passionately, devotedly,

hopelessly

INTRODUCTION AND WHAT'S NEW

Scope of this book

There are three themes to this book:
(1) Taxation of foreign domiciliaries
(2) Taxation of non-residents on UK assets
(3) Taxation of UK residents on foreign assets
?To attempt to cover all these topics is ambitious, and this book is in danger of bursting, particularly because foreign aspects can only sensibly be discussed in a wider context. But one cannot address the first topic without the second and third: in taxation, as in life, everything is connected to everything else. Thus what started as a book on foreign domiciliaries has become a book which addresses all aspects of offshore taxation.

The year 2013/14 in review

The chancellor stated in 2011:

> Our tax code has become so complex that it recently overtook India to become the longest in the world".[1]

Parliament has subsequently added:
FA 2011: 403 pages
FA 2012: 703 pages (a record),
FA 2013: 648 pages.
FA 2014: 663 pages

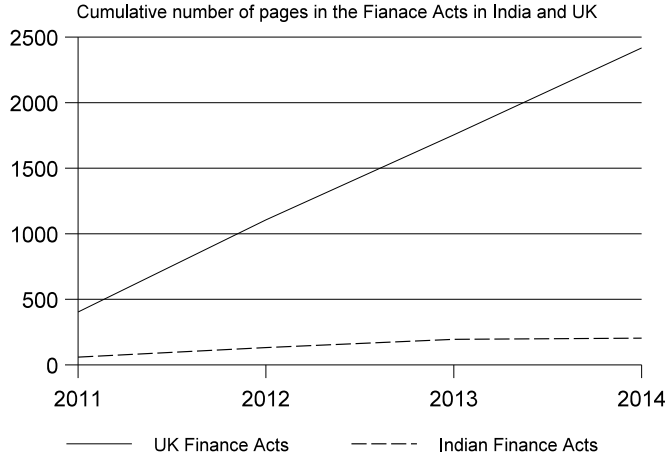
Set against that, the Office of Tax Simplification has achieved little, and it seems unrealistic to hope for much.[2]

---

1 Budget speech 2011. It is hard to empirically assess a claim that the UK has the longest tax code in the world, but there seem to be no other serious contenders for that title.

2 "[The OTS] cannot be an effective solution to the problem of over-complication without the Treasury allowing it a far more fundamental role." Ussher and Walford, *National Treasure* (Demos, 2011)

The choice of India as comparator seems strange.[3] Four years of Indian Finance Acts together are shorter than any single UK finance act since 1999.[4] The graph speaks for itself:



It is easier to *talk* of simplification. Budget 2014 used the word simplification 23 times; even including a reference to simplifying

---

http://www.demos.co.uk/files/National_treasure_-_web.pdf?1299511925.
In (I think) 2013 the government came up with the slogan "Creating a simpler, fairer tax system" under which the OTS now operates; which imagines away a troubling reality in which simplicity and fairness are competing values which require hard choices.
https://www.gov.uk/government/policies/creating-a-simpler-fairer-tax-system

3 The comparison seems to originate from CIOT, "The Making of Tax Law" (2010) para 3.3, *http://old.tax.org.uk/ciot_media/themakingoftaxlaw.pdf*.

4 Finance Act page counts are a rough proxy for the ever growing complexity of the UK tax system, but not an altogether bad one. A better proxy would also consider secondary legislation and HMRC guidance; and, perhaps, case law; then the page count involved would far exceed the Finance Act numbers set out here.
The Office of Tax Simplification have published two (somewhat simplistic) discussions of complexity in tax legislation:
Length of Tax Legislation as a Measure of Complexity (Apr 2012)
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/193496/ots_length_legislation_paper.pdf
The Office of Tax Simplification Complexity Index (2012)
http://www.gov.uk/government/uploads/system/uploads/attachment_data/file/193493/ots_complexity_index_methodology_paper.pdf

partnership taxation;[5] those who have wrestled with the FA 2014 partnership provisions may smile, grimly.

The process of understanding the FA 2013 has only just begun its course. I stated in the introduction to this book last year:

> The FA 2013 contains the most significant set of changes in taxation since the introduction of CGT in 1965. It will take several years to work out the implications of these changes, except for the GAAR, which will take several decades.

The FA 2014 continues this trend, with many important changes, including some controversial steps back from the rule of law in relation to taxation. But apart from the provisions on remittances from dual employments, there is not much which directly concern the themes of this book.

The Courts have decided many interesting cases. *Mehjoo v Harben Barker* rolled back the boundary of tax negligence. *Ardmore v HMRC,* when final, will resolve the test for the source of interest.

Thanks ...

I am very grateful to my colleagues Robert Venables QC and Stephen Brandon QC for discussions on many aspects of tax. I owe a great debt to Jane Hunt and Ruth Shaw who work patiently on this intractable book throughout the year, and to Edward Chin who undertook the daunting role of copy-editor.

... and request for help

Comments from readers would be of the greatest value and interest to the author.

The pleasure in writing this book consists in the interest of the questions which it raises and the success which it may have achieved in answering them. It seeks to state the law as at 20 July 2014.

James Kessler QC
15 Old Square *kessler@kessler.co.uk*
Lincoln's Inn WC2A 3UE *http://www.kessler.co.uk*

---

5 Budget 2014 para 1.123: "The government's aim is that the tax system is simple to understand and easy to comply with. ... the government will ... simplify the taxation of employee benefits and expenses, employee share schemes and partnerships."

OBTAINING FURTHER ADVICE - AND DISCLAIMER

Further advice

If you want advice on which you are legally entitled to rely you can obtain it - but not from this work.

In particular, you may instruct the author to advise. I enjoy writing, but spend most of my time giving independent specialist professional advice in private client matters especially areas covered in this work. For further details see *http://www.kessler.co.uk.*

TFD Online

TFD Online is an online version of this book and more. It can be used:
(1) to search the text of this book or to access it online.
(2) to see if the book has been updated
(3) to correct or contribute to the book

TFD Online is a free service to individuals and firms who have purchased the current edition of this work. It is moderated by Amanda Hardy, a member of Tax Chambers, 15 Old Square, Lincoln's Inn.

TFD Online is accessible on *http://www.foreigndomiciliaries.co.uk.* The authorisation code is in the inside cover of this volume, and is valid until publication of the next edition.

Disclaimer

It is a sign of the times that the CIOT issue *professional guidance* with a disclaimer:

> While every care has been taken in the preparation of this guidance the CIOT ... do not accept any responsibility for any loss occasioned by reliance on this guidance.[1]

---

1 CIOT, *Professional Conduct in Relation to Taxation* (2014), para 1.10 *http://www.tax.org.uk/Resources/CIOT/Documents/2014/02/Professional%20Conduct%20in%20Relation%20to%20Taxation%20190214%20final.pdf*

Similarly, the views contained in this book are put forward for consideration only and are not to be relied upon. Neither the author nor the publisher accept any responsibility for any loss to any person arising as a result of any action taken or refrained from in reliance of this work.

A note to the lay reader

This book is not intended as a self-help guide, and is addressed to tax practitioners, but it is readable for a lay person. Initiation in these matters must often be by the taxpayer. If you wish to research this subject in depth, and so take more control of your own tax affairs, read on. But for implementation you will need to find professionals to advise you. Self-help guides extol "the benefit of bypassing expensive lawyers"; but the bypass may prove the more expensive route in the long run.

Edition history

1st Edition 2001	5th Edition 2006	9th edition 2010
2nd Edition 2003	6th edition 2007	10th edition 2011
3rd Edition 2004	7th edition 2008	11th edition 2012
4th Edition 2005	8th edition 2009	12th edition 2013

This book was called *Taxation of Foreign Domiciliaries* for the first nine editions; it changed to *Taxation of Non-residents & Foreign Domiciliaries* in the 10th edition.

CHAPTER ONE

FOREIGN DOMICILE: TAX POLICY AND REFORMS

1.1 Introduction

The topics of this chapter are:

(1) The policy arguments for and against a lighter tax regime for foreign domiciliaries (or some similar class of footloose individuals)[1]
(2) A history of foreign domicile tax reforms
(3) An assessment of the domicile reforms of the FA 2008
(4) The state of UK tax reform, and prospects for the future

1.2 Tax competition arguments

All UK residents have a choice where to reside, but foreign domiciled individuals are in general less securely attached to the UK. Tax competition arguments claim that if their tax burden was as great as that of a UK domiciliary, fewer would choose to live in the UK, and overall the UK economy would lose:

(1) directly, from tax paid by the foreign domiciliaries (including VAT); and
(2) indirectly, from investment and expenditure in the UK which is more likely to be made by UK residents.[2]

Similarly, UK firms competing in the global market for talent and expertise

---

1 For discussion on policy issues, see STEP, "Residence and Domicile: Response to Background Paper"(2003); CIOT, "Reviewing the Residence and Domicile Rules" (2003); CIOT, "PBRN18 (Residence & Domicile Review)" (2007); all accessible *http://www.kessler.co.uk/tfd-archive*.

2 Except to the extent that tax makes investment by UK resident foreign domiciliaries difficult, which has been the case since 2008: see 12.24 (Remittance investment relief: commentary).

will find recruitment easier if the tax regime for foreign employees is lighter. Some potential employees would not choose, or could not afford, to come if the UK tried to tax them as it does its own domiciliaries.

In a nutshell: the argument is that UK benefits from foreign domiciliary reliefs.

1.2.1 *Assessing the strength of foreign tax competition*

Tax competition raises three distinct issues:
(1) To assess the existence and strength of international tax competition
(2) What the UK tax system should do in the light of tax competition
(3) What international agreements might do to regulate tax competition
The first question is essentially one of fact; the second is a question of domestic politics. The third is a matter of international politics.

In principle there are many low-tax or preferential tax regimes where wealthy individuals may choose to reside.[3] Switzerland, for instance, has a lump sum taxation regime for non-Swiss citizens specifically targeted for this purpose.[4]

In assessing the existence and strength of international tax competition several points must be borne in mind.

Effective low tax may be achieved in other countries by relaxing legal provisions at administrative level, in a non-transparent way.

One paragraph summaries of other countries tax systems are bound to be misleading.

The terms of statutory tax law are only one aspect of tax competition. Compliance costs are important. The quality of tax administration is important. An OECD study lists six desiderata: a developed legal system, confidentiality, impartiality, proportionality, responsiveness [I am not sure what is meant by that] and competence. They add:

> Frequent changes in legislation, particularly where there has been an

---

3 An OECD study "Engaging with High Net Worth Individuals on Tax Compliance" para 34 (May 2009) singles out Ireland, France, the Netherlands and the UK for what it terms "preferential regimes for specifically defined groups of taxpayers"; see *http://www.oecd.org/document/5/0,3746,en_2649_33749_42902277_1_1_1_1,00.html*

4 Though this is politically controversial; it was abolished in Zurich in 2010 and some other cantons have followed suit. The debate is similar to that in the UK: see Pulfer and Sigg, "The Swiss lump-sum taxation regime: a natural evolution" [2013] JITTCP 215.

> absence of consultation, can have an adverse impact on the taxpayers and their advisers trust in the tax system.[5]

But there are others: can a tax authority subject an individual to an expensive and intrusive tax investigation without any evidence to justify doing so? Certainty is very important.[6] Perception matters as much as reality. Rates of tax on UK earned income may matter more than the rules for foreign domiciliaries. By many of these measures, the UK scores poorly.[7]

---

5 "Engaging with High Net Worth Individuals on Tax Compliance" (May 2009) para 208 and 243; see *http://www.oecd.org/document/5/0,3746,en_2649_33749_42902277_1_1_1_1,00.html*.

6 See 2.6 (The rule of law).

7 Not just in foreign domicile taxation. See, for instance, KPMG, *Taxation & the Competitiveness of UK Funds* (2006):

> "For all fund types, the UK tax regime is viewed less favourably than those of Ireland and Luxembourg ...The negative perception of the UK tax regime is driven more by uncertainty than by any specific factor. ...A key feature of [structured] products is that promoters must be as certain as possible of the tax analysis for investors over a period of five years and more, and hence the uncertainty of the UK regime in this area makes the UK an unsuitable domicile location. Accordingly, most firms look immediately overseas when establishing these products. ... The most common concern with the UK tax regime is not a specific tax measure that can be fixed by a change in legislation. Rather, it is the overall management of the UK tax regime, characterised by the pace of change and the style of consultation... The majority of participants made strong calls for certainty and stability, regarding the lack of these as a key adverse factor of the UK tax regime. ...The lack of constructive consultation has led to an increasing number of surprising changes to the regulations and a number of proposed changes that were reversed after further prolonged consultation. ... Comments on derivatives caused uncertainty by questioning the appropriateness of an accounts based regime that was introduced just two years before, and the suggestion that QIS would not benefit from the established regime for authorised funds, significantly slowed development of UK based QIS. As one participant commented: 'By this stage Ireland and Guernsey were laughing.' ...There is also a view among participants that HMRC is focused on targeting avoidance rather than creating an environment to support industry development and growth. ...
>
> "The UK tax system undergoes constant change, or threat thereof, which results in ongoing uncertainty as to the tax treatment of funds and investors on assets totalling many billions. The UK Revenue can overturn arrangements without consultation albeit of very many years standing and is not seen to be working with the industry for the benefit of UK Plc, quite the reverse. This approach is very much at odds with that in other territories."

1.2.2 *Attitudes to tax competition arguments*

The debate about international tax competition is long standing and is not restricted to foreign domicile taxation.[8]

Most though not all commentators would accept that tax competition is an important factor in framing UK taxation.

Tax competition offers advantages to countries which compete successfully and disadvantages to those who do not. In many cases Government have accepted the challenge of competition, and sometimes with enthusiasm:

> The [investment manager] exemption enables non-residents to appoint UK-based investment managers without the risk of UK taxation and is one of the key components of the UK's continuing attraction for investment managers.[9]

---

8 See the evidence of Lord Vestey to the 1920 Royal Commission, accessible *http://www.kessler.co.uk/tfd-archive*.

9 SP 1/01; see 44.1 (Investment manager exemptions: Introduction) .
Another example is the IHT exemption for OEICs and AUTs; see 62.3 (Non-settled property: authorised unit trusts and OEICs). Press Release 16 October 2002 (OEICs and AUTs) para 6 provides:

> "Overseas investors are in theory liable to inheritance tax on their OEIC and AUT holdings, because they are regarded as being situated in the UK for tax purposes on the investors' death. Competing centres do not charge tax in parallel circumstances. Removing the potential inheritance tax charge will help UK managers compete on an equal footing with overseas fund providers."

The text continues (inaccurately):

> "This very rarely generates any significant yield, because UK assets still have to exceed the inheritance tax threshold ... before any tax is due. But it is a deterrent in marketing terms".

I suspect that the true reason that the old IHT rule raised little IHT was rather different, namely that no-one (if properly advised and wishing to comply with UK tax rules) would invest more than the IHT threshold in AUTs or OEICs. Undetectable non-compliance must also be reckoned with. But that does not affect the point made here.

Another example:

> "The location of ownership, flagging (registration) and management activities is very 'footloose', since it can easily be transferred from one country to another. This makes it vital to have regard to the fiscal regimes in other countries if we want to maintain a successful shipping industry in the UK. The modern armoury in the battle for success invariably includes a virtually tax-exempt fiscal regime." (Independent Enquiry into a Tonnage Tax, Lord Alexander, HM Treasury 1999.)

Another example is the exemptions for major sports events. The first (as far as I

The present coalition government seems well aware of the point, at least in relation to companies:

> In recent years too many businesses have left the UK amid concerns over tax competitiveness. It's time to reverse this trend.[10]

Similarly the budgets 2011 and 2012 stated the Government's aim to create:

> the most competitive tax system in the G20.[11]

Those opposed to the consequences of this line of argument describe it as a "race to the bottom"[12] and it is correct that tax competition should logically drive tax rates on mobile sources of income to zero - at least if it were the only consideration in forming tax policy, which of course it is not. But most sober commentators recognise that the UK could not act alone, as if there were no such thing as international tax competition.[13] The expression "harmful tax competition" conceals awkward questions about harmful to whom? The focus is often on harm to the G7 countries.[14]

---

know) was s.68 FA 2006 (Olympic Games 2012) but now this has become standard: sch 20 FA 2010 (Champions League 2011); s.13 FA 2012 (Champions League 2013); ss.8, 9 FA 2013 (London anniversary games and Commonwealth games). These events would not be held in the UK in the absence of tax exemption.

10 HM Treasury, "Corporate Tax Reform: delivering a more competitive system", November 2010.

11 The phrase occurs seven times in Budget 2011: it was described as an "ambition"; presumably the word "intention" was thought too strong. The claim is made nine times in Budget 2012 and five times in Budget 2013. *http://webarchive.nationalarchives.gov.uk/20130129110402/http:/cdn.hm-treasury.gov.uk/2011budget_complete.pdf*

12 This metaphor goes back at least to the OECD *Harmful Competition* (1998) *http://www.oecd.org/tax/transparency/44430243.pdf*

13 However at the extreme even this is denied; eg "Tackle Tax Avoidance" a campaign of Progress (which describes itself as a New Labour pressure group):

> "There is real fear at the heart of government that if it gets tough on business, businesses will flee the UK. But as the chief executive of Google, Eric Schmidt, himself admitted in an interview: 'Google will continue to invest in the UK no matter what you guys do because the UK is just too important for us.'

http://www.progressonline.org.uk/campaigns/tackle-tax-avoidance/articles/ (accessed October 2013).

14 See Littlewood, "Tax Competition: Harmful to Whom?" in Asif Qureshi and Xuan Gao, eds, Critical Concepts in Law: International Economic Law, Routledge, London (2010) volume VI, 162-234; reprinted from (2004) 26 Michigan Journal of

Devolution raises the possibility of tax competition within the UK. So far, debate has focused on the possibility that Scotland and Northern Ireland may have a lower corporation tax rate than England:

> a lower headline rate of corporation tax could encourage greater investment by Scottish and UK firms in both physical and human capital and in research and development within Scotland.
> At the same time, it could make the country more attractive as a location for multi-national investment. It could also act as an important signal to global companies and investors as to Scotland's ambition to be a location for competitive business.[15]

Perhaps at some point it may occur to politicians and commentators that similar arguments apply to taxation of individuals.

Unfortunately, it is always hard to predict what will be the overall economic effect of any reform, and predictions tend to reflect the views and wishes of those who make them.[16] Ascertaining the effect of reforms

---

International Law 411-487 accessible *http://www.law.auckland.ac.nz/webdav/site/law/shared/about/our%20staff/academic%20staff/files/Michael%20Littlewood/Tax%20competition.pdf*
Avi-Yonah "Globalization, Tax Competition, and the Fiscal Crisis of the Welfare State" [2000] Harvard Law Review p.1573.

15 See "Corporation Tax: Discussion Paper Options for Reform" (August 2011), accessible *http://www.scotland.gov.uk/Resource/Doc/919/0120786.pdf*
"Devolution of tax powers to the Scottish Parliament - Commons Library Standard Note" (Published February 2012, Amended 17 July 2013) *http://www.parliament.uk/briefing-papers/SN05984*
The consultation paper does not consider the possibility that England might match the Scottish lower rate and does not address the question of what constitutes a Scottish company for the purpose of the lower rate.
Likewise in Northern Ireland: HM Treasury, "Rebalancing the Northern Ireland economy" (March 2011) accessible *http://www.hm-treasury.gov.uk/d/rebalancing_the_northern_ireland_economy_consultation.pdf.*
Wales would also like to join in:
"If Northern Ireland is allowed to cut corporation tax, it would be outrageous if Welsh politicians did not have the option of doing the same"
Gerald Holtham, chair of the Holtham Commission for Wales (Cited in the Scottish consultation paper).
So we may have no shortage of tax competition within the UK.

16 HMRC estimate that a reduction in the rate of Corporation Tax in Scotland to 12.5% would cost £2.6bn, but the Scottish Parliament say the impact will be positive: "Corporation Tax: Discussion Paper Options for Reform" (August 2011) p.43,

after they are made is scarcely less difficult.

1.2.3 *EU law aspects*

The freedom of the UK to enter into tax competition against other countries is subject to certain constraints of EU and international law and politics. International fiscal co-operation in this area at present operates only to a limited extent, but it has made some progress in a (non-binding) EU code of conduct on business taxation.[17]

State Aid rules also impose restrictions on UK's freedom to tax and untax.[18]

The EC has expressed disapproval of the remittance basis:

> The Commission does not advocate remittance base taxation, as it may(?) lead to double non-taxation.[19]

That does not seem to have had any impact on UK domestic politics.

1.2.4 *International tax law reform*

Since tax competition extends beyond the EU, and increasing EU powers in relation to tax is (to say the least) politically controversial, those hoping for a body to curb international tax competition tend to look to the OECD.[20] At present this is focussing on corporate rather than personal taxation.[21]

1.2.5 *"Customers" of HMRC*

In the 2010/11 edition of this work I summarised the tax competition argument thus:

> Where there is tax competition, the term "customer", which HMRC

---

accessible *http://www.scotland.gov.uk/Resource/Doc/919/0120786.pdf*.
The reduction in the UK corporation tax rates in Budget 2012 may partly be motivated by anticipation of Scottish tax competition, though this was tactfully not mentioned.

21 See 2.6.2 (OECD BEPS project).

> have (controversially) applied to taxpayers since 2001[22] is slightly less inapt. UK resident foreign domiciliaries are in principle more free than other taxpayers to take their "custom" elsewhere.

As far as I am aware, no other Revenue department in the world calls its taxpayers "customers" and it is interesting to digress for a moment to consider what the word implies for the taxpayer/Revenue relationship.

It must be taken to suggest that the relationship should be based on the market but what does that entail? A person who regards himself as a customer (as opposed, say, to a "citizen") has no disposition to put public good ahead of private interest, and no moral relationship with their supplier. Customers control producers of commodities only by buying or not buying what they like.

Rowan Williams (Archbishop of Canterbury, 2003-2012) sees the issue in the wider context of the ways in which the language of the market has expanded beyond a market context, and his objections to the terminology are profound:

> The language of customer and provider has wormed its way into practically all areas of our social life, even education and healthcare, and we forget that it is a metaphor when we call a student, a patient or a traveller a "customer". The implication is that the most basic relation between one human being and another or one group and another is that of the carefully calibrated exchange of material resources; the most basic kind of assessment we can make about the actions of another, from the trader to the nurse to the politician, is the evaluation of how much they can increase my liberty to negotiate favourable deals and maximize my resources.[23]

But this is not of course the inference which HMRC intended. Sir Nicholas Montagu (Chairman of the Board of Inland Revenue, 1997-2004) said that the reason for the change was to remind Revenue staff that the needs of the consumer of public services should be considered first.[24] One cannot quarrel with the aspiration, though one might question the extent to

---

22 A press release at the time provided: (14/06/01) "M and C Saatchi, a leading advertising agency, has been appointed by the IR to rebrand the department. Branding and design consultants, Corporate Edge, will also be working with the IR and M and C Saatchi to 'create a customer driven department'."

23 Williams, "Knowing our Limits" in Williams and Elliott (eds), *Crisis and Recovery: Ethics, Economics and Justice* (2010), p.20.

24 See "The Customer is always right" Tax Advisor, February 2003.

which it is achieved, or whether the change of terminology was an effective aid to achieving it.

The change of terminology from taxpayer to "customer" came at a time which has seen a substantial increase in HMRC's powers and in its desire to use them to impose civil and criminal penalties.[25] The reader may speculate whether that is wholly coincidental, but the current enthusiasm for civil penalties and criminal convictions does make the usage seem a strange one.

A certain sense of the ridiculous prevents the parliamentary drafter from using the expression: for instance the SRT consistently uses the term "taxpayer". The terminology will not cease to give rise to derision as long as the current generation of tax practitioners remain in practice[26] and the Tribunal has also been moved to comment:

> I note in passing that all the reports mentioned below refer to HMRC's 'customers'. While this is a regrettable misuse of language by HMRC as it implies people have a choice whether to interact with HMRC and that therefore the payment of taxes is voluntary, nevertheless it is clear that references to 'customers' are meant to be references to taxpayers. Needless to say the payment of taxes is not voluntary despite the

---

25 "The Department expects the new [civil] penalty regime to result in higher penalties as the minimum penalty for deliberate evasion and concealment is 50%. The Department should track the level of penalties imposed to ensure that it is applying the new regime rigorously." House of Commons Committee of Public Accounts, "HM Revenue & Customs: Managing civil tax investigations" (March 2011) *http://www.publications.parliament.uk/pa/cm201011/cmselect/cmpubacc/765/765.pdf.*

"We have recruited an additional 200 criminal investigators to increase the number of people prosecuted for tax evasion from 165 in 2010 to 2011, to 565 in 2012 to 2013, and to 1,165 in 2014 to 2015."

https://www.gov.uk/government/policies/reducing-tax-evasion-and-avoidance The wisdom (and cost/benefit) of the vast increase in prosecutions has never been the subject of public debate.

26 See eg Cameron, "Customer Service?" *Taxation* 10 Apr 2008, p.361: "It never ceases to amaze me that HMRC have adopted the word 'customer' to describe the taxpaying public. A customer is someone who chooses to patronise a business." Andy Wells agrees: "I will never be a 'customer' of HMRC. This disregard for the English language irks just about every tax professional I come across..." *Taxation* 4 June 2009, p.549. Similarly Anthony Thomas (then president of CIOT): "HMRC now refer to taxpayers as customers, but they do not treat them as customers"; "We need Trust", Taxation (2 June 2011) p.7; Truman, "Still Not a Customer" *Taxation* 14 Jun 2012 p.8.

misnomer ....[27]

It is conceivable that the terminology will last until a future generation sees nothing to laugh at in expressions such as *"penalties designed to change customer behaviour"*[28] but I think that unlikely. Perhaps at some point it will be dropped.

1.3 Fairness

The other consideration in the assessment of foreign domicile taxation is fairness.

1.3.1 *What is fairness?*

The starting point for any serious discussion of fairness in tax is economists terminology:

(1) **"horizontal equity"**, the view that people who are relevantly equal should pay the same amount of tax.

(2) **"vertical equity"**, the view that people who are relevantly different should pay different amounts of tax, which leads to the (more or less) accepted view that fair taxation should be progressive rather than regressive.

Economists have developed these concepts with considerable sophistication[29] but their limitations are exposed when one tries to apply them in a real life context, such as an assessment of the fairness of the taxation of foreign domiciliaries. The concept of horizontal equity is not so much a definition of fairness as an approach to identifying the issues. In deciding whether one group (foreign domiciliaries, say) is fairly taxed,

28 *http://www.hmrc.gov.uk/e-learning/New_Penalties_Awareness/Inaccuracy_Pen_ext/HTML/Inaccuracy_Pen_ext_106.html.* Similarly House of Commons Treasury Committee , "Administration and effectiveness of HMRC" Sixteenth Report of Session 2010–12 at 143: "we question whether a strategy focused around shifting customers' behaviour can truly be described as customer-centric."(!)

29 For a starting point, see Kaplow, "Horizontal Equity: Measures in Search of a Principle" National Tax Journal 42, no. 2 (1989) p.139-55 accessible *http://ntj.tax.org/wwtax/ntjrec.nsf/A4CE18763C5BB9608525686C00686DAC/$FILE/v42n2139.pdf*
Musgrave "Horizontal Equity Once More" National Tax Journal 43, no. 2 (1990) p.113-23 accessible *http://ntj.tax.org/wwtax/ntjrec.nsf/0/a42168feab9541ff8525686c00686dca/$FILE/v43n2113.pdf*

one needs to identify another group by way of comparison (UK domiciliaries, say) and ask if they are relevantly equal.

1.3.2 *Is a distinction between UK and foreign domiciliaries fair?*

In the author's view, domicile is in general a useful and practical measure of UK linkage, and to regard UK and foreign domiciled residents as completely equivalent is facile. Or put the other way, foreign domicile does constitute a significantly weaker UK link than UK domicile. Accordingly conferring a lighter UK tax regime on foreign domiciliaries, such as a remittance basis, is indeed fair. This is especially so bearing in mind that:

(1) Mere residence does not require a very close connection to the UK, though the SRT has mitigated the worst excesses of the common law residence test.
(2) A foreign domiciliary may not have had a fair opportunity to arrange their affairs with UK tax in mind; for instance creating settlements from which they were excluded.
(3) Another consideration is the impracticality (both for taxpayers and HMRC) of untangling ownership of assets, especially in family ownership arrangements which are common in third world countries.

This view is not universally held. Some maintain that any distinction (for IT or CGT) between UK residents based on domicile is unfair. The two are relevantly equal. It is difficult to see how the dispute between the rival views can be judged, or what either side could do or say to convince the other. The concept of fairness is insufficiently precise to resolve the dispute. One might say that it comes down to a matter of impression, or politics; which is to say the same thing.

Those who advocate this view most strongly are not tax practitioners, and I think would be surprised to find how little is required to be UK resident: their views are based on a paradigm of a foreign domiciliary who is a very long-term UK resident. Thus in Ireland, which has similar rules, a Commission on Taxation report argued:

> Equity requires that taxpayers who are in a comparable situation should be afforded the same treatment for tax purposes. Making a distinction between individuals based on their domicile results in a situation where taxpayers who are otherwise in a comparable situation are treated for tax purposes in different ways. This is inequitable. Thus, for example, an individual who, although domiciled outside of Ireland, is a *permanent resident* should be treated the same as any other resident taxpayer. The

> special treatment afforded to individuals who are resident, but not domiciled, in Ireland whereby they are only taxable in Ireland on foreign source income and capital gains to the extent that the income and gains are remitted to Ireland is inequitable and should be discontinued.[30]

To repeal the remittance basis in order to tax "permanent residents" (however that expression is defined) is to throw out the baby with the bathwater.

It has to be said that in political debate, depth of analysis is not to be expected; assessment of fairness is visceral, and sensitive ears might sometimes detect elements of class or wealth hostility and xenophobia.

1.3.3 *Is a remittance basis fair?*

Even if it is accepted that it is fair to tax foreign domiciliaries less than UK domiciliaries, the question of what constitutes a fair reduction is a separate issue. The 2008 reforms accepted the principle of a distinction (which is why they did not go far enough for some commentators) but significantly reduced the extent of the tax reduction by making the remittance basis less attractive.

The remittance basis of taxation is a form of qualified non-taxation. In assessing its fairness it is relevant to compare different groups of foreign domiciliaries:

(1) *Short-term residents* who are:
   (a) wealthy individuals, who can elect for the remittance basis and are able to retain (or spend) significant foreign income/gains abroad, and
   (b) less wealthy individuals for whom the remittance basis offers little or no benefit since they have no foreign income/gains, or cannot afford to retain (or spend) much foreign income/gains abroad.

(2) *Long-term residents*
   (a) ultra-wealthy individuals, who can elect for the remittance basis and are able to retain significant foreign income/gains abroad, and
   (b) less wealthy individuals for whom the remittance basis does not justify the remittance basis charge.

The effective rate of tax under the remittance basis approximately declines

30 [Ireland] Commission on Taxation Report (2009) para 6.2.2 accessible *http://www.commissionontaxation.ie/downloads/Commission%20on%20Taxation%20Report%202009.pdf*

with income and it can be described as regressive taxation. If one accepts that taxation ought in principle to be progressive, which has been a broad feature of UK taxation, then there is the basis for an argument that the remittance basis is unfair.

What effect have the 2008 reforms had in this area? So far as they have decreased the attractiveness of the remittance basis by withdrawal of personal reliefs as a cost of the remittance basis they have decreased the unfairness.

So far as they have introduced the remittance basis claim charge, the reforms have targeted the benefit of the remittance basis at a small number of ultra-wealthy individuals. That may make sense under the tax competition argument, but from a fairness point of view it is difficult to justify.

1.4 Suitability of domicile as a fiscal test

The domicile concept is not ideally framed to identify the "footloose" individuals, whose UK links are sufficiently less that a lighter tax regime is appropriate on fairness or tax competition arguments. The adhesive quality of a domicile of origin, and the restrictive rules for the acquisition of a domicile of choice, allow some fortunate individuals to enjoy foreign domicile tax treatment, despite very close UK links and only tenuous, historical and fortuitous links to their domicile of origin. To the extent that they do so the current tax system fails both on economic and fairness criteria.

In considering this objection to domicile, however, one should bear in mind that no perfect criteria exists: the question is not whether domicile always produces the right answer, but whether one can do significantly better with other concepts or refinements.

Other concepts are sometimes used:

(1) Long term residence, of which UK tax uses a variety of tests:
   (a) IHT deemed domicile rule: 17 years residence
   (b) Remittance basis claim charge: 7 and 12 years residence
   (c) Temporary non-residence: 4 years residence and 5 years absence
   (d) Arriver/leaver rules for residence & OWR: 3 years residence
(2) Citizenship (not much used in UK domestic tax law but used in the OECD model treaty and some IHT DTAs).

These are all alternative ways to make the distinction between UK residents with strong and weaker UK links; whether they would serve better than a domicile test is very doubtful.

It is suggested that domicile is the best that can be done, subject to one refinement: those born in the UK *and* deemed domiciled here on IHT principles (17 years residence) may reasonably be treated as UK domiciled for all tax purposes, not just for IHT, even if they have not acquired a domicile of choice in the UK.

1.5 Approaches to reform of foreign domiciliary taxation

It is helpful to distinguish different ways of altering the tax system for foreign domiciliaries:

(1) Alter the definition of domicile for general purposes and so alter the class who qualify for foreign domicile tax treatment. Of course this would have ramifications beyond tax. Those proposing reforms of this kind are not usually motivated by tax – though those objecting to them may be.[31]
(2) Alter the definition of foreign domicile for some or all tax purposes.
(3) Alter tax laws applying to all foreign domiciliaries.
(4) Identify subclasses of foreign domiciliaries with close UK links so as to tax them more heavily than foreign domiciliaries with less close UK links.

One can of course achieve the same end result by more than one technique. There is a lot to be said for approach (4) both on economic and fairness grounds.

1.6 History of reform of foreign domicile taxation[32]

The chequered history reflects the difficulty, or impossibility, of reconciling incompatible policy considerations.

1.6.1 *1974-2002*

The 1974 Finance Bill included a provision (clause 18) that an individual ordinarily resident in the UK for five out of the preceding six years of assessment should be deemed UK domiciled for IT and CGT purposes. This was withdrawn from the Bill.[33]

---

31 See 3.5.4 (Proof of intention).

32 See too 10.4 (History of the remittance basis).

33 For an account of the lobbying behind this, see Barnett, *Inside The Treasury* (1982) p.28–9.

The 1988 Consultative Document (Residence in the UK) made radical proposals. The remittance basis would be abolished. Those resident here for less than seven out of 14 years (and, perhaps, who are also not UK domiciled) would qualify for a new "intermediate basis" of taxation. This would require disclosure of worldwide income in order to tax it at an effective rate of 2% or less. This proposal was abandoned.

In the first edition of this work (2001) I said:

> It seems more likely than not that, apart from tinkering changes, the present regime will continue for the foreseeable future. But the major distinguishing feature of the British tax system is its instability.[34] ... If what has been a backwater acquires political prominence, perhaps due to no more than a campaign by a single newspaper, there will certainly be major changes.

1.6.2 *2003 background paper on residence and domicile*

In 2002 a newspaper campaign emerged[35] which pressed the Blair Government into action, or at least into the appearance of action. The Budget of April 2003 delivered a "background paper" called "Reviewing the residence and domicile rules as they affect the taxation of individuals".[36] This was a facile document[37] but it may be unfair to criticise its (unnamed) authors. Their instructions may have been to be uncontroversial; by saying nothing, there was nothing in the document to which anyone could object.

Nothing then happened from 2003 to 2008 except an often repeated statement that:

---

34 See 1.8 (The promise# of stability).

35 See for instance, *The Sunday Times*, 1 March 2002; *The Guardian*, 11 and 12 April 2002.

36 *http://webarchive.nationalarchives.gov.uk/20091222074811/http://www.hmrc.gov.uk/budget2003/residence_domicile.pdf*

37 It contained an outline of the law (a rehash of IR20) and one paragraph summaries of the law of 29 other countries (of insufficient detail to be of any use and generally said to be misleading). The paper did not consider any proposals or their possible impact. It (consciously?) ignored every earlier discussion of reform: the Royal Commissions of 1920 and 1955, the 1936 Codification Committee, the 1974 Finance Bill, the 1987 Law Commission Report and the 1988 Consultation Paper.
For an account of the decline in quality of Government white and green papers, see Forster, *British Government in Crisis* (2005), p.134.

> The review of the residence and domicile rules ... is ongoing.[38]

It is clear that the review of foreign domicile tax did not follow the normal course of consultation, decision and implementation. In the absence of a frank explanation of what went on, it is tempting to speculate. The likely explanation is that the Blair Government wanted to do nothing, but prevaricated to avoid an announcement which would have lead to a furore from those in favour of reform.[39] Blair resigned in June 2007. A change of power led to an unannounced U-turn from that unannounced policy.

1.7 2008 reforms: assessment

The 2003 background paper on domicile recited the principle that taxation of foreign domiciliaries:

> [1] should be fair;
> [2] should support the competitiveness of the UK economy; and
> [3] should be clear and easy to operate.[40]

It is naive to recite these principles without noting (as Adam Smith did) that they are to a substantial extent irreconcilable. But subject to that qualification, these are the criteria by which the 2008 reforms, or any tax reforms, are to be assessed.

The 2008 reforms increased the tax burden on foreign domiciliaries in four main ways:

(1) The remittance basis claim charge for long-term residents
(2) The withdrawal of personal allowances for remittance basis claimants
(3) The ITA remittance basis, stricter than before

---

38 The history is set out in the 9th edition of this work para 1.3.2. The last outing of (by then extremely tired) statement was Hansard 12 July 2007 Col 1605 by which time almost no-one believed it, but by then it was possibly true.

39 See Oborne, *The Rise of Political Lying* (2005).

40 The paper might have cited Adam Smith *The Wealth of Nations* (1776) Book 5 chapter 2, accessible *http://www.bibliomania.com/2/1/65/112/frameset.html*
In Scotland, Adam Smith is more highly regarded: "As with the entire approach the Government takes ... on taxation, these proposals are firmly founded on principles, Scottish (?) principles, that have stood the test of time. Adam Smith in 1776 in his "Inquiry into the nature and causes of the Wealth of Nations", set out four maxims with regard to taxes; the burden proportionate to the ability to pay, certainty, convenience and efficiency of collection." See Swinney, (Finance Secretary) "The Scottish Government's Approach to Taxation" (2012) *http://www.scotland.gov.uk/News/Speeches/taxation07062012*

(4) The extension of anti-avoidance provisions to remittance basis taxpayers (in particular, the s.720, s.13 and s.87 remittance bases, and the AIP remittance basis)

1.7.1 *Clear and easy to operate*

It will be evident to anyone who skims this book that by this criteria the 2008 rules are a failure. The rules are unclear, often difficult and sometimes impossible to operate. In these respects they are unquestionably worse than the pre-2008 rules.

Government policy normally requires an impact assessment.[41] None was carried out in relation to any of the 2008 reforms. Many features of the reforms could not have survived if it had been.

1.7.2 *Competitiveness of the UK economy*

On one side of the account is the gain of more tax paid by foreign domiciliaries. On the other is:

(1) Tax and investment lost from individuals who leave the UK, and those who (because of the reforms) decide not to come.

(2) The loss to the economy that the 2008 rules in many cases discourage or prevent investment in the UK and prevent use of UK services.

In the 2008/09 edition of this work my initial assessment was as follows:

> Overall it seems to me implausible that the reforms will make a positive contribution to the UK economy. One can test the matter this way. If a wealthy individual, a beneficiary of offshore trusts created by himself or his family, asked for advice on the desirability of choosing the UK as a residence, what would one say? Even now the individual could still do worse; and if enough advance planning and restructuring is possible, the problems may be ameliorated, at an administrative cost. Thus tax may still not prevent an individual from coming to the UK if he wants to sufficiently. Also, the old cliché about the tax tail and the commercial dog still holds good. But all this is a far cry from the pre-2008 position, where one would simply respond that the UK was clearly a desirable place to reside.

This view is now supported by a number of informal surveys (though these may be lacking in rigour and methodology).

A KPMG survey found that as a result of the 2008 changes, 24% of foreign domiciliaries were planning to leave the UK within two years, with

---

41 *http://www.berr.gov.uk/files/file44544.pdf*

an additional 24% hoping that the rules will be changed and looking to review their position in the medium term. More than nine out of ten said that the changes had damaged the UK's competitiveness.[42]

A Knight Frank survey found that up to 7% of foreign domiciliaries left UK in the months following the tax announcements and a further 31% were planning or actively considering departure.[43]

Stonehage research suggests that the changes will produce an initial tax gain diminishing to a tax loss beginning from a date between 2014 and 2018.[44]

My own anecdotal experience - consistent with the above - is of a number of individuals who decide - I think wisely - not to come to the UK because of the uncertainties relating to taxation.

It is of course difficult if not impossible to disentangle the 2008 reforms from other disincentives to coming to the UK, such as the increase in income tax rates to 45%, the uncertainties caused by the transfer of asset abroad changes in 2005, and corporation tax changes.

Corporate departures from the UK have been widely publicised; they include WPP, Shire, Regus, Henderson, Charter, Beazley, Brit Insurance, UBM, Shore Capital, Informa and Aureos Capital. Individual departures from the UK are not readily identifiable, and losses from those who decide not to come are almost totally unmeasurable.

HMRC offer the following statistics:[45]

	Non-doms	**Tax paid**		**Remittance basis charge**	
	Total no	*total £billion*	*average per person*	*no. paying*	*total receipt*
2004-05	110,000	3.3	£30,000		
2005-06	111,000	4	£36,036		
2006-07	117,000	5	£42,735		
2007-08	140,000	6.9	£49,286		
2008-09	123,000	5.61	£47,967	5400	£162m

42 March 2009, accessible *http://www.kpmg.co.uk/news/docs/NomDoms_FinanceAct2008_Access3.pdf*

43 *http://www.knightfrank.com* Press Release, 20 June 2009.

44 "Non Doms and the UK Economy", March 2010, accessible *http://www.stonehage.com*.

45 Hansard 14 Feb 2011 Column 556W *http://www.publications.parliament.uk/pa/cm201011/cmhansrd/cm110214/text/110214w0002.htm*; Data from 2008-2013 are from private correspondence; these figures may be subject to revision for later tax years.

2009-10	120,300	6.29	£52,286
2010-11	113,700	6.41	£56,376
2011-12	111,700	6.44	£57,645
2012-13	110,700	6.33	£57,181

The figures are interesting but it is impossible to draw any conclusions which relate to UK resident foreign domiciliaries.

In relation to the number of foreign domiciliaries, HMRC say:

> The number of individuals who filed a self-assessment (SA) tax return and indicated that they were non-domiciled. The figures include both individuals who were UK resident and individuals who were not UK resident.

Including non-residents in the figures is alone sufficient to make the statistics useless for the purpose of assessing the taxation of UK resident foreign domiciliaries. For good measure:

> Individuals who complete a SA return are only required to indicate that they are non-domiciled if this affects their tax liability. Therefore the actual number of non-domiciled individuals who complete a return will be greater than the number who indicate their non-domicile status on their SA return.

In relation to the tax paid, HMRC say:

> Figures are not available for the total amount of UK tax paid by non domiciled individuals. However, it is possible to calculate the total amount of UK income tax and CGT paid by individuals who completed an SA return and indicated that they were non-domiciled. These amounts for the past five tax years were as [specified in the table above]. Several taxes are not accounted for via the SA system and some non-domiciled individuals are not required to complete an SA return at all.

1.7.3 *Fairness of 2008 reforms*

The FA 2008 contained a wide ranging package of reforms and any short assessment of its fairness must necessarily be limited to its main features.

The remittance basis claim charge distinguishes between short term and long-term residents, and taxes the latter more heavily, the connecting factor here being the long term residence tests. One cannot categorise those distinctions as unfair.

On the other hand, among long-term foreign domiciliaries, the charge distinguishes between the extremely wealthy (to whom the remittance basis

is still attractive) and others (to whom it is not). This offends against the principle of vertical equity, which suggests that people with higher incomes should pay more tax. That is not fair, it represents a decision to prioritise the economic advantage of tax competition by targeting the remittance basis to the wealthiest. The tax competition consideration conflicts with fairness.

The withdrawal of personal allowances as a quid pro quo of a remittance basis is not unfair (though it comes at a cost in terms of complexity).

Of perhaps greater importance is the other aspects of a package of reforms which affect all foreign domiciliaries, not just long-term residents.

The stricter ITA remittance basis is not unfair, except for the wilder reaches of the relevant person definition[46] and the supposed rule (probably ignored in practice) that the taxable amount remitted may exceed the value of the asset remitted.[47]

The extended 2008 anti-avoidance rules can work unfairly but complete fairness is impossible to achieve in this area.

The transitional rules are another matter. The rules are retroactive in that their impact on individuals depends on income and gains arising before 2008, and unfair in that they impose tax on those income/gains in a manner that no-one before 2008 would have anticipated. These rules were unquestionably unfair. The significance of the transitional rules will fade over time.

All in all, the 2008 reform may be given some limited marks for fairness. This is not to say that the pre-2008 rules should be regarded as unfair: the concept of fairness (especially if viewed through the lense of practicality) is so vague that a very wide range of tax policies may all be categorised as "fair".

Some of the hardest hit are long-term UK resident US citizens, who pay
(1) US tax on a citizenship basis and
(2) substantially greater UK tax liabilities under the 2008 regime.
with only treaty relief to mitigate double taxation, as far as it goes.
That is unfair, but the reason is not that UK unfairly taxes its long-term residents, but that the US (I think, uniquely in the world) imposes US tax on non-resident citizens, so all its non-residents face the burden of double taxation: US tax and tax in their country of residence (subject to limited tax

46 See 11.8.1 (Corporate relevant persons: Commentary) 11.11 (Commentary: let's simplify remittance and relevant person rules).

47 See 11.29.2 (Remittance of derived property).

credit relief).

1.7.4 *Process of implementation*

The manner in which the FA 2008 was introduced deserves to be recorded.

In January 2008, 26 pages of draft clauses were published whose unwritten message to wealthy non-residents was broadly: *do not come to the UK if possible; if you must, do not under any circumstances invest any money here*. The clauses were officially described as work in progress, but this was unfit for publication.

HMRC[48] presumably agreed. On 27 March the Finance Bill was published, containing 54 pages of legislation. The FB clauses bore almost no resemblance to the January draft. One consequence is that the professional time and clients' money spent considering the old clauses was almost entirely wasted. That certainly cost many £millions. Another consequence was that the profession had nine frantic days to scramble around before the end of the tax year. Because of the absence of sensible transitional reliefs, large amounts of tax depended on decisions and actions taken in those days. Sensible consideration of difficult and important matters was rendered impossible.

On the date of publication the Treasury announced that the Finance Bill was incomplete and amendments covering almost every aspect of the rules[49] were made in the course of progress of the Finance Bill.[50] Thirty pages of amendments duly emerged in mid June – far too late in the Finance Bill timetable to give them any serious consideration. Forty eight more Report Stage amendments were published on 26 June. The report stage and third reading (after which no further amendments could be made) were held on 1 and 2 July 2008. John Avery Jones notes that "Report

---

48 In this chapter I use the expression HMRC loosely, to include those in HM Treasury and in Government who share the responsibility for tax reform, as it is not easy, or necessary, to identify where tax reform decisions are actually made.

49 Explanatory notes to Schedule 7, para 36 (mixed funds); para 47 (s.87 charge); para 52 (non-resident trusts); para 74 (Schedule 4C); para 91 (ToA provisions; para 106 (works of art); para 107 (employment related securities).

50 In the 2008/09 edition I said:
"This is a new development in tax legislation. While from time to time inadequately drafted clauses have always been found in Finance Bills, this is as far as I am aware the first time that the Government has had to announce that fact at the time of publication of the Finance Bill."
There are similar examples in the FA 2009 but it has not become a trend.

Stage amendments are usually a disaster."[51]

As a result, the final legislation poses problems which will occupy practitioners and HMRC for many years, but it is also noteworthy that during the first three months of 2008/09 taxpayers could not know what laws governed transactions which they might wish to carry out, or what record keeping would be required of them.

The former editor of *Taxation* is blunt:

> The standard of strategic policy making at the Treasury has been unacceptably poor in recent years, but this must surely have been one of its lowest ebbs ever.[52]

The CIOT say:

> when corners are cut, especially under time pressures, there can be serious deficiencies.

and their example to prove the point is the non-domicile rules in the FA 2008.[53]

The House of Lords Economic Affairs Committee comment in measured language:

> Our private sector witnesses would not have used words like "a real shambles" if they did not feel strongly about this. ...
> 176. We recommend that, if they have not already done so, HMT and HMRC should carry out a full review of the reasons why there were so many difficulties in the development of this policy initiative. They should ensure that the lessons are learned so that these problems do not emerge in other initiatives.
> 177. We also recommend that if another policy initiative gets to the point where the legislation cannot be finalised for inclusion in the Finance Bill, that initiative should not be included in the Bill, or, if feasible, the part which is not finalised should not be included. We cannot support the approach of the Finance Bill's still being subject to much amendment at the time it is published, particularly when the proposals come into effect

51 See "Taxing Foreign Income from Pitt to the Tax Law Rewrite—The Decline of the Remittance Basis", John Avery Jones in *Studies in the History of Tax Law* (Vol 1 2004) accessible *http://www.kessler.co.uk/tfd-archive*.

52 *Taxation* 12 June 2008 Vol 161 No. 4160 p.627 (Malcolm Gunn).

53 The Making of Tax Law, para 3.2, CIOT, June 2010 *http://www.tax.org.uk/resources/CIOT/Documents/2010/09/themakingoftaxlaw.pdf*

> from the beginning of the tax year, as in this case. [54]

No review was carried out.

Does it now matter? Readers may think it pointless to cry "foul" in a game which has no referee, and whose result has now been declared. But I think the story deserves to be recorded as what Lord Howe described as "an object lesson in how not to legislate".[55]

1.8 The promise of stability

There is a long tradition of instability in the UK tax system. In 1981:

> One of the most noticeable characteristics of the British tax system is that it is under continual change.[56]

In 1993:

> The major distinguishing characteristic of the British tax system is its instability. The British tax system changes faster, more frequently, and more radically than any other tax system I have observed.[57]

The development in recent years is a series of promises of stability without any change of practice. In 2008 Alistair Darling (then Chancellor of the Exchequer) said:

> There will be no further changes to this regime [for foreign domiciliaries] for the rest of this Parliament or the next.[58]

No-one seriously believed that.[59] In the 2008/09 edition of this work I said:

---

58 Budget speech *http://webarchive.nationalarchives.gov.uk/20100407010852/http://www.hm-treasury.gov.uk/bud_bud08_speech.htm* *http://webarchive.nationalarchives.gov.uk/20100407010852/http://www.hm-treasury.gov.uk/bud_bud08_speech.htm*

59 The House of Lords Economic Affairs Committee said:

> "227. In his Budget Statement, the Chancellor promised that the rules in this area would not be substantially revised for the rest of this or the next Parliament. We do not take this to mean that there will not be legislation in coming Finance Bills to

> The statement is constitutionally wrong, as Parliament cannot bind its successor. But leaving aside (if one can) constitutional fundamentals, it would be rash to rely on it.

In practice there have been changes (often far reaching) in *every* year since 2008.

The 2011 budget had another promise of stability:

> There will be no other substantive changes to these rules for the remainder of this Parliament.[60]

In the 2011/12 edition of this work I commented:

> The coalition government (correctly) does not promise to bind the next Parliament. The promised period of stability is therefore for three years, from 2012 (assuming the proposed 2012 changes are enacted on schedule)[61] until 2015.

In December 2011 the Government continue to promise and indeed to boast about stability:

> 2.2 ... The commitment to making no further substantive changes for the rest of this Parliament was seen as a clear indication that the Government recognises the importance of providing certainty....
> 2.12 The Chancellor made a commitment at Budget 2011 that there would be no further substantive changes to non-domicile taxation for the rest of this Parliament. ... The Government believes this will provide certainty and stability for non-domiciles.[62]

---

address defects in the current legislation. We think it inevitable that, given the evident pressure under which this legislation was produced, there will be such defects." 2nd Report of Session 2007–08, The Finance Bill 2008 *http://www.publications.parliament.uk/pa/ld200708/ldselect/ldeconaf/117/117i.pdf*. In the Consultation Document "Modernising Powers, Deterrents and Safeguards: Tackling Offshore Tax Evasion" 9 December 2009 para 4.43 HMRC tactfully misquoted the then Chancellor, saying "At Budget 2008, the Chancellor of the Exchequer gave a commitment that there would be no *significant* changes to the *policy underlying* the remittance basis for the lifetime of that Parliament and the next."

60 HMRC "Overview of Tax Legislation and Rates" (23 March 2011) para 3.7.

61 They were not: Ministerial Statement 6 December 2011 [2011] STI 3355.

62 HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (December 2011) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

Budget 2012 broke this commitment with the ATED regime which was not restricted to foreign domiciliaries but will affect them primarily. That might have been an oversight. But Budget 2013 broke the commitment again with changes to the deduction of liabilities for IHT targeted directly at foreign domiciliaries. The rhetoric continued:

> the Chancellor made the point in Budget 2011 that we have no intention of making any further substantive changes to the remittance basis rules for the remainder of this Parliament, and I am happy to reiterate that. We believe that a stable set of rules for non-domiciled individuals will provide certainty and increase the international attractiveness of the UK as a place to live and work.[63]

FA 2014 introduced another substantive change concerning dual contracts.

The promises of stability should be regarded as lip-service to the desideratum of stability. The practice, which lies deep in the culture of government, seems immune to such announcements. A true commitment to stability requires HMRC to refrain from making reforms which they would like to make, and when any actual reforms come to the table, the interest of reform overcomes the interest of stability. It is easier for politicians to talk about stability than to achieve it. Perhaps HMRC have recognised this, as Budget 2014 contains no promise of stability, as far as I can see.

1.9 The tax consultation framework

These have been bad times for tax policy. The CIOT expresses itself strongly: "the way tax law is developed and effected in the UK is deeply flawed."[64]

Two recent publications shed light on what has gone wrong with tax legislation in recent years. Firstly, Demos:

> The centralisation of [tax policy-making power] is a particular problem because of the lack of institutional accountability of the Treasury on taxation policy and the lack of accountability of chancellors themselves in matters of taxation. ... The concept of checks and balances in tax policy

63 David Gauke (Exchequer Secretary to the Treasury) Hansard, 21 May 2013 *http://www.publications.parliament.uk/pa/cm201314/cmpublic/financeno2/130521/pm/130521s01.pdf*

64 Letter from CIOT to George Osborne, 19 May 2010 accessible *http://www.tax.org.uk/Resources/CIOT/Migrated%20Resources/t/to-santos_40.pdf*

> is nonexistent.
>
> ... the current relationship between the Treasury and HMRC was 'very dysfunctional', had 'almost gone as wrong as it could have gone'...
>
> At the moment, pursuing a career only in tax policy is not valued within the Treasury hierarchy. Officials pass through the tax teams rather than making tax policy a career choice. ... High turnover results in a lack of experience in the tax section and little institutional memory...
>
> ... There are traditional areas that are ring-fenced as not for consultation, including tax rates and anti-avoidance measures. ...
>
> ... 'at the moment [anti-avoidance] works like a drive-by shooting. You might hit your objective but you also hit a lot of other people.'
>
> At present, policies are frequently changed without understanding the impact the policy has initially had in practice.[65]

Along with a decision not to consult is an HMRC policy which is not deaf to the tax profession but positively hostile. The Director of the HMRC Tax Avoidance Group 2004-2009 records:

> ... I was never happier than when a new tax avoidance initiative was greeted with howls of protest from the tax avoidance quarter.[66]

In short, preventing avoidance has been a priority that outweighs other considerations, such as certainty, workability and the rule of law; or rather obliterates all consideration; and listening to the tax avoidance quarter – which includes the professional bodies and almost any practitioner who said what HMRC did not want to hear – has been ruled out. The professional bodies are regarded by HMRC and HM Treasury as a pressure group whose vaunted commitment to fairness, practicality and the rule of law is merely a cloak for self-interest.

The consequences of a decade or more of that policy can be seen in seeking to state the law, as this book seeks to do, or in seeking to understand the law, as you the reader will do now.

1.9.1 *The Tax Consultation Framework*

In March 2011 the Government promised a fresh start with The Tax Consultation Framework:

> 2. There are five stages to the development and implementation of tax

---

65 Ussher and Walford, *National Treasure* (Demos, 2011) accessible *http://www.demos.co.uk/files/National_treasure_-_web.pdf?1299511925*.

66 Tailby, "Some Reflections on Tax Avoidance" [2011] PCB 41.

policy:
Stage 1 Setting out objectives and identifying options.
Stage 2 Determining the best option and developing a framework for implementation including detailed policy design.
Stage 3 Drafting legislation to effect the proposed change.
Stage 4 Implementing and monitoring the change.
Stage 5 Reviewing and evaluating the change.
3. Where possible, the Government will:
- engage interested parties on changes to tax policy and legislation at each key stage of developing and implementing the policy;
- make clear at what stage (or stages) the engagement is taking place so that its scope is clear;
- carry out at least one formal, written, public consultation in areas of significant reform;
- set out, as the policy develops, its strategy for stakeholder engagement including planned formal consultation periods, informal discussions, working groups and workshops;
- consult, where it can, on the policy design, draft legislation and implementation of anti-avoidance and other revenue protection measures, provided this does not present additional risk to the Exchequer;
- minimise the occasions on which it consults only on a confidential basis. Where confidential consultation has been necessary the Government will be as transparent as possible about its outcome and consult openly if pursuing the policy change further; and
- provide feedback which sets out the Government's response to the views received and makes clear what changes, if any, have been made to the planned approach as a result of those views.

4. At each stage of consultation, the Government will set out clearly:
- the policy objectives and any relevant broader policy context;
- the scope of the consultation, in particular what is already decided and where there is still scope to influence the outcome;
- its current assessment of the impacts of the proposed change and seek to engage with interested parties on this analysis. A final assessment of impacts will be published once the final policy design has been confirmed; and
- which department and official is leading on the consultation (or specific elements for joint HMT and HMRC consultations).

5. Informal consultation will be as transparent as possible, consistent with the need to protect revenue. The best principles of formal consultation will be applied to informal consultation to ensure clarity of scope, impact, accessibility, and meaningful feedback. Comments will

> only be attributed to a representative body when it is clear that the individual consulted is commenting on behalf of that representative body. It is recognised that individuals need time to consult others before they can provide comments on behalf of a representative body. Informal consultation can run alongside formal consultation but will often be most appropriate at the earliest and latest stages of tax policy development to identify options and then to fine-tune the detailed legislation and implementation of change.
>
> **Exceptions**
>
> 8. The Government will generally not consult on straightforward rates, allowances and threshold changes, or other minor measures; recognising, however, that even in these cases some level of consultation can often be informative. It may also adopt a different approach for revenue protection or anti-avoidance measures where following this Framework could present a risk to the Exchequer. In other circumstances where the Government decides not to consult during tax policy development it will explain the reasons for that decision.
>
> 9. There will be times when it will be necessary to deviate from this Framework. In these circumstances the Government will be as open as possible about the reasons for such deviations.[67]

A comprehensive assessment of the extent to which tax reform since 2011 has complied with the Framework would need a volume to itself, there has been so much. In brief, compliance with the Framework has been patchy. It is easier to announce these good intentions than to abide by them. The culture of "ready fire aim" is not easily tackled.

The proposed cap on charitable reliefs in the 2012 budget was announced in breach of the Framework. The editor of *Taxation* commented:

> It seems that the policy has been abandoned, and we are back to the 'rabbit out of a hat' approach.[68]

The ATED regime was introduced in breach of the Framework. The House of Lords Economic Affairs Committee commented:

> ... the Government's response to SDLT avoidance might have been more appropriately designed had it consulted interested parties at the outset as its 'new approach to tax policy making' stipulates. We recommend that the Government adhere to that approach in designing future tax

67 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/89261/tax-consultation-framework.pdf*

68 Truman, "Taxation" (2 May 2012).

changes.[69]

The 2013 restrictions on deduction of liabilities for IHT were introduced in breach of the Framework. But neither here, nor, as far as I am not aware, in any other case have the Government acknowledged a breach of the Framework or been "as open as possible about the reasons for such deviations."

The City of London Law Society comment:

> A disturbing pattern is emerging where such legislation is introduced: minimal or ineffective consultation, over-draconian legislation and untaxing via HMRC guidance (sometimes even coupled with legislation that is effective immediately). The resultant uncertainty, and on occasion the inadvertent imposition of tax contrary to policy, has been damaging to the UK's competitiveness. We would highlight in particular the Disguised Remuneration legislation, this year's new Salaried Members rules and ... the introduction of the penal 15% SDLT rate for certain high value residential property acquisitions as cases where business confidence in the policy-making and implementation processes has been greatly damaged.[70]

There is one route and one route only to a good tax system: sound tax policy devised by those with a sound understanding of the current tax system; a leisurely timetable of consultation and legislative drafting as envisaged in the Tax Consultation Framework and the 10 tax tenets of the ICAEW.[71]

That is a hard prescription, and it is tempting to look for an easier solution. Past unsuccessful attempts include the tax law rewrite, which achieved little, and the HMRC charter which achieved nothing. The most recent is the GAAR; it will take several decades to assess whether that will yield a consistent case law and reasonable predictability of outcome.

1.10 The Future

Budget 2014 has announced important forthcoming reforms:
(1) to extend the scope of CGT to residential property of non-residents
(2) to extend ATED and related taxes to properties above £500k.
More generally, the instability and ever increasing complication of the UK tax system is likely to continue for as long as the HMRC view remains is that the current state of tax reform is good, or if it is not good, nothing can be done to make it better.

CHAPTER TWO

WAKE UP AND SMELL THE COFFEE: THE PUBLIC DEBATE ON TAX AVOIDANCE

2.1 Introduction

The topic of tax avoidance is as old as taxation itself;[1] but it has taken prominence recently, in Parliament and the media.[2]

The topic impinges on many aspects of this book, but it is best to consider it as a subject and in a chapter of its own.

The title of this chapter derives from the splendid admonition of David Cameron:

> Of course there is a difference between tax evasion and tax avoidance. Evasion is illegal. It can and should be subject to the full force of the criminal law.
>
> But what about tax avoidance? Now of course there's nothing wrong with sensible tax planning and there are some things that governments want people to do that reduce tax bills, such as investing in a pension, a start up business or giving money to a charity. But there are some forms of avoidance that have become so aggressive that I think it is right to say these raise ethical issues, and it is time to call for more responsibility and for governments to act accordingly.
>
> In the UK we've already committed hundreds of millions (?) into this effort, but acting alone has its limits. Clamp down in one country and

---

1 For examples from 1798 and 1920, see "Tax Avoidance in 1798" and "Vestey: Royal Commission evidence and ensuing debate" both accessible *http://www.kessler.co.uk/tfd-archive*.

2 It is interesting to speculate why that has been the case. I think reasons lie more in the realm of politics and sociology than tax law and practice. The Public Accounts Committee, and some effective pressure groups, have clearly contributed but given the pressure on the front page, why has their work received so enthusiastic a reception? The climate of austerity may be a contributing factor.

> the travelling caravan of lawyers, accountants and financial gurus will just move on elsewhere. ...
> I believe in low taxes, that is why my government is cutting the top rate of income tax, we've cut corporation tax. [*Delete - political]*.[3]
> Individuals and businesses must pay their fair share. And businesses who think they can carry on dodging that fair share, or that they can keep on selling to the UK and setting up ever more complex tax arrangements abroad to squeeze their tax bills right down, well they need to wake up and smell the coffee, because the public who buy from them have had enough.[4]

All the main tropes of the political debate are in this passage:

(1) Everyone should pay a "fair share" of tax.
(2) Some taxpayers fail to do so due to tax avoidance.
(3) Tax avoidance is unethical, immoral or anti-social.
(4) Acknowledgement of the avoidance/evasion distinction;[5] but it does not contradict point (3). In the words of Margaret Hodge: "We're not accusing you of being illegal, we're accusing you of being immoral."
(5) Disparaging references to tax advisors.[6]

On the political left, the same points are made, but more stridently, and of course without David Cameron's approval of low taxes.

2.1.1 *The amounts lost due to avoidance*

Another common thread in public debate is a vast estimate of the amounts involved. HMRC publish figures called "the tax gap":

> It estimated that at 31 March 2012 up to £35 billion of tax was at risk or under consideration due to avoidance or legal interpretation.[7]

The words "or legal interpretation"[8]make the figure meaningless as a measure of avoidance, but for a critique of the methodology, see Oxford

---

3 This side note is included in the version of the speech published online; one wonders what happened when the speech was delivered.

4 David Cameron speech to World Economic Forum in Davos, January 2013 *http://www.number10.gov.uk/news/prime-minister-david-camerons-speech-to-the-world-economic-forum-in-davos/*

5 I suspect newspaper libel readers (rightly) insert this if a journalist overlooks it.

6 This feeds on another very ancient trope concerning lawyers.

7 National Audit Office, *Tax avoidance: tackling marketed avoidance schemes* (2012), para 1.14.

8 In HMRC's terminology, a tax loss arises from "legal interpretation" when the taxpayer disagrees with HMRC on an issue of tax law.

University Centre for Business Taxation "The Tax Gap for Corporation Tax".[9]

The IFS say:

> we don't know how much corporate tax is lost to the UK as a result of tax avoidance. This is partly because there is no accepted definition of exactly what constitutes 'avoidance' and partly because we lack full information about the activities of firms.[10]

Of course, the fact that an amount is unknown and unknowable does not mean that it is small or unimportant. There is no doubt that the amounts involved are significant. I doubt if time spent guessing at figures is productive.

The IFS report continues:

> Importantly, even if we knew that information and could calculate the tax lost to avoidance, it would not be right to assume that, were all avoidance opportunities to be completely removed, the UK would be able to collect that full amount. We would expect higher taxes to feed through, at least to some degree, to lower investment and changes in prices such that genuine UK profits may be lower. To the extent that the corporate tax affects prices or wages, or the location of firms' activities (and therefore jobs), there may also be lower receipts from income taxes or VAT.

This is true for all taxes, but particularly so for corporation tax:

> First, corporation tax is a particularly distortionary form of taxation that can work to reduce investment. This is especially the case for internationally mobile investments because firms will consider tax when choosing where to locate real activities. The Mirrlees Review noted that, in principle, it would be efficient to tax relatively mobile activities at a lower rate in order to avoid deterring mobile activities while allowing a higher rate to be supported on less mobile activities.[11] Avoidance behaviours are one way that de facto lower rates on more mobile income are achieved. (The Patent Box ... is one way to try to achieve this

---

9 December 2012, accessible *http://www.sbs.ox.ac.uk/sites/default/files/Business_Taxation/Docs/Publications/Reports/TaxGap_3_12_12.pdf*. The HMRC paper itself concedes that "There are many sources of potential error and uncertainty in these estimated tax gaps."

10 IFS, *Green Budget 2013* p.297 *http://www.ifs.org.uk/budgets/gb2013/gb2013.pdf*

11 [Footnote original] See page 12 of J. Mirrlees et al., *Tax by Design: The Mirrlees Review*, (2011) *http://www.ifs.org.uk/mirrleesReview/design*.

directly.) In this case, there may even be benefits to the UK from avoidance opportunities if the lower tax rates achieved on mobile activities – for example, through profit shifting – mean that more real activity is in the UK than would otherwise be the case. But, of course, there are many costs too, including the inefficiencies that arise from tax planning, the distortions between activities and the potential revenue loss.[12]

Second, the ultimate incidence of corporate tax always lies with households and is borne either by the owners of capital (in the form of lower dividends), by workers (in the form of lower wages) or by consumers (in the form of higher prices). We do not know with any precision who is made worse off as the result of the corporation tax. However, estimates suggest that, because capital tends to be much more mobile than workers or consumers, a significant share of the burden of corporate tax tends to be shifted to domestic factors – and specifically labour.[13] In other words, there is reason to believe that at least a part, and in some cases a large part, of the corporation tax that companies are subject to is ultimately passed on to workers in the form of lower wages.[14]

There is a certain irony in the last point, given the left's enthusiasm for corporation tax.

2.2 The need for analysis

This chapter draws on a paper published by the Oxford University Centre for Business Taxation, ("the OUCBT paper").[15] The OUCBT paper says:

> The question is how to tackle the problems. This requires a clear

12 [Footnote original] There is an academic literature on the costs and possible benefits of tax planning. See for example, D. Dharmapala, "What problems and opportunities are created by tax havens?", Oxford Review of Economic Policy, 2008, 24, 661–79, which considers the role of tax havens, and references therein.

13 [Footnote original] Workers may receive lower wages as a result of the corporation tax because (i) a lower level of capital investment results and this reduces labour productivity and therefore wages and/or (ii) the effect of lower after-tax profits feeds directly into lower wages. See, for example, W. Arulampalam, M. Devereux and G. Maffini, 'The direct incidence of corporate income tax on wages', Oxford University Centre for Business Taxation, Working Paper 07/07, 2007, and references therein.

14 IFS, *Green Budget 2013* p.290 *http://www.ifs.org.uk/budgets/gb2013/gb2013.pdf*

15 "Tax avoidance" (2012) accessible *http://www.sbs.ox.ac.uk/sites/default/files/Business_Taxation/Docs/Publications/Reports/TaxGap_3_12_12.pdf* (I omit some footnotes from my quotes).

> analysis of their cause and differentiation between different causes. Labelling a whole range of quite different behaviours as "avoidance" without further differentiation is unhelpful. ...

Any differentiation requires terminology. As there is no agreed terminology,[16] it is best not to use any terms at all without some explanation of what is meant.

2.2.1 *The OUCBT categorisation*

The OUCBT paper distinguishes:

(1) **Ineffective avoidance** (no tax saving if the law is correctly applied)
(2) **Effective avoidance** (tax saved by avoidance)
(3) **Non-avoidance** (little tax paid but not due to avoidance).[17]

These are essential distinctions if one is to identify the correct response to the problems:

(1) Ineffective avoidance needs enforcement of the law.
(2) Effective avoidance needs changes in tax law.
(3) In cases of non-avoidance:
    (a) It may be no change in tax law is appropriate.[18]
    (b) If change is needed, the change is one of policy as well as of tax law; and the matter should be considered without the haste and moral outrage that may be associated with effective avoidance.

2.2.2 *Tax practitioners classification*

If one wishes to assess emotional and moral responses to avoidance, and actual or theoretical anti-avoidance rules, we need further vocabulary to discuss the range of tax-motivated behaviour.

We might cover the terrain in four categories:[19]

---

16 For instance, Tiley described "tax planning" as a euphemism for avoidance, which is no doubt sometimes (maybe often) the case.

17 The paper adopts the somewhat unhelpful labels "categories A, B, and C". It is difficult to find short labels which neatly sum up the concepts: "Ineffective avoidance" is not ideal as this is not really "avoidance" at all.

18 It may be that a change in public expectation or knowledge is desirable.

19 Different authors draw different distinctions; contrast Barnett, "A baker's dozen" Taxation, 2 August 2012; Lord Walker proposed seven types of tax avoidance (a riff on Empson's *Seven Types of Ambiguity)*: "Ramsay 25 years on" [2004] LQR 120. But one must resist the temptation to taxonomy for its own sake. All classification is (or should be) purposive: a useful taxonomy must draw *useful* distinctions: it should identify categories which call for different responses, and only those.

Uncontroversial tax planning Taking advantage of a tax relief in a manner *everyone* would accept as reasonable and indeed desirable. It is easy to find clear examples: for instance, pension contributions and moderate[20] charity giving.[21]

Ordinary tax planning Using tax legislation in a way which some politicians and commentators do not like, but where the planning is ordinary in the sense that many people have done and continue to do it; it is obvious and foreseeable; the points probably came to the mind of those responsible for the legislation, or should have done, or there is no reason to think that parliament would have done anything different if it had considered the points. Ordinary tax planning is not contrary to the "intention of parliament" as that construct is normally understood.

Examples are:

(1) Advancing or delaying
    (a) disposals for CGT purposes or
    (b) bonuses or pension contributions for IT purposes
    in anticipation of changes of rates or going non-resident.
(2) Transfer of family assets or business to a spouse to equalise income.
(3) Transfer of assets or business to a company to reduce tax rates.
(4) Lifetime giving to avoid IHT.
(5) Going non-resident.

The term "tax mitigation" could be used to cover uncontroversial tax planning and ordinary tax planning.

Tax avoidance Something legal but contrary to the intention of parliament in the sense that had parliament thought about it, it would probably prevent the tax advantage. An example is the transfer of assets to a non-resident company where the transferor has power to enjoy.

Other possible examples are:

(1) The scheme in *Furniss v Dawson*.
(2) Temporary non-residence (if tax-driven).

However one might place these at the upper reaches of the ordinary tax planning spectrum.

---

20 In the debate on the Budget 2012, some said that giving more than £50k or 25% of income was excessive.

21 These are the examples which David Cameron called "sensible tax planning" in the quote at the start of this chapter.

Tax abuse Tax avoidance with aggravating features (typically, self-cancelling steps) that make it (more) unreasonable.[22] It is easy to find clear examples: take the schemes in: *Ramsay*, *Fitzwilliam*, *Astall* and *Mayes*.

Thus this terminology raises three distinctions:
(1) Uncontroversial/ordinary tax planning
(2) Tax planning/avoidance
(3) Tax avoidance/ abuse

Before considering whether these distinctions have, or should have, different consequences, it is important to note the two difficulties which they entail:

(1) *The demarcation problem* Except at the extreme ends of the spectrum, the demarcation problem is intractable: the classification of specific examples (if it actually had to be decided) would give rise to endless disagreement (and has done so in the context of tax motive defences). There are two reasons for this:
   (a) The distinctions rely on:
      (i) imponderable hypothetical questions (what would Parliament have done if it had noticed the issue?)
      (ii) vague constructs ("the intention of parliament" and "the spirit of the legislation")
      (iii) identifying tax policy (there may be no clear policy, or it can fluctuate).
   (b) The four distinct categories attempt to impose an order on tax motivated behaviour which exhibits a scale of unreasonableness, without clear divisions. (It might be better to mark out a sliding scale from 1 to 10, recognising finer distinctions, but that would not help for practical purposes.)
(2) *The knowledge problem* Except for the extreme end of the spectrum, (a small part of the total field) a serious discussion of where any particular arrangement should be classified, or graded, can only be carried out by someone who understands the tax background. Few non-practitioners have that understanding. Journalists in the UK do not arrange for their work to be reviewed by someone who understands tax. Politicians are characterised by grandstanding and soundbites.

22 The word sometimes used is "egregious" or "aggressive". That does not clarify anything but it neatly expresses the point.

> Pressure groups grind their axes. If discussing particular taxpayers, one would need to know the facts, which are not usually in the public domain. So public debate is not well-informed. It is a yeasty mingling of dimly understood facts with vague but deep impressions, and images, half real, half fantastic.

2.2.3 *Significance and recognition of these distinctions*

The distinctions I have drawn are not easy, but they are the best that can be achieved.

The ordinary tax planning/tax avoidance dividing line is established in tax law: it marks the point at which tax motive defences begin to bite.

The tax avoidance/tax abuse distinction is new to tax law, but it marks the point at which the GAAR is intended to bite:

> The Government agrees with the Report's recommendation to introduce a rule which is targeted at artificial and abusive arrangements (those that the Report refers to as "egregious", "very aggressive" or "highly abusive contrived and artificial"). It accepts the Report's conclusion that introducing a "broad spectrum" general anti-avoidance rule would not be beneficial for the UK tax system. ... the GAAR should not affect what the Report describes as "the centre ground of tax planning".[23]

There has not been much judicial discussion (the issue has not arisen for decision) but a passage in *Furniss v Dawson* recognises something like a tax avoidance/abuse distinction:

> The scheme [in *Furniss*] has none of the extravagances of certain tax avoidance schemes which have recently engaged the attention of the courts, where the taxpayer who has been fortunate enough to realise a capital profit has gone out into the street and, with the aid of astute advisers, manufactured out of a string of artificial transactions a supposed loss in order to counteract the profit which he has already made. The scheme before your Lordships is a simple and honest scheme which merely seeks to defer payment of tax until the taxpayer has received into his hands the gain which he has made.[24]

The uncontroversial/ordinary tax planning distinction is not relevant in tax law, but it is relevant to the public debate on morality.

24 [1984] AC 474 at p.518.

2.3 Views on morality of tax avoidance

This is intended to be a practical book. But the issue of the morality of tax avoidance (and, importantly, an assessment of what views are held as to morality) does have a practical aspect: it affects judicial attitudes and decisions; it is the main motivator for the enactment of the GAAR and will play an important role in its interpretation.

2.3.1 *Some judges views*

Older cases do not appear hostile to tax avoidance. In 1900:

> Bundey J. recognises to the full both the legal *and the moral* right of every man to dispose of his property if he can in a way which does not expose it to be taxed under the existing system of taxation.[25]

In 1965:

> The fact that a settlement is drawn with a view to avoiding particular charging provisions is *neither reprehensible, nor* a proper ground for inclination to a conclusion that it ought to come within those or some other charging provisions. ... If any moral criticism could be levelled at them, then the consciences of the judges of the Chancery Division, in the exercise of their discretionary jurisdiction under the Variation of Trusts Act, 1958, would be in a sorry state.[26]

Lord Diplock expressed the traditional view in 1964:

> Tax law no more lies within the field of morals than does a crossword puzzle.[27]

Likewise in 1982:

> the fact that the purpose of the scheme was tax avoidance does not carry any implication that it was in any way reprehensible or other than perfectly honest *and respectable*.[28]

The same view has been expressed in Australia in 1995:

---

25 *Simms v Registrar of Probates* [1900] AC 323 at p.333.

26 *Re Kirkwood* [1965] Ch 286 at p.327.

27 Diplock, "The Courts as Legislators" Address to The Holdsworth Club 1965 accessible *http://www.kessler.co.uk/tfd-archive*.

28 *IRC v Burmah Oil* 54 TC 200 at p.220; followed in 1988 in *Craven v White* 62 TC 1 at p.196.

> The obligation to pay [income tax] is a legal one. Some politicians try to treat it as a moral obligation. But it is not. The citizen is bound to pay no more tax than the statute requires him to pay according to the relevant state of his affairs.
>
> Consistently with this view, it has long been a principle of the law of income taxation that the citizen may so arrange his affairs as to render him less liable to pay tax than would be the case if his affairs were cast in some different form. In the language of the layman, the citizen is entitled to minimise his liability to pay tax. This is sometimes expressed as a right to avoid tax...[29]

The following points can be made in favour of the traditional view.

(1) *The nature of the tax system* The tax system is full of anomalies, artificial, arbitrary, and not based on any consistent principles. That suggests that there is no "right" amount of tax except in the sense of what is due by statute.

(2) *HMRC practice* When the boot is on the other foot, HMRC take advantage of anomalies in their favour. The unfortunate Mr Lobler fell into the trap[30] of a partial surrender of life policies:

> Mr. Lobler invested some US $1.4 million in a series of life assurance policies with Zurich Life on 1 March 2006 and within the next two years withdrew $1.4 million from the policies leaving the policies with comparatively negligible value. The form in which he made the withdrawal was by a partial surrender of each policy. As a result of the tax legislation in Chapter 9 Part 4 ITTOIA... he is treated as having in those years realised taxable income of some $1.3 million. He becomes liable to pay some $560,000 in tax. He made no profit or gain as that term is commonly or commercially understood and yet he becomes liable to pay tax which exhausts his life savings and may bankrupt him. That is an outrageously unfair result....
>
> This is legislation which does not seek to tax real or commercial gains. Thus it makes no sense to say that the legislation must be construed to apply to transactions by reference to their commercial substance….No overriding principle can be extracted from the legislation....
>
> Thus with heavy hearts we dismiss the appeal.[31]

---

29 Sir Garfield Barwick, *A Radical Tory* (1995) at p.229.

30 See 33.1 (Policies – Introduction).

31 *Lobler v HMRC* [2013] UKFTT 141 (TC); see Firth, "Sauce for the Goose" Taxation, 4 April 2013.

This is the point made in one of the best known dicta in the whole of taxation:

> No man in this country is under the smallest obligation, moral or other, so to arrange his legal relations to his business or to his property as to enable the Inland Revenue to put the largest possible shovel into his stores. The Inland Revenue is not slow - and quite rightly - to take every advantage which is open to it under the taxing Statutes for the purpose of depleting the taxpayer's pocket. And the taxpayer is in like manner entitled to be astute to prevent, so far as he honestly can, the depletion of his means by the Revenue.[32]

HMRC say that this has changed:

> [The above quote] epitomises the approach which Parliament has rejected in enacting the GAAR legislation. Taxation is not to be treated as a game[33] where taxpayers can indulge in any ingenious scheme in order to eliminate or reduce their tax liability.[34]

At the abuse end of the spectrum the GAAR now applies. so the rules have indeed changed. But I am not sure why it should be said that anything else has changed. *Ayshire* itself was not an abuse case (the issue was whether the taxpayer's children had entered into a valid partnership) and the result would not have been affected by the GAAR. More fundamentally, it continues to be the case that HMRC take advantage of any rules or anomalies in their favour.

(3) *Difficulty of applying moral principles* The view that taxation is governed by moral principles distinct from black letter tax law either:

(a) requires one to enter into the intractable distinction of tax avoidance/abuse; or

---

32 *Ayrshire Pullman Motor Services v IRC* 14 TC 754 at p.763.

33 The game metaphor begs an essay to itself. What, in fact, is a game? It is an elastic concept which can be analogised in different ways. What is it in the notion of game which the guidance seeks to identify as significantly different from tax? Is it a notion of non-seriousness? Or an adversarial approach? Or a notion of a rule based activity? or arbitrary rules? In the latter three respects, tax law and general law very much resemble games. These problems suggest that it would help clarity of thinking not to use the word "game": a stale and failed metaphor.
See Midgley, *Heart and Mind* (1981) chapter 8 (The game game).

34 HMRC, "GAAR Guidance" (2013) *http://www.hmrc.gov.uk/avoidance/gaar-part-abc.pdf.*

(b) spreads the net very wide, far wider than any practitioner is likely to accept (and still requires one to enter into the intractable distinction of uncontroversial/ordinary tax planning).

In practice, public debate does not engage with the relevant black letter law and it is difficult to envisage that it ever would, or could. Ethics is a practical subject. If standards are so vague, or so difficult to apply in actual cases, that we cannot see how we could act on them, we become sceptical. That suggests that morality has little if any role to play.

(4) *Tax avoidance sometimes leads to a fair result* There are cases where tax avoidance mitigates unfairness of tax rules. Parliament sometimes admits this by enacting a new relief to allow directly what had previously been achieved by avoidance. Examples are:

(a) Nil rate band discretionary trusts, which allow transferrable nil rate bands before the relief was enacted in 2007.

(b) CGT group relief to obtain loss relief. A company about to realise a gain on an asset would transfer it to a group company that had realised an allowable loss. Alternatively, a company which had realised a gain might acquire from a group company an asset which was to be sold at a loss. That would allow the loss to be set against the gain.

Offshore trusts can mitigate the deleterious lock-in effect of CGT by deferring tax until the profits are received.

2.3.2 *More modern views*

In earlier times there was plenty of tax avoidance but little (if any) activity in the category of tax abuse. When that changed, I think in the 1970's, attitudes changed too. By 2007:

> For many directors, the objection to arrangements that are in their view 'too' artificial may be framed largely in terms of business ethics. Other directors, equally determined to behave in an ethical way, may consider that the degree of artificiality is not an ethical issue provided no attempt is made to misrepresent the facts or to hide them from the tax authorities....
>
> At one time such a view would perhaps have been more widely held than now. At the present time it represents one end of a range of views in a debate where probably most commentators would hold that within the compass of what is legal there is some behaviour that is acceptable and some that is not. What they differ on is precisely where the line between the two is to be drawn and, perhaps more importantly, what criteria are

> to be used to determine the distinction.[35]

In 2011, Aaronson's GAAR study reported (with only a small element of exaggeration):

> There was unanimous disapproval, indeed distaste, for egregious tax avoidance schemes.[36]

Tax practitioners are mostly drawn to the view that opprobrium should only attach at the top end of the scale, in cases of tax abuse; or if any opprobrium attaches to tax motivated behaviours lower down the scale, the amount of opprobrium should vary according to the scale.

This would be consistent with Lord Templeman's views in tax abuse cases, which were expressed trenchantly (some would say, stridently):

> In common with my predecessors I regard tax-avoidance schemes *of the kind invented and implemented in the present case* as no better than attempts to cheat the Revenue.[37]

2.3.3 *Views outside the tax profession*

Outside the tax profession, the line is drawn not at the avoidance/abuse level, but at the uncontroversial/ordinary tax planning level. That is, some quite ordinary tax planning has come under fire. One might dismiss those views as unworthy of consideration. I restrict the following examples to those whose views must carry some weight.

Deferring bonuses to 2013/14 in order to take advantage of the reduction in IT rates: Practitioner-readers are likely to agree that this is ordinary tax planning near the bottom end of the scale. But Mervyn King, then Governor of the Bank of England, is reported to have criticised Goldman Sachs for it.[38] The House of Lords select committee concluded that the GAAR will not apply to the deferral of bonuses from one tax year to

another,[39] but one might infer that they disapproved none the less for that.

The Bump Plan In September 2013 a minor political furore arose after David Heaton was secretly filmed suggesting bonus payments to pregnant employees; if made during the relevant period it would increase the amount of statutory maternity pay.[40] I do not think practitioners would regard that as on the abusive side of the line (though there are many points which need to be made to properly understand the legal and moral analysis, none of were heard in the public debate).[41] The point was not just political hot air: Heaton had to resign from the GAAR panel following criticism from David Gauke (Exchequer Secretary to the Treasury).

Income sharing with a spouse I think practitioners were surprised that HMRC found this unacceptable in their (ultimately unsuccessful) attack in *Jones v Garnett*. But exactly the same planning has been criticised in India:

> While tax evasion is universally condemned, there is a disposition in certain quarters to regard tax avoidance as a permissible course of action. We are unable to endorse this view. The mere fact that the income-tax law is not violated does not mean that the procedure which results in tax avoidance is justified. We might take as an illustration the act of introducing, without adequate consideration, one's wife ... as partner in a business of which the assessee himself is a partner. It is an attempt to fraction income and reduce tax liability under a provision of law meant to apply to genuine partnerships. Conduct of this nature, though legal, cannot but be regarded as anti-social.[42]

---

39 Select Committee on Economic Affairs Report on The Draft Finance Bill 2013 *http://www.publications.parliament.uk/pa/ld201213/ldselect/ldeconaf/139/139.pdf* The Select Committee said this was because that "the issue is one concerning the structure of the tax system rather than avoidance involving manipulation of loopholes in the legislation." It would be more accurate to say the reason is that these are not examples of tax abuse (in my terminology).

40 *https://www.youtube.com/watch?v=9rFuhC2ZSEM*

41 In particular: (1) This planning does not give rise to a tax advantage, but to a benefit advantage for the employer; it could not be counteracted by the GAAR. (2) Not every payment to an employee is earnings so it is possible for planning of this kind to fail on the facts. (3) The privacy aspects of secret filming, and the ease with which short clips misrepresent nuanced positions, seem particularly worrying.
For the background, see Johnson, "Tax, Lies and Hypocrisy" (CCH Tax News , Issue 133 25 September 2013); for the law, see the Statutory Maternity Pay (General) Regulations 1986.

42 Government of India Report of the Taxation Enquiry Commission 1953-54 Vol II para 5.

Gift of company to political party A donor who owns a suitable company might arrange that:
(1) The donor gives the company to the political party.
(2) The political party extracts the funds by way of dividend.
The gift at stage (1) qualifies for CGT hold-over relief; and the distribution at stage (2) would not be taxable assuming the party is a company for tax purposes.

It seems that Labour arranged this in 2013, giving rise to a fit of indignation, or purported indignation, from the Conservatives. An open letter from George Osborne to Ed Milliband provided:

> Dear Ed,
> You said in April last year that 'tax avoidance is a terrible thing'. ...
> Yet ... the Labour Party has gone to great lengths to help your biggest donor, ... avoid paying tax on a political donation. ...
> The Labour Party registered a donation of shares in JML worth £1.65 million in January 2013, from Mr John Mills. By making a donation in shares rather than as a single cash dividend, it has been reported that Mr Mills managed to avoid a potential tax charge of £724,710. ...
> As leader of the Labour Party, and given your previous statements on tax avoidance, such actions by your party appear to be directly at odds with your public statements.
> Most importantly, will you now pass the amount of tax that has been avoided to the Exchequer? As you say, this is money that is needed to fund vital public services such as the health service and our schools.
> Yours sincerely,
> George Osborne[43]

What is one to make of this? I think any practitioner, or anyone who understood the tax background, would regard this as in the category of "sensible tax planning" or, perhaps, ordinary tax planning; in either case, well short of avoidance and opprobrium. The letter could be seen as just an example of debased or meaningless political debate, whose object is just to knock the opposition. It could be taken as a case where ordinary tax planning is regarded as immoral. However, it may be regarded as an illustration of the difficulties which arise if one regards taxation as governed by moral principles distinct from black letter tax law. The letter

43 6 June 2013 accessible *http://www.politicshome.com/uk/article/79622/george_osborne_letter_to_ed_miliband_over_donors_taxes.html*

might then be regarded as a rather subtle and well aimed contribution to the political/moral debate. Perhaps there are elements of each of these.

2.4 The rule of law

"The rule of law" is a slogan for a set of standards, the content of which is contested, and discussion of which needs a book to itself. The OUCBT paper provides a summary of the requirements of the rule of law, in relation to taxation:

> Subject to some exceptions, the rule of law requires that taxpayers are able to determine the tax consequences of their actions in advance. This can only be done through legislation and not vague notions of fairness. Also ... the imposition of tax on citizens is the monopoly of Parliament.[44] Tax in the UK must be imposed by Parliament through legislation.

In formulating a response to the problem of tax avoidance, one needs to consider whether cure is worse than the disease. In *Ransom v Higgs* Lord Simon said:

> Disagreeable as it may seem that some taxpayers should escape what might appear to be their fair share of the general burden of national expenditure, it would be far more disagreeable to substitute the rule of caprice for that of law.[45]

In the 6th edition (2007) and earlier editions of this book, I said:

> The UK tax system is largely[46] based on the rule of law rather than informal practice and discretion.

To the extent this is true it is something to boast of,[47] and a feature which makes the UK an attractive choice for anyone choosing where to reside.

---

44 [Footnote original] Article 4 of the Bill of Rights 1688 provides: "That levying Money for or to the Use of the Crown by pretence of Prerogative without Grant of Parliament for longer time or in other manner than the same is or shall be granted is illegal." 1 Will. And Mar. Sess. 2, c.2. Art. 4. See also *MacNiven v Westmoreland* [2001] STC 237, at [29] per Lord Hoffmann and *Collector of Stamp Revenue v. Arrowtown Assets Ltd* [2003] HKFCA 46 at [105] per Lord Millett.

45 50 TC 1 at p.94.

46 But see 10.23 (Forward tax agreements).

47 The boast is an old one: Blackstone's Commentaries on the Laws of England (1765) vol 2 chap 37 provides: "a country like this, which boasts of being governed in all respects by law and not by will..."; and contrast John Adams "A government of laws, and not of men" (1780).

By the 13th edition I qualified the boast:

> However, it is less the case than formerly, due to:
> (1) wide, complex, or vague anti-avoidance provisions mitigated by informal practice, HMRC guidance, HMRC discretion or oversight.[48]
> (2) an increasing use of retrospective legislation.[49]

The City of London Law Society say:

> 2.4 We have a broad concern, applicable to all taxes, that tax policymakers are insufficiently conscious of the importance of the rule of law – that is, the constitutional right of a citizen to determine the law applicable to him at any given date. Related to this is a similar problem of lack of respect for legislation as the only proper source of law, and over-reliance on guidance. Over-reliance on guidance is another serious problem. It is clear from the case of *Gray's Timber*[50] that a court will (indeed must) ignore any published guidance in forming its view of the law. This must be correct, as otherwise guidance would effectively have the force of statute despite not passing through Parliament. An extreme example of this problem was the draft Salaried Members legislation within the [2014] Finance Bill. Both law and policy in this field are underdeveloped (we would note the House of Lords' Economic Affairs Committee's recommendation that introduction be deferred for a year, which was regrettably ignored by the Government).
> 2.5 By way of example, the policy view as to whether "costs plus" remuneration – favoured by many fund managers, a business sector which it is express Government policy to attract to the UK – should be subject to employer's NIC under the new rules changed late in the day. This change was reflected not in law but in guidance – the legislation is sufficiently ambiguous that it can be read either way. This is not good enough. The measures themselves were inevitably unpopular with those businesses to which they potentially applied, but the protracted uncertainty created by the heavily-criticised process of their introduction in particular has materially damaged the UK's competitiveness in an area of the economy which the Government has identified as key...
> 2.7 Increasingly in new policy initiatives the taxpayer's right to appeal is being watered down. We would highlight in this context that there is no appeal against an HMRC determination that a bank has breached the

48 Examples include the POA rules (2004); restrictions on allowable losses (2007); the ITA remittance rules (2008); (4) the GAAR.

49 Examples include the IHT reforms (2006); the ITA remittance rules (2008).

50 *Gray's Timber v HMRC* 80 TC 96.

> Banking Code of Practice on Taxation. Similarly, under the current proposals relating to "follower notices", the taxpayer has no right of appeal against the issue of such a notice on a number of important grounds. This absence of a right to appeal lends to a denial of the right to have one's rights and duties determined by law, rather than official discretion. This should not be acceptable in a constitutional democracy, and it erodes confidence in the robustness of the UK's legal system.[51]

2.5 Relationship between morality and taxation

The OUCBT paper provides:

> Relying on the lack of "morality" of particular taxpayers to argue that a "fair share" of tax is not being paid is not helpful, for the simple reason that abstract concepts such as "fairness" cannot be used to determine a taxpayers' tax liability. This is not to say that morality is unimportant or irrelevant to how an individual behaves or a business operates, but simply that it cannot answer the question of how much tax is payable.

The topic of the relationship between morality and taxation should be seen as part of a wider discussion of the relationship between morality and law. Without entering into that contentious topic, it should generally be accepted that not everything which is immoral should be proscribed by law.

2.5.1 *Naming and shaming*

The OUCBT paper provides:

> ... searching for individual or corporate villains will not assist in remedying the underlying problems...
> Even if public naming and shaming influences a few taxpayers in the public eye to impose their own voluntary constraints, it will not necessarily affect the worst avoiders, and may even encourage some non-compliance from those who feel that "everyone is at it". Only understanding the flaws in the tax system and working on serious changes can give long-term results....
> We may well question whether the transfer pricing rules are adequate, or

51 Response to Office of Tax Simplification competitiveness review (May 2014) *http://www.citysolicitors.org.uk/attachments/article/105/20140605%20Response%20to%20Office%20of%20Tax%20Simplification%E2%80%99s%20'Competitiveness%20review%20-%20initial%20thoughts%20and%20call%20for%20evidence'.pdf*

> CFC rules are sufficient or appropriate, but these are considerations relating to tax policy reform and not to tax avoidance. They are not issues that can be remedied by pressure on a particular taxpayer to act in a different way. Even if that were to have an effect on one taxpayer it would not tackle the underlying issues.

Naming and shaming in public debate may quickly lead away from the rule of law. Starbucks paid £20m following the threat to occupy its cafes.[52] If one calls that payment "taxation" at all, it was certainly not taxation imposed by Parliament. A hostile commentator would call this taxation by mob rule. Google and Amazon, who do not have public premises vulnerable to the same threat, have paid nothing.

2.6 Avoidance by multinational companies

Much attention has been given to multinational companies (sensitive ears may detect elements of xenophobia). The Public Accounts Committee looked at Starbucks, Amazon and Google. The verdict was guilty.[53]

It is not possible to comment sensibly on the taxation of multi-national groups without knowing the relevant facts, which are not usually in the public domain.[54] The claim that these companies have avoided UK tax is usually based on the size of their UK sales or UK staff, set against the corporation tax actually paid. But all well-informed commentators know that corporation tax is not a tax on sales, or the size of an establishment. The OUCBT paper provides:

> Starbucks and Facebook ... have been criticized for not paying tax where they are making sales, but sales are not the basis for the corporation tax, so this alone is no cause for criticism of the companies concerned. We could argue that the tax base should change, but unless and until that

---

52 Ironically, the post-tax cost of the payment would have been diminished as it should in principle be deductible in computing taxable profits.

53 Or was it? "We were not convinced that their actions, in using the letter of tax laws both nationally and internationally to immorally minimise their tax obligations, are defensible." Public Accounts Committee 19th report 2012, para 12. If the convoluted wording was intended to reflect a note of caution, it was lost in the public debate. But I think the obfuscation is just the dialect of politics.

The PAC returned to this theme in Ninth Report of Session 2013–14 "Tax Avoidance–Google". A PAC hearing is not, perhaps, well suited to ascertaining the facts; it is not possible to ascertain from this whether the complaint of the PAC is that Google have been conducting successful or unsuccessful tax avoidance.

54 See Maas, "Looking for Avoidance" Taxation, 28 February 2013.

> occurs, the fact that there is a high turnover but no taxable profit is not in itself an indicator that the taxpayer is behaving in an unreasonable way.

Likewise the fact that relatively little CT is paid proves nothing. The OUCBT paper provides:

> The fact that there is little or no tax payable is not, however, conclusive evidence that there is effective or ineffective avoidance. In some of these cases, these companies are simply operating in accordance with incentives created by the international tax system and by domestic governments trying to attract economic activity into their jurisdictions. This the governments may do for non-tax reasons, or because this activity gives rise to forms of taxes other than those which are not being collected. ...

HMRC make the same point:

> Globalisation means that multinationals have the opportunity to structure their business to take advantage of beneficial tax rules in different countries. Provided that this results in profits being taxed in line with where genuine economic activity is carried on, this does not amount to tax avoidance. Recent reforms to the UK's corporation tax system mean that the UK has an internationally-competitive corporate tax system, which is designed to attract and retain economic activity here which will be operating in the UK. In broad terms, companies are required to pay corporation tax in the country where they carry on the economic activity that generates their profits, not where their customers are located.[55]

The IFS say:

> A low corporate tax bill is not in itself therefore evidence of tax avoidance. Even if income appears high, there may be genuinely low UK taxable profits if a firm has relatively high current expenditures or can offset the effects of large investment expenditures or losses. The UK tax bill can also be appropriately relatively low compared with declared income if that income is the result of genuinely non-UK activities.

Unusually, the facts are known in relation to Apple as a result of US congressional hearings (I suspect, better conducted than the UK

55 HMRC, "Taxing the profits of multinational businesses" Issue Briefing, October 2012 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/89030/profits-multinationals.pdf*

equivalent). These have been well analysed by Antony Ting.[56] In short, there is no reason to think that Apple have avoided *UK* tax. The group has avoided tax by Irish/US hybrid companies.

2.6.1 *Impact of the GAAR on international tax planning*

The GAAR guidance provides:

> B5.2 Many of the established rules of international taxation are set out in double taxation treaties. These cover, for example, the attribution of profits to branches or between group companies of multi-national enterprises, and the allocation of taxing rights to the different States where such enterprises operate. The mere fact that arrangements benefit from these rules does not mean that the arrangements amount to abuse, and so the GAAR cannot be applied to them. Accordingly, many cases of the sort which have generated a great deal of media and Parliamentary debate in the months leading up to the enactment of the GAAR cannot be dealt with by the GAAR.[57]

In my terminology, these issues are non-avoidance, and in some cases, tax avoidance, but not tax abuse. But where there is abuse, one country's domestic GAAR cannot resolve the issue. Apple's planning, for instance, turned on a hybrid entity, tax transparent in one jurisdiction and non-transparent in another. The planning was not contrary to the tax policy of either country; it was the result of the gap between the two.[58]

2.6.2 *OECD BEPS project*

It is thus an international problem which only international consensus can resolve.

The OECD has been tasked with doing something in response to the current debate on the taxation of multinational companies, and has produced an "Action Plan on Base Erosion and Profit Shifting".[59] It will be interesting to see what emerges. The difficulty of achieving international consensus is considerable:

CHAPTER THREE

DOMICILE

3.1 Domicile: Introduction

Domicile is important for many tax purposes, in particular:
(1) The remittance basis for IT and CGT.
(2) IHT on foreign situate assets.
Domicile is also important for many non-tax purposes including aspects of family law, civil jurisdiction and succession law.

3.1.1 *Cross references and further reading*

The following matters are considered elsewhere:
61.1 (IHT Deemed domicile)
69.3 (Interpretation)
4.1 (Residence & domicile of MPs and members of House of Lords).
The RDR Manual has lengthy guidance. For discussion of the general law of domicile, see Dicey, Morris & Collins, *Conflict of Laws*, (15th edition, 2012) ("*Dicey*"); "Mr Dicey's celebrated work"[1] is the one that HMRC and the courts most often cite. For an important reminder of the need for legal realism in this area, see Fawcett, "Result Selection in Domicile Cases" (1985) OJLS vol 5 p.378.[2]

3.2 Accountants duty in relation to domicile

An advisor's duty depends on the terms of their retainer:

> There is no such thing as a general retainer ... The expression "my solicitor" is as meaningless as the expression "my tailor" or "my

---

1 *IRC v Cohen* 21 TC 301 at p.309.

2 Concluding that the policy of not allowing individuals with a UK domicile of origin to escape UK taxes is influential in determining the result in tax appeals. Accessible *http://www.ojls.oxfordjournals.org/content/5/3/378.full.pdf*.

> bookmaker" in establishing any general duty apart from that arising out of a particular matter in which his services are retained. The extent of his duties depends upon the terms and limits of that retainer and any duty of care to be implied must be related to what he is instructed to do.[3]

In *Mehjoo v Harben Barker* the judge held that a generalist accountant should:

(1) Raise the topic of domicile with their client, if aware that the client was originally from outside the UK.
(2) Be aware that "non-dom was a favoured status (to be cherished) which brought with it tax advantages... that there was some sort of opportunity there." The opportunity was a bearer share scheme.[4]
(3) Advise the client to take further advice from a non-dom expert.[5]

But the Court of Appeal took a more limited view of the scope of the accountant's retainer:

> 56. The reasonably competent accountant setting out to advise Mr Mehjoo of the tax consequences of the sale would not, in my view, have been under any obligation to raise for discussion the claimant's domicile unless it was relevant to the CGT liability on the disposal. The accountant would have known that it gave Mr Mehjoo no tax advantages in relation to the sale of the [UK registered] shares unless the situs of the shares could be changed. As this was something which [the accountants] neither knew or could have been expected to know was achievable, there was no reason to mention the matter still less a liability in negligence for not having done so...
>
> 59. I take the same view in respect of the claim that [the accountant] should have told Mr Mehjoo that his probable non-dom status carried with it significant tax advantages. Again, these were not advantages which were available to the claimant on the sale of UK registered shares and, in the absence of any claim that [the accountants] should have known and advised Mr Mehjoo that it would or might be possible to

---

3 *Midland Bank Trust Co v Hett Stubbs & Kent* [1979] Ch 384 at p.402.

4 There is still scope for IHT planning, and for CGT planning if advice is taken at the time the company to be sold is set up (rather than at the time of disposal): see 83.24 (CGT planning: making UK situate property non-UK situate).

5 [2013] EWHC 1669 (QB) at [183] - [189]. The judge said, correctly, that it is not time-consuming or difficult for a generalist to recommend taking specialist advice. In that case, £800k CGT was at stake; the damages came to £1.2m and the claimant's costs were over £5m. The cost of consulting a specialist (in 2004) was said to be £500 (presumably the cost of an initial enquiry rather than detailed advice).

> change the situs of the shares without triggering a charge to CGT in the process, it is difficult to understand why they were under any legal duty to bring the existence of "very significant tax advantages" to the claimant's attention. The competent accountant would not have believed that they existed.[6]

3.3 The concept of domicile

Domicile is a concept of private international law. The rules are laid down by common law, but modified by statute. These rules apply for tax purposes except so far as modified by tax law.

Scots domicile law is (more or less)[7] the same as English law, and indeed the leading case of *Udny v Udny* is a Scottish case. Northern Ireland domicile law is the same as English law.

"Domicile" has a technical meaning in UK law and should not be confused with:

(1) "Domicile" in civil law jurisdictions.[8]
(2) "Domicile" in EU regulations and international treaties (where a definition generally overrides the UK law sense of domicile).
(3) "Domicile" in ordinary English usage.[9]

On the spelling, Garner states that the word "is spelt both with and without the final *-e* but the better and more common spelling is with it".[10]

Everyone has one and only one domicile. The expression "**non-domiciled**" is in a literal sense inapt, because everyone is domiciled somewhere. It is, however, an acceptable and convenient abbreviation (in context) for non-UK domiciled (just as "non-resident" in context means non-UK resident). I have in the past regarded the abbreviation "non-dom" as slang, but in keeping with the Zeitgeist, the informal but irresistible monosyllables have found their way into the statute book: the FA 2013 uses the heading *Remittance basis restricted to non-doms*.

A person must be domiciled in a single legal jurisdiction. The

---

6 [2014] EWCA Civ 358.

7 See 3.14 (Child's domicile of dependency).

8 Article 102 of the French Civil Code provides: "Le domicile de tout Francais est au lieu où il a son principal établissement" (The *domicile* of a French person is where he has his main establishment).

9 e.g. in the lines from Walt Disney's *Lady and the Tramp*:
"Now we lookin' over our new domicile
If we like we stay for maybe quite a while"(!)

10 Garner, *Dictionary of Legal Usage* (3rd ed., 2011) entry under *Domicile*.

expression "**UK domiciled**" is in a literal sense inapt because a person must be domiciled in England, Scotland or Northern Ireland. It is, however, universally used to describe someone who is domiciled in England, Scotland or Northern Ireland.[11] For tax purposes it makes no difference where in the UK one is domiciled, though for non-tax purposes that may be important.

3.4 Domicile of origin

Dicey states:

> (1) Every person receives at birth a domicile of origin:
>
> (a) A legitimate child born during the lifetime of his father has his domicile of origin in the country in which his father was domiciled at the time of his birth;
>
> (b) A legitimate child not born during the lifetime of his father, or an illegitimate child, has his domicile of origin in the country in which his mother was domiciled at the time of his birth; ...[12]

This rule embodies gender assumptions which reflect the time of its origin. This is also one of the few areas of English law where legitimacy still matters. The position in Scotland has been revised and avoids the sex and marital status discrimination.[13] I expect English law will eventually follow.

Dicey continues:

> (2) A domicile of origin may be changed as a result of adoption or by issue of a parental order under the Human Fertilisation and Embryology Act 2008, but not otherwise.[14]

3.5 Domicile of choice

Dicey states:

---

11 Section 721(3) ITEPA (somewhat pedantically) states this expressly:
"Any reference in this Act to being domiciled in the UK is to be read as a reference to being domiciled in any part of the UK."
The tax law rewrite team must have realised this was unnecessary as (quite correctly) they did not put an equivalent clause in any subsequent rewrite legislation. Section 721(3) ought to be repealed as otiose.

12 Dicey, Morris & Collins, *Conflict of Laws* (15th ed., 2012), para 6R-025.

13 See 3.14 (Child's domicile of dependency).

14 Dicey, Morris & Collins, *Conflict of Laws* (15th ed.., 2012), para 6R-025.

> Every independent person can acquire a domicile of choice by the combination of residence and intention of permanent or indefinite residence, but not otherwise.[15]

I shall consider "residence" and "intention" separately.

3.5.1 *"Residence"*

"Residence" here means "residence as an inhabitant" which is something more than "presence as a traveller".[16] This is not necessarily the same as residence for tax purposes. In practice it will usually come to the same thing, since tax residence (before and after the SRT) is supposed to represent the ordinary meaning of the word residence. So far as possible it would be best to avoid having two concepts of residence, one for tax and one for domicile. But there are some differences:

(1) For domicile purposes one becomes resident on a particular date, whereas for tax purposes one becomes UK resident for a tax year.

(2) Assuming a person resides as an inhabitant, there is no minimum period of residence required: residence commences immediately on arrival if the intention is to stay.[17]

A peripatetic person whose chief home is in the UK may acquire a UK domicile of choice, even though they do not spend sufficient days here to become UK resident under the statutory residence test (which will often

---

15 Dicey, Morris & Collins, *Conflict of Laws* (15th ed., 2012), para 6R-033.

16 In the case of acquisition of a domicile of choice, the precise definition of residence is never a real issue, because a person acquiring a domicile of choice in a country must *ex hypothesi* have the intention to reside there permanently; so if they are present in the country at all, they must be "resident as an inhabitant" and not "present as a traveller". But the definition of residence is important for abandonment of domicile of choice.

17 *Fasbender v AG* [1922] 2 Ch 850 at p.857-8: "I have great doubts whether her domicile at the time of the marriage was English. She had left England, and become resident in Germany at the time, though she had only been there a few days. She had done so with the intention of being married to a German resident in Germany, and of continuing to reside there with him after marriage, and I think this is, at any rate, evidence that she had adopted a German domicile." Likewise *Bell v Kennedy* (1868) LR 1 Sc & Div 307 at p.320: "Now this case was argued at the Bar on the footing, that as soon as Mr. Bell left Jamaica he had a settled and fixed intention of taking up his residence in Scotland. And if, indeed, that had been ascertained as a fact, then you would have had the *animus* of the party clearly demonstrated, and the *factum*, which alone would remain to be proved, would in fact be proved, or, at least, would result immediately upon his arrival in Scotland."

allow a foreigner as much as 119 UK days each year without regarding them as UK resident).

3.5.2 *"Permanent or indefinite" residence*

"Permanent" residence is straightforward but the concept of "indefinite" residence needs comment.

"Indefinite" (in short) requires that the individual intends to reside in a country "until the end of his days". It seems to me that "indefinite" is an unfortunate word to use because in its normal sense it is used to describe any period whose duration is not known exactly, even a short period. For instance the duration of a strike is indefinite;[18] so is the duration of a contract of employment. That is not the meaning here. However there is no single English word which neatly encapsulates the intended meaning. "Unlimited" is sometimes used and is more apt, but this too needs clarification. *IRC v Bullock* 51 TC 522 commented on the classic statement that a domicile of choice is acquired when:

> a man fixes voluntarily his sole or chief residence in a particular place with an intention of continuing to reside there for an *unlimited* time.[19]

Buckley LJ said at p.540:

> I accept that statement ... with this qualification only that the expression "unlimited time" requires some further definition. A man might remove to another country because he had obtained employment there without knowing how long that employment would continue but without intending to reside there after he ceased to be employed. His prospective residence in a foreign country would be indefinite but would not be unlimited in the relevant sense. On the other hand, ... I do not think that it is necessary to show that the intention to make a home in the new country is irrevocable or that the person whose intention is

---

18 This is self-evident, but if authority is needed, see *Howard E. Perry v. British Railways Board* [1980] 1 WLR 1375 at p.1380 which described the period of a strike as "clearly ... indefinite. It may be short, or it may be long; but it is plainly uncertain." The Law Commission made the same point in *The Law of Domicile* (1987) Law Com 186 accessible *http://www.scotlawcom.gov.uk/download_file/view/228/* para 5.12: "'Indefinitely' by itself is insufficient: it could, on one view, cover an intention to live in a country for a short time for some temporary purpose, for example a short holiday of indefinite duration."

19 *Udny v Udny* (1869) LR 1 Sc & Div App 441 at p.458. (Emphasis added.)

> under consideration believes that for reasons of health or otherwise he will have no opportunity to change his mind.

And crucially:

> In my judgment, the true test is whether he intends to make his home in the new country until the end of his days unless and until something happens to make him change his mind.[20]

The requirement to intend to reside somewhere "indefinitely" is very strict. In *IRC v Bullock* 51 TC 522 the taxpayer resided in England for 40 years but hoped to return home to Nova Scotia (to which his wife objected) should he survive her or persuade her to change her mind. This contingency had sufficient substance to represent a real determination to return home rather than a vague hope or aspiration. Mr Bullock did not acquire a UK domicile of choice but retained his domicile of origin.[21]

This may be contrasted with *Furse v IRC* where the taxpayer intended to live in England for the rest of his life except that he would return to America in the event that he were to become physically incapable of taking an active interest in his farm. This was held to be too insubstantial:

> That contingency is altogether indefinite. It has no precision at all. A man's idea of an active physical life is likely to contract with the years. At the age of 80, after 40 years in England, the testator was still living at West Hoathly and, although he had been ill, he had no firm plans at all for leaving England.
>
> The testator's expressed intention, it seems to me, depended entirely on his own assessment of whether an ill-defined event had occurred. I think it really amounted to no more than saying, 'I will leave England when I feel I want to leave England'. That is substantially the same as Buckley LJ's example of the man who says he will leave 'when I've had enough of it'.[22]

Accordingly Mr Furse acquired a domicile of choice in England. Again:

---

20 This test was reaffirmed in *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [10] to [15].

21 There are many examples of long periods of UK residence without acquiring a UK domicile: *Buswell v IRC* 49 TC 334; *Cyganik v Agulian* [2006] ITELR 762; *Ramsay v Liverpool Royal Infirmary* [1930] AC 588 (36 years); *Winans v AG* [1904] AC 287 (37 years).

22 [1980] STC 596 at p.604.

> If a man intends to return to the land of his birth upon a clearly foreseen and reasonably anticipated contingency, e.g., the end of his job, the intention required by law [to acquire a domicile of choice] is lacking; but, if he has in mind only a vague possibility, such as making a fortune (a modern example might be winning a football pool), or some sentiment about dying in the land of his fathers, such a state of mind is consistent with the intention required by law.[23]

3.5.3 *Tax and intention*

Tax may be relevant to intention. For instance if a Swedish tax exile remains in the UK, intending to return home if and when Sweden's tax regime is relaxed, they would not acquire a domicile of choice here. Likewise if an individual intended to remain in the UK only so long as UK tax law continues to allow a remittance basis, they would not acquire a domicile of choice here.

In *Spence v Spence* an individual moved to Spain to avoid CGT. The CGT avoidance motive showed an intention to remain in Spain long enough to lose ordinary residence in the UK (then, some 3 years) but as far as intention to reside permanently was concerned, it was a neutral factor. It shed no light either way. It was argued that if the avoidance of a tax liability was a dominant factor in the move to Spain, this undermined the proposition that it should be inferred that the individual had from the start the intention of making his permanent home there. That was a non-sequitur, as the Judge rightly held:

> ... the mere fact that a person moves to another country in order to avoid liability to tax in the country of origin does not necessarily mean that he cannot or is unlikely to acquire thereby a domicile of choice in that other country. It is plainly a matter which depends upon the facts and circumstances of the particular case.[24]

The acquisition of a foreign domicile which is motivated by tax considerations alone is possible in theory but may be difficult in practice as the intention to live in the territory may prove to be insufficiently firm. Sir Charles Clore is an example:

> ... Sir Charles was ... unhappy in Monaco and often said that he would

---

23 [1980] STC 596 at p.604.

24 [1995] SLT 335 at p.339.

> really like to return to England permanently and accept the tax consequences. [A witness] asked him why he had decided to go there when all his interests were elsewhere. Sir Charles said that he did not know and that he was thinking of changing his mind and returning to live in England... he did not feel at home in Monaco.[25]

On those facts the Court found that Clore did not acquire a domicile of choice in Monaco.

3.5.4 *Proof of intention*

In the event of a dispute the court must determine what is or was the individual's intention. In order to do so the court will have regard to every factor which might shed light on the individual's intention – except voting as an overseas elector.[26]

The burden of proof lies on HMRC to show that an individual has acquired a UK domicile of choice. The courts regard the acquisition of a domicile of choice as a serious matter which is to be found only on clear and compelling evidence.[27]

3.5.5 *Commentary: should acquisition of domicile of choice be reformed?*

The reason why the test of acquiring a domicile is so strict is in part a historical one:

> For centuries, people have gone into the world from this country intending ultimately to return and without any intention of severing their connection with the British legal system and the ideas underlying it. It would not be in harmony with the temper of the British people if those who happen to be living abroad had to be told that there was no method whereby they could continue to regulate their lives according to the familiar British conceptions. It should also be remembered that a country which does not apply nationality as a yardstick in matters of private international law is bound to substitute for it a strict test involving a measure of permanence.[28]

---

25 *Re Clore (No. 2)* [1984] STC 609 at p.615.

26 See 3.6.1 (Involvement in politics).

27 But just how "clear and compelling" the evidence needs to be depends on the facts of the case in point: *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [84] to [96].

28 First Report of the Private International Law Committee (1954) Cmd 9068, para 7; accessible *http://www.kessler.co.uk/tfd-archive*.

The fact that the rules were designed to accommodate the empire builders of the 19th century does not show that they are now unsuitable; but it is often said that they operate too strictly.

In 1954 the Private International Law Committee proposed that if an individual had his home in a country, he should be presumed to have acquired an intention to reside there permanently. A bill to that effect was introduced in 1958 but failed as a result of lobbying by UK resident foreign domiciled individuals. The government argued that the fears of foreign businessmen were groundless, as the reforms would effect them, but that was a damaging defence, as if the reforms did not have much effect, why were they worth making?[29]

A similar reform was proposed by the Law Commission in 1987.[30] The Government initially accepted the 1987 proposals but there was no change in the law. In 1996 the proposals were formally abandoned, probably for the same reason.[31]

Neither of these reforms were tax motivated. If they had any effect, it should have been broadly Revenue neutral, as to the extent that they may have made it easier to acquire a UK domicile of choice, they also made it easier to acquire a foreign domicile of choice. But they suffered from the problem of many tax reforms, that potential losers (UK resident foreign domiciliaries) complain more than potential winners.

In considering this reform one should bear in mind that "the importance of onus of proof is easily exaggerated. While the burden of proof always exists, few substantial cases turn upon it and in making their factual findings the judge is usually expressing their considered judgment as to

---

29 The history of the controversy is recorded in Mann "The Domicile Bills"(1959) 8 ICLQ 457.

30 Law Com. No. 168 *The Law of Domicile*, accessible *http://www.scotlawcom.gov.uk/download_file/view/228/*

31 According to Hansard HC, 16 Jan 1996 Col 487:

> "The Government have decided not to take forward these reforms on the basis that, although they are desirable in themselves, they do not contain sufficient practical benefit to outweigh the risks of proceeding with them and to justify disturbing the present long established body of case law on this subject."

This was the right reason for the right decision. However, the true reason for the decision may well have been pressure of the foreign domicile lobby: see "Rules for Determining Domicile", Law Reform Commission of Hong Kong (2005) para 4.28 accessible *http://www.hkreform.gov.hk*.

what in truth occurred".[32] If that is right, the reform of amending the burden of proof in domicile cases would have little if any practical effect, at least as a matter of law. It might have a significant effect in practice, if it spurred HMRC to challenge foreign domicile claims more readily.

3.6 Retaining foreign domicile of origin while UK resident

Suppose an individual with a foreign domicile of origin comes to the UK and wishes to retain their foreign domicile. The concern is not to acquire a UK domicile of choice.

The primary advice to be given is clear: the individual may live in the UK as long as they wish from year to year but should not form the intention to settle here permanently. Unless they do so, the essential condition for the acquisition of a new domicile will not be satisfied.

However, the individual should not be content with this mental step unless their stay here is short or fixed term. They should also take appropriate steps to broadcast the absence of any intention of residing here permanently and to manifest an intention to return elsewhere in due course. This is important because the court will decide for itself the true intention of the individual and will be influenced by the way that the individual conducts their affairs while in the UK.

The individual should if possible retain ties with their country of origin. There are many ways to do so and they need not adopt them all. Possibilities for consideration include regular and extended visits home; local business interests, bank accounts and investments; membership of local social, political and religious organisations. The individual should make a will taking effect under local law.[33] The will should include a declaration that the individual intends to return home in due course or the circumstances in which that is to occur. The will might if appropriate express a desire to be buried in that country. The declaration should be drafted in accordance with the individual's specific circumstances; a standard form declaration of domicile is inadequate.[34]

---

32 Bingham, "The Judge as Juror", *Current Legal Problems* (1985) p.2; reprinted in *The Business of Judging*, (2000) p.2 (good holiday reading).

33 A separate UK will may also be appropriate to deal with UK property.

34 For an example of a simple declaration rightly disregarded, see *Reddington v MacInnes* [2002] ScotCS 46 accessible *http://www.bailii.org*. (If those drafting the will had considered domicile more carefully, the litigation might have been avoided.) For precedents, see Kessler & Sartin, *Drafting Trusts & Will Trusts* (11th ed., 2012)

Conversely, the individual's social and business commitments in the UK should be minimised. The purchase of a home in this country might indicate a greater degree of permanence than rented accommodation, but purchasing a property may imply nothing more than an intention of medium-term residence. The development of other long-term commitments to the community, such as changing one's name (or its spelling) to accord with UK usage, are to be avoided.

The purchase of a burial plot provides some indication of an intention to be buried in that country. If that is the country of residence it might indicate an intention to remain in that country for the rest of the individual's life. If the burial plot is in the country of origin it provides some evidence of an intention to return home in due course. However, this is not necessarily a matter which carries much weight and if done at the suggestion of a tax advisor, it carries no weight at all.

The assembling of evidence of an intention to return to the country of origin, while obviously helpful, is not strictly necessary and in some cases will be unnecessary, maybe even inappropriate. The retention of the foreign domicile of origin is not dependent on establishing a positive intention to return home; rather, it is determined negatively by the absence of an intention to stay in the UK. An intention to move from the UK, whether to the country of origin or somewhere else, would be enough to enable the domicile of origin to be retained.

3.6.1 *Involvement in politics*

The general rule is that involvement in UK politics is compatible with a non-UK domicile though it is a factor to be taken into account in ascertaining domicile. However, MPs and members of the House of Lords are deemed UK resident and domiciled[35] and the position of other foreign domiciled politicians is politically fraught.[36]

The rule that (in short) non-resident and foreign domiciled individuals may not make gifts (above a nominal amount) to a political party[37] is a restriction on the rights of non-residents and foreign domiciliaries to

---

para 18.26 (Best form of will for foreign domiciled testator).

35 See App 3.1 (Tax status of MPs and members of the House of Lords).

36 This has been the case at least since the 1920's where the peerage given to Lord Vestey (who had been a tax exile) gave rise to some debate: see "*Vestey: Royal Commission evidence and debate*" accessible *http://www.kessler.co.uk/tfd-archive*.

37 Section 54 Political Parties, Elections and Referendums Act 2000.

engage in UK politics.

On the other hand, registration and voting as an overseas elector[38] is (in short) ignored in a domicile tax appeal, unless the taxpayer wishes otherwise.[39] This rule was intended to encourage UK expatriates to vote without imperiling their claim to be non-UK domiciled. There is considerable force in the objection made at the time by Labour MP Mike O'Brien:

> Whereas the American colonies in 1774 cried, "No taxation without representation," it seems that ... overseas voters are now demanding representation without taxation... [Section 200] has all the hallmarks of a cynical amendment motivated by the self-interest of the Tory party. ... registration to vote shows a commitment to one's country. It can be evidence of domicile. In each case, that evidence will have a different weight, depending on the other circumstances of the individual, but it is right that registration should have some weight and show some degree of commitment to one's country.[40]

The rule ought to be repealed, but in the scrabble for political advantage it would be unrealistic to expect cool and impartial reflection, and it does not much matter.[41] Those who are concerned about possible UK domicile would still be best advised not to register or vote.

---

38 This is an interesting corner of election law. Before 1985 non-residents could not vote in Parliamentary elections. The Representation of the People Act 1985 extended the franchise to "Overseas electors" who are (in short) non-resident British citizens who had registered, as voters when UK resident; they who may continue to vote until they have been non-resident for 15 years.
See House of Commons Library "Overseas Voters" (2013) SN05923

39 See s.200 FA 1996; the section was (unhelpfully) rewritten for IT purposes in s.835B ITA 2007.

40 Hansard, HC Deb 27 March 1996 vol 274 cc1106-10.
http://www.publications.parliament.uk/pa/cm199596/cmhansrd/vo960327/debtext/60327-41.htm The subsequent election (1997) was the Blair landslide, and O'Brien was no doubt also right to question whether this provision helped the Tories.

41 There are over 5m overseas British citizens, but only 20,000 are overseas electors; it is open to question whether there has ever been a case where the rule makes any difference for tax purposes.
The US has a similar rule in s.106 [US] Uniformed and Overseas Citizens Absentee Voting Act 1986, but since the US taxes its non-resident citizens, its practical significance must be rather less.

3.7 Acquisition of foreign domicile of choice

The domicile rules are favourable to foreign domiciliaries since they may stay many years in this country without acquiring a UK domicile and becoming exposed to the concomitant tax burden. But the rules are correspondingly unfavourable to the individual who wishes to replace their UK domicile of origin by the acquisition of a foreign domicile of choice. Such a person must not only reside in that other country; they must hold and manifest their intention to remain resident there permanently.

An individual cannot shed their UK domicile of origin without acquiring a domicile of choice in another territory; it is not enough to intend to leave the UK permanently, never to return. The domicile of origin is not lost by abandonment but by replacement. Departure from the UK must therefore be accompanied by permanent residence in the chosen territory. If any time is spent in the UK, the UK must not be the chief residence

In order to acquire a domicile of choice in a jurisdiction, one must *want* to live there. If a UK domiciliary has plans of a business or personal nature which lead them to want to settle abroad, then acquiring a foreign domicile may be feasible. Links with the UK must be kept to a minimum, particularly at first, and the facts must be clear. Fawcett concluded in 1985 that an unspoken policy of not allowing individuals with a UK domicile of origin to escape UK tax was influential in determining the result in domicile tax cases[42] and subsequent cases suggest this is still true.[43]

3.8 Loss of domicile of choice

Dicey states:

> (1) A person abandons a domicile of choice in a country by ceasing to reside there and by ceasing to intend to reside there permanently or indefinitely, and not otherwise.

For the meaning of "reside" and "indefinitely" see 3.5 (Domicile of choice). Dicey continues:

---

42 "Result Selection in Domicile Cases" (1985) OJLS vol 5 p.378. Accessible *http://www.ojls.oxfordjournals.org/content/5/3/378.full.pdf*.

43 Cases in which an apparently strong claim of a UK domiciliary to acquire a foreign domicile of choice failed include: *Portland; Plummer; Gaines-Cooper*.

(2) When a domicile of choice is abandoned, either
  (i) a new domicile of choice is acquired; or
  (ii) the domicile of origin revives.[44]

The concern of a person who has a UK domicile of origin but has acquired a foreign domicile of choice is that they may lose their domicile of choice. They must:
(1) maintain their residence in the country of domicile of choice; or
(2) maintain the intention to reside there permanently; or
(3) acquire a new foreign domicile of choice.

3.9 Dual residence and domicile

The tests of residence and intention to reside are straightforward if a person resides (and intends to reside) in only one country. What if the person resides (or intends to reside) in more than one country? Increased mobility makes this a greater problem than in the past.

3.9.1 *Acquisition of domicile of choice by dual resident*

In *Udny v Udny* Lord Westbury said that a domicile of choice is acquired when:

> a man fixes voluntarily his sole *or chief* residence in a particular place, with an intention of continuing to reside there for an unlimited time.[45]

If a person resides in a number of countries, it is considered that they acquire a domicile of choice in country A if and only if:
(1) country A is their chief residence; and
(2) their intention is permanently to reside in country A as their chief residence.

If a person has a secondary residence in a country (for example, a holiday home is used every summer or winter), they do not acquire a domicile in that country even if they intend to retain that residence indefinitely. But if they acquire (and intend to retain) a chief residence in a country they become domiciled there even if they retain a secondary residence elsewhere.

Plummer v IRC 60 TC 452 comments on the *Udny* dictum:

---

44 Dicey, Morris & Collins, *Conflict of Laws* (15th ed.), para 6R-074.
45 (1869) LR 1 Sc & Div App 441 at p.458 (Emphasis added).

> ... a person who retains a residence in his domicile of origin can acquire a domicile of choice in a new country only if the residence established in that country is his chief residence. [Counsel for the taxpayer] submitted that a person whose presence in a new country is sufficient to amount to residence may, notwithstanding that his chief residence remains in his domicile of origin, acquire a domicile of choice by evincing an intention to continue to reside permanently in the new country. I think that this submission is inconsistent with the passage which I have quoted from Lord Westbury and which has always been treated as an authoritative statement of the circumstances in which a domicile of choice may be acquired.

This should not be controversial.[46]

3.9.2 *Loss of domicile of choice by dual resident*

The judge continued:

> Rule 13(1) of Dicey and Morris, if read literally, appears to go too far. This says that:
>
> > "A person abandons a domicile of choice in a country by ceasing to reside there and by ceasing to intend to reside there permanently or indefinitely, and not otherwise."
>
> These words might suggest that a domicile of choice (and presumably a fortiori a domicile of origin) cannot be lost unless the person in question has ceased altogether to reside there. I do not think that the rule was framed with dual residence in mind. At any rate, it seems to me that *Udny v Udny* (1869) LR 1 Sc & Div App 441 shows that loss of a domicile of *origin or choice* is not inconsistent with retention of a place of residence in that country if the chief residence has been established elsewhere.
>
> (Emphasis added)

This passage is obiter and has caused confusion. One needs to consider domicile of origin and domicile of choice separately:

---

46 "It is possible for a person to have two homes, each in a different territory. In that event, the relevant enquiry is which of the two homes is the chief residence": *Re Shaffer* [2004] WTLR 457 at [11]. The same point is made in *IRC v Bullock* 51 TC 522 at p.539F where the expression used is "principal home".
In *IRC v Duchess of Portland* 54 TC 648, Nourse J said that the test was, in which of the two countries did the individual reside "as an inhabitant". That comes to the same thing, but to ask which of the two countries is the chief or principal residence is a clearer and more direct way to approach the question.

(1) *Loss of domicile of origin.* The only way to "lose" a domicile of origin is to acquire a domicile of choice. This passage (so far as it concerns a domicile of origin) is correctly stating the point made at 3.9.1 (Acquisition of domicile of choice by dual resident).
(2) *Loss of domicile of choice.* There are two ways to "lose" a domicile of choice:
    (a) by acquiring a new domicile of choice;
    (b) by abandonment without acquiring a new domicile of choice.

The judge here is considering acquisition of a new domicile of choice.[47] The passage (so far as it relates to a domicile of choice replaced by a new domicile of choice) correctly states the point made at 3.9.1 (Acquisition of domicile of choice by dual resident) above.

What is the test for abandonment of a domicile of choice (without acquiring a new domicile) in a dual residence context? It is considered that Hoffmann is correct to say that T abandons his domicile of choice where:

(1) T acquires a domicile of choice in country A.
(2) T continues to reside in country A but
    (a) they cease to reside there as their chief residence; and
    (b) they cease to intend to reside there as their chief residence.
(3) T does not acquire a domicile of choice elsewhere.

This is consistent with the test of acquisition of domicile: see 3.9.1 (Acquisition of domicile of choice by dual resident).

3.9.3 *Which is the "chief" residence?*

The next question is exactly how one ascertains which of two competing residences is the chief one. The test is multifactorial: no single factor is decisive. In *Barlow Clowes International v Henwood* the Court said:

> [The] test of chief residence ... cannot simply be a reference to the main home in terms of size or amenities. Nor can it be a reference to the home in which the subject spends the most time. The court has to look at the quality of the residence in order to decide in which country the subject has an intention to reside permanently.[48]

---

47 Hence the words at the end of the passage ("if the chief residence has been established elsewhere").

48 [2008] EWCA Civ 577 at [104].

There is guidance in *Plummer v IRC* 60 TC 452. Here, Miss Plummer had a domicile of origin in England. She intended to live in Guernsey, but was studying at university in London, so she spent only some weekends and holidays in Guernsey. In all, two-thirds of her time was spent in England and one-third in Guernsey. It was held that England remained her chief residence so she did not acquire a domicile of choice in Guernsey. However the test was not just a matter of counting days:

> [Counsel for the taxpayer] submitted that the commissioners paid no regard to anything except the relative amounts of time which the taxpayer spent in England and Guernsey during the years in question. They ignored the quality of her presence in each country: the fact that she was in England solely for the purpose of education and in Guernsey because it was her family home. I do not think that this is a fair reading of the commissioners' decision. They set out at length the taxpayer's ties with Guernsey and her reasons for remaining in England. In deciding whether the house in St. Peter Port had become her chief residence, they said:
>
> > "We accept the [taxpayer's] evidence that she likes Guernsey and enjoys the amenities of the island when she is there, quite apart from enjoying the company of her family ... We do not underestimate the part which Guernsey plays in her thinking.."
>
> Nevertheless they said that these considerations did not outweigh the fact that the taxpayer had resided for the greater part of the year in England and that there had been no "break in the pattern" which would justify a finding that she had ceased to have her chief residence in England. She had not, to use the language of Lord Hatherley in *Udny v Udny*,[49] settled in Guernsey.
>
> I think that this was a conclusion to which the commissioners were on the evidence entitled to come. I go further and say that in my judgment it was the right conclusion. If the taxpayer had ... broken altogether with England and settled in Guernsey like her mother and sister and then, even after a relatively short interval, returned to England for study, the quality of her presence here might have been such as to prevent a revival of her domicile of origin. But the fact is that she has not yet settled in Guernsey, and the reasons why she has been unable to do so are in my view irrelevant. ... To treat the house in Guernsey as her chief residence simply because it is the sole residence of her mother and sister would in

49 LR 1 Sc & Div 441.

> my view be attributing to her a kind of quasi-dependent domicile for which there is no legal justification. And the fact that the taxpayer may intend to settle in Guernsey after her education and training are completed and then to remain permanently is not sufficient to give her a proleptic domicile of choice.

The concept is similar to the OECD tie-breaker test of "centre of vital interests" and some guidance can be had from discussion of that test; see 6.10 (Centre of vital interests).

The concept is also similar to the question of which of two private residences is the main residence. This point arose in *Frost v Feltham* where Mr Feltham spent two or three days a month at his property "Mount Severn". He spent the rest of the time in "The White Horse", a public house of which he was licensee. The judge noted that "viewed in isolation those are not long periods of time to spend at a house which can properly be described as the principal or more important residence of the persons concerned". Nevertheless, Mount Severn was his main residence:

> A residence is a place where somebody lives, and it is clear that Mr Feltham lived for the greater part of the year at the White Horse, Roydon. Therefore, he could not have used Mount Severn as his only residence. But that does not at all mean that he could not have used it as his principal or more important residence, even though he spent very little time there. If someone lives in two houses the question, which does he use as the principal or more important one, cannot be determined solely by reference to the way in which he divides his time between the two. I can test that by reference to an example far removed from the facts of this case and the conditions of our own times. In his "Lives of the Lord Chancellors" Lord Campbell tells how Lord Eldon was often prevented by the burdens of his office from visiting his estate at Encombe in Dorset for long periods at a time. Sometimes he was only able to get down there for three weeks or so in the year, for the partridge shooting in September. True it was that Lord Eldon also had a good house in Hamilton Place, but it could not really have been suggested that he did not use Encombe as his principal or more important residence.[50]

3.10 Presence in UK because of illness

In *Moorhouse v Lord,* Lord Kingsdown said:

---

50 55 TC 10 at p.13.

> Take the case of a man labouring under a mortal disease. He is informed by his physicians that his life may be prolonged for a few months by a change to a warmer climate and that at all events his sufferings may be mitigated by such a change. Is it to be said that if he goes out to Madeira he cannot do that without losing his character as an English subject, without losing his right to the intervention of the English laws as to the transmission of property after his death, and the construction of his testamentary instruments. My lords, I apprehend that such a proposition is revolting to common sense, and the common feelings of humanity.[51]

Someone who comes to or stays in the UK for medical treatment only will not acquire a domicile of choice here. This is so even if the individual comes or stays for treatment of a final illness and knows that they will not recover to return home. Nor will such a person lose their domicile of choice.

However, that applies only to one who stays here purely for medical treatment or palliative care.[52] If, say, an individual comes to England who is housebound and needs long-term care, or because the weather in Bournemouth is better for their health than Falkirk,[53] the individual may acquire an English domicile; it depends of course on intention in each case.

3.11 Domicile and citizenship

3.11.1 *Retention of existing citizenship*

In *IRC v Bullock*, the court said:

> Domicile is distinct from citizenship. The fact that the taxpayer chose to retain his Canadian citizenship and not to acquire UK citizenship would not be inconsistent with his having acquired a domicile in the UK, but his adherence to his Canadian citizenship is, in my opinion, one of the circumstances properly to be taken into consideration in deciding

---

51 (1863) 10 HLC 272 at p.292. Similarly *Udny v Udny* (1869) 1 LR Sc & Div 441 at p.458: "There must be a residence freely chosen, and not prescribed or dictated by any external necessity, such as ... the relief from illness ..."

52 Citation of Tribunal or Special Commissioners' decisions on domicile is not generally appropriate, as there are more than enough cases of higher authority. However, *Allen v HMRC* [2005] STC (SCD) 614 offers a convenient illustration.

53 As in *Reddington v MacInnes* [2002] ScotCS 46.

whether he acquired a UK domicile.[54]

3.11.2 *Change of citizenship*

The acquisition of citizenship is known as naturalisation. The House of Lords have said:

> Naturalisation is one thing; change of domicile is another: it is not the law either that a change of domicile is a condition of naturalisation, or that naturalisation involves necessarily a change of domicile.[55]

This is correct. However when British citizenship is acquired, it is necessary to look in a little detail at the circumstances of the case.

3.11.3 *Acquisition of British citizenship where home must be in the UK*

The current legislation is the British Nationality Act 1981. In order for a person to become a British citizen under this Act, it is often a requirement that:

> his intentions are such that, in the event of a certificate of naturalisation as a British citizen being granted to him, his home or (if he has more than one) his principal home will be in the UK.[56]

A person whose intention is that *their home will be in the UK* will generally acquire a UK domicile of choice. Although conceptually the requirement that ones "home is in the UK" is distinct from, and can fall short of, an intention to reside in the UK "indefinitely" (in the domicile sense) the gap is exiguous and for practical purposes someone who has the one intention will have the other.

There are exceptions where a person who is naturalised on the basis that they intend their home to be in the UK may nevertheless not acquire a UK domicile of choice:

---

54 51 TC 522 at p.540. The point was also made in *Udny v Udny* 1 Sc & Div 441 at p.452: "The question of naturalization and of allegiance is distinct from that of domicile;" likewise at p.457. Similarly, in *Gaines-Cooper v HMRC* the Special Commissioners noted that the taxpayer retained British citizenship, and did not apply for citizenship in the Seychelles. Perhaps more significantly, his wife applied for British citizenship: [2008] STC 1665 at [141].

55 *Wahl v Attorney-General* (1932) 147 LT 382; [1938] All ER 922 at p.926 accessible *http://www.kessler.co.uk/tfd-archive*.

56 See Sch 1 British Nationality Act 1981.

(1) In *F v IRC*[57] the individual lied in his naturalisation application; in the circumstances he did not acquire a UK domicile of choice.
(2) A person who intends their home to be in the UK might not have decided whether to reside in England, Scotland or Northern Ireland: one cannot acquire a UK domicile of choice unless and until one intends to reside in one specific jurisdiction. However, in practice this will rarely if ever arise, since a person who intends their home to be in the UK (and by the time that they have made an application for naturalisation) will normally have decided where in the UK that home is to be.

A naturalised citizen may of course later change their intention and lose their UK domicile of choice.

3.11.4 *Acquisition of British citizenship where home need not be in the UK*

In some cases an applicant for naturalisation is not required to intend that their home will be in the UK. This was the case under the pre-1981 law and is sometimes the case under the present law.[58] In these cases it is strictly speaking correct to say that the individual who becomes a naturalised citizen does not necessarily acquire a UK domicile of choice. However the fact of naturalisation still tends to suggest that the individual has formed the intention to live in the UK permanently: the issue is one for the Tribunal to decide in the light of all the facts.

The case law in this area needs some care as a cursory reading will mislead.

Wahl v Attorney-General concerned an individual naturalised under the Naturalization[59] Act 1870. Naturalisation then required an intention to reside in the UK. However in his application he went further and declared

---

57 [2000] STC (SCD) 1.

58 A full discussion of naturalisation law is not possible here, but one alternative requirement is that the person intends, in the event of naturalisation, "to enter into, or continue in,

[a] Crown service under the government of the UK, or

[b] service under an international organisation of which the UK or Her Majesty's government therein is a member, or

[c] service in the employment of a company or association established in the UK."

See Sch 1 British Nationality Act 1981. In some cases a person may become a British citizen by registration without any intention as to residence.

59 This is the spelling of the 1870 Act.

that he intended to reside permanently in the UK and had no intention of permanently leaving the UK. The House of Lords somewhat implausibly[60] found nevertheless that he did not intend to make his home in the UK and did not acquire a UK domicile of choice. But that was a finding of fact (not law) which depended on all the facts of the case.[61]

The point was reargued in *Steiner v IRC* concerning an individual naturalised under the British Nationality and Status of Aliens Act 1914. Here the statutory naturalisation requirement was merely "to reside in His Majesty's dominions" but the individual went further and stated in his application that he intended "to reside *permanently* in His Majesty's dominions" (which, in the context, meant England). The Court rightly brushed *Wahl* aside:

> The Special Commissioners attached some importance to the declaration associated with the naturalisation application, and so do I ... I bear in mind, of course, the views expressed in the House of Lords in *Wahl v Attorney-General*. But the significance of such matters must be judged in the context of any particular case and the background against which the application for naturalisation and the statements therewith is to be viewed. ... I think it would be quite wrong for this Court to dismiss the view of the Special Commissioners ...

And again:

> Now, it is true that in *Wahl v Attorney-General* a similar application and a statement in somewhat similar terms were regarded by the majority of the House of Lords as not affording any strong evidence of intention to reside permanently in England; but Lord Macmillan, in a dissenting speech, was of opinion that considerable weight should be attached to these matters, and Lord Atkin, who was one of the majority, said, at page 385: "I am far from saying that an application for naturalisation is not a matter to be carefully considered as part of the evidence in a case of domicile"; and the opinion of Lord Atkin was entirely concurred in by Lord Dunedin. In those circumstances, it appears to me that the Special Commissioners acted entirely properly in taking into account the fact of the application for naturalisation, to which they indicated that they did not attach great weight, and further in taking into account the statement

60 (1932) 147 LT 382; [1938] All ER 922 accessible *http://www.kessler.co.uk/tfd-archive*. Lord Macmillan dissented and the failure of the mainstream law reports to report the case may be taken as tacit disapproval.

61 Nowadays the Supreme Court would not concern itself with issues of fact.

made as to the applicant's intentions as to residence.[62]

3.11.5 *Commentary*

Citizenship is a status which confers a bundle of rights and responsibilities, the nature of which may be the subject of an interesting debate. But naturalisation does involve entering into a reciprocal relationship by which an individual offers loyalty to a state in exchange for protection.[63] It is suggested that there should be a rule that naturalised citizens are deemed to be UK domiciled for UK tax purposes.[64] On this point the lighter fiscal regime for foreign domiciliaries could be better targeted. Of course this would only affect naturalised citizens (I expect only a small minority, but there are apparently some[65]) who are not UK domiciled under general principles; and their children who should have a deemed UK domicile of origin.

This would also reverse the unsatisfactory result in *F* (who was held not UK domiciled because he lied about his intentions in his naturalisation application).[66]

3.12 Refugees, illegal immigrants and temporary visas

Refugees may be forced to sever most of their links with their country of origin. But while that may show they had no intention to return to their

---

62 49 TC 13. Likewise *Gulbenkian v Gulbenkian* [1937] 4 All ER 618 at p.627: " When ... Gulbenkian expressed upon oath that he intended to reside permanently in Great Britain, I can see no reason why that declaration should not be taken at its full value as a desire to acquire a domicile of choice in this country."
For completeness, *Wahl* was cited in *F v IRC* [2000] STC (SCD) 1 but *Steiner* was not cited and *F* has nothing to add.

63 See *Citizenship: Our Common Bond* (the Goldsmith report), 2008, accessible *http://www.kessler.co.uk/tfd-archive*; *Theorizing Citizenship* (ed Beiner) 1995.

64 The deeming would cease if citizenship was renounced.
An alternative would be to say that a naturalised citizen is deemed UK domiciled for all purposes. But then the legislation would need to specify whether the deemed domicile was in England, Scotland or Northern Ireland which might occasionally be problematic.
This reform would not involve the contrary rule, that a person who becomes naturalised outside the UK automatically ceases to be UK domiciled: in such a case the usual rules of domicile can be left to apply.

65 *Al Fayed v Advocate General* [2002] STC 910 at [23] records the HMRC view in 1985 that naturalisation would have no effect on Mr Fayed's domicile.

66 *F v IRC* [2000] STC (SCD) 1.

country of origin, it would not, by itself, show that they had acquired an intention to reside in the UK permanently.

A person in a country illegally may become domiciled there, though the illegality is a factor in deciding whether they have a genuine intention of remaining there.[67]

In *Barlow Clowes International v Henwood*:

> He was not able to live there on a permanent basis without the permission of the Mauritian government. His residence was ... in that sense precarious. This does not make it impossible for him to acquire a domicile of choice in Mauritius but makes it less likely that he did so.[68]

3.13 Married women

3.13.1 *Marriage after 1 January 1974*

Until 1 January 1974, a married woman had the domicile of her husband (a "domicile of dependency"). However, s.1 Domicile and Matrimonial Proceedings Act 1973 now provides:

> (1) Subject to subsection (2) below, the domicile of a married woman as at any time after the coming into force of this section shall, instead of being the same as her husband's by virtue only of marriage, be ascertained by reference to the same factors as in the case of any other individual capable of having an independent domicile. ...
> (3) This section extends to England and Wales, Scotland and Northern Ireland.[69]

Although a wife does not automatically acquire the domicile of her husband, the decision to marry and set up a home in the UK may be evidence of an intention to reside in the UK permanently, but of course that depends on all the facts.[70]

---

67 *Mark v Mark* [2006] AC 98.

68 [2008] EWCA Civ 577 at [119].

69 For the background to this provision, see Law Commission report no. 48, *Family Law Report on Jurisdiction in Matrimonial Causes* (1972) accessible *http://www.bailii.org/ew/other/EWLC/1972/48.pdf*

70 This is obvious but if authority is needed, see *Cyganik v Agulian* 8 ITELR 762 at [46]. Likewise the fact that T's spouse is UK resident may tend to suggest that T has not acquired a foreign domicile of choice; see (if authority is needed) *Gaines-Cooper v HMRC* [2008] STC 1665 at [46] [47].

3.13.2 *Marriage existing on 1 January 1974*

The position of women who married before 1 January 1974 is more complex. Section 1(2) Domicile and Matrimonial Proceedings Act 1973 provides:

> Where immediately before this section came into force a woman was married and then had her husband's domicile by dependence, she is to be treated as retaining that domicile (as a domicile of choice, if it is not also her domicile of origin) unless and until it is changed by acquisition or revival of another domicile either on or after the coming into force of this section.

In *IRC v Duchess of Portland* 54 TC 648, a foreign domiciled wife married a UK domiciled husband before 1974, and so she acquired a UK domicile of dependency. She resided in the UK but never intended to reside in the UK permanently. After 1974 she continued to reside in the UK. She therefore retained her former domicile of dependency ("as a domicile of choice"). That domicile could only be abandoned by ceasing to intend to reside in the UK permanently (which she did) *and* ceasing to reside in the UK (which she did not).

In Ireland the wife's domicile of dependency was held unconstitutional[71] and it is an interesting question whether the UK transitional provision is consistent with the Human Rights Act 1998. In practice the issue may never arise.

3.13.3 *Marriage ended before 1 January 1974*

In *Re Wallach*[72] a widow died five days after the death of her husband. The judge held that a married woman retained her domicile of dependency when the marriage ceased, unless and until she changed it (by abandonment or by acquisition of a new domicile of choice).

It has been said that the test for abandonment of a domicile of dependency is more lenient than the test for abandonment of a domicile of choice.[73] However, it is considered that the *test* is the same: the individual must (1) cease to reside in the place of domicile of dependency and (2) cease to intend to reside there permanently. However, in the case of a domicile of dependency the individual may never have intended to

---

71 *JW v JW* (1992) 4 Irish Tax Reports p.437.

72 [1950] All ER 199.

73 *IRC v Duchess of Portland* 54 TC 648 at p.655.

reside there permanently, so requirement (2) may in practice be easier to satisfy. The test is more lenient in that the onus of proof is more easily satisfied.

3.13.4 *Woman a US national*

The US/UK DTA[74] undoes the effect of a UK domicile of dependency for a woman who is a US national. Article 4(6) of the treaty provides:

> A marriage before January 1st, 1974 between a woman who is a United States national and a man domiciled within the UK shall be deemed to have taken place on January 1st, 1974 for the purpose of determining her domicile for UK tax purposes, on or after the date on which this Convention first has effect in relation to her.

The US Technical Explanation of the Convention provides:

> under UK law, a female US citizen who married a UK domiciliary male before January 1, 1974, does not have the same opportunity to prove a domicile outside the UK as does a male US citizen who married a UK domiciliary female before January 1, 1974. Paragraph 6 of the Convention equalizes the treatment of male and female US citizens in this situation.[75]

As far as I am aware, the US Treaty is the only one which does this. Perhaps this reflects a cultural difference, a greater sensitivity to gender equality issues in the US.[76] This rule does not however apply where a *UK* woman marries a *US* man before 1 January 1974. In that case the woman keeps her domicile of dependency. In this situation a woman is in a better position than a man.

3.14 Child's domicile of dependency: England and Northern Ireland

The domicile of children is not usually important during their minority. However if a child acquires a domicile of dependency during their minority that domicile will continue until lost by abandonment or by acquisition of a new domicile of choice, so the issue occasionally arises

---

74 That is, the IT/CGT treaty of July 2001. The USA IHT DTA does not contain the same rule.

75 Department of the Treasury Technical Explanation of the Convention, accessible *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

76 The English common law rule that a married woman had the domicile of her husband was rejected by US case law.

long after a child has become an adult.

3.14.1 *Age at which independent domicile can be acquired*

Section 3 Domicile and Matrimonial Proceedings Act 1973 provides:

> (1) The time at which a person first becomes capable of having an independent domicile shall be when he attains the age of sixteen or marries under that age; and in the case of a person who immediately before 1st January 1974 was incapable of having an independent domicile, but had then attained the age of sixteen or been married, it shall be that date.
> (2) This section extends to England and Wales and Northern Ireland (but not to Scotland).

The time at which a person first becomes capable of having an independent domicile has gradually been reduced: it started at 21 (the common law age of majority), it reduced to the age of 18 on 1 January 1970[77] and to 16 on 1 January 1974. The age of 16 was set as the age at which a person may marry, and it was thought that a person old enough to marry should be regarded as old enough to acquire a domicile of choice.[78]

3.14.2 *Domicile of dependency: General rule*

Dicey states:

> Subject to [s.4 Domicile and Matrimonial Proceedings Act 1973 discussed below] the domicile of an unmarried child under 16 is determined as follows:
> (1) the domicile of a legitimate child is, during the lifetime of his father, the same as, and changes with, the domicile of his father;
> (2) the domicile of a legitimated child is, from the time at which the legitimation takes effect, during the lifetime of his father, the same as, and changes with, the domicile of his father;
> (3) the domicile of an illegitimate child and of a child whose father is dead is, in general, the same as, and changes with, the domicile of his mother;
> (4) the domicile of a legitimate or legitimated child without living parents, or of an illegitimate child without a living mother, probably

---

77 Section 1 Family Law Reform Act 1969.

78 See Law Commission report no. 48, *Family Law Report on Jurisdiction in Matrimonial Causes* (1972) accessible *http://www.bailii.org/ew/other/EWLC/1972/48.pdf*

cannot be changed;
(5) the domicile of an adopted child is determined as if he were the legitimate child of the adoptive parent or parents.[79]

A child's domicile of dependency (like a former wife's domicile of dependency)[80] can be abandoned, after the age of independence, by (1) ceasing to reside in the place of domicile of dependency and (2) ceasing to intend to reside there permanently.

3.14.3 *Parents living apart*

Section 4 Domicile and Matrimonial Proceedings Act 1973 provides:

> **Dependent domicile of child not living with his father**.
> (1) Subsection (2) of this section shall have effect with respect to the dependent domicile of a child as at any time after the coming into force of this section when his father and mother are alive but living apart.
> (2) The child's domicile as at that time shall be that of his mother if—
> (a) he then has his home[81] with her and has no home with his father; or
> (b) he has at any time had her domicile by virtue of paragraph (a) above and has not since had a home with his father.
> (3) As at any time after the coming into force of this section, the domicile of a child whose mother is dead shall be that which she last had before she died if at her death he had her domicile by virtue of subsection (2) above and he has not since had a home with his father.
> (4) Nothing in this section prejudices any existing rule of law as to the cases in which a child's domicile is regarded as being, by dependence, that of his mother.
> (5) In this section, "child" means a person incapable of having an independent domicile.
> (6) This section extends to England and Wales, Scotland[82] and Northern Ireland.

Prior to 1/1/1974 what was the test of domicile of a child whose parents were divorced, and who was living with the mother? Dicey records that

---

79 *Conflict of Laws* (15th ed., 2012), para 6R-090. Some tie-breaker rule will be needed in case of a child adopted by a same-sex couple within a civil partnership if the couple have different domiciles.

80 See 3.13.3 (Marriage ended before 1 January 1974).

81 See 6.9.1 ("Home").

82 Schedule 3 Family Law (Scotland) Act 2006 repeals this section in relation to Scotland. However see below on whether this has effect for tax purposes.

the position in Scotland was that domicile followed the father; in Northern Ireland, it followed the mother; Dicey suggested English law should follow the Northern Ireland decision.[83]

3.15 Child's domicile in Scotland

The position is different in Scotland. Section 22 Family Law (Scotland) Act 2006 provides:

> **Domicile of persons under 16**
> (1) Subsection (2) applies where—
> (a) the parents of a child are domiciled in the same country as each other; and
> (b) the child has a home with a parent or a home (or homes) with both of them.
> (2) The child shall be domiciled in the same country as the child's parents.
> (3) Where subsection (2) does not apply, the child shall be domiciled in the country with which the child has for the time being the closest connection.
> (4) In this section, "child" means a person under 16 years of age.

Scots law (like most countries but not, yet, England) has abolished the status of illegitimacy and this provision reflects that principle.

It is an interesting question whether this reform of the law of domicile applies for tax purposes. Taxation is (in general) a reserved matter over which the Scottish Parliament has no competence. A full discussion of Scottish Parliament competence would need a long chapter, which the importance of the issue here does not justify; it is however suggested that a reform of domicile law, which has a merely incidental consequential effect on taxation, should be within the power of the Scottish Parliament.[84] HMRC agree: the RDR Manual provides:

> **RDRM22120 The Family Law (Scotland) Act 2006** [Mar 2014]
> The Family Law (Scotland) Act 2006 [FL(S)A 2006] came into effect on 4 May 2006. Section 22 of the Act creates a new form of domicile in Scotland for individuals under the age of sixteen. Legitimacy has ceased to be a factor in determining domicile in Scots law under the FL(S)A 2006, section 21 of the Act having abolished the status of illegitimacy.

---

83 Dicey & Morris, *Conflict of Laws* (9th ed., 1973) p.119. This passage is not in later editions of this book.

84 See *Martin v HM Advocate* [2010] UKSC 10.

> In Scotland only, since 4 May 2006, where a child's parents share a domicile and the child has a home with either or both of them, the child is domiciled in the same country as its parents.
> Where a child's parents are domiciled in different countries, or the child has a home with neither parent, the child is domiciled in the country with which he or she has 'for the time being the closest connection'.
> The wording of FL(S)A 2006 indicates that in any proceedings commenced on or after 4 May 2006 the legislation should be applied retrospectively in order to determine the domicile of an individual under the age of sixteen.

But then what is the position of a person where English and Scots law produce a different answer as to domicile? The solution to the conundrum is to remember that when statute refers to domicile in the UK, that is a shorthand for domiciled in England Scotland or Northern Ireland. A person should be regarded as domiciled in the UK if they are:

(1) domiciled in England according to English law
(2) domiciled in Scotland according to Scots law, or
(3) domiciled in Northern Ireland according to NI law.[85]

It could then happen that (say) an English tribunal has to apply Scots law principles. But that is inevitable; one should avoid so far as possible a situation under which the selection of a tribunal leads to a difference as to applicable law and so to a different outcome.

It is suggested that the law of domicile ought to be as similar as possible in each jurisdiction, and in this case, the law of England and Northern Ireland ought to be amended to adopt the Scots law approach.

3.16 Division of territory

3.16.1 *Republic of Ireland/Northern Ireland*

Para 8 Government of Ireland (Adoption of Enactments) (No. 1) Order, 1922 provides:

> For the purpose of determining the domicile of any person, Northern Ireland shall be deemed always to have been a separate part of the UK.

In *Re M*[86] the question arose concerning a person's domicile prior to the partition of Ireland in 1922. A person who lived all their life in what is

85 See too 82.18.2 (Situs in Scots law).

86 [1937] NI 159. This was followed in *Re P* [1945] Ir Jur Rep 17.

now Northern Ireland was held to be domiciled in the part of the divided territory in which they had resided.

The RDR Manual provides:

> **RDRM20060 - Domicile: Introduction and Background: Domicile and Law Territories** [June 2010]
> The last two centuries have seen many changes in national and political boundaries. Any new territories should be regarded as having existed for the purposes of ascertaining domicile prior to their creation. Authority for this approach is provided by cases in which the 1921 division of Ireland into its present parts was considered.

3.16.2 *Guernsey, Aldernay, Sark*

The RDR Manual provides:

> **RDRM20060 - Domicile: Introduction and Background: Domicile and Law Territories** [June 2010]
> ... the Bailiwick of Guernsey includes Guernsey, Alderney and Sark, are all separate law territories.

That is, a person is domiciled in one of these three jurisdictions, not in "the Bailiwick of Guernsey".

3.17 HMRC rulings and domicile investigations

HMRC formerly provided rulings on domicile, but that was abolished in 2010.[87] The reason was no doubt that the former rulings procedure was judged not to be efficient use of limited HMRC resources.

Domicile rulings are obtainable on a death. The form is IHT401 (Domicile outside the UK). IHT Manual 13011 explains HMRC practice on receipt of this form.

3.17.1 *Effect of old HMRC rulings*

HMRC Brief 17/09 provides:

> Where an individual has already submitted a form DOM 1 or P86 and obtained an initial view from HMRC about their domicile status it will be unusual for us to open an enquiry into domicile status in the few years after that, unless new information becomes available that indicates our initial view was incorrect or there has been a change in circumstances.

87 HMRC Brief 34/10.

However with the passage of time, circumstances and intentions change and so that initial view from HMRC can become less and less useful as an indicator of domicile status. For example if an individual had advised HMRC on their arrival in England a decade or so ago that they planned to leave the UK after five years but had since married, had a family and decided to make England their permanent home then they will have adopted a domicile of choice within the UK.

Domicile and Inheritance Tax

... As is currently the case, where HMRC has expressed an opinion on the domicile status of a settlor for Inheritance Tax purposes we will not normally seek to reconsider that opinion unless new information becomes available that indicates our initial opinion was incorrect or there has been a material change in the circumstances of the settlor. However, when we make a decision it applies only to the date of the transaction concerned. So if circumstances change, the individual returns to the UK for example, that individual's domicile may need to be considered again at another point in time. Domicile is not a static thing, it can change as people's circumstances and intentions change.

... Where HMRC has expressed a view on an individual's domicile status for income tax or capital gains tax purposes, as a result of an enquiry, then that view will also apply for Inheritance Tax purposes at that time. Likewise a HMRC view expressed for Inheritance Tax purposes, following a Part VIII IHTA enquiry, will also apply for income tax and capital gains purposes at that time. However, it is important to remember that each decision on domicile will be made at a certain point in time, if circumstances have changed since the time of the relevant decision, the domicile of the taxpayer may also have changed.

3.17.2 *When will HMRC make domicile enquiries?*

In the absence of a ruling, the usual enquiry system applies. HMRC Brief 17/09 provides:

Enquiries into domicile status

... if HMRC decides to enquire into an individual's domicile status this will be by way of a section 9A TMA enquiry into their Self Assessment tax return. (Alternatively in appropriate cases HMRC may enquire into an individual's domicile status by way of a Part VIII IHTA enquiry into an Inheritance Tax return.) Where a claim to the remittance basis is not challenged for that year it does not mean HMRC necessarily accepts the individual's domicile is outside the UK and does not prevent HMRC from later opening an enquiry to consider the domicile status of the individual in relation to that, or any earlier year.

HMRC Brief 34/10 provides:

> HMRC will consider opening an enquiry where domicile could be an issue, or making a determination of Inheritance Tax in such cases, only where there is a significant risk of loss of UK tax.
> The significance of the risk will be assessed by HMRC using a wide range of factors. The factors will depend very much on the individual case but will include, for example:
> - a review of the information available to HMRC about the individual on HMRC databases
> - whether there is a significant amount of tax (all taxes and duties not just Inheritance Tax) at risk
>
> HMRC does not consider it appropriate to state an amount of tax that would be considered significant, as the amount of tax at stake is only one factor.[88] It should be borne in mind that HMRC will take into account the potential costs involved in pursuing an enquiry, and also those of potential litigation should the enquiry not result in agreement between HMRC and the individual; clearly such costs can be substantial.
> Where HMRC does open an Inheritance Tax enquiry in any of these cases, it will keep the factors in view and may stop the enquiry at any stage if it considers the continuation of the enquiry is not cost effective. The outcome of such an enquiry may be that HMRC does not consider it appropriate to make a determination of the Inheritance Tax.

It has been said in relation to those with a foreign domicile of origin:

> with the exception of the one case of *Steiner v IRC* [1973] STC 547 and perhaps another one, HMRC had never won a case on domicile against a living taxpayer and that they rarely take on such cases.[89]

It is of course possible that HMRC policy may change.

3.17.3 *How HMRC investigates domicile*

HMRC Brief 17/09 provides:

> Enquiries aimed at establishing an individual's domicile are, by their very nature, examinations of an individual's background, lifestyle, habits and intentions, possibly over the course of a lifetime. Consequently, any

88 [Author's footnote] This is obviously less than frank; the true (and proper) reason to withhold this information is no doubt to prevent fraud.

89 *Mehjoo v Harben Barker* [2013] EWHC 1500 (QB) at [258]. The point was not considered on appeal.

such enquiries conducted by HMRC will, where necessary, extend to areas of individuals' and their families' affairs that may not normally be regarded as relevant to their UK tax position. ...

The RDR Manual provides:

RDRM23080 - Domicile: Enquiries into domicile status: Schedule of useful information and documents [June 2010]

The list below shows the types of information that might be requested during an enquiry. It should not be regarded as either prescriptive or comprehensive, and the individual may offer other relevant information or evidence for consideration too.

Any information request should be tailored to the particulars of the individual's claim, and their present circumstances. It is always important to think about the relevance of particular items of information to the detailed subject matter of each enquiry. An information request need not be limited only to the items listed here, nor will all items listed necessarily be appropriate in all cases. It may not be possible for some individuals to provide some of the items on the list, even if they would be useful to an understanding of their domicile status. Given the inevitable passage of time in many cases, HMRC and the individual may need to consider how best the facts can be checked and tested.

Information

Date of birth.

Full name at birth.

Parents' full names, including mother's maiden name, and places of birth.

Place of birth, identifying the relevant law territory.

Background to the place of birth, if this was not in the same territory as the parental home at the time.

Details of any name changes, and where, if at all, such changes were registered.

Nationality (citizenship) at birth, including an explanation of its basis where this is not obvious from the context.

Details of any changes in or additions to the nationality (citizenship) at birth, with explanations of the relevant background.

Family background, including marital status of parents during the period of derived domicile.

Information about any adoption proceedings.

If parents were not living together at any time during the period of derived domicile, an explanation of the background to this matter and how parental responsibilities were exercised.

Information about relationships entered into by parents following their separation during the period of derived domicile.

Details of siblings

List of places of residence from birth to the time of the enquiry, including home addresses.

An explanation of the reason for residence at each place on the list.

Details of legal rights of residence in respect of each place and a summary of any visas, permits or other official documents required.

Summary of educational background, including places of education, periods of attendance and qualifications obtained.
Details of military service.
Details of governmental or diplomatic service.
Summary of employment and/or business history.
Explanation of employment and/or business plans, including anticipated retirement, and any arrangements that are in place in respect of these matters.
A detailed summary of properties that have been available for use other than as short-term holiday lettings. This should include the addresses of all the properties, a description of them, details of their ownership, the periods during which the properties have been available, and an explanation of how they have been used when not occupied by the individual.
Details of all marriages, civil partnerships, separations and divorces, including information relating to other relationships involving long-term cohabitation. These should cover the full names of any relevant parties, their dates, places of birth and nationalities, the periods during which the relationships existed, the dates of any formal acts or ceremonies, information relating to the domicile of the other parties, and explanations of any periods during which the parties to the relationship did not live together.
Information about transfers of property, including those between spouses or civil partners.
A summary of the names, dates of birth and nationalities of the children of the individual.
Details of where any children were educated.
The current locations of any children and the relevant background.
Information relating to the exercise of political rights in any territory, as either a voter or a representative.
Membership of any political parties, or participation in campaigns or lobbying groups, and the extent of any activities.
Details of professional qualifications, membership of professional bodies and active participation in these, including offices held.
Summary of membership of clubs, societies, associations, organisations and other bodies, and details of the level of participation in these.
Information about any representative activities undertaken on behalf of a country, territory, or any political, territorial or other sub-division thereof.
The location of personal papers and any items of financial, sentimental or other value. If such items are moveable, the place where they are usually kept and details of any insurance policies in respect of them.
Details of any wills, including an explanation of the law by which the will is intended to be construed and upon which it relies for its formal validity.
Summary of any deeds, declarations, covenants and similar documents created, including those relating to dependants.
Information relating to any legal proceedings or other matters in which domicile was relevant, either as a basis for any action or as an evidential point.
Locations of members of the extended family, including a description of the relationship between the individuals.
Details of religious, cultural and social connections, including the degree of

religious observation, the level of participation in social and cultural life, and ability to speak, read and write relevant languages.

Information about charitable and voluntary activities, including the foundation of charitable trusts, donations to charities and good causes, and active participation in the administration or fund-raising activities of third-sector organisations.

Summary of professional and personal advisers, including their locations and details of the nature and extent of the services that they provide.

An explanation of the individual's intentions for the future. What plans have been made? What contingencies have been taken into account? What would cause a change of residence? What provision has been made for the future? What has the individual actually done that provides evidence for the answers to these questions?

A summary of any connections not specifically mentioned above that the individual has with various territories. When did these begin and precisely what form have they taken over the years? How much time has the individual spent in each territory during the relevant period? What was the reason for such presence?

49620

The list in this paragraph deals with the types of documentary evidence that might be requested during an enquiry.

In some cases it might be necessary to request applications and other documents relating to the acquisition, loss or withdrawal of the items listed below.

Birth certificates

Adoption papers

Registrations of name changes

Marriage certificates

Civil Partnership certificates

Passports and identification documents

Social security documents

Applications for nationality (citizenship)

Documents renouncing nationality (citizenship)

Visas, residence permits, work permits and similar documents

Driving, firearms and other licences

Practising certificates and authorisations from professional or regulatory bodies

School records and reports

Examination certificates

Military service records

Employment contracts

Business accounts, reports and planning documents

Conveyances, leases, tenancy agreements and other documents relevant to the ownership, occupation or use of property

Mortgage and loan agreements

Health insurance policies

Property, motor and other insurance policies

Life assurance policies

Documents relating to savings, retirement and pension plans

Wills, expressions of wishes, deeds of covenant and other legal documents
Personal financial records, including bank account and credit card statements and documents relating to investments
Documents confirming membership of or participation in organisations and activities
Personal correspondence, photographs or electronic records relating to an individual's background, lifestyle and intentions

This is a daunting list, but forewarned is forearmed.

3.18 Domicile of company

A company is domiciled where it is registered, which is the place of incorporation.[90] But (after the 2013 reforms of the ToA rules) I cannot think of a case where domicile of a company matters, for tax or any other purpose.

90 *Gasque v IRC* 23 TC 209; Dicey, Morris & Collins, *Conflict of Laws*, (15th ed., 2012), para 30-002.

CHAPTER FOUR

RESIDENCE OF INDIVIDUALS

4.1 Residence – Introduction

This chapter discusses the statutory residence test ("SRT").[1]

HMRC have issued a guidance note **("RDR3")**.[2]

HMRC have also published a general guide **("RDR1")**[3] which covers the meaning of residence, domicile and their tax implications. Keith Gordon gives this a poor review.[4] To be fair, if one attempts to cover many vast topics in 88 pages, oversimplification and omission is inevitable. RDR1 is aimed at the nonprofessional reader, and practitioners will not usually need to read it.

HMRC have also published an online Tax Residence Indicator.[5] I suspect that this is also aimed at the nonprofessional user and practitioners will not usually find it useful.

The development of the SRT can be traced through 3 HMRC papers:
(1) Consultation paper (**"the Residence Consultation Paper"**)[6]

---

1 This is the statutory term. Para 1(2) Sch 45 FA 2013 provides: The rules are referred to collectively as "the statutory residence test".

2 HMRC, "Guidance Note: Statutory Residence Test" (December 2013) *http://www.hmrc.gov.uk/international/rdr3.pdf*. This is now in its third edition; earlier versions were published May and August 2013.

3 HMRC "Guidance Note: Residence, Domicile and the Remittance Basis (October 2013) *http://www.hmrc.gov.uk/cnr/rdr1.pdf*.

4 Taxation (24 October 2013) p.5: "The new RDR1 goes so far out of its way to avoid making any promises that a taxpayer could rely on, that it puts caveats on propositions that are actually provided for by the statute. ... RDR1 will be an inadequate guide for anyone wishing to determine their residence status, whereas anyone who does rely on it will risk being misled."

5 *http://www.hmrc.gov.uk/calcs-tools/*

6 HM Treasury/HMRC, "Statutory Definition of Tax Residence" (June 2011) *http://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81588/consult_condoc_statutory_residence.pdf*

(2) Response to consultation (**"the Residence Response Paper"**)[7]
(3) A further response paper[8]

These are now of historic interest only.

The statutory residence test applies from 2013/14. For the rules before then, see chapter 3 of the 2012/13 edition of this work.[9]

4.2 Scope of statutory residence test

Para 1 Sch 45 FA 2013 provides:

> (1) This Part of this Schedule sets out the rules for determining for the purposes of relevant tax whether individuals are resident or not resident in the UK....
> (4) "Relevant tax" means-
> (a) income tax,
> (b) capital gains tax, and
> (c) (so far as the residence status of individuals is relevant to them) inheritance tax and corporation tax.

The SRT does not apply for VAT[10] or NIC.

The rules apply to individual residence and not corporate residence. Para 1(3) Sch 45 FA 2013 provides an exclusion:

> The rules do not apply in determining for the purposes of relevant tax whether individuals are resident or not resident in England, Wales, Scotland or Northern Ireland specifically (rather than in the UK as a whole).

---

7 HM Treasury/HMRC, "Statutory definition of tax residence and reform of ordinary residence: a summary of responses" (June 2012) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_srt_or_summary.pdf*

8 HM Treasury, "Statutory definition of tax residence and reform of ordinary residence: summary of responses to the June 2012 consultation" (December 2012) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/consult_responses_statutory_definitions_of_tax_residence_reform_of_ordinary_residence_responses.pdf*

9 The pre-2013 law was hopelessly uncertain, and following changes of HMRC practice, in recent years it generated more litigation than any other topic. So cases on pre-2013 residence continue to roll in: see *Glyn v HMRC* [2013] UKFTT 645; *Rumbelow v HMRC* [2013] UKFTT 637; *Daniel v HMRC* [2014] UKFTT 173. Likewise in Australia, which follows pre-2013 UK case law on residence: *Dempsey v Commissioner of Taxation* [2014] AATA 335.

10 For residence for VAT purposes, see *1st Contact v HMRC* [2012] UKFTT 84.

But it is a very rare case where that applies.

In practice I expect that the tax definition will be influential in other contexts where practical. That would be sensible. The fewer residence tests we have the better.

Para 2(1) Sch 45 FA 2013 dots *I*'s and crosses *T*'s:

> In enactments relating to relevant tax, a reference to being resident (or not resident) in the UK is, in the case of individuals, a reference to being resident (or not resident) in the UK in accordance with the statutory residence test.

4.2.1 *Residence of trustees and personal representatives*

Para 145 Sch 45 FA 2013 provides an non-standard definition of individual:

> In this Schedule ... "individual" means an individual acting in any capacity (including as trustee or personal representative);

Para 2(2) Sch 45 FA 2013 makes a similar point; it needs to be read with para 2(1) to follow the sense:

> (1) In enactments relating to relevant tax, a reference to being resident (or not resident) in the UK is, in the case of individuals, a reference to being resident (or not resident) in the UK in accordance with the statutory residence test.
> (2) Sub-paragraph (1) applies even if the reference relates to the tax liability of an actual or deemed person who is not an individual (for example, where the liability of another person depends on the residence status of an individual).

I think the point is that where an individual is trustee or PR, the residence of the PRs or trustees may depend on the residence of the individual in their private capacity; and for that purpose the SRT applies.

4.3 Outline of statutory residence test

Schedule 45 FA 2013 provides:

> 3 An individual ("P")[11] is resident in the UK for a tax year ("year X") if–
>
> (a) the automatic residence test is met for that year, or

11 "P" stands for "person".

(b) the sufficient ties test is met for that year.

4 If neither of those tests is met for that year, P is not resident in the UK for that year.

This suggests a two-stage test, but it is better to regard the SRT as having three stages:

1. Automatic overseas tests: First are 5 overseas tests; if one of these tests are met the individual is not UK resident:

(1) Overseas test 1: Less than 16 UK days
(2) Overseas test 2: 3 years non-residence and less than 46 UK days
(3) Overseas test 3: Overseas work
(4)(5) Overseas test 4,5: Death in year

2. "Automatic" UK tests: Subject to that, there are four UK tests, if one these tests are met the individual is UK resident:

(1) UK test 1: 183 UK days
(2) UK test 2: UK home
(3) UK test 3: UK work
(4) UK test 4: Death in year

3. Sufficient ties test: Then comes the sufficient ties test, with 4 or 5 connecting ties. If the individual has sufficient UK ties (the number depending on the number of UK days) the individual is UK resident, and otherwise, not UK resident. The ties are:

(1) a family tie
(2) an accommodation tie
(3) a work tie
(4) a 90-day tie
(5) a country tie

4.4 Automatic overseas tests

Schedule 45 FA 2013 first sets out the "automatic" UK tests in paras 6-10, and then the automatic overseas tests in paras 12-16. I consider the overseas tests first as if they apply, they have priority over the UK test. An overseas test trumps an "automatic" UK test and leads to a conclusion of non-residence.

Para 11 Sch 45 FA 2013 provides:

There are 5 automatic overseas tests.

I refer to these as **"overseas tests 1-5"**.

4.5 Overseas test 1: Less than 16 UK days

Para 12 Sch 45 FA 2013 provides:

> The first automatic overseas test is that–
> (a) P was resident in the UK for one or more of the 3 tax years preceding year X,
> (b) the number of days in year X that P spends in the UK is less than 16, and
> (c) P does not die in year X.

4.6 Overseas test 2: Established non-resident, less than 46 UK days

Para 13 Sch 45 FA 2013 provides:

> The second automatic overseas test is that–
> (a) P was resident in the UK for none of the 3 tax years preceding year X, and
> (b) the number of days that P spends in the UK in year X is less than 46.

This applies even if P dies in the year.

4.7 Overseas test 3: Overseas work

4.7.1 *Overseas test 3: Introduction & terminology*

Test 3 is more complicated. Para 14(1) Sch 45 FA 2013 provides:

> The third automatic overseas test is that—
> (a) P works sufficient hours overseas, as assessed over year X,
> (b) during year X, there are no significant breaks from overseas work,
> (c) the number of days in year X on which P does more than 3 hours' work in the UK is less than 31, and
> (d) the number of days in year X falling within sub-paragraph (2) is less than 91.

Year X must satisfy 4 conditions: I refer to **"overseas work conditions (a) to (d)"**.

I refer to days within (c) as **"3-hour UK work days"** and days within (d) as **"UK days".**

Overseas test 3 is the approximate equivalent of the pre-SRT full-time work abroad rule. Paragraphs (a) and (b) reflect the requirement of full-time work. Para (c) reflects the requirement that the work is "abroad".

4.7.2 *Overseas work condition (a): "Sufficient hours overseas"*

Para 14(1) Sch 45 FA 2013 requires:

> (a) P works sufficient hours overseas, as assessed over year X.

This takes us to para 14(3) sch 45 FA 2013, which provides:

> Take the following steps to work out whether P works "sufficient hours overseas" as assessed over year X—
> *Step 1 [disregard 3-hour UK work days]*
> Identify any days in year X on which P does more than 3 hours' work in the UK, including ones on which P also does work overseas on the same day.
> The days so identified are referred to as "disregarded days".
> *Step 2 [net overseas hours]*
> Add up (for all employments held and trades carried on by P) the total number of hours that P works overseas in year X, but ignoring any hours that P works overseas on disregarded days.
> The result is referred to as P's "net overseas hours".
> *Step 3 [reference-period days]*
> Subtract from 365 (or 366 if year X includes 29 February)—
> (a) the total number of disregarded days, and
> (b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.[12]
> The result is referred to as the "reference period".

Armed with the figures from steps 2 and 3, we proceed to the computation. This is set out in the remaining two steps:

> *Step 4 [reference-period weeks]*
> Divide the reference period by 7. If the answer is more than 1 and is not a whole number, round down to the nearest whole number. If the answer is less than 1, round up to 1.

Division by 7 reflects the number of weeks in the reference period. One might question whether rounding is appropriate at this preliminary stage; though in this case rounding down slightly helps the taxpayer; it does not matter much.

---

12 See 4.16 (Reference period: deduction of non-work days).

Step 5 [compute net overseas hours ÷ no. of reference-period weeks]
Divide P's net overseas hours by the number resulting from step 4.
If the answer is 35 or more, P is considered to work "sufficient hours overseas" as assessed over year X.

The computation set out in steps 4 and 5 could have been more easily expressed algebraically, but the drafter of the SRT was somewhat algebra-phobic.

RDR3 provides two examples:

Example 2 (Anne)
A is working overseas, has had a period of maternity leave and is considering her UK residence status. She finds she needs to consider whether she has worked sufficient hours overseas in the tax year to be treated as working full-time overseas for the purposes of the third automatic overseas test.
Step 1: A has no disregarded days.
Step 2: A has no sickness absence or gaps between employments. Her normal pattern of employment is for seven hours and 40 minutes, Monday to Friday. During the tax year she:
- worked as normal between 6 April and 2 June
- started her maternity leave on 3 June, returning to work after 26 weeks, on 2 December
- worked from 2 to 20 December
- took annual leave across the Christmas period from Monday, 23 December through to Wednesday, 1 January, returning to work on 2 January
- worked as usual from 2 January to 5 April; taking five days of leave from Monday, 3 February to Friday, 7 February and another three days from Thursday, 13 March to Monday, 17 March (dates are inclusive).

A calculates her net overseas hours (Step 2)
- between 6 April and 2 June, she worked on 38 days (6 and 27 May were bank holidays)
- between 2 December and 20 December she worked on 15 days
- between 2 January and 5 April she worked on 59 days
- total days worked = 38+15+59=112.
- on each day she worked for seven hours and 40 minutes, therefore her total net overseas hours = 112 × 7 hours 40 minutes = 858 hours 40 minutes.

Step 3: To calculate her reference period, A starts with the 365 days of the tax year and subtracts
- maternity leave, including embedded weekends from Monday, 3

June to Friday, 29 November - 180 days (30 November and 1 December do not meet the rules about embedded non-working days).

- annual leave on 23, 24, 27, 30 and 31 January, 3-7 February and 13, 14 and 17 March - 13 days.

As 25 and 26 December and 1 January and all the weekend dates are non-working days that do not meet the rules about embedded non-working days, she makes no adjustment for them.

A calculates her reference period: = 365–180–13 = 172 days

Step 4: divide number from Step 3 by 7 = 172÷7 = 24.57, which is rounded down to 24.

Step 5: divide net overseas hours by result from Step 4 = 858 hours 40 minutes ÷ 24 = 35.78.

A meets the sufficient hours test. She will need to consider whether she meets all other parts of the third automatic overseas test, in particular that the number of days spent in the UK in the tax year is less than 91.

Example 3 (MayLing)

ML is considering whether she meets the third automatic overseas test in respect of her work in Italy in the last tax year. She worked for her first employer there for an average of eight hours a day, five days a week, between 6 April and 23 August (20 weeks). During that period she took nine days annual leave (there were no embedded non-working days); consequently ML had worked for 18 full weeks and for only one day in another week. She ceased that employment and took a break of 30 days to tour around Italy.

She then took up a new employment, again in Italy, between 23 September and 5 April (27 weeks and six days – amounting to 28 working weeks). During that period she worked for nine hours and 30 minutes from Monday to Thursday and for four hours on a Friday. She took:

- five days of annual leave; for three weeks she only worked three long days and a short day, and for one week she worked two long days and a short day, reducing her number of full working weeks by five weeks
- 10 days of annual leave, with two embedded non-working days (the Saturday and Sunday in the middle of this two-week period), reducing her number of full working weeks by two
- five days, continuous, sick leave (with no embedded non-working days), reducing her number of full working weeks by one.

She therefore worked for only 20 full working weeks in this part of the year. ML spends no time in the UK in the tax year.

Step 1 ML has no disregarded days.
Step 2 Net overseas hours:
Employer 1: 18 weeks and one day at (5 days × 8 hours) = 728 hours
Employer 2: 20 weeks at ((4 days × 9.5 hours) + 4 hours) = 840 hours
3 weeks at ((3 days × 9.5 hours) + 4 hours) = 97.5 hours
1 week at ((2 days × 9.5 hours) + 4 hours) = 23 hours
Total net overseas hours: = 728+840+97.5+23 = 1688.5 hours.
Step 3 The statutory residence test Reference period:
Subtract from 365 days
Disregarded days 0 days
Other days that can be deducted:
- 9 days leave Employer 1
- 15 days leave employer 2
- 2 embedded days
- 5 sick days

= 9+15+2+5 = 31 days
Gap between employments 15 days (total gap 30 days but the amount deducted is limited to 15 days)
Reference period is: 365−31−15 = 319 days.
Step 4
Divide reference period by 7 = 319÷7= 45.57 which is rounded down to 45.
Step 5
Divide net overseas hours by figure at Step 4 = 1688.5÷45= 37.52.
ML meets the sufficient hours test. She will need to consider whether she meets all other parts of the third automatic overseas test, in particular that the number of days spent in the UK in the tax year is less than 91.

4.7.3 *Sufficient hours test: Analysis and planning*

Peter Ashby has done the maths:

> The good news here is that you exclude from the days that qualify sick days and paternity or maternity leave. You also exclude holidays – which is fair enough as you don't work any hours then. But you do not exclude weekends (or more correctly non-working days because these include public holidays – and for shift workers it may not be the weekend that is a non-working day) unless they are 'embedded' in a holiday. So one week of holiday excludes five days and a two-week holiday means 12 days are excluded – unless you start your holiday midweek because you need at least three days before and after the weekend to qualify that weekend. As you divide the denominator by

seven to calculate a weekly amount, you do lose out by including these 'non-qualifying embedded days'. The answer of course is to work longer hours. If you can!
Say I usually work 37 hours per week and take three two-week holidays, the average hours would be:

$$\frac{37 \times (52-6)}{(365 - (3\times12))/7} = 36.2 \text{ hours}$$

If you work 40 hours a week it will probably make no difference. If you work 36 hours a week you may be borderline and fail. If you work 35 hours a week you will almost certainly not get [sufficient hours overseas] without doing some overtime.
I suppose it does at least encourage a work mentality so [foreign] employers may be happy with this![13]

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

Sufficient hours – interaction with significant breaks
Question: Can a non-working period of up to 31 days (i.e. a lesser period than a significant break) preceding or following a period of full-time work can be included as part of that period (assuming that the 35 hours test is met)?
HMRC Answer: Provided the FTW test is met over the period by the calculations that are set out, it does not matter if there is a non-working period of up to 31 days at the start or end of the period. An individual would need to work significantly more than 35hrs a week in order to do enjoy periods off from work (which were not annual, sick or parenting leave) and still meet the FTW tests.[14]

4.7.4 *Overseas work condition (b): No significant breaks from work*

Para 14(1) Sch 45 FA 2013 requires:

(b) during year X, there are no significant breaks from overseas work

See 4.17 "Significant break from work".

4.7.5 *Overseas work condition (c): Less than 31 UK work days*

Para 14(1) Sch 45 FA 2013 requires:

13 Ashby, "Employees working abroad" [2013] Tax Adviser 38.
14 29 January 2014
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf

(c) the number of days in year X on which P does more than 3 hours' work in the UK is less than 31

4.7.6 *Overseas work condition (d): Less than 91 UK days*

Para 14(1) Sch 45 FA 2013 requires:

> (d) the number of days in year X falling within sub-paragraph (2) is less than 91.
>
> (2) A day falls within this sub-paragraph if—
>
> (a) it is a day spent by P in the UK, but
>
> (b) it is not a day that is treated under paragraph 23(4) as a day spent by P in the UK.

Para 2(b) excludes the deeming rule (frequent visits) in computing UK days.[15] Why?

4.7.7 *FTWO and FTWUK*

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

> **Sufficient hours - simultaneous FTWUK and FTWO**
> Question: Because of the way in which working days are disregarded for both the numerator and denominator of the sufficient hours test where the employee has worked for more than three hours in the "wrong" country (e.g. worked for more than three hours in the UK on some days when working all day abroad on most other days) it is possible to be employed full-time simultaneously in both the UK and an overseas work country for a period. This might happen where an individual transitions into a new cross-border ro le over a short period. This is not an intuitive outcome and will confuse taxpayers. Could there be a rule to prevent it?
> HMRC answer: Because the FTW tests are mechanical, HMRC agrees it is possible to be simultaneously FTWUK and FTWO. In reality this is likely to happen in a small number of cases and for a very short period of time. The SRT provides a tie-breaker in this scenario, with those meeting automatic overseas tests becoming definitively non resident. The split year cases have also been drafted so there is a priority rule between Case 5 (starting FTWUK) and Case 6 (ceasing FTWO).[16]

---

15 See 4.13.5 (The deeming rule (frequent visits)).

16 29 January 2014
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf

4.8 "Automatic" UK tests

Sch 45 FA 2013 provides:

> 5 The automatic residence test is met for year X if P meets–
>
> (a) at least one of the automatic UK tests, and
>
> (b) none of the automatic overseas tests.
>
> 6 There are 4 automatic UK tests.

I refer to these as **"UK tests 1-4"**. "Automatic" residence tests is not a particularly apt label for this set of tests; I add scare quotation marks.

4.9 UK test 1: 183 UK days

Para 7 Sch 45 FA 2013 provides:

> The first automatic UK test is that P spends at least 183 days in the UK in year X.

4.10 UK test 2: UK home

4.10.1 *UK test 2: Introduction and terminology*

This is complicated. Para 8(1) Sch 45 FA 2013 provides:

> The second automatic UK test is that–
>
> (a) P has a home in the UK during all or part of year X,
>
> (b) that home is one where P spends a sufficient amount of time in year X, and
>
> (c) there is at least one period of 91 (consecutive) days in respect of which the following conditions are met—
>
> (i) the 91-day period in question occurs while P has that home,
>
> (ii) at least 30 days of that 91-day period fall within year X, and
>
> (iii) throughout that 91-day period, condition A or condition B is met or a combination of those conditions is met.

I refer to **"UK-home conditions (a) to (c)"**.

4.10.2 *UK-home condition (a)*

Para 8(1) Sch 45 FA 2013 requires:

> (a) P has a home in the UK during all or part of year X

See 4.14 ("Home").

4.10.3 *UK-home condition (b): Sufficient amount of time in UK home*

Para 8(1) Sch 45 FA 2013 requires:

> (b) that home [the UK home] is one where P spends a sufficient amount of time in year X

Para 8(4) Sch 45 FA 2013 provides:

> In relation to a home of P's in the UK, P "spends a sufficient amount of time" there in year X if there are at least 30[17] days in year X when P is present there on that day for at least some of the time (no matter how short a time).

4.10.4 *"Present at the home"*

Para 8(6)(b) Sch 45 FA 2013 provides:

> In sub-paragraphs (4) and (5)...
> (b) a reference to P being present at the home is to P being present there at a time when it is a home of P's (so presence there on any other occasion, for example to look round the property with a view to buying it, is to be disregarded).

Thus "present at the home" means present at a time when the property is a home.

4.10.5 *UK-home condition (c): UK-home period*

Para 8(1) Sch 45 FA 2013 requires:

> (c) there is at least one period of 91[18] (consecutive) days in respect of which the following conditions are met—
> (i) the 91-day period in question occurs while P has that home,
> (ii) at least 30 days of that 91-day period fall within year X, and
> (iii) throughout that 91-day period, condition A or condition B is met or a combination of those conditions is met.

---

17 Para 8(6)(a) Sch 45 FA 2013 explains how to count to 30: "In sub-paragraphs (4) and (5)—
(a) a reference to 30 days is to 30 days in aggregate, whether the days are consecutive or intermittent".

18 Para 8(7) Sch 45 FA 2013 explains that numbers do not stop at 91: "Sub-paragraph (1)(c) is satisfied so long as there is a period of 91 days in respect of which the conditions described there are met, even if those conditions are in fact met for longer than that."

It is UK-home condition (c) which makes the UK home test complicated. Condition (c) is in fact a set of conditions, which I call **"conditions (c)(i), (c)(ii), and (c)(iii)A and C(iii)B"**. I refer to the 91-day period in condition (c) as **"the UK-home period"**.

4.10.6 *UK-home condition (c)(iii)A (no overseas home)*

Para 8(2) Sch 45 FA 2013 provides:

> Condition A is that P has no home overseas.

4.10.7 *UK-home condition (c)(iii)B: permitted amount of time in overseas home*

Para 8(3) Sch 45 FA 2013 provides:

> Condition B is that—
> (a) P has one or more homes overseas, but
> (b) each of those homes is a home where P spends no more than a permitted amount of time in year X.

Para 8(5) Sch 45 FA 2013 provides:

> In relation to a home of P's overseas, P "spends no more than a permitted amount of time" there in year X if there are fewer than 30 days in year X when P is present there on that day for at least some of the time (no matter how short a time).

4.10.8 *HMRC examples*

RDR3 provides some examples of UK test 2 (UK home).

The first example is an individual becomes UK resident by acquiring a UK home. The facts (stripping out irrelevancies) are as follows:[19]

> **Example 4 (Stan)**
> S ceases to have an overseas home on 10 January 2014.

---

19 The example including all its irrelevant detail in full is as follows:
"S has lived in Australia all his life. In June 2012 he takes a holiday in London and likes it so much he decides to emigrate to the UK. He spends the next few months preparing for the move. He sells his Australian house (his only home) on 10 January 2014 and arrives in the UK on 25 January 2014. He finds a flat in London and moves in on 1 February 2014. The London flat is now his only home and he lives there for a year.
During tax year 2013-14 S is present in his Australian home on 250 days, and he is present in his London flat on 55 days."

S acquires a UK home on 1 February 2014 and remains there for a year.

The HMRC analysis is as follows:

In 2013-14 S has a home in the UK ... and is present in it on at least 30 days.

Thus UK-home conditions (a) and (b) are met.

Also from 1 February 2014 there is a period of 91 consecutive days at least 30 of which fell in 2013-14 (the tax year under consideration) when S has a UK home and no overseas home.

Thus UK-home condition (c) is met. The UK-home period is 1 February - 3 May 2014. UK-home condition (c)(iii)A is met.

As S does not meet any of the automatic overseas tests, he is resident under the second automatic UK test for tax year 2013-14.

There are several points to note from this example:

(1) The UK-home period extends well into 2014/15, so S does not know on 6 April 2014 whether he was resident in 2013/14. If he had left, or died, before 3 May 2014, he would not have been UK resident.

(2) S is UK resident in 2013-14 even though he is present in his overseas home on 250 days, and present in his UK home on only 55 days. But DT relief should be available for the period when S was treaty-resident overseas.

(3) A little planning would have avoided UK residence. For instance, if S had kept his overseas home until 7 March, rather than selling on 10 January, he would not have been UK resident.

The next example is an individual who fails to become non-resident despite acquiring an overseas home:

Example 5 (Jane)
J has a home in the UK throughout tax year 2013-14 and tax year 2014-15. She is present in that home on more than 30 days during tax year 2013-14.

Thus UK-home conditions (a) and (b) are met.

J acquires an overseas home on 1 March 2014 and is present there on 30 days in tax year 2013-14.

The HMRC analysis is as follows:

Although there is a period of 91 consecutive days, 30 of which fall in

2013-14 (the tax year under consideration), when J had both a UK home and an overseas home, there is also a period of at least 91 consecutive days (6 April 2013 to 28 February 2014) when she had a UK home (in which she spent sufficient time in 2013-14) but no overseas home.

Thus UK-home condition (c) is met. The UK-home period is 6 April - 28 February 2014. UK-home condition (c)(iii)A is met.

J is therefore resident in the UK for 2013-14 under the second automatic UK test.

The next example is an individual who retains a UK home and does not acquire an overseas home:

Example 6 (Edith)
E has had a home in Cheshire for many years. It is her only home. E retires towards the end of tax year 2014-15 and decides to use her retirement lump sum to see the world.
During tax year 2015-16 she takes three long holidays, visiting 22 different countries. She moves around and does not establish a home overseas. She keeps her Cheshire home throughout, returning to it briefly between trips, and is present there on 41[20] days in tax year 2015-16.

The HMRC analysis is as follows:

In 2015-16 E has a home in the UK in which she is present on at least 30 days in the tax year.

Thus UK-home conditions (a) and (b) are met.

During the year E has no overseas home.

Thus UK-home condition (c) is met. The UK-home period is the whole of 2015/16. UK-home condition (c)(iii)A is met.

E does not meet any of the automatic overseas tests and therefore she is resident under the second automatic UK test for tax year 2015-16.

Next, another example of passing the UK home test by ceasing to have an overseas home:

Example 7 (Berni)
At 6 April 2014 B considers whether she meets the second automatic UK

20 The significance of the 41 day figure is that E would need 4 UK ties to be resident under the sufficient ties test; in the absence of a family tie, E would not be UK resident under the sufficient ties test.

test for 2013-14:

- She bought a home in the UK on 1 January 2013. It was her home throughout 2013-14.
- She was present in that home on at least 30 days in the tax year 2013-14.
- She came to the UK on 10 April 2013 and rented out her overseas home (which she had owned for many years) from 11 April 2013 to 10 March 2014.

Therefore, during 2013-14 there was a period of 91 days, 30 of which fell in the tax year during which B had a UK home in which she was present for a sufficient amount of time, and had no overseas home. As B did not meet any of the automatic overseas tests she is resident under the second automatic UK test.

If B had not let out the overseas home, and had been present there 30 days or more, she would not have been resident under the UK home test.

The last example is designed to illustrate the scope for tax planning. The facts (stripping out irrelevancies) are as follows:[21]

Example 8 (Rosa)

R rents a house in the UK for four months commencing 1 May 2015. She is present in her UK home on 100 days in 2015-16.

Throughout 2015-16 R owns an overseas home. She is present in that house on 200 days in 2015-16.

While she is in the UK, R lets out her overseas home from 1 June to 31 August 2015 (92 days). For that period the New Zealand house is not R's home.

The HMRC analysis is as follows:

There is a period of 91 consecutive days, at least 30 of which fall in 2015-16, when R had a UK home where she spends a sufficient amount of time, and when she does not have an overseas home. R meets the

21 The example including its irrelevant detail in full is as follows:
"R is a professional cricketer who lives in New Zealand. She comes to the UK for the summer of 2015 to play for Trinity Bridge Ladies. She rents a house in Dorking for four months commencing 1 May 2015. She is present in her Dorking home on 100 days in 2015-16. After the English cricket season ends she returns to New Zealand. Throughout 2015-16 R owns a house in New Zealand. She is present in that house on 200 days in 2015-16.
While she is in the UK, R lets out her New Zealand home on a commercial basis to a third party, from 1 June to 31 August 2015 (92 days). For that period the New Zealand house is not R's home."

second automatic UK test for 2015-16.

HMRC then draw the moral:

> If R had not let out her New Zealand house and it had remained available for R to use throughout the summer, it would have remained her home and R would not meet the second automatic UK test.

It may make no difference whether R is resident or not, once one has allowed for DT relief and that UK source income earned as an sportswoman while in the UK would be subject to UK tax anyway. But R's costs of dealing with UK tax returns and the DT claim may well exceed the rent R received from the short let of the overseas home.

4.10.9 *More than one UK home*

Para 8(8) Sch 45 FA 2013 provides:

> If P has more than one home in the UK—
> (a) each of those homes must be looked at separately to see if the second automatic UK test is met, and
> (b) the second automatic UK test is then met so long as it is met in relation to at least one of those homes.

RDR3 provides a straightforward (if implausible) example:

> **Example 9 (Fatima)**
> F has had four UK homes for several years. In the tax year under consideration, F is present in her home in Swansea on 15 days, 20 days in her home in Loch Lomond, 29 in her London flat and 29 in her Newcastle flat.
> F has been present on 91[22] days in total in those UK homes. However, as she was not present in any individual home on at least 30 days, she will not have spent a sufficient amount of time in any single UK home. She will not meet the second automatic UK test for the tax year under consideration.

4.11 UK test 3: UK work

4.11.1 *UK work: Introduction and terminology*

This is complicated. Para 9(1) sch 45 FA 2013 provides:

> The third automatic UK test is that–

22 The correct figure is 83, but this does not affect the conclusion of the example.

(a) P works sufficient hours in the UK, as assessed over a period of 365 days,
(b) during that period, there are no significant breaks from UK work,
(c) all or part of that period falls within year X,
(d) more than 75% of the total number of days in the 365-day period on which P does more than 3 hours' work are days on which P does more than 3 hours' work in the UK, and
(e) at least one day which falls in both that period and year X is a day on which P does more than 3 hours' work in the UK.

I follow the terminology of RDR3 and refer to **"the 365-day reference period"**. This period must satisfy the five conditions, which I refer to as **"UK-work conditions (a) to (e)"**.

4.11.2 *UK-work condition (a): Sufficient hours in the UK*

Para 9(1) sch 45 FA 2013 requires:

(a) P works sufficient hours in the UK, as assessed over a period of 365 days...

Para 9(2) sch 45 FA 2013 provides:

Take the following steps to work out, for any given period of 365 days, whether P works "sufficient hours in the UK" as assessed over that period—
Step 1 [disregarded days]
Identify any days in the period on which P does more than 3 hours' work overseas, including ones on which P also does work in the UK on the same day.
The days so identified are referred to as "disregarded days".
Step 2 [net UK hours]
Add up (for all employments held and trades carried on by P) the total number of hours that P works in the UK during the period, but ignoring any hours that P works in the UK on disregarded days.
The result is referred to as P's "net UK hours".
Step 3 [reference-period days]
Subtract from 365—
(a) the total number of disregarded days, and
(b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.[23]

23 See 4.16 (Reference period: deduction of non-work days).

The result is referred to as the "reference period".
Step 4 [reference-period weeks]
Divide the reference period by 7.
If the answer is more than 1 and is not a whole number, round down to the nearest whole number.
If the answer is less than 1, round up to 1.
Step 5 [compute net UK hours ÷ no. of reference-period weeks]
Divide P's net UK hours by the number resulting from step 4.
If the answer is 35 or more, P is considered to work "sufficient hours in the UK" as assessed over the 365-day period in question.

This is the same approach as overseas test 3 (overseas work): see 4.7.2 (Overseas work condition (a): "Sufficient hours overseas").
RDR3 provides an example:

Example 12 (Sam)
S has never been resident in the UK. On 3 March 2014, he starts a two-year contract to work on a North Sea Oil platform in UK waters. S is contracted to work two weeks off-shore, working 12 hours a day over 14 days, followed by two weeks onshore field break.
Unfortunately, half-way through his shift on 9 April 2014, S has an accident at work and is medically unfit to work up to 30 April 2014. The doctor certifies that he is fit enough to return to work from 1 May 2014.
From 10 April to 30 April 2014 (21 days), when S was unfit to work, there is a period of 14 days (14 – 27 April) which were scheduled non-working days when S was on his onshore field break.
For the purpose of calculating whether he meets the third automatic UK test, S considers whether he worked sufficient hours in the UK. Usually, his non-working days cannot be deducted from the 365-day period over which his average weekly hours are calculated as they do not meet the rules about embedded non-working days.
However, when calculating whether S works sufficient hours in the UK over a 365-day period, the 14 non-working days between 14 and 27 April 2014 can be subtracted from the 365-day period when calculating the 'reference period' at Step 3 of the calculation.
This is because the 14 non-working days are embedded within a period
- where S was unfit to work, from 10-30 April 2014 and
- there were at least three consecutive days of sick leave before the non-working period and
- there were at least three consecutive days of sick leave after the non-working period.

For the purpose of this example we will look at the 365-day period starting on 3 March 2014, the date S started work in the UK.

Step 1: there are no disregarded days on which S worked more than three hours overseas
Step 2: net UK hours
S works for 23.5 days (between 3 March and midway through 9 April) and then for a total of 22 weeks and five days between1 May and 2 March 2015.
Hours worked = ((22 × 7) + 23.5 + 5) × 12 = 2190 hours
Step 3: calculate the reference period, subtract from 365 the disregarded days and other days that can be subtracted = 365–21= 344
Step 4: divide reference period by 7 = 344 ÷ 7 = 9.14, rounded down to 49
Step 5: divide net UK hours by result of Step 4 = 2190÷49 = 44.69
S works sufficient hours in the UK because he works an average of more than 35 hours a week calculated over the 365-day period. He would have to consider other aspects of the third automatic UK test to determine his residence status.

4.11.3 *UK-work condition (b): No significant breaks from work*

Para 9(1) sch 45 FA 2013 requires:

> (b) during that period, there are no significant breaks from UK work

See 4.17 ("Significant break from work").

4.11.4 *UK-work condition (c): 365-day reference period overlaps tax year*

Para 9(1) sch 45 FA 2013 requires:

> (c) all or part of that period falls within year X

4.11.5 *UK-work condition (d): 75% UK work days*

Para 9(1) sch 45 FA 2013 requires:

> (d) more than 75% of the total number of days in the 365-day period on which P does more than 3 hours' work are days on which P does more than 3 hours' work in the UK

I refer to days on which P does more than 3 hours' work in the UK as **"3-hour UK work days"**.

4.11.6 *UK-work condition (e): UK workday in year and in 365-day reference period*

Para 9(1) sch 45 FA 2013 requires:

(e) at least one day which falls in both that period and year X is a day on which P does more than 3 hours' work in the UK.

Para (e) ensures that at least one day of more than 3 hours' work must fall within both year X and the 365-day period. Without it, the test could be satisfied if the 365-day period ended in, for example, May (with no days of working more than 3 hours in the UK in that tax year), but there was a solitary 7 hour UK workday in the following March.

4.11.7 *HMRC examples*

RDR3 provides some examples. The first is straightforward:

> **Example 10 (Henri)**
> H travels to the UK on 1 July 2013 to start a new job on the following day. His posting finishes on 1 July 2014 and he leaves the UK on 6 August 2014, 400 days after he arrived in the UK. Over the 365-day period to 30 June 2014 H calculates that he worked full-time in the UK and has not taken a significant break from his UK work during this period. Part of the period of 365 days falls within the tax year 2013-14 and part falls within the tax year 2014-15.

The reference period is 1 July 2013 - 30 June 2014. UK-work conditions (a) and (b) are satisfied for that period. The period falls within 2012/13 and 2013/14 so condition (c) is satisfied for those years.

> Over the period of 365 days ending 30 June 2014 H works for over three hours on 240 days, 196 (80%) of which are days when H worked for more than three hours in the UK.
> At least one day when H does more than three hours work in the UK falls within the tax year 2013-14 therefore H is resident in the UK under the third automatic UK test for tax year 2013-14.

So UK-work condition (e) is satisfied for 2013/14.

> There is also at least one day when H does more than three hours work in the UK within the tax year 2014-15, so H also meets the third automatic UK test for that year.

So UK-work condition (e) is satisfied for 2014/15.

The next example is a case where one 365-day reference period does not satisfy the conditions, but another does (resulting in UK residence):

> Example 11 (Frank)
> F works full-time in Paris for a branch of a multi-national export company. He comes to work in the UK every month for two days each

month; on both days he works for more than three hours in the UK. On 1 September 2013 F is seconded to work in the UK for a period of two years. F returns to the Paris office and works there for more than three hours on two days each month.

In the period of 365 days ended 5 April 2014 F calculates he worked full-time in the UK (the days worked overseas are identified and disregarded at Step 1 of the calculation of full-time work overseas).[24] As F worked for more than three hours on two days each month in the UK prior to September 2013, F did not have a significant break from UK work.

In the 365-day period ending 5 April 2014 F worked for more than three hours on 240 days. However only 150 days (62%) were days when F worked for more than three hours in the UK. Using that 365-day reference period F would not be resident in the UK under the third automatic UK test for 2013-14.

So it seems that the UK work test is not satisfied. But no:

F needs to check the 75% test against another 365-day period.

In the 365-day period ending 31 August 2014, F calculates he worked full-time in the UK. Again days worked overseas are identified and disregarded at Step 1 of the calculation of full-time work overseas. In the 365-day reference period ending 31 August 2014 F worked for more than three hours on 230 days; 210 days (91%) were days when F worked for more than three hours in the UK. Part of this 365-day period falls within tax year 2013-14 and at least one day in 2013-14 is a day on which F worked for more than three hours in the UK. Therefore, using the 365-day reference period ending 31 August 2014 F is resident in the UK under the third automatic UK test for 2013-14.

4.12 The sufficient ties test

Para 17(1) Sch 45 FA 2013 provides:

> The sufficient ties test is met for year X if–
>
> (a) P meets none of the automatic UK tests and none of the automatic overseas tests, but
>
> (b) P has sufficient UK ties for that year.

4.12.1 *"Sufficient" ties*

Para 17(3) Sch 45 FA 2013 defines "sufficient":

---

24 See 4.11.2 (UK-work condition (a): Sufficient hours in the UK).

Whether P has "sufficient" UK ties for year X will depend on–

(a) whether P was resident in the UK for any of the previous 3 tax years, and

(b) the number of days that P spends in the UK in year X.

The SRT distinguishes between:

(1) **"Leavers":** Those who have been UK resident for one or more of the previous 3 years

(2) **"Arrivers":** Those who have not been UK resident for any of the previous 3 years

Para 18 Sch 45 FA 2013 defines sufficient ties for leavers:

> The Table below shows how many UK ties are sufficient in a case where P was resident in the UK for one or more of the 3 tax years preceding year X–

Days spent by P in the UK in year X	**Number of ties that are sufficient**
More than 15[25] but fewer than 45	At least 4
More than 45 but fewer than 90	At least 3
More than 90 but fewer than 120	At least 2
More than 120	At least 1

Para 19 Sch 45 FA 2013 defines sufficient ties for arrivers:

> The Table below shows how many UK ties are sufficient in a case where P was resident in the UK for none of the 3 tax years preceding year X–

Days spent by P in the UK in year X	**Number of ties that are sufficient**
More than 45 but fewer than 90	All 4
More than 90 but fewer than 120	At least 3
More than 120	At least 2

4.13 Days spent in UK

"Days spent" matters for many SRT purposes, of which the most important are:

(1) Overseas test 1: Less than 16 UK days

(2) Overseas test 2: 3 years non-residence, less than 46 UK days

(3) UK test 1: 183 UK days

(4) The sufficient ties test:

(a) The number of "sufficient" UK ties depends on the number of UK

---

25 The words "More than 15" are otiose since if P spends less than 16 days in the UK automatic overseas test 1 will be satisfied and P will not be UK resident.

days
(b) The 90 day tie
(c) The country tie

Para 24 Sch 45 FA 2013 tries to explain the word "in":

> Any reference to a number of days spent in the UK "in" a given period is a reference to the total number of days spent there (in aggregate) in that period, whether continuously or intermittently.

In most cases what matters is days spent in the UK but for the country tie, days spend in the foreign country must also be counted. A day spent in the UK is defined, but a day spent overseas is not defined. Presumably it is a day not spent in the UK.

4.13.1 *The midnight test*

Schedule 45 FA 2013 provides the general rule:

> 22(1) If P is present in the UK at the end of a day, that day counts as a day spent by P in the UK...
> 23(1) If P is not present in the UK at the end of a day, that day does not count as a day spent by P in the UK.

There are three exceptional cases:

(1) A day may count as not spent in the UK even though the individual is present at midnight:
   (a) Transit passenger exemption
   (b) Exceptional circumstances
(2) A day may count as a day spent in the UK even though the individual is not present at midnight: the deeming rule (frequent visits)

4.13.2 *Transit days*

Para 22(2) introduces two exceptions; it needs to be read with para 22(1):

> (1) If P is present in the UK at the end of a day, that day counts as a day spent by P in the UK.
> (2) But it does not do so in the following two cases.

Para 22(3) Sch 45 FA 2013 provides:

> The first case is where–
>
> (a) P only arrives in the UK as a passenger on that day,
> (b) P leaves the UK the next day, and
> (c) between arrival and departure, P does not engage in activities that

> are to a substantial extent unrelated to P's passage through the UK.[26]

This is vague, but RDR3 provides a gloss:

> 3.9... Merely taking dinner or breakfast at your hotel, in the normal course of events, would be related to your passage. In contrast enjoying a film at the local cinema or catching up with friends would be considered substantially unrelated to your passage through the UK.

> **Example 17 (Holly)**
> S regularly visits the UK for work and social engagements. She also travels widely. She is planning to visit her Aunt in Philadelphia, and will be flying in from Rome to connect with her continental flight at Heathrow.
> S's flight lands at 23:05 on Monday evening. Her flight to Philadelphia does not depart Heathrow until 11:05 on Tuesday. S decides to stay at an airport hotel to catch some sleep, before returning to board the plane for her onward journey. She merely leaves the airport, catches a taxi to the hotel, sleeps, and snatches a quick breakfast before returning to the airport.
> The transit arrival day (Monday) spent in the UK would not count as a day for S when she considers how many days she spent in the UK at the end of the tax year. The departure day (Tuesday) may count as a qualifying day under the deeming rule.

> **Example 18(a)** (Lawrence)
> S's brother, L, has a similarly itinerant lifestyle. He too is visiting their Aunt in Philadelphia, and will be flying in from Toulouse to connect with their continental flight at Heathrow.
> L's flight lands at 17:20 on Monday evening. Their flight to Philadelphia does not depart Heathrow until 11:05 on Tuesday. L decides to stay at an airport hotel to catch some sleep before returning to board the plane on Tuesday. In this scenario the midnight spent in the UK will not count as a day spent in the UK for SRT purposes. The departure day (Tuesday) may count as a qualifying day under the deeming rule.

> **Example 18(b)**
> The circumstances are as for 18(a) but L decides that as he has a long transit period in the UK he will meet up with some friends and go to the theatre.

---

26 The drafting is, exceptionally for the SRT, from the pre-2013 legislation: s.831(1B)(b) ITA.

In this scenario L's meeting friends and visiting the theatre is regarded as being to a substantial extent unrelated to his passage through the UK and therefore the midnight spent in the UK will count as a day spent in the UK for SRT purposes. The following day (Tuesday) may also count as a qualifying day under the deeming rule.

Example 18(c)

The circumstances are as for 18(a) but L meets his team leader for dinner to discuss work related issues. Their meeting lasted for an hour and a half.

In this scenario the meeting with his team leader is regarded as being to a substantial extent unrelated to his passage through the UK and the midnight spent in the UK will count as a day spent in the UK for SRT purposes. The following day (Tuesday) may also count as a qualifying day under the deeming rule.

EN FB 2008 provides some unexceptionable examples:

Example 1 – Peter works for the Jersey arm of HSBC and is travelling from Jersey to Frankfurt. He flies from Jersey to Gatwick and will catch his onward flight the next day to Frankfurt from London City airport. He travels from Gatwick to Canary Wharf for a meeting with several other HSBC colleagues before staying overnight in a nearby hotel.

The meeting with colleagues is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

Example 2 – John works for the Jersey arm of HSBC and is travelling from Jersey to Frankfurt via Gatwick and London City airport. In lobby of his hotel near London City Airport, he unexpectedly spots another colleague who has just arrived from Paris. They have a couple of pints together and their conversation covers a number of business-related issues. [John][27] then travels to London City airport to catch his onward connection.

This meeting was not planned and therefore it can be considered that John's activities in the UK substantially related to completing travel to a foreign destination. The transit passenger provisions will apply.

Example 3 – Shirley lives in Guernsey and is travelling to New Zealand by way of Gatwick and Heathrow. She has planned to spend most of the day with her daughter and grandchildren, who live in Crawley and will also spend the night there before travelling to Heathrow for her onward flight.

Her visit is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

Example 4 – Phil lives in Guernsey and is travelling to New Zealand by way of Gatwick and Heathrow. His flight from Guernsey is delayed by fog and he arrives too late to make his onward connection to New Zealand that day. His son had

27 The original erroneously reads: Peter.

already arranged to meet him at Gatwick and drive him to Heathrow, now he drives him to a hotel near Heathrow instead where Phil will stay overnight before catching his rearranged flight. At the hotel they have a snack together.

These activities are substantially related to completing travel to a foreign destination – Phil would have eaten in the hotel even if he had been unaccompanied. The transit passenger provisions will apply.

Example 5 – George lives in the Isle of Man and is flying to New York on business via Manchester. He has made an appointment with a consultant orthopaedic surgeon based in Manchester to carry out a number of tests. He will stay in the clinic overnight before travelling on to New York the following afternoon.

The appointment is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

Example 6 – George lives in Jersey and is travelling to Stavanger. He does not fly and travels to the UK by ferry before continuing to London by train. He stays overnight at a West End hotel, having prearranged dinner and a trip to the theatre with friends. The next day he travels to Newcastle by train, where he boards a ferry to Stavanger. His activities in the UK are not substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

Formal review of the SRT

Will the Government commit to formally reviewing the SRT legislation? Taxpayers and advisors are struggling with the complexity of the legislation and the administration burden that it produces.

Ultimately, this is a matter for Ministers. At present, the Government has no plans for further changes to residence rules. But it will keep them under review as with any other tax policy. The legislation will be kept under review both in terms of its effect on Exchequer yield and taxpayer behaviours as well as in terms of the effect on administration burdens for individuals and for employers. This will be done by HMRC working with advisers, employers and representative bodies in the normal course of their communications.

What records?

Would it be possible to get an indication of what records are going to be acceptable for the purpose s of residence enquiries?

HMRC has issued guidance on record keeping at page 80 of RDR3.

The minutes of the Joint Forum on Expatriate Tax and NICs provides:

Transit days and "substantially related" – general clarification

Question: If the statutory phrasing is viewed narrowly, whatever [an individual] is likely to do, whether watching a film in his hotel room, telephoning family, reviewing work e-mails, catching up with friends on

Facebook or going to the hotel gym or pool could be viewed as "substantially unrelated" to passage through the UK because it is not an intrinsic part of the journey.
HMRC answer: HMRC confirms that it will not interpret "substantially related" narrowly. It is reasonable to expect that, for example, anyone who chose to stay in a hotel to avail themselves of the facilities, to check Facebook and so on. The facts in each case will be important. In the final analysis we would consider whether a person was in fact enjoying the benefit of being in the UK – for example by going to t he theatre – which is out with the spirit of a transit day. However it is true that doing any work, including reviewing emails, is unrelated to P's passage through the UK and the day would result in a day spent in the UK.

Transit days and "substantially related" – work of any sort andalternative approaches
Question: A restriction on doing work of any so rt means individuals cannot check work emails (e.g. on smartphones and tablets) which is unreasonable. Can a more pragmatic interpretation be struck? e.g. US Treasury Regulations 301.7701(b)-3(d) covering Days in Transit, which hinges on whether or not there has been a business meeting.
HMRC answer: HMRC interprets the term "substantially unreated" with reference to what the transit day provisions are there to achieve – to allow leeway for day counting purposes for those passing through the UK who carry out no work. A simple reading means there is can be no debate around the degree and nature of work done.

Departure days and deemed days
Question: Are departure days that are disregarded under the transit rule counted for the deeming rule? In other words, do transit departure days count towards an excess over 30 days, as per in para 23(3)?
HMRC answer: Departure days, following a day in transit, are not disregarded under the transit rules and may count towards the deemed days rule. A day of departure may be a "qualifying day" under the terms of para 23(3)(b). The intention is to minimises the scope for the deemed days rule to be circumvented.[28]

If the individual arrives in the UK and leaves on the *same* day, that day will not count even though work or other matters are done in between. The individual does not need to rely on the transit passenger exemption.[29]

---

28 29 January 2014 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf*

29 Unless the deeming rule (frequent visits) applies.

The transit passenger rule is essential to the role of Heathrow airport as an international hub. Heathrow relies on transit passengers for the viability of its hub status. Transit passengers facilitate network diversity and frequency. Passengers would not arrange to change planes in the UK if that might make them UK resident.

4.13.3 *Exceptional circumstances*

Para 22(4) Sch 45 FA 2013 provides:

> The second case is where–
>
> (a) P would not be present in the UK at the end of that day but for exceptional circumstances beyond P's control that prevent P from leaving the UK, and
>
> (b) P intends to leave the UK as soon as those circumstances permit.

Para 22(5) Sch 45 FA 2013 tries to explain the word "exceptional":

> Examples of circumstances that may be "exceptional" are–
>
> (a) national or local emergencies such as war, civil unrest or natural disasters, and
>
> (b) a sudden or life-threatening illness or injury.

RDR3 provides:

> **B13** In order to be ignored as days spent in the UK, there must be exceptional circumstances beyond the control of the individual. In other words, the event or situation in question must be one over which the individual has no control or influence and which cannot reasonably have been foreseen.
>
> **B14** For example, if an individual is a passenger on a commercial aircraft that is forced to make an emergency landing in the UK and there is no available onward flight to their original destination for two days afterwards, the two days that would otherwise count as spent in the UK would be ignored due to exceptional circumstances.

Example B3 (Claude)

C is retired and came to the UK for the first time on 1 June for a five month extended travelling holiday, intending to leave on 31 October.

On 29 September while travelling to Scotland he is involved in a car crash suffering multiple injuries. He is in hospital for a total of 14 weeks and arranges to travel back to his home in France on the day he is discharged.

C has been in the UK for 220 days

The time C spent in hospital is an exceptional circumstance. The maximum number of days in the tax year that can be ignored is 60. C has

160 days counted as spent in the UK.

B15 For days spent in the UK due to exceptional circumstances to be ignored, an individual must intend to leave the UK as soon as those circumstances permit. If an individual does leave the UK once the exceptional circumstances have ended HMRC will usually accept this as evidence of such an intention.

Example B4
The circumstances are as in Example B3.
However, C's nephew who lives in Wales writes to him in hospital and suggests C should visit him when he leaves hospital. C writes back on 1 December agreeing.
From 1 December it is no longer C's intention to leave the UK as soon as the exceptional circumstance has come to an end and so only the period 29 September to 30 November can be discounted as exceptional circumstances for SRT day counting purposes.

Someone in the UK might have been prevented from going back due (say) to civil war there. However there would be nothing to stop them going to France. It is considered that that still counts as exceptional circumstances which prevented P leaving the UK. RDR3 provides:

Example B1 (Anna)
A is returning to her home in Denmark having spent her seven week summer holiday working in the UK. This was her first visit to the UK.
On her boat journey home there is an explosion in the engine room. Emergency rescue services attend the vessel and A is found unconscious and badly burned. The emergency services make the decision to airlift A to a specialist burns unit in the UK where she remains for five months. A returns to Denmark as soon as she is discharged from hospital.
A has been in the UK for 202 days.
This disaster would be considered to be an exceptional circumstance beyond A's control. However, the maximum number of days that can be ignored towards days spent in the UK is 60. So A has 142 days which count as days spent in the in the UK.

Exceptional circumstances and Foreign and Commonwealth Office (FCO) advice
B16 Exceptional circumstances will generally not apply in respect of events that bring you back to the UK. However, there may be circumstances such as civil unrest or natural disaster where associated FCO advice is to avoid all travel to the region.
B17 Individuals who return to and stay in the UK while FCO advice

remains at this warning level would normally have days spent in the UK ignored under the SRT, subject to the 60-day limit.

Example B5 (Philip)

P is a structural engineer and has worked full-time abroad for many years. He is currently working on a project in Africa. His wife and children live in the UK.

In May the Government of the country in which he is working is overthrown in a military coup. This initially gave rise to peaceful protests but soon developed into increasing levels of civil unrest. In early July the Foreign and Commonwealth Office (FCO) issued advice against all but essential travel to the country. P continued to work there.

By mid-October the country was on the verge of civil war and the FCO upgraded their advice, advising against all travel to the country. P returned to the UK on 21 October.

Due to international intervention, by the end of January the following year political stability had returned to the country. On 29 January the FCO downgraded their advice to avoid all but essential travel to the country. P took the first available flight back and resumed work on 31 January.

The days P spent in the UK were due to an exceptional circumstance beyond his control and can be ignored for the purpose of the day counting tests of the SRT. However, the maximum period that can be ignored due to exceptional circumstances is 60 days. P was in the UK for 103 days during this period which means P must count 43 days as days spent in the UK for the purposes of the SRT day counting tests.

Examples of circumstances not normally considered to be exceptional circumstances.

B18 Days spent in the UK will not be considered exceptional where the circumstances are not beyond the individual's control, or where they could reasonably have been foreseen or predicted.

B19 Life events such as birth, marriage, divorce and death are not routinely regarded as exceptional circumstances. Choosing to come to the UK for medical treatment or to receive elective medical services such as dentistry, cosmetic surgery or therapies will not be regarded as exceptional circumstances.

B20 Travel problems, for example a delayed or missed flight due to traffic disruption, train delays or cancellations, or a car breakdown, will not be considered as exceptional circumstances.

The illness/injury need not be the taxpayer's, but may be their spouse or family members. RDR3 provides:

B11 There may also be limited situations where an individual who needs to stay in the UK to deal with a sudden life threatening illness or injury to a spouse, person with whom they are living as husband and wife, civil partner or dependent child can have those days spent in the UK ignored under the SRT subject to the 60-day limit.

B12 There may also be limited situations where an individual who comes back to the UK to deal with a sudden life threatening illness or injury to a partner or dependent child can have those days spent in the UK ignored under the SRT subject to the 60-day limit.

Para 22(6) sch 45 FA 2013 limits the number of exceptional days:

For a tax year–

(a) the maximum number of days to which sub-paragraph (2) may apply in reliance on sub-paragraph (4) is limited to 60, and

(b) accordingly, once the number of days within sub-paragraph (4) reaches 60 (counting forward from the start of the tax year), any subsequent days within that sub-paragraph, whether involving the same or different exceptional circumstances, will count as days spent by P in the UK.

RDR3 provides:

B7 The maximum number of days spent in the UK in any tax year that may be ignored due to exceptional circumstances is 60. This is a limit, not an allowance or entitlement, and it applies whether there is one event or several events in the same tax year. Days spent in the UK over the 60-day limit count for the purposes of the SRT.

4.13.4 *Tests where exceptional circumstances not taken into account*

RDR3 provides:

B6 SRT day counting tests where exceptional circumstances cannot be taken into account when an individual is determining whether they satisfy the test

- Second automatic UK test
  - an individual is present in their home on at least (for UK homes) or fewer than (for overseas homes) 30 separate days
  - period of 91 consecutive days, at least 30 of which fall within the tax year
- Third automatic UK test
  - an individual works sufficient hours in the UK, as assessed over a period of 365 days
  - 75% of the total number of days

  - at least one day in the tax year is a day on which an individual does more than three hours of work in the UK
  - significant break –31 days go by
- Third automatic overseas test
  - significant break – 31 days go by
  - number of days on which an individual does more than three hours of work in the UK is fewer than 31
- Full-time work - 129 January 20145 day gap between employments (and 30 day maximum number of days that may be subtracted for gaps between employments)
- Family tie - an individual spends time with their child in person on 60 days or fewer, for all or part of a day
- Family tie - an individual's child spends fewer than 21 days in the UK outside term-time
- Accommodation tie
  - continuous period of 91 days
  - gap of 15 days or fewer
- Work tie - an individual works in the UK for at least 40 days
- Country tie - midnight test – greatest number of midnights.
- Deeming rule – if an individual has more than 30 qualifying days, the excess are treated as if the individual were in the UK at the end of the day, subject to the conditions set out in paragraph 3.5.

4.13.5 *The deeming rule (frequent visits)*

Para 23 sch 45 FA 2013 provides:

(1) If P is not present in the UK at the end of a day, that day does not count as a day spent by P in the UK.
(2) This is subject to the deeming rule.

Para 23 sch 45 FA 2013 provides:

(3) The deeming rule applies if—
  (a) P has at least 3 UK ties for a tax year,
  (b) the number of days in that tax year when P is present in the UK at some point in the day but not at the end of the day ("qualifying days") is more than 30, and
  (c) P was resident in the UK for at least one of the 3 tax years preceding that tax year.

(4) The deeming rule is that, once the number of qualifying days in the tax year reaches 30 (counting forward from the start of the tax year), each subsequent qualifying day in the tax year is to be treated as a day spent by P in the UK.

> (5) The deeming rule does not apply for the purposes of sub-paragraph (3)(a) (so, in deciding for those purposes whether P has a 90-day tie, qualifying days in excess of 30 are not to be treated as days spent by P in the UK).

The label "the deeming rule" is not helpful; I adopt the statutory term but add in brackets: "frequent visits".

4.14 "Home"

Home matters for several tax purposes:

(1) For the SRT, in particular UK test 2 (UK home) and the accommodation tie

(2) For other purposes, in particular:
  (a) Treaty-residence[30]
  (b) Child's domicile if parents living apart[31]

The meaning of the word "home" is discussed in *Re Y*:

> 'Home' is defined thus in the Shorter Oxford English Dictionary:
>
> > "A dwelling-place, house, abode: the fixed residence of a family or household; one's own house; the dwelling in which one habitually lives, or which one regards as one's proper abode."
>
> It is a definition which, in my judgment, contains the essential elements of a "home" as it is to be understood for present purposes.[32]

The Law Commission observes:

> "Home" conveys ... the combined ideas of physical presence and emotional link.[33]

The folk-saying is true that "home is where the heart is". In the dictionary definition set out above, home is a place which one *regards* as one's proper abode. The views of the individual himself are therefore highly relevant. It would be surprising if a place which an individual regarded as home was not in fact their home. The views of the parties as to which property was the main residence were held to be relevant in *Frost v Feltham*; see 55 TC at p.16; the same applies *a fortiori* in determining whether a property is a

---

30 See 6.9 (Permanent home).

31 See 3.14 (Child's domicile of dependency).

32 [1985] Fam 136 at p.140.

33 *The Law of Domicile* (1987) Law Com 186 at para 4.20 *http://www.scotlawcom.gov.uk/download_file/view/228/*

"home".

The fact that one does not have a room set aside for oneself in a "home" does not shed much light on whether it is a "home". The more important question is whether space is available when one wishes to use it. In Robert Frost's epigram, "home is the place where, when you have to go there, they have to take you in".

Fox discusses "home" from an interdisciplinary viewpoint, and concludes that the word "represents a complex amalgam of financial, practical, social, psychological, cultural, politico-economic, and emotional interests to its occupiers".[34]

Also see 4.28.1 (Record keeping: home).

4.14.1 *Para 25 and HMRC examples*

RDR3 provides:

> **A3** As the meaning of 'home' can vary according to its context it is not possible for this guidance to provide an absolute definition of the term. What this guidance does is to give indicators outlining the characteristics that a home will generally have. We give some general examples of what a home may or may not be; whether a place is or is not a home will always be dependent on the facts and circumstances of its use by the individual. HMRC may choose to enquire into those facts and circumstances.

4.14.2 *Caravans, house boats*

Para 25(1) Sch 45 FA 2013 provides:

> A person's home could be a building or part of a building or, for example, a vehicle, vessel or structure of any kind.

RDR3 gives a straightforward example of a caravan:

> **Example A1 (Jim)**
> J lives in a mobile home with his wife. They travel extensively throughout the UK to wherever J can find work. They keep their personal belongings in the mobile home, take most of their meals there, and with the exception of their annual holiday abroad, sleep in it every night. It is where J and his wife spend most of their time when J is not working. It is their home.

---

34 Fox, "The meaning of home: a chimerical concept or a legal challenge?" [2002] JLS p.580.

The OECD commentary provides:

> 13 As regards the concept of home, it should be observed that any form of home may be taken into account (house or apartment belonging to or rented by the individual, rented furnished room).

This is making a similar point in the context of treaty-residence, and it reflects the general meaning of the word.

4.14.3 *Permanence of occupation*

One characteristic of a "home" is that one lives there. As the Court said in *Re Y*:

> I have no doubt that any individual may have two homes; but each, in my judgment, to be properly so called, must comprise some element of regular occupation (whether past, present, or intended for the future, even if intermittent), with some degree of permanency, based upon some right of occupation whenever it is required, where ... "You find the comforts of what is known as home"; the fixed residence of a family or household.

However, the *amount* of time that one spends in a place may not shed much light on whether that place is a "home". One can spend relatively little time in a place which is still a home, or even a main or principal residence.[35] Para 25(1) Sch 45 FA 2013 acknowledges the point without providing much further guidance:

> Whether, for a given building, vehicle, vessel, structure or the like, there is a sufficient degree of permanence or stability about P's arrangements there for the place to count as P's home (or one of P's homes) will depend on all the circumstances of the case.

RDR3 gives an example of an international commuter:

> **Example A3 (William)**
> W has business interests in both Switzerland and the UK. He flies to Switzerland each Monday returning to the UK every Thursday. In Switzerland he lives in a rented flat. When in the UK he lives with his family at the family home which he has owned for many years. In this situation both properties are his homes.

35 *Frost v Feltham* 55 TC 10, see 3.9.3 (Which is the "chief" residence?).

W subsequently decides he does not need to spend so much time in Switzerland and starts to travel there less frequently. He sub-lets his flat in Switzerland retaining no rights to use it, choosing instead to stay in whatever hotel can accommodate him. He now has only one home, which is in the UK.

The next example concerns a short temporary absence:

Example A4 (Elizabeth)
E is seconded to New York for two months by her UK employer. She stays in a hotel when she is there. Prior to her secondment she lived with her husband in their home in London. Her husband continues to live and work in the UK. When E returns to the UK after her secondment she returns to live with her husband in their London home. The London house was E's home throughout the period of her secondment.

The next example concerns a longer and more indefinite absence:

A13 If an individual moves out of their home temporarily it may still remain their home.
Example A5 (Asif)
A has lived and worked in the UK for many years, occupying the same apartment in Liverpool since the day he arrived here. A's father lives in Sweden and is seriously ill. Ten months ago A decided to take a career break to care for his father and moved to Sweden. He does not know how long he will be out of the UK.
Since moving to Sweden A has not returned to Liverpool, but his apartment remains empty and available for him to return to whenever he wants. In this situation A will have a home in both Liverpool and Sweden even though he is spending all of his time in Sweden.

The next example concerns absence during temporary building work:

A14 A place that is used as a home will remain a home even if it is temporarily unavailable, for example, because of damage or renovation.
Example A6 (Rachel and Tom)
R and T's kitchen and dining room have suffered flood damage. The estimated clean-up and repair operation will take six weeks, so they stay with R's parents while the work is being done. The property will remain their home even though R and T are unable to stay there for the time being.

Building work before moving into a home is different:

A15 Your home starts to be your home as soon as:
- it is capable of being used as your home, for example, you have taken

ownership of it, even if it is temporarily unavailable because of renovation

- you actually use it as your home.

If the first point above is satisfied, but in fact you never actually use it as your home, then it will not be your home.

Example A7 (Aneta)

A moved from Poland to the UK and completed the purchase of her new house on 1 June. Whilst it was empty she stayed with friends, until her belongings arrived. These were moved in by the removal firm on 15 June. A stayed in her new home overnight that night. However, as she had arranged to have some extensive refurbishment done to her bathrooms and kitchen, she stayed in a local hotel and with colleagues whilst the main works were carried out. She moved into her home on a permanent basis on 15 July.

For SRT purposes we would consider that the house became A's home from 15 June.

A16 The key points are that:

- a place must be capable of being used as a home, even if it is temporarily unavailable, and
- an individual must actually use it as a home.

4.14.4 *Holiday home*

Para 25(3) Sch 45 FA 2013 provides:

> But somewhere that P uses periodically as nothing more than a holiday home or temporary retreat (or something similar) does not count as a home of P's.

RDR3 provides:

> **A20** [The text sets out para 25(3) and continues:] So a holiday home where an individual spends time for occasional short breaks, and which clearly provides a distinct respite from their ordinary day to day life will not be a home. However if there comes a time when an individual's use of a holiday home or temporary retreat changes so that it is used as a home it will become a home from the time of the change. It will then continue to be a home until such time as circumstances change again and it ceases to be used as a home.
>
> **Example A11 (Jenny)**
>
> J lives in Birmingham and works from home. She also owns an apartment in Spain which she rents out apart from two to three weeks a year when she takes her holiday there. The Spanish property is not her home.

However, J then decides to live in the Spanish apartment throughout the British winter time, from October to March. Her use of the property has changed from being somewhere she used for an occasional short break to somewhere she uses as a home for part of the year. The property is her home from the point she commences using the property as her home.

4.14.5 *No ownership requirement*

Para 25 Sch 45 FA 2013 provides:

> (4) A place may count as a home of P's whether or not P holds any estate or interest in it (and references to "having" a home are to be read accordingly).
> (5) Somewhere that was P's home does not continue to count as such merely because P continues to hold an estate or interest in it after P has moved out (for example, if P is in the process of selling it or has let or sub-let it, having set up home elsewhere).

A house belonging to parents will be the home of children who live there:

> **Example A2 (Mary)**
> M comes back to the UK to take up employment after spending three years studying abroad. She has given up the tenancy on the flat she occupied abroad and moves into her parents' house. Her parents' house is her home.

RDR3 provides:

> **What is not considered to be a home for the purpose of the statutory residence test?**
> **A17** If an individual moves out of their home completely and makes it available to let commercially on a permanent basis it will not be their home during the period it is let unless they or their family retain a right to live there. This can happen, for example, where the rental agreement permits the individual to use the property or part of the property as living accommodation.
> **Example A9 (Ivan)**
> I left the UK to work in Germany. He lets the flat he previously lived in to a tenant on a two-year lease. After 18 months he was made redundant and returned to the UK. The rental agreement on his flat gave exclusive use of the property to the tenant so Ivan arranged to stay with relatives and friends until the lease expired. For the period his property was let it is not his home.

However, if the rental agreement had allowed I to use the flat and he had stayed there when he visited the UK it would have remained his home throughout.

A18 A place that has never been capable of functioning as a home cannot be a home. For example, a property purchased in such a state of disrepair that it is not capable of being lived in as a home, is not a home until such time as it becomes habitable.

A19 If an individual completely moves out of a property and makes no further use of it whatsoever it will no longer be their home.

Example A10 (Harry)

H's new job requires him to travel extensively around Europe. He spends some time working in the UK but most of his work is carried out in other countries. He decided to sell his UK property. On 3 June he put his furniture and belongings in storage and two weeks later he handed the keys to his estate agent. He did not return to his UK property after 3 June and stayed in hotels or with friends on the occasions when he came back to the UK. The property is not his home from 3 June, the date he put his furniture and belongings in storage.

4.14.6 *"Home" in DTAs*

According to RDR3, "home" has a different meaning in DTAs:

> **A5** The concept of home as described in this guidance relates only to the SRT. The guidance does not apply for the purpose of applying the residence Article under a double taxation agreement. Double taxation agreements have additional qualifiers that are not included as part of the SRT and so the two terms do not have the same meaning.

The expression in the OECD model is "permanent home" but "permanent" does not add much. It reflects the point that a temporary abode does not constitute a "home" at all.

4.15 Work

"Work" matters for:
(1) UK test 3: UK work
(2) Overseas test 3: Overseas work
(3) The work tie
Para 26(1) Sch 45 FA 2013 provides:

> P is considered to be "working" (or doing "work") at any time when P is doing something–

(a) in the performance of duties of an employment held by P, or
(b) in the course of a trade[36] carried on by P (alone or in partnership).

If P is a director of a charitable company, time spent on directors duties (eg directors meetings) is "work" even though unpaid. But if P is a trustee of a charitable trust, time spent on duties is in principle not "work".

Para 26 Sch 45 FA 2013 provides:

> (2) In deciding whether something is being done in the performance of duties of an employment, regard must be had to whether, if value were received by P for doing the thing, it would fall within the definition of employment income in section 7 of ITEPA 2003.
> (3) In deciding whether something is being done in the course of a trade, regard must be had to whether, if expenses were incurred by P in doing the thing, the expenses could be deducted in calculating the profits of the trade for income tax purposes.

HMRC guidance provides:

> 2.13 Your time spent working includes:
> • instances where your employer instructs you to stay away from work, for example while serving a period of notice while you remain on the payroll
> ...
> 2.16 Being on-call or stand-by may count as time spent working depending on the conditions of your employment and the nature of your duties.
>
> **Example 20 (Paula)**
> P works as an engineer and is contractually required to be on-call for four nights a month in addition to her normal full-time attendance. She is paid a retainer for those four nights, in addition to being paid for any work done if she is called out. The four nights are counted as working time.
>
> **Example 21 (Franek)**
> F is a self-employed locksmith who keeps his mobile phone switched on 24 hours a day to receive customer calls. For the purposes of calculating

36 Para 145 FA 2013 provides a wide definition:
"trade" also includes–
(a) a profession or vocation,
(b) anything that is treated as a trade for income tax purposes, and
(c) the commercial occupation of woodlands (within the meaning of section 11(2) of ITTOIA 2005).

working time, F should only include the time spent carrying out his jobs and the related travelling time.

4.15.1 *Travelling*

Para 26(4) sch 45 FA 2013 provides:

> Time spent travelling counts as time spent working–
>
> (a) if the cost of the journey could, if it were incurred by P, be deducted in calculating P's earnings from that employment under section 337, 338, 340 or 342 of ITEPA 2003, or, as the case may be, in calculating the profits of the trade[37] under ITTOIA 2005, or
>
> (b) to the extent that P does something else during the journey that would itself count as work in accordance with this paragraph.

Para (a) raises the pleasing possibility of a case where HMRC argue *for* deductibility of the expenses, and the taxpayer argue against. But answering emails will count as work, so in practice most public transport will involve work unless the employee deliberately chooses not to work.

Para (b) is strict: if the individual spends 5 minutes working during a six hour journey the whole period of the journey will be classified as work. I wonder if that was intended.

What is "travelling" is not always clear. A person who stops at a traffic light is still travelling. A person who stops for lunch has stopped travelling. What about queuing at immigration or for luggage? Perhaps it depends on whether the queue is an ordinary one or unusually long.

4.15.2 *Training*

Para 26 Sch 45 FA 2013 provides:

> (5) Time spent undertaking training counts as time spent working if–
>
> (a) in the case of an employment held by P, the training is provided or paid for by the employer and is undertaken to help P in performing duties of the employment, and

---

37 Para 145 sch 45 FA 2013 provides a wide definition:
"trade" also includes–
(a) a profession or vocation,
(b) anything that is treated as a trade for income tax purposes, and
(c) the commercial occupation of woodlands (within the meaning of section 11(2) of ITTOIA 2005).

(b) in the case of a trade[38] carried on by P, the cost of the training could be deducted in calculating the profits of the trade for income tax purposes.

(6) Sub-paragraphs (4) and (5) have effect without prejudice to the generality of sub-paragraphs (2) and (3).

4.15.3 *Location of work*

Para 27(1) Sch 45 FA 2013 provides a commonsense rule:

> Work is done where it is actually done, regardless of where the employment is held or the trade is carried on by P.

Travelling usually counts as work,[39] but there is special rule for the location of travelling work. Para 27 Sch 45 FA 2013 provides:

> (2) But work done by way of or in the course of travelling to or from the UK by air or sea or via a tunnel under the sea is assumed to be done overseas even during the part of the journey in or over the UK
> (3) For these purposes, travelling to or from the UK is taken to–
> (a) begin when P boards the aircraft, ship or train that is bound for a destination in the UK or (as the case may be) overseas, and
> (b) end when P disembarks from the aircraft, ship or train..

This may make flying directly to or from a regional airport more attractive as the UK work day would not start until the individual disembarks at the regional airport rather than at Heathrow/Gatwick before taking a connecting flight or other transport to the destination. The use of cross channel ferries may be disadvantageous when compared with travel by Eurostar given the point at which UK work is deemed to begin and end. But I suspect that however the journey is organised, it will be rare for a business trip to the UK not to involve 3-hour UK work days.

4.16 Reference period: deduction of non-work days

The reference period matters for computing the sufficient hours tests for
(1) Automatic overseas test 3 (Overseas work) and
(2) "Automatic" UK test 3 (UK work).
Para 28(1) sch 45 FA 2013 provides:

---

38 Para 145 FA 2013 provides a wide definition set out in the FN above.

39 See 4.15.1 (Travelling).

This paragraph applies in calculating the "reference period" (which is a step taken in determining whether P works "sufficient hours in the UK" or "sufficient hours overseas" as assessed over a given period of days).

4.16.1 *Reduction for non-work days*

There are three reductions. Para 28(2) sch 45 FA 2013 provides:

> The number of days in the given period may be reduced to take account of—
>
> (a) reasonable amounts of annual leave or parenting leave taken by P during the period (for all employments held and trades carried on by P during the period, whether in the UK or overseas),
>
> (b) absences from work at times during the period when P is on sick leave and cannot reasonably be expected to work as a result of the illness or injury in question, and
>
> (c) non-working days embedded within a block of leave for which a reduction is made under paragraph (a) or (b).

4.16.2 *Disregarded days*

Para 28(3) sch 45 FA 2013 provides:

> But no reduction may be made in respect of any day that is a "disregarded day" (see paragraphs 9(2) and 14(3) in Part 1 of this Schedule).

For overseas test 3 (overseas work), "disregarded days" are 3 hour UK work days.[40]

For UK test 3 (UK work), "disregarded days" are 3 hour overseas work days. [41]

4.16.3 *Reduction (a): reasonable leave*

Para 28(4) sch 45 FA 2013 attempts to define "reasonable":

> For any particular employment or trade, "reasonable" amounts of annual leave or parenting leave are to be assessed having regard to (among other things)—
>
> (a) the nature of the work, and
>
> (b) the country or countries where P is working.

40 See 4.7.2 (Overseas work condition (a): Sufficient hours overseas).

41 See 4.11.2 (UK-work condition (a): Sufficient hours in the UK).

4.16.4 *"Embedded within a block of leave"*

Para 28(5) sch 45 FA 2013 provides:

> Non-working days are "embedded within" a block of leave only if there are, as part of that block of leave—
>
> (a) at least 3 consecutive days of leave taken before the non-working day or series of non-working days in question, and
>
> (b) at least 3 consecutive days of leave taken after the non-working day or series of non-working days in question.

4.16.5 *"Non-working day"*

Para 28(6) sch 45 FA 2013 provides:

> A "non-working day" is any day of the week, month or year on which P—
>
> (a) is not normally expected to work (according to P's contract of employment or usual pattern of work), and
>
> (b) does not in fact work.

4.16.6 *Rounding*

Para 28(7) sch 45 FA 2013 deals with rounding:

> In calculating the reductions to be made under sub-paragraph (2)—
>
> (a) if it turns out, after applying sub-paragraph (3), that the reasonable amounts of annual leave or parenting leave or, as the case may be, the absences from work on sick leave do not add up (across the period) to a whole number of days, the number in that case is to be rounded down to the nearest whole number, but
>
> (b) any such rounding is to be ignored for the purposes of subparagraph (2)(c).

4.16.7 *Change of employment*

Para 28 sch 45 FA 2013 provides:

> (8) If—
>
> (a) P changes employment during the given period,
>
> (b) there is a gap between the two employments, and
>
> (c) P does not work at all at any time between the two employments,
>
> the number of days in the given period may be reduced by the number of days in that gap.
>
> (9) But—

(a) if the gap lasts for more than 15 days, only 15 days may be subtracted, and
(b) if there is more than one change of employment during the period, the maximum number of days that may be subtracted under subparagraph (8) for all the gaps in total is 30.

RDR3 gives a straightforward example:

> **Example 1 (Jack)**
> J is calculating his reference period and has two gaps between employments within the 365-day period he is considering.
> The first gap was of 21 days and the second one was of five days. J does not work at all in either gap. As the first gap exceeded the maximum number of days for a single gap, Jack can only subtract 15 days from his reference period in relation to this gap between employments. He can subtract the full five days of the second gap.
> J therefore subtracts a total of 20 days for gaps between employments from his 365-day period under Step 3 of the sufficient hours calculation.

The provisions about gaps between employments do not apply for the self-employed; there is no deduction for gaps between self-employed work periods.

4.17 "Significant break from work"

"Significant break from work" matters for:
(1) Overseas test 3 (Overseas work)
(2) UK test 3 (UK work)
Para 29 Sch 45 FA 2013 provides:

> (1) There is a "significant break from UK work" if at least 31 days go by and not one of those days is—
> (a) a day on which P does more than 3 hours' work in the UK, or
> (b) a day on which P would have done more than 3 hours' work in the UK but for being on annual leave, sick leave or parenting leave.
> (2) There is a "significant break from overseas work" if at least 31 days go by and not one of those days is—
> (a) a day on which P does more than 3 hours' work overseas, or
> (b) a day on which P would have done more than 3 hours' work overseas but for being on annual leave, sick leave or parenting leave.

4.18 Minor definitions

4.18.1 *Employment*

Para 145 sch 45 FA 2013 provides the standard definition.[42]

Para 26(8) sch 45 FA 2013 provides an unnecessary comment on the word "employment":

> A voluntary post for which P has no contract of service does not count as an employment for the purposes of this Schedule.

A contract of service is simply another expression for an employment contract. A voluntary post for which P does have a contract is not likely to be an employment, as the contract will not be a contract of service.

4.18.2 *Annual leave and parenting leave*

Para 146 sch 45 FA 2013 provides:

> In relation to an individual who carries on a trade—
>
> (a) a reference in this Schedule to annual leave or parenting leave is to reasonable amounts of time off from work for the same purposes as the purposes for which annual leave or parenting leave is taken, and
>
> (b) what are "reasonable amounts" is to be assessed having regard to the annual leave or parenting leave to which an employee might reasonably expect to be entitled if doing similar work.

4.18.3 *"Overseas"*

Para 145 sch 45 FA 2013 provides a definition:

> "overseas" means anywhere outside the UK;

One might have thought "abroad" was more apt. Northern Ireland is not "overseas" but if one crosses the land border to the Republic of Ireland, one finds oneself "overseas"! But it does not matter.

---

42 "employment"—
(a) has the meaning given in section 4 of ITEPA 2003, and
(b) includes an office within the meaning of section 5(3) of that Act.
(If these were taxes-act-wide definitions that would not be necessary).

4.18.4 *Zero is a number (!)*

Para 147 sch 45 FA 2013 provides:

> A reference in this Schedule to a number of days being less than a specified number includes a case where the number of days is zero.

The drafter's concern that zero may not be considered a number seems somewhat misconceived.

4.19 UK ties

Para 31(1) Sch 45 FA 2013 provides:

> What counts as a "UK tie" depends on whether P was resident in the UK for one or more of the 3 tax years preceding year X.

Thus there are different rules for leavers and for arrivers. Para 31(2) sets out the ties for leavers:

> If P was resident in the UK for one or more of those 3 tax years, each of the following ties counts as a UK tie.
>
> (a) a family tie,
> (b) an accommodation tie,
> (c) a work tie,
> (d) a 90-day tie, and
> (e) a country tie.

Para 31(3) sets out the ties for arrivers:

> Otherwise, each of the following ties counts as a UK tie.
>
> (a) a family tie,
> (b) an accommodation tie,
> (c) a work tie, and
> (d) a 90-day tie.

These are the same factors with the deletion of the country tie.

4.20 Family tie

Para 32(1) Sch 45 FA 2013 provides:

> P has a family tie for year X if–
>
> (a) in year X, a relevant relationship exists at any time between P and another person, and
> (b) that other person is someone who is resident in the UK for year X.

If a couple split up at any time during the year, or a child attains 18, the family tie can still be met until the next tax year.

4.20.1 *Relevant relationship*

Para 32(2) Sch 45 FA 2013 provides:

> A relevant relationship exists at any time between P and another person if at the time–
>
> (a) P and the other person are husband and wife or civil partners and, in either case, are not separated,[43]
>
> (b) P and the other person are living together as husband and wife or, if they are of the same sex, as if they were civil partners, or
>
> (c) the other person is a child of P's and is under the age of 18.

4.20.2 *Limited contact with child in UK*

Para 32(3) sch 45 FA 2013 provides:

> P does not have a family tie for year X by virtue of sub-paragraph (2)(c) if P sees the child in the UK on fewer than 61 days (in total) in–
>
> (a) year X, or
>
> (b) if the child turns 18 during year X, the part of year X before the day on which the child turns 18.

RDR3 provides examples:

> **Example C2 (Jurgen)**
> Between May and November J visited the UK for 125 days, 104 of which were days on which he worked for more than three hours in the UK. When in the UK he stayed in a number of different hotels, so has no accommodation tie. He was not resident in the UK for any of the last three years. J's 17-year-old son lives and works full-time in the UK and is UK resident.
> Under the sufficient ties test of the SRT J will be resident if he has two or more UK ties. He has a work tie. However the only time J and his son spent together in the UK during his visit was three weeks in the summer. Therefore J has no family tie and, having only one tie, is not resident in

43 Para 32(5) sch 45 FA 2013 provides the common form definition of "separated":
"Separated" means separated–
(a) under an order of a court of competent jurisdiction,
(b) by deed of separation, or
(c) in circumstances where the separation is likely to be permanent.

the UK for that tax year.

Example C3 (Pierre)
P has a company flat in the UK which is permanently available to him and which he always uses when he comes here. This year P has been in the UK for 75 days, 41 of which were days on which he worked for more than three hours in the UK. He was resident in the UK the year before last.
P's ex-wife lives in the UK with their 15-year-old daughter. P has spent 70 days with his daughter this year.
Under the sufficient ties test of the SRT P will be UK resident if he has three or more UK ties. He has an accommodation tie and a work tie.
However, although P has spent 70 days with his daughter this year, 21 of these days were spent at P's home in Paris and 14 were spent in Spain. Only 35 of the days P has spent with his daughter were spent in the UK.
So, P does not have a family tie and is not UK resident for this tax year.

It is a sign of the times that the drafter clarifies the word "see". Para 32(4) sch 45 FA 2013 provides:

> A day counts as a day on which P sees the child if P sees the child in person for all or part of the day.

Seeing one's child on Skype does not count.

A blind person cannot satisfy the family tie.

In some circumstances, a parent may need to instruct a child to stay in bed and not get up until they leave the house!

4.20.3 *Ascertaining residence of family member for family tie test*

In order for an individual to apply the family tie test, it is necessary to decide whether the spouse/child is resident in the UK. But in order to decide whether an individual's spouse is resident under the SRT, it may be necessary to decide whether the individual is resident in the UK.

Para 33 Sch 45 FA 2013 solves that problem by amending the residence test:

> (1) This paragraph applies in deciding for the purposes (only) of paragraph 32(1)(b) whether a person with whom P has a relevant relationship (a "family member") is someone who is resident in the UK for year X.
> (2) A family tie based on the fact that a family member has, by the same token, a relevant relationship with P is to be disregarded in deciding whether that family member is someone who is resident in the UK for year X.

RDR3 provides:

> **Example C1 (George)**
> G and his wife Mary both spend 140 days in the UK (a fewer number of days than the 183 day threshold in the automatic UK test). Neither of them was resident in any of the three previous tax years. Under the sufficient ties test of the SRT they will each be resident if they have two or more UK ties.
> Both G and Mary have an accommodation tie. They also have a relevant relationship to each other because they are man and wife. Therefore, if they have a family tie they will both be regarded as resident in the UK. However, because the family tie only exists because of their relevant relationship, the tie can be ignored.
> As each of them now only has one UK tie neither of them is UK resident.

4.20.4 *Children in full-time education*

Para 33(3) Sch 45 FA 2013 provides a special rule for residence of children:

> A family member falling within sub-paragraph (4) is to be treated as being not resident in the UK for year X if the number of days that he or she spends in the UK in the part of year X outside term-time is less than 21.

RDR3 provides:

> **C13** For the purpose of the SRT half-term breaks are regarded as term-time.

Para 33 Sch 45 FA 2013 provides:

> (4) A family member falls within this sub-paragraph if he or she–
> (a) is a child of P's who is under the age of 18,
> (b) is in full-time education in the UK at any time in year X, and
> (c) is resident in the UK for year X but would not be so resident if the time spent in full-time education in the UK in that year were disregarded.
> (5) In sub-paragraph (4)–
> (a) references to full-time education in the UK are to full-time education at a university, college, school or other educational establishment in the UK, and
> (b) the reference to the time spent in full-time education in the UK is to the time spent there during term-time.

RDR3 provides examples:

Example 31 (Yok Lin)
YL attends a boarding school in the UK. Term dates are:
Saturday 6 April to Friday 5 July
Sunday 3 September to Friday 15 December
Sunday 7 January to Friday 23 March
Sunday 15 April to Friday 6 July
She remains in the UK for the half-terms, staying with various friends and relatives but returns to the family home in Thailand during the Christmas and Easter holidays. She spends two weeks of the summer break with her friends but travels home to Thailand on 21 July.
As YL is only in the UK for 14 days outside term-time, her parents will not have a family tie with YL for the purposes of the SRT.

Example C4 (Clara)
C is 14 years-old and her parents, who reside in Dubai because of her father's work, send her to boarding school in the UK. She spends ten days of her summer break on a school trip to Scotland and one week (seven days) of her Christmas break staying with friends in London. C has therefore spent 17 days in the UK outside term-time but will not be regarded as resident in the UK for the purposes of the family tie even though C herself is resident for tax purposes in the UK.

4.21 Accommodation tie

Para 34(1) Sch 45 FA 2013 provides:

P has an accommodation tie for year X if–
(a) P has a place to live in the UK,
(b) that place is available to P during year X for a continuous period of at least 91 days, and
(c) P spends at least one night at that place in that year.

4.21.1 *Place to live*

Para 34(3) Sch 45 FA 2013 provides a commonsense definition:

P is considered to have a "place to live" in the UK if–
(a) P's home or at least one of P's homes (if P has more than one) is in the UK, or
(b) P has a holiday home or temporary retreat (or something similar) in the UK, or
(c) accommodation is otherwise available to P where P can live when P is in the UK.

4.21.2 *Accommodation "available"*

Para 34(4) Sch 45 FA 2013 provides:

> Accommodation may be "available" to P even if P holds no estate or interest in it and even if P has no legal right to occupy it.

RDR3 provides:

> **Example A13 (Peter)**
> P left the UK last year to travel the world. He let his UK property on a two year lease and has no rights to use the property. P has no home in the UK.
> Before leaving the UK P agreed with his cousin that he could stay with her on any occasion he was in the UK. This is more than a casual offer; P's cousin is fully prepared to put P up for several months at a time should he need it. He made two visits to the UK this year, each for ten days, and stayed with her. P has an accommodation tie this year.
>
> **A27** The main difference between the term 'home' for SRT purposes and available accommodation is that accommodation can be transient and does not require the degree of stability or permanence that a home does.
> **A28** If an individual does not have a home in the UK they may still have an accommodation tie if they have a place to live in the UK.
> **The principles and characteristics of accommodation as a UK tie**
> **A29** Although this guidance gives some general examples of what an accommodation tie may or may not be, whether somewhere is or is not an accommodation tie will always be dependent on the facts and circumstances of its use by the individual. HMRC may choose to enquire into those facts and circumstances.
>
> **Example A14 (Mary)**
> M has lived and worked in the USA for many years. Her uncle has a holiday houseboat in the UK where he has agreed M can stay any time she wishes, for as long as she wishes, when she comes here. M's uncle does not allow other people to stay in the houseboat.
> Last year M came to the UK twice. She made arrangements to stay for three weeks with a friend and for four weeks with her brother. Although the houseboat was available for a continuous period of at least 91 days, M did not use it at all. Therefore, she had no accommodation tie in respect of the houseboat last year.
> This year M again visited the UK twice, spending her five-week summer holiday on her uncle's houseboat. This year M has an accommodation tie as the houseboat is available for a continuous period of at least 91 days and she has stayed on it for at least one night.

Example A15 (Simone)
S has lived and worked in France all her life. She and her brother purchased a cottage in the UK several years ago as a holiday home. The cottage is let for most of the year but June, July and August are always kept free so that S or her brother can stay there. There is sufficient accommodation in the cottage to ensure that S is able to stay there, even when her brother and his family are also there.
S spent two weeks in the cottage last year and three weeks this year. S has an accommodation tie both last year and this year.
A33 Accommodation is regarded as available to you for a continuous period of 91 days if you are able to use it, or it is at your disposal, at all times throughout that period (subject to the 16 day gap rule covered below). If a relative were to make their home available to you casually, for a social visit, say, it will not mean that the accommodation would be regarded as being available to you. However, if it is available to you for a continuous period of 91 days and you use it casually, it will be a tie.
A34 Similarly, a casual offer from a friend to "stay in my spare room any time" will not constitute an accommodation tie unless your friend really is prepared to put you up for 91 days at a time (whether he actually does so or not).

Example A16 (Sacha)
S visits the UK on business and usually stays in different hotels. On one of these visits he takes an opportunity to attend the Wimbledon Tennis Championships. A business associate who lives in Wimbledon invites S to stay at his flat for three nights rather than use a hotel. The arrangement is a one-off invitation and the accommodation is not available to S for 91 days. It is not an accommodation tie.

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

Question: It would be useful to have some guidance as to what arrangements HMRC perceive to be continuously available for a consecutive period of 91 days – e.g. a situation where "your room" in your parents' home is always potentially available but is not maintained for your exclusive use. If the parent has other visitors, they may also be put in that room. Consequently, it will always necessary to check in advance of each visit whether it will be possible to stay on specific dates. Can HMRC confirm this type of arrangement would not constitute continuously available accommodation for purposes of the SRT?
HMRC answer: HMRC can confirm that accommodation availability has to be more than ad hoc or casual. Arrangement can be tacit, verbal or written but the availability itself will be a question of fact and every case

will be determined by reference to the available facts and circumstances of each case. Situations where availability is agreed but on a particular occasion it cannot be used - perhaps because some else is using it – will often be rendered irrelevant by the 'gaps of fewer than 16 days are ignored' rule at 34(2).[44]

4.21.3 *Continuous period of 91 days*

Para 34(2) Sch 45 FA 2013 provides:

> If there is a gap of fewer than 16 days between periods in year X when a particular place is available to P, that place is to be treated as continuing to be available to P during the gap.

This would be a problem for those who visit and stay in hotels every fortnight, because one ignores the gap of 15 days. RDR3 provides:

> **Example A17 (Hyo)**
> H lives and works in Poland. He is his company's European sales manager. This year he will be responsible for launching a new product in the UK and will need to spend time here. His sales force are on the road the last week of every month so he books a room in the same hotel for the first three weeks of June, July, August, and September.
> H has an accommodation tie this year.
>
> **A42** Short stays at hotels and guesthouses will not usually be considered to be an accommodation tie. However, if an individual books a room in the same hotel or guesthouse (and does not cancel those bookings) for at least 91 days continuously in a tax year, bearing in mind that short gaps may be discounted, it will be an accommodation tie (see Example A17).

4.21.4 *Accommodation is home of close relative*

Para 34(5) Sch 45 FA 2013 provides:

> If the accommodation is the home of a close relative of P's, sub-paragraph (1)(c) has effect as if for "at least one night" there were substituted "a total of at least 16 nights".

Amended as para 34(5) directs, para 34(1) provides:

> P has an accommodation tie for year X if–

---

44 29 January 2014
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf

(a) P has a place to live in the UK [in the form of accommodation which is the home of a close relative of P],
(b) that place is available to P during year X for a continuous period of at least 91 days, and
(c) P spends ~~at least one night~~ a total of at least 16 nights at that place in that year.

The relief is that one can stay up to 15 nights at a close relative without satisfying the accommodation tie. If someone is in a position where night 16 could trigger an accommodation tie, they may have to move to a hotel.

Para 34(6) Sch 45 FA 2013 provides:

> A "close relative" is–
> (a) a parent or grandparent,
> (b) a brother or sister,
> (c) a child aged 18 or over, or
> (d) a grandchild aged 18 or over,
> in each case, including by half-blood or by marriage or civil partnership.

The words "by marriage or civil partnership" do not make sense; maybe they come from an earlier draft; maybe the intention is to include close relatives of a spouse/civil partner or the spouse/civil partner of a close relative?

RDR3 gives a straightforward example:

> **Example A18 (Ravi)**
> R can stay with his grandparents whenever he is in the UK. They will put him up for more than 91 days if he wishes. He usually comes from India every year to visit them and stays with them for the whole summer.
> Last year R spent only the first two weeks with his grandparents then went on a one-off visit to his uncle (who would not be regarded as a close relative for the purposes of the SRT) for two months before returning home. So, although accommodation at his grandparents, who are regarded as close relatives, was available for more than 91 days, R stayed with his grandparents for only 14 days, and therefore had no accommodation tie.
> This year R spent the whole summer with his grandparents.
> This year R has an accommodation tie.
>
> **A38** If an individual stays in UK accommodation held by a spouse, partner or minor children then they will be considered to have an accommodation tie if they spend at least one night there.
>
> **Example A19 (P and Andrew)**
> P and his civil partner A share an apartment in London. Last year A

moved to the USA to take up a university place to study marine biology. This year A came back to the UK for a three-week holiday which he and P spent in Scotland. A spent the first night and last night of his holiday in their London apartment.
This year A has an accommodation tie.

A39 It is possible to have more than one place in the UK that counts as available accommodation. However this would still represent only one accommodation tie no matter how many different places of accommodation are available.

Example A20 (Julie)
J has lived in Canada with her husband for many years.
J and her husband own a holiday home in the UK which they do not let out and in addition J can stay with her parents whenever she is in the UK, for as long as she wishes.
This year J visits the UK and stays with her parents for four weeks and then spends a further three weeks in her holiday home before returning to Canada.
This year although J has two places that count as available accommodation she has only one accommodation tie.

4.22 Work tie

Para 35(1) Sch 45 FA 2013 provides:

> P has a work tie for year X if P works in the UK for at least 40 days (whether continuously or intermittently) in year X.

Para 35(2) Sch 45 FA 2013 defines "works in the UK for a day":

> For these purposes, P works in the UK for a day if P does more than 3 hours' work in the UK on that day.

4.23 90-day tie

Para 37 Sch 45 FA 2013 provides:

> P has a 90-day tie for year X if P has spent more than 90 days in the UK in–
>
> (a) the tax year preceding year X,
> (b) the tax year preceding that tax year, or
> (c) each of those tax years separately.

4.24 Country tie

Para 38 Sch 45 FA 2013 provides:

(1) P has a country tie for year X if the country in which P meets the midnight test for the greatest number of days in year X is the UK.
(2) If–
(a) P meets the midnight test for the same number of days in two or more countries, and
(b) that number is the greatest number of days for which P meets the midnight test in any country in year X,
P has a country tie for year X if one of those countries is the UK.

The country tie applies to leavers but not to arrivers. Presumably the object is that HMRC can notify tax authorities of the country where the individual spends most time, to see if tax should be paid there.

The question will sometimes arise as to what constitutes a single country. If an individual spends time in different states of a federal country, such as the USA, then the time counts as spent in one country. Eg if P spends 100 days in Florida, 100 days in California, and 165 days in the UK, that counts as 200 days in the USA and P will not satisfy the country tie.

Some constitutional research will occasionally be necessary. Are Spain and Majorca one country? Or Guernsey, Alderney and Sark? Or are they separate countries?

Para 145 Sch 45 FA 2013 provides:

"country" includes a state or territory;

I am unable to see the need for that.

4.25 International transport workers

4.25.1 *"Relevant job"*

Para 30(1) Sch 45 FA 2013 provides:

P has a "relevant" job on board a vehicle, aircraft or ship if condition A and condition B are met.

"Relevant job" is not a helpful label: I refer to a person with a relevant job as an **"international transport worker"**.

I refer to **"international transport conditions A and B."**

4.25.2 *International transport condition A*

Para 30(2) Sch 45 FA 2013 provides:

Condition A is that P either—
(a) holds an employment, the duties of which consist of duties to be

performed on board a vehicle, aircraft or ship while it is travelling, or

(b) carries on a trade, the activities of which consist of work to be done or services to be provided on board a vehicle, aircraft or ship while it is travelling.

Para 30(4) Sch 45 FA 2013 provides:

> Sub-paragraph (2)(b) is not satisfied unless, in order to do the work or provide the services, P has to be present (in person) on board the vehicle, aircraft or ship while it is travelling.

4.25.3 *International transport condition B*

Para 30(3) Sch 45 FA 2013 provides:

> Condition B is that substantially all of the trips made in performing those duties or carrying on those activities are ones that involve crossing an international boundary at sea, in the air or on land (referred to as "cross-border trips").

4.25.4 *Incidental duties*

RDR3 provides:

> 3.18 Being on-call or stand-by may count as time spent working depending on the conditions of your employment and the nature of your duties.
>
> **Example 21 (Paula)**
> P works as an engineer and is contractually required to be on-call for four nights a month in addition to her normal full-time attendance. She is paid a retainer for those four nights, in addition to being paid for any work done if she is called out. The four nights are counted as working time.
>
> **Example 22 (Franek)**
> F is a self-employed locksmith who keeps his mobile phone switched on 24 hours a day to receive customer calls. For the purposes of calculating working time, F should only include the time spent carrying out his jobs and the related travelling time.

Para 30(5) Sch 45 FA 2013 provides:

> Duties or activities of a purely incidental nature are to be ignored in deciding whether the duties of an employment or the activities of a trade consist of duties or activities of a kind described in sub-paragraph (2)(a) or (b).

RDR3 provides:

> **3.27** In deciding whether or not you fall within one of the categories of relevant job you should ignore duties or activities of a purely incidental nature. For instance, where a pilot whose job consists of making long haul international flights also attends a training course, the duties spent undertaking training are incidental to the duties of flying the plane and so can be ignored.
> **Example 27 (Preeya)**
> P is a member of a cabin crew on board flights between London and Switzerland for a short haul airline. For one month during the year, she changes her shifts and works on UK domestic flights. However, substantially all of the trips she makes in performing her duties are cross border ones; P does have a relevant job.
>
> **3.28** You will not have a relevant job simply because you occasionally work during a journey from one country to another, for example, if you catch up on business emails during a flight from your base in one country to visit a client in another country.

4.25.5 *Significance of having a relevant job*

Para 9(3) Sch 45 FA 2013 disapplies UK test 3 (UK work):

> This paragraph does not apply to P if—
> (a) P has a relevant job on board a vehicle, aircraft or ship[45] at any time in year X, and
> (b) at least 6 of the trips that P makes in year X as part of that job are cross-border trips that either begin in the UK, end in the UK or begin and end in the UK.

Para 14(4) Sch 45 FA 2013 disapplies overseas test 3 (Overseas work). The wording is identical.

The work tie is different for international transport workers. The rules in para 35, 36 Sch 45 FA 2013 need to be read together:

> 35 (1) P has a work tie for year X if P works in the UK for at least 40 days (whether continuously or intermittently) in year X.
> (2) For these purposes, P works in the UK for a day if P does more than 3 hours' work in the UK on that day.
> 36 (1) This paragraph applies for the purposes of paragraph 35.

---

45 Defined para 145 sch 45 FA 2013: "'ship' includes any kind of vessel (including a hovercraft)".

(2) It applies in cases where P has a relevant job on board a vehicle, aircraft or ship.

(3) When making a cross-border trip as part of that job—

(a) if the trip begins in the UK, P is assumed to do more than 3 hours' work in the UK on the day on which it begins,

(b) if the trip ends in the UK, P is assumed to do fewer than 3 hours' work in the UK on the day on which it ends.

(4) Those assumptions apply regardless of how late in the day the trip begins or ends (even if it begins or ends just before midnight).

(5) For the purposes of sub-paragraph (3)(a), it does not matter whether the trip ends on that same day.

(6) A day that falls within both paragraph (a) and paragraph (b) of sub-paragraph (3) is to be treated as if it fell only within paragraph (a).

(7) In the case of a cross-border trip to or from the UK that is undertaken in stages—

(a) the day on which the trip begins or, as the case may be, ends is the day on which the stage of the trip that involves crossing the UK border begins or ends, and

(b) accordingly, any day on which a stage is undertaken by P solely within the UK must (if it lasts for more than 3 hours) be counted separately as a day on which P does more than 3 hours' work in the UK.

4.26 Year of death

4.26.1 *Death and the SRT*

Many of the residence tests depend on the number of days that some condition is satisfied during the year. This assumes that the individual lives for the whole of the year; the rules are not apt if the individual dies during the year. For instance, overseas test 1 requires less than 16 UK days. There has to be some amendment for death during the year, or anyone who died between 6 and 20 April would be non-resident.

Death has the following consequences for the SRT:

(1) Death disapplies overseas test 1: instead overseas tests 4 and 5 and UK test 4 apply.

(2) Death alters the day count requirements for the sufficient ties test.

4.26.2 *Overseas test 4: Year of death (established non-resident)*

Para 15 Sch 45 FA 2013 provides:

(1) The fourth automatic overseas test is that—

(a) P dies in year X,
(b) [i] P was resident in the UK for neither of the 2 tax years preceding year X or, alternatively,
[ii] P's case falls within sub-paragraph (2), and
(c) the number of days that P spends in the UK in year X is less than 46.

(2) P's case falls within this sub-paragraph if—
(a) P was not resident in the UK for the tax year preceding year X, and
(b) the tax year before that was a split year as respects P because the circumstances of the case fell within Case 1, Case 2 or Case 3 (see Part 3 of this Schedule) [that is, a leaver's split year].

4.26.3 *Overseas test 5: Year of death (working overseas)*

Para 16 Sch 45 FA 2013 provides:

(1) The fifth automatic overseas test is that—
(a) P dies in year X,
(b) P was resident in the UK for neither of the 2 tax years preceding year X because
[i] P met the third automatic overseas test [Overseas work] for each of those years or, alternatively,
[ii] P's case falls within sub-paragraph (2), and
(c) P would meet the third automatic overseas test for year X if paragraph 14 were read with the relevant modifications.

(2) P's case falls within this sub-paragraph if—
(a) P was not resident in the UK for the tax year preceding year X because P met the third automatic overseas test for that year, and
(b) the tax year before that was a split year as respects P because the circumstances of the case fell within Case 1 (see Part 3 of this Schedule) [leaving for overseas work].

(3) The relevant modifications of paragraph 14 are—
(a) in sub-paragraph (1)(a) and (b) and sub-paragraph (3), for "year X" read "the period from the start of year X up to and including the day before the day of P's death", and
(b) in step 3 of sub-paragraph (3), for "365 (or 366 if year X includes 29 February)" read "the number of days in the period from the start of year X up to and including the day before the day of P's death".

Amended as para 16(3) directs, para 14 reads:

(1) The third automatic overseas test is that—

(a) P works sufficient hours overseas, as assessed over ~~year X~~ the period from the start of year X up to and including the day before the day of P's death,

(b) during ~~year X~~ the period from the start of year X up to and including the day before the day of P's death, there are no significant breaks from overseas work,

(c) the number of days in year X on which P does more than 3 hours' work in the UK is less than 31, and

(d) the number of days in year X falling within sub-paragraph (2) is less than 91.

(2) A day falls within this sub-paragraph if—

(a) it is a day spent by P in the UK, but

(b) it is not a day that is treated under paragraph 23(4) as a day spent by P in the UK.

(3) Take the following steps to work out whether P works "sufficient hours overseas" as assessed over ~~year X~~ the period from the start of year X up to and including the day before the day of P's death—

Step 1 [disregarded days]

Identify any days in ~~year X~~ the period from the start of year X up to and including the day before the day of P's death on which P does more than 3 hours' work in the UK, including ones on which P also does work overseas on the same day.

The days so identified are referred to as "disregarded days".

Step 2 [net overseas hours]

Add up (for all employments held and trades carried on by P) the total number of hours that P works overseas in ~~year X~~ the period from the start of year X up to and including the day before the day of P's death, but ignoring any hours that P works overseas on disregarded days.

The result is referred to as P's "net overseas hours".

Step 3 [reference-period days]

Subtract from ~~365 (or 366 if year X includes 29 February)~~ the number of days in the period from the start of year X up to and including the day before the day of P's death

(a) the total number of disregarded days, and

(b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.

The result is referred to as the "reference period".

Step 4 [reference-period weeks]

Divide the reference period by 7. If the answer is more than 1 and is not a whole number, round down to the nearest whole number. If the answer is less than 1, round up to 1.

Step 5 [compute net overseas hours ÷ no. of reference-period weeks]

Divide P's net overseas hours by the number resulting from step 4.

If the answer is 35 or more, P is considered to work "sufficient hours overseas" as assessed over ~~year X~~ the period from the start of year X up to and including the day before the day of P's death.

4.26.4 *UK test 4: Year of death of established UK resident*

Death in a year may effectively disapply any of the UK tests. For instance, UK test 2 (UK home) will not be met if P dies before completing the necessary 91 day period.

Para 10(1) Sch 45 FA 2013 provides a UK test for the year of death:

> The fourth automatic UK test is that–
>
> (a) P dies in year X,
>
> (b) for each of the previous 3 tax years, P was resident in the UK by virtue of meeting the automatic residence test,
>
> (c) even assuming P were not resident in the UK for year X, the tax year preceding year X would not be a split year as respects P (see Part 3 of this Schedule),
>
> (d) when P died, either–
>
> (i) P's home was in the UK, or
>
> (ii) P had more than one home and at least one of them was in the UK and
>
> (e) if P had a home overseas during all or part of year X, P did not spend a sufficient amount of time there in year X..

The point of para (c) is to apply the split year rules which would otherwise require non-residence.

The point of para (e) is that the test is not intended to catch, for example, someone who is living back in their overseas home following a secondment to the UK and happens to retain a UK home. Provided the 'spending sufficient time' requirement is met in respect of an overseas home, the amendment ensures that such an individual does not automatically become UK resident by virtue of their death.

Para 10 Sch 45 FA 2013 provides:

> (2) In relation to a home of P's overseas, P "spent a sufficient amount of time" there in year X if—
>
> (a) there were at least 30 days in year X when P was present there on that day for at least some of the time (no matter how short a time), or
>
> (b) P was present there for at least some of the time (no matter how short a time) on each day of year X up to and including the day on which P died.
>
> (3) In sub-paragraph (2)—
>
> (a) the reference to 30 days is to 30 days in aggregate, whether the days were consecutive or intermittent, and

(b) the reference to P being present at the home is to P being present there at a time when it was a home of P's.

(4) If P had more than one home overseas—

(a) each of those homes must be looked at separately to see if the requirement of sub-paragraph (1)(e) is met, and

(b) that requirement is then met so long as it is met in relation to each of them.

4.26.5 *Death in year: sufficient ties test*

The sufficient ties test is amended if the individual dies during the year. Para 20(1) Sch 45 FA 2013 provides:

> If P dies in year X, paragraph 18 has effect as if the words "More than 15 but" were omitted from the first column of the Table.

The first column of the table therefore reads:

Days spent by P in the UK in year X	**Number of ties that are sufficient**
~~More than 15 but~~ fewer than 45	At least 4

Para 20 Sch 45 FA 2013 provides:

> (2) In addition to that modification, if the death occurs before 1 March in year X, paragraphs 18 and 19 have effect as if each number of days mentioned in the first column of the Table were reduced by the appropriate number.
>
> (3) The appropriate number is found by multiplying the number of days, in each case, by A ÷ 12
>
> where "A" is the number of whole months[46] in year X after the month in which P dies.
>
> (4) If, for any number of days, the appropriate number is not a whole number, the appropriate number is to be rounded up or down as follows–
>
> (a) if the first figure after the decimal point is 5 or more, round the appropriate number up to the nearest whole number,
>
> (b) otherwise, round it down to the nearest whole number.

Amended as para 20 requires, the sufficient ties test for a death before 1 March becomes:

---

46 Para 145 sch 45 FA 2013 provides: "whole month" means the whole of January, the whole of February and so on, except that the period from the start of a tax year to the end of April is to count as a whole month.

Leavers

Days spent by P in UK in year X	**Number of ties that are sufficient**
~~More than 15 but~~ fewer than 46×A÷12	At least 4
More than 45×A÷12 but fewer than 91×A÷12	At least 3
More than 90×A÷12 but fewer than 121×A÷12	At least 2
More than 120×A÷12	At least 1

Arrivers

Days spent by P in UK in year X	**Number of ties that are sufficient**
More than 45×A÷12 but fewer than 91×A÷12	All 4
More than 90×A÷12 but fewer than 121×A÷12	At least 3
More than 120×A÷12	At least 2

RDR3 offers the following tables:

Table C: UK Ties needed by a deceased person who was UK resident for one or more of the three tax years before the tax year under consideration

No of ties		**Date of death**											
		6-30 Apr	May	1 Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	1 Mar to 5 Apr
		Days spent in UK in year of death											
All 4 ties	Not more than	4	7	11	15	19	22	26	30	34	37	41	45
At least 3 ties		5-7	8-15	12-22	16-30	20-37	23-45	27-52	31-60	35-67	38-75	42-82	46-90
At least 2 ties		8-10	16-20	23-30	31-40	38-50	46-60	53-70	61-80	68-90	76-100	83-110	91-120
At least 1 tie	Over	10	20	30	40	50	60	70	80	90	100	110	120

Table D: UK Ties needed by a deceased person who was UK resident for none of the three tax years before the tax year under consideration

No of ties		**Date of death**											
		6-30 Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	1 Mar to 5 Apr
		Days spent in UK in year of death											
All 4 ties		4-7	8-15	11-15	15-30	19-37	23-45	27-52	31-60	34-67	38-75	42-82	46-90
At least 3 ties		8-10	16-20	23-30	31-40	38-50	46-60	53-70	61-80	68-90	76-100	83-110	91-120
At least 2 ties	over	10	20	30	40	50	60	70	80	90	100	110	120

4.26.6 *Transitional rules for years to 2017/18*

Para 154(5) sch 45 FA 2013 deals with the transitional problem where the 3 previous tax years include pre-2013 periods, where the SRT (and in particular the automatic residence tests) did not apply:

Unless, in relation to a pre-commencement tax year, an election is made under sub-paragraph (3) as respects that year—[47]

(a) paragraph 10(b) of this Schedule has effect in relation to that year as if the words "by virtue of meeting the automatic residence test" were omitted,

(b) paragraph 16 of this Schedule has effect in relation to that year as if—

(i) in sub-paragraph (1)(b), the words "because P met the third automatic overseas test for each of those years" were omitted, and

(ii) in sub-paragraph (2)(a), the words "because P met the third automatic overseas test for that year" were omitted, and

(c) paragraph 49 of this Schedule has effect in relation to that year as if in sub-paragraph (2)(a) for the words from "because" to the end there were substituted "in circumstances where the taxpayer was working overseas full-time for the whole of that year."

4.26.7 *Transitional rules for years to 2015/06*

Para 154(5) sch 45 FA 2013 deals with the transitional problem where the 3 previous tax years include pre-2013 periods, where the SRT (and in particular the automatic residence tests) did not apply:

Unless, in relation to a pre-commencement tax year, an election is made under sub-paragraph (3) as respects that year[48]—

(a) paragraph 10(b) of this Schedule has effect in relation to that year as if the words "by virtue of meeting the automatic residence test" were omitted

4.27 Transitional issues

4.27.1 *Ascertaining pre-2013 residence for purposes of SRT*

The distinction between leavers and arrivers depends on whether a person is UK resident in the previous 3 years, so pre-2013 residence will be relevant to determine whether a person is a leaver or an arriver, and so may be relevant to post-2013 residence:

2013/14: position depended on residence in 2010/11, 2011/12, 2012/13

47 See 4.27.1 (Ascertaining pre-2013 residence for purposes of SRT).

48 See 4.27.1 (Ascertaining pre-2013 residence for purposes of SRT).

2014/15: position depends on residence in 2011/12, 2012/13
2015/16: position depends on residence in 2012/13

By **2016/17** the position will depend on residence in 2013/14 onwards, but the residence position in those years may in part depend on the old law. Thus it will take decades before pre-2013 residence is completely irrelevant to post 2013 residence, but the number of cases in which it matters will become small by 2016 and will diminish each year thereafter.

Para 154 sch 45 FA 2013 explains how one determines pre-2013 residence. One applies the pre-2013 residence law but with an election to apply the SRT:

> (1) This paragraph applies if—
>
> (a) year X or, in Part 3 of this Schedule, the relevant year is the tax year 2013-14, 2014-15, 2015-16, 2016-17 or 2017-18, and
>
> (b) it is necessary to determine under this Schedule whether an individual was resident or not resident in the UK for a tax year before the tax year 2013-14 (a "pre-commencement tax year").
>
> (2) The question under this Schedule is to be determined in accordance with the rules in force for determining an individual's residence for that pre-commencement tax year (and not in accordance with the statutory residence test).
>
> (3) But an individual may by notice in writing to HMRC elect, as respects one or more pre-commencement tax years, for the question under this Schedule to be determined instead in accordance with the statutory residence test.
>
> (4) A notice under sub-paragraph (3)—
>
> (a) must be given no later than the first anniversary of the end of year X or, in a Part 3 case, the relevant year, and
>
> (b) is irrevocable.

Probably in practice one will have regard to the SRT for pre-2013 years, even when no election is made. That would be sensible since the SRT "broadly recreates the outcome of the current residence rules".[49]

An election would seem to be appropriate in cases of doubt but it will usually have the downside of focussing HMRC attention on uncertain claims of non-residence in pre-2013 years.

An election would be appropriate where an individual is UK resident under the pre-2013 rules but non-resident under the SRT. That will be rare but it could happen if an individual spent more than 183 days in the

---

49 See 4.31 (How different is the SRT from pre-2013 residence law?).

UK due to exceptional circumstances (such as illness). In that case the individual could be UK resident under the pre-2013 rule (where the 183 day test did not allow any relief for exceptional circumstances) but non-resident under the SRT.

The election does not apply for other tax purposes, such as:

(1) IHT deemed domicile rule
(2) The residence period which determines liability to pay the remittance basis charge

4.27.2 *Split years before 2013/4*

Para 155 sch 45 FA 2013 provides:

> (1) This paragraph applies if—
>
> (a) year X or, for Part 3 of this Schedule, the tax year for which an individual's liability to tax is being calculated is the tax year 2013-14 or a subsequent tax year, and
>
> (b) it is necessary to determine under a provision of this Schedule, or a provision inserted by Part 3 of this Schedule, whether a tax year before the tax year 2013-14 (a "pre-commencement tax year") was a split year as respects the individual.
>
> (2) The provision is to have effect as if—
>
> (a) the reference to a split year were to a tax year to which the relevant ESC applied, and
>
> (b) any reference to the UK part or the overseas part of such a year were to the part corresponding as far as possible, in accordance with the terms of the relevant ESC, to the UK part or the overseas part of a split year.
>
> (3) Where the provision also refers to cases involving actual or deemed departure from the UK, the reference is to be read and given effect so far as possible in accordance with the terms of the relevant ESC.
>
> (4) "The relevant ESC" means whichever of the extra-statutory concessions to which effect is given by Part 3 of this Schedule is relevant in the individual's case.

The relevant ESCs are A11, A78 and D2.

4.28 Record keeping

Careful record keeping will often be necessary, especially for individuals whose residence is governed by the sufficient ties test.

4.28.1 *Record of UK days*

Note that it is hardly possible to be present in the UK without leaving

some electronic trail behind. In *Morris v HMRC*:

> the Revenue used their powers under s 20(3) TMA to obtain copies of the taxpayers' credit card and mobile phone records. These indicated that their credit cards and phones had been used in the UK on many more days than the taxpayers claimed they had been in the country. In subsequent correspondence, the solicitors said that this was because they had been used by other family members...[50]

Perhaps it would be unwise for non-UK residents to share mobile phones and credit cards with UK residents.

4.28.2 *Record keeping: home*

RDR3 provides:

> **Home**
> 7.2 When considering whether you had a home in the UK or abroad, HMRC would look for evidence to establish your presence at a particular home and whether or not a home existed. The following information would help establish the facts.
> - General overheads - utility bills which may demonstrate that you have been present in that home, for example, telephone bills or energy bills, which demonstrate usage commensurate with living in the property.
> - TV/satellite/cable subscriptions.
> - Local parking permits.
> - Membership of clubs, for example sports, health or social clubs.
> - Mobile phone usage and bills pointing to your presence in a country.
> - Lifestyle purchases pointing to you spending time in your home – for example, purchases of food, flowers and meals out.
> - Presence of your spouse, partner or children.
> - Engagement of domestic staff or an increase in their hours.
> - Home security arrangements.
> - Increases in maintenance costs or the frequency of maintenance, for example having your house cleaned more frequently.
> - Insurance documents relating to that home.
> - SORN notification that a vehicle in the UK is "off road".
> - Re-directed mail requests.
> - The address to which you have personal post sent.
> - The address to which your driving licence is registered.
> - Bank accounts and credit cards linked to your address and

50 79 TC 184 at [6].

statements which show payments made to utility companies.
- Evidence of local municipal taxes being paid.
- Registration, at your address, with local medical practitioners.
- What private medical insurance cover you have, is it an international policy?
- Credit card and bank statements which indicate the pattern and place of your day by day expenditure.

7.3 The above list is not definitive; no one piece of evidence will demonstrate the existence of your UK or overseas home with the requisite time spent there. HMRC will consider the weight and quality of all the evidence as, taken together, a number of pieces of evidence may be sufficiently strong to demonstrate your presence in a particular home.

7.4 Where your home has changed from a holiday home to your home for the purposes of the SRT, the change in occupation could be evidenced by, amongst other things:
- utility bills which may show an increase in usage,
- changes you have notified to
  - local municipal authorities, or
  - the company providing your buildings and contents insurance.

4.28.3 *Recording keeping: work*

RDR3 provides:

Working hours and location of work done

7.5 Where your residence status is determined by the automatic tests relating to working full-time in the UK or overseas, you should keep information and records relating to:
- the split in your working life between the UK and overseas, particularly noting days where you worked (including training, being on stand-by and travelling) for more or less than three hours
- the nature and duration of your work activities - a work diary/calendar or timesheet is likely to indicate this. You may find that it would be beneficial to ensure your diary is sufficiently detailed, maybe reflecting hours worked and the nature of your work, for example reviewing and responding to emails, meetings, or filing travel claims
- breaks you had from working, for example between jobs, and why
- your periods of annual, sick or parenting leave
- time you spend visiting dependent children (those under the age of 18) when they are in the UK
- time you had to spend in the UK owing to exceptional circumstances,

  - what your circumstances were
  - what you did to mitigate them where that was possible, for example making alternative travel arrangements
- your contracts of employment, and documentation/communications which relate to these, particularly to curtailment or extension of these or other changes to them.

4.28.4 *Recording keeping: sufficient ties test*

RDR3 provides:

> 7.6 Where you have connections to the UK, such as family, accommodation, work or time spent here, you should keep information and records that will allow you to work out:
> - in which countries you have spent your days and midnights, for example
>   - your travel details
>   - booking information, or
>   - tickets, and boarding cards
> - if you left the UK to live or work abroad,
>   - the date you left the UK
>   - visa or work permit applications, etc if you had to make them
>   - contracts of employment
> - if you come to live or work in the UK
>   - the date you arrive here
>   - visa or work permit applications
>   - documentation relating to you taking up employment or ceasing your previous employment
> - when you were present at your home or homes, or other available accommodation
> - how long you owned or rented those homes, for example when you purchased, sold or leased those homes
> - the time your home was unavailable for your use, for example because it was rented out.

4.29 Contacting HMRC when arriving in or leaving the UK

RDR1 provides:

> 1.14 You should tell HMRC immediately if you come to the UK to live or work or leave the UK to live or work overseas. You should also tell HMRC if those circumstances change while you are in the UK.

There is no legal obligation to do this. But at some point arrivers are likely to have to complete a tax return, put in a remittance basis claim, or

give HMRC notice of liability to tax under s.7 TMA; it may make sense to contact HMRC in advance of the formal deadlines for those steps. The RDR Manual provides:

> **RDRM10215 - Residence: Coming to the UK: Form P86** [Jun 2011]
> Since 1 June 2010 the form P86 has been withdrawn and new arrivals to the UK will be integrated into HMRC processes by existing means
> • Form P46 or P46(Expat) for new employees
> • CWF1 for newly self employed, or
> • SA1 registration process for customers who are not self employed but who need to complete a tax return
> Please refer to BGN 044/10 for further information (also refer to EIM42890 and PAYE81750)

Form P85 is used to claim tax relief or a repayment of tax on becoming non-UK resident. For a discussion of how to answer some of the questions on this form, see Finney, "A new form of test" (24 October 2013) Taxation, p.18.

4.29.1 *Form SA109*

This form contains HMRC's standard questions on residence. The minutes of the Joint Expatriate Forum on Tax and NICs provide:

> 3.3 HMRC was aware that some agents and taxpayers felt that the SA109 asked for unnecessary or duplicate information. HMRC explained that this additional information was useful because it would allow HMRC to consider whether the claimed residence status was correct even though the basis of the claim was incorrect, e.g. an individual who failed to be automatically non-resident might not have sufficient UK ties or days of presence to be resident, and vice versa. HMRC made clear that an individual had no obligation to answer question other than those they believed to be appropriate to their circumstances.
> 3.4 HMRC acknowledged that the 2013-14 SA109 is not perfect but explained that the window of opportunity for making changes was very small. HMRC has taken on board stakeholders' comments in respect of the 2013-14 form and that they will use the information to inform the 2014-15 form and guidance notes.
> 3.5 HMRC re-iterated that ultimately individual taxpayers were responsible for entries they make on their Self Assessment returns and completing the sections of the SA109 that they believe to be appropriate to them. Any entries made can be clarified or expanded upon via an entry in the free entry white space at box 39. The following points were

addressed in discussion:

- HMRC is relaxed regarding the criteria used in making entries in boxes 6 and 7. Either split year relevant dates or dates of physical arrival and departure can be entered and the information can be qualified/ explained in Box 39 to assist a reviewer. HMRC said entry of physical dates of arrival and departure will support day-count tests. Boxes 6 and 7 will be changed in future years. HMRC confirmed that boxes 6 and 7 are not appropriate where an individual is resident in the UK under the first automatic UK test (183 days test) in consecutive years. In these circumstances as the individual has not arrived or departed and this should be explained in Box 39.
- HMRC said that it is up to the individual to decide which of the boxes are appropriate to complete and use a white space note to qualify the information provided. Returns will be risk assessed for enquiry based on the entries made on the front page of SA109 in conjunction with other entries made on the return.
- HMRC confirmed that where an individual remits prior year relevant foreign earnings but is not benefiting from overseas workdays relief in the current year Box 5 should not be ticked and Box 39 should be used to explain the situation.
- When a taxpayer is completing Box 12 for split years and there are different ties for the UK/overseas parts, the taxpayer should explain in Box 39 which tie is relevant to which part. For split years and boxes 10 and 12, HMRC is only looking for information in relation to the overseas part of the year.
- If an individual has a UK and an overseas workday on the same day, that day should be entered (twice) in each of Boxes 13 and 14. The taxpayer should explain the entries in Box 39.
- When recording split year information, all relevant cases should be disclosed in Box 39 but there is no need to identify all relevant dates where multiple cases potentially apply (subject to the statutory order of priority) – only the date the individual considers applies need be recorded.[51]

4.30 Ordinary residence

Schedule 46 FA 2013 (more or less) removed the concept of ordinary residence from tax law. The concept survives in the context of NICs, in

51 29 April 2014
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/327284/140704_Expat_Forum_Minutes_FINAL.pdf

non-tax law, and in obscure corners of tax where it could not conveniently be abolished.[52]

Para 72(1) Sch 46 provides:

> The amendments made by this Part of this Schedule [Part 2: Income tax: arising basis of taxation] have effect for the purposes of a person's liability to income tax for the tax year 2013-14 or any subsequent tax year.

Para 73 Sch 46 FA 2013 provides a transitional relief:

> (1) This paragraph applies to an individual who—
>
> (a) was resident in the United Kingdom for the tax year 2012-13, but
>
> (b) was not ordinarily resident there at the end of the tax year 2012-13.
>
> (2) The provisions listed in sub-paragraph (3) have effect, in relation to such an individual and a qualifying tax year, as if the amendments made to or with respect to those provisions by this Part of this Schedule had not been made.
>
> (3) The provisions are—
>
> (a) section 413 of ITEPA 2003 (exception for payments and benefits on termination of employment etc in certain cases involving foreign service),
>
> (b) section 414 of that Act (reduction in other cases of foreign service), and
>
> (c) Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad).
>
> (4) But, in the case of provisions within paragraph (a) or (b) of sub-paragraph (3), this paragraph applies only if service in the employment in question began before the start of the tax year 2013-14.

4.30.1 *"Qualifying tax year"*

Para 73(5) Sch 46 FA 2013 provides

> The meaning of "qualifying tax year" depends on the individual's residence status—
>
> (a) if the individual was resident in the UK for the tax year 2010-11 and the tax year 2011-12, "qualifying tax year" means the tax year 2013-14,
>
> (b) if the individual was not resident in the UK for the tax year

52 Eg, taxation of diplomats; see s.841 ITA. The concept of habitual residence, which covers similar ground, remains in the context of DTAs.

2010-11 but was resident in the UK for the tax year 2011-12, "qualifying tax year" means each of the tax year 2013-14 and the tax year 2014-15, and

(c) if the individual was not resident in the UK for the tax year 2011-12, "qualifying tax year" means each of the tax year 2013-14, the tax year 2014-15 and the tax year 2015-16.

The old law will become finally obsolete on 6 April 2016 when this transitional relief ceases to have effect.

4.30.2 *Determining ordinary residence*

Para 73(6) Sch 46 FA 2013 provides

> Where, by virtue of this paragraph, it is necessary to determine whether an individual is (or is not) ordinarily resident in the UK at a time on or after 6 April 2013, the question is to be determined as it would have been in the absence of this Schedule.

4.31 How different is the SRT from pre-2013 residence law?

The Residence Consultation Paper provides:

> 3.55 The SRT ... will broadly recreate the outcome of the current residence rules...

In short, the SRT is not generally intended to change the old law, only to clarify its vagueness. Four old cases would however be decided differently under the SRT:[53]

Rogers v IRC 1 TC 225 (the mariner's case). Rogers, a ship's captain, was not present in the UK throughout 1878-9. He was held to be UK resident, but would have been non-resident under SRT overseas test 1 (less than 16 UK days).

Cooper v Cadwalader 5 TC 101 (the American grouse shooter)
Cadwalader was an American barrister who lived and worked in New York. He spent two months each year in a shooting lodge rented in Scotland. Mr Cadwalader was an arriver in the first relevant year and so have needed 4 UK ties to make him resident. In each year his only UK tie was an accommodation tie. He was held to be resident from 1900/01 to 1903/04. Under the SRT Mr Cadwalader would not have been resident.

---

53 I am grateful to Oliver Marre, Barrister, 15 Old Square, for his research in this section.

Lysaght v CIR 13 TC 511 (the non-executive director)

Lysaght was held to be resident in 1922/23 and 1923/24. He was present in the UK for approximately one week per month in each of the years of assessment, giving a UK presence of (say) 84 days p/a.

Lysaght was UK resident until sometime in 1919. If this means that he was UK tax resident in the tax year 1919/20, he would have been a "leaver" in 1922/23 and therefore have needed 3 or more UK ties to be tax resident in the UK that year. If Lysaght was not resident in 1919-20 he would have been an "arriver" in 1922/23 and so needed 4 or more UK ties.

Lysaght did not have a **family tie**.

Lysaght did not have an **accommodation tie**. His brother had a house but he did not stay there 16 nights in the year.

Lysaght did have a **work tie** in the UK. His work was the reason for his presence. Assuming he worked five of the seven days he was present in the UK, he would have worked for 60 days. 40 days constitutes a work tie.

Lysaght does not appear to have had the **90 day tie** as he does not appear to have been in the UK for more than 90 days in either of the previous two tax years.

Lysaght did not have the **country tie** as he spent more time in Ireland than in the UK.

In 1922/23 Lysaght therefore had one UK tie and would not have been resident.

In 1923/24 Lysaght would accordingly have been an "arriver" and would have needed UK ties to be resident. The same facts apply and Lysaght therefore had one UK tie.

Under the SRT Lysaght would have been non-resident.

Zorab v IRC 11 TC 289 (British subject from India)

Zorab was held not to be UK resident in 1924/25.

In that year, Zorab was present in the UK from 21 May to 18 October, making him present for 150 days.

If Zorab was an arriver, he would therefore need 2 UK ties to make him resident; and if he was a leaver, he would need 1 UK to make him resident.

In the previous three tax years, Zorab was present in the UK for 181, 182 and 173 days respectively. In the tax year 1920/21 he was present in the UK for 210 days, and therefore would have been UK resident under the 183 day test.

Accordingly in the three years prior to 1924/25 Zorab would have been

a leaver and needed just one UK tie. In each case he was present for over 90 days in the previous year and so would have been tax resident for that year.

Therefore in 1924/25 Zorab would also have been a leaver and needed just one UK tie to make him resident. He was present in the UK for over 90 days the previous year and accordingly had a **90 day tie**.

Under the SRT Zorab would have been UK resident.

Of these four cases, however, HMRC did not in practice enforce the first: they would regard Captain Rogers as non-resident.[54] The second and third were strongly (and, I think, rightly) criticised by the Canadian Supreme Court.[55] The last was a surprising decision even in its time. So the SRT has successfully identified four wrong decisions, and has provided a test of residence which is more true to the principles of the common law rules than these outlier decisions, as well as being more clear and certain.

4.32 Tax motivated non-residence

In *Reed v Clark* the taxpayer carefully organised his year abroad to reduce his tax liability but that was irrelevant to residence:

> Residence abroad for a carefully chosen limited period of work there ... is no less residence abroad for that period because the major reason for it was the avoidance of tax.[56]

The same principle will apply under the SRT.

I would regard tax-motivated migration as mitigation rather than avoidance[57] but the that classification issue is not likely to arise in this

---

54 See Kessler, *Taxation of Non-residents & Foreign Domiciliaries* (11th ed., 2012), para 3.20 (Seafarers).

55 *Thomson v Minister of National Revenue*, [1946] SCR. 209 at p.221, 224: ... "*Cooper v Cadwaladar*... is the case of an American citizen living in the United States, who owned shooting rights in Scotland, where he spent a few months annually, and who was held liable in Scotland for income tax. I feel quite confident that no Canadian court, in similar circumstances, would hold that such a person... is a "resident" ... "it must, I think, be said that the language of "plain men" was stretched to the breaking point to encompass the facts that had been found by the Commissioners [in *Lysaght v IRC*] to be residence..."

56 58 TC 528 at p.556.

57 See 32.7 ("Avoidance", "mitigation", "tax reduction", "evasion": introduction). Contrast the Special Commissioner in *Shepherd v IRC* 78 TC 389 at [62]: "Although the Appellant's intention in going to Cyprus was to *mitigate* tax, I do not regard that as a relevant factor in deciding whether he was resident in the UK."

context.

As to whether becoming treaty non-resident might constitute avoidance or abuse, see 57.12 (Tax avoidance using DTAs).

4.33 Assessment of the SRT

The Residence Response Paper provides:

> 3.5 [1] The Government does not believe the test is complicated and [2] taxpayers will be able to determine their residence status with clarity if they know how many days they have spent in the UK and which of the relevant connection factors they have.

Tax complexity is a complex phenomenon[58] but no-one will take point [1] seriously. It is however true that taxpayers will for the first time be able to determine their residence status (in the large majority of cases) with reasonable certainty. That is a change for the better. The SRT is complex, voluble and repetitious, and onerous in terms of record keeping; but however much one might regret that, no-one would swap the SRT for the previous law.

Almost all the problems raised by the pre-2013 (non)definition of residence have been swept away. This carries out the reform recommended by the Consolidation Committee in 1936,[59] though the committee would have been astonished that the definition of residence required more than 50 pages of legislation and over 100 pages of HMRC guidance.

The reform benefited from the input of the professional bodies from an early stage of policy development, rather than being produced by HM Treasury/HMRC and then presented in a complete form, at a consultation stage.

4.34 The future

Given the complexity of the rules, it is likely that there will be changes in the next few years as the effect of the rules begins to be understood. It appears that Parliament expects this, as s.218(2) FA 2013 provides:

> The Treasury may by order make any incidental, supplemental, consequential, transitional or saving provision in consequence of Schedule 45.

---

58 See the Introduction to this work.

59 See the 2012/13 edition of this work, para 3.15.1 (Practice prior to 1936).

The CIOT are lobbying for a review:

> The CIOT notes that the Tax Information and Impact Notes for the SRT, published on 11 December 2012, included a commitment that 'This measure will be kept under review through communication with affected taxpayer groups.' Further, in the discussion document 'Tax policy making: a new approach' issued in 2010, the Government recognised the importance, in maintaining the integrity of the tax code, of evaluating the impact and effectiveness of tax policy reforms following implementation.
>
> Accordingly, after a suitable interval, the CIOT recommends that the new SRT be formally evaluated, by an independent review, against its declared objectives in order to assess whether it is achieving those objectives.
>
> The CIOT suggests that such a review could be conducted in April 2016 ie three tax years after the SRT came into force.[60]

60 CIOT, letter to HMRC, (2013) published *http://www.tax.org.uk/Resources/CIOT/Documents/2013/12/131203%20Evaluation%20of%20the%20Statutory%20Residence%20Test%20-%20CIOT%20comments.pdf*

CHAPTER FIVE

RESIDENCE OF TRUSTEES

5.1 Trustee residence: Introduction

Trustee[1] residence (like individual residence) is fundamental to the territorial limitations of IT and CGT.

There is one main definition of trustee residence, which is the same for IT and CGT.[2] The IT and CGT provisions are differently worded, but the effect of the rules is the same. In this chapter I set out both sets of provisions.[3]

The current rules adopt proposals originally made in the Trusts Consultative Document (1991).[4] This is worth reading as it explains the background to the current rules.

Different rules apply to PRs[5] and to trustees of unit trusts.[6]

5.2 Who are the trustees?

One needs first of all to identify the trustees.

"Trustee" is not usually defined for IT and CGT purposes and the identity of trustees of a classic settlement is a matter of trust law.

What if there has been an invalid appointment of new trustees, and the

---

1 Strictly, one should refer to trustee residence, not trust residence, but in practice the two expressions may be used synonymously.

2 For IHT see 5.18 (Trustee residence for IHT).

3 When introduced in the FA 2006, the wording was exactly the same (though the provisions were set out twice, once in ICTA and again in TCGA). But ITA repealed the ICTA provisions and recast them in its own plain English style. If (as the professional bodies asked at the time) the 2006 reform had been put back to 2007, this complication would have been avoided. But there it is.

4 Chapter 10, accessible *http://www.kessler.co.uk/tfd-archive*.

5 See 78.3 (Residence and domicile of PRs for CGT) and 79.4 (Residence of PRs for IT).

6 See 39.3.2 (Residence of trustees of unit trust).

trust property has been transferred to the invalidly-appointed trustees? Trust law distinguishes between:

(1) a validly appointed trustee, and

(2) a person purportedly but invalidly appointed as trustee; such a person is not the proper owner and administrator of the trust assets, but is of course subject to the duty to transfer the trust assets to the correct trustees, and if they act in trust administration, they may become a trustee *de son tort.*

What confuses matters is that the term "trustee" is sometimes (but not always) used to describe a person in category (2).[7] But it is considered that such a person is not a "trustee" in the full trust law sense, and so is not a trustee for tax purposes.[8]

For the question whether a protector may be a trustee, see 5.17 (UK protector and trustee residence). For the identity of trustees of a settlement-arrangement which is not a classic trust, see 51.2 ("Settlement" and "trustee").

5.3 Trustees treated as single and distinct person

Section 474(1) ITA provides:

> For the purposes of the Income Tax Acts (except where the context otherwise requires), the trustees of a settlement are together treated as if they were a single person (distinct from the persons who are the trustees of the settlement from time to time).[9]

EN CTA 2010 Annex 1 change 3 discusses this deeming provision:

> Section 474(1) of ITA ... substitutes a notional person for the trustees. That notional person is not a company and so cannot be an associated company [for the purposes of s.25 CTA 2010]. It follows that [the former] ESC C9 is not needed to prevent a trustee company and a company which it controls from being treated as associated. Similarly, if section 474(1) of ITA treats the trustees of two settlements as separate notional person, the concession is not needed to prevent two companies controlled by different settlements from being treated as associated [even

---

7 See R.C. Nolan's learned article "Equitable Property" [2006] LQR 232.

8 For CGT this is clearer as an invalidly appointed trustee would be a nominee within s.60 TCGA, but the same would apply for IT. *Jasmine Trustees v Wells & Hind* [2007] STC 660 held that invalidly appointed trustees were "trustees" but were not "trustees of the settlement", which is another route to the same destination.

9 The CGT equivalent is s.69(1) TCGA. The CT equivalent is s.1169 CTA 2010.

if the trustees are actually the same persons].

The deeming provision applies for the taxation of the trust but not for the taxation of the trustee: trustee remuneration is income of the person who is actually the trustee, not the notional person.

5.4 Trustee residence for income tax and CGT

Section 475 ITA provides:

> (1) This section applies for income tax purposes and explains how to work out, in relation to the trustees of a settlement, whether or not the single person mentioned in section 474(1) is UK resident.
> (2) If at a time either condition A or condition B is met, then at that time the single person is UK resident.
> (3) If at a time neither condition A nor condition B is met, then at that time the single person is non-UK resident.

Similarly, s.69 TCGA provides:

> (2) The deemed person referred to in subsection (1) shall be treated for the purposes of this Act as resident in the UK at any time when a condition in subsection (2A) or (2B) is satisfied...
> (2E) If the deemed person referred to in subsection (1) is not treated for the purposes of this Act as resident in the UK, then for the purposes of this Act it is treated as being not resident in the UK.

There are therefore two circumstances in which trustees are UK resident. In the ITA they are called Condition A and Condition B. In the CGT legislation they are called Condition 1 and Condition 2. I refer to them as "**trustee residence conditions A and B**".

5.5 Trustee residence condition A: trustees all UK resident

Section 475(4) ITA provides:

> Condition A is met at a time if, at that time, all the persons who are trustees of the settlement are UK resident.

Similarly for CGT, s.69(2A) TCGA provides:

> Condition 1 is that all the trustees are resident in the UK.

One must identify the trustees' actual place of residence in their personal capacities, applying the statutory residence test to trustees who are

individuals,[10] and the corporate residence test to corporate trustees. If all the trustees are UK resident, the trust is UK resident; conversely if all the trustees are not resident in the UK, then the trust is non-resident.

5.6 Trustee residence condition B: mixed resident trustees

Condition B deals with the position of trustees of mixed residence. Section 475(5) ITA provides:

> Condition B is met at a time if at that time—
>
> (a) at least one person who is a trustee of the settlement is UK resident and at least one such person is non-UK resident, and
>
> (b) a settlor in relation to the settlement meets condition C (see section 476).

I refer to condition C as "**trustee residence condition C**".

Similarly for CGT, s.69 TCGA provides:

> (2B) Condition 2 is that:
>
> (a) at least one trustee is resident in the UK,
>
> (b) at least one is not resident in the UK, and
>
> (c) a settlor in relation to the settlement was resident or domiciled in the UK at a time which is a relevant time in relation to him.
>
> (2C) In subsection (2B)(c) 'relevant time' in relation to a settlor—
>
> (a) means where the settlement arose on the settlor's death (whether by will, intestacy or otherwise), the time immediately before his death, and
>
> (b) in any other case, a time when the settlor made the settlement (or was treated for the purposes of this Act as making the settlement).

5.7 Trustee residence condition C

Trustee residence condition C corresponds to the CGT relevant time requirement in s.69(2C) TCGA. Section 476(1) ITA provides:

> This section applies for the purpose of working out whether a settlor ("S") in relation to a settlement meets condition C at a time.

Section 476(2) ITA deals with testamentary trusts:

> If—
>
> (a) the settlement arose on S's death (whether by S's will, on S's

---

10 See 4.2.1 (Residence of trustees and personal representatives).

intestacy or in any other way), and

(b) immediately before S's death, S was UK resident or domiciled in the UK,

then S meets condition C from the time of S's death until S ceases to be a settlor in relation to the settlement.

Section 476(3) ITA deals with lifetime trusts:

If—

(a) the settlement is not within subsection (2)(a), and

(b) at a time when S made the settlement (or is treated for the purposes of the Income Tax Acts as making the settlement), S was UK resident or domiciled in the UK,

then S meets condition C from that time until S ceases to be a settlor in relation to the settlement.

There is no express split year rule, so the default rule applies: condition C is met even if a trust is made during the overseas part of a split year.[11]

For the purposes of discussion it is convenient to have some terminology and I coin the following terms:

(1) A "**UK-linked settlor**" is one within Condition C, i.e. (in short) who is resident or domiciled in the UK when they made the settlement.

(2) A "**UK-linked trust**" is one where the settlor (or a settlor) was UK-linked when they made the settlement.

(3) A trust has "**mixed resident trustees**" if some trustees are UK resident and some are not.

Thus (in my terminology) a trust with mixed resident trustees is UK resident if it is a UK-linked trust; conversely it is non-resident if it is not a UK-linked trust.

5.7.1 *Identifying settlor and date of provision: tainting*

In trusts with mixed resident trustees, it is necessary to identify the settlor(s)[12] and to ascertain when the settlor(s) provide trust property.

A trust whose settlor is not UK-linked may have some UK trustees (as long as they are not the sole trustees). In that case, however, one must take care that no other UK-linked person provides even a nominal amount of funds because that will make them co-settlors and the trust UK resident.

---

11 See 7.1 (Default rule: individual regarded as resident throughout tax year).

12 See 80.1 (Who is the settlor?).

This is known as "tainting" the trust.[13]

Suppose:

(1) Year 1: the settlor makes a trust when not UK resident;
(2) Year 2: the *same* settlor becomes UK resident and then adds property to the settlement.

The time that S made the settlement was year 1; S does not make a separate settlement in year 2; so at first sight it seems that the settlement is not UK-linked. But S is treated as making a settlement in year 2,[14] so it is considered that the settlement does become UK-linked.

For the position where a settlor leaves a loan outstanding after coming to the UK, see 80.19 (Interest-free or back-to-back loan).

5.7.2 *2013 ordinary residence transitional rules*

Prior to the abolition of ordinary residence in 2013, s.476 ITA provided:

> (2) If—
>
> (a) the settlement arose on S's death (whether by S's will, on S's intestacy or in any other way), and
>
> (b) immediately before S's death, S was UK resident, ordinarily UK resident or domiciled in the UK,
>
> then S meets condition C from the time of S's death until S ceases to be a settlor in relation to the settlement.
>
> (3) If—
>
> (a) the settlement is not within subsection (2)(a), and
>
> (b) at a time when S made the settlement (or is treated for the purposes of the Income Tax Acts as making the settlement), S was UK resident, ordinarily UK resident or domiciled in the UK,
>
> then S meets condition C from that time until S ceases to be a settlor in relation to the settlement.

Para 57(2)(3) sch 46 FA 2013 deleted the underlined words. But para 57 provides:

---

13 See 80.3.8 (Tainting).

14 See 80.3.2 (Standard IT/CGT definition of settlor). The pre-rewrite wording was clearer. Section 110 FA 1989 referred to "the time *or, where there is more than one, each of the times* when he has provided funds ... for the purposes of the settlement." It is an interesting question to what extent the Courts will refer to pre-rewrite legislation to construe post-rewrite legislation. But that will not arise here, as the current legislation seems clear enough.

(4) The amendment made by sub-paragraph (2) does not apply if the person died before 6 April 2013.
(5) The amendment made by sub-paragraph (3) does not apply if the settlement was made before 6 April 2013.

Thus the pre-2013 rules continue to apply to govern the taxation of pre-2013 settlements. But it only makes a difference if a settlor is ordinarily resident but not UK resident, which probably never happens.[15]

5.8 Residence of individual trustee during split year

The HM Treasury residence response paper provides:

> 3.122 Under the SRT an individual is resident for the whole of a tax year or not at all. It follows that provisions that look at residence status at a particular time may not work in the same way as previously. It is recognised that this may have an unintended impact on the position of a trust in the year in which an individual trustee comes to or leaves the UK and is resident for that year.
> 3.123 Accordingly the draft legislation contains a new rule that provides that an individual trustee is not regarded as resident for the purposes of determining the residence status of the trust if the only period in the year when the individual is a trustee falls within the overseas part of a split year for that individual.[16]

Section 69(2DA) TCGA provides:

> A trustee who is resident in the UK for a tax year is to be treated for the purposes of subsections (2A) and (2B) as if he or she were not resident in the UK for that year if—
> (a) the trustee is an individual,
> (b) the individual becomes or ceases to be a trustee of the settlement during the tax year,
> (c) that year is a split year as respects the individual, and
> (d) in that year, the only period when the individual is a trustee of the settlement falls wholly within the overseas part of the year.

---

15 See the 2012/13 edition of this work para 3.14 (Ordinarily resident but not resident).
16 HM Treasury, "Statutory definition of tax residence and reform of ordinary residence: summary of responses to the June 2012 consultation" (December 2012) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/consult_responses_statutory_definitions_of_tax_residence_reform_of_ordinary_residence_responses.pdf*

This applies if an individual becomes trustee during the overseas part of a split year. It does not apply if the individual is trustee throughout the year. In such a case the trust may be resident in part of the year, and so subject to CGT for the whole year.

Section 69(2DB) TCGA provides an exception relating to the PE residence rule:[17]

> Subsection (2DA) is subject to subsection (2D) and, accordingly, an individual who is treated under subsection (2DA) as not resident is, in spite of that, to be regarded as resident whenever the individual acts as mentioned in subsection (2D).

For IT, s.475 ITA provides the same rule in slightly different words:

> (7) Subsection (8) applies if—
> (a) an individual becomes or ceases to be a trustee of the settlement during a tax year,
> (b) that year is a split year as respects the individual, and
> (c) the only period in that year when the individual is a trustee of the settlement falls wholly within the overseas part of the year.
> (8) The individual is to be treated for the purposes of subsections (4) and (5) as if he or she had been non-UK resident for the year (and hence for the period in that year when he or she was a trustee of the settlement).
> (9) But subsection (8) is subject to subsection (6) and, accordingly, an individual who is treated under subsection (8) as having been non- UK resident is, in spite of that, to be treated as UK resident whenever the individual acts as mentioned in subsection (6)

5.9 Accidental residence: a trap

A trust may become UK resident if:
(1) its sole trustee becomes UK resident; or
(2) any trustee becomes UK resident and it is a UK-linked trust.
The consequences of a trust becoming UK resident will be disastrous for CGT and (except for IIP trusts) for IT. So it is essential for an individual to resign trusteeship before becoming UK resident if (1) a sole trustee or (2) trustee of a UK-linked trust. This includes trusteeships of foreign law charitable trusts.

This state of affairs is deliberate, for the 1991 consultative document

17 See 5.12 (Permanent establishment residence rule).

discussed a relief for temporary resident trustees, but suggested, implausibly, that the problem was not significant. In practice, in cases of unfairness, I expect the problem will be overlooked or ignored by non-compliant taxpayers, and HMRC may not spot it or turn a blind eye.

5.10 Sub-funds

It is common for one trust to hold separate funds ("sub-funds") on separate terms, and it is possible (though not common) for the sub-funds to have separate trustees. Section 474(2) ITA provides:

> If different parts of the settled property in relation to a settlement are vested in different bodies[18] of trustees, subsection (1) and sections 475 and 476 apply in relation to the different bodies as if they were all one body.

Thus the trust is UK resident unless the trustees of the sub-funds jointly meet the trustee residence conditions.

Section 474(3) deals with Settled Land Act settlements:

> The cases covered by subsection (2) include cases where settled land (within the meaning of the Settled Land Act 1925) is vested in the tenant for life and investments representing capital money are vested in the trustees of the settlement.[19]

Settled Land Act settlements are obsolescent and not considered here.

The FA 2006 introduced a regime for sub-funds where there has been a sub-fund election. The regime is supposed to be a relief, but its conditions are so strict that it is almost never used. In the first year of the sub-fund regime, only *eight* sub-fund elections were made.[20] The lengthy and complex provisions are dead letter tax law. There is a special residence rule for trusts subject to a sub-fund election: see s.477 ITA. In the circumstances it is not necessary to consider this here.

5.11 Transfer between settlements

Section 476(4) ITA deals with transfers between settlements:

> (4) Further, if—

---

18 The drafter has here retained the expression "body of trustees" which has elsewhere been deleted from the legislation, but it does not matter.

19 The CGT equivalent is s.69(3) TCGA.

20 Private correspondence.

(a) there is a transfer of property in relation to which section 471 applies,
(b) S is a settlor in relation to settlement 2 as a result of that section, and
(c) immediately before the disposal by the trustees of settlement 1, S meets condition C as a settlor in relation to settlement 1 as a result of subsection (2) or (3) or this subsection,

then S meets condition C as a settlor in relation to settlement 2 from the time S becomes such a settlor until S ceases to be such a settlor.
(5) "Settlement 1" and "settlement 2" are to be read in accordance with section 470(1).

For CGT, the equivalent is the last paragraph of s.69(2C) TCGA:

> and, in the case of a transfer of property from Settlement 1 to Settlement 2 in relation to which s.68B applies, "relevant time" in relation to a settlor of the transferred property in respect of Settlement 2 includes any time which, immediately before the time of the disposal by the trustees of Settlement 1, was a relevant time in relation to that settlor in respect of Settlement 1.

5.12 Permanent establishment residence rule

Section 475(6) ITA provides:[21]

> If at a time a person ("T") who is a trustee of the settlement acts as trustee in the course of a business which T carries on in the UK through a branch, agency or permanent establishment there, then for the purposes of subsections (4) and (5) assume that T is UK resident at that time.

I refer to this as the "**PE residence rule**".

The PE residence rule has four requirements:

(1) A trustee carries on a business.
(2) It carries on business in the UK.
(3) It carries on business through a branch, agency or PE in the UK.
(4) It acts as trustee in the course of that business.

HMRC has published guidance on the PE residence rule (**"HMRC Trustee Residence Guidance"**).[22]

---

21 The CGT equivalent is s.69(2D) TCGA.

22 Accessible *http://www.hmrc.gov.uk/manuals/tsemmanual/attachments/tsem1461_appendix1.doc* The guidance was published July 2009 and lightly revised December 2011 (though

A very lengthy note was issued in 2010 (**"Taxguide 3/10"**).[23] This consists of (I think, excessively) detailed examples put to HMRC by the professional bodies, followed by brief statements of generalities from HMRC. This format does make it difficult to extract relevant principles, though one or two points can be found which are not made elsewhere.

See too 5.19.1 (Reason for the PE residence rule).

5.12.1 *"A business"*

The PE residence rule only applies if the trustee carries on a business. A trustee which does not charge, or only charges to recoup expenses (such as a family trustee company) does not carry on a business. This may offer a solution to the problem of the PE residence rule.

HMRC agree. HMRC Trustee Residence Guidance provides:

> By business we mean the business of providing professional trustee services for a fee.

5.12.2 *"Acting as trustee in the course of a business"*

The business must be (or include) the business of acting as trustee. For instance, a trustee may run a property business in the UK, but is not acting as trustee in the course of running that business: it is running the business in the course of acting as trustee.

HMRC agree. HMRC Trustee Residence Guidance provides:

> 8. When considering the applicability of the [PE residence rule] the following three questions are relevant:
>
> **A. Is the trustee carrying on a business in the UK?**
>
> ... This question does not relate to the business of a particular trust that might be conducted by the trustee. It enquires whether the person who is a trustee carries out business activities (as a professional or businessman, not as trustee of a particular trust) in the UK.
>
> **B. If the trustee is carrying on a business in the UK is it carrying on that business through a branch, agent, or permanent establishment**

---

the website version is still dated 1 July 2009). The guidance is in appendix 1 of the TSE Manual but in the form of a downloadable word file, not online text; as a result it is not transcribed into commercial tax databases.

23 Taxguide 3/10 Trustee Residence: Guidance note agreed by HMRC issued August 2010 by ICAEW, CIOT and STEP accessible *http://www.icaew.com/~/media/archive/files/technical/tax/tax-news/taxguides/TAXGUIDE-3-10-Trustee-Residence.pdf*.

in the UK?

Again this means that the trustee is carrying on through the branch, agency or permanent establishment the sort of activities from which it substantially derives its worldwide profits - providing professional services for a fee - and not what it is doing in relation to an individual trust.

5.12.3 *Business "carried on in the UK"*

What if T carries on business partly in the UK and partly elsewhere? It is suggested that T carries on business in the UK, so if the UK part is carried on through a PE, T is deemed UK resident. If this is right, the rule lacks all proportionality. There is no *de minimis* rule. If a tiny part of T's trust business is carried on through a UK PE, the entire trust may become UK resident. As to whether a business is partly carried on in the UK, see 15.5 (Trading income of a non-resident), but if the business is carried on through a PE in the UK, there must be a business carried on in the UK.

5.12.4 *"Through a branch/agency or PE"*

In UK domestic tax law, the concept PE is used for companies[24] and "branch or agency" is used for individuals.[25] It is considered that the PE residence rule applies:

(1) If a corporate trustee is carrying on a trustee business through a PE.
(2) If an individual trustee is carrying on a trustee business through a branch/agency.

One does not ask if an individual has a PE, or if a company has a branch or agency. HMRC agree. HMRC Trustee Residence Guidance provides:

> 5. HMRC accept that for trustees the '*branch*' and '*agency*' tests apply to non-corporate trustees and the '*permanent establishment*' test to corporate trustees. Non-UK resident companies that are trustees therefore need only be concerned about being treated as UK resident if they carry on a business through a permanent establishment in the UK. This is in line with section 10B TCGA 1992 which has the effect that an overseas company is not taxed on the gains made by a UK branch or agency, but only on those made by a permanent establishment here. ...

---

24 The statutory definition of PE applies only to companies: see 86.2.1 (Scope of UK law definition).

25 For discussion of these concepts, see 86.2 (Meaning(s) of "permanent establishment"); 86.14 (Meaning of "branch or agency").

In practice offshore trusts often do not have individuals as trustees, and where individuals do act, they do not usually do so "in the course of business". Accordingly, the question will normally be whether a corporate trustee has a PE: branch/agency will not normally arise. Since branch/agency is a somewhat undeveloped concept that is just as well. If, exceptionally, the issue did arise, the concept of branch/agency is more or less the same as PE and for most practical purposes is identical.

If, as advocated in this book, the concept of branch/agency was replaced altogether by PE, this complication would cease.[26]

5.12.5 *One trustee of several trusts*

What is the position if a person is trustee of several trusts and acts as trustee through a UK PE for one trust, but not the others? It is considered that only that one trust is UK resident. This view makes better sense in the context and is supported by the rule that trustees are a separate person from the person who is actually trustee. HMRC agree. HMRC Trustee Residence Guidance provides:

> 8. When considering the applicability of the [PE residence rule] the following three questions are relevant ...
> **C. If so is the trustee carrying on the activity of being a trustee of that particular trust in the course of its business through the branch, agent or permanent establishment?**
> For example, a corporate trustee could have a permanent establishment in the UK but it is only when it is acting as a trustee through that place that the deemed residence rules apply in relation to the particular trust for which the company acts as trustee. The test is on a trust by trust basis. So while a corporate trustee might be acting as a trustee in relation to one trust through a fixed place of business in the UK, other trusts must be considered separately according to their facts and circumstances.
> The same principle applies in the case of a non-corporate trustee: the test is on a trust by trust basis.

5.12.6 *Several trustees of one trust*

Suppose:

(1) a trust has two trustees, T1 and T2.

(2) T1 is deemed UK resident (because it has a UK PE) but T2 is not (e.g.

---

26 See 86.16 (Commentary: let's abolish branch/agency).

T2 is an individual who does not carry on business).

This is treated as a trust with mixed resident trustees So where a trust does not have a UK-linked settlor, the appointment of a co-trustee who does not carry on trustee business would solve the difficulty posed by the PE residence rule.[27] HMRC agree. Trustee Residence Guidance example 4b provides:

> **Example 4b** (December Ltd & Mr Wednesday joint trustees of Tuesday Trust)
> As in example 4a[28] but the significance of the meetings M has in the UK with the beneficiaries of the Tuesday Trust is sufficient for D Ltd to have a permanent establishment in the UK in respect of that trust. However D Ltd has a co-trustee Mr. W who is a non-UK resident trustee.
> **HMRC view**: As there is a co-trustee who is non-UK resident and as the settlor of the T Trust was not resident or domiciled in the UK when he introduced property into the trust that means that the trustees of the T Trust as a body will not be UK resident.

5.13 When is there a UK PE?

5.13.1 *Which definition of PE?*

The term "permanent establishment" is used in different places with different definitions:

(1) "**UK-law PE**" defined in s.1141 CTA 2010.
(2) "**OECD Model PE**" defined in the OECD Model.
(3) PE as defined in any particular DTA.

The term is not defined for the purposes of trustee residence, so the applicable definition is UK-law PE.[29]

HMRC Trustee Residence Guidance in its original form (2009) assumed that the applicable definition was OECD Model PE. In December 2011, the following passage was added to the guidance:

> **Treaty Issues**
> 13. Most UK treaties contain a permanent establishment threshold (Article 5 in the OECD Model) for taxing business profits of a non-resident. This applies to both corporate and non-corporate trustees. Although permanent establishment is generally relevant to corporate

27 See 5.6 (Trustee residence condition B: mixed resident trustees).
28 See 5.15.4 (UK resident director or employee of trustee).
29 See 86.2 (Meaning(s) of "permanent establishment").

> trustees, and branch and agency to non-corporates, where trustees are residents of a treaty country (and the treaty contains a permanent establishment threshold) then effectively that is the standard that needs to be met in the case of all trustees, non-corporate as well as corporate. This means that for treaty countries broadly the same considerations for permanent establishment as set out in the guidance will apply in the case of non-corporates. This includes the independent agent exemption outlined below.
>
> 14. Thus, where a treaty exists between the UK and the country in which the trustee is resident the permanent establishment article needs to be satisfied for the trustee to be treated as UK resident for the purposes of the trustee residence rules.
>
> 15. Annex A outlines in more detail how the OECD Commentary interprets Article 5. For example, in this context for there to be a permanent establishment Article 5 usually requires the trustee to operate from a fixed place of business for more than 6 months.

There are two points here. HMRC now say:

(1) Where a corporate trustee is treaty-resident in a foreign state under a DTA with a PE article, the expression PE in the PE residence rule is understood to refer to PE as defined in the treaty.

(2) For non-corporate trustees, the same rules apply.

Point (1) is wrong, as the statutory definition applies. The definition is a taxes-act-wide definition, though it only applies in relation to companies. I suspect that the author of the guidance (both the 2009 and the 2011 versions) overlooked the statutory definition of PE. Point (2) therefore does not arise.

This is all a terrible muddle, though it would easily be resolved by straightforward tax simplification.[30] However there is probably no difference between UK-law PE and OECD model PE, and there is rarely much difference between OECD model PE and PE as defined in any particular treaty, so it will not often matter.

The more important question is what amounts to a PE, whichever definition applies. On that point HMRC Trustee Residence Guidance offers only vague and heavily qualified generalities.

There are two types of PE which I call:

(1) **"Fixed place of business PE"** and

(2) **"Agency PE"**

---

30 See 86.12 (Commentary: let's have one definition of PE).

5.13.2 *Acts of the trustee in the UK: auxiliary v core activities*

HMRC Trustee Residence Guidance provides:

> **Core activities**
> 9. In connection with Question C and in line with the Commentary to the OECD Tax Model Convention, "carrying on the function of being a trustee" means in this context activities which are the core activities of a trustee and not those activities which are auxiliary or preparatory.[31] This applies equally to non-corporate trustees.

It is correct that activities which are of a preparatory or auxiliary character do not constitute a PE.[32] The use of the label "*core* activities" to describe those which are not merely preparatory or auxiliary is not entirely apt, but it is difficult to think of a better term. HMRC Trustee Residence Guidance explains "core activities":

> 10. A trustee is the person who has a legal duty to manage the assets of that trust in the best interests of the beneficiary or beneficiaries. The trustee manages, employs and disposes of the trust assets in accordance with both the terms of the trust and the duties and responsibilities which the law places upon trustees. The core activities of a trustee would therefore be regarded as including:
> 10.1 the general administration of the trusts
> 10.2 the over-arching investment strategy.
> 10.3 monitoring the performance of those investments.
> 10.4 decisions on how trust income will be dealt with and whether distributions should be made.[33]

HMRC Trustee Residence Guidance then explains "auxiliary activities":

> 11. There are other activities which trustees carry out which are not core activities central to their conduct and management of the trust, but are instead preparatory or auxiliary activities. These *generally* can include information gathering meetings, including meetings with independent agents or with beneficiaries but, as mentioned below, each case will have to be considered individually.

In fact, the rule that information gathering is auxiliary is a statutory rule.[34]

---

31 See 5.12.5 (One trustee of several trusts).

32 See 86.9 (PE: preparatory and auxiliary activities).

33 The draft guidance included a further paragraph 10.5: "accounting, making tax returns and record keeping." Significantly, the final guidance has deleted this.

34 See 86.9 (PE: preparatory and auxiliary activities).

But in practice meetings tend to move seamlessly from information gathering to decision making.

> 12. In deciding whether the conduct and management of a particular trust is being carried on in the course of the corporate trustee's business through a permanent establishment, HMRC's approach will be to look at where the core activities are physically being carried out. If these core activities are being carried on in the UK through the corporate trustee's permanent establishment, the trustee would be treated as UK resident for the purposes of the particular trust. However as well as the nature or significance of the individual activities and meetings and whether they are core activities, we would also consider the issue of frequency. So where there is, in relation to a particular trust, evidence of considerable administrative work – such as meetings with investment managers or beneficiaries – being carried on in the UK through a permanent establishment, so that such meetings have become a major element of the trustee's activities in relation to that trust, and no longer preparatory or auxiliary, we would need to consider carefully whether as a matter of fact the non-UK resident corporate trustee was acting as a trustee through that permanent establishment.

Before turning to examples, the Guidance sets out the usual disclaimer:

> 13. The guidance that follows sets out examples of when a corporate trustee may or may not be regarded as UK resident. This guidance is based on the law as it stood on the day of publication. HMRC will publish amended or supplementary guidance if there is a change in the law or in the Department's interpretation of it. Whilst the guidance is intended to be as extensive and helpful as possible, it should not be assumed that it will provide a definitive answer in every case. That will depend upon the facts of each individual case. You can of course take your own advice on this issue and where HMRC's view is that there is a liability to UK tax on the basis that it regards a trust as UK resident because of how these rules apply to the trustees then the trustees can appeal to an independent tribunal.

5.13.3 *Marketing*

Marketing to prospective settlors is not carrying on trust business in the UK because no trust at that time exists. HMRC agree:

> **1. Preparatory work prior to the creation of any trust**
> 1.1 A non-UK resident trust company that is to be a trustee of a settlement may carry out a number of activities in the UK before the trust is created. This might, for example, include discussions with clients

such as potential settlors or beneficiaries over the appropriate terms of any trust. It could also include research with specialist professionals about possible trust investments and assets. These discussions may take place even before the beneficiaries are chosen.

Example 1 (February Ltd trustee of January trust)

Before the J Trust is established, F Ltd, a non-UK resident trust company holds several meetings in the UK at its Manchester office with the potential settlor Mr J. The meetings are to discuss the possible terms of the trust and suitable investments.

HMRC view: The J trust does not yet exist, so there is no need to consider the tests in section 69(2D) TCGA 1992 and section 475(6) ITA. In any case, introductory meetings and discussions of this type would generally be regarded as preparatory or auxiliary activities and not core activities.

5.14 When is there a fixed place of business PE?

5.14.1 *Occasional visits*

A place which the trustees use occasionally to meet the settlor, beneficiaries or others cannot constitute a fixed place of business PE, which requires a degree of permanency.[35] HMRC Trustee Residence Guidance provides:

2. Trustee carrying out duties for the administration of any trust

As mentioned in paragraphs 9 to 11 of the Background section of this guidance, a range of activities may be carried out by a trustee once a trust has been set up including meetings. When considering whether the corporate trustee is carrying on the administration of a particular trust in the course of their business through the permanent establishment, the frequency of the meetings will be looked at as well as their significance and quality.

Example 2 (March Ltd, trustee of April trust)

M Ltd, a non-UK resident trust company that is trustee of the A Trust, holds quarterly meetings in the UK at its London offices with investment advisers. The purpose of these meetings is for M Ltd to collect purely factual information about potential assets to inform future investment strategy for the A trust. The actual decisions about the investment strategy are taken by M Ltd at their home office outside the UK. No other activities or meetings relating to the A Trust are carried on in the UK.

35 See 86.3.2 (Degree of permanency).

> **HMRC view:** M Ltd has a permanent establishment in the UK. However, the significance of the meetings with the investment advisers is not sufficient for March Ltd to be regarded as acting as a trustee in respect of April Trust through that permanent establishment. They will not, therefore, be regarded as UK resident for the purposes of the April Trust.

The correct analysis is that the trustee does not have a PE in the UK, for two independent reasons: information collecting is an auxiliary matter, and the office is not used with sufficient regularity to constitute a PE. (One is of course looking on the matter on a trust by trust basis).

The author assumes that the trustee does have a fixed place of business PE but does not carry on business through it. Strictly a PE means a place of business through which a business is carried on, so there is no PE. However the end result is the same.

By contrast:

> **Example 2a** (May Ltd, trustee of June Trust)
> M Ltd, a non-UK resident trust company, is sole trustee of the J Trust. M Ltd carries out all the work for the trust through its UK offices, including preparatory work, general administration, meetings with investment managers, accountants, beneficiaries etc.. The investment and distribution policies are also all determined in the UK office. Formal ratification of those strategies, including signature of documents, is made by M Ltd at very brief meetings outside the UK, with little or no further discussion of the proposals before approval is given.
> **HMRC view:** Although the strategic decisions are core activities, all the administration of the J Trust has been carried out in M Ltd's UK office. The formal meetings outside the UK although prima facie core activities are in reality merely "rubber stamping" all the UK work. M Ltd has acted as a trustee in respect of the J Trust through its UK permanent establishment and so will be treated as UK resident for the purposes of the J Trust.

That seems correct. M Ltd has a fixed place of business PE.

> **Example 2b** (July Ltd, trustee of August trust)
> J Ltd, a non-UK resident trust company is trustee of the A Trust. It always carries out the core activities of the A Trust at its office overseas. The beneficiary of the trust has a single one-off meeting with J Ltd at J's

Manchester office to discuss the potential release[36] of capital from the A trust. The discussion involves the imposition of certain conditions on the beneficiary before such a release.

HMRC view: On the face of it J Ltd by discussing the release of capital and the imposition of conditions with the beneficiary has engaged in a core activity and this has taken place at what is J's permanent establishment in the UK. So prima facie J Ltd is acting as trustee of the A Trust through a permanent establishment. However the whole context has to be looked at - i.e. where the decision making on the trust is being carried on and if the meeting in the UK was a one-off. If the trustee took the information from the meetings out of the UK with them and then discussed and made the decisions outside the UK, they would not be UK resident. If there was any doubt as to where the decision making is taking place we would as part of our considerations consider the frequency of any meetings both within and outside the UK.

More analytically, the issues (which are not clearly identified or answered) are:

(1) Are the acts of the trustee in the UK merely preparatory (such as information gathering)? If so, there is no PE.

(2) Is the office used with sufficient regularity to constitute a fixed place of business PE? On the given facts, a one-off meeting is clearly not sufficient and the UK office is not a PE, so (although the HMRC example does not reach any conclusion) the answer is that the trustee is not UK resident.

5.15 When is there an agency PE?

An agency PE, which arises if (in short)

(1) An agent has and habitually exercises authority to do business on behalf of the trustee; and

(2) it is not "an agent of independent status acting in the ordinary course of the agent's business."[37]

5.15.1 *Accountancy services and tax advice*

A person who provides accountancy services or tax advice cannot be an agency PE as providing services of that kind does not constitute doing

36 The Guidance seems unfamiliar with trust terminology and practice, though nothing turns on that.

37 See 86.4 (Agency PE) and 86.6 (Independent agent).

business on behalf of the trustee: an accountant or tax adviser has no authority to do any business at all on behalf of the trustee.

If necessary, I would also say that these activities were auxiliary, not core; but it is not necessary to rely on that.

5.15.2 *Investment managers and brokers*

If the relief which I call IME PE relief applies, it is not necessary to consider further whether or not the broker/IM would otherwise be a PE.[38]

In this section I concentrate on investment managers; the position of brokers is the same.

The relief is in s.1146(1) CTA 2010 which provides:

> This section applies if an investment transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the UK acting as an investment manager.

This relief can apply. The non-UK resident company (the trustee) is not carrying on the trade of dealing in securities. However the trustee is carrying on the trade of acting as trustee in the UK. The contrary view has been suggested, but this seems reasonably clear.

The question then is whether investment manager conditions A to E are met. I deal with these briefly here as they are discussed in detail elsewhere.[39] Conditions A and B are straightforward. Conditions C and E require an arm's length relationship and full remuneration (which overlap: can one envisage an arm's length relationship without remuneration?). Condition D is the 20% rule. This was not written with trustees in mind, but construed in the context (perhaps a purposive construction) it should be regarded as satisfied provided that the investment manager (and connected persons) do not have an interest in more than 20% of the trust income. That will usually be the case.

It follows that investment managers/brokers on arm's length terms will not constitute a PE. Taxguide 3/10 confirms this:

> It doesn't matter that there is a corporate relationship between the investment manager and the trustee (such as the two entities being in the same corporate group) and this will not prevent the independent agent status applying. This follows the principle in the OECD Commentary on Article 5 that a subsidiary is not automatically assumed to be a

38 See 44.2 (IME PE Relief).

39 See 44.6 (Investment manager conditions).

dependent agent of its parent.

5.15.3 *Services provided by UK companies: the guidance*

The HMRC guidance in this area bears only a tenuous connection to the law. The original HMRC guidance did have the merit of clarity:

> I can confirm that our interpretation of the rules is that the provision of services on an arms length basis would not cause non-UK trustees to have a permanent establishment and therefore would not make the non-resident trustee UK resident.
>
> More specifically, this would include where services are carried out by a subsidiary on a fully arms length basis, such as:
>
> - maintaining the financial or accounting records
> - preparation of accounts
> - preparation and submission of tax returns for any settlement by a separate entity within the organisation contracting at arms length terms.
>
> Provided the services are contracted (at arms length terms) HMRC would not consider this constitutes a permanent establishment as the UK company will be rendering a service to the trust. Therefore, these activities would not cause the non-UK trustees to have a permanent establishment in the UK and the non-UK trustee is not made resident by [the PE residence rule].[40]

The correct questions are whether the agent has and habitually exercises authority to do business on behalf of the trustee, and if so whether the IM exemption applies, and whether the agent is of independent status and acting in the ordinary course of their business. The question is not whether the agent is receiving an arm's length fee. However the HMRC arm's length fee test reflects the policy aims of the provision, would be a simpler and workable rule, and would not normally give a different result from the correct approach.

In HMRC Trustee Residence Guidance, this approach is maintained but is watered down with qualifications such as "likely" or "ordinarily":

> **3. Activities carried on for the trust other than by the non-UK resident trust company**

---

40 Extract from letter dated 18 July 2007 accessible *http://old.tax.org.uk/attach.pl/5810/6458/TrusteeeResidenceTestHMRCtoEC180707.pdf*

> 3.1 Whilst a non-UK resident trust company acting as a trustee may not carry out trust business at a fixed place of business permanent establishment in the UK, it is also necessary to consider whether activities are carried out in the UK on that non-UK resident trust company's behalf by a dependent agent. If this is the case the trustee may be treated as having a permanent establishment in the UK. ...
> 3.2 The activity of providing services to a non-UK resident trustee, whether by a connected person or not, does not of itself create a dependent agency permanent establishment ... It is necessary to consider the capacity in which the person provides the services to the trust on behalf of the non-UK resident trustee. Where
> [1] the services that are provided to the trust are only those that the person is contractually obliged to provide under their agreement with the non-UK resident trustee and
> [2] are remunerated at arm's length,
> then this is *unlikely* to create a dependent agency permanent establishment.

Point [1] is hard to understand. Who would provide services without a contract? Perhaps the author has in mind a beneficiary providing services to the trust informally, but it is difficult to see how remuneration could be paid in the absence of a contract, express or implied.

> 3.3 Whether there is a dependent agency permanent establishment will depend on the facts of the case; the position is the same whether it is an unconnected third party or a UK subsidiary or other connected person that carries out the work for the trust. Where, say, a UK subsidiary of a non-UK resident trust company is providing services to a trust, then unless the powers granted to it by the non-UK resident trust company are such that it becomes a '*dependent agent with authority to do business on behalf of the non-resident trustee*' ... we will not contend that the UK subsidiary's actions cause the non-UK resident trustee company to have a permanent establishment.

This is correct.

> **Example 3** (September Ltd trustee, October Ltd investment advisers, November trust)
> S Ltd, a non-UK resident trust company contracts with O Ltd which is a UK company within the same group. The services to be provided by O Ltd are for investment advice for the N Trust. The contract between S Ltd and O Ltd is on an arm's length basis and O Ltd has no powers granted to it by September Ltd.

HMRC view: O Ltd is providing a service for S Ltd and has contracted to do so on arm's length terms. They have no authority to do business on behalf of S Ltd so are not their dependent agent. Therefore, S Ltd will not be treated as having a permanent establishment through the work carried out by O Ltd in the UK. So S Ltd will not be treated as UK resident for the purposes of the N Trust.

This is straightforward. If the investment advisor had no authority to do business on behalf of its principal, then it is not an agent at all. It cannot be an agency PE.

If the investment advisor did have power to do business on behalf of the trust, it is still not PE as long as it qualified for the IM exemption (which in practice should usually be the case).

Other examples which would be treated in the same way where there was an arm's length relationship are:

- •. Preparing trust accounts for the trustees' review and approval
- Preparing trust tax returns for the trustees' review and approval and filing the return on their behalf with HMRC
- Obtaining quotes for necessary repair work on trust property
- Having contact with workmen to ensure that those repairs are carried out
- Day to day management of let property (such as dealing with tenants etc)
- Signing small cheques such as paying for minor repairs

Example 3a (September Ltd trustee, October Ltd investment advisers) As above but O Ltd also has authority to buy and sell commodities with a view to realising profits for the trust subject to trading limits set by S Ltd. It receives an arm's length fee for this activity.

HMRC view: The investment manager is appointed by the trustee, and so is its agent. If it receives an arm's length fee for the investment management services, it will not *ordinarily* constitute a dependent agent of the non-UK resident trustee.

If, however O Ltd was providing investment management services to the trustees other than on arm's length terms i.e. was acting as their dependent agent, rather than simply providing a service to them, in that case the trustees would be *likely* to have a dependent agent permanent establishment.

(This is in line with the Investment Manager Exemption provisions – in particular that the provision of services at less than a customary rate can indicate that the investment manager is not an independent agent of the non-UK resident trustee.)

5.15.4 *UK resident director or employee of trustee*

The question may arise whether a UK resident director/employee can be an agency PE, though I wonder how often a non-resident trustee company has a UK resident director/employee.

HMRC Trustee Residence Guidance provides:

> **4. UK resident directors or other employees of a non-UK resident trust company.**
> 4.1 First, it is necessary to consider the role of the UK resident director or employee of the non-UK resident trustee.
> 4.2 If the UK resident employee is not carrying out activities that would be regarded as core trustee activities in relation to a particular trust then the presence in the UK of an employee of a non-UK resident trust company could not by itself cause a non-UK resident trustee to have a permanent establishment in the UK.

This is consistent with the point made at 5.13.2 (Acts of the trustee in the UK).

> 4.3 Where in relation to a particular trust the UK resident employee does carry out [core] trustee activities in the UK then it is likely that the non-UK resident trustee will have a permanent establishment in the UK. This will be the case if
> [1] the employee operates from a fixed base, or
> [2] does not have a fixed base but habitually acts on behalf of the non-UK resident trustee for the particular trust, i.e. is a dependent agent permanent establishment of the non-UK resident trustee.
>
> The crucial point in relation to a dependent agent permanent establishment is whether the non-UK resident trustee company has in the UK-resident employee a dependent agent with authority to conduct business on behalf of the non-UK resident trustee. If this UK resident employee of a non-UK resident trustee does have the authority to make decisions then s/he is likely to constitute a dependent agent permanent establishment of the non-UK resident trust company.

The first example is a simple variant of example 1 (marketing):

> **Example 4 (December Ltd trustee; Mr Monday employee)**
> D Ltd, a non-UK resident trustee has a director or other employee M who is resident in the UK. (This individual may also be an employee or director of UK resident group members.)
> The group provides office accommodation in the UK to M. His role is to market the business of the non-UK resident trust company in the UK which includes meeting with prospective settlors and other business

contacts for this purpose.

HMRC view: In this case, M's role is only meeting with prospective settlors and other business contacts for the purpose of marketing the business of D Ltd. Although these activities are carried out at the same place, they are not activities as a trustee that are carried out at a fixed place of business. They would generally be preparatory or auxiliary activities. This would not cause D Ltd to be treated as carrying on trustee business through a permanent establishment in the UK.

In the next example, the director/employee does more than marketing:

Example 4a

As in example 4, but M's role also extends to meeting beneficiaries of existing trusts.

HMRC view: In this case, the importance of the subject matters discussed and the decisions taken at those meetings, and the frequency of the meetings held, will need to be analysed in relation to each trust in order to reach a conclusion as to whether D Ltd is carrying on a business through a permanent establishment in the UK for that trust through M.

If no office accommodation is at his disposal M could still constitute a dependent agent permanent establishment of the non-UK resident trustee if he has authority to enter into contracts or otherwise do business on behalf of the trustee of the trusts i.e. more than simply meeting the beneficiaries and he habitually exercises that authority on behalf of his employer for the trust.

HMRC do not answer the question in the example, but the general approach to the answer is correct.

5.16 Conclusion: Some guidelines on the PE residence rule

It is considered that the following guidelines will avoid difficulties under the PE residence rule. It is assumed that the trust has only a corporate trustee, or if it has individual trustees, they are not carrying on a business (so it is necessary to consider PE issues but not branch/agency issues).

Use of professional UK investment managers and brokers on arm's length terms is safe.

Use of professional UK advisors to prepare tax returns or give tax advice is safe.

Use of UK agents to manage UK property investments is safe, providing they are acting in the ordinary course of their business, which in practice

they should be.

The trustees may meet beneficiaries (or others) in the UK in any of the following circumstances:

(1) If the meeting is at the offices of the beneficiaries (or others) or hotels; not in the trustees own offices, or in offices provided by a company in the same group as the trustees.

(2) If the meeting is occasional. Once a year or less would safely be "occasional" for this purpose.

(3) If the meeting is purely for information gathering purposes. (The minutes of the meeting should make that clear.) However it may be difficult to restrict meetings to information gathering topics.

The trustees should not appoint a beneficiary to act for the trustee (unless, exceptionally, the beneficiary is carrying on a business and acting in the course of that business).

Where the trustees own a house which is occupied by the beneficiary, I see no difficulty in the trustees authorising the beneficiary to maintain the house, as that does not constitute carrying on business in the UK.

Marketing and meetings with prospective settlors are safe.

In cases where the settlor was not UK resident or domiciled when the settlement was made, all difficulty under the PE residence rule can be avoided by the appointment of an individual co-trustee who is not UK resident and not carrying on a business.

5.17 UK protector and trustee residence

5.17.1 *Protectors*

It is common practice to appoint a "protector" who (typically) has power:

(1) to consent to certain key matters of trust administration; and

(2) to appoint and dismiss trustees.

The protector may be a UK resident. A protector could not be regarded as a trustee[41] and so their actual residence is irrelevant in ascertaining the

---

41 *Re Marshall* [1945] Ch 21 held that trustees for the purpose of the obsolescent Settled Land Act 1925 are "trustees" for the purpose of the Judicial Trustee Act 1896. Although trust land is not vested in SLA trustees, capital money and investments other than land are vested in them, and *for this reason* they were held to be trustees.

In *Manoogian v Sonsino* a settlement provided:

"... the Bank shall make such investments as may from time to time be particularly and specifically directed to be made of it in writing from time to time by the Armenian Patriarchate of Jerusalem."

actual residence of the trustees in their personal capacities.

A protector has functions imposed by the trust deed, and is not an agent of the trustees. So a protector cannot constitute an agency PE, and does not affect trustee residence under the PE residence rule.

5.17.2 *Reserved powers*

The same points arise for reserved power trusts. Taxguide 3/10 provides:

> If the settlor has reserved the investment function to himself do HMRC consider the settlor to be an agency PE of the trustees if he habitually

---

The Patriarch was not a trustee for the purposes of the Charities Act:

> "His power to direct investments is not an obligation to do so. His position is analogous to powers of a life tenant under a conventional strict settlement. The life tenant is often given powers to possess land, direct investments and so on, but none of those things make him a trustee of the settlement."

[2002] EWHC 1304 (Ch); [2002] WTLR 989; 5 ITELR 125 at [41].

In *Bridge Trustees v Noel Penny (Turbines)* [2008] EWHC 2054 (Ch) an employer had power to distribute the surplus assets of a pension scheme. The employer was not "a trustee properly so called, that is to say, a person in whom property is vested as trustee"; see at [23].

This view is generally accepted: See Hubbard *Protectors of Trusts* (2013) para 2.24 (Distinction between a Protector and a Trustee), 8.70 ('Not a trustee' provision; Underhill and Hayton, *Law of Trusts and Trustees* (18th ed, 2010), p.1.78: "Because the protector merely has powers vested in him and not trust property he is not a trustee".

It might be a different matter if the protector's powers extend beyond those traditionally given to a protector. One could imagine a trust deed under which:

(1) persons named "trustees" held legal title to property; and
(2) a person (mis)named "protector" held all the administrative and dispositive powers normally given to trustees.

This case (depending on the drafting) might be equivalent to the common situation where trust property is vested in nominees. In such a case no one suggests that the nominees are "trustees" for the purposes of the trust residence rule. Although the legal title may not be vested in the trustees, the trustees have the right to call for it.

Alternatively (depending on the drafting) the case may be equivalent to the situation where custodian trustees hold the trust fund on behalf of managing trustees under s.4 Public Trustee Act 1906. In such a situation, the (so-called) protector would be a trustee. This is hypothetical – I have never seen it in practice – but worth mentioning as warning of the problems which might arise if the powers of a UK resident protector were extremely extended.

Many offshore Trust Laws state expressly that a protector is not a trustee; but (i) that only states what would in principle be the position, and (ii) that could not be determinative of the meaning of "trustee" in a UK statute.

exercises the investment function while present in the UK? Our view is that this is NOT the case. The settlor cannot be a PE of the trustees' business because the investment function is not part of the trustees' business. The trustees' primary and overriding responsibility is to comply with the terms of the trust deed and the trust deed does not give the trustees the investment function in the first place.

HMRC answers

If settlor has investment function under trust deed then it cannot be acting as agent of trustee.

5.18 Trustee residence for IHT

Trustee residence is not very important for IHT but the concept is used on a few occasions. IHT definitions of trustee residence are different from the IT/CGT definition.

For the (somewhat academic) relief for foreign currency bank accounts,[42] s.157(4) IHTA provides:

> For the purposes of this section—
>
> (a) the question whether a person is resident in the UK shall, subject to paragraph (b) below, be determined as for the purposes of income tax; but
>
> (b) the trustees of a settlement shall be regarded as not resident in the UK unless the general administration of the settlement is ordinarily carried on in the UK and the trustees or a majority of them (and, where there is more than one class of trustees, a majority of each class) are resident there.

For the duty to disclose the creation of non-resident trusts,[43] s.218(3) IHTA provides:

> For the purposes of this section trustees of a settlement shall be regarded as not resident in the UK unless the general administration of the settlement is ordinarily carried on in the UK and the trustees or a majority of them (and, where there is more than one class of trustees, a majority of each class) are for the time being resident in the UK.

For the purposes of s.201(1)(d) IHTA (collection of non-resident trust's tax from settlor), s.201(5) IHTA makes an identical provision.[44]

---

42 See 62.20 (Non-residents foreign currency bank accounts).

43 See 87.11 (IHT reporting requirement on creation of settlement).

44 For completeness, the same definition is set out yet again in the IHT (Delivery of Accounts) (Excepted Settlements) Regulations 2008.

For the question of where the administration of a settlement is carried on, see the 5th edition of this work, para 5.6. There are various interesting points that could in theory arise under these definitions, but I doubt if they will ever arise in practice.

5.18.1 *Trustee residence for IHT: Commentary*

IHT trustee residence is a mess: essentially the same definition is repeated four times.

There is no need to have a separate definition of trustee residence for IHT at all, and if we need to keep the concept of trustee residence, it would be best to switch to the IT/CGT definition. Failing that, a single standard definition applying for all IHT purposes would be a small improvement.

5.19 Trust residence: commentary

Various policy considerations simmer below the surface of this topic.

One factor is the desirability of attracting the business of trust administration to the UK. The work will not come to the UK if that is going to incur additional tax liabilities.

Another factor is to avoid a loss of tax, measured from the benchmark of the present system.

More fundamentally, trustee residence needs to be discussed in the context of the very broad set of questions of how to tax trusts generally on (1) trust gains, and (2) trust income.[45]

Residence of *individuals* is a sensible connecting factor for UK taxation: everyone accepts that an individual who is UK resident should to some extent at least be subject to UK tax. It is not self-evident that it should be the main connecting factor, or a connecting factor at all, for the taxation of *trusts*. The move from individual residence to trust residence is problematic in two respects:

(1) Residence of trustees is a matter which is chosen by the appointment of trustees.

(2) Trustees are taxed as representing the beneficiaries, who may or may not be UK resident. Unfortunately the solution of taxing beneficiaries

45 In this paragraph I use the term "trust income" to mean income of trustees other than a life tenant's income. The taxation of life tenant's income is easy: one should tax the life tenant. I assume that settlor-interested trust rules are not in point.

on trust income or gains on an arising basis is not available.

There are three broad categories of solution. None are wholly satisfactory.

The first solution is the present system with or without minor variants.

The second solution is a system of residence by election:

> Why not let all trustees elect that they and their beneficiaries and settlors should be taxed as if they were non-UK resident. All the trust business which now goes offshore could come back to the UK. The economy, and therefore the Revenue, wold benefit, while beneficiaries would be less exposed to some of the practical problems to which offshore trusts are prone. Drug enforcement officers would then know that the reason that Mr X had set up a trust in some Caribbean jurisdiction would have nothing to do with UK taxation. [46]

Venables concludes: "No doubt the suggestion will be dismissed out of hand. Yet is it so absurd?" Discuss.

A third and more radical solution abandons the concept of trust residence. Trusts pay tax on trust income and gains regardless of the residence of the trustees: the connecting factor should be that property is provided by a UK domiciled or resident settlor. Conversely, trusts should be exempt from CGT and IT (like non-residents) in relation to property provided (or wholly provided) by foreign domiciled non-resident settlors. This is (I think) the basis of taxation of trust income and gains in Canada, New Zealand and, I suspect, most other common law jurisdictions. It is also the basis of IHT trust tax. Of course, domicile and residence of the settlor are not perfect connecting factors. Such a thing does not exist. International families can sometimes break the link by tax planning. But the rickety anti-avoidance structure of ss.86 to 98 TCGA, bolstered (supposedly) by Schs 4A to 5, can be replaced with one based on the TAA rules. The reform, like any, would bring winners and losers but the overall result could — if properly drafted — be a system which was fairer, simpler and much more effective.

5.19.1 *Reason for the PE residence rule*

It appears that the PE residence rule is based in part on loss of tax considerations and in part (somewhat implausibly) on a desire to support UK professional trustees.

---

46 Venables, *Comments on the Inland Revenue Consultative Document on Trusts* (1991) p.60.

The Trusts Consultative Document (1991) explains:

> 10.21 The income tax test might need to be modified for certain foreign corporate trustees. A trust company, resident outside the UK, could be the sole trustee of a trust which was dealt with in this country by the company's UK branch. It would not be appropriate if such a trust were treated as non-resident, because it would then be taxed more favourably than a similar trust dealt with by a branch of a UK corporate trustee, or by some other UK professional. That could both lead to a loss of tax and put UK professionals at a competitive disadvantage. It is therefore suggested that the UK branch of a foreign trustee should be treated as a trustee resident in the UK for the purpose of the common residence test.[47]

5.19.2 *Relief for professional trustees*

The law before 2007/08 provided that a UK professional trustee of a trust with a non-resident, non-domiciled settlor was regarded as non-resident. This sensible provision allowed UK professional trustees to act without attempting to tax them. The object was to allow the UK to compete on equal tax terms with foreign trustees. The reason given for its abolition was that the Department of Trade and Industry had advised the rule breached EU restrictions on State Aid.[48]

---

47 accessible *http://www.kessler.co.uk/tfd-archive.*

48 There are strong arguments against that view of EU law, and indeed the former UK rule still applies in Ireland. However HMRC refused to disclose the DTI advice which makes it impossible to assess the advice which HMRC said they received. One might speculate as to whether this was a true reason or an excuse. Following an application under the Freedom of Information Act, the Information Tribunal "urged" HMRC to disclose their reasons (which were "bald and substantially unexplained.") Unfortunately the Tribunal did not order HMRC to do so and HMRC disregarded the urging of the Information Tribunal as non-binding. So it remains a matter of speculation. For the freedom of information aspects, see *http://www.kessler.co.uk/FoI.*

CHAPTER SIX

TREATY-RESIDENCE

6.1 Three concepts of residence

The starting point is to note that there are (at least) three distinct concepts of residence. We need terms to describe them, and I coin the following terminology.

(1) **"UK-law residence"** means residence as defined in UK tax law.
   (a) A person who is resident in the UK within the UK tax law definition is **"UK-law UK resident"**
   (b) A person who is not resident in the UK within the UK tax law definition is **"UK-law non-UK resident"**.

(2) **"Treaty-residence"** means residence as defined in a DTA.
   (a) A person who is a resident of the UK within a DTA definition is **"treaty-resident in the UK"**.
   (b) A person who is resident in the foreign state within a DTA definition is **"treaty-resident in the foreign state"**. One could use the term "treaty-resident outside the UK." Statute sometimes calls this *"treaty non-resident"* but I think my term is clearer.

"Foreign-law residence" means residence as defined in some foreign tax law.

"Domestic law" means the law of the UK, or of a foreign state, as opposed to treaty law or international law.

This chapter discusses treaty-residence. The discussion is mainly on the OECD model treaty, though I refer at points to the US and other treaties. In any particular case it will be necessary to review the terms of the actual treaty concerned.

DTAs refer to a resident *of* a treaty state and UK tax law refers to a person who is resident *in* the UK; but nothing turns on the choice of preposition. I guess that the DTA wording was influenced by the French wording *résident d'un État contractant.* In this book I use *in* or *of* as

grammar dictates, whichever the context.

6.1.1 *"State"*

DTAs refer to "contracting state" but I abbreviate this to **"treaty state"** or just **"state"** and where that state is not the UK, I refer to it as **"the foreign state"**.

Article 4 OECD Model Convention provides that "contracting state"

> also includes that State and any political subdivision or local authority thereof.

For this reason, UK legislation generally uses the word "territory" rather than "state".

6.1.2 *Cross references*

The following matters are considered elsewhere:
57.1 (Introduction to DTAs).
84.25 (US S-Corps and LLCs).
For further reading, see Avery Jones et al, "Dual Residence of Individuals: The Meaning of the Expressions in the OECD Model Convention", [1981] BTR 15 & 104; Maisto (ed.) *Residence of Individuals under Tax Treaties and EC Law* (2010); Venables "The interpretation of double taxation conventions: Residence of dual resident and temporarily non-UK resident individuals" (1999) 8 OTR 189.

6.2 Relationship between treaty-residence and UK-law residence

A person cannot be treaty-resident in two treaty states: the tie-breaker test requires treaty-residence to be in one state alone.

However a person who is UK-law UK resident may be resident in another state under the UK law, or foreign law, or DTA definitions of residence. That is, UK-law UK residence does not preclude residence elsewhere.

In particular, a person may be UK-law UK resident while treaty-resident in a foreign state. Treaty-residence in a foreign state does not preclude UK-law UK residence (except for companies).

The INT Manual provides:

> **154020. Dual residents** [December 2011]
> ... Although the agreement overrides some of the normal consequences of being a UK resident, it does not, in the case of an individual, override the fact of UK residence itself for purely domestic law purposes. Even

> though an individual may be resident for agreement purposes elsewhere, he (as a resident of the UK for UK tax purposes) still has to complete returns and fulfil any similar obligations imposed by the Taxes Management Act. He will also remain entitled to any personal allowances which may be due on account of his UK residence status.

Sometimes this rule works in favour of the taxpayer; for instance, it preserves the right to personal allowances (which are conferred on UK-law UK residents but not generally available to non-residents).[1] Often however the rule works in favour of HMRC. For instance, a year in which an individual is UK-law UK resident counts for the purposes of:

(1) the long-term residence test for the remittance basis claim charge;[2]
(2) deemed domicile for IHT (the 17 year residence rule);

even though the individual is treaty-resident in a foreign state throughout the year.

In the Canadian case *Black v. The Queen*[3] the taxpayer was Canadian-law resident in Canada but treaty-resident in the UK under the tie-breaker. He argued that (contrary to the view taken here) treaty-residence outside Canada precluded his being Canada-law resident. I do not see how this was properly arguable: under the treaty, treaty-residence was defined only *for the purposes of this Convention.* The court agreed, even if it took 20 pages to set out the arguments behind that conclusion.

6.3 Residence under art. 4.1

Article 4 OECD Model Convention provides:

> 1. For the purposes of this Convention, the term "resident of a Contracting State" means any person who, under the laws of that State, is liable to tax therein by reason of his domicile, residence, place of management or any other criterion of a similar nature....

I describe a person who is within this paragraph as **"resident in a state under article 4.1"**.

For the purposes of discussion it is convenient to abbreviate the phrase "domicile, residence, place of management or any other criterion of a similar nature" to "UK-law residence"; in a UK context this is a

---

1 See 47.7 (Personal allowances under DTAs: non-residents).

2 See 10.11.11 (Individual treaty non-resident).

3 2014 TCC 12 accessible *https://www.canlii.org*. The case is going on appeal, but it seems safe to predict that the decision of the lower court will be upheld.

permissible shorthand since it is UK-law residence (not the other criteria mentioned) which determines whether a person is liable to UK tax.

There are then four requirements to be a resident of a state under article 4.1:

(1) There must be a "person".
(2) The person must be liable to tax in the state.
(3) The person must be domestic-law resident in that state.
(4) Domestic-law residence must be the reason for liability to tax.

A person may be a resident of one treaty state alone under article 4.1 , in which case they are treaty-resident in that state. A person may be a resident of both treaty states under article 4.1, in which case the tie-breaker tests discussed below are applied to identify the state of treaty-residence.

So far as the UK is concerned, a person who is UK-law UK resident is in general a resident of the UK under article 4.1.

6.3.1 *Certificate of residence*

HMRC helpsheet 302 (Dual Residents - 2012/13) provides:

> If you:
> - are resident in the UK under domestic law, and
> - are also resident in another country under that country's rules, and
> - want to claim that you are a resident of the other country for the purposes of the DTA between the UK and that other country
>
> then you need to obtain a certificate from the overseas tax authority confirming that it regards you as resident there under its domestic law for the period in question, which must be stated on the certificate.
> You should attach the certificate to your completed claim on pages 8 to 11 of this helpsheet and sent with your tax return.

A certificate is not needed for a USA treaty-resident who seeks relief under the USA/UK treaty: see 6.19 (USA/UK DTA).

A UK treaty-resident who seeks foreign tax relief under a DTA may need a certificate of UK residence for the foreign tax authorities. One can now apply online for a certificate of UK residence.[4]

6.4 "Person"

The first requirement of treaty-residence is that there must be a "person" and one must identify:

---

4 *http://www.hmrc.gov.uk/news/cert-of-residence.htm*.

(1) who that person is; and
(2) whether that person is an individual or a person other than an individual (because different tie-breaker tests apply).

The term "person" is defined (after a fashion). Article 3.1(a) OECD Model provides:

> 1. For the purposes of this Convention, unless the context otherwise requires:
>
> a) the term "person" includes an individual, a company[5] and any other body of persons;

For individuals (who are "natural persons") and companies (which are "legal persons") this is straightforward, but partnerships, trusts and some other entities are more problematic. See:

6.14 (Treaty-residence: Trusts)
6.15 (Treaty-residence: Partnerships)
84.9.3 (Is a stichting a person for treaty purposes?)

6.5 "Liable to tax"

"Tax" is usually defined to mean IT or CGT.

A remittance basis taxpayer is "liable to tax" (and so resident in the UK under article 4.1) because (among other reasons) the remittance basis is a form of tax liability.

The Canada Revenue Authority take this view:

> The Department takes the view that individuals who are subject to tax on a remittance basis are liable to tax on a world income basis. Accordingly, persons who are liable to tax in a contracting state on a remittance basis, would not in our view, be precluded from being resident there for the purposes of paragraph 1 of the residence article of a convention.[6]

That is clearly right, and the OECD commentary also assumes that it is the case.[7] The issue is normally one for foreign tax authorities rather than HMRC. It would matter for UK tax only if the foreign state operated a

---

5 Article 3.1(b) OECD Model defines company: "the term "company" means any body corporate or any entity that is treated as a body corporate for tax purposes".

6 Canada Revenue Authority, "Income Tax -- Technical News No. 16", (March 1999) *http://www.cra-arc.gc.ca/E/pub/tp/itnews-16/itnews-16-e.html*. The position is even clearer now the remittance basis is a matter of a claim, not compulsory (as was formerly the case)..

7 See 57.15 (Interaction of DT reliefs and the remittance basis).

remittance basis; the only examples of which I am aware are Ireland and Japan.

For whether partnerships are liable to tax, see 6.15.2 (Is a partnership "liable to tax"?).

6.6 Change of residence during tax year

6.6.1 *Change of residence of individual during tax year*

An individual cannot cease to be resident during a tax year.

If the split year rules are met, the individual is still resident in the UK during the overseas part of a split year. During that part the individual is still "liable to tax", since the reliefs for the overseas part of a split year cover most types of income but not all, so the individual is a resident of the UK under article 4.1 even during the overseas part of a split year.

Para 42 sch 45 FA 2013 confirms the point:

> The existence of special charging rules for cases involving split years is not intended to affect any question as to whether an individual would fall to be regarded under double taxation arrangements as a resident of the UK.

This is clear on first principles, but if authority is needed, see *Smallwood v HMRC*.

Some DTAs expressly address the question of migration during the year. For instance, article 14(6) France/UK DTA qualifies the OECD model CG article:

> The provisions of paragraph 5 [CGT relief] shall not affect the right of a Contracting State to levy according to its law a tax chargeable in respect of gains from the alienation of any property
> [a] on a person who is, and has been at any time during the previous six fiscal years, a resident of that Contracting State or
> [b] on a person who is a resident of that Contracting State at any time during the fiscal year in which the property is alienated.

6.6.2 *Change of residence of trustee during tax year*

In *Smallwood v HMRC*[8] a trust had three different trustees, resident in different states, in the course of one tax year:

Apr - Dec: Jersey resident trustees ("the Jersey period")

8 *Smallwood v HMRC* [2010] STC 2045.

Dec - Mar: Mauritius resident trustees ("the Mauritian period")
Mar onwards: UK resident trustees ("the UK period")

Gains accrued during the Mauritian period. During this period the trustees were residents of Mauritius under article 4.1 as they were liable to Mauritian tax[9] by reason of their residence in Mauritius. The question was whether they were also residents of the UK under article 4.1.[10]

One might have thought that they were not. The Mauritian trustees were liable to tax in the UK during the Mauritian period, but not by reason of *their* residence: they were so liable by reason of *someone else's* residence (namely, the residence of their successor trustees during the UK period). However the Court of Appeal held that for treaty purposes trustees should be regarded as a continuing body of persons distinct from the actual trustees.[11] The trustee-body were residents of the UK under article 4.1 during the Jersey and Mauritian periods since:

(1) they were liable to UK tax[12] during that period; and
(2) they were so liable by reason of "their" UK residence in the subsequent UK period.

During the Jersey and Mauritian periods (April - March) the trustees could not know that they were residents of the UK under article 4.1, as the facts which made them residents of the UK occurred later. That did not matter: "The issue of liability has to be looked at retrospectively".[13] That is not surprising, as during a tax year a non-resident trustee never knows whether they are subject to UK CGT, since they will be subject to tax if they become UK resident later in the tax year.

Although the trustees were residents of the UK under article 4.1, they

---

9 In fact the trustees were not liable to CGT in Mauritius, because Mauritius did not tax capital gains but only to income tax; but that made no difference because the trustees were liable to "tax" as defined.

10 A further question arose concerning POEM; see 6.18.4 (Short term period in foreign state).

11 The Court relied on s.69 TCGA. The wording of the section has changed, but the changes are not significant. The current wording reads: "*For the purposes of this Act* the trustees of a settlement shall, unless the context otherwise requires, together be treated as if they were a single person (distinct from the persons who are trustees of the settlement from time to time)." It might have been argued that s.69 is irrelevant to DTAs. However art.3.1 would justify treating trustees as a continue body of persons, and the decision on this point seems right.

12 In fact it could have been argued that the trustees were *not* liable to tax in the UK, because of s.77 TCGA and s.624 ITTOIA; but the taxpayer did not take that point.

13 *Smallwood v HMRC* [2010] STC 2045 at [42].

were also residents of Mauritius under article 4.1, so treaty-residence was decided under the tie breaker.

Smallwood is in part somewhat muddled and its reasoning is not quite that set out above. But however one reaches that result, the law should be regarded as settled.

In *Smallwood* the law decided by the CA favoured HMRC. However the rule will sometimes favour the taxpayer because income/gains arising at a time when a person does not meet the requirements to be a resident of a treaty state under article 4.1 may later meet those requirements, and retrospectively qualify for relief. Suppose:

(1) A company within s.13 TCGA is resident in Jersey during part of a tax year ("the Jersey resident period").
(2) The company becomes resident in state A under the law of state A during part of the tax year ("the state A resident period").
(3) Under the tax law of state A the company is liable to tax throughout both periods. That is, state A has a rule similar to that which applies to individuals and trusts in the UK.
(4) The company is at no time UK-law UK resident.

A gain arising in the Jersey resident period will retrospectively qualify for relief under a treaty between the UK and state A, which would benefit a UK participator within the scope of s.13. (Before the Court of Appeal's decision in *Smallwood*, an advisor might have thought that the company had to be able to say at the time the gain accrued. that it was resident under article 4.1 at that time, in order for treaty relief to apply. But now we know the position is looked at retrospectively.)

6.6.3 *HMRC view*

The International Manual provides:

> **154040. Individuals** [December 2011]
> Different countries have different fiscal years, for example, the United States tax year ends on 31 December. An individual who wishes to make a treaty claim as a resident of the United States in respect of the UK tax year 2010/11 will need to demonstrate that he is a resident of the United States during both of the United States tax years 2010 and 2011. If an individual was resident in the United States during the tax year 2010 but ceased to be so resident after 31 December 2010, then he may make a claim as a United States resident for any 2010/11 income which arose during 2010 but no claim is possible in respect of income arising in 2011. If income arises partly during a period of residence in the other country

> and partly during a period of residence in the UK, the income may be apportioned between the periods on a time basis, unless it is clear that the income arose unevenly over the two periods, for example a bonus payable for duties performed in one of the periods.

6.7 Exception where source tax only

Article 4(1) OECD Model Convention continues:

> This term, ["resident of a Contracting State"] however, does not include any person who is liable to tax in that State in respect only of income from sources in that State or capital situated therein.

This only applies in the unusual case where:

(1) A person is liable to tax in a state by reason of his domicile, residence, place of management or any other criterion of a similar nature; but
(2) the person is only liable on income from a source in that state, or on gains on property in that state.

One example is diplomats. A UK resident diplomat is exempt from tax on foreign source income and gains and so not treaty-resident in the UK. The US Department of the Treasury Technical Explanation of the Convention provides:

> Thus, a consular official of the UK who is posted in the United States, who may be subject to U.S. tax on U.S. source investment income, but is not taxable in the United States on non-U.S. source income, would not be considered a resident of the United States for purposes of the Convention. (See Code section 7701(b)(5)(B))....[14]

Another example is a person who holds as nominee for a non-resident beneficiary. A UK resident nominee for a non-resident beneficiary is not subject to tax on foreign income, and so not treaty-resident in the UK.

6.8 Tie-breaker tests for individuals

It is of course possible for a person to be:

(1) a resident of state A under art. 4.1 during the whole of a tax year and
(2) a resident of state B under art. 4.1 during the whole of the same period.

This may arise for various reasons:

(1) Two states may have different domestic-law definitions of residence.

---

14 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*. While this is directed at the US DTA, the relevant wording is (more or less) the same: See 6.19 (USA/UK DTA).

(2) Residence (however defined) is distinct from presence: a person may be UK-law UK resident throughout a year while only present in the UK during part of the year; such a person may be regarded by the foreign state as a resident of the foreign state.
(3) Split residence years: see above.

In such cases the tie-breaker tests are needed. For individuals, there are a series of tie-breaker tests, in order of priority:
(1) permanent home
(2) centre of vital interests
(3) habitual abode
(4) nationality
(5) mutual agreement.

6.9 Permanent home

Article 4 OECD Model Convention provides:

> 2. Where by reason of the provisions of paragraph 1 an individual is a resident of both Contracting States, then his status shall be determined as follows:
>
> a) he shall be deemed to be a resident only of the State in which he has a permanent home available to him;

For clarity of exposition it is helpful to consider separately the concepts of:
(1) "home"
(2) "permanent"
(3) "available"

But this neat analysis is not practical: the three terms interact, for a property which is not "available" or "permanent" is less likely to be a "home".

6.9.1 *"Home"*

"Home" matters for several tax purposes:
(1) Treaty-residence
(2) Residence[15]
(3) Child's domicile if parents living apart.[16]

See 4.14 ("Home").

15 See 4.14 ("Home").
16 See 3.14 (Child's domicile of dependency).

6.9.2 *"Permanent"*

The concept of "permanent" is as vague as the concept of "home". The OECD commentary is untrammelled by the restraint of precision:

> 11 The Article gives preference to the Contracting State in which the individual has a permanent home available to him. This criterion will frequently be sufficient to solve the conflict, eg where the individual has a permanent home in one Contracting State and has only made a stay of some length in the other Contracting State.
> 12 Subparagraph (a) means, therefore, that in the application of the Convention (that is, where there is a conflict between the laws of the two States) it is considered that the residence is that place where the individual owns or possesses a home; this home must be permanent, that is to say, the individual must have arranged and retained it for his permanent use as opposed to staying at a particular place under such conditions that it is evident that the stay is intended to be of short duration.
> 13. ... But the permanence of the home is essential; this means that the individual has arranged to have the dwelling available to him at all times continuously, and not occasionally for the purpose of a stay which, owing to the reasons for it, is necessarily of short duration (travel for pleasure, business travel, educational travel, attending a course at a school, etc).

Para 11 of the commentary looks at the situation where "the individual has a permanent home in one Contracting State and has only made a stay of some length in the other Contracting State". The commentary is not making a contrast between:

(1) permanent, and
(2) a stay of some length.

The point correctly being made is that the existence of one (undoubtedly) permanent home impacts on whether one regards *another* place as a permanent home.

Paras 12 and 13 contrast:

(1) permanent use, and
(2) a stay of short duration; exemplified as "travel for pleasure, business travel, educational travel, attending a course at a school, etc".

This suggests that a stay of more than short duration qualifies as permanent. Thus in *Hankinson v HMRC* 81 TC 424, an apartment held under an 18 month lease, where the taxpayer lived for some 130 nights between 6 April 1998 and 2 January 1999, was found to be a permanent

home.

A similar view is taken in Australia on the phrase "permanent place of abode".[17] The court said:

> "permanent" is used in the sense of something which is to be contrasted with that which is temporary or transitory. It does not mean everlasting. The question is thus one of fact and degree.[18]

6.9.3 *"Available"*

HMRC helpsheet 302 (Dual Residents - 2012/13) provides:

> A permanent home is any form of accommodation which is continuously available to you for your personal use. It does not necessarily have to be owned by you.

6.10 Centre of vital interests

Article 4(2)(a) OECD Model Convention provides:

> if he has a permanent home available to him in both States, he shall be deemed to be a resident only of the State with which his personal and economic relations are closer (centre of vital interests);

The test is multifactorial, no single factor is decisive. The OECD commentary provides:

> 15 If the individual has a permanent home in both Contracting States, it is necessary to look at the facts in order to ascertain with which of the two States his personal and economic relations are closer. Thus, regard will be had to his family and social relations, his occupations, his political, cultural or other activities, his place of business, the place from which he administers his property, etc. The circumstances must be examined as a whole, but it is nevertheless obvious that considerations based on the personal acts of the individual must receive special attention. If a person who has a home in one State sets up a second in the other State while retaining the first, the fact that he retains the first in the environment where he has always lived, where he has worked, and where he has his family and possessions, can,

---

17 Section 6(1) of the (Australian) Income Tax Assessment 1936 provides: "resident or resident of Australia ... includes a person ... whose domicile is in Australia, unless ... his permanent place of abode is outside Australia".

18 *Applegate v Federal Commissioner of Taxation* [1978] 1 NSWLR 126 at p.134, affirmed on appeal [1979] FCA 37; (1979) 38 FLR 1.

> together with other elements, go to demonstrate that he has retained his centre of vital interests in the first State.

This is only relevant where the tie-breaker is not decided by the question of a permanent home.

A similar expression "centre of a debtor's main interests" is used in Regulation (EC) No 1346/2000 of 29 May 2000 on insolvency proceedings; case law on that may also be helpful in relation to the expression centre of vital interests.

Yates v HMRC [2012] UKFTT 568 (TC) and *Hankinson v HMRC* 81 TC 424 offer illustrations but are otherwise of no particular importance.

The Australian Revenue offer another illustration:

> **Facts**
>
> The taxpayer and his spouse and children initially lived in the UK.
>
> The taxpayer accepted employment in Australia for a period of 18 months, which is the period in question.
>
> The taxpayer and his spouse and children moved to Australia for that period.
>
> The taxpayer and his spouse own family homes both in Australia and in the UK, and each home is maintained so that it can be used by the taxpayer or his family at any time.
>
> Prior to, and during, the period in question, the taxpayer had business interests in both the UK and Australia.
>
> While the taxpayer lived in Australia, he managed both his Australian and UK business interests from Australia, but he made occasional short trips to the UK when it was necessary.
>
> The taxpayer is a member of several clubs in the UK. When he was living in the UK or visiting the UK he would regularly socialise with friends and with members of his extended family.
>
> While he was living in Australia the taxpayer did not join any clubs, and he did not socialise as regularly, as he did not have many friends or any extended family members in Australia.
>
> The taxpayer's hobby is attending cooking classes, and he attended cooking classes as often as he could, both in Australia and in the UK.
>
> During the 18 months that the taxpayer lived in Australia, he remained on the electoral roll in the UK but he was not on the Australian electoral roll.
>
> The taxpayer's children have a cat, which remained in the UK with friends while the taxpayer was living in Australia.
>
> At the end of the 18 months, the taxpayer and his spouse and children returned to the UK to live.

Reasons for Decision

Paragraph 10 of the OECD Commentary on Article 4 states that the facts to which the special rules in Article 4(2) of the OECD Model will apply are those existing during the period when the residence of the taxpayer affects tax liability. In this case the relevant period is the 18 months that the taxpayer lived in Australia.

[The Australian Revenue cite para 15 of the OECD commentary and continue:] This means that the taxpayer's relations with Australia must be weighed against the taxpayer's relations with the UK, with more weight being given to the taxpayer's personal acts.

Klaus Vogel on Double Taxation Conventions, Third Edition, Kluwer Law International 1997, is consistent with paragraph 15 of the OECD Commentary on Article 4(2)(a) and states that 'personal relations encompass a taxpayer's entire way of life' (emphasis added). This includes family and social, political and cultural relations. At paragraphs 74 and 74a of page 249, Vogel suggests that factors that are part of a person's personal relations include intention to spend their old age at a certain place; possession of an identity card; enlistment on the electoral roll; and relations to a thing or to an impersonal entity such as a private collection or membership in a club or the exercise of a hobby.

As the taxpayer pursued his hobby in both Australia and the UK, the hobby is not significant in deciding the centre of vital interests.

The registration on the electoral roll; the club memberships; the presence of friends and extended family members and the family's cat; and the active social life when he visits the UK, are factors which point to the UK as the taxpayer's centre of vital interests during the 18 months that he is living in Australia.

However, at page 249, paragraph 74a, Vogel states that the most significant factor in establishing to which state a taxpayer's personal relations are closer is where the taxpayer regularly lives with his family. Where a taxpayer lives alone, the location of any family members will be relevant if the taxpayer maintains relations with them.

The taxpayer lived with his family in Australia during the 18 months in question. Even though he had strong ties with the UK during that time, the presence of his spouse and children in Australia carries greater weight.

Regarding economic relations, the OECD Commentary on Article 4 at paragraph 15 refers to 'the place from which he administers his property, etc'.

Consistent with this, Vogel at page 249, paragraph 74b, states:

> **Economic relations will primarily exist with activities** linked with a locality or with sources of income. ... A permanent home mainly

> serving the realization or maintenance of economic relations, would be a manifestation of special ties with a place to live. This, will as a rule, be **that home from where the individual proceeds to perform his everyday work and from where he manages and controls his capital or income** (emphasis added).

In this case, during the 18 months in question the taxpayer was employed in Australia so the home from where he proceeded to perform his everyday work was in Australia. In addition, although he made some trips to the UK when his business interests made it necessary, he generally managed his business interests from Australia during the time he lived in Australia.

For the 18 months in question the taxpayer lived with his spouse and children in Australia, and generally managed his business interests from Australia. Consequently, even though he also had ties with the UK, the taxpayer's personal and economic relations, during the 18 months in question, were closer with Australia than with the UK.[19]

6.11 Habitual abode

Article 4(2) OECD Model Convention provides:

> b) if
>
> [i] the State in which he has his centre of vital interests cannot be determined, or
>
> [ii] if he has not a permanent home available to him in either State,
>
> he shall be deemed to be a resident only of the State in which he has an habitual abode;

The OECD commentary provides:

> 16 Subparagraph (b) establishes a secondary criterion for two quite distinct and different situations:
>
> (a) the case where the individual has a permanent home available to him in both Contracting States and it is not possible to determine in which one he has his centre of vital interests;
>
> (b) the case where the individual has a permanent home available to him in neither Contracting State.
>
> Preference is given to the Contracting State where the individual has an habitual abode.
>
> 17 In the first situation, the case where the individual has a permanent home available to him in both States, the fact of having an habitual

19 ATO ID 2011/53.

> abode in one State rather than in the other appears therefore as the circumstance which, in case of doubt as to where the individual has his centre of vital interests, tips the balance towards the State where he stays more frequently. For this purpose regard must be had to stays made by the individual not only at the permanent home in the State in question but also at any other place in the same State.
> 18 The second situation is the case of an individual who has a permanent home available to him in neither Contracting State, as for example, a person going from one hotel to another. In this case also all stays made in a State must be considered without it being necessary to ascertain the reasons for them.
> 19 In stipulating that in the two situations which it contemplates preference is given to the Contracting State where the individual has an habitual abode, subparagraph (b) does not specify over what length of time the comparison must be made. The comparison must cover a sufficient length of time for it to be possible to determine whether the residence in each of the two States is habitual and to determine also the intervals at which the stays take place.

HMRC helpsheet 302 (Dual Residents - 2012/13) provides:

> You will be a resident of the State in which you have a 'habitual abode'. This test which is applied to each State is whether you live in that State regularly, normally or customarily. The number of visits as well as the duration of the visits are taken into account and this test is applied over a sufficient period as is necessary depending on the facts of each case. If you cannot be said to have a habitual abode in either of the two countries or you have a habitual abode in both of them, you should move on to the next test.

In *Hankinson v HMRC* 81 TC 424, the tribunal said:

> In a case in the Tax Court of Canada ... *Lingle v R* 12 ILTR 55, Campbell J makes the point that the French equivalent to an habitual abode is *où elle séjourne d'une façon habituelle* which means "where one stays[20] in an habitual way." He was dealing with the US-Canada treaty the official languages of which are English and French whereas we are dealing with

20 [Footnote original] We also point out that *séjourne* is also translated as "is present" in article 15(2)(c) of the Model: *le bénéficiaire séjourne dans l'autre État pendant une période ou des périodes n'excédant pas au total 183 jours durant toute période de douze mois*….("the recipient is present in the other state for a period or periods not exceeding in aggregate 183 days in any twelve month period…").

the Treaty, which is in English and Dutch but as the French is the same in the French official version of the OECD Model we consider that it is permissible to look at it to confirm the meaning of the expression in English which is an odd use of the English language. In the overlap period [the appellant] did not stay in either state because he was in Barbados. We find that he did not have an habitual abode in either state during the overlap period. If it is possible to look at a longer period as required by paragraph 19 of the Commentary, such as the UK tax year 1998-99, he stayed in an habitual way in both countries (some 130 nights in the Netherlands and 82 nights in the UK, including non-working days) and the intervals were fairly evenly spaced. We regard both of these as habitual. We do not read this test as purely a matter of counting days in spite of the Commentary's reference to "tips the balance towards the State where he stays more frequently" unless one is far larger than the other because the Treaty deals with the possibility of habitual abode being in both or neither state, which would virtually never arise with counting days. We would therefore decide if it were relevant that the Appellant had an habitual abode in neither state if only the overlap period were taken or that he had an habitual abode in both states if the tax year 1998-99 were taken.[21]

6.12 Nationality and mutual agreement procedure

Article 4(2)(c)(d) OECD Model Convention provides:

c) if he has an habitual abode in both States or in neither of them, he shall be deemed to be a resident only of the State of which he is a national;
d) if he is a national of both States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

6.13 Period for enquiry into individuals tie-breaker tests

In *Hankinson v HMRC* 81 TC 424 the Tribunal said:

> It seems therefore that while one applies the tie-breaker at the time of alienation in a case concerning capital gains, this does not mean that one cannot look at a longer period in applying the elements of the tie-breaker when appropriate, which it may not be for permanent home, but it is necessarily for habitual abode.

21 The Court of Appeal stated this on p.497 at [69].

While one needs to determine whether a person is treaty-resident at a particular moment, one looks over an appropriate period of time to determine whether they are treaty-resident at that moment; see 6.18.3 (Period for enquiry into POEM).

6.14 Treaty-residence: Trusts

The first step is to identify who is the "person" for treaty purposes.[22]

6.14.1 *The trust law background*

The following propositions are well established.

(1) A trust is not a person (ie does not have legal personality, which in short means the ability to hold property and be subject to liabilities). This is the case in English law, Scots law[23] or, as far as I know, any other trust law.[24]

(2) A trustee is a person. It is often convenient to distinguish:
(a) a person acting in their capacity as trustee and
(b) that person acting in their private capacity.
However trust law does not recognise the concept of separate personality, that is, there is only one person: the person acting in one capacity is not a different person from the person acting in another capacity. For instance, a person (as trustee) cannot enter into a contract with himself (as individual) because of the rule that a contract must be made between two persons.[25]

---

22 See 6.4 ("Person").

23 The Scottish Law Commission discussed but rejected a proposal to give trusts legal personality: *Discussion Paper on the Nature and the Constitution of Trusts* (October 2006) para 2.29-2.45.

24 Though a trust is close to being a person. Gretton, "Trusts Without Equity" (2000) 49 Int'l & Comp. LQ 599:
"In ordinary language the noun 'trust' is a person word. Idiom treats it like 'company'. 'This land is owned by a trust.' 'These shares are held by a trust'. ... 'The trust is liable for this debt.' Ordinary language is right."
So one should not rule out the possibility that context may show that the word "person" is used (loosely rather than strictly) to mean or include a trust.

25 Discussion of the topic demands reference to *The Mikado:*
Ko-Ko. Pooh-Bah, it seems that the festivities in connection with my approaching marriage must last a week. I should like to do it handsomely, and I want to consult you as to the amount I ought to spend upon them.
Pooh-Bah. Certainly. In which of my capacities? As First Lord of the Treasury, Lord Chamberlain, Attorney General, Chancellor of the Exchequer, Privy Purse, or Private

It seems to me that the source of difficulty is not rule (1) that a trust is not a person: it is rule (2) that a trustee does not have a separate personality. Despite that rule, references in legislation to "individuals" have always been understood to exclude trustees (and references to "trustees" exclude individuals) and that usage takes us towards some concept of separate personality. Further, for UK IT and CGT purposes, a trustee is deemed to be a distinct, notional person.[26] So in a tax context, at least, rule (2) does not apply: the person acting as trustee *is* generally regarded as a separate person from the same person acting in their private capacity.

6.14.2 *Position of trustees under OECD Model treaty*

One would expect:

(1) Trustees (if more than one) to be treated as one person ("a trustee-person"). That avoids the difficulty which otherwise arises if a trust

---

Secretary?

Ko-Ko. Suppose we say as Private Secretary.

Pooh-Bah. Speaking as your Private Secretary, I should say that, as the city will have to pay for it, don't stint yourself, do it well.

Ko-Ko. Exactly — as the city will have to pay for it. That is your advice.

Pooh-Bah. As Private Secretary. Of course you will understand that, as Chancellor of the Exchequer, I am bound to see that due economy is observed.

Ko-Ko. Oh! But you said just now "Don't stint yourself, do it well".

Pooh-Bah. As Private Secretary.

Ko-Ko. And now you say that due economy must be observed.

Pooh-Bah. As Chancellor of the Exchequer.

Ko-Ko. I see. Come over here, where the Chancellor can't hear us. Now, as my Solicitor, how do you advise me to deal with this difficulty?

Pooh-Bah. Oh, as your Solicitor, I should have no hesitation in saying "Chance it —"

Ko-Ko. Thank you. I will.

Pooh-Bah. If it were not that, as Lord Chief Justice, I am bound to see that the law isn't violated.

Ko-Ko. I see. Come over here where the Chief Justice can't hear us. Now, then, as First Lord of the Treasury?

Pooh-Bah. Of course, as First Lord of the Treasury, I could propose a special vote that would cover all expenses, if it were not that, as Leader of the Opposition, it would be my duty to resist it, tooth and nail. Or, as Paymaster General, I could so cook the accounts that, as Lord High Auditor, I should never discover the fraud. But then, as Archbishop of Titipu, it would be my duty to denounce my dishonesty and give myself into my own custody as first Commissioner of Police.

Ko-Ko. That's extremely awkward."

26 See 5.4 (Trustee residence for income tax and CGT).

had trustees who are resident in different places in their private capacities.

(2) Whether there is a single trustee, that person is to be treated as a person (again, one may use the expression "trustee-person") who is distinct from the individual or company who is the trustee, acting in their private capacity. That allows for the possibility that the person may be treaty-resident in one state in their private capacity and treaty-resident in another state in their trustee capacity.

Is there any difficulty in reading the model treaty to reach this result? Where there is more than one trustee, there is no difficulty at all: the trustees should be regarded as a body of persons (and so constitute one person) for treaty purposes. That trustee-person is necessarily distinct from the persons who act as trustees.

Where there is a sole trustee, it should still be regarded as a person distinct from the person who is actually the trustee in their private capacity. It would be odd to have one rule for a sole trustee and another where there is more than one trustee. One way to reach this result is to say that even a sole trustee is a "body of persons" it may seem odd to say that a single person constitutes a body of persons but the institution of a "corporation sole" is an example. Another way to reach this result is to say that "person" is to be understood by reference to domestic tax law, domestic tax law treats the trustee as a separate person, despite the trust law rule to the contrary; and so the same rule applies for a treaty.

The trustee-person is not an individual, so its treaty-residence is decided by the POEM rule, not the rule for individuals (which would obviously not be appropriate).

Another possible analysis would be that the *trust* is a person for OECD model purposes. There are two difficulties with that:

(1) A trust is not a "person" in English law.

(2) Even if the trust were a person, it is only treaty-resident in a treaty state under article 4.1 if it is a person "liable to tax." Whether a person is liable to tax is a matter of domestic law. In UK law, it is the trustees rather than trust which is liable to tax.

These arguments are not insuperable: since treaties can be loosely construed, there are no words from which there is no escape. One could say that a trust is a person (in the treaty sense) even though not a person in English law; and that the trust is "liable to tax" (in the treaty sense) since the trust fund will bear the tax. But there is no need to take this high-handed course, as to regard the trustee or trustees as a distinct trustee-

person is the simpler and more satisfactory solution.[27]

While it is possible that a foreign law might look at the matter differently, it would be desirable if possible for all countries to adopt the same approach, and in practice this seems to be the case.

HMRC agree. INT Manual provides:

> **162120. Certificates of Residence: for trusts** [January 2014]
> Trusts are not themselves liable to tax in the UK, but the trustees may be liable to tax in the UK. A trust therefore cannot be a resident of the UK for the purposes of most UK Double Taxation Agreements (DTAs). Accordingly a Certificate of Residence (CoR) cannot normally be issued in respect of a trust. However, some trusts are included within the definition of 'resident of a Contracting State' in specific DTAs. In those limited circumstances a certificate of residence can be issued in respect of a trust. It is therefore essential that the relevant DTA is checked on receipt of all applications.
> Trustees as a body (rather than the trust) are regarded as a single person. Where the trustees as a body are regarded as resident in the UK they will be entitled to the benefits of a DTA as they are liable to tax in the UK in respect of the income of the trust. Subject to the comments in the next paragraph a CoR can be issued in respect of a UK resident body of trustees.

The International Manual also provides:

> **353600. Claims by trustees in Ireland** [January 2010]
> Article 4(3) (Fiscal Residence) of the convention makes reference to 'a person other than an individual'. Trustees act as a body of persons and so are persons other than an individual for the purposes of the article, and we therefore refer to the criteria in Article 4(3) to determine whether trustees of an Irish trust are resident in the Ireland for the purposes of the convention.

This is commenting on the Ireland/UK treaty but the same would apply generally as that follows the OECD model.

The same would apply to the estate of a deceased person.

On this topic, see Prebble, "Trusts and Double Taxation Agreements"

---

27 It has been suggested that the question whether the person for the purposes of the OECD Model is the trustees (as a body) or the trust is purely theoretical and makes no difference in practice. I have some sympathy with that view. But (1) it is always good to know what one is talking about; (2) HMRC need to know what name(s) to put on a residence certificate: the trust or the trustee(s).

ejournal of Tax Research (2004) vol 2 no 2 p192, accessible *http://www.atax.unsw.edu.au/ejtr/content/issues/previous/paper3_v2n2.pdf*.

6.15 Treaty-residence: Partnerships

6.15.1 *Is a partnership a "person" for treaty purposes?*

This section considers whether a partnership is a treaty-resident of a state. For other DT issues see 41.10 (DT relief for partnership).

The first question is whether a partnership is a "person" for treaty purposes.[28] Before turning to the definition, one might expect a partnership to be a person, since:

(1) It avoids difficulty which would arise if a partnership had partners who were resident in different places in their private capacity.
(2) It avoids an undesirable distinction between English partnerships (which are not legal persons) and Scottish partnerships (which are).
(3) "It is highly improbable that so common a vehicle for commercial activity as a partnership should have been intended to be excluded " from a DTA...[29]

Article 3.1(a) OECD Model provides:

> 1. For the purposes of this Convention, unless the context otherwise requires:
>
> a) the term "person" includes an individual, a company[30] and any other body of persons;

There are three bases for arguing that a partnership is a person within this definition:

(1) A partnership is a body of persons, and so within the definition (the "body of persons" argument).
(2) A partnership is a person in the ordinary sense of the expression (the "ordinary person" argument.) If so it does not matter whether a partnership is a body of persons.
(3) Partners (being individuals or companies) are persons (in their private capacities) and a partnership is a person because the singular includes the plural (the singular/plural argument).

---

28 See 6.4 ("Person").

29 *Padmore v IRC* 62 TC 352 at p.377.

30 Article 3.1(b) defines company: "the term "company" means any body corporate or any entity that is treated as a body corporate for tax purposes".

Discussion is made more difficult because of the variety of wording in different treaties.

The body of persons argument succeeded in *Padmore v IRC*, where the issue was whether a partnership was a person for the purposes of the Jersey/UK DTA. This is an old colonial model DTA, and the definition of "person" is not quite OECD model form. Para 2(1)(d) of the Jersey/UK DTA provides:

> The term "person" includes any body of persons, *corporate or not corporate*;

The Court held that a partnership is a body of persons in the ordinary sense of that term.[31] Accordingly it constitutes a person within the Jersey/UK treaty definition.

The Revenue's argument was a subtle one. They referred to the general principle that undefined treaty terms have domestic law meanings[32] and argued:

> "Body of persons", it is contended by the Crown, is a term of art in UK tax law and is defined in [what is now s.989 ITA] as follows:
>
> > " 'Body of persons' means any body politic, corporate or collegiate, and any company, fraternity, fellowship and society of persons whether corporate or not corporate".[33]
>
> The Jersey Law has a provision in the same terms ....[34]

That is, the Revenue argued that (1) a partnership (although a body of persons in the general sense) was not a body of persons in the UK tax law sense and (2) the UK tax law sense applied in the treaty. The Court's reason for rejecting the argument at point (2) was equally subtle:

> If that [UK tax law] definition [of body of persons] is applicable, a partnership is (I will assume) not within it; because a partnership cannot be brought within any of the groups specified in the definition. ... however ... the [UK tax law] definition is not applicable. The draftsman of the Arrangement in para 2(1)(d) was giving a comprehensive

---

31 See 6.15.1 (Is a partnership a "person" for treaty purposes?).

32 Article 2(3) of the Jersey/UK DTA, which is broadly similar to the OECD model form, see 57.11 (Undefined terms have domestic law meanings).

33 Section 989 ITA copies the earlier provision verbatim. These terms are now of historical interest and it is a pity that the tax law rewrite failed to modernise and simplify this. Perhaps the Office of Tax Simplification could do so.

34 *Padmore v IRC* 62 TC 352 at p.377.

> definition of the word "person". If he was assuming that the statutory definition of "body of persons" would apply, I see no reason why he should have added the words "corporate or not corporate". They form part of the Article 2(1)(d) definition itself, and their inclusion had no purpose if the statutory definition applied. I do not think that they can be dismissed as mere tautology. On the face of the Arrangement they are a specific part of what is intended to be a self-contained definition for the purposes of the Arrangement. They are not, it seems to me, consistent with an intention on the part of the draftsman to utilise the statutory definition. They indicate a contrary intention. A partnership is, as a matter of the ordinary use of English, plainly a body of persons, and the language used by the draftsman does not, in my opinion, indicate that he was intending any different meaning.

Unfortunately that reasoning does not apply to the OECD model form, since that lacks the words "corporate or not corporate." See Article 3.1(a) OECD Model set out above. It is however considered that "body of persons" in the OECD model should be given its ordinary meaning rather than its UK tax meaning. It is relevant to note that the term does not have a UK tax meaning, only an income tax meaning. There is no similar definition for CGT. Thus a partnership is a body of persons (within the meaning of the Model convention) and so a person within the OECD definition.

Avery Jones agrees:[35]

> ...it is hardly likely that the other State, if it had troubled to ask in the course of negotiations what body of persons meant in UK tax law, would wish to have an 18th century list of bodies govern the interpretation of the treaty. It is therefore not difficult to say that the context otherwise requires, and one should include partnerships either within the ordinary meaning of body of persons, or merely by reading the singular as the plural.[36] On the basis a partnership may be included in those cases

35 Avery Jones, "Bodies of Persons" [1991] BTR 453 at p.464.

36 [Footnote original] This was mentioned as a possibility in *Padmore* [1989] STC 493, 498g but Fox L.J. stated that this was not sufficient for the taxpayer to succeed, as those persons were not all resident in Jersey. It is not clear why persons in partnerships should not be given a single residence under TA 1988, s.112, which the court held to be applicable for the purpose of interpreting the treaty. The statutory definition of residence of trustees in FA 1989, s.110 does not give them a residence as a body but deems the resident trustees to be non-residence and vice versa.

> where wording similar to the 1977 Model is used.[37]

Alternatively one could fall back on the ordinary person or the singular/plural arguments. The difficulty with that is that some treaties provide:

> the term "person" *comprises* an individual, a company and any other body of persons;

Others provide:

> the term "person" *means* an individual, a company and any other body of persons;

Avery Jones comments:

> Normally in modern UK treaties the definition of person is that it *comprises* an individual, a company and any other body of persons, which was the wording of the 1963 model; at first sight this might prevent the ordinary meaning of *person* from being used.[38] The official French version of the Model, however, uses the same word *comprend* in both the 1963 and the 1977 versions. There may therefore be no difference between it and the 1977 Model, which makes it difficult to see why the UK persists in using the 1963 wording. In eight treaties the word *means* is used instead of the Model's *includes*, in which case the ordinary meaning, in addition to the defined meaning, of person cannot be used. But certainly where *includes* and probably in the light of the French version where *comprises*, is used, the argument that the context includes partnerships under the ordinary meaning of body of persons is still available, as these words are not intended to be comprehensive. It is considered that partnerships are so included under that wording, on the basis that they cannot have been intended to be excluded.[39]

It is considered that any of these arguments will suffice, so a partnership is a "person" for DTA purposes in all cases, though the precise arguments which arise vary from one wording to another. The commentary to the

---

37 [Footnote original] See art. 1 Comm. Paras. 2-6 of the application of the OECD Model to partnerships. The UK gives a residence to a partnership: TA 1988, s.112(1).

38 [Footnote original] The OECD Commentary (Art.3 Comm. Para.2), however, stated that the provision was not worded as an exhaustive definition and should be read as indicating that the term person is used in a very wide sense.

39 Avery Jones, "Bodies of Persons" [1991] BTR 453 at p.464.

OECD model convention supports this view. The commentary to article 3 provides:

> Partnerships will also be considered to be "persons" either because they fall within the definition of "company" or, where this is not the case, because they constitute other bodies of persons.

6.15.2 *Is a partnership "liable to tax"?*

But even though a partnership is a person, it is only a resident of a treaty state within the OECD definition if it is a person liable to tax. Whether a person is liable to tax is a matter of domestic law.

In UK law, it is the partners rather than the partnership which is liable to tax. Partners are of course "persons" in their private capacity. They can be treaty-resident in the UK. It seems that a partnership (though a "person") cannot be treaty-resident in the UK. A partnership could (depending on the foreign domestic law) be treaty-resident in a foreign state.

INT Manual provides:

> **162033. Certificates of Residence and partnerships** [January 2013]
> UK partnerships (including Scottish partnerships and UK LLPs) cannot be resident in the UK for the purposes of any of the UK's Double Taxation Conventions (DTCs) because they are not themselves liable to tax in the UK. Therefore they cannot claim the benefits of any DTC. However, UK resident partners making up the partnership are entitled to such benefits as they are taxed in the UK on their share of the partnership worldwide profits.

This is correct for OECD Model treaty-residence. Para 5 of the OECD Commentary to article 1 similarly provides:

> Where... a partnership is treated as fiscally transparent in a State, the partnership is not "liable to tax" in that State within the meaning of paragraph 1 of Article 4, and so cannot be a resident thereof for the purposes of the Convention.

The same (more or less) applies to LLPs. BI Manual provides:

> **82145 Limited Liability Partnership (LLP): International aspects** [December 2013]
> ... A UK LLP is not itself liable to tax in the UK as the LLP tax provisions identify other persons (i.e. the members) as the persons who are to be taxed. Accordingly for the purposes of the Double Taxation

> Agreements (DTAs) the LLP is not regarded as being resident in the UK and cannot itself therefore claim relief from foreign taxes under such agreements. As is now the case with ordinary and limited partnerships the members must make the claim.
> ...In the very narrow circumstances where the LLP is not treated as transparent, but instead as a body corporate for tax purposes (such as when the LLP is in liquidation or being wound up in circumstances where transparency cannot be retained), we take the view that the LLP can itself claim relief for foreign taxes, including if appropriate underlying tax.

However HMRC do not always apply this view in practice.[40]

6.15.3 *HMRC practice*

For US partnerships this practice is not followed and HMRC allow claims from partnerships.[41] There is no reason why American partnerships should be treated better than other partnerships, and other partnerships could therefore seek to obtain similar treatment, even though there would be no legal remedy if HMRC insist on applying the strict law. In practice HMRC accept such claims. INT Manual provides:

> **335510. Background** [December 2011]
> ***How Double Taxation Agreements treat partnerships***
> Double Taxation Agreements (DTAs) do not normally give a tax-transparent concern such as a partnership the right to claim treaty relief. Instead, in those cases where the income of the partnership is taxable in the hands of the partners (rather than at the level of the partnership) each partner should in strictness make a separate claim to treaty relief...
> ***HMRC's approach to Partnerships***
> We recognise that applying the provisions of the DTA in such a literal way would be unwelcome and could possibly hamper the business interests of both countries.
> Accordingly, HMRC may accept a single claim from a partnership on behalf of its partners. Where a partnership wishes to take advantage of this departure from the strict position and to claim treaty benefits on

---

40 See 59.16.3 (US partnerships and LLCs).
This view was rejected in India: *Linklaters LLP v Income Tax Officer* [2010] ITELR 245. However in India (unlike the UK) a partnership is treated as a person for income tax purposes: s.2 [India] Income Tax Act 1961.

41 See 59.16.3 (US partnerships and LLCs).

behalf of its partners, the general or managing partner should sign the declaration on the claim form. In addition to the normal information that is required by the claim form, a list of the names and addresses (residential addresses for individuals and registered addresses where the partners are companies) of the partners should be supplied. These lists should also normally show for each partner their respective percentage shares of the income that is the subject of the claim. In those cases where all of the partners are resident for tax purposes in the same country as the one in which the partnership is established (the country with which the DTA applies) it is not necessary to insist upon this information being provided.

Where any of the partners are resident for tax purposes in a country other than that in which the partnership is established, they should make separate claims to relief from UK tax under the terms of any relevant DTA.

In cases where such a partner is resident in a country which (unusually) does not regard the partnership as fiscally transparent - which would mean that it regards the partnership rather than the UK payer as the source of the payments its resident receives - then that partner may have difficulty in getting a claim form certified as relevant to a DT treaty with the UK. In such rare cases, you should consider accepting an uncertified claim form. If you decide to invite a claim in these circumstances you should ask for the claim form to be supported by additional evidence (for example copies of recent tax returns) to show that the partner is resident for tax purposes in the country concerned. Any such case should be referred to Specialist Personal Tax, PT International Advisory at an early stage.

335520. Examination of claims [December 2011]

What Personal Tax International will do

Where you are able to conclude that all of the beneficial owners of the income for which relief is being claimed are "qualifying persons" within the meaning of a DTA, then you should process the claim in the normal way without further enquiry. This includes asking the tax office for the UK payer of the income to complete a report on forms in the 4450 series as appropriate.

If the supplementary information that is supplied with the claim form does not allow you to conclude that each of the partners is resident for tax purposes in the same country as that in which the partnership is established, you will have to ask for further information to be supplied.

If any of the partners that are identified are themselves (at face value) transparent for tax purposes (for instance Limited Partnerships and Limited Liability Companies, as well as Trusts and some types of

investment funds) you should ask for similar information to be supplied about these 2nd and 3rd level partners. Your aim should be to reach a reasonable level of assurance that all of the underlying participators in these concerns are themselves "persons" who would be able to claim double taxation relief if they were receiving the money directly rather than through the partnership.
(This text has been withheld because of exemptions in the Freedom of Information Act 2000)
Where the partnership is unable to provide sufficient information about the identity of its partners to allow you to be satisfied that each person is entitled to relief from UK tax, the amount of relief to be allowed must be restricted to the percentage share of the income that is attributable to the partners who you accept as being entitled to treaty benefits in their own right.

6.16 Partnerships under non-OECD model DTAs

Some DTAs do not follow the OECD model. The former International Tax Handbook provided:

1656. Later DT Agreements
The significance of 1987 for partnerships and Double Taxation Agreements is that in 1986 the High Court gave its decision on the Padmore case which upset our view that a treaty did not apply to partnerships unless they were specifically mentioned. We look at the Padmore case and its consequences in the next paragraphs. Later treaties will normally have something about partnerships, either specifically excluding some or all of them from the treaty or preserving our right to tax the UK resident partners. The precise provisions may depend on the status of partnerships in the country of the treaty partner. Examples of later treaties where partnerships are mentioned are Italy and Bulgaria.

6.16.1 *Partnerships under UK/Switzerland DTA*

Article 4.1 of the UK/Switzerland DTA provides, unusually:

> In the case of Switzerland, the term [resident of a Contracting State] includes a partnership created or organised under Swiss law.

The former International Tax Handbook provided:

1655. Older DT Agreements
... the Swiss Agreement which includes as a resident of Switzerland a partnership created or organised under Swiss law. If this were the only provision it could mean that we would not have the right to tax under

> Case V a UK-resident partner in a Swiss partnership which had no permanent establishment in the UK. But our right to tax our resident partners is specifically protected by a separate provision.

The DTR Manual now provides:

> **DT18104 - Switzerland: Partnerships** [September 2011]
> The agreement makes it clear that, if a partnership is a resident of Switzerland and is entitled, in accordance with the provisions of the agreement, to exemption from UK tax on any income, the UK nevertheless has the right to tax a UK resident partner on his share of the partnership income. Such income is deemed to be income from a source in Switzerland (Article 27(2)).
> The agreement provides in Article 4 (1) that, in the case of Switzerland, the term 'resident of a Contracting State' includes a partnership created or organised under Swiss law. This provision should not be understood to override the general requirement that a resident must be liable to taxation in the relevant Contracting State. Where a claim is received in respect of the income of a Swiss partnership it should be ascertained that the income is actually taxed in Switzerland. Any claim that income of a Swiss partnership which has not been taxed in Switzerland should be relieved from taxation in the UK should be referred to Business Profits, International.

6.17 RICs, REITs and REMICs

The US Department of the Treasury Technical Explanation of the Convention[42] provides:

> Certain entities that are nominally subject to tax but that in practice are rarely required to pay tax also would generally be treated as residents and therefore accorded treaty benefits. For example, RICs, REITs and REMICs are all residents of the United States for purposes of the treaty. Although the income earned by these entities normally is not subject to U.S. tax in the hands of the entity, they are taxable to the extent that they do not currently distribute their profits, and therefore may be regarded as "liable to tax." They also must satisfy a number of requirements under the Code in order to be entitled to special tax treatment.

While this is directed at the US DTA, the wording in point ("liable to tax") is the same generally and the same argument should apply to REITs in other states.

---

42 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf.*

6.18 Place of effective management ("POEM")

Article 4.3 OECD Model Convention provides:

> Where by reason of the provisions of paragraph 1 a person other than an individual is a resident of both Contracting States, then it shall be deemed to be a resident only of the State in which its place of effective management is situated.

This is the tie-breaker for trusts, companies and PRs. The OECD commentary provides:

> 24. ... The place of effective management is the place where key management and commercial decisions that are necessary for the conduct of the entity's business as a whole are in substance made. All relevant facts and circumstances must be examined to determine the place of effective management. An entity may have more than one place of management, but it can have only one place of effective management at any one time.

This has often been cited and adopted in UK cases, as one would expect. The UN commentary provides:

> [The term "place of effective management"] is used in several provisions of the OECD Model Convention, as is the term "place of management". Neither term is defined explicitly in the Convention itself or in the commentary thereon, nor is it made clear whether the two terms are to be construed as having the same meaning or two different meanings. It is, however, understood that when establishing the place of effective management, circumstances which may, inter alia, be taken into account are the place where a company is actually managed and controlled, the place where the decision-making at the highest level on the important policies essential for the management of the company takes place, the place that plays a leading part in the management of a company from an economic and functional point of view, and the place where the most important accounting books are kept.[43]

The International Manual provides:

> **353600. Claims by trustees in Ireland** [January 2010]
> ***... When you need to determine the place of effective management of an***

43 United Nations Manual for the Negotiation of Bilateral Tax Treaties between developed and Developing Countries 2003.

Irish trust

... So if you have a claim from a trust under the treaty with Ireland and find that the trustees are resident in more than one country, you will need to establish the trust's place of effective management.

You should ask Technical Advice Group to confirm any judgement you make on the residence of a group of individual trustees.

Criteria for determining the place of effective management of an Irish trust

You need to find out who generally controls and supervises the work of administering the trust. By administering the trust we mean: keeping accounts, conducting correspondence, arranging the trustees' meetings and putting the trustees' decisions into effect.

If the trustees are all individuals

You will need to find out which of the trustees is responsible for the tasks outlined above, and the dates and locations of all trustees' meetings held during the period of the claim.

If a professional body acts as a trustee

You can accept that the place of business of the professional body is the place of effective management of the trust.

For this purpose the professional body is appointed by the testator or settlor of the trust, and does not include:

- An individual who is a solicitor or an accountant
- An agent or an attorney administrator appointed by the trustees

Residence of a professional body

If a professional body acting as a trustee is a branch in Ireland of a UK bank or similar institution, it is considered to be in Ireland for the purposes of Article 4(3). A UK branch of an Irish bank would however not be considered to be in Ireland.

6.18.1 *"Effective" management*

In *Smallwood v HMRC* [2008] STC (SCD) 209 the Special Commissioners said at [112]:

> We believe 'effective' should be understood in the sense of the French 'effective' (siège de direction effective) which connotes real, French being the other official version of the [OECD] model, though not of the [Mauritius/UK] treaty.

This does not take matters much further. The word "real" never does.

6.18.2 *Comparison with "central management and control"*

In *Smallwood v HMRC* (CA) at [58] Patten LJ says:

> [In] *Wood v Holden* 78 TC 1 ... Chadwick LJ expressed the view that it was difficult to draw any meaningful distinction between the two tests [POEM, and central management and control] but that even if they did in fact differ in substance, they were unlikely to lead to different results.

The difference between the two expressions is only one of nuance, as both stress "top level" or "key supervision" and neither are concerned with day to day matters.

In *Smallwood v HMRC* [2008] STC (SCD) 209 the Special Commissioners discussed POEM:

> 111. There was thus some debate about whether, or to what extent, POEM differed from CMC [central management and control]. We consider that this misses the point; the two concepts serve entirely different purposes. CMC determines whether a company is resident in the UK or not; POEM is a tie-breaker the purpose of which is to resolve cases of dual residence by determining in which of two states it is to be found. CMC is essentially a one-country test; the purpose is not to decide where residence is situated, but whether or not it is situated in the UK…
> 112. POEM, on the other hand, must be concerned with what happens in both states since its purpose is to resolve residence under domestic law in both states, caused for whatever reason, which could include incorporation in one state and management in the other, or different meanings of management applied in each state, or different interpretations of the same meaning of management applied in each state, or divided management. One must necessarily weigh up what happens in both states and according to the ordinary meaning to be given to the terms of the treaty in their context (to quote art 31 of the Vienna Convention on the Law of Treaties) decide in which state the place of effective management is found.[44]

The Australian Revenue have given guidance on "central management and control"of a superannuation fund (which is a trust) and it is considered this is also helpful to the concept of effective management:[45]

---

44 That is in the context of a trust, but the same passage was applied in the context of a company: *Laerstate BV v HMRC* [2009] UKFTT 209 at [48]. See Avery Jones, "The Definition of Company Residence in Early UK Tax Treaties" [2008] BTR 556.

45 Taxation Ruling TR 2008/9, "Income tax: meaning of 'Australian superannuation fund' in subsection 295-95(2) of the Income Tax Assessment Act 1997" *http://law.ato.gov.au/atolaw/view.htm?locid=%27PAC/19970038/295-95%282%29%27&PiT=99991231235958#295-95%282%29*

Meaning of 'central management and control' in the context of a superannuation fund

108. The phrase 'central management and control' is not defined in the ITAA 1997. Therefore, the term takes its meaning from the context in which it appears. In this case, the operations of a superannuation fund form part of that context, using the word 'context' in its widest sense.[46]

109. The term 'central management and control' was developed by the courts as the common law rule for determining the residence of a company. As Lord Loreburn LC stated in De Beers Consolidated Mines v Howe[47] (De Beers):

> In applying the concept of residence to a company, we ought, I think, to proceed as nearly as we can upon an analogy of an individual. A company cannot eat or sleep, but it can keep house and do business. We ought, therefore, to see where it really keeps house and does business...a company resides for purposes of income tax where its real business is carried on. I regard that as the true rule, and the real business is carried on where the central management and control actually abides.

110. Since the House of Lords decision in De Beers, there have been a number of cases, both in the UK and Australia, which have discussed the application of the CM&C test in relation to companies. In *Koitaki Para Rubber Estates v FCT*[48] (Koitaki), Williams J stated that in relation to determining the residence of a company:[49]

> the crucial test is to ascertain where the real business of the company is carried on, not in the sense of where it trades but in the sense of from where its operations are controlled and directed. It is the place of personal control over and not of the physical operations of the business which counts.[50] (emphasis added)

111. There is currently no case law which has discussed the meaning of CM&C in the context of superannuation funds. In the absence of such guidance, the question arises as to whether the CM&C test that is applied to companies can also be applied to determine the meaning of CM&C as it relates to superannuation funds.[51]

112. Williams J in Koitaki stated that the important element in determining the location of CM&C is the place of personal control over, and not the physical operations of, the business. Although this statement was made in the context of a company that carried on an operational business (for example, manufacturing or major trading activities), the CM&C test applied in Koitaki has been applied to companies that have as their main activity management of investment assets.[52]

50 [Footnote original] Williams J referred to his comments in Koitaki in *Waterloo Pastoral Company Limited v Federal Commissioner of Taxation* (1946) 72 CLR 262 at 266.

51 [Footnote original] For guidance on how the CM&C test is applied to companies refer to Taxation Ruling TR 2004/15: Income tax: residence of companies not incorporated in Australia - carrying on business in Australia and central management and control.

52 [Footnote original] See for example *Egyptian Delta Land and Investment Company Limited v Todd* [1929] AC 1 and *Esquire Nominees v FCT* (1973) 129 CLR 177; 72 ATC 4076; (1972) 3 ATR 105.

113. In the context of the activities of a superannuation fund, its income earning outcomes are largely dependent on the investment decisions made in respect of its assets rather than any productive or operational activities. Hence, despite differences between the kinds of activities a company may undertake and those of a superannuation fund, we consider that an analogy can be drawn between the business activities of a company and the activities of a superannuation fund in that the activities of a superannuation fund, like the business activities of a company, require personal control and direction. Accordingly, we consider that the principles established in cases dealing with the operation of the CM&C test in relation to companies are capable of application to determine the meaning of CM&C as it relates to superannuation funds.[53]

114. The cases which have considered the application of the CM&C test in relation to companies have held that the CM&C of a company comprises the high level management and control and strategic decision making.[54] Such an analysis focuses on who makes those high level and strategic decisions and when and where those decisions are made.

115. Like companies, determining the CM&C of a superannuation fund involves a focus on the who, when and where of the strategic and high level decision making of the fund.

116. In the context of the operations of a superannuation fund, the strategic and high level decision making of the fund includes the performance of the following duties and activities:

- formulating the investment strategy for the fund;[55]
- reviewing and updating or altering the investment strategy of the fund as well as monitoring and reviewing the performance of the fund's investments;
- if the fund has reserves[56] - the formulation of a strategy for their prudential management;[57] and
- determining how the assets of the fund are used to fund member benefits, for example the decision to segregate certain fund assets to support superannuation income stream benefits.

117. The other principal areas of operation of a superannuation fund that form part of the day-to-day or operational side of the fund's activities will not constitute CM&C. These activities do not form part of the CM&C of the fund because they are not of a strategic or high level nature. Rather, these activities are of a more formalistic or administrative

---

53 [Footnote original] There is nothing in the legislative or historical context of the definition of 'Australian superannuation fund' to indicate that the legislature intended that the term CM&C in the context of superannuation funds was to have a different meaning than that in the context of companies.

54 *Koitaki Para Rubber Estates v FCT* (1941) 64 CLR 241 at 244; (1941) 6 ATD 82 at 83-84.

55 [Footnote original] An investment strategy is a plan or policy adopted by the fund for investing the fund's assets to achieve the fund's investment objectives. A fund can have more than one investment strategy. The duty to formulate an investment strategy is contained in paragraph 52(2)(f) of the SISA.

56 [Footnote original] Where permitted by the trust deed, reserves may be maintained by a fund for the purpose of smoothing investment returns to members.

57 [Footnote original] The requirement to formulate a reserving strategy where a fund maintains reserves is set out in paragraph 52(2)(g) of the SISA.

nature. Examples of such activities include the acceptance of contributions that are made on a regular basis, the actual investment of the fund's assets, the fulfilment of administrative duties[58] and the preservation, payment and portability of benefits.

118. Furthermore, in accepting such contributions, paying benefits and in the fulfilment of administrative obligations, the prudential requirements in SISA, the governing rules of the fund and other legislative requirements are merely being complied with. As emphasised by the courts in the context of companies, compliance with statutory requirements is not, of itself, sufficient to constitute CM&C but rather is a matter to be taken into account in determining where the CM&C is located. In *Egyptian Delta Land and Investment Company v Todd*,[59] the House of Lords held that a company, which was incorporated in England and did nothing in that country beyond fulfilling its statutory requirements, was not a resident of England as its CM&C was in Egypt.

Who exercises the CM&C of the fund?

119. As mentioned above, the majority of superannuation funds operate under a trust structure. According to the general law of trusts, a trust is not a legal person but rather is a collection of rights, duties and powers arising from the relationship to property held by the trustee for the benefit of beneficiaries.[60] Therefore, the trustee is the legal person to that relationship.[61] Since the legal responsibility for operating and managing the fund, including the responsibility for performing the high level duties and actions mentioned in paragraph 116 of this Ruling rests solely with the trustee, it is the trustee of the fund who has the legal obligation for exercising the CM&C of a fund.

120. In the context of companies, the courts have held that the 'bare possession' of the legal right or power to exercise CM&C is not equivalent to taking part in the CM&C of the company.[62] Rather, the focus has been on whether that right or power has been exercised in practice. This is a question of fact. This point was emphasised by Lord Loreburn LC in De Beers:[63]

> This is a pure question of fact, to be determined, not according to the construction of this or that regulation or bye-law, but upon a scrutiny of the course of business or trading.

---

58 [Footnote original] Such as lodging the regulatory and income tax return for the fund, the preparation of financial statements, the audit of the fund and record-keeping.

59 [1929] AC 1.

60 [Footnote original] Trusts and superannuation funds are given statutory status as entities in themselves under subsection 960-100(1) of the ITAA 1997. See also the definition of 'superannuation entity' in section 10 of the SISA.

61 [Footnote original] To be a regulated superannuation fund within the meaning of the SISA, a superannuation fund must have a trustee - subsection 19(2) of the SISA. The trustee of the fund can be an individual, a group of individuals or a corporate trustee. A 'trustee' for the purposes of the SISA is defined in section 10 of that Act.

62 [Footnote original] *Mitchell v Egyptian Hotels* [1915] AC 1022 at 1041, per Lord Sumner. See also *Egyptian Delta Land and Investment Company v Todd* [1929] AC 1 where it was considered that the mere existence of the capacity for ultimate control was not sufficient to constitute CM&C where the control was not exercised in practice.

63 [1906] AC 455 at 458.

121. In *Unit Construction Co v Bullock*[64] (Unit Construction), the House of Lords held that the CM&C of three African subsidiaries of a UK parent company was not exercised by the subsidiary companies' boards even though the boards possessed the legal power to exercise CM&C under each company's constitution. Rather, the court concluded that it was in fact the board of directors of the parent company in London that had exercised the real management and control of the African subsidiaries.[65] In reaching this conclusion, the House of Lords followed the approach laid down in De Beers. In the context of the facts in Unit Construction, Viscount Simonds stated:[66]

> Nothing can be more factual and concrete than the acts of management which enable a court to find as a fact that central management and control is exercised in one country or another. It does not in any way alter their character that, in greater or less degree, they are irregular or unauthorised or unlawful. The business is not the less managed in London because it ought to be managed in Kenya. Its residence is determined by the solid facts, not by the terms of its constitution however imperative.

122. In the context of superannuation funds, this same principle applies in that the trustee's duty or responsibility to carry out or perform those activities that constitute CM&C does not, of itself, amount to CM&C. It is only by performing those high level duties and activities that the trustee will be exercising the CM&C in practice.[67] There also may be situations where a person other than the trustee is exercising the CM&C of the fund.

Delegation of trustee's duties and powers

123. Where permitted by the trust deed of the fund or in the circumstances prescribed in the trustee legislation of the relevant State or Territory, and consistent with the provisions of the SISA, the individual trustee or trustees of a superannuation fund may delegate all or any of their duties and powers.[68] For example, in all jurisdictions, the trustee legislation permits a trustee to delegate the execution of the trust where he or she is absent from the jurisdiction or about to depart from it. In accordance with the Corporations Act 2001, the directors of a corporate trustee may also delegate their duties and powers.[69]

124. Where the trustee of a fund delegates their duties to another person, the delegate will be exercising the CM&C of the fund if they independently and without influence from the trustee, perform those duties and activities that constitute CM&C of the superannuation fund.

125. However, if the trustee continues to participate in the strategic and high level decision making and activities of the fund then it cannot be said that the delegate is exercising the CM&C of the fund. The trustee may continue to participate in such

---

64 [1959] 3 All ER 831.

65 [Footnote original] In that case, the directors of the African subsidiaries 'stood aside' from their directorial duties and never purported to function as a board of management.

66 [1959] 3 All ER 831 at 834.

67 [Footnote original] Since duties are imperative, that is, they compel or prohibit a trustee from acting in a certain way, the failure to fulfil a duty prima facie renders the trustee liable for breach of trust.

68 [Footnote setting out relevant provisions of the trustee legislation omitted].

69 [Footnote setting out provisions of the Corporations Act 2001 omitted].

activities by reviewing or considering the decisions and actions of the delegate before deciding whether any further action is required. The decision in *BW Noble v Mitchell*[70] (BW Noble) illustrates this principle.

126. In BW Noble, full management and control of the business of the company registered in England was vested in the board of directors in London by the company's articles of association, with powers of delegation. The board of directors exercised that power by executing a power of attorney granting one of the directors of the board full power to carry on the company's business in France. The French attorney sent some reports on the progress of the business to the directors in London, and on one or two occasions received the agreement of the board to his proposals. It was held that the CM&C of the company remained with the board of directors in London and had not been shifted to France under the power of attorney. Relevantly, Rowlatt J stated:[71]

> ...in my judgment that power of attorney did not and could not, consistently with the Articles, and did not by its tenor, divest the Board in London of their authority; it did not make an independent plenipotentiary who could do what he liked until the power of attorney was determined. It seems to me that although he held the power of attorney, the Directors at any moment could have said to him: 'Well, we do not think under your power you ought to do this; we decide that it shall not be done, although you might have done it under your power of attorney if we had not told you to the contrary'.

127. Similarly, despite the intention to delegate the trustee's duties, the trustee may continue to make the high level decisions in respect of the fund and instruct the delegate to implement those decisions. Or alternatively, the trustee may continue to make those decisions and perform those duties and activities that constitute CM&C themselves. In these situations, the CM&C of the fund would remain with the trustee and would be located where the trustee makes those decisions.

Delegation of the investment management function

128. The trustee of a superannuation fund will often appoint an investment manager to invest the assets of the fund, consistent with the investment strategy of the fund, on behalf of the trustee. Importantly, the investment manager is subject to a prudential requirement under SISA to periodically provide information to the trustee of the fund regarding the making of, and return on those investments and to provide such information as is necessary to enable the trustee to assess the capability of the investment manager to manage the investments of the fund.[72]

129. The delegation of the investment management function to an investment manager does not mean however that the investment manager is exercising the CM&C of the fund in any sense. This is because the trustee is still controlling the operations of the fund by ensuring that the investments of the fund are consistent with the investment strategy of the fund and by monitoring and evaluating the performance of the investment manager. Further, the actions of the investment manager in investing the assets of the fund in accordance with the fund's investment strategy comprise part of the day-to-day or 'operational' side of the operations of the fund rather than the strategic or high level decision making activities of the fund.

---

70 11 TC 372.

71 11 TC 372 at p.410.

72 [Footnote original] Section 102 of the SISA.

130. This view is consistent with the decision of Dixon J at first instance in Koitaki.[73] The company in Koitaki, which was incorporated in Sydney, owned rubber plantations in Papua. The plantations were managed by an officer of the company who acted under a power of attorney by which the company authorised him to manage, carry on and conduct the company's property, affairs and business. The officer sent weekly reports of the working of the plantations to the chairman of directors in Sydney which is where the directors of the company resided and met. He also periodically sent to the manager of the company in Sydney for presentation to the directors, reports concerning the running of the plantations and the yield of rubber.

131. Dixon J's decision, which was affirmed by the Full High Court on appeal,[74] was that the company was not a resident of Papua as the company's central management and control was not there exercised, despite the responsibilities of the attorney. His Honour stated that the responsibility of the attorney was confined to the production and shipment of rubber and did not extend to the control of the general or corporate affairs of the company or to matters of policy and finance.[75] The matters of policy and finance were matters which in fact formed part of the CM&C of the company as distinct from the day to day management of the production and shipment of rubber. The fact that the performance of the attorney was being monitored from Sydney was also an important consideration in the decision of Dixon J.

Trustee acting on external advice

132. The trustee of a fund may seek external advice relating to the performance of their high level duties and activities in relation to the fund. Provided that the trustee makes the actual decisions for the fund, the circumstance that the trustee acts on or is influenced by such advice does not affect the fact that the trustee is exercising the CM&C of the fund. This view is supported by the decision of Gibbs J at first instance in *Esquire Nominees v FC of T* (Esquire Nominees).[76]

133. In Esquire Nominees, his Honour stated that even if it was accepted that the decision makers of the appellant company did what the company's advisers told them to do, it did not necessarily follow that the control and management of the company's affairs lay with the advisers. He acknowledged the possibility that the advisers in Esquire Nominees exerted strong influence on the company directors but found that even though the advisers had power to exert influence on the company directors, that power of itself did not amount to the advisers exercising control and management of the company. He also considered that had the advisers instructed the company's directors to 'do something which they considered improper or inadvisable' that he did not believe that the directors would have acted on the instruction. He decided, on the facts of Esquire Nominees, that the company directors were the high level decision makers.[77]

73 *Koitaki Parra Rubber Estates v FCT* (1940) CLR 15; (1940) 6 ATD 42.

74 *Koitaki Parra Rubber Estates v FCT* (1941) 64 CLR 241; (1941) 6 ATD 82.

75 (1940) CLR 15 at 18; (1940) 6 ATD 42 at 45.

76 (1973) 129 CLR 177; 72 ATC 4076; (1972) 3 ATR 105.

77 [Footnote original] In the context of companies, there are a number of other cases which have stated the principle that influence is not the same thing as control and that a board of directors may act under the influence of another person or persons but that does not necessarily mean that the directors have ceased to exercise central

Location of the CM&C of the fund

134. The place where the CM&C of the fund is exercised is a question of fact[78] to be determined in light of all the relevant facts and circumstances. The location of the CM&C of the fund is intertwined with identifying who it is that is exercising the CM&C of the fund. This is because the place where the person(s) exercise the CM&C of the fund determines the location of the CM&C of the fund. Hence, in the case of a fund with an individual trustee who exercises the CM&C of the fund, the place where the trustee performs the high level duties and activities that constitute CM&C will determine the location of the CM&C of the fund.

135. Equally, in the case of a fund with a group of individual trustees or a corporate trustee, the place where the trustees (or directors of the corporate trustee) meet will determine where the CM&C of the fund is located, provided that the CM&C of the fund is exercised at those meetings.[79] If the CM&C of the fund is not exercised at the meeting of trustees, it will be located where the strategic and high level decisions and activities are in fact made and carried out.

136. If the CM&C of the fund is being exercised by a person or persons other than the trustee, the place where the person(s) performs the strategic and high level duties and activities in relation to the fund will determine the location of the CM&C of the fund (subject to the principles set out in paragraphs 125 to 127 of this Ruling).

137. Where individual trustees or directors of a corporate trustee participate in the CM&C of the fund via electronic facilities[80] (rather than physical attendance), the focus is on where the participants contributing to the high level decisions and activities are located rather than where the electronic facilities are based. This view applies in situations where the trustees or directors conduct a meeting via electronic facilities and in situations where the strategic and high level decisions are facilitated through electronic facilities without the need for an actual meeting (for example, decisions made via email).

138. In these situations, the fact that a majority of the individual trustees or directors of a corporate trustee regularly participate in the CM&C of the fund from a jurisdiction other than Australia would support a conclusion that the CM&C of the fund is not located in Australia (and vice versa where the majority of trustees/directors are located in Australia).

---

management and control. For example, see *Re Little Olympian Each Ways* [1995] 1 WLR 560; *New Zealand Forest Products Finance NV v Commissioner of Inland Revenue* [1995] 2 NZLR 357; *Untelrab v McGregor* [1996] STC (SCD) 1; *Wood and another v Holden (Inspector of Taxes)* [2006] 1 WLR 1393.

78 *Unit Construction Co (Inspector of Taxes) v Bullock* [1959] 3 All ER 831 at 839, per Lord Radcliffe.

79 [Footnote original] In determining where the CM&C of a company is located, the common law places significant weight on the place where the board of directors meet. For example, De Beers and Koitaki. However, the courts have also held that the place where the board meets is not necessarily conclusive of the location of CM&C: Lord Radcliffe in Unit Construction.

80 [Footnote original] For example, by teleconference or video conference.

139. The residency status of those who exercise the CM&C of the fund is not relevant in determining the location of the CM&C of the fund.[81]

6.18.3 *Period for enquiry into POEM*

While one needs to determine whether a person is treaty-resident at a particular moment, one looks over an appropriate period of time to determine the POEM: see eg *Smallwood v HMRC* (CA) at [47]. Contrast 6.13 (Period for enquiry into individuals tie-breaker tests).

6.18.4 *Short term period in foreign state*

In *Smallwood v HMRC*, a trust had different trustees resident in different states, all in one tax year:

Apr - Dec: Jersey resident trustees
Dec - Mar: Mauritius resident trustees ("the Mauritian period")
Mar onwards: UK resident trustees ("the UK period")

It was necessary to apply the tie-breaker test.[82] Everything was done which could reasonably be done to ensure that the Mauritian trustees carried out effective management, but POEM was nevertheless in the UK throughout:

> The scheme was devised in the UK by Mr Smallwood on the advice of KPMG Bristol. The steps taken in the scheme were carefully orchestrated throughout from the UK, both by KPMG and by Quilter. And it was integral to the scheme that the trust should be exported to Mauritius for a brief temporary period only and then be returned, within the fiscal year, to the UK, which occurred. Mr Smallwood remained throughout in the UK. There was a scheme of management of this trust which went above and beyond the day to day management exercised by the trustees for the time being, and the control of it was located in the UK.[83]

The dissenting decision of Patten LJ seems more convincing to me, and the majority dealt with the point in two short paragraphs, as if a fuller exposition of their reasons would be an embarrassment. However the conclusion must be that tax avoidance schemes requiring short term residence in a treaty state are likely to fail on factual POEM grounds.

6.19 USA/UK DTA

This section considers the definition of treaty-residence in the USA/UK DTA.

Article 4(1) of the US/ UK DTA provides:

> [a] Except as provided in paragraphs 2 and 3 of this Article, the term "resident of a Contracting State" means, for the purposes of this Convention, any person who, under the laws of that State, is liable to tax therein by reason of his domicile, residence, *citizenship,* place of management, *place of incorporation,* or any other criterion of a similar nature.

This is standard OECD model form except for the addition of the italicised words, which reflect the US rule that citizens and US incorporated companies are liable to tax regardless of residence and other such criteria.

Article 4(1) of the US/ UK DTA continues:

> [b] This term, however, does not include any person who is liable to tax in that State in respect only of income from sources in that State or of profits attributable to a permanent establishment in that State.

This is close to standard OECD model form[84] and the differences do not seem material.

6.19.1 *US citizens/green card holders*

Article 4(2) of the US/ UK DTA provides:

> An individual who is a United States citizen or an alien admitted to the United States for permanent residence (a "green card" holder) is a resident of the United States only if
> [a] the individual has a substantial presence, permanent home or habitual abode in the United States and
> [b] if that individual is not a resident of a State other than the UK for the purposes of a double taxation convention between that State and the UK.

The US Department of the Treasury Technical Explanation of the Convention[85] provides:

> Paragraph 2 contains an exception to the general rule of paragraph 1 that

84 See 6.7 (Exception where source tax only).

85 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

residence under internal law also determines residence under the Convention. The exception applies with respect to a U.S. citizen or alien lawfully admitted for permanent residence (i.e., a "green card" holder). Under paragraph 1, a person is considered a resident of a Contracting State for purposes of the Convention if he is liable to tax in that Contracting State by reason of citizenship. Although this rule applies to both Contracting States, only the United States taxes its non-resident citizens in the same manner as its residents. In addition, aliens admitted to the United States for permanent residence ("green card" holders) qualify as U.S. residents under the first sentence of paragraph 1 because they are taxed by the United States as residents, regardless of where they physically reside.

Under the exception of paragraph 2, a U.S. citizen or green card holder will be treated as a resident of the United States for purposes of the Convention, and, thereby entitled to treaty benefits, only if he meets two conditions. First, he must have a substantial presence (see section 7701(b)(3)), permanent home or habitual abode in the United States. This rule requires that the U.S. citizen or green card holder have a reasonably strong economic nexus with the United States. Second, he must not be treated as a resident of a state other than the UK under any treaty between the UK and a third state. This rule prevents a U.S. citizen or green card holder who is a resident of a country other than the United States or the UK from choosing the benefits of the Convention over those provided by the treaty between the UK and his country of residence. If the U.S. citizen or green card holder's country of residence does not have a treaty with the UK, however, then he will be treated as a resident of the United States as long as he meets the first requirement of an economic nexus. If such a person is a resident of both the United States and the UK, whether or not he is to be treated as a resident of the United States for purposes of the Convention is determined by the tie-breaker rules of paragraph 4.

The text goes on to give some examples:

Thus, for example, an individual resident of Mexico who is a U.S. citizen by birth, or who is a Mexican citizen and holds a U.S. green card, but who, in either case, has never lived in the United States, would not be entitled to benefits under the Convention. However, a U.S. citizen who is transferred to Mexico for two years would be entitled to benefits under the Convention if he maintains a permanent home or habitual abode in the United States and is not a resident of Mexico for purposes of the U.K.-Mexico tax treaty. If he were treated as a resident of Mexico under the U.K.-Mexico tax treaty, he could claim only the benefits of that treaty, even if the Convention would provide greater benefits.

The fact that a U.S. citizen who does not have close ties to the United States may not be treated as a U.S. resident under the Convention does not alter the application of the saving clause of paragraph 4 of Article 1 (General Scope) to that citizen. For example, a U.S. citizen who pursuant to the "citizen/green card holder" rule is not considered to be a resident of the United States still is taxable on his worldwide income under the generally applicable rules of the Code.

HMRC helpsheet 302 (Dual Residents - 2012/13) provides:

Special rules apply where the other country is the United States of America (US), if you are claiming to be a resident of the US for the purposes of the UK/US Double Taxation Convention (DTC). Statements concerning residence should not normally be sought from the US Internal Revenue Service. This is because the US operates a special system whereby it taxes its 'citizens' on their worldwide income, wherever they may be resident. US citizens are not, however, necessarily 'residents' of the US for the purposes of the DTC.

Article 4(2) of the DTC provides that a citizen or green card holder will be treated as a resident of the US for purposes of the DTC, and thereby entitled to treaty benefits, only if two conditions are met:

- first, you must have a substantial presence (see below), permanent home or habitual abode in the US
- second, you must not be treated as a resident of a State other than the UK under any treaty between the UK and a third State.

6.19.2 *Substantial presence*

It appears that "substantial presence" is a technical term in US tax law (whose meaning applies in the treaty). HMRC helpsheet 302 (Dual Residents - 2012/13) provides:

Substantial presence test

You will have a substantial presence if:

- you were present in the US on at least 31 days in the calendar year under test, and
- the sum total of days on which you were present in the US in the year under test, and in the two preceding years, adds up to at least 183 days.

For the purposes of this calculation a day spent in the US in the year preceding the year under test counts as 1 /3, and a day in the year before that counts as 1 /6. Part days of presence in the US should be treated as if they were whole days for this purpose.

Example 1
If you spent 48 days in the US in 2013, 250 days in 2012 and 365 days in 2011, the calculation would be as follows:
Year of test – 2013 (more than 31 days spent in the US)

2013	48 days × 1/1 =	48
2012	250 days × 1/3 =	84
2011	365 days × 1/6 =	61
		193

Both conditions of the substantial presence test are passed and you will be regarded as resident in the US under that country's domestic law.

6.19.3 *Miscellaneous bodies*

The USA/UK DTA continues:

> (3) The term "resident of a Contracting State" includes—
> (a) a pension scheme;
> (b) a plan, scheme, fund, trust, company or other arrangement established in a Contracting State that is operated exclusively to administer or provide employee benefits and that, by reason of its nature as such, is generally exempt from income taxation in that State;
> (c) an organisation that is established exclusively for religious, charitable, scientific, artistic, cultural, or educational purposes and that is a resident of a Contracting State according to its laws, notwithstanding that all or part of its income or gains may be exempt from tax under the domestic law of that State; and
> (d) a qualified governmental entity that is, is a part of, or is established in, that State.

The US Department of the Treasury Technical Explanation of the Convention[86] provides:

> Paragraph 3 provides that certain tax-exempt entities such as pension funds and charitable organizations will be regarded as residents of a Contracting State regardless of whether they are generally liable for income tax in the State where they are established. The inclusion of this provision is intended to clarify the generally accepted practice of treating an entity that would be liable for tax as a resident under the internal law of a State but for a specific exemption from tax (either complete or partial) as a resident of that state for purposes of paragraph 1.
> Subparagraph (a) of paragraph 3 applies to pension schemes, as defined

86 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf.*

in subparagraph (o) of paragraph 1 of Article 3 (General Definitions). Subparagraph (b) applies to any plan, scheme, fund, trust, company or other arrangement established in a Contracting State that is generally exempt from taxation in that State because it is operated exclusively to administer or provide employee benefits. The reference to a general exemption is intended to reflect the fact that under U.S. law, certain organizations that generally are considered to be tax-exempt entities may be subject to certain excise taxes or to income tax on their unrelated business income. Subparagraph (c) applies to an organization that is established exclusively for religious, charitable, scientific, artistic, cultural, or educational purposes and that is a resident of a Contracting State. Thus, an exempt section 501(c) organization (such as a U.S. charity) that is generally exempt from tax under U.S. law is a resident of the United States for all purposes of the Convention. Subparagraph (d) applies to a qualified governmental entity, as defined in subparagraph (k) of paragraph 1 of Article 3, if it is the Contracting State itself, is established in a Contracting State or is a part of that State.

6.19.4 *Tie breaker*

For individuals, art.1(4) provides standard OECD model wording.

Art 1(5) USA/UK DTA provides:

> Where by reason of the provisions of paragraph 1 of this Article a person other than an individual is a resident of both Contracting States, the competent authorities of the Contracting States shall endeavour to determine by mutual agreement the mode of application of this Convention to that person. If the competent authorities do not reach such an agreement, that person shall not be entitled to claim any benefit provided by this Convention, except those provided by paragraph 4 of Article 24 (Relief from Double Taxation), Article 25 (Non-discrimination) and Article 26 (Mutual agreement procedure).

The US Department of the Treasury Technical Explanation of the Convention[87] provides:

> Dual residents other than individuals (e.g., companies, trusts, and estates) are addressed by paragraph 5. If such a person is, under the rules of paragraph 1, resident in both Contracting States, the competent authorities shall seek to determine a single State of residence for that person for purposes of the Convention. For example, a company is treated as resident in the United States if it is created or organized under

87 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf.*

the laws of the United States or a political subdivision. Under U.K. law, a company is treated as a resident of the UK if it is either established there or managed and controlled there. Dual residence, therefore, can arise if a U.S. company is managed and controlled in the UK. Paragraph 5 provides that the competent authorities will try to determine a single State of residence for such a company.

If the competent authorities do not reach an agreement on the single State of residence, that person may not claim any benefit provided by the Convention, except those provided by paragraph 4 of Article 24 (Relief from Double Taxation), Article 25 (Non-Discrimination), and Article 26 (Mutual Agreement Procedure). Thus, for example, a State cannot discriminate against a dual resident company, and such a company can bring issues to the competent authorities.

Dual resident companies also may be treated as resident for purposes other than that of obtaining benefits under the Convention. For example, if a dual resident company pays a dividend to a resident of the UK, the U.S. paying agent would withhold on that dividend at the appropriate treaty rate because reduced withholding is a benefit enjoyed by the resident of the UK, not by the dual resident. The dual resident company that paid the dividend would, for this purpose, be treated as a resident of the United States under the Convention. In addition, information relating to dual resident companies can be exchanged under the Convention because, by its terms, Article 27 (Exchange of Information and Administrative Assistance) is not limited to residents of the Contracting States.

CHAPTER SEVEN

YEAR OF ARRIVAL AND DEPARTURE

7.1 Default rule: individual regarded as resident throughout tax year

The starting point, under the SRT, is that an individual is resident (or not) in the UK during the whole of a tax year. Para 3, 4, Sch 45 FA 2013 provides:

> 3 An individual ("P") is resident in the UK for a tax year ("year X") if—
> (a) the automatic residence test is met for that year, or
> (b) the sufficient ties test is met for that year.
> 4 If neither of those tests is met for that year, P is not resident in the UK for that year.

Para 2(3) Sch 45 FA 2013 explains the significance of being resident "for" a year:

> An individual who, in accordance with the statutory residence test, is resident (or not resident) in the UK "for" a tax year is taken for the purposes of any enactment relating to relevant tax[1] to be resident (or not resident) there at all times in that tax year.

This general rule is subject to two exceptions of such breadth that the principle only rarely applies:
(1) The statutory split year rules
(2) Relief may be available under DTAs[2]

---

1 Defined Para 1(4) Sch 45 FA 2013: "Relevant tax" means-
(a) income tax,
(b) capital gains tax, and
(c) (so far as the residence status of individuals is relevant to them) inheritance tax and corporation tax.

2 See 6.6 (Change of residence during tax year).

This chapter considers the definition of "split year". The treatment of income or gains arising during a split year is discussed in the chapters considering that type of income or gains.

In the absence of an applicable statutory split year provision, the default rule remains that a year is not split. It is not possible to give a full list of cases where the default rule applies, but they include:

(1) Some remittance basis rules:
  (a) Sub-£2k remittance basis taxpayers[3]
  (b) Non-taxpayers remittance basis[4]
  (c) Remittance basis claim charge[5]
(2) ToA income: s.720 income[6] and 731 income[7]
(3) Non-residents income tax relief[8]
(4) Year counting for:
  (a) Remittance basis claim charge[9]
  (b) IHT deemed domicile[10]

7.1.1 *Cross references*

The following topics are considered elsewhere:

4.29 (Contacting HMRC when arriving in or leaving the UK).
8.1 (Exit taxes).

The topic of companies becoming or ceasing to be UK resident is not discussed.

7.2 Split year of trustees and PRs

Para 2 sch 45 FA 2013 provides that *individuals* are resident during whole tax years. The SRT split year rules do not apply to trustees or PRs. Para 41 sch 45 FA 2013 provides:

> This Part [Part 3: Split Year Treatment]—
> (a) does not apply in determining the residence status of personal

3 See 10.8.1 (Interaction of £2k limit with split-year rules).
4 See 10.9 (Non-taxpayers: s.809E).
5 See 10.11.12 (Remittance basis claim charge in year of arrival and departure).
6 See 29.9.3 (Split year) and 29.14.1 (Remittance during overseas part of split years).
7 See 29.9.3 (Split year); 30.35.4 (Split years).
8 See 42.2.1 (split years).
9 See 10.11.2 (7 and 12-year residence tests).
10 See 61.2.5 (Meaning of "residence" for 17-year residence rule).

representatives, and

(b) applies to only a limited extent in determining the residence status of the trustees of a settlement (see section 475 of ITA 2007 and section 69 of TCGA 1992, as amended by this Part).

For para (b) see 5.8 (Residence of individual trustee during split year).

If a trust changes residence, the HMRC view is that the tax year is split into UK and non-UK resident periods for income tax purposes.[11] HMRC Residency: Non-resident Trusts (published 1 April 2008) provides:

> **Change in residence status of body of trustees**
> A change in the residence status of a body of trustees is usually caused by a change in the trustees who make up the body. It can also happen where the trustees remain the same but one of them changes their residence status.
> For income tax purposes if the residence status of a body of trustees changes during the tax year then the trustees are potentially liable for income tax on all their worldwide income for the period they were actually resident. They are only liable for income tax on their UK source income for the period they were actually non-resident.[12]

This view was probably formulated before the introduction in 2006 of the rule that trustees are a single and distinct person for IT;[13] but HMRC do not argue that that has altered the position.

7.3 Definition of a "split year"

Para 43 Sch 45 FA 2013 provides:

(1) As respects an individual, a tax year is a "split year" if-
  (a) the individual is resident in the UK for that year, and
  (b) the circumstances of the case fall within–
    (i) Case 1, Case 2 or Case 3 (cases involving actual or deemed departure from the UK), or
    (ii) Case 4, Case 5, Case 6, Case 7 or Case 8 (cases involving actual or deemed arrival in the UK).

I refer to **"split-year cases 1-8"**. The split year cases can be summarised as follows:

---

11 The rule is different for CGT: see 49.1.4 (Gains accruing to trustees in split year).

12 See *http://www.hmrc.gov.uk/cnr/nr_trusts.htm*.

13 See 5.3 (Trustees treated as single and distinct person).

Leaving UK		
Case	*Para*	*Outline*
1	44	Starting full-time work overseas
2	45	Partner starting full-time work overseas
3	46	Ceasing to have a home in the UK
Coming to UK		
4	47	Starting to have only home in the UK
5	48	Starting full-time work in the UK
6	49	Ceasing full-time work overseas
7	50	Partner ceasing full-time work overseas
8	51	Starting to have a home in the UK

7.4 Split-year case 1: Starting full-time work overseas

Para 44(1) Sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 1 if they are as described in sub-paragraphs (2) to (4).

7.4.1 *UK resident in previous year*

Para 44(2) Sch 45 FA 2013 provides:

> The taxpayer was resident in the UK for the previous tax year (whether or not it was a split year).

This is a requirement in each of split year cases 1-3, which apply to leavers.

7.4.2 *Overseas work*

Para 44(3) Sch 45 FA 2013 provides:

> There is at least one period (consisting of one or more days) that—
> (a) begins with a day that—
> (i) falls within the relevant year, and
> (ii) is a day on which the taxpayer does more than 3 hours' work overseas,
> (b) ends with the last day of the relevant year, and
> (c) satisfies the overseas work criteria.

7.4.3 *"Overseas work criteria"*

"Overseas work criteria" is a label for 4 sets of conditions. Para 44(5) Sch 45 FA 2013 provides:

> A period "satisfies the overseas work criteria" if—

(a) the taxpayer works sufficient hours overseas, as assessed over that period,

See 7.4.4 ("Sufficient hours overseas").

(b) during that period, there are no significant breaks from overseas work,
(c) the number of days in that period on which the taxpayer does more than 3 hours' work in the UK does not exceed the permitted limit, and

I refer to days within (c) as **"3-hour UK work days"**.

(d) the number of days in that period falling within sub-paragraph (6) does not exceed the permitted limit.

I refer to days within (d) as **"UK days"**; see 7.4.6 ("The permitted limit").

7.4.4 *"Sufficient hours overseas"*

Para 44(5) Sch 45 FA 2013 provides:

A period "satisfies the overseas work criteria" if—
(a) the taxpayer works sufficient hours overseas, as assessed over that period...

Para 44(7) Sch 45 FA 2013 provides:

To work out whether the taxpayer works "sufficient hours overseas" as assessed over a given period, apply paragraph 14(3) but with the following modifications—
(a) for "P" read "the taxpayer",
(b) for "year X" read "the period under consideration",
(c) for "365 (or 366 if year X includes 29 February)" read "the number of days in the period under consideration", and
(d) in paragraph 28(9)(b), as it applies for the purposes of step 3, for "30" read "the permitted limit".

Amended as para 44(7) requires, para 14(3) provides:

(3) Take the following steps to work out whether [the taxpayer] works "sufficient hours overseas" as assessed over [the period under consideration]—
Step 1 [disregarded days]
Identify any days in [the period under consideration] on which [the taxpayer] does more than 3 hours' work in the UK, including ones on which [the taxpayer] also does work overseas on the same day.

The days so identified are referred to as "disregarded days".

Step 2 [net overseas hours]

Add up (for all employments held and trades carried on by [the taxpayer]) the total number of hours that [the taxpayer] works overseas in [the period under consideration], but ignoring any hours that [the taxpayer] works overseas on disregarded days.

The result is referred to as [the taxpayer]'s "net overseas hours".

Step 3 [reference-period days]

Subtract from the number of days in [the period under consideration]—

(a) the total number of disregarded days, and

(b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.[14]

The result is referred to as the "reference period".

Armed with the figures from steps 2 and 3, we proceed to the computation. This is set out in the remaining two steps:

Step 4: *[compute reference period ÷ 7]*

Divide the reference period by 7. If the answer is more than 1 and is not a whole number, round down to the nearest whole number. If the answer is less than 1, round up to 1.

Step 5 [compute net overseas hours ÷ reference-period weeks]

Divide [the taxpayer]'s net overseas hours by the number resulting from step 4.

If the answer is 35 or more, [the taxpayer] is considered to work "sufficient hours overseas" as assessed over [the period under consideration].

See 4.7.2 (Overseas work condition (a): "Sufficient hours overseas").

RDR3 provides:

5.13 Table E sets out the permitted limits for Case 1 – the appropriate portions of the full-year permitted limits

Table E

	Overseas part of year starts on												
	6 -30 Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	1-5 Apr
X	30	27	25	22	20	17	15	12	10	7	5	2	0
Y	90	82	75	67	60	52	45	37	30	22	15	7	0

14 See 4.16 (Reference period: deduction of non-work days).

Key

X – permitted limit on days where you can work more than 3 hours and maximum number of days that can be subtracted for gaps between employments

Y – permitted limit on days spent in the UK

RDR3 provides some examples:

Example 33 (Richard)

R has lived and worked in London for the last ten years and is UK resident for tax purposes. He is seconded abroad by his employer for a three year period. His overseas contract starts on 3 November 2014 when he takes up duty at his new office in Madrid. This example assumes he fails the third automatic overseas test for 2014-15 but meets it for 2015-16.

On 2 December 2014 he returns to the UK office to finish off a project he was involved in before his secondment. His work in the UK is completed on 16 December 2014 (11 UK workdays and four non-working days). He then takes leave until 28 December (12 days) flying back to Madrid and resuming work on 29 December. On his return to Madrid he works only at the Madrid office until 5 April.

R calculates that he meets the criteria for Case 1 split year treatment from 3 November, this being the first date on which he works for more than three hours overseas. Using table E he calculates that between 3 November 2013 and 5 April 2015 he can spend 37 days in the UK and work for more than three hours in the UK for up to 12 days.

R determines that:

- he was UK resident for the previous tax year (2013-14)
- he is resident in the UK for the current year (2014-15) and that he does not meet the third automatic overseas test
- he was non-UK resident for 2015-16
- he calculates that he meets the sufficient hours overseas test for the period 3 November 2014 to 5 April 2015
- he did not exceed the limits of 12 UK work days and 37 days spent in the UK between 3 November 2014 and 5 April 2015, and
- he had no significant break from overseas work during the period.

To determine that he worked full time overseas during a relevant period, R did the calculations below.

His reference period

Days in the period 3 November 2014 to 5 April 2015 = 155

Less

- Disregarded days 11

(Days spent working more than three hours in the UK)

- Annual, sick and parental leave 8

(leave on 17, 18, 19, 22, 23, 24, 27 and 28 December)

- Embedded non-working days (20 &21 December)	2	
- Gaps between employments	Nil	
Total		21
Reference Period =		134 days
Sufficient Hours Test		
All hours worked overseas from 3 November		670
Less: Hours worked overseas on disregarded days		Nil
Net overseas Hours		670

Divide Reference Period by 7 (134÷7) = 19.14 (rounded down) = 19
Divide net overseas hours by 19 (670÷19) = 35.26
R meets the sufficient hours overseas test because his average over the reference period (3 November 2014 to 5 April 2015) is more than 35.
For R, the UK part of the tax year ends on the 2 November 2014 and the overseas part starts on 3 November 2014 (the earliest date from which he meets all the conditions of the sufficient hours overseas test.

Example 34 (Amanda)
A has been living in the UK since she was born and is UK resident for tax purposes. She has worked in the media industry for five years and gets a job as a reporter on a three-year contract based in India. She moves there on 10 November 2013 and lives in an apartment provided by her new employer. She meets the overseas work criteria from 10 November 2013.
She returns to visit her family over the Christmas period for two weeks, and does not work while she is there.
A remains working in India throughout the tax year 2014-15, again only returning for a two-week period over Christmas.
A will receive split year treatment for tax year 2013-14 because:
- she was UK resident for 2012-13 and 2013-14
- she is non-UK resident for 2014-15 and meets the third automatic overseas test for that year

From 10 November 2013 until 5 April 2014 she:
- does not work at all in the UK
- spends 14 days in the UK, which is less, by reference to Table E above than the permitted limit of 37 days.

For Amanda, the UK part of the tax year will end on 9 November 2013, and the overseas part of the tax year will start on 10 November 2013.

7.4.5 *UK days within permitted limit*

Para 44 Sch 45 FA 2013 provides:

(5) A period "satisfies the overseas work criteria" if ...

(d) the number of days in that period falling within sub-paragraph (6) does not exceed the permitted limit.

(6) A day falls within this sub-paragraph if—

(a) it is a day spent by the taxpayer in the UK, but

(b) it is not a day that is treated under paragraph 23(4)[15] as a day spent by the taxpayer in the UK.

I refer to days within (6) as **"UK days"**.

7.4.6 *"The permitted limit"*

The expression "permitted limit" is used in split-year cases 1, 2 and 6. It is defined each time, but the cases 1 and 6 definitions are identical.

For case 1, the "permitted limit" matters for three purposes:

(1) 3-hour UK work days must not exceed the permitted limit: para 44(5))(c).

(2) UK days must not exceed the permitted limit: para 44(5)(d).

(3) For the purposes of ascertaining the reference period: para 44(7)(d).

Case 1 has two definitions of "permitted limit". It would have been simpler to have two terms, but there it is. Para 44(8) Sch 45 FA 2013 provides:

> The permitted limit is—
>
> (a) for sub-paragraphs (5)(c) [3-hour UK work days] and (7)(d), the number found by reducing 30 by the appropriate number, and
>
> (b) for sub-paragraph (5)(d) [days spent in UK] , the number found by reducing 90 by the appropriate number.

7.4.7 *"The appropriate number"*

The drafter of the SRT was fond of the expression "appropriate number" which is used in almost every one of the split year cases, with a different definition every time, or sometimes (as in split-year case 1) with two definitions. Para 44(9) Sch 45 FA 2013 provides:

> The appropriate number is the result of—
>
> A × (B÷12)
>
> where—
>
> "A" is—
>
> (a) 30, for sub-paragraphs (5)(c) and (7)(d), or
>
> (b) 90, for sub-paragraph (5)(d), and

---

15 See 4.13.5 (The deeming rule).

> "B" is the number of whole months in the part of the relevant year before the day mentioned in sub-paragraph (3)(a).

For rounding, see 7.12.4 (Rounding).

7.4.8 *Overseas work in following year*

Para 44(4) Sch 45 FA 2013 provides:

> The taxpayer is not resident in the UK for the next tax year because the taxpayer meets the third automatic overseas test for that year (see paragraph 14).

In short, the individual must continue working overseas in the following year. See 4.7 (Automatic overseas test 3: Overseas work).

7.5 Split-year case 2: Partner of someone starting full-time work overseas

Para 45(1) Sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 2 if they are as described in subparagraphs (2) to (6).

7.5.1 *UK resident in previous year*

Para 45(2) Sch 45 FA 2013 provides:

> The taxpayer was resident in the UK for the previous tax year (whether or not it was a split year).

This is a requirement in each of split year cases 1-3, which apply to leavers.

7.5.2 *Partner working overseas*

Para 45(3) Sch 45 FA 2013 provides:

> The taxpayer has a partner[16] whose circumstances fall within Case 1 for–
> (a) the relevant year, or
> (b) the previous tax year.

7.5.3 *Living with partner*

Para 45(4) Sch 45 FA 2013 provides:

---

16 See 7.12.3 ("Partner").

On a day in the relevant year, the taxpayer moves overseas so the taxpayer and the partner can continue to live together while the partner is working overseas.

7.5.4 *No (principal) UK home*

Para 45(5) Sch 45 FA 2013 provides:

> In the part of the relevant year beginning with the deemed departure day-
>
> (a) the taxpayer
>
> [i] has no home in the UK at any time, or
>
> [ii] has homes in both the UK and overseas but spends the greater part of the time living in the overseas home, and
>
> (b) the number of days that the taxpayer spends in the UK does not exceed the permitted limit.

There are two possible deemed departure days. Para 45 Sch 45 FA 2013 provides:

> (7) If sub-paragraph (3)(a) applies, [partner's split year is the same year] the "deemed departure day" is the later of—
>
> (a) the day mentioned in sub-paragraph (4), and
>
> (b) the first day of what is, for the partner, the overseas part of the relevant year as defined for Case 1 (see paragraph 53).
>
> (8) If sub-paragraph (3)(b) applies, [partner's split year is the previous year] the "deemed departure day" is the day mentioned in sub-paragraph (4).

Para 45 Sch 45 FA 2013 defines the permitted limit in two stages:

> (9) The permitted limit is the number found by reducing 90 by the appropriate number.
>
> (10) The appropriate number is the result of—
>
> A × (B÷12)
>
> where—
>
> "A" is 90, and
>
> "B" is the number of whole months in the part of the relevant year before the deemed departure day.

For rounding, see 7.12.4 (Rounding).

It would have been easier to say that the permitted limit is 90 – (A×B÷12) but the author of the SRT is somewhat algebra-phobic (or else thought that the reader would be).

7.5.5 *Non-resident in next year*

Para 45(6) Sch 45 FA 2013 provides:

> The taxpayer is not resident in the UK for the next tax year.

7.5.6 *HMRC examples*

RDR3 provides:

> **Example 35 (Peter)**
> P is A's husband (see Example 34). He too had lived in the UK for all his life and was resident in the UK for tax purposes. He travels with A on 8 January 2014 to live with her in India, having given up his job. A and P have let their flat in the UK for a three-year period, commencing on 9 January 2014.
> Once in India, P spends his time following his lifelong hobby as a lepidopterist, cataloguing Indian butterflies. He spends all his time there, except for the Christmas trips to the UK with A.
> P will receive split year treatment for tax year 2013-14 as he meets the Case 2 conditions:
> - he has no home in the UK after 8 January 2014
> - he was UK resident for 2012-13
> - he is non-UK resident for 2014-15
>
> From 8 January 2014 until 5 April 2014 he spends less than the permitted limit of 22 days in the UK (Table E).
> For P the UK part of the tax year will end on 7 January 2014 and the overseas part of the tax year will start on 8 January 2014, the day he joined A to live together in India.

7.6 Split-year case 3: Ceasing to have a home in the UK

Para 46(1) Sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 3 if they are as described in subparagraphs (2) to (6).

7.6.1 *UK resident in previous year*

Para 46(2) Sch 45 FA 2013 provides:

> The taxpayer was resident in the UK for the previous tax year (whether or not it was a split year).

This is a requirement in each of split year cases 1-3, which apply to leavers.

7.6.2 *No UK home*

Para 46(3) Sch 45 FA 2013 provides:

> At the start of the relevant year the taxpayer had one or more homes in the UK but-
>
> (a) there comes a day in the relevant year when P ceases to have any home in the UK, and
>
> (b) from then on, P has no home in the UK for the rest of that year.

7.6.3 *Less than 16 UK days*

Para 46(4) Sch 45 FA 2013 provides:

> In the part of the relevant year beginning with the day mentioned in subparagraph (3)(a) [day when ceasing to have UK home], the taxpayer spends fewer than 16 days in the UK.

7.6.4 *Non-resident in next year*

Para 46(5) Sch 45 FA 2013 provides:

> The taxpayer is not resident in the UK for the next tax year.

7.6.5 *Sufficient overseas link*

Para 46 Sch 45 FA 2013 provides:

> (6) At the end of the period of 6 months beginning with the day mentioned in sub-paragraph (3)(a), the taxpayer has a sufficient link with a country overseas.
>
> (7) The taxpayer has a "sufficient link" with a country overseas if and only if-
>
> (a) the taxpayer is considered for tax purposes to be a resident of that country in accordance with its domestic laws, or
>
> (b) the taxpayer has been present in that country (in person) at the end of each day of the 6-month period mentioned in sub-paragraph (6), or
>
> (c) the taxpayer's only home is in that country or, if the taxpayer has more than one home, they are all in that country.

7.6.6 *HMRC examples*

RDR3 provides:

> **Example 36 (Maureen)**
>
> M has been based in the UK for most of her working life, and has been

resident here for tax purposes. On holiday in Bali in the summer of 2013 she meets Maurice, who lives and works in the United Arab Emirates. Some twelve months later, they marry. M resigns from her job and moves out of her home on 24 September 2014. She spends the nights of 24 and 25 September in a hotel and flies out to the UAE to live with Maurice on 26 September 2014. She has no close family in the UK and does not return to the UK in the remainder of the tax year. She does not take up any employment in the UAE. Maurice and M plan to live in the UAE for at least another five years.

M will receive split year treatment for 2014-15 as she meets the Case 3 conditions.

- She was UK resident for 2013-14
- She is non-UK resident for 2015-16
- From 24 September 2014 until 5 April 2015 she has no home in the UK and spends fewer than 16 days in the UK
- She had established her only home is in UAE within six months.

For M, the overseas part of the tax year will start on 24 September 2014, the day she no longer had a home in the UK.

7.7 Split-year case 4: Starting to have a home in the UK only

Para 47(1) Sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 4 if they are as described in subparagraphs (2) to (4).

7.7.1 *Non-resident in previous year*

Para 47(2) Sch 45 FA 2013 provides:

> The taxpayer was not resident in the UK for the previous tax year.

This is the requirement of each of split year cases 4 - 8, which apply to arrivers.

7.7.2 *Acquiring UK home*

Para 47(3) Sch 45 FA 2013 provides:

> [a] At the start of the relevant year, the taxpayer did not meet the only home test, but
> [b] there comes a day in the relevant year when that ceases to be the case and
> [c] the taxpayer then continues to meet the only home test for the rest of that year.

Para 47(5) Sch 45 FA 2013 defines the only home test:

> The "only home test" is met if-
> (a) the taxpayer has only one home and that home is in the UK, or
> (b) the taxpayer has more than one home and all of them are in the UK.

7.7.3 *Insufficient UK ties in previous period*

Para 47(4) Sch 45 FA 2013 provides:

> For the part of the relevant year before that day [day of acquiring UK home], the taxpayer does not have sufficient UK ties.

"Sufficient ties" occurs in split-year cases 4, 5 and 8. The expression is defined separately, three times in all, but the definitions are almost identical. It has the usual SRT meaning, with minor adjustments. For split-year case 4, para 47 Sch 45 FA 2013 provides:

> (6) Paragraphs 17 to 20 (and Part 2 of this Schedule so far as it relates to those paragraphs) apply for the purposes of sub-paragraph (4) with the following adjustments-
> (a) references in those paragraphs and that Part to year X are to be read as references to the part of the relevant year mentioned in subparagraph (4), and
> (b) each number of days mentioned in the first column of the Table in paragraphs 18 and 19 is to be reduced by the appropriate number.
> (7) The appropriate number is found by multiplying the number of days, in each case, by-
> A ÷ 12
> where "A" is the number of whole months in the relevant year beginning with the day mentioned in sub-paragraph (3).
> (8) Sub-paragraph (6)(a) does not apply to the references to year X in paragraphs 32(1)(b) and 33 of this Schedule (which relate to the residence status of family members) so those references must continue to be read as references to year X.

RDR3 provides:

> 5.26... When you are considering whether you have sufficient UK ties in this part of the year, you should reduce the day count limits in the sufficient UK ties tables by substituting the values from the table below.

Table F

Day before satisfying only home or having a UK home tests is

	6 to 30 Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	1 Mar to 5 Apr
For 15 substitute	1	2	4	5	6	7	9	10	11	12	14	15
For 45 substitute	4	7	11	15	19	22	26	30	34	37	41	45
For 90 substitute	7	15	22	30	37	45	52	60	67	75	82	90
For 120 substitute	10	20	30	40	50	60	70	80	90	100	110	120

7.7.4 *HMRC example*

RDR3 provides:

> **Example 37 (Olan)**
> O has been working for his employer in Germany for the last five years. He had no UK ties and was not resident in the UK. On 1 June 2013 O moves to the UK to look for work here. He rents out his flat in Germany on a two year lease, from 27 May 2013
> He arrives in the UK and stays in temporary accommodation while he finds a flat to rent. He signs a 12 month lease on a flat in London on 1 July 2013.
> He starts UK employment on 22 July 2013 and remains in the UK for a further two years.
> O receives split year treatment for 2013-14 as he meets the Case 4 conditions:
> - he is non-UK resident for 2012-13
> - he started to have his only home in the UK during the tax year and that continued until at least the end of the tax year.
> - he had no UK ties from 6 April 2013 to 1July 2013.
>
> For O the overseas part of the tax year will end on 30 June 2013, and the UK part of the tax year will start on 1 July 2013, the day he started to have his only home in the UK.
> Note: O might also meet the criteria for Case 5 or Case 8 split years, but priority is given to the case where the overseas part is the shortest.

7.8 Split-year case 5: Starting full-time work in the UK

Para 48(1) Sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 5 if they are as described in subparagraphs (2) and (3).

7.8.1 *Non-resident in previous year*

Para 48(2) Sch 45 FA 2013 provides:

> The taxpayer was not resident in the UK for the previous tax year.

This is the requirement of each of split year cases 4 - 8, which apply to arrivers.

7.8.2 *UK work*

Para 48(3) Sch 45 FA 2013 provides a set of 5 conditions:

> There is at least one period of 365 days in respect of which the following conditions are met—
>
> (a) the period begins with a day that—
>
> (i) falls within the relevant year, and
>
> (ii) is a day on which the taxpayer does more than 3 hours' work in the UK,
>
> (b) in the part of the relevant year before the period begins, the taxpayer does not have sufficient UK ties,
>
> (c) the taxpayer works sufficient hours in the UK, as assessed over the period,
>
> (d) during the period, there are no significant breaks from UK work, and
>
> (e) at least 75% of the total number of days in the period on which the taxpayer does more than 3 hours' work are days on which the taxpayer does more than 3 hours' work in the UK.

7.8.3 *"Sufficient hours in the UK"*

Para 48(4) Sch 45 FA 2013 provides:

> To work out whether the taxpayer works "sufficient hours in the UK" as assessed over a given period, apply paragraph 9(2) but for "P" read "the taxpayer".

7.8.4 *Sufficient UK ties*

Para 48(3) Sch 45 FA 2013 provides:

> There is at least one period of 365 days in respect of which the following conditions are met ...
>
> (b) in the part of the relevant year before the period begins, the taxpayer does not have sufficient UK ties,

"Sufficient ties" has the usual SRT meaning, with minor adjustments.

Para 48 Sch 45 FA 2013 provides:

> (5) Paragraphs 17 to 20 (and Part 2 of this Schedule so far as it relates to those paragraphs) apply for the purposes of sub-paragraph (3)(b) with the following adjustments—
>
> (a) references in those paragraphs and that Part to year X are to be read as references to the part of the relevant year mentioned in subparagraph (3)(b), and
>
> (b) each number of days mentioned in the first column of the Table in paragraphs 18 and 19 is to be reduced by the appropriate number.
>
> (6) The appropriate number is found by multiplying the number of days, in each case, by—
>
> $A \div 12$
>
> where "A" is the number of whole months in the part of the relevant year beginning with the day on which the 365-day period in question begins.
>
> (7) Sub-paragraph (5)(a) does not apply to the references to year X in paragraphs 32(1)(b) and 33 of this Schedule (which relate to the residence status of family members) so those references must continue to be read as references to year X.

This is almost the same as in 7.11.3 (Insufficient UK ties in previous period) but with a slightly different definition of "A".

7.8.5 *HMRC example*

RDR3 provides:

> **Example 38 (Andrea)**
>
> A arrived in the UK on 20 May 2013 from Poland for a two week visit. She stays with her sister who is working in the UK. This is her first trip to the UK and she has never previously been UK resident for tax purposes. Just before A is about to return to Poland, she is offered a part-time job at a hotel. This will be her first ever job. She starts work on 10 June 2013. For the first eight weeks of her employment she works 20 hours a week (five hours a day) but from 5 August 2013 she is offered full-time hours of 40 hours a week. She takes 20 days leave during the tax year; there are no non-working days embedded within any of her periods of leave.
>
> Although for the first eight weeks of her employment she only works 20 hours per week, she works out that she meets the third automatic UK test from 10 June 2013 as follows:
>
> **Step 1:** In a 365-day period there are 0 disregarded days when she did

more than three hours of work overseas.
Step 2: Total number of UK hours worked during the 365 period (8 weeks x 20 hours & 40 weeks x 40 hours) = 1760 hours
Step 3: Subtract 0 disregarded days and 20 other days that can be deducted from 365 = which leaves a reference period of 345 days.
Step 4: Divide the reference period by 7: 345÷7 = 49.29, which is rounded down to 49
Step 5: Divide A's net UK hours by 49 (the result of Step 4):
1760÷49 = 35.91 hours
A's hours average out at over 35 over the 365-day period from 10 June 2013 (which is a day on which she worked more than three hours in the UK); she meets the third automatic UK test from that date.
A meets the criteria for Case 5 split year on the basis that:

- she was non-UK resident in the previous year
- she meets the third automatic UK test for the 365-day period commencing 10 June 2013 (which is a day on which she worked more than three hours in the UK).
- in the part of the tax year from 6 April until 10 June 2013 she did not have sufficient UK ties. See Table F.

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

Sufficient hours – non alignment of Case 5 and FTWUK
These tests diverge insofar as, for Case 5, the period starts with a day on which the individual works for three or more hours in the UK, but this is not a requirement for the third automatic UK test. You could therefore find that an individual is resident under the third automatic UK test in the tax year following re turn to the UK, but does not meet the Case 5 condition to split the arrival year, which would be seen as odd. Could this be addressed?
HMRC reply: HMRC agrees these dates can differ and th is is because the two tests are testing different things. If an individual meets the FTWUK test for a year they will be resident here. Case 5 then determines if they are entitled to split year tax treatment in that tax year. The Case 5 3hr requirement is there to ensure that the UK part of a split year does not start before the individual has done any UK work – which would otherwise be possible under the 35hr averaging requirement. Not setting it as a requirement does not seem to make sense for a split on the basis of FTWUK. The Government believes that for the majority of people the 365 day period they identify for FTWUK is likely to start with a day on which they worked more than 3 hours in the UK even though

it is not a requirement for the 3rd automatic UK test.[17]

7.9 Case 6: Ceasing full-time work overseas

Split-year case 1 is for individuals who start work overseas during a year. Case 6 is for individuals who have been working abroad and stop during the year. Accordingly there are concepts and definitions in common, though the legislation repeats them in each place.

Para 49(1) Sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 6 if they are as described in subparagraphs (2) to (4).

7.9.1 *Non-resident in previous year*

Para 49(2) Sch 45 FA 2013 provides:

> The taxpayer—
>
> (a) was not resident in the UK for the previous tax year because the taxpayer met the third automatic overseas test for that year (see paragraph 14), but
>
> (b) was resident in the UK for one or more of the 4 tax years immediately preceding that year.

Para (a) is the requirement of each of split year cases 4 - 8, which apply to arrivers, but in this case non-residence must be specifically due to meeting the 3rd overseas test. See 4.7 (Automatic overseas test 3: (Full-time overseas work)).

7.9.2 *Full-time overseas work*

Para 49(3) Sch 45 FA 2013 provides:

> There is at least one period (consisting of one or more days) that—
>
> (a) begins with the first day of the relevant year,
>
> (b) ends with a day that—
>
> (i) falls within the relevant year, and
>
> (ii) is a day on which the taxpayer does more than 3 hours' work overseas, and
>
> (c) satisfies the overseas work criteria.

---

17 29 January 2014
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf

7.9.3 *"Overseas work criteria"*

Para 49 Sch 45 FA 2013 provides:

> (5) A period "satisfies the overseas work criteria" if—
>
> (a) the taxpayer works sufficient hours overseas, as assessed over that period,
>
> (b) during that period, there are no significant breaks from overseas work,
>
> (c) the number of days in that period on which the taxpayer does more than 3 hours' work in the UK does not exceed the permitted limit, and
>
> (d) the number of days in that period falling within sub-paragraph (6) does not exceed the permitted limit.
>
> (6) A day falls within this sub-paragraph if—
>
> (a) it is a day spent by the taxpayer in the UK, but
>
> (b) it is not a day that is treated under paragraph 23(4)[18] as a day spent by the taxpayer in the UK.

This is identical to the "overseas work criteria" in split-year case 1: see 7.4.3 ("Overseas work criteria").

7.9.4 *"Sufficient hours overseas"*

Para 49(7) Sch 45 FA 2013 provides:

> To work out whether the taxpayer works "sufficient hours overseas" as assessed over a given period, apply paragraph 14(3) but with the following modifications—
>
> (a) for "P" read "the taxpayer",
>
> (b) for "year X" read "the period under consideration",
>
> (c) for "365 (or 366 if year X includes 29 February)" read "the number of days in the period under consideration", and
>
> (d) in paragraph 28(9)(b), as it applies for the purposes of step 3, for "30" read "the permitted limit".

This is identical to "sufficient hours overseas" in split-year case 1: see 7.4.4 ("Sufficient hours overseas").

Para 49 Sch 45 FA 2013 provides:

> (8) The permitted limit is—
>
> (a) for sub-paragraphs (5)(c) and (7)(d), the number found by

18 See 5.8 (The deeming rule).

reducing 30 by the appropriate number, and

(b) for sub-paragraph (5)(d), the number found by reducing 90 by the appropriate number.

(9) The appropriate number is the result of A × (B÷12) where—

"A" is—

(a) 30, for sub-paragraphs (5)(c) and (7)(d), or

(b) 90, for sub-paragraph (5)(d), and

"B" is the number of whole months in the part of the relevant year after the 365-day period in question ends.

RDR3 provides:

5.37 Table G sets out the permitted limits for Case 6 – the appropriate portions of the full-year permitted limits.

Table G

	UK part of year starts on											
	6 -30 Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	1 Mar to 5 Apr
X	2	5	7	10	12	15	17	20	22	25	27	30
Y	7	15	22	30	37	45	52	60	67	75	82	90

Key

X – permitted limit on days where you can work more than 3 hours in overseas part of the year or maximum number of days which may be subtracted from the reference period on account of gaps between employment.

Y – permitted limit on days spent in the UK in overseas part of year

7.9.5 *HMRC example*

RDR3 provides:

Example 39 (Edward)

E left the UK on 1 November 2010 to work full-time for a company based in Switzerland. Prior to this date he had always lived, worked and been resident in the UK. He has kept an apartment in the UK throughout his time in Switzerland so he had a place to stay whenever visiting family in the UK.

E retires from his employment, his last overseas workday being 31 October 2014. He returns permanently to the UK on 3 November 2014 and takes up residence in his apartment. E also has an apartment in Switzerland which is up for sale, but until a buyer is found he continues to use it when he visits Switzerland.

Provided E did not exceed the limits for days spent working more than three hours in the UK or days spent in the UK before the UK part of the tax year commenced (see Table G), he will receive split year treatment under Case 6 for 2014-15 as follows:

- he is not resident in the UK for 2013-14 tax year because he met the

test for full-time work overseas for that tax year
- from 6 April 2014 until 31 October 2014 he worked full-time overseas
- he is UK resident for the tax year following his return to the UK, 2015-16 tax year (he has retired permanently to the UK).

E does not meet Case 4, Case 5 or Case 8 criteria for split year treatment. The overseas part of the tax year ends on 31 October 2014 which is the day that E finished his spell of working full-time overseas and the UK part of the tax year starts on 1 November 2014.

7.9.6 *UK resident in following year*

Para 49(4) Sch 45 FA 2013 provides:

> The taxpayer is resident in the UK for the next tax year (whether or not it is a split year).

7.10 Split-year case 7: Partner of someone ceasing full-time work overseas

Case 2 applies if an individual accompanies their partner who works overseas. Case 7 applies if the individual accompanies their partner who works in the UK. The two cases share some common drafting.

Para 50(1) Sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 7 if they are as described in subparagraphs (2) to (6).

7.10.1 *Non-resident in previous year*

Para 50(2) Sch 45 FA 2013 provides:

> The taxpayer was not resident in the UK for the previous tax year.

This is the requirement of each of split year cases 4 - 8, which apply to arrivers.

7.10.2 *Living with partner*

Para 50 Sch 45 FA 2013 provides:

> (3) The taxpayer has a partner[19] whose circumstances fall within Case 6 for—
>
> (a) the relevant year, or

19 See 7.12.3 ("Partner").

(b) the previous tax year.

(4) On a day in the relevant year, the taxpayer moves to the UK so the taxpayer and the partner can continue to live together on the partner's return or relocation to the UK.

The wording is the same as case 2: see 7.5.3 (Living with partner).

7.10.3 *No previous UK home*

Para 50 Sch 45 FA 2013 provides:

(5) In the part of the relevant year before the deemed arrival day—

(a) the taxpayer

[i] has no home in the UK at any time, or

[ii] has homes in both the UK and overseas but spends the greater part of the time living in the overseas home, and

(b) the number of days that the taxpayer spends in the UK does not exceed the permitted limit.

(7) If sub-paragraph (3)(a) applies, the "deemed arrival day" is the later of—

(a) the day mentioned in sub-paragraph (4), and

(b) the first day of what is, for the partner, the UK part of the relevant year as defined for Case 6 (see paragraph 54).

(8) If sub-paragraph (3)(b) applies, the "deemed arrival day" is the day mentioned in sub-paragraph (4).

(9) The permitted limit is the number found by reducing 90 by the appropriate number.

(10) The appropriate number is the result of—

$$A \times (B \div 12)$$

where—

"A" is 90, and

"B" is the number of whole months in the part of the relevant year beginning with the deemed arrival day.

7.10.4 *Resident in following year*

Para 50(6) Sch 45 FA 2013 provides:

The taxpayer is resident in the UK for the next tax year (whether or not it is a split year).

7.10.5 *HMRC example*

RDR3 provides:

Example 40 (Joan)
J is E's wife (see Example 39). J lived with E in Switzerland for the duration of his employment. She also retires from work and returns to live in the UK with E. However she does not return on 3 November with her husband; she arrives in the UK on 8 November 2014 having worked her notice at her part-time job (20 hours a week) in Switzerland.
Provided J did not exceed the limits for days spent in the UK before the UK part of the tax year commenced, she meets the criteria for Case 7 for 2014-2015 as follows:

- she was not UK resident for the 2013-14 tax year
- she does not qualify for Case 6 as she did not meet the criteria for the third automatic overseas test. Nor does she qualify for Cases 4, 5 or 8
- her husband will receive Case 6 split year treatment
- she is resident in the UK for the tax year following her return to the UK, 2015-16
- she has come to the UK to continue to live with her husband.

The UK part of the tax year 2014-15 starts on 8 November 2014 when J moves to the UK.

7.10.6 *Transitional rul for 2013/14*

Para 156 Sch 45 FA 2013 provides:

> (1) Sub-paragraph (2) applies in determining whether the test in paragraph 50(3) is met where the relevant year is the tax year 2013-14.
> (2) The circumstances of a partner of the taxpayer are to be treated as falling within Case 6 for the previous tax year if the partner was eligible for split year treatment in relation to that tax year under the relevant ESC on the grounds that he or she returned to the United Kingdom after a period working overseas full-time.
> (3) Where the circumstances of a partner are treated as falling within Case 6 under sub-paragraph (2), the reference in paragraph 50(7)(b) to the UK part of the relevant year as defined for Case 6 is a reference to the part corresponding, so far as possible, in accordance with the terms of the relevant ESC, to the UK part of that year.
> (4) "The relevant ESC" means whichever of the extra-statutory concessions to which effect is given by Part 3 of this Schedule is relevant in the partner's case.

7.11 Split-year case 8: Starting to have a home in the UK

Para 51(1) Sch 45 FA 2013 provides:

The circumstances of a case fall within Case 8 if they are as described in subparagraphs (2) to (5).

7.11.1 *Non-resident in previous year*

Para 51(2) Sch 45 FA 2013 provides:

> The taxpayer was not resident in the UK for the previous tax year.

This is the requirement of each of split year cases 4 - 8, which apply to arrivers.

7.11.2 *Acquiring UK home*

Para 51(3) Sch 45 FA 2013 provides:

> At the start of the relevant year, the taxpayer had no home in the UK but—
>
> (a) there comes a day when, for the first time in that year, the taxpayer does have a home in the UK, and
>
> (b) from then on, the taxpayer continues to have a home in the UK for the rest of that year and for the whole of the next tax year.

7.11.3 *Insufficient UK ties in previous period*

Para 51(4) Sch 45 FA 2013 provides:

> For the part of the relevant year before the day mentioned in sub-paragraph (3)(a), the taxpayer does not have sufficient UK ties.

"Sufficient ties" has the usual SRT meaning, with minor adjustments. Para 51 Sch 45 FA 2013 provides:

> (6) Paragraphs 17 to 20 (and Part 2 of this Schedule so far as it relates to those paragraphs) apply for the purposes of sub-paragraph (4) with the following adjustments—
>
> (a) references in those paragraphs and that Part to year X are to be read as references to the part of the relevant year mentioned in subparagraph (4), and
>
> (b) each number of days mentioned in the first column of the Table in paragraphs 18 and 19 is to be reduced by the appropriate number.
>
> (7) The appropriate number is found by multiplying the number of days, in each case, by—
>
> A ÷ 12

where "A" is the number of whole months in the part of the relevant year beginning with the day mentioned in sub-paragraph (3)(a).
(8) Sub-paragraph (6)(a) does not apply to the references to year X in paragraphs 32(1)(b) and 33 of this Schedule (which relate to the residence status of family members) so those references must continue to be read as references to year X.

7.11.4 *Resident in following year*

Para 51(5) Sch 45 FA 2013 provides:

> The taxpayer is resident in the UK for the next tax year and that tax year is not a split year as respects the taxpayer.

7.11.5 *HMRC example*

RDR3 provides:

> **Example 41 (Nicola)**
> N is retired. She is non-resident in the UK for tax purposes having lived in Cyprus for a number of years. She has a home in Cyprus and she also has a property in the UK which has been let out on a commercial basis for the last few years. She has recently become a grandmother and decides that she will now split her time between Cyprus and the UK so that she can see more of her grandson who lives in the UK.
> She comes back to the UK and moves into the UK property when the rental agreement with her tenant expires on 4 August 2014. She now has two homes, one in each country.
> Between 6 April 2014 and 4 August 2014 when she started to have a UK home, N only spent four days in the UK, visiting her daughter, and therefore did not exceed the limit for days spent in the UK in the overseas period before she started to have the UK home.
> N meets the criteria for Case 8 for 2014-15 on the basis that:
> - she was not UK resident for 2013-14
> - she is UK resident for 2015-16 (N is possibly dual resident in UK and Cyprus)
> - she continues to have a home in the UK for the rest of 2014-15 and the following tax year
> - she did not have sufficient UK ties to make her resident from 6 April 2014 until 4 August 2014
>
> N does not meet the criteria for Case 4, 5, 6 or 7 split year treatments.
> The UK part of the split year starts on 4 August 2014 which is when N starts to have a home in the UK.

7.12 Definitions for split year rules

7.12.1 *"Relevant year"*

Para 43 Sch 45 FA 2013 provides:

> (2) The 8 Cases are described in paragraphs 44 to 51.
> (3) In those paragraphs, the individual is referred to as "the taxpayer" and the tax year as "the relevant year".
> (4) In applying Part 2 of this Schedule to those paragraphs, for "P" read "the taxpayer".

I refer to a **"split year"** rather than the less helpful term "relevant year".

7.12.2 *"Previous tax year" "next tax year"*

Para 52 Sch 45 FA 2013 provides commonsense definitions:

> (1) This paragraph applies for the purposes of paragraphs 44 to 51.
> (2) A reference to "the previous tax year" is to the tax year preceding the relevant year.
> (3) A reference to "the next tax year" is to the tax year following the relevant year.

7.12.3 *"Partner"*

Para 52(4) Sch 45 FA 2013 provides:

> "Partner", in relation to the taxpayer, means—
> (a) a husband or wife or civil partner,
> (b) if the taxpayer and another person are living together as husband and wife, that other person, or
> (c) if the taxpayer and another person of the same sex are living together as if they were civil partners, that other person.

In non-legal English the word "partner" has long had this sense. In legal English (or at least, in tax legislation) the word has only been used to describe a partner within the meaning of the Partnership Acts; so this is something of a legal English innovation. But no confusion is likely to arise.

7.12.4 *Rounding*

Para 52(5) Sch 45 FA 2013 provides:

If calculation of the appropriate number results in a number of days that is not a whole number, the appropriate number is to be rounded up or down as follows—

(a) if the first figure after the decimal point is 5 or more, round the appropriate number up to the nearest whole number,

(b) otherwise, round it down to the nearest whole number.

7.12.5 *"The overseas part"*

Para 53 Sch 45 FA 2013 provides:

(1) "The overseas part" of a split year is the part of that year defined below—

(a) for the Case in question, or

(b) if the taxpayer's circumstances fall within more than one Case, for the Case which has priority (see paragraphs 54 and 55).

(2) For Case 1, the overseas part is—

(a) if there is only one period falling within paragraph 44(3) [overseas work period], the part beginning with the first day of that period, and

(b) if there is more than one such period, the part beginning with the first day of the longest of those periods.

(3) For Case 2, the overseas part is the part beginning with the deemed departure day as defined in paragraph 45(7) and (8).

(4) For Case 3, the overseas part is the part beginning with the day mentioned in paragraph 46(3)(a) [day ceasing to have UK home].

(5) For Case 4, the overseas part is the part before the day mentioned in paragraph 47(3) [day acquiring UK home].

(6) For Case 5, the overseas part is—

(a) if there is only one period falling within paragraph 48(3) [roughly, day starting UK work], the part before that period begins, and

(b) if there is more than one such period, the part before the first of those periods begins.

(7) For Case 6, the overseas part is—

(a) if there is only one period falling within paragraph 49(3), the part ending with the last day of that period, and

(b) if there is more than one such period, the part ending with the last day of the longest of those periods.

(8) For Case 7, the overseas part is the part before the deemed arrival day as defined in paragraph 50(7) and (8).

(9) For Case 8, the overseas part is the part before the day mentioned in paragraph 51(3)(a) [day acquiring UK home].

7.12.6 *Priority between cases*

Para 54 sch 45 FA 2013 deals with priority between split-year cases 1 to 3:

> (1) This paragraph applies to determine which Case has priority where the taxpayer's circumstances for the relevant year fall within two or all of the following—
> Case 1 (starting full-time work overseas);
> Case 2 (the partner of someone starting full-time work overseas);
> Case 3 (ceasing to have a home in the UK).
> (2) Case 1 has priority over Case 2 and Case 3.
> (3) Case 2 has priority over Case 3.

Para 55 deals with priority between split-year cases 4-8:

> (1) This paragraph applies to determine which Case has priority where the taxpayer's circumstances for the relevant year fall within two or more of the following—
> Case 4 (starting to have a home in the UK only);
> Case 5 (starting full-time work in the UK);
> Case 6 (ceasing full-time work overseas);
> Case 7 (the partner of someone ceasing full-time work overseas);
> Case 8 (starting to have a home in the UK).
> (2) In this paragraph "the split year date" in relation to a Case means the final day of the part of the relevant year defined in paragraph 53(5) to (9) for that Case.
> (3) If Case 6 applies—
> (a) if Case 5 also applies and the split year date in relation to Case 5 is earlier than the split year date in relation to Case 6, Case 5 has priority;
> (b) otherwise, Case 6 has priority.
> (4) If Case 7 (but not Case 6) applies—
> (a) if Case 5 also applies and the split year date in relation to Case 5 is earlier than the split year date in relation to Case 7, Case 5 has priority;
> (b) otherwise, Case 7 has priority
> (5) If two or all of Cases 4, 5 and 8 apply (but neither Case 6 nor Case 7), the Case which has priority is the one with the earliest split year date.
> (6) But if, in a case to which sub-paragraph (5) applies, two or all of the Cases which apply share the same split year date and that date is the only, or earlier, split year date of the Cases which apply, the Cases with that split year date are to be treated as having priority.

7.12.7 *"The UK part"*

Para 56 Sch 45 FA 2013 provides:

> "The UK part" of a split year is the part of that year that is not the overseas part.

CHAPTER EIGHT

EXIT TAXES

8.1 Exit taxes: Introduction

This chapter considers exit taxes, that is, taxes imposed on emigration from the UK by individuals or trustees. They are as follows:
(1) Clawbacks of hold-over and EIS relief on emigration of individual.
(2) Charges on emigration of a trust.
(3) Charges on emigration of persons carrying on a trade.
I hope in a future edition to discuss restrictions on CGT share exchange relief which are akin to an exit charge.[1] Exit taxes on companies are not considered.

I use the term **"emigration"** to refer to a person becoming UK law non-UK resident (ie non-resident as defined in UK tax law), and **"treaty-emigration"** to refer to a person becoming treaty-resident in a foreign state (ie resident as defined in a DTA.)

8.1.1 *Cross references*

This chapter only considers exit taxes. For taxation of income and gains arising during the year, see (Year of arrival and departure).

The emigration of a trust may lose the benefit of transitional reliefs for s.86 TCGA.[2]

8.2 Clawback of hold-over relief on emigration of individual

Section 168(1) TCGA provides a clawback of hold-over relief on emigration of individuals.

If—

---

1 See *Coll v HMRC* [2010] STC 1849.

2 See 50.5 (Pre-1998 protected trusts); 50.7 (Pre-1991 protected trusts).

> (a) relief is given under section 165 in respect of a disposal to an individual or under section 260 in respect of a disposal to an individual ("the relevant disposal"); and
> (b) at a time when he has not disposed of the asset in question, the transferee ceases to be resident in the UK,
>
> then, subject to the following provisions of this section, a chargeable gain shall be deemed to have accrued to the transferee immediately before that time, and its amount shall be equal to the held-over gain (within the meaning of section 165 or 260) on the relevant disposal.

There is no charge if the individual becomes treaty non-resident but remains UK-law UK resident.

The gain accruing to the individual may qualify for DT relief.

An individual ceases to be resident in the UK at the end of a tax year, even if the year is a split year.[3]

These rules give some scope for tax planning. But given the EU issues discussed below, and the CGT temporary non-residence rules, this may not matter much.

8.2.1 *Disposal prior to emigration*

The clawback charge does not apply if the individual disposes of the asset before emigration. Section 168(2) TCGA deals with part disposals:

> For the purposes of subsection (1) above the transferee shall be taken to have disposed of an asset before the time there referred to only if he has made a disposal or disposals in connection with which the whole of the held-over gain on the relevant disposal was represented by reductions made in accordance with section 165(4)(b) or 260(3)(b) and where he has made a disposal in connection with which part of that gain was so represented, the amount of the chargeable gain deemed by virtue of this section to accrue to him shall be correspondingly reduced.

Section 168(3) TCGA provides that inter-spouse disposals are disregarded:

> The disposals by the transferee that are to be taken into account under subsection (2) above shall not include any disposal to which section 58 applies; but where any such disposal is made by the transferee, disposals by his spouse or civil partner shall be taken into account under subsection (2) above as if they had been made by him.

---

3 See 7.1 (Default rule: individual regarded as resident throughout tax year).

This is obviously right.

8.2.2 *Time limit*

Section 168(4) TCGA contains a time limit:

> Subsection (1) above shall not apply by reason of a person ceasing to be resident more than 6 years after the end of the year of assessment in which the relevant disposal was made.

8.2.3 *Relief for short term postings abroad*

Section 168(5) TCGA contains a relief for short term postings abroad:

> Subsection (1) above shall not apply in relation to a disposal made to an individual if—
>
> (a) the reason for his ceasing to be resident in the UK is that he works in an employment or office all the duties of which are performed outside the UK, and
>
> (b) he again becomes resident in the UK within the period of 3 years from the time when he ceases to be so, without having meanwhile disposed of the asset in question;
>
> and accordingly no assessment shall be made by virtue of subsection (1) above before the end of that period in any case where the condition in para (a) above is, and the condition in para (b) above may be, satisfied.

Section 168(6) TCGA deals with part disposals and inter-spouse disposals by the short term non-resident. The wording is based on s.168(2)(3) but its effect is different:

> For the purposes of subsection (5) above a person shall be taken to have disposed of an asset if he has made a disposal in connection with which the whole or part of the held-over gain on the relevant disposal would, had he been resident in the UK, have been represented by a reduction made in accordance with section 165(4)(b) or 260(3)(b) ...

This is a strict rule, since even a part disposal loses the benefit of the relief for the entire asset. The subsection continues:

> and subsection (3) above shall have effect for the purposes of this subsection as it has effect for the purposes of subsection (2) above.

Thus there is no exit charge on an asset if T goes non-resident, and gives the asset to the spouse, provided that T becomes UK resident again within 3 years and the spouse does not dispose of the asset during that period. It

is irrelevant whether the spouse becomes UK resident.

8.2.4 *Collection of clawback charge from donor or trustee*

The tax may be collected from:
(1) the donor who gave the asset to the individual; or
(2) the trustee who transferred the asset to the individual.
This is not usually important for an individual donor because they will generally be prepared to take a view about the future actions of their donee. It is important for trustees who transfer assets to beneficiaries and claim hold-over relief to avoid a charge under s.71 TCGA.

Section 168(7) TCGA provides:

> Where an amount of tax assessed on a transferee by virtue of subsection (1) above is not paid within the period of 12 months beginning with the date when the tax becomes payable then, subject to subsection (8) below, the transferor may be assessed and charged (in the name of the transferee) to all or any part of that tax.

Section 168(8) TCGA sets out a time limit:

> No assessment shall be made under subsection (7) above more than 6 years after the end of the year of assessment in which the relevant disposal was made.

Thus a donor who makes a claim for hold-over relief is at risk of a clawback if the donee emigrates within (approximately) 4 years of the gift.
Suppose:
(1) In 2001/02 D makes a gift to E.
(2) E emigrates in 2005/06.
The exit charge is payable on 31 January 2007.
E cannot be assessed until 12 months later, 31 January 2008. That is just within "6 years after the end of the year of assessment in which the relevant disposal was made". But if E had made the gift in 2000/01 it would have been too late for HMRC to collect the tax from E.

Section 168(9) TCGA provides an indemnity (for what it may be worth):

> Where the transferor pays an amount of tax in pursuance of subsection (7) above, he shall be entitled to recover a corresponding sum from the transferee.

8.2.5 *Prevention of double charge*

Section 168(10) TCGA provides:

> Gains on disposals made after a chargeable gain has under this section been deemed to accrue by reference to a held-over gain shall be computed without any reduction under section 165(4)(b) or 260(3)(b) in respect of that held-over gain.

This prevents double UK taxation (if the individual later makes a disposal within the charge to CGT, eg if they return to the UK). It does not prevent double taxation if the individual pays foreign tax on the same gain. The EU have noted the issue and recommend member states to act, but the UK has not done anything and show no sign of taking any notice..

8.3 Clawback of EIS relief

There is a similar clawback of EIS relief if (in short) an individual becomes non-resident within three years of acquiring EIS shares: para 3 Sch 5B TCGA.

8.4 Charge on emigration of trust

Section 80 TCGA provides an exit charge for trusts:

> (1) This section applies if the trustees of a settlement become at any time ("the relevant time") not resident in the UK.
> (2) The trustees shall be deemed for all purposes of this Act—
> (a) to have disposed of the defined assets immediately before the relevant time, and
> (b) immediately to have reacquired them,
> at their market value at that time.

Unlike the exit charge for individuals, this applies to all gains, not just held-over gains.

8.4.1 *Defined assets*

"Defined assets" is a label which brings in a number of rules which limit the scope of the charge. Section 80(3) TCGA provides:

> Subject to subsections (4) and (5) below, the defined assets are all assets constituting settled property of the settlement immediately before the relevant time.

8.4.2 *Assets of UK trade*

Section 80(4) TCGA brings in an exception for UK trades:

> If immediately after the relevant time—

(a) the trustees carry on a trade in the UK through a branch or agency, and
(b) any assets are situated in the UK and either used in or for the purposes of the trade or used or held for the purposes of the branch or agency,

the assets falling within para (b) above shall not be defined assets.

No charge is needed as these assets remain within the charge to CGT.

8.4.3 *DTA exemption*

Section 80(5) TCGA brings in an exception for assets protected by DTAs:

Assets shall not be defined assets if—
(a) they are of a description specified in any double taxation relief arrangements, and
(b) were the trustees to dispose of them immediately before the relevant time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

No charge is needed as these assets never were within the charge to CGT.

8.4.4 *Restriction of roll-over relief*

Section 80 TCGA provides:

(6) Section 152 shall not apply where the trustees—
(a) have disposed of the old assets, or their interest in them, before the relevant time, and
(b) acquire the new assets, or their interest in them, after that time, unless the new assets are excepted from this subsection by subsection (7) below.
(7) If at the time when the new assets are acquired—
(a) the trustees carry on a trade in the UK through a branch or agency, and
(b) any new assets are situated in the UK and either used in or for the purposes of the trade or used or held for the purposes of the branch or agency,

the assets falling within para (b) above shall be excepted from subsection (6) above.
(8) In this section "the old assets" and "the new assets" have the same meanings as in section 152.

The CG Manual explains:

38215. Roll-over Relief [November 2012]
Section 80(6) prevents roll-over relief under TCGA 1992, s.152 from applying so as to avoid the new exit charge where trustees dispose of assets before, then acquire new assets after becoming non-resident where the new assets are outside the UK tax charge.

8.4.5 *Accidental emigration on death of trustee*

Section 81 TCGA provides:

> (1) Subsection (2) below applies where—
> (a) section 80 applies as a result of the death of a trustee of the settlement, and
> (b) within the period of 6 months beginning with the death, the trustees of the settlement become resident in the UK.

This could apply if for instance a trust has a UK and a foreign trustee, and the UK trustee dies.

> (2) That section shall apply as if the defined assets were restricted to such assets (if any) as—
> (a) would be defined assets apart from this section, and
> (b) fall within subsection (3) or (4) below.

That is, there is no charge apart from the exceptional cases of (3) and (4). Section 81(3) TCGA provides:

> Assets fall within this subsection if they were disposed of by the trustees in the period which—
> (a) begins with the death, and
> (b) ends when the trustees become resident in the UK.

Since the trust will be UK resident in the year and subject to CGT on its gains, it is difficult to see the point of this. Section 81(4) TCGA provides:

> Assets fall within this subsection if—
> (a) they are of a description specified in any double taxation relief arrangements,
> (b) they constitute settled property of the settlement at the time immediately after the trustees become resident in the UK, and
> (c) were the trustees to dispose of them at that time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

8.4.6 *Accidental immigration on death of trustee*

Section 81 goes on to give a relief where there has been an accidental immigration to the UK followed by emigration:

> (5) Subsection (6) below applies where—
>
> (a) at any time the trustees of a settlement become resident in the UK as a result of the death of a trustee of the settlement, and
>
> (b) section 80 applies as regards the trustees of the settlement in circumstances where the relevant time (within the meaning of that section) falls within the period of 6 months beginning with the death.
>
> (6) That section shall apply as if the defined assets were restricted to such assets (if any) as—
>
> (a) would be defined assets apart from this section, and
>
> (b) fall within subsection (7) below.

There is only one exceptional case:

> (7) Assets fall within this subsection if—
>
> (a) the trustees acquired them in the period beginning with the death and ending with the relevant time, and
>
> (b) they acquired them as a result of a disposal in respect of which relief is given under section 165 or in relation to which section 260(3) applies.

This is only a limited relief, since it does not avoid the CGT charge on actual disposals of assets by the trustees in a year when accidentally UK resident.

8.5 **Liability of trustees for exit charge**

There are special rules. The usual rule for liability of trustees for CGT is in s.65(1) TCGA:

> Subject to subsection (3) below, capital gains tax chargeable in respect of chargeable gains accruing to the trustees of a settlement or capital gains tax due from the personal representatives of a deceased person may be assessed and charged on and in the name of any one or more of the relevant trustees ....[4]

---

4 Defined in s.65(4): "In this section ...
"the relevant trustees", in relation to any chargeable gains, means the trustees in the year of assessment in which the chargeable gains accrue and any subsequent trustees of the settlement..."

Section 65(3) has an exemption for trustees who retired before an emigration without knowing of a proposed emigration:

> Where section 80 applies as regards the trustees of a settlement ("the migrating trustees"), nothing in subsection (1) above shall enable any person—
>
> (a) who ceased to be a trustee of the settlement before the end of the relevant period,[5] and
>
> (b) who shows that, when he ceased to be a trustee of the settlement, there was no proposal that the trustees might cease to be resident in the UK,
>
> to be assessed and charged to any capital gains tax which is payable by the migrating trustees by virtue of section 80(2).

Section 82 TCGA provides:

> (1) This section applies where—
>
> (a) section 80 applies as regards the trustees of a settlement ("the migrating trustees"), and
>
> (b) any capital gains tax which is payable by the migrating trustees by virtue of section 80(2) is not paid within 6 months from the time when it became payable.
>
> (2) The Board may, at any time before the end of the period of 3 years beginning with the time when the amount of the tax is finally determined, serve on any person to whom subsection (3) below applies a notice—
>
> (a) stating particulars of the tax payable, the amount remaining unpaid and the date when it became payable;
>
> (b) stating particulars of any interest payable on the tax, any amount remaining unpaid and the date when it became payable;
>
> (c) requiring that person to pay the amount of the unpaid tax, or the aggregate amount of the unpaid tax and the unpaid interest, within 30 days of the service of the notice.
>
> (3) This subsection applies to any person who, at any time within the relevant period,[6] was a trustee of the settlement, except that it does not apply to any such person if—
>
> (a) he ceased to be a trustee of the settlement before the end of the relevant period, and
>
> (b) he shows that, when he ceased to be a trustee of the settlement,

---

5 Defined by reference in s.65(4): In this section—
"the relevant period" has the same meaning as in section 82;..."

6 Defined in s.82(6) as (in effect) one year.

there was no proposal that the trustees might cease to be resident in the UK.

(4) Any amount which a person is required to pay by a notice under this section may be recovered from him as if it were tax due and duly demanded of him; and he may recover any such amount paid by him from the migrating trustees.

(5) A payment in pursuance of a notice under this section shall not be allowed as a deduction in computing any income, profits or losses for any tax purposes.

SP 5/82 sets out HMRC practice:

5 Payment can only be sought from former trustees where the Revenue is unable to obtain payment from current trustees. In the first instance, payment will generally be sought from those persons who resigned as trustees immediately before the trust migrated and then from earlier trustees. Each case will, however, need to be considered in the light of the relevant facts.

SP 5/82 correctly states:

6 An amount recovered from present trustees by a former trustee in respect of capital gains tax under TCGA 1992 s 82 is not regarded as a capital payment under s 97. Further, such amounts do not fall within the provisions of [what is now s.720, 727 or 731 ITA] nor are there any inheritance tax implications.

8.5.1 *The relevant period*

This term is defined in s.82(6) TCGA:

For the purposes of this section—

(a) [this is a spent transitional rule for an emigration in 1991-2];

(b) in any other case, the relevant period is the period of 12 months ending with the relevant time.

8.5.2 *Commentary*

In short, a trustee at the time of the emigration is liable, and a trustee who retired up to a year before is liable if aware of the proposal to migrate the trust. This may help HMRC (because they can go back to trustees in an earlier year) and it may help the trustees (if they can say that they were not aware of a migration). But it is not likely to make any difference either way. There is no good reason for special rules and s.82 and s.65(3) TCGA should be repealed, resulting in a small but worthwhile tax simplification.

8.6 Charge on treaty-emigration of trust

Section 83 TCGA provides:

> (1) This section applies if the trustees of a settlement, while continuing to be resident in the UK, become at any time ("the time concerned") trustees who fall to be regarded for the purposes of any double taxation relief arrangements[7] —
>
> (a) as resident in a territory outside the UK, and
>
> (b) as not liable in the UK to tax on gains accruing on disposals of assets ("relevant assets") which constitute settled property of the settlement and fall within descriptions specified in the arrangements.
>
> (2) The trustees shall be deemed for all purposes of this Act—
>
> (a) to have disposed of their relevant assets immediately before the time concerned, and
>
> (b) immediately to have reacquired them,
>
> at their market value at that time.

This charge does not contain any of the exceptions applicable to the s.80 exit charge and has no special rules for trustee liability.

8.6.1 *Restriction of roll-over relief*

Section 84 TCGA provides:

> (1) Section 152 shall not apply where—
>
> (a) the new assets[8] are, or the interest in them is, acquired by the trustees of a settlement,
>
> (b) at the time of the acquisition the trustees are resident in the UK and fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK,
>
> (c) the assets are of a description specified in the arrangements, and
>
> (d) were the trustees to dispose of the assets immediately after the acquisition, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

This is the equivalent of s.80(6): see 8.4.4 (Restriction of roll-over relief).

---

7 See 9A.3.3 ("DTR arrangements": CGT).

8 Defined by reference in s.84(2): "In this section "the new assets" has the same meaning as in section 152."

8.7 Disclosure of emigration or treaty-emigration of trust

Para 5 Sch 5A TCGA provides:

(1) This paragraph applies if—

(a) the trustees of a settlement cease at any time (the relevant time) on or after the commencement day[9] to be resident in the UK, or

(b) the trustees of a settlement, while continuing to be resident in the UK, become at any time (the relevant time) on or after the commencement day trustees who fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.

(2) Any person who was a trustee of the settlement immediately before the relevant time shall, before the expiry of the period of twelve months beginning with the relevant day, deliver to the Board a return specifying—

(a) the day on which the settlement was created,

(b) the name and address of each person who is a settlor in relation to the settlement immediately before the delivery of the return, and

(c) the names and addresses of the persons who are the trustees immediately before the delivery of the return.

(3) For the purposes of sub-paragraph (2) above the relevant day is the day when the relevant time falls.

There are minor exceptions in para 6 sch 5A TCGA:

(1) Nothing in paragraph 2, 3, 4 or 5 above shall require information to be contained in the return concerned to the extent that—

(a) before the expiry of the period concerned the information has been provided to the Board by any person in pursuance of the paragraph concerned or of any other provision, or

(b) after the expiry of the period concerned the information falls to be provided to the Board by any person in pursuance of any provision other than the paragraph concerned.

(2) Nothing in paragraph 2, 3, 4 or 5 above shall require a return to be delivered if—

(a) before the expiry of the period concerned all the information concerned has been provided to the Board by any person in pursuance of the paragraph concerned or of any other provision,

---

9 Defined para 1 sch 5A TCGA: "In this Schedule "the commencement day" means the day on which the Finance Act 1994 was passed."

or

(b) after the expiry of the period concerned all the information concerned falls to be provided to the Board by any person in pursuance of any provision other than the paragraph concerned.

8.8 Emigration of individual trader[10]

Section 17 ITTOIA provides:

(1) This section applies if—

(a) an individual carries on a trade otherwise than in partnership, and

(b) there is a change of residence.

(1A) For the purposes of this section there is a "change of residence" if—

(a) the individual becomes or ceases to be UK resident, or

(b) a tax year is, as respects the individual, a split year.

(1B) The change of residence occurs—

(a) in a case falling within subsection (1A)(a), at the start of the tax year for which the individual becomes or ceases to be UK resident, and

(b) in a case falling within subsection (1A)(b), at the start of whichever of the UK part or the overseas part of the tax year is the later part.

(2) If this section applies and the individual does not actually cease permanently to carry on the trade immediately before the change of residence occurs, the individual is treated for income tax purposes—

(a) as permanently ceasing to carry on the trade at the time of the change of residence, and

(b) so far as the individual continues to carry on the trade, as starting to carry on a new trade immediately afterwards....

8.8.1 *Emigration of partner in trading partnership*

For the equivalent rules for partnerships, see s.852 ITTOIA:

(6) If there is a change of residence, the partner is treated as permanently ceasing to carry on one notional trade when that change of residence occurs and starting to carry on another immediately afterwards...

(8) Subsections (1A) and (1B) of section 17 apply for the purposes of subsection (6).

---

10 References in this paragraph to a trade include a profession or vocation, since there is no difference between them.

8.9 EU restriction on exit taxes

8.9.1 *Exit charge on emigration of individual to EU state*

An EC communication on exit taxes[11] provides:

> **2. EXIT TAXES: LEGAL FRAMEWORK**
>
> **2.1. The decision of the ECJ in *de Lasteyrie*[12] and its implications for individuals**
>
> On 11 March 2004, the ECJ gave an important interpretation of the freedom of establishment in the context of French legislation taxing unrealised increases in value of securities where individual taxpayers move their tax residence outside France. When Mr. de Lasteyrie du Saillant in 1998 moved from France to Belgium, he was subject to immediate taxation on the unrealised increase in value of the shares which he held in a French company.
>
> The ECJ held that the French provision in question was likely to restrict the exercise of the freedom of establishment, having at the very least a dissuasive effect on taxpayers wishing to establish themselves in another MS, because they were subjected in the exit country, by the mere fact of transferring their tax residence outside France, to tax on a form of income that had not yet been realised, and thus to disadvantageous treatment by comparison with a person maintaining his residence in France.
>
> Although the ruling in *de Lasteyrie* relates to the facts and circumstances of the case at issue, the ECJ's interpretation of EC Law implies conclusions as regards exit taxes in general.
>
> Taxing residents on a realisation basis and departing residents on an accruals basis is a difference in treatment which constitutes an obstacle to free movement. Where a MS decides to assert a right to tax gains accrued during a taxpayer's residence within its territory, it cannot take measures which present a restriction to free movement.
>
> This rules out the possibility of immediate collection of the tax due on the unrealised gains when taxpayers move their tax residence to another MS.

---

11 "Exit taxation and the need for co-ordination of Member States' tax policies" 19.12.2006 COM(2006) 825 final, accessible *ec.europa.eu/taxation_customs/resources/documents/taxation/COM(2006)825_en.pdf*

12 *de Lasteyrie du Saillant v Ministère de l'Économie, des Finances et de l'Industrie,* [2005] STC 1722.

This view has since been reaffirmed in *National Grid Indus BV v Inspecteur van de Belastingdienst Rijnmond / kantoor Rotterdam*.[13]

The communication then considers permitted forms of charges on departing residents (not applicable in the UK)[14] and concludes:

> Most MSs which had exit tax rules on individual shareholders similar to those at issue in *de Lasteyrie* have since abolished or amended them in line with the ruling. This has enabled the Commission to suspend infringement proceedings against a number of MSs on this particular aspect. The Commission will, however, continue to monitor MSs' rules in this area with a view to ensuring their EC law compatibility.

The UK has three exit charges on individuals, the hold-over clawback, the EIS clawback, and the charge on migrating traders. So far they seem to have escaped direct EU attention. If the migration is to a member state, these can hardly be described as compliant with EU freedom of establishment[15] and freedom to reside.[16]

---

13 [2012] STC 114.

14 "The ECJ ruled in *de Lasteyrie* and in *N* [*N v Inspecteur van de Belastingsdienst Oost/kantoor Almelo*, [2008] STC 436] that the possible suspension of payment made subject, for example, to conditions that guarantees must be provided, constitutes a restrictive effect in that the taxpayer is deprived of enjoyment of the assets given as a guarantee. Similarly, it is clear from *de Lasteyrie* that suspension of payment cannot be made subject to the condition of designating a representative in the MS of origin. In general, any means of preserving the tax claim must be strictly proportional to that aim and must not entail disproportionate costs for the taxpayer.
As the ECJ confirmed in *N*, when a resident of a MS transfers his/her residence to another MS, the MS from which he/she departs is not prevented by EU law from assessing the amount of income on which it wishes to preserve its tax jurisdiction, provided this does not give rise to an immediate charge to tax and that there are no further conditions attached to the deferral. Such a practice is in line with the principle of fiscal territoriality, connected with a temporal component, namely residence within the territory during the period in which the taxable profit arises. A requirement, that the taxpayer submits a tax declaration at the time of the transfer of residence, necessary for the purpose of assessing the income, can be considered proportionate having regard to the legitimate objective of allocating the taxing powers, in particular so as to eliminate double taxation, between the MSs."

15 See 60.4 (Freedom of establishment).

16 Art. 21 TFEU provides:
"Every citizen of the Union shall have the right to move and reside freely within the territory of the Member States, subject to the limitations and conditions laid down in the Treaties and by the measures adopted to give them effect."

8.9.2 *Exit charge on emigration of trust to EU state*

What about the exit charge for trusts? The EC communication does not discuss trusts, but it does discuss companies:

> **3.1. Implications of *de Lasteyrie* for companies**
> The Commission is of the opinion that the interpretation of the freedom of establishment given by the ECJ in *de Lasteyrie* in respect of exit tax rules on individuals also has direct implications for MSs' exit tax rules on companies.

This is obviously correct since freedom of establishment applies to companies as well as individuals.[17] The same will apply to a trust either on the grounds that it is an "undertaking" within the meaning of the freedom of establishment rule[18] or on the grounds of the freedom of movement or of establishment of the trustee in its personal capacity.

8.9.3 *Exit charge on emigration to EEA state*[19]

The EC communication continues:

> **4.1. Freedoms applicable to EEA-states**
> The European Economic Area (EEA) Agreement provides for the same four basic freedoms as the EC Treaty (goods, persons, services and capital). It also includes horizontal provisions relevant to the four freedoms. Secondary Community legislation in the area of taxation, however, has not been incorporated in the EEA Agreement. The Mutual Assistance Directive and the Recovery Directive therefore do not apply to these states
> **4.2. Emigration of individuals/transfer of seat of companies – free movement of workers/freedom of establishment**
> Taxes levied in case of the emigration of individuals or the transfer of seat of companies would primarily appear to involve the free movement of workers (Article 39 EC/28 EEA Agreement) and the freedom of establishment (Article 43 EC/31 EEA Agreement) respectively. The exit taxes at issue in *de Lasteyrie* and *N* which applied to individuals with substantial shareholdings were found to contravene the freedom of establishment. As the same basic freedoms apply to EEA states, the rulings in *de Lasteyrie* and *N* are of direct relevance to them. The

17 See 60.4 (Freedom of establishment).

18 See 60.10 (Section 86 TCGA).

19 The states within the EEA (European Economic Area) are Norway, Iceland and Liechtenstein.

question is whether there are significant differences in situation which could justify such restrictions in the case of EEA states. The Commission is of the opinion that an immediate collection of tax may be justified in certain circumstances by overriding reasons in the general interest, in particular the need to ensure the effectiveness of fiscal supervision and to prevent tax evasion.
EEA states are not obliged to implement secondary Community legislation in the area of taxation, such as the Mutual Assistance Directive and the Recovery Directive. As a consequence, MSs do not necessarily have the same guarantees that deferred tax claims can be discharged at a later stage as they would have within the Community. In many cases, MSs have, however, concluded bilateral or multilateral tax conventions with EEA states which include information exchange obligations that provide for an equivalent level of mutual assistance. The Commission believes that in situations where a lack of administrative cooperation prevents MSs from safeguarding their tax claims they should be entitled to take appropriate measures at the moment of emigration or transfer.

Council Directive 2010/24/EU[20] applies to MSs but not to EEA states. However, all the EEA states have a DTA with an information exchange article which should suffice.

8.9.4 *Exit charge on emigration to other countries*

The EC communication continues:

5. EXIT TAXES IN RESPECT OF THIRD COUNTRIES
Of the four basic freedoms, only the free movement of capital and payments applies to third countries.
In respect of the emigration or transfer of seat to other third countries as such, the provisions on the free movement of persons do not apply and MSs remain free to assess and collect their taxes at the moment of departure. However, the emigration of an individual or the transfer of seat of a company may involve transactions which are covered by the provisions on the free movement of capital. The transfer of assets to a PE in a third country may also fall to be examined from the perspective of the free movement of capital.
Since the result of the application of the different freedoms should be the same, it would appear that an immediate collection of tax at the

20 16 March 2010, concerning mutual assistance for the recovery of claims relating to taxes, duties and other measures.

> moment of transfer of such assets constitutes a restriction on the free movement of capital. However, as noted above, the Commission believes that a lack of administrative co-operation may justify a restriction in these circumstances. The Commission would encourage MSs, where appropriate, to enhance administrative co-operation with their non-EU partners, as this is the best means of ensuring tax compliance and preventing tax evasion.[21]

The European Parliament supports this view.[22]

In the case of an emigration to a third country (not a MS or EEA state), it would be necessary to review the treaties between the UK and that state in order to ascertain the position.

8.9.5 *EU proceedings against UK*

The EC say:

> The European Commission has formally requested the UK to amend its legislation providing for exit taxes on companies.
>
> The UK legislation at stake results in immediate taxation of unrealised capital gains in respect of certain assets when the seat or place of effective management of a company is transferred to another EU/EEA State. However, a similar transfer within the UK would not generate any such immediate taxation and the relevant capital gains would only be taxed once they have been realised.
>
> The Commission considers that the UK has failed to fulfil its obligations under EU rules by maintaining these restrictive provisions. Exit taxes may breach the freedom of establishment as they make it more expensive to transfer a company seat or place of effective management to another Member State than to another location in the UK.
>
> The Commission's request takes the form of a reasoned opinion (second step of EU infringement proceedings). In the absence of a satisfactory response within two months, the Commission may refer the UK to the Court of Justice of the European Union.[23]

In the area of company migration (outside the scope of this work) the CIOT have been lobbying the EU for action.[24]

---

21 In EU terminology, "tax evasion" includes tax avoidance.

22 European Parliament resolution of 24 October 2007 on the contribution of taxation and customs policies to the Lisbon Strategy.

23 IP/12/285, 22/03/2012.

24 Letter dated 20 March 2007 accessible *http://www.tax.org.uk* (search for *Heydt*).

The UK response was Sch 49 FA 2013, though whether this achieves EU law compliance has been questioned.[25] However, no changes have been made to the exit charges for trusts and individuals.

8.10 Council Resolution on coordinating exit taxation

The Council of the European Union (the Council of Ministers) adopted a resolution on 2 December 2008 which invites Member States to adopt the following guiding principles:

> A. "Transfer of economic activities" means any operation whereby a taxpayer subject to corporation tax or a natural person engaged in a business:
> 1) ceases to be subject to corporate or personal income tax in a Member State (the exit State) while at the same time becoming subject to corporate or personal income tax in another Member State (the host State); or
> 2) transfers a combination of assets and liabilities from a head office or a permanent establishment in the exit State to a permanent establishment or a head office in the host State.
>
> B. When, in connection with a transfer of economic activities, the exit State reserves the option to exercise its taxing rights on the reserves made (profits realised but not yet taken into account for tax purposes) and to take back, in full or in part, the provisions made (expenditure not yet incurred but already taken into account for tax purposes), the host State may provide for the creation of reserves or provisions of identical or different amounts, in accordance with the rules governing the tax base in that State, and allow deduction from taxable results for the year in which they were established.
>
> C. When, in connection with a transfer of economic activities, the exit State reserves the option to exercise its taxing rights on the unrealised gains corresponding to the assets held by the taxpayer, calculated as the difference between the market value of these assets on the transfer date and their book value, the host State takes the market value on the transfer date when calculating the subsequent added value in the event of disposal.
>
> D. In case of disagreement between the host State and the exit State regarding the market value of the assets on the transfer date, the two

25 See CIOT Letter to HMRC re FB13 exit charges (May 2013) accessible *http://www.tax.org.uk/tax-policy/public-submissions/2013/exit_charges*

States settle their dispute using the appropriate procedure.

E. The host State can require the taxpayer engaged in a transfer of economic activities to provide evidence that the exit State has exercised or will exercise its rights under the conditions set out above, as well as evidence of the market value applied by the exit State.

F. The provisions laid down at Community level in relation to Mutual Assistance provide the framework for the host State to assist the exit State, in particular for the purposes of determining the disposal date.

This does not seem to have much impact yet, at least in the UK, but the law is not stable.

CHAPTER NINE

TEMPORARY NON-RESIDENCE POST-2013 DEPARTURES

9.1 Temporary non-residence: Introduction

This chapter discusses the temporary non-residence rules (**"TNR rules"**). Para 153(3) Sch 45 FA 2013 provides:

> Part 4 of this Schedule has effect if the year of departure (as defined in that Part) is the tax year 2013-14 or a subsequent tax year.

It is therefore necessary to distinguish:

(1) **"The post-2013 TNR rules"** which apply where an individual's year of departure is 2013/14 or later.

(2) **"The pre-2013 TNR rules"** which continue to apply where an individual's year of departure is before 2013/14.

This does make the legislation twice as complicated as necessary. The two sets of rules are best regarded as separate topics, though occasionally the same wording is used, and often the end result is the same. At the cost of some repetition - those who read tax statutes must become enured to repetition - I address the new rules in this chapter and the old rules in the next chapter.

The rules were introduced in 1998 and constantly amended, producing a fine tangle. Perhaps the authors of the FA 2013 realised that the legislation was a mess, because it was almost completely rewritten (as well as extended) by part 4 Sch 45 FA 2013. Unfortunately some of the problems under the pre-2013 rules are preserved in the post-2013 rules.

The decision to keep all the old legislation for pre-2013 leavers, even the parts which are gibberish, does seem rather odd. But there it is.

The rules apply if an individual's temporary period of non-residence is 5 years or less, so the pre-2013 rules will finally become obsolete on 6 April 2018, when those who left the UK in 2012/13 clock up five years non-residence, after which they can no longer be caught by the TNR rules.

9.1.1 *Residence terminology*

In this book I use the following terminology:

(1) **"UK-law residence"** means residence as defined in UK tax law.
   (a) A person who is resident in the UK within the UK tax law definition is **"UK-law UK resident"**
   (b) A person who is not resident in the UK within the UK tax law definition is**"UK-law non-UK resident"**.

(2) **"Treaty-residence"** means residence as defined in a DTA.
   (a) A person who is a resident of the UK within a DTA definition is **"treaty-resident in the UK"**.
   (b) A person who is resident in the foreign state within a DTA definition is **"treaty-resident in the foreign state"**. One could use the term "treaty-resident outside the UK." Statute calls this *"treaty non-resident"*[1] but I think my term is clearer.

Since UK-law residence and treaty-residence are distinct concepts,[2] a person who is UK-law UK resident may be:

(1) treaty non-UK resident (under the tie-breaker test);[3] or
(2) not treaty non-UK resident: described as having **"sole UK residence"**.[4]

These are somewhat clumsy terms but it is difficult to think of better.

9.1.2 *Cross references*

For the interaction with sch 4C TCGA, see 52.22.2 (Trust within s.87).

9.2 Purpose of the temporary non-residence rules

It is helpful to outline the three sets of problems which the TNR rules are intended to address.

9.2.1 *Gains accruing during temporary period of non-residence*

In the absence of the TNR rules, gains of temporary non-residents are not

---

1 See 9.3.2 ("Treaty non-resident").

2 See 6.2 (Relationship between treaty-residence and UK-law residence).

3 It would be useful to have a short term to describe someone who is UK-law UK resident but treaty-resident outside the UK (= treaty non-UK resident). But *dual resident* and *semi-resident* do not encapsulate the concept; *treaty tie-breaker non-UK resident*" does encapsulate the concept but it is so long-winded it seems better just to use the full expression when it is needed.

4 See 9.3.3 ("Sole UK residence").

in general subject to tax.

So a possible method of CGT planning for a UK resident would be as follows. An individual could become UK-law non-UK resident and realise gains (typically by disposing of assets) during a year of non-residence; in the following tax year they could become UK resident again. Thus relatively brief periods of UK-law non-residence offered the opportunity of CGT-free disposals.

A variant of this planning is: an individual could remain UK-law UK resident but become treaty non-UK resident (ie treaty-resident in a state with a DTA conferring CGT relief under the tie-breaker); the individual realises gains while treaty non-UK resident; following the disposal the individual could cease to be treaty non-resident. Thus relatively brief periods of treaty non-UK residence offered some opportunity of CGT-free disposals (so far as CGT treaty relief could be available).

The TNR rules bring gains into charge on the return of the temporary non-resident to the UK.

9.2.2 *Income arising during temporary period of non-residence*

In the absence of the TNR rules, some income of temporary non-residents is not subject to UK tax. So a similar method of IT planning for a UK resident would be to arrange for income to arise to an individual when UK-law non-UK resident, or when treaty non-UK resident. Relatively brief periods of UK-law or treaty non-residence offered the opportunity of receiving income free of IT.

The TNR rules bring some of this income ("TNR income") into charge on the return of the temporary non-resident to the UK. The rules are aimed at types of income which could be arranged to accrue during the non-resident period. The categories of income caught by the TNR rules are as follows:

(1) Close companies in which the individual has a material interest
(2) OIGs
(3) Gains from life policies and bonds
(4) Specific employment income (not discussed here):
    (a) Pension schemes charges: s.394A, 576A, s.572A, 579CA ITEPA
    (b) Disguised remuneration: s.554Z4A, 554Z11A ITEPA
    (c) Employer-financed retirement benefits: s.394A ITEPA

Other types of income accruing to temporary non-residents remain exempt on return to the UK.

HMRC summarise the position as follows:

> 3.47 Ceasing to be UK resident means that an individual is no longer liable to UK tax on income from non-UK sources. In many instances there can also be a reduced tax liability on income from UK sources. This can result in people finding it advantageous to become not resident for a short period of time if they expect substantial amounts of income to arise which otherwise would be liable to tax in the UK. This leads to a cost to the Exchequer.
> 3.48 A similar position used to arise for CGT. It was possible for individuals to leave the UK temporarily and realise capital gains in the period of non-residence and therefore be exempt from liability to UK tax on those gains. Legislation was enacted in Finance Act 1998 to counter such avoidance of CGT.
> 3.49 Introducing a statutory definition will make it clearer when a person is tax resident or not resident in the UK. This could enable those who want to avoid liability on substantial amounts of income to plan short periods of temporary non-residence with more certainty.
> 3.50 The SRT rules will therefore need to counteract the risk of individuals creating artificial short periods of non-residence, during which they receive a large amount of income (which accrued during periods of UK residence) free of UK tax and then bring the income back into the UK tax-free. This activity would undermine the effectiveness of an SRT (?) and present an unacceptable risk to the Exchequer.[5]

9.2.3 *Remittance by temporary non-resident*

In the absence of the TNR rules, a possible method of remitting RFI tax free would be as follows. Suppose an individual had RFI taxable on remittance (in this chapter called "**pre-departure income**").

The individual could become UK-law non-UK resident and remit the pre-departure income during a year of non-residence; in the following tax year they could become UK resident again. Thus relatively brief periods of UK-law non-residence offered the opportunity of tax-free remittances of pre-departure income.

The same applies for pre-departure gains but not for foreign earnings.[6]

---

5 HM Treasury/HMRC, "Statutory Definition of Tax Residence" (June 2011) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81588/consult_condoc_statutory_residence.pdf*

6 See 22.24 (Remittance when non-resident).

9.3 Statutory terminology

The TNR provisions share a common terminology. These are not taxes-act-wide definitions so they have to be repeated or incorporated by reference where used in other statutes in a TNR context.

9.3.1 *"Residence period"*

This term is devised to deal with full tax years and split years. Para 109 Sch 45 FA 2013 provides:

> In relation to an individual, a "residence period" is—
> (a) a tax year that, as respects the individual, is not a split year, or
> (b) the overseas part or the UK part of a tax year that, as respects the individual, is a split year.

9.3.2 *"Treaty non-resident"*

Para 112(3) Sch 45 FA 2013 provides:

> An individual is "Treaty[7] non-resident" at any time if at the time the individual falls to be regarded as resident in a country outside the UK for the purposes of double taxation arrangements[8] having effect at the time.

It might be clearer to say "treaty-resident in the foreign state" or "treaty non-UK resident".

9.3.3 *"Sole UK residence"*

Para 112 Sch 45 FA 2013 provides a commonsense definition:

> (1) An individual has "sole UK residence" for a residence period consisting of an entire tax year if—
> (a) the individual is resident in the UK for that year, and
> (b) there is no time in that year when the individual is Treaty non-resident.
> (2) An individual has "sole UK residence" for a residence period consisting of part of a split year if—
> (a) the residence period is the UK part of that year, and

---

7 The legislation, I think rather oddly, uses a capital *T* in this expression.

8 Para 145 Sch 45 FA 2013 provides the standard definition:
"In this Schedule ... "double taxation arrangements" means arrangements that have effect under section 2(1) of TIOPA 2010".

(b) there is no time in that part of the year when the individual is Treaty non-resident.

Taxation gives this example:

> M leaves the UK 9 August 2015 to work in Ruritania.
> 2014/15 is a split year.
> The Ruritania tax year runs 1 Jan - 31 Dec. Under Ruritania tax law, M is resident in the calendar year 2015.
> Using the OECD model tie-breaker test, M is treaty-resident in Ruritania in the calendar year 2015.

The *Taxation* analysis is:

> Although the 2015/16 tax year is a split year, the period from 6 April 2015 to 8 August 2015 is not a period of sole UK residence because under the treaty he is resident in Ruritania during that period (Sch 1, para 101(2)(b)).
> M was also treaty non-resident in the UK from 1 January to 5 April 2015, which is part of the 2014/15 tax year. As a result, he does not have sole UK residence during that tax year either.

Is that right?

9.3.4 *"Period A"*

Para 110 Sch 45 FA 2013 provides:

> (1) An individual is to be regarded as "temporarily non-resident" if—
> (a) the individual has sole UK residence for a residence period,
> (b) immediately following that period (referred to as "period A"), one or more residence periods occur for which the individual does not have sole UK residence ...

"Period A" is the last pre-departure UK period. The label is not ideal, but I adopt it as it is easiest to follow the statutory terminology.

9.3.5 *"Temporary period of non-residence"*

Para 113 Sch 45 FA 2013 provides a commonsense definition:

> In relation to an individual, "the temporary period of non-residence" is the period between—
> (a) the end of period A, and
> (b) the start of the next residence period after period A for which the individual has sole UK residence.

9.3.6 *"Year of departure"*

Para 114 Sch 45 FA 2013 provides:

> "The year of departure" is the tax year consisting of or including period A.

9.3.7 *"Period of return" and "year of return"*

Para 115 Sch 45 FA 2013 provides:

> "The period of return" is the first residence period after period A for which the individual has sole UK residence.

Section 10A(11) TCGA provides:

> In this section ... "the year of return" means the tax year that consists of or includes the period of return.

9.4 "Temporarily non-resident"

"Temporarily non-resident" is a key term. The definition is slightly different from the pre-2013 TNR rules.

9.4.1 *Residence followed by non-residence*

Para 110 Sch 45 FA 2013 provides:

> (1) An individual is to be regarded as "temporarily non-resident" if—
> (a) the individual has sole UK residence for a residence period,
> (b) immediately following that period (referred to as "period A"), one or more residence periods occur for which the individual does not have sole UK residence ...

This sets the scene for what are essentially two conditions.

9.4.2 *4/7 UK resident years before departure*

Para 110 Sch 45 FA 2013 provides:

> (1) An individual is to be regarded as "temporarily non-resident" if...
> (c) at least 4 out of the 7 tax years immediately preceding the year of departure were either—
> (i) a tax year for which the individual had sole UK residence, or
> (ii) a split year that included a residence period for which the individual had sole UK residence,

I refer to this as **"the 4/7 UK years test"**.

9.4.3 *Temporary period of non-residence not above 5 years*

Para 110 Sch 45 FA 2013 provides:

> (1) An individual is to be regarded as "temporarily non-resident" if...
> (d) the temporary period of non-residence is 5 years or less.

RDR3 provides:

> 6.2... Note that, for the special rules to not apply, your period of temporary non-residence has to be for more than five years; it does not have to be for five complete tax years.

9.4.4 *Residence in years before 2013/14*

An individual whose year of departure is 2013/14 or later, and so who falls within the post-2013 TNR rules, may need to look at some pre-2013/14 years in order to apply the 4/7 UK years test, thus:

Year of Departure	Years for 4/7 year test	No. pre-2013/14 years
2013/14	2006/07 - 2012/13	7
2014/15	2007/08 - 2013/14	6
2015/16	2008/09 - 2014/15	5
2016/17	2009/10 - 2015/16	4
2017/18	2010/11 - 2016/17	3
2018/19	2011/12 - 2017/18	2
2019/20	2012/13 - 2018/19	1

Para 157 Sch 45 FA 2013 provides:

> (1) This paragraph applies in determining whether the test in paragraph 110(1)(c) is met in relation to a tax year before the tax year 2013-14 (a "pre-commencement tax year").

Two rules then follow:

> (2) Paragraph 110(1) is to have effect as if for paragraph (c) there were substituted—
> "(c) at least 4 out of the 7 tax years immediately preceding the year of departure was a tax year meeting the following conditions—
> (i) the individual was resident in the UK for that year, and
> (ii) there was no time in that year when the individual was Treaty non-resident (see paragraph 112(3)).".

This incorporates the pre-2013 TNR definition of temporarily non-resident. It is needed as the statutory split year concept did not apply

before 2013.

> (3) Whether an individual was resident in the UK for a pre-commencement tax year is to be determined in accordance with the rules in force for determining an individual's residence for that pre-commencement tax year (and not in accordance with the statutory residence test).

This applies the pre-2013 residence rules. One cannot elect to apply the SRT rules.

This transitional provision will at last become obsolete on 6 April 2020.

9.5 HMRC examples

RDR3 provides:

Example 42 (Max)
Max has had sole residence in the UK for the previous ten years. On 22 February 2015 Max moves to Poland and is considered resident there from this point, as well as retaining his UK residence up to the end of the tax year. From 22 February to 5 April 2015 he is treaty non-resident.
For the purpose of this example, Max does not satisfy the conditions for split year treatment in tax year 2014-15.
Max is not solely UK resident from 22 February 2015 but he will remain UK resident for the tax year. As this is not a split year, Period A will end at the end of the tax year 2013-14, because that is the end of the last tax year in which Max was solely UK resident. His year of departure for the purpose of applying the temporary non-resident provisions is therefore 2013-14, even though he actually physically left the UK on 22 February 2015. The next residence period begins on 6 April 2014 and Max will begin to be regarded as temporarily non-resident from this point.
Max returns on 26 May 2018 and split year treatment applies.
Max has sole UK residence from 26 May 2018. He is treaty resident for the UK part of the year. His temporary non-residence ends on 25 May 2018. The period of temporary non-residence is 6 April 2014 to 25 May 2018 inclusive, which is less than five years and so Max is within the scope of the temporary non-residence provisions.

Example 43 (Louis)
Louis moves to the UK on 9 January 2014, becoming resident here for 2013-14. He satisfies the conditions for split year treatment for 2013-14 and is treaty resident in the UK from arrival.
On 4 January 2017, Louis moves to the USA. He becomes a US tax resident and is not treaty resident in the UK from that point onwards. He satisfies the

conditions for split year treatment and his overseas part of the split year starts on 4 January 2017.
Louis returns to the UK on 9 March 2022 and split year treatment applies. He is treaty resident in the UK from the date of his return.
Louis meets the 'four out of seven' test for tax years immediately preceding his departure.

- 2013-14 was a split year which included a residence period for which Louis had sole UK residence
- 2014-15 and 2015-16 were full tax years for which he had sole UK residence
- 2016-17 was a tax year that included a residence period for which he had sole UK residence (6 April 2016 – 3 January 2017). This last period is period A.

Louis has more than one residence period immediately following period A in which he does not have sole UK residence. The first such period is 4 January 2017 – 5 April 2017 (the overseas part of the split year in the year of his departure).
By the time Louis returns he has been non-resident for more than five years (4 January 2017 to 8 March 2022), therefore he is not temporarily non-resident for the purposes of the statutory residence test. He does not need to be non-resident for five complete tax years in order to be outside the scope of the temporary non-residence provisions.

9.6 Gains and losses accruing in temporary period of non-residence

Section 10A TCGA provides:

> (1) This section applies if an individual ("the taxpayer") is temporarily non-resident.
> (2) The taxpayer is chargeable to capital gains tax as if gains and losses within subsection (3) were chargeable gains or, as the case may be, losses accruing to the taxpayer in the period of return.

I refer to gains within (3) as **"TNR gains"**.

9.6.1 *Ordinary gains/losses*

Section 10A TCGA provides:

> (3) The gains and losses within this subsection are—
> (a) chargeable gains and losses that accrued to the taxpayer in the temporary period of non-residence,

Section 10A(3)(a) works because gains are in principle chargeable gains even if they accrue to a non-resident.

Section 87 gains are TNR gains, within 10A(3)(a) TCGA as they are chargeable gains, treated as accruing to the beneficiary under s.87, even if the beneficiary is non-resident.

However, s.10A(3)(a) does not catch s.86 or s.13 gains, as gains under these sections do *not* accrue to a non-resident. The sections only apply to a settlor or participator who is UK resident. Hence the drafter extends s.10A(3) to catch these gains. It was not necessary to do this for s.87.

For the interaction with sch 4C TCGA, see 52.22.2 (Trust within s.87).

9.6.2 *Section 13 gains*

In the absence of express provision, s.13 gains would not be TNR gains. Section 10A TCGA provides:

> (3) The gains and losses within this subsection are ...
>
> (b) chargeable gains that would be treated under section 13 as having accrued to the taxpayer in that period if the residence assumption were made...
>
> (4) The residence assumption is—
>
> (a) that the taxpayer had been resident in the UK for the tax year in which the gain or loss accrued to the company, or
>
> (b) if that tax year was a split year as respects the taxpayer, that the gain or loss had accrued to the company in the UK part of it.

9.6.3 *Section 13 losses*

In the absence of express provision, s.13 losses of a temporary non-resident would not be within the TNR rules, and would not be allowable. Section 10A TCGA provides:

> (3) The gains and losses within this subsection are ...
>
> (c) losses that would be allowable in the taxpayer's case under section 13(8) in that period if that assumption [the residence assumption] were made ...

Section 10A(3)(c) is needed because s.13 losses do not accrue to participators or settlors who are non-resident.

Section 10A TCGA provides:

> (7) To determine the losses mentioned in subsection (3)(c)—
>
> (a) calculate separately, for each tax year falling wholly or partly in the temporary period of non-residence, the portion of sum A that does not exceed sum B, and
>
> (b) add up all those portions.

(8) For the purposes of subsection (7)—
"sum A" is the aggregate of the losses that were not available in accordance with section 13(8) for reducing gains accruing to the taxpayer by virtue of section 13 in the relevant tax year, but would have been available if the residence assumption had been made, and "sum B" is the amount of the gains that did not accrue to the taxpayer by virtue of section 13 in that tax year but would have so accrued if that assumption had been made.

Section 13 losses are limited to s.13 gains. This is consistent with the usual rule for s.13 losses: see 53.26 (Loss accruing to non-resident company).

Careful timing of disposals is necessary to ensure that s.13 losses are not wasted.

9.6.4 *Section 86 gains*

In the absence of express provision, s.86 gains would not be TNR gains. Section 10A TCGA provides:

(3) The gains and losses within this subsection are ...
(d) chargeable gains that would be treated under section 86 as having accrued to the taxpayer in a tax year falling wholly in that period if the taxpayer had been resident in the United Kingdom for that year.

9.6.5 *TNR gains remitted during period of temporary non-residence*

Section 10A TCGA provides:

(9) If section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the taxpayer for the year of return, any foreign chargeable gains[9] falling within subsection (3) by virtue of paragraph (a) of that subsection that were remitted to the UK at any time in the temporary period of non-residence are to be treated as remitted to the UK in the period of return.

What about s.13 gains within s.10A(3)(b)?

A foreign domiciled settlor is not within s.86, so no particular exemption is needed for s.86 TNR gains, which fall within s.10A(3)(d).

---

9 Section 10A(11) incorporates the standard definition by reference: "In this section "foreign chargeable gains" has the meaning given by section 12(4)".

9.6.6 *Time limit for assessment*

Section 10AA TCGA provides:

> (5) Nothing in any enactment imposing any limit on the time within which an assessment to capital gains tax may be made prevents any assessment for the year of departure from being made in the taxpayer's case at any time before the end of the second anniversary of the 31 January next following the year of return (as defined in section 10A).

This copies the wording of the pre-2013 s.10A(7) TCGA, which was intended to deal with problems relating to the former ESC D2.[10] I do not think it is now needed, though it does no harm.

9.7 Gains subject to CGT on an arising basis

Section 10A TCGA provides:

> (5) But—
>
> (a) a gain is not within subsection (3) if, ignoring this section, the taxpayer is
>
> [i] chargeable to capital gains tax in respect of it
>
> [ii] (and could not cease to be so chargeable by making a claim under section 6 of TIOPA 2010), and
>
> (b) a loss is not within subsection (3) if the test in paragraph (a) would be met if it were a gain.

Para [i] sensibly disapplies the TNR rules where the temporarily non-resident individual is already subject to CGT. That may be:

(1) If the individual is UK-law UK resident and treaty non-UK resident but:
   (a) the treaty does not have a CG article.
   (b) the treaty CG article does not apply to the gain (eg UK land)
(2) If the individual is UK-law non-UK resident but carrying on a trade in the UK through a branch or agency. [11]

9.8 Post-departure acquisitions

Section 10AA(1) TCGA provides:

> (1) Section 10A(2) does not apply to a gain or loss accruing on the disposal by the taxpayer of an asset if—

---

10 See 9A.10 (Time limit for assessment).

11 See 49.8 (Non-resident trader with UK branch).

Four conditions must be satisfied.

9.8.1 *Acquisition post-departure*

The first condition is:

> (a) the asset was acquired by the taxpayer in the temporary period of non-residence,

9.8.2 *Exclusion following no gain/no loss transfers*

The next condition is:

> (b) it was so acquired otherwise than by means of a relevant disposal that by virtue of section 58, 73 or 258(4) is treated as having been a disposal on which neither a gain nor a loss accrued,

The sections referred to are:
Section 58 TCGA (transfers between spouses),
Section 73 TCGA (death of life tenant),
Section 258(4) TCGA (works of art).
In practice the first of these is the most important.
Section 10AA(2) TCGA defines "relevant disposal":

> "Relevant disposal" means a disposal of an asset acquired by the person making the disposal at a time when that person was resident in the UK and was not Treaty non-resident.

The drafter not used the term "Sole non-residence"; I assume only because the term is defined in Sch 45 FA 2013 and incorporating a definition by reference was more trouble than it was worth.

The test focuses on when the asset was originally acquired. There is still scope for planning for assets acquired when non-resident. Eg:
(1) H acquires an asset when non-resident.
(2) H returns to the UK.
(3) H and W become temporarily non-resident.
If H disposes of the asset, the gain is a TNR gain and taxed on H's return to the UK. But if H gives it to W, the gain on the disposal by W qualifies for post-departure acquisition relief.

9.8.3 *Exclusion for settled property*

The next condition is:

(c) the asset is not an interest created by or arising under a settlement

This prevents an avoidance scheme under which T might acquire an interest under a settlement with relevant income or trust gains, and then sell the interest tax free.

9.8.4 *Exclusion following roll-over transfers*

The next condition is:

(d) the amount or value of the consideration for the acquisition of the asset by the taxpayer does not fall, by reference to any relevant disposal, to be treated as reduced under section 23(4)(b) or (5)(b), 152(1)(b), 153(1)(b), 162(3)(b) or 247(2)(b) or (3)(b).

The sections referred to are:
Section 23 TCGA (compensation and insurance)
Sections 152 and 153 TCGA (business assets roll-over relief),
Section 162 TCGA (transfer of business to a company)
Section 247 TCGA (compulsory acquisition).

9.8.5 *Exclusion following reorganisation, etc*

Section 10AA, TCGA provides:

(3) Subsection (1) does not apply if—
(a) the gain is one that (ignoring section 10A) would fall to be treated by virtue of section 116(10) or (11), 134 or 154(2) or (4) as accruing on the disposal of the whole or part of another asset, and
(b) that other asset meets the requirements of paragraphs (a) to (d) of subsection (1), but the asset in respect of which the gain actually accrued or would actually accrue does not.

The sections referred to are:
Section 116 TCGA (new asset is a qualifying corporate bond)
Section 134 TCGA (compensation stock)
Section 154 TCGA (depreciating assets)

9.8.6 *Interaction with share pooling rules*

The CIOT raise an interesting question:

Suppose an individual were to own 100 shares in a limited company. The individual becomes non-resident and, whilst non-resident,

> purchases in the market a further 200 shares (of the same class) in the same company.
> Whilst non-resident, the individual then disposes of the entire shareholding at a gain.
> Under TCGA 1992 section 10A, assets owned at the date of departure which are then disposed of whilst non-resident are treated as disposed of in the year of return if the individual is away for fewer than five tax years. Section 10A therefore catches the disposal of the 100 shares. The policy behind section 10A would not therefore seek to charge tax on any gain arising in respect of the 200 shares acquired, held and disposed of whilst the individual was non-resident. This would ordinarily be provided for by section 10A(3)(a). However, section 104 provides that shares (and other fungible assets) are treated as a single asset 'growing or diminishing' as the case may be. Therefore, it would appear that section 104 TCGA treats the 200 shares as if they were part of the same asset which previously consisted of only 100 shares. That asset is one that was held prior to the individual's departure (and therefore falls outside the exception for post-departure acquisitions.[12]

9.9 DTA override

Most DTAs with a capital gains article broadly adopt the OECD Model form:

> Gains from the alienation of any property, other than [specified exceptions] shall be taxable only in the Contracting State of which the alienator is a resident.

Gains accruing to an individual when treaty-resident in a foreign state (in the statutory terminology, treaty non-resident) would in principle qualify for this relief even if within the scope of s.10A. Section 10AA(4) TCGA provides a treaty override:

> Nothing in any double taxation relief arrangements is to be read as preventing the taxpayer from being chargeable to capital gains tax in respect of any chargeable gains treated under section 10A as accruing to the taxpayer in the period of return (or as preventing a charge to that tax from arising as a result).[13]

---

12 *http://www.tax.org.uk/Resources/CIOT/Documents/2012/10/121011_s10A_CIOT.pdf*

13 I would be grateful to any reader who could explain why the words in brackets are needed.

This constitutes a breach of treaties in OECD Model form.[14] However the intention of Parliament is clear and that prevails over the treaty.[15]

9.9.1 *Foreign tax credit relief*

For the pre-2013 TNR rules, EN FB 2005 provided:

> The application of section 10A in relation to an individual does not prevent the individual obtaining relief for foreign tax paid in respect of chargeable gains which are treated as arising to him or her in the year of return.

The same should apply to the post-2013 rules.

9.10 Interaction of TNR rules and deadline for entrepreneurs' relief claim

The CGT liaison group (HMRC and the tax professional bodies) has issued a guidance note which provides:[16]

> **Technical tax analysis put forward for HMRC comment**
> 49 Under s.10A TCGA 1992 the gain will be treated as accruing to a taxpayer in the year of return. The view taken is that the original disposal date applies for ER purposes. As s.169M TCGA requires an election for ER to be made before the first anniversary of 31 January following the tax year in which the disposal takes place, it is likely that the individual will be out of time in making an ER claim if he waits until he has resumed UK residence. The advice is therefore to make a protective claim...
> **HMRC response ...**
> 51 ER is only available on the making of a claim and such claim must be made within the statutory time limit which is set by reference to the date of the qualifying disposal (see s.169M(3) TCGA 1992). It is for the taxpayer to consider whether to submit a protective claim for ER within this time period.

9.11 Interaction of s.86 TNR charge and s.87

In the absence of relief, gains accruing to the trustees during the settlor's

---

14 This is recognised in some treaties, which have an additional provision specifically to authorise a s.10A charge (and any foreign state's equivalent). See 9.24 (Recent departure non-residence rules).

15 *Padmore (No 2) v IRC* 73 TC 470.

16 *http://www.tax.org.uk/Resources/CIOT/Documents/2012/02/120213%20ER%20Technical%20Questions%20and%20HMRC%20response.pdf*

period of temporary non-residence may be:

(1) s.86 gains of the settlor in the year of return, and

(2) s.2(2) amounts (trust gains) which may effectively be charged on beneficiaries of the settlement who receive capital payments.

Section 86A TCGA provides relief against double taxation

Section 86A TCGA provides:

> (1) Subsection (3) applies if—
>
> (a) chargeable gains of an amount equal to the amount referred to in section 86(1)(e) for a tax year ("year A") are treated under section 10A as accruing to a settlor under section 86 in the period of return,

"Year A" is one of the temporary non-resident years. The label is not ideal, but I adopt it as it is easiest to follow the statutory terminology.

> (b) there are amounts on which beneficiaries of the settlement are charged to tax under section 87 or 89(2) for one or more tax years, each of which is earlier than the year of return, and
>
> (c) those amounts are in respect of matched capital payments received by the beneficiaries.

It is considered that non-resident beneficiaries are not "charged to tax" unless they are temporary non-resident beneficiaries who have returned to the UK before the settlor's year of return. Remittance basis beneficiaries are "charged to tax" even if nothing is remitted.

> (2) A "matched" capital payment is a capital payment, all or part of which is matched under section 87A with the section 2(2) amount for year A.

9.11.1 *The reliefs*

There are three reliefs. Firstly, s.86A(3)(4) TCGA provides s.87 gains charged to tax are deducted from the settlor's s.86 gains:

> (3) The amount of the chargeable gains mentioned in subsection (1)(a) for year A that are treated under section 10A as accruing to the settlor under section 86 in the period of return is to be reduced by the appropriate amount.
>
> (4) The appropriate amount is—
>
> (a) the sum of the amounts mentioned in subsection (1)(c) to the extent that the matched capital payments are matched under section 87A with the section 2(2) amount for year A, or

(b) if the property comprised in the settlement has at any time included property not originating from the settlor, so much (if any) of that sum as, on a just and reasonable apportionment, is properly referable to the settlor.

Section 86 gains which are brought into charge are deducted from s.2(2) amounts. That follows the usual rule in s.87(4)(b) TCGA.[17] The legislation has separate rules for the year of return and for earlier years (why?). Section 86A(5) deals with the year of return:

(5) If a reduction falls to be made under subsection (3) for the year of return, the deduction to be made in accordance with section 87(4)(b) for the settlement for that year must not be made until—

(a) all the reductions to be made under subsection (3) for that year for each settlor have been made, and

(b) those reductions are to be made starting with the year immediately preceding the year of return and working backwards.

Lastly, s.86A(6)(7) deals with the earlier years:

(6) Subsection (7) applies if, with respect to year A, an amount remains to be treated under section 10A as accruing to any of the settlors in the period of return after having made the reductions under subsection (3) with respect to year A.

(7) The aggregate of the amounts remaining to be so treated (for all of the settlors) is to be applied in reducing so much of the section 2(2) amount for year A as has not already been matched with a capital payment under section 87A for any year prior to the year of return (but not so as to reduce the section 2(2) amount below zero).

Section 86A(8) TCGA provides definitions needed for a trust with multiple settlors:

(8) In this section—

(a) "the settlement" means the settlement in relation to which the settlor mentioned in subsection (1)(a) is a settlor,

(b) a reference to "the settlors" or "each settlor" is to the settlors or each settlor in relation to the settlement,

(c) "period of return" and "year of return" have the same meanings as in section 10A, and

17 See 51.5.2 (Section 86 gains deducted from s.2(2) amount).

(d) paragraph 8 of Schedule 5 applies in construing the reference to property originating from the settlor.

9.12 TNR dividend provisions: introduction

The position can be summarised in a table:

Section	Income type: Relief affected	TNR term
UK dividends		
401C ITTOIA	dividend/distribution: DT relief	Relevant distribution
413A ITTOIA	stock dividend- *not discussed here*	Relevant stock dividend income
420 ITTOIA	debt write-off- *not discussed here*	
812A ITA	div/distrib'n: s.811 non-residents IT relief	TNR income (my terminology)
Foreign dividends		
408A ITTOIA	Foreign dividend	TNR income (my terminology)
689A ITTOIA	Foreign distribution	TNR income (my terminology)

I refer to the provisions together as the **"TNR dividend provisions**"

9.13 TNR dividend provisions: terminology

Some common terminology is used throughout the TNR dividend provisions.

9.13.1 *"Participator" and "associate"*

These terms have their standard meanings: s.401C(12) ITTOIA provides:

> In this section ...
> "associate" and "participator" have the same meanings as in Part 10 of CTA 2010 (see sections 448 and 454);

This definition only applies for s.401C but the same definition is repeated throughout the TNR dividend provision: see s.408A(4)(a), 689A(4)(a) ITTOIA

For discussion, see 85.5 (Associates); 85.17 (Definition of "Participator").

9.13.2 *"Material" participator*

Section 401C(12) ITTOIA provides:

> In this section ...
> "material participator" means a participator who has a material interest in the company, as defined in section 457 of CTA 2010;

That definition only applies for s.401C but the same definition is repeated throughout the TNR dividend provisions: see s.408A(4)(b), 689A(4)(b)

ITTOIA

Our journey takes us to s.457 CTA 2010, which provides:

> (1) A person has a material interest in a company for the purposes of section 456 if condition A or B is met.
> (2) Condition A is that the person (with or without one or more associates) or any associate of that person (with or without one or more other such associates) is—
> (a) the beneficial owner of, or
> (b) directly or indirectly able to control,
> more than 5% of the ordinary share capital of the company.
> (3) Condition B is that, in the case of a close company, the person (with or without one or more associates) or any associate of that person (with or without one or more other such associates) possesses or is entitled to acquire such rights as would—
> (a) in the event of the winding up of the company, or
> (b) in any other circumstances,
> give an entitlement to receive more than 5% of the assets which would then be available for distribution among the participators.

The net is cast wider than is necessary to deal with TNR avoidance. Contrast s.13 TCGA, which started with a 5% de minimis limit, later increased to 10% and now set at an appropriate 25%.

9.13.3 *"Relevant time"*

Section 401C(12) ITTOIA provides:

> In this section ...
> "relevant time" means—
> (a) any time in the year of departure or, if the year of departure is a split year as respects the individual, the UK part of that year, or
> (b) any time in one or more of the 3 tax years preceding that year;

That definition only applies for s.401C but the same definition is repeated throughout the TNR dividend provisions: see s.408A(4)(c), 689A(4)(c)

9.14 UK distributions: UK-law UK res./treaty non-res. (treaty users)

9.14.1 *"Relevant distribution" (TNR income)*

This is the key term. Section 401C(6) ITTOIA provides:

> For the purposes of this section, a dividend or other distribution is a "relevant distribution" if—

(a) it is a dividend or other distribution of a close company, and
(b) it is made or treated as made to the individual because the individual was at a relevant time—
    (i) a material participator in the company,...

9.14.2 *The causation test*

There are two requirements to satisfy condition (b)(i):

(1) The individual was a material participator in the company at a relevant time. That is relatively straightforward. If an individual only purchases shares after departure, the distribution on the shares is not a relevant distribution.
(2) The dividend was made to the individual *because* the individual was a material participator at the relevant time.

Requirement (2) is a causation test, and causation is not straightforward. Bramwell says:

> Take the most obvious case: a shareholder in a close company departs from the UK in Year 1 ("the year of departure") for a period of temporary non-residence.
> In Year 2 (a year of non-residence) a dividend is declared and paid on the shares he owned in the year of departure and which he continues to own.
> The issue is whether the income arises to him because he was a material participator in the company at "a relevant time" namely, at a time in the year of departure. In fact the income arises to him because he owns the shares when the dividend is declared in Year 2.[18]

It is correct that the income arises to the shareholder because they own shares in year 2 when the dividend is declared. But the reason they own shares in that year is that they held the shares in year 1 (the year of departure) and have retained them. The causation test ought to be applied in the context of the purpose of the provisions.[19] So in the context it is suggested that the causation condition in (6)(b)(i) is satisfied.

Similarly, if T holds shares before departure, and by a reorganisation becomes entitled to other shares, then a distribution on the other shares is

---

18 Bramwell on Corporation Tax para E2.3.7A.

19 On causation, a large topic, the starting point is Hart and Honoré Causation in the Law, and Hoffmann's judgements in *Fairchild v Glenhaven* [2003] 1 AC 32 and *Chester v Afshar* [2005] 1 AC 134. In short: causation tests ought to be applied flexibly and in a manner sensitive to the context or purpose of the provisions.

in principle a relevant distribution.

What if T holds shares in the relevant period and:

(1) T sells those shares when non-resident and T repurchases shares in the same company; or

(2) T sells the shares to his spouse?

It is suggested that the causation condition is met if the arrangement is designed to avoid the rules.

One might have expected definition of relevant distribution to provide:

> A distribution is a relevant distribution if it arises in respect of shares held by the same person (or by a connected person) at any time in the relevant period.

That would be too wide: it would catch all cases where the individual had bought and sold and later bought the same shares in a four year period. the work involved in keeping track could be considerable. At the cost of some uncertainty, the causation wording allows some innocent arrangements to escape, and catches some arrangements designed to avoid the rules.

9.14.3 *Settlor-interested trusts*

The settlor of a settlor-interested trust is taxed on trust income but would not be caught by s.401C(6)(b)(i) as the settlor is not a participator. This is caught by s.401C(6)(b)(ii); it is necessary to read this in the context of the whole of subsection (6):

> (6) For the purposes of this section, a dividend or other distribution is a "relevant distribution" if—
>
> (a) it is a dividend or other distribution of a close company, and
>
> (b) it is made or treated as made to the individual because the individual was at a relevant time ...
>
> (ii) an associate of a material participator in the company.

This could apply to the settlor of a settlor-interested trust where the trustees are the material participator. The settlor is an associate of the trustees; it may in principle be said that the dividend is treated as made to the settlor because he was an associate so the causation condition in (6)(b)(ii) may be satisfied.

9.14.4 *The rule*

In the absence of a specific rule, a relevant distribution would qualify for

DT relief in the hands of a treaty user. Treaty relief is in art.10 OECD Model.[20] It is easier to follow if rewritten to specify which states is which, in the present context:

> 1. Dividends paid by a company which is a resident of a Contracting State [the UK] to a resident of the other [the foreign] Contracting State [may be taxed in that other [the foreign] State.
> 2. However, such dividends may also be taxed in the Contracting State of which the company paying the dividends is a resident [in the UK] and according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other [the foreign] Contracting State, the tax so charged shall not exceed:
> a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25 per cent of the capital of the company paying the dividends;
> b) 15 per cent of the gross amount of the dividends in all other cases.

Equipped with the definition of relevant distribution, and with this DT relief in mind, we can at last turn to the TNR rule itself. Section 401C ITTOIA provides:

> (1) This section applies if—
> (a) an individual is temporarily non-resident,
> (b) a relevant distribution is made or treated as made to the individual in the temporary period of non-residence,
> (c) the tax year in which it is made or treated as made ("the distribution year") is a tax year for which the individual is UK resident, and
> (d) the amount of income tax charged on the distribution under this Chapter is less than it would have been if the existence of double taxation relief arrangements were disregarded.

The rules distinguish between the year of return and earlier temporary non-resident years. For the earlier non-resident years, s.401C ITTOIA provides:

> (2) Subsections (3) and (4) have effect in cases where the distribution year is not the year of return.
> (3) The total income (see Step 1 of the calculation in section 23 of ITA 2007) on which the individual is charged to income tax for the year of

20 See 20.7 (DT relief for dividend income).

return is to be increased by an amount equal to the amount on which tax would be charged under this Chapter in respect of the distribution disregarding any double taxation relief arrangements.
(4) But the notional UK tax[21] on that distribution is to be allowed as a credit against the individual's liability to income tax for the year of return under Step 6 of the calculation in section 23.

Does this work?

For the year of return, s.401C(5) ITTOIA provides:

> If the distribution year is the year of return, the tax charged under this Chapter in respect of the relevant distribution is to be charged and assessed without regard to the existence of double taxation relief arrangements.

Why is there a separate rule for the year of return?

9.15 Relief for post-departure trade profits

Section 401C(7) ITTOIA provides:

> But a dividend or other distribution within subsection (6) in the form of a cash dividend is not a "relevant distribution" to the extent that the dividend is paid in respect of post-departure trade profits.

The relief applies only to a cash dividend. It is difficult to see why, but perhaps it will not often matter.

9.15.1 *"Post-departure trade profits"*

Section 401C ITTOIA provides:

> (8) "Post-departure trade profits" are—
> (a) trade profits[22] of the close company arising in an accounting period that begins after the start of the temporary period of non-residence, and
> (b) so much of any trade profits of the close company arising in an accounting period that straddles the start of that temporary

21 Section 401C(10) ITTOIA provides: "The "notional UK tax" on the relevant distribution is so much of the income tax paid by the individual for the distribution year as is attributable on a just and reasonable basis to the relevant distribution." The tax is not "notional", it is payable.

22 Section 401C(12) ITTOIA provides: "In this section... "trade profits of the close company" means the profits of any trade carried on by the close company, as calculated in accordance with Part 3 of CTA 2009 (trading income)."

period as is attributable (on a just and reasonable basis) to a time after the start of that temporary period.

(9) The extent to which a dividend is paid in respect of post-departure trade profits is to be determined on a just and reasonable basis.

9.16 Foreign dividends received by temporary non-resident

Section 408A ITTOIA provides:

(1) This section applies if an individual is temporarily non-resident.

(2) Dividends within subsection (3) are to be treated for the purposes of this Chapter as if they were received by the individual, or as if the individual became entitled to them, in the period of return.

I refer to dividends within (3) as **"TNR dividends"**.

9.16.1 *TNR dividends*

Section 408A(3) ITTOIA provides:

A dividend is within this subsection if—

(a) the individual receives or becomes entitled to it in the temporary period of non-residence,

(b) it is a dividend of a company that would be a close company if the company were UK resident,

(c) the individual receives or becomes entitled to it by virtue of[23] being at a relevant time—

(i) a material participator in the company, or

(ii) an associate of a material participator in the company, and

(d) ignoring this section, the individual—

(i) is not liable for tax under this Chapter in respect of the dividend, but

(ii) would have been so liable if the individual had received the dividend, or become entitled to it, in the period of return.

Section 408A(4) ITTOIA provides:

For the purposes of subsection (3) ...

(d) paragraph (d)(i) includes a case where the individual could be relieved of liability on the making of a claim under section 6 of TIOPA 2010 (double taxation relief), even if no claim is in fact

23 The drafter has used "by virtue of" where s.401C used "because". I guess that the drafter started with the traditional legal language, and someone later remembered the plain legal English aspect, but did not reword the provisions consistently.

made.

9.16.2 *Foreign dividends remitted in period of temporary non-residence*

Section 408A(5) ITTOIA provides:

> If section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for the year of return, any dividend within subsection (3) that was remitted to the UK in the temporary period of non-residence is to be treated as remitted to the UK in the period of return.

This is the standard formula.

9.16.3 *Relief for post-departure trade profits*

Section 408A ITTOIA provides:

> (6) This section does not apply to a dividend within subsection (3) to the extent that it is paid in respect of post-departure trade profits.
> (7) "Post-departure trade profits" are—
> (a) trade profits of the company arising in an accounting period that begins after the start of the temporary period of non-residence, and
> (b) so much of any trade profits of the company arising in an accounting period that straddles the start of that temporary period as is attributable (on a just and reasonable basis) to a time after the start of that temporary period.
> (8) The extent to which a dividend is paid in respect of post-departure trade profits is to be determined on a just and reasonable basis.

This is the standard formula. Section 408A ITTOIA provides:

> (9) [This deals with interaction with SIP regime; not discussed here].
> (10) In this section—
> "remitted to the UK" has the meaning given in Chapter A1 of Part 14 of ITA 2007;
> "trade profits of the company" means the profits of any trade carried on by the company, as they would be calculated in accordance with Part 3 of CTA 2009 (trading income) if the company were UK resident."

9.17 Foreign distributions received by temporary non-resident

Section 689A ITTOIA provides:

> (1) This section applies if an individual is temporarily non-resident.
> (2) Distributions within subsection (3) are to be treated for the purposes of this Chapter as if they had been received by the individual, or as if the

individual had become entitled to them, in the period of return.

I refer to distributions within (3) as **"TNR distributions"**.

9.17.1 *TNR distributions*

Section 689A(3) ITTOIA provides:

> A distribution is within this subsection if—
> (a) the individual receives or becomes entitled to it in the temporary period of non-residence,
> (b) it is a distribution of a company
> [i] that is a close company or
> [ii] that would be a close company if the company were UK resident,
> (c) the individual receives or becomes entitled to the distribution by virtue of being at a relevant time—
> (i) a material participator in the company, or
> (ii) an associate of a material participator in the company, and
> (d) ignoring this section the individual-
> (i) is not liable for tax under this Chapter in respect of the distribution, but
> (ii) would have been so liable if the individual had received the distribution, or become entitled to it, in the period of return.

At first sight the reference in (b)[i] to a distribution of a *close* company is odd. The individual will always be liable to tax in respect of the distribution,[24] so the condition in (d)(i) will never be satisfied. The answer is in s.689A(4) ITTOIA provides:

> For the purposes of subsection ...
> (d) paragraph (d)(i) includes a case where the individual could be relieved of liability on the making of a claim under section 6 of TIOPA 2010 (double taxation relief), even if no claim is in fact made.

Treaty relief in OECD model form does not

9.17.2 *Distributions remitted during temporary period of non-residence*

Section 689A(5) ITTOIA provides:

---

24 See 20.2 (Income from UK resident company).

If section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for the year of return, any distribution within subsection (3) that is relevant foreign income and is remitted to the UK in the temporary period of non-residence is to be treated as remitted to the UK in the period of return.

This is the standard formula: see 9.16.2 (Foreign dividends remitted during period of temporary non-residence).

9.18 Section 811 non-residents income tax relief

Section 812A ITA provides:

(1) This section applies if—
- (a) an individual is temporarily non-resident,
- (b) the individual's liability to income tax for a tax year is limited under section 811,
- (c) that tax year ("the non-resident year") falls within the temporary period of non-residence, and
- (d) the individual's income for that tax year includes relevant investment income.

(2) The total income (see Step 1 of the calculation in section 23) on which the individual is charged to income tax for the year of return is to be increased by an amount equal to the amount of that relevant investment income.

(3) But the notional UK tax on that relevant investment income is to be allowed as a credit against the individual's liability to income tax for the year of return under Step 6 of the calculation in section 23.

9.18.1 *"Relevant investment income"*

Section 812A ITA provides:

(4) Income is "relevant investment income" if—
- (a) it is chargeable under Chapter 3 or 5 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies and stock dividends from UK resident companies),
- (b) the distributing company is a close company, and
- (c) the income arises or is treated as arising to the individual because the individual was at a relevant time—
  - (i) a material participator in that company, or
  - (ii) an associate of a material participator in the company.

9.18.2 *Relief for post-departure trade profits*

Section 812A ITA provides:

(5) But income within subsection (4) in the form of a cash or stock dividend is not "relevant investment income" to the extent that the dividend is paid, or the share capital is issued, in respect of post-departure trade profits.

(6) "Post-departure trade profits" are—

(a) trade profits of the distributing company arising in an accounting period that begins after the start of the temporary period of non-residence, and

(b) so much of any trade profits of the distributing company arising in an accounting period that straddles the start of that temporary period as is attributable (on a just and reasonable basis) to a time after the start of that temporary period.

(7) The "notional UK tax" on relevant investment income is—

(a) the total of any sums in respect of that income that were included within amount A in determining the limit under section 811, less

(b) any credit for foreign tax paid in respect of that income that was allowed under Chapter 2 of Part 2 of TIOPA 2010 against the individual's liability to income tax for the non-resident year.

(8) The following matters are to be determined on a just and reasonable basis—

(a) the extent to which a dividend is paid, or share capital is issued, in respect of post-departure trade profits, and

(b) the extent to which a sum included within amount A is a sum in respect of relevant investment income.

(9) Nothing in any double taxation arrangements is to be read as preventing the individual from being chargeable to income tax by virtue of this section (or as preventing a charge to that tax from arising as a result)...

9.19 Gains from policies and contracts

Section 465B ITTOIA provides:

(1) This section applies if an individual is temporarily non-resident.

(2) The individual is liable for tax under this Chapter for the year of return in respect of any gain that meets the conditions in subsection (3).

(3) The conditions are—

(a) the gain arose in the temporary period of non-residence,

(b) it arose from a policy issued in respect of an insurance made, or from a contract made, before the start of that period,

(c) the chargeable event giving rise to it was neither a death nor a chargeable event treated as occurring under section 525(2),

(d) no-one is liable under section 466 or 467 in respect of the gain,
(e) no-one is liable by virtue of section 468 for either the year of return or an earlier tax year as a result of the gain, and
(f) the individual would have been liable under section 465 in respect of the gain, applying the assumptions in subsection (4).

(4) The assumptions are—
(a) the individual was UK resident for the tax year in which the gain arose, and
(b) that tax year was not a split year as respects the individual.

(5) If the individual is liable by virtue of subsection (2) in respect of a gain—
(a) the amount of the gain in respect of which he or she is liable is the amount on which tax would have been charged under this Chapter applying the assumptions in subsection (4), but
(b) in determining that amount, section 528 must be applied ignoring those assumptions.

(6) That amount is treated as income of the individual for the year of return.

(7) If the gain arises from a policy or contract treated under section 473A as a single policy or contract, the date, for the purposes of subsection (3)(b), on which the insurance or contract is made is the date on which the first insurance is made in respect of which the connected policies were issued or, as the case may be, the date on which the first of the connected contracts is made.

(8) This section does not apply to a gain if—
(a) in relation to the policy or contract from which the gain arises, a terminal event occurs in the temporary period of non-residence or in the period of return,
(b) the chargeable event giving rise to the gain occurred before that terminal event,
(c) the chargeable event giving rise to the gain is one that is treated as occurring under section 509(1) as a result of the application of section 498(1)(a),
(d) section 498(1)(a) applies other than by virtue of section 500, and
(e) a person (whether or not the individual) is liable for tax under this Chapter (including by virtue of this section) in respect of any gain resulting from the terminal event.

9.19.1 *DT relief overridden*

Section 465B ITTOIA provides:

(9) Nothing in any double taxation relief arrangements is to be read as

preventing the individual from being liable for tax under this Chapter in respect of any gain in respect of which the individual is liable for tax by virtue of subsection (2) (or as preventing a charge to tax on that gain from arising under this Chapter).
(11) In this section—
"terminal event" means an event mentioned in section 499(3);...

9.20 Offshore funds

The regulations were rewritten by the Temporary Non-Residence (Miscellaneous Amendments) Regulations 2013.

Regulation 2 of these regulations provides:

2. The amendments made...
(b) by regulation 4 have effect for the purposes of income tax for the tax year 2013-14 or any subsequent tax year.

This is unlike the FA 2013 commencement rule, which only applies if the *year of departure* is 2013/14 or later.[25] The new offshore fund rules apply to OIGs from 2013/14 regardless of the year of departure.

Regulation 23 OFTR provides:

(1) This regulation applies where an individual ("the taxpayer") is temporarily non-resident.
(2) The taxpayer is chargeable to income tax as if offshore income gains within paragraph (3) were offshore income gains arising to the taxpayer in the period of return.

I refer to OIGs within (3) as **"TNR OIGs"**.

9.20.1 *TNR OIGs*

Regulation 23 OFTR provides:

(3) The offshore income gains within this paragraph are those that—
(a) arise to the taxpayer in the temporary period of non-residence, and
(b) would be treated under section 13 of TCGA 1992 (attribution of gains to members of non-resident companies) as it applies to offshore income gains by virtue of regulation 24 as having arisen to the taxpayer in that period if the residence assumption were made.
(4) The residence assumption is—

25 See 9.1 (Temporary non-residence – Introduction).

(a) that the taxpayer had been resident in the UK for the tax year in which the offshore income gain arose to the company, or
(b) if that tax year was a split year as respects the taxpayer, that offshore income gain had arisen to the company in the UK part of it.

This is the same as s.10A TCGA, except (consistently with the OIG regime) there is no relief for losses and no provision dealing with s.86.

9.20.2 *OIGs of non-residents subject to CGT on an arising basis*

Regulation 23 OFTR provides:

> (5) But a gain is not within paragraph (3) if, ignoring this regulation, the taxpayer is chargeable to income tax in respect of it (and could not cease to be so chargeable by making a claim under section 6 of the Taxation (International and Other Provisions) Act 2010).

This sensibly disapplies the TNR rules where the temporarily non-resident individual is already subject to IT on the OIG. That may be:
(1) If the individual is UK-law UK resident and treaty-resident in a state whose treaty does not have an article giving relief from OIGs.
(2) If the individual is UK-law non-UK resident but carrying on a trade in the UK through a branch or agency. [26]

9.20.3 *TNR OIGs remitted during period of temporary non-residence*

Regulation 23 OFTR provides:

> (7) If section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the taxpayer for the year of return, any offshore income gains to which regulation 19(2) applies falling within paragraph (3) of this regulation by virtue of sub-paragraph (a) of that paragraph that were remitted to the UK at any time in the temporary period of non-residence are to be treated as remitted to the UK in the period of return.

What about gains within reg 23(3)(b)?

9.20.4 *Post-departure acquisitions*

Regulation 23A(1) OFTR deals with post-departure acquisitions:

> (1) Regulation 23(2) does not apply to an offshore income gain accruing

---

26 This is only theoretical: see 35.9 (OIG non-residence defence).

on the disposal by the taxpayer of an asset if –

(a) the asset was acquired by the taxpayer in the temporary period of non-residence,

(b) it was so acquired otherwise than by means of a relevant disposal[27] that by virtue of section 58, 73 or 258(4) TCGA 1992 is treated as having been a disposal on which neither a gain nor a loss accrued, and

(c) the asset is not an interest created by or arising under a settlement.

See 9.8 (Post-departure acquisitions).

9.20.5 *DTA override*

Regulation 23A(2) OFTR provides the DTA override:

> (2) Nothing in any double taxation relief arrangements is to be read as preventing the taxpayer from being chargeable to income tax in respect of any offshore income gains treated under regulation 23 as accruing to the taxpayer in the period of return (or as preventing a charge to that tax from arising as a result).

See 9.9 (DTA override).

9.20.6 *Time limit for assessment*

Regulation 23A(3) provides the (unnecessary) time extension for assessment:

> (3) Nothing in any enactment imposing any limit on the time within which an assessment to income tax may be made prevents any assessment for the year of departure from being made in the taxpayer's case at any time before the end of the second anniversary of the 31 January next following the year of return.

See 9.6.6 (Time limit for assessment).

9.21 Income not caught by TNR rules

The following types of income arising during the temporary period of non-residence are not caught by TNR rules

(1) Income of discretionary trusts (annual payments)

(2) Section 720 income (transferors)

---

27 Defined by reference in reg 23A(4) "In this regulation (a) "relevant disposal" has the meaning given in section 10AA(2) of TCGA 1992".

(3) discretionary trust income

In the case of a settlor-interested trust, UK source dividend income would be caught, but other types of income would not be.

It would be bold to plan on this continuing to be the position in the future.

9.22 Pre-departure income

Section 832A ITTOIA provides:

> (1) This section applies if an individual is temporarily non-resident.
> (2) Treat any of the individual's relevant foreign income within subsection (3) that is remitted to the UK in the temporary period of non-residence as remitted to the United Kingdom in the period of return.

I refer to income within (3) as **"pre-departure RFI"**.

9.22.1 *Pre-departure RFI*

Section 832A ITTOIA provides:

> (3) Relevant foreign income is within this subsection if—
> (a) it is relevant foreign income for the UK part of the year of departure or an earlier tax year, and
> (b) section 832 applies to it.

So we need to refer back to s.832(1) ITTOIA:

> This section applies to an individual's relevant foreign income for a tax year ("the relevant foreign income") if section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year.

This is intended to apply to a temporary non-resident who is UK-law non-UK resident and remits pre-departure RFI[28] during the temporary period of non-residence.

It is not needed where a temporary non-resident is UK resident and domestic law non-resident and remits pre-departure RFI during the temporary period of non-residence, as treaties do not provide relief in this

---

28 That is, RFI which:
(1) is taxed on a remittance basis, ie accruing to a remittance basis taxpayer while the individual was UK resident; and
(2) which was not remitted prior to departure (so was not subject to tax before departure).

situation, so tax planning of this kind was not possible. Nevertheless s.832A does apply in this case.

The drafter may perhaps have thought that this planning was possible, or may have introduced the rule unintentionally by copying across in s.832A the s.10A TCGA rules which were designed for a different situation.

Income arising after the year of departure is not caught by this section. What about pre-ITTOIA income to which s.832 does not apply?

9.22.2 *Just and reasonable apportionment*

Section 832A ITTOIA provides:

> (4) Any apportionment required for the purposes of subsection (3)(a) is to be done on a just and reasonable basis.

9.22.3 *DTA override*

Section 832A ITTOIA provides:

> (5) Nothing in any double taxation relief arrangements is to be read as preventing the individual from being chargeable to income tax in respect of any relevant foreign income treated by virtue of this section as remitted to the UK in the period of return (or as preventing a charge to that tax from arising as a result).

This is based on a misconception that DT relief may apply in this case.

9.22.4 *HMRC examples*

RDR3 gives a straightforward example:

Example 46 (Marie)
Marie returned to the UK during the tax year 2018–19 after a period of residence abroad.
She originally left the UK to become resident abroad on 2 September 2013 (end of period A) and so her year of departure was 2013–14. She had been resident in the UK for the seven years before her departure and claimed the remittance basis in those years.
While Marie was resident abroad she remitted to the UK the following relevant foreign income (RFI):
- £15,000 RFI from 2009–10 remitted in 2014–15
- £18,000 RFI from 2010–11 remitted in 2014–15
- £18,000 RFI from 2011–12 remitted in 2015–16
- £20,000 RFI from 2012–13 remitted in 2016–17

Total £71,000

As she was not resident in the UK, this income was not taxed when remitted here.

On her return to the UK on 1 June 2018 (the beginning of the UK part of split year 2018-19), Marie is within the special rules because her period of temporary non-residence was less than five years. She will be liable to UK tax on these earlier remittances which took place when she was temporarily non-resident. They will be chargeable to UK tax in 2018-19, the tax year of her return.

9.23 Pre-departure gains

What is the position if a temporary non-resident remits pre-departure gains to the UK (ie gains which accrued when solely UK resident)? Section 12 TCGA provides:

> (1) This section applies to foreign chargeable gains accruing to an individual in a tax year ("the foreign chargeable gains") if—
>
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
>
> (b) the individual is not domiciled in the United Kingdom in that year.
>
> (2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the United Kingdom.

The gains are deemed to accrue when remitted. This deeming then brings into effect s.10A TCGA:

> (1) This section applies if an individual ("the taxpayer") is temporarily non-resident.
>
> (2) The taxpayer is chargeable to capital gains tax as if gains and losses within subsection (3) were chargeable gains ... accruing to the taxpayer in the period of return.
>
> (3) The gains and losses within this subsection are—
>
> (a) chargeable gains ... that accrued to the taxpayer in the temporary period of non-residence,

The pre-departure gains did not accrue to the taxpayer in the temporary period of non-residence, but they are deemed to have done so, so they are further deemed to accrue in the year of return.

9.24 Recent departure non-resident rules

Some DTAs impose a short-term non-residence rule in their CGT article.

This is not in the OECD model treaty, but about one third of UK treaties have a restriction of this kind.

Treaties are easier to follow if one notes in the text which contracting state is which. A variety of wordings are used and Italy will serve as an example. We are considering a claim for UK CGT relief by a person treaty resident in Italy. Article 13 of the UK/Italy DTA provides:

> (4) Gains from the alienation of any property other than that referred to in the preceding paragraphs of this Article shall be taxable only in the Contracting State of which the alienator is a resident [Italy]

This is (more or less) the OECD model form; the restriction then follows:

> (5) The provisions of paragraph (4) of this Article shall not affect the right of a Contracting State [UK] to levy according to its law a tax on gains from the alienation of any property derived by an individual who:
>
> (a) is a resident of the other Contracting State [Italy]; and
>
> (b) has been a resident of the first-mentioned Contracting State [UK] at any time during the five years immediately preceding the alienation of the property; and
>
> (c) is not subject to tax on those gains in the other Contracting State [Italy]

This is not strictly a *temporary* non-residence rule as it applies to those who do not return to the UK, but the idea is similar.

The IHT s.267 deemed domicile rule can be considered in part a similar short term non-residence rule, since its effect is that a person who ceases to be UK resident (or domiciled) continues for a 3 or 4 year period to be regarded as UK domiciled for IHT purposes and so within the scope of IHT.

9.25 Planning

There is scope for planning for types of income not caught by the TNR rules. For instance, payments of up front interest may be possible.

Remittance basis taxpayers must take care not to mix foreign income/gains of the non-resident period with other sums which can be remitted tax free.

Careful timing is needed for gifts to charity: normally avoid gifts during the period of temporary non-residence, and defer them to the year of return. Likewise for other IT reliefs.

The conditions allow (indeed invite) tax planning by arranging that the period of non-residence is more than five years.

9.26 TNR rules: commentary

The TNR rules are aimed at taxpayers who deliberately accrue or remit income or gains in years of temporary non-residence.[29] But the rules apply regardless of whether the individual intended to reduce UK tax.

The TNR rules work unfairly in that they bunch income and gains of up to four years into the year of return, so:

(1) Lower rate taxpayers may fall into the higher or additional rates of tax.

(2) Personal allowances and annual exemptions of non-resident years are lost.

Before 2013, this was unfair but perhaps not grievously so, as the amounts involved were not so significant, and bunching is always a possible downside of the remittance basis. Following the extension of the TNR rules in 2013, the unfairness has increased considerably. A motive test would be difficult to operate and an averaging rule would be impractical. However the unfairness is not difficult to resolve. The TNR rules should not apply to TNR income/gains if the rate of foreign tax is, say, at least 50% of the UK rate. If that exclusion does not apply, there should be a *de minimis* exclusion, say, twice the IT personal allowance/ CGT annual exemption for each year of non-residence. That would target the rules at those at whom they are aimed.

9.26.1 *EU law compliance*

The rules can give rise to an exit charge and where the charge arises on ceasing to reside in an EU member state, it is an interesting question whether the charge is EU law compliant.

29 See 9.2 (Purpose of the temporary non-residence rules).

CHAPTER 9A

TEMPORARY NON-RESIDENCE: PRE-2013 DEPARTURES

9A.1 Temporary non-residence: Introduction

This chapter discusses the pre-2013 TNR rules, which apply where an individual's year of departure was before 2013/14. For an introduction to the topic, and residence terminology, see 9.1 (Temporary non-residence – Introduction).

Para 158 sch 45 FA 2013 provides:

> (1) The existing temporary non-resident provisions, as in force immediately before the day on which this Act is passed, continue to have effect on and after that day in any case where the year of departure (as defined in Part 4 of this Schedule) is a tax year before the tax year 2013-14...
>
> (3) The existing temporary non-resident provisions are—
>
> (a) section 10A of TCGA 1992 (chargeable gains),
>
> (b) section 576A of ITEPA 2003 (income withdrawals under certain foreign pensions),
>
> (c) section 579CA of that Act (Income withdrawals under registered pension schemes), and
>
> (d) section 832A of ITTOIA (relevant foreign income charged on remittance basis).

9A.1.1 *Residence in years before 2013/14*

A person whose year of departure is 2013/14 or later, and so who falls within the rules discussed in this chapter, may still need to look at some pre 2013/14 years in order to apply the 4/7 years part of the test. Para 158 sch 45 FA 2013 provides:

> (2) Where those provisions continue to have effect by virtue of sub-paragraph (1)—
>
> (a) the question of whether a person is or is not resident in the UK

for the tax year 2013-14 or a subsequent tax year is to be determined for the purposes of those provisions in accordance with Part 1 of this Schedule, but

(b) the effect of Part 3 is to be ignored.

This is the same as the post-2013 TNR rule: see 9.4.4 (Residence in years before 2013/14).

9A.2 Temporary non-resident conditions

Section 10A TCGA sets out four conditions which must all be satisfied if the section is to take effect. I refer to these as the "**TNR conditions**". Section 10A(1) TCGA provides:

> This section applies in the case of any individual ("the taxpayer") if—
>
> (a) he satisfies the residence requirements for any year of assessment ("the year of return");
>
> (b) [i] he did not satisfy those requirements for one or more years of assessment immediately preceding the year of return but
>
> [ii] there are years of assessment before that year for which he did satisfy those requirements;[1]
>
> (c) there are fewer than five years of assessment falling between the year of departure and the year of return; and
>
> (d) four out of the seven years of assessment immediately preceding the year of departure are also years of assessment for each of which he satisfied those requirements.

Section 832A(1) ITTOIA is the same for IT.[2]

---

1 Limb [ii] appears to be otiose, given para (d); but it does not matter.

2 Section 832A(1) ITTOIA provides:

"This section applies if—

(a) an individual satisfies the residence requirements for any tax year ("the year of return"),

(b) the individual did not satisfy those requirements for one or more tax years immediately before the year of return but did satisfy those requirements for an earlier tax year,

(c) there are fewer than 5 tax years between—

(i) the last tax year before the year of return for which the individual satisfied those requirements ('the year of departure'), and

(ii) the year of return, and

(d) the individual satisfied those requirements for at least 4 out of the 7 tax years immediately before the year of departure."

The legislation uses three defined terms with commonsense definitions:
(1) Year of departure.[3]
(2) Intervening year.[4]
(3) Year of return.[5]

9A.3 "Residence requirements"

"Residence requirements" is defined in s.10A(9) TCGA:

> For the purposes of this section an individual satisfies the residence requirements for a year of assessment—
>
> (a) if, during any part of that year of assessment, he is resident in the UK and not Treaty non-resident, or
>
> (b) if he is ordinarily resident in the UK during that year of assessment, unless he is Treaty non-resident during that year of assessment.

Section 832A(4) ITTOIA is the same for IT.[6]

One has to read s.10A(9) more than once, to assimilate the double negatives (s.832A(4) is better drafted), but the matter can be set out in a table:

---

3 Section 10A(8) TCGA provides:
"'the year of departure' means the last year of assessment before the year of return for which the taxpayer satisfied the residence requirements."

4 Section 10A(8) TCGA provides:
"'intervening year' means any year of assessment which, in a case where the conditions in paras (a) to (d) of subsection (1) above are satisfied, falls between the year of departure and the year of return."
That is, an intervening year is one in which the temporary non-resident conditions are satisfied.

5 Defined in s.10A(1)(a) TCGA as the year in which the temporary non-resident again satisfies the residence requirements.

6 Section 832A(4) ITTOIA provides:
"For the purposes of subsection (1) an individual 'satisfies the residence requirements' for a tax year if—
(a) at any time in that year, the individual is UK resident and not Treaty non-resident, or
(b) the individual is ordinarily UK resident, and is not Treaty non-resident, for that year."

Resident	Ord Resident	Treaty non-res.	Resident Reqs met
Y	Non relevant	N	Y
Y	Non relevant	Y	N
Not relevant	Y	N	Y
Not relevant	Y	Y	N
N	N	Not relevant	N

Section 10A(9)(b) only applies to the theoretical case of a person who is non-resident but ordinarily resident.

9A.3.1 "*Treaty non-resident*"

"Treaty non-resident" is defined for CGT in s.288(7B) TCGA:

> For the purposes of this Act, a person is Treaty non-resident at any time if, at that time, he falls to be regarded as resident in a territory outside the UK for the purposes of double taxation relief arrangements having effect at that time.

Section 832A(5) is the same for IT.[7]

The key term is "double taxation relief arrangements" (here called "DTR arrangements").

9A.3.2 *"DTR arrangements": IT*

Section 832A(6) ITTOIA defines DTR arrangements for the purposes of the IT provision:

> In subsection (5) "double taxation relief arrangements" means arrangements which have effect under section 2(1) of TIOPA 2010.

9A.3.3 *"DTR arrangements": CGT*

Section 288(1) TCGA defines DTR arrangements for the purpose of CGT:

> "double taxation relief arrangements"—
>
> (a) in relation to a company[8] means arrangements that have effect under section 2(1) of TIOPA 2010 except so far as they have effect in relation to petroleum revenue tax, and

---

7 Section 832A(5) ITTOIA provides:
"For the purposes of subsection (4) an individual is 'Treaty non-resident' at any time if, at that time, he is regarded as resident in a territory outside the UK for the purposes of double taxation relief arrangements having effect at that time."

8 Companies are not relevant to this chapter but one needs to read para (a) in order to follow para (b).

(b) in relation to any other person means arrangements that have effect under section 2(1) of TIOPA 2010 but only so far as they have effect in relation to capital gains tax;

This is different from the IT definition because the treaty needs to contain a CGT provision. For instance, the Jersey DTA counts as "DTR arrangements" for IT but not for CGT because it applies for IT but not for CGT.

9A.4 Gains and losses accruing in intervening years

Section 10A(2) TCGA sets out the consequence if the TNR conditions are met:

> Subject to the following provisions of this section and section 86A, the taxpayer shall be chargeable to CGT as if—
>
> (a) all the chargeable gains and losses which (apart from this subsection) would have accrued to him in an intervening year,
>
> (b) all the chargeable gains which under section 13 or 86 would be treated as having accrued to him in an intervening year if he had been resident in the UK throughout that intervening year ...[9]
>
> were gains or, as the case may be, losses accruing to the taxpayer in the year of return.

Para (a) works because gains accruing on disposals of assets by individuals are in principle chargeable gains even if the individual is non-resident. This needs to be supplemented by para (b) because s.13 gains and s.86 gains do not accrue to participators or settlors who are non-resident.

Section 10A(2) is a deeming provision. Gains which actually accrued in an intervening year are deemed to have accrued in the year of return. I refer to this as "**the s.10A(2) fiction**". Applying the s.10A(2) fiction the intervening year gains are in principle taxable in the year of return.

Losses can be carried back, ie losses accruing in a later intervening year can be set against gains accruing in an earlier intervening year.

9A.5 Interaction with remittance basis

For a remittance basis taxpayer there could be a conflict between two deeming rules:

---

9 S.10A(2)(c) TCGA deals with losses of non-resident companies: see 9A.9.1 (Losses of non-resident company within s.13 TCGA).

(1) Section 12 TCGA (the CGT remittance basis) provides that gains are treated as accruing when remitted.
(2) The s.10A(2) fiction which provides that gains are treated as accruing in the year of return.

Section 10A(9ZA) TCGA provides:

> If—
>
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the taxpayer for the year of return, and
> (b) the taxpayer is not domiciled in the UK in that year,
>
> any foreign chargeable gains[10] falling within subsection (2)(a) which were remitted in an intervening year are treated as remitted in the year of return.

9A.5.1 *"Subsection (2)(a) gains"*

Section 10A(9ZA) only applies to gains "falling within subsection (2)(a)" that is:

> chargeable gains ... which (apart from subsection 2(a)) would have accrued to him in an intervening year,

That is, gains accruing in an intervening year and remitted in an intervening year: they are treated as accruing in the year of return, not when remitted. I refer to those as **"subsection (2)(a) gains"**. It is an interesting question how to treat gains accruing in an intervening year and not remitted until after the year of return.

I had previously considered that s.10A(9ZA) applied to pre-departure gains (foreign gains accruing while the individual was UK resident, ie gains before departure) which were remitted during an intervening year. However on reflection that does not appear to be the case because these are not subsection 2(a) gains.

---

10 Section 10A(9ZA) adds: "For this purpose 'foreign chargeable gains' has the meaning given by section 12(4)." If there were a TCGA-wide definition this would not be necessary.

Suppose (1) an individual has a UK foreign currency account (2) the individual disposes of the account when temporarily resident abroad. The account is non-UK situate for CGT purposes; the gain is a foreign chargeable gain and is charged under the temporary non resident rules when the individual returns to the UK, but qualifies for the remittance basis.

9A.5.2 *Treaty users*

Section 10A(9B) TCGA provides:

> Where this section applies in the case of any individual in circumstances in which one or more intervening years would, but for his being Treaty non-resident during some or all of that year or those years, not be an intervening year, ...

That is a case of an individual who is UK-law UK resident but treaty non-resident (**"treaty-users"**).[11] The position of treaty users is different from individuals who are UK-law non-UK resident, since treaty-users are subject to CGT unless treaty relief applies.

Where no CGT treaty relief applies, there is no need for the TNR provisions, and the TNR rules should simply have been disapplied. Instead the rules are disapplied in part, in a complex manner, and the problems have not been fully thought through.

Section 10A(9B) makes four modifications to s.10A:

> this section shall have effect in the taxpayer's case—
>
> (a) as if subsection (2)(a) above did not apply in the case of any amount treated by virtue of section 87 or 89(2) as an amount of chargeable gains accruing to the taxpayer in any such intervening year,

Section 10A(9B)(a) disapplies the TNR rules for s.87 gains: such gains accrue in the year that the s.87 code provides (under the s.87 matching rules and s.87 remittance basis) and not in the year of return. This is sensible on the view (taken in this book) that such gains do not qualify for DT exemption.

Secondly:

> this section shall have effect in the taxpayer's case ...
>
> (b) as if any such intervening year were not an intervening year for the purposes of subsections (2)(b) and (c) and (6) above.

There are three amendments here. They are best considered separately.

To follow the first we need to refer back to s.10A(2)(b):

> Subject to the following provisions of this section and section 86A, the taxpayer shall be chargeable to CGT as if—
>
> (b) all the chargeable gains which under section 13 or 86 would

---

11 See row 2 of the table in 9A.3 ("Residence requirements").

> be treated as having accrued to him in an intervening year if he had been resident in the UK throughout that intervening year ...
>
> were gains ...accruing to the taxpayer in the year of return.

Section 10A(9B)(b) disapplies the TNR rules for s.13 gains: such gains accrue in the year that the s.13 code provides (the year of accrual, subject to the s.13 remittance basis) and not in the year of return. Similarly, the subsection disapplies the TNR rules for s.86 deemed gains: such gains accrue in the year that s.86 provides (the year of accrual) and not in the year of return. This would be sensible on the view that s.13 gains and s.86 deemed gains do not qualify for DT exemption but in some cases they do.

The other amendments made by s.10A(9B)(b) concern s.10A(2)(c) and s.10A(6): these are consequential amendments relating to losses.[12]

What about gains of an individual who is UK-law UK resident, treaty non-resident, but which do not qualify for treaty relief (eg gains on a disposal of UK land)? They fall within the TNR rules, so the gain accrues in the year of disposal (and tax is paid) but it accrues instead in the year of return (and the former computation is revised, and tax paid or repaid accordingly).

9A.6 Pre-departure income

The drafting of s.832A was based on the existing s.10A which was designed for a different situation, resulting in anomalies.

The reader may wonder if the following planning was possible: suppose an individual remained UK-law UK resident but became treaty-resident in a state with a DTA conferring the necessary relief (ie "treaty non-resident"); the individual remitted the pre-departure income/gains while treaty non-resident. However treaties do not provide relief in this situation so planning of this kind was not possible. Nevertheless s.832A does apply in this case. The drafter may perhaps have thought that this planning was possible, or they may have introduced the rule unintentionally by copying across in s.832A the s.10A(2) rules which were designed for a different situation.

Section 832A(3) ITTOIA provides:

> Relevant foreign income is within this subsection if—

12 See 9A.9.1(Losses of non-resident company within s.13 TCGA).

(a) it is for the year of departure or any earlier tax year,[13] and
(b) section 832 applies to it.

In the following discussion I refer to such income as **"pre-departure income"**; in other words, that means RFI which:

(1) is taxed on a remittance basis, ie accruing to a remittance basis taxpayer while the individual was UK resident; and
(2) which was not remitted prior to departure (so was not subject to tax before departure).

Section 832A(2) ITTOIA sets out the taxation of pre-departure income if the TNR conditions are met:

> Treat any of the individual's relevant foreign income within subsection (3) which is remitted to the UK after the year of departure and before the year of return as remitted to the UK in the year of return.

Pre-departure income which is remitted during an intervening year is treated as remitted in the year of return. This makes sense for an individual who is UK-law non-UK resident during the intervening year. It makes no sense for someone who is UK-law UK resident but treaty non-resident, unless one takes the view that treaty relief is available on remitted income during the intervening year, which would not seem to be the case.

Income arising after the year of departure is not caught.

The RDR Manual provides a straightforward example. Omitting irrelevant detail (and rewriting slightly to enhance clarity) this provides:[14]

---

13 "Any earlier year" would include a year in which a person was non-resident, but income of such a year is not relevant foreign income: see 10.3.1 (Relevant foreign income).

14 The example including its irrelevant detail in full is as follows:

32520 Temporary Non Residents: qualifying conditions [June 2010] *Example (Travis)*

T, a long-term UK resident has been a remittance basis user since 2000-01. He leaves the UK for a work secondment in January 2009 (2008-09) and is not resident in 2009-10 and 2010-11.

T returns to the UK in August 2011 and meets the residence requirements in s832A in 2011-12.

He has £6,000 of relevant foreign income from 2007-08, a year in which he had claimed the remittance basis under ITA07/s831. He also has £8,000 of relevant foreign income from 2008-09, a year in which he claimed the remittance basis under the new rules at ITA07/s809B.

In 2009-10 and 2010-11 he remits all of this relevant foreign income to the UK to

> T is UK resident in 2007-08 and 2008-09 and a remittance basis taxpayer in both years.
> T is non-resident in 2009-10 and 2010-11.
> T is UK resident again in 2011-12 and the temporary non residence conditions of s.832A ITTOIA are satisfied.
> He had £6,000 of unremitted relevant foreign income from 2007-08, and £8,000 of relevant foreign income from 2008-09.
> In 2009-10 and 2010-11 he remits all of this relevant foreign income to the UK.
> T will be taxed on £14,000 in 2011-12 (the 'year of return') in respect of his remittances of his relevant foreign income in the years of 'temporary non-residence'.

9A.6.1 *2008 transitional rules*

Para 83(4) Sch 7 FA 2008 provides:

> Nothing in section 832A of that Act applies in relation to anything remitted to the UK in the tax year 2007-08 or any earlier tax year.

Thus pre-2008 income is caught by the new rule if remitted after 2008/09. This retrospective rule is intentional. The RDR Manual provides a straightforward example of a case where transitional relief is available. Omitting irrelevant detail (and slightly rewriting for enhanced clarity) this provides:[15]

> J is non-resident in 2007-08 but meets the temporary non-residence

---

meet certain ongoing UK financial commitments.
T will be taxed on £14,000 in 2011-12 (the 'year of return') in respect of his remittances of his relevant foreign income in the years of 'temporary non-residence'.

15 The example including its irrelevant detail in full is as follows:
31440 Relevant foreign income and the temporary non-residents rule [July 2010]
Example (Johan)
J is not-resident in 2007-08 but meets the residence requirements in s832A when he returns to the UK in 2008-09.
He has £6,000 of relevant foreign income from 2006-07, a year in which he was resident and had claimed the remittance basis under ITA07/s831.
In 2007-08 he remits all of this relevant foreign income to the UK to meet certain ongoing UK financial commitments.
This transitional provision means that J will not be taxed in 2008-09 (the 'year of return') in respect of this remittance of the £6,000 relevant foreign income from 2006-07, although all of the 'temporary non-resident' conditions at ITTOIA05/s832A are otherwise met.

conditions of s.832A when he returns to the UK in 2008-09.
He has unremitted relevant foreign income from 2006-07, a year in which he was resident and had claimed the remittance basis.
In 2007-08 he remits this relevant foreign income to the UK.
This transitional provision means that J will not be taxed in 2008-09 (the "year of return") in respect of this remittance of the RFI from 2006-07, although all of the 'temporary non-resident' conditions at s.832A ITTOIA are otherwise met.

9A.7 Interaction with double taxation relief

9A.7.1 *DT exemption*

Section 10A(9C) TCGA provides:

> Nothing in any double taxation relief arrangements shall be read as preventing the taxpayer from being chargeable to capital gains tax in respect of any of the chargeable gains treated by virtue of subsection (2)(a) above as accruing to the taxpayer in the year of return (or as preventing a charge to that tax from arising as a result).

The wording is the same in the post-2013 TNR rules: for a discussion see 9.7 (Interaction with DTAs).

9A.7.2 *Foreign tax credit relief*

EN FB 2005 provides:

> The application of section 10A in relation to an individual does not prevent the individual obtaining relief for foreign tax paid in respect of chargeable gains which are treated as arising to him or her in the year of return.

9A.8 Post-departure acquisitions

Section 10A(3) TCGA provides:

> Subject to subsection (4) below, the gains and losses which by virtue of subsection (2) above are to be treated as accruing to the taxpayer in the year of return shall not include any gain or loss accruing on the disposal by the taxpayer of any asset if—
>
> (a) that asset was acquired by the taxpayer at a time in the year of departure or any intervening year when—
>
> (i) he was neither resident nor ordinarily resident in the UK, or
>
> (ii) he was resident or ordinarily resident in the UK but was Treaty non-resident; ...

The CG Manual provides:

26230. Temporary non-residence: Gains or losses excluded from scope of s.10A [August 2011]

An individual may acquire assets after leaving the UK in a period of temporary residence abroad. If such assets are disposed of during the period of temporary non-residence, during an intervening year (see CG26155) any gains or losses on such assets are, in general, excluded from the scope of Section 10A, but see CG26240 which tells you about the exceptions to this general rule.

TCGA92/S10A(3)(a)

Section 10A(3)(a) provides that a gain or loss on an asset that was acquired after departure from the UK in either the tax year of departure or any of the intervening tax years when the taxpayer was not resident or not ordinarily resident* shall not be treated as chargeable in the tax year of return.

If the asset was acquired at a time when the taxpayer was resident or ordinarily resident* in the UK but was Treaty non-resident, any gain on that asset may fall within the scope of S10A. (This is only likely to apply to acquisitions after the date of departure up to the next 5 April).

You should note that the general exclusion of gains on assets acquired and disposed of during temporary non residence applies only to gains and losses which would otherwise be chargeable or allowable by virtue of TCGA92/S10A. Such gains or losses can only accrue in an intervening year.

Where assets are acquired after the date of departure and disposed of in the year of departure or year of return while the individual is not resident and not ordinarily resident the gains will be chargeable under TCGA92/S2 unless the concessionary treatment under ESCD2 is available to the individual, see CG26300+.

* For 2013-14 and later years ordinary residence does not need to be considered.

Example 1 (Mr Smith)

S who has lived all his life in the UK, leaves the UK on 10 July 2008 for a four year contract of employment abroad.

He resumes tax residence in the UK on 15 August 2012.

On 8 May 2009 S buys 20,000 shares in a UK Company. He sells all of the shares on 10 January 2011, realising a gain of £12,000.

S fulfils all of the conditions for Section 10A to apply, see CG26156, but because the shares were acquired after his departure from the UK the gain is not treated as chargeable in the year of return.

9A.8.1 *Exceptions to relief*

The CG Manual provides:

26240 Temporary non-residence: Exceptions to the exclusion from section 10A [April 2010]

Sometimes the exclusion from the scope of s.10A TCGA 1992 afforded to gains accruing during intervening years on assets acquired after departure from the UK is not appropriate. Some assets acquired by an

individual after departure in either the tax year of departure or any of the intervening tax years when the taxpayer was not resident or not ordinarily resident have a connection with the earlier period of residence. These exceptional assets fall under three headings (see below). Where they apply, any gains or losses on the disposal of the assets during intervening years are treated as chargeable in the tax year of return, that is to say they are within the scope of section 10A.

There are three categories of exceptions. Section 10A(3)(b) TCGA requires:

> (b) that asset was so acquired otherwise than by means of a relevant disposal which by virtue of section 58, 73 or 258(4) is treated as having been a disposal on which neither a gain nor a loss accrued;

The sections referred to are:
Section 58 TCGA (transfers between husband and wife or between civil partners),
Section 73 TCGA (death of life tenant),
Section 258(4) TCGA (works of art).

Section 10A(3)(c) TCGA requires:

> (c) that asset is not an interest created by or arising under a settlement;

This prevents an avoidance scheme under which T might acquire an interest under a settlement with relevant income or trust gains, and then sell the interest tax free.

Lastly, s.10A(3)(d) requires:

> (d) the amount or value of the consideration for the acquisition of that asset by the taxpayer does not fall, by reference to any relevant disposal, to be treated as reduced under section 23(4)(b) or (5)(b), 152(1)(b), 153(1)(b), 162(3)(b) or 247(2)(b) or (3)(b).

The sections referred to are:
Section 23(4)(b) and (5)(b) TCGA (compensation and insurance)
Section 152(1)(b) and s.153(1)(b) TCGA (business assets roll-over relief),
Section 162(3)(b) TCGA (transfer of business to a company)
Section 247(2)(b) and (3)(b) TCGA (compulsory acquisition).

The asset must be acquired "by the taxpayer". The CG Manual provides:

> **26231. Assets acquired by an offshore trust** [October 2013]
> The exclusion from charge, see CG26230, for assets acquired after the taxpayer's departure does not apply to assets acquired within an offshore trust, TCGA 1992, s.86 or TCGA 1992, s.87 or by a non-resident closely controlled

company, TCGA 1992, s.13.

26243. Arrival in and departure from UK: temporary non-residence: exceptions to the exclusion from section 10A: example – year of departure 2012-13 or earlier [October 2013]

Example (Mr and Mrs Brown)

Mr and Mrs B, who have lived in the UK all of their lives, leave the UK on 15 November 2009 for Mr B to take up a three year contract of employment abroad. They resume tax residence in the UK on 1 December 2012.

Mr B had acquired a property in the UK on 4 March 2002. On 12 June 2010, he gave the property to Mrs B. Mrs B sold the property on 10 March 2011 realising a gain of £100,000.

TCGA92/S58 applies to the gift by Mr B, so that for Capital Gains Tax purposes at the time of transfer neither gain nor loss arises. On the sale by Mrs B, the gain is treated as accruing in the year of return as she fulfils all of the conditions for TCGA92/S10A to apply, and the asset is not excluded from the scope of TCGA92/S10A (subsection (3)(b)).

Section 10A(4) TCGA provides:

Where—

(a) any chargeable gain that has accrued or would have accrued on the disposal of any asset ("the first asset") is a gain falling (apart from this section) to be treated by virtue of section 116(10) or (11), 134 or 154(2) or (4) as accruing on the disposal of the whole or any part of another asset, and

(b) the other asset is an asset falling within paras (a) to (d) of subsection (3) above but the first asset is not,

subsection (3) above shall not exclude that gain from the gains which by virtue of subsection (2) above are to be treated as accruing to the taxpayer in the year of return.

The CG Manual provides:

26250 Arrival in and departure from UK: temporary non-residence: held-over gains - year of departure 2012-13 or earlier [October 2013]

Sometimes a gain on disposal of an asset (the first asset) is 'held over' and not charged until another asset is disposed of. Where this happens under one of the provisions listed below then the gains which eventually accrue when the other asset is disposed of are not excluded from the scope of s.10A TCGA 1992 by subsection (3) of that section, where subsection (3) would otherwise apply because the other asset was within its scope (see CG26230 and CG26240). Note that for subsection (3) to be disapplied in this way, the first asset must not be within its scope.

Where s.10A(4) TCGA 1992 applies, a held-over gain which accrues on

a disposal in an intervening year when a taxpayer is not UK resident will be treated as accruing in the year of return to the UK, even if the asset which is disposed of was acquired after the taxpayer became non-resident, see CG26111.

The Capital Gains Tax 'hold-over' provisions to which this subsection refers are:

- s.116(10) TCGA 1992 or s.116(11) TCGA 1992 (where the new asset is a qualifying corporate bond), see CG53845+.
- s.134 TCGA 1992 (compensation stock), see CG55045+.
- s.154(2) TCGA 1992 or (4) (depreciating assets), see CG60370+.

Example (Mr Priestley)

Mr P goes to live in France for political reasons. As a result, he is not resident in the UK for the next three full years of assessment. During the first of those years he sells his shares in P Chemicals Ltd and receives qualifying corporate bonds issued by the purchaser, Davy Plc. In the following year he redeems the qualifying corporate bonds and receives cash.

Although he has actually disposed of his shares, s.116(10) TCGA 1992 applies and so he is treated for the purposes of TCGA 1992 as if he had not done so. Instead, a gain is computed as if he had disposed of the shares and that gain is 'held over' or 'frozen' until he disposes of the qualifying corporate bonds. Without the special provision at s.10A(4) TCGA 1992 the gain which accrued when the qualifying corporate bonds were disposed of would not be within the scope of section 10A because they are assets both acquired and disposed of whilst Mr P was not UK resident. Note that the first asset, the shares, is not within the scope of subsection (3) because it was acquired before Mr P left the UK: it is appropriate to bring the gain latent in those shares within the potential scope of s.10A even though the gain did not arise until some other asset was disposed of.

9A.9 Section 10A and non-resident trusts/companies

9A.9.1 *Losses of non-resident company within s.13 TCGA*

Section 10A provides:

> (2) Subject to the following provisions of this section and section 86A, the taxpayer shall be chargeable to CGT as if— ...
>
> (c) any losses which by virtue of section 13(8) would have been allowable in his case in any intervening year if he had been resident in the UK throughout that intervening year,
>
> were ... losses accruing to the taxpayer in the year of return. ...
>
> (6) The reference in subsection (2)(c) above to losses allowable in an

individual's case in an intervening year is a reference to only so much of the aggregate of the losses that would have been available in accordance with subsection (8) of section 13 for reducing gains accruing by virtue of that section to that individual in that year as does not exceed the amount of the gains that would have accrued to him in that year if it had been a year throughout which he was resident in the UK.

The CG Manual explains:

26201 Losses attributed to participators in non-resident companies [October 2013]
Losses on the disposal of an asset by a non-resident company are only attributed to a participator under s.13 TCGA 1992 in certain circumstances, s.13(8) TCGA 1992. A loss is attributed only if it will be set off against a gain attributed to the same person from the same company in the same year of assessment or against a gain made by another non-resident company which has been attributed to the taxpayer in the same year of assessment, see CG57250+, in particular, CG57295-CG57299.
Section 10A TCGA 1992 can apply to losses which are attributed to a UK resident participator under s.13 just as it applies to attributed gains, so that the losses are treated as accruing in the year the individual returns to the UK. However, the restriction to the attribution contained in s.13(8) TCGA 1992 has a parallel at s.10A(6) TCGA 1992, which restricts the amount of losses within the scope of s.10A to the amount which would be available under s.13, subsection (8) to set against attributed gains. Losses of a year in excess of the gains attributed in that year are not within the scope of section 10A.
26203. Temporary non-residence [April 2010]
Example (Mrs Adams)[16]

16 The example including all its irrelevant detail in full is as follows:
26203. – Losses [October 2013]
Example
Mrs. Adams, who has lived in the UK all of her life, leaves the UK on 1 September 2008 to take up a four year contract of employment abroad.
She resumes tax residence in the UK on 31 August 2012.
Mrs Adams has owned all of the shares in a company resident in Jersey for many years. The company owns a portfolio of shares and a number of properties. During Mrs Adams' period of non-residence the company makes a number of disposals. Gains and losses accrue as follows:
3 May 2009 gain £20,000 (year of assessment 2009-10)
23 October 2009 loss £ 5,000 (year of assessment 2009-10)
14 July 2010 loss £10,000 (year of assessment 2010-11)

The CG Manual provides an example where the facts (stripping out irrelevancies) are as follows:

> A is non-UK resident in 1999/00 - 2001/02 inclusive.
> A has owned all of the shares in a non-resident company. During A's period of non-residence gains and losses accrue to the company as follows:
> 1999/00 gain £20,000; loss £5,000
> 2000/01 loss £10,000
> 2001/02 gain £20,000
> The TNR conditions apply to A. Under Section 10A(2)(b) all the gains which would have been treated as accruing to A in the intervening years if she had been resident in those years are treated as accruing to her in the year of return. Losses are allowable to be set against gains of the same year of actual accrual.
> A is therefore chargeable in the year of return, 2002-2003 as follows
> - net gains of £15,000 (gain £20,000 less loss £5000) for 1999-2000
> - a gain of £20,000 for 2001-2002.
>
> The total gains chargeable are therefore £35,000.
> The loss arising in 2000-2001 is not allowable.

9A.9.2 *Temporarily non-resident beneficiaries: s.87 charge*

Section 10A TCGA does not mention s.87 TCGA. So at first sight it might seem that s.87 gains are not caught; but this is not the case. Section 10A(2)(a) TCGA applies to gains accruing to the individual on actual disposals. If a non-resident individual disposes of assets, chargeable gains do accrue to then (even though under s.2 TCGA they are outside the charge to CGT). Subsection (a) likewise applies if an individual receives

---

> 4 September 2011 gain £20,000 (year of assessment 2011-12)
> Mrs Adams fulfils all of the conditions for Section 10A to apply, see CG26156. Under Section 10A(2)(b) all the gains which would have been treated as accruing to Mrs Adams in the intervening years if she had been resident in those years are treated as accruing to her in the year of return. Losses are attributed to her, and section 10A applies to them, to the extent that they may be set against gains attributed in the same year.
> Mrs Adams is therefore chargeable in the year of return, 2012-13 as follows
> * net gains of £15,000 (gain £20,000 less loss £5000) from 2009-10
> * a gain of £20,000 for 2011-12.
>
> The total gains chargeable are therefore £35,000.
> The loss arising in 2010-2011 is not allowable because no gains from that year were attributed to her.

a capital payment, as trust gains are treated as accruing to the beneficiary under s.87, even if they are non-resident. However, subsection (a) would not catch s.86 or s.13 gains, as gains under these sections do *not* accrue to a non-resident. The sections only apply to a UK resident settlor or participator. Hence the drafter correctly extends s.10A(2) by subsection (b), which applies ss.13 and 86 by deeming the taxpayer to be UK resident. It was not necessary to do this for s.87.

For the interaction with sch 4C TCGA, see 52.22.2 (Trust within s.87).

9A.9.3 *Temporarily non-resident settlor: s.86 charge*

CG Manual provides:

> **26220 – Attribution of gains to settlor** [February 2014]
> TCGA92/S86 provides that in certain cases a UK resident settlor of a non-resident settlement is assessed on the chargeable gains of the trustees, see CG38200+. Following the enactment of TCGA92/S10A a settlor who is temporarily resident outside the UK may also be assessed under Section 86 on gains realised by the trustees during his/her period of non-residence.
> However, all or part of the gains realised by the trustees during the settlor's period of temporary non-residence may already have been charged, under TCGA92/S87, to beneficiaries of the settlement who have received capital payments, see CG38210. TCGA92/S86A provides relief in this situation by excluding the gains charged to beneficiaries under Section 87 from the extended charge on the settlor under Section 86.
> Any case involving Section 86 or Section 86A is to be reported to Specialist PT Trusts and Estates in accordance with CG38200.

The last sentence tacitly acknowledges that s.86A is a difficult section. The amendments in 2008 have created a fine mess. I do not attempt to consider the transitional rules.

Section 86A(1) TCGA provides:

> (1) Subsection (2) below applies in the case of a person who is a settlor in relation to any settlement ("the relevant settlement") where—
> (a) by virtue of section 10A, amounts falling within section 86(1)(e) for any intervening year or years would (apart from this section) be treated as accruing to the settlor in the year of return; and
> (b) there is an excess of the relevant chargeable amounts for the non-residence period over the amount of the section 87 pool at the end of the year of departure.

"Relevant chargeable amounts" is defined in s.86A(3) TCGA:

> In subsection (1) above, the reference to the relevant chargeable amounts for the non-residence period is (subject to subsection (5) below) a reference to the aggregate of the amounts on which beneficiaries of the relevant settlement are charged to tax under section 87 or 89(2) for the intervening year or years in respect of any capital payments received by them.

"Section 87 pool" is defined in s.86A(4) TCGA:

> In subsection (1) above, the reference to the section 87 pool at the end of the year of departure is (subject to subsection (5) below) a reference to the amount (if any) which, *in accordance with subsection (2) of that section*, fell in relation to the relevant settlement to be carried forward from the year of departure to be included in the amount of the *trust gains* for the year of assessment immediately following the year of departure.

The definition of "s.87 pool" refers back to s.87(2) TCGA. That worked by reference to the original s.87(2) TCGA. Unfortunately s.87 was redrafted in 2008 and by reference to the current s.87(2) the italicised words make no sense. This can be seen by comparing the two provisions:

Original s.87(2):
(2) There shall be computed in respect of every year of assessment for which this section applies the amount on which the trustees would have been chargeable to tax under section 2(2) if they had been resident and ordinarily resident in the UK in the year; and that amount, together with the corresponding amount in respect of any earlier such year so far as not already treated under subsection (4) below or section 89(2) as chargeable gains accruing to beneficiaries under the settlement, is in this section and sections 89 and 90 referred to as the trust gains for the year.

Current s.87(2):
(2) Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement who has received a capital payment from the trustees in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under section 87A as it applies for the relevant tax year) with the section 2(2) amount for the relevant tax year or any earlier tax year.

The drafter in 2008 failed to notice that consequential amendments were needed here. Taken literally, therefore, the definition of "section 87 pool"

is nonsense and the amount of the s.87 pool should be zero. If one could adopt a position of sufficient indifference to statutory words, one might rewrite the section to say what Parliament would presumably have said, had the point been noticed, in which case the "section 87 pool" means s.2(2) amounts; though this really amounts to legislation and not construction.

Section 86A(5) deals with settlements with more than one settlor.[17]

Section 86A(6)(7) was intended to deal with the computation of trust gains, now s.2(2) amounts:

> Where any reduction falls to be made by virtue of subsection (2) above in any amount to be attributed in accordance with section 10A to any settlor for any year of assessment, the reduction to be treated as made for that year *in accordance with section 87(3)* in the case of the settlement in question shall not be made until—
>
> (a) the reduction (if any) falling to be made by virtue of that subsection has been made in the case of every settlor to whom any amount is so attributed; and
>
> (b) effect has been given to any reduction required to be made under subsection (7) below.

This provision refers to s.87(3) TCGA. That worked by reference to the original s.87(3) TCGA. Unfortunately s.87 was redrafted in 2008 and by reference to the current s.87(3) the italicised words again make no sense. The same problem affects s.86A(7)(8):

> Where in the case of any settlement there is (after the making of any reduction or reductions in accordance with subsection (2) above) any amount or amounts falling in accordance with section 10A to be attributed for any year of assessment to settlors of the settlement, the amount (or aggregate amount) falling in accordance with that section to be so attributed shall be applied in reducing the amount carried forward to that year in accordance with section 87(2).
>
> (8) Where an amount has been applied, in accordance with subsection (7)) above, in reducing the amount which in the case of any settlement is carried forward to any year in accordance with section 87(2), that

17 "Where the property comprised in the relevant settlement has at any time included property not originating from the settlor, only so much (if any) of any capital payment or amount carried forward in accordance with section 87(2) as, on a just and reasonable apportionment, is properly referable to property originating from the settlor shall be taken into account for the purposes of subsections (3) and (4) above."

> amount (or, as the case may be, so much of it as does not exceed the amount which it is applied in reducing) shall be deducted from the amount used for that year for making the reduction under section 87(3) in the case of that settlement.

Lastly, for completeness, s.86A(9) provides some referential definitions.[18]

For the interaction with sch 4B TCGA, see 52.22.1 (Trust within s.86 TCGA).

9A.10 Time limit for assessment

Section 10A(7) TCGA provides:

> Where this section applies in the case of any individual, nothing in any enactment imposing any limit on the time within which an assessment to capital gains tax may be made shall prevent any such assessment for the year of departure from being made in the taxpayer's case at any time before the end of two years after the 31st January next following the year of return.

The CG Manual provides:

> **26270. Assessment time limits** [October 2013]
> The normal assessment time limits apply where gains accruing in the intervening years are treated by virtue of TCGA92/S10A as assessable in the tax year of return to UK residence.
> Where, however, a gain accrues in the tax year of departure from the UK after the date of the departure, this gain should be assessed by virtue of TCGA92/S2 in the year of departure. ESC D2 will not apply in cases where TCGA92/S10A would apply to any gains accruing in intervening years, see CG26300. In these circumstances, to ensure there is sufficient time in which to assess such a gain, the time limit has been specifically extended where the individual satisfies the conditions of Section 10A TCGA 1992 (whether or not gains accrue which are chargeable under that section). (TCGA92/S10A(7)).
> The extended time limit permits gains accruing in the tax year of departure from the UK to be assessed at any time up to two years after 31 January next following the year of return to the UK notwithstanding any other time limit for the making of an assessment.

---

18 "Expressions used in this section and section 10A have the same meanings in this section as in that section; and paragraph 8 of Schedule 5 shall apply for the construction of the references in subsection (5) above to property originating from the settlor as it applies for the purposes of that Schedule."

If the conditions of Section 10A TCGA 1992 are not satisfied then the normal assessment time limits will apply.

9A.11 Offshore funds

This topic (by an unintended accident of drafting) is dealt with by the post-2013 TNR rules, even if the year of departure was before 2013/14. See 9.20 (Offshore funds).

CHAPTER TEN

THE REMITTANCE BASIS

10.1 Remittance basis: Introduction

Income tax and CGT employ two types or bases of assessment:

(1) An **"arising basis"** under which tax is charged on the amount of income/gains which arise.

(2) A **"remittance basis"** under which tax is charged on the amount of income/gains which are received in the UK.

A remittance basis applies (in short) when a foreign domiciliary receives:

(1) Foreign income/gains

(2) Deemed income/gains under the settlement provisions, the ToA provisions and s.87 TCGA.

I use the following self-explanatory terminology:

(1) **"The ITA remittance basis"** (which applies from 2008/09 for all tax purposes).

(2) **"The pre-2008 remittance basis"** (which applied until 2008/2009); there were different rules for different taxes, so one might specifically refer to **"the pre-2008 RFI/employment income/CGT remittance bases"**.

10.1.1 *Cross references*

I deal with the subject in four chapters:

(1) This chapter considers who qualifies for the remittance basis, and the remittance basis claim charge

(2) Chapter 11: what counts as a remittance

(3) Chapter 12: remittance reliefs

(4) Chapter 13: the mixed funds rule.

The remittance basis as it applies to particular anti-avoidance rules is discussed in the chapter on those rules. Thus I refer to "the s.624 remittance basis"; "the s.720 remittance basis"; the s.87 remittance basis;

etc.

The following points are considered elsewhere:

26.2.3 (Life tenant remittance basis taxpayer).

46.3.2 (Rates of tax on interest under remittance basis)

46.4.3 (Rates of tax on foreign dividend income under remittance basis)

10.2 HMRC guidance

Most of the HMRC guidance is to be found in the vast RDR Manual.

The RDR Manual frequently makes its point by examples. In some cases the examples are straightforward and might have been better omitted for the sake of brevity.[1] In almost all cases the examples are padded out with irrelevant facts. (No doubt in the spirit of *The Mikado*, "intended to give artistic verisimilitude to an otherwise bald narrative".) This is about as unhelpful a method of explaining statutory provisions as could be devised. The consequence is to make it quite unnecessarily difficult to identify the important points from the examples. I try to deal with this by editing or rewriting the example so the reader can more easily see the relevant point; I set the original text of the Manual in a footnote, so that the reader can see what I have done.

The RDR Manual was published online in 2010, and updated from time to time since, but no guidance can ever be up to date as long as tax reform continues at its present frenetic pace.

Earlier guidance was in the form of Q&As.[2] Most of the Q&As are now superceded by the RDR Manual but they are still sometimes relevant. Guidance published before then, under the name of FAQs, is now of historic interest only.

10.3 "Foreign income and gains"

Section 809Z7(1) ITA provides:

> This section applies for the purposes of this Chapter.

These are chapter-wide definitions. In accordance with the principles of Plain English drafting, the legislation contains occasional (somewhat

---

1 But for the sake of completeness, and just in case some readers should find them helpful, I sometimes set them out in footnotes.

2 I refer to these as "**December 2008 Q&As**"; "**January 2009 Q&As**"; and "**March 2009 Q&As**". HMRC have removed the Q&As from their website but they are accessible on *http://www.kessler.co.uk/tfd-archive*.

unnecessary) pointers to the definitions.[3]

Section 809Z7(2) ITA provides:

> An individual's "foreign income and gains" for a tax year are—
> (a) the individual's relevant foreign earnings for that year,
> (b) the individual's foreign specific employment income for that year,
> (c) the individual's relevant foreign income for that year, and
> (d) the individual's foreign chargeable gains for that year.

10.3.1 "*Relevant foreign income*"

The expression RFI is used so often in tax that it is not possible to provide a complete list. The most important significance of RFI is that it qualifies for the remittance basis. In addition:

(1) There are special deductions and reliefs for RFI: chapter 2 part 8 ITTOIA.

(2) There is a relief for RFI of consular officials: s.771 ITTOIA.

Section 830(1) ITTOIA provides the definition of "RFI":

> In this Act "relevant foreign income" means income which
> (a) arises from a source outside the UK, and
> (b) is chargeable under any of the provisions specified in subs.(2) (or would be so chargeable if s.832 [remittance basis] did not apply to it).

Section 830(2) ITTOIA sets out 15 categories of RFI:

> The provisions are—
> (a) Chapter 2 of Part 2 (trade profits),
> (b) Chapter 17 of Part 2 (adjustment income),
> (c) Chapter 3 of Part 3 (profits of property business),
> (e) Chapter 2 of Part 4 (interest),
> (f) Chapter 4 of Part 4 (dividends from non-UK resident companies),
> (g) Chapter 7 of Part 4 (purchased life annuity payments),
> (h) Chapter 8 of Part 4 (profits from deeply discounted securities),
> (i) Chapter 13 of Part 4 (sales of foreign dividend coupons),
> (j) Section 579 (royalties and other income from intellectual property),
> (k) Chapter 3 of Part 5 (films and sound recordings: non-trading

---

3 Eg s.809C(6) ITA: "See s.809Z7 for the meaning of an individual's foreign income and gains for a tax year".

businesses),
(l) Chapter 4 of Part 5 (certain telecommunication rights: non-trading income),
(m) section 649 (estate income),
(n) Chapter 7 of Part 5 (annual payments not otherwise charged), and
(o) Chapter 8 of Part 5 (income not otherwise charged).

Section 830(3) ITTOIA concerns the very specialist case of a clawback of relief for unremittable income (exchange control income).[4]

Section 830(4) ITTOIA flags up another 9 cases where income is treated as RFI:

> For the treatment of other income as relevant foreign income, see—
> (a) section 857(3) (a partner's share of a firm's trading income),
> (aa) regulation 19 of the Offshore Funds (Tax) Regulations 2009,
> (b) paragraph 6(3) of Schedule 3 to the Commonwealth Development Corporation Act 1999 (distributions by the Commonwealth Development Corporation),
> (c) section 575(3) of ITEPA 2003 (taxable pension income: foreign pensions),
> (d) section 613(4) of that Act (taxable pension income: foreign annuities),
> (e) section 631(3) of that Act (pre–1973 pensions paid under the Overseas Pensions Act 1973),
> (f) section 635(4) of that Act (taxable pension income: foreign voluntary annual payments),
> (g) section 679(2) of that Act (taxable social security income: foreign benefits),
> (h) section 670A of ITA 2007 (accrued income profits), and
> (i) sections 726, 730 and 735 of that Act (transfer of assets abroad: foreign deemed income).

As far as I can see, it makes no difference whether income is in the s.830(2) list (defined as RFI) or the s.830(4) list (treated as RFI).

Thus there are 24 categories of RFI altogether. The 24 categories includes almost all foreign income (other than earnings); in particular, they include trading income, property income, interest and dividends. This is income formerly taxed under Schedule D Cases IV and V.

"Relevant foreign income" is a narrower concept than "foreign income"

4 See 56.4 (Withdrawal of unremittable income relief).

in two respects:

(1) Some types of foreign income (formerly charged under schedule D case VI) are not "relevant foreign income."

(2) Foreign source income of a non-resident is not RFI as it is not "chargeable" and does not meet the condition in s.830(1)(b).[5]

There is therefore a distinction between (1) income arising from a source outside the UK (foreign source income) and (2) RFI. All RFI is foreign source income; but foreign source income is not RFI if (a) it is not within the 24 categories of RFI; or (b) it is received by a non-resident.

Relevant foreign income is not a helpful label but no short label could do justice to the complexities.

Sometimes the drafter overlooks s.830(1)(b) in the statutory definition, ie the term is understood to include foreign income of a non-resident.[6]

The s.830 ITTOIA definition only applies for ITTOIA, but s.989 ITA provides:

> The following definitions apply for the purposes of the Income Tax Acts—
> "relevant foreign income"
> [a] has the meaning given by section 830(1) to (3) of ITTOIA 2005
> [b] but also includes, for any purpose mentioned in any provision listed in section 830(4) of that Act, income treated as relevant foreign income for that purpose by that provision

10.3.2 *Let's simplify the definition of RFI*

It is suggested that the law should be simplified in two ways.

First, "RFI" should be extended to include all income arising outside the UK (except employment income). There is no reason why any foreign source income should not qualify for the reliefs currently given to RFI. The amount of tax involved is small because properly advised remittance basis taxpayers will not invest in foreign source income which is taxed on an arising basis. The law simply laying traps.

If, contrary to that view, there must continue to be special cases of foreign income which does not qualify for the remittance basis, they should be specified as express exemptions from the definition of RFI. We should not specify the 24 categories of RFI: RFI should be all foreign

---

5 Unless the temporary non-residence rules apply.

6 See 27.4 (Section 624 remittance basis); 18.16.1 (Foreign source interest).

source income with specified exceptions.

Something also needs to be done about the rule in s.830(1)(b) that only income of a UK resident is RFI. Its role in ITTOIA to avoid a charge if a UK resident remits foreign income arising in a period of non-residence. But the rule makes no sense (and has sometimes been overlooked) when the concept of RFI is used elsewhere. The rule should not be in the definition of RFI: it should be moved to the charge on remitted income in s.832 ITTOIA. Then RFI would mean foreign source income (other than earnings and, perhaps, other specified categories): that is the meaning that it is often (incorrectly) ascribed to it at present.

The term RFI could be relabelled "foreign investment income" but the choice of a label is a secondary issue.

10.3.3 *Relevant foreign earnings ("RFE")*

Section 809Z7(3) ITA provides the definition of RFE:

> An individual's "relevant foreign earnings" for a tax year are—
>
> (a) if the individual does not meet the requirement of section 26A of ITEPA 2003 [Overseas Workday Relief] for that year, the individual's chargeable overseas earnings[7] for that year, and
>
> (b) otherwise, the individual's general earnings within s.26(1) of ITEPA 2003 for that year (non-UK earnings).

10.3.4 *Foreign specific employment income*

Section 809Z7 ITA incorporates the definitions from ITEPA:

> (4) An individual's "foreign specific employment income" for a tax year ("the relevant tax year") consists of the income (if any) within subsections (4A) and (4B).
>
> (4A) The income within this subsection is the individual's specific employment income for the relevant tax year so far as it consists of foreign securities income for the purposes of section 41A of ITEPA 2003.
>
> (4B) The income within this subsection is any income, or any part of any income, of the individual—
>
> (a) to which section 554Z9(2) or 554Z10(2) of ITEPA 2003 applies, and

---

7 Section 809Z7(6) provides: "In subs.(3)(a) 'chargeable overseas earnings' has the same meaning as in s.22 of ITEPA 2003 (see s.23 of that Act)." See 22.12 (Chargeable overseas earnings).

(b) which consists of the value of a relevant step, or a part of the value of a relevant step, which is "for" the relevant tax year as determined under section 554Z4 of ITEPA 2003.

Specific employment income raises a set of specialist topics not discussed in this book, though I hope to cover them in a future edition.

10.3.5 *Foreign chargeable gains*

Section 12(4) TCGA provides a commonsense definition:

> In this section "foreign chargeable gains" means chargeable gains accruing from the disposal of an asset which is situated outside the UK.

This is only a section-wide definition, so it has to be repeated or incorporated when the expression is used elsewhere.

Section 809Z7(5) ITA incorporates this definition:

> An individual's "foreign chargeable gains" for a tax year are the individual's foreign chargeable gains (within the meaning of s.12(4) of TCGA 1992) accruing to the individual in that year.

10.3.6 *Income/capital terminology in remittance basis context*

One might start off by thinking that a remittance of income is subject to income tax and a remittance of capital is not. It is not that simple. The terminology of "capital" and "income" in the context of the remittance basis is potentially confusing.

A sum received in the UK may not be taxable under the remittance basis because it is derived not from income but from some fund easily identified as capital in the hands of the taxpayer, such as a gift or inheritance, or borrowing. In cases in this category it makes sense to say that the remittance is tax free because it is one of capital.

A sum received in the UK may not be taxable under the remittance basis because:

(1) the donor was non-resident when the remitted sum accrued; or
(2) the remitted sum has already been subject to income tax.

Such sums might be said to be "income" in the normal sense of the word. These examples show that a remittance of a sum which is income in nature may nevertheless be remittance free of tax under the remittance basis.

(3) Conversely, suppose a remittance basis taxpayer accumulates income offshore for many years; the accumulated fund might be said to be

their "capital" in the normal sense of the word. Yet for the purposes of the remittance basis, it is in principle taxable if remitted.[8] Perhaps it is better described as "income".

It is best not to use the terminology of income/capital in any of cases (1) to (3): it is unnecessary to do so.

10.4 History of the remittance basis

It is not necessary for a practitioner to know the history of the remittance basis but it makes an interesting story and is helpful to understand the background to the older cases.[9]

Until 1914 all foreign income was taxed on a remittance basis: s.100 Income Tax Act 1842. Since then the remittance basis has been withdrawn, in stages, except for foreign domiciliaries. In 1914 income from "securities, stocks, shares, or rents in any place out of the UK" was brought onto an arising basis: s.5 FA 1914. This did not apply to foreign domiciliaries and non-ordinarily resident British subjects. Even those who were domiciled and ordinarily resident in the UK retained the remittance basis for foreign source income other than income from securities and rents. Hence the need for cases to decide whether trust income was to be regarded as income arising from securities or from the trust.[10]

In 1940 the general remittance basis was further restricted, to (a) income from offshore trades, professions or vocations, and (b) income from offshore offices, employments or pensions: s.19 FA 1940. The exception was intended, perhaps, to encourage foreign trade. However, it did enable tax planning by splitting a single mixed UK and foreign based trade into

---

8 See (if authority is needed) *Walsh v Randall* 23 TC 55:
"... the accumulated income which he had derived from the drawings of the firm of which he was a sleeping partner. I have no doubt that he had come to regard this sum of money as capital. It was invested savings and it was in that sense capital, unless it can be said that, for instance, a professional man's invested savings never are and never become capital. I should have thought it was quite a harmless thing to use the word 'capital' in relation to a professional man, or indeed to any other private person. I think that word may very definitely have a meaning with regard to ordinary private persons and may be correctly used to describe some part of their property. That, however, is not, for Income Tax purposes, the test. To the Crown the [unremitted] income of a person residing in the UK is, as I gather, always income until it is taxed."

9 See John Avery Jones, "Taxing Foreign Income from Pitt to the Tax Law Rewrite—The Decline of the Remittance Basis", *Studies in the History of Tax Law* (Vol 1 2004), accessible *http://www.kessler.co.uk/tfd-archive*.

10 See 26.3 (Taxation of life tenant).

separate UK and foreign source trades, the latter qualifying for the remittance basis. An arrangement of this kind was held to be successful in *Newstead v Frost* 53 TC 525. So in 1974 this was abolished: ss.22, 23 FA 1974.

The same rules applied to companies as to individuals, until the introduction of corporation tax in 1965, which put UK resident companies onto an arising basis.

In 2008 the remittance basis was recast, and restricted by the remittance basis claim charge.

10.5 Who qualifies for the remittance basis?

After the traditional overview, in accordance with the principles of plain English drafting,[11] s.809B, 809D and 809E ITA set out three categories of individuals to whom the remittance basis applies:

(1) Section 809B is the main category, those who make a claim for the remittance basis. I refer to these as "**remittance basis claimants**".

The other two categories are classes of *de minimis* taxpayers, defined with complex and pernickety detail.

(2) Section 809D applies to individuals whose unremitted foreign income and gains are less than £2,000. I refer to these as "**sub-£2k taxpayers**".

(3) Section 809E applies to those with no (or virtually no) taxable (UK source) income and gains who do not remit any foreign income or gains. I refer to these as "**non-taxpayers**".

The advantages of being in one of the two de minimis categories are as follows:

(1) No claim is needed, so the taxpayer may not need to submit a tax return.

(2) The remittance basis claim charge does not apply, personal allowances remain available,[12] and the individual is not forced to make a CGT loss election.[13]

I refer to the three groups together as "**remittance basis taxpayers**". HMRC use the term "remittance basis user" (HMRC do not like to use the

---

11 Section 809A ITA provides: "This Chapter provides for an alternative basis for charge in the case of individuals who are not domiciled in the UK".

12 See 47.5 (Withdrawal of personal allowances & CGT annual exemption for remittance basis claimants).

13 See 54.9 (Loss accruing to remittance basis taxpayer).

word "taxpayer"[14]) and in 2012 that usage was adopted into statute.[15]

10.6 Remittance basis claimants: s.809B

10.6.1 *Entitlement to claim remittance basis*

Section 809B ITA provides:

> (1) This section applies to an individual for a tax year if the individual-
> (a) is UK resident in that year,
> (b) is not domiciled in the UK for that year, and
> (c) makes a claim under this section for that year.

I refer to the claim as a **"remittance basis claim"**.

10.6.2 *Is a claim worthwhile?*

A claim gives the advantages of the remittance basis but has the following drawbacks:

(1) Loss of personal allowances:[16]
  (a) CGT annual exemption.
  (b) IT personal allowance (only a concern for those with taxable income up to about £100k as otherwise there is no personal allowance to lose[17])
(2) The need to make a CGT loss election
(3) Remitted dividends are taxed at a higher rate than dividends taxed on an arising basis
(4) Loss of 10% deduction for foreign pension[18]
(5) For long-term residents: the remittance basis claim charge

The effect of the remittance basis claim charge is to withdraw the remittance basis from long-term residents except the most wealthy, since a claim is not likely to be worthwhile for individuals whose income is much less than £150,000 in the year in question, though the position varies a great deal from one case to another.

For short-term residents, a claim is likely to be worthwhile as long as

---

14 See 1.2.5 ("Customers" of HMRC).

15 See s.809Z10 ITA.

16 See 10.6.2 (Is a claim worthwhile?).

17 See 47.4 (Withdrawal of allowances for high earners). For completeness: in rare cases the allowance may be saved by a DTT: see 47.7.2 (Personal allowances under DTAs: remittance basis claimants).

18 See 24.3 (Foreign pension).

they expect to have foreign income in excess of the personal allowance (if available).

10.6.3 *Is a remittance basis claim worthwhile: US taxpayers*

Bober states:

> Generally, the ability to claim double tax relief will mean that an adult US citizen (or green- card holder) who is a long-term UK resident will achieve a better overall tax result (meaning that less tax will be payable overall) by being subject to UK tax on the arising basis. This is because the individual will generally be subject to US tax on a worldwide basis anyway. For many, while UK tax rates are in excess of US tax rates, the additional UK tax that will be payable on the arising basis will not be in excess of the £30,000 RBC payable if the remittance basis claim is made. This will not always be the case, though, as:
>
> - the individual may have specific issues meaning that some of their foreign income or gains are sheltered from the US tax net, and/or
> - the individual might be sufficiently wealthy that the difference between the higher UK tax rates and the US tax rate will mean that paying the £30,000 is worthwhile.
>
> In addition, some US citizens (or green-card holders) may prefer to pay tax on the remittance basis in the UK rather than try to determine the UK tax treatment with respect to some of the offshore investments they have, and make the necessary disclosure. Since the US and the UK tax systems are different the fact that an individual has to submit a US tax return showing worldwide income and gains will not necessarily mean he or she is in a position to complete a UK return without incurring significant additional compliance costs. Paying the RBC will avoid the need for this work and may result in privacy gains.[19]

10.7 Procedure and time limits for remittance basis claim

Section 42(1) TMA 1970 provides (so far as relevant):

> Where any provision of the Taxes Acts provides for relief to be given, or any other thing to be done, on the making of a claim, this section shall, unless otherwise provided, have effect in relation to the claim.

Section 809B(3) ITA applies this to a remittance basis claim:

> Sections 42 and 43 of TMA 1970 (procedure and time limit for making

19 Bober "The remittance basis charge – US issues" (2011) 9 TQR p.8 accessible (free to STEP members or on subscription) *http://www.step.org*.

> claims), except s.42(1A) of that Act, apply in relation to a claim under this section as they apply in relation to a claim for relief.

I would have thought that s.42 TMA would apply to a remittance basis claim in any event, as even if the claim is not a "claim for relief", it is a claim for a "thing to be done". Perhaps the drafter thought that was not entirely clear; or perhaps the only point of s.809B(3) is to disapply s.42(1A); it does not matter. We must turn to s.42 TMA to find the relevant rules.

10.7.1 *Procedure to make a remittance basis claim*

Section 42 TMA 1970 provides (so far as relevant):

> (2) Subject to [immaterial exceptions] where notice has been given under section 8 ... of this Act [ie a notice to deliver a personal return] a claim shall not at any time be made otherwise than by being included in a return under that section if it could, at that or any subsequent time, be made by being so included...
> (5) The references in this section to a claim being included in a return include references to a claim being so included by virtue of an amendment of the return;

Thus there are different rules depending on whether HMRC have given a notice to complete a tax return.

In the usual case, HMRC do give notice to complete a tax return (form SA316). The remittance basis claim can and must be included in the return. This is done as follows:

(1) Tick box 28 in form SA109 (Residence remittance basis, etc) 2012/13. The caption by this box states: *If you are making a claim for the remittance basis for 2013–14, put 'X' in the box.*
(2) It is also necessary to tick other boxes:
   (a) Box 23 in form SA109 (2013/2014). The caption by this box states: *If you are domiciled outside the UK and it is relevant to your Income Tax or Capital Gains Tax liability, put 'X' in the box.* (There are further relevant boxes if this is the first domicile claim.)
   (b) Box 8 in form SA100 (2013/2014). The caption by this box states: *Were you, for all or part of the year to 5 April 2014, one or more of the following – not resident or not domiciled in the UK and claiming the remittance basis, applying split year treatment, or dual resident in the UK and another country?*

It is not necessary for the remittance basis claim to specify the amount of

unremitted income or gains.[20]

If HMRC do not give notice to complete a tax return, the remittance basis claim could be made informally, eg by letter; but in practice it may not often happen that a person who wishes to make a s.809B claim does not receive a notice to complete a tax return. I suspect it may be more normal practice to voluntarily submit a tax return (despite the absence of a notice requiring one) and make the claim in that return.[21]

10.7.2 *Procedure to withdraw remittance basis claim*

If a tax return is submitted without a remittance basis claim, the claim can be made by amending the return; similarly, if a tax return is submitted with a claim, the claim can be withdrawn by amending the return.

HMRC agree. The RDR Manual provides:

> **32020 Claiming the remittance basis: Making a claim** [July 2010]
> ... If the return is subsequently amended, the claim may be included then or a previously made claim may be amended or deleted (s.42(5) TMA 1970).

However the time limit for amending a tax return is quite short. Section 9ZA TMA provides:

> (1) A person may amend his return under section 8 ... of this Act by notice to an officer of the Board.
> (2) An amendment may not be made more than twelve months after the filing date.
> (3) In this section "the filing date", in respect of a return for a year of assessment (Year 1), means—
> (a) 31st January of Year 2, or
> (b) if the notice under section 8 or 8A is given after 31st October of Year 2, the last day of the period of three months beginning with the date of the notice.

---

20 Because s.42(1A) TMA is disapplied. This provided: "... a claim for a relief, an allowance or a repayment of tax shall be for an amount which is quantified at the time when the claim is made." (At first sight it was not necessary to disapply this subsection, as a remittance basis claim is not "a claim for a relief, an allowance or a repayment of tax" so the subsection would not apply in any event. But the remittance basis claim is treated as if it were a claim for a relief, so it was necessary.)

21 A claim in an unsolicited tax return is an effective claim: see *Weerasinghe v HMRC* [2013] UKFTT 144 (TC).

The RDR Manual provides:

> **32020 Claiming the remittance basis: Making a claim** [July 2010]
> ... when the time period for making an amendment has passed, the claim may not be withdrawn even if the making of the claim turns out to have been an error. This is because error or mistake relief does not apply to claims made to use the remittance basis under s.809B ITA 2007 (s.33(2A)(c) TMA 1970).

Section 33(2A)(c) TMA formerly provided that no relief was given under s.33 for an error or mistake consisting of the making of a remittance basis claim. The reference in the Manual is out of date as the legislation was rewritten in 2009. The provisions are now in Sch 1AB TMA, which does not refer expressly to remittance basis claims, but the new provisions only apply where tax has been paid, or assessed, which is not due. That is not the case where making a remittance basis claim was a mistake in the sense that it was not beneficial. So the position remains as before. That is, it is only possible to withdraw a remittance basis claim after the filing date anniversary in the circumstances below.

10.7.3 *Time limit for remittance basis claim*

Section 43(1) TMA provides:

> Subject to any provision of the Taxes Acts prescribing a longer or shorter period, no claim for relief in respect of income tax or capital gains tax may be made more than 4 years after the end of the year of assessment to which it relates.

Section 42(2) TMA 1970 provides (so far as relevant):

> (2) Subject to [immaterial exceptions] where notice has been given under section 8 ... of this Act [ie a notice to deliver a personal return] a claim shall not at any time be made otherwise than by being included in a return under that section if it could, at that or any subsequent time, be made by being so included...

In the usual case where HMRC have given the notice to make a tax return, the claim must (as noted above) be made in the return, and it seems at first sight that the timetable for making (and amending) tax returns controls when the claim has to be made: if it is too late to make or amend the tax return, the claim cannot be made. However the better view is that s.42(2) merely outlines the procedure for making claims and that the time limits

are those set in sections 43 and 43A. Once the deadline for amending the return has passed, the claim cannot be included in the return at that or any subsequent time, and that opens up the possibility of a claim being made outside the return.[22] HMRC agree. The RDR Manual provides:

> **RDRM32030 Claims - Time Limits** [July 2010]
> The time limits for making claims are set out in Section 43 TMA 1970. The general time limit as set out in TMA70/s43(1) for making a claim also applies to making a claim for the remittance basis.
> By way of an example, under the **present** time limits a claim for the remittance basis for 2008-09 must be made by 31 January 2015.
> **Note:** The present limits are changing as a result of changes introduced at Schedule 39 FA 2008. From 1 April 2010 the new time limits will be 4 years after the end of the year of assessment to which it relates. ...The Taxes Acts may prescribe a longer or shorter period in respect of certain claims, and if that is the case then that time limit will override the general rule of S43(1).
> S43(2) extends the time limit in certain circumstances. ...

The Manual adds:

> If there is a likelihood that the claim might not be made within the general time limit for making the claim, then the individual must tell HMRC of the intention to make the claim. This must stipulate:
> - the nature of the claim, and
> - the year for which it is to be made

But I think what the Manual describes as "telling HMRC of the intention to make the claim" actually amounts to making a claim.

10.7.4 *Making or withdrawing a remittance basis claim after time limit*

Section 43(2) TMA allows a late claim following the making of an assessment:

> A claim (including a supplementary claim) which could not have been allowed but for the making of an assessment to income tax or capital gains tax after the year of assessment to which the claim relates may be made at any time before the end of the year of assessment following that in which the assessment was made.

Section 43C(2) TMA provides (so far as relevant):

---

22 I am grateful to Peter Finch for his comments on this issue.

Where-

(a) a return is amended under section 28A(2)(b) ... and

(b) the amendment is not made for the purpose mentioned in subsection (1)(b) above [ie not for "the purpose of making good to the Crown any loss of tax brought about carelessly or deliberately by the taxpayer or a person acting on his behalf"]

sections 43(2), 43A and 43B apply in relation to the amendment as they apply in relation to any assessment under section 29.

Amended as s.43C directs, s.43(2) TMA provides:

> A claim (including a supplementary claim) which could not have been allowed but for the making of an [*amended return*] after the year of assessment to which the claim relates may be made at any time before the end of the year of assessment following that in which the [*return*] was [*amended*].

So if:

(1) HMRC raise a late assessment, and

(2) there is no negligence

it is possible to make a late remittance basis claim if the claim is one "which could not have been allowed but for the making of an amended return". That would be the case if there is no income returned against which the claim could be allowed.

Section 43A TMA provides:

(1) This section applies where—

(a) by virtue of section 29 of this Act an assessment to income tax or capital gains tax is made on any person for a year of assessment, and

(b) the assessment is not made for the purpose of making good to the Crown any loss of tax brought about carelessly or deliberately by that person or by someone acting on behalf of that person.

(2) Without prejudice to section 43(2) above but subject to section 43B below, where this section applies—

(a) any relevant[23] claim, election, application or notice which could

---

23 Section 42A TMA provides:

"(2B) For the purposes of this section and section 43B below, a claim under Schedule 1AB is relevant in relation to an assessment for a year of assessment if it relates to that year of assessment.

have been made or given within the time allowed by the Taxes Acts may be made or given at any time within one year from the end of the year of assessment in which the assessment is made, and

(b) any relevant claim, election, application or notice previously made or given may at any such time be revoked or varied—

(i) in the same manner as it was made or given, and

(ii) by or with the consent of the same person or persons who made, gave or consented to it (or, in the case of any such person who has died, by or with the consent of his personal representatives),

except where by virtue of any enactment it is irrevocable.

...

Section 43B TMA provides a cap on the relief given by a late claim:

...

(3) In any case where—

(a) one or more relevant claims, elections, applications or notices are made, given, revoked or varied by virtue of the application of section 43A above in the case of an assessment, and

(b) the total of the reductions in liability to tax which, apart from this subsection, would result from the action mentioned in paragraph (a) above would exceed the additional liability to tax resulting from the assessment,

the excess shall not be available to reduce any liability to tax.

(4) Where subsection (3) above has the effect of limiting either the reduction in a person's liability to tax for more than one period or the reduction in the liability to tax of more than one person, the limited

---

(3) For the purposes of this section and section 43B below, any other claim, election, application or notice is relevant in relation to an assessment for a year of assessment if—

(a) it relates to that year of assessment or is made or given by reference to an event occurring in that year of assessment, and

(b) it or, as the case may be, its revocation or variation has or could have the effect of reducing any of the liabilities mentioned in subsection (4) below.

(4) The liabilities referred to in subsection (3) above are—

(a) the increased liability to tax resulting from the assessment,

(b) any other liability to tax of the person concerned for—

(i) the year of assessment to which the assessment relates, or

(ii) any year of assessment which follows that year of assessment and ends not later than one year after the end of the year of assessment in which the assessment is made."

amount shall be apportioned between the periods or persons concerned—

(a) except where paragraph (b) below applies, in such manner as may be specified by the inspector by notice in writing to the person or persons concerned, or

(b) where the person concerned gives (or the persons concerned jointly give) notice in writing to the inspector within the relevant period, in such manner as may be specified in the notice given by the person or persons concerned.

(5) For the purposes of paragraph (b) of subsection (4) above the relevant period is the period of 30 days beginning with the day on which notice under paragraph (a) of that subsection is given to the person concerned or, where more than one person is concerned, the latest date on which such notice is given to any of them.

Section 43C TMA provides:

(1) Where—

(a) a return is amended under section 28A(2)(b) ... and

(b) the amendment is made for the purpose of making good to the Crown any loss of tax brought about carelessly or deliberately by the taxpayer or a person acting on his behalf,

sections 36(3) and 43(2) apply in relation to the amendment as they apply in relation to any assessment under section 29.

(2) Where—

(a) a return is amended under section 28A(2)(b) ... and

(b) the amendment is not made for the purpose mentioned in subsection (1)(b) above,

sections 43(2), 43A and 43B apply in relation to the amendment as they apply in relation to any assessment under section 29.

(3) References to an assessment in sections 36(3), 43(2), 43A and 43B, as they apply by virtue of subsection (1) or (2) above, shall accordingly be read as references to the amendment of the return.

A typical case is if no remittance basis claim was made as a taxpayer reasonably considered that some relief applied. Likewise a late claim for DT relief may be made if a taxpayer reasonably considered that some other relief was available.

HMRC agree. The Self Assessment Claims Manual provides:

SACM9015. Non-Culpable Additions [January 2010]

Where you

- amend a return in an ITSA enquiry closure notice or

- make a discovery assessment for reasons other than fraudulent or negligent conduct

the taxpayer can make a relevant out-of-time claim or election within one year from the end of the year of assessment in which the notice is issued. (Sections 43A and 43C(2) TMA).

In section 43A for a claim or election to be relevant to an amendment or assessment it must

- relate to the same year of assessment or
- be made or given by reference to an event in that year (Section 43A(3) TMA 1970).

The taxpayer can also

- revoke a claim or election already made, or
- amend a claim or election, except where it is irrevocable in law.

The effect of the taxpayer making, revoking or amending a claim or election is limited to the additional liability to tax resulting from the assessment or your amendment.

So if an ITSA enquiry increases a taxpayer's self assessment by £1,500 tax, the effect of any out-of-time claims or elections is limited to £1,500 (Section 43B(3) TMA 1970). Any "excess" tax effect of the claim or election "shall not be available to reduce any liability to tax".

10.8 Sub-£2k taxpayer: s.809D

Section 809D ITA provides:

(1) This section applies to an individual for a tax year if-

(a) the individual is UK resident for that year,

(b) the individual is not domiciled in the UK in that year, and

(c) the individual's unremitted[24] foreign income and gains for that year are less than £2,000.

unless condition A or condition B is met.

(1A) Condition A is that conditions A to F in section 828B are met.[25]

(1B) Condition B is that the individual gives notice in a return under

---

24 Section 809D(2) provides a commonsense definition of "unremitted":

"The amount of an individual's "unremitted" foreign income and gains for a tax year is—

(a) the total amount of what would (if this section applied) be the individual's foreign income and gains for that year, minus

(b) the total amount of those income and gains that are remitted to the UK in that year."

25 This relates to lower-paid employees see 22.33 (Lower-paid employee exemption). I do not understand the reason for condition A.

section 8 of TMA 1970 that this section is not to apply in relation to the individual for that year.

Why should anyone wish to make a claim under s.809D(1B) and move from the remittance basis to the arising basis? The reason may be that the remittance basis (for those with modest incomes) involves too much trouble and expense: it may be more cost effective to pay tax on an arising basis. Another reason might be to facilitate double taxation relief.

10.8.1 *Interaction of £2k limit with split-year rules*

Under the split year rules, foreign income from the overseas part of a split year is not subject to UK tax. However in considering whether the £2,000 threshold limit applies in respect of use of the remittance basis of taxation under ITA07/s809D, the level of unremitted foreign income and gains for the entire tax year must be taken into account. This continues the position as it was before the SRT.

This is straightforward but the RDR Manual gives an example to drive the point home:[26]

> **32120 Below £2,000 threshold users: Years of arrival and departure - interaction with ESC A11** [June 2010]
>
> ...
>
> *Example (Ferdinand)*
>
> F enters the UK on 20 October 2010, and is resident for the tax year 2010-11. He claims[27] split-year treatment under ESC A11.
>
> F's RFI is as follows:
>
> | | |
> |---|---|
> | 6 April to 19 October 2010 | £2,200 |
> | 20 October 2010 to 5 April 2011 | £1,300 |
> | Total | £3,500 |
>
> F remits £1,000 to the UK in that year.
>
> At the end of the year his total unremitted foreign income is £2,500.

The HMRC analysis is as follows:

> Even though F has claimed split-year treatment for 2010-11, he still has to include any foreign income that arose before he entered the UK.
>
> As F's unremitted foreign income is above the £2k threshold he cannot use the remittance basis under s809D. If he wishes to use the remittance

26 I have slightly altered the wording of the example for enhanced clarity.

27 It would be more accurate to say F "qualifies" for split-year treatment since the concession does not need a claim. But nothing turns on that.

basis he will need to claim under ITA07/s809B, and will lose his personal allowances and the annual exempt amount.

The same applies under the SRT. In practice, F (if well advised) would not make a claim for the remittance basis but could save a few pounds of tax by remitting £1,500.01 to the UK instead of £1,000.

The same applies for chargeable gains and RDRM32130 sets out an example. But in practice it hardly matters.

10.8.2 *How to claim*

Although there is no formal claim or election, it is necessary to tick the relevant box in the tax return. This is box 29 in the SA109 form (2013/14). The caption by the box reads: *If your unremitted income and capital gains for 2013–14 is less than £2,000, put 'X' in the box.*

It is also necessary to tick box 23 in the SA 109 form (2013/14). The caption by this box states: *If you are domiciled outside the UK and it is relevant to your Income Tax or Capital Gains Tax liability, put 'X' in the box*. (There are further relevant boxes if this is the first domicile claim.)

It is also necessary to tick box 8 in the form SA100 (2013/14). The caption by this box reads: *Residence, remittance basis etc. Were you, for all or part of the year to 5 April 2014, one or more of the following – not resident, not ordinarily resident or not domiciled in the UK and claiming the remittance basis; or dual resident in the UK and another country?*

10.8.3 *Concession for remittances by sub-£2k taxpayer*

HMRC Brief 17/09 provides:

> **Remittance basis users whose foreign income and gains is less than £2,000**
> Individuals making use of section 809D are still taxable on any foreign income or gains remitted to the UK. ...
> It is recognised that some individuals, in particular those on low income, may make small cash remittances to the UK, out of foreign income or gains, and as a result have to complete a Self Assessment tax return possibly to pay only a small amount of tax. This is particularly the case where foreign tax has already been paid on the income or gains. Where an individual who is making use of section 809D remits less than a total of £500 in cash, which arises from foreign income or gains, into the UK during the tax year, then HMRC will accept that such an individual does not need to make a Self Assessment Tax return simply to pay the tax on those cash remittances. However where such an individual is required

> to complete a Self Assessment tax return for any other reason, or HMRC serves them with a notice to make a return, then they will need to include those remittances on the return and pay the tax due. This practice will apply for 2008-09 and subsequent years.

This is a concession (the word concession is not used, perhaps because HMRC are not now supposed to issue concessions). A concession which only applies if HMRC chose not to require a SA return is a new development in tax, and setting the limit at £500 is difficult to defend, but the manner of introduction of the concession precluded any possibility of debate on it.

10.8.4 *Reform?*

HMRC have rejected lobbying to increase the £2k limit:

> In particular, the Government will not look further at the following:
> *Simplification* Increasing the £2,000 de minimis limit to align with the income tax personal allowance
> Government response The Government considers that this would be likely to have a material Exchequer cost. It would also restore the income tax personal allowance and CGT Annual Exempt Amount (AEA) to some individuals with a significant level of income or capital gains and the Government does not think that this can be justified.[28]

The paper does not mention that the decision not to increase the limit since 2008 amounts to a reduction in real terms.

10.9 Non-taxpayers: s.809E

Section 809E(1) ITA provides:

> This section applies to an individual for a tax year if—
> (a) the individual is UK resident for that year,
> (b) the individual is not domiciled in the UK in that year,
> (c) for that year the individual either has no UK income or gains or has no UK income and gains other than taxed investment income not exceeding £100.

---

28 HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (December 2011) para 2.127 *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

(d) no relevant income or gains are remitted to the UK in that year, and

(e) either—

(i) the individual has been UK resident in not more than 6 of the 9 tax years immediately preceding that year, or

(ii) the individual is under 18 throughout that year.

unless the individual gives notice in a return under s.8 of TMA 1970 that this section is not to apply in relation to the individual for that year.

I refer to a person within s.809E as **"a non-taxpayer"**. Thus there are five requirements which must all be met. Requirements (a), (b) and (e) do not need comment.

10.9.1 *(Virtually) no UK income/gains*

The requirement in s.809E(1)(c) is:

> for that year the individual either has no UK income or gains or has no UK income and gains other than taxed investment income not exceeding £100.

Section 809E(2) ITA provides a commonsense definition:

> For the purposes of subs.(1)(c) the individual's "UK income and gains" for the tax year are the individual's income and chargeable gains for that year other than what would (if this section applied) be the individual's foreign income and gains for that year.

There is a paltry exemption for £100 "taxed investment income". This term is defined in s.809E(2A) ITA:

> For the purposes of subsection (1)(c) "taxed investment income" means UK income or gains consisting of payments within s.946 from which a sum representing income tax has been deducted.

10.9.2 *No relevant income or gains remitted*

The requirement in s.809E(1)(d) is:

> (d) no relevant income or gains are remitted to the UK in that year

Section 809E(3) ITA provides the definition:

> For the purposes of subs.(1)(d) "relevant" income and gains are—
>
> (a) what would (if this section applied) be the individual's foreign income and gains for the tax year mentioned in subs.(1), and

(b) the individual's foreign income and gains for every other tax year for which s.809B or 809D or this section applies to the individual.

Para 85 Sch 7 FA 2008 contains transitional provisions for pre-2008 income and gains:

(1) In s.809E(3)(b) of ITA 2007, the reference to a tax year for which s.809B, 809D or 809E of that Act applies to an individual includes a tax year (not later than the tax year 2007-08) in which the individual—
(a) was UK resident, but
(b) was not domiciled in the UK or was not ordinarily UK resident.
(2) In relation to such a tax year, the reference there to the individual's foreign income and gains includes the individual's relevant foreign income if (and only if)—
(a) the individual made a claim under s.831 of ITTOIA 2005 for the year, or
(b) s.65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the year.

The split year rules do not apply, so income from the overseas part of a split year will be included within the definition of relevant income and gains for that year for section 809E purposes.

10.9.3 *What is the purpose of s.809E?*

EN FB 2008 provides:

Individuals entitled to claim the remittance basis who have no UK income or gains, and who don't remit any foreign income or gains, won't have to claim the remittance basis in years they are not liable to the RBC. This avoids them having to complete a self assessment return only so they can claim the remittance basis and then have no tax to pay.

There will not be many non-taxpayers within s.809E – mainly spouses accompanying their partners, children and some students, perhaps.

10.10 Time of foreign domicile

Section 809B(1) ITA requires (in short) that the foreign domiciliary is not domiciled in the UK in the year that the income arises.

It is an interesting question what is the position if a person changes domicile during a year.

10.11 Remittance basis claim charge

10.11.1 *Outline of position from 2012*

The remittance consultation paper provides:

> 2.8 ... the Government proposes to introduce a higher charge of £50,000 for those non-domiciles who claim the remittance basis and have been UK resident in at least 12 of the 14 tax years prior to the year of the claim. It intends that this will take effect from 6 April 2012.
> 2.9 The £30,000 charge will be retained for those who have been resident in at least seven of the nine years prior to the year of claiming the remittance basis, but fewer than 12 years.
> 2.10 The £50,000 charge will work in exactly the same way as the current £30,000 charge, namely:
> - In each tax year the individual will have a choice whether to pay the charge or to be liable to UK tax on their worldwide income and capital gains. Any decision will depend on the individual's personal circumstances, such as the level of their overseas income and capital gains; 6
> - Those who choose to pay the charge will make a claim to the remittance basis on an SA tax return after the end of the relevant tax year;
> - Individuals will be able to opt in and out of the remittance basis from year to year. Choosing the arising basis in one year will not preclude claiming the remittance basis in a future year; and
> - It will not be payable if the individual is under 18 or if they have unremitted overseas income and capital gains of less than £2,000 in the tax year.[29]

10.11.2 *7-year and 12-year residence tests*

Section 809H ITA provides:

> **809H Claim for remittance basis by long-term UK resident: charge**
> (1) This section applies if—
> (a) s.809B (claim for remittance basis to apply) applies to an individual for a tax year ("the relevant tax year"),
> (b) the individual is aged 18 or over in the relevant tax year, and
> (c) the individual meets the 12-year residence test or the 7-year

29 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible *http://www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.*

> residence test for the relevant tax year.
> (1A) See section 809C(1A) and (1B) for when an individual meets the 12- year residence test or the 7-year residence test for a tax year.

That takes us to s.809C ITA which provides:

> (1A) An individual meets the 12-year residence test for a tax year if the individual has been UK resident in at least 12 of the 14 tax years immediately preceding that year.
> (1B) An individual meets the 7-year residence test for a tax year if the individual.
> (a) does not meet the 12-year residence test for that year, but
> (b) has been UK resident in at least 7 of the 9 tax years immediately preceding that year.

I adopt the statutory terminology and refer to individuals who meet the 7 or 12-year residence tests as "**long-term residents**".

The period of residence might be continuous or broken.

While an individual is under 18:

(1) they are not subject to the remittance basis charge; but
(2) any UK resident years do count for the 7-year and 12-year residence tests..

In the year a long-term resident attains 18, the charge is payable in full. The RDR Manual 32230 provides a straightforward example of a case involving a minor.[30]

---

30 **32230 Counting years of UK residence - Minors** [March 2014]
...
Example (Pranav)
"P was born on 23 October 1991. He came to the UK as a school boarder in August 2001 (tax year 01-02). He is domiciled outside the UK. He has stayed in education in the UK for every tax year since.

99-00 Not Resident	05-06 Resident
00-01 Not Resident	06-07 Resident
01-02 Resident	07-08 Resident
02-03 Resident	08-09 Resident
03-04 Resident	09-10 Resident
04-05 Resident	

In 08-09 P has foreign income of £300,000 and he claims to use the remittance basis in that year. He is a long-term resident in the UK as he has been UK resident for eight years, but as he is under 18 he may use the remittance basis in 08-09 without paying the remittance basis charge.
In October 2009 (tax year 2009-10) P turns 18. He has foreign income of £400,000. If he wishes to claim the remittance basis for that tax year he will be liable to the

A split year counts as a full year of residence in determining whether an individual meets the long-term residents rule, that is, whether he has been in the UK for at least 7 out of the 9 tax years immediately preceding the current tax year.[31]

The RDR Manual 32220 offers a straightforward example of a case involving a split year.[32]

10.11.3 *Nomination of income and gains*

Section 809C ITA provides:

> **809C Claim for remittance basis by long-term UK resident: nomination of foreign income and gains to which s.809H(2) is to apply**
>
> (1) This section applies to an individual for a tax year if the individual-
>
> (a) is aged 18 or over in that year, and
>
> (b) meets the 12-year residence test or the 7-year residence test for that year.

---

remittance basis charge."

Of course the (implausibly large) income specified is strictly irrelevant to the application of the remittance basis charge: the position is the same whatever is P's income.

31 See 7.1 (Default rule: individual regarded as resident throughout tax year).

32 **32220 Counting years of UK residence (seven out of nine) - Section 809 ITA 2007** [March 2014]

...

"Example (Dominic)

D, a non-dom, is resident in the UK for the tax year 2008-2009.

• D came to the UK in May 1999 (99-00 tax year)

• He left to live in Spain in January 2001 (00-01 tax year)

• He returned to the UK on 12 October 2002 (02-03 tax year)

• He left to work in the Republic of Ireland on 29 April 2004 (04-05 tax year)

• He then returned to the UK on 16 May 2006 (06-07 tax year) and has been resident here since.

D is resident in the UK for the current tax year (08-09). He has chargeable overseas earnings of £150,000 in that year, paid into his Spanish bank account and he does not remit anything. For the last nine tax years he has been resident/not resident as follows:

1 99-00 Resident
2 00-01 Resident (year he went to Spain)
3 01-02 Non Resident
4 02-03 Resident
5 03-04 Resident
6 04-05 Resident (year he went to Ireland)
7 05-06 Non Resident
8 06-07 Resident
9 07-08 Resident

D is a long term resident; if he claims the remittance basis in 2008-2009 he will be liable for the remittance basis charge."

> (2) A claim under s.809B by the individual for that year must contain a nomination of the income or chargeable gains of the individual for that year to which s.809H(2) is to apply.

Following the statutory terminology,[33] I refer to the income or gains so nominated as "**nominated income/gains**". Section 809C continues:

> (3) The income or chargeable gains nominated must be part (or all) of the individual's foreign income and gains for that year.
> (4) The income and chargeable gains nominated must be such that the relevant tax increase does not exceed
> (a) for an individual who meets the 12-year residence test for that year, £50,000;
> (b) for an individual who meets the 7-year residence test for that year, £30,000.

Section 809C(5) ITA provides a commonsense definition of "the relevant tax increase":

> "The relevant tax increase" is-
> (a) the total amount of income tax and capital gains tax payable by the individual for that year, minus
> (b) the total amount of income tax and capital gains tax that would be payable by the individual for that year apart from s.809H(2).

EN Amendments to the Remittance Basis Charge explains the reason for the cap in s.809C(4):

> This stops an individual from nominating too much income and gains and as a result paying a remittance basis charge of more than £30,000 [now the applicable amount].

The legislation does not say what happens if an individual fails to nominate any income/gains or if they nominate income/gains but the relevant tax increase exceeds the applicable amount. The RDR Manual provides:

> **32310 Nomination of foreign income and gains - overview** [January 2014]

---

33 Section 809H(3) ITA provides: "'Nominated' income or chargeable gains means income or chargeable gains nominated under s.809C in the individual's claim under s.809C for the relevant tax year." The definition is repeated in s.809I(3) and s.809J(3) ITA. (If a chapter-wide definition had been used the repetition would have been unnecessary.)

... Any claim that does not include a nominated amount is not valid. ...
32330 Relevant tax increase [January 2014]
The remittance basis charge cannot exceed £30,000 for those individuals who have been UK resident in at least 7 out of 9 years or £50,000 for those individuals who have been UK resident in at least 12 out of 14 years. Any nominations which produce an excessive relevant tax increase may invalidate the claim under section 809B to be taxed on the remittance basis.
Also refer to RDRM35100 remittances of nominated income or gains for details about the rules that may apply if the individual remits any nominated income or gains in later years.

The following example from the RDR Manual shows how complicated this will be:

32350 Relevant tax increase - Example 2 [July 2010]
...
Relevant tax increase: Example 2 (Lorna)
L, a non domiciled long-term UK resident makes a claim to use the remittance basis in 201X and must pay the £30,000 remittance basis charge (RBC). She is a higher rate taxpayer paying tax at 40%, with UK source employment income of £80,000.
She also has £150,000 of interest (relevant foreign income) from an overseas investment in Country X paid to her.
Because nominated income is taxed on the "arising basis", a remittance basis user is in the same position as any other UK resident person and is, subject to the ordinary rules that apply in such cases (s.793 ICTA 1988+), entitled to credit against UK tax for certain amounts of overseas tax that is payable on that same income.
Under the domestic law of Country X in which the investment was made, the interest was paid after deduction of 15% withholding tax. The Double Taxation Agreement between the UK and Country X provides that tax on this interest may be retained in the "source" country at the rate of 15%.
L is therefore entitled to a credit, which she takes in the form of foreign tax credit relief (FTCR), against UK tax for the tax withheld in the other country. ...
Foreign tax credit relief calculation – general principles
Ignoring the remittance basis issue for the moment:
L has received foreign interest of £150,000, on which Country X's tax of £22,500 (15% as provided for in the DT treaty) has been deducted.
L's income is chargeable to tax at 40%. The UK tax charge is respect of this £150,000 would be £60,000 (40%×£150,000).
If she claims foreign tax credit relief her net liability to UK tax after the foreign tax credit relief will be:
£60,000 minus £22,500 = £37,500
Relevant tax increase including FTCR
Foreign tax credit relief is only due to the extent that the foreign income on

which it is given is brought into the UK tax charge. So for remittance basis users, relief for foreign tax paid on foreign income chargeable on the remittance basis is given when that income is remitted.

However for remittance basis charge payers like L, any foreign income which she nominates is chargeable on the arising basis so foreign tax credit relief can be given in relation to that nominated income.

Because the "relevant tax increase" must be £30,000, L will need to nominate £120,000 of her foreign interest if she wishes to create an overall remittance basis charge of £30,000.

- FTCR calculation

Foreign tax that relates to the £120,000 nominated (at 15%)	£18,000
UK tax on £120,000 (at 40%)	£48,000
Net liability to UK tax after the FTCR (£48,000 minus £18,000)	£30,000

(refer to note 2 below)

- Relevant tax increase calculation

To determine the relevant tax increase we must complete two calculations.

The first calculation (a) is of the total amount of L's income tax and capital gains tax actually payable in the year, as a remittance basis user and RBC payer.

The second calculation (b) is the total amount of L's income tax and capital gains tax that would be payable by L in the year as a remittance basis user, as if no nomination was required and the RBC was not due that is, as if there was no income tax or capital gains tax payable on her nominated foreign income or gains.

The relevant tax increase is the total of calculation (a) minus calculation (b)

	Calculation (a)			Calculation (b)		
Non-savings income						
20%[1] on	**£34,800**	=	**£6,960**	**£34,800**	=	**£6,960**
40% on	**£45,200**	=	**£18,080**	**£45,200**	=	**£18,080**
	£80,000		£25,040	£80,000		£25,040
Savings						
40% on	£120,000[2]	=	**£30,000**	Note 4		
Total Income Tax Due			**£55,040**[3]			**£25,040**[4]

1 Rates and thresholds used here for the purposes of this example only; use the rates applying in the relevant tax year.

2 This is the foreign income that is nominated, and charged to tax on the arising basis in the year. FTCR is given, which has reduced the tax to £30,000.

3 As a remittance basis user, L has no personal allowances due.

4 L is a remittance basis user so would not be subject to tax on her unremitted foreign income, nor would any FTCR be due.

Relevant Tax Increase is	Total (a)		£55,040
less	Total (b)		£25,040
		Total	**£30,000**

March 2009 Q&As provides:

Q3: HM Revenue & Customs (HMRC) have indicated that individuals do not have to specify which account the nominated income comes from, and from this it could be inferred that without further disclosure of the particulars of the account the taxpayer may be at risk of "tainting" every other source of income of that type. For example if an individual has an account with one bank in Jersey and another bank in a different jurisdiction, he could nominate bank interest on his Jersey account, so that it would be obvious that if he remitted income from his other account, he might not fall foul of re-characterisation provisions. However, this may not be the case if he had three different accounts with the same bank in Jersey and he wishes to nominate income from one of those accounts without disclosing the account number of that account. Can HMRC clarify what their approach to this will be?

A: It is up to the individual to decide how much information to give HMRC on their Self Assessment returns in order to identify the source of the nominated income or gains; if, as in this example, there is more than one account the individual should provide sufficient detail to distinguish between them and identify the "nominated" account. That might be the entire account number, or the account "name", or some other unique identifying feature of the account.

The RDR Manual 32380 provides:

Completing the SA Return - How is this done in practice? [January 2014]

SA109 ‹Residence, remittance basis etc' is the supplementary page to the SA100 main tax return for remittance basis users to complete under Self Assessment.

There is a box to claim the remittance basis on the SA109 and two boxes where the ‹amount of income you are nominating' and the ‹amount of capital gains you are nominating' must be entered. The amount nominated can be either income or gains or a combination of the two.

The source(s) of the amount nominated is the individual's personal choice.

When either or both of these boxes are completed the SA109 notes say that details of the nominations are to be shown in the "Any other information" box.

The required information is:

- the precise amounts of income and gains that have been nominated, (this should include the country of origin and the type and source of the income)
- the computation of the gain (if applicable)

- the exchange rates used[34]
- the calculation of the tax due in relation to the nominated income and gains.

Also if there have been deductions for expenses or losses from either foreign income or foreign gains in arriving at the final taxable amount, full details of the amounts and nature of those expenses or losses must also be provided.

All of this information is required to validate the nomination or nominations that have been made.

10.11.4 *Nominated income/gains charge*

Section 809H(2) ITA provides:

> Income tax is charged on nominated income, and capital gains tax is charged on nominated chargeable gains, as if s.809B did not apply to the individual for the relevant tax year (and neither did s.809D).

This disapplies the remittance basis, so nominated income and gains are taxed on the arising basis. I refer to this as the "**nominated income/gains charge**".

EN FB 2008 provides:

> 14. This charge is in addition to the tax liability for the year in question on any income and gains remitted to the UK, and any UK income or gains taxed on the arising basis. The £30,000 [now the applicable amount] will be paid on nominated income and gains not remitted to the UK in the year. (These income and gains are called "nominated" income and gains because the taxpayer is free to nominate the income and gains not remitted to the UK in the year on which tax of £30,000 is payable. For example, this could be £75,000 of unremitted foreign deposit interest on which UK tax was due at 40 per cent, so leading to an income tax charge of £30,000.)

10.11.5 *Remittance basis deficit charge*

The removal of the remittance basis for nominated income/gains might not yield the desired additional tax for various reasons. The individual might under-nominate, ie, they might not nominate enough income/gains. There is no requirement to nominate enough to give rise to a IT or CGT charge of the applicable amount. Indeed, it is not always possible to know how

34 See 55.8 (Nominated income and gains: currency conversion date).

much that would be. One could nominate just £1, as long as what is nominated is foreign income or gains. HMRC agree. The RDR Manual 32320 provides:

> **32320 Making a Nomination** [January 2014]
> *Insufficient nomination*
> Although an individual may choose to make an insufficient nomination RDRM32360 they must have foreign income and/or foreign chargeable gains from the tax year such that they can nominate something, even if only £1. This fulfils the mandatory requirement that a nomination **must** be made when making the claim.
> *Completing the self-assessment return*
> All claims and nominations are made on the individual's self assessment tax return. The minimum amount that can be nominated **is**£1 of foreign income or gains for the claim to be valid. Where a claim to the remittance basis is made under s809B but no nomination of either foreign income or capital gains is made the claim is invalid.[35]

According to EN Amendments to the Remittance Basis Charge, this was done to enhance confidentiality:

> 7. The legislation provides the option for those who can claim the remittance basis not to disclose anything about their unremitted income or gains as they can make a claim with a nominal £1 amount and do not have to specify what further foreign income or gains remain unremitted.

But it may not be in the interests of the taxpayer to under-nominate, and the confidentiality is illusory because HMRC are likely to make further enquiries.

The removal of the remittance basis for nominated income/gains might not yield the desired additional tax where the individual has some tax reliefs (eg loss relief, interest relief, DTRs, etc).

---

35 Similarly March 2009 Q&As provides:
"**Q7:** The question has arisen whether less than £1 (ie pence) can be nominated income. Given current interest rates there is concern that accounts specifically set up to generate nominated income may not generate £1 before 6 April 2009. The concern expressed is that because pence are rounded down on tax returns, it might be your view that there is no nominated income?
A: The minimum nomination of income or gains required to calculate the relevant tax increase is £1. This is the minimum figure to be declared on the relevant supplementary page of the Tax Return."
But where is the statutory authority for HMRC to disregard figures under £1?

Section 809H(4) ITA goes on to ensure that HMRC will receive their desired amount of tax:

> If the relevant tax increase would otherwise be less than the applicable amount,[36] subsection (2) has effect as if—
>
> (a) in addition to the income and gains actually nominated under s.809C in the individual's claim under s.809B for the relevant tax year, an amount of income had been nominated so as to make the relevant tax increase[37] equal to the applicable amount, and
>
> (b) the individual's income for that year were such that such a nomination could have been made (if that is not the case).

I refer to s.809H(4) as the "**deficit charge**". The deficit charge is a tax on deemed income (deemed nominated income) and not on any actual income of the taxpayer (if indeed the taxpayer has other income). Section 809H(6) ITA makes this clear (if necessary):

> Nothing in subs.(4) affects what is regarded, for the purposes of s.809I or 809J, as nominated under s.809C.

I use the term "**remittance basis claim charge**" to mean the two distinct (albeit related) charges:
(1) the nominated income/gains charge, under s.809H(2); and
(2) the deficit charge, under s.809H(4).
It might be more accurate to refer to remittance basis claim *charges* (in the plural). However for many purposes it does not matter that there may be

---

36 Section 809H(5B) provides:
"The applicable amount" is–
(a) if the individual meets the 12-year residence test for the relevant tax year, £50,000;
(b) if the individual meets the 7-year residence test for the relevant tax year, £30,000."

37 Section 809H(5)(5B) ITA repeats the definition of "the relevant tax increase" from s.809C(5) (5A):
"'The relevant tax increase' is—
(a) the total amount of income tax and capital gains tax payable by the individual for the relevant tax year, minus
(b) the total amount of income tax and capital gains tax that would be payable by the individual for the relevant tax year apart from subsection (2).
(5A) The references to income tax in subsection (5) do not include income tax under s.424 (gift aid)."
If there had been a chapter-wide definition the repetition would have been unnecessary.

two charges rather than one, (especially since in practice the second may not often arise) and it is convenient to use the singular label for them both.

10.11.6 *Interaction with Gift Aid*

Section 809H(5A) ITA provides:

> The references to income tax in subsection (5) do not include income tax under s.424 (gift aid).

The RDR Manual provides:

> **32450. Charitable Donations and Gift Aid** [January 2014]
> Chapter 2 of Part 8 ITA 2007 provides relief from tax for some gifts of money to charities that are made by individuals. This is known as 'Gift Aid'. One part of the Gift Aid rules is that the donor must pay at least as much UK income tax and/or capital gains tax in the tax year as the amount that is repayable to the charity.
> - Section 414(2)(a) ITA 2007 treats a qualifying donation as if it had been made after deduction of basic rate income tax.
> - If the donor has not paid enough UK income tax and capital gains tax to 'frank' the gift aid donations in a tax year, a further amount of income tax is charged to make up the shortfall (s.424 ITA 2007).
>
> The Remittance Basis Charge
> In exactly the same way as any other amount of income tax or capital gains tax, amounts of tax that are paid to satisfy the Remittance Basis Charge can be used to frank Gift Aid donations. That is because the remittance basis charge is 'income tax charged' or 'capital gains tax charged' on nominated income and/or gains.
> However, where the individual has:
> - chosen to use the remittance basis, and
> - claimed Gift Aid tax relief
>
> any income tax that is charged under s. 424 ITA 2007 is not taken into account when calculating the 'relevant tax increase' (see RDRM32330) that is required to produce the remittance basis charge (s.809C(5A) ITA 2007 and s.809H(5A)).
> Effect
> No matter how it is calculated, the Remittance Basis Charge is always £30,000 [or, in certain circumstances, from 6 April 2012, £50,000] – see RDRM32300.

For this topic, see Kessler and Marre, *Taxation of Charities and Nonprofit Organisations* (9th edition, 2013-14), para 15.41 (Donor pays insufficient tax) (online version *http://www.taxationofcharities.co.uk*).

10.11.7 *How much to nominate?*

It is important not to remit nominated funds to the UK. From that point of view it is convenient to under-nominate, ie nominate a nominal £1 only.

On the other hand, taxpayers who want to offset the remittance basis charge against foreign tax will want to nominate income or gains on which the foreign tax is at least equal to the applicable amount, or as close to the figure as possible; that requires a full nomination and some care in the choice of income/gains which are nominated.

10.11.8 *Remittance basis claim charge in cases of doubt over residence*

A person may be unsure whether or not they are UK resident in a year (residence if often unknowable) but know that they would be a long-term resident if actually UK resident in that year. That person may if appropriate make a remittance basis claim in that year, for the avoidance of doubt, and argue the residence position at leisure; if they are eventually held to be UK resident the remittance basis claim charge is due, but if non-resident the sum is not due. Nothing is lost by making the claim.[38] Section 809B does not apply unless the individual meets the conditions of s.809B(1)(a) and (b) in the year.

Alternatively a person may know that they are UK resident in a year but not know if they are a long-term UK resident in that year (because they are unsure whether or not they were resident in one or more earlier years). That person should make a remittance basis claim but not nominate any income or gains. The claim is valid if they are not long-term UK resident. The claim is invalid if they are long-term UK resident, so the remittance basis claim charge is not due (unless they proceed to make a new election and nomination).

On the other hand a remittance basis claim is effective (and the remittance basis charge payable) even if the individual has less than £2k unremitted income and gains, and so would qualify as a sub-£2k taxpayer. That would be an expensive box to tick in error!

10.11.9 *Minimising the remittance basis claim charge*

Basic tax planning for spouses will be to arrange that income and gains

38 Similar points arise if a person is unsure about their domicile in a year, but in practice that would be less common because domicile (unlike residence) is generally ascertainable.

accrue only to one of them, so that only one has to pay the remittance basis claim charge.

Basic planning for individuals who do not wish to pay the remittance basis claim charge every year is to time disposals and accruals so far as possible that foreign income and gains accrue before the 8th year of residence, and only once every few years subsequently (so a claim is only needed once every few years).

10.11.10 *Remittance basis claim charge: credit against foreign tax*

EN FB 2008 provides:

> 17. As the RBC consists of income tax or CGT paid on the arising basis ... the tax should be recognised as tax (on income or capital gains, as the case may be) for the purposes of our double taxation agreements.

The proposal in the Draft Clauses published January 2008 was for a simple charge of a fixed amount. This would not have qualified as a credit against foreign tax because it was not a tax on income or gains. HMRC presumably agreed, as the provisions were then recast in order that:

(1) The provisions took the form (so far as possible) of a charge on income or gains but

(2) the provisions had the effect (so far as possible) of a fixed charge.[39]

Article 24(1) of the UK/US DTA provides:

> In accordance with the provisions and subject to the limitations of the law of the United States (as it may be amended from time to time without changing the general principle hereof), the United States shall allow to a resident or citizen of the United States as a credit against the United States tax on income
>
> (a) the income tax paid or accrued to the UK by or on behalf of such citizen or resident ...

It is suggested that the *nominated income/gains charge* can in principle be set against foreign tax since it is an income tax or CGT. However the remittance basis *deficit* charge is not a charge on actual income, and cannot be set against foreign tax. HMRC agree. EN Amendments to the Remittance Basis Charge provides:

> 16. The individual claiming the remittance basis might decide to nominate only £50,000 of bank interest under s.[809C(2)] and pay

39 See too 10.11.12 (Remittance basis claim charge in year of arrival and departure).

£20,000 of the £30,000 under s.[809H(2)] (assuming higher rate tax is due on all the £50,000). Section [809H(4)] would then apply with the effect that further income of £25,000 is treated as nominated to bring a further £10,000 of income tax into charge. However if the individual intended claiming credit for all or part of the £30,000 under a DTA then DTA relief will only be due on the income or gains actually nominated under s.[809C(2)] – £50,000 of income and £20,000 of income tax in this example. The income tax paid on income treated as nominated under s.[809H(4)] = £25,000 of income and £10,000 of income tax in this example, will not qualify for relief under DTAs as it is not tax on specific nominated income.

It follows that a careful choice of what income or gains to nominate is important, because (if foreign tax allows credit for the UK tax) that can make up to £30k or £50k difference to the foreign tax liability.

The RBC might have been regarded as a fixed levy, merely disguised as an income tax by sleight of hand, but in America, the IRS have after some delay[40] accepted the HMRC view. The question is of course one for foreign law, not UK law. The US ruling made August 2011 provides:

Rev. Rul. 2011-19
ISSUE
Whether a credit is allowable under section 901 of the Internal Revenue Code for the Remittance Basis Charge (RBC) of £30,000.[41]
[The ruling outlined the UK tax rules and continues]
LAW AND ANALYSIS
Section 901 generally allows a credit for the amount of any income, war profits and excess profits tax (collectively, an income tax) paid or accrued during the taxable year to any foreign country or to any possession of the United States. A foreign levy is an income tax if and only if (i) it is a tax and (ii) the predominant character of that tax is that of an income tax in the US sense. §1.901-2(a)(1).
A. Single Levy or Separate Levies
Each levy must be analysed separately to determine if it is an income tax under section 901. §1.901-2(d)(1). For purposes of section 901, whether a single levy

40 One would like to know what discussions took place behind the publication of this statement. Perhaps in 2041 the relevant files will be made public.
For HMRC's opening shot in this debate see BN 107 accessible
(2008) Simon's Tax Intelligence, issue 11 (20th March 2008) annex

41 Author's note: The increase in the remittance basis charge in 2012 will not affect the reasoning.

or separate levies are imposed by a foreign country depends on US principles and not on whether foreign law imposes the levy or levies in a single or separate statutes. Where the base of a levy is different in kind, and not merely in degree, for different classes of persons subject to the levy, the levy is considered for purposes of section 901 to impose separate levies for such classes of persons. For example, regardless of whether they are contained in a single or separate foreign statutes, a foreign levy identical to the tax imposed under section 871(b) on a US nonresident alien individual's income that is effectively connected with the conduct of a US trade or business is a separate levy from a foreign levy identical to the tax imposed by section 1 on the income of a US citizen or resident, as the tax on nonresidents has a more limited scope and therefore is different in kind from the tax on the worldwide income of US citizens and residents.

Where foreign law imposes a levy that is the sum of two or more separately computed amounts, and each such amount is computed by reference to a separate base, separate levies are considered, for purposes of section 901, to be imposed. Amounts are not separately computed if they are computed separately merely for purposes of a preliminary computation and are then combined as a single base. §1.901-2(d)(1). For example, where excess deductible expenses allocated to one type of income are applied to reduce other types of income, a single levy exists, since despite a separate preliminary computation the bases are combined before computing the tax due. See §1.901-2(d)(3), Examples (3), (4), and (5).

1. The Remittance Basis and the Arising Basis of Taxation Are Separate Levies

Under both the arising basis and the remittance basis of taxation, a non-domiciliary is subject to tax on UK-source and non-UK-source income and gains. However, under the arising basis, a non-domiciliary is subject to tax on worldwide income and gains that arise or accrue in a particular taxable year; while under the remittance basis, a non-domiciliary is subject to tax only on UK-source income and gains and on non-UK-source income or gains that are remitted in a particular taxable year, whether the non-UK-source income or gains arise or accrue in the year remitted or in an earlier year. Thus, the bases of these levies are different in kind, and not merely in degree; therefore, the arising basis and remittance basis of taxation are considered for purposes of section 901 to impose separate levies.

2. The RBC, in Combination with the Remittance Basis of Taxation, is a Single Levy that is a Separate Levy

All non-domiciliaries who elect the remittance basis of taxation are subject to tax on their UK-source and remitted non-UK-source income and gains. In addition, long-term non-domiciliaries must pay the RBC on nominated but unremitted non-UK-source income and gains (and, if the amount nominated generates a tax charge of less than £30,000, on income or gains realized but not nominated and on imputed income such that the tax charge equals £30,000). Losses and deductions allocated to UK-source income or gains, remitted non-UK-source

income or gains, or nominated but unremitted non-UK-source income or gains may offset income or gains in another category in determining the amount of the long-term non-domiciliary's taxable income. Therefore, under §1.901-2(d)(1), despite a separate preliminary computation, the long-term non-domiciliary's UK-source income or gains, remitted non-UK-source income or gains, and unremitted non-UK-source income or gains giving rise to the RBC are combined in determining the long-term non-domiciliary's taxable income; therefore, the tax imposed on the sum of the long-term non-domiciliary's three separately computed amounts of income constitute a single levy (the Long-Term Non-Domiciliary (LTND) Levy).

A. The LTND Levy Is a Tax in the US Sense

A foreign levy is an income tax if and only if it is a tax and the predominant character of that tax is that of an income tax in the US sense. §1.901-2(a)(1). A foreign levy is a tax if it requires a compulsory payment pursuant to the authority of a foreign country to levy taxes. §1.901-2(a)(2)(i). The LTND Levy is a tax because it is required to be paid pursuant to the authority of the government of the UK to levy taxes.

A. The Predominant Character of the LTND Levy Is that of an Income Tax in the US Sense

The predominant character of a foreign tax is that of an income tax in the US sense if the tax is likely to reach net gain in the normal circumstances in which it applies, and liability for the tax is not dependent, by its terms or otherwise, on the availability of a credit for the tax against income tax liability to another country. §1.9012(a)(3). Liability for the LTND Levy is not dependent on the availability of a credit for the LTND Levy against income tax liability to another country.

Thus, whether the LTND Levy has the predominant character of an income tax depends on whether it is likely to reach net gain in the normal circumstances in which it applies. A foreign tax is likely to reach net gain in the normal circumstances in which it applies if and only if the tax, judged on the basis of its predominant character, satisfies each of the realization, gross receipts, and net income requirements set forth in §1.9012(b)(2), (b)(3), and (b)(4), respectively.

1. Realization

A foreign tax satisfies the realization requirement if, judged on the basis of its predominant character, it is imposed upon or subsequent to the occurrence of events that would result in the realization of income under the income tax provisions of the Code. §1.901-2(b)(2)(i)(A). A foreign tax that, judged on the basis of its predominant character, is imposed upon the occurrence of realization or pre-realization events described in §1.901-2(b)(2)(i) satisfies the realization requirement even if it is also imposed in some situations upon the occurrence of events not described in that paragraph. For example, a foreign tax that, judged on the basis of its predominant character, is imposed upon the occurrence of realization events satisfies the realization requirement even though the base of that

tax also includes imputed rental income from a personal residence used by the owner. §1.901-2(b)(2)(i).

The UK-source and remitted non-UK-source income and gains of a long-term non-domiciliary electing the remittance basis of taxation generally are computed on the basis of amounts that satisfy the realization requirement. In addition, the income or gains nominated for purposes of the RBC must be part (or all) of the non-UK-source income and gains arising or accruing in that taxable year. Income tax is charged on nominated income, and capital gains tax is charged on nominated gains, as if the arising basis applied for the relevant taxable year. In other words, the nominated income and gains are subject to tax, even though they have not been remitted in the taxable year. Thus, the RBC is imposed on nominated income or nominated gains that have been realized or accrued in the taxable year.

If the long-term non-domiciliary realizes or accrues, but fails to nominate, sufficient income or gains, with the result that the tax charge on nominated income would be less than £30,000, an amount of income or gains is deemed to be nominated so as to make the tax charge equal £30,000. Thus, income or gains that have been realized or accrued but not nominated will be subject to the RBC. If a long-term non-domiciliary elects the remittance basis but does not have sufficient realized or accrued income or gains to make the tax charge equal £30,000, the long-term non-domiciliary is deemed to have sufficient realized or accrued income or gains and to have nominated such imputed income or gains to make the tax charge equal £30,000.

Section 1.901-2(b)(2)(i) states that, as provided in §1.901-2(a)(1), a tax either is or is not an income tax, in its entirety, for all persons subject to the tax; therefore, a foreign tax on a base that includes imputed rental income will satisfy the realization requirement even though some persons subject to the tax will on some occasions not be subject to the tax except with respect to such imputed income. However, a foreign tax based only or predominantly on such imputed income would not satisfy the realization requirement. Although it is possible for a long-term non-domiciliary to elect the remittance basis without having sufficient non-UK-source income or gains to support a £30,000 tax charge, in which case the base of the tax would include imputed income or gains, it is highly unlikely that substantial numbers of long-term non-domiciliaries in this situation would elect to be taxed on the remittance basis. Accordingly, it is reasonable to conclude that the RBC is not based only or predominantly on such imputed income or gains. The RBC in general is imposed on realized income or gains, whether nominated by the long-term non-domiciliary or considered by the UK statute to have been nominated. Thus, judged on its predominant character, the LTND Levy meets the realization test.

1. Gross Receipts

A foreign tax satisfies the gross receipts requirement if, judged on the basis of its

predominant character, it is imposed on the basis of gross receipts or gross receipts computed under a method that is likely to produce an amount that is not greater than fair market value. §1.901-2(b)(3)(i). A foreign tax that, judged on the basis of its predominant character, is imposed on the basis of amounts described in §1.9012(b)(3)(i) satisfies the gross receipts requirement even if it is also imposed on the basis of some amounts not described in that paragraph. As is the case with income and gains that are taxed under either the arising basis or the remittance basis, nominated income and gains subject to the RBC generally are based on gross receipts. Therefore, the LTND Levy meets the gross receipts test.

1. Net Income

A foreign tax satisfies the net income requirement if, judged on the basis of its predominant character, the base of the tax is computed by reducing gross receipts to permit recovery of the significant costs and expenses (including significant capital expenditures) attributable, under reasonable principles, to such gross receipts; or recovery of such significant costs and expenses computed under a method that is likely to produce an amount that approximates, or is greater than, recovery of such significant costs and expenses. §1.901-2(b)(4)(i). Since the LTND Levy is imposed on UK-source income and gains, remitted non-UK-source income and gains, and nominated but unremitted non-UK-source income and gains, all of which consist of gross receipts less costs and expenses, the LTND Levy satisfies the net income requirement.

1. Conclusion

Because the LTND Levy is likely to reach net gain in the normal circumstances in which it applies, it has the predominant character of an income tax in the US sense.

HOLDING

Because the LTND Levy is a tax (within the meaning of §1.901-2(a)(2)), and its predominant character is that of an income tax in the US sense, the LTND Levy, including the Remittance Basis Charge (RBC) of £30,000, is an income tax for which a credit is allowable under section 901. However, a credit for the LTND Levy will be available only if the other legal requirements for obtaining a foreign tax credit are satisfied. For example, an amount paid is treated as a compulsory payment of income tax only to the extent the taxpayer applies the substantive and procedural provisions of foreign law, including elective provisions such as those available under UK law relating to the LTND Levy, in such a way as to reduce, over time, the taxpayer's reasonably expected liability under foreign law for income tax. §1.901-2(e)(5).

Taxpayers generally may rely upon revenue rulings to determine the tax treatment of their own transactions and need not request a ruling that would apply the principles of a published revenue ruling to the facts of their own particular cases. However, because each revenue ruling represents the conclusion of the Internal Revenue Service (IRS) as to the application of the law to the specific facts

involved, taxpayers, IRS personnel, and others concerned are cautioned against reaching the same conclusion in other cases unless those cases present facts and circumstances that are substantially the same as those in the revenue ruling. §601.601(d)(2)(v)(e). Accordingly, because the provisions of UK law described in this revenue ruling are facts on which this revenue ruling bases its holding, a taxpayer may not rely on the revenue ruling if the relevant provisions have been amended in any material respect, and the taxpayer is responsible for determining whether any such modification has occurred.[42]

The US ruling concludes with a paragraph which one would not find in the UK:

> **DRAFTING INFORMATION**
> The principal author of this revenue ruling is Teresa Burridge Hughes of the Office of Associate Chief Counsel (International). For further information regarding this revenue ruling, contact Ms. Hughes at (202) 622-3850 (not a toll-free call).

What an good thing it would be if in the UK HMRC statements and regulations similarly identified a principal author who would take responsibility - both credit for the good and blame for mistakes.[43]

10.11.11 *Individual treaty non-resident*

The RDR Manual provides:

> **RDRM32250 Dual residents - treaty non-resident** [March 2014]
> It is possible for individuals to be resident both in the UK and in another country or countries in a tax year. In such a case we look to the provisions of existing Double Taxation Agreements (DTAs) to determine in which country the individual is resident for treaty purposes. So a person may be resident in the UK under UK law, but regarded as 'treaty resident' elsewhere and consequently treated for tax purposes as 'not resident' in the UK.
> An individual who is, under the terms of a DTA, resident in the other country or territory but is also a long-term resident RDRM32200 in the UK (that is someone who has been resident in the UK n at least seven out of the previous nine tax years) and claims the remittance basis is, if their un-remitted foreign income and gains is £2,000 or more, liable to pay the

42 *http://www.legalbitstream.com*.

43 Contrast the rule in the FA 2009 that a senior accounting officer of large companies must take a personal responsibility for the company's tax returns.

> £30,000 remittance basis charge, or for 2012/13 or later the £30,000 or £50,000 remittance basis charge.

It is considered that DT relief is in principle available against the nominated income/gains charge, but not against the remittance basis deficit charge. The effect of claiming DT relief against nominated income or gains is to reduce the remittance basis claim charge on the nominated income or gains, but to increase the deficit charge by the same amount.

This certainly defeats the spirit of any DTA. It may also breach the DTA itself. But the intention of Parliament is clear, and the doctrine of parliamentary sovereignty allows Parliament to breach DTAs.[44] How our treaty partners will react to this will be interesting to see.

The RDR Manual continues:

> **32250 Dual residents - treaty non-resident** [March 2014]
> ...
> In determining the number of years in which an individual has been resident in the UK for the purposes of the long-term resident provisions, you count all years where the individual is resident in the UK under UK domestic law even if the individual was treaty resident in another territory in some or all of those years.

This is correct.[45] The RDR Manual continues with some tax planning advice:

> In most cases, an individual resident both in the UK and in another country and who under the Double Taxation Agreement with the other country is treated as resident in that other country (for the purpose of applying the provisions of the DTA) will be chargeable to tax in the other country on income and gains that originate in that other country and not in the UK. The treatment of any income and gains that originate in third countries (not the UK or the country of treaty residence) will depend upon the terms of the DTA between the UK and the country of residence.
> Where, exceptionally, an individual is chargeable to tax in the UK on such income or gains, they will need to consider whether a claim for the remittance basis of taxation is in their best interests or if, instead, they should pay tax on the arising basis and in the usual way, claim a credit for the tax charged in the other territory.

---

44 See *Padmore v IRC (No.2)* [2000] STC (SCD) 356.

45 See 6.2 (Relationship between treaty-residence and UK-law residence).

10.11.12 *Remittance basis claim charge in year of arrival and departure*[46]

There is no split year rule, so the remittance basis claim charge is payable in full if the remittance basis is claimed, even in split years.[47]

What is the reason for that rule? If the remittance basis claim charge is a tax on the nominated income or gains, the split year rule should logically apply. The reason is that the charge is intended only to take the form of a tax on the nominated income or gains, and it is intended to have the effect of a fixed charge.

10.11.13 *Administration*

The RDR Manual provides:

> **32210 Long-term residents and the remittance basis charge - overview** [March 2014]
> ... The remittance basis charge is payable through and collected by the SA regime, and an SA tax return must be filed. The SA109 ‹Residence, remittance basis etc' supplementary return should be completed and filed for this purpose. Also refer to RDRM32020 ‹Making a claim'.

So a long-term resident who wishes to claim the remittance basis will need to file an SA tax return in order to pay the remittance basis charge.

Of course the charge could not be collected through PAYE. For one thing, the charge might be a charge to CGT and even if it is income tax it need not be a charge on employment income. Also the claim on which the charge depends will be made in the tax return some time after PAYE is due.

HMRC Brief 17/09 provides:

> The rules for nominating income and gains upon which the £30,000 is paid, and the rules for identifying what is taxed if those nominated income or gains are later remitted to the UK, can be complex. To help ensure individuals who pay the £30,000 get the right level of customer support [!] from HMRC, we have decided that most individuals who pay the £30,000, or have paid it in the past, will have their tax affairs dealt with in one HMRC office from 2009-10. This will be the CAR Residency office in Castle Meadow, Nottingham.
> Customers who are sent a self assessment return by a different office should make the return to the office issuing that return. Once the return

---

46 For the distinct issue of the interaction of the split-year rules and the definition of "long-term UK resident" see 10.11.2 ("Long-term UK resident").

47 See 7.1 (Default rule: individual regarded as resident throughout tax year).

has been received by HMRC we will arrange for the individual's tax records to be transferred to the CAR Residency office in Nottingham and advise the individual and any agent, accordingly. Until such time as individuals or their agents receive such a notification they should continue to deal with their current tax office.

10.11.14 *Interaction with payments of IT on account*

The RDR Manual provides:

> **32390 Payments on account - interaction with the remittance basis charge (RBC)** [January 2014]
> The remittance basis charge is tax on nominated income or nominated gains, (or a mixture of the two) ...
> To the extent that the remittance basis charge consists of income tax, the payment on account position for those paying the charge is the same as that for any other SA taxpayer. This means their payments on account are based their income tax liability for the previous year (TMA1970/s59A(1)).
> The SA109 ‹Residence, remittance basis etc' supplementary pages to the SA tax return must be completed to both claim the remittance basis and nominate income or gains and pay the remittance basis charge.
> *Effect and treatment of income*
> If paying part or all of the remittance basis charge in respect of nominated income, then income tax will be due. The amount which has been nominated from income and produced income tax will need to be taken into account and included in the overall calculation of payments on account for the following year.
> If an insufficient nomination is made to produce the remittance basis charge of either £30,000 or £50,000 (ITA07/s809H(4)) the additional amount treated as nominated will always produce income tax. This also has a bearing on the payments on account position, even though the additional nominated amount is from an unidentified and unspecified amount of income. The additional amount nominated from income will automatically produce income tax that will become part of the individual's payment on account calculation for the following year.
> *Effect and treatment of capital gains*
> Capital gains tax is not included in computing payments on account, so any of the remittance basis charge that is constituted of capital gains tax will not form any part of the following year's payments on account.
> *Example (Ricardo)*
> R, a non-domiciled long-term resident has an income tax liability of £200,000 for tax year 2007-08. Subsequently he makes payments of £100,000 on 31 January 2009 and on 31 July 2009 on account of his liability for 2008-09.
> His tax liability for 2008-09 is £250,000, which includes for the first time the £30,000 remittance basis charge. The remaining £220,000 is income tax on UK sources. R nominated only £21,000 of his foreign income which led to a charge of £8,400 income tax; he also nominated £120,000 foreign chargeable gains which led to a capital gains tax of charge £21,600. Together these amounts make up his £30,000 remittance basis tax charge.

R's payments on account for 2009-10 will be calculated using the £220,000 income tax paid on UK income sources in 2008-09, plus the £8,400 income tax element of the remittance basis charge. This means that he will make payments on account of £114,200 on 31 January 2010 and on 31 July 2010 on account of liability for 2009-10. ...

32400 Payments on account – nominations involving chargeable gains [January 2014]

Capital gains tax included in the calculation of liability for a year is not included in computing payments on account for the next year. Any part of the remittance basis charge that is tax on nominated foreign gains will not form part of the following year's payments on account.

There is an additional box to complete on the SA109, if a nomination of capital gains is made to ensure that the capital gains tax forming part of the remittance basis charge for a year is ignored for the purpose of calculating the next year's payments on account..

This box is called ‹Adjustments to payments on account for capital gains' and must be completed if any nomination of capital gains is made.

This box is not completed if a nomination of income only has been made, as any amount nominated from income will be taken into account in computing the overall payments on account liability for the following year.

The amount entered in the ‹Adjustment to payments on account for capital gains' box on the SA109 is required in order for the payments on account to be calculated correctly for subsequent years:

- where a taxpayer calculates their own liability to tax, the amount for capital gains tax entered in the box to adjust payments on account, should be excluded in their calculation of payments on account
- if the tax calculation summary page is used the first payment on account for the following year will not include any part of the amount entered for capital gains in the adjustment to payments on account box.

Example involving an amount of capital gains in the ‹Adjustment to payments on account for capital gains' box:

R, claims the remittance basis in 2008-09 and nominates both foreign income and foreign gains to pay the £30,000 remittance basis charge.

He nominates as follows:

£21,000 of relevant foreign income	@40%	£8,400
£120,000 of foreign chargeable	@18%	£21,600
		£30,000

The amount of £21,600 for capital gains tax should be entered in the ‹Adjustment to payments on account for capital gains' box as this amount is excluded in calculating payments on account for the following year. Only the £8,400 tax that is chargeable on nominated income is taken into account when calculating the amount due as payments on account.

If the entire amount nominated to pay the remittance basis charge comes from capital gains then the capital gains tax element of the remittance basis charge is not included in the calculation of the payments of account. In this case the full £30,000 from nominated gains will be entered in the ‹Adjustment to payments on

account for capital gains' box.

32410 Payments on account - first-year of paying RBC [June 2010]

The remittance basis charge is only payable from tax years 2008-09 onwards by long-term residents making a claim to use the remittance basis.

For example, if a remittance basis claim is made in 2008-09 and the remittance basis charge is due, then the first year that any payments on account can be considered in relation to the remittance basis charge is 2009-10 unless there is a claim to reduce ...

The fact that their tax liability for 2008-09 will be increased for those paying the remittance basis charge has no effect on the payments on account position for 2008-09 (unless there is a claim to reduce them) but, to the extent that the remittance basis charge is income tax, it will be taken into account when calculating payments on account for 2009-10.

The remittance basis charge for 2008-09 is not due for payment until 31 January 2010 when it can be paid as part of any balancing payment for the year

The same principle applies to the payment on account position in relation to the remittance basis charge for any first year that a claim to the remittance basis is made, and the remittance basis charge is due. Payments on account will not generally be affected until after the first year in which they pay the remittance basis charge (TMA70/s59A(2)).

32420 Payments on account: no remittance basis charge due in following year [June 2010]

When the remittance basis of taxation is **not** claimed in a year following one where the remittance basis has been claimed and the remittance basis charge was paid, the amount of income used to pay part or all of the remittance basis charge may be excluded from the calculations of payment on account.

To allow this to happen, a claim to reduce payments on account may be made on form SA 303. Further information on the rules and the time-limits for making a claim to adjust payments on account can be found in the Self Assessment Manual under SAM1110.

32430 Claim to reduce Payments on Account (PoA) [June 2010]

The payment on account (PoA) position in relation to the remittance basis charge will be affected by any claims to reduce payments on account.

Where the RBC is paid in the previous year on nominated income, the amount feeds through to the individual's payments on account (PoA) for the next year, unless the individual makes a claim to reduce their PoAs on the grounds that their income tax liability for that year will be less than the sum of the two PoAs. For example this could be because they will not claim the remittance basis for the following year. If they subsequently do claim the remittance basis and pay the remittance basis charge in the following year and the income tax due for that year exceeds the sum of the PoAs made we will charge interest on the reduction in the PoA.

This is shown in the example below:

Stage 1

The return shows liability to income tax, which includes the RBC, partly or fully paid in respect of nominated income. The payments on account due on 31 January and 31 July are half of the relevant amount of income tax (TMA70/s59A).

For example, Marie-Clare's 2008-09 income tax liability is £55,000, of which £25,000 related to tax on UK source income, and the remainder is the £30,000 RBC (all in respect of nominated foreign income). Nothing is taxed at source. Her payments on account for 2009-10, payable on 31 January 2010 and 31 July 2010 will each be £27,500.

Stage 2

If the individual does not intend to use the remittance basis for the following year, and so they will not be subject to the remittance basis charge, they can claim to reduce the PoAs.

In the Marie-Clare example, if she does not think she will claim the remittance basis and so will not need to pay the remittance basis charge for 2009-10 she could reduce her payments on account for 2009-10 to £12,500 each, that is 50% of her 2008-09 income tax liability of £25,000 (if the remittance basis charge is excluded). She will of course still have to consider her other income sources and overall expected income tax liability for the year in making this decision.

Stage 3

If the individual subsequently decides to claim the remittance basis and to pay the £30,000 remittance basis charge and a claim to reduce payments on account has been made which resulted in insufficient PoAs being made, then interest will be charged from the due date for the payments on account until a claim to increase payments on account is made or payment is made for the year is paid to stop interest accruing (TMA70/s86).

In the Marie-Clare example, she has claimed to reduce her payments on account to omit the remittance basis charge, so she only makes payments on account of £25,000 (two lots of £12,500). When she files her 2009-10 self-assessment return her UK income has remained, as expected, at £25,000. However she now decides to claim the remittance basis and so she has to pay the remittance basis charge. As she has erroneously claimed to reduce her payments on account in the year, she will be charged interest on the payments that she should have made, that is, on £15,000 from 31 January 2010 and £15,000 from 31 July 2010 until the date these amounts are paid.

See Self-Assessment Manual – Legal Framework SALF303 for further information on claims to reduce payments on account.

Example 1 (Eva)

- E claimed the remittance basis and paid the remittance basis charge in 2008-09, and her income tax liability produces two payments on account for 2009-10 of £120,000 each.
- E has decided that she will not be claiming the remittance basis in 2009-10 so will not pay the remittance basis charge. E makes a claim to reduce the amount due on account of her tax liability to £200,000 due to a drop in income and because she will not pay the remittance basis charge in 2009-10. When E files her 2009-10 return in September 2010 it shows that the tax due on income is £200,000, but these are provisional figures as E is awaiting some details from her foreign bankers in relation to some foreign transactions.
- The two £100,000 payments on account appear "correct" at this stage. In November 2010 E receives the information from her foreign bankers and decides to amend her return and to claim the remittance basis. She nominates

some foreign income and has to pay the remittance basis charge of £30,000, all constituting income tax, bringing her total liability to £230,000.

- E will be charged interest on the £30,000 reduction in her payments on account on the grounds that E should not have reduced them.

Example 2 (Vali)

- V had no foreign income or gains arising in 2008-09, so he did not claim the remittance basis and so he did not need to pay a remittance basis charge in 2008-09.
- V's income tax liability for 2008-09 produces two payments on account of £200,000 for 2009-10. No claim is made to reduce the payments on accounts.
- When V begins to prepare his 2009-10 return he has a liability of £420,000 income tax on UK sources, so his £400,000 payments on account were correct, based on Vali's previous year's income tax liability.
- V has foreign income arising in 2009-10 and he decides to claim the remittance basis in his 2009-10 return. As a long-term but non-domiciled resident V has to pay the remittance basis charge of £30,000 bringing his total liability to £450,000. Interest will not be charged on the additional £50,000 tax due, as long as this is paid by the proper due date.[48]

10.11.15 *Interaction with Scots rates of tax (from 2016)*

HMRC say:

> Long-term UK residents who are not domiciled here can pay an annual charge to be taxed under the remittance basis (currently £30,000). This will not be affected by the introduction of the Scottish rate of income tax. Payments of the charge due from Scottish taxpayers will continue to be paid direct to the UK Exchequer.[49]

10.11.16 *Commentary*

The rules set out in this section can only be described as bizarre. Their purpose is to ensure the deduction of the RBC for foreign (in particular, US) tax. HMRC openly acknowledge this:

> 2.99 The Government sees no case for more fundamental simplification of the nominated income rules. The identification rules ensure that non-domiciles cannot gain a tax advantage by remitting their nominated income or capital gains to the UK before other income and capital gains on which they would be taxed. Removing the nominated income rules would call into question the creditability of the RBC for US tax purposes. Therefore, wider simplification of these rules would carry an

48 See too March 2009 Q&As Q18.

49 HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (May 2012) para 61.

unacceptable risk.[50]

10.12 Nature of charge on remitted RFI

Section 809F(1) ITA provides:

> This section applies if s.809B, 809D or 809E applies to an individual for a tax year.

That is, the section applies to remittance basis taxpayers. Section 809F(3) ITA provides:

> The individual's relevant foreign income for that year is charged in accordance with s.832 of ITTOIA 2005.

So we turn to s.832(1) ITTOIA which provides somewhat repetitively:

> This section applies to an individual's relevant foreign income for a tax year ("the relevant foreign income") if s.809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year.

We find the rule at last in s.832(2) ITTOIA:

> (2) For any tax year for which the individual is UK resident, income tax is charged on the full amount of so much (if any) of the relevant foreign income as is remitted to the United Kingdom—
>
> (a) in that year, or
>
> (b) in the UK part of that year, if that year is a split year as respects the individual.

At first glance it may seem that IT is charged on remitted RFI and not on unremitted RFI. It is not that simple. The scheme of the rewritten legislation is that for every category of income there is:
(1) a charging provision; and
(2) a provision specifying the amount of income on which tax is charged.
For instance, in relation to dividends from non-resident companies, s.402 ITTOIA provides:

> **402 Charge to tax on dividends from non-UK resident companies**
> (1) Income tax is charged on dividends of a non-UK resident company.
> ...

---

50 HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (December 2011) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

> **403 Income charged**
> (1) Tax is charged under this Chapter on the...amount of the dividends arising in the tax year.
> (2) Subsection (1) is subject to ... Part 8 (foreign income: special rules).

The (subtle) point is that IT is *charged* on dividends under s.402 ITTOIA. Section 403 ITTOIA does not impose a charge. It merely quantifies *the amount on which income tax is charged.* Likewise s.832(2) ITTOIA does not impose a charge, it merely quantifies *the amount on which income tax is charged*.[51] The distinction does matter. For instance, references to "income chargeable to income tax" in principle include unremitted income taxable on the remittance basis.[52] However the context may show that the word "chargeable" is used in a narrower sense so as not to include unremitted income (un)taxed on the remittance basis.

10.13 Charge on remitted gains

Section 809F ITA provides:

> (1) This section applies if s.809B, 809D or 809E applies to an individual for a tax year...
> (4) The individual's foreign chargeable gains for that year are charged in accordance with s.12 of TCGA 1992.

So we turn to s.12(1) TCGA which provides (somewhat repetitively):

> This section applies to foreign chargeable gains accruing to an individual in a tax year ("the foreign chargeable gains") if section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year.

We find the rule at last in s.12(2)(3) TCGA:

> (2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the UK.
> (3) The amount of chargeable gains treated as accruing is equal to the full amount of the foreign chargeable gains so remitted in that year. ...

---

51 Hence the legislation states that tax is charged "in accordance with" s.832 not *under* s.832. See eg ss.13, 14, 16 ITA.

52 The distinction explains why foreign dividend income taxable under remittance basis in 2005/06 and 2006/07 was taxable at the dividend upper rate and not at the higher rate (though this is now of historic interest only); see the 6th edition of this work para 28.4.3.

While non-ordinary residence is sufficient to qualify for the RFI remittance basis, foreign domicile is needed for CGT.

10.14 Remittance in year after income/gains arise

Suppose:
(1) Income or gains accrue to T (a remittance basis taxpayer) on or after 2008/09 and
(2) The sum is remitted in a subsequent year (in which T is still resident).
The income or gains are taxable in the year of remittance. There is no time limit so income or gains may be taxed many decades after they accrue.

10.14.1 *Transitional rule for pre-2008 income and gains*

Suppose:
(1) RFI accrues to T before 2008/09 and
(2) The RFI is remitted in 2008/09 or later (when T is still resident).
In the absence of a transitional rule, the income would not be taxable under s.832 ITTOIA because the condition in s.832(1) would not be met. Sections 809B, 809D or 809E did not apply before 2008. Para 83 Sch 7 FA 2008 fills that gap for RFI:

> (1) This paragraph applies to an individual's relevant foreign income for the tax year 2007–08 or any earlier tax year ("the relevant tax year") if—
> (a) the individual made a claim under s.831 of ITTOIA 2005 for the relevant tax year, or
> (b) s.65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the relevant tax year.
> (2) Section 832 of ITTOIA 2005 (as amended by this Part of this Schedule) applies in relation to the relevant foreign income as if s.809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year.

Thus pre-2008 RFI is taxed under s.832(2) if remitted from 2008/09 (as one would expect).

The same applies to gains. In the absence of a transitional rule, pre-2008 gains would not be taxable from 2008/09 because the condition in s.12(1)(a) TCGA would not be met. Para 84 Sch 7 FA 2008 fills that gap:

> (1) This paragraph applies if s.12 of TCGA 1992 (or any corresponding superseded enactment) applied in relation to a gain accruing to an individual in the tax year 2007-08 or any earlier tax year ("the relevant

> tax year").
> (2) Section 12 of TCGA 1992 (as amended by this Part of this Schedule) applies in relation to that gain as if s.809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year.

10.14.2 *Income arising before 2005/06 remitted before 2007/08: ITTOIA transitional rules*

Para 150 Sch 2 ITTOIA provided:

> A claim may be made under s.831 (claim for relevant foreign income to be charged on the remittance basis) for relevant foreign income to be charged in accordance with s.832 for the tax year 2005–06 or any later tax year, despite that income having arisen in a tax year before the tax year 2005–06; and ss.832 to 834 apply accordingly.

ITTOIA EN Vol 3 para 347 explains:

> This paragraph ensures that Chapter 2 of Part 8 of this Act is not restricted in its operation to income that arose after the tax year 2004–05 (whenever the earlier income is remitted).

Para 150 was not aptly worded, but what it meant was this: if a s.831 claim is made in 2005/06, 2006/07 or 2007/08, pre-ITTOIA income (which was not taxed on receipt because a claim was made under the former s.65 ICTA) is taxed under s.832 ITTOIA if remitted in that year.

10.14.3 *Income arising before 2005/06 remitted from 2008/09*

FD Draft Clauses EN 2008 provided:

> 121. Para 47 deletes paras 150 and 151 of Schedule 2 (transitional provisions), which set out transitional arrangements for the application of the remittance basis to certain relevant foreign income arising before the tax year 2005-06. These are now considered obsolete in light of the amendments in this Schedule.[53]

10.15 Remittance after acquisition of UK domicile

Suppose:
(1) RFI/gains accrue to T (a remittance basis taxpayer).
(2) T acquires a UK domicile and for that reason ceases to be a remittance

53 The equivalent passage in EN FB 2008 para 380 is less informative.

basis taxpayer. T remains UK resident.
(3) T subsequently remits the sum.
This is taxable under the ITA remittance basis.

10.15.1 *Transitional rules for pre-2008 RFI/gains*

The rule for the pre-2008 RFI remittance basis was that there was no IT charge on a remittance after acquisition of a UK domicile. It is considered that the same applied for the pre-2008 CGT remittance basis, though HMRC did not accept that.
Suppose:
(1) RFI/gains accrued to T before 2008/09.
(2) T became UK domiciled before 2008/09.
(3) The income/gains are remitted from 2008/09.
T is taxable on the remitted income under s.832(2) ITTOIA. The tax charge is retrospective in that pre-2008 RFI/gains outside the scope of tax has now fallen within the scope of tax.

What is the position if an individual acquires a UK domicile before 6/4/2008 and remitted the income or gains before then? It is suggested that there is no charge because of the cap on the amount remitted; see 11.29.5 (Cap on amount remitted).

10.16 Remittance in year when taxed on arising basis

Suppose:
(1) RFI accrues to T from 2008/09 in a year in which T is a remittance basis taxpayer.
(2) T subsequently remits the income in a year in which T is not a remittance basis taxpayer (because T's foreign income and gains exceed the £2k limit and T does not claim the remittance basis).
T is taxable on the remitted income under s.832(2) ITA.

10.16.1 *Transitional rules for pre-2008 RFI*

The rule for the pre-2008 RFI remittance basis was that there was no charge on a remittance in a year in which no claim was made for the RFI remittance basis. HMRC accepted that (at least for years when ITTOIA applied). The new rule applies to pre-2008 RFI remitted from 2008/09. The tax charge is retrospective in that pre-2008 RFI/gains outside the scope of tax has now fallen within the scope of tax.

If RFI was remitted before 2008/09, it is considered that there is no charge because of the cap on the amount remitted; see 11.29.5 (Cap on amount

remitted).

10.17 RFI/gains arising when resident, remitted when non-resident

Suppose:
(1) RFI or gains accrue to T (a remittance basis taxpayer).
(2) T remits the sum to the UK in a year when non-resident.
RFI is not taxable in the year of remittance, because the conditions in s.832(2)(a) ITTOIA are not met. Gains are not taxable in the year of remittance because although the conditions of s.12 TCGA are satisfied (remitted gains are treated as accruing when remitted) the individual (being non-resident) is not subject to tax on chargeable gains.

The temporary non-residence rules need to be considered.

10.18 Remittance after death

Suppose:
(1) RFI or gains accrue to T (a remittance basis taxpayer).
(2) T dies, and the sum is received in the UK after the death.
In the following discussion,

"The tax year of death" is the tax year in which T dies.

"Post-death tax year" means any subsequent tax year.

If RFI is received in the UK in a post-death tax year, no IT charge arises because the requirement in s.832(2) ITTOIA is not met: the year of remittance is not one "for which the individual is UK resident".

If gains are received in the UK in a post-death tax year, no CGT charge arises because the requirement in s.12(1) TCGA is not met: the year of remittance is not one for which s.809B, 809D or 809E ITA (remittance basis) applies to the individual.

There is no taxable remittance if funds are received in the UK after the death but in the tax year of death. Property cannot be received in the UK by T (who is dead) or by a relevant person (there are no relevant persons in relation to a dead person); so remittance condition A cannot be satisfied.

For employment income, see 22.25 (Receipt or remittance after death of employee).

10.19 Remittance after source has ceased

Section 832(3) ITTOIA provides:

> Subsection (2) applies whether or not the source of the income exists when the income is remitted.

10.19.1 *Transitional rules for pre-2008 RFI*

The rule for the pre-2008 RFI remittance basis was that there was no charge on a remittance from a source in a year after the source has ceased. Suppose:

(1) RFI accrued to T before 2008/09.
(2) The source of the RFI ceased before 2008/09.
(3) The RFI is remitted from 2008/09.

Is T taxable on the remitted income under s.832(2) ITTOIA? Yes, the tax charge is retrospective in that pre-2008/09 income previously outside the scope of tax has now fallen within the scope of tax. It does not matter when the income arose or the source ceased: income arising in the 1950s could now come into charge, though all records relating to it would have been long discarded.

STEP rightly comment:

> It appears that any source ceased funds, whenever the source ceased will be caught by the new rules. The effect of this is to retrospectively change the nature of these funds and this is unfair. If this is to be the case then taxpayers who have used this technique may have placed the funds in capital accounts which will, as a consequence of the changes to the rules, now be classified as mixed accounts. Not only do the mixed account rules fail to take into account the change in nature of these funds which were capital on 5 April 2008 and income on 6 April 2008, but there does not seem to be any clear way to separate out these funds now as the mixed account rules only apply to remittances to the UK. Whilst STEP does not object to the change in these rules for the future, we do feel that it is unfair to impose additional tax and reporting burdens on taxpayers who used a technique in the past which HMRC recognised and accepted when they used it.[54]

What if the source ceased and T remitted the income before 2008/09? Even if the transitional rule does not provide relief, it is considered that there is no charge because of the cap on the amount remitted; see 11.29.5 (Cap on amount remitted).

HMRC accept that there is no charge on pre-2008 deemed gains.[55] The same reasoning must apply here so it is considered that pre-2008 source-ceased income, which was remitted to the UK prior to 6 April 2008,

---

54 STEP Representations on the FB 2008.

55 See 11.30.6 (Transitional rules: pre-2008 gains).

remains non-taxable.

10.20 RFI/gains arising when non-resident, remitted when resident

Suppose:

(1) A non-resident individual receives RFI or gains. The income or gains are not of course taxed as they arise.

(2) The individual becomes UK resident, and subsequently remits that sum when taxable under the remittance basis.

RFI remitted is not taxed on remittance as the condition in s.832(1) ITTOIA is not met. Gains remitted are not taxed on remittance because the condition in s.12(1) TCGA is not met.

FAQ Remittances (April 2008) correctly states:

> **Where a non-domiciled individual not resident in the UK, has purchased assets abroad out of income that has not been taxed in the UK, then moves to the UK and becomes resident, will the importation of those assets in the first year be taxed as a remittance?**
> No. As the untaxed income arose while the individual was not UK resident, there is no charge unless the proposed new s.832A ITA 2007 applies (temporary foreign residence).

10.21 RFI from Ireland

The UK/Ireland DTA also needs to be considered but it is not discussed here. Similar points arise in relation to earnings: see 22.28 (Earnings from Ireland).

10.21.1 *Income from 2008/09*

The position for income from 2008/09 is straightforward. The ITA remittance basis treats Irish source income in the same way as any other foreign income. The FA 2008 repealed the rule of the pre-2008 remittance basis which provided (unlawfully and probably ineffectively[56]) that Irish income was taxed on an arising basis.

10.21.2 *Pre-2008 Irish income remitted from 2008/09*

This change raised the problem of transition. Para 83 Sch 7 FA 2008 provides:

---

56 The point is discussed in the 6th edition of this work para 9.51 and the 2012/13 edition para 9.1920 (RFI from Ireland).

> (1) This paragraph applies to an individual's relevant foreign income for the tax year 2007-08 or any earlier tax year ("the relevant tax year") if—
>
> (a) the individual made a claim under section 831 of ITTOIA 2005 for the relevant tax year, or
>
> (b) section 65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the relevant tax year. ...
>
> (3) But nothing in section 832 of ITTOIA 2005 applies in relation to any of the relevant foreign income that arose in the Republic of Ireland.

EN FB 2008 provides:

> 399. Sub-paragraph(3) provides that the new section 832 does not apply to relevant foreign income that arose in the Republic of Ireland. This ensures that no double charge can arise in relation to those tax years during which it was not possible to claim the remittance basis for such income. (This might be relevant for example where income arose in one of those years and was charged on an arising basis but was not remitted to the UK until on or after 6th April 2008.)

Para 83(3) disapplies the remittance basis charge for pre-2008 Irish income. In short, if:

(1) Irish source income arose before 2008/09; and

(2) The income is remitted on or after 2008/09

there is no tax charge on remittance.

This applies even if taxpayers successfully argue that pre-2008 Irish income should as a matter of EU law have been taxed on the remittance basis. But that point will not now often arise.

10.22 Remittance basis for trustees: pre 2007 transitional issues

From 2007/08 the remittance basis applies only to individuals, so trustees do not qualify.

Before that time, UK resident foreign domiciled trustees did qualify for the remittance basis on RFI[57] (though I am not sure how widely that was appreciated or used). Pre-2007 income of trustees which qualified for the remittance basis when it arose, is not taxable on remittance after 5/4/2007, because s.832 ITTOIA now applies to individuals. This could be something of a windfall for trustees who qualified for the RFI remittance basis before 2007. But the point will not often arise.

---

57 See the 2012/13 edition of this work para 9.21 (Remittance basis for trustees).;

10.23 Forward tax agreements

Details of this arrangement were made public in an article by Malcolm Gunn in *Taxation*, 17 May 2001, under the revealing name "subscription rate method of taxation". The taxpayers involved were very wealthy UK resident non-domiciled individuals.

HMRC required full disclosure of the taxpayer's worldwide assets. The taxpayer then offered to settle the tax liability on foreign sources for a fixed sum. A starting position was that one worked out the taxpayer's UK living expenses; deducted from that the amount of UK income; the balance then represented funds which would be required annually from overseas, on which tax was expected. The forward tax agreement related to foreign income and gains. UK source income remained taxable in the normal way. Malcolm Gunn explained:

> One may be able to negotiate the annual fixed payment downwards on the starting point figure. ... So in the final analysis, it is down to negotiating a deal which both the taxpayer and the Revenue feel they can live happily with.[58]

In the first edition of this book I said:

> It is likely that publication will stop the practice completely. Those who believe that tax should be governed by law will add: Quite right too.

Since then the courts have tried to stop these agreements by holding them to be *ultra vires*.[59] Where such agreements have been made in the past, a taxpayer may have a defence to an assessment if they can show they have suffered prejudice. It is an interesting question how these agreements should deal with transitional issues such as the introduction of the remittance basis claim charge.

---

58 Transition from taxation by agreement to taxation by law raises additional problems discussed in Malcolm Gunn's article.

59 *Fayed v Advocate General* 77 TC 273. *Fayed*-style bargaining is however the basis of taxation of wealthy foreigners in many countries, including, I understand, Switzerland, France and Austria. Even in the UK after *Fayed* the temptation is ever present to move from the inconvenience of taxation by law to the convenient (but ultimately corrupt) method of taxation by negotiation.

CHAPTER ELEVEN

THE MEANING OF REMITTANCE

11.1 Meaning of remittance: Introduction

This chapter considers what constitutes a remittance for the purposes of the remittance basis.

11.1.1 *Cross references*

The following topics are considered elsewhere; see:
13.9 (Remittance due to bank error)
23.4 (Repayment of overpaid PAYE)
77.3.9 (Remittance from joint account).

11.2 The ITA remittance basis

The law is in chapter A1 part 14 ITA, which sets out what I call **"the ITA remittance basis"**.

Section 809K(1) ITA provides a list of 6 places where the ITA remittance basis applies:

> Sections 809L to 809Z6[1] apply for the purposes of—
> (a) this Chapter,
> (b) sections 22 and 26 ITEPA (relevant foreign earnings charged on remittance basis),
> (c) s.41A of that Act (specific employment income from securities etc charged on remittance basis),
> (ca) ss. 554Z9 to 554Z11 of that Act (employment income provided through third parties charged on remittance basis),
> (d) s.832 ITTOIA (relevant foreign income charged on remittance basis), and

---

1 The reference to "ss.809L to 809Z6" was always strange, as it omitted s.809Z7 (interpretation). Now it is wrong, because the FA 2012 added further sections: it should be taken as a reference to "ss.809L to 809Z10".

(e) s.12 TCGA (foreign chargeable gains charged on remittance basis).[2]

This is not a full list. The ITA remittance basis is incorporated in other places, using the formula:

> See Chapter A1 of Part 14 of ITA 2007 for the meaning of "remitted to the United Kingdom" etc.[3]

As far as I can see, the ITA remittance basis applies everywhere the remittance basis applies.

11.2.1 *Remittance conditions A to D*

Section 809L(1) ITA provides that there is a remittance if one of three conditions, or (more accurately) sets of conditions, are met:

> An individual's income is, or chargeable gains are, "remitted to the UK" if—
>
> (a) conditions A and B are met,
>
> (b) condition C is met, or
>
> (c) condition D is met.

I refer to "**remittance conditions A to D**".

It is considered that s.809L(1) is a comprehensive and not an inclusive definition of remittance. That is, a sum is remitted if and only if one of these three sets of conditions are satisfied. Remittance conditions A to D are so complex, and so broad, that there is no room for any other type of remittance.

In practice remittance conditions A and B are the most important.

---

2 Section 809K(2) ITA provides a (somewhat unnecessary) overview in accordance with the principles of Plain English Drafting:
"Those sections—
(a) explain what is meant by income or chargeable gains being 'remitted to the UK' (sections 809L to 809O),
(b) provide for the calculation of the amount remitted (section 809P),
(c) contain rules for attributing transfers from mixed funds to particular kinds of income and capital (sections 809Q to 809S),
(d) contain further provision in relation to certain foreign chargeable gains (section 809T and 809U), and
(e) treat income or chargeable gains as not remitted to the UK in certain cases (see sections 809V to 809Z6)."

3 See s.648(4) ITTOIA; s.554Z11(4) ITEPA.

I refer to a remittance within the meaning of s.809L(1) as **"a taxable remittance"**.

A sum which can be received in the UK without a taxable remittance is referred to as **"clean capital"**; (the expression might be misunderstood, but I adopt this terminology as it is used in the RDR Manual). The most common examples of clean capital are:

(1) Sums which are not income or gains, eg inheritance, borrowing
(2) Sums which are not taxable in the UK, eg income/gains accruing to a non-resident
(3) Sums which are already taxed in the UK, eg UK source income

11.2.2 *Why is the remittance basis difficult?*

The difficulty is inherent in the concept of a remittance basis. Although it is an exaggeration to say that "money has no earmark" it is often very difficult to trace or earmark money.[4] The fungibility between foreign income/gains and other assets makes it hard to determine whether any assets received in the UK should be regarded as the foreign income/gains. But this is what a remittance basis requires to be done.

Before 2008 the matter was largely left to the courts to sort out. It cannot be said that the courts were entirely successful.[5] In 2008 Parliament recast the rules in statutory form. By most measures this has also been unsuccessful. The ITA rules are:

(1) Unstable: they have been amended in every Finance Act from 2009 to 2014 inclusive;
(2) More complex: The topic which took up 78 pages in the 2007/08 edition of this work needs four chapters and 350 pages in the current edition.
(3) Record keeping is vastly increased.

No less than before, careful planning is needed to avoid unfairness.

11.2.3 *Comparison with pre-2008 remittance basis*

The wording of the ITA remittance basis is so different that cases on the pre-2008 remittance basis need careful review to see if they have any

---

4 *Lipkin Gorman v Karpnale* [1989] 1 WLR 1340 at p.1382 (CA). The law of tracing illustrates this.

5 Thus Viscount Simonds referred to remittances as "this difficult branch of the law": *Thomson v Moyse* 39 TC 291 at p.328. Likewise Finlay J in *Kneen v Martin* 19 TC 33 at p.41: "This subject is always troublesome...".

relevance to the ITA remittance basis; in practice I have not found any that are still important.

HMRC agree. The RDR Manual provides:

> **31210. Key differences between 'new' (post 5 April 2008) and 'old' regime (pre 6 April 2008)** [December 2011]
> ...The previous case law is now of limited relevance.

There should be no assumption that the law on any point is the same. There are many transactions which are now taxable remittances which were not previously caught; but there are also transactions which were caught but which are now not taxable remittances.[6]

11.3 Relevant person: Introduction

Before discussing the remittance conditions, it is necessary to consider the term "relevant person". All four remittance conditions use the term.

"Relevant person" is defined in s.809M ITA. Section 809M(1) ITA provides:

> This section applies for the purpose of this Chapter.[7]

The term "relevant person" is also used in transitional provisions: para 86(2)(3) Sch 7 FA 2008. Here the drafter did not supply any definition but the context shows that the s.809M definition must be applied. So the definition applies throughout the remittance provisions.

A relevant person strictly means the individual to whom income/gains accrue, as well as certain persons connected to them. But in the discussion below I generally refer to the individual himself as "the individual" and use the term "relevant person" to mean the others within the statutory definition.

Strictly one should not use the term "relevant person" in the abstract. A relevant person can exist only *in relation to an individual*. But where the context is clear it is permissible to refer to a relevant person in isolation (leaving the words "in relation to an individual" and the identity of that individual to be inferred).

Section 809M ITA sets out 8 categories of relevant person. These can

---

6 For example, see 11.19.2 (Use as security for debt) where the rules are less rigorous than the pre-2008 remittance basis.

7 This is duplicated in s.809Z(10) ITA: "In this Chapter ... "relevant person" has the meaning given by section 809M".

be split into three groups: close family, family companies and family trusts.

11.4 Relevant person: Close family

The first four categories of relevant person are close family. Section 809M(2) ITA provides:

> A "relevant person" is—
> (a) the individual,
> (b) the individual's husband or wife,
> (c) the individual's civil partner,
> (d) a child or grandchild of a person falling within any of paras (a) to (c), if the child or grandchild has not reached the age of 18.

11.4.1 *Cohabitees*

Section 809M(3) ITA provides:

> For that purpose—
> (a) a man and woman living together as husband and wife are treated as if they were husband and wife;
> (b) two people of the same sex living together as if they were civil partners of each other are treated as if they were civil partners of each other.

This provision treats cohabitees as married persons and so relevant persons. In 2008 this was a relatively new development in tax, but it has now become standard in anti-avoidance provisions. See App 1.5 ("Living together as husband and wife").

11.5 Relevant persons: Companies

The provisions discussed in this section have had a complicated evolution. I omit that here – reluctantly as the story has amusing aspects – but it is now of historic interest only.[8]

Under s.809M(2)(e) ITA the next category of relevant person is:

> (e) [i] a close[9] company in which a person falling within any other

8 For a lesson in how not to legislate, see the 9th (2010/11) edition of this work para 10.4, 10.5.

9 Section 809M(3)(c) ITA provides the standard definition:
"'close company' is to be read in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439 of that Act)."

paragraph of this subsection is a participator, or

[ii] a company which is a 51% subsidiary[10] of such a close company.

Under s.809M(2)(f) ITA the next category of relevant person is:

(f) [i] a company

[1] in which a person falling within any other paragraph of this subsection is a participator, and

[2] which would be a close company if it were resident in the UK, or

[ii] a company which is a 51% subsidiary of such a company

This is intended to catch family companies but it is widely drawn. An individual would not usually know whether any company is a relevant person in relation to them, because they cannot tell whether it might have a participator who is a trustee of a RP trust.

Companies may also be relevant persons as bodies connected to trusts.[11]

11.5.1 *"Participator"*

The key term here is "participator". Section 809M(3)(ca) ITA provides:

"participator",

[i] in relation to a close company, means a person who is a participator in relation to the company for the purposes of section 455 of CTA 2010 (see sections 454 and 455(5) of that Act), and,

[ii] in relation to a company that would be a close company if it were resident in the UK, means a person who would be such a participator if it were a close company

This incorporates s.455(5) CTA 2010 which provides the wider than standard definition of "participator"; see 85.17 (Definition of participator) and in particular, 85.17.3 (Chain of partly owned companies).

11.6 Relevant persons: Trusts

Under s.809M(2)(g) ITA the next category of relevant person is:

(g) the trustees of a settlement of which a person falling within any other

---

10 Section 809M(3)(cb) ITA provides the standard definition:
"'51% subsidiary' has the same meaning as in the Corporation Tax Acts (see Chapter 3 of Part 24 of CTA 2010)."

11 See 11.7 (Body connected with trust).

> paragraph of this subsection is a beneficiary.

This is intended to catch family trusts but it is so widely drawn it covers many if not most trusts in existence.

In the following discussion:

"An RP beneficiary" is a beneficiary falling within any other paragraph of s.809M(2).

"An RP trust" is a trust within s.809M(2)(g), ie one with an RP beneficiary.

Strictly one should not use the term RP trust in the abstract. It can exist only *in relation to an individual*. But where the context is clear it is permissible to refer to a RP trust in isolation (leaving the words "in relation to an individual" and the identity of that individual to be inferred).

Thus in my terminology, if T (or T's spouse, etc) is a beneficiary, the trust is an RP trust in relation to T, or (for short) it is an RP trust.

Section 809M(3)(e) ITA defines "beneficiary":

> "beneficiary", in relation to a settlement, means any person who receives, or may receive, any benefit under or by virtue of the settlement;

Every trust with an unrestricted power to add beneficiaries (which is a standard form) is an RP trust.

If T and their relevant close family (spouse etc) are all excluded, but the power to add beneficiaries extends to a close company in which T is a participator, then the trust is still an RP trust. The company may be a RP beneficiary even though T has no beneficial interest in it.

If the power to add beneficiaries is only exercisable with the consent of an individual, the position is different.

Suppose the beneficiaries are T's children and their issue. If T's children are adult and there are no minor grandchildren, then the trust is not an RP trust. However it becomes a RP trust if a grandchild is born.

A trust is not an RP trust in relation to T just because its terms provide that children or grandchildren of T can benefit after they have reached the age of 18, as long as they cannot benefit before then.[12]

---

12 See *Vestey v IRC* 31 TC 1 which decided that a trust with a power to benefit the widow of the settlor was not settlor-interested. At the time that the income arose:

(1) The settlor's wife could not benefit (as she was not a widow).

(2) It was possible that in the future she could benefit (as she might survive the settlor and so become a widow). That did not matter because the legislation (which is comparable to s.809M) was held to apply only if *at the time that the*

If T is not a beneficiary, but T lends interest-free to the trust, it is considered that the trust does not become an RP trust in relation to T just because of the loan. T may receive a benefit (on repayment of the loan).[13] However that benefit arises under or by virtue of making the loan to the trustees, (ie, under or by virtue of the loan agreement): T does not receive a benefit under or by virtue of the settlement.[14]

For charitable trusts, see 11.37 (Gift to charity by remittance basis taxpayer).

Section 809M(3)(d) ITA provides:

> "settlement" and "settlor" have the same meaning as in Chapter 2 of Part 9.

This brings in the standard IT/CGT definition of "settlement".[15] The definition of "settlement" is unnecessary, since this definition applies except so far as the contrary intention otherwise requires; but it does no harm.[16]

The definition of "settlor" is otiose as the word is not used in the definition of "relevant person".

Section 809M(3)(f) ITA provides:

> "trustee" has the same meaning as in section 993 (see, in particular, section 994(3)).

So we need to turn to s.994(3) ITA:

> For the purposes of section 993 "trustee", in the case of a settlement in relation to which there would be no trustees apart from this subsection, means any person—
>
> (a) in whom the property comprised in the settlement is for the time being vested, or
>
> (b) in whom the management of that property is for the time being

---

widow received a benefit she fell within the words "spouse of the settlor".

13 See 27.3.2 ("Settlor-interested" for IT purposes).

14 The same point arises in relation to pre-owned assets, where HMRC accept a similar argument: see 76.8 (POA intangible property charge).

15 See 80.2.2 (Standard IT/CGT definition of settlement).

16 The definition is useful for the avoidance of doubt, since s.809M twice refers to s.993 ITA, where the settlement-arrangement definition applies. Thus the definition makes it clear that the settlement-arrangement definition of settlement is not applicable to s.809M.

vested.[17]

Section 809M(3)(f) (incorporating the s.994(3) definition of trustee) is misconceived. The s.994(3) definition of trustee makes sense in the context of s.993 ITA where settlement means settlement-arrangement (which may not have trustees). It does not make sense in the context of s.809M ITA where settlement means classic settlement, which must have trustees. But no significant harm arises from this mistake.

11.7 Body connected with trust

Under s.809M(2)(h) ITA the last category of relevant person is:

> (h) a body connected with such a settlement.

That is, a body connected with an RP trust, within 809M(2)(g), a trust of which some other relevant person is a beneficiary.

11.7.1 *"Connected with" a settlement*

Section 809M(3)(g) ITA defines "connected with":

> a body is "connected with" a settlement if the body falls within section 993(3)(c), (d), (e) or (f) as regards the settlement.

This must not be confused with the common tax concept of a "connected person".

In order to follow this, one needs to set out the four paragraphs of s.993(3)(c)(d)(e) and (f).

First, s.993(3)(c)(d) ITA provide:

> (3) A person, in the capacity as trustee of a settlement,[18] is connected with ...
> (c) any close company whose participators include the trustees of the settlement,
> (d) any non-UK resident company which, if it were UK resident, would be a close company whose participators include the trustees of the settlement

17 For completeness: s.994(3) concludes: "Section 466(4) does not apply for the purposes of this subsection." That has no relevance here.

18 "Settlement" in s.993 means settlement-arrangement: see s.994(1) ITA. However for a body to qualify as a relevant person under s.809M(2)(h) there needs to be a settlement within the standard IT/CGT definition.

Section 809M(3)(g) is not elegantly drafted. It refers to a body connected with a settlement; whereas s.993 refers to bodies connected with trustees of a settlement; but the meaning must be the same.

At first sight it seems unnecessary for s.809M(3)(g) to refer to s.993(3)(c) or (d), because any company within (c) or (d) would be a relevant person in any event under s.809M(2)(e) or (f).[19] But this does make a difference as can be seen from the examples below. In any case, one needs to have (c) and (d) in mind in order to understand s.993(3)(e). "Participator" in s.993(3)(c)(d) is not defined; it is considered that it bears the normal close company meaning.

Section 993(3)(e) ITA provides:

> (e) any body corporate controlled (within the meaning of section 995) by a company within para (c) or (d)

For the s.995 definition of control, see 85.9 (Control in strict sense).

Lastly, s.993(3)(f) ITA provides:

> (f) if the settlement is the principal settlement in relation to one or more sub-fund settlements, a person in the capacity as trustee of such a sub-fund settlement.

It seems unnecessary for s.809M(3)(g) to refer to s.993(3)(f). Possibly the drafter only intended to refer to s.993(3)(c)(d)(e) and the reference to (f) slipped in by mistake. But since sub-fund settlements are dead-letter tax law (never found in practice) the point does not matter.

11.7.2 *"Body"*

Section 809M(2)(h) ITA refers to a "body" connected with a settlement. The term is wide and somewhat vague. However in order to fall within s.993(3)(c)(d) the body must be a company. In order to fall within s.993(3)(e) the body must be a body corporate. Presumably the word "body" was selected as the apt term to include the (somewhat theoretical) case of trustees of sub-funds under s.993(3)(f).

11.7.3 *Partnership*

A general or limited partnership does not fall within any para of s.809M(2)(a)-(g) ITA.

A general or partnership does not fall within s.809M(2)(h) ITA. What if

---

19 Because the trustees are participators.

trustees control a partnership? A general or limited partnership is a body, but it is not "connected with" the settlement within s.809M(3)(g) as it is not a company or body corporate.

So a general or limited partnership as such is never a relevant person. That is not surprising, since a partnership is also not a "person" in the normal sense of the expression.[20]

The legal analysis of a LLP is different, but the end result is the same. A LLP is not a company for tax purposes, so it does not fall within any para of s.809M(2)(a)-(g) ITA. What if trustees control a LLP? A LLP is a body, but it is not "connected with" the settlement within s.809M(3)(g) A UK LLP is a body corporate, but is deemed not to be one for IT and CGT purposes; s.993 clearly assumes that a partnership is not a body corporate.

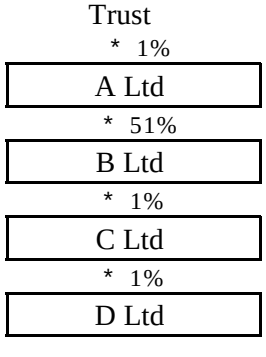
Of course the partners may be relevant persons; see 11.34 (Partnerships).

11.8 Companies as relevant persons: Examples

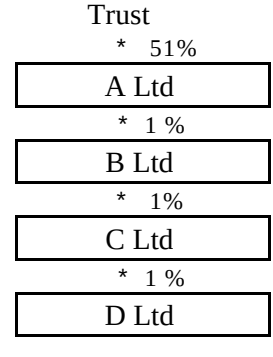
It may be helpful to give some examples of how the relevant person rules apply to trust/company structures. In the following examples:

"An (e) company" is one which is a relevant person under s.809M(2)(e).
"An (f) company" is one which is a relevant person under s.809M(2)(f).
"An (h) company" is one which is a relevant person under s.809M(2)(h).
"A non (e) person" is a person who falls within any other paragraph of 809M(2) ie not a person who falls outside 809M or who is *only* within para (e).
"A non (f) person" is a person who falls within any other paragraph of 809M(2) ie not a person who falls outside 809M or who is *only* within para (f).

Example 1



Example 2



20 See 41.3 (Is a partnership a "person").

Assume the trust is a relevant person (eg the individual is a beneficiary). Assume all the companies are UK resident or non-resident close companies.
A Ltd is an (h) company. It is also an (e) company if UK resident or an (f) company if non-resident. However since it is an (h) company that does not matter; it is a non (e) person and a non (f) person (as those expressions are defined).

Example 1
Assume first that the companies are all non-resident close companies.
B Ltd is an (f) company because a non (f) person - A Ltd - is a participator.
C Ltd is not a relevant person. It is not an (f) company as it does not meet the requirement in (f) that a person "falling within any *other* paragraph" of s.809M(2) is a participator.

The end result is the same if all the companies are UK resident close companies, though the statutory references are different:
B Ltd is an (e) company because a non (e) person - A Ltd - is a participator.
C Ltd is not a relevant person. It is not an (e) company as it does not meet the requirement in (e) that a person "falling within any *other* paragraph" of s.809M(2) is a participator.

Suppose however that B Ltd is UK resident and C Ltd is non-resident. In that case C Ltd is a relevant person:
B Ltd is an (e) company because a non (e) person - A Ltd - is a participator.
C Ltd is an (f) company as a non (f) company - B Ltd - is a participator.

It follows that D Ltd is then an (e) company if UK resident, since a non (e) company - B Ltd - is a participator.

Example 2

The difference in example 2 is that the trustees are participators in B Ltd[21] so B Ltd is an (h) company.

11.8.1 *Corporate relevant persons: Commentary*

Where any of these companies are relevant persons, so are all their 51%

21 See 85.17.2 (Chain of wholly owned companies).

subsidiaries. It will be apparent that the definition of relevant person in relation to companies is far too wide and it is not realistic to think that the rules are being or ever could be applied in practice to large corporate groups of close companies.

11.9 Relevant person transitional rule: Pre-2008/09 income/gains

Para 86(4) Sch 7 FA 2008 provides:

> Subject to sub-paras (2) and (3), in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

This transitional rule only operates for the purposes of s.809L (remittance conditions A and B), so it has to be repeated for the purposes of remittance conditions C and D, and for s.624.[22] In other provisions the transitional rule does not apply: s.809Z2 (Personal use rule); para 86(2)(3) Sch 7 FA 2008. I wonder if that is deliberate or an oversight. These are provisions where it is helpful to have a wide definition of relevant person but it will not often matter.

The RDR Manual provides:

> **31480. Relevant persons and foreign income and gains arising before 6 April 2008** [June 2010]
> *Background*
> The introduction of Chapter A1 Part 14 ITA 2007 has extended the meaning and scope of foreign income and gains that become taxable when remitted to the UK. One change is the introduction of the concept of 'relevant person' at section 809L which, broadly, provides that a taxable remittance will occur when foreign income or gains are brought into or otherwise used in the UK by relevant persons other than the individual himself or herself.
> *Transition*
> The transitional rule provides that in establishing whether there has been a remittance of an individual's income and gains for 2007-08 or any earlier year Conditions A and B, Condition C and Condition D at ITA07/s809L are applied as if references to 'relevant person' are to the individual.

---

22 For remittance condition C, see 11.25 (Transitional rules: pre-2008 income/gains). For remittance condition D, see 11.28 (Transitional rules: pre-2008 income/gains). For s.624, see 27.4.1 (Transitional rule for pre-2008 trust income).

Effect

This means that the income or gains remitted either as cash or property have to be brought to, received by or used in the UK for the benefit of the individual concerned before there can be a remittance.

The Manual then provides a straightforward (if factually implausible) example[23] and continues:

> Note: The exclusion of 'relevant persons' from s809L for pre 6 April 2008 income and gains does not apply in considering the other transitional rules in relation to the remittance of relevant foreign income (refer to RDRM31140 Relevant foreign income).

I do not understand the point being made here; the cross reference does not help.

11.10 Relevant and other persons: Compliance

Suppose:

(1) an individual gives income or gains to a relevant person ("R"); and
(2) R remits sums to the UK.

The individual in principle becomes liable to a tax charge. The residence of R does not matter.

However, R is under no duty to inform the individual that R has remitted sums to the UK. R is under no duty to inform HMRC, as any tax liability on the remittance is that of the individual, not of R. But the rules in theory require R to keep records for the lifetime of the individual.

Similar issues arise in relation to remittance condition C. Suppose:

(1) an individual gives income or gains to a non-relevant person ("G", a gift recipient); and
(2) qualifying property is enjoyed by a relevant person (or used in respect of a relevant debt).

---

23 "Sanjay is a non-domiciled remittance basis user who transferred £10,000 of his foreign employment income from 2007-08 to his 15 year old grandchild's offshore bank account.

In 2008-09 the grandchild then remits £3,000 of this to the UK to buy himself a new computer. [How the 16 year old minor would operate the account and purchase the (overpriced) computer is not explained, but it does not matter.]

Under the rules at section 809L this would create a taxable remittance of £3,000 by Sanjay because his grandson is a relevant person. However the transitional rule means that there is no taxable remittance of this income because it is employment income from 2007-08."

The individual in principle becomes liable to a tax charge. The residence of G does not matter. G is under no duty to inform the individual or HMRC. But the rules in theory require G to keep records for the lifetime of the individual.

Similar issues arise in relation to remittance condition D, where any property of any third person ("P") is enjoyed by a relevant person (or used in respect of a relevant debt) and there is a connected operation (as defined). The individual in principle becomes liable to a tax charge. The residence of P does not matter. P is under no duty to inform the individual that P has remitted sums to the UK or to inform HMRC. But the rules in theory require P to keep records for the lifetime of the individual.

Of course in practice these rules will not (and indeed could not) be observed except in straightforward cases.

The individual has no indemnity against the relevant person, gift recipient or third party.

Under the pre-2008 remittance basis, if A (a remittance basis taxpayer) transferred A's foreign income to any other person ("B") and B receives that income abroad, there was in general no remittance of that income if B subsequently remits the income to the UK. In the 6th edition of this work I said:

> The law could hardly be otherwise, for A will not usually know what B does with his money after it has been transferred to B.

I was wrong about that! My comment assumed that workability was a necessary requirement of UK anti-avoidance provisions. Now it is sufficient if the law is workable in simple cases. Now if T gives income to a relevant person, who remits, T is taxable.

A relevant person who bears a grudge against an individual (eg a separated spouse) may be able to trigger a significant tax charge out of spite, by deliberately remitting income or gains they have received from the individual. They may alternatively blackmail the individual by threatening to remit unless paid not to do so.

What about a gift recipient (such as an estranged adult child)? There is no charge if they remit income or gains they have received from the individual. What if they apply property they have been given for the benefit of a relevant person, eg a minor child or grandchild of the individual? This arguably does not constitute a taxable remittance under condition B, because the sums are not derived property, but it is caught by remittance condition C.

Also see 11.35 (Proceeds of divorce settlement).

The RDR Manual provides:

> **35030 Conditions A and B - remittances derived from foreign income or gains** [January 2014]
> ... Where an individual gives untaxed foreign income or gains to another person then they should ensure the donee is aware that they must tell the donor if the property or anything subsequently derived from it is bought to the UK in circumstances such that there would be a remittance under ITA07/s809L.

There is no statutory obligation to do this but failure will make compliance difficult.

HMRC say in March 2009 Qs & As Q9:

> If
> [1] the record keeping requirements are felt to be too onerous and
> [2] the probability of remittance to the UK is high
> the donor may wish to consider making a gift of taxed income or gains.

This will not satisfy readers. If "the probability of remittance to the UK is high" then the donor may indeed prefer a gift of taxed income or gains,[24] quite regardless of record keeping requirements. Conversely, what advice would HMRC give if the record keeping was felt to be onerous but the probability of remittance was low? Or if the donee had insufficient taxed income or gains to make the gift?

11.11 Commentary: Let's simplify remittance and relevant person rules

If an individual remits their own income to the UK, they are able to spend it here and there is some sense in taxing them. The same may be said for an individual's spouse and minor children.

The extension to minor grandchildren (though not to adult grandchildren) is a novel development in tax. The policy is inconsistent with other anti-avoidance provisions, and leads to some strange anomalies and nonsense.[25] The intention is perhaps to catch grandparents paying the school fees of their UK resident grandchildren – at least if the school is in the UK. The Blair/Brown administration was not supportive of private education. But that is only a surmise, as the Government never published any explanation.

---

24 Or other clean capital.

25 See 11.32 (Payment of school fees).

The coalition Government apparently considered this point:

> 2.128 ... the Government does accept that there is value in giving further consideration to the following suggestions:
> - Excluding minor grandchildren from the definition of a 'relevant person'...
>
> 2.129 The Government will undertake further evaluation of these areas with a view to implementing any changes from April 2013.[26]

In practice nothing happened.

When a family trust or a family company remits its income to the UK, the individual (as beneficiary or shareholder) is not in any way advantaged unless and until the trustees decide to transfer the income to them or to a close family member. In these respects the definition of relevant person is made extravagantly wide. What is the thought process that has led to this situation? Needless to say, there was no discussion of these policy issues when the rules were announced. I infer that it is based on a conception that the remittance basis requires funds to be taxed if and when *funds* come to the UK. The policy ought surely to be to charge tax when funds are available *for personal spending* in the UK, not simply because they are invested here. The reader may think it unfortunate that the manner of the 2008 precluded any debate or consideration about what the remittance basis was intended to achieve.

For these reasons the definition of relevant person ought to be restricted to the individual, their spouse and minor children (and if necessary, though one could argue the matter both ways, the individual's cohabitee).

In the 2010/11 edition of this work I said:

> The main effect of the present rules is to impose a prohibitive tax charge on investment in the UK by the foreign domiciliary or relevant persons.

This is now recognised to an extent by the introduction of the complex and restricted remittance investment relief in 2012.

It is considered that the way forward is to restrict the definition of relevant person to the individual, spouse, minor children and (perhaps)

---

26 HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (December 2011) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

cohabitee. Remittance investment relief could then be abolished as it would not be needed. That would be a significant simplification, enhance UK investment, and not result in any significant loss of tax. The 2008 reform lost sight of what the remittance basis is in fact intended to catch, and overlooked that the remittance basis was, and (if it serves any purpose) still is, intended to attract wealthy foreigners to come to live *and invest* in the UK.

11.12 Remittance condition A (link to UK)

Remittance conditions A and B go together: condition A requires a link to the UK, and condition B requires a link to the foreign income or gains. Both conditions need to be satisfied to have a remittance under s.809L(1)(a).

Section 809L(2) ITA provides:

> Condition A is that—
>
> (a) money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person, or
>
> (b) a service is provided in the UK to or for the benefit of a relevant person.

There are eight ways to satisfy remittance condition A. The first six are:

(1) Property is:
- (a) brought to the UK
  - (i) by a relevant person
  - (ii) for the benefit of a relevant person
- (b) received in the UK
  - (i) by a relevant person
  - (ii) for the benefit of a relevant person
- (c) used in the UK
  - (i) by a relevant person
  - (ii) for the benefit of a relevant person

I refer to these as the **"brought" limb,** the **"received" limb,** and the **"used" limb** of condition A. I refer to property within (1) as "**property brought/received/used in the UK**". (One might refer to that as "condition A property" or "UK property" but I think it is clearer to use the clumsy expression **"brought/received/used in the UK."** I leave the words "by/for the benefit of a relevant person" to be implied.)

The last two ways to satisfy condition A are:

(2) A service is:
(a) provided in the UK to a relevant person
(b) provided in the UK for the benefit of a relevant person

11.12.1 *Enactment history*

The wording of remittance condition A is loosely derived from the pre-2008 s.33(2) ITEPA, but the connection is tenuous. The former s.33(2) ITEPA provided:

> *If general earnings are—*
> *(a) paid, used, or enjoyed in the UK, or*
> *(b) transmitted or brought to the UK in any manner or form,*
> *they are to be treated as remitted to the UK at the time when they are so paid, used or enjoyed or dealt with as mentioned in para (b).*[27]

In the current provision, the words "brought/received/used" have replaced "paid/used/enjoyed/transmitted/brought".

The former words "in any manner or form" have been omitted; they are unnecessary as the concept of "derived property" in remittance condition B does the same work.

The words "for the benefit of" are new. The reference to a relevant person is new.

11.12.2 *"Property" and "money"*

The language of the remittance basis provisions is not entirely consistent:
"Money or other property" is used 20 times.
"Property (including money)" is used once.
"Property (other than money)" is used once.

Sometimes the word "property" is used by itself. I think it is clear that the word "property" by itself includes money, that is, it is equivalent to "money or other property". In this book I use the word "property" (by itself) to mean money or other property.

When the expression "money or other property" is used, we do not care about the meaning of the word "money" because if an asset is not "money"

---

27 Pre-2008 s.12(2) TCGA was in the same terms. The wording was perhaps intended to extend the concept of "remittance" beyond that which applied for the pre-2008 RFI remittance basis. Though it is just as likely that the drafter only had in mind a plain English paraphrase of the antique language of the former s.65 ICTA 1988. There is no authority discussing these words. The question was raised but left open in *Harmel v Wright* 49 TC 149; it will not now be decided.

it will be "other property".

When the expression "money" is used by itself, or in the expression "property other than money" we do care about the meaning of the word "money".

Except in a few special contexts[28] the words "property" and "money" are not defined and carry their ordinary meaning.

11.12.3 *Property brought to the UK ("brought" limb of condition A)*

The first two ways to satisfy remittance condition A are:

(a) Property is brought to the UK by a relevant person
(b) Property is brought to the UK for the benefit of a relevant person

This limb requires one to identify whether property is brought to the UK, and if so who brings it to the UK, or for whose benefit it is brought. If a relevant person brings it, condition A is satisfied. If someone else brings it, para (a) is not satisfied.

For instance, suppose T owns a chattel outside the UK, and wishes to lend it to a non-relevant person, eg an adult child, in the UK.

(1) If T brings the chattel to the child in the UK, there is a taxable remittance.
(2) If the child collects it abroad, or arranges for a courier to bring it, then para (a) does not apply. No other part of condition A applies, so there is no taxable remittance.

What if T instructs a courier to bring the chattel to the child in UK? One might think that T (by instructing the courier) has brought the chattel to the UK. But comparing this with cases (1) and (2) it is considered that the courier (not T) has brought the chattel to the UK, so there is no taxable remittance. It would be strange if the administrative matter of who instructs the courier should determine taxability.[29]

This could be relevant if a remittance basis taxpayer wished to lend to a museum, as it would not be necessary to meet the conditions of the public access rule. (The public access rule would be needed if the museum was a relevant person.)

Para (b) might apply if N holds property as nominee for T, and N brings the property to the UK.

---

28 See 12.27.1 ("Property").

29 This is consistent with the HMRC view discussed in 11.12.7 (Property in transit). For gifts of cash, see 11.12.8 (Gift to non-relevant person).

11.12.4 *Property received in the UK ("received" limb of condition A)*

The next two ways to satisfy remittance condition A are:

(c) Property is received in the UK by a relevant person
(d) Property is received in the UK for the benefit of a relevant person

This requires one to ask where property is received (or more precisely, whether property is received in the UK); the answer is by no means obvious. If property is received in the UK, the question is who receives it, or for whose benefit is it received.

We need the "brought" limb as well as "received". T can receive an asset in the UK without bringing it here (eg on the purchase of a UK situate chattel). Can T "bring" an asset to the UK without receiving it in the UK? Perhaps an example is if T acquires a chattel outside the UK, and packs it in T's luggage; or acquires a car outside the UK and drives it to the UK. T "brings" the chattel or car to the UK, but does not "receive" it here. (It is arguable that an asset can only be received once, so if it is received outside the UK it cannot later be received in the UK, but whether or not that is right, in the case of a chattel or car, there is no identifiable moment of "receipt" in the UK.) So both these limbs of condition A are needed.

Para (d) might apply if N holds property as nominee for T, and N receives the property in the UK.

11.12.5 *Property used in the UK ("used" limb of condition A)*

The next two ways to satisfy remittance condition A are:

(e) Property is used in the UK by a relevant person
(f) Property is used in the UK for the benefit of a relevant person

This requires one to ask whether property is used, where property is used, who is the user, and what exactly is the property which is used.

It is suggested that "used" means enjoyed in specie, and property is used where it is situate.

It is difficult at first sight to see the role of the "used" limb of condition A. Normally if T uses property in the UK, T (or a relevant person) will have brought or received it in the UK, so the "brought" or "received" limbs will be satisfied. But there could arguably be a case where property comes to be held by T without being brought or received in the UK by T[30] and in

30 See 11.12.10 (Acquisition of UK debt/security).

such a case the "used" limb is needed.[31] There could be a case where property is brought to the UK when not a relevant person, and subsequently used by T after he becomes a relevant person.

If a creditor enforces a debt, and receives money due, one does not say that the creditor is "using" the debt in the normal sense of the word, though the creditor could be said to be using rights attached to the debt. But it is not clear where these rights are used. So it is suggested that the used limb does not apply to debts or other choses in action.

If money is spent, it is "used" in the normal sense of the word.[32] However it is not clear where money (other than cash) is used, so it is not clear how one decides whether it is used in the UK. It is suggested that spending money should be dealt with under the receipt limb, or the brought limb of condition A, or under the debt remittance rules, eg using money to pay a debt may be a remittance of the money under the debt remittance rules; but the used limb does not apply: the money is not used in the UK. Non-cash money is in fact a debt, so that is consistent with the paragraph above. In short, in the "used" limb of condition A, "used" means used *in specie*.

11.12.6 *Bank entries*

What if a transfer of money to a foreign bank account involves credits in UK accounting records of the foreign bank? (This is understood to be the position for Channel Island and IOM banks.) Remittance condition A is not satisfied: the funds are not brought/received/used in the UK. The RDR Manual provides:

> **33560 Banking Issues** [December 2011]
> *Banking Transactions*
> Transfers between foreign centres often pass through the UK banking system, for example when a sterling payment is made abroad and the payment is cleared through London in the normal banking process.

---

31 There could of course be a case where property is brought or received in the UK by a non-relevant person and used by T eg if T gives RFI to a brother who purchases a house which T occupies. In that case condition A is satisfied under the "used" limb. But in this case, condition B is not satisfied (the house is not property of a relevant person) so the question whether condition A is satisfied does not arise. This situation is covered instead by remittance condition C.

32 That is self evident, but if an example is needed, see s.809VA ITA referring to money being "used" to make an investment.

In such circumstances HMRC do not regard the passage of funds through the UK as being a taxable remittance.

The machinery employed is irrelevant provided that, without express provision, the individual has:

- no right to payment at any intermediate point; and
- no control over the funds transferred by their foreign bank to secure payment at the agreed point.

Similarly, the EI Manual provides:

> **40302 Meaning of "remitted to the United Kingdom"** [Jan 2009]
> *Paid in the UK*
> [1] Earnings are remitted to the UK if they are paid to the employee in cash in this country or if the employee's bank account here is credited with them. Employees may arrange to have earnings paid into offshore bank accounts to avoid this rule.
> [2] Money that is transmitted from the employer's bank in the UK to the employee's offshore bank is not treated as remitted here. It has been in the banking system all of the time; the employee did not have access to it.

The conclusions are correct, though the statements that the money passes "through the UK" or "through the UK banking system" or that the money has "been in the banking system" is layman's language. Banking law draws a sharp distinction between the accountholder's money and the bank's money:

> The funds received by the beneficiary's [customer's] bank through the payment system belong legally and beneficially to itself. They become part of the bank's general liquid assets. They are distinct from any corresponding credit entry that the bank makes to the customer's account on the strength of receiving those funds.[33]

---

33 Fox, *Property Rights in Money* (2008) para 7.44. *Foley v Hill* (1848) 2 HLC 28 at p.36 explains the relationship of banker/customer (and borrower/lender generally):

> "Money, when paid into a bank, ceases altogether to be the money of the principal ... ; it is then the money of the banker, who is bound to return an equivalent by paying a similar sum to that deposited with him when he is asked for it. The money paid into the banker's custody... is then the banker's money; he is known to deal with it as his own; he makes what profit of it he can, which profit he retains to himself, paying back only the principal, ... or the principal and a small rate of interest ..."

More recently, *Foskett v McKeown* [2001] 1 AC 102 at p.127: "We speak of money at the bank, and of money passing into and out of a bank account. But of course the

11.12.7 *Property in transit*

The same approach is applied in March 2009 Qs & As to physical assets transported by a courier through the UK:

> **Q17:** Will HMRC apply the same principle, expressed in relation to mechanistic banking transfers which pass through the UK in the banking system, in a case where a courier passes through the UK in transit carrying property not covered by the temporary importation exemption?
> **A:** Yes. In principle, where the "passing through" is a mechanistic part of the courier service provision and, no relevant persons have any rights to use or access the property at any intermediate point; and no control over how property is transported to and from the agreed points. In such circumstances the passage of property which merely "touches" the UK would not be regarded as a sum remitted to the UK.

More analytically, remittance condition A is not satisfied because the owner of the property:
(1) does not receive it in the UK;
(2) does not bring it to the UK (the courier brings it).

11.12.8 *Gift to non-relevant person*

In *Timpson's Executors v Yerbury*[34] (a pre-2008 remittance case):
(1) Mrs Timpson ("T") gave cheques representing her foreign income to her children.
(2) The children cashed the cheques which were credited to their bank accounts in the UK.

Thus, the foreign income was received in the UK, but it was not received by T. This was nevertheless held to be a taxable remittance by T. Romer LJ and (I think) Greene LJ decided *Timpson's Executors* on the basis that there was a taxable remittance if:

---

account holder has no money at the bank. Money paid into a bank account belongs legally and beneficially to the bank and not to the account holder. ... We speak of tracing money into and out of the account, but there is no money in the account. There is merely a single debt of an amount equal to the final balance standing to the credit of the account holder. No money passes from paying bank to receiving bank or through the clearing system (where the money flows may be in the opposite direction). There is simply a series of debits and credits which are causally and transactionally linked."

34 20 TC 155 followed in *Walsh v Randall* 23 TC 55.

(1) money is received in the UK by a third party at T's direction, and
(2) immediately before receipt, the money (or funds representing it) belonged to T.[35]

This is no longer the law under the ITA remittance basis. Remittance condition A requires that property is brought/received/used in the UK *by or for the benefit of a relevant person*. So if a remittance basis taxpayer writes a cheque on a foreign bank account, gives it to a donee (not a relevant person) who pays the cheque into their UK bank account, remittance condition A is not satisfied. The receipt of the cheque is not a remittance.[36] The money is received in the UK by the donee (not by a relevant person); and if it is brought to the UK, it is brought in by the donee.

Suppose (instead of a cheque) T makes a gift to a donee (not a relevant person) by electronic transfer from T's offshore account to the UK account of the donee. It is suggested that remittance condition A is not satisfied. It would be strange if there were a difference between payment by cheque and a direct electronic transfer. At first sight it seems that T "brought" the money into the UK (even though T did not receive or use it in the UK). But the better view is nothing is *brought* to the UK. One needs to understand the banking law background. A bank transfer involves the destruction of an asset (T's claim against the bank) and the creation of a new asset (the donee's claim against the bank).[37] The new asset is received

---

35 The judgments are discussed in more detail in the 2012/13 edition of this work, but they are not now relevant.

36 See 11.15.13 (Receipt of cheque in UK).

37 "It is something of a misnomer to speak of the transfer of funds, as there is no actual transfer of coins and bank notes from the payer to the payee, and no assignment of the debt owed to the payer by their own bank." Brindle & Cox, *The Law of Bank Payments* (4th ed., 2010), para 3-002; and see 11.12.7 (Property in transit); Fox, *Property Rights in Money* (2008) para 5.23-5.31; *R v Preddy* [1996] AC 815 at p.841D "I start with the proposition that the money in a bank account standing at credit does not belong to the account holder. He has merely a chose in action which is the right to demand payment of the relevant sum from the bank. I use the word money for convenience but it is of course simply a sum entered into the books of the bank. When a sum of money leaves A's account a chose in action quoad that sum is extinguished. When an equivalent sum is transferred to B's account there is created in B a fresh chose in action being the right to demand payment of that sum from his bank."...

"The question remains, however, whether the debiting of the lending institution's bank

in the UK but not brought to the UK.

The practice before 2008 was for remittance basis taxpayers to make the gift abroad (by payment into a foreign bank account of the donee). This will no doubt continue, even though it is not strictly necessary, as HMRC may not agree with this analysis. The RDR Manual provides:

> **RDRM33140 Remittance Basis: Identifying Remittances: Conditions A and B: Condition B - direct remittance of income and gains** [Jul 2010]
> Example 5 (Tyler)
> T, a remittance basis user, donates an amount of money to a Battersea Dogs Home, a UK charity, by making a payment direct to the charity from his US bank account which contains his relevant foreign income. There has been a direct remittance of T's income into the UK; it does not matter that he or any other relevant person does not benefit personally from the money...

In the usual style of the Manual, the example states a conclusion without addressing the relevant statutory provisions, and it is not likely that the author has considered the banking law background.

For gifts to charity, see 11.37 (Gift to charity by remittance basis taxpayer).

11.12.9 *Arm's length payment to non-relevant person*

Similar points apply to an arm's length payment to a non-relevant person. Suppose X (not a relevant person) provides services to T outside the UK, or sells a non-UK situate asset to T, or T subscribes for shares in a company X Ltd.

If T makes a payment to the foreign bank account of X, remittance condition A is not satisfied.

---

account, and the corresponding crediting of the bank account of the defendant or his solicitor, constitutes obtaining of that property. The difficulty in the way of that conclusion is simply that, when the bank account of the defendant (or his solicitor) is credited, he does not obtain the lending institution's chose in action. On the contrary, that chose in action is extinguished or reduced pro tanto, and a chose in action is brought into existence representing a debt in an equivalent sum owed by a different bank to the defendant or his solicitor. In these circumstances, it is difficult to see how the defendant thereby *obtained property belonging to another*, ie to the lending institution."

If T pays by giving X a cheque for the amount due, and X pays the cheque into their UK account, remittance condition A is not satisfied. The money is received in the UK by X, not by T. It is not used in the UK by T.[38] If it is brought to the UK, it is not brought by T (but the better view is it is not *brought* to the UK). It is considered that the payment is not received in the UK on behalf of T. T receives the payment on his own behalf.

If (instead of a cheque) T pays by electronic transfer from T's offshore account to the UK account X, it is considered that remittance condition A is not satisfied.

This gives a sensible result. There is no remittance in any real or meaningful sense, and no reason why one would expect a tax charge to arise.

HMRC may not agree. A payment into the foreign account of X is safest, though in practice X may not want to go to the trouble of opening a foreign bank account.

11.12.10 *Acquisition of UK debt/security*

In the following discussion, **"a UK debt/security"** means a debt, or shares or debentures, which is UK situate (because the debtor is UK resident, or the company's register is UK situate). It is assumed that the debtor or company is not a relevant person.

What is the position if T uses RFI to acquire a UK debt/security, ie T lends to the debtor, subscribes for a security, or purchases a debt/security from a third party? Assume for simplicity that the RFI itself is not received in the UK (because payment is made outside the UK).

The "brought" limb of condition A is not satisfied: the UK debt/security is not brought to the UK, and neither is the RFI.

HMRC might rely on the "received" limb. The UK investments are "received" by the relevant person, but are they received "in the UK"? It is arguable that they are not: either they are not received anywhere, or else they are received in the place of the law governing the transfer or creation of the assets concerned (which may or may not be a UK law). So while condition A is only satisfied if the relevant individual actually uses the assets, merely acquiring UK situate assets may not be not enough.[39]

---

38 See11.12.6 (Bank entries).

39 If this were wrong then words "used in" in remittance condition C (and perhaps condition A) would be otiose since chattels used in the UK must be received in or brought to the UK.

HMRC may not agree. The RDR Manual provides examples of taxable remittances including:

> **RDRM33050 - Remittance Basis: Practical Examples of Remittances to the UK** [Nov 2013]
> [Taxable remittances include:]
> • You buy shares or bonds in a UK registered plc from a foreign broker with your foreign income.

If receipt of a UK situate asset is receipt of an asset in the UK, then there are some surprising consequences:

(1) There would be a remittance if a person lends to any UK resident (even if not a relevant person) since the lender receives a debt and a debt from a UK resident is usually UK situate.
(2) There might be a remittance if T sells any foreign asset to a UK resident, if the sale price remains outstanding for a time as a debt, as the debt is UK situate; (though it is arguable that short term delays in payment should not count as remittences as the debt (even if UK situate) should be characterised as merely a step in the mechanism of payment and not as an independent receipt.)
(3) There may be a remittance if a foreign asset is sold to a UK resident for some contractual right, as in *Marren v Ingles*.[40]

A cautious approach where possible is to keep the debt/security outside the UK, which might be done by using bearer securities (if possible) and specialty debts, and arranging that the document is kept outside the UK.

11.12.11 *Sale or other disposal of UK debt/security*

If debt/security is not received in the UK, so remittance condition A is not met on the acquisition of the asset, the question arises whether the asset might later be used "in the UK". It is arguable that "use" is appropriate to chattels but not to intangible property. Does the sale of an asset or calling of a debt amount to "use"? If it does, is the asset used "in the UK" just because the asset is situate here? Or is something else required, and if so

---

40 See Firth, "A trap for remittance-basis Taxpayers: the situs of choses In action" GITC Review, Vol.XI no.2
http://www.taxbar.com/A_Trap_for_Remittance_-_Basis_Taxpayers_The_Situs_of_Choses_in_Action_Michael_Firth.pdf.pdf

what? The difficulties in all these questions suggest that the better view is that the term "use" does not apply to intangible assets.

11.12.12 *Situs of property for purpose of remittance condition A*

There are no statutory situs rules for income tax, so the common law/private international law rules apply.[41] So money received in a UK branch of a foreign bank is remitted, but money received in a foreign branch of a UK bank is not remitted.[42] Money is remitted if received in:

(1) a UK account in the name of the taxpayer, and held by them beneficially; or
(2) a UK account held in the name of a third party who holds on trust for the taxpayer.

CGT has statutory situs rules. But it is considered that the effect of s.12(5) TCGA is to incorporate the ITA rules, so the CGT situs rules do not apply for the purpose of remittance condition A. That view is confirmed by s.809W(6) ITA which applies the CGT situs rules specifically for the purposes of s.809W(3) ITA. If that view were wrong, there could be a remittance under the CGT remittance basis when a UK resident foreign domiciliary:

(1) places sterling in a foreign bank account, as the account is regarded as UK situate for CGT;[43] or
(2) sells and leaves the purchase price outstanding, since the right to the purchase price is a UK situate asset under the CGT situs rules.

11.12.13 *Non-UK company with UK asset: Secondhand companies*

Suppose T acquires a non-UK company which holds a UK asset. If the UK asset is not enjoyed in specie by T or a relevant person, then Condition A is not satisfied. If the UK asset is (say) a house, which is occupied by T, then remittance condition A is satisfied. However, remittance condition B is not satisfied.

11.12.14 *Service provided in the UK*

The next way to satisfy remittance condition A is:

(e) a service is provided in the UK to a relevant person

---

41 See 82.1 (Concept(s) of situs).
42 See 82.23 (Bank account).
43 See 83.12 (Bank account).

The rule requires one to identify the place where services are provided, or at least whether they are provided in the UK. While in some cases this is straightforward, in other cases there is no obvious answer.[44]

The connecting factors could be:

(1) where the work is done
(2) where the supplier is based
(3) where is the property (if any) to which the services relate
(4) where the customer is based

It is considered that the connecting factor should be where the work is done, when that is physical work with a simple physical location. This is consistent with the IT trading source rules.[45] In other cases it should be where the supplier is based.

In practice physical work will generally be done where the supplier is based, so factors (1) and (2) will normally point the same way. But that is not necessarily the case. If one instructs a French firm to put up a building in the UK the service is provided in the UK: if one instructs a UK firm to put up a building in France, the service is provided out of the UK.

Factor (3) cannot be decisive as foreign services relief assumes that a service which relates to property situate outside the UK may be a service provided in the UK.[46]

The RDR Manual is consistent with this view. It provides:

> **34040.Relevant services provided in the UK** [December 2011]
> ... A service is regarded as having been provided in the UK if the providers of that service are based in and give that service in the UK....

"Based in" the UK is my factor (2). I understand that the words *"and give that service in the UK"* is my factor (1), where the physical work is done. This is therefore an easy case where both factors point the same way.

The RDR Manual goes on to give this example:

> *Example 1 (Chandra)*
> C, a remittance basis user, engages an investment manager based in the UK to manage her portfolio of investments in foreign stocks and shares of overseas concerns. ...
> The service - the management of the portfolio - is provided in the UK to

44 It is of course no solution to say that the question is just one of fact: see 18.8 (Objection to multi-factorial approach).

45 See 15.15 (Services).

46 See 12.26 (Foreign services relief).

C...[47]

This is a case where there is no physical work within factor (1), so one falls back on factor (2), where the supplier is based.

Where one travels entirely within the UK, the services are provided in the UK and where one travels entirely outside the UK, the services are provided outside the UK. What is the position if the journey begins in the UK and ends outside, or begins outside the UK and ends within? Possible solutions are:

(1) the services are provided in the UK if any part of the journey is in the UK,
(2) the services are not provided in the UK if any part of the journey is not in the UK,
(3) apportion the journey into two parts.

None of these are satisfactory. (1) and (2) are unfair in favour of HMRC or the taxpayer, and not in accordance with the natural meaning of the words. (3) is wrong as there is only one service.

The best answer is that in this case factor (1) - where physical work is done - does not provide a solution, and one should rely on factor (2) - where the supplier is based.[48] HMRC may agree. The RDR Manual

---

47 March 2009 Qs & As made the same point:

Q23: ... If a service provider engages with the Jersey resident trustees of a trust of which a UK resident but non-domiciled individual is a beneficiary and settlor and provides advice which is prepared and issued from the UK, but received and read in Jersey, it is not clear if this would be "a service provided in the UK."...

A: ... The general rule is that, for the purposes of this condition, a service is regarded as being provided in the jurisdiction where the providers of that service are based. Advice which is researched, prepared and issued from the UK would therefore fall within the definition of "provided in the UK" irrespective of where the client might receive it.

Q24: As part of providing advice to clients who have an international aspect to their affairs, a service provider may prepare advice in several different jurisdictions, which may then be issued from only one office, and therefore country, that being the office which has the main relationship with the client.

A: In the case where an offshore service provider provides advice which has been prepared in several different jurisdictions, the same approach will need to be taken to determine whether the test in section 809L is met, and, because the advisors in your scenario are based in the UK, their service will be provided in the UK.

48 The same considerations led the OECD model to a similar rule. Art 8(1) OECD model treaty provides: "Profits from the operation of ships or aircraft in international traffic shall be taxable only in the Contracting State in which the place of effective

provides:

> **34040. Relevant services provided in the UK** [December 2011]
> ... *Example 4 (Charlotte)*
> C, a remittance basis user, purchases a return air ticket using her foreign income. The ticket is to travel from the UK to Belgium and return. *The ticket was purchased from a UK company* but payment was made into the company's offshore bank account.

The HMRC analysis is as follows:

> Because part of the travel service was provided in the UK (the journey begins and ends in the UK) there is a remittance to the UK [ie the service is provided in the UK].[49]

It is on this analysis significant that the HMRC example specified that the purchase was from a UK company.

In order to decide where a service is provided, it is necessary to identify the service or services which are provided. The VAT distinction between (1) single (though composite) supplies and (2) multiple supplies is applicable here. The RDR Manual gives an example of a multiple supply:

> **34040. Relevant services provided in the UK** [December 2011]
> ... *Example 5 (Sarah)*
> S, a remittance basis user, purchases an air ticket using her foreign income and gains to travel from Sweden to Holland, using a UK based booking agency. Payment is made into the agency's offshore bank account.
> There is a 'service provided in the UK', which is the agent's booking services, so the part of the cost of the service that relates to the agency's booking fee is a remittance (although not the cost of the flight between Sweden and Holland as no part of this service is provided in the UK).

---

management of the enterprise is situated."

49 For completeness: there is another version of this example in RDRM 33130:
"*Example 3*
Charlotte, a remittance basis user, purchases an air ticket using her foreign income. The ticket is to travel from the UK to Belgium. The ticket was purchased from an overseas company and payment made into the company's offshore bank account.
Because part of the travel service was provided in the UK (the journey begins and ends in the UK) there is a remittance to the UK."
This is incoherent, since the question assumes there is a ticket from the UK to Belgium, but the answer assumes the journey ends in the UK.

This is correct if there are two services, a booking service and a transport service; but if there is only one supply then it would not be correct.

Basic planning is to use services outside the UK where possible, eg foreign investment advice, foreign accountancy services, foreign travel agencies, and foreign schools.

The last way to satisfy remittance condition A is:

> *(f) a service is provided in the UK for the benefit of a relevant person*

Do the words "for the benefit of" add anything? Is there a case where a service is provided for the benefit of a person but not to that person? Perhaps an example is where a parent P contracts with a school to educate P's child C. The services are perhaps provided to P (who pays for them) but for the benefit of C.

11.13 Remittance condition B (link to foreign income/gains)

Section 809L(3) ITA provides:

> Condition B is that—
> (a) the property, service or consideration for the service, is (wholly or in part) the income or chargeable gains,
> (b) the property, service or consideration—
> (i) derives (wholly or in part, and directly or indirectly) from the income or chargeable gains, and
> (ii) in the case of property or consideration, is property of or consideration given by a relevant person ... [50]

There are eight ways to satisfy remittance condition B. The first six[51] are:

(1) The property received/used/brought to the UK:
  (a) is (wholly or in part) the income or gains,
  (b) is derived property and is property of a relevant person.
(2) The consideration for the service provided in the UK:
  (a) is (wholly or in part) the income or gains, or
  (b) is derived property and is property of a relevant person.
(3) The service:
  (a) is the income or gains or
  (b) derives from the income/gains.

---

50 Section 809L(3) continues with paras (c) and (d) which relate to debt remittances, considered separately below.

51 The remaining two relate to the debt remittance rules, which are considered separately below.

11.13.1 *Property and consideration for service*

It is impossible to refer constantly both to property and to services, so I refer to property and leave the reference to services to be read in, as the same points apply to both.

11.13.2 *Property of a relevant person*

Remittance condition B is not satisfied unless the property brought/received/used in the UK either:
(1) is the foreign income or gains; or
(2) is derived from the foreign income or gains.[52]
If the property *is* the foreign income or gains, it does not have to meet the requirement that it is property of a relevant person. If the property is *derived from* the income/gains ("derived property"), it does have to meet that requirement.

Why the distinction? If T transfers income/gains to R, the funds cease to be the income/gains (instead in the hands of R the funds become derived property). That is, if the property *is* the foreign income or gains, the property must necessarily be property of the individual (T) himself (not any one else who is a relevant person in relation to T), so it is not necessary to impose the requirement expressly. That might be the reason; though if so the matter could have been more simply expressed.

Suppose:
(1) T gives foreign income to S (not a relevant person).
(2) S uses the money to buy property used by T.
Condition B is not satisfied: the purchased property is derived property but it is not the property of T or of any relevant person.[53]

The question whether the property either *is* the foreign income/gains or is *derived from* the income/gains also matters for the purposes of s.809P ITA (amount of income remitted).

We need to classify what the relevant person receives as (1) property or (2) a service or (3) neither. This is not always easy. Suppose T pays rent for use of a picture in the UK. Does T receive a service? It is thought not.[54] Does T receive property and if so what? T does not receive the picture, but receives a contractual right, which is arguably property. Or it

52 But where these conditions are not met, remittance condition C or D may apply.
53 But remittance condition C or D may then apply.
54 "Service" is widely defined for VAT, but that definition is not applicable here.

may be that T makes a payment in respect of a relevant debt. A court is likely to hold that there is a taxable remittance under one or other of these routes, though neither analysis is entirely trouble-free.

11.13.3 *Service derives from income/gains*

Next, condition B is met if:

> The service
> (a) is the income or gain; or
> (b) derives from the income or gains.

I am unable to make sense of this. How can a *service* be (or derive from) income or gains? I think the reference to "service" here is misconceived. Perhaps the drafter is considering services which constitute earnings or benefits in kind, or a disposal of an asset in consideration of services. In that case only para (b) is misconceived.

11.14 Property is the income or the gains

11.14.1 *What is the income?*

The question of whether the property brought/received/used in the UK is the income should be straightforward if the income is pure income, such as dividends, interest or income distributions from trusts, because the income should be easy to identify.

Identifying the income is less obvious if the income consists of trading or property income. Trading (or property) income emerges as the result of a trading (or property income) computation. The gross receipts of a trade (or gross rents from a property) are not the income. For example, suppose an individual borrows to purchase land and pays interest or other deductible expenses out of the rent. The income of the individual is the net profit (rent less expenses), it is not the gross rent. So the payment of the interest out of the gross rent is not a remittance of the rental income. The income is the profit (if any) which is left after payment of the interest and other expenses. See *Anson v HMRC* at first instance:

> ... "profits" is not something which one can own as an asset. The profits of an enterprise are an abstract notion, arrived at after a calculation. One cannot find an asset which represents them which one can own; one can only own the assets which, for the time being, reflect them.[55]

55 [2011] STC 2126 at [38].

Similarly in the Court of Appeal:

> ... profits do not arise until an account is struck for a particular period showing that there has been a profit, and that in general an entity will not have particular assets that can be said to be assets which represent the profit which it has made.[56]

Trading profits are regarded as arising at the end of an accounting period, not during the period.[57]

11.14.2 *What is the gain?*

The question of whether the property is the gain is problematic. What is the jurisprudential nature of a gain? The RDR Manual provides:

> **35320 Mixed Funds: Example 4 - remittances before 6 April 2008 Note 3** [June 2010]
> ... unlike income that can be identified separately, a capital gain is merely part of the money received from the sale and has no separate existence within that amount. See Capital Gains Manual CG25380 onwards (and CG25440 in particular).

On one view, a gain is not an item of property: it is merely a figure resulting from a mathematical computation. The quantum of a gain (generally) depends (in part) on the amount or value of the proceeds of a disposal, but that does not entail that the gain is a part of the proceeds. The income of a trade may similarly be said to be distinct from the gross trading receipts. On this view, the proceeds of a disposal are not the gain and are not even derived from the gain. The gain is not a part of the money received from the sale. But whatever the true jurisprudential nature of a gain may be, the provisions are not drafted on that view: they are drafted on the basis that the proceeds of a disposal for full consideration do constitute (1) gain and (2) non-gain (representing base cost and other exemptions) so for remittance purposes, the proceeds of disposal do include the gain.[58] So for remittance purposes, at least, this statement in the Manual is correct.

---

56 [2013] STC 557 at [59].

57 *Re Robbins* [1941] Ch 434.

58 The position is more difficult for sales at an undervalue: see 11.30.5 (Sale of asset at undervalue).

11.15 Derived property

Remittance condition B (and C and D) refer to property which *derives (wholly or in part, and directly or indirectly)* from foreign income or gains. I refer to this as "**derived property**" and in this section for convenience I refer to RFI (leaving other types of foreign income/gains to be understood).

The words "directly or indirectly" show that the drafter did not want the word "derives" to be construed narrowly.

Some very general guidance might be drawn from case law on s.22 TCGA ("there is ... a disposal of assets by their owner where any capital sum is derived from assets..."). In *IRC v Montgomery* trustees sold a policy of insurance, which was valuable because a fire had damaged insured land held by the trustees. The proceeds of sale were derived from the policy and not derived from the land:

> What, in the context of [s.22], does "derived" mean? The relevant dictionary meaning of "derivation" is to trace or show the origin, and that is what I think it means here.

A dictionary definitions rarely helps, and it does not do so here.

> It appears to me quite clear that the capital sum paid by [the purchaser] was derived from the sale of the rights under the policies, and that it is not right to go back any further. If it were legitimate to embark on the exercise of tracing the derivation of assets back in the manner of an abstract of title, I do not know where the line could ever properly be drawn. I think that one must ask the simple question, "From what asset of the trustees was the capital sum of £75,192 they received derived?" and the simple answer is that it was derived from the ... policies of insurance.[59]

It is considered that the same should apply in a remittance context, which would arise if (say) the land was derived from RFI but the insurance policy was not. Condition B has the words "directly or indirectly" which were not in the CGT provision, but I do not think that alter the position.

11.15.1 *Enactment history*

I do not think that the enactment history helps much, but for completeness: The word "derived" was used in case law on the pre-2008 RFI remittance

---

59 49 TC 679 at p.686.

basis.[60] That is presumably the source of the current wording; or perhaps the drafter started with a blank sheet and came up with the expression "derived".

Under the pre-2008 CGT and employment income remittance bases, tax was charged on sums received in the UK *in respect of* the foreign income or gains. Is that different from "derived from"? It is impossible to answer with precision, since "in respect of" and "derived from" are both imprecise and context-dependent expressions. It is suggested that the meaning (given the context) is the same, but the expression "derived from" more aptly expresses the necessary connection between the foreign income and the property received in the UK.

11.15.2 *Income/gains invested and re-invested*

Suppose T uses RFI to purchase assets. The purchased assets are derived from the RFI. If the purchased assets are sold and the proceeds re-invested in new assets, those new assets are derived from the RFI indirectly. The tracing process can continue for the lifetime of T.

11.15.3 *T gives income/gains to R*

Suppose T gives RFI to R. The funds in the hands of R are not the income, but they are derived from the RFI. If R uses the funds to purchase assets, the purchased assets are derived from the T's RFI , and (as above) that tracing process can continue for the lifetime of T.

11.15.4 *T purchases asset for full consideration from R*

Suppose:

(1) T purchases an asset ("the purchased asset") from a relevant person ("R") for full consideration.

(2) T uses RFI to pay the purchase price.

It is considered that the proceeds of sale in the hands of R is not derived from T's RFI. So there is no taxable remittance if R brings the proceeds of sale to the UK: remittance condition B is not satisfied.[61]

---

60 The former Inspectors Manual para 1564 published 9/95 provided: "Income is received in the UK if funds provided in the UK are derived from income arising overseas;" that was based on a comment in *Thomson v Moyse* 39 TC 291 at p. 335.

61 Of course the purchased asset in the hands of T is derived from T's RFI so there would be a taxable remittance if T brings the purchased asset to the UK.

If my view is wrong, there would be a double charge to tax where the purchased asset

Likewise if T provides services to R for full consideration, and T uses RFI to pay the fee. The fee in the hands of R is not derived from the RFI.

This is a sensible rule, because if T uses RFI to purchase an asset from a company, at arm's length, T will often have no way of knowing whether the company is a relevant person, and T can hardly be expected to ask the company what it has done with its own money. Whereas if T *gives* money to R, the request is not so unreasonable.

This view was accepted in another context in *Cohen v Petch* [1999] STC (SCD) 207. Here:

(1) T borrowed money from a building society and used it to purchase an asset from T's mother.
(2) The mother immediately gave or lent the proceeds of sale back to T.
(3) T lent the money to a company.

The son claimed relief for the interest on the building society loan. The Special Commissioner said at p.211:

> ... once the money had been borrowed [by] the taxpayer from the society it was paid to his mother and became her funds. Subsequently, three days later, the sum of £46,600 was returned to the taxpayer by his mother either in the form of a loan or as a gift. The funds, whether or not they are traceable in specie, were no longer the money borrowed from the society. They were funds lent or given by Mrs Daphne Cohen to her son. *There was no longer any link between the money which the taxpayer eventually lent to the company and the money which he borrowed from the society.*

The questions (simplifying the clumsy language of ICTA) were (1) whether the money borrowed from the building society had been used to lend to the trading company, and (2) whether it had been "applied for some other purpose" before being so used.[62] This not the same as the wording of the ITA remittance basis ("derived directly or indirectly"). But the words used by the Commissioner ("no longer any link") do suggest that the derived test would not be satisfied.

---

represented RFI of R, that is, where:
(1) R receives RFI (R's income) and uses it to purchase an asset (the purchased asset).
(2) T receives RFI (T's income) and uses it to purchase the asset from R.
Suppose T brings the purchased asset to the UK. There is a taxable remittance of T's RFI. But it would be surprising if R's income was also remitted.

62 The current provisions are s.385(3) ITA and 392(2) ITA.

11.15.5 *T sells asset for full consideration to R*

Suppose:
(1) T uses RFI to acquire an asset ("the RFI asset")
(2) T sells the RFI asset to a relevant person ("R") for full consideration.

It is considered that the RFI asset in the hands of R is not derived from T's RFI. So there is no taxable remittance if R brings the RFI asset to the UK: remittance condition B is not satisfied.[63]

Similarly, suppose:
(1) T sells an asset to a company within s.720 or s.13 or a trust within s.624.
(2) The company uses its income (treated as derived from T's s.720 income) or its gains (treated as derived from T's s.13 gains) or the trust uses its income (treated as derived from T's s.624 income) to pay the purchase price.

The proceeds of sale in T's hands are not derived from the s.720 income, the s.13 gains or the s.624 income.

11.15.6 *T lends income/gains to R*

Suppose T receives RFI and lends it to an individual who is a relevant person ("R"). Are the funds in R's hands derived from T's RFI? There are three possible solutions:
(1) R's borrowed money is always derived from T's RFI.
(2) R's borrowed money is never derived from T's RFI.
(3) R's borrowed money is sometimes derived from T's RFI.

There are strong arguments in favour of solution (2):
(1) R's promise to repay the loan is (in principle)[64] full consideration for the money, whether the loan is on commercial terms or interest free repayable on demand (the promise to repay an interest free loan is full consideration). R's borrowed money is derived from that promise.[65]

---

63 Of course proceeds of sale in the hands of T is derived from T's RFI so there would be a taxable remittance if T brings the proceeds of sale to the UK.
If my view is wrong, there could be a double charge to tax.

64 The position would be different if the loan is a fixed-term loan at a low rate of interest as then R's promise to repay is not full consideration; that would be unusual and is assumed not to be the case here.

65 Contrast 76.6 ("Provide").

(2) T acquires an asset (the benefit of the debt) which is derived from the RFI, so it would be surprising if R's borrowed money was also derived from the same RFI.
(3) Suppose R repaid the debt (not out of the borrowed money but out of other funds). On solution (1) the borrowed money would continue to be derived from the RFI, which would be very odd to say the least.

The objection to solution (2) is that it is too good to be true; a remittance is too easily avoidable. There is not much point in having a charge on remittances by relevant persons which arises if T gives RFI to R, but not if T lends RFI to R interest-free. It is considered that there must be some circumstances in which one should regard R's borrowed money as derived from T's RFI. The court might then describe the loan as a mere "conduit".[66] However "conduit" is a metaphor which constitutes a conclusion rather than a basis for reaching that conclusion. The difficulty is to find an appropriate method of distinguishing between cases where one does and does not regard borrowed money as derived from RFI used to make the loan.

It is suggested that one should seek to distinguish between:

(1) loans which have characteristics of an outright payment, where R's borrowed money is regarded as derived from the RFI; and
(2) loans which do not have those characteristics.

A loan has the characteristics of an outright payment if there is no intention to repay the loan, or at least, the loan is likely to remain outstanding during the lifetime of the borrower, or, perhaps, during the period that the borrower is UK resident. A particular instance of that would be where the borrower has insufficient funds to repay the loan (other than the borrowed money). Such "loans" (the facts justifying scare quotation marks) are (from the recipient's viewpoint) more or less equivalent to outright payments.

A loan on arm's length terms is less like an outright payment, at least assuming there is in fact an intention to comply with the terms (pay the interest).

A loan made at arm's length is not like an outright payment.

Similar points arise on a sale with the payment left outstanding (which is commercially equivalent to a loan, though not a loan in the strict sense of

66 As Lord Templeman did in *Harmel v Wright*, 49 TC 149 at p.157, a case on the pre-2008 legislation and so not now directly relevant.

the word).

11.15.7 *T subscribes for shares in R Ltd*

Suppose T uses RFI to subscribe for shares in a company which is a relevant person ("R Ltd"). The shares are clearly derived from the income.

It is considered that the proceeds of the share subscription in R Ltd are also derived indirectly from the income. But (assuming a share subscription on arm's length terms) some obvious difficulties do arise from this view, and the contrary could be argued.

11.15.8 *T purchases shares in R Ltd (secondhand companies)*

Suppose T uses RFI to purchase the shares in R Ltd (a relevant person). R Ltd already owns assets. The assets of R Ltd are not derived property: they do not derive from the RFI.

11.15.9 *T borrows on security of foreign income/gains*

It is helpful first to consider the position for unsecured loans. If T borrows without giving security the borrowed money is derived from the promise to repay. That is so even if T owns assets (say, RFI) and the lender would not lend had T not owned those assets. The fact that the lender only lends because of the RFI does not show that the borrowed money is derived from the RFI. No-one would doubt that.

Suppose T borrows on the security of RFI. Is the borrowed money derived from the RFI? It is considered that in this case the borrowed money is still derived from the promise to repay and not from the security. This is clearly so if T could have borrowed without giving the security.

That is still the case even if T could not have borrowed without giving that specific security. There are three reasons for this view:

(1) The position is analogous to unsecured loans where no-one suggests that borrowed money is derived from the borrower's RFI even T could not have borrowed were it not for that RFI.

(2) A rule which says that borrowed money is derived from a security if and only if the borrower needed the security in order to borrow is not workable: the question whether the security is needed is often imponderable.

(3) The debt remittance rules[67] are designed to cover this aspect of

67 See 11.19.2 (Use as security for debt).

remittances and that suggests that there would not be a remittance under general principles.

For these reasons it is considered that borrowed money is derived from the promise to repay, not from assets used as security, even if T could not have borrowed without giving that security.

In *West v Trennery* 76 TC 713, trustees held shares and borrowed money on the security of the shares. One question was whether the borrowed money was derived property for the purposes of s.77 TCGA (now repealed). So far as relevant, s.77(8) TCGA at that time provided:[68]

> In this section "derived property", in relation to any property, means ... any ... property directly or indirectly representing proceeds
>
> [i] of, or
>
> [ii] of[69] income from,
>
> that property ...

So the question was whether the borrowed money directly or indirectly represented the proceeds of the shares. Lord Millett said:

> 16. The final question is whether the Revenue are correct in contending that the [borrowed] moneys ... constituted derived property within the meaning of s 77(8) in relation to the Einkorn shares. There can be only one answer to this: of course they do. The [borrowed] moneys ... directly represented the proceeds of a mortgage of the Einkorn shares ... If the trustees ... had invested the moneys in stocks and shares, these would have indirectly represented those proceeds. It will be observed that I have equated the proceeds of a mortgage of property with the proceeds of the property itself. But the subsection does not refer to "the proceeds of a sale of that property", but to "the proceeds of that property"; and this covers any proceeds, whether sale or mortgage or otherwise howsoever, by which value is extracted from one property and transferred to another.[70]

---

68 In 2006 the definition was amended with retrospective effect, only to be repealed in 2008.

69 At first sight the word "of" appears to be a grammatical error, but it makes sense if one understands the words to mean:

[i] proceeds of, or

[ii][proceeds] of income from,

that property...

70 Likewise Lord Walker said:

"In my opinion the £770,000 [borrowed money] started off as derived property..."

It is considered that this case is of no relevance, since the statutory words on which the decision rests are not present in the remittance basis provisions.

In practice HMRC appear to accept this view; see 11.19.2 (Use as security for debt).

11.15.10 *T uses income/gains to pay debt*

Suppose:

(1) T borrows from L and receives "the borrowed money".

(2) T uses RFI to repay the debt to L so L receives "the repaid money" and T retains the borrowed money..

In the absence of a statutory provision, the borrowed money would not be derived from the RFI. It would not be derived from the RFI at the time of the borrowing. It would not become derived from the RFI later when the debt is repaid.[71] However, s.809R(3) ITA alters this: see 13.3.6 (Income/gains used to pay debt).

It is considered that the repaid money in the hands of L is not derived from the RFI. It is derived from the debt, and (indirectly) from the funds which L used to make the loan to T.

11.15.11 *Income from income/gains*

Suppose:

(1) T receives £1m ("original income").

(2) T invests the original income and receives £50k ("new income").

It is considered that the new income is not derived from the original income. One must stop tracing the original income at that point. Otherwise various odd results will follow:

(1) If T remits the £50k new income, T would pay tax on the £1m original income.[72]

(2) Suppose:

(a) T gives £1m original income to R (a relevant person).

(b) R receives £50k new income.

---

71 The position might be different if the two steps formed part of a scheme and were carried out in quick succession. Of course, if the debt were a relevant debt there would be a remittance of the RFI on payment of the debt, under the debt remittance rules.

72 See 11.29.2 (Remittance of derived property).

(c) R brings the £50k new income to the UK.

If the new income is derived from the original income, there will be double taxation:

(i) R will pay tax on the new income (on an arising or remittance basis, depending on whether R is a remittance basis taxpayer; that makes no difference for the purposes of this example).

(ii) T would pay tax on the remittance of the new income by R.

11.15.12 *Gift on to third person*

The position becomes more complex if a second individual is involved. Suppose:

(1) T gives income/gains to A (an individual who may or may not be a relevant person).[73]

(2) A gives the fund to B (a relevant person).

It is suggested that the funds in the hands of B are derived property if steps (1) and (2) form an arrangement. If there is no connection of that kind between T's gift and the transfer to B, the funds in B's hands are not derived property. The chain of derivation stops there. In particular, if B acquires the funds on the death of A, the funds are not derived property.[74]

If T gives income/gains to a trust and the trustees appoint the fund to B, the same approach should be applied, but the two steps do form an arrangement because the trustees is merely carrying out the intention of the settlor and is not a wholly independent mind.[75] So the funds in the hands of B are derived property.

11.15.13 *Receipt of cheque in UK*

Suppose T receives in the UK a cheque which, if cashed, the proceeds would be RFI. For instance, a cheque representing a dividend from a non-resident company, or a cheque drawn on a foreign account holding unremitted income of T.

---

73 If A is not a relevant person, A will be a gift recipient, and remittance condition C needs consideration.

74 This view is supported a little by s.48(3C)(b) IHTA: see 62.17.3 (Purchased equitable interest).

75 See *Williams v Muir* [1943] AC 468 at p.483 in relation to a special power of appointment, as contrasted with a general power: "It is as though the settlor had left a blank in the settlement which B fills up for him if and when the power of appointment is exercised. The appointees' interests come to them under the settlement alone and by virtue of that document."

A cheque has a twofold character:

(1) It is an instruction to the payor's bank.

(2) It is also a chose in action which entitles the payee to sue on it.[76]

Under neither character is the mere receipt of a cheque a taxable remittance.[77] So far as the cheque is an instruction to pay:

> It is not enough to complete the beneficiary's title to the proceeds of the transfer that the beneficiary [ie payee] or his or her bank receives the payment instruction. This is the case whether the instruction is embodied in a telex or telephone instruction given by the originator [payor] or a standing order or payment order form The instruction only confers on the originator's bank the necessary mandate to make the payment to the beneficiary as his or her agent and to debit his or her account.[78]

So far as the cheque is a chose in action, a promise to pay, it is a different asset from the funds in the account, and so not derived property. Remittance condition B is not satisfied. Also, the chose in action is not UK situate (even if the paper itself is in the UK) unless the cheque is a bearer instrument or negotiable.[79] So remittance condition A is also not satisfied.

Even if the cheque is presented to a bank in the UK, there is still no remittance if:

(1) the credit is made to the payee's foreign account, not to a UK account; or

---

76 Fox, *Property Rights in Money* (2008) para 5.18, 5.64.

77 This continues the pre-2008 law. The RDR (discussing the pre-2008 remittance basis) provides:

"RDRM36110 - Remittance Basis: Remittance Basis up to 6 April 2008: Form of Remittance: Cheques received

If a taxpayer receives a cheque which represents taxable foreign income, before it is treated as taxable remittance it is necessary for the taxpayer to do something with it after it came into his or her hands.

For example, the cheque might be:

- Credited to a UK bank account
- Exchanged for cash (through a bank or otherwise)
- Accepted by a third party in settlement of a debt owed by the taxpayer
- Given away to a relative

A taxable remittance is not made if a cheque is received in the UK but is then sent abroad and credited to a bank account which the taxpayer has overseas."

78 Fox, *Property Rights in Money* (2008) para 5.64.

79 Cheques drawn on UK banks have generally been non-transferable since the Cheques Act 1992.

(2) the payee is not a relevant person.[80]

11.15.14 *Betting*

In a conventional bet, the individual puts up a stake in advance, and the winnings (if any) are (at least partly) derived from that stake.

Spread betting is explained in *Spreadex v Battu*:

> [2] Spread betting is not so much or not merely a bet, although it can be described as such, as a form of contract for differences. It enables a customer to take a position on a market (or an event) for a very small stake. Thus, if the Dow Jones index is, say, at 10,000, one can "buy" or "sell" the market at a spread around the index of, for the sake of example, 10 points either way, 9990 to 10,010. If one buys, one is betting that the market will rise above 10,010. If one sells, one is betting that the market will fall below 9990. If one buys and the market rises, one stands to gain £1 for every point that the index exceeds 10,010. If one sells and the market falls, one stands to gain £1 for every point that the index drops below 9990. If, however, one calls the market wrong, then one will stand to lose £1 for every point the market rises above 9990. Until the bet or "trade" is closed, the gains and losses are merely "running" gains or losses. They are real enough, but constantly changing with every change in the index, and have not yet been fixed. Closing the bet will fix the position, win or lose. Unlike a classic bet, the customer can of course lose more than his stake. Indeed, on the example given, of a sales spread point of 9990 when the market is at 10,000, if the market does not move an inch, the customer will lose £10 for every £1 staked. Nor, again unlike a classic bet, are his winnings fixed at the outset by an agreement on odds. In theory, winnings based on rising markets are infinite (in practice, of course, they are not) and losses based on falling markets are limited only in so far as they cannot exceed the consequences of a fall in the index to zero.[81]

Pelling explains:

> A spread bet is a form of contract for differences. The client agrees with the firm where he holds his account that each will pay to the other a

80 See 11.12.8 (Gift to non-relevant person); 11.12.9 (Arm's length payment to non-relevant person).

81 *Spreadex Ltd v Battu* [2005] EWCA Civ 855.

> specified sum per point (the stake) in respect of movements in a nominated index. In financial spread betting the index could be the FTSE 100 or the Dow, or the price of an individual share such as BP or, conceivably, a much smaller floated company, or the price of a commodity or a rate of exchange between specified currencies. If the client is "long" the firm will pay him the stake multiplied by any increase in the index value between opening and closing, but he will have to pay the firm on the same basis if there is a decrease. If he is "short" the opposite applies. The "spread" is the difference between the long and short, or "buy" and "sell" prices at any given time. Spread bets generally have expiry dates built into them but the client is able to close his position before expiry if he chooses to do so. The firm, however, does not have the same discretion. ...
>
> Not all spread betting is on financial indices. Spread betting markets are made by firms on a huge breadth of sporting events, although in this country anecdotal evidence suggests that the biggest individual positions are still taken on financial indices. In this regard spread betting offers certain advantages over more orthodox financial instruments when it comes to profiting from market movements. First, profits on spread bets are taken free of capital gains tax.[82] Secondly, the "geared" or "leveraged" nature of spread bets means that typically the client only has to put up a fraction of the total cost of a position, which means that he can get bigger exposure for a given sum (in hedging the exposure the firm puts up the balance of the cost from its own resources). Thirdly, spread betting offers the client the opportunity to go "short" if he thinks that the market will fall — something that is not always available with a more straightforward brokerage.[83]

In a spread bet, the individual does not put up any stake, but instead incurs a liability to make a possible payment in the future.

If an individual takes a spread bet and loses, nothing can be received in the UK and there can be no remittance. If an individual takes a spread bet and wins, the winnings are not derived from any foreign income or gains: they are derived from the (contingent) liability which the individual undertook when making the bet. Accordingly, there is no taxable remittance.

---

82 See 44.11.4 ("Gambling" and distinction between individuals and companies).

83 Pelling, "The long and the short: common issues in spread betting cases" (2012) 1 JIBFL 18.

11.16 Debt remittance rules

I turn to the second part of remittance condition B. Section 809L(3) ITA provides:

> Condition B is that ...
>
> (c) the income or chargeable gains are used outside the UK (directly or indirectly) in respect of a relevant debt, or
>
> (d) anything deriving (wholly or in part, and directly or indirectly) from the income or chargeable gains is used as mentioned in para (c).

I refer to these rules as the "**debt remittance rules**".

In order to have a debt remittance under condition B, three conditions must be satisfied; in short:

(1) A *relevant debt* (broadly, relating to property brought/received/used in the UK).

(2) Foreign income/gains used *in respect of* the debt.

There is no remittance under the debt remittance rules unless both conditions are satisfied:

(1) if a relevant debt is paid out of a sum which does not constitute foreign income/gains; or

(2) if foreign income/gains are used to satisfy a debt which is not a relevant debt.

The third requirement is that the income/gains are used *outside the UK*; however if the income/gains are used in the UK, there will normally be a remittance under the usual remittance rules, so this is not so important in practice.

11.17 Relevant debt

"Relevant debt" is a key term, which is found in remittance conditions B, C and D . Section 809L(7) ITA provides the definition.

There are six categories of relevant debt:

> In this section "relevant debt" means a debt that relates (wholly or in part, and directly or indirectly) to—
>
> (a) property falling within subsection (2)(a) [property brought/received/used in the UK]
>
> (b) a service falling within subsection (2)(b) [service provided in UK]
>
> (c) qualifying property dealt with as mentioned in subsection (4)(a),

(d) a service falling within subsection (4)(b),
(e) qualifying property dealt with as mentioned in subsection (5)(a), or
(f) a service falling within subsection (5)(b).

To understand this one must read back in the words in the six cross-references:
(a) and (b) relate to remittance condition A
(c) and (d) relate to remittance condition C
(e) and (f) relate to remittance condition D.
When one reads in the words, it is clear that para (f) is otiose: it only repeats para (d).

In para (e) "*Qualifying* property dealt with as mentioned in s.809L(5)(a)", the word "qualifying" is meaningless. The expression "qualifying property" is defined for remittance condition C but not for condition D.

The most important category is para (a). The discussion here concentrates on this category. There are two steps in deciding whether a debt is a relevant debt within para (a):
(1) One must identify the property (if any) to which the debt relates. I refer to that as **"the debt-related asset"**.
(2) One must ask if that asset is "property falling within s.809L(2)(a)" ie is the property brought/received/used in the UK by a relevant person.

The residence of the lender is not relevant. A loan from a UK bank is not a relevant debt if the money borrowed is received and retained outside the UK but it is a relevant debt if the money borrowed is received in the UK. However the debt remittance rules only apply if income/gains are used *outside the UK* in respect of a relevant debt, which is not likely to happen where the loan is from a UK bank: repayment to a UK bank is in principle use of funds in the UK.

"Debt" is not defined. It is suggested that it includes any liability to pay money. If an individual holds a lease, the payment of rent is the payment of a debt. If the land is UK situate, the debt is a relevant debt. A guarantee is not a debt but if the guarantee is called on, it becomes a debt.

11.18 Debt "relating" to property (debt-related asset)

"Relates" requires some nexus between the debt and the debt-related asset; exactly what that nexus is has been left to the courts to sort out.

The words "directly or indirectly" do not add any clarity; indeed I am not sure that it is altogether coherent to speak in the abstract of direct and indirect relationships, for "relates" requires a relationship and an indirectly

relationship is a type of relationship. But the word "indirectly" shows that the drafter did not want the word "relates" to be construed narrowly.

In the following discussion I just use the word "relate" and leave "directly or indirectly" to be understood.

11.18.1 *Some straightforward examples*

Suppose T borrows and receives money. The debt relates to the money. If T receives the borrowed money in the UK, the debt is a relevant debt.

If T borrows and receives the borrowed money outside the UK, the debt still relates to the money but the money is not "property falling within s.809L(2)(a)" so the debt is not a relevant debt. However if T later brings the money to the UK, it becomes "property falling within s.809L(2)(a)" and the debt at that time becomes a relevant debt. HMRC agree.[84]

Under a typical loan facility, T will borrow but may not receive money: T may draw down the borrowing to pay for an asset, the money being paid directly to the vendor. In that case the debt relates to the asset. If at any time T brings/receives/uses the asset in the UK the debt is a relevant debt. It makes no difference whether the loan is drawn down first or (which may be more usual) drawn down directly to pay for the asset.

The RDR Manual provides some examples which are consistent with the above. I set out the relevant parts of the text, relegating the full text to footnotes.

Example 1 concerns borrowing to buy UK shares.

> *Example 1 (Katrina)*[85]
> K borrows money to buy shares in a UK company.

The HMRC analysis is as follows:

> This is a relevant debt as it relates to property (shares) in the UK which is for the benefit of a relevant person.

---

84 See the example of Ali at 11.17.6 (Debt-related asset given to another person).

85 The example in full (including its irrelevant detail) is as follows:

> "**33160 Condition B - relevant debt** [May 2012]
> In May 2006 Katrina, a remittance basis user, borrows money from an overseas bank to buy shares in a UK company. This is a relevant debt as it relates to property (shares) in the UK which is for the benefit of a relevant person (Katrina).
> From 6 April 2008 any foreign income or gains that Katrina uses in respect of the loan, for example to service or to repay the loan, are taxable as a remittance."

More analytically, the debt is in the HMRC view a relevant debt on the following grounds:

(1) The debt relates to the shares. (This is correct).
(2) The shares are received in the UK by K. This assumes a receipt of UK situate property is a receipt in the UK.[86]

Example 2 concerns borrowing to buy UK residential accommodation:

> *Example 2 (Gary)*[87]
> G borrows money to buy an apartment in the UK which he occupies.

The HMRC analysis is as follows:

> The loan is a relevant debt because money is used in the UK, and it is respect of property (the apartment) which is used in the UK for the benefit of a relevant person (G).

More analytically, this is in the HMRC view a relevant debt on one or both of the following grounds:

(1) It relates to the flat which is used in the UK by G. (This is correct).
(2) It relates to money which is used in the UK by G. Whether this is correct depends on the details of the purchase arrangement but it does not matter since the debt is a relevant debt under (1)).

Example 3 concerns borrowing to buy a UK chattel for a relevant person.

> *Example 3 (Robina)*[88]
> R borrows money to buy a car for M, a relevant person.

The HMRC analysis is as follows:

---

86 See 11.12.10 (Receipt of UK situate investment asset).

87 The example in full (including its irrelevant detail) is as follows:
"On 6 April 2015, Gary, a remittance basis user, borrows money from an overseas bank to buy an apartment in Solihull.
The loan is a relevant debt because money is used in the UK, and it is respect of property (the apartment) which is used in the UK for the benefit of a relevant person (Gary)."

88 The example in full (including its irrelevant detail) is as follows:
"In October 2012 Robina, a remittance basis user, borrows money on a fixed-rate loan from an overseas bank to buy a car for Mark, a relevant person. Robina pays £x each month from 1 November 2012, making 24 monthly payments. She uses her foreign chargeable gains to make these repayments.
The loan is a relevant debt because it is respect of property (the car) which is used in the UK by a relevant person (Mark)."

The loan is a relevant debt because it is respect of[89] property (the car) which is used in the UK by a relevant person (M).

More correctly, there is a relevant debt because:

(1) The debt relates to the car.

(2) The car is used in the UK by a relevant person, M. (Another reason is that the car must have been brought or received in the UK by R or M.)

Example 4 concerns borrowing to pay for two services, one provided in and the other out of the UK; I discuss this at 11.18.13 (Debt relating to UK property in part).

Example 5 concerns borrowing to purchase an asset given to a relevant person; I discuss this at 11.18.6 (Debt-related asset given to another person). Example 6 (Francine) is a straightforward example of borrowing to pay for services in the UK which adds nothing and so is not set out here.

For example 7, see 11.18.12 (Borrowing by relevant person (not the individual)).

11.18.2 *Asset derived from debt-related asset*

Suppose:

(1) T borrows and uses the borrowed money to purchase a non-UK asset ("asset 1").

(2) T later sells asset 1 and uses the proceeds of sale to purchase a UK asset ("asset 2").

The debt relates to asset 1. It is considered that the debt does not necessarily relate to asset 2. The word "relates" requires more than just a historic tracing exercise. It is suggested that the debt relates to asset 2 if and only if steps (1) and (2) form part of an arrangement.

Suppose:

(1) T borrows.

(2) The borrowed funds (or proceeds representing them) are mixed with other funds.

(3) Some of the mixed funds are used to acquire a UK asset (leaving an amount in the mixed fund which equals the borrowed funds).

89 The author of the example probably regarded "relates to" and "in respect of" as synonymous, which no doubt they are; but it is best to use the statutory wording and not a paraphrase.

Does the borrowing relate to the UK asset or to the amount remaining in the mixed fund? Unless steps (1) to (3) form part of an arrangement, the debt does not relate to the UK asset. If the debt does relate to the asset, some commonsense tracing rules must be devised; the ITA mixed fund regime does not apply.

Suppose T borrows invests the borrowed funds, and receives income from the borrowed funds. It is considered that the debt does not relate to the income. So if the income is remitted, it is in principle taxable, but the debt does not thereby become a relevant debt.

11.18.3 *Debt relating to asset later removed from UK or ceasing to exist*

Suppose:
(1) T borrowed to acquire an asset.
(2) T brings/receives the asset in the UK so the debt is a relevant debt.
(3) T later takes the asset outside the UK.

The debt still relates to the asset. It is suggested that the asset is still "property falling within s.809L(2)(a)" ie property brought/received/ used in the UK by T. So the debt is still a relevant debt. The contrary view would give scope for planning/avoidance. Suppose T wanted to use property/chattels in the UK:
(1) T borrows funds.
(2) T uses the funds to purchase property in the UK and chattels which are in the UK or which are brought to the UK.
(3) Interest rolls up on the debt.
(4) Later when T no longer wants to use the property/chattels, the chattels are taken outside the UK, and the property is sold.
(5) The debt is then repaid.

If my view is wrong, the debt has ceased to be a relevant debt by the time it is repaid so there is no remittance, even though T may have enjoyed substantial benefits in the UK.

Suppose:
(1) T borrowed to acquire an asset.
(2) T brings/receives the asset in the UK so the debt is a relevant debt.
(3) The asset ceases to exist (eg it is a short lease which expires, or money which is spent).

It is considered that the debt remains a relevant debt. That is consistent with debt remittance rules for services, for if T borrows to pay for services provided in the UK, the debt is a relevant debt even after the services have ceased to be provided.

11.18.4 *Borrowed money used to repay debt*

Suppose:

(1) T borrows to acquire borrowed money or other property; T has a debt ("debt 1") and an asset ("asset 1"). Debt 1 relates to asset 1.

(2) T borrows more ("debt 2") and uses the borrowed funds to repay debt 1, so T retains asset 1.

Does debt 2 relate to asset 1? It is considered the answer is yes, if the steps form a scheme or arrangement.

11.18.5 *Borrowed money lent on to another person*

The position becomes more complex if borrowed money is lent on to another person. Suppose:

(1) T borrows money from a bank.

(2) T lends the borrowed money to A.

(3) A uses the money to acquire a UK asset ("A's UK asset").

In this case:

(1) T has a debt: the burden of the debt to the bank ("T's debt"). One needs to ask if it is a relevant debt.

(2) A has a debt: the burden of the debt to T ("A's debt"). One needs to ask if it is a relevant debt.

(3) T has an asset: the benefit of A's debt to T: one needs to ask if it is UK situate.

(4) A has an asset: "A's UK asset".

A's debt is a relevant debt: it relates to A's UK asset.

Is T's debt a relevant debt? T's debt relates to the benefit of A's debt. If the benefit of A's debt is a UK situate asset, then T's debt is a relevant debt. Let us assume this is not the case.

T's debt is also a relevant debt if (1) it relates (indirectly) to A's UK asset and (2) A is a relevant person in relation to T. It is suggested that T's debt does not relate to A's UK asset. This is clearly the case if steps (1) and (2) do not form an arrangement. If there is no connection of that kind between T's debt and the UK asset, the debt does not relate to the asset. But even if there is an arrangement, T's debt does not relate to A's UK asset, since T has another asset which relates to the debt. There is no scope for tax avoidance in this conclusion, since the debt remittance rules apply to A.

If my view is wrong, what would the position be if:

(1) T borrows from a bank and lends to A.

(2) A lends the proceeds of the borrowing to B.

(3) B uses the money to acquire a UK asset.

How many assets would T's debt relate to, and how could T keep track of them all?

11.18.6 *Debt-related asset given to another person*

RDR Manual 33160 gives an example of borrowing to purchase an asset which is later given to a relevant person and brought to the UK:

> *Example 5 (Ali)*[90]
> A borrows to purchases a sculpture outside the UK.
> A gives the asset to his wife W.
> W brings the asset to the UK.

HMRC correctly analyse why the debt is a relevant debt:

> There is a debt (the loan from the bank) which relates to property (the sculpture) which is brought to the UK by a relevant person (W).

---

90 The example in full (including its irrelevant detail) is as follows:

"**33160 Condition B - relevant debt** [May 2012]

Ali, a remittance basis user, purchases a sculpture in Sweden in October 2012 (see earlier example). He takes out an interest-free [*sic*] loan with his US bank to fund this purchase, repayable within 1 year. In November 2012 he gives them to his wife as an anniversary gift.

She initially keeps it at her mother's home in Stockholm, but 6 months later in March 2013 Ali's wife decides to bring the sculpture to the UK to display in her UK garden. In October 2013 Ali arranges with the US bank that he will repay the loan by giving them an oil painting which is currently in his apartment in Miami, which he had purchased in May 2011, using his relevant foreign earnings, and some capital inherited from an uncle.

There is a debt (the loan from the US bank) which relates to property (the sculpture) which is brought to the UK by a relevant person (Ali's wife, in March 2013).

The painting which derives, in part, from A's relevant foreign earnings, is used outside the UK in respect of this relevant debt.

There is a taxable remittance in 2013-14, the tax year in which the painting is used to pay the relevant debt."

More analytically, remittance condition B is satisfied under s.809L(3)(d): the picture (which derives from RFE) is used in respect of the relevant debt. The example continues:

"The remittance occurs when the foreign income or gains are regarded as used in respect of the relevant debt (2013-14) not when the property is first used in the UK by a relevant person (2012-13). ...

NB – for the purposes of this example assume there is no chargeable gain on the transfer of the painting to the bank."

Suppose:
(1) T borrows money from a bank.
(2) T gives the borrowed money to R (a relevant person in relation to T).
(3) R uses the money to acquire a UK asset ("R's UK asset").
Is T's debt a relevant debt? T's debt is a relevant debt if it relates (indirectly) to R's UK asset. It is suggested that T's debt relates to R's UK asset if and only if steps (1) and (2) form an arrangement. If there is no connection of that kind between T's debt and the R's asset, the debt does not relate to the asset.[91]

11.18.7 *Borrowed money used to buy secondhand company*

Suppose T borrows and buys all the shares of a company which owns a UK asset ("the Co's asset"). The debt relates to the shares. At first sight it may seem that the debt also relates to the Co's asset. But note that if T uses foreign income to purchase the shares, the income is not remitted. That being the case, it would be anomalous if there were a remittance if T borrows to purchase the shares and then uses foreign income to pay the debt. So the debt should not be regarded as a relevant debt: the debt does not relate to the Co's asset. One does not lightly pierce the corporate veil.

11.18.8 *Borrowed money used to buy partnership interest*

Suppose T borrows and buys an interest in a partnership which owns a UK asset. It is suggested that the debt does not relate to the UK asset.[92]

11.18.9 *Debt for unpaid interest*

Suppose T has two debts:
(1) A debt for capital borrowed (the principal debt).
(2) A debt for interest on the principal debt (the interest debt).
The fact that the principal debt is a relevant debt (assume it relates to property brought/received/used in the UK) does not make the interest debt a relevant debt. This follows from the repeal of the former s.809L(8) ITA in 2009. However see 11.19.1 (Payment of interest).

11.18.10 *Borrowing on security of UK asset*

Suppose T borrows and receives the borrowed money abroad but secures

91 Contrast 11.15.12 (Gift on to third person).
92 See 11.34 (Partnerships).

the debt on property brought/received/used in the UK. It is considered that the debt does not relate to the UK property (within the meaning of the section) so the debt is not a relevant debt. The context shows that the colourless word "relate" is intended to apply to the proceeds of the debt, the borrowed money. Otherwise there would be a remittance when the debt is repaid, which is absurd.[93]

11.18.11 *Debt imposed by law*

Debts may be imposed by law. Court orders on divorces are not relevant debts (they do not relate to property brought received/used in the UK) and indeed the obligation may not be a "debt". So the debt remittance rules do not apply. Similarly, fines imposed by the courts do not in principle relate to property brought/received/used in the UK.

There might, however, be a remittance under ordinary principles when the court order is satisfied.

A tax liability on income or gains may relate to the income or gains. If so a tax liability on foreign income/gains is not a relevant debt, but a tax liability on UK income or gains, or remitted RFI and foreign gains may be a relevant debt.

11.18.12 *Borrowing by relevant person (not the individual)*

Suppose:
(1) R (a relevant person - not the individual) borrows to purchase an asset.
(2) R receives or uses the asset in the UK (so the debt is a relevant debt).
The debt is a relevant debt and if T uses their income/gains to repay it there is a taxable remittance.

It is suggested that this is the case even if R ceases to be a relevant person before T uses their income/gains to repay the debt, since even at that time the debt relates to the asset, and the asset is property falling within s.809L(2)(a); but the contrary is arguable.

The RDR Manual 33160 provides an example:

Example 7 (Kumar)[94]

---

93 The debt would not be a relevant debt if T first took the UK security outside the UK, which would be somewhat odd.

94 The example in full (including its irrelevant detail) is as follows:
"**33160 Condition B - relevant debt** [May 2012]
Example 7
Kumar sets up and is a beneficiary of a non resident trust with £1,000,000 capital

K is settlor of a non resident settlor-interested trust.
The trust borrows to buy an asset which K uses in the UK.

The HMRC analysis is as follows:

There is a relevant debt (the loan) which is used to purchase an asset in the UK (property used by a relevant person).

More analytically, the debt is a relevant debt since:
(1) It relates to the UK asset.
(2) The asset is used in the UK by a relevant person (K).
Thus if the debt is repaid out of foreign trust income, K is chargeable under the s.624 remittance basis.

11.18.13 *Debt relating to UK property in part*

If a debt relates partly to property brought/received/used in the UK, the entire debt is a relevant debt. The unfairness is avoided by the rules in s.809P: see 11.29.3 (Debt remittances). But HMRC do not agree. In RDR Manual the facts (stripping out irrelevancies)[95] are as follows:

Example 4 (Karen)
K borrows:
- to pay UK school fees for her 14 year old daughter.
- to pay for a summer school in France for the daughter.

---

which the trustees invest in overseas property which produces income that would be chargeable on Kumar if he remitted it to the UK.
The trust borrows £500,000 from an offshore lender to buy a UK asset which Kumar uses in the UK. The trust pays the interest on the loan with the income from the letting of the overseas property.
There is a relevant debt (the loan) which is used to purchase an asset in the UK (property used by a relevant person). The income used to service the loan is regarded as a taxable remittance, chargeable on Kumar."

95 The example in full (including its irrelevant detail) is as follows:
"**33160 Condition B - relevant debt** [May 2012]
Example 4
In August 2011 Karen, a remittance basis user, uses an interest-free [*sic*] overdraft facility on her Jersey bank account to pay UK school fees for her 14 year old daughter Lauren. She also uses the remainder of the facility to pay for Lauren to attend a summer school in France organised by a French university. Karen repays the overdraft from her relevant foreign earnings between August and November 2011. ...
The daughter therefore has taxable remittances of the relevant foreign earnings used to service and repay the part of the overdraft that is a relevant debt."

K repays the overdraft from her relevant foreign earnings.

The HMRC analysis is:

> There is a debt (the overdraft) which relates in part to a service provided in the UK (the schooling) to a relevant person (the daughter) – this part is a relevant debt. However part of the overdraft facility is not a relevant debt because it does not relate to a service provided to the daughter in the UK, but to a service provided in France.

The author has overlooked the definition of relevant debt in s.809L(7) ITA:

> In this section "relevant debt" means a debt that relates *(wholly or in part*, and directly or indirectly) to—
> (a) property falling within subsection (2)(a),
> (b) a service falling within subsection (2)(b) ...

11.18.14 *Transitional rules*

A pre-2008 debt may be a relevant debt. There is transitional relief if pre-2008 income/gains are used to repay the debt (wherever made). Otherwise transitional relief for pre-2008 debts is limited to residential loans: see 11.38 (Transitional lloan relief: Pre-2008 loans).

11.19 **Use "in respect of" a relevant debt**

Condition B is satisfied if income/gains are used in respect of the relevant debt.

Use "in respect of" a debt requires some nexus between the use and the debt; exactly what that nexus is has been left to the courts to sort out.[96] The words "directly or indirectly" do not add any clarity. Indeed I am not sure that it is altogether coherent to speak in the abstract of use "directly or indirectly" in respect of a debt, for use indirectly in respect of a debt is use in respect of a debt. But the word "indirectly" shows that the drafter did not want the words "in respect of" to be construed narrowly.

If foreign income/gains are used to pay a relevant debt, this is a taxable remittance under the debt remittance rules: money used to pay a debt is used in respect of a debt.

In this section I sometimes refer simply to a debt rather than a relevant debt, ie it may be assumed the debt is a relevant debt.

---

96 In *Cunard's Trustees v IRC* 27 TC 122 at p.135 Lord Greene MR described the phrase *in respect of* as "colourless words".

11.19.1 *Payment of interest*

Section 809L(9) ITA provides:

> The cases in which property (including income or chargeable gains) is used in respect of a debt include cases where the property is used to pay interest on the debt.

Suppose T has two debts:
(1) A debt for capital borrowed (the principal debt).
(2) A debt for interest on the principal debt (the interest debt).
It is possible that:
(1) the principal debt is a relevant debt (assume it relates to property brought/received/used in the UK) but
(2) the interest debt is not a relevant debt.[97]
However if T uses foreign income/gains to pay the interest debt, the funds are regarded as used in respect of the *principal* debt, and so are regarded as remitted under the debt remittance rules. In other words, it does not matter whether or not the interest debt is a relevant debt, all that matters is whether the principal debt is a relevant debt.

11.19.2 *Use as security for debt*

Suppose foreign income/gains are charged as security for a debt. There are various possible views.
(1) One view is that the charge constitutes "use" of the funds within the meaning of the debt remittance rule; and (if "used") the funds are used "in respect of" the debt. On this view charging funds as security for a debt constitutes a remittance. Nothing more is needed.
(2) The word "used" might connote "used up" ie consumed; in that sense (unless and until the security is enforced) the funds are not "used", and the charge does not constitute a remittance.
(3) The compromise view is that merely charging funds does not constitute use in respect of the debt: something more is needed combined with the charge, before the income/gains can be said to be used in respect of the debt. The question then is to identify that "something more":
    (a) I have considered the view that funds charged are "used" in circumstances where the loan would not be made without the

97 See 11.18.9 (Debt for unpaid interest).

security, and funds are not "used" if the circumstances are that the loan would be made anyway. On reflection I think that is not an attractive view. Among other objections, the question whether the loan would be made without the security is a hypothetical question which would often be imponderable; and the answer to that question may vary over time.

(b) The RDR Manual adopts another variant of the compromise view:

> **33170 Condition B: collateral[98] in respect of relevant debt** [Dec 2011]
> Foreign income and gains may be used as collateral for a loan which is brought to the UK or otherwise used for a purpose to which ITA2007/s809L(2) applies (that is, there is a relevant debt).
> Such foreign income and gains used as collateral are used 'in respect of' the relevant debt, so there may be a taxable remittance at this point.
> [1] The foreign income or gains used as collateral may be used directly, that is, the lender may receive a charge over cash assets in a bank account.
> [2] However it is more likely they will be offered indirectly, often in the form of an asset such as a property or bond note that is 'derived from' the foreign income or gains.[99]
> [3] This situation only arises where remittance basis users offer their foreign income or gains for use as collateral for a relevant debt, whether to a UK-based or an offshore lender.
> [4] In many cases UK property or non-taxable offshore property is offered as collateral in respect of a relevant debt; there is no remittance of this collateral within Condition B (ITA2007/s809L(3)(c)).[100]
> To determine the amount of remittance where foreign income or gains are used as collateral in respect of a relevant debt refer to RDRM35050.[101]

So far the Manual appears to take the view that charging as security is use in respect of a debt, but the text goes on to qualify that with an exception so large that the rule rarely applies:

---

98 [Author's footnote] A note on terminology. The author of this passage is using the word "collateral" as a synonym of "security" though that is (I think) American rather than English legal usage. The word includes any type of security, whether a charge, lien, pledge, or some other form.

99 [Author's footnote]. I rather doubt that [2] is "more likely" than [1] but it does not matter.

100 More analytically: There is no taxable remittance of this collateral because Condition B is not met.

101 See 11.29.4 (Use as security: amount remitted).

> Foreign income and gains used to pay interest on the debt and to repay the borrowed capital are also 'used in respect of' a relevant debt, and will be taxable as a remittance. Thus there are potentially two possible sources of a taxable remittance charge in respect of the relevant debt – the foreign income or gains used as collateral and the foreign income or gains used to repay the debt.
>
> In the majority of commercial situations, neither party to the relevant debt transaction expects or intends that the collateral offered as security will be taken by the lender. Instead it is planned that the loan will be serviced and the capital repaid without recourse to the security charge. In such cases using foreign income or gains to regularly service or make capital repayments in respect of the relevant debt effectively 'masks' the collateral being used. In such cases the only taxable remittance will occur as and when the foreign income or gains are used to service or repay the loan. The payments, and thus the taxable remittances, will be spread over the loan period.

The Manual then gives an example where the facts (stripping out irrelevancies)[102] are as follows:

> *Example 1 (John)*
>
> J, a remittance basis user, borrows £200,000 from a Guernsey bank in 2012/13.
>
> J uses the loan to purchase UK property so the loan is a relevant debt.
>
> J offers as collateral for the loan an offshore bond. He had purchased this bond out of his untaxed RFI.
>
> J repays £18,000 of the loan (interest and some principal) in 2012/13, using his RFE.

The HMRC analysis is as follows:

> J is using the offshore bond as collateral for the loan; the offshore bond derives directly from his foreign income so J is using his RFI in respect

---

102 The example in full (including its irrelevant detail) is as follows:
"In 2012/13 John, a remittance basis user takes out a loan for £200,000 from a Guernsey bank. John uses the loan to purchase a horse and a stable/paddock in Chester to indulge his young daughter's latest hobby; so the loan is a relevant debt. John offers as collateral for the loan a 5-year offshore bond, due to mature in 2015. He purchased this bond in 2010 (a year in which he was also a UK resident remittance basis user) using £200,000 of his untaxed relevant foreign income from that year.
John repays £18,000 of the loan (principle (*sic*) plus interest) in 2012/13, using his relevant foreign earnings from his separate employment in Guernsey."

of the relevant debt.

However J is also using his RFE to both service and repay the debt capital; this 'masks' the collateral and so J will only be regarded as remitting the £18,000 RFE in 2012/13.

Note – In the example above, the relevant debt could also be serviced and repaid using non-taxable income or capital sources; in which case there would be no taxable remittances of foreign income or gains. However the servicing/repaying of the loan effectively masks the collateral offered, so there is still no remittance of the collateral in this circumstance.

In some cases, usually involving avoidance or non-commercial arrangements, the relevant debt is not serviced or repaid by the borrower, or only a token amount is offered. In these circumstances the foreign income or gains offered as collateral are being utilised in respect of the relevant debt, that is, to delay or minimise service charges or repayments. As there is only one possible tax charge in respect of the relevant debt, that is the charge HMRC will take. The charge is taken up-front when the collateral is offered. Such arrangements are expected to be rare.

This should not be mistaken with interest-only repayment terms, or commercial arrangements that offer payment breaks and so forth. Always check the terms and general availability of the loan arrangements on offer.

If you think there is a remittance of foreign income or gains offered as collateral in respect of a relevant debt you should obtain copies of all the relevant arrangements, including all loan agreements and repayment schedules.

Thus in the HMRC view, security is not "used in relation to a debt" if the debt is "serviced and repaid" on commercial terms but in other cases it is so used. HMRC give an example of what they regard as caught:

RDRM33050 - Remittance Basis: Practical Examples of Remittances to the UK [Nov 2013]

[Taxable remittances include:]

[1] You take out a loan from an offshore bank secured against your foreign income held by the bank and

[2] use the money to fund your life in the UK.[103]

The loan requires you to repay the capital and interest after 15 years.

The HMRC analysis is as follows:

103 Para [2] means, more analytically, that the borrowed money is brought/received/used in the UK.

> As the loan does not have regular monthly repayments this is a remittance of the foreign income used as security when the loan is taken out.

The 15 year roll-up loan might reasonably be regarded as non-commercial[104] and as avoidance.

What happens if initially the debt is serviced and repaid on commercial terms and that changes over time?

What if the property charged exceeds the amount of the loan? HMRC say that the remittance is limited to the amount of the loan, which is a fair result, but that ignores the difficulty that if any property charged is "used" then all the property charged is used.[105]

For these reasons, it is considered that (in the absence of special features) the grant of security is not use in relation to the debt, until the security is enforced.

There may be some special feature in the arrangements which do constitute "use". Back-to-back loans may be an example; suppose:

(1) T deposits foreign income/gains in a bank ("T's deposit").
(2) T borrows from the bank ("the relevant debt").
(3) No interest is paid on T's deposit and only a small rate of interest is paid on the borrowing.

It is suggested that the income/gains deposited is used in respect of the relevant debt. But even here, it is arguable that there is no use in respect of the relevant debt, as the funds are not used up or consumed. (On the other hand, if commercial interest rates are paid on the deposit and the borrowing, the deposited funds are not used in respect of the debt.)

11.20 Becoming/ceasing to be a relevant person: Conditions A & B

A person may be a relevant person at one time and not at another time. For instance, a child ceases to be a relevant person on becoming 18; a person becomes a relevant person on marriage or cohabitation and ceases to be a relevant person on divorce or separation. A company becomes a relevant person in relation to T if T becomes a participator in the company.

The statute does not expressly address the application of conditions A and B in this situation. We need to find the answer as best we can in the words

---

104 In an extreme case the borrower may be acting uncommercially even if the bank is acting commercially: see 32.5.4 (Commercial from whose viewpoint?).

105 See 11.29.4 (Use as security: amount remitted).

of the statute.

11.20.1 *Condition A*

Section 809L(2) ITA provides:

> Condition A is that—
>
> (a) money or other property is brought to, or received or used in, the UK by ... a relevant person...

For present purposes there are three ways of satisfying condition A: property must be (i) brought or (ii) received or (iii) used in the UK by a relevant person. Property is *brought* or *received* in the UK at a particular moment, and it is considered that the person must be a relevant person at that moment.

Suppose:

(1) T uses RFI to make a gift of an asset to S (not a relevant person). S brings or receives the asset in the UK. There is no charge at the time of the gift or of the receipt in the UK.
(2) Later, S becomes a relevant person (eg S becomes a spouse or cohabitee). There is no charge at that time.[106]

Likewise if:

(1) T uses RFI to make a gift of an asset to R (a relevant person). R does not remit the asset to the UK. There is no charge at this time.
(2) Later, R ceases to be a relevant person, and subsequently brings or receives the asset in the UK. There is no charge at that time.

HMRC agree. RDR Manual 33150 example 5 is an example of a person ceasing to be a relevant person. The facts (stripping out irrelevancies)[107]

---

106 An interesting question arises if there is a second receipt in the UK later. That is, add to those two steps a third step: S subsequently takes the property outside the UK and then (still a relevant person) brings or receives it in the UK for a second time. Is there a taxable remittance on the second receipt? It is suggested that the answer should be no, though it needs a somewhat purposive construction to reach that result.

107 The example in full (including its irrelevant detail) is as follows:
"**33150 Condition B - remittances derived from income or gain** [January 2014]
Example 5
Caroline is a remittance basis user. In August 2013 she realises some foreign assets and so makes some foreign chargeable gains. She uses all the proceeds (and so uses all these gains) to purchase a motorcycle in Paris which she gives to her husband Joel. It is registered in his name. Joel keeps the bike at his French apartment. A few years later Caroline and Joel divorce, and Joel moves from their home in Liverpool

are:

> In 2013 W uses foreign chargeable gains to purchase a motorcycle in Paris.
> W gives the asset to her husband H. H keeps the bike at his French apartment. [So there is no remittance at this time].
> Subsequently, H and W divorce, and H moves from their home [ie H ceases to be a relevant person].
> In 2017 H brings his bike to the UK.

The relevant part of HMRC analysis is as follows:

> H and W were married and so H was a relevant person in 2013 when W gave him the motorcycle; he could not therefore have been a gift recipient (see Condition C – Gift recipients cannot be relevant persons).

More analytically, condition C is not satisfied.[108]

> By 2017 they have divorced so H is not a relevant person when he brings in the motorcycle [to the UK] for C to use.

More analytically, condition A is not satisfied because H is not a relevant person when H brings the asset to the UK.

11.20.2 *Condition B*

Condition B provides (in part):

> Condition B is that—
> (b) the property, service or consideration [received in the UK]—
> (i) derives (wholly or in part, and directly or indirectly) from the income or chargeable gains, and
> (ii) in the case of property or consideration, is property of or consideration given by a relevant person ...

It is considered that the requirement in (b)(ii) is met only if the person is a relevant person at the time that condition A is met (ie at the time that the property is brought/received/used in the UK). HMRC agree. The RDR Manual 33120 provides an example (already discussed above in

---

> to Manchester.
> In September 2017 Joel and Caroline's 16 year old son, Joseph wants to learn how to ride a motorcycle, so Joel imports his bike from Paris to his Manchester home for Joseph to use."

108 See 11.23 (Remittance condition C (gift recipient)).

connection with condition A). The facts (so far as relevant) are as set out above with one additional fact:

> The motorcycle is used in the UK by C who is a minor child of W (a relevant person).

The HMRC analysis is as follows:

> Here, property has been provided in the UK (the motorcycle) for the use of a relevant person (C) ...

More analytically, condition A is satisfied.

> ...and the property derives directly from W's foreign chargeable gains. However the motorcycle is the property of H, who is not a relevant person [at the time that the property is used by the relevant person], so there is no taxable remittance for W.

More analytically, condition B is not satisfied because H is not a relevant person when the asset is used by the relevant person, C.

To drive the point home, the RDR Manual 33150 gives another example making the same point on somewhat far-fetched facts. So far as relevant[109] the facts are:

> In 2011 W uses RFI to purchase prints retained outside the UK.
> W gives the prints to her daughter D who is age 16 and so a relevant person. D retains the prints outside the UK [so there is no remittance].
> D ceases to be a relevant person on becoming 18 but in that year (although still a teenager) D has a child GD (who is a relevant person in relation to W).

---

109 The example in full (including its irrelevant detail) is as follows:
"**33150 Condition B - remittances derived from income or gain** [January 2014]
Example 6
In 2011, while visiting New York, Ros, a UK resident remittance basis user, purchases several art prints by H Marecus, an international artist. Ros uses her relevant foreign income to make the purchase. She gives them to her daughter Rachael, who is at that time living and studying in the US, as a 16th birthday present in February 2011. Rachael returns to the UK in May 2011, but leaves the prints at her uncle's New York apartment.
In June 2016 Rachael's 3 year old daughter Abigail decides to start singing lessons in Newcastle. The singing teacher's mother is a collector of Marecus prints, so the teacher agrees with Rachael to accept one of the prints in exchange for the lessons. Rachael arranges for her uncle to send the print from New York directly to the singing teacher's mother in California."

> In 2016 D enters into an (implausible) agreement under which she transfers the prints to the mother of a singing teacher outside the UK in consideration of the teacher giving singing lessons to GD (age only 3) in the UK.

The HMRC analysis is as follows:

> A service has been provided in the UK (the singing lessons) for the benefit of a relevant person (GD) ...

More analytically, condition A is satisfied.

> ...and the consideration for the service (the print) derives from W's RFI. However the consideration is given by D, who is not a relevant person [at the time that condition A is satisfied] and so W has not made a taxable remittance of her relevant foreign income. Rachael is 21 years old and so is not a relevant person in June 2016 when she gives the prints in consideration for a service.

More analytically, condition B is not satisfied.

> Note – D was 16 years old and so is a relevant person in February 2011 when her mother gave her the prints (see also Condition C – Gift recipients cannot be relevant persons).

More analytically, condition C is not satisfied.

The rule of when one applies the relevant person test may work in favour of HMRC. Suppose:

(1) T uses RFI to make a gift of an asset to S (not a relevant person). There is no charge at this time.
(2) S becomes a relevant person, and subsequently brings/receives the asset to the UK. There is a taxable remittance at that time.

HMRC agree. The RDR Manual provides an example where the facts (stripping out irrelevancies)[110] are:

---

110 The example in full (including its irrelevant detail) is as follows:
"In June 2010 Sam, a remittance basis user, uses £8,000 of her relevant foreign income to make an overseas purchase of an antique clock from a dealer in Denmark. Sam immediately makes a gift of an antique clock to Chris and Jo, who at that time are living in Denmark. The clock is kept at Chris's family home in Copenhagen. Chris, not being a relevant person, is a gift recipient.
Two years later Jo and Chris split up, and in July 2014, Sam and Chris marry. Chris ceases to be a gift recipient at this time.
In October 2014 Chris brings the antique clock to the UK to the house that is shared with Sam."

> **33240 Gift recipients cannot be relevant persons** [June 2010]
> *Example 2*
> In 2010 T uses RFI to purchase a clock outside the UK.
> T immediately gives the clock to S (not a relevant person) and it is kept outside the UK.
> S, not being a relevant person, is a gift recipient.
> In 2014, T marries S. S becomes a relevant person and ceases to be a gift recipient at this time.
> Subsequently, S brings the clock to the UK.

The HMRC analysis is as follows:

> As S is no longer a gift recipient Condition C is not relevant.
> However as S is now [in 2014] a relevant person there is a taxable remittance chargeable on T when S imports the clock, under Conditions A and B. This is because
> [1] property (the clock) has been brought to the UK by a relevant person (S) [ie condition A is satisfied] and
> [2] that property derives from T's RFI and the property is property of a relevant person (S) [ie condition B is satisfied]

So far we have considered property brought to or received in the UK. That can happen only at a particular moment. On the other hand, property can be *used* in the UK over a period of time. Suppose:

(1) Year 1: T uses RFI to make a gift of an asset to S (not a relevant person). S uses and continues to use the asset in the UK eg she buys a house which she occupies. There is no charge at the time of the gift or at the time of the use.
(2) Year 2: S becomes a relevant person (eg a spouse or cohabitee). She continues to use the property.

Is there a charge in year 2 when S becomes a relevant person? It would be strange if there were a difference between this case and the case of receipt in the UK. It is tentatively suggested that the answer is, no.

11.20.3 *Third persons*

The position becomes more complicated when a third person is involved. Suppose:

(1) T gives RFI to T's spouse W.

The example as published is defective in that it must be assumed (though this is not stated) that Chris gave his interest in the clock to Jo (or perhaps the gift was to Jo and not to Jo and Chris).

(2) There is a divorce and W ceases to be a relevant person.
(3) W transfers the RFI to a trust under which a minor child of T is a beneficiary. The trustee is a relevant person in relation to T.
(4) The trustee transfers the funds to the minor child who receives them in the UK.

Condition B appears to be satisfied since at the time of the receipt in the UK the funds are the funds of a relevant person. But the trust funds may not be derived income.[111]

11.21 Debt becoming/ceasing to be a relevant debt

A debt which is not a relevant debt may become a relevant debt. Condition B is (in short) that income is used in respect of a relevant debt. It is considered that the debt must be a relevant debt at the time the income is used.

Suppose:

(1) Year 1:
  (a) T borrows and receives the borrowed sum offshore.
  (b) T uses RFI to pay the interest (use in respect of the debt).

In year 1 condition B is not satisfied as the RFI is not used in respect of a relevant debt.

(2) Year 2: T remits the borrowed sum to the UK.

In year 2 the debt becomes a relevant debt, but it is considered that the RFI used to pay interest in year 1 does not become remitted at that time. But if RFI is used to pay more interest in year 2, that RFI satisfies condition B.

The problem of a debt ceasing to be a relevant debt is not likely to arise; see 11.18.3 (Debt relating to asset later removed from UK or ceasing to exist).

11.22 The need for remittance conditions C and D

The drafter identified 2 gaps in remittance conditions A and B which are addressed by remittance conditions C and D.

In outline:

(1) The individual may receive funds in the UK which are derived from the foreign income/gains but which are not the property of a relevant person. Then condition B is not met.[112] This problem is met by

111 See 11.15.12 (Gift to third person).

112 It is usually a requirement of condition B that the income/gains are the property of a relevant person; see 11.13.2 (Property of a relevant person).

imposing a remittance if the individual receives in the UK property of a third party (not a relevant person) with some link to the individual:

(a) Remittance condition C applies if the individual receives property of a gift recipient.

(b) Remittance condition D applies if the individual receives property of a third party, called (my terminology) a condition D person.

(2) The individual may receive funds in the UK which are not derived from the foreign income/gains ("non-derived property"). Then condition B is not met. This problem is met by imposing a remittance if the individual receives non-derived property in the UK with some link to the foreign income/gains:

(a) Remittance condition C applies if the individual receives "qualifying property" (which can include non-derived property).

(b) Remittance condition D applies if the individual receives any property; the necessary link is in the requirement of a "connected operation".

11.23 Remittance condition C (gift recipient)

Section 809L(4) ITA provides:

> Condition C is that qualifying property of a gift recipient—
>
> (a) is brought to, or received or used in, the UK, and is enjoyed by a relevant person,
>
> (b) is consideration for a service that is enjoyed in the UK by a relevant person, or
>
> (c) is used outside the UK (directly or indirectly) in respect of a relevant debt.

11.23.1 *Enjoyment by a relevant person*

The requirements in (a) and (b) are similar but not the same as remittance condition A. The differences are as follows:

Condition C requirement	**Condition A requirement**
Property brought/received/used in the UK	Property brought/received/used in the UK *by or for the benefit of a relevant person.*
Property *enjoyed* by a relevant person.	No equivalent in condition A (though the requirement that the property is brought/received/used by or for the benefit of a relevant person is similar.)

The word "enjoyed" in condition C means more or less the same as the word "used" in condition A.[113] I do not think there is a difference though if there were, the vagueness of the words makes it impossible to say what it may be. The reason for the different word is probably that other parts of condition C are derived from the GWR wording, where the word "enjoyed" is used[114] so the word enjoyed is copied across to condition C.

11.23.2 *Enjoyment disregards*

Section 809N ITA provides definitions and other supplementary provisions for condition C. Section 809N(1) ITA provides:

> This section applies for the purposes of determining whether or not income or chargeable gains of an individual are remitted to the UK by virtue of condition C in section 809L.

Section 809N(9) ITA provides three cases where enjoyment is disregarded. Since enjoyment is a requirement of remittance condition C, the disregards amount to exemption from condition C:

> Enjoyment by a relevant person of property or a service is to be disregarded in any of these cases—
>
> (a) if the property or service is enjoyed virtually to the entire exclusion of all relevant persons;
>
> (b) if full consideration in money or money's worth is given by a relevant person for the enjoyment; or
>
> (c) the property or service is enjoyed by relevant persons in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

Para (a) is based on IHT GWR provisions.[115]

Para (b) is the most important of the three disregards, and is also based on GWR:[116] I refer to it as "**the full consideration exemption**".

Para (c) concerns charitable or public gifts; it is hard to see that it is needed but it does no harm.

Suppose:

---

113 As to which, see 11.12.5 (Property used in the UK ("used" limb of condition A)).

114 See 63.1 (GWR – Introduction).

115 See 63.6.3 ("Virtually" to the entire exclusion).

116 See 63.7 (Full consideration exemption for GWR).

(1) T gives pre-2008 RFI to T's spouse (not a relevant person and so a gift recipient) and the spouse uses the money to buy a house jointly with T; or
(2) T gives RFI to T's brother (a gift recipient) and the brother uses the money to buy a property jointly with T.
(3) The co-owners occupy the property jointly.

It is considered T does not "enjoy" the co-owner's half share, so condition C is not satisfied in respect of the gifted RFI.

Suppose:

(1) T gives RFI to T's adult son S (a gift recipient), and
(2) S uses the money to purchase a UK residence which is occupied by S, not by T.
(3) S has a minor child, GS, who also lives in the property.

It is considered that the property is not "enjoyed" by GS, who is merely a licensee of S. Any "enjoyment" by GS is incidental to the primary use by S, and should be ignored. It is different if S leaves the property and GS becomes the occupier (but since GS is by then likely to be 18, GS ceases to be a relevant person). HMRC agree. RDR Manual provides:

> **33270 Remittance Basis: Identifying Remittances: Condition C - Gift Recipients: Remittances - enjoyment by a relevant person ignored** [June 2010]
> Each case will depend on its particular facts, but broadly, enjoyment by a relevant person is disregarded, and so there is no taxable remittance under Condition C (if there otherwise would be) where the property or service is enjoyed by the gift recipient virtually to the entire exclusion of all relevant person, that is,
> [1] the gift is genuine and
> [2] any enjoyment by a relevant person is incidental (ITA2007/s809N(9)).

After this somewhat loose paraphrase of the statutory provision, the Manual gives the example we are considering:

> For example a minor child may derive benefit from living in the UK with his parents in a house that was purchased using offshore funds gifted by his grandfather (a remittance basis user) to his father, for his father's own use. It is normal for a young child to live with his parents and therefore, in most cases, no advantage over minor children generally is obtained. In this type of circumstance HMRC would generally accept that the minor

child's enjoyment of the house was merely incidental to that of his father.

11.23.3 *Gift recipient*

The key terms in remittance condition C are "gift recipient" and "qualifying property".

Section 809N(2) ITA provides:

> A "gift recipient" means a person, other than a relevant person, to whom the individual makes a gift of money or other property that—
>
> (a) is income or chargeable gains of the individual, or
>
> (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

Strictly one should not use the term "gift recipient" in the abstract. A gift recipient can exist only *in relation to an individual (the donor)*. But where the context is clear it is permissible simply to refer to a gift recipient.

A relevant person cannot be a gift recipient. So in practice gift recipients will be individuals who are not members of the individual's close family, such as parents, adult children, friends and relatives. (Family trusts and companies will generally be relevant persons and where they are not, it is unlikely they would or properly could enter into a transaction caught by condition C.)

If T makes a gift to G, and G gives the property to H, H is not a gift recipient in relation to T.

If T makes a gift to a trust, and the trust appoints the property to B, B is not a gift recipient, as T has not made a gift to B.

11.23.4 *"Gift"*

Section 809N(5) ITA extends "gift" to include disposals at an undervalue:

> The individual "makes a gift of" property if the individual disposes of the property—
>
> (a) for no consideration, or
>
> (b) for consideration less than the full consideration in money or money's worth that would be given if the disposal were by way of a bargain made at arm's length;
>
> but, in a case falling in para (b), the individual is to be taken to make a gift of only so much of the property as exceeds the consideration actually given.

In the phrase "full consideration in money or money's worth *that would be given if the disposal were by way of a bargain made at arm's length*" do

the italicised words add anything? It is thought not; these words are otiose but they do no harm.

Section 809N(6) ITA is intended to widen this:

> A reference to the individual making a gift of property includes a case where—
>
> (a) the individual retains an interest in the property, or
>
> (b) an interest, right or arrangement enables or entitles the individual to benefit from the property.

I am unable to make sense of this. The wording is loosely based on s.102A FA 1986 but the context there is different, and s.102A is itself obscure, so that does not shed any light on the matter. Perhaps it is meaningless.

Suppose T makes an interest-free loan to B. The transaction is for full consideration so it is not a gift within s.809N(5). A lender in principle has no interest in the money lent so s.809N(6)(a) does not apply. A loan does not entitle T to benefit from the money lent. B may use that money for himself. It is considered that the loan does not enable T to benefit from the money lent, so s.809N(6)(b) does not apply. B is not a gift recipient.

11.23.5 *"Qualifying property"*

Section 809N(7) ITA defines "qualifying property". There are three categories of qualifying property:

> "Qualifying property", in relation to a gift recipient, is—
>
> (a) the property that the individual gave to the gift recipient,
>
> (b) anything that derives (wholly or in part, and directly or indirectly) from that property, or

Para (a) and (b) are what one would expect, but the definition goes on to include non-derived property which has some nexus to the gifted property:

> (c) any other property, but only if it is dealt with as mentioned in section 809L(4)(a), (b) or (c) by virtue of an operation which is effected—
>
> (i) with reference to the gift of the property to the gift recipient, or
>
> (ii) with a view to enabling or facilitating the gift of the property to the gift recipient to be made.

Section 809N(8) ITA is intended to widen this:

> In subsection (7)—

> (a) the reference in para (b) to anything deriving from property, and
> (b) the reference in para (c) to other property,
>
> includes a thing,[117] or property, that does not belong to the individual but which the individual is enabled or entitled to benefit from by virtue of any interest, right or arrangement.

This is misconceived. Qualifying property will not belong to the individual because it has been given to the gift recipient, so it is not necessary to say that property includes property not belonging to the recipient. Here, as in s.809N(6), the drafter's desire to achieve the widest possible generality, and avoid any possible gaps in the legislation, has led to incoherence.

11.23.6 *Time of remittance*

Section 809L(6) ITA provides a rule which applies for conditions C and D:

> In a case where subsection (4)(a) or (b) or (5)(a) or (b) applies to the importation or use of property, the income or chargeable gains are taken to be remitted at the time the property or service is first enjoyed by a relevant person by virtue of that importation or use.

11.23.7 *Becoming/ceasing to be a relevant person: Condition C*

Section 809N ITA provides:

> (3) The question of whether or not a person is a relevant person is to be determined by reference to the time when a gift is made.
> (4) But, if a person to whom a gift is made subsequently becomes a relevant person, the person ceases to be a gift recipient.

Thus if a gift is made to a relevant person, condition C cannot apply, even if they cease to be a relevant person[118] and so become a gift recipient.

If a gift is made to a non-relevant person, condition C ceases to apply if they become a relevant person. That makes sense because in such a case, remittance conditions A and B may apply.

---

117 The reference to a "*thing or* property" is meaningless. What non-property "thing" could there be?

118 See 11.20 (Becoming/ceasing to be a relevant person: conditions A & B); 11.26.3 (Becoming/ceasing to be a relevant person: condition D).

11.24 Examples of condition C

11.24.1 *Gift followed by loan of gifted asset*

The RDR Manual provides examples numbered (1)(a) and (b); I consider example (b) first as it is the easier of the two. I reword the examples so that T is the taxpayer and G is the gift recipient.

The facts of example 1(b) (stripping out irrelevancies)[119] are:

> *Example 1(b) (Klimt)*
> T gives money derived from chargeable gains to his sister G (a gift recipient).
> G uses the money to buy a car which T's wife uses in the UK.

Condition C is satisfied. The HMRC analysis is:

> The qualifying property here is the car, which derives from the money that T gifted to G.
> That qualifying property is used in the UK and is enjoyed by a relevant person (T's wife).
> The use of the gift means there is a taxable remittance on T.

The same applies if T gives RFI to T's adult son S (not a relevant person)

---

119 The example in full (including its irrelevant detail) is as follows:
33260 Gift recipients - qualifying property [June 2010]
"Example 1(b) (Klimt and Helena)
In May 2015 K, a remittance basis user, gives some of his foreign chargeable gains for that year to his sister H, a gift recipient.
In October 2016 H transfers half of this money to the UK and gives it to K's wife."
There is a similar example in the CG Manual:
CG25342 Meaning Of Remitted To The UK: Gifts Of Money And Assets [April 2010]
"... Torvald claims the remittance basis in 2009-10; in that year he sells a property in Norway and uses the proceeds to buy a car which he gives to his business partner Stig who lives in Oslo. Stig exports the car to the UK and gives Torvald's wife Helga the keys.
In terms of ITA07/S809L(4), the car is qualifying property because it was given by Torvald to Stig. Stig is a gift recipient because he is not a relevant person and he has received a gift of property (the car) that drives from Torvald's chargeable gain. ... The car is brought to the UK and is enjoyed by a relevant person, Torvald's wife. Torvald's chargeable gain on the disposal of his property has therefore been remitted to the UK to the extent that it was used to buy the car. Note that it is the cost of the car, not its market value when it comes to be used in the UK, which fixes the upper limit of the remittance.)"

and S uses it to buy the house in the UK in which T lives. This is not caught by remittance condition B. (The house is derived from the RFI but it is not property of a relevant person.) The house is qualifying property and is caught by remittance condition C.[120]

11.24.2 *Gift followed by gift of gifted asset*

The facts of RDR Manual example 1(a) (stripping out irrelevancies)[121] are:

> T gives money derived from chargeable gains to his sister G (a gift recipient).
> G brings the money to the UK and then gives it to T's wife.

In the HMRC view condition C is satisfied. The HMRC analysis is as follows:

> [1] The qualifying property here is the money that T gifted to G.
> [2] That qualifying property is used in the UK and is enjoyed by a relevant person (T's wife).
> [3] The use of the gift means there is a taxable remittance on T.

Point [2] is not correct. Condition C is that:

> qualifying property of a gift recipient is ... enjoyed by a relevant person,

The money ceases to be qualifying property "of a gift recipient" when G gives it to T's wife. Thus qualifying property of a gift recipient is brought to or received in the UK.[122] But the property which is enjoyed by a relevant person is not property of a gift recipient.

However, on the facts of the example, remittance condition B may be satisfied. That depends on whether the money given to T's wife can be said to derive from T's gains, which would be the case if the two steps of the example are part of a single arrangement.[123]

---

120 See 11.31 (Purchase of family home).

121 The example in full (including its irrelevant detail) is as follows:
33260 Gift recipients - qualifying property [June 2010]
"*Example 1(a) (Klimt and Helena)*
In May 2015 K, a remittance basis user, gives some of his foreign chargeable gains for that year to his sister H a gift recipient.
In October 2016 H transfers half of this money to the UK and gives it to K's wife."

122 Though, contrary to the HMRC analysis, it is not *used* in the UK (unless one says that H "uses" the funds by making a gift to K's wife, which is not the normal meaning of the word "uses").

123 See 11.15.12 (Gift to third person).

11.24.3 *Gift followed by loan of non-derived property*

The RDR Manual 35060 [June 2010] next provides an example where the property enjoyed in the UK is non-derived property. The facts (stripping out irrelevancies)[124] are:

> There is an arrangement under which:
> (1) T gives RFI to his aunt G (a gift recipient).
> (2) Later,[125] G allows T's wife to use a property in the UK owned by G, without charge.

One analysis of these facts is that T and G have entered into a contract, under which G promises to allow T's wife to use the land in consideration of T's payment (not properly called a "gift") to G. In that case there is a remittance under remittance conditions A and B. It is however assumed that the arrangement is an informal, non-binding, non-contractual one. That would be implausible if G were a stranger, but not in the case of a friend or relative. In that case condition B is not satisfied.

The HMRC analysis is as follows:

> The house cannot be said to "derive from" the income or gains.

More analytically, condition B is not satisfied.

However condition C is satisfied:

> The house is "other property" [ie non-derived property, within s.809N(7)(c)] used in the UK and enjoyed by a relevant person (T's wife).
> As the operation which brought the house within Condition C was done with reference to the gift or to enable or facilitate the gift it is qualifying property and Condition C is met.

---

124 The example in full (including its irrelevant detail) is as follows: *(Adam and Linda)* L's husband's family has owned a holiday house in Scotland for many years. In February 2012 A, a remittance basis user transfers some of his foreign income and gains to his aunt, L, the gift recipient, which she uses to book herself on an around-the-world cruise. A gives the money to L on the agreement that L will provide his wife Clare, a keen painter, with access to the Scottish property.
Several months later L provides Clare with an agreement saying that she can use the Scottish house, for which Clare pays nothing.

125 The example specifies that "several months" pass between step (1) and step (2) to make the point that one cannot avoid the tax consequences of the arrangement by a few months delay.

There is a remittance and tax is chargeable on T.
The amount of the remittance is determined by s809P(11)(c).[126]

Suppose the order of transactions was reversed:

(1) G grants allows W to use a property in the UK.
(2) Later, after W has left the property, T gives RFI to G.

Condition C is not satisfied at stage (1) since G is not at that point a gift recipient. At stage (2) G becomes a gift recipient but condition C does not become satisfied. However condition D would apply: see 11.27.1 (Loan of asset followed by gift to lender).

11.24.4 *Gifted property used to pay relevant debt*

The last HMRC example is slightly contrived, in order to illustrate the debt remittance rule in application to remittance condition C. The facts (stripping out irrelevancies)[127] are:

T gives property derived from RFI (shares) to his brother G, (a gift recipient.)
G borrows to purchase furniture.
T uses the furniture in the UK.
G uses the property to repay the loan.[128]

The HMRC analysis is as follows:

T has made a gift of property derived from his foreign income (the shares) to G, a gift recipient. The shares are thus qualifying property of a gift recipient.
The loan taken out by G to purchase the furniture is a relevant debt

126 See 11.29.6 (Condition C and D cases: amount remitted).

127 The example in full (including its irrelevant detail) is as follows:
"**33270 Condition C - remittances of relevant income or chargeable gains - relevant debt** *(Fraser and Victor)*
F, who is a remittance basis user, purchases some non-UK shares in January 2012, using his foreign income and gains. F makes a gift of these shares to his brother, V, a fashion designer.
In March 2012 V takes out a loan with an offshore bank to purchase a designer table and chairs. V brings these table and chairs to the London town house that he and his brother F inherited jointly from their father, and where they both now live. F regularly entertains clients and friends at the house.
V uses some of the shares and bonds to pay off the loan.

128 That is, G sells and uses the proceeds to repay the loan; or (less plausibly) transfers the shares to the creditor in satisfaction of the loan.

because it relates to property (the furniture) brought to the UK for the benefit of a relevant person (T).
T benefits because he uses the furniture.
The qualifying property (the shares) of G (a gift recipient) is used outside the UK in respect of this relevant debt. There is a remittance under Condition C.

11.25 Condition C transitional rule: Pre-2008 income/gains

Para 86(4) Sch 7 FA 2008 provides:

> Subject to sub-paras (2) and (3), in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

I refer to this as **"the para 86(4) amendment"**. Amended as para 86(4) directs, condition C (set out in s.809L(4)) provides:

> Condition C is that qualifying property of a gift recipient—
>
> (a) is brought to, or received or used in, the UK and is enjoyed by ~~a relevant person~~ *the individual*,
>
> (b) is consideration for a service that is enjoyed in the UK by ~~a relevant person~~ *the individual*, or
>
> (c) is used outside the UK(directly or indirectly) in respect of a relevant debt.

This is consistent with the remittance condition A and B rules for pre-2008 income.[129] Since the para 86(4) amendment applies only for s.809L, para 87 Sch 7 FA 2008 has to make further amendments to s.809N:

> Section 809N of ITA 2007 (section 809L: gift recipients, qualifying property and enjoyment) has effect in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year as if—
>
> (a) the reference in subsection (2) to a relevant person were to the individual,
>
> (b) subsections (3) and (4) were omitted, and
>
> (c) the references in subsection (9) to a relevant person, all relevant persons, or relevant persons were to the individual.

Amended as para 87 requires, s.809N(2) reads:

---

129 See 11.9 (Relevant person transitional rule: pre-2008/09 income/gains).

> A "gift recipient" means a person, other than ~~a relevant person~~, the individual to whom the individual makes a gift of money or other property that—
>
> (a) is income or chargeable gains of the individual, or
>
> (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

The words "other than the individual" are meaningless because the individual cannot make a gift to himself. So s.809N(2) means:

> A "gift recipient" means a person ... to whom the individual makes a gift of money or other property that—
>
> (a) is income or chargeable gains of the individual, or
>
> (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

Para 87 does not restrict the definition of "gift recipient": it *widens* it.

The para 87 deletions of 809N(3)(4) are straightforward amendments consequential on the para 87 amendment to s.809N(2).

The last para 87 amendment is also a straightforward consequential amendment. Amended as para 87 requires, s.809N(9) reads

> Enjoyment by ~~a relevant person~~ the individual of property or a service is to be disregarded in any of these cases—
>
> (a) if the property or service is enjoyed virtually to the entire exclusion of ~~all relevant persons~~ the individual,
>
> (b) if full consideration in money or money's worth is given by ~~a relevant person~~ the individual for the enjoyment, or
>
> (c) the property or service is enjoyed by ~~relevant persons~~ the individual in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

The condition C rule for pre-2008 income/gains is not very different from that which applied under the pre-2008 law.

11.26 Remittance condition D (connected operation)

For an introduction to the topic, see 11.22 (The need for remittance conditions C and D).

Section 809L(5) ITA provides:

> [1] Condition D is that property of a person other than a relevant person (apart from qualifying property of a gift recipient)—
>
> (a) is brought to, or received or used in, the UK, and is enjoyed by a relevant person,
>
> (b) is consideration for a service that is enjoyed in the UK by a relevant person, or

(c) is used outside the UK (directly or indirectly) in respect of a relevant debt,

[2] in circumstances where there is a connected operation.

We need some terminology to grapple with this, and in the following discussion:

"The condition D person" is the non-relevant person whose property is used as set out in (a)-(c), ie (in short) enjoyed by a relevant person.

"The enjoyment requirement"is the requirement in s.809L(5)[1] (in short, that a relevant person enjoys property of the condition D person in the UK). The property which the relevant person enjoys need not be derived from the individual's income or gains.

The wording of the enjoyment requirement is (more or less) the same as in remittance condition C.[130] The same enjoyment disregards apply.[131] The same timing rule applies.[132] These aspects need not be considered again here.

The RDR Manual comments on the identity of the condition D person:

> **33430 Connected Operation - definition** [June 2010]
> The property that is brought to the UK, or used outside the UK as consideration for a service or in respect of a relevant debt must not be qualifying property of a gift recipient as this will fall within Condition C. However this restriction relates to the property not the individual, so the same person may be a gift recipient under Condition C and, in other transactions, "a person whose property is used" under Condition D.

11.26.1 *"Qualifying disposition"*

The key term in remittance condition D is "connected operation", and that term relies on the concept of a "qualifying disposition." Section 809O provides the definitions and other supplemental provisions for condition D.

Section 809O(1) ITA provides:

> This section applies for the purposes of determining whether or not income or chargeable gains of an individual are remitted to the UK by virtue of condition D in section 809L.

---

130 See 11.23.1 (Enjoyment by a relevant person).

131 Section 809O(6) ITA repeats s.809N(9) verbatim; see 11.23.2 (Enjoyment disregards).

132 See 11.23.6 (Time of remittance).

Section 809O(4) ITA defines "qualifying disposition":

> A "qualifying disposition" is a disposition that—
> (a) is made by a relevant person,
> (b) is made to, or for the benefit of, the person whose property is dealt with as mentioned in section 809L(5)(a), (b) or (c) [ie made to/for the benefit of the condition D person], and
> (c) is a disposition of money or other property that is, or derives (wholly or in part, and directly or indirectly) from, income or chargeable gains of the individual.

Section 809O(5) provides an exception:

> But a disposition of property is not a qualifying disposition if the disposition is, or is part of, the giving of full consideration in money or money's worth for the dealing that falls within section 809L(5)(a), (b) or (c).

I do not see the need for that, since if there is full consideration for "the dealing that falls within section 809L(5)(a), (b) or (c)" (in short, for the enjoyment by the relevant person) then the full consideration exemption applies.[133] But it does no harm.

11.26.2 *Connected operation*

Armed with the term "qualifying disposition" we can turn to the definition of "connected operation". Section 809O(3) ITA provides:

> A "connected operation", in relation to property dealt with as mentioned in section 809L(5)(a), (b) or (c), means an operation which is effected—
> (a) with reference to a qualifying disposition, or
> (b) with a view to enabling or facilitating a qualifying disposition.

Thus in order to have a connected operation, four requirements must be met:

(1) A qualifying disposition (eg a gift to the condition D person).
(2) An operation (but that is so wide it scarcely counts as a requirement).
(3) A link between the operation and the qualifying disposition: the operation must be effected with reference to/with a view to enabling/facilitating the qualifying disposition.

---

133 See 11.23.2 (Enjoyment disregards). Perhaps the point is that s.809O(5) provides exemption in a case falling within s.809L(5)(c) (relevant debts).

(4) A link between the operation and the condition D person's property: the operation must be "in relation to property dealt with as mentioned in s.809L(5)(a)(b)(c)" ie it must relate to the condition D person's property.

The RDR Manual comments on requirement (3):

> **33430 Connected Operation - definition** [June 2010]
> It is important to note the words "with reference to" and "with a view to enabling or facilitating a qualifying disposition". The nature of the link between the connected operation and the qualifying disposition, or even which comes first, is not specified. This means that a taxpayer cannot avoid a charge to tax by setting up complex structures to disguise foreign income or gains, or to try and "break the link" between something enjoyed in the UK and that income or those gains.

11.26.3 *Becoming/ceasing to be a relevant person: Condition D*

Section 809O(2) ITA provides:

> For the purposes of section 809L(5), the question of whether or not the person whose property is dealt with as mentioned in para (a), (b) or (c) of section 809L(5) is a relevant person is to be determined by reference to the time when the property is so dealt with.

This is consistent with condition C: see 11.23.7 (Becoming/ceasing to be a relevant person: condition C).

11.27 Examples of condition D

11.27.1 *Loan of asset followed by gift to lender*

A straightforward example of condition D would be:

> T wishes to use a UK asset owned by X (not a relevant person). T and X enter into an informal, non-binding arrangement[134] under which:
> (1) X allows T to use the asset.
> (2) After T has ceased to use the asset, T gives RFI to X (the qualifying disposition).

The analysis is:
X is a condition D person.

---

134 If the arrangement is by way of binding contract (which is likely unless T and X are relatives or friends) then remittance conditions A and B are satisfied as T's obligation to X will be a relevant debt.

The enjoyment requirement is met by T's use of X's asset.
T's gift to X is a qualifying disposition.
The connected operation is X's allowing T to use the asset.
So condition D is satisfied.

11.27.2 *Loan of asset followed by gift for benefit of lender*

The RDR Manual provides a more subtle example where the facts (stripping out irrelevancies)[135] are:

> T wishes to use UK land owned by X (not a relevant person).
> There is an arrangement under which:
> (1) X allows T to use the land rent free.
> (2) T transfers an asset derived from T's RFI (a yacht) to a company owned by X, at an undervalue.

This is like my straightforward example, except that T transfers the RFI to a company owned by X (not to X directly).

One analysis of these facts is that T and X have entered into a contract, under which X leases or licenses the land to T in consideration of T's transfer of the yacht to the company. In that case there is a remittance under remittance conditions A and B, on the basis that:

(1) If the rent is paid in advance: T receives an asset in the UK (a lease or licence) which is derived from T's RFI; or
(2) If the rent is paid after the grant of the lease: T has used RFI to pay a relevant debt.

Note that the rent would also be taxable.

It is however assumed that the arrangement is an informal, non-binding, non-contractual one. That might be possible if X is a friend of T or a friendly trust or company. In that case condition B is not satisfied.

---

135 The example in full (including its irrelevant detail) is as follows:
Janet and John
"**35080 Condition D - remittances of foreign income or chargeable gains** [June 2010]
John personally owns a country estate in Cornwall, in an area of outstanding natural beauty. His friend Janet wishes to use the mansion for several important family functions.
Janet is a remittance basis user. She owns a foreign yacht which she bought using her foreign income and gains. On 2 March she disposes of the yacht to a nonresident company for £15,000. John has a controlling interest in that non-resident company. In October, with reference to the transfer of the yacht, John allows Janet full and exclusive use of the estate, rent-free.

The HMRC analysis first considers condition C:

> X is not a gift recipient (the yacht was given to his company, not to X). Condition C cannot therefore apply.

So we turn to condition D. In my terminology, X is the condition D person.

> [1] X is not a relevant person in relation to T.[136]
> [2] There is a qualifying disposition because:
> [a] There is a disposal of property (the yacht) which derived from T's income (ITA07/S809O(4)(c))
> [b] The disposal was made by a relevant person (T) (ITA07/S809O(4)(a))
> [c] The disposal was for the benefit of X (although the disposal was not made directly to X, he benefits from it through his ownership of the company) (ITA07/S809O(4)(b))
> [3] X's property [the land] is enjoyed in the UK by a relevant person (T) (ITA07/S809L(5)(a) and ITA07/S809O(4)(b)).
> In this example T's advantage is due to[137] a connected operation[138] (ITA07/S809O(3)) and Condition D will be met.
> Some or all of the foreign income used by T to acquire the yacht will be remitted.

The author does not consider whether it is some or all of the income which is remitted, which one might have thought an important issue. In principle, all of the income is remitted.[139]

Take the same facts in another order:

> (1) T uses land owned by X rent-free for a period.
> (2) After the end of that period, T transfers RFI to a company owned by X.

---

136 The HMRC analysis adds that "the company is not a relevant person (as T is not a participator)". In fact, whether the company is a relevant person is not determined by the facts expressly given in the example. The company would be a relevant person if any relevant person is a participator. Perhaps we are meant to assume that X is the sole participator in the company and that X is not a relevant person. However it makes no difference whether or not the company is a relevant person (unless the company brings the yacht to the UK).

137 "Due to" is an inaccurate paraphrase of the statutory language, but it does not matter.

138 HMRC do not identify the operation, but I think it is X's licencing the land to T; this is indeed a connected operation.

139 See 11.29.6 (Condition C and D cases).

Condition D is not satisfied at stage (1) as there is no connected operation. There is no charge at stage (2): one could not say that X's property is enjoyed "in circumstances where there *is* [present tense] a connected operation." But if (as would normally be the case) there is a contract between X and T, there would be a remittance under conditions A and B.

11.27.3 *Loan of asset followed by gift to parent of corporate lender*

The CG Manual provides another example. The facts (stripping out irrelevancies)[140] are:

> T wishes to occupy a house in the UK.
> T enters into an arrangement with X Ltd (not a relevant person) under which:
> (1) A subsidiary of X Ltd[141] ("the subsidiary") acquires a house and allows T to live in it rent-free.
> (2) T transfers shares (derived from foreign chargeable gains) to X Ltd.

This is like the RDR Manual example above, except that the asset is lent to T by a subsidiary of X Ltd (not by X Ltd directly).

In my terminology, X Ltd is the condition D person.

Let us ignore the implausibility of the facts. (In practice, the transfer might be the purchase price, in which case the subsidiary would hold the house on trust for T. Or the transfer might be rent. In those cases there is a remittance under usual principles.) Let us assume that the arrangement is an informal, non-binding, non-contractual one.

In that case condition B is not satisfied. The HMRC analysis on this point is:

---

140 The example in full (including its irrelevant detail) is as follows:
Antonella
CG25343 - Remittance basis: meaning of remitted to the United Kingdom: other reciprocal arrangements [April 2010]
A has claimed remittance basis in 2009-10. She realises a foreign chargeable gain of £5 million in that year and uses it to buy shares in a company listed on the Zurich stock exchange. She enters into an agreement with her bank in Naples that an Italian subsidiary of the bank will acquire a house in London and allow A and her family to live in it rent-free: as consideration for this she agrees to transfer her Swiss shares to the bank. The family moves into the house on 3 April 2010 and A transfers the shares on 7 April.

141 The Manual specifies that X Ltd is a bank. It is not conceivable that a bona fide bank could enter into an arrangement of this kind, but a friendly company might do so.

> Note that the conditions for a basic remittance are not met because the London property is not, and is arguably not derived from, the chargeable gain, and does not belong to a relevant person.

The Manual then makes a comment which I assume relates to remittance condition C:

> The conditions for a remittance after a gift are not met because the gain or property derived from the gain is not gifted to the subsidiary but transferred for what we assume is full value.

If the transfer is for full value there is a remittance under remittance conditions A and B. But if it is a gift, then X is a gift recipient but the subsidiary is not.

However that may be, we turn to condition D. The HMRC analysis is as follows:

> T is a relevant person, and she makes a disposition of property which derives from her own chargeable gains. The disposition is made
> [i] to (if it is made directly to the subsidiary) or
> [ii] for the benefit of (if it is made to another company in X Ltd's group)
> the person whose property is used to provide the advantage in the UK.
> There is therefore a qualifying disposition.

In fact the example specifies that the shares are transferred to X Ltd. The condition D person (who provides the property) is the subsidiary. The transfer to a parent company is not for the benefit of a subsidiary. So there is no qualifying disposition. The rest of the HMRC analysis does not arise:

> Property belonging to X Ltd's subsidiary is used in the United Kingdom and is enjoyed by a relevant person (eg T or her family).
> Furthermore, the process by which the London House is made available is closely linked[142] to the qualifying disposition ie the transfer of the shares to the bank, so it is a connected operation.
> So a chargeable gain of £5m is treated as accruing to T.

The HMRC example raises the timing issue:

> T moves into the house on 3 April 2010 and T transfers the shares on 7 April.

142 This wording is a paraphrase of the statutory language, but it does not matter.

The HMRC analysis states that the gain is treated as remitted in 2009/10. See 11.23.6 (Time of remittance).

It is difficult to escape the conclusion is that the author of the CG Manual example had only a tenuous grasp of the remittance basis - not altogether surprising given the difficulty of the topic.

11.28 Condition D transitional rule: Pre-2008 income/gains

It will be recalled that Para 86(4) Sch 7 FA 2008 provides:

> Subject to sub-paras (2) and (3), in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

I refer to this as **"the para 86(4) amendment"**. Amended as para 86(4) directs, condition D (set out in s.809L(5)) provides:

> Condition D is that property of a person other than ~~a relevant person~~ *the individual* (apart from qualifying property of a gift recipient)—
>
> (a) is brought to, or received or used in, the UK, and is enjoyed by ~~a relevant person~~ *the individual*,
>
> (b) is consideration for a service that is enjoyed in the UK by ~~a relevant person~~ *the individual*, or
>
> (c) is used outside the UK (directly or indirectly) in respect of a relevant debt,
>
> in circumstances where there is a connected operation.

This is consistent with remittance condition A and B rules for pre-2008 income.[143] Since the para 86(4) amendment applies only for s.809L, para 88 Sch 7 FA 2008 has to make further amendments to s.809O:

> Section 809O of ITA 2007 (section 809L: dealings where there is a connected operation) has effect in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year as if—
>
> (a) subsection (2) were omitted, and
>
> (b) the references in subsections (4) and (6) to a relevant person, all relevant persons, or relevant persons were to the individual.

Amended as para 88 requires, s.809O(4) provides:

> A "qualifying disposition" is a disposition that—
>
> (a) is made by ~~a relevant person~~ *the individual*,

143 See 11.9 (Relevant person transitional rule: pre-2008/09 income/gains).

(b) is made to, or for the benefit of, the person whose property is dealt with as mentioned in section 809L(5)(a), (b) or (c), and

(c) is a disposition of money or other property that is, or derives (wholly or in part, and directly or indirectly) from, income or chargeable gains of the individual.

The last para 88 amendment is also a straightforward consequential amendment. Amended as para 88 requires, s.809N(6) reads

> Enjoyment by ~~a relevant person~~ *the individual* of property or a service is to be disregarded in any of these cases—
>
> (a) if the property or service is enjoyed virtually to the entire exclusion of ~~all relevant persons~~ *the individual,*
>
> (b) if full consideration in money or money's worth is given by ~~a relevant person~~ *the individual* for the enjoyment, or
>
> (c) the property or service is enjoyed by ~~relevant persons~~ *the individual* in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

11.29 Amount remitted

Section 809P(1) ITA provides:

> The amount of income or chargeable gains remitted to the UK is to be determined as follows.

Five rules then follow.

11.29.1 *Remittance of actual income or gains*

Section 809P(2) ITA provides:

> If the property, service or consideration[144] is the income or chargeable gains, the amount remitted is equal to the amount of the income or chargeable gains.

That seems sensible, indeed self-evident.

11.29.2 *Remittance of derived property*

Section 809P(3) ITA provides:

> If the property, service or consideration derives from the income or

144 The words "property, service or consideration" relate back to the wording of condition B: property means property brought/received/used in the UK, service means a service provided in the UK, and consideration means consideration for a service provided in the UK.

chargeable gains, the amount remitted is equal to the amount of income or chargeable gains from which the property, service or consideration derives.

The RDR Manual provides:

> **35030 Conditions A & B - remittances derived from foreign income/gains** [January 2014]
> ... Where, as in most cases, the property, service or consideration derives from a foreign currency, the taxable amount is the pounds sterling equivalent value (at time of remittance) of the amount of foreign currency (refer to RDRM31190 Exchange rates) used to acquire or pay for the property or service etc. This means that where an item of depreciating value (such as a car) is brought to the UK the amount that is liable to tax is not the current value of the car but the amount of foreign income or gains from which the car derives (example 4). For the same reason, where an item of appreciating value (perhaps a work of art) is brought to the UK, the taxable amount is the amount of foreign income or gains from which the property derived, and not its current market value (example 5).
> The same principle applies where an investment is made in shares or other such financial instruments, and those shares are in, or are otherwise brought, to the UK. The chargeable amount is the amount of foreign income or gains from which the shares derived...

The RDR Manual provides an example where the facts (stripping out irrelevancies)[145] are as follows:

> **35030 Conditions A and B - remittances derived from foreign income or gains** [January 2014]
> *Example 4 (Marianne)*
> M, a remittance basis user, used £25,000 of her foreign chargeable gains to purchase a car.
> M kept the car outside the UK.

145 The example in full (including its irrelevant detail) is as follows:
In example 1 above, Marianne, a remittance basis user, used £25,000 of her foreign chargeable gains to purchase a car. The car is regarded as derived from foreign income and gains.
Instead of bringing it straight to the UK, Marianne kept the car at her Italian villa for use on her visits to Italy. A few years later she then decides to bring the car to the UK for her and her daughter to use. At this time the approximate market resale value of the car is £14,000.

> A few years later M brings the car to the UK.
> The market value of the car is [implausibly] £14,000.

The HMRC analysis is as follows:

> The amount remitted is still £25,000, that being the amount equal to the chargeable gains from which the property – the car – derived.

The author has not addressed the interesting questions which arise if M sells the car abroad and remits the proceeds of sale or buys a new car.

Suppose:

(1) T invests £3m foreign income in an asset,
(2) T sells the asset at a loss and receives only £1m.
(3) T remits the £1m.

Under the pre-2008 remittance basis the amount remitted was £1m only. Is the amount remitted now £3m? The tax exceeds the amount remitted. I doubt if anyone will observe this in practice. Perhaps a purposive approach allows one to read in a requirement that the amount remitted cannot exceed the amount of the money remitted or (because of the loss) what is received in the UK is not derived from the gain.

Conversely suppose:

(1) T invests £3m foreign income in an asset,
(2) T sells the asset at a gain and receives £6m.[146]
(3) T remits £3m.

The amount remitted is only £1.5m, one half of the foreign income.

11.29.3 *Debt remittances*

Section 809P ITA provides:

> (4) If the income or chargeable gains are used as mentioned in section 809L(3)(c), [that is, used in respect of a relevant debt] the amount remitted is equal to the amount of income or chargeable gains used; but this is subject to subsection (10).
> (5) If anything deriving from the income or chargeable gains is used as mentioned in section 809L(3)(c), [that is, used in respect of a relevant debt] the amount remitted is equal to the amount of income or chargeable gains from which what is used derives; but this is subject to subsection (10).

---

146 For simplicity assume the gain on this disposal is not within the charge to CGT (eg the gain is not a chargeable gain or T was non-resident when the gain accrued).

This is the equivalent of s.809P(2)(3) for debt remittances, but here there is an apportionment rule. Section 809P(10) ITA provides:

> If the debt is only partly in respect of[147] the property or service, the amount remitted is (if it would otherwise be greater) limited to the amount the debt would be if it were wholly in respect of the property or service.

Suppose:
(1) T borrows £10m.
(2) T remits £1m of the borrowed sum to the UK.
The *entire* debt is a relevant debt. Suppose then T repays the entire borrowing out of income/gains. Only £1m is treated as remitted.

Suppose T only repaid £1m or £2m of the debt. There is still a remittance of £1m. This example illustrates a planning point: one should avoid debts which relate *partly* to property brought/received/used in the UK. Instead of the above, T should borrow so as to have two separate debts, one of £1m (remitted to the UK) and one of £9m (unremitted). Then the unremitted debt is *not* a relevant debt and can be repaid out of foreign income/gains.

The apportionment rule applies where a relevant debt is partly in respect of the property received in the UK. What if property is used partly in respect of a relevant debt?

The RDR Manual provides:

> **RDRM35040 Remittance Basis: Amounts remitted: Quantification: Conditions A and B - remittances in respect of relevant debt** [June 2010]
> Where foreign income or gains are used outside of the UK in respect of a relevant debt RDRM33040 the chargeable amount is the amount of foreign income or gains so used (ITA07/s809P(4)) (example 1 and 2).
> Similarly, if anything, for example an asset, which derived from foreign income or gains is used outside the UK to service a relevant debt then the amount of the remittance is the amount of the income or gains from which the asset used to service the debt was itself derived (ITA07/s809P(5)) (example 3 and 4).
> Foreign income or gains may be used outside the UK to redeem or service a debt only part of which is a 'relevant debt' within the meaning of ITA07/s809L(7). In such cases, the amount that is taxable as an

147 Section 809P(10) refers to a debt *in respect of* UK property but the definition of relevant debt is one which *relates to* UK property. It is considered that the expressions are synonymous.

'amount remitted' is, if it would otherwise be greater, limited to the amount that is attributable to that part of the debt which is a relevant debt (ITA07/s809P(10)) (example 5).

The taxable amount of foreign income or gain that is treated as having been remitted because of these provisions, taken together with any amounts that have been previously remitted (or treated as having been remitted), cannot be greater than the amount of the original foreign income and gains (ITA07/s809P(12)).

Example 1 (Katrina)

In May 2011, K, a remittance basis user, borrows £12,000 from an overseas bank to buy shares in a UK company. This is a relevant debt.

In tax year 2011-12 K uses £4,600 of her relevant foreign income to pay the interest and to repay some of the amount borrowed. The chargeable amount is £4,600.

Example 2 (Gary)

On 6 April 2015, G, a remittance basis user, borrows money from an overseas bank to buy an apartment in Solihull. Payments are due on the first day of each month from May 2015 onwards. The first 12 payments are on an interest-only basis. G pays £1,000 interest each month to the overseas lender from his overseas account with the same bank, into which G ensures a sufficient amount of his relevant foreign earnings are paid directly to cover the repayments.

From 1 May 2016 the payments increase to a fixed amount of £2,500 each month as G starts to repay the capital amount of the loan as well as the interest. The payments continue to be met from the same account of relevant foreign earnings.

The loan is a relevant debt because it is respect of property (the apartment) which is used in the UK by a relevant person (G).

G has made taxable remittances in 2015-16 of £12,000, that being the relevant foreign earnings used to service the relevant debt. In 2016-17 G has made taxable remittances of £30,000, being the amount used to both service and repay the relevant debt.

Example 3 (Ali)

A, a remittance basis user, purchases some sculptures in Sweden in October 2012 for £80,000; he takes out an interest-free loan of £80,000 with his US bank to fund this purchase, repayable within 1 year.

In November 2012 he gives them to his wife as an anniversary gift. She initially keeps them at her mother's home in Stockholm, but 6 months later in March 2013 she decides to bring these sculptures to the UK to display in her UK garden.

In October 2013 A arranges with the US bank that he will repay the loan

by giving them an oil painting which is currently in his apartment in Miami. A had purchased the painting in May 2011, using £50,000 of his relevant foreign earnings and £30,000 of capital inherited from an uncle. The relevant debt is serviced by the oil painting, which derives, in part, from A's relevant foreign earnings (refer to the earlier example). A has made a taxable remittance in 2013-14 of £50,000.
Note: For the purposes of this example assume there is no chargeable gain on the transfer of the painting to the bank.

Example 4 (Francine)
F, a remittance basis user, has a Spanish-style courtyard created at her house in Brighton. She takes out an unsecured loan of £40,000 from her French bank which she uses to pay the specialist Spanish contractor.
F has several French government bonds, which she purchased entirely from her relevant foreign income, and a German government bond which she acquired using her foreign chargeable gains. These bonds are each worth £10,000.
In September 2010 F gives the German bond to her bank as part repayment of the loan.
The relevant debt is serviced by the German bond which derives wholly from F's foreign chargeable gains, and is used outside the UK in respect of this relevant debt (refer to the earlier examples). F has made a taxable remittance in 2013-14 of £10,000.

Example 5 (Karen)
In August 2011 K, a remittance basis user, uses an interest-free £10,000 overdraft facility on her Jersey bank account to pay £8,000 of UK school fees for her 14 year old daughter Lauren. The remaining £2,000 of the facility is used to pay for Lauren to attend a summer school in France organised by a French university.
K repays the overdraft from her relevant foreign earnings between August and November 2011.
K has made a taxable remittance in 2011-12 of £8,000 relevant foreign earnings, that being the part of the debt that is in respect of a service provided in the UK (refer to the earlier example) which is thus a 'relevant debt'.

11.29.4 *Use as security: Amount remitted*

The RDR Manual provides:

RDRM35050 - Amounts remitted: Quantification: Condition B - Collateral in respect of relevant debt [June 2010]
When foreign income and gains are used as collateral for a relevant debt they are used 'in respect of' the relevant debt, so there may be a taxable

remittance at this point. (refer to RDRM33170).

In fact, the RDR Manual takes the view that circumstances where the grant of security is a taxable remittance will be "rare" and in the author's view, the grant of security is not taxable remittance at all, in the absence of some special circumstances.[148] So it is not usually necessary to consider the amount that is remitted on a grant of security, but the passage is still of some interest. The Manual continues:

> The amount of the foreign income or gains that are so used in respect of the relevant debt will be restricted to the amount of the capital loaned, together with any accrued interest (where applicable). The amounts due will depend, to some extent on the terms on which the security is offered.
>
> *Example 1 (Freda)*
> F, a remittance basis user takes out an interest-free loan for £100,000; with allegedly no requirement for repayment until an indeterminate future date. She uses the loan to purchase a plot of land in the UK, so the loan is a relevant debt.
> F offers as collateral for the loan a French painting, currently in her Parisian apartment. She purchased this painting in an earlier tax year in which she was also a UK resident remittance basis user, using £160,000 of her untaxed relevant foreign income from that year. The painting is still worth £160,000.
> F has used her foreign income as collateral, in respect of a relevant debt. The amount so used is 'capped' at the amount of the debt, which is £100,000 in this case.
> The reason for this is obvious if you consider what would happen in the very unlikely event that the lender immediately 'seized' the collateral in the painting to repay the £100,000 debt in full. The lender would realise £160,000 from the painting; the lender would retain £100,000 to satisfy the debt owed and return £60,000 to F (ignoring accrued interest, penalties and service charges). So only £100,000 of the collateral is used in respect of the debt.

The RDR Manual also looks at debts charged on the security of a mixed fund:

> **35270 Remittances from mixed funds: Collateral in respect of relevant debt** [June 2010]

148 See 11.19.2 (Use as security for debt).

> ... The amount of the foreign income or gains that are used in respect of the debt will be restricted to the amount of the capital loaned, together with any accrued interest. See Chapter 5: Condition B – Collateral in respect of relevant debt.
> Often the collateral offered will be an asset which is itself a mixed fund. In these circumstances the mixed fund ordering rules at section 809Q(4) apply to the asset offered as security. In such a case, the taxable amount is made up of the same amounts of capital and foreign income and gains that were used to purchase the asset in the first place.
> The 'transfer' is the offering of the asset as collateral in respect of the relevant debt and any formal charge is registered to the lender (where appropriate). The analysis is carried out on the date immediately before the collateral is so offered.

Example 1 (omitting irrelevant detail) is as follows:

> *Example 1 (John)*[149]
> In 2014/15 J, a remittance basis user takes out a loan for £200,000 from a Guernsey bank.
> J uses the loan to purchase UK assets. The loan is a relevant debt.
> J offers up, as security for this loan, a charge on his Guernsey farmhouse, which he purchased for £320,000 in 2010-11.

The HMRC analysis is as follows:

> J has used his foreign income and gains as collateral, in respect of a relevant debt. If the use of the collateral creates a taxable remittance, the amount of the remittance is 'capped' at the amount of the debt, which is £200,000.

---

149 (This is a variant of *Example 1 (John)* considered 11.19.2 (Use as security for debt). The example in full (including its irrelevant detail) is as follows:
"In 2014/15 John, a remittance basis user takes out a loan for £200,000 from a Guernsey bank. John uses the loan to purchase a horse and a stable/paddock in Chester to encourage his young daughter's latest hobby. The loan is a relevant debt. John offers up, as security for this loan, a charge on his Guernsey farmhouse, which he purchased for £320,000 in 2010-11.

- £60,000 of the purchase price was met using John's un-remitted relevant foreign income from 2008-09
- £50,000 of the purchase price was met using John's un-remitted relevant foreign income from 2009-10 and £120,000 using foreign chargeable gains from that same year
- The remainder was met using clean capital from a family inheritance in 2007-08 and 2008-09."

The farmhouse is derived from:

Relevant Foreign Income	2008-09 £60,000
	2009-10 £50,000
Foreign chargeable gain	2009-10 £120,000
Clean capital	2007-08 £40,000
	2008-09 £50,000

The mixed fund rules apply to determine the order of remittances. J will be regarded as remitting £50,000 RFI and £120,000 foreign chargeable gains from 2009-10, and £30,000 RFI from 2008-09.

Example 2

As per example 1, except that the farmhouse which J offers as collateral in respect of the relevant debt was purchased for £150,000 in 2010-11. It is now worth £250,000.

J has used his foreign income and gains as collateral, in respect of a relevant debt. If the use of the collateral creates a taxable remittance, the amount of the remittance is 'capped' at the amount of the debt, which is £200,000.

The farmhouse is derived from:

Relevant Foreign Income	2008-09 £60,000
	2009-11 £50,000
Clean capital	2007-08 £40,000

The mixed fund rules apply to determine the order of remittances; J will be regarded as remitting £110,000 RFI.

Any increase in the value of the farmhouse is ignored.

Example 3 (Freda)[150]

F, a remittance basis user receives an interest-free loan[151] of £100,000. She uses the loan to purchase a plot of land in the UK, so the loan is a relevant debt.

F gives, as collateral for the loan, a general right to the bank over her many current and savings accounts and investment portfolio held with them.

Ignoring accrued interest, the 'cap' on the amount of collateral regarded as used in respect of the relevant debt is £100,000. The 'transfer' is the offering of the asset as collateral so an analysis of F's accounts over which the charge is granted would be needed to analyse the credits into each account immediately before the date of transfer, in order to determine the constituent parts of each account for s809Q(4) purposes. In these circumstances the terms and conditions surrounding the loan and

150 This is a variant of *Example 1 (Freda)* above.

151 The grant of an interest-free loan from a bank seems somewhat implausible.

the collateral offered should be examined carefully as this may prioritise the order of the accounts against which any 'collateral' charge will be taken; for example it may prioritise current or savings flexible accounts over high-interest period or notice accounts. The s809Q(4) analysis should reflect this priority.

11.29.5 *Cap on amount remitted*

Section 809P(12) ITA provides:

> If the amount remitted (taken together with any amount previously remitted) would otherwise exceed the amount of the income or chargeable gains, the amount remitted is limited to the amount which, when taken together with any amount previously remitted, is equal to the amount of the income or chargeable gains.

How could the amount remitted (which must derive from the income/gains) exceed the amount of the income or the gains? One case is if income is remitted (the remittance conditions are met) and then the remittance conditions are met again, in relation to the same income or gains. There are many ways that this could happen, but one case concerns re-remittances. Suppose:

(1) Year 1: T (an individual taxable on the remittance basis) receives foreign income. The income is remitted ("the first remittance") and so subject to tax.
(2) Year 2: The income is transferred out of the UK and remitted again ("the re-remittance").

The RDR Manual provides:

> **35030 Remittance Basis: Amounts remitted: Quantification: Conditions A & B - remittances derived from foreign income/gains** [January 2014]
> ...When taken together with any amounts that have been previously remitted (or treated as having been remitted), the taxable amount of income or gain that is treated as having been remitted because of these provisions cannot be greater than the amount of the original foreign income and gains (ITA07/s809P(12)). Where property is brought to or used in the UK by or for the benefit of a relevant person the amount that is liable to tax is the amount of the underlying foreign income or gains from which the property derives (whether directly or indirectly). The taxable remittance will only occur once; this will usually be the time the asset is first brought to, received by or used in the UK by a relevant person.

This is obviously right. But the same would apply if the income/gains were not taxed on the first remittance, eg:

(1) A remittance before 2008 of source-ceased income or of property enjoyed in specie.

(2) A remittance by a non-resident of income/gains accruing during a resident period (the temporary non-residence rules would need consideration).

HMRC agree. December 2008 Qs & As provides:

> **Q9** If a taxpayer undertook a source ceasing exercise during the 2006-07 tax year and then remitted the proceeds before the 2008-09 tax year, if those funds were to then be taken back outside of the UK and re-imported, would this constitute a remittance. In other words, would the earlier source ceasing exercise be looked through despite its timing? It is understood that interest/profit from any new investment would be a remittance.
>
> **A** If the source ceased in 2006-07 and was remitted in 2007-08, then this did not count as a remittance and it will not count as a remittance if it is exported and subsequently re-imported.

HMRC do not cite a statutory authority to justify their answer; s.809P(12) ITA would do, though there are others as well.[152]

11.29.6 *Condition C and D cases: Amount remitted*

Section 809P ITA provides:

> (6) In a case falling within section 809L(4)(a) or (b), the amount remitted is equal to the amount of the relevant income or chargeable gains.
>
> (7) In a case falling within section 809L(4)(c), the amount remitted is equal to the amount of the relevant income or chargeable gains; but this is subject to subsection (10).
>
> (8) In a case falling within section 809L(5)(a) or (b), the amount remitted is equal to the amount of the income or chargeable gains referred to in section 809O(4)(c).
>
> (9) In a case falling within section 809L(5)(c), the amount remitted is equal to the amount of the income or chargeable gains referred to in section 809O(4)(c); but this is subject to subsection (10).
>
> ...
>
> (11) In subsections (6) and (7) "relevant income or chargeable gains" means—
>
> (a) if the qualifying property falls within section 809N(7)(a), the income

152 Para 86(2) Sch 7 FA 2008 would also provide relief here: see 11.38 (Transitional relief for property acquired before 2008).

or gains—
(i) of which the qualifying property consists, or
(ii) from which the qualifying property derives;

(b) if the qualifying property falls within section 809N(7)(b), the income or gains—
(i) of which the property given to the gift recipient consisted, or
(ii) from which that property derived;

(c) if the qualifying property falls within section 809N(7)(c), the income or gains—
(i) of which the property given to the gift recipient consists, or
(ii) from which that property derives.

The RDR Manual offers seven examples but the matter does not seem important enough to be setting out here.

11.30 CGT disposal not for market value

11.30.1 *The CGT background*

CGT is charged on gains accruing to a person on a disposal of assets. Gains are normally computed as the actual consideration for the disposal less allowable expenditure.

In certain circumstances the consideration for a disposal is deemed to be market value consideration, not the actual consideration (if any).[153] In these cases a gain is deemed to accrue which is not a real gain (in the sense that the individual does not actually receive a sum which constitutes or represents the gain). I refer to this as **"a deemed gain"**.

The most common case of a deemed gain is a gift. In money terms (one might say, in economic reality, but I do not think that is a helpful concept) a gift cannot give rise to a gain and normally gives rise to a loss. However, for CGT purposes a gift is treated as made for market value.

11.30.2 *Deemed gains and the remittance basis*

In the absence of express provision a deemed gain arising on a gift could not be remitted, because it does not exist (in the sense that the individual does not receive a sum from the disposal which is the gain or is derived from the gain). Accordingly, s.809T ITA provides:

---

153 Section 17(1) TCGA sets out seven sets of circumstances when a disposal is treated as made for market value. (The section also deems certain acquisitions to be for market value, but we are not concerned with that here.)
In certain circumstances a gain is deemed to accrue to an individual even though there is no disposal, but s.809T does not apply to that.

(1) This section applies if—
  (a) foreign chargeable gains accrue to an individual on the disposal of an asset, and
  (b) the individual does not receive consideration[154] for the disposal of an amount at least equal to the market value[155] of the asset.
(2) For the purposes of this Chapter, treat the asset as deriving from the chargeable gains.

It is not expressly stated that s.809T only applies on a disposal made by an individual, but this is implied. Eg on a disposal by non-resident close company, conditions (a)(b) are met, if one reads the words literally:
(a) s.13 gains may accrue to an individual who is a participator, and
(b) the individual does not receive the consideration for the disposal.
But s.809T does not apply. Otherwise provisions such as s.14A(3)(a) TCGA would be unnecessary.

11.30.3 *Gift of asset*

Suppose:
(1) T (a remittance basis taxpayer) gives an asset (foreign situate) to a trust. A gain is deemed to accrue on the disposal as if the asset were sold for market value. (Assume the asset has risen in value and a deemed gain accrues.)
(2) T (or a relevant person) receives the asset in the UK.
The deemed gain is remitted. This reverses the rule for the pre-2008 CGT remittance basis.

For the interaction with the s.87 charge on the capital payment from the trust, see 51.6.7 (Payment derived from old unremitted gains taxable on remittance).

11.30.4 *Sale of asset for market value*

Suppose T sells an asset to a trust for market value. Then s.809T does not apply. It does not matter if T and the trustees are connected persons. The purchase price is or (better) is derived from the gain accruing on the sale,

---

154 "Consideration" here obviously means actual consideration, as opposed to deemed market value consideration under s.17(1) TCGA. (Though normally in the legislation the drafter states this expressly; eg s.165(7) TCGA.)

155 Defined s.809Z10 ITA 2007: " In this Chapter ..."market value" has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act)."

but the asset itself is not (and is not derived from) the gain. So it does not matter if the asset is remitted.

Suppose T sells an asset and the purchase price is left outstanding as a loan. It is considered that T "receives" the consideration, for the benefit of the outstanding loan is the consideration.

11.30.5 *Sale of asset at undervalue*

Suppose T sells an asset to a trust at an undervalue. Assume for the purpose of discussion that the asset has a market value of £200 and has a base cost of £50. So a deemed gain of £150 accrues on the disposal. The asset is treated as derived from the chargeable gains, and there is a charge if the asset is remitted.

If the asset is sold for base cost, £50, it is suggested that the £50 is not derived from the deemed gain, so the £50 sale proceeds could be remitted tax free. But other views are possible.

What if the asset is sold for more than base cost, say £100? In the absence of s.809T, I would say that the purchase price is in part derived from the gain. One might say that since the sale price is half the market value, half of the sale price represents the gain, ie £75. I prefer the view that the purchase price is £50 more than base cost, so that £50 of the purchase price is derived from gain. Does the rule in s.809T, that the asset is derived from the gain, mean that the proceeds of sale are *not* derived from the gain? Logically that should follow, but if that were right then tax could be avoided by sales at a (marginal) undervalue. So the context shows that one should not carry the deeming so far.

The conclusion is that on a sale at an undervalue:

(1) the asset held by the trust derives from the gain *and*

(2) the proceeds of sale (in part) are derived from the gain.

However the cap on the amount remitted avoids double taxation.[156]

This rule applies to all sales at less than market value, even if accidental.

This rule applies if the sale is less than market value even if it is 99% of the market value.

The rule applies even if the disposal is not between connected persons, though in practice s.809T is not likely to apply to a disposal between unconnected persons.

---

156 See 11.29.5 (Cap on amount remitted).

11.30.6 *Transitional rule: Pre-2008 deemed gain*

Subject to immaterial exceptions, para 81 Sch 7 FA 2008 provides:

> The other amendments made by this Part of this Schedule have effect for the tax year 2008-09 and subsequent tax years.

A deemed gain accrued to an individual on pre-2008 gifts: it was just not remittable. At first sight this does not help. It is accepted that the ITA remittance basis rules govern pre-2008 income/gains. So after 2008/9 s.809T applies and the gain becomes remittable, though it qualifies for RP relief. It does not matter when (after 1965) the gain arose: gains from disposals made in the 1960s could now come into charge, though all records will have been long discarded. However HMRC do not take that view. The RDR Manual provides:

> **31180 Foreign chargeable gains accruing on disposal made otherwise than for full consideration** [June 2010]
> The new rule at Section 809T ITA 2007 applies to disposals by remittance basis users on or after 6 April 2008.

11.31 Purchase of family home

Suppose:

(1) T gives RFI to T's son S, not a relevant person.
(2) S buys the freehold interest of a house and uses the RFI to pay the purchase price.

The topic raises many remittance issues, discussed throughout this chapter, so it is convenient to draw them together.

11.31.1 *Rent-free occupation*

Suppose S allows T to occupy the house rent-free. It is considered that S "uses" the house (the word "use" is wide enough to cover this even though it would be more normal and better legal English to say S occupies or enjoys the use of the house). Accordingly remittance condition A is satisfied. The house is derived from the RFI, but condition B is not satisfied because the property is not property of a relevant person.

Remittance condition C is satisfied, since the property is qualifying property of a gift recipient, and is used and enjoyed by a relevant person. So the purchase price RFI is remitted.

11.31.2 *Lease granted for full consideration*

Now suppose:

(1) T gives RFI to T's son S, who uses it to buy the freehold interest of a house.

(2) S grants a lease of the property to T for full consideration and T occupies the property. S retains the freehold reversion.

One must ask various questions here.

First, does T use the lease? The answer is that T does "use" the lease (see above). So remittance condition A is satisfied in relation to the lease. However the lease is not derived from the RFI. So condition B is not satisfied. Of course funds T uses to pay for the lease are regarded as remitted.

Next, does T use the reversion? If so condition A is satisfied in relation to the reversion. However that may be, the reversion is not property of a relevant person so condition B is not satisfied.

Conditions C and D are excluded (even if they could otherwise apply) since the full consideration exemption applies.

11.31.3 *Lease granted for less than full consideration*

Now suppose:

(1) T gives RFI to T's son S, not a relevant person, who uses it to buy the freehold interest of a house.

(2) S grants a lease of the property to T for no consideration or for less than full consideration, and T occupies the property. S retains the freehold reversion.

One must ask various questions here.

First, does T use the lease? The answer is that T does "use" the lease (see above) So remittance condition A is satisfied in relation to the lease. If the transactions are part of an arrangement, the lease is derived from the RFI. So condition B is satisfied (as the lease is property of a relevant person). What is the amount remitted? It is the amount from which the lease is derived. It is suggested that that is not the full amount used to pay for the property, but only a part reflecting the value of the lease.

Next, does T use the reversion? If so condition A is satisfied in relation to the reversion. However that may be, the reversion is not the property of a relevant person so condition B is not satisfied.

Turning to remittance condition C, does T enjoy the lease for the purposes of remittance condition C? T does. At first sight this does not

matter as the lease is not qualifying property of a gift recipient (it is not property of a gift recipient). The lease may (depending on the facts) however be qualifying property within s.809N(7)(c). If so the amount remitted is all the RFI (not the value of the lease).

Next, does T use and enjoy the reversion? It is considered that T does, since the lease T enjoys is derived from the reversion, and the lease is the mechanism by which T enjoys the reversion. If that is right, then condition C is satisfied, since the reversion is qualifying property of a gift recipient.

11.31.4 *Another analysis*

Another analysis is that the "property" is the physical house, not the legal interests in the property, but one should not disregard the most basic principles of the law of real property in construing a taxing statute, if any other approach is possible.

11.32 Payment of school fees

Suppose T wishes to pay the school fees of minor grandchildren. Assume the grandchildren are at school in the UK (otherwise there is no problem). A direct payment out of RFI is a remittance as conditions A and B are satisfied.

Suppose T gives funds to T's child (not a relevant person) and the child uses the funds to pay the fees. This is still a remittance as conditions A and B are still satisfied: the funds in the hands of the child are derived from the RFI.

Suppose there is an informal arrangement under which:

(1) T gives funds to T's child;

(2) the child will use *other* funds to pay the school fees.

This is caught by condition C because the funds used to pay the fees are "qualifying property" within s.809N(7)(c). That is, it is used to pay the school fees by virtue of an operation which is effected "with reference to the gift of the property to the gift recipient".

T must therefore make an unconditional gift to T's child ie a gift such that the payment of the school fees is not with reference to that gift; in that case (assuming the fees are not paid out of the gifted property) there is no taxable remittance.

11.33 Remittance before income or gains arise

Section 809U ITA provides:

> Where—
> (a) income or foreign chargeable gains are treated as arising or accruing, and
> (b) by virtue of anything done in relation to anything regarded as deriving from the income or chargeable gains, the income or chargeable gains would otherwise be regarded as remitted to the UK before the time when they are treated as arising or accruing,
> treat the income or chargeable gains as remitted to the UK at that time.

EN Remittance Basis Amendments 482 to 493 states:

> Under the original wording such payments might in certain circumstances become chargeable before the tax year in which the income or gain is treated as arising. The amendment ensures that cannot happen.

This can apply to s.87 gains[157] and to s.731 income, where a benefit is received in a year before the income accrues. It can also apply under the accrued income scheme.

11.34 Partnerships

This section discusses two related questions. Assume P (a remittance basis taxpayer) is a member of a partnership.

(1) *Remittance of funds transferred to partnership.* Suppose:
   (a) P receives foreign income/gains.
   (b) P contributes the funds to the partnership, as partnership capital.
   (c) The partnership brings the funds to the UK.

(2) *Remittance of partnership income/gains*. Suppose:
   (a) The partnership receives foreign income/gains.
   (b) The partnership does not distribute the funds to the partners, but brings the funds to the UK.

In these cases, is there a taxable remittance? The partnership itself is not a relevant person[158] but P is a relevant person and P's partners may be relevant persons too.

There are two possible views:

(1) One regards P as owning an asset (a partnership share). In that case:
   (a) Funds contributed to the partnership are remitted if P receives the partnership share in the UK (because the partnership share is

157 See 51.15 (Section 87 remittance basis).

158 See 11.7.3 (Partnership).

derived from P's foreign income/gains.)

(b) Partnership income/gains brought by the partnership to the UK are not remitted.

(2) One regards P as owning a share of the partnership assets. In that case:

(a) Funds contributed to the partnership[159] are remitted if the partnership brings the funds to the UK.

(b) Partnership income/gains[160] are remitted if the partnership brings the income/gains to the UK.

One might describe the first view as being that partnerships are not transparent for remittance basis purposes, and the second view as one that partnerships are transparent.

11.34.1 *The partnership law background*

In order to understand partnership taxation, one needs to understand the nature of a partner's interest in a partnership (also known as a partnership share).

A partnership share has a twofold nature:

> [1] As between themselves, partners are not entitled individually to exercise proprietary rights over any of the partnership assets. This is because they have subjected their proprietary interests to the terms of the partnership deed which provides that the assets shall be employed in the partnership business, and on dissolution realised for the purposes of paying debts and distributing any surplus.
> [2] As regards the outside world, however, the partnership deed is irrelevant. The partners are collectively entitled to each and every asset of the partnership, in which each of them therefore has an undivided share.[161]

Lindley and Banks on Partnership refers to the two parts of this double nature as internal and external perspectives;[162] but for present purposes it

159 Or at least, the share of the funds attributable to the share in the partnership of P and of other relevant persons who are partners.

160 Or at least, the share of the income/gains attributable to the share in the partnership of P and of other relevant persons who are partners.

161 *IRC v Gray* [1994] STC 360 at p.377.

162 *Lindley & Banks on Partnership* (19th ed., 2010), para 19-03; Law Com, *Partnership Law*, Report no 283 (2003), para 9.66 (Nature of a partner's interest) *http://lawcommission.justice.gov.uk/docs/lc283_Partnership_Law.pdf*

is clearer to describe them as a *chose in action analysis* and a *joint ownership analysis* of partnership share.

Which analysis is adopted can make a difference for tax purposes. There is no general answer: the decision is made according to the context of the provisions concerned. Thus the passage cited above continues:

> It is this outside view [the joint ownership analysis] which identifies the nature of the property falling to be valued for the purpose of capital transfer tax [now IHT].

In the context of *Gray*, the joint ownership analysis gave the sensible result, that where a partnership held land, a partnership interest was (or included) "land" so the Lands Tribunal had jurisdiction to value it.

In the context of remittances, the RDR Manual adopts the chose in action analysis:

> **33530. Partnerships** [December 2011]
> *Investment into partnerships*
> When a partner makes a capital contribution to a partnership they acquire an asset under partnership law, namely an 'interest' or 'share' in the partnership which gives them rights to share in future profits and distributions (of their capital and any surplus) on dissolution of the partnership.[163]

The legal analysis of a LLP is different, but for present purposes the end result is the same. A LLP is not a relevant person. The members of the LLP have no interest in the assets of the LLP, which is beneficial owner of its assets. But for (most) tax purposes a LLP is treated like a common law partnership.

11.34.2 *Non-transparent nature of partnership for remittance basis purposes*

On this basis the RDR Manual adopts the non-transparent view:

---

163 Similarly the former Stamp Taxes Manual: "4.442 A partner cannot claim to be the owner of any particular asset or, indeed, any specific share in an asset. A partner's interest is a peculiar form of property known as an interest in a *unum quid* or, in other words, in an indivisible whole. This is not a share in any goods, money or other assets. It is merely a right as a partner, with others, to control the partnership assets and affairs so long as the partnership exists and, upon dissolution, a right to have the assets liquidated, the liabilities discharged and a division of any surplus." *http://www.hmrc.gov.uk/so/manual.pdf*

> **33530. Partnerships** [December 2011]
> *... Offshore partnerships trading or investing in the UK*
> A partnership is not a relevant person. Individuals who are partners together in a partnership are not relevant persons by virtue of their role as a partner (although they may, of course, be relevant persons under other provisions).
> Offshore partnerships, whether trading or investment partnerships, may bring partnership funds into the UK to meet trading or investment expenses in the usual course of partnership business. As the funds are brought in by the partnership they are not brought in by a relevant person. In most cases there will be no benefit to a relevant person from the money or other property brought into the UK by the partnership, nor will a service usually be provided in the UK to or for the benefit of a relevant person, so Condition A of ITA07/s809L is not met.[164] Thus there will be no taxable remittance.

In short, in the Manual's view, partnerships are not transparent for remittance basis purposes. At first glance, one might have thought inconsistent with the rule that partnership income is regarded as income of the partners; in that sense partnerships are said to be transparent.[165] But there is no contradiction, for the issues and statutory provisions are different: there is no general principle of income tax transparency which requires the same answer to both.[166]

The RDR Manual adds four qualifications (which should not be controversial):

> **33530. Partnerships** [December 2011]
> ... [1] In cases where there does appear to be a benefit to an individual partner (or to another relevant person) from money or other property brought into UK by the partnership, or from a service provided in the UK for which the partnership gives consideration then you should examine the transaction and the partnership documents very carefully to identify the source of the partnership funds.
> [2] The provision of the property or service by the partnership may be a remittance of that individual's 'share' in partnership profit. To the extent that the individual's share in partnership profit falls to be regarded as relevant foreign income (see below) there may be a remittance.

---

164 This is a loose paraphrase of remittance condition A, but the meaning is clear.

165 See 41.4 (Transparency of partnership for IT).

166 See 84.2.1 (Terminology).

Para [1] is considering whether a capital contribution to the partnership is remitted and para [2] is considering whether partnership income/gains are remitted. Clearly, if a partnership asset is used by the individual in the UK, remittance condition A is in principle satisfied.

> [3] You may also need to examine whether there is a true partnership, or whether in fact it is the individual's foreign income or gains that have been remitted.

Whether there is a partnership is a question of partnership law. That should not cause difficulties, if documentation and implementation are correct, but it depends on the facts.

> [4]...Alternatively there may be a connected operation to which Condition D of ITA07/s809L(5) applies.

This is a shot from the hip. The Manual wisely does not seek to explain how remittance condition D might be satisfied.

11.34.3 *Contribution of foreign income/gains to UK partnership*

The RDR Manual 33530 provides:

> **33530. Partnerships** [December 2011]
> ... It follows [from the statement of the partnership law position] that a remittance basis user who uses his foreign income or gains to make a capital contribution to a UK partnership acquires a UK asset; namely a share in the UK partnership, in exchange for his 'equity' subscription in the partnership. Thus the foreign income or gains that he uses to contribute to the partnership will be a taxable remittance within ITA07/s809L.
> This is so even if the individual places his investment into the partnership's overseas account, and the UK partnership is only investing or trading overseas and not in the UK.

The text does not say what it means by "UK partnership" - presumably it means one an interest in which is UK situate, on common law/international law principles: that is, an unincorporated partnership which is managed and controlled in the UK or a LLP with a UK register.[167]

---

167 See 82.34 (Situs of partnership share).

An unspoken assumption here is that receipt of a UK situate asset is a taxable remittance, ie is a receipt of an asset in the UK. That is arguable.[168]

11.34.4 *Remittance of partnership profits*

Where partnership income is RFI[169] the same point arises. There is no taxable remittance if the partnership brings its income to the UK. A partner who is a remittance basis taxpayer can only remit income to the UK after it is distributed to them from the partnership.

See too 13.7 (Mixed funds held by third parties).

11.34.5 *Company held by partnership*

Suppose a partnership holds a company. The partners are participators in the company. The company will be a close company (or a non-resident close company), since partners are connected persons. Accordingly the company is a relevant person in relation to each of the partners. So there is a taxable remittance if property is brought/received/used in the UK by the company; even though there would be no remittance if the same property was brought/received/used in the UK by the partnership which holds the company! This is the case regardless of the size of the partnership. Remittance investment relief may mitigate this problem.

11.35 Proceeds of divorce settlement

11.35.1 *Is a transfer on divorce made for "consideration"?*

The starting point is to understand the family law background.

A transfer in connection with divorce may be made:

(1) Pursuant to a court order
   (a) following a contested hearing; or
   (b) approving a settlement agreed by the parties.
(2) Without a court order but under an agreement between the parties (the transferee agreeing to seek no (or a reduced) court order in return for the transfer).

Assume (as will normally be the case on divorce) that the transfer is made bona fide, at arm's length and with no gratuitous intent. Are transfers of these kinds made for consideration?

---

168 See 11.12.10 (Receipt of UK situate investment asset).

169 See 41.5 (Partnership income: remittance basis).

One might have thought that the answer was no. One argument is:
(1) there is only "consideration" where there is a contract[170] and
(2) (a) a court order is clearly not a contract; and

(b) an agreement between the parties is generally not a valid contract.[171] The word consideration is wide enough to apply in the absence of a contract, but in case (1) there is no agreement of any kind. In case (2) a nuptial agreements can in some cases constitute enforceable contracts.[172] But more fundamentally, the quid pro quo which is the essence of consideration is lacking.

Accordingly in *G v G*[173] the High Court held that a transfer pursuant to a Court Order at a contested hearing (type (1)) was not made for consideration, so that CGT hold-over relief was available.

However in *Hill v Haines* [2008] Ch 412 the Court of Appeal held that a transfer pursuant to a Court Order at a contested hearing (type (1)) *was* made for consideration, for the purposes of s.339 Insolvency Act 1986.

Where does this leave *G v G* and CGT hold-over relief? Either it is overruled or else there are (at least) two concepts of consideration, in which case a transfer might be for consideration in one sense but not for consideration in the CGT sense. In that case one could never ask whether a transfer is made for consideration in the general, but only whether it is made for consideration in some specified sense of the ambiguous word.

Each view has some support in *Hill v Haines* (though they cannot both be right). Morritt C said:

> [30] ... the fact that a transfer ordered by the court does not give rise to a payment of consideration so as to reduce the value of hold-over relief *for capital gains tax* [does not entail] a conclusion that a property adjustment order must be regarded as made for no consideration.

In other words, "consideration" in the CGT code has a different meaning.

---

170 *C&E Commissioners v Apple and Pear Development Council* [1985] STC 383; *IRC v Plummer* 54 TC 1 at p.57; *Unilever v Smith* [2002] STC 113.

171 See *Aspden v Hildesley* 55 TC 609.

172 See Law Commission consultation paper no. 198, *Marital Property Agreements* (Jan 2011) accessible *http://lawcommission.justice.gov.uk/*; *Granatino v Radmacher* [2011] 1 AC 534.

173 *G v G* [2002] EWHC 1339 [2003] Fam Law 14 [2002] 2 FLR 1143 at [43] accessible *http://www.kessler.co.uk/tfd-archive*.

But Rix LJ preferred the view that *G v G* was wrong.[174] Since Rix also agreed with Morritt, it is clear that he did not give a great deal of attention to this point (which did not need to be decided and which would not have been fully argued). A legal realist would say that each decision was result led, the court first deciding what is the just result and then holding that there was/was not consideration in order to reach that result. But it is considered that the two decisions can be reconciled and the view of Morritt is to be preferred. Rights under the Matrimonial Causes Act are not assets for CGT purposes: no gain arises when a spouse is awarded a capital sum. Accordingly, there is no "consideration" for CGT purposes. However that is a special case and a transfer on divorce is made for consideration in the general sense of the expression.

11.35.2 *The HMRC view*

The CG Manual provides:[175]

> **67192. Hold-over relief: Consideration** [February 2006]
> The disposal of an asset from one spouse or civil partner to the other in the circumstances described in CG67191 [that is, a disposal in a year after separation, which does not qualify for the CGT spouse exemption] is, where there is no recourse to the courts, usually made in exchange for a surrender by the donee of rights which they would otherwise be able to exercise to obtain alternative financial provision. In such cases we take the view that the value of the rights surrendered represents actual consideration of an amount which would reduce the gain potentially eligible for hold-over relief to nil. "Consideration" is not limited to money or money's worth.

After considering the case where there is gratuitous intent, which is so rare that it need not be considered here, the Manual continues:

---

174 At [81] "... As for *G v G*, the view expressed by Coleridge J at para 43 regarding potential consequences for the purposes of capital gains tax can hardly be regarded as authoritative in the absence of the revenue. As Coleridge J stated, his view that the wife gave no consideration for the shares transferred to her because 'neither party has any 'rights'… cannot, of course, ultimately bind the Inland Revenue': he merely proceeded "on the footing" that business hold-over relief would be available to the husband. In doing so, he appears to have drawn an unnecessary inference from the decision of this court in the *Xydhias* case."

175 The passage has not been revised after *Hill v Haines,* but as several years have elapsed since that decision, it may be taken as a statement of the HMRC current view.

> However, in cases where there is recourse to the courts and a court makes an order
> - for ancillary relief under the Matrimonial Causes Act 1973 which results in a transfer of assets from one spouse to another, or
> - for property adjustment under the Civil Partnership Act 2004, or
> - formally ratifying an agreement reached by the divorcing parties or by the civil partners of a dissolved civil partnership dealing with the transfer of assets,
>
> we take the view that the spouse or civil partner to whom the assets are transferred does not give actual consideration, in the form of surrendered rights, for their transfer. A Court Order, made in these circumstances, reflects the exercise by the court of its independent statutory jurisdiction and is not the consequence of any party to the proceedings agreeing to surrender alternative rights in return for assets. This approach represents a change in the Revenue's prevailing practice, following consideration of judicial observations made in the case of *G v G* and applies with effect from 31 July 2002. Therefore, where assets are transferred between divorcing parties or between civil partners of a dissolved civil partnership by reason of a Court Order as described above and a claim for gift hold-over relief is made, or remains unsettled, on or after that date, the relief should not be restricted in accordance with Section 165(7) TCGA 1992 on the grounds that actual consideration has been given by the donee.

Thus in the HMRC view:

(1) A transfer made pursuant to a court order, including a consent or *Tomlin* order, is not made for consideration.
(2) A transfer not made pursuant to a court order is made for consideration.

It is considered that the position is in both cases the same:

(1) The transfer is made for consideration in the general sense of the word;
(2) The transfer is not made for consideration for CGT purposes.

11.35.3 *Are proceeds of divorce settlement "derived property"?*

Suppose T transfers RFI to W as part of a divorce settlement. It is suggested that the funds in the hands of W are not derived from the income. They are received for full consideration (in the general sense of that expression). If that is right, remittance condition B is not satisfied even if:

(1) W remits while still a relevant person (before decree absolute);

(2) W applies the funds for the benefit of relevant persons (eg children or grandchildren of T under 18).

However in case HMRC do not agree, W should not bring the funds to the UK until after decree absolute, by which time she has ceased to be a relevant person; and she should ideally not use the funds for the benefit of relevant persons (in relation to H). Then there is clearly no taxable remittance.[176]

11.36 Debit, credit and charge cards

This section considers whether the use of debit, credit and charge cards involves a remittance. The starting point is to understand the legal nature of debit, credit and charge cards. The following analysis draws on *The Law of Bank Payments*.[177]

On the use of a card, three contracts come into being. For present purposes the most important terms of the contracts are as follows:

(1) Cardholder and supplier

This is the contract for goods or services between the cardholder and the person from whom the cardholder purchases goods or services ("the supplier"). This contract is the same whether the cardholder pays by card or by cash.

(2) Card-issuer and supplier

The card-issuer undertakes to honour the card by paying the supplier.

(3) Card-issuer and cardholder

(a) A *debit* card is issued only by a bank. The contract between the card-issuer bank and cardholder authorises the bank to debit the cardholder's bank account with the amount of the card transaction.

(b) Charge and credit cards are different. Here the cardholder is required to make a payment to the card-issuer. A *charge* card requires the cardholder to repay the balance outstanding after a set period.[178] A *credit* card allows the cardholder extended credit.

---

176 See 11.20 (Becoming/ceasing to be a relevant person: conditions A and B). As to debt remittance rules, see 11.18.11 (Debt imposed by law).

177 Brindle and Cox, (4th ed., 2010), para 4-014. In any particular case it is strictly necessary to review the specific terms governing the card concerned, but I expect that will not usually make any difference in practice. Store-issued cards are not discussed here.

178 In the case of a bank-issued credit card, the issuer is normally authorised to debit the cardholder's bank account to meet a debt due on the card. But in practice this facility is not used unless needed (or the card effectively becomes a debit card).

It is necessary to distinguish between use of cards to obtain (1) cash, and (2) goods or services.

11.36.1 *Cards used to obtain cash*

If a debit card is used to obtain cash in the UK from a foreign bank account which is in credit,[179] and the card is used at a branch of the bank which issued the card, then there is clearly a remittance of the money. The same applies if the cash is withdrawn from a bank which is not the card-issuing bank, because the third party bank acts as the agent for the card-issuing bank.

The use of a *charge* card to obtain cash in the UK from a foreign bank account is likewise a remittance. The time of the remittance is when the sum is debited from the account, not when the card is used. The position is the same if an individual uses a *credit* card to obtain cash in the UK.

11.36.2 *Cards used to obtain goods or services*

Where a debit card is used to obtain goods or services in the UK, remittance condition A is satisfied. Payment of the debt to the card issuer out of income or gains satisfies remittance condition B.

11.36.3 *HMRC practice*

The RDR Manual provides:

> **36130 Credit Cards and Debit Cards** [June 2010]
> *Credit card issued in the UK*
> If a taxpayer who is chargeable on the remittance basis uses a UK credit card to pay for goods or services, either in the UK or overseas and he or she subsequently settles their credit card bill using foreign income or gains, the payment is a taxable remittance.
> The remittance does not have to be received in the UK by the taxpayer, it is sufficient that it is received by the credit card company in the UK.

This is not correct, but a remittance basis taxpayer should avoid a UK credit card in order to avoid dispute.

---

179 If the effect of use of the card is to put an account into debit, there is obviously no remittance on ordinary principles, though the debt remittance rule will in principle apply when the overdrawn account is repaid.

Credit card issued by an overseas bank or other financial institution

Where an overseas credit card is used in the UK, the cardholder is effectively authorising the credit card company to pay the bill for the goods or service in just the same way as if they had instructed the bank to make a payment directly to the person supplying the goods or services. The terms of credit card agreements may differ as to the moment of "indebtedness" between the cardholder and the credit card company. However the use of the credit card to pay for goods used or received in the UK, or services provided in the UK by, to or for the benefit of a relevant person will create a debt.

The use of the individual's untaxed foreign income or gains to pay the credit card company in respect of the relevant debt will be a taxable remittance.

Interest and other such charges should be apportioned accordingly between UK and non-UK goods and services. In most cases a straight proportional split of the interest against each type of expenditure will be acceptable; for example if £400 of the debt relates to UK goods which are taxed as a remittance and £600 to non-UK goods and there is an interest charge in relation to that £1,000 debt of £10, then £4 of the interest is also a taxable remittance. However some cards may apply different rates where cash is withdrawn, or depending of date of purchase, in which case the taxpayer will need to compute the interest due on the "relevant debt" part of the payment only.

Note 1: This section may apply to any credit card debt which the individual satisfies using their foreign income or gains, even if they are not the cardholder.

Note 2: If an overseas credit card is used abroad and the account is settled direct to the card company out of overseas income, no liability to UK tax will arise. But if an asset purchased using the card is brought to the UK and subsequently sold here, there will be a taxable remittance, at the date of disposal, up to the amount of any foreign income used to settle the original account.

Debit card issued by an overseas bank or other financial institution

Payments for goods or services that are made using a debit card (for example a Visa debit card or one issued under the brand name "Cirrus") issued by an overseas financial institution are treated in exactly the same way as a cash transaction.

This means that when goods or services are purchased in the UK using a debit card a taxable remittance is made to the extent of the amount of any overseas income or gains in the bank account. Likewise any cash withdrawals from shops or ATM machines in the UK are taxable cash remittances.

> Payment by cheque drawn on an overseas account or by electronic transfer of any kind are also treated in exactly the same way as cash and are potentially taxable remittances of overseas income and gains.

11.37 Gift to charity by remittance basis taxpayer

A remittance basis taxpayer ("T") making a gift to charity[180] should give:
(1) money (including foreign currency) (qualifying for gift aid relief) or
(2) foreign assets (qualifying for qualifying investment donation relief).
The gift may be made out of foreign income/gains, or property derived from foreign income/gains. If the sum given is money the charity should open a bank account outside the UK.[181] The charity may bring the assets to the UK without a taxable remittance, provided the charity is not a relevant person in relation to T.

A charitable company would only be a relevant person if it is a close company and T or some other relevant person is a participator.[182]

A charitable trust would be a relevant person if T or some other relevant person is a beneficiary.[183] No individual has a legal or equitable (beneficial) interest in a charitable trust, so in the strict sense a charitable trust has no beneficiaries:

> Individuals may benefit from the application of trust moneys but they are not, as individuals, the beneficiaries of the trust and may not enforce its terms.[184]

---

180 This includes some EU and EEA charities: see Kessler & Marre, *Taxation of Charities and Nonprofit Organisations* (9th ed., 2013), chapter 2 (Definitions of "Charity") online version *http://www.taxationofcharities.co.uk*.

181 I understand that the CAF maintain an offshore account for this purpose (and no doubt some other charities do the same). This may not be strictly necessary: see 11.12.8 (Gift to non-relevant person).

182 See 11.5 (Relevant persons: companies). For the general definition of close company, see 85.19 (Close company: Introduction). For a discussion in relation to charities, see Kessler & Marre, *Taxation of Charities and Nonprofit Organisations* (9th ed., 2013), para 10.3 (Definition of close company) (online version *http://www.taxationofcharities.co.uk*).

183 See 11.6 (Relevant persons: trusts).

184 *Re Crown Forestry Rental Trust, Latimer v IRC* [2004] 4 All ER 588 at [29]. Likewise Law Commission, *Capital and Income in Trusts: Classification and Appointment* Consultation Paper No. 175 (2004) para 6.16: "The 'beneficiary' [of a charitable trust] is at all times the public (although the identity of the individuals who incidentally benefit from the carrying out of the charitable purpose may not remain constant)."

There is a statutory definition but that makes no difference. Section 809M(3)(e) ITA provides:

> "beneficiary", in relation to a settlement, means any person who receives, or may receive, any benefit under or by virtue of the settlement.

It is possible (at least theoretically) that (say) the individual becomes destitute and a charity whose objects include the relief of poverty makes them a grant. However that does not bring the individual within the definition. One must say:
(1) The benefit is incidental (the object of the charitable trust being the relief of poverty, not to benefit the individual) and incidental benefits should be disregarded;[185] or
(2) This possibility is not included in the word "may".[186]
If that were wrong, then (in the absence of a settlor exclusion clause) every charitable trust is within the scope of s.624 ITTOIA as a settlor-interested trust; which cannot be correct. The definition must be read in its context. The purpose is to include discretionary beneficiaries or persons who may be added to the class of beneficiaries.

11.37.1 *Reform?*

HMRC say:

> **Philanthropy**
> 2.91 A number of responses from the arts and charity sectors suggested that the business investment relief[187] should be extended to allow

---

Likewise *AG v Cocke* [1988] Ch 414 at p.419: "... the nonsense of alleging that there is any beneficiary in any meaningful sense of that word under a public charitable trust of this nature. It seems probable to me that in almost all charitable trusts there are no individual beneficiaries."
I stress this because statute does sometimes refer to "beneficiaries" of a charity, eg: s.525(1)(b) ITA, s.561 ITA; s.117 Charities Act 2011. These are examples of the word being used in a loose non-chancery law sense, where it may apply in the context of charitable companies as well as charitable trusts.

185 See 30.4.13 (Payment of school/university fees).

186 See Kessler, *Drafting Trusts and Will Trusts* (12th ed., 2014), para 13.12 (What does a settlor exclusion cause cover?).

187 As far as I can see, the proposal has nothing to do with business investment relief; the proposal was framed that way because it was made in the context of a consultation on that relief.

non-domiciles to bring overseas income and gains to the UK tax-free for the purpose of making donations to, or investments (?) in, UK charities.

Government response

2.92 The Government is committed to encouraging philanthropy. However, there are already tax-efficient ways for non-domiciles to make donations to UK charities and the Government has not seen any compelling evidence that extending the business investment relief in the way suggested would lead to a significant increase in the level of donations to UK charities by non-domiciles. It is also very likely that complicated legislation and anti-avoidance provisions would be required. The Government therefore does not intend to take any further action on this issue at the present time The Government therefore does not intend to take any further action on this issue at the present time but it will consider how to increase awareness of ways for non-domiciles to make tax-efficient donations under the existing rules.[188]

Thus there is no current prospect of reform.

11.38 Transitional relief for property acquired before 2008

Para 81 Sch 7 FA 2008 provides the starting point:

> The other[189] amendments made by this Part of this Schedule [ie part 1 which sets out the provisions discussed in this chapter] have effect for the tax year 2008-09 and subsequent tax years.

11.38.1 *Property remitted before April 2008: Para 86(2) transitional relief*

Under the pre-2008 RFI remittance basis, there was no remittance of RFI if property was remitted *in specie* (not in the form of money). This is now caught by remittance condition B.

Para 86 Sch 7 FA 2008 provides a transitional relief:

> (1) Section 809L of ITA 2007 (meaning of "remitted to the UK") has effect subject to this paragraph.
> (2) If, before 6 April 2008, property (including money) consisting of or

188 HMRC, *Reform of the taxation of non-domiciled individuals: summary of responses to consultation* (December 2011). *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

189 The word "other" excludes provisions concerning employment-related securities, not discussed here.

> deriving from an individual's relevant foreign income was brought to or received or used in the UK by or for the benefit of a relevant person, treat the relevant foreign income as not remitted to the UK on or after that date (if it otherwise would be regarded as so remitted).

I refer to this as **"para 86(2) transitional relief"** and I refer to the asset brought/received/used in the UK as **"the UK asset"**.

The UK asset may be any property, including money. At first sight, the words "including money" seem otiose: the word "property" alone would in any event include money. But assuming it was desired to apply para 86(2) transitional relief to money brought to the UK before 2008, it made some sense for the statute refer expressly to money, if only for clarity, since para 86(3) transitional relief (discussed below) excludes money.

Why was it desired to apply para 86(2) transitional relief to money? The remittance of *money* to the UK before 2008/09 was in principle a taxable remittance under the old rules so no transitional relief was needed. The reason is that para 86(5) applies a definition of "money" which is artificial in that it includes assets which are not money in the normal sense.[190] Such assets would not have been taxable on remittance before 2008, so the transitional provision is needed to give them exemption now.

Para 86(2) transitional relief continues to apply even if the UK asset is sold. HMRC appear to accept this in relation to para 86(3) transitional relief (see the example of Heidi, below) and the same must apply in relation to para 86(2). The result is something of a windfall, but there it is.

The RDR Manual provides:

> **31460. Property derived from RFI not treated as a remittance (1)** [June 2010]
>
> ***Background***
>
> The introduction of Chapter A1 Part 14 ITA 2007 has extended the meaning and scope of foreign income and gains that become taxable when remitted to the UK. In certain situations, the operation of the previous remittance rules in respect of relevant foreign income meant that it could be brought to the UK without triggering an immediate tax charge.
>
> As an example, if an asset such as a car was purchased abroad using

190 Para 86(5) provides: "money" has the same meaning as in s.809Y of ITA; see 12.27.2 ("Money"). But since the expression here is "property (including money)", the definition of money is not important.

relevant foreign income and the car was then brought into the UK, there would be no income or capital gains[191] tax charge when it is brought in. Instead the charge would only occur if/when the asset was sold or otherwise realised for cash in the UK (also refer to RDRM31250 Changes to old regime - cash only).

Property consisting of, or deriving from, relevant foreign income from tax years up to and including 2007-08 may have been brought into the UK prior to 6 April 2008, and the transitional provisions deal with these situations.

Transition

The transitional position is that the new rules contained in Section 809L do not have effect and that property brought to the UK is not treated as a remittance where:

- Property, including money, was acquired either directly or indirectly using relevant foreign income RDRM31140 and was brought to, received, or used in the UK before 6 April 2008.

Effect

Relevant foreign income brought to or used in the UK by the individual or any other relevant person before 6 April 2008 is not regarded as remitted under Section 809L after 6 April 2008 even if it is still in the UK. So in the example of the car above, even though it is still used in the UK by a relevant person on or after 6 April 2008 it will not be treated as a remittance under Section 809L.

Also, the same money or property can be sent or taken outside the UK and then brought in again. It will not be regarded as a remittance when brought in a second or subsequent time.

The Manual goes on to explain why the transitional relief is restricted to RFI:

> Note: This transitional provision applies only to relevant foreign income because the pre 6 April 2008 position for employment income and capital gains was different. These were always chargeable even if remitted in the form of property rather than cash.

It is debatable whether this correctly states the pre-2008 law, but it does not now matter.

Suppose:

(1) T borrowed to purchase an asset and acquired the asset before 6 April 2008.

---

191 There is no question of a CGT charge if the car is purchased out of RFI, so the words "or capital gain" are irrelevant.

(2) T receives the asset in the UK after 6 April 2008.
(3) T repays the borrowing out of RFI after 6 April 2008.

Para 86(2) transitional relief does not apply because the purchased asset is not derived from RFI.

11.38.2 *Property acquired before 12 Mar 2008: Para 86(3) transitional relief*

Para 86(3) Sch 7 FA 2008 provides:

> If, before 12 March 2008, property (other than money) consisting of or deriving from an individual's relevant foreign income was acquired by a relevant person, treat the relevant foreign income as not remitted to the UK on or after 6 April 2008 (if it otherwise would be regarded as so remitted).

I refer to this as **"para 86(3) transitional relief"**.

Para 86(2) transitional relief applies where property (including "money") was *remitted* before 6 April 2008.

Para 86(3) transitional relief where property (excluding "money") was *acquired* before 12 March 2008, regardless of the date of remittance.

The RDR Manual provides:

> **31470. Property derived from RFI not treated as a remittance (2)** [June 2010]
> [The Manual repeats the text of RDR Manual 31460 and continues:]
> ***Transition***
> The transitional position is that the new rules contained in Section 809L do not have effect and that property brought to the UK will not be treated as a remittance where:
> - property (other than money) was acquired either directly or indirectly by a relevant person using relevant foreign income before 12 March 2008 and is brought to or received in the UK after 5 April 2008.
>
> The exclusion of money is important as it ensures that income arising from sources that have ceased is subject to the rule changes.[192] See Section 809Y ITA 2007 for the definition of money in these circumstances.
> ***Effect***
> This provision is similar to that described in RDRM31460. However this provision applies only to the purchase of property abroad before 12

192 Author's note: I am unable to understand this sentence.

March 2008 using relevant foreign income, where that property remained abroad and was not brought to or used in the UK before 6 April 2008.

Example 1 (Heidi)

H bought a car in Germany on 15 October 2007 using her relevant foreign income.

She kept the car at her German apartment until May 2009 when she decided to bring it to the UK to use here. Under the previous rules there would have been no remittance until the car was sold in the UK.

The HMRC analysis is as follows:

Under the new rules at Section 809L the car is regarded as derived from the relevant foreign income and so, without this transitional rule, there would be a taxable remittance of that relevant foreign income in May 2009.

Example 1A (Heidi)

As for example 1 but this time H decides that she needs a bigger car. In August 2009 she sells her car in Germany and brings the proceeds to the UK.

The HMRC analysis is as follows:

The proceeds from the sale of the car derive from H's relevant foreign income and would be regarded as a taxable remittance to the UK under the new rules at Section 809L. But as H's car (the property) was acquired before 12 March 2008 the transitional rule at paragraph 86(3) applies and what would be regarded as remitted is treated as not remitted. The money from the sale of the car that H brings into the UK is not therefore a taxable remittance.

There will be no foreign chargeable gain on the disposal of the car because her private motor vehicle is not a chargeable asset.[193]

Since para 86(3) relief applies to property "other than money" the

193 The RDR Manual is less clear-cut on the position if there is a sale of the asset:

"36230. Cash only [June 2010]

Under the transitional rules introduced in Finance Act 2008 (refer to RDRM31400 for more information about the transitional provisions), any asset purchased out of untaxed relevant foreign income which an individual owned on 11 March 2008 remains exempt from a charge under the remittance basis, for so long as that individual owns it, even if that asset is outside the UK and is imported at a later date. Any asset in the UK on 5 April 2008 is also exempt from a charge under the remittance basis for so long as the current owner owns it, even if that asset is later exported and then re-imported."

definition of "money" is important. Para 86(5) provides: "money" has the same meaning as in s.809Y ITA; this provides a wide and artificial meaning of "money"; see 12.27.2 ("Money").

If para 86(3) is taken literally, it disapplies the remittance basis for all RFI held in non-"money" form before 12 March 2008! For instance, it would apply to RFI invested in shares.

The possibilities are:

(1) "Property (other than money)" should be taken literally, ie any form of property other than "money" (as defined).
(2) "Property (other than money)" should be taken to refer to chattels (as the drafter of the RDR Manual perhaps assumes).
(3) Since Parliament has failed to express any intention with sufficient clarity, it should be dismissed as meaningless.

None of these solutions are easy:

(1) Solution (1) is far reaching, and it is not likely that it represents the actual intention of the drafter. Of course, the FA 2008 was enacted in such a rush that one can safely say that no-one carefully formulated any intention at all on the extent of para 86.
(2) One might infer from the RDR Manual that HMRC intended para 86(3) to apply to RFI used to purchase chattels; but the Manual was written much later, and there was no clear statement at the time the Act was passed, so that may be an afterthought. It is also inconsistent with the words "other than money". To read the section in that way amounts to legislation and not construction.
(3) This is the course of desperation.

It is considered that solution (1) is to be preferred.

11.39 Transitional loan relief: Pre-2008 loans

Para 90 Sch 7 FA 2008 provides a relief which I call "**transitional loan relief**". Para 90(1) provides:

> This paragraph applies if—
>
> (a) before 12 March 2008, money was lent to an individual outside the UK,
> (b) the loan was made for the purpose of enabling the individual to acquire an interest in residential property in the UK (and for no other purpose), and
> (c) before 6 April 2008—
>
> (i) the money was received in the UK,
> (ii) the individual used the money to acquire an interest in

residential property in the UK ("the interest"), and

(iii) repayment
[A] of the debt for the money ("the debt"), or
[B] of payments made under a guarantee of that repayment ("the guarantee"),[194]
was secured on the interest.

Para 90(2) provides the relief:

> Relevant foreign income of the individual used outside the UK before 6 April 2028 to pay interest on the debt is treated as not remitted to the UK.

The individual does not have to occupy the relevant property.

Thus:

(1) Transitional loan relief is restricted to RFI (and does not apply if employment income or gains are used to pay the interest).
(2) The relief is restricted to loans for residential property; (it does not apply even to loans to pay home improvements or SDLT).
(3) The relief is restricted to secured loans.

Suppose:

(1) H borrowed before 2008 to purchase property.
(2) W used her RFI to pay this interest.

Transitional loan relief does not apply as W is not the individual to whom the money is lent.

The effect of the relief in some cases will be to impose a severe tax

---

194 Para 90(6) Sch 7 FA 2008 defines "guarantee":
"In this paragraph 'guarantee' includes an indemnity, and 'guaranteed' is to be read accordingly."
March 2009 Qs & As provides:
Q20: We would also welcome confirmation that the provisions in paragraph 90(1)(c)(iii) apply to a non-UK loan drawn down before 12 March 2008 where there are two (or more) guarantees in place for repayment of the debt, of which only one is secured on the UK residential property.
A: We can only reply in general terms to this query. The way in which this provision will apply will be determined in practice by the details of the particular loan or guarantee transactions in question. We would generally treat repayments of a debt secured on the property itself as falling within the provisions of paragraph 90 regardless of what guarantees might also exist. Likewise, any repayments made under such a guarantee will also be covered by the paragraph. However, any repayments made under a guarantee which is not secured on the UK property will not be covered.

penalty on a foreign domiciliary who wishes to move house. It also makes re-financing almost[195] impossible as the relief ceases to apply.

11.39.1 *Refinancing before 2008*

Para 90(4) Sch 7 FA 2008 provides:

> If—
>
> (a) before 12 March 2008, money was lent to the individual outside the UK ("the subsequent loan"),
>
> (b) the subsequent loan was made for the purpose of enabling the individual to repay—
>
> (i) the loan mentioned in sub-para (1), or
>
> (ii) another loan in relation to which sub-paras (2) and (3) apply (by virtue of this sub-paragraph),
>
> and for no other purpose, and
>
> (c) before 6 April 2008—
>
> (i) the individual used the money to repay the loan referred to in para (b)(i) or (ii), and
>
> (ii) repayment of the subsequent loan, or of payments made under a guarantee of that repayment, was secured on the interest,
>
> sub-paras (2) and (3) apply in relation to the subsequent loan (and for this purpose references there to the debt or the loan are to be read as references to the subsequent loan).

11.39.2 *What is the loan for?*

March 2009 Qs & As provides:

> **Q19:** It would be helpful to understand more fully the meaning of the requirement in paragraph 90(1)(b) that the loan was made for the purpose of acquiring an interest in residential property "and for no other purpose" and in particular to what extent any other purpose might cause the whole loan to fall outside paragraph 90.
>
> In a situation where money is lent before 12 March 2008 from a non-UK bank to an individual (resident but not domiciled in the UK) outside the UK under a facility letter for £5 million. £4.5 million of the facility is initially drawn down and the money used by the individual to purchase a residential property in the UK. Assume for these purposes that the loan was secured on a UK residential property.

195 It would be possible for the creditor to assign the benefit of the loan, which may allow some scope for refinancing.

Subsequently (and before 12 March 2008) a second tranche of £0.5 million was drawn down under the same loan facility, also outside the UK. The money from the second draw down was used to refurbish the residential property purchased by the first draw down.

A: The effect of paragraph 90(1) is to provide transitional provisions for loans made for the purpose of acquiring an interest in residential property in the UK. In this scenario, there are effectively two separate loans, even though they were made under a single facility letter: it is the drawdown of the money rather than the facility letter which constitutes the lending of the money. Therefore the first £4.5m drawn-down was money lent to the individual before 12 March and used to purchase a UK residential property and for no other purpose and was secured on that interest. That being the case, the transitional conditions will apply if, and to the extent which, relevant foreign income is used to pay interest on the debt.

However, because the second £0.5m tranche of money was used to refurbish the property rather than to acquire an interest in it, it is does not meet the conditions set out paragraph 90(1)(b). Therefore, any relevant foreign income which is used to pay interest on this part of the debt will be treated as a taxable remittance in the UK.[196]

What if a loan meets the conditions in part? It appears that HMRC accept there can be an apportionment. March 2009 Qs & As provides:

Q21: We would welcome guidance on the principles for calculating the interest on that part of the debt which can be paid from relevant foreign income of the individual outside the UK without triggering a taxable remittance (under paragraph 90(2)). We suggest a reasonable approach is to calculate the interest element based on the loan capital ratio (ie that

196 The RDR Manual provides:

RDRM31501 Remittance Basis: Introduction to the Remittance Basis: Transitional Provisions: Relevant foreign income and offshore loans [Jun 2010]

Example 1

Before 11 March 2008 Jennifer draws down £100,000 from a mortgage loan with a non-UK bank that is secured on a residential property in the UK, with interest payments made out of relevant foreign income. On 10 March 2008 she draws down a further amount of £21,000 from this mortgage (still secured on the UK property) to fund some home repairs.

Although the full £121,000 has been lent before 12 March 2008, only £100,000 relates to the acquisition on the interest in the property, so it is only the interest payments in relation to the £100,000 draw-down of the loan that are not treated as a remittance.

part of the loan which meets the paragraph 90 conditions over total capital of the loan facility), and apply that ratio to the total amount of interest due.

A: The approach you suggest is, in broad terms, one which HMRC would consider acceptable, with the obvious caveat that the actual approach in any specific case would depend entirely on the terms of the loans.

11.39.3 *When is the loan made?*

December 2008 Qs & As provides:

> **Q27 Remittance basis - offshore borrowing** If a mortgage was arranged and contracts for the purchase of the relevant property were exchanged in October 2007 but completion was not until March 31 2008 and the mortgage funds were not drawn down until completion, would this be considered to be an existing mortgage as at 12 March 2008?

HMRC refuse to answer the question:

> **A** The conditions for the grandfathering relief to run would only be met if the "lending" took place before 12 March 2008, providing the funds were received in the UK and used to acquire the interest in the property in question before 6 April 2008. The answer depends on the terms and conditions of the mortgage arrangement, which determine the point at which the funds are regarded as "lent".

The answer does not depend on the terms and conditions of the mortgage arrangement. It depends on when the money was lent which the question states was not until completion. Thus transitional loan relief is not available. This is of course extremely unfair: it may be because of the unfairness that HMRC chose not to answer the question. But the same question is asked later in the Qs & As, and receives a straight answer:

> **Q** A UK non-domiciled came to the UK in July 2007. He made an offer to purchase a residential property in the UK in November 2007. The deal became unconditional in February 2008 and entry was agreed for 16 March 2008. He has an offshore mortgage and the loan offer was made prior to 12 March but of course not drawn until 16 March. Does para 90 of Schedule 7 of FA 2008 apply?
>
> **A** The grandfathering provisions for offshore mortgages apply only where the loan was made before 12 March 2008. This means that the money had to be in the hands of the non-domiciled individual (or for

example in the Solicitor's client account) before that date.

11.39.4 *Joint accounts*

March 2009 Qs & As provides:

> **Q22:** We would welcome confirmation that the remittance protection in paragraph 90 applies where a husband and wife (or civil partners), both of whom are resident but not domiciled in the UK, have a joint non-UK bank account and a joint offshore mortgage. The offshore mortgage meets the conditions set out in paragraph 90 (1).
> If only one spouse (or civil partner) has relevant foreign income and that spouse makes a payment into a joint non-UK bank account using that relevant foreign income and these funds are then used to pay the interest on the offshore mortgage, then it is our understanding that such payment of interest will not constitute a remittance of any of the relevant foreign income by virtue of paragraph 90.
> **A:** We are not able to provide the confirmation you are seeking because whether there is a taxable remittance in this situation will depend on the composition of the joint account and the way in which the mixed fund rules section 809Q apply to it. Therefore we can again only answer in general terms.
> Provided the payment of relevant foreign income by one spouse or civil partner into the joint account is the only income within that account (in other words, section 809Q is not in point) which is then used to pay the interest on the mortgage which meets the conditions within paragraph 90(1), then that payment would also fall within paragraph 90.

11.39.5 *Meaning of residential property*

Para 90(5) Sch 7 FA 2008 provides:

> In this paragraph "residential property" has the same meaning as in Part 4 of FA 2003 (see section 116 of that Act).

So we turn to s.116 FA 2003 to find the complex definition:

> (1) In this Part "residential property" means—
>
> (a) a building that is used or suitable for use as a dwelling, or is in the process of being constructed or adapted for such use, and
>
> (b) land that is or forms part of the garden or grounds of a building within para (a) (including any building or structure on such land), or
>
> (c) an interest in or right over land that subsists for the benefit of a building within para (a) or of land within para (b);
>
> and "non-residential property" means any property that is not residential property.

This is subject to the rule in subsection (7) in the case of a transaction involving six or more dwellings.

(2) For the purposes of subsection (1) a building used for any of the following purposes is used as a dwelling—

(a) residential accommodation for school pupils;

(b) residential accommodation for students, other than accommodation falling with subsection (3)(b);

(c) residential accommodation for members of the armed forces;

(d) an institution that is the sole or main residence of at least 90% of its residents and does not fall within any of paras (a) to (f) of subsection (3).

(3) For the purposes of subsection (1) a building used for any of the following purposes is not used as a dwelling—

(a) a home or other institution providing residential accommodation for children;

(b) a hall of residence for students in further or higher education;

(c) a home or other institution providing residential accommodation with personal care for persons in need of personal care by reason of old age, disablement, past or present dependence on alcohol or drugs or past or present mental disorder;

(d) a hospital or hospice;

(e) a prison or similar establishment;

(f) a hotel or inn or similar establishment.

(4) Where a building is used for a purpose specified in subsection (3), no account shall be taken for the purposes of subsection (1)(a) of its suitability for any other use.

(5) Where a building that is not in use is suitable for use for at least one of the purposes specified in subsection (2) and at least one of those specified in subsection (3)—

(a) if there is one such use for which it is most suitable, or if the uses for which it is most suitable are all specified in the same sub-paragraph, no account shall be taken for the purposes of subsection (1)(a) of its suitability for any other use,

(b) otherwise, the building shall be treated for those purposes as suitable for use as a dwelling.

(6) In this section "building" includes part of a building.

(7) Where six or more separate dwellings are the subject of a single transaction involving the transfer of a major interest in, or the grant of a lease over, them, then, for the purposes of this Part as it applies in relation to that transaction, those dwellings are treated as not being residential property.

(8) The Treasury may by order—

(a) amend subsections (2) and (3) so as to change or clarify the cases where use of a building is, or is not to be, use of a building as a dwelling for the purposes of subsection (1);

(b) amend or repeal subsection (7) and the reference to that subsection in subsection (1).

Any such order may contain such incidental, supplementary, consequential or

transitional provision as appears to the Treasury to be necessary or expedient.

11.39.6 *Withdrawal of relief*

Para 90(3) Sch 7 FA 2008 provides:

> If, at any time on or after 12 March 2008—
>
> (a) any term upon which the loan was made, or any term of the guarantee, is varied or waived,
>
> (b) repayment of the debt, or of payments made under the guarantee, ceases to be secured on the interest,
>
> (c) repayment of any other debt is secured on the interest or is guaranteed by the guarantee, or
>
> (d) the interest ceases to be owned by the individual,
>
> sub-para (2) does not apply in relation to relevant foreign income used as mentioned there after that time.

I am unable to see the point of conditions (b) and (c).

FAQ Remittances (April 2008) stated that the relief only applies so long as "no further advances are made on or after 12 March". This is not correct, but if any further advances are made care must be taken with the documentation to ensure that there is a new loan (not a variation of an existing one) and the debt is not secured on the individual's interest in the property.

The RDR Manual provides:

> **RDRM31502 Transitional Provisions: RFI and offshore loans - Example 2** [Jun 2010] (Charles)
>
> C is a UK resident remittance basis user and has lived in the UK for several years. He has an existing mortgage that was taken out in 2005 with a non-UK bank that is secured on a house in the UK in which C, his wife and children all live. C pays interest on the loan out of his untaxed relevant foreign income.
>
> The existing mortgage facility includes an open credit facility that allows C to borrow (draw-down) additional funds. On 15 March 2008 C uses the credit facility to borrow a further amount of £100,000 that he intends to use to buy an additional interest in his residential property. The terms and conditions of the original loan facility apply to the further draw-down.
>
> The draw down of additional funds after 12 March 2008 represents a further advance of the mortgage under the original terms, so it is not regarded as 'another debt' secured on the property. It is a 'relevant debt' for the purposes of s809L.

> **RDRM31510 Transitional Provisions: Loans in existence before 12 March 2008 - Grandfathering no longer applicable** [Jun 2010]
> ...
> **Example 1** (Judith)
> J is a UK resident, non-domiciled remittance basis user who has an offshore mortgage from an overseas lender that was in place before 12 March 2008 on which she pays interest out of her relevant foreign income.
> Under the terms of her loan agreement interest on the loan is at a fixed rate for two years at the end of which J will automatically transfer to the lenders standard variable rate for the remaining ten year period of the loan agreement.
> The ending of the fixed-rate period and the automatic transfer to the variable rate is not regarded as amending or otherwise varying the loan facility, so the 'grandfathering' provision at FA08/para 90 applies to the loan.

In practice in the usual case the move to a floating rate will happen automatically, and the relief will continue to apply.

> **Example 2 (Jane)**
> J is a remittance basis user who has an offshore mortgage on her UK residential property from an overseas lender that was in place before 12 March 2008. She pays the interest on this loan using her relevant foreign income from her Jersey bank account.
> Under the terms of her loan agreement the loan is a two-year fixed interest loan. In May 2009, at the end of the two year period, J agrees a new loan with the same bank, for a further period of two years. The new loan has the same terms as her previous loan agreement.
> This is a new loan that is not covered by the grandfathering provisions at FA08/para 90. The new loan is a 'relevant debt'; any payments of interest (or capital) that are made from the Jersey account are a taxable remittance.

11.39.7 *Transitional loan relief: Commentary*

No reasons were ever given for the strikingly restricted features of transitional loan relief, so one is left to speculate. If the purpose of the relief is to assist those who have taken out loans on the assumption that the law which existed from 1956 to 2008 would govern the taxation of the interest, and who may now be unable to pay the interest, each of these restrictions are irrational. I surmise that the object was specifically to

bolster the residential property market by preventing forced sales by foreign domiciliaries who are made unable to repay their mortgages: if so only the restriction of relief to RFI is irrational.[197]

Why the restriction to residential property? The reason may be that loans to acquire let property had a benevolent treatment under the pre-2008 remittance basis: the interest could be paid out of foreign income without a remittance, but the interest was deductible against the rent for the purpose of computing the profits of the UK property business. Similar points apply to other cases where interest is deductible. But if that is the aim then it is achieved in a very rough and ready manner. Those who borrowed to buy a house and improve it are particularly unfairly treated.

Perhaps the matter was not thought out at all and the only thinking was to provide the smallest possible transitional relief consistent with appeasing the banking lobby. Perhaps it was to give the appearance of a transitional relief without much substantial relief. In the absence of any reasons being provided by HMRC, all the above can only be speculation.

11.40 Remittance basis planning points

11.40.1 *Planning to avoid mixed funds (segregation of funds)*

The best way to avoid any question of a remittance basis liability is to keep funds which are charged at different rates on remittance separate from each other.

The starting point is to segregate clean capital and other funds. Clean capital may consist of:

(1) Funds held before arrival in the UK.
(2) Gifts[198] and inheritance.
(3) Capital distributions from trusts (if not within the many IT and CGT anti-avoidance provisions which normally requires some care).
(4) UK source income and gains (and, for taxpayers who do not claim the remittance basis every year, foreign income and gains for a year in which no remittance basis claim is made).

If funds are large enough, may be worth segregating:

(1) Income taxable on remittance:

---

197 It was probably based on the erroneous belief that under the pre-2008 rules, employment income or gains used to pay interest were regarded as remitted.

198 Unless the donor is a remittance basis taxpayer making a gift of income/gains to a relevant person.

(a) at the top rate
(b) at the top dividend rate
(c) at a lower rate (because of DTR).

(2) Chargeable gains taxable on remittance:
(a) at the full CGT rate
(b) at a lower CGT rate (because of DTR)

(3) Clean capital

Funds can then be remitted from accounts with a lower or nil rate of tax. Income taxable at the top rate can be used abroad or reinvested.

How does one segregate funds?

An easy course is to keep clean capital in a bank account and pay the income into a separate account. The bank account may be in any currency as currency bank account gains are not taxed.

What if the individual does wants to invest in a wider class of assets? Possible solutions are:

(1) Borrowing charged on a clean capital account.

(2) Life insurance policy[199] purchased out of clean capital. The individual may surrender up to 5% of the policy tax free, and that amount is derived from the clean capital, and can be remitted tax free. The growth in the policy reflects the underlying investments but the gains on those investments do not form a mixed fund. The ultimate surrender of the policy is taxable, but if it might be possible to arrange that a time when the policyholder is not UK resident (and not temporarily non-resident).

11.40.2 *Planning when mixed fund exists*

Suppose T already has a substantial mixed fund holding income and gains. Some planning is still possible. T should begin segregating income from the fund, allowing capital gains to accrue within the fund. Subsequent remittances are regarded as taken from those gains first before the income. If the gains are sufficient to exceed the remittances, this will reduce the rate of charge on remittance to CGT rates, as gains of subsequent years are treated as remitted before income of earlier years.

11.41 Reform?

HMRC have rejected calls for simplification and reform:

---

199 But not a personal portfolio bond.

> The Government will not look further at the following:
> *Simplification* Definition of a remittance and the derivation rules
> *Government response* The Government recognises that the definition of a taxable remittance is widely defined but believes any change to narrow the rules would open up opportunities for abuse and an unacceptable risk to the Exchequer.[200]

Chapter **Page**

CHAPTER TWELVE

REMITTANCE RELIEFS

12.1 Remittance reliefs: Introduction

This chapter considers 9 reliefs which allow sums to be received in the UK without a taxable remittance:

(1) Investment relief
(2) Reliefs for payment of tax:
    (a) remittance basis charge
    (b) payment on account
(3) Foreign services relief
(4) Exempt property:
    (a) public access
    (b) personal use
    (c) small remittances exemption
    (d) temporary importation
    (e) the repair rule

12.2 Remittance investment relief

The ITA remittance basis in its original 2008 form (more or less) prevented remittance basis taxpayers from investing in the UK, either directly or indirectly through trusts and companies.

Sections 809VA – 809VO ITA, introduced by the coalition government in 2012, provide a relief. The statutory heading is "business investment relief"; I call it **"remittance investment relief"** or just "investment relief".

The development of the relief can be traced through a consultation paper[1]

---

1 HMRC, *Reform of the taxation of non-domiciled individuals: a consultation* (June 2011) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf*

and a consultation response paper[2] (**"the consultation response document"**). But these are now of mainly historic interest.

HMRC comment on EU law:

> 2.90 The Government is satisfied that the draft legislation to be published in Finance Bill 2012 is compatible with EU law and the State Aid rules.[3]

The relief is not discussed in the RDR Manual, but there is some basic guidance.[4]

12.3 Relevant event

Section 809VA(1) ITA sets out three conditions for relief. The first is in para (a):

> (1) Subsection (2) [remittance investment relief] applies if–
> (a) a relevant event occurs,

The term "relevant event" is not a particularly helpful label but it is convenient to follow the statutory usage.

There are two types of relevant event.

12.3.1 *Relevant event: Investment*

Section 809VA(3) ITA provides:

> A "relevant event" occurs if money or other property–
> (a) is used by a relevant person to make a qualifying investment[5]

12.3.2 *Relevant event: Remittance for purpose of investment*

Section 809VA(3) ITA provides:

> A "relevant event" occurs if money or other property...
> (b) is brought to or received in the UK in order to be used by a

4 HMRC Guidance Note: Changes to the Remittance Basis (May 2012) *www.hmrc.gov.uk/cnr/guide-remit.pdf*

5 See 12.9 ("Qualifying investments").

relevant person to make a qualifying investment.

Section 809VA ITA imposes a time limit on the period between bringing the money to the UK and making the investment:

> (5) Subsection (2) [remittance investment relief] applies by virtue of subsection (3)(b) to the extent only that the investment is made within the period of 45 days beginning with the day on which the money or other property is brought to or received in the UK.
> (6) Where some but not all of the money or other property is used to make the investment within that 45-day period, the part of the income or gains to which subsection (2) applies is to be determined on a just and reasonable basis.

12.4 Remittance of income/gains by virtue of relevant event

Section 809VA(1) ITA sets out three conditions for relief. The second is in para (b) but this must be read with para (a) to follow the sense:

> (1) Subsection (2) [remittance investment relief] applies if–
> (a) a relevant event occurs,
> (b) but for subsection (2), income or chargeable gains of an individual would be regarded as remitted to the UK by virtue of that event...

12.4.1 *"Income or chargeable gains of an individual"*

HMRC say:

> 2.86 The Government confirms that relief will apply to a qualifying investment using overseas income and gains that arose in any year in which the non-domiciled individual claimed the remittance basis, regardless of their basis of taxation in the year the qualifying investment is made.[6]

The relief applies to income treated as arising to an individual under s.624, or s.720, or gains treated as accruing under s.13, even though the income or gains actually arise to a non-resident trust or company and are invested (and so remitted) by the trust or the company. This was deliberate. HMRC say:

---

6 Consultation Response Document *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

> 2.34 It is common for non-domiciles to hold money in offshore trusts but the tax treatment of remittances currently deters some offshore trusts and companies from investing in the UK. For this reason, it is not proposed to limit the new tax incentive to investments made directly by the individual. There will be no restriction on individuals remitting overseas income or capital gains which are held in investment vehicles or trusts. This will allow non-domiciles to invest in UK businesses using funds held in offshore companies and trusts without attracting a tax charge on the remittance.[7]

Suppose:

(1) an individual receives a benefit chargeable under the s.87 remittance basis or the s.731 remittance basis and

(2) the individual uses the benefit to make a qualifying investment.

Investment relief applies, as the income or gains invested are the income or gains of the individual.

Similarly, investment relief applies if:

(1) an individual receives a benefit chargeable under the s.731 remittance basis and

(2) the person abroad uses matched relevant income to make a qualifying investment.

It is not a requirement that the income used to make the investment is the income of the individual: just that income of the individual would be regarded as remitted by virtue of the relevant event.

However in these cases, consideration must be given as to whether the benefit is a related benefit.

Section 809VA(4) ITA deals with the interaction with exempt property:

> Subsection (1)(b) includes a case where income or gains would be treated under section 809Y as remitted to the UK by virtue of the relevant event.

Could that ever happen?

12.4.2 *Regarded as remitted to the UK "by virtue of" the relevant event*

The requirements for relief in s.809VA(2) are:

(1) a relevant event

---

7 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible *www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.*

(2) income/gains remitted to the UK and
(3) the remittance is "by virtue of" the relevant event.
Suppose:
(1) T lends to a company or subscribes for shares in a company.
(2) The company uses the funds to purchase a property in the UK.
Step (1) is a relevant event. If it is also a remittance to the UK, the position is straightforward: the relief applies.

Suppose step (1) is not a remittance to the UK (in short, because the company receives the funds outside the UK). There is a taxable remittance at step (2) when the company brings the funds to the UK.[8] However the company does not make a qualifying investment so step (2) is not a relevant event. But it is considered that the remittance is "by virtue of" the relevant event at step (1), so the relief applies. HMRC agree. HMRC remittance investment relief guidance provides:

> 2.28 ... It is possible for a qualifying investment to be made in a close company which is itself a relevant person. In such cases, where the company subsequently uses the invested funds in the UK, such as to purchase stock or to pay employees, the foreign income and gains will not be treated as a taxable remittance, provided they are not used in a way which would itself be a potentially chargeable event.

Suppose:
(1) T borrows to make a qualifying investment. This is a relevant event but no income/gains are remitted to the UK.
(2) T uses income/gains to repay the loan. This is a remittance of the income/gains.

HMRC accept that the relief applies. The CIOT say:

> HMRC have confirmed that using foreign income and/or gains to repay loans where those loans, in turn, funded investments made after 6 April 2012, would in principle qualify for the business investment relief.
> Concerns had been expressed on this point because s809VA(1)(b) gives relief only where (in the absence of the relief) income or chargeable gains would be regarded as remitted by virtue of the investment. Where borrowed monies are used to make the investment, it is not the investment which (in the absence of the relief) triggers the remittance; rather it is the subsequent repayment of that borrowing which triggers the remittance.

8 Assume the company is a relevant person (as a close company would be).

> However, HMRC have confirmed that they take a wide view of the meaning of 'by virtue of' in this context and there is nothing in s809VA which requires that the remittance which would otherwise have occurred should take place in the same year as the relevant event to which it relates. It therefore follows that the remittance and claim can be in a year or years after the relevant event.
> For non-doms wishing to invest in this way, there is therefore scope – through borrowing – to fund that investment through future offshore income/gains.
> Claims should be made in the year(s) that the loan is repaid rather than the year the investment is made and careful records will obviously need to be kept for these purposes.[9]

It would have been better if the statutory expression was "in connection with" the relevant event, not "by virtue of" the relevant event. But a generous construction, together with the flexibility inherent in a causation test, has brought us to the same destination.

12.5 Claims

The third condition for the relief is in s.809VA(1)(c) ITA which provides:

> Subsection (2) [remittance investment relief] applies if ...
> (c) the individual makes a claim for relief under this section.

Section 809VA(8) ITA provides:

> A claim for relief under this section must be made on or before the first anniversary of the 31 January following the tax year in which the income or gains would, but for subsection (2) [remittance investment relief], be regarded as remitted to the UK by virtue of the relevant event.

The claim is made in the tax return. The sidenote to box 37 SA109 (2013/14) reads:

> If you are claiming relief from UK tax for foreign income or gains invested in a qualifying business, enter the total amount invested and the Company Registration Number(s) below

12.6 The relief

Assuming the three conditions in s.809VA(1) are satisfied, we can turn to

---

9 Press release 15 August 2012 [2012] STI 2563 accessible *www.tax.org.uk/media_centre/LatestNews-migrated/BIR_Non-dom-loans*

the relief, which is in s.809VA(2) ITA; but to follow that one needs to read subsections (1) and (2) together:

> (1) Subsection (2) [remittance investment relief] applies if–
> (a) a relevant event occurs,
> (b) but for subsection (2), income or chargeable gains of an individual would be regarded as remitted to the UK by virtue of that event, and
> (c) the individual makes a claim for relief under this section.
> (2) The income or gains are to be treated as not remitted to the UK.

12.7 Avoidance purpose

Section 809VA(7) ITA provides:

> Subsection (2) [remittance investment relief] does not apply if the relevant event occurs, or the investment is made, as part of or as a result of a scheme or arrangement the main purpose or one of the main purposes of which is the avoidance of tax.

Section 989 ITA provides:

> The following definitions apply for the purposes of the Income Tax Acts
> ...
> "tax", if neither income tax nor corporation tax is specified, means either of those taxes.

So it does not matter if one of the purposes of the arrangement is IHT avoidance or CGT avoidance: only IT (or CT) avoidance counts.

The concepts of avoidance and purpose are the same as in the ToA motive defence; see 32.1 (Motive defence).

The HMRC consultation paper provided:

> 2.53 ... there will be provisions to prevent non-domiciles buying a pre-existing business from themselves by selling it to a new company funded by income remitted from overseas. This would create no new business investment in the UK and would merely transfer legal ownership whilst the individual continues to own the business.[10]

10 HMRC, *Reform of the taxation of non-domiciled individuals: a consultation* (June 2011) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf*

There are no express provisions to this effect, but the arrangement may constitute avoidance and so the relief would be disallowed.

The CIOT lobbied for repeal of this rule:

> That test is a potential deterrent as nobody can say with certainty what kind of transaction a particular officer of HMRC, or an individual judge, will view as avoidance. ...We would urge removal of section 809VA(7), particularly now that the GAAR has been enacted.[11]

But no-one took any notice of that.

12.8 Investment fails to proceed

A person may bring funds to the UK intending to make an investment which fails to proceed. Then there is no relief under s.809VA(2) as there is no relevant event, but s.809VB provides relief:

> (1) This section applies to any portion of the income or gains to which section 809VA(2) [remittance investment relief] does not apply because the investment was not made within the period mentioned in section 809VA(5) ("the 45-day period").
> (2) That portion is to be treated as not remitted to the UK to the extent that the remaining money or other property is taken offshore within the 45-day period.
> (3) Where some but not all of the remaining money or other property is taken offshore within the 45-day period, the part of the income or gains to which subsection (2) applies is to be determined on a just and reasonable basis.
> (4) If any remaining money or other property is taken offshore within the 45-day period, nothing in subsection (2) prevents anything subsequently done in relation to it (or anything deriving from it) from counting as a remittance of the underlying income or gains to the UK at the time when the thing is subsequently done.
> (5) A reference to the "remaining" money or other property is to so much of the money or other property brought to or received in the UK as is not used within the 45-day period to make the investment (which may in some cases be all of it).

---

11 Business Investment Relief: CIOT comments (September 2013) accessible *http://www.tax.org.uk/Resources/CIOT/Documents/2013/09/130918%20Business%20Investment%20Relief%20-%20CIOT%20comments.pdf*

12.9 "Qualifying investments"

This is a key term used throughout the remittance investment relief provisions; in particular, a relevant event requires a qualifying investment. Section 809Z10 ITA provides:

> In this Chapter ... "qualifying investment" has the meaning given by section 809VC (and references to making a qualifying investment are to be read in accordance with that section)

So we turn to s.809VC.

12.9.1 *"Investment"*

"Investment" has an artificial meaning. Section 809VC(1) ITA provides:

> (1) For the purposes of section 809VA, a person makes an investment if–
> (a) shares[12] in a company are issued to the person, or
> (b) the person makes a loan (secured or unsecured) to a company.

This definition only applies for the purposes of s.809VA but it is incorporated by reference in s.809VD(4) ITA.

The purchase of shares from a third party does not amount to an investment: there must be a share subscription.

At present, only corporate investments count as "investment". HMRC say:

> 2.43 The Government is not yet convinced of the case for including partnerships within the relief. It remains concerned that extending the relief in this way could lead to large scale avoidance unless complex anti-avoidance legislation was introduced. The legislation which will take effect from 6 April 2012 will not allow investment in partnerships.
> 2.44 However, in view of the strength of support for extending the relief to investments in partnerships and the increased investment that this might encourage, the Government will consider this issue further to evaluate whether there is any scope for widening the relief to include investment in partnerships in Finance Bill 2013. The Government will not consider extending the relief to sole traders.[13]

---

12 Section 809VC(6) ITA provides: "A reference in this section to "shares" includes any securities."

13 Consultation Response Document *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

But the idea of extending relief to partnerships seems to have been dropped.

Section 809VC ITA provides some terminology:

> (2) The company is referred to as "the target company".
> (3) The shares or the person's rights under the loan (or both) forming the subject of the investment are referred to as "the holding"...

Section 809VC ITA deals with timing:

> (7) If a loan agreement authorises a company to draw down amounts of a loan over a period of time—
>
> (a) entry into the agreement does not count for the purposes of this section as the making of a loan, but
>
> (b) a separate loan is to be treated as made each time an amount is drawn down under the agreement.
>
> (8) Accordingly—
>
> (a) a separate investment is treated as made each time an amount is drawn down under the agreement, and
>
> (b) the reference in subsection (3) to the person's rights under the loan applies only to so much of the person's rights as relate to the drawdown of that particular amount.

12.9.2 *"Qualifying" investment*

Section 809VC(4) ITA provides:

> The investment counts as a "qualifying investment" if conditions A and B are met when the investment is made.

I refer below to **"investment conditions A and B"**.

12.10 Investment condition A (trading company/group)

Section 809VD(1) ITA provides:

> Condition A is that the target company is–
>
> (a) an eligible trading company,
>
> (b) an eligible stakeholder company, or
>
> (c) an eligible holding company.

12.10.1 *Eligible trading company*

Section 809VD(2) ITA provides:

> A company is an "eligible trading company" if–
>
> (a) it is a private limited company,

(b) it carries on one or more commercial trades or is preparing to do so within the next 2 years, and
(c) carrying on commercial trades is all or substantially all of what it does (or of what it is reasonably expected to do once it begins trading).

HMRC comment on condition (c):

> 2.21 The Government will require all, or substantially all, of the company's activities to be qualifying activities. Investments will therefore be eligible for the relief provided any non-qualifying activities do not form a substantial part of the company's total business activities. For these purposes this will mean that the non-qualifying activities constitute no more than 20% of the company's business activities. For companies that have yet to start trading at the time the investment is made, the relief will be available where it is reasonable to expect that non-qualifying activities will not be substantial. For most companies, determining whether non-qualifying activity breaches this condition will be based on the company's turnover but this may not be applicable in all cases.[14]

12.10.2 *Eligible stakeholder company*

Section 809VD(3) ITA provides:

> A company is an "eligible stakeholder company" if–
> (a) it is a private limited company,
> (b) it exists wholly for the purpose of making investments[15] in eligible trading companies (ignoring any minor or incidental purposes), and
> (c) it holds one or more such investments or is preparing to do so within the next 2 years.

12.10.3 *Eligible holding company*

Section 809VD ITA provides:

---

14 Consultation Response Document. *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*
The paragraph added: "HMRC will provide guidance on how total business activity should be measured." But no guidance was produced.

15 Section 809VD(4) ITA provides: "The reference in subsection (3) to making investments is to be read in accordance with section 809VC." See 12.9.1 ("Investment").

(5) A company is an "eligible holding company" if—
(a) it is a member of an eligible trading group or of an eligible group that is reasonably expected to become an eligible trading group within the next 2 years,
(b) an eligible trading company in the group is a 51% subsidiary of it, and
(c) if the ordinary share capital that it owns in the eligible trading company is owned indirectly, each intermediary in the series is also a member of the group.
(6) "Group" means a parent company and its 51% subsidiaries.
(7) "Parent company" means a company that—
(a) has one or more 51% subsidiaries, but
(b) is not itself a 51% subsidiary of any company.
(8) A group is an "eligible group" if the parent company and each of its 51% subsidiaries are private limited companies.
(9) A group is an "eligible trading group" if—
(a) it is an eligible group, and
(b) carrying on commercial trades is all or substantially all of what the group does (taking the activities of its members as a whole).
(10) The reference in subsection (5) to owning ordinary share capital indirectly is to be read in accordance with section 1155 of CTA 2010.

A group may consist of resident and non-resident companies.[16]

12.10.4 *Private limited company*

Section 809VD(11) ITA provides:

A company is a "private limited company" if–
(a) it is a body corporate whose liability is limited,
(b) it is not a limited liability partnership, and
(c) none of its shares are listed on a recognised stock exchange.

The company need not be UK resident. This is deliberate. HMRC say:

2.38 The Government wants to ensure that non-domiciles can invest in a range of companies, including those incorporated in other countries, and believes this will broaden the positive economic impact of this incentive. Therefore, it does not propose to restrict tax relief to investment in businesses that are resident in the UK or to businesses carrying out trades wholly or mainly in the UK. Relief will be extended

16 Groups for CGT group relief are different: see 53.28 (Group relief).

> to overseas income and capital gains remitted to invest in non-UK resident companies....
> 2.41 The Government does not propose to introduce any other restrictions on the type of holding company that can qualify or the degree of ownership the company has over its subsidiary companies. This means that companies that hold shares in other companies and are resident outside the UK would be included. It also means that private equity companies and venture capital companies could qualify even where they do not have a majority ownership stake in the invested companies....
> 2.52 The Government agrees that restricting investment to non-UK resident companies with a UK PE is not necessary and has decided not to include this restriction.[17]

The company may be a foreign entity. This was deliberate. HMRC say:

> 2.45 Investment in a foreign entity will be eligible for relief where it is a private limited company and the other conditions on qualifying activities are met.

12.10.5 *"Trade"*

Section 809VE ITA provides an extended definition of trade, to allow property investment:

> (1) Section 809VD is to be read in accordance with this section.
> (2) A reference to a "trade" also includes—
> (a) anything that is treated for corporation tax purposes as if it were a trade, and
> (b) a business carried on for generating income from land (as defined in section 207 of CTA 2009).

HMRC said:

> 2.33 Businesses undertaking furnished holiday lettings (FHLs) will not be qualifying businesses for the purposes of the relief. Although FHLs are treated as a trade for certain purposes, they are not taxed as such and will therefore not meet the qualifying conditions.[18]

---

17 Consultation Response Document *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

18 Consultation Response Document *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

This is not carried through in the legislation since FHL is a property business. Presumably there was a change of mind.

The residence consultation paper explains:

> **UK businesses**
> 2.38 ... Relief will be extended to overseas income and capital gains remitted to invest in non-UK resident companies ....
> 2.39 While this approach would allow investments to be used for trades outside the UK, non-domiciled investors can already invest in such trades without remitting income or capital gains into the UK. It is therefore likely that in the vast majority of cases, non-domiciles will use do without incurring a tax charge....[19]

12.10.6 *"Commercial" trade*

Section 809VE(3) ITA provides:

> A trade is a "commercial trade" if it is conducted on a commercial basis and with a view to the realisation of profits.

Since this only applies for the purposes of s.809VD, the definition has to be incorporated by reference in Section 809VH ITA.

This is a requirement which comes up in loss relief and in many other areas of taxation. The BI Manual comments on s.66 ITA which imposes a similar requirement in the context of loss relief:

> **BIM85705 – Trade losses – restriction of relief: uncommercial trades – not on a commercial basis** [December 2013]
> The object of S66 ITA 2007 is to deny relief for losses arising from activities which can be seen clearly to lack commercial inspiration. The Chancellor of the Exchequer, at the time the original legislation was enacted, stated in the course of a Parliamentary debate:
>
> > 'We are after the extreme cases in which expenditure very greatly exceeds income or any possible income which can ever be made in which, however long the period, no degree of profitability can ever be reached.'
>
> The restriction applies to trades, professions and vocations but does not apply to losses made in the exercise of functions conferred by or under an Act.

---

19 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible *www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.*

The test in S66(2) ITA 2007, whether the trade is commercial, is two legged: the trade must be carried on throughout the basis period for the tax year:

a. on a commercial basis, and
b. with a view to the realisation of profit.

So before considering the test in S66(2) ITA 2007, you must be satisfied that a trade is carried on. Statute provides little guidance on what amounts to a trade. The overall conclusion from case law is that this is a question of fact. You should always examine critically claims that a trade exists where the claim may have been made to get relief that is only available to businesses. Guidance on trades is at BIM20070-BIM20075.

Commercial basis

The first part of the test, that of carrying on the trade on a commercial basis, was considered satisfied in the past if the activities that were carried on amounted to a trade. The basis for this was judicial comments like that of the Lord President in The British Legion, Peterhead Branch, Remembrance and Welcome Home Fund v CIR (35 TC 509):

In my view, a person cannot be said to be engaged in carrying on a trade or a concern in the nature of trade within the meaning of the Income Tax Acts unless, in a reasonable sense, he is conducting business on commercial principles.' (514)

But following the High Court decision in Wannell v Rothwell [1996] 68 TC 719 we now accept that in very unusual cases the activities may constitute a trade even though they are uncommercial.

The meaning of commercial basis was expanded by Robert Walker J in Wannell v Rothwell where he states at page 733B-D:

> `I was not shown any authority in which the Court has considered the expression "on a commercial basis", but it was suggested that the best guide is to view "commercial" as the antithesis of"uncommercial", and I do find that a useful approach. A trade may be conducted in an uncommercial way either because the terms of the trade are uncommercial (for instance, the hobby market-gardening enterprise where the prices of fruit and vegetables do not realistically reflect the overheads and variable cost of the enterprise) or because the way in which the trade is conducted is uncommercial in other respects (for instance, the hobby Art Gallery or Antique Shop where the opening hours are unpredictable and depend simply on the owner's convenience). The distinction is between a serious trader who, whatever his shortcomings in skill, experience or capital, is seriously interested in profit, and the amateur or dilettante. There may well be many borderline cases for

the Commissioners to decide, and such borderline cases could as well occur in Bond Street as at a car boot sale.'

'Commercial' is not the same as'profitable'. We take it to mean, conducted in the way that we would expect a business of the same type to be carried on. A distinction may also be drawn between individual transactions and the trade itself; individual transactions may have the character of commerciality but overall the way in which the trade is conducted may lack commerciality. Indeed, even where the trader is serious about what he does but does not act in the way someone in that type of trade would act, we take the view that the trade is not being conducted on a commercial basis. See BIM85715 where the way in which the trade is carried on changes during the basis period for the tax year. Fact-finding is vital in exploring whether the trade is carried on on a commercial basis. One important question to be addressed is whether there are any non-commercial reasons for becoming involved in a particular business, for example, has the trader a general interest in sailing which might explain the venture into yacht chartering…

View to the realisation of profits

Consideration of other, non-commercial, reasons is also important when examining the second leg to the test in S66(2) ITA 2007. See BIM85710 for guidance on the second leg to this test.

BIM75710 - Computing the amount to assess: trade losses - restriction of relief: trade losses - uncommercial trades - not with a view to the realisation of profit [December 2013]

The second leg of the test in ITA07/S66(2), with a view to the realisation of profits, is expanded in S66(3): if at any time a trade is carried on so as to afford a reasonable expectation of profit, it is carried on at that time with a view to the realisation of profits.

'With a view to' was considered, in the EBT case *Macdonald (HMIT) v Dextra Accessories Limited & others* TCL 3759, to embrace a range of realistic possibilities, indicating that the view must be a reasonable one.

The criterion of the expectation of profit does not specify any period within which the trade must be expected to realise a profit and it is sufficient there is some realistic possibility of profit being earned at some future date, however distant. The fact that it is distant is not a ground for refusing relief. 'Profit' in this context is the commercial profit in the accounts, not the tax adjusted profit; that is, the profit before capital allowances but after depreciation and interest.

There are 2 possible ways to displace the trader's assertion of expectation of profits: if it is not a reasonable expectation, or there is another reason for carrying on the trade.

It is not a reasonable expectation

You may be able to show that there is no possibility of profit ever regardless of however long the trade is carried on, so the expectation of profit is unfounded, by closely examining any business plan, profits projection or whatever is provided as the basis for the trader's expectations of profit. You are justified in pointing to past results when considering whether the trader's expectation of profit is reasonable. Where there has been a change in the way the trade is carried on, see BIM85715.

There is another reason for carrying on the trade

A trader who makes losses with no realistic possibility of making a profit may have some other reason for carrying on the trade. For example, it may be that the trade is a hobby (which in itself may fall foul of the commercial basis part of the test see BIM85705) or gives the trader personal enjoyment. It may also be the case that the trader is simply seeking to offset personal expenditure or to increase the value of a capital asset.

In the Special Commissioners' case of *Delian Enterprises v Ellis* [1999] SpC186 the Revenue was unable to prove that the trader was carrying on a hobby. This was specifically mentioned by the Special Commissioner as a factor in his decision. In another Special Commissioners' case *Brown v Richardson* [1997] SpC129 and TB31F the expressed intentions of the trader were not found to be conclusive. In this case the Special Commissioner found that the income generated was intended to offset expenditure rather than with a view to the realisation of profits.

12.10.7 *Research and development*

Section 809VE ITA provides:

> (4) The carrying on of activities of research and development from which it is intended that a commercial trade will be derived, or will benefit, is to be treated as the carrying on of a commercial trade.
>
> (5) But preparing to carry on activities within subsection (4) is not to be treated as the carrying on of a commercial trade.

12.11 Investment condition B (no benefit)

Section 809VF(1) ITA provides:

> Condition B is that
>
> [a] no relevant person has (directly or indirectly) obtained or become entitled to obtain any related benefit, and
>
> [b] no relevant person expects to obtain any such benefit.

Remittance investment relief has two no-benefit rules:

(1) Investment condition B applies if there is a benefit or expected benefit at the time of the investment.

(2) The extraction of value rule applies if there is a benefit later.[20]

Investment condition B is severe in that any benefit disallows relief on the entire investment.

The no-benefit rule applies even if the benefit is received outside the UK, which is illogical in the context of the remittance basis.

12.11.1 *Benefit*

"Benefit" is not usually defined, but that did not deter the drafter. Section 809VF(2)(a) ITA provides:

> A "benefit"–
>
> (a) includes the provision of anything that would not be provided to the relevant person in the ordinary course of business, or would be provided but on less favourable terms, ...

Section 809VF(2)(b) ITA provides an exclusion

> A "benefit" ...
>
> (b) does not include the provision of anything provided to the relevant person in the ordinary course of business and on arm's length terms.

This is otiose but does no harm.

12.11.2 *"Provision"*

"Provision" is never defined, but that did not deter the drafter. Section 809VF(4) ITA provides:

> For the purposes of subsection (2)–
>
> (a) a reference to the provision of anything is to the provision of anything in money or money's worth, including property, capital, goods or services of any kind, and
>
> (b) "provision" includes any arrangement that allows a person to enjoy or benefit from the thing in question (whether temporarily or permanently).

This is otiose though it does no harm. But one hopes this will not enter

---

20 See 12.14 (Extraction of value rule).

the handbook of the office of parliamentary counsel, and so become standard practice, like the standard (but unnecessary) definition of arrangement.

12.11.3 *"Related" benefit*

Section 809VF(3) ITA provides a wide meaning of "related":

> A benefit is "related" if–
>
> (a) it is directly or indirectly attributable to the making of the investment (whether it is obtained before or after the investment is made), or
>
> (b) it is reasonable to assume that the benefit would not be available in the absence of the investment.

12.12 Clawback remittance charge

Section 809VG ITA provides:

> (1) Subsection (2) applies if–
>
> (a) income or chargeable gains are treated under section 809VA(2) as not remitted to the UK as a result of a qualifying investment,
>
> (b) a potentially chargeable event occurs after the investment is made, and
>
> (c) the appropriate mitigation steps are not taken within the grace period allowed for each step.[21]
>
> (2) The affected income or gains are to be treated as having been remitted to the UK immediately after the end of the relevant grace period.

I refer to this as **"the clawback remittance charge"**.

12.12.1 *"Relevant grace period"*

The "grace period" is the deadline for taking the appropriate mitigation steps. As there are various possible grace periods, statute uses the term "relevant grace period" to fix the date on which the clawback remittance charge arises.

Section 809VG ITA provides:

> (3) Where the step required by section 809VI(2)(a) is not taken within the grace period allowed for that step, "the relevant grace period" is the

21 See 12.18 (The grace period).

grace period allowed for that step.
(4) Otherwise, "the relevant grace period" is the grace period allowed for the step required by section 809VI(1) or (2)(b).

12.12.2 *"Affected income or gains"*

"Affected income or gains" matters as these are the income/gains which are treated as remitted under the clawback remittance charge.

Section 809VG ITA provides:

> (5) "The affected income or gains" means such portion of the income or gains mentioned in subsection (1)(a) as reflects the portion of the investment affected by the potentially chargeable event.
> (6) The portion of the investment affected is—
> (a) if the potentially chargeable event is a disposal of a part of the holding (or a part of the remaining holding), a portion equal to the portion of the holding (or remaining holding) being disposed of, and
> (b) otherwise, the whole of the investment.

12.12.3 *Investment partly out of UK funds and partly out of offshore funds*

Section 809VG ITA provides:

> (8) If a qualifying investment is made using the money or other property mentioned in section 809VA(3) together with other funds ...

What is the property "mentioned in s.809VA(3)"? That provides:

> (3) A "relevant event" occurs if money or other property—
> (a) is used by a relevant person to make a qualifying investment, or
> (b) is brought to or received in the UK in order to be used by a relevant person to make a qualifying investment.

I assume s.809VG(8) applies if an investment is made partly out of UK funds and partly out of offshore funds, though that is not what the words actually say.

Assuming the opening words of s.809VG(8) are satisfied, two rules follow:

> (a) that investment is to be treated as two separate investments,
> [i] one made using the money or other property mentioned in section 809VA(3) and
> [ii] one made using the other funds, and

(b) references in the business investment provisions[22] to "the investment" and "the holding" relate only to the investment made using the money or other property mentioned in section 809VA(3).

12.12.4 *Series of potentially chargeable events*

Section 809VG ITA provides:

(9) If the potentially chargeable event mentioned in subsection (1)(b) is not the first such event to affect the investment, the income or gains mentioned in subsection (1)(a) do not include, as respects that investment—

(a) any part already treated under subsection (2) as remitted to the UK as a result of an earlier event,

(b) any part contained in amounts already taken offshore or reinvested by way of appropriate mitigation steps following an earlier event, or

(c) any part contained in amounts already used to make a tax deposit without which an amount mentioned in paragraph (b) would not have been enough to satisfy section 809VI(1) or (2)(b) (see section 809VK).

12.13 Potentially chargeable event

There are four types of potentially chargeable event:
(1) Ceasing to be an eligible company
(2) Disposal of holding
(3) Extraction of value
(4) 2-year start-up rule
I consider items (1)(2)(4) in this section, and item (3), which is the most difficult, in the following section.

12.13.1 *Ceasing to be an eligible company*

Section 809VH ITA provides:

(1) For the purposes of section 809VG, a "potentially chargeable event" occurs if—

(a) the target company is for the first time neither an eligible trading company nor an eligible stakeholder company nor an eligible

22 Defined s.809Z10 ITA: "In this Chapter "the business investment provisions" means sections 809VA to 809VO".

holding company...

An example would be if the company stops trading or becomes quoted.

12.13.2 *Disposal of holding*

Section 809VH ITA provides:

> (1) For the purposes of section 809VG, a "potentially chargeable event" occurs if ...
>
> (b) the relevant person who made the investment ("P") disposes of all or part of the holding,

"Dispose" is not defined and so has its natural meaning, not the CGT meaning.

A person does not dispose of assets on death[23] so death is not a potentially chargeable event.

HMRC remittance investment relief guidance provides:

> **Share for share exchanges**
> 2.61 During corporate restructuring, old shares can be disposed of and new shares in the same company, or another company, issued in their place. The disposal of the old shares is a potentially chargeable event. However, provided both the old and new shares are qualifying investments, the exchange will be treated as an immediate reinvestment in another target company and no potentially chargeable event will occur. The new shares are derived from the original foreign income and gains in the same way as the original shares. (s809VI(7) and VL(3))

If consideration for a disposal is paid by installments, it may be difficult to re-invest (the mitigation step which would avoid a clawback charge). Section 809VH(8) ITA deals with this:

> If consideration for a disposal of all or part of the holding is to be paid in instalments, the disposal is to be treated for the purposes of this section as if it were separate disposals, one for each instalment (and each giving rise to a separate potentially chargeable event).

12.13.3 *2-year start-up rule*

Section 809VH ITA provides:

> (1) For the purposes of section 809VE, a "potentially chargeable event"

23 Contrast 35.5 (Death of individual).

occurs if ...

(d) the 2-year start-up rule is breached.

Section 809VH ITA provides:

(5) The 2-year start-up rule is breached if—

(a) immediately after the end of the period of 2 years beginning with the day on which the investment was made, the target company is non-operational, or

(b) at any time after the end of that period, the target company becomes non-operational.

(6) The target company is "non-operational" at any time when—

(a) it is an eligible trading company but is not trading,

(b) it is an eligible stakeholder company but—

(i) it holds no investments in eligible trading companies, or

(ii) none of the eligible trading companies in which it holds investments is trading, or

(c) it is an eligible holding company but—

(i) the group of which it is a member is not an eligible trading group, or

(ii) none of its 51% subsidiaries in the eligible trading group of which it is a member is an eligible trading company that is trading.

(7) In subsection (6), "trading" means carrying on one or more commercial trades (including the carrying on of any activities treated under section 809VE(4) as the carrying on of a commercial trade).

12.13.4 *Insolvency relief*

Section 809VH ITA provides:

(9) An event listed in subsection (1) does not count as a potentially chargeable event if it is due to an insolvency step taken for genuine commercial reasons (but this does not prevent the extraction of any value in connection with the insolvency step from counting as a potentially chargeable event).

(10) For the purposes of subsection (9), an insolvency step is taken if—

(a) the target company enters into administration or receivership or is wound up or dissolved,

(b) the target company is an eligible stakeholder company and any eligible trading company in which it holds an investment enters into administration or receivership or is wound up or dissolved,

(c) the target company is an eligible holding company and any eligible trading company in the group that is a 51% subsidiary

of it enters into administration or receivership or is wound up or dissolved, or

(d) a similar step is taken in relation to a company mentioned in paragraph (a), (b) or (c) under the law of a country or territory outside the UK.

12.14 Extraction of value rule

Section 809VH ITA provides:

> (1) For the purposes of section 809VG, a "potentially chargeable event" occurs if ...
>
> (c) the extraction of value rule is breached,

Section 809VH(2) ITA provides:

> The extraction of value rule is breached if–
>
> (a) value (in money or money's worth) is received by or for the benefit of P or another relevant person,
>
> (b) the value is received–
>
> (i) from an involved company, or
>
> (ii) from anyone else but in circumstances that are directly or indirectly attributable to the investment or to any other investment made by a relevant person in an involved company, and
>
> (c) the value is received other than by virtue of a disposal that is itself a potentially chargeable event.

The normal way to draft para (a) would be to say that the extraction of value rule is breached if P (or a relevant person) receives a *benefit*. I am unable to see any difference between "benefit" and the novel expression used, *value (in money or money's worth)* though I would have thought that the words "in money or money's worth" were pretty clearly unnecessary.

The normal way to draft para (b)(ii) would be to say that the extraction of value rule is breached if the benefit is received directly or indirectly by reason of, or as a result of, or in consequence of, the investment. I am unable to see any difference between those words and the phrase used., *directly or indirectly attributable to the investment*. Either way, there is a causation test.

Perhaps the drafter though that the innovatory statutory wording was vaguer and wider.

Section 809VH(3) ITA provides a limited exception for taxable benefits:

> But the extraction of value rule is not breached merely because a relevant person receives value that–
>
> (a) is treated for income tax or corporation tax purposes as the receipt of income or would be so treated if that person were liable to such tax, and
>
> (b) is paid or provided to the person in the ordinary course of business and on arm's length terms.

"Involved company" is of course widely defined. Section 809VH(4) ITA provides:

> Each of the following is an "involved company"–
>
> (a) the target company,
>
> (b) if the target company is an eligible stakeholder company, any eligible trading company in which it has made or intends to make an investment,
>
> (c) if the target company is an eligible holding company, any eligible trading company that is a 51% subsidiary of it, and
>
> (d) any company that is connected with a company within paragraph (a), (b) or (c).

HMRC give some examples:

> 2.52 ... the Government proposes to introduce a provision to prevent the value of the investment leaking out to the individual either directly through payments or loans which are not arms-length or through transactions designed to pass value to the individual. For example, it would not be permitted for the company to use the funds invested to guarantee loans made to the individual; nor would it be possible to make payments to a third party which are linked to payments made to the individual.[24]

The CIOT comment:

> If value is extracted, all the relief is clawed back unless the entire holding is sold and the entire proceeds reinvested or removed abroad
> Such is the result even if the value extracted is minimal;
> The pooling rules in section 809VN mean that where the investor has made multiple investments qualifying for BIR [Business Investment

24 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible *www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.*

Relief] in the same company or group, claw back affects all investments unless all are sold and the proceeds removed abroad or reinvested;
The definition of 'involved company' in section 809VH(4) means that value counts as extracted if extracted from any company connected with the BIR investee company, regardless of whether that company had anything to do with the BIR investment or indeed is UK resident;
[The CIOT touch on the extreme width of the definition of connected person - a regular theme in this book.[25]]
The arm's length rule preventing a receipt from counting as value extracted if it is paid in the ordinary course of business only applies if what is received is income for UK tax purposes; and
The rule stating that value does not count as extracted if the extraction is a disposal applies only where what is disposed of is part of the holding ie the shares in or loans to the BIR company itself or other companies in its group.
The combined effect of these provisions may be illustrated by an example:
Mr X, a Chinese national, invests £100,000 in A Ltd, a UK company which he controls and claims and is granted BIR.
His son living in China controls a Chinese property company B Ltd.
A Hong Kong trust of which Mr X is settlor owns a Hong Kong trading company, C Ltd.
Should any of the following occur, the extraction of value rule will be breached and Mr X's entire BIR on the £100,000 will be clawed back:
B Ltd pays Mr X's son a dividend. This is an extraction of value because it is not on arm's length terms.
B Ltd is put into member's voluntary liquidation and its assets distributed to Mr X's son.
C Ltd makes a £1,000 gift to Mr X's son in recognition of Mr X's son's efforts in facilitating a contract in China. This was quite unsolicited but entirely proper as ratified by the trust shareholder.[26]

12.14.1 *Interaction with VCT and EIS relief*

What is the position if the investment confers EIS income tax relief? At first sight, the income tax relief is a receipt of value. The benefit is certainly received in circumstances which are attributable to the

25 See 85.7.3 (Commentary).

26 Business Investment Relief: CIOT comments (18 September 2013) accessible *http://www.tax.org.uk/Resources/CIOT/Documents/2013/09/130918%20Business%20Investment%20Relief%20-%20CIOT%20comments.pdf*

investment.[27] The exemption for income-taxable benefits does not apply. However HMRC say:

> 2.89 A claim to relief under this incentive will not affect entitlement to other UK reliefs. An individual who brings overseas income and gains to the UK to invest under this relief will still be able to claim other tax reliefs, such as EIS or VCT, if the conditions for such reliefs are met.[28]

It would be wise to seek HMRC clearance before relying on this view.

12.15 "The appropriate mitigation steps"

Where there is a potentially chargeable event, there is (in short) sill no remittance clawback remittance charge if the appropriate mitigation steps are taken.

Section 809VI ITA provides:

> (1) If the potentially chargeable event is a disposal of all or part of the holding, the appropriate mitigation steps are regarded as taken if the whole of the disposal proceeds have been taken offshore or reinvested.
> (2) For any other case, the appropriate mitigation steps are regarded as taken if—
> (a) P has disposed of the entire holding (or so much of it as P retains when the potentially chargeable event occurs), and
> (b) the whole of the disposal proceeds have been taken offshore or re-invested.

12.16 "Taken offshore" or "re-invested"

12.16.1 *Scope of definition*

Section 809Z9 ITA provides:

> (1) This section applies to a provision of this Chapter that is satisfied if something (for example, disposal proceeds) is taken offshore or used by a relevant person to make a qualifying investment...
> (10) References in this section to something being "invested" are to something being used by a relevant person to make a qualifying

---

27 The same conclusion was reached in another context in *Harris v HMRC* [2010] SFTD 1159.

28 Consultation Response Document *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

investment.

(11) The provisions to which this section applies include sections 809UA(2)[29] and 809VB(2)[30], but in those cases—

(a) disregard references in this section to investment, and

(b) in the case of section 809VB(2), the assessment date for the purposes of subsection (5) is the date of the relevant event (see section 809VA(3)(b)).

12.16.2 *Meaning of "taken offshore"*

Section 809Z9(2) ITA provides:

> Things are to be regarded as "taken offshore" if (and only if) they are taken outside the UK such that, on leaving the UK, they cease to be available—
>
> (a) to be used or enjoyed in the UK by or for the benefit of a relevant person, or
>
> (b) to be used or enjoyed in any other way that would count as remitting income or gains to the UK.

The next subsections deal with tracing issues. Section 809Z9(3) ITA explains how money is taken offshore:

> If—
>
> (a) the thing required to be taken offshore or invested is money and
>
> (b) it is paid temporarily into an account pending satisfaction of the provision,
>
> the provision is satisfied only if the money actually taken offshore or invested is taken from the same account.

There is no relief if money is paid from one account to another, or if money is paid into one account and funds from another account are taken offshore. It is difficult to see the reason for the rule.

Section 809Z9 ITA then deals with property other than money:

> (4) If the thing required to be taken offshore or invested is something in money's worth,[31] the provision may be satisfied—
>
> (a) by taking the thing offshore or investing it, or

---

29 See 12.25.3 (Payment on account).

30 See 12.8 (Investment fails to proceed).

31 "Something in money's worth" is a clumsy expression meaning property other than money; the drafter is half remembering the technical conveyancing phrase *consideration of money or money's worth*.

(b) by taking offshore or investing money or other property of the equivalent value.

(5) "The equivalent value" is the market value[32] of the thing in money's worth, assessed as at the date of the sale or other disposal in relation to which the provision is triggered.

Perhaps the point is that the consideration might be property which cannot be taken offshore.

Section 809Z9(6) ITA then deals with deemed consideration:

> If the consideration for a disposal is deemed under section 809Z8(4),[33] the provision may be satisfied by taking offshore or investing money or other property of a value equal to—
>
> (a) the amount of the deemed consideration, less
>
> (b) any agency fees (within the meaning of section 809Z8) that are deducted before the actual consideration is paid or otherwise made available to or for the benefit of a relevant person.

Section 809Z9(7) ITA deals with the interaction with exempt property rules:

> (7) Subsections (4)(b) and (6) do not apply in the case of other property of the equivalent value if the other property is—
>
> (a) exempt property under section 809X,[34]
>
> (b) consideration for the disposal of any such exempt property, or
>
> (c) consideration for the disposal of all or part of the holding (see section 809VC) relating to a qualifying investment.

Section 809Z9(8) ITA deals with the interaction with the mixed fund rules:

> Money or other property taken offshore or invested in accordance with subsection (4)(b) or (6) is to be treated for the purposes of this Chapter—
>
> (a) as deriving from the thing required to be taken offshore or invested, and
>
> (b) as having the same composition of kinds of income and capital as that thing.

12.16.3 *Partly taken offshore and partly invested*

Section 809Z9(9) ITA provides:

---

32 Defined s.809Z10 ITA: "In this Chapter ..."market value" has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act)."

33 See 12.17.3 (Deemed market value consideration).

34 See 12.27 (Exempt property).

A provision to which this section applies may be satisfied—

(a) by taking the whole thing offshore or investing the whole thing, or

(b) by taking one part offshore and investing the other part.

12.16.4 *Re-invested*

Section 809VI(7) ITA provides:

Proceeds are "re-invested" if a relevant person uses them to make another qualifying investment (or the proceeds are themselves a qualifying investment) whether in the same or a different company.

12.16.5 *Gain on disposal of investment*

Section 809VI ITA provides:

(3) But if the disposal proceeds exceed X, subsections (1) and (2)(b) apply only to so much of the proceeds as is equal to X.

(4) "X" is—

(a) the sum originally invested, less

(b) so much of that sum as has, on previous occasions involving the same investment—

(i) been taken into account in determining the affected income or gains under section 809VG(2) [clawback remittance charge],

(ii) been taken offshore or re-invested in order to avoid the application of that section, or

(iii) been used to make a tax deposit without which the amount actually taken offshore or re-invested would not have been enough to satisfy subsection (1) or (2)(b) (see section 809VK).

(5) "The sum originally invested" means the amount of the money, or the market value of the other property, used to make the investment.

(6) Market value[35] is to be assessed for these purposes as at the date of the relevant event (see section 809VA).

HMRC say:

The Government will require that the overseas income or gains used to fund the qualifying investment is identified with the first amount of value

35 Defined s.809Z10 ITA: "In this Chapter ..."market value" has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act)."

taken out of the business until the total amount invested has been matched. This means that, in general, the investor will not be required to take chargeable gains which arise on disposal out of the UK in order to benefit from the relief. However, if an investor disposes of part of their investment, it may be necessary for them to take the gain arising on that part disposal out of the UK, or to reinvest it in a qualifying business, to meet this requirement.[36]

12.16.6 *Liquidation of target company*

Section 809VI ITA provides:

> (8) In cases where a breach of the extraction of value rule occurs in connection with the winding-up or dissolution of the target company—
> (a) subsection (2)(a) does not apply,
> (b) the reference in subsection (2)(b) to the disposal proceeds is to the value received, and
> (c) references in this section and in succeeding provisions of the business investment provisions[37] to the disposal proceeds are to be read as references to the value received.

12.17 "The disposal proceeds"

Section 809Z8(1) ITA provides:

> (1) In this Chapter, in relation to a sale or other disposal, "the disposal proceeds" means—
> (a) the consideration for the disposal, less
> (b) any agency fees that are deducted before the consideration is paid or otherwise made available to or for the benefit of the person making the disposal ("the transferor") or any other relevant person.

12.17.1 *Agency fees*

Section 809Z8 ITA provides:

> (6) In subsection (1), "agency fees" means fees and other incidental costs of the disposal that are charged to the transferor by any person by or

36 Consultation Response Document *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

37 Defined s.809Z10 ITA: "In this Chapter "the business investment provisions" means sections 809VA to 809VO".

through whom the disposal is effected, but excluding any such fees or costs that—

(a) are charged to the transferor by another relevant person, or

(b) are to be passed on to or otherwise applied for the benefit of a relevant person.

(7) The exclusion mentioned in subsection (6) does not apply to the extent that the fees or costs—

(a) relate to a service actually provided by the relevant person to the transferor in connection with effecting the disposal, and

(b) do not exceed the amount that would be charged for that service if it were provided in the ordinary course of business and on arm's length terms.

12.17.2 *Non-cash consideration*

Section 809Z8(3) ITA[38] provides:

> If the consideration is provided in the form of anything other than money, the amount of the consideration is the market value[39] of the thing at the time of the disposal.

12.17.3 *Deemed market value consideration*

Section 809Z8 ITA[40] provides:

> (4) If the disposal is made other than by way of a bargain made at arm's length, the disposal is deemed to be made for a consideration equal to the market value, immediately before the disposal, of the thing being disposed of.
>
> (5) Without limiting the generality of subsection (4), a disposal made to another relevant person or to a person connected with a relevant person is treated in all cases as made other than by way of a bargain at arm's length.

Usual CGT reliefs such as spouse relief and charity relief do not apply.

12.17.4 *Retention of funds to meet CGT liabilities*

Section 809VK ITA provides:

---

38 Flagged by s.809Z8(2) ITA.

39 Defined s.809Z10 ITA: "In this Chapter ..."market value" has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act)."

40 Flagged by s.809Z8(2) ITA.

(1) This section applies if—
- (a) there is a disposal of all or part of the holding,
- (b) the disposal counts as a potentially chargeable event or is part of the appropriate mitigation steps taken in consequence of a potentially chargeable event,
- (c) a chargeable gain (but not a loss) accrues to P on the disposal, (d) P is chargeable to capital gains tax (but not corporation tax) in respect of that gain, and
- (e) the actual disposal proceeds are less than Y.

(2) The difference between the actual disposal proceeds and Y is referred to in this section as "the shortfall".

(3) "The actual disposal proceeds" means the disposal proceeds but disregarding section 809Z8(4).

(4) "Y" is the sum of—
- (a) the amount (if any) that would, but for this section, be required to be taken offshore or re-invested in order to satisfy section 809VI(1) or (2)(b), and
- (b) the amount found by applying the highest potential CGT rate to the amount (computed in accordance with TCGA 1992) of the chargeable gain accruing to P on the disposal.

(5) The highest potential CGT rate is—
- (a) if the chargeable gain accrues to P as the trustees of a settlement or accrues to the personal representatives of P, the rate specified in section 4(3) of TCGA 1992, and
- (b) otherwise, the rate specified in section 4(4) of that Act (regardless of the rate at which income tax is chargeable in respect of P's income).

(6) If this section applies, the amount that is required to be taken offshore or re-invested in order to satisfy section 809VI(1) or (2)(b) is reduced by the permitted amount.

(7) "The permitted amount" is so much of the shortfall as is used, within the grace period allowed for taking the disposal proceeds offshore or re-investing them, to make a deposit in respect of which a certificate of tax deposit is issued to P under section 12 of the National Loans Act 1968.

(8) A reduction may not be made under subsection (6) unless—
- (a) when details of the deposit are confirmed to HMRC, the confirmation letter states that this section is intended to apply to the deposit, and
- (b) the amount of the deposit is no greater than the shortfall.

12.18 The grace period

There is no clawback remittance charge if "the appropriate mitigation

steps" are taken "within the grace period."

Section 809VJ ITA provides:

> (1) The grace period allowed for the step mentioned in section 809VI(2)(a) is the period of 90 days beginning—
>
> (a) if the potentially chargeable event is a breach of the extraction of value rule, with the day on which the value is received, and
>
> (b) otherwise, with the day on which a relevant person first became aware or ought reasonably to have become aware of the potentially chargeable event.
>
> (2) The grace period allowed for the step mentioned in section 809VI(1) and (2)(b) is the period of 45 days beginning with the day on which the disposal proceeds first became available for use by or for the benefit of P or any other relevant person.

12.18.1 *Exceptional circumstances*

Section 809VJ(3) ITA provides:

> An officer of HMRC may agree in a particular case to extend the grace period allowed for an appropriate mitigation step in exceptional circumstances.

HMRC give one example of exceptional circumstances:

> 2.24 In some cases, it may be difficult for an investor to know that a company's activities have changed and to dispose of their investment within the 45-day period. The draft legislation therefore contains a provision to allow HMRC to extend this grace period where exceptional circumstances mean it would be unreasonable to expect the individual to dispose of an investment within 45 days.[41]

12.18.2 *Extension of grace period*

Section 809VJ ITA provides:

> (4) An officer of HMRC may agree in a particular case to extend the grace period allowed for an appropriate mitigation step in circumstances specified in regulations made by the Commissioners.
>
> (5) Regulations under subsection (4) may have effect in relation to investments made before the day on which the regulations are made.

---

41 Consultation Response Document *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

(6) Nothing in subsection (4) or in regulations made under it limits the power conferred by subsection (3).
(7) The powers conferred on officers of HMRC by subsections (3) and (4) include power to agree to extend a grace period for a length of time that is indefinite but is capable of becoming definite by means identified in the agreement (such as the satisfaction of conditions).

The regulations are the Business Investment Relief Regulations 2012. It is dispiriting to see the level of micro-detail under a government which claims to be "determined to cut red tape".[42]

The regulations came into force in August, but apply retrospectively to qualifying investments made on or after 6 April 2012.[43]

Regulation 2 Business Investment Relief Regulations provides:

2. The grace period allowed for an appropriate mitigation step by section 809VJ of the Income Tax Act 2007 may be extended by an officer of HMRC if regulation 3 or 4 applies.

Lock-up agreements

3.—(1) This regulation applies if conditions 1 and 2 are met.
(2) Condition 1 is that—
(a) the target company has ceased to be a private limited company by virtue of having some or all of its shares listed on a recognised stock exchange; or
(b) (i) the target company has become a subsidiary of another company ("the new company"); and
(ii) the new company is a body corporate some or all of whose shares are listed on a recognised stock exchange (or are to be so listed).
(3) Condition 2 is that P is unable to comply with an appropriate mitigation step without breaching the terms of a lock-up agreement.
(4) For the purposes of this regulation "lock-up agreement" means a contract—
(a) entered into by P with one or more relevant parties which is directly related to the listing of shares in the target company or, as the case may be, the new company, on a recognised stock exchange; and
(b) that imposes restrictions on the time or manner in which P may—
(i) dispose of some or all of P's holding in the target company;

42 *www.redtapechallenge.cabinetoffice.gov.uk/about.*
43 Reg. 1, Business Investment Relief Regulations 2012.

or

(ii) dispose of some or all of any shares in the new company received by P in return for P's holding in the target company.

(5) For the purposes of this regulation "relevant party" means—

(a) the target company;

(b) the new company;

(c) professional advisors retained by the target company or the new company in relation to the listing of the shares of the target company (or, as the case may be, the shares of the new company) on a recognised stock exchange.

Statutory and legal bars

4. This regulation applies if—

(a) P is prevented from taking an appropriate mitigation step by a prohibition imposed by or under any enactment; or

(b) the taking of an appropriate mitigation step by P would breach the terms of an order imposed by any court.

12.19 Effect of taking mitigation steps

Section 809VL ITA provides:

(1) This section explains the effect for the purposes of this Chapter in cases where section 809VG(2) [clawback remittance charge] does not apply because the appropriate mitigation steps were taken within the grace period allowed for each step.

(2) If disposal proceeds were taken offshore as part of those steps, nothing in section 809VA(2) [remittance investment relief] prevents anything subsequently done in relation to those proceeds (or anything deriving from them) from counting as a remittance of the underlying income or gains to the UK at the time when the thing is subsequently done.

(3) If disposal proceeds were re-invested as part of those steps—

(a) the underlying income or gains continue to be treated under section 809VA(2) as not remitted to the UK, and

(b) the business investment provisions[44] apply to the reinvestment as they apply to the original investment.

(4) In the application of the business investment provisions to the reinvestment—

44 Defined s.809Z10 ITA: "In this Chapter "the business investment provisions" means sections 809VA to 809VO".

(a) treat the potentially chargeable event mentioned in section 809VG(1)(b) as the relevant event,
(b) treat the underlying income or gains as the income or gains treated under section 809VA(2) as not remitted to the UK as a result of the re-investment, and
(c) treat the amount used to make the re-investment as the sum originally invested.

(5) If the re-investment is made using more than the minimum amount of disposal proceeds required to satisfy section 809VI(1) or (2)(b)—
(a) that investment is to be treated as two separate investments, one made using the minimum amount of disposal proceeds and one made using the excess, and
(b) references in the business investment provisions to "the investment" and "the holding" relate only to the investment made using the minimum amount of disposal proceeds.

(6) "The underlying income or gains" means the affected income or gains (within the meaning of section 809VG) or, if one part of the disposal proceeds is taken offshore and the other part re-invested, a corresponding proportion of the affected income or gains.

(7) A further claim must be made in accordance with section 809VA in respect of the re-investment and, if no such claim is made on or before the first anniversary of the 31 January following the tax year in which the re-investment was made, section 809VG(2) [clawback remittance charge] applies, as respects the original investment, as if the appropriate mitigation steps had not been taken within the grace period allowed for each step.

(8) Section 809VM makes further provision in cases involving a tax deposit.

12.20 Tax deposits

Section 809VM ITA provides:

(1) This section applies in cases where—
(a) section 809VG(2) [clawback remittance charge] did not apply because the appropriate mitigation steps were taken within the grace period allowed for each step,
(b) the amount required to be taken offshore or re-invested in order to satisfy section 809VI(1) or (2)(b) had been reduced under section 809VK, and
(c) but for that reduction, the amount that was actually taken offshore or re-invested would not have been enough to satisfy section 809VI(1) or (2)(b).

(2) The tax deposit that gave rise to the reduction is referred to in this section as "the tax deposit".
(3) Use of the tax deposit to pay the relevant tax liability does not count as remitting the underlying income or gains to the UK (and, accordingly, section 809VA(2) [remittance investment relief] continues to apply to the income or gains).

12.20.1 *CTD clawback charge*

Section 809VM ITA provides:

(4) If any of the CTD conditions is breached, the underlying income or gains are to be treated as having been remitted to the UK immediately after the day on which the breach occurs.
(5) "The underlying income or gains" means such portion of the affected income or gains (within the meaning of section 809VG) as is—
- (a) represented by the payment, in the case of subsection (3), or
- (b) affected by the breach, in the case of subsection (4).

(6) The CTD conditions are as follows—
- (a) the tax deposit must not be used to pay a tax liability other than the relevant tax liability,
- (b) if any of the tax deposit is withdrawn by the depositor, the amount withdrawn must be taken offshore or re-invested within the period of 45 days beginning with the day on which the withdrawal was made, and
- (c) any part of the tax deposit that has been neither used to pay a tax liability nor withdrawn by the due date must be withdrawn by the depositor and taken offshore or reinvested within the period of 45 days beginning with that date.

(7) Where the CTD conditions were not breached because the requisite amount was taken offshore or re-invested within the 45-day period mentioned in subsection (6)(b) or (c)—
- (a) section 809VL applies to the amount taken offshore or reinvested as it applies to disposal proceeds, but
- (b) read the reference in section 809VL(4)(a) to the potentially chargeable event as a reference to—
  - (i) the withdrawal, in a case within subsection (6)(b), and
  - (ii) the due date, in a case within subsection (6)(c).

(8) For the purposes of this section—
- (a) "the relevant tax liability" means P's liability to capital gains tax for the tax year in which the disposal took place,
- (b) "the due date" means the date by which the relevant tax liability is required to be paid,

(c) "re-invested" has the meaning given in section 809VI(7), and
(d) references to withdrawal include repayment for whatever reason.

12.21 Multiple investments in same company or group: pooling

12.21.1 *Multiple claims for relief in same company/group*

Section 809VN(1) ITA provides:

> Subsection (2) applies if at any time income or chargeable gains of an individual are treated under section 809VA as not remitted to the UK as a result of—
> (a) more than one qualifying investment made in the same target company,
> (b) more than one qualifying investment made in companies in the same eligible trading group, or
> (c) qualifying investments made
> [i] in an eligible trading company and
> [ii] in an eligible stakeholder company that holds investments in that trading company.

Where these conditions are met, we turn to s.809VN(2) ITA:

> In the application of section 809VG at that time—
> (a) treat the investments and holdings as if they were a single qualifying investment and a single holding, and
> (b) assume that a disposal of all or part of that deemed single holding affects the deemed single investment in the order in which the qualifying investments were made (that is to say, on a first in, first out basis).

There are two deemings here.

The first deeming is a pooling of the various holdings. If an investor has made multiple investments qualifying for relief in the same company or group, clawback on receipt of a benefit affects all the investments unless they are all taken abroad or reinvested.

The second deeming is that disposals are on a FIFO basis regardless of the asset actually disposed of.

12.21.2 *Qualifying and non-qualifying investments in same company/group*

Section 809VN(3) ITA provides:

> Subsection (4) applies if at any time—
> (a) income or chargeable gains of an individual are treated under

section 809VA as not remitted to the UK as a result of one or more qualifying investments,

(b) in addition to that investment or those investments, a relevant person holds at least one other investment in
[i] the same target company,
[ii] the same eligible trading group or
[iii] a related eligible company,[45] and

(c) that other investment is not a qualifying investment.

Where these conditions are met, we turn to s.809VN(4) ITA:

> In the application of section 809VG at that time—
> (a) treat the investments and holdings as if they were a single investment and a single holding, and
> (b) assume that a disposal of all or part of that deemed single holding is a disposal of a holding from a qualifying investment until the holdings from all the qualifying investments have been disposed of.

These are the same two deemings as s.809VN(2) discussed above; though the second of them is slightly differently worded (I would be grateful if any reader could explain why).

12.21.3 *Investments held by different relevant persons*

Section 809VN(6) ITA provides:

> Subsections (2) and (4) apply whether the investments in question are held by the same relevant person or different ones.

This would apply (for instance) where some investments are made by one close company in which T is a participator, and other investments are made by another.

12.21.4 *Examples*

These rules work in anomolous ways.
Suppose:

---

45 Section 809VN (5) provides: "The reference to a "related eligible company"—
(a) in relation to an eligible trading company, is to an eligible stakeholder company that holds investments in that company, and
(b) in relation to an eligible stakeholder company, is to an eligible trading company in which that company holds investments."

(1) An individual ("T") makes an investment (say, a loan) in a company which qualify for remittance investment relief.
(2) T (or a relevant person) purchases other investments (say, shares) in the same company; those purchased shares are not a qualifying investment.
(3) T (or the relevant person) sells the shares.

The two investments are pooled, the sale is treated as a disposal of the loan, so the proceeds must be removed outside the UK.

Suppose:

(1) An individual ("T") makes an investment (say, a loan "the first loan") in a company and does not claim remittance investment relief (eg the loan may have been made before 2012).
(2) T (or a relevant person) lends to the same company ("the second loan") and claims the relief.

Pooling does not apply. Section 809VN(2) does not apply as there is only one claim for relief. Section 809VN(4) does not apply as the first and the second loan are both qualifying investments. (A loan or share subscription may be a qualifying investment even though the investor does not claim the relief.)

12.22 Investment out of mixed fund

Section 809VO ITA provides:

> (1) This section applies if—
> (a) but for section 809VA(2) [remittance investment relief], income or gains would have been remitted to the UK by virtue of a relevant event, and
> (b) section 809Q (transfers from mixed funds) would have applied in determining the amount that would have been so remitted.

That is, s.809VO applies if:

(a) Remittance investment relief applies; and
(b) The investment is made out of a mixed fund.

Suppose:

(1) A mixed fund consisted of

capital	£90
income	£10
total	£100

(2) The investment was £10

In the absence of express provision, the onshore transfer mixed fund rule

would apply. The investment would represent the £10 income, and the mixed fund would cease to be mixed. That would allow scope for planning. So s.809VO provides:

> (2) The relevant event counts as an offshore transfer for the purposes of section 809R(4).

This applies the offshore mixed fund rule. Thus on the facts of the example above:

(1) The investment is a mixed fund of £9 capital and £1 income.
(2) The offshore fund becomes a mixed fund of £91 capital and £9 income.

Section 809VO ITA provides:

> (3) The holding is to be treated as containing a proportion of each kind of income and capital contained in the invested property equal to the fixed proportion.
> (4) "The fixed proportion" is the proportion of that kind of income or capital contained in the invested property by virtue of subsection (2).
> (5) "The invested property" means the money or other property used to make the investment.

12.22.1 *Funds taken offshore*

Section 809VO ITA provides:

> (6) Subsection (7) applies in cases where—
> (a) section 809VG(2) [clawback remittance charge] does not apply because an amount is taken offshore, re-invested or used to make a tax deposit,[46] or
> (b) section 809VM(4) [CTD clawback charge] does not apply because an amount is taken offshore or re-invested.[47]
> (7) The amount taken offshore, re-invested or used to make a tax deposit is treated, immediately after that step, as containing the fixed proportion of each kind of income and capital contained in the holding.
> (8) In cases where section 809VG(2) applies—
> (a) the affected income or gains are so much of the fixed amount of each kind of income or gain mentioned in subsection (1)(a) as reflects the portion of the investment affected by the potentially chargeable event (see section 809VG(6)),
> (b) "the fixed amount" is the amount of that kind of income or gain

46 See 12.12 (Clawback remittance charge).
47 See 12.20 (Tax deposits).

that the holding is treated as containing by virtue of subsection (3), and

(c) section 809Q does not apply in determining the affected income or gains.

These rules could still be exploited for tax planning, but the s.809S TAAR is kept in reserve. Section 809VO ITA provides:

> (9) Section 809R(2) and (3) and section 809S apply for the purposes of this section.

See 13.10 (Mixed fund anti-avoidance rule).

12.23 Clearance applications

It is possible to seek advance clearance that the relief applies, under CAP 1 ("How non-business customers or customers with a query about non-business activities get advice on HMRC's interpretation of recent tax legislation").[48] This is a non-statutory procedure, but a positive response should bind HMRC, assuming full disclosure.

Annex B sets out the list of points which need to be covered in the application:

Annex B - Business Investment Relief advance assurance checklist

Use this checklist if you want to ask HMRC to give you their view on whether a proposed investment can be treated as a qualifying investment as defined in section 809VC of ITA. You can find guidance on the business investment relief on the website *www.hmrc.gov.uk*. Please refer to the Information Note and associated Guidance Note: Changes to the Remittance Basis.

It helps us if you follow the order set out in the checklist in your clearance application and use the numbering on any supporting documents.

How to send us your request by post

Send your request to: Business Investment Relief Team S1278, P O Box 202 Bootle L69 9AL

1. Information about the claimant and their request for advance assurance:

1.1 The claimant's name, address and customer identification number in full, eg, National Insurance number and Self Assessment Unique Taxpayer Reference (UTR). The claimant is the person whose foreign income and gains will be used to make the investment.

1.2 If you are requesting advance assurance on behalf of the claimant state the capacity in which you are acting and your authority to do so where HMRC

48 *www.hmrc.gov.uk/cap/cap1.htm*.

do not already hold this. Provide your contact details for correspondence including your phone number.

1.3 The legislation permits a 'relevant person' to make an investment using the claimant's foreign income or gains. A relevant person is defined in section 809M of ITA 2007. Please provide general information about the 'relevant person'.

If the 'relevant person' is an individual: Name and address, NINO, UTR and the relationship of the 'relevant person' to the claimant.

If the 'relevant person' is a company: registered office, place of tax residence, directors and shareholders (including their names and addresses), any UK tax reference, company registration number and reason for it being a 'relevant person', ie, its relationship to the claimant.

2. Information about the proposed investment(s):

2.1 General information about the company in which the proposed investment is intended to be made: name and registered office address, Company Registration Number, date and place of incorporation and UK tax reference if known

2.2 Details of all trading or other activities which the company, and any subsidiary company(ies), is carrying on or intends to carry on. This should be in as much detail as possible and demonstrate that the company is an eligible trading, stakeholder or holding company. For more information on the eligibility conditions that apply please refer to Condition A in Section 2 of the Guidance Note.

2.3 Details of how the investment will be structured.

2.4 Details about any shares to be issued to the claimant or 'relevant person' by the company and/or details of the nature of any loan(s) to be made by the claimant or 'relevant person' to the company.

2.5 Details of any loan or subscription agreement or other side agreement to be entered into by the claimant or 'relevant person'.

2.6 The anticipated date that the income/gains will be brought to the UK and the date the investment will take place.

2.7 The amount of income/gains to be invested.

2.8 The anticipated SA Return year in which the claimant will claim the relief.

2.9 Copies of all supporting documents including:

- the latest available accounts of the company and of any subsidiary company or investment company, or an explanation of why no accounts are available;
- a copy of any prospectus or similar document (such as a business plan or financial projections) issued by the company to potential investors; and/or
- an up-to-date copy of the Memorandum and Articles of Association for the company with details of any changes to be made

Please identify any part(s) or passage(s) of the documents that you think are particularly relevant.

2.10 Any other information relevant to the request.

3. Advice requested from HMRC

3.1 The nature of the assurance you are seeking from HMRC – set out your opinion of the tax consequences of the particular investment you want HMRC to consider and how you have arrived at that opinion.

3.2 A clear explanation of any point(s) on which you are uncertain. If you have already received professional advice please explain why you are still unclear and share any advice which you are content to disclose.

3.3 Any legal advice you have already received which you are content to disclose.

4. Claimant's confirmations:

Please include with your request confirmations from the claimant that

4.1 To the best of their knowledge and belief, no 'relevant person' will (directly or indirectly) obtain or become entitled to obtain any related benefit, and no 'relevant person' expects to obtain any such benefit as a consequence of making the investment.

[For these purposes, a benefit is defined in section 809VF of ITA.]

4.2 To the best of their knowledge and belief they have told HMRC about all of the facts relevant to the investment/the advice sought and that these are correct.

5. Tax avoidance schemes:

5.1 If there is an avoidance scheme which covers all or part of the transaction please provide details of the arrangement and/or any disclosure made to HMRC with the allocated DOTAS scheme reference number, if applicable.[49]

12.24 Remittance investment relief: commentary

Budget 2011 announced:

> **3.7 Review of non-domicile taxation** ... the rules mean that foreign income and gains are taxed if they are brought to the UK and this is a disincentive to inward investment. The Government will introduce the following reforms:
>
> - remove the tax charge when non-domiciles remit foreign income or capital gains to the UK for the purpose of commercial investment in UK businesses;

It is melancholy to compare the aspiration expressed in these three lines

49 *www.hmrc.gov.uk/cap/annex-b-cap1-checklist.pdf.*

with the achievement in 18 dense pages of legislation. The rules are complex, restrictive, and (perhaps most seriously to potential investors) contain many uncertainties, as anyone who tries to apply them to a complex business deal will immediately discover.

In the consultation paper, HMRC said:

> 2.48 At the same time the Government recognises that complicated anti-avoidance provisions could deter non-domiciles from using this new incentive and believes that both these risks can be tackled by relatively straightforward provisions....
> The Government recognises that complexity can deter investment. Therefore, to make the investment incentive genuinely appealing to non-domiciles, the Government is clear that it should be free of unnecessary restrictions and be simple to use.[50]

I infer that the minister's intention clashed with the deeply ingrained culture of HMRC/HMT, that anti-avoidance is a consideration which out-trumps every other; and the latter prevailed. In consequence, the legislation has not lived up to the promise.

All else being equal, a remittance basis taxpayer will not wish to rely on this relief to invest in the UK, either directly or indirectly through trusts and companies, as investment elsewhere avoids the burden of the rules discussed in this chapter.

For a simple solution to this problem, see 11.11 (Commentary: let's simplify remittance and relevant person rules).

12.25 Relief for payment of remittance basis charge

12.25.1 *Payment of remittance basis charge*

Section 809V ITA provides:

> (1) Subsection (2) applies to income or chargeable gains of an individual if–
> (a) the income or gains would (but for subsection (2)) be regarded as remitted to the UK by virtue of the bringing of money to the UK,
> (b) the money is brought to the UK by way of one or more direct payments to the Commissioners [HMRC], and

50 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible *www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.*

(c) the payments are made in relation to a tax year to which section 809H applies as regards the individual.

(2) The income or chargeable gains are to be treated as not remitted to the UK to the extent that the payments do not exceed the applicable amount (as defined in section 809H).[51]

The RDR Manual provides:

34020. Remittance Basis charge - money paid directly to HMRC [Jan 2014]

Money brought into the UK to pay the remittance basis charge (see RDRM32210) is treated as not remitted to the UK if direct payment is made to HMRC (Section 809V[2] ITA 2007).

This exemption will only apply if the money is paid:

- in respect of the tax due for the year in which the remittance basis has been claimed, and
- the remittance basis charge is due for that tax year.

Only remittances that relate to the remittance basis charge are covered by the exemption. Remittances of foreign income or gains to pay any other liability to UK tax, including for example income tax or capital gains tax on remitted amounts, are themselves chargeable to UK tax as remitted income or gains of the tax year in which the tax is paid to HMRC (although see also RDRM35140 - remittances of nominated income). This includes payments to settle enquiry cases by contract settlement except to the extent of any payments of the remittance basis charge included in the contract settlement but not any interest or penalties on those amounts)

The remittance basis charge can be paid in one or more amounts. However, the amount that benefits from the exemption provided at Section 809V is limited to the amount of the charge – that is either £30,000 or £50,000. The amount due can be paid in one lump sum or in several stages, and may form part of the payments on account paid on 31 January or 31 July, or may be paid as a balancing payment. The exemption applies as long as the payment is in relation to the tax year in which the remittance basis charge is due.

The exemption only applies where the remittance basis charge is paid directly from foreign income or gains held outside the UK, the payment must be made direct to HMRC. This can be done either by:

- cheque (drawn on a foreign bank account)
- electronic transfer of funds.

Taxpayers will need to keep sufficient records to show that payment of

51 See 10.11.2 (7 and 12-year residence tests).

the £30,000 or £50,000 remittance basis charge was made directly to HMRC from an overseas account. A copy of a cheque (or cheques) drawn on the foreign bank account, or the relevant bank statement identifying the bank transfer are examples of acceptable evidence.

The £30,000 remittance basis charge may be paid directly from outside the UK to HMRC by a person other than the individual; the most common example will be a payment by an employer on behalf of an employee. In such cases the £30,000 paid to HMRC may form part of the taxpayer's income, for example if paid by his employer the £30,000 will form part of the employee's earnings. To the extent that these are regarded as foreign chargeable earnings this exemption will apply.

The Manual gives an example where A remits £40k to pay a £30k remittance basis charge

Example (Alex)

A is a long-term UK resident remittance basis taxpayer. He uses the remittance basis in 2008-09 and plans to use it again in 2009-10. A therefore makes payments on account (see RDRM32390) of £100,000 on 31 January 2009 and on 31 July 2009 in respect of his 2009-10 liability.

In July 2009 he pays £40,000 of that payment on account from his 2008-09 foreign income. Payment is made by cheque drawn on an account at a bank in the Isle of Man that was sent direct to HMRC.

A's tax liability for 2009-10 is £200,000 including the remittance basis charge of £30,000, which has been wholly met from the payments on account that he has made. No further tax is due for this year.

Because £40,000 of the tax that A has paid on account was paid directly to HMRC from an overseas account, £30,000 of the £40,000 income remitted may be treated as not remitted to the UK and is not chargeable to tax, unless A has instructed otherwise. The remaining £10,000 will be taxed as a remittance in the normal way. As it was remitted in July 2009 it will be a taxable remittance for the tax year 2009-10, and should be declared as such.

In this example, all of the £40,000 was remitted in July. However the remittances might be split between the payment on account dates, for example £20,000 remitted on 31 January 2009 and a further £20,000 on 31 July 2009. In such cases, unless the taxpayer specifies otherwise, the £10,000 that is not subject to the exemption and so is a taxable remittance will be treated as having occurred at the later date, as this will usually be in the taxpayer's favour.

Refer to RDRM34030 for example of where the 'remittance basis charge' is repaid to A, or otherwise no longer applies

Nominated Income or gains
If taxpayers use nominated income or gains to pay the remittance basis charge of either £30,000 or £50,000 it is treated as not remitted to the UK under section 809V. Because none of the individual's nominated income or gains is treated as having been remitted to the UK in that tax year you do not have to apply the 'ordering rules' at ITAs809I and s809J. See RDRM35100 Remittances of nominated income or gains.

lf the remittance basis charge is repaid by HMRC it is treated as remitted at that point (see RDRM34030) and section 809I will be triggered.

The Manual formerly contained an example of a somewhat unusual situation where A pays the remittance basis charge of B:

Example 1 (Olaf)
O uses the remittance basis in 2008/09 and 2009/10 and 2010/11; but in 2011/12 O chooses not to use the remittance basis.
In 2011/12 O makes payment of £30,000 direct to HMRC from his foreign income that arose during 2009/10. This payment is to pay the remittance basis charge of his sister Giselle, who is a long term resident of the UK and who has made a claim to the remittance basis in 2011/12.
The £30,000 remitted by O may be treated as not remitted to the UK under Section 809V ITA 2007 and so is not chargeable to tax provided that the payments made for a particular year do not exceed £30,000.
The position should be looked at critically if there is evidence of any reciprocity. In the case of doubt or difficulty submit to PTI Advisory Foreign Income and Remittance Basis Team.

This text was removed in January 2014.

12.25.2 *Repayment of remittance basis charge*

Section 809V ITA provides:

> (3) Subsection (2) [relief for payment of remittance basis charge] does not apply to payments if or to the extent that they are repaid by the Commissioners.

The RDR Manual provides:

34030. Remittance Basis charge - repayment by HMRC [January 2014]
There may be some exceptional circumstances where the £30,000 or the £50,000 remittance basis charge is paid to HMRC but then is later repaid, or is otherwise no longer due.
Any foreign income or gains remitted to pay the charge and initially covered by the exemption at s.809V ITA 2007 will be regarded as a remittance when the charge is withdrawn and so will be treated as liable to UK tax at that point (s.809V(2) ITA 2007).

Change of claim

The £30,000 or £50,000 remittance basis charge is most likely to be withdraw where an individual, having made a claim for the remittance basis and paid the charge for that year, subsequently decides not to claim the remittance basis for that year and makes an amendment to their Self Assessment return (TMA1970/Section 9ZA). In such circumstances Section 809H ITA 2007 will not apply for that tax year, so the exemption cannot apply either.

Change of status

The other situation where the £30,000 or £50,000 is likely to be withdrawn or not otherwise due is where it later transpires an individual has claimed the remittance basis for a tax year but was not entitled to do so as they were UK domiciled and ordinarily resident in the UK in that year.

Effect

If the exemption under section 809V was claimed, the foreign income or gains used to pay the remittance basis charge will not have been subject to tax in the year in which they arose/accrued because the individual used the remittance basis in that year. Due to the exemption the income or gains will also not have been subject to tax when brought into the UK. In such situations there are two possibilities:

• the £30,000 or £50,000 payment was made from foreign income or gains from an earlier year in which the individual was entitled to claim the remittance basis and did so. The £30,000 or £50,000 is treated as a taxable remittance and will be taxable in the year in which the remittance to HMRC occurred

• the £30,000 or £50,000 payment was made from foreign income or gains from the present year or an earlier year in which the individual was not entitled to claim the remittance basis. The income or gains will be taxed on the arising basis for the year in which the foreign income or gains actually arose. If the return cannot be amended you may need to deal with such assessments under the 'discovery provisions' at s.29 TMA 1970.

Example 1 (Alex)

In the example above, A's circumstances change and he decides not to claim to be taxed on the remittance basis for 2009-10. His liability for 2009-10 on the arising basis is £195,000.

When A made the payment on account of £40,000 in July 2009 he anticipated that £30,000 of it would be attributed to the remittance basis charge. In the event he did not claim to be taxed on the remittance basis. He does not have to pay the remittance basis charge.

None of the payments on account can therefore be attributed to the remittance basis charge and the £40,000 that A paid from his 2008-09 foreign income (remember that A did use the remittance basis in 2008-09) in July 2009 is a taxable remittance.

Any cases of difficulty should be referred to Specialist PT PTI – Advisory, Foreign Income and Remittance Basis Team.

See 13.14.9 (Nominated income used to pay remittance basis charge).

12.25.3 *Payment on account*

Section 809UA ITA provides:

> (1) Subsection (2) applies to income or chargeable gains of an individual if—
>
> (a) the income or gains would (but for subsection (2)) be regarded as remitted to the UK by virtue of the bringing of money to the UK,
>
> (b) the money is brought to the UK by way of direct payments to the Commissioners on account of income tax,
>
> (c) the tax year ("tax year 2") in respect of which the payments on account are made is a tax year for which section 809H (remittance basis charge for long-term UK resident) does not apply as respects the individual, and
>
> (d) that section applied as respects the individual for the previous tax year ("tax year 1").
>
> (2) The relevant amount of income or chargeable gains is to be treated as not remitted to the UK if money equal to the relevant amount is taken offshore by—
>
> (a) the 15 March following the end of tax year 2, or
>
> (b) such later date as the Commissioners may allow on a claim made by the individual.
>
> (3) A claim under subsection (2)(b)—
>
> (a) may be made only if the individual has made and delivered a return under section 8 of TMA 1970 for tax year 2 and reasonably expects to receive from the Commissioners a repayment of tax paid in respect of that tax year, and
>
> (b) may be made no later than the 5 April following the end of tax year 2.
>
> (4) Money that is taken offshore in accordance with subsection (2) is to be treated as having the same composition of kinds of income and capital as the money used to make the payments on account.
>
> (5) In this section "the relevant amount" means the lower of the following—
>
> (a) the amount brought to the UK as mentioned in subsection (1)(b), and
>
> (b) the applicable amount (as defined in section 809H) for tax year 1...

12.26 Foreign services relief

Section 809W ITA provides a relief which I call "**foreign services relief**".

Section 809W(1) provides:

> This section applies to income or chargeable gains if—
> (a) the income or gains would (but for subsection (2)) be regarded as remitted to the UK because conditions A and B in section 809L are met,
> (b) condition A in section 809L [remittance condition A] is met because a service is provided in the UK ("the relevant UK service"), and
> (c) condition B in section 809L [remittance condition B] is met because section 809L(3)(a) or (b) applies to the consideration for the relevant UK service ("the relevant consideration").

I refer to these conditions as "**services relief conditions A and B**".

Section 809W(2) ITA provides the relief:

> The income or chargeable gains are to be treated as not remitted to the UK if the following conditions are met but this is subject to subsection (5).

There is no relief in relation to remittance conditions C or D but in practice these will not often apply. More importantly, there is no relief if s.809L(3)(c) or (d) apply, which deal with debt remittances. Thus if T borrows, uses the borrowed money to pay for foreign services and repays the borrowing, there is a remittance under the debt remittance rules even though a direct payment for the services would be exempt. This is anomalous. The reason might be the difficulty of applying services condition B to a relevant debt case; if so it is not a good reason as services condition B is itself misconceived.

12.26.1 *Services relief condition A: Relating to property situated outside UK*

Section 809W(3) ITA provides:

> Condition A is that the relevant UK service relates wholly or mainly to property situated outside the UK.

One needs to identify:
(1) the service
(2) the property (if any) to which the service relates
(3) the situs of the property
(4) if the service relates to property in and outside the UK, whether the property is "mainly" outside the UK

Unless the service is provided in the UK there is no need for foreign

property services relief.[52] In the following discussion it is assumed that the service is provided in the UK.

Situs is relatively straightforward. Section 809W(6) ITA incorporates the CGT situs rules.[53] The other requirements can be more difficult.

EN Clause 23 Sch 7 Remittance Basis Amendment 354 provides some obvious examples:

> 7. Condition A would cover for example, fees paid to a UK bank for managing an individual's overseas investment portfolio. It would cover legal or brokerage fees in respect of offshore assets, such as the legal fees on the sale of a foreign house....

This is considering fees paid by the individual, but the same applies to fees paid by a relevant person, such as a settlor-interested trust:

> 13. Among the sort of payments that Condition A might cover would be fees paid by non-UK resident trustees to UK advisers for advice on
> [1] managing the assets held in the trust or
> [2] non-UK assets the trustees are considering purchasing.
> Accountancy fees for preparing non-UK tax returns would also be covered providing the majority of the accountancy services relates to non UK property.

The RDR Manual provides:

> **34060 - Remittance Basis: Exemptions: Relevant services provided in the UK - location of overseas property** [June 2010]
> In applying these rules it is important to determine exactly what the service relates to, not just to whom it is provided.
> For example, services may be said to be provided for non-resident trustees (a relevant person) in respect of shares that the trust owns in a non-resident company (that would, if it were UK resident, be a 'close' company').[54] However if the service actually relates to that company's underlying UK assets then the service does not relate to property

52 See 11.12.14 (Service provided in the UK).

53 Section 809W(6) ITA provides: "sections 275 to 275C of TCGA 1992 (location of assets) apply for the purposes of subsection (3) as they apply for the purposes of TCGA 1992." See 83.1 (Situs of assets for CGT).

54 The author is confused, here and in the examples which follow, in that whether or not the company is a close company is not relevant; though in the kind of case under consideration the company is likely to be a trust holding company and so would be "close". (In this section I use the expression "close" company loosely, to include a non-resident close company, ie one which would be close if UK resident.)

> 'outside the UK'.
> On the other hand, if the service is in connection with legal obligations between the trustees and the non-resident company in respect of, say the shares that are held, for example updating the share register in the local territory, then this is a service relating to property (the company/shares) wholly situated outside of the UK.
> *Example 1 (Petra)*
> P, a remittance basis user, is a participator in a Jersey company that would, if it were in the UK, be a close company. The company is a relevant person.[55] The company owns a portfolio of UK real estate. UK-based advisors produce an investment and tax report in respect of the company's UK activities; the advisors fees are paid overseas using P's foreign income.

The example is factually far-fetched since one would normally expect the company to pay for advice supplied to the company, and (so far as the expense is deductible) there would in principle be no taxable remittance.[56] Assuming (as the example requires) P did pay for advice supplied to P, then the HMRC analysis is as follows:

> The relevant UK service is the provision of advice in a tax report which relates to the Jersey company's UK activities. It is the UK activities which are the subject of the advice, not the overseas company so the exemption cannot apply. We look through to what the work relates to.

The analysis is wrong. The advice relates to property, not activities, but it relates to UK property and so HMRC are correct to conclude that the foreign services relief does not apply. The moral for tax planning is that P should use foreign advisors (who may subcontract to the UK).

> *Example 1(a)*
> The Jersey company in example 1 above also has a French property, which makes up only 10% of its business.
> UK-based advisors produce a separate marketing report in respect of this property. The advisors fees are paid overseas using P's foreign income. The service provided in the UK - in this case the preparation of the report - relates to a non-UK property. So the exemption at ITA07/s809W would apply, assuming the other conditions are also met.

---

55 The facts that the company is close, and a relevant person, are irrelevant; see above footnote.

56 See 11.14.1 (What is the income?).

This is straightforward.

> **RDRM34040 - Remittance Basis: Exemptions: Relevant services provided in the UK** [December 2011]
>
> ...
>
> *Example 6 (Micho)*
>
> M, a remittance basis user, employs UK-based agents to prepare his US tax return. He uses his foreign income to pay for this service, paying directly into the agent's offshore bank account. This is a service provided in the UK.
>
> Advice on the completion of a non-UK tax return would generally be within the exemption providing the majority of the advice relates to non-UK property; for example:
>
> 1. M's major source of income is UK salary and other UK employment benefits, and most of the work relates to this.
>
> This is service work relating to non-asset related income, eg employment income, so whether UK employment or not there is no property so the exemption at s809W cannot apply.

The HMRC analysis is wrong as an employment contract is property.[57] However the UK contract of employment is likely to be subject to UK law, and so UK situate, and so the conclusion that the services exemption does not apply is correct. The moral, again, is that M should use foreign advisors. The Manual continues:

> 2. Most of the work undertaken is in respect of his UK sources of income and gains, albeit these are small compared to his world wide income and gains.
>
> The service relates to investment income/gains from UK sources so it is outside the exemption.

The HMRC analysis is wrong as the issue is CGT situs, not source, but in practice the two are normally the same.

> 3. Most of the work undertaken is in respect of advice relating to investment income/gains from non-UK sources.
>
> The service provided relates to investment income/gains from non-UK sources, so it is within the exemption if all other conditions are met.

Perhaps more importantly, fees for preparing UK tax returns will similarly be exempt if they relate mainly to non-UK assets.

---

57 *O'Brien v Benson's Hosiery* 53 TC 254.

In some cases, it would be helpful for invoices to identify expressly the property to which the services charged for relate.

12.26.2 *"Wholly or mainly"*

The RDR Manual provides:

> **34040. Relevant services provided in the UK** [December 2011]
> ... For the purposes of applying the exemption "wholly or mainly" means more than half. Wholly or mainly relates to the service provided, not the property, and is, in general, judged by reference to work done, normally time spent.
> However, if advisers value the measurement of work done using a variety of factors, such as, for example a basis of both time and fee rate (eg use of a team specialising in international property), it is appropriate that this should be reflected in the considerations of "wholly or mainly". Other factors may include the fee and time rate if specialist advice was required, split of assets between UK and foreign situs, and the place of research or administration.[58]

The RDR Manual provides an example:

> **34040. Relevant services provided in the UK** [December 2011]
> ... *Example 2 (Ritika)*
> R, a remittance basis user, engages an investment manager based in the UK to manage her investment portfolio which covers assets both in and outside the UK and which changes throughout the year. ... Whether Condition A is met depends on whether the service provided relates wholly or mainly to property situated outside the UK.
> If the advice relates to assets and investments held by R, and/or her obligations that ensue from these (eg completing valuation/ownership details to comply with requirements in the jurisdiction where the assets are based), and the advice relates to both UK-situs and offshore situs assets, it will depend on the split of the assets.
> For example, if she holds, say, 60% foreign assets, and the advice given relates to all of the assets held in the portfolio, then the 'wholly or mainly' test would be met.
> If the advisors are considering changes in R's portfolio or the acquisition of UK assets and their research is UK-centric, then the 'service' provided in the UK is likely to relate to UK property, regardless of what is eventually acquired.

---

58 The same point is made in EN Clause 23 Sch 7 Remittance Basis Amendment 354.

The tax planning moral is that R should instruct the investment managers to invest in non-UK property, but in practice she will want to do that for other reasons anyway; or (better) appoint foreign managers and then R can forget about the requirements of foreign services relief.

12.26.3 *Services relief condition B (payment to foreign bank account)*

Section 809W(4) sets out services relief condition B:

> Condition B is that the whole of the relevant consideration is given by way of one or more payments to one or more bank accounts held outside the UK by or on behalf of the person who provides the relevant UK service.

No relief is available if any part of the fees are paid in any other manner, for instance by way of set-off.

The service provider will generally remit the payment to the UK immediately on receipt. That does not affect the customer's tax position. The customer will not know, and will not be entitled to know, what the supplier does with its own money.

12.26.4 *Services relief condition B: Commentary*

I am unable to see the purpose of services relief condition B. It continues the rule in *Timpson's Executors v Yerbury* applicable under the pre-2008 remittance basis. Perhaps the policy was that nothing which was a remittance under the pre-2008 rules should cease to be a remittance under the ITA remittance rules. If so the policy was misguided. The opportunity should have been taken to create an entirely new and coherent set of rules. As it is, suppliers of services relating to foreign property will need to open foreign bank accounts and the individual must ensure that they pay all the fees into that account; a pointless and inconvenient bureaucratic requirement, but there it is.

In practice it will often be easier to appoint foreign advisors so as not to have to bother about the relief.

12.26.5 *Identifying "the service"*

It is necessary to identify what is the service before identifying what is the property to which the service relates:

(1) There may be one service relating to UK and non UK property, in which case one applies the "wholly or mainly" test.

(2) There may be separate services, one (or more) relating to UK property, and one (or more) relating to foreign property, in which case the services relating to the foreign property only can qualify for exemption.

Of course either analysis may better suit the taxpayer or HMRC, depending on the result of the wholly or mainly test. The VAT distinction between single (though composite) and multiple supplies is applicable here.

The RDR Manual provides:

> **34040. Relevant services provided in the UK** [December 2011]
> ... If
> [1] the services (and thus the consideration due for that service) can be clearly and specifically identified as relating either to UK assets or to non-UK assets and
> [2] it is possible to separately identify this from the fees structure and invoicing,
> the work relating to UK assets will not be regarded as meeting the "wholly or mainly" test at Condition A in section 809W.[59] This does not necessarily require a separate advice letter, report or invoice ("split-invoice") to be issued, as long as the individual is clearly able to identify from the invoice to what his payments relate.

If that is right, a remittance basis taxpayer should not use a UK investment manager, say, as the commission on the purchase of UK situate securities would not be exempt, even if the securities as a whole are mainly non UK situate. A UK investment manager should be used only if no UK situate securities are purchased.

Where there are two or more separate supplies, some exempt, some not, it is necessary to identify the consideration given for each supply. The RDR Manual discusses apportionment:

> **34040. Relevant services provided in the UK** [December 2011]
> If there is a split contract for services relating to UK and non-UK assets you should accept the computations if the split bears a reasonable resemblance to the actuality of service provided.
> Any attempt to use artificial or otherwise unrealistic cost structures, for example to increase the costs attributed to non-UK property advice work against UK-property advice work should be strongly resisted.

---

59 [Author's footnote] It follows that the work relating to the foreign assets does meet the wholly or mainly test (even if the foreign assets are a minority of the whole).

12.26.6 *Exceptions: s.730 and s.87 benefits*

Section 809W(5) ITA provides:

> Subsection (2) does not apply if the relevant UK service relates (to any extent) to the provision in the UK of—
>
> (a) a benefit that is treated as deriving from the income by virtue of section 735, or
>
> (b) a relevant benefit within the meaning of section 87B of TCGA 1992 that is treated as deriving from the chargeable gains by virtue of that section.

I cannot see what the legislation is aiming at here. The following conditions must all be satisfied:

(1) A service is provided in the UK.
(2) The service relates to non-UK property.
(3) The service relates to the provision *in the UK* of a benefit within s.731 or a capital payment for CGT.

Points (2) and (3) appear to be contradictory. I would be grateful to any reader who could suggest a plausible scenario where s.809W(5) could apply. (If there were such a case, one would need to go on to consider why relief should be withdrawn, but in the absence of any such case, it is difficult to address that question.)

It is suggested that s.809W(5) ITA should be repealed.

12.27 Exempt property

Section 809X(1) ITA provides:

> Exempt property which is brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies[60] is to be treated as not remitted to the UK.

There are five categories of exempt property. These relate to:

(1) Works of art with public access
(2) Clothing etc for personal use
(3) Property brought to UK for repair
(4) Temporary importation to UK
(5) Small remittances exemption (£1,000)

---

60 Section 809L(2)(a) applies if "money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person."

The exemption does not extend to remittance condition C or D but they will not often apply.

12.27.1 *"Property"*

Section 809Z6 ITA provides some definitions. Section 809Z6(1) ITA provides:

> This section applies for the purposes of sections 809X to 809Z5.

Section 809Z6(2) ITA provides:

> "Property" does not include money.

This is an artificial definition of "property" in that the word in its natural sense does include money.

In the remittance basis provisions outside s.809X to 809Z5, the word "property" is used without a definition, and does include money.[61] This breaches the somewhat elementary principle of good drafting, not to use the same word with different meanings. The consequence is to cause confusion and make discussion more difficult, as greater care is needed in one's choice of terminology. In this chapter:

- the word "property" (by itself) does include money;
- where I want to refer to "property" in the artificial s.809Z6(2) sense, I use the expression "property (excluding money)".

12.27.2 *"Money"*

Section 809Z6(3) ITA defines money:

> In subsection (2) "money" includes—
> (a) a traveller's cheque,
> (b) a promissory note,
> (c) a bill of exchange, and
> (d) any other—
> (i) instrument that is evidence of a debt, or
> (ii) voucher, stamp or similar token or document which is capable of being exchanged for money, goods or services.

This is an artificial definition of "money" in that none of these five categories would be "money" in the ordinary meaning of the word.

The definition is over-complex, given the limited importance of the

---

61 See 11.12.2 "Property" and "Money".

exempt property rules, but there it is.

The definition is expressed to apply only for the purposes of s.809Z6(2), through which it applies for the purposes of s.809X to s.809Z5. It is also needed in s.809Y, where it is repeated verbatim. (If the definition had been expressed to apply to the whole ITA remittance code the repetition would have been unnecessary.) It also applies in para 86 Sch 7 FA 2008, where it is incorporated by reference. In the remittance basis provisions elsewhere the word *money* is used without any definition, and has its ordinary meaning. So once again, care is needed in ones choice of terminology. In this chapter:

- when the word *money* is used in the artificial s.809Z6(3) sense, I refer to it as "money" with scare quotation marks.
- when the word *money* is used in its ordinary sense, I write it without quotation marks.

12.27.3 *Property "being in the UK"*

Section 809Z6(4) ITA defines "being in the UK":

> References to property being in the UK are references to the property—
> (a) being in the UK after being brought to, or received in, the UK in circumstances in which section 809L(2)(a) applies, or
> (b) being used in the UK in circumstances in which section 809L(2)(a) applies.

Section 809L(2)(a) applies if "money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person."

12.27.4 *"Lost, stolen or destroyed"*

Section 809Z6(5) ITA provides:

> References to property being lost, stolen or destroyed are to the property being lost, stolen or destroyed whilst in the UK.

12.27.5 *"Compensation payment"*

Section 809Z6(6) ITA provides:

> "Compensation payment", in relation to property that has been lost, stolen or destroyed, means any payment of compensation (whether under an insurance policy or otherwise) in respect of the property.

12.27.6 *Compensation payment "released"*

Section 809Z6(7) ITA provides:

> A compensation payment is "released" on the day on which it first becomes available for use in the UK by or for the benefit of any relevant person.

12.27.7 *"Recovered"*

Section 809Z6(8) ITA provides:

> Property that has been lost or stolen is "recovered" on the day on which it becomes available to be used or enjoyed in the UK by or for the benefit of a relevant person.

12.28 Public access rule

12.28.1 *Introduction*

Suppose an individual has purchased works of art out of foreign income or gains. It may be possible to lend these works to UK institutions without a taxable remittance[62] but s.809Z ITA provides an additional exemption for works of art brought to the UK for public display. Perhaps it is intended for the case where the institution is a relevant person. Section 809X(3) ITA provides:

> Property is exempt property if it meets the public access rule (see section 809Z).

Section 809Z(1) ITA provides:

> Property meets the public access rule if conditions B and C are met.

I refer to **"public access conditions B and C"**.

The former conditions A and D were deleted by the FA 2013. Former condition A had restricted the relief (in short) to works of art. It is now available (in short) for any property put on public display at an approved gallery or museum. Former condition D had incorporated VAT rules by reference which required several pages to set out and which the 2012/13 edition of this work had described as "quite pointless".

12.28.2 *Public access condition B (public access)*

Section 809Z(3) ITA provides:

---

62 See 11.12.3 (Property brought to the UK ("brought" limb of condition A)).

Condition B is that—

(a) the property is available for public access at an approved establishment,

(b) the property is to be available for public access at an approved establishment and, in connection with its being so available, is in transit to, or in storage at, public access rule premises, or

(c) the property has been available for public access at an approved establishment and, in connection with its having been so available, is in transit from, or in storage at, public access rule premises.

The key terms here are "available for public access" and "approved establishment." Both are defined.

12.28.3 *Available for public access*

Section 809Z(4) ITA provides:

> Property is "available for public access" at an approved establishment if the property is—
>
> (a) on public display at the establishment,
>
> (b) held by the establishment and made available to the public on request for viewing or for educational use, or
>
> (c) held by the establishment for public exhibition in connection with the sale of the property.

The RDR Manual outlines the statutory provision and continues:

> **34140 - Remittance Basis: Exemptions: Public access rule - Condition B - available for public access - definition** [Jan 2014]
> ... Some property qualifying under the public access rule will be on permanent display at an approved establishment. Other works will have been lent to a museum or art gallery as part of temporary exhibition - perhaps of the work of a particular artist.
> The second bullet above [para (b)] might apply to articles that are too fragile to be on permanent display.
> Prior to 6 April 2012, property brought into the UK for public display in connection with its sale to satisfy the public access rule meant that if that property was sold in the UK a charge arose ....
> Since 6 April 2012, property brought to the UK for public display and subsequently sold in the UK may not result in a UK charge to tax if all of the conditions as set out at s809YA are met ...

12.28.4 *Approved establishment*

Section 809Z(5) ITA defines approved establishment. There are two types:

> An "approved establishment" is—
>
> (a) an approved museum, gallery or other institution within the meaning of Group 9 of Schedule 2 to the Value Added Tax (Imported Goods) Relief Order 1984, or

If one turns to the VAT (Imported Goods) Relief Order 1984 one might expect to find a definition of "approved museum, gallery or other institution." There is none, but article 2 does say that "approved" means approved by the secretary of state. In practice approval is granted by the National Import Reliefs Unit and its practice is set out in HMRC Notice 361 (Importing museum and gallery exhibits free of duty and VAT).

Section 809Z(5) ITA continues:

> An "approved establishment" is ...
>
> (b) any other person, premises or institution designated (or of a description designated) by the Commissioners.

The RDR Manual provides:

> **34130 - Remittance Basis: Exemptions: Public access rule - Condition B - approved establishment - definition** [December 2011]
> ...Any questions about what constitutes an 'approved establishment' or requests for approval as an 'approved establishment' (ITA07/s809Z(5)(b)) should be made to Specialist Personal Tax, PTI Advisory - Remittance Basis Technical Team.
> There is no set form which needs to be completed to request designation as an approved establishment, but all applications should be made in writing and provide sufficient detail about the relevant circumstances relating to making property available for public access, including particulars of the appropriate person, premises or institution wanting to be designated as an approved establishment and full contact details.

12.28.5 *Public access premises*

Lastly, s.809Z(6) ITA defines public access rule premises:

> "Public access rule premises" are—
>
> (a) premises in the UK at which the property is to be, or has been, available for public access, or
>
> (b) other commercial premises in the UK used by the approved establishment for the storage of property in advance of its being,

or after its having been, available for public access at the approved establishment.

12.28.6 *Public access condition C (time limit)*

Section 809Z ITA provides:

(7) Condition C is that, during the relevant period, the property meets condition B for no more than—
(a) two years, or
(b) such longer period as the Commissioners may specify.
(8) "The relevant period" means the period—
(a) beginning with the importation of the property, and
(b) ending when it ceases to be in the UK after that importation.
(8A) But if the property is lost or stolen—
(a) the relevant period ends with the time at which it is lost or stolen, and
(b) a new relevant period begins with its importation or the time at which it is recovered.
(9) "Importation" means the property being brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies.

The definition of "importation" recognises that there may be an importation to the UK to which s.809L(2) does not apply, in which case time does not begin to run. The RDR Manual provides:

34150 Public access rule - Condition C - two year period [December 2011]
...
The relevant period starts with the importation of the property and ends when the property ceases to be in the UK after that importation.
For these purposes, property is treated as brought into the UK or imported if it is brought to the UK in circumstances such that it would be treated as a remittance to the UK within Condition A of s.809L ITA2007 (refer to RDRM33120 Condition A - property) if it were not for this public access rule (or any other rule exempting it) (s.809Z(9) ITA2007).
The two year period will not necessarily start with the importation of the property as the property may not have been available for public access when it was first imported into the UK. For example it may be brought in under the temporary importation rule prior to public access.
Again the two year period will not necessarily end when the property ceases to be in the UK as the property may cease to be available for public access before the property actually leaves the UK. For example it may instead qualify under the repair rule after a period of public access.

Example 1 (Faizal)[63]

F is a remittance basis user. He is asked by a London museum, which is an approved establishment, if he will contribute a vase that he owns to an exhibition that the museum intends to stage. The vase is derived from F's relevant foreign income.

F arranges for the vase to be shipped to the UK from Switzerland. In May the vase is received by the museum and is put into storage for one month after which exhibition begins. The exhibition lasts until the following year in October, at the end of which the vase is returned to Switzerland. The vase has been in the UK for 18 months in total. The vase is exempt property so F has not made a chargeable remittance.

Example 2

The circumstances are the same as Example 1 but this time, at the end of the exhibition, the vase is not returned to Switzerland. Instead, F asks for the vase to be sent to a restorer in Newcastle to be cleaned. The restorer keeps the vase in his business premises for a further eight months [!] and then in the following June F arranges for it to be sent back to Switzerland.

The vase has been in the UK for 26 months. The vase, purchased using F's relevant foreign income is exempt property under the public access rule for the 18 months from its arrival in the UK in May to the October in the following year.

Between October and the following June it is within temporary importation rule (as it is with the repairer) and so remains exempt property. As the 2 year time 'repair' limit at Condition C has not been exceeded the vase remains exempt property throughout and F has not made a taxable remittance.

Any requests under the terms of s.809Z(7)(b) ITA 2007 to extend the period during which property may remain in the UK under the terms of the public access rule should be made to CAR: PTI Advisory, Foreign Income and Remittance Basis Team

12.29 Personal use rule (clothing and jewellery)

Section 809X(4) ITA provides:

> Clothing, footwear, jewellery and watches are exempt property if they meet the personal use rule (see section 809Z2).

Section 809Z2 ITA provides:

> (1) Clothing, footwear, jewellery or watches meet the personal use rule

63 I omit a few irrelevancies in setting out the text of this example.

if they—

(a) are property of a relevant person, and

(b) are for the personal use of a relevant individual.

(2) In this section—

(b) "relevant individual" means an individual who is a relevant person by virtue of section 809M(2)(a), (b), (c) or (d) (the individual with income or gains, or a husband, wife, civil partner, child or grandchild).

The words "*by virtue of section 809M(2)(a), (b), (c) or (d) (the individual with income or gains, or a husband, wife, civil partner, child or grandchild)*" are otiose because an individual who is a relevant person is necessarily a relevant person by virtue of those provisions; but no harm is done.

12.30 Repair rule

Section 809X(5)(a) ITA provides:

Property is exempt property if— ...

(a) the property meets the repair rule (see s.809Z3).

Section 809Z3 ITA provides:

(1) Property meets the repair rule for the whole of the relevant period if, during the whole of that period, the property meets the repair conditions.

(2) Property meets the repair rule for a part of the relevant period if—

(a) during the whole of that part of that period, the property meets the repair conditions, and

(b) during the whole of the other part of that period, or the whole of each other part of that period, the property meets the repair conditions or the public access rule.

(3) Property meets the repair conditions if the property—

(a) is under repair or restoration,

(b) is in transit from a place outside the UK to repair rule premises, in transit between such premises, or in storage at such premises, in advance of repair or restoration, or

(c) is in storage at such premises, in transit between such premises, or in transit from such premises to a place outside the UK, following repair or restoration.

(4) "Repair rule premises" means—

(a) premises in the UK that are to be used, or have been used, for the repair or restoration referred to in subsection (3)(b) or (c), or

(b) other commercial premises in the UK used by the restorer for the

storage of property in advance of, or following, repair or restoration of property by the restorer.

(5) "Restorer" means the person who is to carry out, or has carried out, the repair or restoration referred to in subsection (3)(b) or (c).

(6) Property meets the repair conditions, or the public access rule, during the whole of a period, or the whole of part of a period, if the property meets those conditions or that rule—

(a) on the whole of, or on part of, the first day of that period or part period,

(b) on the whole of, or on part of, the last day of that period or part period, and

(c) on the whole of each other day of that period or part period.

(7) "The relevant period" has the same meaning as in section 809Z.

The relief applies only to the property being repaired. There is no relief for the service of repair. A remittance basis taxpayer would be mad to bring an asset to the UK in order to make use of UK repair or restoration services. Even if the importation of the asset did not give rise to a remittance the payment for the repair would give rise to a remittance. All yacht and similar restoration work, for instance, from remittance basis taxpayers is lost to the UK. But there it is.

12.31 Temporary importation rule

Section 809X(5)(b) ITA provides:

> Property is exempt property if— ...
>
> (b) the property meets the temporary importation rule (see s.809Z4)

Section 809Z4(1) ITA provides:

> Property meets the temporary importation rule if the total number of countable days (subject to any increase under subsection (3B)) is 275 or fewer.

Section 809Z4(2) ITA defines "countable day":

> A "countable day" is a day on which, or on part of which, the property is in the UK by virtue of being brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies (whether the current case, or a past case, when the property was so brought, received or used).

One needs to keep a lifetime record for every asset.

UK days before 2008/09 are not countable days, but that will not

normally matter because chattels received in the UK before 2008 qualify for transitional relief.[64]

Section 809Z4(3) ITA deals with the interaction with other remittance reliefs:

> A day is not a countable day if, on that day or any part of that day—
> (za) the property meets the public access rule,
> (a) the property meets the personal use rule,
> (b) the property meets the repair rule,
> (ba) subsection (3A) applies to the property,
> (c) the notional remitted amount[65] in relation to the property is less than £1,000, or
> (d) all or any part of the income or chargeable gains contained in the property (or from which the property derives) is treated, or continues to be treated, under section 809VA(2), 809Y(8)(b) or 809YC(2) or 809YF(4) as not remitted to the UK.

Section 809Z4(3A)(3B) ITA deal with lost or stolen property:

> (3A) This subsection applies to the property if—
> (a) it is not available to be used or enjoyed in the UK by or for the benefit of a relevant person because it has been lost, stolen or destroyed,
> (b) (if lost or stolen) it has not been recovered, and
> (c) no compensation payment has been released in respect of it.
> (3B) If—
> (a) property that has been lost or stolen is recovered,
> (b) the first day after the day on which it is recovered is a countable day, and
> (c) excluding that countable day there have already been 231 or more countable days in relation to the property,
> the number of countable days specified in subsection (1) is read as being increased by the number necessary for there to be 45 countable days beginning with the countable day mentioned in paragraph (b).

The RDR Manual provides an example:

> **34220 Temporary importation rule - countable days** [June 2010]
> ... Example (Jez)
> On 15 January 2010 J, a remittance basis user, brings a rare oil painting

64 See 11.38 (Transitional relief for property acquired before 2008).

65 This term is defined in s.809Z5 ITA: see 12.32 (Small remittances rule).

into the UK to hang on the wall of his castle. J had purchased the painting two months earlier using his foreign employment income.
On 1 July 2010 he allows the painting to be put on public display at the National Gallery, London. The painting remains on display for six months, until 31 December 2010, after which it is immediately shipped to J's office in Dubai on 1 January 2011.
The conditions for meeting the public access rule for the period 1 July 2010 to 31 December 2010 have been satisfied.

The HMRC analysis is as follows:

Bringing the painting into the UK would ordinarily be a taxable remittance under section 809L but we need to consider the exemption rules. During the period 15 January to 30 June 2009 the painting was not available for public access. This period is immediately followed by a period of public access from 1 July 31 December 2009.
The 15 January to 30 June 2009 period falls to be considered under the temporary importation rule (167 days).
For the period 1 July 2009 to 31 December 2009 the property is exempt property under the public access rule and therefore this period does not count towards the 275 day limit.

12.32 Small remittances rule

Section 809X(5)(c) ITA provides:

Property is exempt property if ...
(c) the notional remitted amount (see s.809Z5) is less than £1,000,

I refer to this as **"the small remittances rule"**.
Section 809Z5(1) ITA defines "notional remitted amount":

The "notional remitted amount", in relation to property, is the amount that would be taken to be remitted to the UK in relation to the property (if section 809X did not apply in relation to the property).

Each item of property qualifies for the £1,000 limit. HMRC agree. The RDR Manual provides:

34180 Exempt Property - Notional remitted amount less than £1,000
[June 2010]
... Example (Jacob)
J, a remittance basis user, uses his foreign income to purchase a mobile phone for £250 a fountain pen for £485, and a new suitcase for £630. He brings all the items back to the UK.
The mobile phone, pen and suitcase all derive from J's foreign income so

> would be taxable as remittances when brought into the UK under ITA07/s809L. However each item's notional remitted amount (£250, £485 and £630 respectively) is under the £1,000 limit, so section 809Z5 provides that the phone, the pen and the suitcase are regarded as exempt property. J has not therefore made a chargeable remittance.
> In J's case the total cost of all the property brought to the UK exceeds £1,000. However the exemption limit applies to each item of property, [unless it forms part of a set.]

£1,000 was quite a substantial limit, but it has not been increased so its real value is gradually being whittled away by inflation.

Section 809Z5(2)(3) formerly continued with rule relating to sets of property which in the 7th edition of this book I described as unnecessary. HMRC presumably agreed, since this was repealed with effect from 22 April 2009.

12.33 Exempt property clawback charge

12.33.1 *Clawback charges*

Section 809Y ITA provides:

> (1) Property that ceases to be exempt property is to be treated as having been remitted to the UK at the time it ceases to be exempt property.
> (2) Property ceases to be exempt property in any of the following cases.

There are three cases where the clawback charge may apply.

12.33.2 *Clawback charge 1: Sale in UK*

Section 809Y ITA provides:

> (3) The first case is where the whole or part of the exempt property is sold or otherwise converted into money[66] whilst it is in the UK.

An exchange for a non-money asset is not a sale.

12.33.3 *Clawback charge 2: Exemption requirements cease to apply*

Section 809Y ITA provides:

> (4) The second case is where the property—
> (a) is exempt property only because it meets one or more of the

66 For the definition see 12.27.2 ("Money").

relevant rules,[67]

(b) ceases to meet that rule, or all of those rules, whilst it is in the UK, and

(c) does not meet any other relevant rule.

12.33.4 *Clawback charge 3: Compensation payment*

Section 809Y(4B) ITA provides:

> The third case is where a compensation payment is released in respect of exempt property that has been lost, stolen or destroyed.

12.33.5 *Exception to clawback cases 1 & 2: Lost property*

Section 809Y(4A) ITA provides:

> (4A) Where exempt property has been lost, stolen or destroyed, the first and second cases do not apply in relation to the property during any period—
>
> (a) beginning with the time at which it was lost, stolen or destroyed, and
>
> (b) (if lost or stolen) ending with the time at which it is recovered.

12.33.6 *Relief for arm's length sale if proceeds taken abroad*

Section 809YA - 809YD ITA provide a relief for arm's length sales where the proceeds are taken out of the UK.

Section 809YA(1) ITA provides:

> Section 809Y(1) does not apply to property if—
>
> (a) it ceases to be exempt property because the whole of it is sold whilst it is in the UK, and
>
> (b) conditions A to F are met.

I refer to **"sales relief conditions A-F"**.

12.33.7 *Sales relief conditions A - C: Unconditional sale to 3rd party*

Section 809YA ITA provides:

---

67 Section 809Y(5) ITA provides:
"relevant rule" means-
(a) the public access rule,
(b) the personal use rule,
(c) the repair rule, and
(d) the temporary importation rule.

(2) Condition A is that the sale is to a person other than a relevant person.
(3) Condition B is that the sale is by way of a bargain made at arm's length.
(4) Condition C is that, once the sale is completed, no relevant person—
(a) has any interest in the property,
(b) is able or entitled to benefit from the property by virtue of any interest, right or arrangement, or
(c) has any right (whether conditional or unconditional) to acquire any interest mentioned in paragraph (a) or ability or entitlement mentioned in paragraph (b).

12.33.8 *Sales relief condition D: Prompt receipt of sale proceeds*

Section 809YA ITA provides:

(5) Condition D is that the whole of the disposal proceeds are released (whether in one go or in instalments) on or before the final deadline.
(6) "The final deadline" is the first anniversary of the 5 January following the tax year in which the property ceases to be exempt property (within the meaning of section 809Y).

12.33.9 *Sales relief condition E & F: Proceeds taken outside UK or invested*

Section 809YA ITA provides:

(7) Condition E is that—
(a) the whole of the disposal proceeds are taken offshore or used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which the proceeds are released, or
(b) if the disposal proceeds are paid in instalments, each instalment is taken offshore or used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which the instalment is released.
(8) But if any of the disposal proceeds are released in the period of 45 days ending with the final deadline, Condition E is satisfied, as respects those proceeds, only if they are taken offshore or used by a relevant person to make a qualifying investment on or before the final deadline.
(9) Condition F is that, if Condition E is satisfied wholly or in part by using disposal proceeds to make a qualifying investment, the remittance basis user makes a claim for relief under section 809YC(2) on or before the first anniversary of the 31 January following the tax year in which the property is sold.

Section 809YB ITA provides power to extend the time limit for investment:

> (1) An officer of HMRC may agree in a particular case to extend any period within which disposal proceeds (or instalments) must be taken offshore or used by a relevant person to make a qualifying investment in order to satisfy Condition E.
> (2) The power to agree to an extension is exercisable only in exceptional circumstances and only if the remittance basis user requests such an extension.

12.33.10 *"Released"*

Section 809YA ITA(10) provides:

> For the purposes of this section, proceeds or instalments are "released" on the day on which they first become available for use by or for the benefit of any relevant person.

12.33.11 *Anti-avoidance*

Section 809YA(11) ITA provides:

> This section does not apply if the sale is made as part of or as a result of a scheme or arrangement the main purpose or one of the main purposes of which is the avoidance of tax.

12.33.12 *The relief*

Section 809YC ITA provides:

> (1) This section has effect if section 809Y(1) does not apply to property by virtue of section 809YA.
> (2) The income and gains treated under section 809X as not remitted to the UK continue to be treated after the sale as not remitted to the UK even though the property has ceased to be exempt property.
> (3) But nothing in subsection (2) prevents anything done in relation to any part of the disposal proceeds after that part is taken offshore (or used to make a qualifying investment) from counting as a remittance of the underlying income or gains to the UK at the time when the thing is done.
> (4) Treat the disposal proceeds as containing or deriving from an amount of each kind of income and gain mentioned in section 809Q(4)(a) to (h) equal to the amount of that kind of income or gain contained in the exempt property when it was brought to, or received or used in, the UK (as mentioned in section 809X).

(5) Where Condition E was met by using the disposal proceeds to make a qualifying investment—
(a) the business investment provisions apply to the income and gains that continue, by virtue of subsection (2), to be treated as not remitted as they apply to income or gains that are treated under section 809VA(2) as not remitted, and (b) if the investment was made using more than just the disposal proceeds, treat only the part of the investment made using the disposal proceeds as "the investment" for the purposes of those provisions.

Section 809YD ITA provides:

(1) This section applies to an individual ("P") if—
- (a) a chargeable gain (but not a loss) accrues to a person on a sale of exempt property,
- (b) but for section 809YA, section 809Y(1) would have applied to the property by virtue of the sale, and
- (c) P is either—
  - (i) the person to whom the gain accrues, or
  - (ii) a person to whom a part of the gain is treated as accruing under section 13 of TCGA 1992 (members of non-resident companies).

(2) The relevant UK gain is to be treated for the purposes of this Chapter as if—
- (a) it were a foreign chargeable gain of P, and
- (b) in the case of section 809E, it were not part of P's UK income and gains.

(3) Accordingly, if section 809F applies to P for the applicable tax year, the relevant UK gain is charged in accordance with section 12 of TCGA 1992 as if it were a foreign chargeable gain.

(4) The relevant UK gain is—
- (a) in a case falling within subsection (1)(c)(i), the gain accruing to P,
- (b) in a case falling within subsection (1)(c)(ii), the part of the gain treated as accruing to P.

(5) The applicable tax year is —
- (a) if section 10A of TCGA 1992 (temporary non-residents) applies in P's case and the relevant UK gain is within subsection (2) of that section, the year of return as defined in that section,
- (b) otherwise, the tax year in which the relevant UK gain accrues.

(6) In applying this Chapter to the relevant UK gain—

(a) treat the amount of any gains mentioned in section 809Q(4)(e) contained in the disposal proceeds by virtue of section 809YC(4) as increased by the amount of the relevant UK gain,
(b) disregard section 809U, and
(c) anything done in relation to any part of the disposal proceeds before the part is taken offshore or used to make a qualifying investment (or both) does not count as a remittance to the UK of any of the relevant UK gain.

(7) The relevant UK gain is to be treated for the purposes of the following provisions of TCGA 1992 as if it fell within the definition of foreign chargeable gains in section 12(4) of that Act—
(a) section 10A,
(b) section 12,
(c) section 14A, and
(d) sections 16ZB to 16ZD.

(8) This section has effect despite section 14A(2) of TCGA 1992.

(9) This section does not apply with respect to a chargeable gain if P gives notice to HMRC under this subsection.

(10) A notice under subsection (9)—
(a) must be in writing and must identify the gain in question,
(b) must be given on or before the first anniversary of the 31 January following the applicable tax year, and
(c) may not be revoked after that first anniversary.

This presumably reflects some effective lobbying by the auctioneer industry. Of course it is far too complicated.

12.33.13 *Exempt property used to make investment*

Section 809Y ITA provides:

(6) Subsection (1) does not apply to property that ceases to be exempt property by virtue of the first or second case if—
(a) the property, or anything into which it is converted,[68] is used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which it ceased to

68 This is given a commonsense definition in s.809Y(7): "The reference in subsection (6)(a) to anything into which property is converted is—
(a) if the property is disposed of, the disposal proceeds, and
(b) if the property is converted into money in some other way, the money into which it is converted, (including where the disposal or conversion occurs after the property ceases to be exempt property)."

be exempt property, and

(b) the remittance basis user[69] makes a claim for relief under this subsection on or before the first anniversary of the 31 January following the tax year in which the property ceases to be exempt property.

Section 809Y(8) ITA incorporates the investment remittance relief rules:

(8) If subsection (1) does not apply by virtue of subsection (6)—

(a) the property (or thing into which it was converted) used to make the investment is to be treated as containing or deriving from an amount of each kind of income and gain mentioned in section 809Q(4)(a) to (h) equal to the fixed amount,

(b) the income or gains treated under section 809X as not remitted to the UK continue to be treated as not remitted to the UK even though the property has ceased to be exempt property, and

(c) the business investment provisions[70] apply to the income and gains as they apply to income or gains treated under section 809VA(2) as not remitted to the UK.

(9) "The fixed amount" is the amount of that kind of income or gain contained in the property when it was brought to, or received or used in, the UK (as mentioned in section 809X).

Section 809Y(10) ITA provides an apportionment rule:

If the investment is made using more than just the property (or thing into which it was converted), treat only the part made using the property (or thing into which it was converted) as "the investment" for the purposes of the business investment provisions.

12.33.14 *Exempt property qualifies for Gift to the Nation relief*

For completeness, s.809YE ITA provides:

(1) Section 809Y(1) does not apply to property if—

(a) it ceases to be exempt property in the second case mentioned in that section, and

(b) by no later than the time when it ceases to be exempt property, it has been donated in the circumstances described in paragraph 1 of Schedule 14 to FA 2012 (gifts to the nation).

---

69 Defined s.809Z10: "In this Chapter "the remittance basis user", in relation to income or chargeable gains of an individual, means that individual."

70 Defined s.809Z(10) ITA: "In this Chapter "the business investment provisions" means sections 809VA to 809VO".

(2) Where section 809Y(1) does not apply to property by virtue of this section, the property is to continue to be treated as not remitted to the UK even though it no longer meets any of the relevant rules

12.33.15 *Compensation taken out of UK or invested*

Section 809YF ITA provides:

(1) Section 809Y(1) does not apply to property if—
- (a) it ceases to be exempt property because a compensation payment in respect of it is released, and
- (b) conditions A and B are met.

(2) Condition A is that the whole of the compensation payment is taken offshore or used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which the payment is released.

(3) Condition B is that, if Condition A is satisfied wholly or in part by using the compensation payment to make a qualifying investment, the remittance basis user makes a claim for relief under subsection (4) on or before the first anniversary of the 31 January following the tax year in which the payment is released.

(4) If section 809Y(1) does not apply to property by virtue of subsection (1), the income and gains treated under section 809X as not remitted to the UK continue to be treated after the compensation payment is released as not remitted to the UK even though the property has ceased to be exempt property.

(5) But nothing in subsection (4) prevents anything done in relation to any part of the compensation payment after that payment is taken offshore (or used to make a qualifying investment) from counting as a remittance of the underlying income or gains to the UK at the time when the thing is done.

(6) Treat the compensation payment as containing or deriving from an amount of each kind of income and gain mentioned in section 809Q(4)(a) to (h) equal to the amount of that kind of income or gain contained in the exempt property when it was brought to, or received or used in, the UK (as mentioned in section 809X).

(7) Where Condition A was met by using the compensation payment to make a qualifying investment—
- (a) the business investment provisions apply to the income and gains that continue, by virtue of subsection (4), to be treated as not remitted as they apply to income or gains that are treated under section 809VA(2) as not remitted, and

(b) if the investment was made using more than just the compensation payment, treat only the part of the investment made using the payment as "the investment" for the purposes of those provisions.

CHAPTER THIRTEEN

MIXED FUNDS

13.1 Mixed funds: Introduction

It is helpful first to outline the problems which the mixed fund rules are intended to address. Suppose a person holds a fund which includes different types of income/gains, or income/gains of different years:

(1) If the person remits part of the fund to the UK, it is necessary to know:
   (a) which type of income or gains have been remitted (as different rates may apply)
   (b) which year's income or gains have been remitted (as different rates and different rules may apply to income of different years).

(2) If the person transfers some assets out of the fund, without remitting the assets to the UK, there is no immediate tax charge. However it is necessary to know which income/gains are regarded as in the remaining fund, and which in the transferred assets, if there are later remittances of the remaining fund or the transferred assets.

The mixed fund rules are intended to answer these questions.

I coin the following terminology:

"The ITA mixed fund rules" means the rules set out in s.809Q to 809S ITA.

"The pre-2008 mixed fund rules" means the rules applicable before 2008/09.

13.1.1 *Cross references*

The following points are considered elsewhere:

11.40 (Remittance basis planning points).
22.26 (OWR mixed funds rule).
49.5.4 (Entrepreneurs' relief: mixed fund rules)
77.6 (Remittances from joint accounts).

13.2 Definition of "mixed fund"

Section 809Q(6) ITA provides:

> In this section "mixed fund" means money or other property which, immediately before the transfer, contains or derives from—
>
> (a) more than one of the kinds of income and capital mentioned in subsection (4), or
>
> (b) income or capital for more than one tax year.

This is only a section-wide definition so the drafter has to repeat it in s.809R(7) ITA:

> In this section 'mixed fund' means money or other property containing or deriving from—
>
> (a) more than one of the kinds of income and capital mentioned in section 809Q(4), or
>
> (b) income or capital for more than one tax year.

This is not quite a verbatim repetition, but the omission of the words "immediately before the transfer" does not seem material.

One must first identify what is the fund, and then identify the constituents which it contains (or derives from).

13.2.1 *Identifying the fund*

The typical mixed fund is a bank account with diverse entries.

A mixed fund need not necessarily be a bank account. If money representing a mixed fund is invested in an asset, the asset is the mixed fund. For instance, if a person uses foreign income and capital to purchase a foreign property, or shareholding, the foreign property or shareholding is a mixed fund.

A portfolio of securities may constitute a single fund if it is managed by one investment manager and held under one account name and number. In some cases it may be unclear whether a number of securities should be classified as distinct assets or together constitute a single fund; any reasonable analysis consistently adopted ought to be acceptable.

Funds are distinct, ie, not mixed, if they are held in separate accounts or sub-accounts at one bank. HMRC agree. The RDR Manual provides:

> **35230 Remittances from mixed funds** [May 2012]
>
> *No Mixed Fund*
>
> Also, a mixed fund does not exist just because the individual has several

> accounts with the same banking institution, if each account is separately constituted and contains only one of the relevant types of income from only one year. This will usually include bank accounts set up as sub-accounts under an "umbrella" agreement.
> If income and capital sources from a tax year are maintained separately (sometimes referred to as "kept clean" or "clean capital") no mixed fund is created, and so these rules will not apply.[1]

This is consistent with the banking law background:

> A person's claim to money in his or her account is identifiable by an account name and/or number, and subject to the bank's right to combine accounts,[2] is distinct from any other claim he or she may have against the same bank.[3]

Accordingly one can in principle avoid mixing income with other funds by arranging that the income is paid to a separate bank account. If one does that, it will be possible to remit the other funds, keeping the income unremitted. The position is different for capital gains. A capital gain has no separate identifiable existence so the proceeds of a disposal giving rise to a gain are always a mixed fund.[4] For accrued income profits see 37.9 (AIP remittance basis).

13.2.2 *Interested credited to account and immediately withdrawn*

The RDR Manual provides:

> **33560. Banking Issues** [December 2011]
> *Interest credits to a capital account*
> Often interest on a maturing deposit is credited to the same account comprising the principal capital investment, but under the bank's normal

---

1 The Manual then gives a straightforward example: "For example, an individual maintains three separate accounts with the same offshore institution:
Account A into which he pays his relevant foreign earnings for the tax year
Account B into which he pays some inherited money (clean capital)
Account C into which he pays some relevant foreign income for the tax year
As long as these accounts do not become mixed funds, the individual can bring money into the UK from Account B and that will be accepted as a being a transfer of "clean" capital, and so will not be a taxable remittance."

2 [Footnote original] See generally J Wadsley and GA Penn, *Penn and Shea's Law Relating to Domestic Banking* (2nd ed., 2000), para 11-083 *et seq*.

3 Fox, *Property Rights in Money* (2008), para 1.108.

4 See 11.14.2 (What is the gain?).

> internal system the interest is then immediately and identifiably transferred to an income account.
> Where a mixed fund such as this is created fleetingly by an operation of the banking system, HMRC will accept that the interest credit will not taint the principal and so the mixed fund rules in s809Q to s809S do not apply.

At first sight this practice may seem concessionary. However, it is a sensible commercial construction of the statute to say that a sum only "fleetingly" in an account should not to be said to become "mixed".

13.3 Ingredients of a mixed fund

We turn to s.809Q(4) ITA to see what kinds of income and capital may make up a mixed fund:

> The kinds of income and capital are—
> (a) employment income (other than income within para (b), (c) or (f)),
> (b) relevant foreign earnings (other than income within para (f)),
> (c) foreign specific employment income (other than income within para (f)),
> (d) relevant foreign income (other than income within para (g)),
> (e) foreign chargeable gains (other than chargeable gains within para (h)),
> (f) employment income subject to a foreign tax,
> (g) relevant foreign income subject to a foreign tax,
> (h) foreign chargeable gains subject to a foreign tax, and
> (i) income or capital not within another paragraph of this subsection.

I refer to these nine categories as "**the mixed fund categories**". The order in which these categories is placed is important: I call this "**the mixed fund priority order**".

A remittance basis taxpayer needs to classify every mixed fund into these nine categories for 2008/09 and for every subsequent year. This requires vastly more record keeping than the pre-2008 mixed fund rules.

Income which accrues to a non-resident individual is not RFI[5] (even foreign interest, dividends, etc which would be RFI if received by a UK

5 Because it does not meet the condition in s.830(1)(b) ITTOIA; see 10.3.1 (Relevant foreign income).

resident). Similarly, earnings received by a non-resident are not employment income.[6] Such income falls into the bottom category (i).

Chargeable gains from non-UK assets which accrue to a non-resident individual *are* foreign chargeable gains.[7] Such gains will fall within category (e) or (h) depending on whether they are subject to a foreign tax.

What if a UK resident individual receives foreign income or gains which are taxable in the year of receipt, either because they are remitted to the UK or because no remittance basis claim is made in that year? The sums do not cease to be foreign income or gains, so they remain in their relevant categories (a) to (h).

13.3.1 *"Foreign tax"*

I refer to income/gains which are subject to a foreign tax as **"foreign-taxed"**. This affects the mixed fund categories in the following way:

	Not foreign-taxed	**Foreign-taxed**
RFE	para (b)	para (f)
FSEI	para (c)	para (f)
RFI	para (d)	para (g)
Gains	para (e)	para (h)

The object is to increase UK tax by deferring the remittance of foreign-taxed items, so deferring foreign tax credits. This (surely unfair) policy comes at a considerable cost in complexity, since it roughly doubles the number of mixed fund categories and the record keeping.

Section 809Q(5) ITA defines "foreign tax":

> In subsection (4) "foreign tax" means any tax chargeable under the law of a territory outside the UK.

At first I thought that tax deducted under the EU Saving Directive is not "foreign tax". The EU is not a territory outside the UK. But if tax is deducted in, say, Luxembourg, the better view is that the tax is chargeable under the law of *Luxembourg* so the tax is a foreign tax. That is clearly so if the EU directive does not have direct effect in the MS concerned and it would be strange if the position were different when the directive does have direct effect.

---

6 Unless within s.27 ITEPA (duties performed in UK or overseas Crown employment).

7 See 49.1 (Territorial scope of CGT) and 10.3.5 (Foreign chargeable gains).

13.3.2 *"Subject to a foreign tax"*

The RDR Manual provides:

> **35240 Remittances from mixed funds - Identifying nature of remittance** [June 2010]
>
> ...
>
> Occasionally UK resident remittance basis users' UK employment income may be "subject to foreign tax", that is to say another country (usually their country of nationality or citizenship) will also tax them on this income. In these cases HMRC will accept that the individual's UK source employment income may still be regarded as within para (a) in the mixed fund, unless the individual requests otherwise, in which case it will remain to fall within para (f) as employment income subject to a foreign tax.

This is obviously an extra-statutory concession.

> This is only relevant where the other country has in fact subjected the UK employment income under consideration to their tax. In some cases no tax will, in fact, have been due in or paid to the other country due to various exemptions and provisions, (for example the US has a "foreign earned income exclusion" provision to employment income below a certain level), so the UK employment income will be within para (a) anyway.

This is not correct as it is not consistent with the approach applied elsewhere in deciding what is "subject to tax": see 59.17 ("Subject to tax"). But it will normally suit taxpayers to treat UK earnings as category (a) so it will not be contested.

13.3.3 *Category (i)*

This is the residuary category. Section 809Q(8) ITA provides:

> References in this section and section 809R to anything deriving from income or capital within para (i) of subsection (4) do not include—
>
> (a) income or gains within any of paras (a) to (h) of that subsection, or
>
> (b) anything deriving from such income or gains.

13.3.4 *Finding the income and capital for the year*

Step 1 in s.809Q(3) ITA provides:

> For each of the categories of income and capital in paragraphs (a) to (i)

> of subsection (4), find (applying section 809R) the amount of income or capital of the individual for the relevant tax year in the mixed fund immediately before the transfer.

Income for a tax year is not difficult to identify, for the tax system requires one to attribute income to a tax year and provides rules for that purpose. Chargeable gains for a tax year are not difficult to identify, for gains accrue on a particular date, and in particular cases there are rules to identify the date.

What about "other capital" falling within category (i)? That would include:

(1) gifts, inheritance
(2) borrowed money
(3) gains on disposals of UK situate assets
(4) chargeable event gains on a surrender of a life policy

It is considered chargeable event gains are capital for the year in which they are received. Suppose:

(1) Year 1: T uses RFI to purchase a foreign policy for £1m.
(2) Year 5: T surrenders the policy for £2m and realises a chargeable event gain of £1m (taxable on the arising basis[8]). T remits £1m.

The £1m remitted is category (i) (other income or capital) of year 5, so there is no further charge on the remittance.[9]

13.3.5 *Derived property*

Section 809R ITA provides:

> **809R Section 809Q: composition of mixed fund**
> (1) This section applies for the purposes of step 1 of section 809Q(3) (composition of mixed fund).
> (2) Treat property which derives wholly or in part (and directly or indirectly) from an individual's income or capital for a tax year as consisting of or containing that income or capital.

At first I thought that was self-evident but in fact it is useful. For instance, suppose:

(1) Year 1: T receives £1m capital and uses it to purchase shares.
(2) Year 2: T sells the shares for £2m.

---

8 See 33.4.4 (Remittance basis taxpayer).

9 The £1m remitted is not regarded as derived from the RFI: see 11.15.11 (Income from income/gains).

The proceeds of sale are a mixed fund consisting of:
(1) Gains of year 2; and
(2) Capital of year 1 (not year 2) because that derives from the capital of year 1.

HMRC agree: see the example of Jason in 13.4.8 (Single transfer: mixed fund RFI of earlier years and gain of later year).

13.3.6 *Income/gains used to pay debt*

Section 809R(3) ITA provides:

> If a debt relating (wholly or in part, and directly or indirectly) to property[10] is at any time satisfied (wholly or in part) by—
>
> (a) an individual's income or capital for a tax year, or
>
> (b) anything deriving (directly or indirectly) from such income or capital,
>
> from that time treat the property as consisting of or containing the income or capital if and to the extent that it is just and reasonable to do so.

Suppose:
(1) T borrows from L and receives "the borrowed money" outside the UK.
(2) T uses RFI to repay the debt to L so T retains the borrowed money.

The debt is not a relevant debt, so the repayment at stage (2) is not a taxable remittance under the debt remittance rules.

In the absence of a statutory provision, one would not say that the borrowed money was derived from the RFI, or that the borrowed money consists of or contains the RFI.[11] However the debt relates to the borrowed money. So the borrowed money is treated as consisting of or containing the RFI so far as is just and reasonable. When is that just and reasonable? The drafter has given up here. It seems just and reasonable in principle, and it would certainly be so in cases of avoidance. Cases where it is not just and reasonable to apply the rule in s.809R(3) include:
(1) If the sums involved were small.
(2) If it was not practical to make that tracing exercise (but the requirement that the debt must "relate" to the borrowed money is

---

10 The phrase "debt relating ... to property" is taken from the definition of relevant debt; for discussion, see 11.18 (Debt "relating" to property).

11 See 11.15.10 (Income/gains used to pay debt).

another route to the same destination).

(3) If the borrowed money was received in the UK. Then the debt would be a relevant debt and the repayment at stage (2) is a taxable remittance under the debt remittance rules. The taxpayer cannot argue that s.809R(3) prevents a remittance under the debt remittance rules as that would not be just and reasonable.

The same analysis applies if:

(1) T purchases a non-UK asset from L and left the purchase price outstanding as a debt.

(2) T uses the RFI to repay the debt.

The asset will be treated as consisting of or containing the RFI so far as just and reasonable.

It is curious that the rule in s.809R(3) has been made a part of the mixed fund rules, and does not apply more generally.

13.4 Onshore transfer mixed fund rule

13.4.1 *Scope of onshore transfer rule*

Section 809Q ITA provides:

> (1) This section applies for the purposes mentioned in subsection (2) ...
> (2) The purposes referred to in subsection (1) are—
> (a) determining whether condition B in section 809L is met, and
> (b) if it is met, determining (under section 809P) the amount of income or chargeable gains remitted.

Accordingly, the onshore transfer mixed fund rule does not apply for the purposes of remittance basis conditions C or D. This was presumably because those conditions do not always require the use of foreign income/gains or property derived from it. Fortunately conditions C and D will not often apply. So in practice the mixed fund rule applies for most remittance purposes. When conditions C and D are in point, one applies the pre-2008 mixed fund case law rules.

13.4.2 *Onshore transfer*

Section 809Q(1) ITA provides:

> This section applies ... where condition A in section 809L is met[12] and—

12 That is, in short, property is received/used in the UK by a relevant person; see 11.12 (Remittance condition A (link to UK)).

> (a) the property or consideration for the service is (wholly or in part), or derives (wholly or in part, and directly or indirectly) from, a transfer from a mixed fund, ...

The drafter has confused a transfer and the property transferred by a transfer, but the meaning is clear enough. Expanding this, and focussing on property rather than services (which are rarer) it should be read to mean:

> This section applies ... where condition A in section 809L is met and—
> (a) [i] the property ... is (wholly or in part) ... [property transferred by] a transfer from a mixed fund, or
> [ii] the property ... derives (wholly or in part, and directly or indirectly) from [property transferred by] a transfer from a mixed fund...

The next part of s.809Q(1) deals with debt remittances:

> This section applies ... where condition A in section 809L is met and—
> (b) a transfer from a mixed fund, or anything deriving (wholly or in part, and directly or indirectly) from such a transfer, is used as mentioned in section 809L(3)(c).

I refer to a transfer to which s.809Q applies as an **"onshore transfer"**. That term is not always apt[13] but it will do as a short label. The RDR Manual occasionally uses the expression "remittance transfer".

In short, there is an onshore transfer in six cases:

(1) A relevant person receives UK property which:
  (a) is from a mixed fund or
  (b) is derived from a mixed fund
(2) A relevant person receives a UK service, consideration for which:
  (a) is from a mixed fund or
  (b) is derived from a mixed fund
(3) A relevant debt:
  (a) is satisfied out of a mixed fund or
  (b) is satisfied out of a fund derived from a mixed fund.

13.4.3 *"Transfer"*

Transfer is not defined but the context shows that it means any payment

13 For instance, the transfer of funds received in the UK by a non-relevant person counts as an offshore transfer and not as an onshore transfer.

or transfer out of the mixed fund, whether or not for consideration.

If (the usual case) the mixed fund is a bank account, it means any withdrawal from the account.

If the mixed fund is a managed account of securities, it would not include sales or purchases within the account, but any transfer out of the account.

Section 809Q(7) ITA defines the amount of a transfer:

> References in this section to the amount of the transfer include the market value of it.

Strictly one must value the asset transferred, not the transfer, but the meaning is clear.

13.4.4 *Onshore transfer mixed fund rule*

We can turn at last to the rule itself. Section 809Q(3) ITA provides:

> The extent to which the transfer is of the individual's income or chargeable gains is to be determined as follows.

Section 809Q(3) ITA then sets out five steps. It is easier to follow the steps if one has an example in mind. Suppose T (a remittance basis taxpayer) receives £100 per annum of each of the mixed fund categories and pays them into one mixed fund:

Category	**Type of income**	**Year 1**	**Year 2**
Para (a)	UK earnings	£100	£100
Para (b)	relevant foreign earnings	£100	£100
Para (c)	FSEI	£100	£100
Para (d)	relevant foreign income	£100	£100
Para (e)	foreign chargeable gains	£100	£100
Para (f)	foreign-taxed earnings	£100	£100
Para (g)	foreign-taxed RFI	£100	£100
Para (h)	foreign-taxed gains	£100	£100
Para (i)	other income and capital	£100	£100

There is therefore a mixed fund of £1800. Suppose T remits nothing in year 1 and £1,000 to the UK in year 2. This is an onshore transfer. One follows the steps thus:

> *Step 1*
> *For each of the categories of income and capital in paras (a) to (i) of subsection (4), find (applying section 809R) the amount of income or capital of the individual for the relevant tax year in the mixed fund immediately before the transfer.*

"The relevant tax year" is the tax year in which the transfer occurs.

In the example, the relevant tax year is year 2. I consider this further below but for present purposes assume that "the amount of income or capital of the individual in the mixed fund immediately before the transfer" is as set out in the table above.

Step 2
Find the earliest paragraph for which the amount determined under step 1 is not nil.

The earliest paragraph is para (a) and the amount determined under step 1 is £100.

If that amount does not exceed the amount of the transfer, treat the transfer as containing the income or capital within that paragraph (and for that tax year).

T's transfer is treated as containing £100 employment income category (a) for year 2.

Otherwise, treat the transfer as containing the relevant proportion of each kind of income or capital within that paragraph (and for that tax year).
"The relevant proportion" is the amount of the transfer divided by the amount determined under step 1 for that paragraph.

(Had the transfer been (say) £50 then the relevant proportion would have been £50 ÷ £100 = 50% so the transfer would have been treated as containing £50 employment income category (a) for year 2.)

Step 3
Treat the amount of the transfer as reduced by the amount taken into account under step 2.

The amount of the transfer is reduced to £900.

Step 4
If the amount of the transfer (as reduced under step 3) is not nil, start again at step 2.
In step 2, read the reference to the earliest paragraph of the kind mentioned there as a reference to the earliest such paragraph which has not previously been taken into account under that step in relation to the transfer.

Following this iterative process a total of nine times, the transfer is treated

as containing:

(a)	employment income	£100
(b)	relevant foreign earnings	£100
(c)	foreign specific employment income	£100
(d)	relevant foreign income	£100
(e)	foreign chargeable gains	£100
(f)	foreign-taxed employment income	£100
(g)	foreign-taxed RFI	£100
(h)	foreign-taxed gains	£100
(i)	other income and capital	£100
Total		**£900**

The amount of the original £1,000 transfer is by this stage treated as reduced to £100. We move to the next step:

> *Step 5*
> *If the amount of the transfer (as reduced under step 3) is not nil once steps 2 and 3 have been undertaken in relation to all paragraphs of subsection (4) for which the amount determined under step 1 is not nil, start again at step 1.*
> *In step 1, read the reference to the relevant tax year as a reference to the tax year immediately before the last tax year for which step 1 has been undertaken in relation to the transfer.*

Thus we repeat step 2 a last and tenth time, reading "the relevant tax year" to mean year 1. So the transfer of £1,000 from the mixed fund is treated as being:

Category	**Type of income**	**Year**	**Amount**
Para (a)	UK earnings	2	£100
Para (b)	relevant foreign earnings	2	£100
Para (c)	FSEI	2	£100
Para (d)	relevant foreign income	2	£100
Para (e)	foreign chargeable gains	2	£100
Para (f)	foreign-taxed earnings	2	£100
Para (g)	foreign-taxed RFI	2	£100
Para (h)	foreign-taxed gains	2	£100
Para (i)	other income and capital	1	£100

In order to reach this answer for one single transfer we have had to carry out 37 steps.[14] Yet it will be common for there to be hundreds or

14 Steps 1–4 were each carried out 9 times and step 5 once.

thousands of transfers from any mixed fund.

13.4.5 *Commentary: drafting style*

The effect of the onshore transfer mixed fund rule is that transfers from a mixed fund are treated as being made in the mixed fund priority order, taking more recent years before earlier years. Why didn't the statute simply say so? For a discussion of the drafting style, see 51.10.7 (Commentary: step-based drafting). But the fundamental problem is not the drafting, but conception of the mixed fund rule.

13.4.6 *HMRC examples: onshore transfers*

The RDR Manual provides examples. I set them out more or less verbatim, but rearrange and omit some irrelevant detail for clarity.

13.4.7 *One transfer from mixed fund: RFE, RFI and UK EI of one year*

The first example involves a single onshore transfer out of a mixed fund containing RFE, RFI and UK employment income of one year.

RDRM 35280 Example 1 (Amelia) [June 2010]
A, a remittance basis user, has an offshore account with mixed funds as follows:
- foreign earnings from two employers totalling £40,000 per month, half of which is subject to foreign tax [mixed fund categories (b) and (f)]
- relevant foreign income of £10,000 per quarter, which is not subject to foreign tax [mixed fund category (d).
- some of her UK employment income (£50,000 per month) which has already been subject to tax in the UK is paid into the same offshore bank account [mixed fund category (a)]

On 15 October 2010 A purchases an aircraft for £460,000, which she brings to the UK.

Since the account was opened in the tax year, we have an account with 20 credits and one debit (an onshore transfer) thus:

2009-10		**Credit (Debit)**	**Balance**	**Category**
30 Apr	UK salary	£50,000	£50,000	(a)
30 Apr	Overseas salary NFT[15]	£20,000	£70,000	(b)
30 Apr	Overseas salary FT[16]	£20,000	£90,000	(f)
31 May	UK salary	£50,000	£140,000	(a)
31 May	Overseas salary NFT	£20,000	£160,000	(b)
31 May	Overseas salary FT	£20,000	£180,000	(f)
2 Jun	RFI	£10,000	£190,000	(d)
30 Jun	UK salary	£50,000	£240,000	(a)

15 Not foreign-taxed.
16 Foreign-taxed.

30 Jun	Overseas salary NFT	£20,000	£260,000	(b)
30 Jun	Overseas salary FT	£20,000	£280,000	(f)
31 Jul	UK salary	£50,000	£330,000	(a)
31 Jul	Overseas salary NFT	£20,000	£350,000	(b)
31 Jul	Overseas salary FT	£20,000	£370,000	(f)
31 Aug	UK salary	£50,000	£420,000	(a)
31 Aug	Overseas salary NFT	£20,000	£440,000	(b)
31 Aug	Overseas salary FT	£20,000	£460,000	(f)
2 Sept	RFI	£10,000	£470,000	(d)
30 Sept	UK salary	£50,000	£520,000	(a)
30 Sept	Overseas salary FT	£20,000	£540,000	(f)
30 Sept	Overseas salary NFT	£20,000	£560,000	(b)
15 Oct	Aircraft purchase	(£460,000)	£100,000	

Step 1 Identify the "amount of transfer" in the relevant year (2010-11) £460,000
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

Para (a) UK employment income	£300,000
Para (b) Relevant foreign earnings (not subject to a foreign tax)	£120,000
Para (d) RFI (not subject to a foreign tax)	£20,000
Para (f) Employment income subject to a foreign tax	£120,000

Step 2 Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund: Para (a) £300,000

Step 3 Where the amount transferred is greater than the amount identified at Step 2 the amount transferred is treated as reduced by the amount identified in Step 2.

£460,000
-£300,000
£160,000

Step 4 Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.

Step 2 repeated: Para (b) £120,000
Step 3 repeated Amount transferred further reduced to: £40,000

Step 4 In the order of preference listed above repeat Steps 2 and 3.

Step 2 repeated: Para (d) £20,000
Step 3 repeated Amount transferred further reduced to: £20,000

Step 4 In the order of preference listed above repeat Steps 2 & 3.

Step 2 Para (f) £120,000

Step 3 If the amount at Step 2 is equal to or more than the remaining amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain £nil

There has been a transfer to the UK of £460,000. Of this, £300,000 is from UK employment income which has already been taxed, so will not be taxed again. There have also been taxable remittances of A's relevant foreign earnings (£140,000 (£20,000 of which was subject to a foreign tax) and relevant foreign income (£20,000)).

£100,000 of taxed foreign employment income (para f) remains in the offshore account fund.

Moral: A should have kept her taxed foreign earnings separate so that they could be remitted. The tax on that remittance would be less because the foreign tax credit would be available. If A had kept all the sources of income separately, she would also have been saved the significant administrative costs of the computation.

13.4.8 *Single transfer: Mixed fund RFI of earlier years and gain of later year*

The next example is a single onshore transfer from a mixed fund with RFI of earlier years and a chargeable gain of a later year.

> **RDRM 35290 Example 2** (Jason) [June 2010]
> In Year 1 J purchases shares in a foreign company for £8m. The £8m represents J's 'clean' capital, being perhaps an inheritance or similar such windfall.
> In Year 3 J later sells the shares for £10m, which produces a £2m chargeable gain. The sale proceeds are credited in Year 3 to his overseas bank account that contains some relevant foreign income from the last two tax years, but no other monies.
> There is now a mixed fund, containing:
> £8m capital from Year 1,
> £2m a foreign chargeable gain from Year 3
> relevant foreign income from Years 2 and 3.
> Later in Year 3 J, a remittance basis user, brings £5m to the UK from that account. The ordering rules in ITA07/s809Q mean that all of the relevant foreign income and the £2m gain from Year 3 is treated as remitted before any of the capital can be considered as remitted.
> If the mixed fund also included other amounts of income or capital gains for that tax year (Year 2 or 3), those amounts must also be taken into account before any of the 'capital' element of the proceeds, (that is the £8m that is not a gain) realised by the sale of shares can be considered.

The moral is that Jason should have kept the proceeds of the share sale in a separate account. Then the £5m remittance would have been £2m gain and £2m capital.
Even better, he should have disposed of the shares by two separate disposals of £5m each, and remitted the proceeds of the first disposal. Then remittance would have been £1m gain and £4m capital.

13.4.9 *Example: Transfers from mixed fund accruing over 2 years*

The next example involves a single onshore transfer out of a mixed fund of RFE, RFI and UK earnings and chargeable gains, accruing over a two year period.

RDRM 35300, 35310 Example 3 (Jeff) [June 2010]
J has:
- UK salary of £10,000 a month paid into an overseas bank account [mixed fund category (a)]
- a salary for overseas employment and his net salary for that work of £5,000 a month is paid into the same bank account. Both salaries are paid on the last day of each month [mixed fund category (f)]
- Dividends from a shareholding in a foreign company are also paid into the account [assumed subject to a foreign tax - mixed fund category (g)]

In Year 0, J had purchased shares in a foreign company for £8m. The £8m is accepted as representing J's "clean" capital, an inheritance. J sells the shares in Year 2 for £10m, which produces a £2m chargeable gain [mixed fund category (e) and (i)].
J's remittances to the UK from this fund in that year are £10m.
His UK salary is credited net of PAYE and NIC. His overseas salary is subject to a foreign tax deducted at source, and is credited net. His overseas dividends are credited gross.

		Credit (Debit)	**Balance**	**Category**
Year 1			£nil	
31 Mar	UK salary (net of tax)	£10,000	£10,000	(a)
31 Mar	Overseas salary FT	£5,000	£15,000	(f)
Year 2				
30 Apr	UK salary	£10,000	£25,000	(a)
30 Apr	Overseas salary	£5,000	£30,000	(f)
15 May	Dividend	£2,000	£32,000	(g)
15 May	UK salary	£10,000	£42,000	(a)
31 May	Overseas salary	£5,000	£47,000	(f)
18 Jun	Sale of shares (£8m capital and £2m gain)	£2,000,000		(e)
	(no foreign tax)	£8,000,000	£10,047,000	(i)
30 Jun	UK salary	£10,000	£10,057,000	(a)
30 Jun	Overseas salary	£5,000	£10,062,000	(f)
25 Jul	Dividend	£2,000	£10,064,000	(g)
31 Jul	UK salary	£10,000	£10,074,000	(a)
31 Jul	Overseas salary	£5,000	£10,079,000	(f)
31 Jul	Bank interest	£5,000	£10,084,000	(d)
14 Aug	Transfer to UK account	(£10,000,000)	£84,000	
31 Aug	UK salary	£10,000	£94,000	(a)
31 Aug	Overseas salary	£5,000	£99,000	(f)

Applying the ordering rules in S809Q to the account immediately before the transfer:
Step 1 Identify the "amount of transfer" in the relevant tax year
(Year 2) £10,000,000
Analyse mixed fund to identify the separate amounts
of income, capital gains and capital present for each
tax year immediately before the date of the transfer:

Para (a) Employment income (including UK employment income) not subject to a foreign tax	Year 1 – £10,000 Year 2 – £40,000
Para (d) Relevant foreign income (not subject to a foreign tax)	Bank interest Year 2 - £5,000
Para (e) Foreign chargeable gains (not subject to a foreign tax)	Year 2 - £2,000,000
Para (f) Employment income subject to a foreign tax	Year 1 - £5,000 Year 2 - £20,000
Para (g) Relevant foreign income subject to a foreign tax	Foreign dividends Year 2 - £4,000

Step 2 Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund:

Para (a)	£40,000
Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.	£10m less £40k = £9,950,000

Step 4 Find the next paragraph/amount for that tax year.
In the order of preference listed above repeat Steps 2 and 3.

Step 2	**Para (d)**	£5,000
Step 3		£9,955,000

Step 4 In the order of preference listed above repeat Steps 2 and 3

Step 2	**Para (e)**	£2m
Step 3		£7,955,000

Step 4 In the order of preference listed above repeat Steps 2 and 3

Step 2	**Para (f)**	£20,000
Step 3		£7,935,000

Step 4 In the order of preference listed above repeat Steps 2 and 3

Step 2	**Para (g)**	£4,000
Step 3		£7,931,000

Step 4 In the order of preference listed above repeat Steps 2 and 3

Step 2 If the amount is more than the [residual] "relevant amount", treat the whole of the remittance as coming from that item of income or gain. **Para (i)** £8m

The result of this exercise is that

- All of J's UK salary in tax year 2 is deemed to have been brought to the UK first.
- Similarly all of his foreign income and gains of tax year 2 are treated as remitted to the UK and chargeable to tax at the appropriate rates of tax – allowing credit for foreign taxes charged on that same income as appropriate.
- £7,931,000 capital has also been brought to the UK.

Until such time as further amounts of income and gains are credited to the overseas account, the mixed fund contains £69,000 of capital (from the sale of shares) together with £15,000 income of the previous tax year (Year 1).

The next part of the example has two more transfers from the mixed fund.

Remittances from mixed funds – identifying nature of remittance – Example 3a (continuation) [June 2010]

Immediately after the £10m transfer in Year 2 (see example 3) J's mixed fund contains £69,000 of capital (from the sale of shares) and £5,000 overseas employment income of the previous tax year (Year 1).

For the rest of Year 2, J continues to have his UK salary of £10,000 a month and his relevant foreign earnings of £5,000 a month paid into that same account. Both salaries are paid on the last day of each month. There are no further credits or debits from the account in Year 2.

J also writes two cheques to pay bills. These amounts are identified as being 15 October to buy a car and 3 February to pay for building work on his UK property. The final debit on the account (£100,000) is for the purchase of shares in a UK company. All three of these amounts are remittances from a mixed fund to which the rules in s809Q apply.

His UK salary is credited net of PAYE and NIC. His overseas salary is subject to a foreign tax deducted at source, and is credited net. His overseas dividends are also credited to the account net of overseas withholding taxes.

		Credit (Debit)	**Balance**	**Category**
Year 2	Balance b/f		£99,000	
30 Sept	UK salary (net of tax)	£10,000	£109,000	(a)
30 Sept	Overseas salary (net of tax)	£5,000	£114,000	(f)
31 Oct	UK salary	£10,000	£124,000	(a)
31 Oct	Overseas salary	£5,000	£129,000	(f)
30 Nov	UK salary	£10,000	£139,000	(a)
30 Nov	Overseas salary	£5,000	£144,000	(f)
31 Dec	UK salary	£10,000	£154,000	(a)
31 Dec	Overseas salary	£5,000	£159,000	(f)
31 Jan	UK salary	£10,000	£169,000	(a)
31 Jan	Overseas salary	£5,000	£174,000	(f)
28 Feb	UK salary	£10,000	£184,000	(a)
28 Feb	Overseas salary	£5,000	£189,000	(f)
31 Mar	UK salary	£10,000	£199,000	(a)
31 Mar	Overseas salary	£5,000	£204,000	(f)
Year 3				
30 Apr	UK salary	£10,000	£214,000	(a)
30 Apr	Overseas salary	£5,000	£219,000	(f)
15 May	Dividend	£2,000	£221,000	(g)
31 May	UK salary	£10,000	£231,000	(a)
31 May	Overseas salary	£5,000	£236,000	(f)
30 Jun	UK salary	£10,000	£246,000	(a)
30 Jun	Overseas salary	£5,000	£251,000	(f)
30 Jun	purchase UK shares	(£150,000)	£101,000	
3 Jul	Transfer to UK	(£5,000)	£96,000	

Note 1

The direct debit on 30 June (£150,000) is a remittance from a mixed fund. Applying the ordering rules in S809Q to the account immediately before the transfer:

Step 1 Identify the "amount of transfer" in the relevant tax year (Year 3) **£150,000**

Analyse mixed fund to identify the separate amounts of income,

capital gains and capital present for the relevant tax year (Year 3) immediately before the date of the transfer:

Para (a) Employment income (including UK employment income) not subject to a foreign tax £30,000

Para (f) Employment income subject to a foreign tax £15,000

Para (g) Relevant foreign income subject to a foreign tax £2,000

Step 2 Identify the earliest paragraph above for the relevant year (Year 3), which has an amount of income or gain in the mixed fund:

Para (a) £30,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.

£150,000
- £30,000
£120,000

Step 4 Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.

Step 2 Identify the earliest paragraph: **Para (f)** £15,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.

£120,000
- £15,000
£105,000

Step 4 Repeat Steps 2 and 3.

Step 2 Identify the earliest paragraph: **Para (g)** £2,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.

£105,000
- £2,000
£103,000

At this stage all of the amounts credited to the account in Year 3 have been matched against remitted amounts. Income and capital of the next previous year (Year 2) must now be considered - so return to Step 1 for Year 2.

Step 1 Identify the separate amounts of income, capital gains and capital present for Year 2 before transfer:

Para (a) Employment income (including UK employment income) not subject to a foreign tax Year 1 – £10,000 Year 2 – £80,000

Para (f) Employment income subject to a foreign tax Year 1 – £5,000 Year 2 – £40,000

Para (i) Capital Year 2 – £69,000

Step 2 Identify the earliest paragraph above for the relevant year (Year 2) , which has an amount of income or gain in the mixed fund: **Para (a)** £80,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.

£103,000
- £80,000
£23,000

Step 4 Find the next paragraph/amount for that tax year.
In the order of preference listed above repeat Steps 2 and 3.

Step 2 Identify the earliest paragraph:	**Para (f)**	£40,000
Step 3 If the amount is more than the [residual] "transfer amount", the whole of the remittance comes from that paragraph.		£23,000

The £150,000 transfer is therefore regarded as a remittance of:

£110,000	UK employment income	(within para a)
£38,000	relevant foreign income	(within para f)
£2,000	relevant foreign earnings	(within para g)

Note 2

The transfer on 3 July of £5,000 to meet daily living expenses will similarly be regarded as coming from the "earliest paragraph" in the mixed fund, which is paragraph (f) containing relevant foreign earnings from Year 2.

The result of this exercise is that:

- J's UK salary in Year 3 is deemed to have been brought to the UK first and is not a taxable remittance.
- Similarly all of his relevant foreign income and overseas employment income of Year 3 are treated as remitted to the UK and chargeable to tax at the appropriate rates of tax – allowing credit for foreign taxes charged on that same income as appropriate.

Reconciliation

The mixed fund still contains:

£69,000	capital (from the sale of shares in Year 2) together with
£12,000	relevant foreign earnings from Year 2, and
£10,000	UK employment income from Year 1
£5,000	relevant foreign earnings from Year 1
£96,000	

Moral: J should have kept his capital receipt separate and remitted from that. That would have reduced the rate of tax on the remittance and saved the costs of the computation.

13.5 Offshore transfer mixed fund rule

Section 809R(4) ITA provides:

> Treat an offshore transfer from a mixed fund as containing the appropriate proportion of each kind of income or capital in the fund immediately before the transfer.
> "The appropriate proportion" means the amount (or market value) of the transfer divided by the market value of the mixed fund immediately before the transfer.

I refer to this as **"the offshore transfer mixed fund rule".**

13.5.1 *"Transfer"*

"Transfer" is not defined.

It should have the same meaning as in s.809Q[17] so there is a transfer where the funds in the hands of the transferee are regarded as derived from the mixed fund, but not otherwise. For the meaning of derived in this context, see 11.15 (Derived property).

13.5.2 *"Offshore" transfer*

Section 809R(5) ITA defines "offshore transfer":

> A transfer from a mixed fund is an "offshore transfer" for the purposes of subsection (4) if and to the extent that section 809Q does not apply in relation to it.

So far the definition seems clear. One must ask whether s.809Q applies. Section 809Q applies (in short) if a sum is received in the UK by a relevant person.[18] A transfer to a UK bank account is an onshore transfer. So a transfer to a foreign account appears to be an offshore transfer. But suppose:

Year 1: a sum is transferred to a foreign account ("the first transfer")

Year 2: the sum (now in the foreign account) is transferred to a UK account ("the second transfer").

It appears that in year 1 the first transfer is not an onshore transfer, but in year 2 it becomes one.[19] To avoid this result, s.809R(6) ITA provides:

> Treat a transfer from a mixed fund as an "offshore transfer" (and section 809Q as not applying in relation to it, if it otherwise would do) if and to the extent that, at the end of a tax year in which it is made—
>
> (a) section 809Q does not apply in relation to it, and
>
> (b) on the basis of the best estimate that can reasonably be made at that time, section 809Q will not apply in relation to it.

If condition (a) and (b) of this subsection are *both* satisfied, there are two consequences:

(1) One must treat the transfer as an offshore transfer.

(2) One must treat section 809Q as not applying in relation to it, if it otherwise would do.

Unless condition (a) and (b) are both satisfied, this subsection does not apply.

---

17 See 13.4.3 ("Transfer").

18 See 13.4.2 (Onshore transfer).

19 Because remittance condition A is met, and the property received in the UK derives indirectly from the first transfer.

The condition in subsection (6)(a) is clear enough. One asks whether s.809Q applies at the end of the tax year. Eg this condition is met if:

(1) T transfers a sum from a mixed fund to a new offshore account on 6th April 2008, and

(2) the money is still there on 5th April 2009, or the money has been used to purchase a non UK asset.

Subsection (6)(b) is a challenge. At the end of the tax year, one must ask whether one can say that s.809Q will not apply in relation to the transfer. In relation to some transfers one can say with certainty that s.809Q will not apply. If the transferor draws a sum from a mixed fund to pay for a dinner outside the UK, then s.809Q will not apply to it because nothing will be received in the UK. That is an offshore transfer.

If a person transfers a sum to an offshore account and does expect to spend it in the UK that is an onshore transfer when remitted to the UK.

13.5.3 *Recomputation problem*

I use the term "**problematic transfer**" (for reasons which will become clear) to describe a transfer made in the following circumstances (by no means unusual):

(1) In year 1 T transfers a sum from a mixed fund to an account outside the UK.

(2) At the end of year 1 the transferred sum is not received in the UK.

(3) T cannot say at the end of the year 1 that "section 809Q will not apply in relation to" the problematic transfer. This may be because:

  (a) At the end of year 1, T does expect to spend the sum in the UK but not until a later year, say, year 5; or

  (b) T does not know whether T intends to remit the sum to the UK.

  At the end of year 1, the problematic transfer is not an onshore transfer. It is an offshore transfer within the definition in s.809R(5). Admittedly it is not within subsection 809R(6) but that subsection does not stop any transfer being an offshore transfer, if applicable it treats non-offshore transfers as offshore transfers.

(4) Suppose in a later year (say year 5) T transfers the sum to the UK. I refer to this as its **"subsequent remittance**."

On one view, the problematic transfer changes status at the time of its subsequent remittance and becomes an onshore transfer. That is workable if in the meantime T has not made any other onshore transfers from the mixed fund. It is not workable if in the meantime T has made other transfers from the mixed fund, because:

(1) T needed to know at the time what income or gains those other transfers included.
(2) There cannot possibly be a recomputation of the tax effect of the other transfers in earlier years on the basis that the problematic transfer has turned out to be an onshore transfer after all. I think that is obviously impractical, but for good measure it is also inconsistent with s.809R(9) ITA which provides:

> If section 809Q applies in relation to more than one transfer from a mixed fund, when undertaking step 1 in relation to the second or any subsequent transfer take into account the effect of step 2 of section 809Q(3) (composition of transfer) as it applied in relation to each earlier transfer.

It is almost impossible to make a coherent and workable tax regime out of this intractable statutory material, which is not surprising given the way in which it was enacted. I think the best solution is to say that s.809R(6)(b) is misconceived, that a problematic transfer is only an onshore transfer if s.809Q applies to it in the year of the transfer. If at the end of the year it is an offshore transfer, its status does not change later. This can be justified on the basis that IT is an annual tax.

The alternative view is that the problematic transfer does change its status and becomes an onshore transfer, on the occasion of its subsequent remittance. One carries through the implications for tax purposes so far as that is possible, so the result is that tax is charged as if the problematic transfer was made after the subsequent transfers.

If that were so, another issue arises. Suppose when asked whether the sum will be remitted, T says (as may well be said) that T will remit it if represents an offshore transfer. The question whether a sum will be remitted to the UK may depend on the tax position, ie if it represents an offshore transfer it will be remitted and if it represents an onshore transfer it will not. It is therefore impossible to answer the s.809R(6)(b) question, whether the sum will be remitted, on the view that a problematic transfer becomes an onshore transfer when remitted; for if it is an offshore transfer it will be remitted (and so is an onshore transfer) but if it is an onshore transfer it will not be remitted (and so is an offshore transfer).

13.5.4 *HMRC explanation*

EN Clause 23 Schedule 7 Remittance Basis Amendments 463 to 481 explains s.809R(4) ITA:

> 7. Amendment 465 introduces a new subsection [4], dealing with cases where transfers are made wholly offshore. The new rules aim to ensure that where a transfer is made offshore from fund A to fund B, and remittances to the UK are then made from fund A or fund B, the normal ordering rules for mixed funds apply, as they would have done had the transfer to Fund B not been made before the remittance.

In fact the offshore transfer mixed fund rule does nothing of the sort. The EN continues:

> 8. So if fund A consisted of equal amounts of untaxed income and capital, and half the fund was transferred to fund B, it cannot be argued that fund A or B consisted solely of capital, and remittances from fund A or B were not therefore taxable. Instead, where there is an offshore transfer, so that the normal mixed fund ordering rules do not apply, fund B is to be treated as containing the same proportion of the different categories of income and capital as the original fund, in relation to the amount transferred.

13.5.5 *Transfer partly offshore partly onshore*

Section 809R(8) ITA provides:

> If section 809Q applies in relation to part of a transfer, apply that section in relation to that part before applying subsection (4) in relation to the rest of the transfer.

In practice this will rarely if ever occur.

13.5.6 *HMRC examples: onshore and offshore transfers*

The RDR Manual provides a straightforward example of onshore and offshore transfers from an account with different categories of income and gains:

> **RDRM 35430** [June 2010]**, 35440** [February 2011]
> **Example 1** (Ahmid)
> A, a remittance basis user has an offshore bank account into which is paid both UK source (taxed) income and his foreign income and gains. A makes regular **transfers from this account to his UK account to meet his UK living expenses.**

		Credit (Debit)	Balance	Category	Note
10 Apr	XYZ (CI) Ltd – proceeds from sale of shares	£1,000,000	£1,000,000	(e)	1
15 Apr	RFI dividend	£10,000	£1,010,000	(g)	
30 Apr	UK salary	£10,000	£1,020,000	(a)	2
30 Apr	Bank interest	£5,000	£1,025,000	(d)	

30 Apr	Overseas salary (net of tax)	£5,000	£1,030,000	(f)	
3 May	Transfer to UK a/c	(£5,000)	£1,025,000		2
15 May	Offshore dividend	£2,000	£1,027,000	(g)	
31 May	UK salary	£10,000	£1,037,000	(a)	
31 May	Overseas salary (net of tax)	£5,000	£1,042,000	(f)	
31 May	ABC (IoM) Ltd – purchase of shares in foreign company	(£1,000,000)	£42,000		3
3 Jun	Transfer to UK a/c	(£5,000)	£37,000		4
30 Jun	UK salary	£10,000	£47,000	(a)	
30 Jun	Overseas salary (net of tax)	£5,000	£52,000	(f)	
3 Jul	Transfer to UK a/c	(£5,000)	£47,000		5
31 Jul	UK salary	£10,000	£57,000	(a)	
31 Jul	Overseas salary (net of tax)	£5,000	£62,000	(f)	
3 Aug	Transfer to UK a/c	(£5,000)	£57,000		6
15 Aug	Cheque – ZZZ Cars Ltd London	(£25,000)	£32,000		7

Note 1

The sale price of the shares includes a gain over the original purchase price of £150,000 that has not been taxed. The purchase was made long before 6 April 2008 and was made using accumulated foreign income and gains which were treated as clean capital.

The mixed fund provisions do not apply to foreign income or gains that arose or accrued before 6 April 2008 (Sch 7 FA 2008 para 89). This means that it is not possible to apply the "mixed fund" rules to the £850,000 used to buy the shares.

Note 2

Using the ordering rules at ITA07/s809Q(1), the remittance to the UK on 3 May is matched against the UK salary from that tax year credited to the account on 30 April, as this is the "earliest paragraph" of income or gains within the mixed fund.

Working this through:

The £5,000 transfer to the UK on 3 May is a "transfer" from a mixed fund within section 809Q. Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer:

Para (a)	employment income	£10,000
Para (d)	RFI	£5,000
Para (e)	Chargeable gains	£150,000
Para (f)	Earnings subject to a foreign tax	£5,000
Para (g)	RFI subject to tax	£10,000
Para (i)	Income or capital not within another para	£850,000

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income. Although money has been brought into the UK, there is no taxable remittance as the money has already been taxed.

Note 3

The purchase of shares on 31 May is an "offshore transfer"; by the end of the tax year the shares purchase have not, nor on best estimate are they likely to be, a remittance transfer [in my terminology an onshore transfer] so that s809Q applies.

The account is treated as including the amounts of foreign income and gain that were present immediately before the transfer (ITA07/s809R(4)). The transfer has no effect on the amount remitted in the current tax year but may need to be taken into account in a later tax year.

Immediately before the offshore transfer the mixed fund consists of:

Para (a)	employment income	£ 15,000
Para (d)	RFI	£5,000
Para (e)	Chargeable gains	£150,000
Para (f)	Earnings subject to a foreign tax	£10,000
Para (g)	RFI subject to tax	£12,000
Para (i)	Income or capital not within another para	£850,000
		£1,042,000

The offshore transfer consists of an appropriate proportion of each kind of income, gain or capital, within the mixed fund, that is:

Para (a)	employment income	£14,396
Para (d)	RFI	£4,798
Para (e)	Chargeable gains	£143,953
Para (f)	Earnings subject to a foreign tax	£9,597
Para (g)	RFI subject to tax	£11,517
Para (i)	Income or capital not within another para	£815,739
		£1,000,000

Note 4

The £5,000 transfer on 3 June to the UK is a "transfer" to the UK from a mixed fund, and is within s809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

Para (a)	employment income	£604
Para (d)	RFI	£202
Para (e)	Chargeable gains	£6,047
Para (f)	Earnings subject to a foreign tax	£403
Para (g)	RFI subject to tax	£483
Para (i)	Income or capital not within another para	£34,261

The transfer is regarded as coming from each of the paragraphs in order; that is £604 from para (a), and a taxable remittance of £4,396, being £202 from para (d) and £4,194 from para (e).

Note 5 and 6

Both of these £5,000 transfers are to the UK. There have been credits to the fund between the last transfer (note 4) and this transfer and the fund now contains some employment income (para a) and additional amounts of foreign earning subject to foreign tax (para f) in addition to the residue following the last transfer.

The £5,000 transfers made on 3 July and 3 August are regarded as coming from the earliest paragraph of income, that is para (a) – £10,000 of UK employment income credited to the account on 30 June.

Note 7

The cheque remittance on 15 August is £25,000. This amount was used to buy a car from a UK company. This is also a remittance within s809Q. Immediately before the transfer the mixed fund consists of:

Para (a)	employment income	£10,000
Para (d)	RFI	£nil
Para (e)	Chargeable gains	£1,853
Para (f)	Earnings subject to a foreign tax	£10,403
Para (g)	RFI subject to tax	£483
Para (i)	Income or capital not within another para	£34,261

The cheque remittance is regarded as coming from each of the paragraphs in order; that is £10,000 from para (a), £1,853 from para (e) and £10,403 from para (f), £483 from para (g) and £2,261 from para (i).

The remaining £32,000 at 15 August is also within para (i)

13.5.7 *Example 1(a)*

Example 1(a) – Transfer to another account To continue the offshore account in example 1:

Date		**Credit (Debit)**	**Balance**	**Category s.809Q(4)**	**Note**
	Balance b/f		£32, 000		
31 Aug	Overseas salary (net of tax)	£5,000		f	
31 Aug	UK salary	£10,000		a	
3 Sept	Transfer to UK a/c	(£5,000)			1
15 Sept	Cheque – XYZ Travel Services (CI) Ltd	(£10,000)			2
30 Sept	Overseas salary (net)	£50,000		f	
30 Sept	Overseas Dividend	£350,000		g	
30 Sept	UK salary	£180,000		a	
3 Oct	Transfer to UK a/c	(£5,000)			3
15 Oct	Transfer to Swiss a/c	(£350,000)			4

Note 1

Immediately before the transfer on 3 September the mixed fund contained:

Para (a)	Employment income	£10,000
Para (f)	Earnings subject to a foreign tax	£5,000
Para (i)	Income or capital not within another para	£32,000

The transfer is regarded as coming from the 'earliest paragraph', that is para (a), so the £5,000 is UK employment income. Although money has been brought into the UK, there is no taxable remittance as the money has already been taxed,

Note 2

The next payment from the account is £10,000 for the family holiday flights to the USA. The full payment is a remittance because the service provided is in the UK – the flights begin or end in London.

The transfer is regarded as coming from each of the paragraphs in order; that is £5,000 from para (a) and a taxable remittance consisting of £5,000 from para (f).

Note 3

Immediately before the remittance on 3 October the mixed fund contained:

Para (a)	Employment income	£180,000
Para (f)	Earnings subject to a foreign tax	£50,000
Para (g)	RFI	£350,000
Para (i)	Income or capital not within another para	£32,000

The transfer is regarded as coming from the 'earliest paragraph', that is para (a), so the £5,000 is UK employment income.

Note 4

The transfer of £350,000 to a new Swiss bank account is an offshore transfer. Immediately before the offshore transfer on 15 October the IoM bank account (mixed fund) is regarded as containing:

Para (a)	Employment income	£175,000
Para (f)	Earnings subject to a foreign tax	£50,000
Para (g)	RFI	£350,000
Para (i)	Income or capital not within another para	£32,000
		£607,000

The offshore transfer consists of an appropriate proportion of each kind of income, gain or capital, within the mixed fund, that is:

Para (a)	Employment income	£100,906
Para (f)	Earnings subject to a foreign tax	£28,830
Para (g)	RFI	£201,812
Para (i)	Income or capital not within another para	£18,452

The Swiss bank account is another 'mixed fund', containing the income, gains and capital of the transferred amount. Assuming nothing else is added or taken away from the Swiss account in the interim, if in a couple of years time A decides to remit £120,000 to the UK from his Swiss bank account, the same ordering rules will apply to the Swiss fund, so the remittance is regarded as consisting of £100,906 from para (a) and £19,094 from para (f).

13.5.8 *Example 2*

The next example has another mix of offshore and onshore transfers.

RDRM 35450 [June 2010]

Example 2 (Lorraine)

L, a remittance basis user, opens an offshore bank account in Bermuda into which is paid both UK source (taxed) income and her foreign income and gains. L makes a few transfers from this account to her UK account to meet UK living expenses. She also transfers money from this account to her other offshore account in Jersey, as well as using it for several offshore purchases.

Account 1 Bermuda

		Credit (Debit)	Balance	Category	Note
Year 1					
15 Jan	Capital	£1,000,000	£1,000,000	(i)	1
30 Jan	UK salary	£10,000	£1,010,000	(a)	
30 Jan	Bank interest	£5,000	£1,015,000	(d)	
30 Jan	Overseas salary (net of tax)	£5,000	£1,020,000	(f)	
3 Feb	Transfer to UK a/c	(£5,000)	£1,015,000		2
28 Feb	Dividend	£2,000	£1,017,000	(g)	
28 Feb	UK salary	£10,000	£1,027,000	(a)	
28 Feb	Overseas salary	£5,000	£1,032,000	(f)	
3 Mar	Purchase of shares in foreign company	(£800,000)	£232,000		3
10 Mar	Transfer to UK a/c	(£5,000)	£227,000		4
31 Mar	UK salary	£10,000	£237,000	(a)	
31 Mar	Overseas salary (net of tax)	£5,000	£242,000	(f)	
2 Apr	Transfer to UK a/c	(£5,000)	£237,000		5
Year 2					
30 Apr	UK salary	£10,000	£247,000	(a)	
30 Apr	Overseas salary (net of tax)	£5,000	£252,000	(f)	
3 Mar	Transfer to UK a/c	(£5,000)	£247,000		6
15 Mar	Transfer to UK a/c	(£100,000)	£147,000		7
31 May	UK salary	£10,000	£157,000	(a)	
31 May	Overseas salary (net of tax)	£5,000	£162,000	(f)	
8 Jun	Transfer – A2Z travel services	(£20,000)	£142,000		8

Year 1

Note 1

The £1,000,000 credited to the account on 15 January was inherited under L's great aunt's will, and is "clean" capital.

Note 2

The £5,000 transfer to the UK on 3 May is a "remittance" from a mixed fund within section 809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer:

Para (a)	employment income	£10,000
Para (d)	RFI	£5,000
Para (f)	Earnings subject to a foreign tax	£5,000
Para (i)	Inherited capital	£1,000,000

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

Note 3

The purchase of shares on 3 March (£800,000) is an "offshore transfer". By the end of the tax year the shares purchased have not been sold, brought to the UK or otherwise used so that s809Q applies.

The account is treated as including the amounts of foreign income and gain that were present immediately before the transfer (ITA07/s809R(4)). The transfer has no effect on the amount remitted in the current tax year but may need to be taken into account in a later tax year.

Immediately before the offshore transfer the mixed fund consists of:

Para (a)	Employment income	£15,000
Para (d)	Relevant foreign income	£5,000
Para (f)	Earnings subject to a foreign tax	£10,000
Para (g)	Relevant foreign income subject to tax	£2,000
Para (i)	Inherited capital	£1,000,000
		£1,032,000

The "offshore transfer" (the shares purchase) consists of an appropriate proportion (100/129) of each kind of income, gain or capital, within the mixed fund, that is:

Para (a)	employment income	£11,628
Para (d)	RFI	£3,876
Para (f)	Earnings subject to a foreign tax	£7,752
Para (g)	RFI subject to tax	£1,550
Para (i)	Income or capital not within another para	£775,194
		£800,000

Note 4

The £5,000 transfer to the UK on 10 March is a "remittance" from a mixed fund within section 809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer the mixed fund consists of:

Para (a)	employment income	£3,372
Para (d)	RFI	£1,124
Para (f)	Earnings subject to a foreign tax	£2,248
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	£224,806
		£232,000

The remittance is regarded as coming from the "earliest paragraph", that is para (a), £3,372, para (d) £1,124 and para (f) £504. Of this amount, £1,124 and £504 are taxable remittances.

Note 5

The next remittance on 2 April is again £5,000. Two further amounts have been credited to the account which now consists of

Para (a)	employment income	£10,000
Para (f)	Earnings subject to a foreign tax	£6,744
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	£224,806

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

The account now consists of:

Para (a)	employment income	£5,000
Para (f)	Earnings subject to a foreign tax	£6,744
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	£224,806
		£237,000

At the end of the tax year, L has made taxable remittances of: £1,628 (para (d) £1,124 and para (f) £504). She has also made two offshore transfers:

Year 2

At the start of the next tax year, L continues to make remittances to the UK from the overseas account. The "mixed fund" rules mean that income gains and capital of a tax year are treated in priority to income gains and capital of a previous year.

Note 6

The £5,000 transfer to the UK on 3 May is a "remittance" from a mixed fund within s809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 2 immediately before the date of the transfer:

Para (a)	employment income	£10,000
Para (f)	Earnings subject to a foreign tax	£5,000

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

Note 7

On 15 May, L transfers £100,000 to her UK bank account. This is a "remittance" from a mixed fund within section 809Q(1).

Applying the ordering rules section 809Q, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 2 immediately before the date of the transfer:

Para (a)	employment income	£5,000
Para (f)	Earnings subject to a foreign tax	£5,000

So £10,000 of the transfer comes from these two paragraphs of Year 2 income. The outstanding balance of £90,000 must be identified by applying the ordering rules section 809Q, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 1 immediately before the date of the transfer:

Para (a)	employment income	£5,000
Para (f)	Earnings subject to a foreign tax	£6,744
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	£224,806

So the remaining £90,000 of the transfer will regarded as consisting of monies from para (a) £5,000, Para (f) £6,744, Para (g) £450 and Para (i) £77,806 from Year 1.

The mixed fund now consists of:

Para (i)	Income or capital not within another para	£147,000

13.5.9 *Example 3: Repayment of loan from mixed fund*

The next HMRC example involves an offshore transfer which is repayment of a loan (not a relevant loan) from a mixed fund.

RDRM 35470 [June 2010]
Example (Frankie)
F, a remittance basis user, has a bank account in Jersey into which is paid both UK source (taxed) income and foreign income and gains. F makes transfers from the Jersey account to his UK account to meet his UK living expenses.
On 28 May, F acquires a loan from his Jersey bank that he uses to purchase an asset in Jersey for £200,000 – Note 3. He repays the [capital of the] loan from this account.

		Credit (Debit)	Balance	Category	Note
6 Apr	Clean capital	£80,000	£80,000	(i)	
15 Apr	RFI NFT	£10,000	£90,000	(d)	
30 Apr	UK salary	£10,000	£100,000	(a)	
30 Apr	RFI bank interest	£5,000	£105,000	(d)	
30 Apr	RFE NFT	£5,000	£110,000	(b)	
3 May	Transfer to UK a/c	(£5,000)	£105,000		1
15 May	RFI	£2,000	£107,000	(d)	
31 May	UK salary	£10,000	£117,000	(a)	
31 May	Overseas salary	£5,000	£122,000	b	
3 Jun	Transfer to UK a/c	(£5,000)	£117,000		2
28 Jun	bank loan repayment[20]	(£15,000)	£102,000		3 & 4
30 Jun	UK salary	£10,000	£112,000	(a)	
30 Jun	Overseas salary	£5,000	£117,000	(b)	
3 Jul	Transfer to UK a/c	(£5,000)	£112,000		5
28 Jul	bank loan repayment	(£15,000)	£97,000		6
31 Jul	UK salary	£10,000	£107,000	(a)	
31 Jul	Overseas salary	£5,000	£109,000	(b)	
3 Aug	Transfer to UK a/c	(£5,000)	£102,000		7
15 Aug	Cheque – ZZZ Cars	(£25,000)	£77,000		8
28 Aug	bank loan repayment	(£15,000)	£62,000		9
31 Aug	Overseas salary	£5,000	£67,000	(b)	
31 Aug	UK salary	£10,000	£72,000	(a)	
3 Sep	Transfer to UK a/c	(£5,000)	£67,000		10

The first two transfers are straightforward:

Note 1
Using the ordering rules at ITA07/s809Q, the remittance to the UK on 3 May is

20 In this example there are monthly repayments of the capital of the loan, but no payments of interest.

matched against the UK salary from that tax year credited to the account on 30 April, as this is the "earliest paragraph" of income or gains within the mixed fund.

Note 2

The remittance on 3 June is also matched against the UK salary from that tax year credited to the account before that date.

We now turn to the point of the example:

Note 3

The £200,000 used to pay for the assets is borrowed capital and is not in itself a remittance or an offshore transfer.

The reason that the payment of £200k is not an offshore transfer is that the sum is not mixed into the mixed fund. If it had been paid into the account (and withdrawn from there to purchase the asset) the position would have been entirely different.

However, subsequent payments of interest and capital used to repay the loan are offshore transfers.

Note 4

At the time immediately before the first repayment of the debt occurs on 28 June, the mixed fund is composed as follows:

Clean capital	£80,000	
UK salary	£10,000	see note 4(a)[21]
Relevant foreign earnings	£10,000	
Relevant foreign income	£17,000	
	£170,000[22]	

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

Clean capital	£10,256
UK salary	£1,282
Relevant foreign earnings	£1,282
Relevant foreign income	£2,180
	£15,000

The property acquired by F using the loan is now regarded as containing this income. [23]

---

21 Note 4(a) provides: "Although £20,000 of F's UK salary has been credited to the account, £10,000 has already been remitted prior to 28 June (see Notes 1 and 2)."

22 *Sic;* the Manual has a typographic or an arithmetical error here.

23 See 13.3.6 (Income/gains used to repay debt).

The next remittance is straightforward:

Note 5
The next remittance on 3 July is again £5,000 that is matched against the UK salary credited to the account before that date.

Now comes the second loan repayment:

Note 6
At the time immediately before the repayment on 28 July, the "mixed fund" is composed as follows:

Clean capital	£69,744
UK salary	£13,718
Relevant foreign earnings	£13,718
Relevant foreign income	£14,820
	£112,000

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

Clean capital	£9,339
UK salary	£1,838
Relevant foreign earnings	£1,838
Relevant foreign income	£1,985
	£15,000

The property acquired by F is now regarded as containing this income.

Next come two straightforward onshore transfers:

Note 7
A further £5,000 remittance on 3 August is again matched against UK salary.

Note 8
The payment of £25,000 to ZZZ Cars is to buy a car and is a taxable remittance. Immediately before the transfer the mixed fund is composed as follows:

Clean capital	£60,405
UK salary	£16,880
Relevant foreign earnings	£16,880
Relevant foreign income	£12,835
	£107,000

This £25,000 remittance is matched firstly against UK salary (£16,880), then against relevant foreign earnings (£8,120).

Next another loan repayment

Note 9

At the time immediately before the repayment on 28 August, the mixed fund is composed as follows:

Clean capital	£60,405
UK salary	£nil
Relevant foreign earnings	£8,760
Relevant foreign income	£12,835
	£82,000

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

Clean capital	£11,049
Relevant foreign earnings	£1,603
Relevant foreign income	£2,348
	£15,000

Note 10

The fifth remittance on 3 September is again £5,000 that is matched against the UK salary from that tax year credited to the account before that date.

The account now contains £77,000, being

Clean capital	£49,356
UK salary	£5,000
Relevant foreign earnings	£12,157
Relevant Foreign Income	£10,487

For the purposes of this example, assume that on 8 September F wins the Jersey local lottery ("clean capital") and uses his winnings to pay off the outstanding loan.

Three years later, F brings the property acquired with the loan to the UK. The property is a mixed fund, and it is regarded as containing the income and capital used to pay off the loan, that is:

UK salary	£3,120
Relevant foreign earnings	£4,723
Relevant foreign income	£6,513
Clean capital.	£185,644
F has remitted foreign income of	£11,236

The moral which follows from these examples is the imperative of not mixing funds of different types of income or gains, so far as possible.

13.6 Mixed fund with different types of RFI

Suppose an individual holds in one mixed fund two different types of RFI,

both subject to foreign tax but one suffers a higher rate of foreign tax than the other. The ITA mixed fund rules give no guidance because both fall into the same mixed fund category. It is considered that the *Duke of Roxburghe* 20 TC 711 approach applies. A remittance from this mixed fund should be regarded as made first of all out of the income which qualifies for more UK double tax relief.

However, it would be better practice to pay the two types of income into separate accounts. Then this issue does not arise and a remittance from the appropriate account can easily be identified as qualifying for the appropriate relief.

13.7 Mixed funds held by third parties

So far we have considered the ITA mixed fund rules where an individual transfers from a mixed fund containing their own income or gains. The position is more complex when a third party is involved. This may arise in (at least) six circumstances:

(1) A gain accrues to non-resident company within s.13 TCGA, so that a s.13 gain accrues to an individual participator, taxable on the s.13 remittance basis. That gain forms part of a mixed fund (ie the gain is mixed with other funds of the company). There is a taxable remittance if the company remits its gain to the UK. If the company remits part of the fund to the UK, do the mixed fund rules apply to determine whether the part remitted is the gain?

(2) Income arises to a person abroad within s.720, so that s.720 income arises to an individual transferor, taxable on the s.720 remittance basis. That income forms part of a mixed fund (ie the income is mixed with other funds of the person abroad). There is a taxable remittance if the person abroad remits its income to the UK. If the person abroad remits part of the fund to the UK, do the mixed fund rules apply to determine whether the part remitted is the income?

It is suggested that the ITA mixed fund rules can apply in these two circumstances. Step 1 of s.809Q(3) requires one to find the income or gains of the "individual" but the funds in the hands of the third person are treated as derived from the s.720 income or s.87 gains of the individual, so applying s.809R(2) ITA the funds in the hands of the third party are treated as consisting of that income or gains. This view may favour the taxpayer, particularly for a company which is within s.720 but not s.13. Suppose:

(a) A settlor-interested trust holds a company within s.720.

(b) The settlor/transferor is subject to tax on the company income under the s.720 remittance basis, ie if the company remits income to the UK.

(c) The company holds a mixed fund consisting of:

Income of year 1:	£100
Gains of year 2:	£100
	£200

(d) The company remits £100 to the UK.

The sum remitted is regarded as the gain, so there is no charge under the s.720 remittance basis.

Had the transferor held the company directly (not via the trust) the remittance would have given rise to a CGT charge under the s.13 remittance basis.

Similar points arise for a company which is within s.13 but not s.720, though that is now rarer because of the s.13 motive defence.

(3) Income or gains accrue to an individual and the individual gives the income or gains to a relevant person ("R"). The income or gains form part of a mixed fund (ie the income or gains are mixed with other funds of R). There is a taxable remittance if R brings the gifted funds to the UK. If R remits part of the fund to the UK, do the mixed fund rules apply to determine whether the part remitted is the income or gains?

(4) An individual makes a gift of an asset to a relevant person ("R"), on which a deemed gain arises. The asset is treated as derived from that gain and there is a taxable remittance if R remits the asset to the UK. The asset forms part of a mixed fund (ie the asset is mixed with other funds of R). If R remits part of the mixed fund to the UK, do the mixed fund rules apply to determine whether the part remitted is T's income or gains?

Suppose R and the individual ("T") are UK resident at all times. Suppose:

(1) T gives income, say, RFI, ("T's income") to R.

(2) R mixes T's income with gains of R (accruing in the same year).

(3) R remits part of the mixed fund.

Has R remitted T's income or R's gains? It is in R's interest to argue that R has remitted T's income, and in T's interest to argue that R has remitted R's gains.

One must categorise R's mixed fund into the mixed fund categories. The part derived from T's income seems to fall into two categories: it is both RFI of T (within category (d)) but it is also capital of R. However it does

not fall within the final category (i) since that refers to capital *not within another paragraph of this subsection*. So this item is treated as income within category (d). It is considered that R has remitted T's income first.

This rule normally works in favour of HMRC, but if T is not UK resident at the time of the remittance, it works in favour of R.

A similar problem arises in the case of a joint account, where the income of joint account holders is mixed; see 77.6 (Remittances from joint accounts).

(5) Income/gains accrue to an individual ("T") and the individual gives the income/gains to a non-relevant person ("P"). The common example will be a gift of pre-2008 income/gains to a trust. The trustees are not a relevant person in relation to those income/gains. But there will be a taxable remittance if T receives the income/gains. What if the income/gains form part of a mixed fund held by the trustees? It is suggested that the mixed fund rules apply.

(6) Income/gains accrue to a partnership, and the partnership makes a distribution to the partners. It is suggested that the mixed fund rules apply.

13.8 Unremitted income transferred to trust

Suppose:

(1) A remittance basis taxpayer ("S") receives foreign income[24] ("the old income") which is not remitted to the UK and so not taxed.

(2) S transfers the old income to a non-resident trust.

(3) The trustees invest and realise gains ("trust gains") in a subsequent tax year. For simplicity, assume that no income arises to the trustees, or any income which arises to them is segregated and paid out to S.

(4) The trustees make a distribution to S which is received in the UK.

If the distribution is an income receipt of S, it is taxed as an annual payment on ordinary principles;[25] that does not count as a taxable remittance of the old income as the receipt of new income should not be regarded as derived from the old income.[26] (It may not matter whether the distribution is taxed under either way, so long as it is not taxed on both, but it might matter eg if the old income was dividend income, as the rates of tax are different for annual payments.)

---

24 Some similar points would apply if T settles gains.

25 See 25.3 (Tier 3: Discretionary income payment: charge on beneficiary).

26 See 11.15.11 (Income from income/gains).

Suppose the distribution is a capital receipt of S. This raises the question of the interaction of:

(1) the ITA remittance basis charge on the old income and

(2) s.87 charge which arises if S receives a capital payment.

The first question is whether the distribution is derived from the old income. One applies the mixed fund tracing rules. If the payment is out of a mixed fund holding the old income and the capital gains, the capital gains are treated as distributed first, as they are gains of a later year. So if the distribution is less than the gains in the mixed fund, the distribution is not the old income. The distribution is a capital payment, matched to the trust gain, and subject to CGT under s.87. If the distribution exceeds the gains in the mixed fund, it is partly derived from the old income and the old income comes into charge. It is considered that a distribution derived from the old income received in the UK is not a capital payment.[27]

The application of the rules becomes very intricate. Take the following (simplified) example:

S has £900 of old income arising before year 1 ("S's old income"). S transfers this to a non-resident trust. The trust gains and distributions are as follows:

Year	Gift to trust	Trust Gains	Distribution	Total Fund
0	£900			£900
1		£100	nil	£1,000
2		nil	£200 to W	£800
3		£200	nil	£1,000
4		nil	£400 to S	£600

Assume the distributions are received in the UK and that S and W are UK resident. (If received outside the UK and (un)taxed on the remittance basis then no difficulty arises.)

For simplicity, I ignore the trust's CGT annual exemption.

The tax analysis is as follows:

Year 2

The tax analysis of £200 distribution to W in year 2 is (relatively) straightforward. The £200 distribution to W in year 2 does not constitute a taxable remittance of the old income, for IT purposes, because

27 See 51.6.5 (Payment in form of income (un)taxed on remittence basis).

remittance condition A in s.809L is not satisfied. Assume W is not a relevant person.[28]

The £200 distribution is a capital payment which is matched with the £100 trust gain. W is therefore treated as receiving s.87 gains of £100. The remaining £100 of the £200 distribution is unmatched in year 1, and carried forward. We need not consider the mixed fund rules at this point.

Year 3

The remaining £100 of the £200 distribution which was unmatched in year 2 is matched to the trust gain in year 3. W is treated as receiving a s.87 gain of £100 in year 3. The remaining trust gain of £100 is unmatched in year 3 and carried forward to be matched to future capital payments.

Year 4

The tax analysis of the £400 payment to S in year 4 is more complicated.

First, to what extent is the payment derived from S's old income? For IT purposes, what were the constituents of the fund from which the payment was made, immediately before the £400 payment to S? Here we do need to consider the mixed fund rules.

The trustees made a transfer of £200 to W of out a mixed fund:

S's old income but the trustees capital	£900
gain of year 1	£100
total	£1,000

That is an offshore transfer (as defined) since s.809Q does not apply to it; see s.809R(5) and s.8090Q(1). So the transfer consisted of:

one fifth of the capital	£180
one fifth of the gain	£20
total	£200

So the trustees fund before the £400 transfer in year 4 consisted of:

S's old income but the trustees capital	£720
gain of year 1	£80
gain of year 3	£200
total	£1,000

Applying the mixed fund rule, the £400 payment to S consists of the gains before the old income (because they are gains of a later year) so it consists of:

---

28 If S's old income is pre-2008 income, W could be the wife of S, as (for pre-2008 income) a relative is not a relevant person.

gain of year 1	£80
gain of year 3	£200
S's old income but the trustees capital	£120
total	£400

£280 of the capital distribution is not derived from the old income. Of that sum, £100 is matched to the outstanding trust gains, and the balance (£180) is carried forward to be matched against future trust gains.

£120 of the payment is matched to S's old income and is subject to income tax as remitted income. That is not a capital payment.[29]

13.9 Remittance due to bank error

The RDR Manual provides:

> **33560 Banking Issues** [December 2011]
> *Bank Errors and Mistakes*
> Where a bank acts contrary to express instructions by an account holder, and that mistake inadvertently results in a taxable remittance to the UK by the account holder, the account holder and the bank may alter the transaction in line with the original instructions given.
> If the bank does this, HMRC will treat the earlier [mistaken] transaction as not having taken place and the new transaction as being the original transaction in looking at whether there has been a taxable remittance from that account.

This is soundly based on *Duke of Roxburghe's Executors v IRC* 20 TC 711 where a taxpayer received and held offshore:

(1) income subject to UK tax on an arising basis ("taxed income");[30] and
(2) foreign income which qualified for the remittance basis, and which was therefore taxed if remitted ("untaxed income").

These were wisely held in separate accounts and so a remittance out of the taxed income account would not be taxable. The taxpayer correctly directed the bank to make a remittance to the UK out of her taxed income account. Unfortunately the bank made a remittance out of the wrong account, so the sum remitted could (largely) be traced to untaxed income!

The Court of Session identified the sum remitted as taxed income because the taxpayer had *intended* the remittance to come out of taxed

29 See 51.6.5 (Payment in form of income (un)taxed on remittence basis).

30 Being foreign source income of a class not then qualifying for the remittance basis and so subject to UK income tax on an arising basis.

income.[31]

The statement also applies in other circumstances of bank error, eg if a bank was instructed to pay a dividend into a foreign account and accidentally paid it into the UK.

Contrast 13.14.8 (Accidental remittance of nominated income/gains).

13.10 Mixed fund anti-avoidance rule

Section 809S contains a rule which I call "**the mixed fund anti-avoidance rule**".

13.10.1 *Condition for application of mixed fund anti-avoidance rule*

Section 809S(1) ITA provides:

> This section applies if, by reason of an arrangement the main purpose (or one of the main purposes) of which is to secure an income tax advantage or capital gains tax advantage, a mixed fund would otherwise be regarded as containing income or capital within any of paras (f) to (i) of section 809Q(4).

There are two requirements here.

Firstly, there must be an arrangement[32] with the specified purpose. IT advantage and CGT advantage have the standard (wide) definitions.[33] The

---

31 "The Duchess was entitled to have the remittance debited against any fund belonging to her and under her control and that she did so effectually by the *instructions* to debit it against money not derived from the [untaxed] income." Lord Normand at p.726 (emphasis added).

This was also the view of Lord Fleming at p.732: "I base my decision ... on the ground that it was the legal right of the Duchess to make the appropriation against any particular fund belonging to herself, and that in law she made that appropriation when she directed the Bank making the remittance to charge it against her funds in their hands which had already borne British Income Tax."

A second ground of the decision was that a remittance out of a mixed fund with taxed and untaxed income is in general to be treated as out of the taxed income regardless of the intention of the taxpayer. The second ground is now reversed by the ITA mixed fund rules.

32 Section 809S(3) ITA contains the usual (unnecessary) commonsense definition of "arrangement":

"'Arrangement' includes any scheme, understanding, transaction or series or transactions (whether or not enforceable)."

33 Section 809S provides:

(4) "Income tax advantage" means—

(a) a relief from income tax or increased relief from income tax,

terms are not limited to tax avoidance in the strict sense.

Secondly, by reason of the arrangement, a mixed fund would otherwise be regarded as containing income or capital within mixed fund categories (f) to (i). The English is mangled, but the meaning must that in the absence of the arrangement, a mixed fund would contain income or capital within those categories.

The mixed fund anti-avoidance rule applies only if the mixed fund contains income or capital within mixed fund categories (f) to (i). So if a mixed fund consisted of (say) RFI within category (d) and chargeable gains within category (e), the anti-avoidance provision does not apply. This is a little surprising and it might be that s.809S(4) contains a typographical error, (f) being a slip for (a). But it is not obvious that there has been an error, as there is rather more scope for manipulation of the rules in a mixed account which contains categories (f) to (i). So a court should construe the section to mean what it says. In practice the point is not so important as a mixed fund will usually contain some item within categories (f) to (i).

13.10.2 *Application of the mixed fund anti-avoidance rule*

Section 809S(2) ITA provides:

> Treat the mixed fund as containing so much (if any) of the income or capital as is just and reasonable.

(b) a repayment of income tax or increased repayment of income tax,
(c) the avoidance or reduction of a charge to income tax or an assessment to income tax, or
(d) the avoidance of a possible assessment to income tax;
and for this purpose "relief from income tax" includes a tax credit.

(4A) For the purposes of subsection (4)(c) and (d) it does not matter whether the avoidance or reduction is effected—
(a) by receipts accruing in such a way that the recipient does not pay or bear income tax on them, or
(b) by a deduction in calculating profits or gains.

(5) "Capital gains tax advantage" means—
(a) a relief from capital gains tax or increased relief from capital gains tax,
(b) a repayment of capital gains tax or increased repayment of capital gains tax,
(c) the avoidance or reduction of a charge to capital gains tax or an assessment to capital gains tax, or
(d) the avoidance of a possible assessment to capital gains tax.

Subsection (4A) was added in 2010; while it is a standard provision in other contexts, I am unable to see how it could ever apply here.

Section 809S is clearly intended to override the offshore mixed fund transfer rule although this is not expressly stated.[34]

Suppose:

(1) T has an account ("the first account") with a mixed fund containing £2m, 50% income and 50% capital.

(2) T transfers £1m (half the total amount) to another account (an offshore transfer). T intends to keep that amount offshore.

(3) T then remits the funds in the first account to the UK.

Applying the offshore transfer mixed fund rule the first account, which is remitted, consists of 50% income and capital, so on remittance 50% of the sum received is tax free. In the absence of the offshore transfer, the whole of the £1m remitted would have been subject to income tax.

The offshore transfer is an arrangement which secures an IT advantage. Assuming this was one of the main purposes, the condition for the application of the mixed fund anti-avoidance rule is satisfied.

One then has to ask what is "just and reasonable". The drafter has given up here and left the courts to sort it out.[35] One might say that it is reasonable to apply the pre-2008 mixed fund rules. That can hardly be described as unjust or unreasonable. But it is considered that the expression "just and reasonable" should be construed in accordance with the policy of the onshore transfer mixed fund rule. So the arrangement should be disregarded: it would be just and reasonable to raise tax as if the offshore transfer from the first account had not been made. To put it another way, it is just and reasonable that transfers whose main purpose is to obtain a tax advantage should not do so.

If that were wrong, what would happen if there were a second transfer from the first account: in this way one could reduce the income element of any mixed fund to a relatively small sum by a series of offshore transfers.

13.11 Transitional rules for pre-2008 mixed fund

The ITA mixed fund rules raise transitional issues which the FA 2008

---

34 The mixed fund anti-avoidance rule could also override the *onshore* transfer mixed fund rule, but it is not likely ever to be just and reasonable to substitute any other set of rules.

35 CIOT express the point more strongly: Response to consultation paper "Reform of the taxation of non-domiciled individuals"; "Section 809S is so widely drawn as to be almost meaningless."

addresses only in general terms, leaving HMRC, taxpayers and the courts to sort the matter out as best they can.

Para 89 Sch 7 FA 2008 provides:

> Sections 809Q to 809S of ITA 2007 (transfers from mixed funds) do not apply for the purposes of determining whether income or chargeable gains for the tax year 2007-08 or any earlier tax year are remitted to the UK (or the amount of any such income or chargeable gains so remitted).

13.11.1 *Pre-2008 transfer from mixed fund with pre-2008 income/gains*

Suppose:

(1) A mixed fund contains pre-2008 income/gains.

(2) A transfer is made from that fund to the UK before 2008.

One obviously applied the pre-2008 mixed fund rules (discussed in the next section) to identify what was remitted at the time of the transfer and the same rules determine what income/gains remain in the fund (which may be remitted post 2008).

13.11.2 *Post-2008 transfer from mixed fund with pre-2008 income/gains*

Suppose:

(1) A mixed fund contains pre-2008 income/gains (no post-2008 income/gains have been added).

(2) A transfer from that fund is made after 2008.

One needs to determine what part of that fund is remitted to the UK. Para 89 means that one disregards the ITA mixed fund rules (and instead applies the pre-2008 mixed fund rules discussed in the next section).[36] HMRC agree.[37]

13.11.3 *Post-2008 transfer from mixed fund with pre- and post-2008 income/gains*

Suppose:

(1) A mixed fund contains pre-2008 and post-2008 income/gains.

(2) A transfer from that fund is made after 2008.

One needs to determine what part of that fund is remitted to the UK. The

---

36 This view is the more natural reading. Also, if it were wrong (so one had to apply the ITA mixed fund rules) it would be necessary to classify the constituents of the mixed fund held at 6/4/08 by date and by the nine mixed fund categories, going back without limit of time. Records in many cases will not exist.

37 See 13.14.2 (Transfer of fund with pre- and post-2008 entries).

analysis comes in two stages.

(1) First one has to determine whether the transfer consists of pre-2008 or post-2008 income/gains.

(2) (a) If the transfer consists of pre-2008 income/gains, one applies the pre-2008 mixed fund rules to identify what is remitted.

(b) If the transfer consists of post-2008 income/gains, one applies the ITA mixed fund rules to determine what is remitted.

Which set of rules apply at stage 1? It is suggested that one first applies the ITA mixed fund rules so far back as 2008/09 and then the pre-2008 mixed fund rules. HMRC agree.[38]

13.12 Pre-2008 mixed fund rules

We can now turn to consider the pre-2008 mixed fund rules. There were few statutory provisions. There were a few old cases, supplemented by practice, and outside areas governed by clear rules, I expect HMRC would accept any reasonable view.

13.12.1 *Remittance from mixture of taxed and untaxed income*

The RDR Manual provides:

> **36320. Remittances from a mixed fund** [June 2010]
> ... Where an overseas 'mixed fund' contained an amount that has already suffered UK tax, for example UK salary dealt with under PAYE, the practice (*Sterling Trust v CIR* 12 TC 868) was that a taxpayer was entitled to say that he or she has remitted income which has already suffered UK tax (to the extent that such income exists in the fund) in priority to income which is assessable on the arising basis [ie in priority to income which is assessable if remitted].[39]

This is soundly based on *Duke of Roxburghe's Executors v IRC*.[40]

---

38 See 13.14.2 (Transfer of fund with pre- and post-2008 entries).

39 The same point is made in RDR Manual 35320 [June 2010] (Mixed Funds: Example 4 - remittances before 6 April 2008, Note 2).

40 20 TC 711 discussed in another context at 13.9 (Remittance due to bank error). Although the taxpayer in *Roxburghe* kept the funds in two accounts at the bank, the result would have been the same if the taxed and untaxed income had been held in a single bank account. This was accepted without argument in *Walsh v Randall* 23 TC 55: see para 3 of the Special Commissioners' decision, and it is accepted in this passage from the RDR Manual.

13.12.2 *Remittance from mixture of untaxed income and income qualifying for DT relief*

Suppose an individual holds in one pre-2008 mixed fund:

(1) income which is subject to foreign tax and qualifies for UK double tax relief; and

(2) untaxed foreign income taxable in full on the remittance basis.

It is considered that the *Roxburghe* approach applies. A remittance from this mixed fund should be regarded as made first of all out of the income which qualifies for UK double tax relief.

13.12.3 *Remittance from mixture of capital and income*

In *Scottish Provident Institution v Allan* 4 TC 591, the taxpayer held offshore:

(1) Capital which had been invested in secured loans in Australia, and which would not be taxable if remitted; and

(2) Interest arising from those loans, which qualified for the remittance basis, and which was therefore taxed if remitted.

A sum was remitted to the UK and the question was whether this sum was the untaxed income or the capital. The background was this:

(1) The income and capital had been paid into a single account (mixed).

(2) The remittances (from the Australian agents) had been accompanied by letters stating that the sums remitted represent repayments of the loans, ie capital. The loans had in some cases been repaid only very shortly before the remittance.

(3) The sum remitted (£200,000) was small compared to the amount of the loans and the interest received (each about £1.5m).

It was held that the remitted sum was the income, not capital. The Lord Chancellor said:

> It is obvious that the mere nicknaming the sum received and ascribing to it, because it is so named, the character of capital and not of income, cannot defeat the right of the Crown to have the tax levied upon that which in substance and truth is [income] ...[41]

---

41 4 TC 591 at p593. Similarly Lord Davey: "I must say that that is a draft upon my credulity, a strain upon my powers of belief, which they will not bear. I agree that the mere calling it capital for the purpose of the Inland Revenue Department will not make into capital that which is essentially and in truth ... the interest received on the securities."

Two points shine out:

(1) The description of the remittance as capital does not make the remittance capital if "in truth" it is income. This is obviously right, an application of the Shakespearean principle that "a rose by any other name ..." However, this principle does not address the more fundamental question of *how* the courts determine what is income and what is capital.

(2) The answer to this second question is that the courts look to the substance.

However, it is one thing to look for the substance, and another to find and identify it. Why, in substance, was the remittance from the income, not from the capital? The answer may be found in the speech of Lord Robertson: "The facts of the case must furnish the inference."

The following facts were relevant:

> [1] First of all there is the fact of remittance in two consecutive years ...
> [2] There is no suggestion that any exceptional reason required remittances of capital, in either year or in both.
> [3] On the other hand it is certain that the amount of invested capital left behind in the Colony, after these remittances, is larger than before; so that the capital is fully accounted for.
> [4] Well then, what is done with this so-called capital remitted? The answer is, exactly what would be done with profits.

This is explained by Lord Shand in argument:

> If it is capital you have brought back and distributed as bonus, you have been paying back capital, which I should think you have no authority to do.

This is why Lord Robertson concluded:

> The inference from these facts is that the moneys remitted were in fact profits, [ie income] ...

The former Inspectors Manual para 1566 gave the HMRC view:

> Where a person maintains abroad a fund (for example, a bank account) containing income assessable on the remittance basis, a capital lodgement to the fund is normally considered to lose its identity in the fund. A subsequent remittance from such a mixed fund, therefore, represents income up to the full extent of the income content of the fund (see *Scottish Provident Institution v Allan* 4 TC 409 and 4 TC 591, and

> especially the Lord Chancellor's remarks on 'mere nicknaming' at 4 TC 593). Only when the income content of the fund is exhausted will any balance remitted be regarded as capital. Where this is not accepted, the full facts of the case should be reported to Revenue Policy, International (Cases IV and V), Victory House.

The Inspectors Manual over-simplified the law as expounded in *SPI v Allan.* There is no rule that the remittance out of a mixed fund of income and capital is to be treated as income first. Suppose a taxpayer remits a substantial amount, exceeding the income, and applies it capital expenditure, such as an investment in the UK, or the purchase of a house. It is considered that the "substance" of the matter, applying Lord Robertson's approach, is that the remittance is one of capital. The position is even stronger if the taxpayer first uses an amount equal to the income of a mixed account on expenditure abroad of an income nature.

The RDR Manual now provides:

> **36320. Remittances from a mixed fund** [June 2010]
>
> For tax years up to 5 April 2008, there are no statutory rules to determine what amounts remitted from 'mixed funds' actually consisted of.
>
> On occasion this created difficulty in determining, for UK tax purposes what a remittance to the UK actually consisted of, for example, was it non-taxable income, employment income, interest, chargeable gains or capital.
>
> *Scottish Provident v Allan*
>
> Broadly HMRC practice was based on House of Lords decisions, in particular that of *Scottish Provident v Allan* (4 TC 409/591). In the Court of Exchequer, Lord McLaren said (page 419)
>
> > 'un-appropriated remittances must be dealt with according to the ordinary course of business, and these remittances must be presumed to be paid in the first place out of interest so far as they are income, and in the second place of principal or capital. I think that rule results from the fact that no prudent man of business will encroach upon his capital for investment when he has income un-invested lying at his disposal'.
>
> The House of Lords considered that the question of whether any amount of income had actually been received in the UK is essentially one of fact, that is, of tracing in the first instance, or, where direct tracing proves to be impossible, of inference from the known facts.
>
> In the absence of any evidence to the contrary, the principle is that where capital and income have been paid into a single fund overseas so

> that they are no longer distinguishable, remittances to the UK out of the fund will be presumed to be income to the extent that there is income existing in the fund at the time that the remittance was made.
> ... Only when the income content of the fund is exhausted will any balance remitted be regarded as capital.[42]

Note that *SPI v Allan* was a case where the mixed fund was capital and income. The case can have no application where the mixed fund consists of different kinds of income or different kinds of capital.

At first sight there is some tension between *SPI v Allan* and *Duke of Roxburghe* 20 TC 711. In the first, "mere nicknaming" was contemptuously dismissed; in the second, it was the "legal right" of the Duchess to direct whether the remittance was from one part of a mixed fund or the other. The cases agree, however, that the matter is one of "substance". It is submitted that the cases can be reconciled in this way: in a marginal case, the description of the remittance given by the taxpayer may be decisive. Where the substance of the transaction shows that a remittance is one of income or capital, "mere nicknaming" will not alter the position.

13.12.4 *Remittances out of mixed capital funds*

Suppose an individual holds in one pre-2008 mixed fund:

(1) capital which does not represent any chargeable gain within the scope of CGT; and
(2) the proceeds of a disposal on which a chargeable gain accrued.

A remittance from this fund should for CGT purposes be treated as coming out of the tax free source first.

13.12.5 *Remittance of gain or remittance of base cost?*

Suppose a foreign domiciliary purchases a foreign asset for £1m; they sell it for £3m and realises a pre-2008 chargeable gain of £2m. If they remit the entire £3m proceeds, the entire £2m gain is charged to CGT. But what is the position if they remit only £1m and retain the balance abroad? The RDR Manual provides:

> **36320. Remittances from a mixed fund...** [June 2010]
> *Capital Gains*

---

42 The same passage is found in RDRM 35320 Note 2.

> For years up to 5 April 2008, where a remittance is made to the UK from a mixed fund into which the proceeds from the sale of an asset (such as a shareholding) has been paid the remittance contains a due proportion of any capital and of any capital gain arising from the disposal.
> That is because, unlike income that can be identified separately, a capital gain is merely part of the money received from the sale and has no separate existence within that amount. Refer to the Capital Gains Manual CG25380 onwards (and CG25440 in particular).[43]

The last sentence is correct to say that a capital gain has no separate existence. I do not think it even exists as "part of the money received from the sale". It is not a separate or separable item of property existing at all. The gain is merely the result of a computation. The proceeds of a disposal represent the gain, but they do not constitute the gain, just as trading receipts do not constitute the profits of a trade. So it is considered that the HMRC view is correct.

13.13 Pre-2008 mixed funds: HMRC examples

The RDR Manual gives two examples concerning pre-2008 mixed funds.

13.13.1 *Pre-2008 transfer from a pre-2008 mixed fund*

The first example involves a pre-2008 transfer from a pre-2008 mixed fund. One therefore applies the pre-2008 mixed fund rules.[44]

> **35320 Mixed Funds: Example 4 - remittances before 6 April 2008**
> **Example 4** (Martyn) [June 2010]
> The "mixed fund" rules in s809Q do not apply to amounts that are in an account before 6 April 2008 (FA2008/para 89).
> M has lived in the UK for many years. He has paid UK tax on the remittance basis for all relevant tax years and has decided that he will do so again for 2008/2009.
> M has his UK salary paid into his overseas bank account. He also has a salary for overseas employment and his net salary for that work of £5,000 a month is paid into the account. Dividends from a shareholding in a foreign company are also paid into the account.
> On 18 March M sold some of his foreign shares as he was thinking of purchasing a new property. He deposited the proceeds of £5,000,000 from the sale into his overseas account. This amount is made up of £4m capital and £1m gain (no

43 The same point is made at para 35320 (Mixed Funds: Example 4 - remittances before 6 April 2008 Note 3).

44 See 13.11.1 (Pre-2008 transfer from mixed fund with pre-2008 income/gains).

deduction of foreign tax).

Tax Year 2007-2008		**Credit (Debit)**	**Balance**	**Note**
	Balance b/f		£47,000	1
31 Dec	UK salary (net of tax)	£10,000	£57,000	
31 Dec	Overseas salary (net of tax)	£5,000	£62,000	
3 Jan	Transfer to UK account	(£5,000)	£57,000	2
31 Jan	UK salary	£10,000	£67,000	
31 Jan	Overseas salary	£5,000	£72,000	
3 Feb	Transfer to UK account	(£12,000)	£60,000	2
15 Feb	Dividend	£2,000	£62,000	
29 Feb	UK salary	£10,000	£72,000	
29 Feb	Overseas salary	£5,000	£77,000	
3 Mar	Transfer to UK account	(£8,000)	£69,000	2
18 Mar	Share Sale £4m capital, £1m gain	£5,000,000	£5,069,000	3[45]
31 Mar	UK salary	£10,000	£5,079,000	
31 Mar	Overseas salary	£5,000	£5,084,000	
3 Apr	Transfer to UK account	(£10,000)	£5,074,000	2

Note 1: Identity of balance brought forward

The balance brought forward of £47,000 is made up of	
UK salary	£15,000
overseas salary	£25,000
overseas dividends	£7,000
	£47,000[46]

The Manual then considers the tax analysis of the four UK transfers. The key fact is that M never remitted more than the UK salary already received in the account (the transfers totalled £35k and salary totalled £55k). The Manual provides:

> **Note 2: Transfers to UK account**
> ... So to establish the taxable amount of remittances made in the example above in 2007-2008 the account must be analysed. In this case the analysis is straightforward. M has brought £35,000 to the UK between December 2007 and March 2008 to meet his day to day UK spending needs. Applying the *Sterling Trust v IRC* practice outlined above,[47] the £35,000 can be regarded as remittances consisting solely of his UK

45 For this note, see 13.12.5 (Remittance of gain or remittance of base cost?).

46 The Manual adds: "all items arising in, and credited during that tax year. M has paid the relevant amount of UK tax based upon his UK sources of income and the amounts of foreign income and gains that he has remitted to the UK." But that is not relevant to the example.

47 See 13.12.1 (Remittance from mixture of taxed and untaxed income).

salary that has already been taxed under PAYE. Because he has claimed the remittance basis of taxation in respect of his relevant foreign income or foreign earnings for 2007-2008 he has no further amount of UK tax to pay on these amounts that stay in the Offshore account.

The example is repeated in RDR Manual 36330 [June 2010] (Remittances from a mixed fund - Example 1).

13.13.2 *Transfer from fund with pre- and post-2008 entries*

The next example is a post-2008 transfer from a mixed fund containing pre- and post-2008 income/gains.

35330 Remittances from mixed funds involving income/gains before 6 April 2008 - Example 4a [June 2010]

Continuing from the example 4 above, on 5 April 2008 M's Offshore account contains:

2007- 2008	UK salary	£20,000
	Overseas salary	£45,000
	Overseas dividends	£9,000
	Sale of shares: Capital	£4,000,000
	Sale of shares: Gain	£1,000,000
		£5,074,000

2008-2009		**Credit (Debit)**	**Balance**	**Category**	**Note**
6 Apr	Balance b/f	£5,074,000			
30 Apr	UK salary (net)	£10,000	£5,084,000	Para (a)	
30 Apr	Overseas salary (net)	£5,000	£5,089,000	Para (f)	
3 May	Transfer to UK acc	(£5,000)	£5,084,000		1
15 May	Dividend	£2,000	£5,086,000	Para (g)	
31 May	UK salary	£10,000	£5,096,000	Para (a)	
30 May	Overseas salary	£5,000	£5,101,000	Para (f)	
30 Jun	UK salary	£10,000	£5,111,000	Para (a)	
30 Jun	Overseas salary	£5,000	£5,116,000	Para (f)	
30 Jun	Direct Debit to UK	(£100,000)	£5,016,000		2

Note 1 analyses the £5k remittance made 3 May:

Applying the ordering rules in S809Q to the account **immediately before the** transfer:

Step 1 Identify the "amount of transfer" in the relevant tax year (2008-09)	£5,000
Identify the separate amounts of income, gains and capital present for the relevant tax year (2008-09) immediately before the transfer:	
Para (a) Employment income not subject to a foreign tax	£10,000
Para (f) Employment income subject to a foreign tax	£5,000
Step 2 Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund	
Para (a)	£10,000
Step 3 Where the amount of the remittance is less than the amount	

identified at Step 2 the amount remitted is treated coming entirely from that paragraph. There is no need to continue to step 4. £5,000

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

Note 2 analyses the £100k remittance made 30 June. At this point the example becomes more challenging:

M decided to buy a residential property. He remits £100,000 to pay some legal fees [!] for the purchase on 30 June. Although M considers that this amount has come from the sale of shares in 2007-2008 the ordering rules in s809Q require the remittance to be taken into account first against all income and gains of the year in which the remittance is made.

Step 1 Identify the "amount of transfer" in the relevant tax year (2008-2009)	£100,000
Identify the separate amounts of income, gains and capital present for the relevant tax year (2008-09) immediately before the transfer:	
Para (a) Employment income not subject to a foreign tax	£25,000
Para (f) Employment income subject to a foreign tax	£15,000
Para (g) Relevant foreign income subject to a foreign tax	£2,000
Step 2 Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund:	
Para (a)	£25,000
Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.	£100,000
	- £25,000
	£75,000
Step 4 Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.	
Step 2 Identify the earliest paragraph: **Para (f)**	£15,000
Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2	£75,000
	-£15,000
	£60,000
Step 4 In the order of preference listed above repeat Steps 2 and 3.	
Step 2 Para (g)	£2,000
Step 3	£60,000
	- £2,000
	£58,000

At this stage all of the amounts credited to the account in 2008-09 have been matched against £100,000 remittance transfer [in my terminology an onshore transfer] in that year. But £58,000 has been brought to the UK that has not been "matched" under the s809Q rules (and cannot be matched because of FA2008/para89).
The remaining £58,000 is regarded as coming from the 2007-08 credits to the account.

The ordering rules at section 809Q cannot be used, so instead the general principles outlined in Note 2 of example 4 above will apply.

HMRC then explain the applicable pre-2008 mixed fund rules:

This £58,000 will usually be regarded as a remittance of M's income and is, first and foremost (*Sterling Trust* principle) his taxed income and then (*Scottish Provident v Allan* principle) any other income - that is his foreign employment income or dividends - as he selects.
However in this case M may equally be able to demonstrate that the remaining £58,000 comes from the proceeds of the sale of shares, as he particularly sold the shares in order to fund this house purchase. If that is the case, the remaining remittance will consist of £11,600 foreign chargeable gain (1/5 due proportion – see note 3 in example 4).[48]

HMRC do not say whether the £58k remittance is income or capital. How is M to "demonstrate that the £58k comes from the proceeds of the sale of shares" given that the payment was out of a mixed fund? The correct approach is to say that the substance is one of a remittance of capital since the purchase is for the house, ie has the nature of capital expenditure.[49] Thus the £58k remittance is capital.

The moral of the example is that M should not have paid the proceeds of the share sale into a mixed account. If it had been paid into a separate account, and the £100k paid from there, the position would have been simpler and better.

13.14 Remittance of nominated income or gains

13.14.1 *Outline*

EN FB 2008 provides:

> 14... If, in subsequent years, that "nominated" income or gains upon which the RBC has been paid is, in fact, remitted to the UK, then that income or gains will not be taxed again. However, there are ordering rules to ensure that if "nominated" income or gains is, in fact, remitted when other untaxed income and gains remain unremitted, then that unremitted income and gains is treated as being remitted before the "nominated" income and gains.

These rules are not (or not just) mixed fund rules, as they may apply even if funds are not mixed; but it is convenient to deal with them in this

48 See 13.12.3 (Remittance from mixture of capital and income).
49 See 13.12.3 (Remittance from mixture of capital and income).

chapter.

13.14.2 *"Nominated income and gains" and "nomination year"*

The expression "nominated income and gains" is defined in s.809I(3) ITA. The drafter thought that this was a section-wide definition only, so repeated the definition in s.809J(3) ITA. (If the definitions had been made ITA-wide definitions this repetition would not have been necessary.) The definition provides:

> (3) In this section the individual's "nominated income and gains" are the total income and chargeable gains nominated by the individual under section 809C for the relevant tax year or any earlier tax year (each such year for which the individual has made a nomination under that section being referred to as a "nomination year").

The definition is discussed in 10.11.3 (Nomination of income and gains).

13.14.3 *"Remittance basis income and gains"*

Section 809I(4) ITA gives this term a fairly commonsense meaning:

> An individual's "remittance basis income and gains" are the foreign income and gains of the individual for all the tax years (up to and including the tax year mentioned in subsection (1)(a)) for which section 809B, 809D or 809E applies to the individual, apart from the individual's nominated income and gains.

Nominated income/gains do not count as remittance basis income/gains because they are taxed on an arising basis. The drafter thought that this was a section-wide definition only, so repeated the definition in s.809J(4):

> (4) In step (1) of subsection (1) the individual's "remittance basis income and gains" are the foreign income and gains of the individual for all the tax years (up to and including the relevant tax year) for which section 809B, 809D or 809E applies to the individual, apart from the individual's nominated income and gains.

13.14.4 *Nominated income/gains categories*

The taxpayer must classify all their remittance basis income and gains into 8 categories, which I will call **"the nominated income/gains categories"**. The categories are set out in s.809J(2) ITA. These are almost the same as

the nine mixed fund categories[50] but:

(1) there are casual differences of wording which do not affect the meaning; and

(2) there are (incredibly) small differences of substance (I do not see why – if any reader can suggest a reason I would be interested to know).

I here set out a table which compares the two (the differences are italicised):

Nominated income/gains categories	**Mixed fund categories**
	(a) *employment income (other than income within para (b), (c) or (f))*
(a) relevant foreign earnings (other than those subject to a foreign tax)	(b) relevant foreign earnings (Other than income within para (f))
(b) foreign specific employment income (other than income subject to a foreign tax)	(c) foreign specific employment income (other than income within para (f))
(c) relevant foreign income (other than income subject to a foreign tax)	(d) relevant foreign income (other than income within para (g))
(d) foreign chargeable gains (other than gains subject to a foreign tax)	(e) foreign chargeable gains (other than chargeable gains within para (h))
(e) *relevant foreign earnings subject to a foreign tax*	(f) employment income subject to a foreign tax
(f) *foreign specific employment income subject to a foreign tax*	
(g) relevant foreign income subject to a foreign tax	(g) relevant foreign income subject to a foreign tax
(h) foreign chargeable gains subject to a foreign tax	(h) foreign chargeable gains subject to a foreign tax
	(i) income or capital not within another paragraph

Section 809J(6) ITA provides a commonsense definition of "foreign tax" for the purpose of the nominated income/gains categories. The same definition is used for the mixed funds categories and I discuss the

50 See 13.3 (Ingredients of a mixed fund).

definition there.[51]

13.14.5 *Condition for application of nominated income remittance rules*

Section 809I ITA provides:

> (1) This section applies if—
>
> (a) any of an individual's nominated income and gains is remitted to the UK in a tax year,
>
> (b) any of the individual's remittance basis income and gains has not been remitted to the UK in or before that year, and
>
> (c) the £10 test is met for that year.

13.14.6 *The £10 test*

Section 809I ITA provides:

> (5) The £10 test is met for the tax year mentioned in subsection (1)(a) ("year X") if, taking each nomination year separately, the cumulative total as respects at least one nomination year exceeds £10.
>
> (6) In relation to a nomination year–
>
> (a) "the cumulative total" means the sum, for all the tax years in aggregate up to and including year X, of the amounts of relevant income and gains remitted to the United Kingdom in those tax years from that nomination year, and
>
> (b) "relevant income and gains" means the income and chargeable gains nominated by the individual under section 809C for that nomination year.

This is therefore a de minimis rule.

The 2011 remittance consultation paper explains the background:

> 2.67 Non-domiciles who have been UK resident in at least seven of the past nine tax years are liable to an annual charge of £30,000 if they claim the remittance basis. The rules governing the payment of this charge can be very complicated and result in significant administrative burdens and inconvenience for the taxpayer.
>
> 2.68 Those who elect to pay the charge are required to nominate an amount of their overseas income and capital gains which is taxable on the arising basis and is deemed to generate an additional tax charge of £30,000.
>
> 2.69 There are complicated rules to ensure that an individual cannot subsequently remit any of the income or capital gains which they have

51 See 13.3 (Ingredients of a mixed fund).

nominated before other overseas income and capital gains which would be taxed in the UK when remitted. This must be in addition to the UK tax to which they are otherwise liable on income and capital gains arising in the UK or remitted to the UK. This nomination ensures that the £30,000 is a tax charge on overseas income and gains rather than a standalone levy.

2.70 Individuals can encounter significant administrative difficulties where they fail to keep their nominated income and capital gains segregated from other income and capital gains. In such situations, an individual might inadvertently remit some of their nominated income and capital gains to the UK. This will mean that they become subject to complicated identification rules which trace the origin of each payment and ensure that the nominated amounts are always the last to be remitted. In the absence of these rules, it would be possible for an individual to reduce significantly the amount of tax they pay on the income or capital gains which they remit to the UK.

2.71 To avoid some of these complexities, it is common for an individual to open an overseas bank account which has the sole purpose of holding funds to generate sufficient income to be nominated for the purposes of the annual charge. Whilst this should allow the individual to avoid the identification rules, the need to set up a special overseas bank account involves additional expenditure and administrative obligations. Moreover, even where an individual has a dedicated bank account for their nomination, it cannot be guaranteed that they would never inadvertently make remittances from the account.

2.72 The Government recognises that this can result in excessive and unhelpful complexity which is hard for the taxpayer to understand. It therefore proposes to amend the legislation to allow individuals to remit the first £10 of income or capital gains which they nominate free of tax and without becoming subject to the identification rules. This will enable them to nominate up to £10 of their foreign income or capital gains for the purposes of the £30,000 charge without having to ensure they do not subsequently remit any part of that nominated amount to the UK. Many individuals only nominate a small amount of foreign income or capital gains and so this simplification would remove the risk of them inadvertently remitting the nominated income and triggering the identification rules.

2.73 This would significantly reduce the need to maintain an overseas bank account solely for the purposes of nominating income and capital gains, whilst making the nomination rules less administratively onerous.

2.74 The remaining rules applying to nominated income and capital

gains will remain unaltered.[52]

The EN accompanying the draft clauses provides:

> 130. Where [remittance basis taxpayers] remit the foreign income and gains which they have nominated under section 809C before any other unremitted foreign income and gains, the order in which income and gains are remitted is determined by sections 809I and 809J.
> 131. The amendments made by Part 4 of the Schedule allow such individuals to remit up to £10 each year of their income or gains which they have nominated without having to ensure they do not subsequently remit any part of that nominated amount into the UK.
> 132. An illustration of how the new rules work is set out below.
> 133. In year 1, an individual nominates £5 income and gains from that year which they remit to the UK. As the total amount of nominated income and gains remitted is less that £10, they do not meet the £10 test and section 809I does not apply.
> 134. In year 2, the individual nominates £20 from year 1, of which they remit £7. The amounts of nominated income and gains from year 1 exceeds £10, so section 809I will apply.

The example is somewhat far-fetched, since an individual would either nominate a nominal £1 or £10 or else nominate a substantial amount.

13.14.7 *Nominated income remittance rules*

Assuming that the conditions for the application of the nominated income remittance rules are satisfied, we move on to s.809I(2) ITA which provides:

> Income tax and capital gains tax are charged, for that year and subsequent tax years, as if
> [a] the income and chargeable gains treated under section 809J as remitted to the UK by the individual in that tax year had been so remitted
> [b] (and income and chargeable gains of the individual that were actually remitted in that year had not been).

So we turn to s.809J ITA, which sets out artificial or fictional remittance rules which I call **"the nominated income remittance rules".** (It would

52 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible *http://www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.*

be more accurate to call this "the nominated income/*gains* remittance rules", but for convenience I shall where possible refer to income (rather than income/gains) and leave gains to be understood.)

Section 809J(1) provides:

> **809J Section 809I: order of remittances**
> (1) If section 809I applies, the following steps are to be taken for the purpose of determining the income or gains treated in a tax year ("the relevant tax year") as remitted to the UK by the individual.

The section sets out six steps. It is easier to follow the steps if one has an example in mind.

Suppose T (a remittance basis taxpayer) has remittance basis income and gains of £10k per annum of each of the nominated income/gains categories thus:

Category	**Type of income (in short)**	**Year 1**	**Year 2**
(a)	relevant foreign earnings	£10k	£10k
(b)	foreign specific employment income (FSEI)	£10k	£10k
(c)	relevant foreign income	£10k	£10k
(d)	foreign chargeable gains	£10k	£10k
(e)	foreign taxed relevant foreign earnings	£10k	£10k
(f)	foreign taxed FSEI	£10k	£10k
(g)	foreign taxed RFI	£10k	£10k
(h)	foreign taxed gains	£10k	£10k

Suppose T has in addition to the above £30k nominated income and gains per annum.

T remits nothing in year 1. In year 2 T remits:
(a) £1k from T's nominated income/gains.
(b) £80k from T's remittance basis income/gains.

This brings the nominated income remittance rules into action.

> *Step 1*
> *Find the total amount of—*
> *(a) the individual's nominated income and gains, and*
> *(b) the individual's remittance basis income and gains,*
> *that have been remitted to the UK in the relevant tax year.*
> *This amount is "the relevant amount".*

In the example the relevant tax year is year 2. Applying the facts of the example, the relevant amount is £81k.

> *Step 2*
> *Find the amount of foreign income and gains of the individual for the relevant tax year (other than income or chargeable gains nominated under section 809C) that is within each of the categories of income and gains in paras (a) to (h) of subsection (2).*
> *If none of sections 809B, 809D and 809E apply to the individual for that year, treat those amounts as nil (and accordingly go to step 6).*

"The amount of foreign income and gains of the individual for the relevant tax year (other than income or chargeable gains nominated under section 809C)" means the remittance basis income/gains. (The drafter has forgotten to use the term which was defined (twice) for this purpose; but it does not matter.) The amount in the example is as set out in the table above.

> *Step 3*
> *Find the earliest paragraph for which the amount determined under step 2 is not nil.*

The earliest paragraph is para (a).

> *If that amount does not exceed the relevant amount, treat the individual as having remitted the income or gains within that paragraph (and for that tax year).*

The individual is treated as having remitted £10k relevant foreign earnings, category (a) for year 2.

> Otherwise, treat the individual as having remitted the relevant proportion of each kind of income or gains within that paragraph (and for that tax year).
> "The relevant proportion" is the relevant amount divided by the amount determined under step 2 for that paragraph.

(Had the total remittance been (say) £5k then the relevant proportion would have been £5k÷£10k = 50% so the transfer would have been treated as containing £5k RFE category (a) for year (1).)

> *Step 4*
> Reduce the relevant amount by the amount taken into account under step 3.

The relevant amount is reduced to £71k.

> *Step 5*
> If the relevant amount (as reduced under step 4) is not nil, start again at

step 3.

In step 3, read the reference to the earliest paragraph of the kind mentioned there as a reference to the earliest such paragraph which has not previously been taken into account under that step.

Following this iterative procedure a total of eight times, the transfer is treated as containing:

(a) relevant foreign earnings	£10k
(b) foreign specific employment income	£10k
(c) relevant foreign income	£10k
(d) foreign chargeable gains	£10k
(e) foreign taxed RFE	£10k
(f) foreign taxed SEI	£10k
(g) foreign taxed RFI	£10k
(h) foreign taxed gains	£10k
Total	**£80k**

The relevant amount is by this stage reduced to £1k. We move to the next step:

Step 6

If the relevant amount (as reduced) is not nil once steps 3 to 5 have been undertaken in relation to all paragraphs of subsection (2) for which the amount determined under step 2 is not nil, start again at step 2.

In step 2, read the reference to the foreign income and gains of the individual for the relevant tax year as a reference to such of the foreign income and gains of the individual for the appropriate tax year as had not been remitted[53] *by the beginning of the relevant tax year.*

"The appropriate tax year" is the latest tax year which is—

(a) before the last tax year for which step 2 has been undertaken, and

(b) a tax year for which section 809B, 809D or 809E applies to the individual.

Thus we repeat step 2 a last and ninth time, reading "the relevant tax year"

---

53 Section 809J(5) ITA provides:

In step 6 of subsection (1) the reference to income or gains being remitted is—

(a) as respects any tax year before section 809I applies, to income or gains being remitted to the UK, and

(b) as respects any tax year in relation to which that section applies, to income or gains treated under this section as so remitted.

to mean year 1. So the remittance of £81k is treated as being:

(a) relevant foreign earnings	£11k
(b) foreign specific employment income	£10k
(c) relevant foreign income	£10k
(d) foreign chargeable gains	£10k
(e) foreign taxed RFE	£10k
(f) foreign taxed SEI	£10k
(g) foreign taxed RFI	£10k
(h) foreign taxed gains	£10k
Total	£81k

March 2009 Qs & As provides:

> **Q3:** HMRC have indicated that individuals do not have to specify which account the nominated income comes from, and from this it could be inferred that without further disclosure of the particulars of the account the taxpayer may be at risk of "tainting" every other source of income of that type. For example if an individual has an account with one bank in Jersey and another bank in a different jurisdiction, he could nominate bank interest on his Jersey account, so that it would be obvious that if he remitted income from his other account, he might not fall foul of re-characterisation provisions. However, this may not be the case if he had three different accounts with the same bank in Jersey and he wishes to nominate income from one of those accounts without disclosing the account number of that account. Can HMRC clarify what their approach to this will be?
>
> **A:** It is up to the individual to decide how much information to give HMRC on their Self Assessment returns in order to identify the source of the nominated income or gains; if, as in this example, there is more than one account the individual should provide sufficient detail to distinguish between them and identify the "nominated" account. That might be the entire account number, or the account "name", or some other unique identifying feature of the account.

March 2009 Qs & As makes an obvious point:

> **Q6:** If I use nominated income or gains to pay the remittance basis charge of £30,000 it would appear that does not trigger the provisions in sections 809I and 809J. Is that right?
>
> **A:** If £30,000 of the nominated income or gains is brought to the UK to pay the remittance basis charge, it is treated as not remitted to the UK under section 809V. Therefore section 809I does not apply because none of the individual's nominated income or gains is regarded as having

been remitted to the UK in that tax year. If the £30,000 is repaid by HMRC then it is treated as remitted at that point and so section 809I will be triggered.

13.14.8 *Accidental remittance of nominated income/gains*

The RDR Manual provides:

> **35140 Remittances of nominated income or gains - miscellaneous** [January 2014]
> If an individual accidentally remits any nominated income or gains to the UK then HMRC will (using its discretionary powers) allow them to undo their mistake, by reversing the transfer without unreasonable delay and in any event before the end of the tax year, for example by paying the income or gains back to the original account, so that the ordering rules at s809I and s809J will not apply.
> HMRC will only use its discretion in such situations as long as there have been no relevant transactions or other benefits conferred on a relevant person in the interim. Otherwise the s809J ordering rules will apply.
> For example, if £20,000 is transferred in error from an overseas bank to a UK bank account and two weeks later the account owner realises the mistake and immediately transfers that £20,000 directly back to the overseas bank account, HMRC will accept that s809I and s809J do not apply. However if, for example, the £20,000 was spent in the UK and then £20,000 from another UK account was transferred back to the overseas account then s809I and s809J do apply.

This recognises the unfairness of the nominated income remittance rules. Contrast 13.9 (Remittance due to bank error).

13.14.9 *Nominated income used to pay remittance basis charge*

The RDR Manual provides:

> **35140 Remittances of nominated income or gains - miscellaneous** [June 2010]
> If an individual accidentally remits any nominated income or gains to the UK then HMRC will (using its discretionary powers) allow them to undo their mistake, by reversing the transfer without unreasonable delay and in any event before the end of the tax year, for example by paying the income or gains back to the original account, so that the ordering rules at s.809I and s.809J will not apply.

13.14.10 *HMRC example*

The RDR Manual provides:

> **35150 Remittances of nominated income or gains** [July 2010]
>
> *Example 1* (Alexandria)

	Foreign gains Para (d)	Jersey RFI Para (c)	Jersey RFE Para (a)	Nomination (from Jersey RFI)
2010-11	£250,000	£75,000	£200,000	£75,000 RFI
2011-12	£300,000	£80,000	£120,000	£75,000 RFI[54]
2012-13	Nil	£75,000	£280,000	£75,000 RFI
2013-14	£130,000	£80,000	£150,000	£75,000 RFI
Totals	£680,000	£310,000	£750,000	

> *In 2013-14 A actually and identifiably remits*
> £30,000 Jersey relevant foreign income that she nominated in 2010-11,
> £140,000 foreign chargeable gains from 2011-12 and
> £50,000 relevant foreign earnings from 2013-14.

The ordering rules are triggered. The "relevant year" is 2013-14

Step 1 Identify nominated income and gains remitted in the relevant year	£30,000	**Relevant Amount**	£220,000
Identify the remittance basis income and gains remitted in the relevant year	£190,000		
Step 2			
Find the total amount of the individual's foreign income and gains (excluding those nominated) for the relevant tax year	**Para (a)** Relevant foreign earnings (not subject to a foreign tax)		£150,000
	Para (c) Relevant foreign income (not subject to a foreign tax)		£5,000
	Para (d) Foreign chargeable gains (not subject to a foreign tax)		£130,000
Step 3 Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil.	**Para (a)**		£150,000
Step 4 Where the relevant amount is greater than the amount identified above the relevant amount is reduced by	£220k less £150k = £70,000		

54 The author ignores the complication that the rate of income tax has risen to 50%.

the amount identified

Step 5 If the relevant amount is not nil go back and repeat Step 3. Take the reference to the first of paragraphs (a) to (h) as a reference to the earliest paragraph not previously taken into account under Step 3.

Step 3 repeated	**Para (c)**	£5,000
Step 4 repeated	Relevant Amount reduced to:	£65,000

Step 5 In the order of preference listed above repeat Steps 3 and 4.

Step 3 repeated	**Para (d)**	£130,000

Step 4 If the relevant amount is less than the amount identified, treat the whole of the remaining amount of the transfer as coming from that item of income or gain.

So A will be taxed on £220,000 of remittances as if she had actually remitted the following

		2010-11	**2011-12**	**2012-13**	**2013-14**
Foreign chargeable gains	Accruing in year	£250,000	£300,000	Nil	£130,000
	Actually remitted	£Nil	£140,000	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£65,000
Relevant foreign income Nominated	Arising in year	£75,000	£75,000	£75,000	£75,000
	Actually remitted	£30,000	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£Nil
Relevant foreign income Not nominated	Arising in year	£Nil	£5,000	£Nil	£5,000
	Actually remitted	£Nil	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£5,000
Relevant foreign earnings	Accruing in year	£200,000	£120,000	£280,000	£150,000
	Actually remitted	£Nil	£Nil	£Nil	£50,000
	Treated as remitted	£Nil	£Nil	£Nil	£150,000

If in future years she actually remits any of these monies, the ordering rules will treat her as having remitted something else instead (refer to RDRM35160 - example 1 continuation).

35160 Remittance of "nominated" income or gains [July 2010]

Example 1 - Continued

Moving forward, in 2014-15 A has relevant foreign earnings of £80,000, but no other foreign income or gains. She decides not to use the remittance basis in that year.

In 2014-15 A actually brings into the UK;

£5,000 Jersey relevant foreign income that she did not nominate in 2013-14 (note 1)

£80,000 relevant foreign earnings from 2013-14 and

£80,000 relevant foreign earnings from 2014-15

Although A is not using the remittance basis in 2014-15, the ordering rules at s809J ITA 2007 are still required to determine what she is to be taxed as having remitted in that year. The relevant year is 2014-15.

Ordering rules at 2014-15

Step 1 Identify nominated income and gains remitted in the relevant year (2014-15)	£nil	**Relevant Amount**	£85,000
Identify the remittance basis income and gains remitted in the relevant year	£85,000 (see note 2)		
Step 2 Find the total amount of the individual's foreign income and gains (excluding those nominated) for the relevant tax year If the remittance basis was not used in that year (that is sections 809B, 809D or 809E did not apply), treat those amounts as nil and go to step 6	Nil		

Step 6

If the relevant amount is not nil, start again at step 2. Take the reference to "relevant year" to be a reference to foreign income of gains of the individual for the earliest 'appropriate year' previous to the lat tax year from which Step 2 was undertaken.

Step 2 Find the total amount of the individual's foreign income and gains (excluding those nominated) for the appropriate tax year (2013-14) (see note 3)	**Para (d)** Foreign chargeable gains (not subject to a foreign tax)	£65,000
Step 3 Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil.	**Para (d)**	£65,000
Step 4 Where the relevant amount is greater than the amount identified above the relevant amount is reduced by the amount identified	Relevant Amount reduced to:	£85k less £65k = £20,000

Step 5 If the relevant amount is not nil go back and repeat Step 3. Take the reference to the first of paragraphs (a) to (h) as a reference to the earliest paragraph not previously taken into account under Step 3.

Step 6

If the relevant amount is not nil after Steps 3-5 have been completed for the year, start again at step 2. Take the reference to 'relevant year' to be a reference to foreign income of gains of the individual for the earliest 'appropriate year' previous to the lat tax year from which Step 2 was undertaken.

Step 2 Find the total amount of the individual's foreign income and gains (excluding those nominated) for the appropriate tax year (2012-13)	**Para (a)** Relevant foreign earnings (not subject to a foreign tax)	£280,000
Step 3 Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil	**Para (a)**	£280,000

Step 4 If the relevant amount is less than the amount identified, treat the whole of the remaining amount of the transfer as coming from that item of income or gain

So in 2014-15 A is treated as having remitted
£20,000 relevant foreign earnings
£65,000 foreign chargeable gains.
NB – The £80,000 relevant foreign earnings from 2014-15 that she brings in will be taxed on the arising basis in that year.

Note 1 In 2013-14 A has £80,000 of Jersey relevant foreign income, of which £75,000 were nominated; if this £80,000 were all in the one single account, and there was nothing else in the account then, under the principle of this section the first £5,000 remitted in 2014-15 is accepted as being "not-nominated" income.
In this example it is of little practical difference because the s809J ordering rules have already been "triggered" in 2013-14 by her remittance of nominated income (from 2010-11).
But if the ordering rules had not already been triggered, then because, this £5,000 Jersey relevant foreign income in 2014-15 can be accepted as being "un-nominated" income first and foremost, so A's remittance of this £5,000 would not, of itself, have triggered the s809J ordering rules in this year.
Note 2 A's remittance basis income and gains are her total foreign income or chargeable gains for all tax years up to the "relevant tax year" (2014-15) in which she used the remittance basis under section 809B, section 809D or section 809E. It therefore excludes her relevant foreign earnings from 2014-15 because she is not using the remittance basis in that year.
Note 3 the ‹foreign income and gains 'for' the appropriate year exclude any:
- ‹nominated' income or gains, or
- income or gains that were actually remitted to the UK before the beginning of the appropriate tax year or
- income or gains that were treated as remitted to the UK previously under section 809J before the beginning of the appropriate tax year.

In A's case, the £5,000 Jersey relevant foreign income from 2013-14, and the £80,000 relevant foreign earnings from 2013-14 that she actually remitted in 2014-15 were treated as having been remitted in 2013-14 by the ordering rules (refer to the earlier part of example 1 RDRM35150).
Summary

		2010-11	**2011-12**	**2012-13**	**2013-14**	**2014-15**
Foreign chargeable gains	Accruing in year	£250,000	£300,000	£Nil	£130,000	£Nil
	Actually brought to UK	£Nil	£140,000	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£130,000	£Nil
Relevant foreign income Nominated	Arising in year	£75,000	£75,000	£75,000	£75,000	£Nil
	Actually brought to UK	£30,000	£Nil	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£Nil	£Nil
Relevant foreign income Not nominated	Arising in year	£Nil	£5,000	£Nil	£5,000	£Nil
	Actually brought to UK	£Nil	£Nil	£Nil	£5,000	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£5,000	£Nil

Relevant	Arising in year	£200,000	£120,000	£280,000	£150,000	£80,000
foreign	Actually brought to UK	£Nil	£Nil	£Nil	£130,000	£80,000
earnings	Treated as remitted	£Nil	£Nil	£20,000	£150,000	£Nil

13.15 Nominated income: commentary

In short, the effect of the nominated income remittance rule is that remittances are treated as being made in the nominated income/gains priority order, taking more recent years before earlier years (regardless of the actual remittances). As in the case of the "steps" of the mixed fund rules, one is tempted to ask: why didn't the statute simply say so?

But the drafting is the least of the problems of the nominated income remittance rule. The author of the EN anticipates criticism that this is administratively difficult and offers some tax planning advice:

> 14...The rules dealing with this in sections 809I and 809J will require additional records to be maintained from 6 April 2008 or the first year of residence in the UK, if later.
> 15. The record keeping necessary for sections 809I and 809J can be avoided if individuals ensure that "nominated" income or gains upon which the RBC is paid are not remitted to the UK, or only remitted after the remittance of all other unremitted income and gains since the first year of residence from April 2008. If an individual is confident they will never need to remit that "nominated" income or gains, paying the RBC will not involve any extra complexity or record keeping.[55]

Even if this advice were correct it would not help the majority of remittance basis taxpayers, but they should not complain about administrative complexity: they are responsible for the problem, which they brought on themselves by making a claim for the remittance basis:

> 16. As mentioned earlier, those eligible can choose whether or not to claim the remittance basis for each particular year, depending on whether it is to their advantage to do so.

But even the administrative inconvenience is not the serious problem of the rule. The effect of the rule is that if the individual remits a penny of their nominated income/gains, one disregards entirely the actual

---

55 The last sentence is not correct. It is not enough that an individual is "confident that they will never need to remit that nominated income or gains". The individual must be able to demonstrate to HMRC that they have not remitted, and that requires record keeping.

remittances and charges on the basis of the fictional rules. Thus an individual who actually remits gains is taxed as if they remitted income (as long as they also remits a penny of nominated income). It is therefore in principle desirable to take care not to remit any nominated income/gains. The funds may be used abroad or used to pay the remittance basis charge.

13.16 ITA mixed fund rules: commentary

The ITA mixed fund rules operate on a daily, indeed minute by minute basis, as the rules must be applied at the time of every onshore and offshore transfer. They do not operate within a given tax year on a pro rata basis (contrast the s.87 or s.731 matching rules). If a client's account contains thousands of entries, the computations must be done thousands of times. The reader who has studied the chapter to here, and who contemplates applying these rules to the actual circumstances of a client, will agree that the mixed fund rule is unworkable.

Joint Forum on Expatriates Tax and NICs Note of Meeting 18 September 2008 records the same view:

> Delegates asked whether HMRC would be prepared to allow for apportionment on an annualised (rather than a monthly) basis. The legislation concentrates on transfers from mixed funds on the occasion of each and every transfer. HMRC did not think it was possible to override the intention of the legislation but agents considered that it would be unworkable to examine each and every debit and credit on the basis envisaged within a new legislation. ...
>
> The overwhelming view put forward by external delegates was that without the availability of a methodology along the lines of SP 5/84 it would be impractical for any inward expatriate to claim access to the remittance basis because it would not be possible to perform the calculations required by the legislation.[56]

In their defence, HMRC make two points:

> [1] HMRC reminded delegates that use of the remittance basis is voluntary as from 6 April 2008 and [2] that HMRC had been asked to bring in rules on remittance from mixed funds and rules relating to overseas transfers.

But as to point [1], the fact that the remittance basis is voluntary is no

56 Accessible *http://www.hmrc.gov.uk/consultations/expat-mins-180908.htm*

excuse for unworkable tax law. HMRC have overlooked[57] that the remittance basis is intended to make the UK an *attractive* place for foreign domiciliaries to reside. There is no need to comment on point [2].

A few months later HMRC issued SP 1/09 so the step thought impossible proved to be possible after all.[58] But while helping employees who qualify for overseas workday relief, that does not help the rest of the body of remittance basis taxpayers who face the same problems. Why were workday relief employees singled out for special treatment? The reason was presumably down to effective lobbying rather than any rational policy consideration.

The mixed fund legislation needs to be rethought from beginning to end – an immensely challenging task, which could not possibly have been done in the few days available as Schedule 7 FA 2008 hurtled to the deadline for enactment. However HMRC have rejected this:

> In particular, the Government will not look further at the following:
> *Simplification* Reviewing and simplifying the mixed fund rules
> *Government response* Although the Government appreciates that these rules can (!) be complicated to operate, it is essential to be able to identify different types of income, gains and capital as they are remitted from a single account. The Government cannot envisage an alternative approach to achieve this purpose which would not entail similar complexity or a significant Exchequer cost.[59]

It is suggested that the rule ought to be that the person remitting from a mixed fund can determine what constituent of the fund the remittance consists of. That would be a significant simplification. The cost to the exchequer could be recovered by an adjustment in the remittance basis claim charge. The reform would be especially welcomed by those who actually try to comply with the present rules.

---

57 An alternative inference is that a conscious decision was made to undermine the remittance basis by making it impracticably difficult to operate.

58 See 22.26 (OWR mixed fund rule).

59 HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (2011) para 2.127 *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

CHAPTER FOURTEEN

INCOME SOURCES AND CATEGORISATION

14.1 The categories of income

ITTOIA classifies income into:
(1) categories (covered by a Part of ITTOIA); and
(2) sub-categories (covered in a chapter of a Part of ITTOIA)
I refer to these as **"income categories"**. The main categories of income are the following:

	ITTOIA	
CATEGORY/SUBCATEGORY	**PART**	**CHAPTER**
Trading Income	2	
Property Income	3	
Savings & Investment Income	4	
Interest		2
UK dividends		3
Non-UK dividends		4
Deeply discounted securities		8
Life policies: chargeable event gains		9
Miscellaneous Income	5	
Royalties		2
Settlor-interested trusts[1]		5
Estates in course of administration		6
Annual payments		7

Each of these topics has its own chapter in this work. This chapter draws together some general comments which apply to more than one type of income.

Income must be classified or categorised into one of the categories. Categorisation is important because different rules often apply to the

1 Before the Tax Law Rewrite, this was a distinct category of income, taxed under schedule D case VI. Whether ITTOIA was right to classify it as a separate category is doubtful, but it does not much matter.

different categories of income.

The categorisation scheme of ITTOIA is not the most simple or logical. It is influenced by the pre-rewrite schedular system. In particular, "miscellaneous income" is a ragbag of categories some of which might have been better placed elsewhere. But generally speaking, the ITTOIA categorisation works – at least, once the reader is familiar with it.

14.2 Location of source of income: Territorial scope of IT

For tax purposes:
(1) All income has a source.
(2) Every source has a geographical location.

A note on terminology: Statute formerly used a variety of expressions[2] but now the standard terms to refer to location of a source are: "source in/outside the UK" or "income arising in/outside the UK"; these expressions are synonymous.[3]

The location of a source of income matters for several purposes. The most fundamental of these is the territorial scope of income tax. For Part 4 ITTOIA (savings & investment income) s.368 ITTOIA provides:

> (1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.
> (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK.

For Part 5 ITTOIA (miscellaneous income) s.577(1)(2) repeats the same point verbatim. The territorial limitation for other categories of income is discussed in the chapter on the relevant category.

This is a statutory statement of a principle which was formerly in part in statute and (where absent) was implied by the courts.[4] It rests ultimately

---

2 e.g. in section 65 ICTA 1988 (repealed) the test was whether a possession or security was "out of the UK", but that was understood to mean "having a source out of the UK"; see 18.7.2 (Changes made by the tax law rewrite).

3 An argument that there was a distinction between the source of income and the place where the income arose was rightly rejected in *Bayfine v HMRC* [2011] STC 717 at [63]. This is also the view in Hong Kong: see 14.7 (Non-UK tax cases). The suggestion to the contrary by the FTT in *Perrin v IRC* [2014] UKFTT 223 (TC) at [24] is *per incuriam*.

4 ITTOIA EN Vol II explains:
"29. ...Since *Colquhoun v Brooks* 2 TC 490 the courts have followed Lord Herschell's judgment that (p.499):

on a rule of international tax law.[5]

The location of a source matters for various other purposes. In particular, income must have a source outside the UK to qualify as RFI and so to qualify for the remittance basis.[6]

There is no statutory definition of "source". The word is too basic to be usefully defined. The word has been paraphrased as "origin"[7] and "chief" or "originating" cause[8] but these paraphrases are of no practical assistance.

14.3 Approach to locating a source of income

Different considerations naturally apply to locating the source of different categories of income.

Location is generally governed by case law, though occasionally statute

---

> The Income Tax Acts ... themselves impose a territorial limit, either that from which the taxable income is derived must be situate in the UK or the person whose income is to be taxed must be resident there.
>
> 30. Whether Lord Herschell's words referred to the statutory rules of the time or to a general statement of the law, it is as the latter that they have been subsequently applied by the courts. For example in *Perry v Aston* 19 TC 255 Lord Russell of Killowen states (p.280):
>
> > There must, of course, be the necessary limitation which is inherent in all our Income Tax legislation, namely, that what is taxed under or by virtue of this provision can only be either (1) income which is here, or (2) income of a person resident here.
>
> 31. Additionally there is the general principle of UK law that, unless the contrary intention appears, an enactment is taken as not applying to matters outside the UK."

5 United Nations *Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries* (2003): "The jurisdiction to impose income tax is based either on the relationship of the income (tax object) to the taxing state (commonly known as the source or situs principle) or the relationship of the taxpayer (tax subject) to the taxing state based on residence or nationality.

Under the source principle, a State's claim to tax income is based on the State's relationship to that income. For example, a State would invoke the source principle to tax income derived from the extraction of mineral deposits located within its territorial boundaries. Source taxation is generally justified on the ground that the State has contributed to the creation of the economic opportunities that allow the taxpayer to derive income generated within the territorial borders of the State. Of course, jurisdiction to tax is also about power, and a State generally has the power to tax income if the assets and activities that generated it are located within its borders...."

6 See 10.3.1 ("Relevant foreign income")

7 *Hart v Sangster* 37 TC 231 at p.235.

8 *IRC v Philips' Gloeilampenfabrieken* [1955] NZLR 868.

chips in.

The IT rules for the location of an income source are different from the situs of asset rules for IHT/private international law.[9] It would aid clarity of thinking not to use the same word in both contexts, so in this book I use the term "**location**" of a source of income (abbreviated to location of income) and keep *situs* for IHT/international law concepts and CGT. But the usage of "situs" in an income tax context is too well established to alter easily, and no difficulty ought to arise as long as one bears in mind that IHT/international law situs of assets, and IT location of source of income, may be different (though the rules often overlap).

The location of a source is also important for double tax treaties.[10] However DTAs sometimes lay down their own rules for locating a source (for treaty purposes) so it may be necessary to distinguish between UK domestic law source location and treaty-source location.

It is considered that a source of income should be regarded as located in only one jurisdiction. This rule is necessary if source rules in tax law are to achieve the object of avoiding double taxation.

14.4 Does a source of income actually have a location?

The concept of the location of a source of income is sometimes said to be misconceived:

> Income itself does not have a geographical location.[11]

This is not an accurate statement of tax law. Every source of income has a location. In most cases it is easy to identify the location, as the same passage goes on to state:

> By long standing convention,[12] however, income is assigned a geographical location by reference to the location of the assets and activities that are used to generate the income. When all of those assets and activities are located in one State, that State may be considered to be the unambiguous source of the income.

---

9 See 82.1 (Concept(s) of situs).

10 See "Treaty Problems Relating to Source" [1998] BTR 222.

11 Para 2, United Nations Manual for the Negotiation of Bilateral Tax Treaties between developed and Developing Countries) 2003.

12 Contrast the (misconceived) view that the situs of a chose in action is fictional: see 82.1 (Concept(s) of situs).

The problem is how to identify the location in harder cases. The passage gives the example of trading income, the hardest case to locate a source:

> ... When some of the assets or activities generating income are located in more than one State, the source of the income is less clear. For example, business profits derived from the manufacture of goods in State A and their sale in State B have a significant relationship to State A and to State B. In these circumstances, some rules for determining source are needed.

An American scholar makes the same point:

> ... the source of income is difficult to define. In fact, many public finance economists would claim that the concept lacks meaning in the majority of cases... the problem has been partially solved by arbitrary rules. ... Economists argue that defining the true economic source is almost impossible, because income has contributions from many countries.[13]

In cases where 2 or more states are involved, it is correct that there is no "true" location of source of income in *economic* terms. However this is simply one of many cases where economists and tax lawyers reach different conclusions for the purposes of their different disciplines. Tax law must somehow choose connecting factor(s) to link a source to a state. In principle, it does not matter what the rule is, as long as there is some rule and its application is clear. There are many possible connecting factors, and the selection of the determining factor(s) must to some extent be arbitrary.

14.5 Formal v. substantive source rules: the policy background

An American scholar draws an interesting distinction for rules which determine the location of a source of income: formal and substantive. This is helpful in identifying the policy issues which arise in framing of location of source rules:

> Source rules fall into two basic categories. The first category comprises formal rules. These rules do not attempt to trace the economic source of the income, but rather seek to achieve administrative ease and certainty. For example, the source rule for dividends is residence of the payor. Consider the following example demonstrating the formal rule: Suppose a foreign corporation exists and all of its income is earned in the United

13 Avi-Yonah, *International Tax as International Law*, (2007), p.27, 38.

States - it has no other business activity.[14] From an economic perspective, it is clear that a dividend paid by this foreign corporation to its shareholders is US-source. But it is foreign-source under the dividend rule, because the payor is a foreign corporation. Notice also that this means that the source of dividend income is under the control of the taxpayer ... The main reason behind this rule is that it is administratively hard to tax a dividend from a foreign corporation to foreign shareholders, but easy to tax a dividend from a US corporation.

The rule for interest is also a formal rule, and it is the same as the rule for dividends - the residence of the payor. This is fortunate because of the difficulty of distinguishing debt from equity in many cases; at least the source rule is the same. ...

The other kind of source rule is the substantive rule, which attempts to trace the economic source of the income. The first one of these is the rule for royalties ... No universal consensus exists about what the source rule for royalties should be. Many countries have a source rule for royalties that focuses on the residence country; the place of ownership of the underlying copyright or the place of production (research and development). The American rule is a place of use rule, meaning that it focuses on where the copyright or patent is utilised. ...

There are other categories in which a substantive rule applies. In services, for example, the place of delivery of service controls. ...

The basic difference between formal rules and substantive rules is that the formal rules require one single determination (residence of the payor, residence of the seller, or passage of title), whereas substantive rules attempt to trace the economics of the transaction. Formal rules are generally relatively easy to administer, from both the IRS perspective and the taxpayer's perspective, whereas substantive rules may involve much more difficult determinations. For example, in the case of patents and copyrights, the rule requires determination of the location of use, which may be difficult to determine if it is used in many countries: it may be difficult to break up the income into where the service was actually delivered. Not all substantive rules are difficult to administer: real estate is relatively easy because the location of real estate governs residency, and location is simply to determine in real estate. Most of the important applications of substantive rules, however, are difficult to administer and are more difficult for the taxpayer to avoid because the formal rules are much more under the taxpayer's control.[15]

---

14 Author's note: A foreign corporation is non-resident for US tax purposes: there is no central management and control test for corporate residence.

15 Avi-Yonah, *International Tax as International Law* (2007), p.42.

14.6 Location of source of income when there is no source

It was once the case that income tax was charged only on income from sources specified in the schedules, so in the absence of a source of income there could be no income tax. This is not always the case:

> Income tax is traditionally a source-based annual tax, liability depending upon the existence of a source of income falling under one of the Schedules during the year of assessment ...
> It is, however, no longer true to say that liability to income tax depends upon the existence during the year of assessment of a source within the charge. There are cases (such as post-cessation receipts) when liability depends upon the existence of income defined by reference to a source which does not exist within the year of assessment. Or liability may depend upon an event, such as a balancing charge on the sale of an asset which has attracted a capital allowance, or the receipt of a capital sum from a particular kind of transaction, which is deemed to be taxable income received in that year of assessment or sometimes spread over several years of assessment.[16]

ITTOIA EN Vol II para 1639 notes that:

> Such chargeable amounts [capital receipts subject to income tax] could not therefore be said to derive from a "source" in the traditional sense.

ITTOIA EN was concerned that this might cause difficulty in finding the location of the source:

> 1640. Although the definition [of RFI] uses "income which arises from a source" in respect of all income within the definition, specific rules have been added, in view of Lord Hoffmann's remarks, in sections 428(3) ITTOIA (deeply discounted securities) and 658(2) ITTOIA (beneficiaries' income from estates in administration), to attribute a foreign source to the income in question to ensure that there is no doubt that the definition applies to these provisions.

Accordingly, there is a statutory provision to cover the point. For Part 4 ITTOIA (savings & investment income) s.368(3) ITTOIA provides:

> References in this section to income which is from a source in the UK include, in the case of any income which does not have a source, references to income which has a comparable connection to the UK.

---

16 *Walker v Centaur Clothes Group* 72 TC 379 at p.416.

For Part 5 ITTOIA (miscellaneous income) s.577(3) repeats the same point verbatim.

ITTOIA EN Vol II expands on this:

> 34. However, while the term "source" may apply to the majority of receipts chargeable to income tax it does not apply to all such receipts. "Source" is something from which income arises and not all sums charged to income tax are by nature income. "Source" may not be the appropriate term where the amount charged to tax represents a profit on a transaction which is not by nature income and would not be charged to income tax without a specific charge. Indeed, the chargeable profit may arise on the disposal of an income source.....
> 35. It has therefore been necessary to consider how to express the territorial scope in cases where there is no natural source of income.
> 36. [Section 368(3)] is broadly worded to catch such income. Where the connection such income has to the UK is comparable to the connection that income with a source in the UK has to the UK, then it is treated for the purposes of this section as income from a source in the UK.

It is hard to see that this concern was justified, but the statutory provision does no harm.

14.7 Non-UK tax cases on the source of income

There are many Commonwealth cases, which ought to be helpful. It is of course necessary to consider whether the relevant Commonwealth legislation is differently worded from the relevant UK provision. This arises particularly for cases on the source of trading income.

The Southern Rhodesia statute imposed a charge on the amount:

> received by ... any person ... *from any source within the Territory* ...

In *Rhodesia Metals v CT*, the Privy Council said of this provision:

> ... numerous cases founded on the various Income Tax Acts, English, Australian, New Zealand and South African, were cited ...
> Their Lordships have no criticisms to make of any of those decisions, but they desire to point out that
> [1] decisions on the words of one statute are seldom of value in deciding on different words in another statute, and that
> [2] different business operations may give rise to different taxing results.

Point [2] is obviously correct but we are here concerned with point [1]. The Privy Council continue:

> [3] If the charging words of the English statute are looked at,
>
> "annual profits or gains arising to any person ... (ii.) residing in the UK from any trade wherever carried on, and (iii.) whether resident in the UK from any trade exercised within the UK";[17]
>
> they are obviously different from the Southern Rhodesian charging words,
>
> total amount [other than capital] received by ... any person ... from any source within the Territory.
>
> [4] It is desirable, also, to point out that, at any rate for different taxing systems, income can quite plainly be derived from more than one source even where the source is business. For instance, in the case of the business of a railway company whose railway is situate abroad, as in *San Paulo (Brazilian) Railway v Carter*,[18] while the English company may be assessed in England on the whole of its profits because it carries on part of its business there, yet it could not be doubted that so much of the profits of the business as were in fact earned from running the railway in Brazil were derived from exercising a business in Brazil; and still less could it be doubted that the sums received by the company in Brazil were received from a source in Brazil.[19]

Lord Atkin correctly states at [4] that the Commonwealth legalisation and case law has no relevance to the (artificially wide) test of location of source of trading income for UK residents.[20] It is considered that the Commonwealth legislation does apply the same test as s.6(2) ITTOIA (trading income of non-resident). For this purpose the Commonwealth cases *are* persuasive authorities in the UK. For the object of the rules for non-residents is to avoid double taxation and ensure that income is taxed in one and only one jurisdiction. That object can only be achieved if there is an international "common law" on the subject. In practice this is the view taken. For instance, the former International Tax Handbook referred to *Kirk*.[21]

---

17 I have corrected a slight misprint in the law report. This is only a rough summary of the statutory wording, later s.18 ICTA, now rewritten in ITTOIA.

18 3 TC 407.

19 [1940] AC 774 at p.788–9.

20 See 15.3 (Trading income of UK resident).

21 See ITH826.

The same applies to Hong Kong, where the charge is on profits "arising in or derived from Hong Kong".[22] *Smidth* is the basis of the Hong Kong case law.[23] The Hong Kong Revenue have issued useful guidance **"the Hong Kong guidance note"**. It is suggested that its status in an English court should be the same as that of a textbook. The Hong Kong guidance note provides:

> 4. Though the word "source" is not used in section 14, it has always been accepted by the courts that the words "arising in or derived from" raised the concept of source. Cases from other common law jurisdictions with legislation using the specific word "source" are therefore relevant and have been used in assisting the interpretation of the words used in section 14. In *IRC v Philips Gloeilampenfabrieken* [1955] NZLR 868, Barrowclough CJ at 874 said that the concept of derivation seems necessarily to imply the concept of a source.[24]

In an Indian statute, the charge was on profits "accruing or arising in British India". This was held to be substantially the same as in Hong Kong.[25]

> This authority can only be distinguished from the instant case if the words in s 14 'derived from' are given a much wider meaning that the words 'arising in'. Whilst it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases, their Lordships do not accept that it can possibly be sufficient to bear the weight sought to be put on it in distinguishing *Mehta's* case.

14.8 Source of alimony and maintenance income

I deal with this topic here as it does not fit anywhere else.

Before 2000, the source of alimony income was important for the payer and the recipient, because foreign source income was outside the scope of UK withholding tax and a remittance basis taxpayer who received it qualified for the remittance basis. Since 2000, alimony income is not

---

22 Section 14 Hong Kong Inland Revenue Ordinance.

23 *IRC v HK-TVB* [1992] STC 723 at p.728.

24 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No. 21 (Revised) Locality of Profits December 2012, accessible *http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf.* See 14.2 (Location of source of income).

25 *IRC v Hang Seng Bank* [1990] STC 733 at p.739 though "it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases".

generally taxable,[26] so the question of source does not usually arise.

Where the question does arise, the source of alimony income is the country whose court ordered the payment.[27]

Foreign tax may be payable if alimony income has a foreign source under the foreign law (ie if it is paid by the foreign state). However if:

(1) there is a DTA with an "other income" article in OECD model form, and
(2) the recipient is treaty-resident in the UK,

the DTA will in principle provide exemption from the foreign tax (even though the alimony income is not taxable in the UK). This is of course a matter for the foreign law.

14.9 Split years: savings & investment & miscellaneous income

For Part 4 ITTOIA (savings & investment income) s.368(2A) ITTOIA provides the usual split year rule:

> If income arising to an individual who is UK resident arises in the overseas part of a split year, it is to be treated for the purposes of this section as arising to a non-UK resident.

For Part 5 ITTOIA (miscellaneous income) s.577(2A) repeats the same point verbatim.

14.10 Capital/income distinctions

"Income tax is a tax on income." This slogan is less true now than when it was formulated in 1900; but the question whether a receipt is "income" in the hands of the recipient is often important. References to "income" in tax legislation do not include capital receipts unless statute so provides (which it often does). The issue arises in various contexts; those discussed in this book are:

20.5 (Receipt from a non-resident company: Income or capital?)
25.8 (Payment from discretionary trust: Income or capital receipt?).

---

26 See sections 727 and 730 ITTOIA.

27 See *Bingham v IRC* 36 TC 254 where a UK resident made maintenance payments to his ex-wife who was resident in the Netherlands. The payments had been ordered by a Dutch court and so were not UK source income. HMRC agreed. The former ESC A12 provided: "Where alimony or maintenance payments are paid under a UK court order or agreement, the income arises from a UK source regardless of the country of residence of the payer."

CHAPTER FIFTEEN

TRADING INCOME

15.1 Trading income: Introduction

A full discussion of the taxation of trading income would require many volumes. In this chapter I focus on matters closest to the themes of this book.

15.1.1 *Cross references*

The following matters are discussed elsewhere:
16.5 (Border between trading income and property income)
21.6 (Trade royalties)
44.11 (When is there a trade in financial assets?)
43.2 (Collection of tax from UK representatives)

15.2 Charge on trading income

Section 5 ITTOIA provides:

> Income tax is charged on the profits of a trade, profession or vocation.

Section 5 applies to all trading[1] income, but s.6 ITTOIA distinguishes between trading income of residents and of non-residents; these need to be considered separately.

15.3 Trading income of UK resident

Section 6(1) ITTOIA provides:

---

1 In this chapter, reference to a "trade" includes a profession or vocation as there is no relevant distinction between them. Section 6(3) ITTOIA provides:
"This section applies to professions and vocations as it applies to trades."
It is suggested that uniform rules should apply to trades, professions and vocations: that would be a worthwhile simplification; no-one knows what is meant by "vocation" if it actually mattered.

> Profits of a trade arising to a UK resident are chargeable to tax under this Chapter wherever the trade is carried on.

Section 7 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the profits of the tax year. …
> (4) This section is subject to Part 8 (foreign income: special rules).

This brings in the remittance basis rules if the trading income arises from a source outside the UK. It is therefore necessary to identify the source. Section 7(5) ITTOIA states the test of source of trading income:

> And, for the purposes of section 830 (meaning of "relevant foreign income"), the profits of a trade, profession or vocation arise from a source outside the UK only if the trade, profession or vocation is carried on *wholly* outside the UK.

This is a statutory statement of the pre-ITTOIA case law.[2] It is a wide and strange test of source. Applying this test, if a trade is carried on partly in country A and partly in country B, the source of the income is in country A *and* country B. For the same income to have a source in two different countries is contrary to the natural meaning of "source" and contrary to the purpose of the concept which is to locate a source in one jurisdiction in order to identify one state with jurisdiction to tax. (Similarly an individual can have only one domicile.)

The explanation is that s.7(5) ITTOIA does not provide the natural meaning of "source"; it is an artificial or deeming definition. It is fortunate (but not surprising) that commonwealth countries which adopted a UK style income tax did not adopt this rule. Thus Commonwealth cases on the source of trading income are not relevant here.

If any part of the trade is carried on in the UK then the entire trade has a UK source and does not qualify for the remittance basis. There is not even a *de minimis* rule; contrast the incidental duties disregard which applies to employment income.[3]

The former International Tax Handbook discussed the old case law, which still holds good under ITTOIA:

---

2 See John Avery Jones, "Taxing Foreign Income from Pitt to the Tax Law Rewrite – The Decline of the Remittance Basis", *Studies in the History of Tax Law* (Vol 1 2004) p.26 accessible *http://www.kessler.co.uk/tfd-archive*.

3 See 22.14 (Incidental duties in UK).

209. San Paulo case

[The San Paulo Railway Company (*San Paulo (Brazilian) Railway Company v Carter* 3 TC 407)] ... was a UK incorporated company with its board meetings in London. The whole of its physical undertaking was in South America and while it accepted that it was resident here it argued that its business was carried on wholly abroad where its railway was. The Courts held that the head and brain of the trading venture was here and that the profits were those of a trade partly carried on here and that, accordingly, Case I applied. ...

210. Trade partly in UK

The principle underlying the San Paulo decision is that a trade carried on partly in the UK is within Case I. The factors which decide whether a company is resident in the UK by reason of central management and control are, as will be seen, similar to those which decide whether its trade should be within Case I or Case V and the result is that for many years in the corporate sector the only examples seen of Case V trades were those in which a company is a partner in an overseas trade. ...

211. *Ogilvie v Kitton*

But other cases were to show how difficult it was going to be, except on very exceptional facts, to establish that any trade of a resident person was carried on wholly abroad. There was, for example, Mr Ogilvie in *Ogilvie v Kitton* (5 TC 338). He lived in Aberdeen and ran a shop in Canada. To say that he ran the shop really begs the question because he simply received reports from his manager in Canada and did not in fact intervene actively in the business at all, merely taking a tacit interest in things from the information in the reports. It was held that the head and brain of the trading venture was in Aberdeen and that the profits were assessable under Case 1.

In short, if a sole trader is UK resident it is in practice impossible to arrange that their trading income has a foreign source. Section 7(4)(5) ITTOIA is dead letter law. The former International Tax Handbook recognised this at para 209:

> That decision [*San Paulo*] suited the Revenue very well. We no longer had to worry about remittances which after all, though very sensible for an extractive activity which had to send its produce home, did not apply well at all to the more modern industries which did not need to remit their profit and which indeed probably wanted to keep as much profit abroad as possible for the expansion of their business. And so we effectively got on to a statutory arising basis for trades which, in everyday language, were wholly overseas and we reached that position purely through the interpretation of the statute by the Courts. ...

For completeness: s.95 ITA restricts loss relief for trades carried on wholly outside the UK, but since it is almost impossible to arrange that, the section is dead letter law.

15.3.1 *Planning for UK resident sole trader*

If a remittance basis taxpayer carries on a trade partly in and partly out of the UK, the individual will be taxed on the arising basis and not under the remittance basis. In these circumstances the individual may be able to divide up their activities into two spheres – those in and those out of the UK. The individual will then be carrying on two separate activities, of which at least one will yield foreign source income and qualify for remittance basis treatment.

How is this division to be achieved? Overseas activities could be carried on by a partnership controlled abroad. The offshore partner may be a company. This was the route successfully adopted by Sir David Frost: see *Newstead v Frost* 53 TC 525. Alternatively the activities could be carried on by a company or trust. In this way foreign trading income may be converted into foreign employment or dividend income which would enjoy a more beneficial tax treatment

15.4 To whom does trading income arise?

Since different rules apply depending on whether trading income arises to a UK or non-UK resident, it is necessary to identify the person to whom the income arises.

Suppose a non-resident trust is carrying on a trade. If the trading income accrues to the trustees, they are taxed in accordance with the rules relating to *non*-residents, discussed below, so the trustees would only be subject to UK income tax if the trade was carried on partly in the UK, and then only on the profits (if any) attributable to that part.

However if the life tenant of a transparent (*Baker*-style) trust was resident in the UK, then the profits of the trade arise to a UK resident, and the life tenant is taxed in accordance with the rules relating to UK residents: ie on an arising basis unless the strict condition is satisfied that the trade is carried on wholly outside the UK.

Suppose a non-resident settlor-interested trust with a settlor who is a remittance basis taxpayer. One might think that the settlor would be taxable on an arising basis only on the part (if any) of the trading income attributable to carrying on the trade in the UK. The balance of the profits one might think taxable only (if at all) under the s.624 remittance basis. But this is not the case. Since the trust income is deemed to be that of the UK resident settlor, the settlor is taxed in accordance with the rules relating to UK residents: ie theirs are taxed on an arising basis unless the

strict condition is satisfied that the trade is carried on wholly outside the UK.

What if the trade is carried on by a non-resident company within s.720 ITA? The transferor is treated as receiving s.720 income which is not trading income. However, the s.720 remittance basis applies only to income which would be RFI if it were the individual's.[4] So for the purpose of the s.720 remittance basis one must apply the rules relating to UK residents: ie the transferor is taxed on an arising basis unless the strict condition is satisfied that the trade is carried on wholly outside the UK.

In practice there will often be some UK element which would be sufficient to make the entire trade taxable.

15.5 Trading income of non-resident

An entirely different rule applies to trading income arising to a *non*-resident person. Section 6(2) ITTOIA provides:

> Profits of a trade arising to a non-UK resident are chargeable to tax under this Chapter only if they arise—
>
> (a) from a trade carried on wholly in the UK, or
>
> (b) in the case of a trade carried on partly in the UK and partly elsewhere, from the part of the trade carried on in the UK.

The pre-ITTOIA wording imposed a charge on non-residents on income arising:

> from any trade, profession or vocation exercised within the UK.[5]

The meaning was the same so pre-ITTOIA case law is still relevant.

Section 6(2) raises two issues: (1) When is a trade carried on wholly or partly in the UK? and (2) If a trade is carried on partly in the UK, how does one identify the profits from that part?

This is sometimes paraphrased by asking the question whether (or to what extent) the source of the trading income is in the UK. There seems nothing wrong with that; it is the correct and natural meaning of the word "source". Since s.7(5) ITTOIA uses the word "source" in an artificial sense in the rules relating to trading income UK residents, I have

---

4 See 29.14 (Section 720 remittance basis).

5 Section 18 ICTA 1988 (repealed). It was accepted (though not stated in statute) that where a trade was exercised partly in the UK, income was apportioned and only the UK part was taxable.

wondered whether it would aid clarity to avoid the word "source" in the context of the rules for non-residents. But in practice it is not possible to avoid the use of the word "source" here[6] so one simply needs to remember that source has two distinct meanings.

15.6 Trading income of split year

Section 6(2A) ITTOIA provides for the usual split year rule:

> If the tax year is a split year as respects a UK resident individual, this section has effect as if, for the overseas part of that year, the individual were non-UK resident.

15.7 Trading income of non-resident companies

Section 5 CTA 2009 provides:

> (1) A UK resident company is chargeable to corporation tax on all its profits wherever arising...
> (2) A non-UK resident company is within the charge to corporation tax only if it carries on a trade in the UK through a permanent establishment in the UK.[7]

15.7.1 *Extent of profits chargeable through PE*

Section 5(3) CTA 2009 identifies the amount on which CT is charged:

> A non-UK resident company which carries on a trade in the UK through a permanent establishment in the UK is chargeable to corporation tax on all its profits wherever arising that are chargeable profits as defined in section 19 (profits attributable to its permanent establishment in the UK)...

Section 19 CTA 2009 defines "chargeable profits":

> (1) This section applies if a non-UK resident company carries on a trade in the UK through a permanent establishment in the UK.
> (2) The company's chargeable profits are its profits that are—
> (a) of a type mentioned in subsection (3), and
> (b) attributable to the permanent establishment in accordance with sections 20 to 32.
> (3) The types of profits referred to in subsection (2)(a) are—

---

6 Since relevant case law and foreign statutes regularly use the word "source".

7 The drafting is based on article 7 of the OECD Model Convention.

(a) trading income arising directly or indirectly through or from the establishment,
(b) income from property or rights used by, or held by or for, the establishment, and
(c) chargeable gains falling within section 10B of TCGA 1992 (non-resident company with UK permanent establishment)—
  (i) as a result of assets being used in or for the purposes of the trade carried on by the company through the establishment, or
  (ii) as a result of assets being used or held for the purposes of the establishment or being acquired for use by or for the purposes of the establishment.

The topic of how profits are attributed to a PE needs a long book to itself; it is not discussed here.

15.8 Where is the source of trading income?

The UK case law is mostly antique, because in practice double taxation treaties often apply and then the issues may not arise. But of course that is not always the case. The former International Tax Handbook is erudite and still helpful.[8] Commonwealth cases on the source of trading income can be helpful[9] though unfortunately these cases are less than wholly consistent.[10]

15.8.1 *Foreign tax credit cases*

Cases on foreign tax credit may also help. Section 9 TIOPA provides foreign tax credit relief where the foreign tax is:

> calculated by reference to income arising ... in the territory.[11]

Thus for the purposes of foreign tax credit it is similarly necessary to

---

8 Tax Bulletin 18 provides a brief summary, not set out here.

9 See 14.7 (Non-UK tax cases on the source of income).

10 See Littlewood's scholarly article "The Privy Council, the Source of Income and *Stare Decisis*" [2004] BTR 121; Venables, "The Territorial Source of Income" OTPR, Vol 7, p.177, accessible *http://www.khpplc.co.uk/reviews*; Wong, "A comparative study of the taxation of business profits - especially 'online' profits - in Australia and the Hong Kong Special Administrative Region of the People's Republic of China" (2009) *http://arrow.monash.edu.au/vital/access/manager/Repository/monash:7770*

11 See 58.1 (Foreign tax credit relief).

identify the locality of the source. The issue arose in *Yates v GCA International*[12] where *Smidth* principles (ie the rules for trading income of non-residents) were applied. The former International Tax Handbook para 827 provided:

> The *Gaffney Cline* case [*Yates v GCA International* 64 TC 37], ... The point there was what part, if any, of the income from services arose in Venezuela when the contract was made in Venezuela but the services were performed partly in Venezuela but mainly in the UK. That is not necessarily the same as asking whether the trade was exercised in only one or in both of the countries – that was made clear in the judgement. But the judge looked for guidance to the criterion of Atkin LJ in the *Smidth* case 'where do the operations take place from which the profits in substance arise' when deciding that the income arose partly in Venezuela and partly in the UK.

15.9 Place where contract made

The former International Tax Handbook provided:

> **813. *Erichsen v Last***
> Another very early case was *Erichsen v Last* [4 TC 422] which was heard in the Court of Appeal in 1881. It is a highly important case and, curiously, was not published in Tax Cases until some twenty years after the decision. It is perhaps a pity that *Erichsen v Last* was concerned with a very special sort of trade – the relaying of telegraph messages. The application of the ideas which emerge from *Erichsen v Last* to other trades is, because of its special facts, rather difficult.
> The facts are simple enough. Erichsen was the UK representative of the Great Northern Telegraph Company of Copenhagen. The company was not resident here but it had three cables running across the North Sea to bases in Scotland and it had a staff of operators here. Messages were collected through an arrangement with the Postmaster General. The Post Office collected the money and deducted its agreed remuneration before handing over the messages to the company's operators here. The company's own staff then transmitted the messages across the North Sea. Thereafter, depending on their destination, they passed through cables owned by the Danish and Russian governments to their destinations which might have been as far off as Japan. The company made a weak sort of claim that it was not trading here but it went on to say that if it was, it ought to be taxed only on the profit arising from the relaying of the messages along the main cable to Denmark. It was making the point that some of the profit arose from the transmission along other cables which had absolutely nothing to do with the UK.
> The first thing the judgments in the Court of Appeal make clear is that the matter is wholly one of fact. The judgments then separate two questions for decision. First, is there trading in the UK? Brett LJ says this on page 425. His words are important because it is here that the significance of contract – place of contract

12 64 TC 37.

– begins.

> "Now, I think it would be first of all nearly impossible and second wholly unwise to attempt to give an exhaustive definition of when a trade can be said to be exercised in this country. The only thing that we have to decide is whether upon the facts of this case it can be said that this company is carrying on a profit earning trade in this country. Now I should say that wherever profitable contracts are habitually made in England by or for a foreigner with persons in England, because those persons are in England, to do something for or supply something to those persons, such foreigners are exercising a profitable trade in England, although everything done by or supplied by them in order to fulfil their part of the contract is done abroad. The profit arises to them from the contract which they make. The profit which they derive can only be derived from the payment which is to be made to them by the person with whom they contract. In the given case they would not have any such contract as they are in the habit of making unless it was a contract made in England with a person who is in England because he is in England. Observe, if the person or someone acting for him were not in England he would not be wanting to send a telegraph message from England".

The language is now over 100 years old and while it may perhaps look a little old fashioned today its meaning seems plain. The Court was saying: "You, the customer, are in England and because you are here you want goods here (or in the case in point, you want a message sent from here). The profit comes from the contract, the contract is here and there is trading in England and it is nonetheless trading in England even though the goods come from abroad or the service is provided through electric cables which are partly abroad". ...

815. First champagne cases

Erichsen v Last was followed by the so-called champagne cases. There were three leading champagne cases. In the first two, the Revenue succeeded in a claim that the French champagne houses concerned were trading in the UK through agents in London. In the Pommery case [*Pommery and Greno v Apthorpe* 2 TC 182] there was no express finding as to where contracts were made but most orders were met from stock held in the UK. In the Werle case [*Werle v Colquhoun* 2 TC 402] the Court of Appeal made it clear that they considered the contracts to be made by the agents here on behalf of their principal.

These two houses were producers of champagne as well as sellers of champagne and it is reasonably clear that the Revenue did not claim to tax the producer's profit. In the Pommery case at page 189, the Judge specifically referred to the difficulty of calculating the profit; he said that there might be some difficulty as to the manner of calculation in deciding what amount of expenditure to put against the profits and wondered whether it would be proper to look at the goods sent over to England and to put a fair valuation upon them as they arrived. That he said was a matter of quantum, a matter for the consideration of persons skilled in such things.

In the Werle case on page 413 Fry LJ had a similar approach, he said

> "A small shopkeeper... is plainly carrying on a trade in the place where the shop is ... The question, however, becomes more difficult when the trade is carried on, as in the present case, in a far more complicated manner ... when the contract may be in one place, the goods in another, the principal in another and the goods may be delivered in some other place. We have, however, simply to do this, to take all the relevant facts and the mode in which the business is carried on, and to ask ourselves whether that business be or be not carried on within the UK. It appears to me that the same business may in some sense be carried on in many places. The Head Office of a firm, the place where the goods are manufactured, the place where the contracts are made, may all of them be places in which the business or parts of the business is or are carried on. Now, in the present case what we find is this, that the appellants reside in France, carrying on there the business of vineyard proprietors, champagne makers and champagne merchants, no doubt a large portion of that business is carried on within France, but a portion of that business is that of champagne merchants. Now, that means, as I understand, the selling of champagne and that business they carry into effect in England through the intervention of a firm of agents in this country."

816. Contracts abroad

The last of the champagne cases is *Grainger v Gough* [3 TC 311 and 462] and it is a very significant case. The Court of Appeal made no distinction between this and the earlier cases and found that the champagne house was liable on its trading here. ...

But Lord Esher and his fellow judges were overruled by the House of Lords on the question of whether there was liability at all. That was on the basis that in this particular case, contracts were not made in the UK. Although to the customer there may have been little difference between buying through the agents in the first two cases and buying through the agents in the third, there was a difference in the arrangements which the House of Lords saw as vital in determining the non-resident's liability to UK tax. In finding that the contracts were not made in the UK the House of Lords drew the now classic distinction between trading in the UK which involves liability and trading with the UK which does not. Non-residents with customers here commonly rely on this distinction.

The House of Lords may well have had it in mind that if we sought too strenuously to tax foreigners who sold goods here, we might be faced with hostility by countries to which we were exporters and which might seek to tax those exporters in parallel circumstances. The thought is not directly expressed but there is a hint of it at the end of Lord Herschell's judgment on page 468.

15.10 Rejection of place of contract test

The former International Tax Handbook provided:

817. Place of contract not decisive

There are later judgments and very important judgments which tend to water down a little the great emphasis on place of contract. Lord Atkin

> speaking in the Smidth case [*Smidth & Co v Greenwood* 8 TC 193] in 1921 said this
>
> > "It (the place of contract) is obviously a very important element in the enquiry and if it is the only element the assessments are clearly bad. The contracts in this case were made abroad. But I am not prepared to hold that this test is decisive. I can imagine cases where a contract of resale is made abroad, and yet the manufacture of the goods, some negotiation of the terms, and complete execution of the contract take place here under such circumstances that the trade was in truth exercised here. I think that the question is, where do the operations take place from which the profits in substance arise?"

This is sometimes called "the operations test". It is not in fact a "test" as such, because further guidance is needed to identify where the profits in substance arise. It is however a rejection of the place of contract test. The former International Tax Handbook gave one further quote to drive the point home:

> In one of the few fairly modern[13] cases on this subject, the Firestone case [*Firestone Tyre & Rubber v Lewellin* 37 TC 111 at p.142] in 1957, Lord Radcliffe said this
>
> > "But he (Counsel for the Appellants) rightly reminded us that more than once the place where the contract is made has been spoken of as the 'crucial' test or, again, as the 'most vital' element. Speaking for myself, I do not find great assistance in the use of a descriptive adjective such as 'crucial' in this connection. It cannot be intended to mean that the place of contract is itself conclusive. That would be to re-write the words of the Taxing Act, and could only be justified if there was nothing more in trading than the act of sale itself. There is of course much more. But if 'crucial' does not mean as much as this, it cannot mean more than that the law requires that great importance should be attached to the circumstance of the place of sale. It follows, then, that the place of sale will not be the determining factor if there are other circumstances present that outweigh its importance or unless there are no other circumstances that can."

This approach is adopted in the Privy Council. The Hong Kong Revenue

13 I guess that this passage in the former International Tax Handbook was written in the 1980s.

have issued useful guidance (**"the Hong Kong guidance note"**[14]) which provides:

> 7. Lord Bridge explained the "broad guiding principle" in *Hang Seng Bank* at 322H to 323A in the following terms: "But the question whether the gross profit resulting from a particular transaction arose in or derived from one place or another is always in the last analysis a question of fact depending on the nature of the transaction. It is impossible to lay down precise rules of law by which the answer to that question is to be determined. The broad guiding principle, attested by many authorities, is that one looks to see what the taxpayer has done to earn the profit in question."
>
> 8. The "operations test" was further elaborated by Lord Jauncey in *HKTVBI* at 407C-D:
>
> > "*F. L. Smidth &v Greenwood* [1921] 3 K.B. 583 was cited in Hang Seng Bank case and their Lordships do not doubt that Lord Bridge has in mind the judgment of Atkin L. J. in that case and in particular the passage when he said, at p. 593: 'I think that the question is, where do the operations take place from which the profits in substance arise?' Thus Lord Bridge's guiding principle could properly be expanded to read 'one looks to see what the taxpayer has done to earn the profit in question and where he has done it.'"[15] ...
>
> 21. When Lord Bridge said in *Hang Seng Bank* that profits from buying and reselling of commodities were derived from the place where "the contracts of purchase and sale were effected", he could not merely mean legally executed (as this would depend on formal legal rules of offer and acceptance). The Department agrees with the approach in *Magna* and will contemplate all the relevant operations carried out to earn the profits, including the solicitation of orders, negotiation, conclusion, trade financing, shipment and performance of the contracts.
>
> 22. The Department does not merely look at the place of contract to determine the geographical source of profits. Where the contract is made by exchange of letters, by fax, or by e-mail, the application of contract law and of private international law as to where the contract is made may result in conclusions that are entirely fortuitous. In *Firestone Tyre and*

---

14 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf

15 Similarly Lord Jauncey in *HK-TVBI* at 409D-E:
"The proper approach is to ascertain what were the operations which produced the relevant profits and where those operations took place."

Rubber Co v Lewellin [1957] 1 WLR 464 (HL) at 471, Lord Radcliffe said such an approach under the conditions of international business and modern facilities of communication was capable of proving a somewhat ingenuous one. Hunter J shared the same view in *Sinolink Overseas v IRC* 2 HKTC 126 at 131.[16]

15.11 Where profits in substance arise

So we turn to the question of where profits in substance arise. The short answer is that there is no short answer. The former International Tax Handbook provided:

> **820. NRs: profits in substance**
> It is consistent with the words of Brett LJ at the start of the quotation in ITH813 to say that no neat formula to decide what is, and what is not, trading in the UK can be devised. ...

Circumstances vary so widely that it is not possible to devise a single test that fits all cases.[17] The Hong Kong guidance[18] note provides:

> 11. The broad guiding principle has been followed in subsequent cases before the Court of Final Appeal. In *Kwong Mile*, Bokhary PJ summarised the broad guiding principle at 174I to 175E:
>
> "The ascertainment of the source of a profit is not hindered by technical rules, but is helped by the broad guiding principle that one looks to see what the taxpayer has done to earn the profit and where he has done it. ... In *IRC v Orion Caribbean* [1997] HKLRD 5 924, Lord Nolan emphasised (at p.931F) that '[n]o simple, single, legal test can be employed' when ascertaining the source of a profit. ... The situations in which the source of a profit has to be ascertained are too many and varied for a universal judge-made test. Apart from the words of the statute themselves, the only constant is the need to grasp the reality of each case, focusing on effective causes without being distracted by antecedent or incidental matters."[19]

---

16 *IRC v Hang Seng Bank* [1990] STC 733 at p.739 though "it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases".

17 "No simple legal test can be employed"; see *IRC v Orion Carribean.*

18 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf

19 *IRC v Hang Seng Bank* [1990] STC 733 at p.739 though "it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases".

It is not, of course, an answer to say that the question is just a question of fact. The comments made at 18.8 (Objection to multi-factorial approach) apply here too.

15.12 Trading in UK: Preparatory and auxiliary activities

The former International Tax Handbook Manual para 849 provided that activities within OECD Model Convention para 5(4) do not amount to trading in the UK. This states (in short) that preparatory and auxiliary activities do not constitute a PE.[20] That includes in particular

(1) storage, display or delivery of goods
(2) purchasing goods[21]
(3) collecting information

The Hong Kong guidance note provides:

> ANTECEDENT OR INCIDENTAL ACTIVITIES
> 14. In *ING Baring* at 428, Ribeiro PJ when discussing the legal principle also emphasised the need to grasp the reality of each case, focusing on effective causes without being distracted by antecedent or incidental matters. The focus is on establishing the geographical location of the taxpayer's profit-producing transactions as distinct from activities antecedent or incidental to those transactions.
> 15. Whether an act is an antecedent or incidental activity is a question of fact and would depend on the nature of the transaction. In *IRC v The Hong Kong & Whampoa Dock Co* [1960] 1 HKTC 85, the initial business contact in Hong Kong which set in motion a chain of operations that ultimately led to the salvaging of the vessel was rejected as the relevant operation.[22]
> 16. Comments in a similar vein can be found in *Hang Seng Bank* at 320F-G:
>
> > "The activities of the bank from which the income arose was the buying and selling of this property in overseas market places and not the decision making process in Hong Kong or any other activities in Hong Kong. Likewise the income arose from the trading in property situate outside of Hong Kong and not the moneys of customers

20 See 86.9 (PE: preparatory and auxiliary activities).

21 See 15.13 (Buying from UK sellers).

22 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf

situate in Hong Kong."[23]

15.13 Buying from UK sellers

The former International Tax Handbook provided:

> **812. Purchasing is not trading in**
> The mere buying of goods here does not amount to trading here. That was decided in the very first case in these matters, *Sulley v AG* [2 TC 149], in 1860. A New York firm purchased goods in England for sale in America. It had an office here where the English resident partner saw to the purchasing and shipping of the goods. The Court of Exchequer (a Court of Appeal) found that "The profits of the firm in America do not accrue in respect of any trade carried on in this country, but in respect of the trade carried on in New York, where the main business is conducted".

Maintaining a purchasing office is also included in the list of auxiliary activities which do not amount to trading in the UK.[24]

The Hong Kong guidance note provides:

> BUYING OFFICE
> 29. A trading company, carrying on business outside Hong Kong, may set up a branch in Hong Kong to act as a buying office for the purpose of purchasing goods or merchandise or of collecting information. The activities of the branch are confined to the purchase of goods or merchandise or of collecting information in Hong Kong and it is not involved in their sale, either in Hong Kong or elsewhere. In such a situation, a liability to Hong Kong profits tax would not arise. The functions of a buying office may also be carried out by a subsidiary company or by an agent (either related or unrelated). However, as for a branch, the subsidiary company or agent must not be involved in the sale of the goods. On the other hand, any commission or other remuneration earned by the subsidiary company or agent for performing its services in Hong Kong will be fully taxable.[25]

25 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf

15.14 Buying and selling to UK purchasers

The former International Tax Handbook para 820 provided:

> But we do attach much importance to Lord Atkin's approach to the question of "trading in" in the *Smidth v Greenwood* case quoted in ITH817 above – "where do the operations take place from which the profits in substance arise".
> We have come to adopt this test as the principal criterion for determining whether there is "trading in". But it should be borne in mind that the Smidth company was found not to be trading in the UK. Although it had an agent in the UK to advise prospective purchasers and assist with the installation of machinery, the profits in substance arose from the sale of that machinery under contracts made abroad. ...
>
> **821. Merchanting: Place of sale**
>
> The decision in the *Smidth* case supports the conclusion that in the case of merchanting business (buying and selling goods for profit), the trade is normally exercised at the place where the contracts for sale are made – that is where the operations take place from which the profits in substance arise.
> It may help, in considering why that should be the relevant place, to put the decided cases aside and to ask what sort of facts could possibly be significant in leading to an answer to the question of whether there is trading in the UK. Where merchanting is concerned – buying and selling – there will often be a central office where questions of policy are considered and finance is arranged. There is the buying of the goods and perhaps the holding of a stock of goods. Then there is the search for customers and there is the actual contract for sale. That contract may be at a price laid down in a distant Head Office or it may be for a price negotiated with some skill on the spot. Finally there is delivery involving the question where does the lawful property in the goods pass from seller to buyer.
> Few if any of the elements described above necessarily call for a presence in this country and the functions involved can be located where the trader wishes. Most countries take the same view as we do about buying. The Court in *Sulley's* case simply said "It would be most impolitic thus to tax those who come here as customers." The place of sale, as identified by the place of contract for sale, is a reasonable means of determining the location of trading; trading profit becomes measurable only when there is a sale and without a sale there can be no profit.
>
> **822. Place of sale unreliable**
>
> But the place of sale, like other elements, can be moved. Even where the trade is that of buying and selling some qualification is needed to the assertion that there is trading in the UK if the contracts for sale are made here. It is generally taken for granted that it must be so if the sales are to people who are here. But, as is apparent from ITH830–ITH834 below which look at the place of contract, just when and where a contract is concluded can depend on fine distinctions and may even be a matter of chance. If, for example, a non-resident advertises goods for sale in a newspaper here and the customer responds by a telephone call to the non-resident during which agreement is reached or there is an exchange of

telexes, the contract may technically be made in the UK even though the non-resident does very little here at all. We do not know what view the Courts would take of that though they have certainly not ruled out the possibility that while there may be contracts here there may nevertheless be no trading here [See *Belfour v Mace* 13 TC 558].

There may be similar doubt when sales are to people who are not resident here. The problem can be illustrated by a simple example. A New York art dealer has a picture which a Frenchman is interested in. The American and the Frenchman happen to meet in London which both are visiting for a few days holiday. In their hotel they agree on a price for the picture and conclude the deal. The contract is made here. Is the American trading in the UK? The matter is considered further on in chapter 9 (ITH947).

One may devise improbable examples of this kind without doing more than to highlight the difficulties which absolute reliance on the place of contract as a test would involve. Other cases of difficulty are those where there is reason to believe that, although contracts are formally made abroad, everything is really done here short of signing a piece of paper. In such cases we would say that there is trading here. The problem in such a case is largely one of proof. See, for example, the comments in chapters 9 (ITH914) and 10 (ITH1017).

The Hong Kong guidance note provides:

18. In *IRC v Magna Industrial Co* [1997] HKLRD 171 at 178, Litton VP recognised that in case of a trading profit the purchase and the sale were the important factors. He further included in his deliberation all of the relevant operations and not just the purchase and sale of the products. When applying the operations test, Litton VP said at 176G:

> "In other words, one looks to see what the taxpayer has done to earn the profits and where he has done it. Obviously the question where the goods were bought and sold is important. But there are other questions: For example: How were the goods procured and stored? How were the sales solicited? How were the orders processed? How were the goods shipped? How was the financing arranged? How was payment effected?"

19. The obtaining of the buyer's order in Hong Kong and the placing of the order with the seller from Hong Kong are the foundations of a trading transaction since the differential between the selling price and the buying price (i.e. the mark-up) generates the profit. In *Exxon Chemical International Supply SA v IRC* 3 HKTC 57, having decided that the obtaining of the order from the buyer and the placing of the order with the seller, took place respectively in and from Hong Kong, Godfrey J concluded that the profit arose in or was derived from Hong Kong.

20. In *IRC v Euro Tech (Far East) Limited* 4 HKTC 30, Barnett J doubted that there should be some particular level or threshold of activity on the part of the taxpayer in Hong Kong, such as by bringing the products into Hong Kong and re-exporting them. He observed that in many trading companies the taxpayer was doing no more than bringing together the complementary needs of sellers and buyers. He said if the bringing together was done in Hong Kong the trading profit was sourced in Hong Kong....

23. On the basis of the various court judgments discussed in paragraphs 18 to 22 above, the Department's views which are reflected in its assessing practice on the locality of profits derived from trading in commodities or goods by a business carried on in Hong Kong can be summarised as follows:
(a) Where both the contract of purchase and contract of sale are effected in Hong Kong, the profits are fully taxable.
(b) Where both the contract of purchase and contract of sale are effected outside Hong Kong, no part of the profits are taxable.
(c) Where either the contract of purchase or contract of sale is effected in Hong Kong, the initial presumption will be that the profits are fully taxable. Matters, such as those mentioned in paragraph 18 above, will be examined to determine the issue.
(d) Where the sale is made to a Hong Kong customer (including the Hong Kong buying office of an overseas customer), the sale contract will usually be taken as having been effected in Hong Kong.
(e) Where the commodities or goods are purchased from either a Hong Kong supplier or manufacturer, the purchase contract will usually be taken as having been effected in Hong Kong.
(f) Where the effecting of the purchase and sale contracts does not require travel outside Hong Kong but is carried out in Hong Kong by telephone, fax, etc., the contracts will be considered as having been effected in Hong Kong.
(g) The purchase and sale contracts are important factors but all the relevant operations that produce the trading profits must be looked at to determine the locality of the profits. Persons who are merely trading with Hong Kong by either selling goods to customers in Hong Kong or buying goods from suppliers in Hong Kong will not fall within the ambit of this paragraph. Nor will this paragraph applies to a buying office referred to in paragraph 29 below.
24. Having regard to the points expressed above, it will be apparent that, in the Department's view, the question of apportionment does not arise in relation to trading profits. Trading profits will be either wholly taxable or wholly non-taxable. There is no room to substitute a mixed source for a Hong Kong source even though there might be some overseas activities.[26]

15.14.1 *Situs of assets sold*

In *IRC v HK-TVB* the Privy Council said:

> profits accruing to a resident taxpayer from the sale of foreign immovable property are likely to arise in the country where that property is situated although both the contracts of purchase and sale thereof are

26 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf

made in the country of residence of the taxpayer.[27]

The Hong Kong guidance note provides:

> 45. Subject to specific provisions, the Department regards the locality of the following types of profits to be as follows:
>
> (a) Rental income from real property. *Locality:* Location of the property.
>
> (b) Profits derived by an owner from the sale of real estate. *Locality:* Location of the property.
>
> (c) Profits from the purchase and sale of listed shares and other listed securities. *Locality:* Location of the stock exchange where the shares or securities in question are traded. Where the purchase and sale took place over-the-counter, the place where the contracts of purchase and sale are effected.
>
> (d) Profits from the purchase and sale of unlisted shares and other unlisted securities. *Locality:* Place where the contracts of purchase and sale are effected, except financial institutions in instances where section 15(1)(l) applies.

15.14.2 *Buying and selling through an agent*

SP 1/01 provides:

> 22. If a non-resident carries on a financial trade outside the UK, any transactions carried out through a UK investment manager are likely to amount to trading in the UK. That is so whether there is a discretionary agreement or whether the manager acts on the instructions of the non-resident.

Whether or not this is right does not much matter as in most cases the investment manager exemptions apply, but (even allowing for the qualification in the use of the word "likely") it is too widely expressed. The Hong Kong guidance note provides:

> 25. Cases may arise where it is claimed that contracts of purchase and of sale have been effected wholly outside Hong Kong by employees of the Hong Kong business travelling abroad or by overseas agents. In this context, no operations are carried out in Hong Kong to give effect to the trading transaction; and the employee or overseas agent habitually exercises a general authority to negotiate and conclude contracts on

---

27 [1992] STC 723 at p.729 citing *Liquidator, Rhodesia Metals v Commissioner of Taxes* [1940] AC 774.

behalf of his principal.

26. Normally the activities of an agent and an employee are accorded the same weight if it can be shown that the employee has full authority to conclude contracts without reference to the business in Hong Kong. In considering claims that contracts have been wholly effected outside Hong Kong by employees, Assessors will, in addition to facts in paragraph 18 above, require details of travelling, hotel and subsistence expenses in respect of each individual transaction. Where it is claimed that contracts are effected by overseas agents, it will be necessary to provide agency agreements or other evidence to support the claim.[28]

15.15 Services

The former International Tax Handbook continued:

826. Where work is done

Many trades are not limited to merchanting. Where services are concerned, we tend to give greater weight to the place where the service is provided.[29]

The Hong Kong Guidance Note adopts the same approach:

45. The Department regards the locality of the following types of profits to be as follows -

...(e) Service fee income. *Locality*: place where the services are performed[30] which give rise to the fees.[31]

This is consistent with the statutory rule for foreign tax credit relief. Section 9(1) TIOPA provides relief where foreign tax is

(b) calculated by reference to income arising ... in the territory, and

---

28 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf

29 The former International Tax Handbook para 826 continued:
There are particular difficulties with transmission services with which the approach is to say that the service is given where the act of transmission begins, following the case of *Erichsen v Last* already quoted in ITH813.

30 The International Tax Handbook refers to the place where services are *provided* and the HK guidance refers to the place where services are *performed* but the meaning is the same.

31 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf

Section 9(3) TIOPA provides:

> For the purposes of subsection (1), profits from, or remuneration for, personal or professional services performed in the territory are to be treated as income arising in the territory.

This raises the question of where the services are provided or performed. Where the services involve physical work, the answer is obvious. In *Brackett v Chater*[32] a surveyor contracted himself to a Jersey company (owned by a Jersey trust that he had made although this was not material). He became its employee. Clients contracted with the Jersey company but the surveyor did all the work in the UK using facilities available to them at the offices of the firm in which they were previously partners. The Jersey company was held to be trading in the UK.

The Hong Kong guidance note provides:

> It should be noted that in the case of an investment adviser whose organisation and operations are located only in Hong Kong, profits derived in respect of the management of the clients' funds are considered to have a Hong Kong source. Included in chargeable sums are not only management fees and performance fees but also rebates, commissions and discounts received by the adviser from brokers located in Hong Kong or elsewhere in respect of securities transactions executed on behalf of clients.[33]

In *Yates v GCA International*[34] a UK resident company provided services (an investigation into oil fields in Venezuela). Some of the work was done in Venezuela and some in the UK. The company (being UK resident) was in principle taxable on all trading income, but subject to foreign tax credit relief for Venezuela tax on income arising in Venezuela.[35] The *Smidth* principles were applied and so (unsurprisingly) part of the profits were held to arise in Venezuela.

15.15.1 *Commissions*

The Hong Kong Revenue guidance provides:

---

32 60 TC 134 & 639.

33 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf

34 64 TC 37.

35 See 15.8.1 (Foreign tax credit cases).

RE-INVOICING CENTRE

27. The Department's view is that if a profit is derived from services rendered in Hong Kong, the profit is clearly taxable. Commission income or profit that accrues to a "re-invoicing centre" for services rendered is chargeable to profits tax. Profits derived from the buying and selling of goods are not service income. The transaction involves the taking of commercial risks (e.g. product risks, inventory risks, credit risks, exchange risks, capital risks, etc.) different from those attached to a service. Confirmation of sales and issue of purchase orders are indications that it is a trading transaction. The source of trading profits depends on the locality of the trading operations. Paragraphs 18 to 26 are relevant.

28. It is not possible to categorise the circumstances under which income or profit derived by a "re-invoicing centre" would be regarded as a service income and not as a trading profit. In each case, the Department would examine the nature of the operations and the type of risks in question to determine whether they constitute the provision of services or trading. The label "re-invoicing centre" clearly does not in itself provide the answer as it can mean different business structures.

Example 1

Company A, incorporated in Hong Kong, is a re-invoicing centre of a group of companies with a holding company incorporated in the United States, as more particularly described below. It manages in Hong Kong all foreign currency exposures from intra-company trade, guarantees the exchange rates for future orders and manages intra-affiliate cash flows, including lead and lags of payments. Manufacturing affiliates in Mainland China sell goods to Company A, which in turns resells to the distribution affiliates in North America and Europe. Company A resells at cost plus a mark-up for its services. The mark-up covers the cost of the re-invoicing centre and a reasonable return on the services provided. The profits accrue to Company A are service income derived from Hong Kong. The mark-up earned by Company A, which acts as a re-invoicing centre, is chargeable to profits tax.[36]

15.16 Construction and engineering works

The former International Tax Handbook para 826 continued:

> Where construction and engineering works are concerned we say that the construction works are the essential operations and it is normally immaterial where the contract is signed – there is support for this in the Muller case [*WH Muller & Co (London) v Lethem* 13 TC 151].

36 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf

15.17 Manufacturing

The former International Tax Handbook para 826 continued:

> There may be more than one part of the trade which can be identified as the profit producing part. There can be the case where there is manufacture abroad and selling here or manufacture here, and selling abroad. To look at the first situation, manufacture abroad and selling here, it is reasonably clear from the champagne cases that the Revenue only claimed to tax the selling profit and there is nothing in the judgments to suggest that it was entitled to more. The question is considered more fully in chapter 9 (ITH920). As to the second situation, manufacture on its own is certainly trading, even though there may be no sales here, and the old judgments tend to support the view that we should in such circumstances seek, on some sensible basis, to tax only the manufacturing profit. There was a Privy Council [*Commissioners of Taxation v Kirk* [1900] AC 588] case in the early part of the century, an Australian case, which supports that idea and it is what we have in fact always done.

See too *IRC v Hang Seng Bank*:

> If he has … engaged in an activity such as the manufacture of goods, the profit will have arisen or derived from the place where ... the profit making activity carried on. There may, of course, be cases where the gross profits deriving from an individual transaction will have arisen in or derived from different places. Thus, for example, goods sold outside Hong Kong may have been subject to manufacturing and finishing processes which took place partly in Hong Kong and partly overseas. In such a case the absence of a specific provision for apportionment in the Ordinance would not obviate the necessity to apportion the gross profit on sale as having arisen partly in Hong Kong and partly outside Hong Kong.[37]

The Hong Kong Revenue guidance note provides:

> MANUFACTURING PROFITS
>
> 30. Lord Jauncey in *HK-TVBI* at 410F has commented on the source of manufacturing profits. He explained:
>
> > "If a manufacturer in Hong Kong sells his goods to a merchant in Manila the payment which he receives is no doubt sourced in Manila but his profit

37 [1990] STC 733 at p.740. The *dictum* to the contrary in *IRC v HK-TVB* [1992] STC 723 at p.730h can be disregarded.

on the transaction arises in and is derived from his manufacturing operation in Hong Kong."

Where goods are manufactured in Hong Kong, the profits arising from the sale of such goods will be fully taxable because the profit making activities are considered to be the manufacturing operations carried out in Hong Kong, which should include the procurement of raw materials, the employment of labour, the design of products and the use of machinery and plant, etc.

31. The following examples illustrate the Department's views on this subject:

Example 2

Company B manufactures goods in Hong Kong and sells them to overseas customers. The fact that Company B has sales staff based overseas does not give a part of the profits an overseas source. This is not a case for apportionment. The whole of the profits are liable to profits tax.

Example 3

Company C manufactures in Mainland China and sells the finished goods through a retailing branch in Hong Kong. The retailing branch has sales staff and a fixed place of business, and has registered for business in Hong Kong. Company C is both a manufacturer and a retailer. Profits are derived from the manufacturing operations in Mainland China and the retailing operations in Hong Kong. It is necessary to apportion the profits derived by Company C. Profits attributable to the Hong Kong retailing branch are chargeable to profits tax.

32. In Mainland China, two types of processing trade normally involve Hong Kong companies: contract processing and import processing. They are two different forms of transaction and require an accurate legal analysis.

CONTRACT PROCESSING

33. In contract processing, the document that governs the contractual relationship among the parties is the processing agreement. It sets out the rights and responsibilities of the Hong Kong company and the Mainland processing enterprise. The Hong Kong company is responsible for the supply of raw materials and machinery without consideration and to provide technical and managerial know-how while the Mainland processing enterprise is responsible for the provision of factory premises, utilities and labour force. 34. In return for the processing service, the Hong Kong company pays a subcontracting charge to the Mainland enterprise. The legal title to the raw materials and finished goods remains with the Hong Kong company. In the Department's view, the Hong Kong company's operations in Mainland China complement its operations in Hong Kong. Recognising the operations of the Hong Kong company in the Mainland, an apportionment of profits on a 50:50 basis is usually accepted.

35. In *D132/99* 15 IRBRD 25, the taxpayer contended that all of its profits were offshore in nature. The Board of Review held that its operations in Mainland China were not dominant operations that overshadowed the activities in Hong Kong and the operations in Hong Kong could not be disregarded.

36. In *D145/99* 15 IRBRD 91, the Board found that the taxpayer was not privy to the processing agreements, which had been entered into by its fellow subsidiaries and the taxpayer should be assessed for profits tax on 100% of its profits for the years of assessment after the processing agreement lapsed. The

Board found that the taxpayer's business was the procurement of toys to satisfy sale and purchase contracts and that important operations took place inside Hong Kong: the reaching of purchase agreements; the determination of price; the issue of invoices; the procurement of raw materials and the shipment of finished products.

37. If the Hong Kong company has restricted involvement in the processing arrangement with the Mainland enterprise, the apportionment of profits could not be appropriate. For example, a Hong Kong company has contracted out the assembly work to various contractors in Hong Kong and the Mainland. The jobs are numerous, small in value and of short duration and the Hong Kong company has minimal involvement in the assembly work. Given that the Hong Kong company does not carry out any manufacturing operations outside Hong Kong, its profits should be fully chargeable to profits tax without any apportionment.

38. The apportionment contemplated in paragraph 34 above will also apply to cases where manufacturing activities are undertaken under a similar arrangement in other places.

IMPORT PROCESSING

39. In import processing, the manufacturing operations are carried out by a foreign investment enterprise (FIE) related to the Hong Kong company. An FIE is often a separate legal entity incorporated in the Mainland. The Hong Kong company sells raw materials to the FIE and buys back the finished goods from the FIE. The Hong Kong company engages in the trading of raw materials and finished goods whilst the FIE manufactures the finished goods. The legal title to the raw materials and the finished goods passes to/from the FIE.

40. In import processing, the gross profits arise from trading transactions whereby the Hong Kong company purchases finished goods from an FIE and sells them for a profit. The manufacturing operations of the FIE in the Mainland are not performed on behalf of, or for the account of, the Hong Kong company even though the Hong Kong company and the Mainland enterprise might be within the same group of companies.

41. In *ING Baring*, Lord Millet NPJ said that the source of profits had to be attributed to the operations of the taxpayer which produced them and not to the operations of other members of the group. In D36/06 21 IRBRD 694 which was a typical import processing case, the Board held that the taxpayer's profits were fully chargeable to profits tax. It was ruled that the FIE was not part of the taxpayer and was not an agent of the taxpayer. Hence the FIE's operations were not relevant in determining the source of profits of the taxpayer. The Board of Review rejected the contention of "substance over form" and disagreed with the suggestion that a leasing agreement of production facilities was similar to a contract processing agreement.

42. The Department holds the view that profits which accrued to the Hong Kong company from "trading transactions" carried out in Hong Kong cannot be attributed to the manufacturing operations of the FIE carrying on business in Mainland China. The source of the trading profits must be attributed to the operations of the Hong Kong company which produced them. In *Consco Tradingv IRC* [2004] 2 HKLRD 818, To Deputy J said that it was correct to consider factors such as the finance arrangements, the payment of raw materials

and processing fees, the arrangement for receipt of payment from purchasers for the finished product and pre-contract negotiations and the Board was entitled to conclude that, on the evidence, the preponderance of the activities which earned the profits were performed in Hong Kong. The Court of First Instance said the Board correctly excluded the processing activity of the Mainland Chinese entity as not being relevant to the determining of the taxpayer's source of profits which were derived through the sale of processed goods.

43. In *IRC v Datatronic Limited* [2009] 4 HKLRD 675, where the arrangement between Datatronic and the FIE was an import processing arrangement, the Court of Appeal held that the profit-producing transactions were the purchase of goods from the FIE by Datatronic and subsequent sale and that these activities took place in Hong Kong. Thus, the profits were derived from Hong Kong. The Court of Appeal further held that the fact that the FIE, although a wholly-owned subsidiary of Datatronic, is a separate legal entity and that its dealings with Datatronic were not at arm's length would not detract from the reality of the legal effect of the transactions. It is also worth to note the Court of Appeal's concurrence with the Board's findings that the manufacturing was done by the FIE in the Mainland is substance and not form and that Datatronic's activities (i.e. assisting the FIE in preparing the goods and supplying them to Datatronic) in the Mainland were merely antecedent or incidental to the profit-generating activities.

44. The Department has noticed that a Hong Kong company is sometimes interposed between an overseas company and a Mainland manufacturing enterprise in order to comply with or circumvent the trade barriers imposed by the overseas jurisdiction. In D7/08 23 IRBRD 102, the Board of Review recognised that making the Hong Kong company a customer of the overseas company and of the Mainland enterprise freed the overseas company from the trade barriers. Applying what the Court of Final Appeal held in the Kim Eng case on the effective cause of the production of the profits in question, it was held that the Hong Kong company's relevant activity in Hong Kong however limited was what was done to earn the profits in question and the Hong Kong company did it in Hong Kong.[38]

15.18 Use of UK commodity markets

The former International Tax Handbook provided:

929. Is use of the markets "trading in"?

It is a good thing for this country that these markets exist. There are all sorts of spin-off advantages. Big business has to be financed and insured and there are shipping services and all sorts of peripheral activities which are good both for the people who are involved in them and for the country's balance of payments. Looking at the physical markets the produce concerned may or may not come to

38 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf.

this country. A Brazilian plantation owner may sell his cocoa in London although the buyer may be in France. A broker here will sell to another broker acting on behalf of the buyer and the contract will be made here. So the question arises – is the Brazilian producer trading in London and until the end of the last century it never occurred to anybody that this might be so.

Then came clarification by the Courts on the meaning of trading in the UK and the possibility that the fact of a contract being made by an agent in London could involve the principal in UK tax. It appeared open to the Revenue to contend that the principal was carrying on the selling part of his trade in London or even carrying on the whole trade in London. The Revenue had contended neither of those things; to have done so would have frightened off the foreign users of our markets. In any event, in those early days, the non-resident principal could have arranged that his London brokers did not receive the profits or gains.

But in 1915 everything changed because it was then provided that the receipt of the profits or gains would no longer count[39] and the business world was worried. The Revenue said that it had always regarded business done on our markets through brokers as trading with the UK rather than trading in the UK. But the business world was not satisfied. The difficulty was clear enough. If, as some of the early cases might suggest, the bare making of a contract here is such a vital matter, there is a risk that anybody using our markets might be held to be trading here. The Revenue's former view that in normal circumstances that constituted trading with rather than in the UK is not easily defensible.

930. Pt VIII TMA 1970: Trading in: Can there be any profit?

But accepting that a primary producer, a Brazilian plantation owner selling cocoa in London, is trading in the UK, where is the profit? Such commodities have a world market price at any time; it is an essential function of the market to decide exactly what that price is. If it is decided that the Brazilian producer is trading in the UK he must be charged either as a seller of cocoa or as a cocoa grower. If he is not charged as a grower and, to put it no higher it would be stretching things rather to do so, it is hard to see how any profit can be said to arise in London as a seller of cocoa. The position is entirely different from that of the French champagne grower of the type referred to in ITH815 of chapter 8, who may at least be regarded as making a merchanting profit here. In that situation one would look at the market value of the champagne in bulk and then at the price (wholesale or retail) actually realised in this country. But where commodities like bulk tin or rubber or cocoa are concerned, the position is otherwise. These things are traded in our markets precisely to determine what their market value is and to dispose of them at that price.

931. Dealer

In some cases the primary producer may not sell directly in London but sell to an intermediary in the producing country who in turn sells on the London market. The trade here is then clearly that of selling and if the intermediary does not purchase at world prices – there may, for example, be a reserve price – it may be

---

39 F(no.2)A 1915 introduced the rules under which UK representative are liable for the tax of non-resident principals.

> possible to identify a profit or a loss. But if the intermediary sells through a broker within the exemption described in the following paragraphs then the exemption runs just the same. But it sometimes happens that, although the contracts are made through a broker, the seller has a presence here – a branch or an agent – which plays some part in the selling process. It may, for example, instruct the brokers. The question then is whether what is done is sufficient to enable us to say that the non-resident is trading also through that branch or agent. The terminal markets may be used by a non-resident dealer in commodities simply to hedge purchases or sales of raw materials which take place outside the UK. The hedging transactions may amount to trading here but, again, the broker exemption may apply unless the non-resident has a presence here, other than the broker, which is involved with the hedging transactions. If the exemption does not apply, there is then the question of the extent, if any, to which the results of the related transactions outside the UK should be taken into account in measuring the taxable profits. This is an area of difficulty and International Division should be consulted in such a case.

In practice the point is not important because the broker exemption applies.[40]

15.19 Leasing and licensing tangible property

The position for property income from land is governed by statute and trading case law is irrelevant for UK tax.[41]

What about leasing[42] chattels (eg pictures)? It is helpful to consider trading and non-trading cases separately.

15.19.1 *Leasing chattels without trading*

If there is a simple lease (without a trade) the source of the income is the chattel (not the contract) and one would expect the source to be where the chattel is situate.

In *IRC v Hang Seng Bank*, the Privy Council said:

> If the profit was earned by the exploitation of property assets as by letting property ... the profit will have arisen in or derived from the place where the property was let ...[43]

But this was tactfully "explained" in *IRC v HK-TVB*:

---

40 See 44.1 (Investment Manager exemptions).

41 See 16.1 (Property income).

42 References to leasing in this paragraph include licensing: there is no material distinction for our purposes.

43 [1990] STC 733 at p.740b.

> When Lord Bridge used the words "place where the property was let" he must have been referring to the place where the property was situated and not to the place or places where the lease happened to have been signed.[44]

Although the comment was made in the context of immoveable property, it is considered that the same applies to chattels.

It is true that the chattel may be moved, but most chattels do not move often. If a picture was moved permanently, it is unclear whether the source changes. It is tentatively suggested that the source changes.

If the chattel were a mobile asset (a plane or yacht) then it is suggested that one should not adopt the rule that the source is where the asset is situated. It is rational to have a separate rule for ships and aircraft. The IHT/CGT situs rules are also different for such assets.

15.19.2 *Leasing as part of trade*

If the leasing is a trade, then the income is trading income and the source is the trade not the assets of the trade. The question whether the trade is partly carried on inside the UK can be addressed looking at wider factors than just where the asset is situate. But in practice it is suggested that the situs of the assets will often be determinative (unless the trade involves assets situate in more than one country).[45]

15.19.3 *When is chattel leasing a trade?*

Business Leasing Manual provides:

> **00315. Whether lessor trading** [March 2008]
> In general, where chattels are leased, you should accept that the leasing is by way of trade.
> In exceptional cases, however, where the evidence of trading is extremely slight, for example if only one asset has been acquired for leasing and there is no personal involvement by the taxpayer or any semblance of a trading organisation, the taxpayer's activities may be special leasing within Section 19 CAA 2001.
> You should not seek to deny trading treatment where, although there is no personal involvement by the taxpayer, there is trading activity by a manager as agent for the taxpayer.

---

44 [1992] STC 723 at p.729e.

45 See 15.14.1 (Situs of assets sold).

> The same principle applies to special purpose vehicle lessor companies set up by groups that carry out leasing activities. In such cases it is not unusual for the company to own only one (or a few) assets and be managed by a group member.[46]

This is an oversimplification. For instance, when the chattel is acquired by way of gift (not purchase), and when the taxpayer is an individual or trust rather than a commercial company, then trading is much less likely.

A conclusion of trading will usually suit a non-corporate taxpayer and so not be challenged. A conclusion of trading would be a concern to a corporate taxpayer only if it were carrying on that trade in the UK through a permanent establishment, which would move it from income tax to the more onerous corporation tax regime.

15.20 Research division and shop windows

The former International Tax Handbook provided:

> **827. Profit producing activities**
> Early in this chapter (ITH811) an illustration was given of the hypothetical maker of refrigerators making them in various places in the world and selling them in those places. One way of describing the split of that trade is as a vertical split with a vertical slice here and other similar vertical slices in other countries. We would wish to tax only the vertical slice of the trade carried on here. The other way in which a trade may be split may be thought of as horizontal, the sort of situation we have just discussed, one horizontal slice of the trade, manufacturing say, being here and another slice, the selling, abroad.

The horizontal/vertical terminology seems strange. The metaphor is also used in competition law but the other way round.[47] The former International Tax Handbook continued:

> The above cases are straightforward enough but difficulty starts to emerge when what is done here is not clearly identifiable as part of the

---

46 Very similar wording is found in BI Manual 61190 [February 2006].

47 "Vertical agreements" are those made between two or more undertakings each of which operates at a different level of the production or distribution chain. "Horizontal agreements" are those made between undertakings operating at the same level of the production or distribution chain, covering for example research and development, production, purchasing or commercialisation. See Regulation (EC) no. 2790/1999.

> whole trade in that way. An example is the non-resident stock-broker with a branch in London which merely puts the goods in the shop window.

"Shop window" is another unhelpful metaphor. What does it mean? The former International Tax Handbook explained:

> There may be a research section here with computers and the other paraphernalia of a modern trade of that sort. The branch gives advice to would be customers and when they decide to buy a particular American stock, it tells its head office in New York and there the actual deal is done. If the London branch really is only a shop window and really does take no part in the contracting process then the conclusion is that that is not trading within the UK; there is only one trade which is providing the service of buying or selling stocks and that is done in New York. It is quite possible for a non-resident trader to have an office here employing a substantial number of people and yet not to be exercising the trade here.
>
> Another example might be the manufacturer on a very large scale in America, which has a research division in this country. The work of the research division may be absolutely vital to the trade but if that trade consisted for example in the making and sale of television sets, one could not say that research on, let us say, conductivity constituted a distinct profit producing part of that trade. That is reasonably clear.

This is right because it is difficult to allocate the profits, so they should be regarded as merely auxiliary.[48]

> More difficult is the position of non-resident banks or insurance companies which use the UK for their investment activities but do not carry on the business of banking or insurance here. The questions in this whole area of "trading in" are mainly those of fact and degree and absolute guidelines are simply not possible. International Division will be glad to help in cases of doubt.

15.21 Where is contract made?

If or to the extent that the place where is the contract made is an important factor, that place has to be identified. The place where a contract is made is, fundamentally, a question of contract law. But the identity of the place where the contract is made is not relevant for the purposes of contract law, so there are no contract law cases discussing the issue. In the reported tax cases the place where the contract was made was fairly obvious, and so the cases do not help us here. We are thrown back to first principles.

---

48 See 15.12 (Trading in UK: preparatory and auxiliary activities).

Going back to first principles, a contract in English law[49] is made by acceptance of an offer. The contract takes effect on acceptance and the place where the contract is made is where the acceptance takes place. As a general rule, acceptance takes place when the acceptance is received by the person who makes the offer. There are, however, exceptions to this:

(1) Acceptance by post–acceptance takes place when and where the letter of acceptance is posted, not where received (unless the offer otherwise provides).
(2) When an offer is made, one can specify in the terms of the offer how and when it can be accepted, and this can therefore alter the place where the contract is made.

Offer and acceptance can be difficult to identify. The court will try to impose an offer and acceptance analysis on circumstances which may not lend themselves to that analysis.[50]

There is no case law on email acceptance.[51] The person making the offer can decide how that offer is accepted so if the documentation is correctly drafted a contract can be made abroad by the click of a mouse outside the UK.

The former International Tax Handbook discussed this issue:

> **The making of a contract**
> **830. General**
> There have been many references in this chapter to the making of a contract and to the place where a contract is made. If two people agree specifically on a sale by word of mouth that is the making of a contract and the place of their agreement is the place where the contract is made. A great deal of business is done in that way daily and the place of contract is not changed by the signing of a piece of paper in a tax haven sometime afterwards. The difficulty is one of proof as we have already seen in ITH822. But putting difficulties of that sort on

49 Further consideration is needed if the applicable law is not English law.

50 Some academic writers have suggested abandoning the "offer and acceptance" analysis and replacing it by a contract theory based on reliance. (There is more than a hint of this in Lord Denning's judgment in *Gibson v Manchester City Council*. This decision was reversed by the House of Lords but even Lord Diplock accepted that there would be times when offer and acceptance would be difficult to identify and the "normal analysis of a contract as being constituted by offer and acceptance" might not be appropriate. However that would be exceptional. See [1979] 1 WLR 294 at p.297).

51 The Law Commission paper (Electronic Commerce: Formal requirements in commercial transactions, December 2001) does not deal with the issue of where a contract made by email is made.

one side, if the question where a contract is made becomes of central importance it is one on which we should rely on legal advice – it is pre-eminently a question for the Solicitor and what follows is very general guidance.

831. Acceptance of offer

Offer and acceptance constitute contract. The place of contract is governed by the place of acceptance of the offer and acceptance takes place where it is received. Where acceptance is communicated by letter it is regarded as received at the place of posting rather than at the place of actual receipt. This is because, once a letter has been posted, the Post Office holds it on behalf of the addressee. Where telephone communication is used the place of acceptance is the place where the recipient of the acceptance is. That is the general rule for so-called instantaneous communication. It would apply also to an acceptance sent by telex or fax directly from the acceptor's office to the offeror's office. The general rule may need qualifying when a cable company's services are used. A telegram like a letter is regarded as received when put into the hands of the Post Office.

832. Price lists

The mere sending out of price lists and advertisements does not constitute an offer, it is rather an open invitation for offers to be made. An offer must be quite specific and a price list is not an offer to supply an unlimited amount of goods at the price named. It follows that when a customer buys goods from a supplier the customer makes the offer and the supplier notifies acceptance. That is generally the assumption in cases where place of contract has been decisive in determining a non-resident's liability. But it is not impossible for a price list to amount to an offer, as long as the list details the price, the quantity and gives a definite description of the goods concerned. If in such circumstances the buyer were to put in some amendment not contained in the original offer, then what the buyer does becomes a fresh offer and one which has to be unconditionally accepted before there can be said to be a binding contract. And there may be a series of communications between customer and supplier so that it is a matter of chance as to who makes and who accepts the final offer.

833. Delivery

It is quite common to find that there is no formal acceptance of the offer by the person supplying the goods and, in that situation, delivery itself will normally constitute acceptance; and then it would be important to look at the place of delivery, the place where the lawful property in the goods passes from seller to buyer.

834. Acceptance by agent

There can be widely different circumstances in which contracts are made here. There is the case where the agent or branch in this country really does the job of negotiating the contract. That person settles the deal and terms and makes the contract here and there is no doubt whatever about it. On the other hand, there can be the case where the agent makes the contract in the legal sense, but does so only with the specific authority of the principal. That is to say the agent gets an offer, writes to or rings the principal, obtains approval and then, and only then, accepts the offer. In that case, acceptance would be here and there are at

least two cases [For example, *Wilcock v Pinto & Co* 9 TC 111] on that point.[52]

15.22 Trade partly in UK: Apportionment

I turn to the question of how to apportion where part of the trade is in the UK. Of course this overlaps with the question of whether there is a trade partly in the UK. If there are activities in the UK which do not involve trading in the UK there is nothing to apportion.

Tax Bulletin 18 provides:

> It is perhaps less obvious how the profits from the part of the trade carried on in the UK should be measured. They are required to be measured on the arm's length principle set out in the [OECD model tax convention] where a DTA applies which includes the relevant provisions. It is considered that it also follows from the main rule in Schedule D that the same principle applies even if there is no treaty.
>
> There is support for this principle in the early tax cases on non-residents trading in the UK. For example, in *Pommery & Greno v Apthorpe* at 2 TC 189, Denman J said, with regard to the profits chargeable in the UK from merchanting champagne produced in France, that:
>
> > It may be that there may be some difficulty in some respects as to the manner of calculating the amount of expenditure to be put against the profits, whether it would be a proper course to look at the goods sent over to England and then to consider what profit they make, putting a fair valuation on them as they arrive, and as the money is transmitted, or whether it would be necessary in such a case to look more minutely into the profits and losses upon the whole trade carried on partly in France and partly in England. I do not think it is necessary at all at this stage of the case to decide that. That is a matter of quantum, a matter for the consideration of persons skilled in dealing with such matters as assessing profits of trade.
>
> This can be seen as an early description of the arm's length principle and as a recognition of the need to develop methods to apply that principle in practice. Such methods were developed in the OECD 1979 Report on "Transfer Pricing and Multinational Enterprises" and have been reaffirmed and clarified in the recently published 1995 revision of that report by OECD "Transfer Pricing Guidelines for Multinational

52 There is also a brief comment (not worth setting out here) in NI Manual 29013 [February 2006].

Enterprises and Tax Administrations".[53]

The former International Tax Handbook also touched on this issue:

> **814. Measure of profit in *Erichsen v Last*[54]**
> The second point the case deals with is – what is the chargeable profit? That is a rather special point where the transmission of messages is concerned. What the company claimed was that a great deal of the profit arose from the transmission over cables which were not here at all. The Master of the Rolls gave a simple parallel example of a foreign company running a steam packet between Dover and Calais. He said that as far as carrying passengers from Dover to Calais was concerned that was trading in Dover. There was no need to look at the three mile limit or anything of that sort. One simply had to take the receipts and deduct the expenses. The journey started here and the service was here. That is an idea limited in its application to trades involving the transmission of passengers, goods and information.

15.23 Income from contracts (casual income)

This section considers the source of casual income. Casual income is not, strictly, trading income but it is convenient to deal with it here.

The BI Manual provides:

> **BIM100130 Miscellaneous income: Scope of the provisions: Sweep-up - judicial comment** [Dec 2013]
> **...Income from "property"**
> The case of *Alloway v Phillips* [1980] 53 TC 372 involved the wife of one of the Great Train Robbers. Whilst living in Canada, she received £39,000 from a newspaper. It was not in dispute that she had provided information to the newspaper which led to the newspaper publishing a series of articles. It was found that she had entered into an agreement, governed by English law, to assist the newspaper.
> The Court of Appeal held that the £39,000 was taxable in the UK under the miscellaneous income sweep-up provisions as it arose from 'property' in the UK. Lord Denning MR said at page 387D:
> 'The truth is that she had a chose in action in England. It was

53 [Author's Note] For a more up-to-date discussion, see Russo (ed), "The Attribution of Profit to Permanent Establishments" (2005) and OECD Report on the Attribution of Profits to Permanent Establishments (July 2008) accessible *http://www.oecd.org/dataoecd/20/36/41031455.pdf*.

54 [Author's Note] For facts of *Erichsen v Last* 4 TC 422 see 15.9 (Place where contract made).

> property in England: but she had no property at all in Canada. She had no copyright there. She only had the information in her head which she told to the newspaper reporter. That is not a species of property known to the law of England.'
>
> Under the agreement that she had entered with the newspaper, she had a valuable right enforceable in law. The valuable right was property and it was situated in the UK. As she was receiving income under that agreement she was taxable under the miscellaneous income sweep-up provisions.

In *Alloway v Phillips* the location of the source of income was held to be the place that the benefit of the contract (the chose in action) was situate, and the contract being enforceable in the UK the income was taxable. This is not a suitable test, as taxpayers can in principle choose the place where the contractual right is situate. *Alloway v Phillips* is one of those cases where the Court decided the result first and the reasoning second.[55] It is considered that the correct test for casual income is the place where the work is done. But until such time as the Courts say so, a taxpayer is entitled, indeed strictly required, to proceed on the basis that the reasoning of the Court of Appeal is correct in law.

Bayfine v HMRC concerned the profit from a forward contract between a US and a UK company. The contract was executed in the US, partly negotiated in the US, related to assets situated in the US, and was governed by New York law. Thus all the factors were all weighed in favour of a foreign source except for the residence of the recipient. This was held to be foreign source income.[56] That must be right, for if residence was the decisive test of source in this case, then the profit would be UK source if the market moved one way and the UK company took the profit, and US source if the market moved the other way and the US company took the profit; which would be an odd result.

15.24 DT relief for trading income

A full discussion of this topic requires several volumes, and (apart from a chapter on the definition of PE) that is not attempted here. See

---

55 "If the criminals or their wives get money by relating their stories to newspapers, they ought to pay tax on their profits and gains. That is this very case. The wife is now in England. She is outside the jurisdiction of the Canadian courts. She received the money here and ought to pay tax here ..."; 53 TC 372 at p.387.

56 *Bayfine v HMRC* [2011] STC 717 at [54].

Kobetsky, *International Taxation of Permanent Establishments* (2011).

15.24.1 *Treaty relief for trading income*

Article 7(1) OECD model treaty provides:

> The profits of an enterprise of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein. If the enterprise carries on business as aforesaid, the profits of the enterprise may be taxed in the other State but only so much of them as is attributable to that permanent establishment.

Article 7(4) OECD model treaty deals with overlap between this and other articles in the treaty:

> Where profits include items of income which are dealt with separately in other Articles of this Convention, then the provisions of those Articles shall not be affected by the provisions of this Article.

15.24.2 *"Business"*

"Business" is defined in article 1(h) OECD model treaty:

> the term "business" includes the performance of professional services and of other activities of an independent character.

One point of this is to exclude the business of being an employee.

In the usual UK tax sense "business" is very wide. No-one doubts that a profession involves a "business" in that sense. The reference is there for historical reasons. The OECD commentary provides:

> 8. Before 2000, income from professional services and other activities of an independent character was dealt with under a separate Article, i.e. Article 14. The provisions of that Article were similar to those applicable to business profits but it used the concept of fixed base rather than that of permanent establishment since it had originally been thought that the latter concept should be reserved to commercial and industrial activities. However, it was not always clear which activities fell within Article 14 as opposed to Article 7. The elimination of Article 14 in 2000 reflected the fact that there were no intended differences between the concepts of permanent establishment, as used in Article 7, and fixed base, as used in Article 14, or between how profits were computed and tax was calculated according to which of Article 7 or 14 applied. The effect of the deletion of Article 14 is that income derived from professional services or other activities of an independent character

is now dealt with under Article 7 as business profits. This was confirmed by the addition of a definition of the term "business" which expressly provides that this term includes professional services or other activities of an independent character.

15.24.3 *"Enterprise"*

The term "enterprise" is used in two ways:
(1) to refer to the business activity,
(2) to refer to the person who carries on that activity.
Usage (2) seems erroneous, but it does not matter as the meaning is clear enough.

"Enterprise" is defined in article 1 OECD model treaty:

> 1. For the purposes of this Convention, unless the context otherwise requires...
> c) the term "enterprise" applies to the carrying on of any business;
> d) the terms "enterprise of a Contracting State" and "enterprise of the other Contracting State" mean respectively an enterprise carried on by a resident of a Contracting State and an enterprise carried on by a resident of the other Contracting State ...

The OECD commentary provides:

> 4. The question whether an activity is performed within an enterprise or is deemed to constitute in itself an enterprise has always been interpreted according to the provisions of the domestic laws of the Contracting States. No exhaustive definition of the term "enterprise" has therefore been attempted in this Article. However, it is provided that the term "enterprise" applies to the carrying on of any business. Since the term "business" is expressly defined to include the performance of professional services and of other activities of an independent character, this clarifies that the performance of professional services or other activities of an independent character must be considered to constitute an enterprise, regardless of the meaning of that term under domestic law.

15.24.4 *Treaty override for trading income*

Section 130 TIOPA provides:

> (1) Subsection (4) applies if double taxation arrangements make the provision, however expressed, mentioned in subsection (2).
> (2) The provision is that the profits of an enterprise within subsection (3) are not to be subject to UK tax except so far as they are attributable to

a permanent establishment of the enterprise in the UK.

(3) An enterprise is within this subsection if the enterprise—

(a) is resident outside the UK, or

(b) carries on a trade, or profession or business, the control or management of which is situated outside the UK.

The reference to "enterprise" here means the person who carries on the enterprise, which seems an erroneous usage, but it is one which is found the OECD model and the meaning is clear enough.

Assuming we have such an enterprise we move on to s.130(4) which disallows treaty relief:

> The provision does not prevent income of a person resident in the UK being chargeable to income tax or corporation tax.

Treaty relief is only allowed for a person resident outside the UK. Section 130(6) TIOPA defines residence:

> A person is resident in the UK for the purposes of this section if the person is resident in[57] the UK for the purposes of the double taxation arrangements.

Section 130 is headed: *Interpreting provision about UK taxation of profits of foreign enterprises.* This rule is however not interpretation or even misinterpretation: it is a treaty override. This section simply disapplies treaty relief for business profits. Breach of treaty agreements has ceased to concern HMRC when on the tax avoidance warpath.

Section 130 applies where an enterprise is carried on by a trust or company which is a resident in a treaty state with a standard business income article; and a UK resident is taxable on the income as life tenant of the trust, or under s.624, or under s.720 (at least in its pre-2013 form). The UK resident person does not qualify for DT relief.

For completeness: s.130(5) TIOPA provides an exception:

> Subsection (4)—
>
> (a) does not apply in relation to income of a person resident in the UK if section 858 of ITTOIA 2005 (UK resident partner is taxable on share of firm's income despite any double taxation arrangements) applies to the income, and

57 The wording in the definition of treaty-residence is: "a resident *of* the UK", but the preposition does not matter; see 6.1 (Three concepts of residence).

(b) does not apply in relation to income of a company resident in the UK if section 1266(2) of CTA 2009 (UK resident company that is partner in a firm is taxable on share of firm's income despite any double taxation arrangements) applies to the income.

Section 130 is not needed here as s.858 ITTOIA does the same job; see 41.10 (DT relief for partnership).

15.25 Commentary: Multinational trading income tax reform?

This topic has risen to prominence in connection with the current debate on tax avoidance.

An OUCBT paper provides:

> There are various ways to try to reform the taxation of business, especially international business. One route would be to reform existing rules, including those on transfer pricing, royalties, interest deductibility and the CFC rules. There are, however, constraints on a country's ability to undertake these international changes unilaterally. The desire to maintain or improve the country's competitive position is one powerful constraint. European Law is another. ... Further it may be difficult, though not impossible, to change established international norms on such matters as transfer pricing even though these norms were developed in a former era and are not always suitable for current economic and technological conditions.
>
> For this reason some would argue that tinkering with such rules can never produce a satisfactory result – a more radical change is required. We could move away from a corporate level tax on profits altogether and tax business activity on a different basis instead. This would raise other issues. Another popular radical solution would be to keep a corporate profits tax but to adopt a unitary system of taxation. Under this system multi-national companies would be treated as a single entity for tax purposes. Their profits would be determined on a world-wide basis and then allocated to different jurisdictions in accordance with a pre-established formula based on factors such as assets, labour and sales. Whilst clearly providing a number of benefits, it is equally clear that this system raises a number of problems, including difficulties surrounding the design of the all-important formula that will suit all the relevant jurisdictions and not be open to manipulation by taxpayers.
>
> One of the authors of this report has proposed a different radical

solution: a destination based cash flow tax.[58] This solution has many desirable properties; however further work is required to turn it into a workable proposal.

This is not to say that radical change is not possible. However there is unlikely to be a system which effortlessly solves all current difficulties without creating others. Claiming that there is a simple alternative to the current system as a silver bullet is unhelpful to real progress. A good deal of hard work, international co-operation and serious dialogue will be necessary to find the best practical way forward. ...[59]

CHAPTER SIXTEEN

PROPERTY INCOME

16.1 Property income: Introduction

ITTOIA uses the term "**property income**" to mean income from land.[1] The taxation of property income is governed by Part 3 ITTOIA. A full discussion requires a book to itself. This chapter focuses on matters closest to the themes of this book.

I do not consider the position of UK resident companies (subject to CT rather than to IT).

I do not consider deduction of tax at source, the Taxation of Income from Land (Non-residents) Regulations 1995 on which HMRC have written 88 pages of guidance notes; though I hope to cover this in a future edition.

---

1 A note on terminology. The commentary to TLR Exposure Draft No. 13 provides: "*Finding a suitable name*

223. Letting income has long been referred to as 'Schedule A income' by tax professionals. But that is not an informative label for the non-specialist and we are removing references to the Schedules.

224. We considered several possible new names for this type of income including 'land income', 'letting income', 'rental income', 'property business income' and 'property income'. We concluded that 'property income' offered the best compromise because:

- it matches the names that are proposed for the other types of income: 'trading income', 'employment income' and 'savings and investment income';
- for most people, it is likely to appear the most appropriate name; and
- it links directly with what we think is the most appropriate name for the business activity ('property business'): 'land business' and 'rental business' might be particularly misleading.

225. The disadvantage is that it might appear to go wider than income just from land; that is, strictly, 'property' means more than just land and buildings. But we do not think that most people will find this confusing as the proposed use corresponds broadly to the popular use."

16.1.1 *Cross references*

See 58.2 (Foreign tax credit relief: property income).

16.2 "Property business": terminology

The definitions are in s.263, 264 ITTOIA.

CT has equivalent definitions in Chapter 2 Part 4 of CTA 2009. CT itself is outside the scope of this work, but the definition is relevant as it is applied (with modifications) in the ATED rental business relief.[2]

16.2.1 *"UK property business"*

Section 264 ITTOIA provides:

> A person's UK property business consists of—
> (a) every business which the person carries on for generating income from land[3] in the UK, and
> (b) every transaction which the person enters into for that purpose[4] otherwise than in the course of such a business.

The CT equivalent is s.205 CTA 2009.

At first sight para (b) is puzzling. ITTOIA EN explains:

> 1049. … the concept of the "property business" is, to a certain extent, an artificial one. Unlike the term "trade" it may not always correspond to an activity organised in a way that the proprietor would necessarily describe as a business. As such, the term has to cover:
> - "real" businesses where the lettings are organised in a professional way;
> - lettings which are not so organised; and
> - casual and one-off transactions which may have very little of the qualities normally associated with a business.
>
> Then all of these lettings of different types must be treated as part of the same, single business.

16.2.2 *"Overseas property business"*

Section 265 ITTOIA provides:

---

2 See 75.26 (Property rental business).

3 The expression "generating income from land in the UK" is defined in ss.266, 267 ITTOIA.

4 ie for the purpose of generating income from land.

A person's overseas property business consists of—

(a) every business which the person carries on for generating income from land outside the UK, and

(b) every transaction which the person enters into for that purpose otherwise than in the course of such a business.

ITTOIA EN explains:

1056. The definition is identical to that of "UK property business" except that the land from which the income arises is outside the UK. That is the only difference between a UK and an overseas property business: income from land outside the UK can arise only in an overseas property business; income from land in the UK can arise only in a UK property business.

1057. For the purpose of deciding whether there is an overseas property business, overseas land law is interpreted in accordance with section 363.

See 16.4 (Losses of overseas property business) for a refinement to this definition.

16.2.3 *"Property business"*

Section 263(6) provides a commonsense definition:

In this Act "property business" means a UK property business or an overseas property business.

The CT equivalent is s.204 CTA 2009.

16.3 Taxation of income from property business

The charging provisions are in Chapter 3 Part 3 ITTOIA. Sections 268–270 provide:

268 Charge to tax on profits of a property business

Income tax is charged on the profits of a property business.

269 Territorial scope of charge to tax

(1) Profits of a UK property business are chargeable to tax under this Chapter whether the business is carried on by a UK resident or a non-UK resident.

(2) Profits of an overseas property business are chargeable to tax under this Chapter only if the business is carried on by a UK resident.

270 Income charged

(1) Tax is charged under this Chapter on the full amount of the profits arising in the tax year.

(2) Subsection (1) is subject to Part 8 (foreign income: special rules).

Section 270(2) ITTOIA feeds into s.832 which incorporates the remittance basis rules.

16.3.1 *Split year*

Section 270(3) ITTOIA provides the usual split year rule:

> If, as respects an individual carrying on an overseas property business, the tax year is a split year—
> (a) tax is charged under this Chapter on so much of the profits referred to in subsection (1) as arise in the UK part of the tax year, and
> (b) the portion of the profits arising in the overseas part of the tax year is, accordingly, not chargeable to tax under this Chapter.

Section 270(4) (not discussed here) deals with capital allowances.

16.4 Losses of overseas property business

16.4.1 *Losses from 2008/09*

Chapter 4 Part 4 ITA provides loss relief for a property business. There are three classes of loss relief:

(1) Carry forward against subsequent property business profits: ss.118–119 ITA.
(2) (a) Capital allowance losses and
(b) agricultural estate losses.
Sections 120–124 ITA.
(3) Post-cessation property relief: ss.125–126 ITA.

In this chapter I consider only the first of these reliefs. Section 118 ITA provides:

> **Carry forward against subsequent property business profits**
> (1) Relief is given to a person under this section if the person—
> (a) carries on a UK property business or overseas property business (alone or in partnership) in a tax year, and
> (b) makes a loss in the business in the tax year.
> (2) The relief is given by deducting the loss in calculating the person's net income for subsequent tax years (see Step 2 of the calculation in section 23).
> (3) But a deduction for that purpose is to be made only from profits of

the business.[5]

The Property Income Manual correctly summarises:

> **4705 CT** [February 2006]
> *Losses*
> As part of the changes made by FA 1995, the taxable profits and losses of overseas let property were ring fenced for IT purposes. The effect was that:
> - losses of an overseas property business cannot, for IT purposes, be set against profits of a UK property business carried on by the same individual,
> - similarly, losses of UK property business cannot for IT purposes be set against profits of an overseas property business carried on by the same individual.

The definitions of UK property business and overseas property business in ITTOIA were only ITTOIA-wide definitions (they do not apply for all the income tax Acts) so the drafter of the ITA had to repeat them. Section 989 ITA extends them to the income tax acts:

> The following definitions apply for the purposes of the Income Tax Acts—
> "overseas property business" has the meaning given by Chapter 2 of Part 3 of ITTOIA 2005,
> "UK property business" has the meaning given by Chapter 2 of Part 3 of ITTOIA 2005

At this point we need to consider s.263(4)(5) ITTOIA which restricts the meaning of "overseas property business":

---

5 For completeness, the ITA continues:
"(4) In calculating a person's net income for a tax year, deductions under this section from the profits of a business are to be made before deductions of any other reliefs from those profits.
(5) No relief is to be given under this section so far as relief for the loss is given under section 120.
(6) This section needs to be read with section 119 (how relief works).
119 How relief works
This section explains how the deductions are to be made.
The amount of the loss to be deducted at any step is limited in accordance with section 25(4) and (5).
Step 1 Deduct the loss from the profits of the business for the next tax year.
Step 2 Deduct from the profits of the business for the following tax year the amount of the loss not previously deducted.
Step 3 Continue to apply Step 2 in relation to the profits of the business for subsequent tax years until all the loss is deducted."

> (4) References in this Act to an overseas property business are to an overseas property business so far as any profits of the business are chargeable to tax under Chapter 3 (as to which see, in particular, section 269).
> (5) Accordingly, nothing in Chapter 4 or 5 is to be read as treating an amount as a receipt of an overseas property business if the profits concerned would not be chargeable to tax under Chapter 3.

I refer to this provision as **"the non-chargeable overseas property business rule".** This rule applies for the purposes of "this Act" (ITTOIA). However it is suggested that this applies for the purposes of loss relief in the ITA, s.989 ITA incorporates the s.263 rule, because it incorporates the definition of Chapter 2 Part 3 ITTOIA, and s.263 is in Chapter 2.
Suppose T carries on an overseas property business and:
(1) Year 1: T is non-resident and realises losses;
(2) Year 2: T is UK resident and realises profits.
The losses of Year 1 are disallowed since the profits of that year are not chargeable under Chapter 3 (or at all) so there is no overseas property business. In short, losses of non-residents are not relievable. *Quaere* whether this would apply if T were resident in an EU member state.

What about an overseas property business carried on by a remittance basis taxpayer? An overseas property business which is taxed under the remittance basis is (from 2008/09) taxed under Chapter 3 (even though the amount of income taxed is determined by s.832 ITTOIA which is not in chapter 3.) So the non-chargeable overseas property business rule does not disallow loss relief. Presumably this change was intentional as it was not desired to introduce an equivalent of the incomprehensible CGT loss rules into this context.[6]

16.4.2 *Losses before 2008/09*

The position was different before 2008/09. This is still relevant in relation to the question of whether pre-2008 losses can be carried forward and set against post 2008 profits. The relevant legislation in ITTOIA provided:

> **268 Charge to tax on profits of a property business**
> Income tax is charged on the profits of a property business.
> **269 Territorial scope of charge to tax**
> (1) Profits of a UK property business are chargeable to tax under this

6 See 54.9 (Loss accruing to remittance basis taxpayer).

> Chapter whether the business is carried on by a UK resident or a non-UK resident.
> (2) Profits of an overseas property business are chargeable to tax under this Chapter only if the business is carried on by a UK resident.
> *(3) But, in the case of an overseas property business carried on by a UK resident to whom the remittance basis applies, the only profits of the business chargeable to tax under this Chapter are those in respect of land in the Republic of Ireland.*
> *(4) For a UK resident to whom the remittance basis applies, see also Chapter 11 (charge to tax on overseas property income other than income arising in Republic of Ireland).*

(Words in italics repealed by the FA 2008.) Thus for a remittance basis taxpayer, and ignoring the special case of land in Ireland,[7] the charge was not under Chapter 3. Instead it was in Chapter 11 (also repealed in the FA 2008). This provided:

> ***357 Charge to tax on overseas property income***
> *Income tax is charged on the overseas property income of a person to whom the remittance basis applies.*
> ***358 Meaning of "overseas property income"***
> *In this Chapter "overseas property income", in relation to a person to whom the remittance basis applies, means amounts which*
> *(a) are not brought into account in calculating the profits of any overseas property business of the person, but*
> *(b) would be if section 269(3) (charge to tax on profits of an overseas property business of a person to whom the remittance basis applies only in respect of land in the Republic of Ireland) were omitted.*
> ***359 Income charged***
> *Tax is charged under this Chapter on the amount specified by section 832 (relevant foreign income charged on the remittance basis).*

So before 2008, the remittance basis taxpayer did not have an "overseas property business" so there could not be loss relief. In the 2007/08 edition of this book I commented:

> This is consistent with the CGT treatment of losses. It may be desirable for a foreign domiciliary not to claim remittance basis treatment in the year that a loss accrues in order to obtain that loss relief. Though the cost of that

7 I do not discuss Irish property income here, but note that the pre-2008 legislation was in breach of EU law; see 10.21 (RFI from Ireland).

claim must be set against the benefit of the remittance basis in that year. Suppose the loss is allowable in the year it accrues but in a subsequent year the owner claims remittance basis treatment. The loss is not allowable in that year. However, it is suggested that the loss can be carried forward and set against profits of other years if the arising basis applies to those years.

It is suggested that a loss which did not qualify for relief in the year that it accrued cannot be carried forward to 2008/09 or subsequently. HMRC may well agree. The Property Income Manual provides:

> **4702. IT cases up to 2004-05** [April 2007]
> No loss can ever arise on income taxed on the remittance basis.

Offshore property business losses from before 1998/99 are allowable under ESC B25, but it seems unlikely that any such losses will still be available to be carried forward to the present time.

16.5 Border between trading income and property income

A receipt may in some cases be both a trading receipt and a receipt of a property business. Sections 4 and 261 ITTOIA deal with the overlap.

Section 4(1) ITTOIA provides:

> Any receipt or other credit item, so far as it falls within—
> (a) Chapter 2 of this Part (receipts of trade, profession or vocation), and
> (b) Chapter 3 of Part 3 so far as it relates to a UK property business,
> is dealt with under Part 3.

Section 261 ITTOIA provides:

> Any receipt or other credit item, so far as it falls within—
> (a) [i] Chapter 3 of this Part so far as it relates to an overseas property business or
> [ii] Chapter 8 or 9 of this Part (rent receivable in connection with a UK section 12(4) concern or for UK electric-line wayleaves), and
> (b) Chapter 2 of Part 2 (receipts of a trade, profession or vocation),
> is dealt with under Part 2.

ITTOIA EN explains:

> 1058. The priority rules in the trading income Part of this Act (section 4) make it clear that a charge under Part 3 of this Act as UK property income has priority over a charge under Part 2 as trading income. This reflects the rule in Schedule D Case I (section 18(3) of ICTA). The sort

> of receipt to which this rule might apply is rent received by a property developer from the temporary letting of land awaiting development. The rent is taxed as property income, even if it could properly be regarded as a trade receipt.
> 1059. In the case of a foreign trade and foreign property, the rule in section 65A(1)(b) of ICTA is the reverse of that in section 18(3) of ICTA. An overseas property business does not include "income to which section 65(3) of ICTA applies (income immediately derived from carrying on a trade ..)". So the priority rule in section 261 preserves this position.

Perhaps the reason for this apparent anomaly is to maximise income classified as UK source. Under these rules, if UK property income is a receipt of a foreign trade, it is classified as UK property income (and so taxable even in circumstances where foreign trading income may not be); whereas if foreign property income is part of a UK trade it is treated as UK trading income (and similarly taxable).

16.6 DT relief for property income

Article 6(1) OECD Model Convention provides:

> Income derived by a resident of a Contracting State from immovable property (including income from agriculture or forestry) situated in the other Contracting State may be taxed in that other State.

The significance of this is that income from immovable property does not fall within article 21 ("other income", which is taxed only in the state of residence). Instead, it is taxed in the source state with credit given in the state of residence.

The OECD Model Commentary provides:

> 1. Paragraph 1 gives the right to tax income from immovable property to the State of source, that is, the State in which the property producing such income is situated. This is due to the fact that there is always a very close economic connection between the source of this income and the State of source. ... Article 6 deals only with income which a resident of a Contracting State derives from immovable property situated in the other Contracting State. It does not, therefore, apply to income from immovable property situated in the Contracting State of which the recipient is a resident within the meaning of Article 4 or situated in a third State; the provisions of paragraph 1 of Article 21 [other income] shall apply to such income.

16.6.1 *"Immovable property"*

The definition of immovable property is important for article 6 and for article 13 (capital gains).

Article 6(2) OECD Model Convention provides:

> The term "immovable property" shall have the meaning which it has under the law of the Contracting State in which the property in question is situated. The term shall in any case include
> [1] property accessory to immovable property,
> [2] livestock and equipment used in agriculture and forestry,
> [3] rights to which the provisions of general law respecting landed property apply,
> [4] usufruct of immovable property and
> [5] rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources;
> ships, boats and aircraft shall not be regarded as immovable property.

The OECD Model Commentary provides:

> 2. Defining the concept of immovable property by reference to the law of the State in which the property is situated, as is provided in paragraph 2, will help to avoid difficulties of interpretation over the question whether an asset or a right is to be regarded as immovable property or not. The paragraph, however, specifically mentions the assets and rights which must always be regarded as immovable property. In fact such assets and rights are already treated as immovable property according to the laws or the taxation rules of most OECD member countries. ... No special provision has been included as regards income from indebtedness secured by immovable property, as this question is settled by Article 11.

Article 6(3) elucidates "derived from" immovable property:

> 3. The provisions of paragraph 1 shall apply to income derived from the direct use, letting, or use in any other form of immovable property.

The OECD Model Commentary provides:

> 3. Paragraph 3 indicates that the general rule applies irrespective of the form of exploitation of the immovable property....

The OECD Model Commentary comments on the border between property income and distribution income:

> 3. ... Income in the form of distributions from Real Estate Investment

Trusts (REITs), however, raises particular issues which are discussed in paragraphs 67.1 to 67.7 of the Commentary on Article 10.

Article 6(4) deals with the border between business income and property income:

4. The provisions of paragraphs 1 and 3 shall also apply to the income from immovable property of an enterprise.

The OECD Model Commentary provides:

3. ... Paragraph 4 makes it clear that the provisions of paragraphs 1 and 3 apply also to income from immovable property of industrial, commercial and other enterprises. ...

4. It should be noted in this connection that the right to tax of the State of source has priority over the right to tax of the other State and applies also where, in the case of an enterprise, income is only indirectly derived from immovable property. This does not prevent income from immovable property, when derived through a permanent establishment, from being treated as income of an enterprise, but secures that income from immovable property will be taxed in the State in which the property is situated also in the case where such property is not part of a permanent establishment situated in that State. It should further be noted that the provisions of the Article do not prejudge the application of domestic law as regards the manner in which income from immovable property is to be taxed.

CHAPTER SEVENTEEN

DEDUCTION OF INTEREST IN COMPUTING PROPERTY INCOME

17.1 Deduction of interest: Introduction

This chapter considers the deduction of interest for the purposes of income taxation of property income and trading income.

A great deal of tax and tax planning depends on obtaining that deduction.[1] See *Langsam v Beachcroft LLP* [2011] EWHC 1451 (Ch) for an interesting negligence action where a dissatisfied remittance basis taxpayer obtained damages against solicitors who failed to advise on the tax avoidance possibilities dignified with the label of an "equity release arrangement".

The position of UK resident companies (subject to corporation tax and governed by the loan relationship rules) is not discussed.

17.1.1 *Cross references*

For questions of the location of the source of interest, and deduction at source, see 18.1 (interest income).

17.2 Basis for deduction

Section 272(1) ITTOIA is the starting point for property income:

> The profits of a property business are calculated in the same way as the profits of a trade.

Section 272(2) provides a long list of statutory provisions which apply to a property business.

Thus I can deal with property income and trading income in the same chapter, though my focus here is on property income.

---

1 See Traversa, "Interest Deductibility and the BEPS Action Plan: *nihil novi sub sole*" [2013] BTR 607.

17.3 Capital expenditure

Section 33 ITTOIA provides:

> In calculating the profits of a trade, no deduction is allowed for items of a capital nature.

In the early days of income tax, the Courts ruled that where a loan was used as capital in a trade, interest on the loan was a capital expense and so disallowed.[2] That seems a strange result, but the Courts wished to avoid the anomaly, which holds today, and is a contributing factor to the current financial crisis,[3] that debt finance gives rise to deductible interest but equity finance does not, as there is no deduction for dividends or the cost of share capital.

The old rule was however reversed by statute and s.29 ITTOIA now provides:

> For the purpose of calculating the profits of a trade, interest is an item of a revenue nature, whatever the nature of the loan.

Interest is in principle a deductible expense if incurred wholly and exclusively for the purpose of the property business.

A premium (if not interest) is not deductible for IT purposes. That rule is preserved by s.58 ITTOIA, which allows relief for incidental costs of loan finance, but s.58(4) ITTOIA provides:

> But the following are not incidental costs of obtaining finance ...
>
> (c) the cost of repaying a loan or loan stock so far as attributable to its being repayable at a premium or having been obtained or issued at a discount...

17.4 Wholly and exclusively

Section 34 ITTOIA provides:

> (1) In calculating the profits of a trade, no deduction is allowed for—
>
> (a) expenses not incurred wholly and exclusively for the purposes of the trade,

---

2 See for instance *European Investment Trust v Jackson* 18 TC 1.

3 The issue is discussed briefly in Report of the Parliamentary Commission on Banking Standards, *Changing banking for good* (2013) Volume II para 185-188 *http://www.parliament.uk/documents/banking-commission/Banking-final-report-vol-ii.pdf*

The Property Income Manual provides:

2105. Introduction [April 2011]

Overview

... For IT, interest payable on loans used to buy land or property which is used in the rental business, or on loans to fund repairs, improvements or alterations, is deductible in computing the profits or losses of the rental business in the same way as other expenses.

Similarly, interest payable under hire purchase agreements or on an overdraft is deductible where the asset is used for business purposes.

The normal rental business rules apply, see PIM2000 onwards, including the "wholly and exclusively" rule and the rules governing the timing of relief (see PIM1100 onwards). A taxpayer cannot, for example, deduct interest on a private loan, such as a loan used to buy their private residence. Where part of the taxpayer's own residence is let see PIM2120.

Similarly, the interest on a loan or overdraft may not be allowable, or only part may be allowable, where the taxpayer, for example, uses the borrowing:

- to buy non-rental business investments (which may be shown in the balance sheet as assets),
- to buy private assets or assets for their family,
- for the provision of private funds to be taken out from the rental business.

Deciding what interest, if any, can be deducted may be difficult, particularly where the taxpayer's account with the business is overdrawn. That is, where the taxpayer has drawn out more money than the profits of the rental business. The loan may have, for example, partly financed the rental business and partly met private living expenses. Interest on a borrowing that is used to fund private living expenses or other non-business expenditure isn't allowable.

For advice regarding the incidental costs of loan finance see PIM2050.

Interest on a partner's capital account with the business isn't deductible. It is merely an allocation of the rental business profit and is taxed as property income.

For more detailed guidance about the deduction of interest see BIM45650 onwards.[4]

Interest payable on property only partly used for rental business

A property may be let for short periods in a tax year or only part of it may be let throughout a tax year (or both); the rest of the time the property is used for private or non-business purposes. Here the interest charged on a qualifying loan on that property has to be split between the rental business use and the private

4 This material is not set out here for reasons of space, but it is well worth reading, particularly where the interest is deducted from trading income rather than property income.

or non-business use. The split is done in whatever way produces a fair and reasonable business deduction, taking account of both the proportion of business use and the length of business use.

You don't have to split the interest if the taxpayer is genuinely trying to let the property but it is empty because they have not been able to find a tenant. In this case the interest will meet the "wholly and exclusively" test. It won't meet this test if they have not been trying to let the property or they have been using it for private or non-business purposes .

[***Interest and rent-a-room relief*** *- passage not printed here*]

Legislation

The profits of a rental business are calculated in the same way as the profits of a trade. Therefore interest may be deducted in computing the profits of a rental business provided that it meets the following criteria.

- It must be payable wholly and exclusively for the purposes of the rental business.

[• If it is paid to a person not resident in the UK, the deductible element must not be at more than a reasonable commercial rate - see PIM2110.][5]

- It must not be within MIRAS - see PIM2120.

Remember that under the rental business rules, relief is given for interest payable on the accruals basis (not interest paid unless, exceptionally, the cash basis is used - see PIM1101).

The guidance on interest as a trade expense at BIM45650 onwards applies equally to interest as a rental business expense.

Interest rate hedging instruments

Where an interest rate hedging contract such as a swap or cap is taken out to hedge interest payments which are deductible in computing the profits or losses of a rental business, then profits or losses on that contract will normally be taxed or relieved as receipts or deductions of that rental business. This is because trading principles are imported into the property income computation rules. Profits and losses on such instruments should normally be computed on an accruals basis so that payments and receipts are allocated to the periods to which they relate, without regard to the periods in which they are made or received or become due and payable, in accordance with normal accounting practice.

For more on the tax treatment of swaps held by IT payers see PIM2140.

2110. Paid abroad [April 2011]

Business deduction and deduction of tax

The residence status of the lender does not affect the taxpayer's right to an interest deduction in computing the profits or losses of their rental business. But where they pay interest to a lender whose usual place of abode is outside the UK, they should normally deduct IT at the basic rate from the payments they

5 This passage is out of date: see 17.4.1 (Interest paid at uncommercial rate).

make and account for it to HMRC, ...

17.4.1 *Interest paid at uncommercial rate*

The Property Income Manual provides:

> **2110. Paid abroad** [April 2011]
>
> **...**
>
> ***Interest paid at uncommercial rates***
>
> Interest paid to a lender not resident in the UK over and above a commercial rate isn't allowable as a deduction even if it would otherwise qualify (perhaps because the loan was used to buy a rental business property). Generally, HMRC will accept the interest charged by the lender as an allowable deduction where it is paid on an arm's length loan made on a normal commercial basis.
>
> ... Take a broad view of what is a reasonable commercial rate. You should not normally seek an adjustment where the payer and recipient are at arm's length. If interest is payable in the UK on an advance from a foreign bank carrying on a bona fide banking business in the UK through a branch, treat it as if it were interest payable to a UK bank...

This is referring to the former s.74(1)(n) ICTA 1988, which disallowed interest paid to a non-resident so far as it was at more than a reasonable commercial rate. The provision was repealed in 2004, so the Manual is almost a decade out of date. However if interest is paid at more than a commercial rate, whether or not to a non-resident, the deduction would in principle be disallowable on transfer pricing or on "wholly and exclusively" principles.

17.4.2 *Non-resident company paying interest*

Lastly, for completeness, the Manual refers to (what is now) 1301A CTA 2009:

> In calculating a company's income from any source for corporation tax purposes, no deduction is allowed for interest otherwise than under Part 5 (loan relationships).

That only applies for CT and does not disallow a deduction for interest for IT. HMRC agree. The PI Manual states:

> **2110. Paid abroad** [April 2011]
>
> **...**
>
> ***Non-resident companies***
>
> ... Section [1301A] does not preclude a deduction for interest for

companies chargeable to IT such as non-resident companies with income from UK property.

17.5 Tax relief schemes and arrangements

Section 809ZG(1) ITA provides the general rule:

> Relief is not to be given under any provision of the Income Tax Acts to a person in respect of a payment of interest if
>
> [a] a tax relief scheme has been effected, or
>
> [b] tax relief arrangements have been made,
>
> in relation to the transaction under which the interest is paid.

Section 809ZG(2) ITA is a small point:

> Subsection (1) applies whether the tax relief scheme is effected, or the tax relief arrangements are made, before or after the transaction.

I do not see how a transaction could take place before the scheme is effected, but it does not matter.

Section 809ZG(3) ITA defines tax relief scheme:

> A scheme is a tax relief scheme in relation to a transaction for the purposes of subsection (1) if it is such that the sole or main benefit that might be expected to accrue to the person from the transaction is the obtaining of a reduction in tax liability by means of relief under the Income Tax Acts.

Section 809ZG(4) ITA defines tax relief arrangements in the same way:

> Arrangements are tax relief arrangements in relation to a transaction for the purposes of subsection (1) if they are such that the sole or main benefit that might be expected to accrue to the person from the transaction is the obtaining of a reduction in tax liability by means of relief under the Income Tax Acts.

Section 809ZG(5) ITA provides a commonsense definition of relief:

> In this section "relief" means relief by way of—
>
> (a) deduction in calculating profits or gains, or
>
> (b) deduction or set off against income.

Corporate Finance Manual provides:

> **39030. Artificial payments of interest: Sole or main benefit** [October 2009]
>
> [The Manual summarises the legislation and continues:] The sole or main benefit test is an objective, rather than a subjective test: the

> subsection focuses on the result to be expected from the transaction rather than its purpose. (See *The Crown Bedding Co v IRC* 34 TC 107 at pp 115, 118-120, followed in *Ackland & Pratten v IRC* 39 TC 649 at p662, and approved in *IRC v Brebner* 43 TC 705 at p718).
> Ordinary borrowings involving funds, which are genuinely invested or re-lent, are not affected because the tax relief on the interest paid is incidental to the transaction.

The International Manual formerly provided:

> **509120. Section 787 ICTA 1988** [February 2006]
> '*Part XVII ICTA 1988 includes various anti-avoidance provisions including Section 787. This restricts relief for interest paid under a scheme from which the sole or main benefit which might be expected to accrue is the reduction of tax resulting from the relief, including group relief. Although this appears to be a far reaching section which could be used against many avoidance schemes, its usefulness is somewhat restricted.*
> *The provision was introduced to counteract a specific domestic avoidance scheme to get relief on 'manufactured' interest by paying interest in advance on a borrowing which was effectively immediately repaid. It is necessary to distinguish between an out-and-out avoidance scheme and a judiciously arranged borrowing scheme. The section is not, therefore, easily invoked but it may still be legitimate to use it in some cases involving intra-group funding transactions.*'

The entry has been deleted but there seems to be no reason to believe that HMRC practice has changed. HMRC's reluctance to use the section goes back to an assurance given in Parliament:

> **Mr. Robert Sheldon (financial secretary to the Treasury)**: The hon. Member for Guildford (Mr. Howell) rightly asked for some assurance that there would be no problems for innocent parties seeking arrangements whereby they undertook to pay interest for genuine business purposes. I can give the hon. Gentleman the assurance that those paying true interest for genuine business purposes will not be caught by this scheme. To give him the definition, which I think also deals with the question put by the hon. Member for Cirencester and Tewkesbury (Mr. Ridley), in a genuine commercial scheme the main benefit is to secure finance. If that is applicable, those people will not be caught by the main benefit test and they will be perfectly free to go about seeking and undertaking any transactions which fall within that definition.
> The natural anxiety of the hon. Member for Guildford is that these

> matters are closely watched. I can give him that assurance. That is to the advantage of the kind of people mentioned in this debate so that we do not entrap those perfectly legitimate and proper cases where people are prepared to pay the interest and get it allowable against tax. We are concerned about people who resort to some of those very peculiar devices of the kind which show an immense amount of ingenuity and, as the hon. Member for Guildford said, with such unfortunate results.[6]

17.6 Transfer pricing and thin capitalisation

The transfer pricing rules are in part 4 TIOPA, supplemented by the OECD transfer pricing guidelines which is nearly 400 pages. This is a vast topic, and a full discussion would need many volumes. I focus on matters closest to the themes of this book.

Assuming interest is paid at market rates, one would not expect any transfer pricing issues to arise. However the effect of some deft deeming provisions is that transfer pricing rules also serve as thin capitalisation rules, ie rules which restrict the deduction of interest by companies funded primarily by borrowing, having limited share capital or net value. It is therefore necessary to consider these rules in some detail.

The International Manual explains the background as it appears to HMRC:

> **413010. Definition of thin capitalisation** [August 2012]
> In the commercial world, a company is said to be thinly capitalised when it has more debt than equity, and many thin cap cases boil down to a company with more debt than it could and would have borrowed on its own resources, because it is borrowing either from or with the support of connected persons.
> However, the amount of interest payable may be excessive for one or more reasons - interest rate, excessive duration of lending, restrictions on repayment, etc - so all terms and conditions should be considered in a thin capitalisation review. Other less obvious issues of possible interest are the appropriateness of the currency of the loan (e.g. forex risk) and the presence of guarantees. For HMRC, thin cap means looking at every aspect of lending and borrowing from a transfer pricing angle.
> **Other legislation on finance**
> There is other legislation - and this is not an exhaustive list - which may result in a restriction of the interest deduction, including:
> • Arbitrage provisions - see INTM590000

6 Hansard, 13 July 1976.

- Unallowable purpose legislation - Section 441–442 CTA 2009 - see CFM38010
- Remaining provisions of pre-2004 legislation [Section 209 ICTA 1988] - now around Section 1000 CTA 2010 - such as interest in excess of a commercial rate of return - see below and CTM15502
- World-wide debt cap - Part 7 TIOPA 2010 - see CFM90100 onwards

The first two represent anti-avoidance legislation, so the choice depends on the facts and circumstances of the particular case, and transfer pricing concerns may sit alongside avoidance concerns. Section 155(6) TIOPA 2010 says that the Section 1000 CTA 2010 list and the world-wide debt cap legislation shall be disregarded when calculating the transfer pricing tax advantage. The debt cap applies after any transfer pricing adjustment has been made.

These provisions concern corporation tax only and are not discussed here. The Manual provides:

How thin capitalisation arises

When a company operates at arm's length from its sources of funding, commercial considerations drive the decision to raise funds either through debt, equity, or a mixture of the two. There is a marked difference in tax treatment between debt finance and equity, in that interest on debt is deductible from profits, whereas dividends on shares are not. This is explored in more detail in the Practical Thin Cap Guidance from INTM570000 onwards.

When a company borrows from or with the support of other group companies, funding decisions may not be driven by commercial considerations alone. The connection between the parties involved might allow them to change the way in which the funding is obtained in ways unavailable or unattractive to the borrower at arm's length, or to take on funding risks which an independent borrower would avoid. Factors such as group policy, strategy, and tax planning will sit alongside commercial considerations.

As a result of the differences in tax treatment between interest and dividends, a company which increases its indebtedness, and thereby increases its interest payments, reduces the tax it has to pay.

Thin capitalisation is just a form of transfer pricing, and is not limited to companies, except where the legislation says so, but this guidance concentrates largely on corporate relationships.

Thin capitalisation and tax planning

As with transfer pricing more generally, thin capitalisation does not require a tax avoidance motive. The aim of applying transfer pricing legislation is to ensure that arm's length prices are recognised for goods,

services, etc, for tax purposes. However, company finance is an easy and attractive way for groups to change the jurisdiction within which profits arise, and tax planning will be an aspect of the financing plans for any major corporate acquisition.

Corporate thin capitalisation is usually seen in a group context, since it would be counter-productive (though not unheard of) for a company to increase its interest costs payable to a third party, just to reduce its tax liability. Besides, a borrower cannot borrow more (or pay more interest) than an arm's length lender is willing to lend, unless that money is guaranteed, usually by group members. Where the borrowing is intra-group, the interest remains within the group; the group as a whole is no less profitable, but the borrower has paid less tax, and, where the lender is in a country with a lower corporation tax rate than the borrower or has losses to absorb interest received, the group can end up far better off overall. At the same time, there may be arbitrage (INTM590000) or other opportunities to further reduce tax.

With third party borrowing supported by a group guarantee, interest is paid to a third party and value leaves the group, but in that case the issue may be a matter of where it is most tax efficient for the group's interest costs to arise. The inference is that the world-wide group has capacity to borrow but not necessarily within the UK entity, which is where it wishes to place the debt. However, guarantees, including less formal support such as a letter of comfort, can enable a company to borrow more cheaply than would be possible on a standalone basis.

The EC comment on the EU law aspects of thin capitalisation:

Thin capitalisation rules. There are many different approaches to the design of thin cap rules which reflect the different views and legal traditions of MSs. However, the background to these rules is similar. Debt and equity financing attract different tax consequences. Financing a company by means of equity will normally result in a distribution of profits to the shareholder in the form of dividends, but only after taxation of such profits at the level of the subsidiary. Debt financing will result in a payment of interest to the creditors (who can also be the shareholders), but such payments generally reduce the taxable profits of the subsidiary. Dividend and interest may also attract different withholding tax consequences. The difference in treatment between debt and equity financing under national tax law (and at bilateral level), as a result of which the source state's taxing rights on interest are generally more limited than those on dividends, make debt financing considerably more attractive in a cross-border context and can therefore lead to the erosion of the tax base in the state of the subsidiary.

By abolishing their thin cap rules altogether or by carving out dealings with lenders resident in other MSs and EEA States from their scope, the difference in treatment between resident subsidiaries according to the seat of their parent company within the EU/EEA would be removed. The Commission is of the opinion that MSs should, however, be able to protect their tax bases from artificial erosion through structured debt

financing, also within the EU/EEA. Following *Lankhorst*, some MSs have tried to avoid the charge of discrimination by extending the application of their thin cap rules to cover also purely national relations. As discussed above, this is not desirable development.

In *Thin Cap* the ECJ acknowledged that measures to prevent thin capitalisation are not per se impermissible. Their application must however be confined to purely artificial arrangements. This may be achieved by ensuring that the terms of the debt financing arrangements between related companies remain within the limits of what would have been agreed upon between unrelated parties or that they are based on otherwise valid commercial reasons. The Commission considers that the principles laid down by the ECJ in relation to thin cap rules also apply to transfer pricing rules, which are essential to the continued existence of individual national tax systems. MSs cannot operate effective tax systems unless they are able to ensure that their tax bases are not eroded through non-commercial arrangements between associated companies.

4. APPLICATION OF ANTI-ABUSE RULES IN RELATION TO THIRD COUNTRIES

CFC rules determine the tax treatment of the profits of a foreign company controlled by a resident. As such rules are directed at, and thus only affect resident shareholders with definite influence over a foreign company (usually a parent in a corporate group) their centre of gravity lies with the ability of companies (and as the case may be, individuals) to establish themselves, through subsidiaries, in other countries. Similarly, MSs' thin cap rules are directed exclusively at group debt financing arrangements, i.e. they are only applied in situations where a foreign shareholder holds a substantial participation in the resident subsidiary. Thus, the centre of gravity in respect of thin cap rules also lies clearly with the freedom of establishment and as in the case of CFC rules their application is therefore to be examined solely from the perspective of Article 43 of the EC Treaty[7].

As Community law does not require MSs to avoid discrimination in relation to the establishment of their nationals outside the Community, or the establishment of third-country nationals in a MS[8] the issue of discrimination does not arise in the cases of a controlled company or a creditor/shareholder resident in a third country. MSs should therefore not be precluded from applying CFC and thin cap rules in relation to third countries. Community law does not impose any particular requirements on the legitimacy of the application of such legislation to transactions outside the EU[9].

However, should the application of those rules not be confined to situations and transactions between companies in a corporate group (or otherwise related parties where one has definite influence over the other) and to the extent that this was the case, they would need to comply with Article 56 of the EC Treaty, and also in relation to third countries, be applied to wholly artificial arrangements only (with the exception of situations where there is no adequate information exchange relationship with the third country concerned).

---

7 Lasertec, C-492/04, #20.

8 As the ECJ noted in *ICI*: " (…), when deciding an issue concerning a situation which lies outside the scope of Community law, the national court is not required, under Community law, either to interpret its legislation in a way conforming with Community law or to disapply that legislation (…)" #34.

9 Their application may however be precluded by the relevant Double Tax Convention.

The corporate tax directives only apply to companies incorporated in the MSs and their overall objective is to create *within the Community* conditions analogous to those of an internal market by removing tax obstacles to cross-border reorganisations and to payments of dividends, interest and royalties. It would therefore not appear to fall within their ambit to, for instance, facilitate arrangements intended to avoid withholding taxes on payments to non-European entities, if such structuring does not serve any commercial purpose.[10]

17.6.1 "*The basic pre-condition*"

Section 147 TIOPA provides:

> (1) For the purposes of this section "the basic pre-condition" is that—
> (a) provision ("the actual provision") has been made or imposed as between any two persons ("the affected persons") by means of a transaction or series of transactions,
> (b) the participation condition is met (see section 148),
> (c) the actual provision is not within subsection (7) (oil transactions), and
> (d) the actual provision differs from the provision ("the arm's length provision") which would have been made as between independent enterprises.

Thus the "basic pre-condition" actually consists of four conditions or sets of conditions.

Section 151(1) TIOPA defines **"arm's length provision"** in line with the commonsense usage above:

> In this Part "the arm's length provision" has the meaning given by section 147(1).

17.6.2 "*Transaction of series of transactions*"

Section 150 TIOPA defines transaction:

> (1) In this Part "transaction" includes arrangements,[11] understandings and mutual practices (whether or not they are, or are intended to be, legally enforceable).
> (2) References in this Part to a series of transactions include references

---

10 EC Communication "The application of anti-abuse measures in the area of direct taxation" COM(2007) 785 *http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:52007DC0785*

11 Section 150(5) TIOPA provides the standard, unnecessary definition of "arrangement": "In this section "arrangement" means any scheme or arrangement of any kind (whether or not it is, or is intended to be, legally enforceable)."

to a number of transactions each entered into (whether or not one after the other) in pursuance of, or in relation to, the same arrangement.
(3) A series of transactions is not prevented by reason only of one or more of the matters mentioned in subsection (4) from being regarded for the purposes of this Part as a series of transactions by means of which provision has been made or imposed as between any two persons.
(4) Those matters are—

(a) that there is no transaction in the series to which both those persons are parties,
(b) that the parties to any arrangement in pursuance of which the transactions in the series are entered into do not include one or both of those persons, and
(c) that there is one or more transactions in the series to which neither of those persons is a party.

The International Manual provides:

413060. Transaction or series of transactions [August 2012]
Transactions within a series do not have to occur in a recognisable sequence. They may be simultaneous or removed in time from one another, but they have to be part of an overall arrangement or scheme.
The meaning of series of transactions is further widened by Section 150(4) TIOPA 2010 [the Manual sets out s.150(4) and continues:]
By recognising a series of transactions, the transfer pricing legislation can apply to more complex and indirect financial structures in the same way that it does to the most straightforward borrower/lender situation. However, irrespective of the complexity or number of transactions which make up the "series", it should always be borne in mind that this legislation is still about a provision within Section 147 TIOPA 2010 between two persons that results in a tax advantage. (INTM412020 and INTM413050)
A simple example of indirect finance which would fall within the definition of a series of transactions is a UK borrower being lent money by an entirely unconnected third party bank, with a party connected to the borrower guaranteeing the loan.
A more complex example is where a company in the same group as the UK borrower has provided a guarantee to one bank, which then provides a guarantee to a second bank, and the second bank then lends money to the UK borrower. Here there is a step - between the first and second banks - which does not involve either the parent or the borrower. This is still a series of transactions, and one which, though difficult to detect, would fall within the scope of the thin capitalisation legislation. Apart from the provision of a guarantee, the most likely situations where the provision might consist of a series of transactions would be where an

intermediary is acting in a nominee or agency capacity in providing finance cross border between group companies.

In guarantee cases of this nature, the questions to ask in considering the provision are:

- Without the guarantee(s) would the borrower have been able and willing to borrow on these terms?
- Had the borrower and the guarantor been at arm's length from one another, would they have entered into the guarantee?

17.7 The participation condition

Section 148 TIOPA provides:

> (1) For the purposes of section 147(1)(b), the participation condition is met if—
>
> (a) condition A is met in relation to the actual provision so far as the actual provision is provision relating to financing arrangements, and
>
> (b) condition B is met in relation to the actual provision so far as the actual provision is not provision relating to financing arrangements.

I refer to **"participation conditions A and B"**. It is helpful to consider condition B first.

17.7.1 *Participation condition B*

Section 148(3) TIOPA provides:

> Condition B is that, at the time of the making or imposition of the actual provision—
>
> (a) one of the affected persons was directly or indirectly participating in the management, control or capital of the other, or
>
> (b) the same person or persons was or were directly or indirectly participating in the management, control or capital of each of the affected persons.

17.7.2 *Participation condition A*

Section 148(2) TIOPA provides:

> Condition A is that, at the time of the making or imposition of the actual provision or within the period of six months beginning with the day on which the actual provision was made or imposed—
>
> (a) one of the affected persons was directly or indirectly

participating in the management, control or capital of the other, or

(b) the same person or persons was or were directly or indirectly participating in the management, control or capital of each of the affected persons.

Participation condition A is the same as B, except that the participation test can be satisfied at the time of the arrangement in the following 6 months. This wider tests applies to financing arrangements. That term is given a commonsense definition in s.148(4) TIOPA:

> In this section "financing arrangements" means arrangements made for providing or guaranteeing, or otherwise in connection with, any debt, capital or other form of finance.

17.8 Participation in the management control or capital of another person

This expression is elaborately defined.

17.8.1 *Direct participation*

Section 157 TIOPA provides:

> (1) Subsection (2) applies for the purposes of—
> (a) this Part,
> (b) in Part 2, section 132(7), and
> (c) in Part 5, section 219(2).
> (2) A person is directly participating in the management, control or capital of another person at a particular time if (and only if) that other person is at that time—
> (a) a body corporate or a firm, and
> (b) controlled by the first person.

17.8.2 *Indirect participation: Potential direct participant*

Section 159 TIOPA provides:

> (1) Subsection (2) applies for the purposes of—
> (a) sections 148(2) and (3), 154(5), 175(2) and 204(4),
> (b) in Part 2, section 132(7), and
> (c) in Part 5, section 219(2).
> (2) A person ("P") is indirectly participating in the management, control or capital of another person ("A") at a particular time if
> [a] P would be directly participating in the management, control or capital of A at that time
> [b] if the rights and powers attributed to P included all the rights

and powers mentioned in subsection (3) that are not already attributed to P for the purpose of deciding under section 157 whether P is directly participating in the management, control or capital of A.

(3) The rights and powers referred to in subsection (2) are—

(a) rights and powers which P is entitled to acquire at a future date,

(b) rights and powers which P will, at a future date, become entitled to acquire,

(c) rights and powers of persons other than P so far as they are rights or powers falling within subsection (4),

(d) rights and powers of any person with whom P is connected (see section 163), and

(e) rights and powers which would be attributed by subsection (2) to a person with whom P is connected were it being decided under that subsection whether that connected person is indirectly participating in the management, control or capital of A.

(4) Rights and powers fall within this subsection so far as they—

(a) are required, or may be required, to be exercised in any one or more of the following ways—

(i) on behalf of P,

(ii) under the direction of P, or

(iii) for the benefit of P, and

(b) are not confined, in a case where a loan has been made by one person to another, to rights and powers conferred in relation to property of the borrower by the terms of any security relating to the loan.

(5) In subsections (3)(c) to (e) and (4), the references to a person's rights and powers include references to any rights or powers which the person either—

(a) is entitled to acquire at a future date, or

(b) will, at a future date, become entitled to acquire.

(6) In paragraph (e) of subsection (3), the reference to rights and powers which would be attributed to a connected person includes a reference to rights and powers which, by applying that paragraph wherever one person is connected with another, would be so attributed to the connected person through a number of persons each of whom is connected with at least one of the others.

(7) References in this section—

(a) to rights and powers of a person, or

(b) to rights and powers which a person is or will become entitled to acquire,

include references to rights or powers which are exercisable by that person, or (when acquired by that person) will be exercisable, only jointly with one or more other persons.

17.8.3 "*Connected*"

Section 163 TIOPA defines "connected":

(1) Subsections (2) and (3) apply for the purposes of section 159 and this section.
(2) Two persons are connected with each other if one of them is an individual and the other is—
(a) the individual's spouse or civil partner,
(b) a relative of the individual,
(c) a relative of the individual's spouse or civil partner, or
(d) the spouse, or civil partner, of a person within paragraph (b) or (c).
(3) Two persons are connected with each other if one of them is a trustee of a settlement and the other is—
(a) a person who in relation to that settlement is a settlor, or
(b) a person who is connected with a person within paragraph (a).
(4) In this section—
"relative" means brother, sister, ancestor or lineal descendant, and
"settlement" and "settlor" have the same meaning as in section 620 of ITTOIA 2005.

17.8.4 *Indirect participation: One of several major participants*

Section 160 TIOPA provides:

(1) Subsection (2) applies for the purposes of—
(a) sections 148(2) and (3), 154(5), 175(2) and 204(4),
(b) in Part 2, section 132(7), and
(c) in Part 5, section 219(2).
(2) A person is indirectly participating in the management, control or capital of another person at a particular time if the first person is, at that time, one of a number of major participants in that other person's enterprise.

17.8.5 "*Major participant*"

(3) For the purposes of this section, a person ("A") is a major participant in another person's enterprise at a particular time if at that time—
(a) that other person ("the subordinate") is a body corporate or firm, and

(b) the 40% test is met in the case of each of two persons—
(i) who, taken together, control the subordinate, and
(ii) of whom one is A.

(4) For the purposes of this section, the 40% test is met in the case of each of two persons wherever each of them has interests, rights and powers representing at least 40% of the holdings, rights and powers in respect of which the pair of them fall to be taken as controlling the subordinate.

(5) For the purposes of this section—

(a) the question whether a person is controlled by any two or more persons taken together, and

(b) any question whether the 40% test is met in the case of a person who is one of two persons,

is to be determined after attributing to each of the persons all the rights and powers which would be attributed by section 159(2) to a person were it being decided under section 159(2) whether that person is indirectly participating in the management, control or capital of another person.

(6) References in this section—

(a) to rights and powers of a person, or

(b) to rights and powers which a person is or will become entitled to acquire,

include references to rights or powers which are exercisable by that person, or (when acquired by that person) will be exercisable, only jointly with one or more other persons.

17.8.6 *Indirect participation: Sections 148 and 175: financing cases*

Section 161 TIOPA provides:

(1) Subsection (2) applies for the purposes of sections 148(2)(a) and (3)(a) and 175(2)(a).

(2) A person ("P") is indirectly participating in the management, control or capital of another ("A") at the time of the making or imposition of the actual provision if—

(a) the actual provision relates, to any extent, to financing arrangements for A,

(b) A is a body corporate or firm,

(c) P and other persons acted together in relation to the financing arrangements, and

(d) P would be taken to have control of A if, at any relevant time, there were attributed to P the rights and powers of each of the other persons mentioned in paragraph (c).

(3) It is immaterial for the purposes of subsection (2)(c) whether P and the other persons acting together in relation to the financing arrangements did so at the time of the making or imposition of the actual provision or at some earlier time.

(4) In subsection (2)(d) "relevant time" means—

(a) a time when P and the other persons were acting together in relation to the financing arrangements, or

(b) a time in the period of six months beginning with the day on which they ceased so to act.

(5) In determining for the purposes of subsection (2)(d) whether P would be taken to have control of another person ("A"), the rights and powers of any person (and not just P) are to be taken to include those that would be attributed to that person by section 159(2) were it being decided under section 159(2) whether that person is indirectly participating in the management, control or capital of A.

(6) In this section "financing arrangements" means arrangements made for providing or guaranteeing, or otherwise in connection with, any debt, capital or other form of finance.

17.8.7 *Indirect participation: Sections 148 and 175: further financing cases*

Section 162 TIOPA provides:

(1) Subsection (2) applies for the purposes of sections 148(2)(b) and (3)(b) and 175(2)(b).

(2) A person ("Q") is indirectly participating in the management, control or capital of each of the affected persons at the time of the making or imposition of the actual provision if—

(a) the actual provision relates, to any extent, to financing arrangements for one of the affected persons ("B"),

(b) B is a body corporate or firm,

(c) Q and other persons acted together in relation to the financing arrangements, and

(d) Q would be taken to have control of both B and the other affected person if, at any relevant time, there were attributed to Q the rights and powers of each of the other persons mentioned in paragraph (c).

(3) It is immaterial for the purposes of subsection (2)(c) whether Q and the other persons acting together in relation to the financing arrangements did so at the time of the making or imposition of the actual provision or at some earlier time.

(4) In subsection (2)(d) "relevant time" means—

(a) a time when Q and the other persons were acting together in

relation to the financing arrangements, or

(b) a time in the period of six months beginning with the day on which they ceased so to act.

(5) In determining for the purposes of subsection (2)(d) whether Q would be taken to have control of another person ("A"), the rights and powers of any person (and not just Q) are to be taken to include those that would be attributed to that person by section 159(2) were it being decided under section 159(2) whether that person is indirectly participating in the management, control or capital of A.

(6) In this section "financing arrangements" means arrangements made for providing or guaranteeing, or otherwise in connection with, any debt, capital or other form of finance.

17.9 The general rule

If the "basic pre-condition" is met, we move on. Section 147 TIOPA provides:

(2) Subsection (3) applies if—

(a) the basic pre-condition is met, and

(b) the actual provision confers a potential advantage in relation to UK taxation on one of the affected persons.

If that is the case we come to the general rule:

(3) The profits and losses of the potentially advantaged person are to be calculated for tax purposes as if the arm's length provision had been made or imposed instead of the actual provision.

Similarly if there are several affected persons:

(4) Subsection (5) applies if—

(a) the basic pre-condition is met, and

(b) the actual provision confers a potential advantage in relation to UK taxation (whether or not the same advantage) on each of the affected persons.

(5) The profits and losses of each of the affected persons are to be calculated for tax purposes as if the arm's length provision had been made or imposed instead of the actual provision.

The International Manual provides:

413020. Introduction [August 2012]

...Paragraph 1.65 of the OECD Transfer Pricing Guidelines is particularly helpful in finding the appropriate approach towards the arm's length provision in thin capitalisation cases. This says that the

basic transfer pricing approach considers economic substance versus form in thin capitalisation cases:

> "[In cases] where the economic substance of a transaction differs from its form... the tax administration may disregard the parties' characterisation of the transaction and re-characterise it in accordance with its substance. An example of this circumstance would be an investment in an associated enterprise in the form of interest-bearing debt when, at arm's length, having regard to the economic circumstances of the borrowing company, the investment would not be expected to be structured in this way. In this case it might be appropriate for a tax administration to characterise the investment in accordance with its economic substance with the result that the loan may be treated as a subscription of capital."[12]

This means that where a borrower obtains an actual loan of £100m from a non-arm's length source, but would only be able to borrow £60m at arm's length, the tax deduction for the interest costs should be restricted to those accruing on £60m of the £100m actually borrowed. The balance would have had to be provided in some other form, most likely as equity. This is an explanation, not a literal recharacterisation in the way that excessive interest was once reclassified as a distribution for tax purposes (see INTM413260). Debt which is found to be excessive may be treated as equity for the purposes of a thin cap analysis, but the interest on the £40m excess remains interest for tax purposes; it is simply disallowed in the computation.

There will be variations in the way debt is treated as equity. There may be negotiations which result in an amount of debt being recognised as serving an equity function, as if that debt had actually been permanently converted into equity, but there will be other instances, for example the application of a debt: equity ratio in an advance agreement, where equity will in effect vary from year to year.

This sort of "recharacterisation" should be uncontroversial, assuming the level of disallowance is agreed. It is a case of finding an explanation, should one be needed, for the presence and treatment of funds that have been deemed "excessive" as debt in thin cap terms. However, if the argument goes further, for example towards saying that the loan transaction would not have taken place at all and something different would have happened at arm's length, it is recommended that the matter be discussed with Business International before the case is developed,

It is important to remember that thin capitalisation considerations are not

12 OECD, *Transfer Pricing Guidelines for Multinational Enterprises and tax Administration* (July 2010).

limited to determining simply the amount which would have been borrowed at arm's length, but also extend to the other terms attached to the actual provision, such as the interest rate, duration and repayment terms. Any of these is capable of creating or extending a tax advantage for the UK borrower.

17.9.1 *Separate entity basis*

The International Manual provides:

> **413070. Separate entity basis for determining borrowing capacity** [September 2012]
> The separate entity principle is part of the basic precondition in TIOPA10/S147(1)(d). This defines the arm's length provision as that "which would have been made as between independent enterprises". The arm's length borrowing capacity of the borrower is therefore the debt which it could and would, as a stand-alone entity, have taken on from an independent lender. To establish this, it is necessary to consider the borrower separately from other members of the same group of companies This is the "separate entity" or stand-alone basis for determining borrowing capacity.
> This approach is derived from OECD Transfer Pricing Guidelines, as expressed in paragraph 1.6 of the Guidelines:
>
> > By seeking to adjust profits by reference to the conditions which would have obtained between independent enterprises in comparable transactions and comparable circumstances, the arm's length principle follows the approach of treating the members of an MNE group as operating as separate entities rather than as inseparable parts of a single unified business. Because the separate entity approach treats the members of an MNE group as if they were independent entities, attention is focussed on the nature of the dealings between those members.
>
> The main impact of the "separate entity" basis for determining borrowing capacity is that no account is taken of any guarantees, explicit or implicit, from connected companies (INTM413130). However, it is recognised that, without offending the "separate entity" principle, negotiations with a third party lender would include an assessment of the financial strength of the borrower. This would take into account the income, assets and liabilities of the company, but also of its subsidiaries. In broad terms, this will be based on the strength (or otherwise) of the borrower's consolidated balance sheet and profit and loss account, subject to some analysis of what underlies the figures on the face of the accounts. This grouping is known as the "borrowing unit".
> HMRC follows a practical approach and, if consolidated accounts are

not drawn up as a matter of course, will request a consolidated presentation of the relevant figures. The borrower is not obliged to produce audited consolidated accounts purely for HMRC, so properly drawn up schedules reflecting the consolidated position will be acceptable. This may not be a straightforward task if the exercise embraces companies resident in a number of countries and using a variety of accounting conventions. In such cases it may be helpful to discuss how HMRC may be satisfied without creating major expense and difficulty.

There may be companies that need to be excluded from the consolidation and dealt with according to their own characteristics e.g. finance companies which are likely to have higher proportions of debt to equity than ordinary trading companies. Some subsidiaries may need to be excluded altogether e.g. companies with a dividend block, which a lender might not recognise as assets against which they would be willing to lend. This whole question must be viewed pragmatically.

Further practical guidance on the separate entity measure of borrowing capacity is at INTM542050. The next page gives some background on the pre-2004 treatment; this shows the contrast between the previous statutory approach to the borrowing unit with the practical, analytical approach which has been adopted to deal with the separate entity basis. UK companies under common ownership with the borrowing unit may be able to make a compensating adjustment claim if they have spare borrowing capacity...

17.10 "Differ from the provision that would have been made"

Section 151(2) TIOPA provides:

> For the purposes of this Part, the cases in which provision made or imposed as between any two persons is to be taken to differ from the provision that would have been made as between independent enterprises include the case in which
>
> [a] provision is made or imposed as between two persons but
>
> [b] no provision would have been made as between independent enterprises;
>
> and references in this Part to the arm's length provision are to be read accordingly.

The International Manual provides:

> **413030. The "would" and "could" arguments** [September 2012]
>
> The test of thin capitalisation is to test the actual borrowing position against the arm's length borrowing position.
>
> The arm's length principle recognises that connected parties may enter

into transactions with each other on terms which differ from those which would be found in the open market between entirely unconnected persons. Where profits arise and the extent to which those profits are taxed may also differ from the arm's length position.

The application of the arm's length principle requires a judgement on the merit of each individual case to establish what would have happened at arm's length; the terms on which the company in question could have borrowed and would have borrowed (if anything),

- as a separate entity
- from a third party lender unconnected with the borrower, and
- without guarantees or other forms of comfort from any party connected with the borrower.

There are two main ways of looking at the borrowing: what the lender would do and what the borrower would do if the circumstances were as outlined above, and these are expressed as:

- the "could" argument - what a lender would have lent and therefore what a borrower could have borrowed - and
- the "would" argument - what a borrower acting in the best interests of their own business would have borrowed.

The "could" argument

This is generally the less subjective issue. The could argument focuses on what a lender would be prepared to lend to the company and on what terms, taking into account the borrower's capacity to borrow, the risk of default, assets (as security) and liabilities (additional drains on the borrower's resources), and its ability to service the debt: in short, how much and on what terms a lender would lend.

Risk elements will include amount, duration of lending, purpose, security, currency and the economic climate at a sector, national and international level.

The "would" argument

This issue is more subjective, since it can involve the whole basis on which the business is run. The "would" argument considers the borrower's perspective: whether the borrower would have entered into the actual transaction in the absence of a special relationship (INTM412020) with the lender. Therefore, when trying to establish the amount and terms of arm's length debt, the "would" argument relates to how much, and on what terms, the borrower would have borrowed at arm's length bearing in mind the sort of issues mentioned below.

So, the "would" argument requires consideration as to what terms a borrower would have agreed at arm's length, such as

- the amount of debt, and whether that leaves headroom to allow the borrower to absorb cyclical or seasonal variations, an unforeseen event or a fluctuation in interest rates or profits, and ultimately repay

the principal;

- the costs of borrowing, and whether forecasts indicate that the borrower is likely to be able to service the debt fully and still have sufficient cash to operate as a profitable going concern;
- whether the other terms, such as the interest rate or provision for early repayment are ones to which the borrower would have agreed in the absence of a special relationship;
- whether the borrower would have taken out the loan at all.

Consideration of all aspects of the "could" and "would" arguments should highlight situations such as where

- an arm's length interest rate is being applied, but the amount of debt is more than the borrower could have borrowed from an independent lender, or
- an arm's length interest rate is applied to an arm's length amount of debt, but the borrower appears to have no purpose of its own for borrowing the money (and therefore no reason to borrow other than the group relationship).

Debt is not necessarily paid down to nil. A certain level of debt is acceptable, even desirable in most companies, and while higher levels of acquisition debt tend to be reduced in the years following the transaction, there is likely to be a level of debt appropriate to the needs of the business, year on year, appropriate to achieving the right balance between debt, equity and profitability...

17.11 Securities (loans)

Section 152 TIOPA provides:

(1) This section applies where—
  (a) both of the affected persons are companies, and
  (b) the actual provision is provision in relation to a security issued by one of those companies ("the issuing company").

(2) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring account to be taken of all factors, including—
  (a) the question whether the loan would have been made at all in the absence of the special relationship,
  (b) the amount which the loan would have been in the absence of the special relationship, and
  (c) the rate of interest and other terms which would have been agreed in the absence of the special relationship.

The International Manual provides:

413040. Summary of sections specific to thin capitalisation [August

2012]

There are specific sections within Part 4 TIOPA 2010 that apply only to loans between two companies:

- Section 152 TIOPA 2010 requires that in the case of lending between companies certain factors to be considered when comparing the arm's length provision with the actual provisions in Section 147(1)(d) TIOPA 2010. See INTM413100
- Section 181 TIOPA 2010 to Section 184 TIOPA 2010 sets out the conditions required for a lender to make a valid compensating adjustment claim where a disallowance has been made in the borrower's computations. See INTM413140
- Section 153 TIOPA 2010 deals with the factors that are taken into account when a loan is supported by a guarantee, and the borrower and the guarantor have a special relationship. See INTM413160
- Section 191 TIOPA 2010 to Section 194 TIOPA 2010 sets out the conditions required for a guarantor to make a valid compensating adjustment claim. See INTM413150

Non-corporates

Part 4 TIOPA 2010 applies to loans made to companies by non-corporates where the participation condition in Section 148 TIOPA 2010 is met. However, the explicit instructions regarding factors to be considered as part of evaluating the arm's length provision in Section 152 TIOPA 2010 and Section 153 TIOPA 2010 do not apply directly as legislation to loans by non-corporates. Even so, the factors that are set out in Section 152 TIOPA 2010 and Section 153 TIOPA 2010 are generally those which are taken into account by lenders and borrowers acting at arm's length, so in practice the nature of the lender, corporate or non-corporate will have little if any impact on how the arm's length provision is determined.

Claims for compensating adjustments by non-corporates can be made under the conditions in Section 174 TIOPA 2010 to Section 178 TIOPA 2010 (Para 6 of Sch 28AA).

17.11.1 *Disregard: Non-business loans*

Section 152(3) TIOPA introduces two disregards:

Subsection (2) has effect subject to subsections (4) and (5).

Section 152(4) TIOPA provides:

(4) If—

(a) a company ("L") makes a loan to another company with which it has a special relationship, and

(b) it is not part of L's business to make loans generally,

the fact that it is not part of L's business to make loans generally is to be disregarded in applying subsection (2).

Why is this needed? The International Manual explains:

> **413100. Special rules for lending between companies** [September 2012]
> Section 152(4) TIOPA 2010 ensures that the fact that the lender is not generally in the business of making loans cannot be taken into account when evaluating the terms.

17.11.2 *Disregard: Guarantee*

Section 152(5) TIOPA provides:

> (5) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring that, in the determination of any of the matters mentioned in subsection (6), no account is to be taken of (or of any inference capable of being drawn from) any guarantee provided by a company with which the issuing company has a participatory relationship.
> (6) The matters are—
> (a) the appropriate level or extent of the issuing company's overall indebtedness,
> (b) whether it might be expected that the issuing company and a particular person would have become parties to a transaction involving—
> (i) the issue of a security by the issuing company, or
> (ii) the making of a loan, or a loan of a particular amount, to the issuing company, and
> (c) the rate of interest and other terms that might be expected to be applicable in any particular case to such a transaction.

Section 153 TIOPA repeats the same material:

> (1) This section applies where the actual provision is made or imposed by means of a series of transactions which include—
> (a) the issuing of a security by a company which is one of the affected persons ("the issuing company"), and
> (b) the provision of a guarantee by a company which is the other affected person.
> (2) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring account to be taken of all factors, including—
> (a) the question whether the guarantee would have been provided at all in the absence of the special relationship,

(b) the amount that would have been guaranteed in the absence of the special relationship, and

(c) the consideration for the guarantee and other terms which would have been agreed in the absence of the special relationship.

(3) Subsection (2) has effect subject to subsections (4) and (5).

(4) If—

(a) a company ("G") provides a guarantee in respect of another company with which it has a special relationship, and

(b) it is not part of G's business to provide guarantees generally,

the fact that it is not part of G's business to provide guarantees generally is to be disregarded in applying subsection (2).

(5) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring that, in the determination of any of the matters mentioned in subsection (6), no account is to be taken of (or of any inference capable of being drawn from) any guarantee provided by a company with which the issuing company has a participatory relationship.

(6) The matters are—

(a) the appropriate level or extent of the issuing company's overall indebtedness,

(b) whether it might be expected that the issuing company and a particular person would have become parties to a transaction involving—

(i) the issue of a security by the issuing company, or

(ii) the making of a loan, or a loan of a particular amount, to the issuing company, and

(c) the rate of interest and other terms that might be expected to be applicable in any particular case to such a transaction.

The International Manual provides:

413110. Guarantees - what they do and what they are [August 2012]
As explained in INTM413060, a provision may arise from a series of transactions rather than just a single transaction between two connected companies. A loan from a third party which is guaranteed by a connected person constitutes a provision consisting of a series of transactions. The same would apply to a loan from a connected party which is guaranteed by another connected party. The most common instance will be a single loan supported by a single guarantee but the provision could consist of any number and combinations of loans and cross guarantees.

The effect of a guarantee

Guarantees most commonly support third party borrowing, but can be used to support loans between group companies: for example, a European group treasury company might provide finance to a fellow

group company resident in the UK, but under guarantee from the UK borrower's parent company.

With the additional comfort offered to the lender by a guarantor, the lender might provide a loan on more advantageous terms than the borrower could have obtained otherwise, because the guarantee will reduce the risk to the lender. In the event of a failing borrower and no guarantee, a third party lender's prospects of recovering its outlay would be at risk. However, with a guarantee in place, the lender should have greater and more immediate success in recovering debt and interest, simply by exercising its rights under the guarantee and seeking payment from the guarantors, than it would by waiting for a distribution of assets in a liquidation, or having to write off all or part of the loan. The guarantor would of course have to demonstrate that it could make good its pledge, and probably provide security in relation to its commitment.

The effect of a guarantee on loan terms is varied. Guarantees may help secure:

- A larger loan
- A lower rate of interest
- An increase in duration
- Less demanding covenants on the borrower

Any of these may have implications for the transfer pricing of the transaction e.g. a larger loan may be obtainable, but it may be more than the borrower would be able or willing to take on at arm's length. Also, the guarantee may secure preferable terms as compared to what would be otherwise on offer. A lower interest rate on a larger amount of debt might be regarded as a more attractive and not a more expensive deal. See INTM413120.

The presence of a guarantee does not necessarily signify a change in lending terms, and in any case larger, longer, etc, do not mean "better" for the borrower; a larger loan may be more than the borrower would or could borrow without this help, and therefore more than the borrower could or would borrow at arm's length. Lenders may seek guarantees as part of a "belt and braces" approach: not crucial factor, but better to have than not have. A typical example being the cross guarantees required by lenders when they lend to a group of companies.

413120. Evaluating guarantees: starting with the arm's length cost of debt [August 2012]

Section 153 TIOPA 2010 (Paragraph 1B Schedule 28AA) is about considering the effect of, and consequently the issue of allowing the costs of pricing guarantees between connected companies. It adopts a similar approach to the way transfer pricing of securities between companies operates - see Section 152 TIOPA 2010 (INTM413100). However to understand how the section works it is better to start by

looking at the factors that have to be disregarded before looking at the factors that are specifically to be taken into account.

Section 153(4) TIOPA 2010 has the same effect for guarantees as Section 152(4) TIOPA 2010 has for loans. It ensures that where the guarantor is not generally in the business of making guarantees, that circumstance cannot be taken into account when evaluating what the guarantee fee would be at arm's length.

Section 153(5) and (6) TIOPA 2010 ensure that guarantees from connected companies are ignored, so that the borrower's borrowing capacity is evaluated on a separate entity basis (INTM413070). These subsections repeat what was said at Section 152(5) and (6) TIOPA 2010, except with different intent. Section 152 is about how the arm's length provision is calculated for the borrower, for the purposes of testing whether a security is on arm's length terms. Section 153 repeats the same test, but as a precursor to working out whether a guarantee has an arm's length value to the borrower. The exercise should isolate and exclude the effect of the guarantee to identify what would have been achieved without it.

Looking at the loan whilst ignoring the effect of any guarantees establishes the amount the borrower would have been able to borrow in its own right, and the terms on which it would have done so. The legislation specifically states that guarantees should be disregarded in considering the following specific issues:

- the level or extent of overall debt
- whether a loan would have been entered into
- the rate of interest or other terms

Once this is established, the legislation considers the transfer pricing of the guarantee fee itself - see INTM413110.

413130. Establishing the arm's length value of a guarantee [August 2012]

This is about guarantee fees and their worth to the borrower: where the borrower is actually charged for the provision of a guarantee. This is therefore about:

- what value the guarantee brings to the borrower, compared to what it could and would obtain without it
- what is the appropriate level for the guarantee fee which the borrower pays

Section 153 (Paragraph 1B) first establishes the arm's length price of the loan without guarantees. This does not necessarily mean that guarantees will be ignored in pricing the debt. In considering what guarantee, if any, would have been provided at arm's length. Section 153(2) TIOPA 2010 (Paragraph 1B(2)) asks that "all factors" be taken into account in working this out, and particularly asks what would have happened in the

absence of the special relationship between the borrower and the provider of the guarantee (i.e. at arm's length):

- would the guarantee have been provided at all
- what amount would have been guaranteed
- what consideration (fee, etc) and other terms would have been agreed

This is simply a matter of applying a transfer pricing test to guarantee costs.

At arm's length, a company will not take on the extra cost of a guarantee unless that guarantee makes the overall cost of finance cheaper than it would be on a stand-alone basis. If the cost of the guarantee itself is greater than the saving it brings, it will be disallowed to the extent that it causes the total finance costs relating to the guaranteed debt to exceed the stand-alone arm's length price.

The scenarios below set out how Section 153 TIOPA 2010 operates for the borrowing company. The "cost of loan" in the headings below refers to actual costs of borrowing excluding guarantee fees and not adjusted by transfer pricing provisions. These scenarios do not demonstrate the arm's length price of a guarantee, but will show whether the guarantee has brought a benefit when the borrowing is considered on an arm's length basis.

1.Guarantee fee charged and cost of loan exceeds arm's length

The borrower is already paying more than it would if borrowing on a separate entity basis. Considered at arm's length, the value of the guarantee is nil and it simply represents an additional cost. The terms of the loan are adjusted for transfer pricing purposes to the arm's length amount, the non-arm's length element of the loan costs is disallowed, and the guarantee fee is disallowed.

There is no apparent benefit from this guarantee, so any claim that there is value meriting a guarantee fee should be subject to a thorough analysis to identify whether the guarantee provides any other, less obvious commercial benefit that would justify the payment of a fee. A guarantee might enable a borrower to spread its finance costs over a longer period, which might be advantageous in certain circumstances.

2.Guarantee fee charged and cost of loan is equal to the arm's length

The cost of the loan is arm's length so no adjustment is required with respect to the loan itself, but as in 1 above, it would be difficult to justify a guarantee fee. It appears to provide no benefit by way of cheaper financing and is likely to be disallowed unless some less obvious benefit can be demonstrated.

3.Guarantee fee charged and cost of loan is less than arm's length

This situation may arise where the guarantee is taken into account in setting the terms of the loan. For example, the presence of the guarantee may have the effect of improving the credit rating of the borrower and

achieve a lower interest rate. As the guarantee has reduced the cost of the loan to below the stand-alone cost, there is a clear benefit to the borrower in entering into the guarantee. It is therefore likely that at arm's length a fee would be paid, as there is a genuine benefit to the borrower. However, the borrower would only agree to pay a fee at arm's length if there was an overall saving, and the level of the fee should reflect this.

4.No guarantee fee charged and cost of loan is less than arm's length

Where there is a guarantee in place but no fees have been charged, the guarantee may still provide the borrower with beneficial terms, such as a reduced interest rate. The arm's length cost of the loan will exceed the actual cost of the loan, because the guarantee reduces finance costs without itself costing anything. It might be argued that, at arm's length, a fee would be charged for such an effective guarantee, but one cannot be imputed in the computations of the borrower, because transfer pricing legislation operates as a one way street. This scenario creates no tax advantage, so the basic transfer pricing conditions are absent. Of course if the guarantor negotiated a fee, that would be considered on its merits.

Evaluating the arm's length value of a guarantee fee should be more than a simple mathematical comparison of actual and arm's length costs. It is worth emphasising that all relevant factors should be considered:

- the obligations of the guarantor
- its ability to fulfil them
- an analysis of the improvement to the borrower's credit worthiness
- consideration as to whether the guarantee brings the borrower something beyond the implicit parental or group support provided by passive association with fellow group members.

It may be that the benefits provided by a guarantee, particularly informal understandings, are such that a guarantee fee would not normally be justified. Furthermore, where the guarantor is unable to honour its commitments under the guarantee because of the state of its own finances, the guarantee will in practice have no value.

17.12 Definitions

17.12.1 *Special relationship*

Section 154 TIOPA provides some definitions introduced by s.154(1)

> Subsections (3) to (7) apply for the purposes of sections 152 and 153....

Section 154(3) TIOPA provides:

> "Special relationship" means any relationship by virtue of which the participation condition is met (see section 148) in the case of the affected persons concerned.

The term "special relationship" is used in the OECD model treaty without definition (though discussed in the commentary) but the definition here is narrower.

17.12.2 *Guarantee*

Section 154(4) TIOPA provides:

> Any reference to a guarantee includes—
> (a) a reference to a surety, and
> (b) a reference to any other relationship, arrangements, connection or understanding (whether formal or informal) such that the person making the loan to the issuing company has a reasonable expectation that in the event of a default by the issuing company the person will be paid by, or out of the assets of, one or more companies.

The International Manual has an interesting passage on implicit guarantees which is not set out here as it is not relevant to the themes of this book.

17.12.3 *Participatory relationship*

Section 154(5) TIOPA provides:

> One company ("A") has a "participatory relationship" with another ("B") if—
> (a) one of A and B is directly or indirectly participating in the management, control or capital of the other, or
> (b) the same person or persons is or are directly or indirectly participating in the management, control or capital of each of A and B.

17.12.4 *Security*

Section 154 TIOPA provides:

> (6) "Security" includes securities not creating or evidencing a charge on assets.
> (7) Any—
> (a) interest payable by a company on money advanced without the issue of a security for the advance, or
> (b) other consideration given by a company for the use of money so advanced,
> is to be treated as if payable or given in respect of a security issued for the advance by the company, and references to a security are to be read accordingly.

Subsection (6) is standard form. However subsection (7) means that all loans are "securities." It would have been clearer to use the word "loan" rather than to (mis)use the word "securities", but there it is.

17.13 `Potential advantage in relation to UK taxation

Section 155 TIOPA provides:

> (1) Subsection (2) applies for the purposes of this Part.
> (2) The actual provision confers a potential advantage on a person in relation to UK taxation wherever, disregarding this Part, the effect of making or imposing the actual provision, instead of the arm's length provision, would be one or both of Effects A and B.
> (3) Effect A is that a smaller amount (which may be nil) would be taken for tax purposes to be the amount of the person's profits for any chargeable period.
> (4) Effect B is that a larger amount (or, if there would not otherwise have been losses, any amount of more than nil) would be taken for tax purposes to be the amount for any chargeable period of any losses of the person.

17.13.1 *Disregarded income*

Section 155(5) provides a disregard for disregarded income:

> In determining for the purposes of subsection (3) or (4) the amount that would be taken for tax purposes to be the amount of the profits or losses for a year of assessment in the case of a non-UK resident, there is to be left out of account any income of that person which is—
> (a) disregarded income within the meaning given by section 813 of ITA 2007 (limits on liability to income tax of non-UK residents), or
> (b) disregarded company income within the meaning given by section 816 of that Act.

Subsection (6) provides two more disregards:

> For the purposes of subsections (2) to (4)—
> (a) Part 7 (tax treatment of financing costs and income), and
> (b) paragraph E of the list in section 1000(1) of CTA 2010 (excessive interest etc treated as a distribution),
> are to be disregarded.

17.14 Exemption for small companies

Section 166 TIOPA provides what appears to be a general exemption,

which is then restricted by significant exceptions.

> (1) Section 147(3) and (5) do not apply in calculating for any chargeable period the profits and losses of a potentially advantaged person if that person is a small or medium-sized enterprise for that chargeable period (see section 172).

Section 166(2) provides the signposts in accordance with the dictates of plain English drafting:

> Exceptions to subsection (1) are provided—
> (a) in the case of a small enterprise, by section 167, and
> (b) in the case of a medium-sized enterprise, by sections 167 and 168.

17.15 Election into transfer pricing regime

I mention the first exception only for completeness. Section 167(1) TIOPA provides:

> (1) Subsections (2) and (3) set out exceptions to section 166(1).
> (2) The first exception is if the small or medium-sized enterprise elects for section 166(1) not to apply in relation to the chargeable period. Any such election is irrevocable.

Why would anyone would want to elect into the regime?

17.16 Resident of non-qualifying territory

The next exception is more important. Section 167 TIOPA provides:

> (3) The second exception is if—
> (a) the other affected person, or
> (b) a party to a relevant transaction,
> is, at the time when the actual provision is or was made or imposed, a resident of a non-qualifying territory (whether or not that person is also a resident of a qualifying territory).

Section 167(4) TIOPA provides some general definitions:

> For the purposes of subsection (3)—
> (a) a "party to a relevant transaction" is a person who, if the actual provision is or was imposed by means of a series of transactions, is or was a party to one or more of those transactions, and
> (b) "qualifying territory" and "non-qualifying territory" are defined in section 173.

Resident is based on the OECD model definition. Section 167(5) TIOPA provides:

> In subsection (3) "resident", in relation to a territory—
> (a) means a person who, under the law of that territory, is liable to tax there by reason of the person's domicile, residence or place of management, but
> (b) does not include a person who is liable to tax in that territory in respect only of income from sources in that territory or capital situated there.

17.17 Qualifying Territory

Section 173 TIOPA provides:

> (1) In section 167(3)—
> "non-qualifying territory" means any territory which is not a qualifying territory, and
> "qualifying territory" means—
> (a) the UK, or
> (b) any territory in relation to which condition A or condition B is met.

I refer to **"qualifying territory conditions A and B"** to avoid confusion with the myriad conditions in TIOPA.

17.17.1 *Qualifying territory conditions A and B*

Section 173 TIOPA provides:

> (2) Condition A is that—
> (a) double taxation arrangements have been made in relation to the territory,
> (b) the arrangements include a non-discrimination provision, and
> (c) the territory is not designated as a non-qualifying territory for the purposes of this subsection in regulations made by the Treasury.
> (3) Condition B is that—
> (a) double taxation arrangements have been made in relation to the territory, and
> (b) the territory is designated as a qualifying territory for the purposes of this subsection in regulations made by the Treasury.

Non-discrimination provision has a commonsense definition:

> (4) For the purposes of subsection (2)(b) a "non-discrimination

provision", in relation to any double taxation arrangements, is a provision to the effect that nationals of a state which is a party to those arrangements (a "contracting state") are not to be subject in any other contracting state to—

(a) any taxation, or

(b) any requirement connected with taxation,

which is other or more burdensome than the taxation and connected requirements to which nationals of that other state in the same circumstances (in particular with respect to residence) are or may be subjected.

(5) In subsection (4) "national", in relation to a state, includes—

(a) any individual possessing the nationality or citizenship of the state, and

(b) any legal person, partnership or association deriving its status as such from the law in force in that state.

(6) In this section "double taxation arrangements" means arrangements that have effect under section 2(1) (double taxation relief by agreement with territories outside the UK).

CHAPTER EIGHTEEN

INTEREST INCOME

18.1 Interest: Introduction

This chapter considers:
(1) The taxation of interest income
(2) Withholding tax on payment of interest to non-residents
(3) Withholding tax on payment of interest by deposit-takers (banks)
(4) The EU Interest and Savings Directive

Each topic requires a book to itself, except the EU directive which requires several volumes. I focus on matters closest to the themes of this book. I do not consider:
(1) Corporation taxation of interest (the loan relationship rules)
(2) The EU interest and royalties directive 2003/49/EC of 3rd June 2003 which applies to interest and royalty payments made between associated companies of different member states.

Each of those would also require long books to themselves.

18.1.1 *Cross references*

The following topics are considered elsewhere:
17.1 (Deduction for payment of interest
14.2 (Location of source of income: Territorial scope of IT)
14.9 (Split years: savings & investment & miscellaneous income)
19.1 (Exempt interest: Introduction).

18.2 Definition of interest

The SAI Manual provides:

> **SAIM2030 - Interest: meaning of interest** [July 2007]
> **The legal concept of interest**
> Interest is not defined in the Taxes Acts. It is a concept of common and contract law. Halsbury's Laws of England defines it as follows.
> "Interest is the return or compensation for the use or retention by

one person of a sum of money belonging to or owed to another..."[1]

While there can be no such thing as interest without the requisite principal (a sum of money advanced or a debt incurred) there is no requirement that such principal has to carry interest. In common law the general rule is that interest is not payable on a debt or a loan; except where

- there is an express agreement to pay interest,
- an agreement to pay interest can be implied from a course of dealing between the parties, or from the nature of the transaction, or custom or usage of the trade or the profession concerned, or
- in certain cases by way of damages for breach of a contract (other than a contract merely to pay money) where the contract, if performed, would to the knowledge of the parties have entitled the parties to receive interest.

SAIM2040 - Interest: when does interest run? [July 2007]

Interest cannot be back-dated

Since interest on a loan or debt can normally only run where there is an agreement to pay interest (SAIM2030), it follows that interest cannot be back-dated.

Example (Deborah)

D is a controlling shareholder in Deb's Fashions Ltd. When the company started in 2001, she made a loan of £10,000 to the company. There was no agreement in 2001 that the loan should pay interest. In preparing the company accounts for year ended 31 December 2005, the company's accountant advises that the company can now afford to pay interest, and accordingly it is agreed on 4 February 2006 that the loan will carry interest at 3% per annum.

The agreement will have effect only from 4 February 2006. The company may make a payment to D to compensate her for the period when she received no interest on the £10,000. Such a payment is not interest, even if it calculated on a time basis, or if it is described in the company accounts as 'interest'. The tax treatment of such a payment will depend on the exact nature of the arrangements between D and the company.

SAIM2050 - Interest: voluntary payments [July 2007]

---

1 [Author's footnote] See *Halsbury's Laws of England* (5th ed., 2008),Vol 50, para 1303 (Interest in general). Halsbury's footnote at this point refers to: *Re Farm Security Act 1944* [1947] SCR 394 at 411; *Dunn Trust Ltd v Feetham* [1936] 1 KB 22; *Bennett v Ogston* 15 TC 374; *Bond v Barrow Haematite Steel Co* [1902] 1 Ch 353; *Westminster Bank v Riches* (28 TC 159); and adds: Money paid in lieu of interest is not itself interest: *Tomkins v Tomkins* (1978) Times, 24 May.

Voluntary payments are not interest

Since interest can only accrue by virtue of some right, a voluntary or gratuitous payment cannot be interest, even if it is expressed as in lieu of or 'equivalent to half the interest', as in the case of *Seaham Harbour Company v. Crook* (16 TC 333). J Rowlatt's comment that

> "interest or an annual sum which is paid really benevolently each time is merely an allowance, and not taxable at all"

is a reflection of that common-law principle.

Truly voluntary payments are likely to be rare. For instance where compensation is paid, labels such as 'ex gratia' may only mean that the payer settled out of court, or 'without admitting liability'. Such a payment is not voluntary or gratuitous if made in consideration of the claimant giving up the right to take proceedings for the damage suffered. See SAIM2330 for more on compensation or damages generally.

SAIM2060 - Interest: case law [May 2012]

Case law on the meaning of interest

The definition of interest has been the subject of much judicial interpretation over the years. In *Westminster Bank v. Riches* (28 TC 159), Lord Wright observed

> "...the essence of interest is that it is a payment which becomes due because the creditor has not had his money at the due date. It may be regarded either as representing the profit he might have made if he had had the use of the money, or, conversely the loss he suffered because he had not had that use. The general idea is that he is entitled to compensation for the deprivation."

The leading case on the meaning of 'interest of money' is now *Re Euro Hotel (Belgravia)* (51TC293). In that case, Megarry J considered that in general the case-law showed there were two requirements which had to be satisfied for a payment to amount to interest

- there must be a sum of money by reference to which the payment which is said to be interest is to be ascertained - a payment cannot be 'interest of money' unless there is the requisite 'money' for the payment to be said to be 'interest of';
- those sums of money must be due to the person entitled to the alleged interest.

He did not suggest that the two requirements are exhaustive or inescapable but that in the ordinary case they sufficed.

What is interest is a question of substance

What constitutes interest is a question of legal substance, not terminology. In the Westminster Bank case Lord Wright said its 'essential quality…depends on substance not on the mere name'. Lord

Simonds, with Lord Porter concurring, said that what needed to be considered was 'what is its intrinsic character'.

That substantive test was reaffirmed in *Re Euro Hotel (Belgravia),* in which by Megarry J said

> "It has, quite rightly, not been suggested that the language used by the parties to an instrument in describing payments to be made under it can bind the Inland Revenue, or affect the operation of a statute. The question must always be one of the true nature of the payment."

The contract in that case was one in which it was provided that one party would 'pay to the Bank interest'. It was held that what was paid was not 'interest of money' despite the wording of the contract quoted above, because the Bank in question had not advanced money as a loan, but instead as out and out non-returnable payments for building works. The 'interest' was not 'interest of money'.

'Single indivisible sums'

Another important case on the nature of interest is *Chevron Petroleum (UK) v BP Petroleum Development* (57 TC 137). Payments between the companies included 'an interest factor' and were calculated in accordance with a complex formula. BP made the payments to Chevron after deducting income tax from the interest factors. The point at issue was whether the payments were true interest. Lord Justice Megarry's view was that the 'interest factor' was, in law, 'interest of money' and that because of the substantive nature of the test the Court would, if necessary, dissect lump-sum payments into interest of money and other sums. He said

"If in its nature a sum is 'interest of money', I think it retains that nature even if the parties to a contract provide for it to be wrapped up with some other sum and the whole paid in the form of a single indivisible sum. The wrappings may conceal the nature of the contents but they do not alter them. Were the law otherwise, strong contractual wrappings might become remarkably popular."

The Corporate Finance Manual para 33030 also discusses this issue; omitting the parts which repeat the SAI manual, the other parts of this passage provide:

CFM33030 - Loan relationships: computational rules: what is interest? [October 2009]

...

What is interest: case law

The question of what constitutes interest has been the subject of much case law over the years. Perhaps the best known quotation on what

> interest is comes from Rowlatt J in *Bennett v Ogston* (15 TC 374). He described interest as 'payment by time for the use of money'.
> ... The concept that interest is something that accrues over time is supported by the cases of *Wigmore v Thomas Summerson* (9 TC 577) and *Willingale v International Commercial Bank* (52 TC 242). These cases indicated that true interest accrues from day to day or at periodic intervals.

18.2.1 *Discounts*

Section 381(1) ITTOIA provides:

> All discounts, other than discounts in deeply discounted securities, are treated as interest for the purposes of this Act.

18.3 Part payment: attributable to interest or capital?

If a debtor owes both interest and capital, the question may arise as to whether any particular payment made is interest or capital.

A solvent debtor can[2] direct that any payment is to be treated as a payment of the interest, or a payment of the capital. That is, if the debtor chooses to pay interest, the receipt is interest; if the debtor chooses to repay capital due, the receipt is not interest. (If the creditor does not like that, they can sue for the remaining sums due.)

If the debtor is bankrupt, the same applies if the payment is made with the consent of the creditor and the debtor. That is, if the creditor waives the interest, what is then received will be capital.

There is a complication if the debt is owned by an interest in possession trust. If the debtor is bankrupt, and the trustee-creditor does not expressly agree to attribute the payment to income or to capital, the position[3] is governed by the rule in *Re Atkinson* [1904] 2 Ch 16. The rule is summarised by Gregory Hill:

> ... the rules in *Re Atkinson* and *Re Bird*, ... prescribe apportionments between trust capital and income where the realisation of a fixed interest security, such as a mortgage debt or debenture stock, produces a sum which is less than the total amount owing for principal and arrears of interest.
> ... *Re Atkinson* applies where the deficient security was an authorised investment, [this will be usual the case] and requires the amount

2 Unless the contract otherwise provides.

3 Unless the trust otherwise provides.

> actually realised (A) to be divided between capital and income in the proportion which the amount due for capital (B) and that due for arrears of interest (c) bear to one another, but the income beneficiary's entitlement to the interest actually received is not in any way affected. The relevant formulae, where the investment was authorised, are thus:
> Capital = A × B÷(B + C)
> Income = A × C÷(B + C)[4]

The rule in *re Atkinson* was applied in a case where under a scheme approved by the Court, interest on debentures was cancelled and what was paid was regarded as capital (not interest) for tax purposes.[5] But that was a case where the trustees did not consent to treating the payment in that way (they had no choice in the matter as they held only a small holding of the debenture stock concerned). So the application of the rule was necessary if one was to be fair to the life tenant. But the fairness is not tax-efficient. The life tenant's receipt is not interest but it is subject to income tax under the category of "annual payment".

18.4 Interest: charge to tax

Section 369(1) ITTOIA imposes the charge on interest:

> Income tax is charged on interest.

Section 370 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the interest arising in the tax year.
> (2) Subsection (1) is subject to Part 8 (foreign income: special rules).

Section 370(2) incorporates the remittance basis for foreign source interest.

18.5 Interest: location of source

I refer to the person paying interest as "**the debtor**" and the recipient as "**the creditor**".

Foreign source interest is outside the scope of withholding tax and qualifies for the remittance basis, so the question of source matters to both creditor and debtor.

---

4 Hill, "Successive Interests and Deficient Fixed-Interest Securities" [2012] TQR *http://www.step.org/successive-interests-and-deficient-fixed-interest-securities*.

5 *Re Morris* [1960] 1 WLR 1210.

Statute provides virtually no guidance on the location of a source of interest, so one falls back on principle and case law. There are three rival tests, or approaches, to the source of interest:

(1) **The situs approach**: the source of interest is in principle the situs of the debt as determined by the IHT/international law situs rules[6] (**"the situs rules"**). I say "in principle" as a situs approach may allow for points of detail where the rules for the location of the source differ slightly from the debt situs rules.
(2) **The multi-factorial approach**: the source is identified by weighing up all relevant factors.
(3) **The place of credit test**: the source is the place that credit was provided.

The correct approach is currently disputed. In short:

(1) The situs approach was universally accepted until 1993.
(2) HMRC adopted one multi-factorial approach in 1993, and a different multi-factorial approach in 2007, but there is (in short) no UK case law supporting this.
(3) International case law supports the place of credit test but there is no UK case law supporting this.

18.6 The situs approach

18.6.1 *The consensus until 1993*

The situs approach is readily understandable when one recalls the terms of the legislation in force before the ITTOIA rewrite. Section 18 ICTA 1988 provided (so far as relevant):

> *Case III: tax in respect of... any interest of money...*[7]
> *Case IV: tax in respect of income arising from securities out of the UK... ;*
> *Case V: tax in respect of income arising from possessions out of the UK;*

What was the test to determine whether income was from securities or possessions "outside the UK" and so taxed under case IV or V (now,

---

6 See 18.7 (Rejection of the situs approach).

7 Case III was not expressed to have any territorial limitation at all! That had to be read in: interest arising from securities or possessions "outside the UK" was taxed under case IVor case V and did not fall within case III.

relevant foreign income)? The natural reading of the phrase "out of the UK" was *situate* outside the UK, ie, the situs test.

The pre-rewrite legislation did not refer to interest arising from a *source* inside/outside the UK. The word *source* was used as a paraphrase of the statutory words, and I do so here, but it is important to remember it is only a paraphrase.

From the earliest times, up to about 1993, the situs approach was universally adopted. In argument and in the decisions, the textbooks cited were private international law textbooks on situs; and case law cited was situs case law.

The IR consultative document "Tax Treatment of Interest paid by Companies to Non-residents"[8] confirmed a situs approach to location of a source of interest was applied up to 1979:

> In the case of a simple contract debt it is settled law that the source is where the debtor is resident. Before the ending of exchange control, the Revenue was normally able to accept that interest paid abroad in a foreign currency[9] under a specialty contract (ie a contract under seal governed by foreign law) to a non-resident could have a foreign source, even though the payer was a UK resident company.

The situs approach still survives in the Double Taxation Relief Manual (which has not been properly updated since the publication of RI 55 in 1993):

> **1730. Interest** [February 2006]
> There is sometimes some difficulty in deciding whether interest is treated as having a UK source where the borrowing is made by a UK branch. ...
> The leading case on this subject is a Privy Council decision on a Hong Kong estate duty matter (*Kwok Chi Leung Karl*[10] [1988] STC 728). The Privy Council decided that where a debtor company has two places of residence where a debt may be enforced, the locality of the debt *(and its source for tax purposes* in the absence of statutory provision to the contrary) falls to be determined by reference to the place of residence where under the contract creating the debt the primary obligation is

8 January 1983 accessible *http://www.kessler.co.uk/tfd-archive*.

9 The currency is not relevant for situs; but it was relevant for exchange control, as a UK resident needed Bank of England consent to buy, or issue, foreign currency securities.

10 Author's footnote: *Kwok* is a situs case, see 82.13.1 (Meaning of "residence").

expressed to be performed (that is where the creditor would apply first for his money).

A (slightly) refined version of the situs approach to the source of interest is recorded in Revenue/Treasury correspondence in 1969. According to the Revenue, interest has a foreign source if:

(a) the loan contract is made abroad
(b) the loan contract is governed by foreign law
(c) the interest is payable abroad, and there is no UK paying agent and
(d) the loan is not secured on any specific assets or revenue in the UK.[11]

The same (more or less) is recorded in *Whiteman & Sherry on Income Tax:*

> Consistently with the decision in the *National Bank of Greece* case, the Inland Revenue accepted, prior to the suspension of exchange controls in October 1979, that interest payable by a debtor in the UK fell outside Case III (and within Case IV) provided that the debt was constituted by what came to be known as a foreign security. To be a foreign security, the obligation had to be either a bearer document or executed under seal, and had to be governed by a foreign law, executed and kept outside the UK and to provide for interest, in a currency other than sterling, to be payable and paid outside the UK.
>
> The Inland Revenue apparently took the view that, since exchange controls would normally prevent such an obligation being owned by a UK resident, it was sufficiently foreign to constitute a source of income outside the UK. Such foreign securities were commonly employed by UK companies wishing to issue bonds the income on which could be paid gross and in practice confirmation that Case III would not apply could be obtained from the Inland Revenue. Following the suspension of exchange controls, the Inland Revenue ceased to give confirmations that such loan arrangements did not give rise to interest taxable under Case III.[12]

The IR consultative document "Tax Treatment of Interest paid by

---

11 Note by the Inland Revenue to the Working Party on Balance of Payments Aspects of Tax Questions 20 November 1968; Letter HM Treasury to Inland Revenue 10 January 1969; both accessible *http://www.kessler.co.uk/tfd-archive*.
These conditions are reflected in s.338(4)(c) and s.340 ICTA 1988 (repealed) (circumstances in which interest not subject to deduction at source is a charge on income).

12 4th ed., (looseleaf), para 18-050.

Companies to Non-residents"[13] set out the HMRC view from 1979:

> The abolition of exchange control has meant that a transaction in the form of a foreign specialty contract can now take place entirely between UK residents. The Revenue therefore now generally has to regard interest paid by a UK borrower as having a UK source, whatever the nature of the contract ...

This (more or less) equates source with residence of the debtor. It is a step from the situs approach, though not a large one: it differs only in the (non-standard) case of a specialty debt. It appears that this change of practice was made for pragmatic reasons and without reference to tax law. In the circumstances it is not altogether surprising that their view could not be maintained. The consultation paper gives the impression that this practice lasted for 15 years but I doubt if the view was strictly enforced. There was no support for this view in the case law, though in practice a residence test will often lead to the same result as other better established tests.

18.6.2 *Bank of Greece*

Against that background, we can consider the *Bank of Greece* case.[14] The key facts were straightforward:

(1) A Greek bank issued bearer bonds.

(2) The bank defaulted and the guarantor[15] paid the interest.[16]

The Revenue took the situs approach: the "basic test" for the source of interest was the IHT/private international law situs test:[17]

> The basic test for determining whether the payments are income arising in the UK is to be found in *Dicey and Morris on The Conflict of Laws*, 8th ed. (1967), p. 508, rule 79, on the determination of the situs of

13 January 1983 accessible *http://www.kessler.co.uk/tfd-archive*.

14 *Westminster Bank Executor and Trustee Co v National Bank of Greece* 46 TC 472.

15 For completeness: the payments were made by a company which succeeded to the original guarantor, following an amalgamation, and which was subject to the same obligations as the original guarantor; but that made no difference.

16 For completeness: it was not completely clear that guarantee payments should be classified as "interest". However even if it was not interest it is sensible that location of the source of guarantee income should be determined on principles similar to those which apply to interest income, and the House of Lords proceeded on the basis that there is no difference.

17 [1970] 1 QB 256, at p.266; the Revenue were not called on to argue the point in the House of Lords but there is no reason to think they changed their view.

things.[18]

The Revenue argued that although the debt was originally situate in Greece, it had moved and become situate in the UK:

> Applying that rule here, the debt is enforceable only in England where it is situate and this is the place where the income arises.

The difficulty which the Revenue argument faced was that the usual test of situs is residence, and the guarantor was not UK resident! The Revenue answer was that where residence and enforceability differed, situs was in the place of enforceability, not residence:[19]

> Residence is important because in most cases it is where the debtor is resident that the debt can be enforced. But the true test is: in what country is the obligation primarily enforceable? The answer to the question: ... this was an English contract governed by English law; and under English law the Income Tax Act, 1952, requires tax to be deducted before payment. *New York Life Insurance Co. v. Public Trustee*[20] shows that if the test of residence leaves one with a choice between an English and a Greek situs, the English situs must be preferred because the proper law of the contract is English. It would be patently absurd to attribute a Greek situs to the obligation when Greece is the one country where it has been abolished....

The House of Lords held that the interest had a foreign source. First they summarised the facts:

> [1] I have come to the conclusion that the source of the obligation in question was situated outside the United Kingdom.
>
> [a] This obligation was undertaken by a principal debtor which was a foreign corporation.
>
> [b] That obligation was guaranteed by another foreign corporation which, as was conceded before us, had at no time any place of business within the UK.

---

18 Now Dicey, Morris & Collins, (15th ed., 2012), rule 129; see 82.13.4 (Place-of-enforceability as synonym of place-of-debtor rule). The text has not materially changed.

19 The better view of the law of situs is that where residence and enforceability differ, situs is in the place of *residence*, not enforceability; but the point was arguable.

20 [1924] 2 Ch 101; See Cheshire, North, and Fawcett, *Private International Law* (14th ed., 2008), p.1226; *New York Life Insurance* is a situs case; see 82.13 (Simple contract debt).

[c] It was secured by lands[21] and public[22] revenues in Greece.

[d] Payment by the principal debtor of principal or interest to residents outside Greece was to be made in sterling[23] and either at the offices of [UK banks in London] or (at the option of the holder) at the National Bank of Greece in Athens, Greece, by cheque on London. Whichever method of payment was selected, ... discharge of the principal debtor's obligation would have involved in the ordinary course either a remittance from Greece to the paying agents specified in the bond or, at the option of the holder, a cheque issued within Greece though drawn on London, and presumably payable there out of funds remitted by the debtors from abroad.[24]

[e] ... the bond contained no provision for payment by the guarantor at any particular place or in any particular country.

This is a straightforward case of a foreign company raising funds by issuing debentures. Why was it argued the interest had a UK source?

[2] The only circumstances relied on by the Appellants as supporting their contention that the obligation was located inside the United Kingdom were as follows.

[a] Although the original guarantor had no branch in the United Kingdom, the present Appellants had acquired one on their universal succession in London.[25]

[b] Moreover, it was urged that, since discharge of the obligations under the bond in Greece had been caught by the moratorium enacted by the Greek Government, it followed that the only place at which the obligation could have been discharged or enforced was in London.

---

21 For completeness. The debt was originally secured on land in Greece but these properties were taken over or destroyed following the German and Italian occupation of Greece in 1941. But nothing turns on that.

22 For completeness: The interest was payable out of income of the Bank of Greece. That is only "public" revenues in a loose sense, as the National Bank of Greece was publically owned. The bonds were bank bonds and not government bonds.

23 For completeness: in 1935 this changed so that Greek residents could only be paid in drachmas: see *National Bank of Greece v Metliss* [1958] AC 509 at p.510. But nothing turns on that.

24 The point is that payment would in the ordinary course have ultimately derived from funds situate in Greece.

25 That is, the guarantors who succeeded to the original guarantor acquired a branch in London on their succession to the original guarantor.

That is, circumstances had changed, and

(1) The guarantor (who originally had no branch in the UK) now had a branch in the UK.

(2) The bonds (which were originally enforceable in Greece) were now enforceable in the UK.[26]

These changes (though seemingly fundamental) did not change the location of the source of the interest:

> [3] Speaking for myself, I do not see how an obligation originally situated in Greece for the purposes of British income tax could change its location either by reason of the fact that
>
> [a] one guarantor had been substituted for another, or
>
> [b] ... the second guarantor so substituted subsequently acquired a London place of business, or
>
> [c] ... the Government of Greece had by retrospective legislation altered by moratorium and substitution of a new guarantor for the purposes of Greek law the obligations imposed upon the principal debtor and the guarantor.
>
> The Appellants acquired no obligation different from that of the original guarantors, and that was the obligation imposed on the original guarantors by the terms of the bonds.
>
> [4] In my view, the bond itself is a foreign document, and the obligations to pay principal and interest to which the bond gives rise were obligations whose source is to be found in this document.

Only one (quite narrow) proposition of law can be inferred from this. *Bank of Greece* is authority for the (sensible) proposition that the location of a source of interest is fixed and does not move with changes of circumstances.[27]

It was clear, and all sides accepted, that interest paid by the principal debtor (the Bank of Greece, which issued the bonds) had a Greek source.[28] The question whether the interest on the bonds originally had a

---

26 *National Bank of Greece v Metliss* [1958] AC 509.

27 More accurately, the case is authority for the proposition that the changes which occurred in the *Bank of Greece* case did not change the location of the source. However the changes which occurred there were so fundamental that there will be few if any cases where the location of a source of interest will move.

28 In the Court of Appeal at p.487 "it has been common ground both in this Court and at first instance that if the payments of the coupons had been made by the principal debtors (the Mortgage Bank) they would have fallen within Case IV as being in respect of foreign securities." Likewise the case for the respondents in the House of

UK source was not raised, not argued, and not answered. The practice at the time that interest paid by a non-resident was in principle within case IV or V was applied without need for consideration. In any event, almost[29] all the features of the debt pointed to Greece.

A statement of a proposition of law in a judgement on a matter that was not the subject of argument is not binding authority, even in the House of Lords.[30] But it seems to me that no general propositions on locating the source of interest are to be found anywhere in the case.

HMRC argue that paragraph [1] of the quoted passage supports the multi-factorial approach: all the features listed in the paragraph were relevant, and if different features point in different ways, it is a matter of carrying out a balancing exercise. This is a misreading. *Bank of Greece* provides no support for that approach. That is not surprising, as the House of Lords had no need to say anything about the location of source of interest paid by the Bank of Greece. The court heard no argument about the principles of identifying the location of the source of interest. The relevant cases were not cited. In my view *Bank of Greece* gives no general guidance at all on what is the test for the location of the source of interest. That is what one would expect as the courts do not usually lay down the law on points which did not arise for decision and were not argued.

In short: the passage sets out a list of *facts*, not *factors.*

The short sentence at [4] ("the bond is a foreign document") was a paraphrase of the then statutory phrase, *securities out of the UK*). It was not intended to be a test for location of the source of interest. It is not an statement of the law: it is the conclusion.

If (contrary to that view) that half sentence did lay down a test, it raises

---

Lords states at para 6: "It is common ground that if payment of the interest due on presentation of the coupons had been made by the principal debtor, those payments would have fallen within case IV of Schedule D as being in respect of foreign securities."

29 The following features in *Bank of Greece* did not cause the interest to have a UK source:

(1) payment made in sterling
(2) English proper law
(3) interest paid in England.
(4) The loan was "raised in London": 46 TC at p.489.

30 This is basic, but if authority is needed, see *Scrivens v Ethical Standards Officer* [2005] All ER (D) 78 (Apr) at [52] citing long established authorities.

more questions than it answers:

(1) How does one decide if a bond is a "foreign document"? If one identifies a test for that (presumably multi-factorial) one can apply that test without the concept or label of a "foreign document".
(2) What happens if the interest does not arise on a bond: does a "foreign document" test apply also apply to simple contracts?

18.6.3 *Hafton Properties*

Hafton Properties v McHugh (a decision at Special Commissioner level) was another case where the location of the source of interest was straightforward until the circumstances of the debt changed:

(1) Under the original loan agreement, a US company borrowed from a US bank, the loan being secured on US property.
(2) Hafton (UK resident) acquired the property subject to the mortgage. It paid the interest due under the original loan agreement.

At the time of *Hafton Properties* (1986) the Revenue still maintained the situs approach. They argued that IHT/international law situs was the test of source:

> [The Revenue] maintained that, notwithstanding the arrangements made for the servicing of the debt, the residence of the debtor fixed the situs of the debt. See the citation from Atkin LJ's judgment in *New York Life Insurance Company v Public Trustee* [1924] 2 Ch 101 at page 119[31] in Cheshire and North, Private and International Law (10th Edn.) at page 537.

The difficulty for the Revenue was that the debtor (the US company) was not UK resident, so the interest should have been foreign source! the Revenue answer was that the US company was not the debtor:

> [The Revenue] submitted, ... there was a novation of the personal debt: so that Hafton became ... the debtor under the Note. [The Revenue] accordingly submitted that Hafton is the ultimate debtor, that Hafton is resident in the UK, and therefore that the debt is located in the UK. The situs of the debt locates, in her submission, the source of income, and therefore the source of income is a UK source.[32]

Interest under the original loan was not UK source, and the Special

---

31 *New York Life Insurance* is a situs case, see 82.13 (Simple contract debt).

32 59 TC 420 at 426.

Commissioner held it did not acquire a UK source when the payor changed:

> In one respect the Greek Bank case is different from this one, in that in that case the debtors (both original and substituted) were at all times essentially Greek in character. Nevertheless I collect from Lord Hailsham's speech a clear disinclination to regard sources of income as being peripatetic.[33]

This correctly identifies the *ratio* of *Bank of Greece*: the location of a source of interest does not change. One started here with foreign source interest. The change (a change to the identity of the debtor) did not change the source.

It is important to note that there is *nothing* in the judgment about balancing relevant factors, and *Hafton* offers no support for a multi-factorial approach. It was (once again) not necessary to consider how one *does* determine the source of interest, because the circumstances of the original US debt were clear.

This point will not often arise because the facts of *Hafton Properties* (purchase of property subject to mortgage) are unusual. A mortgage is usually paid off at the time of the purchase.

A more common situation is that an individual who has borrowed funds later changes his or her residence, and continues to pay interest. *Hafton* supports the view that (whatever the test for location) interest does not become UK source merely because the debtor becomes UK resident. Conversely interest does not cease to be UK source just because a debtor becomes non-resident.

The Special Commissioner added that the Revenue argument failed even if Hafton was the debtor, because the situs was still outside the UK:

> That is fortified, of course, by the fact that the debt was a mortgage debt. Such a debt is regarded for private international law purposes (at any rate) as a speciality debt, the situs of which is to be found where the mortgage deed is to be found. The mortgage deed is, and so far as I know always has been, in the United States.[34]

18.6.4 *Broome*

For completeness, I should mention *IRC v Viscount Broomes Executors*

---

33 59 TC 420 at p.426.

34 59 TC 420 at p.426.

19 TC 667. This was another case where the circumstances of the loan had changed:

(1) The original debtor was (primarily) resident in Kenya (also UK resident, but that does not matter).
(2) The original debtor died. His executors were UK resident.
(3) The loan was enforceable in Kenya. The UK executors who became liable for the debt paid the interest in the UK out of funds in the UK.

Both sides agreed, and the judge accepted, that the situs approach was the test of source:

> There was really very little dispute between the Solicitor - General and [Counsel for the taxpayer] as to the law (particularly perhaps as to the Income Tax law) which is applicable. There is no doubt at all that if a payment is made by a person here out of a source which is here, then that payment attracts tax. ... This also seems to me to be clear, and it is elaborately explained in the case of the *English, Scottish and Australian Bank, Limited v IRC*,[35]; this, I say, was not questioned, that the locality of a simple contract debt is the place where the debtor is to be found. That is laid down with the utmost clearness in numerous speeches in the House of Lords, and there is no doubt about it at all.[36]

The dispute concerned where the situs actually was. Since the executors were resident in the UK, one would expect that the situs of the debt would also be in the UK. The taxpayer's argument to the contrary was curtly dismissed:

> I think the executors were resident in this country. Mr. Latter [Counsel for the taxpayer] contended that it was not the question of the executors; it was a question of the executorship. I hardly ever fail to understand Mr. Latter, but I am not perfectly certain that I did exactly understand what he meant by the residence of the executorship.[37]

---

35 *English, Scottish and Australian Bank* is a situs case, see 82.13 (Simple contract debt).

36 at p.678.

37 at p.679.

For completeness: The judge added (at p.680):

"There is no doubt at all that if a payment is made by a person here out of a source which is here, then that payment attracts tax. ... I think it was payment out of a source here. The first two payments are perhaps a little more clear, because there the payment was actually made to [the creditor] personally in this country. He happened to be here; he was resident abroad, but he happened to be here, and he was actually paid by the executors in London; and equally [the other payments] were made in

More analytically, an executorship is not a person and does not have a residence. Only executors do.

The result in *Broome* would be different after *Bank of Greece*. Accepting (as the judge did) that interest on the original debt was not UK source, it should not have changed following the death of the debtor, as interest sources are not peripatetic.

18.6.5 *UK cases: conclusion*

The older UK cases all accept a situs approach.

18.7 Rejection of the situs approach

It should always have been apparent that there were some difficulties in applying the situs approach to the source of interest:

(1) The situs rules did not always give what a policy approach would identify as the most sensible answer to the location of the source of interest. That is not surprising, as the rules were not devised for that purpose, or indeed for any tax purpose. This is self-evident, but if authority is needed, see *Philips*:

> If the location of the debt were to be selected as the test, the source would be located differently according as whether the contract was a simple contract or a specialty; and, in the latter case, its location would arbitrarily change with the actual situation of the deed itself. Such a test would, indeed, be far from the practical commonsense test prescribed by the authorities; and I cannot think it proper to apply it here if some other is available.[38]

The High Court of Australia rejected the situs approach for similar reasons in *Studebaker Corporation of Australasia v Commissioner of Taxation*.[39]

(2) There were always some discrepancies between a strict situs approach and HMRC practice, which perhaps mattered more after the abolition of exchange control in 1979.

London, were sent to a bank in London, and were remitted by the bank in London to Kenya to be paid there. In these circumstances I am of opinion that this was a payment made by persons resident in London out of sources in London."

This passage adopts uncritically the view that the funds used to pay interest constitute the source of interest. It is suggested that no guidance should be taken from *Broome* on this point, and in practice it has been ignored.

38 See 18.9.1 (*IRC v Philips' Gloeilampenfabrieken*) [1955] NZLR 868 at p.898.

39 See 18.9.1 (*IRC v Philips' Gloeilampenfabrieken*).

(3) *Bank of Greece* could be taken as inconsistent with a situs approach. If the basis, or a basis, of the decision is that the House of Lords was that the source of interest does not move, there is already one inconsistency.[40]

If it is accepted that the situs approach is to be abandoned, the question arises as to what should be the new test for the source of interest.

18.7.1 *HMRC view 1993–2008: Multi-factorial test*

HMRC finally made the break from the situs approach in RI 58 (1993):

> **Schedule D Case III—meaning of "source"**
> ...The current [HMRC] view on the location of the source for interest is based on ... the Greek Bank case. The factors considered relevant in that case (leading to the conclusion that the income involved did not have a UK source) were—
> [1] there was an obligation undertaken by a principal debtor which was a foreign corporation;
> [2] the obligation was guaranteed by another foreign corporation with no place of business in the UK;
> [3] the obligation was secured on lands and public revenues outside the UK;
> [4] funds for payments by the principal debtor of principal or interest to residents outside Greece would have been provided
> [i] either by a remittance from Greece or
> [ii] funds remitted by debtors from abroad[41]
> (even though a cheque might be drawn in London).
> Although the Greek Bank case was concerned with income which turned out not to have a UK source, inferences can be drawn from that case about the factors which would support the existence of a UK source and [HMRC] regard the most important as—
> [a] the residence of the debtor, that is the place in which the debt will be enforced;
> [b] the source[42] from which interest is paid;

---

40 The security in that case was a bearer security, and under the situs test should have been regarded as situate wherever the document was held. It would obviously be impractical to apply that rule for the source of interest, though I do find it puzzling that the case discloses no mention at all of this difficulty.

41 I am not sure what is meant by this.

42 [Author's Note] I think this means the situs (on IHT/international law principles) of the funds used to pay the interest. It does not mean the location on IT principles of the source of the income used to pay the interest (which could of course be different).

> [c] where the interest is paid; and
> [d] the nature and location of the security for the debt.
> If all of these are located in the UK then it is *likely* that the interest will have a UK source.
> (Emphasis added)

This adopted a multi-factorial approach. This is not supported by *Bank of Greece*. *Spotless* does support this approach, but it does not select these four factors as the most important.

Assuming one does adopt that approach, "likely" was a timid word to use when all four of what HMRC identified as the "most important" connecting factors point the same way. The RI acknowledged the problem that different connecting factors may point different ways, but did not offer an answer:

> It is not possible for [HMRC] to comment individually in advance on the many cases in which the location of the source of interest may be relevant since the precise tax treatment depends on all the factors and on exactly how the transactions are in fact carried out.[43]

18.7.2 *Changes made by the tax law rewrite*

If the situs test is rejected, it followed that the old legislation (which seemed to suggest a situs test) was not appropriate. The tax law rewrite recognised this. ITTOIA EN cited s.18(3) ICTA set out above, and explained why they replaced the expression securities/possessions "out of the UK" with the expression "*source* outside the UK":

> 3079.Section 18(1) and (3) of ICTA require that, for an amount to fall within the charge under those Cases, [cases IV and V] as opposed to another charging provision, it has to be (a) income, (b) which arises from, (c) securities or possessions, (d) out of the United Kingdom ....
> 3080.Case law establishes that "securities" are a sub-set of "possessions". The definition of "relevant foreign income"[44] does not maintain any distinction between income which, in the source legislation, is within Schedule D Case IV and income which is within

---

43 RI 58 ended with wishful thinking:
"[HMRC] hope that this summary of [their] views will assist practitioners and their clients in determining for themselves where the source of interest with which they may be concerned is located."

44 The EN is considering the definition of relevant income in s.830 ITTOIA, but the comments on source apply to the source of interest generally.

Schedule D Case V.

3081.The definition [in the rewrite legislation, ITTOIA] uses "source" rather than "possessions" (the expression in Schedule D Case V). "Possessions", in the context of Schedule D Cases IV and V, appeared in the first income tax Act of 1799 when the word carried associations with, in particular, colonial property that it no longer has. The definition employs the more widely used term "source".

3082.The meaning of "possessions" [out of the UK] in Schedule D Case V has been interpreted by case law. It covers any and every source of income arising outside the United Kingdom. Income charged to tax under Schedule D Cases IV and V by virtue only of section 18(3) of ICTA (that is, excluding amounts treated as income by another provision in the source legislation and charged under Schedule D Case IV or V) has an identifiable source.

3083.In *Colquhoun v Brooks* (1889), 2 TC 490 HL (where the subject was how to tax a partner's share of a foreign trade), Lord Macnaghten dealt with the meaning of "possessions" in terms of a source of income (page 508):

> ...The word "possessions" is not a technical word. It seems to me that it is the widest and most comprehensive word that could be used. Why, for instance, should not possessions in Ireland mean everything, every source of income that the person chargeable has in Ireland, whatever it may be? Why should not "profits from possessions out of Great Britain," which is to be found in [Income Tax Act 1842] Schedule G., No. XI., ... mean profits from every source of income abroad? I use the expression "source of income" because it is as a source of income that the Act contemplates and deals with property and everything else that a person chargeable under the Act may have, and the [Income Tax Act 1842] itself, in section 52, uses the expressions "sources chargeable under [this] Act" and "all the sources contained in the said several schedules" as describing everything in respect of which the tax is imposed.

The current wording, referring to the source of income, removes the inference of the former wording, that the situs test should be the test for the source of interest. But it sheds no light on what the test for source is or ought to be.

18.7.3 *HMRC view from 2009: Multi-factorial test with different factors*

HMRC did not announce a change of view, but from 2008 the SAI Manual adopts a different version of the multi-factorial test, and RI 58 is

now described as "superseded by SAIM 9090 onwards".[45] I take that to be notice that HMRC have withdrawn from it.[46] This version of the multi-factorial approach expands the list of relevant factors from four to eight, and give an inkling of priority:

> **9090. Yearly[47] interest: UK source: The general rule** [August 2013]
> ... Whether or not interest has a UK source depends on all the facts and on exactly how the transactions are carried out. HMRC consider the most important of factor in deciding whether or not interest has a UK source to be
> [1] the residence of the debtor and
> [2] the location of his/her assets.
> Other factors to take into account are
> [3] the place of performance of the contract and
> [4] the method of payment;
> [5] the competent jurisdiction for legal action and
> [6] the proper law of contract;
> [7] the residence of the guarantor and
> [8] the location of the security for the debt.
> This list of factors is derived from the leading case on the source of interest, *Westminster Bank Executor and Trustee Co v National Bank of Greece* (46 TC 472).

Bank of Greece provides no support for a multi-factorial approach or for this particular selection of eight factors.[48]

> HMRC consider the residence of the debtor to be most important because this, along with the location of the debtor's assets, will influence where the creditor will sue for payment of the interest and repayment of the loan.

---

45 See the HMRC online version of Tax Bulletin 9 *webarchive.nationalarchives.gov.uk/20101006151632/http:/www.hmrc.gov.uk/bulletins/tb9.htm* also recorded in Tolley's Yellow Tax Handbook.

46 However INT Manual still supports RI 58:
> **342030 UK source** [January 2010]
> The onus is on the payer to decide whether tax is properly to be deducted having regard to settled case law principles [!] and all the facts surrounding the loan. In particular, the payer should refer to the approach and criteria endorsed by the House of Lords in the *National Bank of Greece* case (46 TC 472). HMRC's position in that case is outlined in Tax Bulletin 9 of November 1993 [RI 58].

47 [Author's note] Although the Manual heading refers to yearly interest, the same rules should apply to the source of short interest.

48 See 18.6.2 (*Bank of Greece*).

The SAI Manual then defines "residence":

> 'Residence' in these circumstances is not the same as tax residence. Residence of the debtor is residence for the purposes of jurisdiction.

I refer to the concept as "**jurisdiction-residence**" to distinguish it from tax-residence. It seems surprising to use the term residence in a non-tax sense but this arises for historic reasons: the concept comes from common law/IHT debt situs rules which in the past governed the rules for the source of interest.[49]

What is the test of jurisdiction-residence? In the case of an individual it is the same as tax-residence (or as near as makes no difference); but in the case of a company, it is place of business, which is quite different from tax-residence.

The SAI Manual provides:

> **9095. Yearly[50] interest: UK source: Companies** [July 2007]
> *Interest paid by companies*
> In deciding whether or not interest has a UK source, in addition to the factors described in SAIM9090, there are other matters to be taken into account for companies.
> **Companies and branches**
> Where the debtor is a company it may of course have more than one residence – for example it may be registered in a US state but managed and controlled from the UK.[51] Jurisdiction in relation to a corporation will in general depend on where the corporation does business (except where the EU Regulation or the 1968 Convention apply – see SAIM9090). So for these purposes it will be resident where it carries on business. If a debtor company has a number of places of residence/business then to decide the location of the debt you have to look at the terms of the loan agreement. The loan agreement should say where the interest and loan are payable, which (if the company is also resident in that place) will determine whether or not the interest has a UK source.
> When it comes to considering loans made to a branch of a UK company the source of the interest is overseas if all the following factors apply:

---

49 See 82.13.1 (Meaning of "residence").

50 [Author's note] Although the Manual heading refers to yearly interest, the same rules should apply to short interest.

51 The example given is muddled, or using "Residence" in an idiosyncratic way, but it does not matter.

[1] an overseas branch of a UK resident company has entered into a loan agreement overseas;
[2] the loan is for the business of the overseas branch;
[3] the overseas branch pays the interest from its income;
[4] the loan agreement obligations are enforceable in the jurisdiction in which the branch is situated.

The paragraph does indicate a "safe haven" situation where one can be confident that the interest paid by a person who is UK tax-resident does not have a UK source.

The SAI Manual continues:

> Conversely, where a branch of a non-UK resident company enters into a loan agreement in the UK for the business of its UK branch and the UK branch pays the interest then the interest is regarded as having a UK source.

18.7.4 *Impact of changes in private international law*

The background law (that is, private international law) has changed since the date of the situs cases which underlie the HMRC view, such as *New York Life Insurance* decided in 1924. Jurisdiction is now largely governed by international conventions, under which it is only approximately correct to say that residence of the debtor is the test of jurisdiction, (even though in most cases the end result will be the same). In short, it is not the case that the residence or place of business of the debtor is the place the debt will be enforced.[52] So if jurisdiction-residence is the test, or a factor in the test, there is a choice. Does interest arise:

(1) in the place where the debtor has jurisdiction-residence; or
(2) in the place where the debt is actually enforceable.

The author of the SAI Manual is aware of the question, but does not give the answer:

> **9090. Yearly interest: UK source: The general rule** [August 2013]
> *Duty to deduct tax from interest with a UK source*
> **EU rules**
> If the debtor is resident within the EU, the Council Regulation (EC) 44/2001 on Jurisdiction and the Recognition and Enforcement of Judgments in Civil and Commercial matters, ["the Judgments

52 See 82.13 (Simple contract debt). In *Bank of Greece* the debt was enforceable in the UK but the interest was not UK source.

Regulation"] and the 1968 'Brussels Convention',[53] may have an impact on the general rule described above.

There are different rules for individuals, corporations, and trusts.

The usual rule is that where an individual is domiciled in a contracting state, then they should be sued in the courts of that state (Article 2 of the Regulation/Convention).[54] Domicile is defined according to the rules of that contracting state but for these purposes only, it is, in the UK, linked to the individual's residence. Under these rules an individual is domiciled in England for example if he is resident there and the nature and circumstances of his residence indicate that he has a substantial connection with England.[55] So an individual resident in England would in general terms only be sued in the courts in that country. However this is a complex area and there are exceptions. For example it may be argued that:

[1] the case does not fall within the Regulation;
[2] another convention or international agreement gives jurisdiction to another state's courts
[3] proceedings have already begun in another state's courts; or
[4] it has been agreed under Article 22 of the Brussels Convention[56]

---

53 [Author's footnote] The Judgments Regulation applies in EU Member States. It supersedes the 1968 Brussels Convention except for some territories which fall within the scope of the Convention and which are excluded from the Regulation pursuant to Article 349 TFEU.

54 [Author's footnote] Article 2 Judgments Regulation provides: "Subject to this Regulation, persons domiciled in a Member State shall, whatever their nationality, be sued in the courts of that Member State."

55 [Author's footnote] Article 59 Judgments Regulation provides:
"1. In order to determine whether a party is domiciled in the Member State whose courts are seised of a matter, the court shall apply its internal law.
2. If a party is not domiciled in the Member State whose courts are seised of the matter, then, in order to determine whether the party is domiciled in another Member State, the court shall apply the law of that Member State."
In England, s.41(3) Civil Jurisdiction and Judgments Act 1982 provides:
"... an individual is domiciled in a particular part of the UK if and only if—
(a) he is resident in that part; and
(b) the nature and circumstances of his residence indicate that he has a substantial connection with that part."

56 [Author's footnote] I think the reference should be Article 23 Judgments Regulation, which provides:
"1. If the parties, one or more of whom is domiciled in a Member State, have agreed that a court or the courts of a Member State are to have jurisdiction to settle any disputes which have arisen or which may arise in connection with a

that the courts of a particular state have exclusive jurisdiction.

Point [4] is common, as the parties may agree any jurisdiction which suits them. What happens then? The Manual does not say:

> In any case in which it is argued that a UK resident debtor can be sued in a Member State in precedence to the UK courts please refer the case to CT&VAT (Financial and Insurance Team).

The SAI Manual then turns to consider the impact of modern private international law on companies:

> **9095. Yearly interest: UK source: Companies** [July 2007]
> *Interest paid by companies*
> **Companies within the EU**
> Under both the EU Regulation and 1968 Convention, domicile is the main ground of jurisdiction and will, at first sight, determine the rules for the recoverability of debts. EU regulation 44/2001 provides for a definition of domicile for corporations so that the company is domiciled where it has its statutory seat (in the UK its registered office), central administration or its principal place of business.[57] However it is important to note that a corporation is not domiciled in a country for these purposes merely because it does business there.

The Manual does express a view on the location of a source in a case where the debtor is jurisdiction-resident in one place but domiciled (in the sense of the Regulation) in another:

> If an EU based company carries on business in a country in which it is not domiciled you have to consider the terms of the loan agreement to

---

particular legal relationship, that court or those courts shall have jurisdiction..."

57 [Author's footnote] Article 60 Judgments Regulation provides:

"1. For the purposes of this Regulation, a company or other legal person or association of natural or legal persons is domiciled at the place where it has its:

(a) statutory seat, or

(b) central administration, or

(c) principal place of business.

2. For the purposes of the UK and Ireland 'statutory seat' means the registered office or, where there is no such office anywhere, the place of incorporation or, where there is no such place anywhere, the place under the law of which the formation took place."

Thus the Judgments Regulation provides *three* places where a company is domiciled and may be sued. There is no single place where the debt can be enforced which would serve as a test for the location of a source.

> determine the situation of the debt. For example, if a company which has its principal place of business in the UK also carries on business in another Member state, where the interest and loan are payable in that other Member state and that member state's courts have jurisdiction then the interest will be non-UK source.
> For branches of EU companies the position is as described above for branches generally.[58]

Thus in the Manual's view, the place of jurisdiction-residence has priority.

For the reasons given in 82.13.3 (Place-of-debtor rule v. jurisdiction where debt enforced) it is suggested that the better approach is to pay no regard to modern conflicts law in determining the source of interest, even if the place where the debt is enforceable is not the place where the debtor resides. But if one adopts a place of credit test, as is suggested, the problem does not arise.

18.7.5 *Interest from securities*

If one does adopt a multi-factorial test, slightly different considerations apply in the case of securities issued by a company as (particularly in the case of publicly issued securities, held by many investors) many of the other connecting factors do not work so well. In these cases the residence of the company should play a more significant role.

The RDR Manual provides:

> **33550 - Remittance Basis: Identifying Remittances: Specific Topics: Accrued Income Scheme** [July 2010]
> ... Securities are "foreign" where income (in practice, interest) from them would be relevant foreign income. This will include, for example, a security issued in registered form by a non UK company, which maintains the register of note-holders outside the UK.[59]

The rule that the source of interest on registered bonds of a foreign company is the location of the register seems a sensible rule but that will

---

58 [Author's footnote] Article 5(5) Judgments Regulation provides:
"A person domiciled in a Member State may, in another Member State, be sued:
... 5. as regards a dispute arising out of the operations of a branch, agency or other establishment, in the courts for the place in which the branch, agency or other establishment is situated;"

59 The comment is made in relation to the AIS remittance basis, but the point made here relating to the source of interest has a more general application. The text is also found in EN FB 2008.

normally be the same as the place of residence.

The same applies to bearer securities: that is consistent with *Bank of Greece*.

18.7.6 *Tribunal and Special Commissioner decisions*

There have been three decisions since HMRC announced their change of view in 1993.

The first is an unreported Special Commissioners decision, *Poldi (UK) Ltd v IRC* (25 November 1985). Unreported decisions cannot properly be cited as precedents, so this decision is not relevant. That is just as well, as HMRC practice is (rightly) to refuse to provide copies of unreported cases.

The second is a tribunal decision, *Perrin v HMRC* [2014] UKFTT 223 (TC). Unfortunately *Poldi* was cited and relied on by the Tribunal, a serious procedural irregularity, with the result that the case cannot be relied on as a precedent.

The third is *Ardmore Construction v HMRC* T [2014] UKFTT 453 (TC). I do not discuss that case here, as a full discussion must wait until the case is final.

18.8 Objection to multi-factorial approach

There are two objections to the multi-factorial approach.

(1) As a matter of principle: it does not provide a clear test.

(2) As a matter of precedent, it has no support in the case law and the rival place of credit test is well supported.

Some interest cases cite the familiar dictum:

> The Legislature in using the word "source" meant, not a legal concept, but something which a practical man would regard as a real source of income. Legal concepts must, of course, enter into the question when we have to consider to whom a given source belongs. But the ascertainment of the actual source of a given income is a practical, hard matter of fact.[60]

---

60 *Nathan v FCT* [1918] HCA 45; [1918] 25 CLR 183 at p.189-190 cited for instance in *Rhodesia Metals v CT* [1940] AC 774 at p.789. The adjectives "practical, hard" are meaningless. The point is made discreetly by Lockhart J at first instance in *Spotless* ("... a little opaque..."); the Court of Appeal said the principle that the source is a matter of fact "did not mean that the question is one for a jury". But if it did not mean that, it does not mean anything.

The most unsatisfactory approach of all is to say that source is a question of fact. The meaning and identification of "source" are questions of law given the basic background facts (which will usually be simple). It is the task of the courts to provide an answer to that question.

Equally unsatisfactory is to say that the answer is whatever a "practical man" would regard as the "real source". The only way in which a man, practical or otherwise, can locate a source of interest (other than tossing a coin) is to apply a theory as to the priority of rival connecting factors.[61] The exhortation to adopt a "practical approach" is unobjectionable. It is just not helpful. No-one advocates that the law should adopt an impractical approach. Those who stress the practical approach should bear in mind that the one thing that a practical man will ask of the law is that it will provide a clear *answer* to the question of where is a source. There is nothing more impractical than uncertainty. What Kurt Lewin said of psychology is also true of tax: there is nothing so practical as a good theory.

It is not satisfactory to say that all the features listed are relevant, and if different features point in different ways, it is a matter of carrying out a balancing exercise. We need rules on which factors have priority or there is no law on the subject at all.[62]

---

61 See 18.9.1 (*IRC v Philips' Gloeilampenfabrieken*) [1955] NZLR 868 at p.895–6:

"What sort of thing is to be looked for when it is sought to discover a *source of income*? This is a question less simple than it seems at first sight, and its difficulty does not seem to me to be greatly lessened by taking the 'practical' approach to it first put forward in *Nathan v Federal Commissioner of Taxation* (1918) 25 CLR 183. ... I am attracted by an approach by which an attempt is made to state lucidly what must be meant by the word 'source' in the phrase 'source of income' in given circumstances."

Similarly, though in a different context, *IRC v Pratt* 57 TC 1 at p.52:

"It is very simple to say that something is a question of fact, or mixed fact and law, and leave it at that, but this does not solve anything at all."

Contrast Keynes' *dictum* that "practical men who believe themselves exempt from intellectual influence are the slaves of some defunct economist".

62 The difficulty is acknowledged in *Spotless* (which adopted a multi-factorial approach) at [52]: "Where ... the transaction is complex in terms of its background, its nature and its execution, and where ... important aspects of the transaction have their origin in locations in several different countries, it will usually be difficult to identify the real source of income so generated." 71 ALJR 81; 34 ATR 183; 141 ALR 92 *http://www.uniset.ca/other/css/96ATC5201.html*.

It is considered that a test which will "usually be difficult" to apply is not a satisfactory one for something as basic as identifying the source of interest.

This formulation derives from Commonwealth cases on the source of *trading* income. There it seems more apt as the circumstances in which trading income arises differ very widely indeed. But even in that context experience has shown that it has not worked well, because no consistent pattern has developed as to which factors have the greatest weight.[63] However that may be, the questions of the source of *interest* and the source of *trading* income are different. There is no reason why the test should be the same. The point is made correctly in *Philips*:

> The location of the source of profits of a business, for instance furnishes a kind of investigation quite different from that of the source of interest on moneys lent, and decisions on sources of one kind of income may be of little assistance when considering sources of a different kind of income.[64]

18.9 Foreign case law

In the absence of UK cases, the UK courts should pay regard to decisions in other common law jurisdictions, especially appellate courts. These are not binding of course, but they should be regarded as persuasive:

(1) The issue of source discussed in those cases is the same issue, and the wording of the foreign statutes is the same as in the UK (this is clearer after the tax law rewrite).

(2) One the point of the source rules is to avoid double taxation (two states regard the source as situate in their territory, and double non-taxation (no state regards the source as situate in its territory) so it is desirable that courts should so far as possible agree on the principles: the IT source rules form a part of international tax law (like situs for IHT).

18.9.1 *IRC v Philips' Gloeilampenfabrieken*

Philips[65] is a case where money was borrowed to pay an existing debt:

(1) The debtor (a New Zealand company) owed a trading debt to the creditor (a Dutch company) ("the old debt").

(2) The debtor borrowed to pay the old debt. So the old debt was paid off and a new debt ("the new debt") came into existence: in technical terms there was a novation.

---

63 See 15.5 (Trading income of non-resident).

64 See 18.9.1 (*IRC v Philips' Gloeilampenfabrieken*) [1955] NZLR 868 at p.896.

65 10 ATD 435 [1955] NZLR 868 accessible *http://www.kessler.co.uk/tfd-archive*.

(3) The new debt arose under a loan agreement made in Holland and governed by Dutch law. The money was not received in New Zealand: it was set against the old debt.[66]

The New Zealand Revenue sought to tax the non-resident company on the grounds that the interest was income from a source in New Zealand.

Philips does what *Bank of Greece* does not do: it considers what should be the test to determine the source of interest. It rejects the situs rules. It rejects the location of funds used to pay the interest.[67] It adopts the place of credit test.

> The lender … gives credit to the borrower and this supply of credit is the service which the lender performs for the borrower, in return for which the borrower pays him interest. Consequently this provision of credit is the originating cause or source of the interest received by the lender
>
> ... the source is located where the transaction from which the debt took its origin took place...

On the facts of Philips the credit was not provided in New Zealand, so the source of the interest was not in New Zealand. It did not matter that the interest was paid out of trading profits in New Zealand.

In reaching this conclusion the Court of Appeal of New Zealand followed other Commonwealth case law. The origin of the place of credit

---

66 This was done in a convoluted way:
(1) The Dutch company creditor drew a cheque and sent it to the New Zealand company.
(2) The New Zealand company debtor endorsed it and returned it to the Dutch company in satisfaction of the old debt.
I do not think anything turns on those mechanics.

67 See *IRC v Philips Gloeilampenfabrieken* [1955] NZLR 868 at p.898: "It is not sufficient to ascertain the fund out of which the income was in fact paid, which is no more than the reservoir from which it was drawn. It is not whence it was paid, but why it was paid, that is the determining factor. The emphasis is not upon the receipt, but upon the derivation of the income. Consequently, it does not constitute the source within the meaning of the section that the money [used to pay the interest] was drawn from or provided by the trading profits in New Zealand. The New Zealand company [the debtor] was free to obtain the funds with which to perform its obligation anywhere it chose, from deposits in England, if it had any, or from borrowing in England, or from the profits of its trading in New Zealand. That was a domestic matter. The money could "come from" any of these "sources", but none of them would be the source from which the [creditor] derived what it received as income."

test is *IRC v Lever Bros*.[68] This was a case where a new debtor replaced the original debtor. The key facts were:

(1) An English company sold assets to a Dutch company. The purchase price remained outstanding ("the old debt"). Clearly, interest on the old debt would not have a South African source.

(2) A South African resident company purchased assets from the Dutch company and as consideration undertook to pay the old debt and the interest on it.

The High Court of Australia applied the same test in *Studebaker Corporation of Australasia v Commissioner of Taxation* where the facts were more straightforward: an Australian debtor paid interest on a trade debt arising on the purchase of cars from America. The interest did not have a source in Australia.[69]

The High Court of Singapore has adopted the same test.[70]

A particular attraction of this test is that it is fixed at the time the loan is made and does not change. On the facts of *Philips* the credit was not provided in New Zealand, so the source of the interest was not in New Zealand.

18.9.2 *Hong Kong cases and practice*

In *IRC v Hang Seng Bank* [1990] STC 733 at p.740 the Privy Council state the position quite clearly:

> If the profit was earned by ... lending money ... the profit will have arisen in or derived from the place where ... the money was lent ...[71]

---

68 [1946] AD 441; see in particular at p.455 (last paragraph) - 456 (Appeal Division of South Africa).

69 (1921) 29 CLR 225 accessible *http://www.austlii.org* at p.233: "...when we find that the interest arises from business transacted and wholly carried out in America the conclusion must be that it was not derived from any source within new South Wales." Similarly *Commissioner of Taxes v Dunn* [1918] AD 607, in which interest earned by an English company on advances for the purchase of goods in the UK for despatch to a South African company was held to be derived from a source in the UK. (In the UK the issue would not have arisen as the interest was short interest not subject to UK tax regardless of source.)

70 *CH Pte v Comptroller of Income Tax* (1988) 1 MSTC 7022 accessible *http://www.kessler.co.uk/tfd-archive*. In this case a loan agreement was made in Malaysia, but (which is considered to be the key fact) the money lent was received in Singapore. (A cheque received outside Singapore but paid into a Singapore account was regarded as a receipt in Singapore.)

71 [1990] STC 733 at p.740.

In *IRC v Orion Caribbean* [1997] STC 923 at p.930 the court made (I think) the same point, slightly more cautiously:

> If [a company] lent its own money to a borrower in, say, New York, then other things being equal there might be little difficulty in saying that the location of the source of the interest on the loan was New York.[72]

This sentence is ambiguous; it could mean that interest has a New York source if the money is lent in New York, ie the credit was provided there. It could mean that interest has a New York source if the borrower is in New York, ie resident in New York. But the context, and reference to the comment from *Hang Seng Bank*, shows that the former is the correct reading.

Both Hong Kong cases were trading cases, ie the issue was the source of trading income. Since different principles apply to trades[73] the comments are *obiter*. However, there is much to be said for the *Hang Seng* approach and it represents the generally held view in Hong Kong. The Hong Kong Revenue explain:[74]

> 2. Only interest arising in or derived from Hong Kong is liable to profits tax. For many years,[75] the Department has taken the view that for the purpose of determining the place where interest arises or is derived from, it is the location of the originating cause that almost invariably determines the source. In essence, the place of derivation of interest is the place where the credit was provided to the borrower, i.e. *the place where the funds from which the interest is derived were provided to the borrower*, commonly known as the "provision of credit" test. This view is based on the decisions in *IRC v Philips Gloeilampenfabrieken,* and *IRC v Lever Brothers & Unilever*.
>
> 3. If the originating cause is situated in Hong Kong, the source of the interest is in Hong Kong, irrespective of the currency in which the loan is denominated, the place of residence of the debtor or the place where

72 [1997] STC 923 at p.930.

73 See 18.8 (Objection to multi-factorial approach).

74 Departmental Interpretation and Practice Notes No. 13 (Revised) Profits Tax: Taxation of Interest Received, December 2004, accessible *http://www.ird.gov.hk/eng/pdf/e_dipn13.pdf*.

75 Author's footnote: The practice goes back at least to 1973: see Willoughby, 'Hong Kong: Source of Interest Profits' (1997) 25 World Tax Report 192.

the debtor employs the capital.[76]

18.9.3 *South Africa cases and practice*

The origin of the place of credit test is in *IRC v Lever Bros.*[77] This was a case where a new debtor replace the original debtor. The key facts were:

(1) An English company sold assets to a Dutch company. The purchase price remained outstanding ("the old debt"). Clearly, interest would not have a South African source.

(2) A South African resident company purchased assets from the Dutch company and as consideration undertook to pay the old debt and the interest on it.

The interest did not have a source in South Africa. One could have reached that conclusion on *Bank of Greece/Hafton* grounds, that changing

---

76 Emphasis added. The statement continues with three exceptional cases:

"[1] Whilst the emphasis is generally placed on the provision of the credit, in some situations, such as mortgages, the originating cause may well be the mortgage itself.

[2] In addition, interest has a Hong Kong source where it forms an integral part of a trading transaction carried out in Hong Kong, e.g. where a Hong Kong manufacturer sells his goods to an overseas buyer on extended credit terms. In such situations, the interest is just as much a part of the profit as the trading profit itself and also arises in Hong Kong, e.g. BR 20/75, IRBRD, vol. 1, 184 and *Studebaker Corporation of Australasia v C of T*, 29 CLR 225.

[3] It should also be noted that the 'provision of credit test' is not applicable where the loans are not simple loans of money. The Privy Council held in the case of *IRC v Orion Caribbean* 4 HKTC 432 [1997] STC 923 that where the taxpayer earned its profits by borrowing and lending of money, the proper test to determine the source of the profits was the operation test, i.e. "one looks to see what the taxpayer has done to earn the profit in question and where he has done it". In the case of a money lending business, the taxpayer's business would normally encompass a broader range of activity, including the borrowing and/or lending of money. For this type of business, the Department will apply the operation test instead of the provision of credit test in determining the source of the interest income."

Cases [2] and [3] are both trading cases and not governed by the location test for interest.

Whether case [1] should be an exception is more doubtful, though it has a little support from *obiter* in *Philips* at p.898: "Where the debt is a secured one, it is possible that the application of the practical test may, in some cases, make it arguable that the source is where the security is; or where the registry is wherein the mortgage deed is registered..."

77 [1946] AD 441, 14 SATC 1 accessible *http://www.kessler.co.uk/tfd-archive*.

the payor does not alter the source. But the Court reached the conclusion by applying a place of credit test.

The Katz commission record the position in South Africa, though they express some dissatisfaction:

> 6.2.2.2 ... Currently there is no statutory definition of the primary source of interest and both Revenue practice and our courts have been relying for many years on the unclear ratio from the decision in the *Lever Brothers* case.[78] Essentially, it was held that the source of interest was the making available of the credit. However, to determine the location of the source, the court considered various factors particular to that case. Over the years, the application of the test applied in the *Lever Brothers* case has become highly over-simplified, and the credit was generally held to be sourced where the agreement was concluded and the funds "physically" made available to the debtor. This simplification not only fails to consider the many other circumstances the majority of the court relied on for their decision, but has led to a damaging formalism in the sourcing of interest. It has become very simple to locate the source of interest tax advantageously, without affecting the economic substance in any way.
>
> 6.2.2.3 The Commission is of the view that the arguments stated by Schreiner JA in his minority judgment in the *Lever Brothers* case have both practical and theoretical merit... Judge Schreiner concluded that the source of interest on a loan should be considered to be where the capital is used and therefore where the debtor is located.[79]

The problem identified by the Katz commission consists of the misapplication of the place of credit test rather than the test itself.

18.9.4 *Spotless*

Commissioner of Taxation v Spotless Services[80] was essentially a bank

The Katz commission go on to recommend a statutory definition for the source of interest.

80 71 ALJR 81; 34 ATR 183; 141 ALR 92. I could not find the case on *http://www.austlii.org* so have put it on *http://www.kessler.co.uk/tfd-archive*.. *Spotless* went on to the High Court of Australia but the Revenue wisely abandoned their appeal on the source issue.

deposit (that is, in law, a loan) from an Australian creditor (Spotless) to a Cook Islands bank.[81]

Instead of a simple transfer of funds from the creditor's Australian account to the Cook Islands bank account:

(1) the creditor deposited its funds in a bank in Singapore

(2) the creditor drew a cheque on that account and delivered the cheque to the borrower in the Cook Islands.

The Australian elements in the arrangement were insignificant:

(1) Pre-contract negotiations

(2) Australian creditor

(3) The security (a letter of credit from Midland Bank, London) was received in Australia

The Court considered that the test of source of interest was a multi-factorial test:

> 52. ... To attribute "source" is a matter of judgment, and of assessment, of the relative weight of all of the relevant surrounding circumstances.

However, the Court applied the multi-factorial test in a completely different manner from the way that HMRC currently formulate their multi-factorial test, and without any stress on residence of the debtor. It is relevant to note the factors which the Court held were the most significant.

Beaumont J said:

> It is true that not all factors point in this direction, and that the case is, as a consequence, on the borderline. Certainly, the origin of the dealings between the parties was to be found in activities undertaken in Australia. Likewise, the provision of the Midland' Bank's letter of credit (with its origins elsewhere than the Cook Islands), to back up the transactions was essential from the taxpayer's standpoint. But, in my view, Lockhart J [the judge at first instance] was correct to identify the

---

81 The deposit was guaranteed by a UK bank, and made in a slightly complex way, but nothing turns on that:

Instead of a simple transfer of funds from the creditor's Australian account to the Cook Islands bank account:

(1) the creditor deposited its funds in a bank in Singapore

(2) the creditor drew a cheque on that account and delivered the cheque to the borrower in the Cook Islands.

I infer that the (rather complex) arrangements were designed to strengthen the argument that Cook Islands was the source.

certificate of deposit as the "critical" document for present purposes. As his Honour observed, it was this certificate which gave rise to rights vested in the taxpayers against [the Cook Islands bank] … (See also *Commissioner of Inland Revenue (NZ) v NV Philips Gloeilampenfabrieken* (1954) 10 ATD 435 at 443, per North J.)[82]

Cooper J said (Northrop J agreeing):

In weighing the factors to be taken into account when reaching a conclusion as to the source of the income, his Honour gave considerable weight to the place where the contract was made and where the money was lent. These events, his Honour found, occurred in the Cook Islands. His Honour continued:-

> "There are other facts and circumstances that in my view point strongly in the direction of the conclusions that the interest was derived by the taxpayers in the Cook Islands.
>
> [1] The borrower, [the Cook Islands bank], was incorporated in the Cook Islands and carried on business there. It did not carry on business in Australia.
>
> [2] The deposit was repaid, together with interest, less withholding tax, from the Cook Islands.
>
> [3] It is impossible to ignore the legal effect of the arrangements entered into by the parties with respect to the lending of the money. Until the cheque for $40m was handed over on 11 December in the Cook Islands (10 December CI time) and the certificate of deposit received in return there was no contract between the lender (the taxpayer) and the borrower. If [the borrower] failed to honour the certificate of deposit on the due date the taxpayers could have sued on the certificate and there would have been no answer in law to their right to judgment."

Once the contention that the contract was in reality made in Australia and that what occurred in the Cook Islands was a mere "formal step designed to screen the reality" is rejected and the banker's letter of credit issued by Midland is seen for what it was, a security to secure performance by [the borrower] of repayment of the loan with interest, and not as an investment in itself, the matters contended for by the Commissioner as matters of practical substance sourcing the interest in Australia are either not factually correct or not sufficient to outweigh the Cook Islands elements.[83]

---

82 At p.262 B-D.

83 At p. 275G - 276.

There is no guidance here as to how to deal with less clear cut cases but the stress on *where the money was lent* takes us close to the place of credit test. It is a pity that the commonwealth cases were not cited, so the Court did not have the opportunity to consider them.

I doubt if other courts will pay much attention to where the contract was made.

18.10 Source of interest: conclusion

There are two rival solutions to the question of where is the source of interest: the place of credit test and the multi-factorial approach. It is submitted that the courts ought to adopt the place of credit test, ie the source of interest is where the credit is provided, or where money is lent, ie where the money lent is received (the two phrases being understood to come to the same thing). This is consistent with case law, principle, international practice[84] and provides a reasonable element of certainty.

Two objections have been raised:

(1) The place of lending can be manipulated and allows scope for tax avoidance.

(2) Other circumstances should be taken into account.

But as to (1) the test (properly applied) cannot so easily be manipulated; and as to (2) avoidance may better be dealt with by other provisions than by using the concept of source. Indeed, an avoidance motive should not be a factor relevant to source at all; and if it did influence decisions, ie the courts emphasise whatever factors happen to defeat the taxpayer's appeal, the result is bound to lead to an incoherent case law.

The rival multi-factorial approach is supported by *Spotless* and (after dithering) HMRC practice. However it would need at least half a dozen reported cases before one could have much idea of the relevant factors and their relative priority, and in practice it is unlikely that the law would ever be clear. In particular, *Spotless* is not consistent with HMRC's view that the residence of the debtor is the most important factor.

If (contrary to my view) such an approach were adopted, it is suggested that the position should be as follows:

(1) Suppose a debt were wholly non-UK connected but secured on UK land; that is, the UK situate security is the only UK aspect of the debt. For instance, a debt from one non-resident to another non-resident, which

84 I would be grateful to readers who could direct me to statements of practice from other common law jurisdictions.

arises under a contract governed by a foreign proper law. It is suggested that interest on such a debt has a foreign source. It would be wiser to avoid the issue.

By contrast, suppose a debt was made unsecured (or secured on non-UK assets) and later became secured on UK land. It is considered that this would not turn a non-UK source into a UK source.

(2) Suppose a debt were wholly non-UK connected but paid out of funds derived from UK source income (eg rents of UK land). This cannot be enough to make the interest UK source. The origin of funds used to pay interest is a weak connecting factor. (I would submit it should not be a connecting factor at all.)

(3) Suppose a debt were wholly non-UK connected but had a UK resident debtor. It is suggested that this alone does not give the source of interest a UK location.

18.10.1 *Source of interest: Commentary*

After reading 30 pages on this issue, the reader will agree with HMRC who say:

> The current tests in UK law of whether, for the purposes of deduction of tax, payment of interest is made from a UK source are unclear and cause confusion.[85]

It is surprising that the question of the source of interest has not given rise to more litigation or to clearer principles. The reason may be that HMRC have in the past taken a relaxed view on source (which no doubt encourages taxpayers to take a relaxed view on disclosure). The enactment of s.874(6A) ITA and the recent case law suggests that HMRC attitudes have changed and the final outcome of *Perrin* and *Ardmore* may lead to greater clarity. Sometimes the point is irrelevant because of a DTA[86] or non-residents income tax relief.[87]

The test in the OECD Model Treaty is superior to both the place of credit test and any multi-factorial approach.[88] However legislation (with

---

85 Inland Revenue, "Income tax: Meaning of UK Source for Payments of Interest and Royalties" Consultation document (December 2003), para 1.1.

86 See 18.17 (DTA relief for interest income).

87 See 42.1 (Non-residents IT relief).

88 See 18.17.1 (OECD Model). If we adopted the OECD model treaty test one modification might be desirable: that where a debtor changes residence, the source of interest does not change (ie the source is determined and fixed at the time the debt

appropriate transitional provisions) would be needed to make this reform.

A HMRC consultation document in 2003 proposed this sensible reform but the proposal was quietly dropped. The reason why was never announced. Tax reforms generally have winners and losers. The losers cry louder than the winners, and that is an obstacle for many tax reforms. It is not clear that this was the case here since at first sight it is hard to identify obvious "losers", ie persons who could say with any confidence that they were not taxable under the present law. But there may have been a lobby on behalf of taxpayers who could argue in favour of foreign source at present, and who would lose under a clearer set of rules.

The gap between the existing case law and this solution is too great to be bridged by the courts, except by the Supreme Court, but the Supreme Court ought to follow the international case law rather than adopting a new solution.

18.11 Source of building society income

In practice, building society income will have a UK source. ITTOIA EN Vol II explains:

> 48. Under section 66 FA 1988 a society incorporated under the Building Societies Act 1986 will be resident in the UK through incorporation. As long as dividends are paid by a UK resident company they have a UK source under the principle in *Bradbury v The English Sewing Cotton Company* 8 TC 481.
> 49. But a society may be non-resident where it satisfies a residence test in the territory of a treaty partner and the treaty awards residence to that other territory. Section 249 FA 1994 will then apply to treat the society as non-resident. Theoretically dividends paid by a building society may therefore arise from a source outside the UK. This would be most unlikely, however, since a building society may only be incorporated under the Building Societies Act 1986 if its principal office is in the UK. With the place of incorporation and the principal office in the UK a residence test is unlikely to be satisfied in another territory.

18.12 Source of Industrial and provident society income

ITTOIA EN Vol 2 explains the source of income from an industrial and provident society:

> 52. Under section 66 of FA 1988 a society registered under the Industrial and Provident Societies Acts will be resident in the UK through incorporation. A society may, however, be non-resident where it also satisfies a residence test in the territory of a treaty partner of the

---

arises). But that point could be argued both ways.

UK and the treaty awards residence to that other territory. Section 249 of FA 1994 will then apply to treat the society as non-resident.

53. Section 486(4) of ICTA provides that share or loan interest is chargeable under Schedule D Case III. Theoretically therefore payments by a registered society may arise outside the UK but be charged under Schedule D Case III and not able to benefit from treatment specific to Schedule D Cases IV and V. For the sake of consistency this section[89] treats such income arising outside the UK as relevant foreign income and therefore able to benefit from the special rules in Part 8 of this Act.

18.13 Non-resident's withholding tax

Section 874 ITA provides:

> (1) This section applies if a payment of yearly interest arising in the UK is made—
>
> (a) by a company,
>
> (b) by a local authority,
>
> (c) by or on behalf of a partnership of which a company is a member, or
>
> (d) by any person to another person whose usual place of abode is outside the UK.
>
> (2) The person by or through whom the payment is made must, on making the payment, deduct from it a sum representing income tax on it at the basic rate in force for the tax year in which it is made.

For interest paid by individuals, trustees and PRs the obligation to withhold arises under s.874(1)(d) when the following conditions are satisfied:

(1) A payment of yearly interest.

(2) The interest arises in the UK.

(3) The payment is made to a person whose "usual place of abode" is outside the UK. In the following discussion a person whose usual place of abode is outside the UK is described (for brevity) as "**outside the UK**".

Deduction of interest at source is particularly important if the recipient is not UK resident, as non-residents IT relief provides effective exemption if interest is not deducted at source.[90]

---

89 [Author's Note] See ss.379 and 83D(2) ITTOIA.

90 See 42.1 (Non-residents IT relief – Introduction).

18.13.1 *Collection of tax deducted and interest on late payment of tax*

The rules for the collection of tax deducted are in chapters 15-17 ITA 2007, s.945-964 ITA. I do not address them here, though I hope to do so in a future edition.

INT Manual provides:

> **413220. Consequences of failing to deduct withholding tax** [August 2012]
>
> ...
>
> ***Assessing the unpaid income tax***
>
> Chapter 15, Part 15 of Income Tax Act 2007 (formerly Schedule 16 ICTA 1988) provides for returns and collection of income tax in respect of payments falling within s.946 ITA 2007, which specifically includes payments of yearly interest where a deduction is required under s.874.
>
> The rules, under s.951 ITA 2007 are that:
>
> - the income tax at the basic rate on the interest is due on the same date as the return reporting the payment
> - both the return and tax are due within 14 days of the end of the quarter within which the payment of interest was made
> - no assessment is required for collection of this tax.
>
> This means that withholding tax, and where applicable, late payment interest, are due and payable even if HMRC does not raise an assessment.
>
> Section 957 ITA 2007 sets out what should happen if it appears that a s.946 payment (which this is) has not been included in a return, and the tax arising on the payment has not been paid:
>
> (1) This section applies if an officer of Revenue and Customs thinks—
>
> (a) that there is a section 946 payment which should have been included in a return under this Chapter and which has not been so included, or
>
> (b) that a return under this Chapter is otherwise incorrect.
>
> (2) An officer of Revenue and Customs may make an assessment, to the best of the officer's judgement, on the person who made the return, or who should have made one.
>
> Note that the onus is on the payer to fulfil their obligation, and to rectify the position if they do not.

18.14 To whom is interest paid?

Since the duty to withhold arises on a payment to a person who is not in the UK, it is necessary for non-residents' withholding tax to identify the

person to whom the payment is made.[91]

Suppose interest is paid to a transparent (*Baker*-style) interest in possession trust which is not a settlor-interested trust. It is suggested that the interest is paid "to" the trustees (who have a lien). So if the trustees are in the UK but the life tenant is outside the UK the person paying the interest to the trustees need not deduct; but the trustees must do so when they pay the interest to the life tenant. But if the trustees mandate the income to the life tenant, the payer has an obligation to deduct.

Suppose:

(1) interest is paid to a settlor-interested trust; and

(2) the trustees are outside the UK and the settlor is in the UK.

At first sight there is no obligation to deduct as the interest is treated as income of the settlor "and of the settlor alone". Following the deeming, the payment should be treated as paid to the settlor. Conversely, if the settlor is outside the UK, there is an obligation to deduct even if the trustees are in the UK. It is suggested that that is the correct view. This is consistent with the position for deposit-takers. HMRC agree. TDSI Guidance Notes (October 2012)[92] para 2.3 provide:

> [2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit should be considered to belong to the settlor[93] and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.
>
> [3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust ... and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.

But this result is surprising: the payer is expected to know whether the payee is outside the UK, but they cannot be expected to know if the recipient is a settlor-interested trust, and if so, who is the settlor and is the settlor outside the UK.

Section 646(8) ITTOIA provides:

---

91 Similar issues arise elsewhere: see 15.4 (To whom does trading income arise?). Somewhat different issues arise for deposit-takers withholding tax: see 18.18(Withholding tax on interest from deposit-takers)

92 *http://www.hmrc.gov.uk/taxon/guidance-notes.pdf.* For TDSI (tax deduction scheme for interest) see 18.18 (Withholding tax on interest from deposit-takers).

93 [Author's footnote] It is assumed that the Stiftung is a settlor-interested trust.

> Nothing in sections 624 to 632 is to be read as excluding a charge to tax on the trustees as persons by whom any income is received.

This is not entirely to the point but it illustrates the view that the deeming of s.624 does not apply in all cases.

Suppose:

(1) interest is paid to a non-resident company within s.720; and
(2) the transferor is in the UK.

The transferor is taxable under s.720 on income treated as arising to them, but the interest is still the income of the company. So there is an obligation to deduct.

18.15 Usual place of abode

18.15.1 *Introduction*

The expression "usual place of abode" occurs in the context of withholding tax on rent and copyright royalties, as well as in the context of withholding tax on interest. The meaning in all cases is the same.[94]

The expression is discussed in a variety of HMRC Manuals. I set out all relevant passages whether or not the Manual has interest specifically in mind.

The phrase "settled or usual abode" was often used as an explanation or paraphrase of the concept of residence before the SRT[95] so one might think that there is no difference between residence and "usual place of abode". However in the HMRC view there is a difference, though the concepts overlap. The PI Manual provides:

> **4800 Overseas landlords** [September 2013]
> Meaning of ‹usual place of abode"'
> ‹Usual place of abode' is not identical in meaning to residence, or ordinary residence, but a person who is not resident in the UK should normally be treated as having their usual place of abode outside the UK.

Likewise the SAI Manual para 9080:

> **9080. Yearly interest: 'place of abode' of recipient** [July 2007]
> *Meaning of 'place of abode'*

94 This view is adopted by ITA EN para 2648: "The term 'usual place of abode' is consciously retained, *because it is a technical term*, distinct from residence" (emphasis added).

95 See the 2012/13 edition of this work para 3.8.

Section 874(1)(d) ITA 2007 requires deduction of tax from a payment to a person "whose usual place of abode is outside the UK". This phrase is distinguishable from the concept of "residence"...

18.15.2 *Individuals*

The PI Manual provides:

4800 Overseas landlords [September 2013]

- Individuals have a usual place of abode outside the UK if they usually live outside the UK. You should still regard the term as applying to them even if in a particular year they are resident in the UK for tax purposes, as long as the usual place of abode is outside the UK.

(For example the individual may count as resident in the UK in a particular year because of
[1] a six months' visit, or
[2] a visit of a shorter time when he has a place of abode available in the UK.)[96]
Do not treat someone as having their usual place of abode outside the UK if they are only temporarily living outside the UK, say for six months or less.

The SAI Manual makes the same point more tersely:

9080. Yearly interest: 'place of abode' of recipient [July 2007]
An individual's usual place of abode is outside the UK if he or she usually lives abroad, unless that arrangement is temporary.

This roughly equates "usual place of abode" with ordinary residence, but the analogy does not help, as the concept of ordinary residence was abolished for tax purposes by the SRT in 2013, and even before then its meaning was vague and sometimes contested.

The former Inspectors Manual made some comments which are not in the current Manuals.

18.15.3 *Companies*

The PI Manual continues:

96 Author's note: Para [2] refers to the supposed "available accommodation rule" which was an aspect of the pre-SRT residence test abolished in 1993. The passage was no doubt written before 1993 and has not been updated since.

4800 Overseas landlords [September 2013]

- Companies that have their main office or other place of business outside the UK, and companies incorporated outside the UK, will normally have a usual place of abode outside the UK. However if the company is treated as resident in the UK for tax purposes, do not treat it as having a usual place of abode outside the UK.

The SAI Manual addresses the question of UK branches of non-resident companies:

> **9080 Yearly interest: 'place of abode' of recipient** [July 2007]
> *Companies*
> A non-UK resident company that has a UK permanent establishment that is within the charge to corporation tax does not have a usual place of abode abroad.[97]

This practice seems surprising, but it favours the taxpayer so it will not be challenged.

18.15.4 *Trustees and PRs*

The SAI Manual 9080 provides:

> **9080 Yearly interest: 'place of abode' of recipient** [July 2007]
> *Trustees*
> Trustees, including personal representatives, have a usual place of abode abroad if each trustee, considered as an individual or a company as the case may be, has a usual place of abode there. So if one trustee does not have a usual place of abode abroad, neither does the trust.[98]

This text was probably composed before the statutory residence rules for trustees and PRs. One might have thought that the usual place of abode for trustees and PRs is where they are resident under those rules. But the HMRC practice favours the taxpayer so it will not be challenged. It is also satisfactory for HMRC; as long as one trustee is here, HMRC can collect

---

97 Accessible *http://www.hmrc.gov.uk/cnr/nrl_guide_notes.pdf*. The HMRC guidance notes on the Non-resident Landlords Scheme likewise provides:
"2.5 The UK branch of a non-resident company, where that branch is within the charge to Corporation Tax, does not have a usual place of abode outside the UK for the purposes of the NRL Scheme."

98 The PI Manual similarly provides:
"c. Trustees have a usual place of abode outside the UK if all the trustees have a usual place of abode outside the UK."

tax from that trustee and do not need the assistance of a withholding tax.

18.15.5 *Miscellaneous*

The HMRC guidance notes on the Non-resident Landlords Scheme makes further comments which are also relevant to deduction of interest:

> **Jointly owned property**
> 2.7 Where a property is jointly owned and one or more of the joint owners has a usual place of abode outside the UK, the share of rental income applicable to those joint owners falls within the NRL Scheme. The share applicable to joint owners who do not have a usual place of abode outside the UK does not fall within the Scheme. For husband and wife joint-ownership cases, see para 2.8 below.
> **Husband and wife joint-ownership cases**
> 2.8 Where a husband and wife jointly own a UK property and both have their usual place of abode outside the UK, the NRL Scheme applies to both spouses and each is treated as a separate landlord in their own right. If the husband and wife both wish to receive the rental income with no tax deducted they must each complete a separate application form and send it to the Inland Revenue (see Chapter 11 below). In such cases, letting agents and tenants should pay rental income with no tax deducted only to the spouse(s) named on Inland Revenue authorities they hold. Under no circumstances should they pay with no tax deducted to a husband and wife where they hold an authority to do so for only one spouse. But if only one of the spouses has a usual place of abode outside the UK, the NRL Scheme applies only to that spouse's share of the rental income. The rental income belonging to the UK resident spouse is not within the Scheme and no Inland Revenue approval is required to pay the income with no tax deducted.
> **Members of HM Armed Forces and other Crown Servants**
> 2.9 Members of HM Armed Forces and other Crown Servants, including diplomats, are treated no differently from any other non-resident landlords. So if they receive UK rental income and have a usual place of abode outside the UK (see para 2.3 above) the NRL Scheme applies to them.
> 2.10 If members of HM Armed Forces and other Crown Servants whose usual place of abode is outside the UK wish to receive rental income with no tax deducted, they should apply to HMIT Public Department 1 or South Wales Area tax office, as appropriate, for approval (see Chapter 11.1 below).
> **How do letting agents and tenants know whether a landlord has a "usual place of abode" outside the UK?**

2.11 A landlord's usual place of abode (see paras 2.3 to 2.6 above) will usually be evident without the need for special enquiries. If it is outside the UK, letting agents or tenants should operate the NRL Scheme. If the usual place of abode is in doubt, letting agents and tenants should get more information from the landlord to satisfy themselves on the point. In particular, PO Box numbers and "care of" addresses alone should *not* be relied on as evidence that the Scheme does not apply. In cases of difficulty letting agents can get advice from the Centre for Non-Residents (see para 1.15 above).

2.12 Where letting agents and tenants have no reason to believe that a landlord has a usual place of abode outside the UK they are not required to make any special enquiries. In these circumstances they do not have to operate the Scheme.[99]

18.15.6 *Place of abode: Commentary*

Do we need a concept of "usual place of abode" in addition to concepts of residence? The statutory residence test provides a proper definition of "residence" which should be the starting point here and "place of abode" should be abolished. (There would need to be some provision for cases where at the time of payment of the interest it is not clear whether the payee is resident or not.)

18.16 Exceptions to obligation to deduct

Sections 875–888 ITA set out 14 exceptions to the duty to deduct. In outline:

Section	Exemption
875	Interest paid by building societies
876	Interest paid by deposit-takers
877	UK public revenue dividends[100]
878	Interest paid by banks
879	Interest paid on advances from banks
880	Interest paid on advances from building societies
881	National Savings Bank interest
882	Quoted Eurobond interest
883	Interest on loan to buy life annuity
884	Relevant foreign income
885	Authorised persons dealing in financial instruments

99 Accessible *http://www.hmrc.gov.uk/cnr/nrl_guide_notes.pdf*.

100 See 19.3 (Deduction at source).

886 Interest paid by recognised clearing houses etc
887 Industrial and provident society payments
888 Statutory interest

The exemptions for interest in advances from banks, and for RFI, are considered below.

18.16.1 *Foreign source interest*

Section 874 ITA imposes the obligation to deduction on making:

> a payment of yearly interest arising in the UK[101]

Foreign source interest is not subject too the obligation to deduct at source, as one would expect.

Section 884(1) ITA provides:

> The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest which is chargeable to income tax as relevant foreign income.

This makes the mistake of thinking that relevant foreign income means the same as income arising outside the UK. The drafter has overlooked the definition of RFI, which means (in short) foreign income of a UK-resident. Foreign source income of non-residents is not RFI.[102] But fortunately this defect does not matter, as under s.874 ITA the obligation to deduct applies only to interest arising in the UK; s.884(1) ITA is otiose.

The SAI Manual provides:

> **9090 Yearly interest: UK source: The general rule** [August 2013]
> ... whether or not tax should be deducted from interest paid on an overseas loan depends on the source of the interest. If the interest has a UK source tax must be deducted, if it does not then tax should not be deducted.

18.16.2 *Source of interest for deduction at source purposes*

Section 874(6A) ITA provides:

> In determining for the purposes of subsection (1) whether a payment of interest arises in the United Kingdom no account is to be taken of the location of any deed which records the obligation to pay the interest

101 See 18.13 (Non-resident's withholding tax).
102 See 10.3.1 ("Relevant foreign income").

For the purposes of s.874(1) (only) the location of a deed is disregarded; for other purposes it is not. Thus there are two definitions of the source of interest.

The disregard does not apply for the purposes of s.884(1). So if one took the provision literally, the location of the deed is taken into account in determining whether the interest is RFI, and if it is RFI, there is no obligation to deduct.

Fortunately this defect does not matter, as the location of a deed is not relevant to the location of the source of interest.[103] Section 874(6A) is otiose. What a mess!

The reason for the provision is found in a shallow HMRC consultation paper:

> 4.11 For 'debts under seal' or 'specialty debt' it is sometimes argued that case law supports the view that interest paid on such debts does not have a UK source where the loan agreement is physically held outside the UK, and hence that income tax is not required to be deducted at source.
> 4.12 HMRC does not accept this argument. However, to put the matter beyond doubt, the Government proposes to amend the relevant provisions of Chapter 3 of Part 15 of ITA so that the question of whether or not interest arises in the UK is established without reference to the location of the agreement or deed evidencing the debt.[104]

The need for a statutory definition of source remains unmet.

18.16.3 *Interest paid to UK bank*

Section 879(1) ITA provides:

> The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest on an advance from a bank if, at the time when the payment is made, the person beneficially entitled to the interest is within the charge to corporation tax as respects the interest

---

103 See 18.7 (Rejection of the situs approach).

104 HMRC, "Possible changes to income tax rules on interest" *http://customs.hmrc.gov.uk/channelsPortalWebApp/downloadFile?contentID=HMCE_PROD1_031986*

> The consultation paper omitted to point out that HMRC formerly adopted the view which they now reject, as did at least one Special Commissioner's decision. It contained no discussion of the relevant law (beyond a cursory reference to *Bank of Greece*) and does not mention the 2003 consultation.

> [or is a bank that would be within the charge to corporation tax as respects the interest apart from section 18A of CTA 2009].[105]

This would apply on payment of interest to a UK branch of a non-resident bank, though it may be that such companies do not have their usual place of abode abroad.

18.16.4 *Short interest*

Tax law distinguishes between:
(1) "yearly" or "annual" interest (the terms are synonymous); and
(2) other interest (known as "short" interest).
The duty to deduct tax does not apply to short interest. The SAI Manual explains the distinction:

> **9075. Yearly interest: Case law on short and yearly interest** [January 2009]
> *When is interest "short" or "yearly"?*
> Although tax law has made a distinction between yearly and short interest since 1806, there is no statutory definition of yearly interest. The distinction rests wholly on case law.
> The classic example of short interest is interest payable on a bank loan for less than a year. In the early case of *Goslings and Sharpe v Blake* (2 TC 450), the Court of Appeal confirmed that interest on such a loan, where there was no provision to extend the borrowing for more than a year, could not be yearly interest, notwithstanding the use of an annual percentage rate.
> It is therefore a useful starting point to say that where a loan or debt is for less than a year, there is a presumption that it gives rise to short interest. Conversely, interest on a loan or debt that exists for more than a year is likely to be yearly interest.
> But you cannot just apply this as a mechanical rule, with the benefit of hindsight. Particular difficulties may occur where, at the time when a loan or debt comes into existence, it is not clear how long it is going to last.
> For example, the case of *Bebb v Bunny* (1854) 1 K&J 216 concerned the payment into court of the purchase price of a property, with interest on the delayed payment. It would have been possible for the interest to have run for more than a year if the purchaser had been particularly late in paying. The judge held that the interest was yearly. On the other hand, the Court of Appeal held, in *Gateshead Corporation v Lumsden* [1914] 2 KB 883, that certain interest which

---

105 For completeness, s.879 continues:
"(2) Section 991 (meaning of 'bank') applies for the purposes of this section.
(3) Subsection (1) applies to the European Investment Bank as if the words from 'if' to the end were omitted.
(4) An order under subsection (2)(e) of section 991 designating an international organisation as a bank may provide that subsection (1) applies to the organisation with the modification mentioned in subsection (3)."

had run for more than a year was nevertheless short interest. The interest in question was statutory interest due to Gateshead Corporation on late-paid contributions towards the cost of making up roads. The court took the view that the mere failure by the Corporation to enforce the debt within a year did not make the interest "yearly interest".

To distinguish interest arising on long-term loans from that arising on apparently short-term debts, the courts began to lay stress on the debt having "a measure of permanence" or being "in the nature of an investment" as opposed to being merely "temporary accommodation". Thus in *Corinthian Securities v Cato* (46 TC 93) the Court of Appeal decided that interest on a bank loan, repayable on demand, was yearly interest because the loan had the quality of investment – even though, in the event, the loan was called in after 6 months.

However, the leading case on yearly interest is now considered to be *Cairns v MacDiarmid* (56 TC 556). In this case, the Court of Appeal saw the intention of the parties as the determining factor. If the debtor and creditor intend that the debt should subsist for more than a year, or where there is mutual acceptance that the interest may have to be paid from year to year, the interest will be yearly. This principle was applied in *Minsham Properties v Price* (63 TC 570), where a loan from a parent company, repayable on demand, gave rise to yearly interest because it was regarded by both parties as permanent finance.

It was felt in *Cairns v MacDiarmid* that merely asking whether a loan had the character of an investment was a less useful test – even an overnight deposit of money might be regarded as an "investment".

9076. Practical application [January 2009]

Applying case law principles

It is always a question of fact whether, in any particular case, interest is yearly or short. The intention of the parties will be the most important factor in deciding the question (see SAIM9075).

The question of whether interest is short interest, from which the payer has no obligation to deduct tax, is most likely to arise in the context of payments made by a UK resident to a person whose usual place of abode is outside the UK. If the interest is short, there is no need for the recipient to apply under a relevant Double Taxation Agreement to receive the interest gross (or with tax withheld at a reduced rate). There is guidance at INTM505010 onwards.

A UK resident may make a series of loans, each of less than a year, to a non-resident, and claim that the interest is short. HMRC staff should refer to the guidance at INTM542010 in such cases.

Uncertainty may also arise as to whether there is a duty to deduct tax from interest in circumstances comparable to that in *Bebb v Bunny* (SAIM9075) – where a sum of money remains outstanding for a period that may, or may not, be longer than a year. For example, a manufacturer might guarantee to refund the purchase price, with interest from the date of claim, if a product proves faulty: such claims may normally be processed speedily but, in disputed cases, may drag on for over a year.

Where the parties intend at the outset that monies due will not be left outstanding longer than 12 months, the interest will be short – even if, in a few cases, there are delays which prolong the period over which interest accrues. If however the

parties anticipate at the beginning that the debt will exist for more than a year, or appear to be indifferent as to whether it will or not, the interest is likely to be yearly.

Where the payer of the interest is uncertain about whether it is short or yearly, they may in practice "play safe" by deducting tax. If the recipient of such interest objects to the tax deduction, HMRC staff should advise him or her to take up the matter with the payer, see SAIM9180.

If, conversely, the payer decides that interest is short and pays it gross, HMRC staff should not challenge that view unless

- the decision appears to be completely unjustified on the facts and in the light of relevant case law, or there is reason to suspect a definite intention of avoiding the payment of withholding tax; and
- material sums of tax are at risk.

Overdraft interest is usually short interest.

The INT Manual formerly provided:

542010. Provisions of Section [s.874 ITA] [March 2007]

'*In some circumstances, an overseas lender may seek to circumvent the provisions of [what is now s.874 ITA] by advancing a series of short-term consecutive loans, each for a period of less than one year. It may then be argued that the interest is not annual interest but short interest, to which the provisions of [s.874 ITA] do not apply. This argument is open to challenge unless the UK borrower can show that there was no need for long term funding or that alternative sources of funding were readily available to replace that which was argued to be short term.*

Where Inspectors meet a situation in which a long-term funding requirement is being met via a series of short-term loans, they should refer for advice to CT & VAT, Business Profits & Relief.'

This was deleted when the Manual was rewritten in March 2011. Perhaps HMRC now accept these arrangements. Challenge would be harder if the short-term loans are each from separate lenders.

The interest consultation paper proposes to extend the deduction at source rules to short interest (and so to abolish the yearly/short interest distinction):

4.4 The distinction between yearly (or 'annual') interest, and interest that is not yearly (usually referred to as 'short' interest), goes back to the origins of the income tax system. There is a substantial body of case law on what constitutes yearly interest. HMRC's Savings and Investment Manual has more details on this.

4.5 This case law is not always straightforward in its application to the facts of a particular case. Whether or not interest is 'yearly interest' is

> not simply determined by the duration of the loan. More recent cases emphasise the importance of the intentions of the parties when making the arrangement under which the interest is paid. However, these intentions are not always easy to determine, for example in cases where interest is paid under a statutory obligation.
>
> 4.6 It is often observed that the concept of yearly interest is now somewhat archaic[106] and of relevance only to the question of whether tax should be deducted at source. There is no distinction between yearly and short interest for the purposes of the TDSI scheme under which most bank and building society interest is paid.
>
> 4.7 In view of this, views are invited on the removal of references to 'yearly' interest throughout Chapter 3 of Part 15 ITA so that deduction of income tax would be required in all cases where interest is not otherwise covered by the rules in Part 15 of ITA. Such a changes would eliminate the need for payers of interest to consider whether it amounts to 'yearly interest' and would remove the cliff edge that may lead to contractual terms being inserted into a loan agreement merely in order avoid it being treated as 'yearly'.[107]

The paper did not consider the need for the rule, or whether any modification of the rule would be better suited for its purpose. It is in fact a form of de minimis rule and as such serves an important purpose. The paper also did not consider international practice. Do other countries require deduction at source for interest on transient or short term loans?

18.16.5 *Discounts and premiums*

The duty to deduct tax does not apply to:

(1) profits on discounts (which are normally treated as interest but which are expressly taken out of the duty to deduct);

(2) premiums even though premiums may be charged to income tax.

SAI Manual rightly provides:

> **3070 Taxation: Profit on disposal** [July 2011]
>
> *Deduction of tax*
>
> Discounts or premiums payable on the redemption of relevant

106 The author does not give any reference to support this; I have not been able to trace any instance where the distinction has been described as archaic, nor can I see any reason why it should be.

107 HMRC, "Possible changes to income tax rules on interest" *http://customs.hmrc.gov.uk/channelsPortalWebApp/downloadFile?contentID=HMCE_PROD1_031986*

discounted securities[108] are not payments of interest. Consequently the payments are made without deduction of tax.

However, the distinction between interest and premiums can be fraught.

18.17 DT relief for interest income

18.17.1 *OECD Model*

Article 11 OECD Model provides:

> 1. Interest arising in a Contracting State and paid to a resident of the other Contracting State may be taxed in that other State.
> 2. However, such interest may also be taxed in the Contracting State in which it arises and according to the laws of that State, but if the beneficial owner of the interest is a resident of the other Contracting State, the tax so charged shall not exceed 10 per cent of the gross amount of the interest. The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of this limitation.

The OECD Commentary provides:

> 5. Paragraph 1 lays down the principle that interest arising in a Contracting State and paid to a resident of the other Contracting State may be taxed in the latter. In doing so, it does not stipulate an exclusive right to tax in favour of the State of residence. The term "paid" has a very wide meaning, since the concept of payment means the fulfilment of the obligation to put funds at the disposal of the creditor in the manner required by contract or by custom.
> 6. The Article deals only with interest arising in a Contracting State and paid to a resident of the other Contracting State. It does not, therefore, apply to interest arising in a third State or to interest arising in a Contracting State which is attributable to a permanent establishment which an enterprise of that State has in the other Contracting State (for these cases, see paragraphs 4 to 6 of the Commentary on Article 21).

On the beneficial ownership requirement, see 25.12 (Are discretionary trusts "beneficial owners" for DTA purposes?).

Article 11(4) and (6) provides the usual exceptions for where the interest

---

108 Discounts and premiums on securities which are not "relevant discounted securities" are also not "interest".

arises through a permanent establishment and for special relationships:

> 4. The provisions of paragraphs 1 and 2 shall not apply if the beneficial owner of the interest, being a resident of a Contracting State, carries on business in the other Contracting State in which the interest arises through a permanent establishment situated therein and the debt-claim in respect of which the interest is paid is effectively connected with such permanent establishment. In such case the provisions of Article 7 shall apply.
> 6. Where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the interest, having regard to the debt-claim for which it is paid, exceeds the amount which would have been agreed upon by the payer and the beneficial owner in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In such case, the excess part of the payments shall remain taxable according to the laws of each Contracting State, due regard being had to the other provisions of this Convention.

18.17.2 *Definition of interest for DTA purposes*

Article 11(3) OECD model defines "interest":

> The term "interest" as used in this Article means income from debt-claims of every kind, whether or not secured by mortgage and whether or not carrying a right to participate in the debtor's profits, and in particular, income from government securities and income from bonds or debentures, including premiums and prizes attaching to such securities, bonds or debentures. Penalty charges for late payment shall not be regarded as interest for the purpose of this Article.

The OECD Commentary provides:

> 18. Paragraph 3 specifies the meaning to be attached to the term "interest" for the application of the taxation treatment defined by the Article. The term designates, in general, income from debt-claims of every kind, whether or not secured by mortgage and whether or not carrying a right to participate in profits. The term "debt-claims of every kind" obviously embraces cash deposits and security in the form of money, as well as government securities, and bonds and debentures, although the three latter are specially mentioned because of their importance and of certain peculiarities that they may present. It is recognised, on the one hand, that mortgage interest comes within the category of income from movable capital (revenus de capitaux mobiliers), even though certain countries assimilate it to income from

immovable property. On the other hand, debt-claims, and bonds and debentures in particular, which carry a right to participate in the debtor's profits are nonetheless regarded as loans if the contract by its general character clearly evidences a loan at interest.

19. Interest on participating bonds should not normally be considered as a dividend, and neither should interest on convertible bonds until such time as the bonds are actually converted into shares. However, the interest on such bonds should be considered as a dividend if the loan effectively shares the risks run by the debtor company (see inter alia paragraph 25 of the Commentary on Article 10). In situations of presumed thin capitalisation, it is sometimes difficult to distinguish between dividends and interest and in order to avoid any possibility of overlap between the categories of income dealt with in Article 10 and Article 11 respectively, it should be noted that the term "interest" as used in Article 11 does not include items of income which are dealt with under Article 10.

20. As regards, more particularly, government securities, and bonds and debentures, the text specifies that premiums or prizes attaching thereto constitute interest. Generally speaking, what constitutes interest yielded by a loan security, and may properly be taxed as such in the State of source, is all that the institution issuing the loan pays over and above the amount paid by the subscriber, that is to say, the interest accruing plus any premium paid at redemption or at issue. It follows that when a bond or debenture has been issued at a premium, the excess of the amount paid by the subscriber over that repaid to him may constitute negative interest which should be deducted from the interest that is taxable. On the other hand, any profit or loss which a holder of such a security realises by the sale thereof to another person does not enter into the concept of interest. Such profit or loss may, depending on the case, constitute either a business profit or a loss, a capital gain or a loss, or income falling under Article 21.

21. Moreover, the definition of interest in the first sentence of paragraph 3 is, in principle, exhaustive. It has seemed preferable not to include a subsidiary reference to domestic laws in the text; this is justified by the following considerations:

a) the definition covers practically all the kinds of income which are regarded as interest in the various domestic laws;
b) the formula employed offers greater security from the legal point of view and ensures that conventions would be unaffected by future changes in any country's domestic laws;
c) in the Model Convention references to domestic laws should as far as possible be avoided.

It nevertheless remains understood that in a bilateral convention two Contracting States may widen the formula employed so as to include in it any income which is taxed as interest under either of their domestic laws but which is not covered by the definition and in these circumstances may find it preferable to make reference to their domestic laws.

21.1 The definition of interest in the first sentence of paragraph 3 does not normally apply to payments made under certain kinds of nontraditional financial instruments where there is no underlying debt (for example, interest rate swaps). However, the definition will apply to the extent that a loan is considered to exist under a "substance over form" rule, an "abuse of rights" principle, or any similar doctrine.

22. The second sentence of paragraph 3 excludes from the definition of interest penalty charges for late payment but Contracting States are free to omit this sentence and treat penalty charges as interest in their bilateral conventions. Penalty charges, which may be payable under the contract, or by customs or by virtue of a judgement, consist either of payments calculated pro rata temporis or else of fixed sums; in certain cases they may combine both forms of payment. Even if they are determined pro rata temporis they constitute not so much income from capital as a special form of compensation for the loss suffered by the creditor through the debtor's delay in meeting his obligations. Moreover, considerations of legal security and practical convenience make it advisable to place all penalty charges of this kind, in whatever form they be paid, on the same footing for the purposes of their taxation treatment. On the other hand, two Contracting States may exclude from the application of Article 11 any kinds of interest which they intend to be treated as dividends.

23. Finally, the question arises whether annuities ought to be assimilated to interest; it is considered that they ought not to be. On the one hand, annuities granted in consideration of past employment are referred to in Article 18 and are subject to the rules governing pensions. On the other hand, although it is true that instalments of purchased annuities include an interest element on the purchase capital as well as return of capital, such instalments thus constituting "fruits civils" which accrue from day to day, it would be difficult for many countries to make a distinction between the element representing income from capital and the element representing a return of capital in order merely to tax the income element under the same category as income from movable capital. Taxation laws often contain special provisions classifying annuities in the category of salaries, wages and pensions, and taxing them accordingly.

18.17.3 *Definition of source for DTA purposes*

Article 11(5) OECD Model provides:

> [1] Interest shall be deemed to arise in a Contracting State when the payer is a resident of that State.
> [2] Where, however, the person paying the interest, whether he is a resident of a Contracting State or not, has in a Contracting State a permanent establishment in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment, then such interest shall be deemed to arise in the State in which the permanent establishment is situated.

Interest arising in a third country (not in either state) is not within this article. Such interest falls within article 21 ("other income") and is taxed only in the state where the recipient is residence.

The OECD Commentary provides:

> 26. This paragraph lays down the principle that the State of source of the interest is the State of which the payer of the interest is a resident. It provides, however, for an exception to this rule in the case of interest-bearing loans which have an obvious economic link with a permanent establishment owned in the other Contracting State by the payer of the interest. If the loan was contracted for the requirements of that establishment and the interest is borne by the latter, the paragraph determines that the source of the interest is in the Contracting State in which the permanent establishment is situated, leaving aside the place of residence of the owner of the permanent establishment, even when he resides in a third State.
> 27. In the absence of an economic link between the loan on which the interest arises and the permanent establishment, the State where the latter is situated cannot on that account be regarded as the State where the interest arises; it is not entitled to tax such interest, not even within the limits of a "taxable quota" proportional to the importance of the permanent establishment. Such a practice would be incompatible with paragraph 5. Moreover, any departure from the rule fixed in the first sentence of paragraph 5 is justified only where the economic link between the loan and the permanent establishment is sufficiently clear-cut. In this connection, a number of possible cases may be distinguished:
>
> a) The management of the permanent establishment has contracted a loan which it uses for the specific requirements of the permanent establishment; it shows it among its liabilities and

pays the interest thereon directly to the creditor.

b) The head office of the enterprise has contracted a loan the proceeds of which are used solely for the purposes of a permanent establishment situated in another country. The interest is serviced by the head office but is ultimately borne by the permanent establishment.

c) The loan is contracted by the head office of the enterprise and its proceeds are used for several permanent establishments situated in different countries.

In cases a) and b) the conditions laid down in the second sentence of paragraph 5 are fulfilled, and the State where the permanent establishment is situated is to be regarded as the State where the interest arises. Case c), however, falls outside the provisions of paragraph 5, the text of which precludes the attribution of more than one source to the same loan. Such a solution, moreover, would give rise to considerable administrative complications and make it impossible for lenders to calculate in advance the taxation that interest would attract. It is, however, open to two Contracting States to restrict the application of the final provision in paragraph 5 to case a) or to extend it to case c).

28. Paragraph 5 provides no solution for the case, which it excludes from its provisions, where both the beneficiary and the payer are indeed residents of the Contracting States, but the loan was borrowed for the requirements of a permanent establishment owned by the payer in a third State and the interest is borne by that establishment. As paragraph 5 now stands, therefore, only its first sentence will apply in such a case. The interest will be deemed to arise in the Contracting State of which the payer is a resident and not in the third State in whose territory is situated the permanent establishment for the account of which the loan was effected and by which the interest is payable. Thus the interest will be taxed both in the Contracting State of which the payer is a resident and in the Contracting State of which the beneficiary is a resident. But, although double taxation will be avoided between these two States by the arrangements provided in the Article, it will not be avoided between them and the third State if the latter taxes the interest on the loan at the source when it is borne by the permanent establishment in its territory.

29. It has been decided not to deal with that case in the Convention. The Contracting State of the payer's residence does not, therefore, have to relinquish its tax at the source in favour of the third State in which is situated the permanent establishment for the account of which the loan was effected and by which the interest is borne. If this were not the case and the third State did not subject the interest borne by the permanent establishment to source taxation, there could be attempts to avoid source

taxation in the Contracting State through the use of a permanent establishment situated in such a third State. States for which this is not a concern and that wish to address the issue described in the paragraph above may do so by agreeing to use, in their bilateral convention, the alternative formulation of paragraph 5 suggested in paragraph 30 below. The risk of double taxation just referred to could also be avoided through a multilateral convention. Also, if in the case described in paragraph 28, the State of the payer's residence and the third State in which is situated the permanent establishment for the account of which the loan is effected and by which the interest is borne, together claim the right to tax the interest at the source, there would be nothing to prevent those two States together with, where appropriate, the State of the beneficiary's residence, from concerting measures to avoid the double taxation that would result from such claims using, where necessary, the mutual agreement procedure (as envisaged in paragraph 3 of Article 25).

30. As mentioned in paragraph 29, any such double taxation could be avoided either through a multilateral convention or if the State of the beneficiary's residence and the State of the payer's residence agreed to word the second sentence of paragraph 5 in the following way, which would have the effect of ensuring that paragraphs 1 and 2 of the Article did not apply to the interest, which would then typically fall under Article 7 or 21: Where, however, the person paying the interest, whether he is a resident of a Contracting State or not, has in a State other than that of which he is a resident a permanent establishment in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment, then such interest shall be deemed to arise in the State in which the permanent establishment is situated.

31. If two Contracting States agree in bilateral negotiations to reserve to the State where the beneficiary of the income resides the exclusive right to tax such income, then ipso facto there is no value in inserting in the convention which fixes their relations that provision in paragraph 5 which defines the State of source of such income. But it is equally obvious that double taxation would not be fully avoided in such a case if the payer of the interest owned, in a third State which charged its tax at the source on the interest, a permanent establishment for the account of which the loan had been borrowed and which bore the interest payable on it. The case would then be just the same as is contemplated in paragraphs 28 to 30 above.

18.17.4 *Which treaties provide full relief?*

The OECD Model Convention does not provide exemption but only a

partial relief. However about one third of UK DTAs provide full relief, ie UK interest received by a person who is treaty-resident in the foreign state is not taxed at all in the UK; this includes France, Ireland, Luxembourg, Switzerland and USA.[109] HMRC publish a convenient digest of DTAs.[110]

The Katz commission discuss some of the policy issues here:

> 6.2.2.1 Most worldwide or residence based systems of taxation subject non-residents to taxation on income derived from a source within their jurisdiction, and, in principle, there should be no objection against doing the same as regards interest accruing to or being received by a non-resident from a South African source. However, in this instance, the high mobility of capital militates against the adoption of a pure approach. Most countries refrain from so taxing interest, at least as regards interest on debts with unrelated parties (so-called portfolio interest). At the same time, most of those systems tax interest flowing between related parties. The reason is that in the latter situations interest merely represents another form of extracting profits from the jurisdiction where they were earned, and of course would enjoy a deduction in appropriate circumstances. In following these tendencies South Africa will ensure that it remains competitive in international capital markets, while still, like most other countries, protecting the tax base on income arising from South African operations.[111]

18.17.5 *Colonial model DTAs*

The Jersey, Guernsey and Isle of Man DTAs do not provide exemption for interest. They do however provide an exemption for industrial or commercial profits. The treaties are in similar form based on the colonial model, so I take the Jersey DTA as an example. Art 3(2) Jersey DTA provides:

> The industrial or commercial profits of a Jersey enterprise shall not be subject to UK tax unless the enterprise is engaged in trade or business in the UK through a permanent establishment situated therein. If it is so engaged, tax may be imposed on those profits by the UK, but only on so

---

109 UK/France Art.11; UK/Ireland DTA Art.12; UK/Luxembourg DTA Art.11; UK/Switzerland DTA Art.11; UK/USA DTA Art. 11.

110 *http://www.hmrc.gov.uk/taxtreaties/dtdigest.pdf*

111 5th Report - Basing the South African Income Tax System on the Source or Residence Principle - Options and Recommendations (March 1997) *http://www.polity.org.za/polity/govdocs/commissions/katz-5.html#6.2.1.*

much of them as is attributable to that permanent establishment.

This confers relief on interest, provided:

(1) The recipient is a Jersey enterprise, defined as "an industrial or commercial enterprise or undertaking carried on by a resident of Jersey"[112] (eg a Jersey bank).
(2) The recipient is not engaged in trade or business in the UK through a PE in the UK (or if it is so engaged, the interest is not profits attributable to that PE).
(3) The interest is or is part of the "industrial or commercial profits".

A person who makes a simple loan by way of investment does not carry on an industrial or commercial enterprise, and interest on such a loan does not constitute industrial or commercial profits. However a business (such as a bank) which includes lending does constitute an industrial or commercial enterprise and the interest is part of its profits.[113] HMRC agree. The International Manual provides:

> **355225. Industrial or commercial profits paragraph** [Jun 2011]
> Para 3 provides for the relief from UK tax of "the industrial or commercial profits of a Jersey enterprise".
> In practical terms, this means that we can allow relief on UK interest paid to a bona fide bank in Jersey, since it can be held that interest represents part of the bank's profits as defined by para 3.
> So if you get a claim from a bank in Jersey you will need to;
> - be certain that it is a recognised bank – the Banker's Almanac will help you [here][114] or HMRC users may ref to the **(This text has been withheld because of exemptions of the Freedom of Information Act 2000)**
> - consider if you should have the loan agreement reviewed by the inspector of taxes who deals with the accounts of the UK borrower – the guidance at INTM342010 will help you here
>
> If these checks are satisfactory, you can allow **full** relief.
> **But** if you receive a claim from a Jersey enterprise in respect of any other category of income, please refer to CAR Technical Advice Group before taking any action.

The International Manual provides:

---

112 Jersey/UK DTA art.2(1)(h).

113 The issue was discussed in more detail in the 6th edition of this work, but the Manual passages cited makes this academic.

114 [Author's footnote]: see *http://www.bankersalmanac.com*.

337310. Background to claims by foreign financial concerns [December 2011]

Under a long-standing practice approved by the Board a claim by an overseas financial concern for interest which bears the character of income arising from their trading activities or forms part of their trading income may be relieved under the Business Profits Article (provided the Business Profits Article doesn't clearly exclude interest for example Kenya) in either of the following circumstances

- there is no interest article, or
- the conditions of the interest article are not satisfied.

337320. Claims by Channel Islands and Isle of Man Banks [December 2011]

HMRC is authorised to consider claims and applications for relief at source by banks in the Channel Islands and the Isle of Man in respect of interest under paragraph 3(2) of the Double Taxation Arrangements with those countries. The basis for this is that the interest forms part of the 'industrial and commercial profits' of the banks.

Relief in respect of interest is available only to a bona fide bank. If you receive a claim or correspondence about relief under paragraph 3(2) from any other concern in the Channel Islands or Isle of Man you should refer the case to Specialist Personal Tax, PT International Advisory.

337330. How to deal with claims from foreign financial concerns [December 2011]

If you receive a claim or correspondence for income which can be considered under the Business Profits Article as outlined in INTM337310 you should deal with it as follows:

Where there is no interest article in the relevant Double Taxation Agreement (DTA) and the claimant is not trading in the UK through a permanent establishment, exemption may be authorised under the business profits article on form 241(Int-Roys).

Where in such circumstances the claimant is trading in the UK through a permanent establishment, necessitating restriction of relief under that article, and in cases where there is an interest article but claims under it are automatically restricted because the claimant is trading in the UK through a permanent establishment, you will need to consult the Officer dealing with the permanent establishment and arrange for any interest attributable to the permanent establishment to be included in his computation of liability. Form 502 should be used for this purpose. Provided the Officer has no objections the interest can then be exempted under the business profits article using form 241(Int-Roys). You should issue form 501 (amended as necessary) with the Officer's copy of the exemption notice where relief is authorised under the business profits

article and there is trading in the UK through a permanent establishment. Where there is no trading through a permanent establishment you need to send a memo with the exemption notice explaining the circumstances in which relief has been authorised.

Note: These provisions do not apply where the rate of relief under the business profits article is more favourable than under the interest article and relief is available under the latter.

337340. Requests to extend the provisions to other income [December 2011]

If the claimant asks you to extend the concession to dividends or other distributions you should ask the HMRC office for the permanent establishment (PE) to confirm that

- the payments represent trading income; and
- they are not attributable to the PE.

The reason for doing this is because dividends/distributions, unlike interest and royalties, cannot be brought into the charge to corporation tax on the PE (Section 19 CTA 2009).

18.17.6 *Relief from withholding tax when DT relief applies*

Regulation 2(1) Double Taxation Relief (Taxes on Income) (General) Regulations 1970 provides:

> The following provisions of these Regulations shall have effect where, under arrangements having effect under section 497 ICTA 1970 [now s.2 TIOPA], persons resident in the territory with the government of which the arrangements are made are entitled to exemption or partial relief from UK income tax in respect of any income from which deduction of tax is authorised or required by the Income Tax Acts.

This applies where interest qualifies for relief under a DTA. Regulation (2) provides the exemption from withholding tax:

> Any person who pays any such income (referred to in these Regulations as "the UK payer") to a person in the said territory who is beneficially entitled to the income (such person being referred to in these Regulations as "the non-resident") may be directed by a notice in writing given by or on behalf of the Board that in paying any such income specified in the notice to the non-resident he shall—
>
> (a) not deduct tax, or
>
> (b) not deduct tax at a higher rate than is specified in the notice, or
>
> (c) deduct tax at a rate specified in the notice instead of at the

> lower[115] or basic rate otherwise appropriate;
>
> and where such notice is given, any income to which the notice refers, being income for a year for which the arrangements have effect, which the UK payer pays after the date of the notice to the non-resident named therein shall, subject to the following provisions of these regulations, be paid as directed in the notice...

18.17.7 *Procedure for claiming relief*

For the procedure see RI 79, Tax Bulletin 41, and the HMRC booklet "Double Taxation Relief Provisional Treaty Relief Scheme".

The application forms are available online.[116]

The International Manual provides:

> **413230. The interaction between UK taxing rights and double taxation agreements** [August 2012]
>
> Where UK-source interest is paid to a person taxable in another state, the same income might be taxable both in the source state (the UK) and in the recipient's country. If the person [being subjected] to double taxation (the recipient of the interest) makes a certified application to HMRC's treaty team, fulfilling the relevant requirements, the double taxation can be reduced or eliminated [so far as] the relevant double taxation agreement (DTA) and domestic legislation allows. This is achieved by the source state yielding some or all of its taxing rights.
>
> Chapter 1 of Part 2 of TIOPA 2010 (formerly Section 788 ICTA 1988) gives effect to the arrangements contained in DTAs, since domestic legislation is necessary to either remove or reduce the requirement to deduct tax in Section 874 ITA 2007, or to give entitlement to repayment of tax previously deducted.
>
> To obtain treaty benefits, the lender must demonstrate eligibility, in which case HMRC will give up its prospective taxing rights and issue a notice under SI 1970/488 directing the borrower to begin paying the interest on the loan in question in accordance with the DTA...

18.17.8 *Relief when borrower is a partnership*

HMRC say:

> In deciding whether or not HMRC Residency should exercise its discretion in meeting an application for relief at source [ie an application to pay interest

---

115 The rate "otherwise appropriate" is always the basic rate, never the lower rate; the drafter has failed to amend the wording of the regulation to keep up with the changes to the rates of tax in 2008. But no harm arises from this error.

116 Accessible *http://www.hmrc.gov.uk/cnr/app_dtt.htm#5*.

without deduction], it must primarily have regard to the risk that the underlying conditions for relief might change over the lifetime of a Direction (which will normally last no longer than five years). Such changes might remove the basis for relief altogether, or in some other way prejudice the amount of tax that the UK is otherwise properly entitled to receive in that period.

Given its duty of care to the UK Exchequer and taxpayer, HMRC Residency have to give particular consideration to the desirability of giving DT treaty relief where transparent concerns such as partnerships and LLCs are concerned. This is because, more often than not, there is a much higher risk that the beneficial owners of such concerns will change. Or that there will be fluctuations in income or profit apportionment that might erode the amount of UK-source income that is attributable to the DT treaty-resident beneficial owners who were identified at the time the application for relief at source was made.

Attention is drawn to the undertaking sought from claimants in the Declaration (Part F of the US/Company 2002) that they will notify HMRC Residency of any changes in the information given on the form. (A similar warning to notify any material changes is given to a UK payer when a Direction is issued to it.)

Without calling into question the good faith of partnership or LLC claimants who give these undertakings, HMRC Residency considers that the problem of monitoring this aspect is particularly acute where there are a very large number of investors, or there is an unfeasible number of layers of participation - partners who are themselves partnerships, which contain yet more transparent partners.

For these reasons, although HMRC Residency is willing to entertain any application for relief at source from partnerships or LLCs, it should be understood that it is likely to give relief in this way chiefly where:

* HMRC Residency are able to accept satisfactory assurances about the monitoring and notification of membership from the claimant concern.
* The number and type of the concern's membership is not a problem in the first place - for example, a small and fixed number of participators, such as US corporations engaged in a joint venture. Or where the concern is the business arm of a small number of joint intellectual property owners such as a band or similar collaborative venture.
* In response to a successful representation of special considerations or factors that would allow us to decide that relief may safely be given in this form.

Each case will be considered on its merits.

Otherwise, HMRC Residency will consider giving relief only by meeting discrete repayment claims.[117]

Although this comment is made in relation to the USA DTA, it should apply to partnerships generally. On the other hand, it applies only to American LLCs (which are treated as transparent under the US DTA).

If interest is paid before a notice of non-deduction is obtained, tax deducted at source can be reclaimed by the creditor. If the loan agreement

117 "HMRC Residency Double Taxation Guidance Note 3 partnerships and LLCs claiming relief under the 2002 UK/USA DTC."

provided for grossing up where tax is deducted at source, the creditor may compensate the debtor for over-payment).

18.17.9 *Relief when borrower is outside the UK*

HMRC Residency Double Taxation Guidance Note 1 deals with applications for relief at source on interest payments where the borrower is outside the UK:

> This Guidance Note explains how HM Revenue & Customs (HMRC) Residency Nottingham handles applications for relief at source from UK income tax under a double taxation treaty in respect of interest payments where both lender and borrower are outside the UK.
> [After some general comments on the law the note continues]
> In its consideration of an application for relief at source in such circumstances, HMRC Residency must be satisfied that all the elements necessary to give relief are present. In the circumstance where the payer of the interest is not situated in the UK, HMRC Residency will need satisfactory evidence that the payer has concluded that the payments are to be considered as UK-source and has formed the intention of deducting and accounting for tax accordingly.
> HMRC Residency's claim forms ask claimants to attach copies of relevant loan documentation as part of the normal process. In cases such as those discussed in the previous paragraph, HMRC Residency would also ask claimants to enclose supporting evidence confirming the payers' intentions. This could, for example, be copies of pertinent correspondence with the borrower or other relevant documentation.
> Without the comfort afforded by such supporting documentation, HMRC Residency may well take the view that it should not exercise its discretion under SI 1970/488 to authorise relief at source.
> However, it would then be open to the non-resident payee to make a repayment claim to HMRC Residency once the interest payments have commenced and tax has been deducted. HMRC Residency will be prepared to keep the application for relief at source open and on file pending this eventuality. If the non-resident payee is then able to forward a certificate of tax deducted completed by the payer, HMRC Residency may then be able to accept that the UK source categorisation of the payments has been established. Assuming that all the other conditions for Double Taxation treaty relief are present, HMRC Residency should then be in a better position both to repay the tax deducted and consider in a more positive light the appropriateness of issuing a Direction under SI 1970/488 for future payments.

This is quite the most absurd procedure which could possibly be imagined,

for in many cases the payor will want to argue that the interest is not UK source but (since one can rarely[118] be sure) will want a direction to pay gross as a safeguard. Perhaps no-one takes any notice of it in practice.

18.17.10 *Interest paid before HMRC notice to pay gross*

The INT Manual provides:

> **413220. Consequences of failing to deduct withholding tax** [August 2012]
> ...
> An application by the overseas lender under a DTA or under the EU Interest & Royalties Directive (INTM400000), is likely to be made up of two elements, depending largely on how promptly the claim follows the making of the loan. These are:
> - A clearance application - for Section 874 no longer to apply (or only to apply to a lower rate of withholding specified in the relevant tax treaty) to a specific loan. If the application is successful, the payer will receive a notice issued under SI488/1970 advising them that they may henceforth, for a specified period, pay interest gross or at the lower rate on the income named in the notice;
> - A repayment claim - for the lender to have paid to them tax which the payer of the interest has accounted for to HMRC in compliance with their Section 874 obligation, prior to the notice being issued.
>
> Forms available on the HMRC website cater for both aspects on a single form.
> It is vital to understand that until the payer receives a clearance notice directing them to do otherwise, the payer must continue to withhold and account for the income tax on interest payments made to an overseas lender. The UK payer is not entitled to anticipate either the lender making an application or the outcome of them doing so. It is immaterial whether the lender is a fellow group company to the borrower, or a vast European lending institution for which the borrower is just another customer.
> If the payer fails to observe the obligation to withhold and pay, or only does so late, HMRC can assess and recover the tax, and charge late

118 The guidance note states complacently that "The meaning of UK-source in this context will not normally give rise to difficulties." The author has not read the HMRC consultation paper on interest:
"The current tests in UK law of whether … payment of interest is made from a UK source are unclear and cause confusion."
See 18.10.1 (Source of interest: commentary).

payment interest under Section 87 TMA 1970 on the outstanding income tax, running from the tax due date to the date of payment. See INTM413240 for what may happen in circumstances where a valid clearance/repayment claim is received.

Grossing up clauses

"Grossing up clauses" appear in loan agreements, requiring borrowers to pay over interest without withholding income tax, irrespective of the clearance position, so that domestic withholding obligations are at the expense of the borrower and the lender gets 100% of their interest. From a loan relationships point of view HMRC accepts that any additional amount paid under a grossing up clause is a loan relationship expense, but it is not interest. If the borrower received the grossing up amount back from the lender, possible after the lender had made a successful treaty claim, the repayment would be treated as a loan relationship credit.

If £100 of interest is paid over, representing the full amount of interest due, the withholding tax is £20, assuming the rate to be 20%. The payment itself should not "grossed up" to £125 and the tax is not £25.

The existence of a grossing-up clause is not an excuse not to withhold income tax.

The International Manual provides:

413230. The interaction between UK taxing rights and double taxation agreements [August 2012]

...If the lender obtains clearance before any interest has been paid, then for the period of the clearance all the interest accruing on the loan can be paid without deduction, or paid subject to a lower rate of income tax, depending on the DTA. However, a problem arises when the benefits set out in the DTA have not yet been obtained and the company paying the yearly interest does so - for whatever reason - without withholding and accounting for the income tax.

Once treaty clearance has been granted (following a successful certified DTA application), income tax will either no longer be withheld or may be withheld at a lower rate, it must also be recognised that clearance applies only to arm's length interest payments made after the clearance is granted. The obligation to deduct income tax from yearly interest paid prior to clearance will not have been removed, and therefore remains enforceable. For payments of interest made before clearance is notified, double taxation is relieved by the lender making a claim for repayment of the income tax withheld. Forms available on the HMRC website allow repayment claims to be made at the same time as the certified application for treaty benefits, although the repayment relief can only go back 5 years after the 31st January next following the year of assessment to

which it relates (TMA70/S43(1)).

Section 87 TMA 1970 - late payment interest

In addition to the unpaid income tax remaining due and payable on payments of yearly interest not covered by a treaty clearance notice, late payment interest will accrue under Section 87 TMA 1970 on any unpaid tax, from the due date (normally 14 days after the quarter in which the yearly interest was paid) until payment. It will accrue whether or not the income tax has been assessed, and while any income tax paid can be repaid if it is subject to a valid repayment claim from the lender, there is no relief or discharge from the Section 87 TMA 1970 interest charge on the payer.

The Section 87 TMA 1970 late payment interest charge is both mechanical and neutral, and accrues at the same rate irrespective of the reason for late payment. While it is not a penalty (though penalties are available for failure to make a return under Part X of TMA70), it stands to reason that if the loan is large, and the tax is outstanding for a long time, the interest charge will be correspondingly greater than in other circumstances.

This is the position for pre-clearance interest payments made gross, even after a DTA clearance application has been made, and clearance granted. While the UK may give up its taxing rights, HMRC does not give up its right to recompense for the late payment of the income tax from the time when it was due. UK taxing rights do not simply disappear following a DTA clearance application, taking with them all associated obligations. HMRC surrenders primary taxing rights to the tax authority of the claimant's country of residence, but retains the power to assess income tax which has not been accounted for and which has not been paid gross under a notice giving permission to do so. Interest payments made before the date on which clearance takes effect are not subject to the clearance. This is the statutory position, unaffected by the fact that assessment and collection of the tax might take place after a certified DTA clearance application has been lodged, in circumstances where it would be immediately repayable to the applicant (assuming a successful claim).

However, in circumstances where there is an established entitlement to repayment, HMRC will by concession, circumvent the assessment and repayment process, and if assessments are raised, they will be "interest only" assessments to collect the Section 87 TMA 1970 interest.

Assessing only the Section 87 TMA 1970 late payment interest - concession

Despite the existence of the powers mentioned above to recover tax which is owing, HMRC considers that in circumstances where it is clear that

- the overseas recipient of the interest has applied for, and has been

granted, clearance to receive future interest payments from the source in question without deduction of income tax under SI 1970/488; and

- the lender would be entitled to repayment of the tax for the period for which income tax should have been withheld, so that it is clear that if tax had been accounted for each period concerned, ultimately HMRC would not have retained it

the right to assess and collect the tax will be set aside and only the Section 87 TMA 1970 interest will be sought. This will of course be limited to tax which is at the time of the concession both collectible and repayable. For more detail, see the Thin Cap Practical guidance from INTM570000 onwards.

The notion that tax collected from the payer will inevitably be repayable to the overseas recipient is not one that may be assumed. It must be established as a fact and a legal right. It is not a reason for not withholding.

18.17.11 *Improvement of procedures: Commentary*

The EU has issued a recommendation to encourage relief from withholding tax where treaty relief applies. Where "in exceptional cases" tax relief at source is not feasible, member states are invited to set up standardised and quick refund procedures.[119] The recommendation is not binding but hopefully it will lead to a review of the UK law and practice.

The deduction scheme for royalties allows self-certification. It is suggested that a similar system should be introduced here.

18.18 Withholding tax on interest from deposit-takers

The legislation is in chapter 2 part 15 ITA. HMRC refer to this as the tax deduction scheme for interest ("TDSI") but I prefer not to use that label as this is only one of the three tax deduction schemes for interest discussed in this chapter. HMRC have issued 139 pages of guidance notes.[120] This contains much interesting material which is not set out here for reasons of space.

Section 851 ITA provides:

(1) This section applies if—

---

119 EU recommendation 19 Oct 2009 on withholding tax relief procedures C(2009)7924 final.

120 February 2009, *http://www.hmrc.gov.uk/taxon/guidance-notes.pdf.*

(a) a deposit-taker or building society makes a payment of interest on an investment (see section 855(1)), and
(b) when the payment is made, the investment is a relevant investment (see section 856).

(2) The deposit-taker or building society must, on making the payment, deduct from it a sum representing income tax on it at the basic rate in force for the tax year in which it is made.

Section 852 ITA authorises exceptions to be made by statutory instrument. Sections 853 and 854 ITA provide an elaborate definition of "deposit-taker" but for present purposes it is sufficient to note that the expression includes banks.

18.18.1 *Investment and deposit*

Section 855 ITA provides commonsense definitions of these terms:

(1) In this Chapter "investment" means—
(a) a deposit with a deposit-taker,
(b) a deposit with a building society,
(c) shares in a building society, or
(d) a loan to a building society.

(2) In this Chapter "deposit" means a sum of money paid on terms which mean that it will be repaid (with or without interest)—
(a) on demand, or
(b) at a time or in circumstances agreed by or on behalf of the person who pays it and the person who receives it.

18.19 Relevant investment

The expression "relevant investment" is a label which brings in a number of rules. Section 856 ITA provides:

(1) An investment is a relevant investment for the purposes of this Chapter if it meets—
(a) the individual interest condition (see subsection (3)),
(b) the Scottish partnership condition (see subsection (4)),
(c) the personal representative condition (see subsection (5)), or
(d) the settlement condition (see subsection (6)).

(2) But an investment is not a relevant investment if any of sections 858 to 870 prevent it from being a relevant investment.

18.19.1 *Individual interest condition*

Section 856(3) ITA provides:

> An investment meets the individual interest condition if the only persons beneficially entitled to interest on the investment are individuals.

An investment held by a Baker IIP trust meets this condition as the life tenant (assume, an individual) is beneficially entitled to the interest.

In the case of a settlor-interested trust within s.624, the income is deemed to accrue to the settlor and the settlor alone. If the settlor is an individual, the individual interest condition is satisfied.[121] HMRC appear to agree. TDSI Guidance Notes (October 2012)[122] para 2.3 provide:

> **Anstalts & Stiftungs**
> [1] Anstalts and Stiftungs are Liechtenstein business entities which are fiscally opaque. ...
> [2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit[123] should be considered to belong to the settlor[124] and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.
> [3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust (see paragraph 2.9) and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.

18.19.2 *Scottish partnership condition*

Section 856(4) ITA provides:

> An investment meets the Scottish partnership condition if—
> (a) a Scottish partnership is beneficially entitled to all interest on the investment, and
> (b) that partnership consists only of individuals.

It is difficult to see the need for this since a Scottish partnership is

---

121 If the settlor is non-resident, the NR exemption applies.

122 Accessible *http://www.hmrc.gov.uk/taxon/guidance-notes.pdf*. For TDSI (tax deduction scheme for interest) see 18.18 (Withholding tax on interest from deposit-takers).

123 [Author's footnote] More accurately, the *interest on* the deposit should be considered to belong to the settlor.

124 [Author's footnote] It is assumed that the Stiftung is a settlor-interested trust and that the settlor is UK resident.

transparent for IT purposes. However, it does no harm.

18.19.3 *PR condition*

Section 856(5) ITA provides:

> An investment meets the personal representative condition if
> [a] personal representatives are entitled to any interest on the investment and
> [b] they receive it in that capacity.

Section 856(5)[b] seems to me otiose, though it does no harm.

18.19.4 *Settlement condition*

Section 856(6) ITA provides:

> An investment meets the settlement condition if
> [a] all interest on the investment is income arising to the trustees of a discretionary or accumulation settlement and
> [b] they receive it in that capacity.

Section 856(6)[b] seems to me otiose, though it does no harm.

The key term here is "discretionary or accumulation settlement". Section 873(1) ITA provides a referential definition:

> A settlement is a discretionary or accumulation settlement for the purposes of this Chapter if any income arising to the trustees would (unless treated as income of the settlor) be to any extent income within subsection (2) for the tax year in which it arises.

So we need to turn to s.873(2):

> Income is within this subsection so far as it is—
> (a) accumulated or discretionary income as defined in section 480 (other than income arising under a charitable trust or an unauthorised unit trust in relation to which section 504 applies), or ...[125]

So to follow s.873(2)(a) we need to turn to s.480 ITA. This is discussed elsewhere; see 25.2.1 (Accumulated or discretionary income).

Having dealt with s.873(2)(a), we turn to s.873(2)(b). This is somewhat more confusing:

> (2) Income is within this subsection so far as it is—

125 I consider s.873(2)(b) separately below.

(b) an amount of a type set out in section 482 (unless the trust is a unit trust scheme or the amount is income arising under a charitable trust or is excluded by section 481(5)).

So to follow s.873(2)(b) we need to turn to s.482 ITA. This is discussed elsewhere; see 25.2.3 (Other income taxed at top rates). If one reviews the 11 types set out in s.482 one emerges somewhat confused as these types are not interest. This does not make sense, and I would be grateful to any reader who could explain.

18.20 Exceptions for *non-residents*

18.20.1 *Non-resident individual*

Section 858 ITA provides:

> **858 Declarations of non-UK residence: individuals**
> (1) This section applies to an investment with a deposit-taker or building society which meets the individual interest condition in section 856(3).
> (2) The investment is not a relevant investment if—
> (a) an appropriate person[126] has made the declaration set out in subsection (3) to the deposit-taker or building society,
> (b) the declaration contains the undertaking set out in subsection (4),[127]
> (c) the declaration contains the name and principal residential address of the individual or (as the case may be) each of the individuals entitled to the interest,
> (d) the declaration contains such other information as the Commissioners for HMRC may reasonably require, and
> (e) the declaration is in such form as the Commissioners may prescribe or authorise.

Section 858(3) then sets out the terms of the declaration:

> The declaration is that, at the time when the declaration is made—
> (a) the person who is beneficially entitled to the interest is non-UK

---

126 Section 857(5) provides:
"In this section 'appropriate person' means—
(a) a person who is beneficially entitled to interest on the investment, or
(b) a person to whom any such interest is payable."

127 Section 858(4) provides:
"The undertaking is an undertaking by the person making it to notify the person to whom it is made if any individual in respect of whom it is made becomes UK resident."

resident, or

(b) (as the case may be) all the persons who are so entitled are not non-UK resident.

The form is R105. I refer to this (adopting the terminology of the TDSI guidance note) as "**NR declaration**".

In short, the requirement for exemption from deposit takers withholding is non-residence. Curiously, "usual place of abode" (which is more or less the same) is the requirement for the *imposition* of non-resident's withholding.[128] Some irreconcilable policy choices are at play here, on one hand to facilitate collection of UK tax from non-residents and on the other to facilitate investment in the UK by non-residents.

18.20.2 *Interest in possession trusts*

The person beneficially entitled to the interest is the life tenant and if that person is NOR, the NOR exemption applies.

18.20.3 *Non-resident discretionary trust*

Section 861 ITA provides:

> **861 Declarations of non-UK residence: settlements**
> (1) This section applies to an investment with a deposit-taker or building society which meets the settlement condition in section 856(6).
> (2) The investment is not a relevant investment if—
> (a) an appropriate person[129] has made the declaration set out in subsection (3) to the deposit-taker or building society,
> (b) the declaration contains the undertaking set out in subsection (4),[130]

---

128 See 18.13 (Non-resident's withholding tax).

129 Defined s.861(5): "In this section 'appropriate person' means—
(a) any person who is a trustee entitled to receive interest on the investment, or
(b) a person to whom any such interest is payable."

130 S.861(4) provides:
"The undertaking is an undertaking by the person making it to notify the person to whom it is made if—
(a) the trustees become UK resident,
(b) an individual in respect of whom it is made becomes UK resident,
(c) a company in respect of which it is made becomes UK resident,
(d) an individual partner in any Scottish partnership in respect of which it is made becomes UK resident,
(e) a company partner in any Scottish partnership in respect of which it is made becomes UK resident,
(f) a partner who is a UK resident individual or a UK resident company joins any Scottish partnership in respect of which it is made, or

(c) the declaration contains such information as the Commissioners for Her Majesty's Revenue and Customs may reasonably require, and
(d) the declaration is in such form as the Commissioners may prescribe or authorise.

(3) The declaration is that, at the time when the declaration is made—
(a) the trustees who are entitled to the interest are non-UK resident (see section 475), and
(b) no person who is a trustee has reasonable grounds for believing that any beneficiary under the settlement is—
(i) an individual who is UK resident,
(ii) a company which is UK resident, or
(iii) a Scottish partnership any of the partners of which is an individual who is UK resident or a company which is UK resident.

The term "beneficiary" is defined in s.873 ITA:

(3) A person is a beneficiary under a discretionary or accumulation settlement for the purposes of this Chapter if—
(a) the person is an actual or potential beneficiary under the settlement, and
(b) condition A or B is met in relation to the person.

(4) Condition A is that the person is, or will or may become, entitled under the settlement to receive some or all of any income under the settlement.

(5) Condition B is that some or all of any income under the settlement may be paid to or used for the benefit of the person in the exercise of a discretion conferred under the settlement.

(6) The references in subsections (4) and (5) to any income under the settlement include a reference to any capital under the settlement so far as it represents amounts originally received by the trustees as income.

The definition is the same as in 42.5.1 ("Beneficiary").

The form is Form R105 (DAT).

The TDSI Guidance Notes (October 2012) provide:

R105 (DAT) – change of trustees or beneficiaries

4.33 Where the Financial Institution becomes aware that there has been a change of trustee or beneficiary, it may continue to pay interest without deduction of BRT if it has no reason to believe

- that the trustees are or may be resident, or
- a beneficiary is or may be ordinarily resident/resident in the

---

(g) a person within any of sub-paras (i) to (iii) of subsection (3)(b) becomes or is found to be a beneficiary under the settlement to which the declaration relates."

UK, or

- a new beneficiary is or may be ordinarily resident/resident in the UK.

18.20.4 *Non-resident Scottish partnership*

Section 859 ITA contains an exception for non-resident Scottish partnerships, which is not discussed here.

18.20.5 *Non-resident PRs*

Section 860 ITA provides:

> **860 Declarations of non-UK residence: personal representatives**
> (1) This section applies to an investment with a deposit-taker or building society which meets the personal representative condition in section 856(5).
> (2) The investment is not a relevant investment if—
> (a) an appropriate person[131] has made the declaration set out in subsection (3) to the deposit-taker or building society,
> (b) the declaration contains such information as the Commissioners for Her Majesty's Revenue and Customs may reasonably require, and
> (c) the declaration is in such form as the Commissioners may prescribe or authorise.
> (3) The declaration is that the deceased was non-UK resident immediately before the deceased's death.

One would expect the rule to require withholding where the PRs were subject to tax and not where they were not subject to tax. But the actual residence of the PRs for IT purposes is not relevant. I suspect the reason may lie deep in the history of the provisions, and would be grateful to any reader who could elucidate the puzzle.

The TDSI Guidance Notes (October 2012) provide:

> **R105(PR) – personal representatives**
> 4.21 Form R105 completed by an investor before his or her death will remain in force after the date of death during the winding up of the estate. But if the personal representatives open an account in their own

131 Defined in s.860(4): "In this section 'appropriate person' means—
(a) any of the personal representatives who are entitled to receive interest on the investment, or
(b) a person to whom any such interest is payable."

names, or transfer funds into an account in their own names, that account will not be an NOR account, unless and until the personal representatives make a NOR declaration. Personal representatives must make their declaration on

- a photocopy of the R105(PR) (see Appendix 6), or
- a downloaded copy of the R105(PR) from the HMRC website
- a substitute form which has been approved by the HMRC.

R105(PR) – who can sign?

4.22 In the case of an investment forming part of a deceased person's estate the form can be signed by either

- the personal representative of the deceased (or legal equivalent in the country where they live), or
- the person to whom the interest is paid.

The person signing the declaration should tick the relevant box above the signature to show whether or not he or she is the personal representative (or legal equivalent in that country).

It is the NOR status of the deceased which is important, and not that of the personal representative. Therefore, it is acceptable for a personal representative who is ordinarily resident in the UK to complete the declaration in respect of a deceased NOR investor.

18.20.6 *Policy and practical use of non-resident exceptions*

The former International Tax Handbook para 876 explained the policy reason behind the exemption:

> There were moreover compelling policy considerations. An attempt to tax the interest could have harmed the balance of payments by discouraging foreigners from putting their money into the UK. For the same reason no attempt has been made to require banks to deduct tax from interest paid to non-residents and interest belonging to persons not ordinarily resident[132] is now excluded from the arrangements for deduction of tax from bank interest.

Since the conditions of all these non-resident exceptions could be onerous, I would have thought that the easier course would be to deposit funds with a non resident deposit-taker and not to use a UK bank. IHT may also be a reason for avoiding UK bank deposits. The remittance basis (and the temporary non-residence rules) may be another reason.

---

132 From 2013 the references to ordinary residence in the tax code have been replaced by references to residence. But that change does not affect the point made here.

18.20.7 *Other exceptions*

The following exceptions to deposit takers withholding are mentioned for completeness and not discussed here:

- Client accounts: s.863 ITA
- Qualifying uncertificated eligible debt security units: s.864 ITA
- Qualifying certificates of deposit: s.865 ITA
- Qualifying time deposits: s.866 ITA
- Lloyds premium trust funds: s.867 ITA
- Sale and repurchase of securities: s.869 ITA
- Loans made by deposit takers: s.870(1)(a) ITA
- Debt on a security listed on a recognised stock exchange: s.870(1)(b) ITA
- Debt on a debenture issued by the deposit-taker: s.870(1)(c) ITA

18.21 Duty on deposit-taker

Section 857 ITA provides:

> **857 Investments to be treated as being or as not being relevant investments**
> (1) A deposit-taker or building society must treat every investment with it as a relevant investment unless satisfied that the investment is not a relevant investment.
> (2) If a deposit-taker or building society is satisfied that an investment is not a relevant investment, it may continue to treat the investment as not being a relevant investment until subsection (3) applies.
> (3) This subsection applies when the deposit-taker or building society has information which can reasonably be taken to indicate that the investment is or may be a relevant investment.

The TDSI Guidance Notes (October 2012) provide:

> **UK address**
> 4.9 Where the declaration shows a residential address in the UK it should not be regarded as acceptable unless it is known that the investor is temporarily in the UK (for example, as a student) and the address given is for the time being his or her principal residential address.
> **Incompatible evidence**
> 4.10 If there is information which appears incompatible with the investor's status as indicated in his or her NOR declaration (for example, he or she appears to have a business in the UK), the Financial Institution cannot be satisfied that the deposit is a relevant investment and is obliged to seek further clarification from the investor of his status before the NOR declaration can be acted upon. The Financial Institution should contact the investor seeking an explanation of why

he or she considers themselves to be not ordinarily resident. See also paragraph 4.37. If the investor is able to satisfy the Financial Institution that the declaration is valid, the Financial Institution can accept the declaration and need take no further action. Financial Institutions are recommended to retain some note of the enquiry. If the investor is unable to satisfy the Financial Institution that his or her NOR declaration is valid the Financial Institution should deduct BRT from any interest paid on the deposit.

Joint accounts

4.11 Any investor in a joint account may sign the form R105 on behalf of all the other investors. But if that investor ceases to be a party to the account, for example, if he or she dies, a new NOR declaration will be required. Financial Institutions can only pay interest on a joint account without deduction of tax if the investors are eligible to receive interest without deduction of tax for the same reason. For example, where one investor is entitled to register using form R85 and another investor is entitled to sign an NOR declaration on form R105 interest must be paid net. In other words, a mixture of a registration on form R85 [income within personal allowances] and form R105 is not allowed on the same joint account.

Death of an investor

4.12 If one party to a joint account dies or otherwise leaves the account, a new declaration is not required unless that person was the only signatory of the NOR declaration.

Giving effect to the NOR declaration

4.37 When Financial Institutions receive a NOR declaration which is fully completed in the form currently prescribed (or approved) by HMRC, they must satisfy themselves that there are no grounds for believing that the investor is or may be ordinarily resident in the UK or that the trustees are or may be resident in the UK, or that any of the beneficiaries are or may be ordinarily resident/resident, as appropriate. If they are so satisfied they must pay interest without deducting BRT.

If Financial Institutions have any information suggesting that the investor is or may be ordinarily resident in the UK, or that the trustees are or may be resident, or that any of the beneficiaries are or may be ordinarily resident/resident, they must not pay interest without deduction of BRT unless and until they have satisfied themselves that the investor is NOR or that the trustees are not resident and the beneficiaries are NOR/not resident, as appropriate.

The NOR supervisor normally carries out these checks on behalf of the Financial Institution. Financial Institutions must therefore put in place systems (clerical or computer-based) for ensuring that all relevant information is made available to the NOR supervisor. In particular all accounts in the branch to which the investor or trustees/beneficiaries is/are party, whether deposit or loan accounts (including mortgage accounts), and any such other accounts which are known to the branch should be reviewed. Examples of relevant information which could cast doubt on the validity of the declaration are

- a UK business in which the investor/trustees/beneficiaries appear to participate actively,
- a UK address or postal directions,

- an overseas PO Box or "c/o" address,
- a BFPO address, and
- a notification that the account is the subject of a third party mandate in favour of a UK resident or used as security for borrowing by UK residents or for borrowing in respect of the purchase of the UK property.

In making his or her decisions the NOR supervisor must not ignore information which comes to his or her attention by personal knowledge or otherwise. An example of this might be frequent or regular personal visits to the bank, cash transactions etc. The Financial Institution should put procedures in place so that information of a similar nature which comes to the knowledge of an employee who is responsible for handling any NOR accounts should similarly be drawn to the NOR supervisor's attention.

It will be unusual for such information to provide conclusive proof that the NOR declaration is invalid. However, where the information could reasonably be taken to indicate that the investor may be ordinarily resident in the UK, the trustees may be resident or that any of the beneficiaries may be ordinarily resident/resident, the Financial Institution is obliged to satisfy itself that the evidence does not render the NOR declaration invalid. One way of doing this would be by obtaining written confirmation from the investor. A note of any enquiries made should be kept in the investor's records or the trust records.

It may be possible to resolve doubts which arise without reference to the investor or trustees. For example if the investor is known to be a student in the UK it would be reasonable for him or her to make frequent personal visits to the bank. In such circumstances, no further action need be taken by the NOR supervisor and the NOR declaration may be accepted. NOR supervisors are recommended to retain some record of the decisions.

The continuing obligation

4.38 Once an NOR declaration has taken effect, Financial Institutions must continue to pay interest without deducting BRT unless and until they receive information suggesting that the investor is or may be ordinarily resident in the UK, or the trustees are or may be resident, or any of the beneficiaries are or may be ordinarily resident/resident. This is called the "continuing obligation". They must put in place systems so that as far as possible all relevant information which can be readily linked to a NOR account is brought to the attention of the NOR supervisor. Relevant information is that which points to a UK connection, for example

- notification of a UK address,
- change of account title,
- applications for credit cards, loans or mortgages suggesting UK residence,
- use of the deposit as security for borrowing by UK residents or for borrowing in respect of the purchase of UK property,
- the grant of third party mandates in favour of a UK resident,
- the grant of a "lien" on the account,
- information which comes to the NOR supervisor's attention by personal knowledge,
- the existence of a UK business in which the investor has an active interest, and

- frequent or regular personal visits to the Financial Institution, cash transactions in the UK etc.

Where information indicates that the investor is or may be ordinarily resident in the UK or the trustees are or may be resident in the UK, or any of the beneficiaries are or may be ordinarily resident/resident in the UK, as appropriate, strictly the Financial Institution should treat the deposit as a relevant investment immediately and begin to deduct BRT. However, provided the Financial Institution has taken steps to satisfy itself that the investor has remained NOR, and, if necessary, has asked the investor to confirm that he or she has remained NOR (or in the case of trustees or beneficiaries that they are NOR/not resident, as appropriate), the Financial Institution may continue to pay interest without deducting BRT for up to 180 days to enable enquiries to be concluded. In exceptional cases HMRC may allow up to a further 180 days. Any Financial Institutions needing more than 180 days should apply to ...

HMRC recommends that where the matter is resolved without correspondence the NOR Supervisor records why he or she considers that the declaration remains valid.

Where the investor or the trustees is/are unable to satisfy the Financial Institution that a NOR declaration remains valid the Financial Institution should treat the deposit as a relevant investment and deduct BRT. Where the investor has not given all the necessary information within 180 days (or any further period HMRC may allow) the Financial Institution must deduct BRT from any future payments of interest.

Overseas Students

4.39 Students entering the UK for a period of study lasting less than four years are normally treated as not ordinarily resident in the UK. HMRC recommend that institutions make a diary note to review these accounts at the end of 4 years. If, at the end of 4 years, there is still a UK address on the account then you have 180 days to check the position with the investor.

If there is a reply and the investor is now ordinarily resident in the UK the Financial Institution should cancel the form R105 and deduct BRT from future payments of interest. The investor may be eligible to complete a form R85.

If there is no reply and there is still movement on the account. The Financial Institution should cancel the form R105 at the end of 180 days and deduct BRT from future payments of interest.

If there is no reply, no movement on the account and no evidence suggesting the investor is ordinarily resident in the UK interest can continue to be paid gross.

Change of name of investor

4.40 Where the investor changes his or her name, for example by marriage, it is not necessary to replace the NOR declaration but the Financial Institution should ensure there is a clear audit trail. An example of a clear audit trail would be annotating the form with the revised details and endorsing the amendment with date stamp.

Transfer of account between branches

4.41 A new NOR declaration is not required when an account is transferred between branches. But Financial Institutions should ensure that there is a clear audit trail back to the original NOR declaration.

18.22 EU Savings Directive

The relevant law and practice is found in:

(1) European Directive 2003/48/EC on taxation of savings income in the form of interest payments (**"EUSD"**) which applies to EU states.
(2) International agreements made by non-EU states.[133]
(3) Domestic legislation in each state (where the state has chosen to enact domestic legislation to impose the rules agreed in the Directive or agreement).[134]
(4) Guidance notes issued by each state.[135]

A full discussion would require many volumes.

The EUSD has been amended by Council Directive 2014/48/EU of 24 March 2014, which Member States must adopt by 1 January 2016.

In the following discussion, "**an ISD state**" is a state where Directive rules apply.

In short, the rules apply when a "paying agent"[136] established in one ISD state pays "interest"[137] to an individual who is "resident"[138] in another ISD state. The duties of the paying agent depend on the state in which the paying agent is established: they are not identical in every state.

A UK resident will most often be affected where:

(1) they receive interest from a paying agent in Belgium, Luxembourg, Austria, or a tax haven jurisdiction which has agreed to apply Directive rules; or

---

133 These are:
(1) UK Crown Dependencies: the Channel Islands and the Isle of Man.
(2) UK Overseas Territories: Anguilla, British Virgin Islands, Cayman Islands, Gibraltar, Montserrat, Turks and Caicos Islands,.
(3) Dependent Territories of the Netherlands: Netherlands Antilles and Aruba.
(4) Other countries: Switzerland, Andorra, Liechtenstein, Monaco and San Marino.
http://ec.europa.eu/taxation_customs/taxation/personal_tax/savings_tax/legal_bases/index_en.htm

134 In the UK this has been done by the Reporting of Savings Income Information Regs 2003.

135 In the UK see *http://www.hmrc.gov.uk/esd-guidance/guidance.htm* which is 71 pages long. But UK residents would not be concerned about UK law.

136 This term is elaborately defined: Art.4 EUSD. It includes trustees but not (in short) individual borrowers not carrying on business.

137 This term is also elaborately defined: Art.6 EUSD.

138 This term is defined in Art.3(3) EUSD.

(2) trustees of a transparent *Baker*-type IIP trust[139] in such a jurisdiction pay interest to a life tenant resident in the UK.

The paying agent has two choices:

(1) If the individual gives authority, the trustees may report the interest payments to HMRC in the UK.

(2) Alternatively the trustees must impose a withholding tax (also called a retention tax) on the payment of interest.[140] Statute uses the label "special withholding tax"[141] but I refer to it as **"EUSD withholding tax"**..

Several jurisdictions have taken the view before 2008/09 that the withholding/disclosure requirement does not apply when a payment of interest is made to a remittance basis taxpayer, if the interest is not remitted (and so not subject to UK tax).[142] This is a purposive

---

139 Payment from a discretionary trust or non-transparent IIP trust is not "interest" and so it does not require withholding or disclosure. The EUSD will eventually be extended to cover this.

140 The states that operate this tax are: Austria, Belgium, Luxembourg, Jersey, British Virgin Islands, Netherland Antilles, Turks & Caicos, Switzerland, Andorra, San Marino, Liechtenstein and Monaco.

The EU withholding tax is in addition to any foreign tax that is withheld.

141 Section 136(6) TIOPA.

142 The Channel Islands and the Isle of Man take this view. See eg para 32 of the Isle of Man Treasury guidance notes accessible *http://www.gov.im/lib/docs/treasury/incometax/guidance.pdf.*

"32. In deciding to whom the retention tax will need to be applied the focus should be on the ultimate aim of the Directive which is to enable savings income in the form of interest payments made in one Member State to beneficial owners who are individuals resident in another Member State to be made subject to effective taxation in accordance with the laws of the latter Member State. The emphasis should be on individuals, and also on those individuals who are not only resident in a Member State but are persons subject to effective taxation in accordance with the laws of the Member State. It is therefore consistent with the aims of the Directive, and therefore of the Agreements into which the Crown Dependencies have entered, that the retention tax will not apply to interest payments made to …

- a trust (unless, as in the case of an interest in possession trust, a relevant beneficiary has the immediate and absolute entitlement to an interest payment); …
- an individual where it is known to the paying agent that they benefit in their Member State of residence from an exemption from income tax; or where because no interest is remitted to the individual no liability to income tax arises in their Member State of residence."

Switzerland agrees: see *Eidgenössische Steuerverwaltung: Wegleitung zur EU-*

construction, as the point is not made in the text of the agreements and whether it is correct seems very doubtful. HMRC do not agree, but the point is not within their jurisdiction, and they actually benefit from this practice as they do not have to allow a tax credit. This point ultimately raises questions of EU or international law, but not questions of UK law. However the EU has taken action on this point. An EU press release IP/09/1013, 25 June 2009, provides:

> The European Commission has decided to refer Luxembourg[143] to the European Court of Justice over its incorrect application of certain provisions of the Savings Tax Directive as regards interest payments made to beneficial owners who benefit from so-called "non-domiciled resident" status in their country of residence.
>
> Luxembourg refuses to apply the Directive to beneficial owners who benefit from the so-called "non-domiciled resident" status in their country of residence. Consequently, Luxembourg paying agents do not levy withholding tax on interest payments to such beneficial owners.
>
> According to Luxembourg legislation, beneficial owners are considered to benefit from the "non-domiciled" status, if they are generally exempt from income tax in their State of residence for tax purposes or if the interest payments, as long as they are not transferred to the State of residence ("remittance"), are not subject to tax in that State.
>
> According to the Commission, Luxembourg cannot provide for an exemption from withholding tax in situations other than those expressly provided by article 13 of the Directive (the so-called "voluntary disclosure" procedure which allows the beneficial owner expressly to authorise the paying agent to report information to the tax authorities of his State of residence and the "certificate procedure" which ensures that withholding tax is not levied when the beneficial owner presents to his paying agent a certificate drawn up by his Member State of residence for tax purposes).
>
> The Commission is of the opinion that the paying agent has the obligation to establish the residence of the beneficial owner on the basis of minimum standards, as provided by article 3(3) of the Directive. If the beneficial owner is a resident of another Member State in accordance with these standards, the

---

Zinsbesteuerung (Swiss Federal Tax Authority Guidelines) § 37.

The operation of this practice from 2008/09 is a little more difficult, because the remittance basis depends on making a claim and at the time the interest is paid the claim will not yet have been made. But the practice will probably continue to be applied in cases where the individual confirms that they intend to make a remittance basis claim.

143 Belgium had previously taken the same view, see the 7th edition of this work, but it backed down so the proceedings are now against Luxembourg alone. I do not know if there are also proceedings against the tax havens which take the same view, but maybe Luxembourg will be a test case which will determine the point.

> Member State of the paying agent must ensure that the latter applies the Directive and, in the case of Luxembourg, that the paying agent levies a withholding tax on interest payments to such a beneficial owner.
> Consequently, the Commission considers that Luxembourg's legislation, in its current state, is not compatible with articles 2, 3, 10 and 11 of the Directive.
> Given that the above Luxembourg tax rules were not amended following the reasoned opinion sent by the Commission in November 2008 (IP/08/1815), the Commission has decided to refer the case to the European Court of Justice.
> The Commission's reference number for the case at issue is 2007/2178.

In practice, if the paying agent, guided no doubt by the local authorities, takes the view that the duty of withholding/disclosure does apply to unremitted interest, the individual will usually consent to the disclosure. Then there will be no withholding tax. No difficulty will normally arise out of that disclosure. The EUSD is designed to prevent criminal tax evasion, not lawful tax planning of the kind considered in this book.

18.22.1 *Credit for EUSD withholding tax*

If tax is withheld, 75% of it is paid to the Member State where the beneficiary is resident.[144] But the beneficiary is entitled to a tax credit for 100% of the tax withheld.[145]

HMRC now accept that the credit is applicable even if it relates to unremitted income (un)taxed on the remittance basis.[146] Helpsheet 264 (Remittance basis) for 2013/2014 provides:

> Where SWT is deducted you are treated as having paid, in the year of deduction, an equivalent amount of Income Tax in the UK. This can be set against your UK tax liability of that year, including the remittance basis charge, or repaid to you if the amount exceeds that liability.
> This applies to any tax deducted from foreign income or gains under the UK/Swiss Tax Cooperation Agreement that you opt to have treated as a payment on account. You should make a claim to have the withholding tax treated in this way on your return and you should also supply the certificates provided by your Swiss paying agent to confirm the amounts of withholding tax deducted.
>
> If you do not take this option and HMRC deem, the tax paid clears your liability to UK tax in relation to the relevant income or gains, you will not

144 Art.12 EUSD.

145 Art.14 EUSD.

146 HMRC changed their mind in Tax Bulletin 84 (discussed in the 6th edition of this book).

be able to subsequently claim a repayment.

If the remittance basis applies to you, amounts of SWT repaid to you, or set against your Income Tax liability, will be treated as a remittance of income at the time it is set off or repaid.

Example 4 (Grace)
G received £8,000 of interest from a Liechtenstein account after deduction of SWT of £2,000. G is non-domiciled in the UK and claims for her foreign income to be taxed on the remittance basis. G did not remit any of the money from her Liechtenstein account but includes an equivalent amount of Income Tax in her return for the SWT to set against other UK tax liability.

Enter on page F 2/F 3 of the Foreign pages:	
Country or territory code (page F 2 column A)	LIE
Amount of income received (page F 2 column B)	£0
SWT (page F 3 column D)	£2,000

Setting off the SWT against Income Tax liability will mean that part of the interest income is remitted to the UK and will be a taxable amount at that time. Normally the 'set-off' will be regarded as having been at 31 January following the tax year. G will therefore have to enter taxable income of £2,500 on her next tax return (remittance £2,000 increased by the rate of SWT (20%) £500; total £2,500). She will not be entitled to any relief for SWT for that year as the full amount has been relieved in this tax year.

If you use the remittance basis and you remit part of your foreign income after SWT is deducted, then the amount of your income remitted is calculated by including the appropriate proportion of the SWT.
You are still able to claim the whole amount of SWT deducted in the year at column D.
Example 5 (Adam)
A received interest of £800 from Jersey after deduction of SWT of £200. A is non-domiciled in the UK and claims for his foreign income to be taxed on the remittance basis. £400 of the interest was remitted to the UK.

Interest received in UK	£400
SWT	£100
	£500

Enter on page F 2/F 3 of the Foreign pages:	
Country or territory code (page F 2 column A)	JEY
Amount of income received (page F 2 column B)	£500
SWT (page F 3 column D)	£200

As in Example 4, the £200 set-off will be a further remittance at the date it

> is set off and subject to the same calculation until the total of the income, £1,000, is taxed. In this example £250 of income should be included on the tax return of the year when the SWT £200 is set off.

However, if a credit is given against tax, it is considered that the amount credited is not received in the UK and so not remitted.

If the credit takes the form of a refund, received in the UK, it is considered that the amount received is derived from the foreign interest, and so is regarded as remitted.

18.22.2 *EUSD: Commentary*

Has the EUSD given benefits which justify its cost and complexity? Readers may share the doubts of the Law Society:

> There are also examples of EU legislation that has proved complex but of limited effect. One example is the EU Savings Directive (EUSD) , which whilst it has limited "retail" avoidance by taxpayers banking in their next door Member State and not declaring the resulting income, is very straightforward to circumvent for those who can.[147]

It remains to be seen whether the 2014 amendments will resolve this problem.

147 Law Society response to "Review of the Balance of Competences between the United Kingdom and the European Union – Taxation (February 2013) para 22.

CHAPTER NINETEEN

EXEMPT INTEREST OF NON-RESIDENTS

19.1 Exempt interest: Introduction

This chapter considers exemptions for interest on:
(1) FOTRA securities;
(2) foreign currency securities;
(3) international securities

The OECD summarises the policy background for the exemptions:

> 7.5 Where the payer of the interest happens to be the State itself, a political subdivision or a statutory body, the end result may well be that the tax levied at source may actually be borne by that State if the lender increases the interest rate to recoup the tax levied at source. In that case, any benefits for the State taxing the interest at source will be offset by the increase of its borrowing costs. For that reason, many States provide that such interest will be exempt from any tax at source.[1]

19.2 Meaning of "FOTRA Securities"

Section 713(2) ITTOIA provides:

> In this Chapter "FOTRA security" means—
> (a) a security issued with a condition about exemption from taxation authorised by section 22 of F(No.2)A 1931,
> (b) a gilt-edged security which was issued before 6th April 1998 and without any such condition (other than 3½% War Loan 1952 Or After), or
> (c) 3½% War Loan 1952 Or After.

FOTRA stands for 'Free of Tax to Residents Abroad'.

---

1 OECD Commentary to article 11 OECD Model Treaty. The OECD are considering exemption provided in a DTA, but the policy points to a general exemption.

19.2.1 *The exemption condition*

Section 713 ITTOIA provides:

> (3) In this Chapter "the exemption condition" has the meaning given by subsections (4) to (6), according to the kind of FOTRA security involved.
> (4) In relation to a security within subsection (2)(a), it means the condition authorised by section 22 of F(No 2)A 1931.
> (5) In relation to a security within subsection (2)(b), it means a condition with which 7.25% Treasury Stock 2007 was first issued, being a condition treated by section 161(1) of FA 1998 (non-FOTRA securities)—
>
> (a) as a condition with which the security within subsection (2)(b) was issued, and
> (b) as a condition authorised in relation to its issue by section 22 of F(No 2)A 1931.
>
> (6) In relation to 31/2% War Loan 1952 Or After, it means a condition of its issue authorised by section 47 of F(No 2)A 1915.

For these provisions see 62.5 (Conditions for FOTRA exemption).

19.3 Deduction at source

Section 893 ITA 2007 provides:

> (1) A payment of a UK public revenue dividend is payable gross if—
>
> (a) it is a payment of interest on gross-paying government securities, and
> (b) no deduction at source application has effect in respect of the securities at the time the payment is made (see section 895).

Thus there are three conditions for gross payment. First the security must be a UK public revenue dividend, defined s.891 ITA:

> In this Chapter "UK public revenue dividend" means any income from securities which—
>
> (a) is paid out of the public revenue of the UK or Northern Ireland, but
> (b) is not interest on local authority stock.

Secondly the security must be a gross-paying government security, defined s.893(2) ITA:

> In this Chapter "gross-paying government securities" means—

(a) gilt-edged securities (see section 1024), or
(b) securities which are the subject of a Treasury direction under section 894(1) or (3).

Thirdly, holders may ask for tax to be deducted at source. It must be rare to want to apply for tax to be deducted, though it might perhaps be convenient for a basic rate taxpayer who does not otherwise have to put in a return.

19.4 FOTRA exemption

Section 714 ITTOIA provides:

> (1) No liability to income tax arises in respect of profits from a FOTRA security if conditions A and B are met. ...
> (3) Condition A is that the profits are stated in the exemption condition to be exempt from income tax.
> (4) Condition B is that any requirements for obtaining the exemption imposed by the security's conditions of issue are met.

A non-resident individual or company would qualify for non-residents IT relief on the interest, so the FOTRA exemption only matters in unusual cases, such as split years (where non-residents income tax relief does not apply).

19.4.1 *Sections 624 and 720*

Section 714 ITTOIA provides:

> (5) Whatever the exemption condition provides, amounts charged under the provisions specified in subsection (6) are not exempted by subsection (1).
> (6) The provisions are—
> Chapter 5 of Part 5 (settlements: amounts treated as income of settlor) so far as it applies to income within section 619(1)(a) or (b), and
> Chapter 2 of Part 13 of ITA 2007 (anti-avoidance provisions: transfer of assets abroad).

These anti-avoidance provisions override FOTRA exemption.

19.4.2 *Restriction on deductions*

For completeness, s.716 ITTOIA provides:

> (1) A person who meets conditions A and B may not bring into account

for income tax purposes—

(a) any amount relating to changes in the value of a FOTRA security, or

(b) expenses related to holding it or to any transaction concerning it.

(2) Condition A is that the person is the beneficial owner of the security.

(3) Condition B is that the person is a person who would be exempt from tax on the security under this Chapter.

This can only apply to traders and is not of general importance.

19.5 Beneficial ownership

For a general discussion of the beneficial ownership requirement, see 62.6 (Beneficial ownership of FOTRA securities). The International Manual provides:

> **368040. The FOTRA condition** [April 2007]
> ...
> *Beneficial ownership of the security*
> To demonstrate beneficial ownership of the security, the claimant must hold the security on the interest date. In strictness a person who has sold a FOTRA security but receives the next interest payment due (an ex-dividend sale) ceases to be the beneficial owner of the security when he sells it.

It would be very strange if an ex-dividend sale caused the interest received post sale to become taxable, and I doubt if that can really be correct. In practice perhaps it does not often happen.[2]

19.6 FOTRA securities held on trust

19.6.1 *Interest in possession trust*

The TSE Manual provides:

---

2 For completeness, The INT Manual continues:
"There is a column on the A1 claim form with the heading 'If sold, date of sale or write still held'. Entries in this column will alert you to a sale before the interest date. You should obtain guidance from Technical Advice Group before you take any action if
• a FOTRA security was sold before the interest date
• that column is left blank"
This is more than a decade out of date since from 1998 interest is paid gross and claims for repayment of deducted tax (formerly on form A1) are not needed.

> **3185. FOTRA securities - resident trustees** [March 2013]
> ... From 6 April 1998 all interest on such securities is paid gross. Trustees need to know whether or not to Self-Assess liability. This depends upon the type of trust involved and the Residence status of the beneficiary.
> *Interest in possession trust (see TSEM1564)*
> For any beneficiary who is not ordinarily resident (NOR) in the UK the interest is not taxable. Trustees should not include it on the returns. The authority for this is *Williams v Singer* 7 TC 387 (TSEM7070). In any circumstances the interest is taxable. It must go on the trust returns.

Thus (although not clear from the statute) all that matters is the residence of the life tenant. That is sensible.

19.6.2 *Discretionary trust*

The position has altered by the abolition of ordinary residence in 2013. In order to follow the transitional rules, one needs to know the original and the current versions of s.715 ITTOIA. It is helpful to set them out in track change format:

> (1) This section applies if—
> (a) a FOTRA security is held on trust, and
> (b) apart from this section, interest payable on the security would not be exempt from income tax under section 714 because of the security not being in the beneficial ownership of a ~~person not ordinarily UK resident~~ non-UK resident person.
> (2) For the purposes of determining whether the interest is exempt under section 714 it is to be assumed that the security is in the beneficial ownership of a ~~person not ordinarily UK resident~~ non-UK resident person if none of the beneficiaries of the trust ~~is ordinarily UK resident at the time when~~ is UK resident for the tax year in which the interest arises.
> (3) In subsection (2) "beneficiaries of the trust" includes any person known to the trustees as a person—
> (a) who is, or will or may become, entitled under the terms of the trust to receive income under the trust, or
> (b) to whom or for whose benefit such income may be paid or applied.
> (4) In subsection (3) "income under the trust" includes any property held on the terms of the trust and falling to be treated as capital so far as it is or represents amounts received by the trustees as income.

Para 52 sch 46 FA 2013 provides the transitional relief:

> In relation to a FOTRA security issued before 6 April 2013, the amendments made by this paragraph apply only if the security was acquired by the trust on or after that date.

ITTOIA EN change 116 provides:

> **Change 116: Interest from FOTRA securities held on trust: s.715**
> This change gives statutory effect to a practice relating to interest arising from FOTRA securities held on trust.
> FOTRA exemptions apply where gilt-edged securities are in the beneficial ownership of persons who are not ordinarily resident in the UK. The source legislation, principally section 154 of FA 1996, is rewritten in Chapter 6 of Part 6 of this Act. The beneficial ownership test lies within the definition of "FOTRA security" as it is part of the exemption condition of the securities. (See, in particular, section 22 of F(No 2)A 1931).
> Although in the case of bare trusts and trusts with an interest in possession, it is fairly clear where the beneficial ownership lies, in the case of discretionary or accumulation trusts it can be difficult to apply the beneficial ownership test. In some types of trust the beneficial ownership of an asset is, in effect, in suspense. In others, while it may be clear where the beneficial ownership lies, it may belong to a different person from the person entitled to the income.

The author does not have a sound grasp of the English law concept of beneficial ownership, but it does not matter, as the passage continues:.

> In practice, where interest from FOTRA securities held in trust arises to trustees and none of the beneficiaries of the trust is ordinarily resident in the UK, the beneficial ownership test is regarded as met whatever kind of trust is involved and no account is taken of whether the trustees themselves are resident or ordinarily resident. So if all the potential beneficiaries of a discretionary or accumulation trust (that is, those who have the right, at the discretion of the trustees, to benefit from the trust income or accumulated income) are not ordinarily resident in the UK, the FOTRA beneficial ownership test is treated as having been met.
> Section 715 of this Act gives effect to this practice. So, for the purposes of determining whether interest arising from a FOTRA security held in trust is exempt from income tax under section 714 of this Act, it is to be assumed that the security is in the beneficial ownership of a person who is not ordinarily resident if none of the beneficiaries of the trust is

resident when the interest arises. (See section 715(1) and (2)). Section 715(3) defines "beneficiaries of the trust" widely so as to cover all potential income beneficiaries of discretionary and accumulation trusts. Section 715(4) brings in beneficiaries receiving accumulated income. This change is in taxpayers' favour in principle. But it is expected to have no practical effect as it is in line with current practice.

This applies even to a UK resident trust.

Relief is available under ESC B18 in a case where:

(1) some beneficiaries are UK resident (so the requirements of this relief are not met) but
(2) the trustees distribute income to a non-ordinarily resident beneficiary.

19.7 Interaction of FOTRA exemption and DT relief

DT relief is obviously not needed where FOTRA exemption applies or where non-residents IT relief applies. There are a few gaps where DT relief could be useful, for instance, an individual who is UK-law UK resident but is treaty-resident outside the UK (under the tie-breaker). The International Manual provides:

> **368110. FOTRA and DT claims** [April 2007]
> A person entitled to exemption from UK income tax on interest payments from a FOTRA security may claim repayment of some or all of the tax deducted under the terms of an interest article in a DTA. You should treat any such claim as a claim under the interest article. It follows that the claimant must satisfy the conditions of the DTA rather than the conditions for FOTRA exemption. In effect the payment loses the label of FOTRA and is treated in the same way as any other interest payment.
> In practical terms it makes no difference if the claimant is entitled to full relief under the DTA. However the person who received the FOTRA interest may be able to claim repayment of the tax deducted by meeting the requirements of the DTA without meeting the beneficial ownership condition for FOTRA exemption.
> If the claimant is only entitled to partial repayment of the tax deducted under the DTA he will probably receive credit for the UK tax retained against his liability to tax on the interest in his country of residence. You should therefore make the payment as claimed because to increase the payment may cause the claimant inconvenience when settling his liability to tax in the country of residence. You could explain to the claimant that full repayment would be available if he made a claim on form A1.

This is more than a decade out of date since from 1998 interest is paid gross and claims for repayment of deducted tax (formerly on form A1) are not needed. But the underlying points are still correct.

19.8 Exempt foreign currency securities

19.8.1 *Securities qualifying for relief*

Section 755 ITTOIA provides:

> (1) This section applies to interest on—
> (a) such foreign currency securities issued by a local authority or a statutory corporation as the Treasury direct, and
> (b) such foreign currency loans made to a statutory corporation[3] as the Treasury direct.

I refer to securities within s.755 as **"exempt foreign currency securities"**.

Section 756 ITTOIA defines "foreign currency" security:

> (1) For the purposes of section 755, a security or loan is a foreign currency one if under its terms the currency to be used for repayment is not sterling.
> (2) Subsection (1) is subject to the following qualifications.
> [Subsections (3) and (4) are transitional rules for securities issued before 6 April 1982.]
> (5) If in the case of a security there is an option as to the currency to be used for repayment, the security is only to be treated as a foreign currency one if the option is exercisable only by its holder.
> (6) If in the case of a loan there is an option as to the currency to be used for repayment, the loan is only to be treated as a foreign currency one if the option is exercisable only by the person for the time being entitled

---

3 Terms are defined in s.755(4) ITTOIA:
In this section—
"company" means a company, as defined in section 1(1) of the Companies Act 2006 (c 46),
'foreign currency', in relation to loans and securities, has the meaning given by section 756, and
'statutory corporation' means—
(a) a corporation incorporated by an Act (other than a company), or
(b) any other corporation on which functions connected with carrying on an undertaking are conferred by an Act or by an order made under or confirmed by an Act.

to repayment or eventual repayment.

19.8.2 *Exemption from deduction at source*

Section 981 ITA provides:

> Despite the provisions of this Part there is no duty to deduct a sum representing income tax from a payment of interest within section 755(1) of ITTOIA 2005 (interest on foreign currency securities etc owned by non-UK residents).

19.8.3 *Tax exemption*

Section 755(2) ITTOIA provides:

> No liability to income tax arises in respect of interest to which this section applies if—
>
> (a) in the case of interest on a security, its beneficial owner is a non-UK resident, and
>
> (b) in the case of interest on a loan, the person for the time being entitled to repayment or eventual repayment is a non-UK resident.

A non-resident individual or company would qualify for non-residents IT relief on the interest, so the exemption does not matter in practice.

19.8.4 *Section 624 and 720*

Section 755(3) ITTOIA provides:

> But interest is not exempt under subsection (2) because a person is a non-UK resident if it is treated as another person's income under—
>
> Chapter 5 of Part 5 (settlements: amounts treated as income of settlor), or
>
> Chapter 2 of Part 13 of ITA 2007 (anti-avoidance provisions: transfer of assets abroad).

This is the same as the rule for FOTRA securities.[4]

ITTOIA EN provides:

> Subsection (3) of the section is an anti-avoidance provision. Section 581(3) of ICTA is very widely drafted: "where any income of any person is by virtue of any provision of the Income Tax Acts to be deemed to be income of any other person, that income shall not be

4 See 19.4.1 (Sections 624 and 720).

exempt ..". In fact, there are only two sets of provisions under which this type of income could be deemed to be income of another person. The relevant provisions are listed in subsection (3) of the section.

19.8.5 *Commentary*

If the aim is to encourage investment in local authority and similar securities, why should the exemption be limited to foreign currency securities? It seems the object when the rules were introduced in 1969 was to encourage loans from foreign lenders who would not wish to lend in sterling; borrowers fared badly because of the devaluation in the subsequent sterling crisis.

Alignment of the foreign currency security with the FOTRA rules would be a small but worthwhile simplification. However the Treasury when asked for a list of exempt foreign currency securities stated that they did not hold the information and could locate no record of a direction having been given under s.755 ITTOIA! It may well be that no exempt foreign currency securities exist, and the entire legislation is dead letter law. I would be grateful for readers comments on that.

19.9 Securities of international organisations

19.9.1 *Inter-American Development Bank*

Section 773 ITTOIA provides:

> (1) No liability to income tax arises for a non-UK resident in respect of income from a security issued by the Inter-American Development Bank if the liability only arises because one or more of circumstances A to C apply.
> (2) Circumstance A is that the security is issued in the UK or in sterling.
> (3) Circumstance B is that the income is made payable or paid in the UK or in sterling.
> (4) Circumstance C is that the Bank maintains an office or other place of business in the UK.

This reflects Section 9 of the Agreement Establishing the IDB:

> (c) No tax of any kind shall be levied on any obligation or security issued by the Bank, including any dividend or interest thereon, by whomsoever held:
> (i) which discriminates against such obligation or security solely because it is issued by the Bank; or
> (ii) if the sole jurisdictional basis for such taxation is the place or

currency in which it is issued, made payable or paid, or the location of any office or place of business maintained by the Bank.

(d) No tax of any kind shall be levied on any obligation or security guaranteed by the Bank, including any dividend or interest thereon, by whomsoever held:

(i) which discriminates against such obligation or security solely because it is guaranteed by the Bank; or

(ii) if the sole jurisdictional basis for such taxation is the location of any office or place of business maintained by the Bank.[5]

19.9.2 *Designated international organisations*

Section 774 ITTOIA provides:

(1) No liability to income tax arises for a non-UK resident in respect of income from a security issued by an organisation if—

(a) the organisation has been designated by the Treasury for the purposes of this section, and

(b) the liability only arises because one or more of circumstances A to C apply.

(2) Circumstance A is that the security is issued in the UK or in sterling.

(3) Circumstance B is that the income is made payable or paid in the UK or in sterling.

(4) Circumstance C is that the organisation maintains an office or other place of business in the UK.

(5) The Treasury may by order designate for the purposes of this section—

(a) any of the Communities,

(b) the European Investment Bank,

(c) any international organisation that meets conditions A and B.

(6) Condition A is that one of its members is the UK or any of the Communities.

(7) Condition B is that the agreement under which that member became a member provides for the same kind of exemption from tax for income from securities issued by the organisation as this section provides.

See the Bretton Woods Agreement Order in Council, 1946 (SR&O 1946 No 36); International Finance Corporation Order 1955; International Development Association Order 1960; International Monetary Fund (Immunities and Privileges) Order 1977/825; International Organisations

5 *http://idbdocs.iadb.org/wsdocs/getdocument.aspx?docnum=781584*

(Tax Exempt Securities) Order 1984; European Communities (Tax Exempt Securities) Order 1985; International Organisations (Tax Exempt Securities) Order 1991.

CHAPTER TWENTY

DIVIDEND INCOME

20.1 Dividends and distributions: Introduction

A full discussion of the taxation of dividends and distributions needs a book to itself. This chapter focuses on matters closest to the themes of this book.

This chapter considers three sets of provisions:

(1) Dividends/distributions from UK resident companies: Chap 3 Part 4 ITTOIA
(2) Dividends/distributions from non-resident companies:
    (a) Chapter 4 part 4 ITTOIA (Income dividends)
    (b) Chapter 8 part 5 ITTOIA (Income distributions)
(3) Double taxation relief

I do not discuss the corporation tax treatment of dividend/distributions received by UK resident companies.

Unfortunately there (at least) *five* different definitions of dividend/distribution! Each set of provisions discussed here has a distinct definition, with CT (not discussed here) different again. The definition of distribution for company law purposes is different from the tax definitions. I have considered devising distinct terminology, but it is clearest to follow the statutory terminology – as long as one bears in mind that dividend/distribution has distinct meanings in each context.

20.1.1 *Cross references*

The following topics are considered elsewhere:

14.2 (Location of source of income: Territorial scope of IT)
14.9 (Split years: savings & investment & miscellaneous income)

20.2 Income from UK resident company

20.2.1 *The charge to IT*

Section 383(1) ITTOIA imposes the charge:

> Income tax is charged on dividends and other distributions of a UK resident company.

It does not matter whether the receipt is a dividend or "other distribution"; hence I refer to "dividends/distributions".

Section 384(1) ITTOIA provides:

> Tax is charged under this Chapter on the amount or value of the dividends paid and other distributions made in the tax year. ...

There is no reference to the remittance basis rules in part 8 ITTOIA, so dividends and distributions from UK resident companies are taxed on the arising basis (even for remittance basis taxpayers). This is because dividends/distributions from UK resident companies are regarded as UK source income. Thus the legislation adopts or enacts the decision in *Bradbury v English Sewing Cotton* 8 TC 481 that the source of income from shares is located where the company is resident.

20.2.2 *Dividends of a capital nature*

Section 383(2)(3) ITTOIA extends the charge to distributions of a capital nature, for instance, certain bonus issues of shares or securities:

> (2) For income tax purposes such dividends and other distributions are to be treated as income.
