> (3) For the purposes of subsection (2), it does not matter that those dividends and other distributions are capital apart from that subsection.

20.2.3 *Definition of dividend/distribution*

Section 989 ITA defines "distribution" by reference to the wide and elaborate definition in CTA 2010:

> The following definitions apply for the purposes of the Income Tax Acts—
> "distribution" has the meaning given by Chapters 2 to 5 of Part 23 of CTA 2010, disregarding section 1027A of that Act.

20.2.4 *Tax credit*

Section 397 ITTOIA provides:

> (1) A UK resident or eligible non-UK resident receiving a qualifying distribution made by a UK resident company is entitled to a tax credit equal to one-ninth of the amount or value of the distribution (but see

subsections (3) and (6)).

(2) Such a person may claim to deduct the tax credit from—

(a) the income tax charged on the person's total income for the tax year in which the distribution is made.

(3) Subsection (1) only applies so far as the distribution is brought into charge to tax, and accordingly if the person's total income is reduced by any deductions which fall to be made from the distribution, the tax credit for the distribution is reduced in the same proportion as the distribution.

Section 397(3) ITTOIA prevents the tax credit being repayable. The SAI Manual provides:

> **5100. Tax credits on qualifying distributions** [November 2011]
> [The Manual paraphrases s.397(3) ITTOIA and continues:] So, for example, if an individual's total income is reduced by deductions (for example, personal allowances) such that the qualifying distributions are not, or are not wholly, brought into charge to tax, the value of the tax credits attaching to those distributions are correspondingly reduced. So a person may be entitled to a tax credit whose value is nil.

20.2.5 *Eligible non-UK resident*

Section 397(4) ITTOIA provides:

> For the purposes of this section "eligible non-UK resident", in relation to a qualifying distribution, means an individual who at any time in the tax year in which it is received is a non-UK resident within
>
> [a] section 278(2) of ICTA or
>
> [b] section 56(3) of ITA 2007 (Commonwealth citizens, EEA nationals etc.).

Subsection (4)[a] has no effect as s.278 ICTA was repealed in 2009 (the drafter forgot to repeal the cross reference here).

There are seven categories of individuals within s.56(3) ITA, of which the only important one is EEA nationals.[1]

The individual has only to fall into the relevant category 'at any time' in the tax year, not necessarily throughout the tax year.

For completeness, s.397(5) ITTOIA provides:

> If a distribution is, or is treated under any provision of the Tax Acts as, the income of a person ("P") other than the recipient ("R"), P (not R) is treated as receiving it for the purposes of this section (and so P (not R)

1 See 47.6.1 (Entitlement to personal allowances: UK residents).

is entitled to a tax credit if P falls within subsection (1)).

20.2.6 *Grossing up*

Section 398(1) ITTOIA[2] provides for grossing up a dividend/distribution by the amount of the tax credit:

> If a person is entitled to a tax credit under section 397 or 397A in respect of a dividend or other distribution, the amount or value of the dividend or other distribution is treated as increased by the amount of the tax credit for all income tax purposes (except sections 397(1) and 397A(1)).

For instance:
Dividend: £1,000 **("net amount")**
Tax credit (one ninth): £111
Dividend plus tax credit: £1,111 **("gross amount")**

20.2.7 *Recipient non-eligible person: effective tax credit*

Section 399 ITTOIA provides:

> (1) This section applies if a person is not entitled to a tax credit under section 397 or 397A for a qualifying distribution included in the person's income for a tax year.
> (2) The person is treated as having paid income tax at the dividend ordinary rate on the amount or value of the distribution (but see subsection (7))...
> (6) The income tax treated as paid under subsection (2) is not repayable.

I call this **"an effective tax credit"** as the legislation uses the expression "tax credit" in the strict sense of a tax credit under s.397 or 397A.

Section 399(7) ITTOIA contains four exceptions concerning specialist topics not discussed here.

20.2.8 *Grossing up income of non-eligible person*

Section 399 ITTOIA provides:

> (3) For the purposes of subsection (2), if the person is non-UK resident the amount or value of the distribution is treated as the grossed up amount, unless the person is a company which is beneficially entitled to the income.

---

2 Flagged by s.384(3) ITTOIA.

> (4) If the person is non-UK resident, the amount or value of the distribution is treated for the purposes of Chapters 3, 4 and 6 of Part 9 of ITA 2007 (special rates for trustees' income) as the grossed up amount.
> (5) In this section "the grossed up amount" means the actual amount or value of the distribution, grossed up by reference to the dividend ordinary rate for the tax year.

This is relevant to a non-resident trust because (in the absence of treaty relief or non-residents IT relief) it affect how much tax is paid at the dividend rates.

A non resident individual does not usually care about grossing up, since no tax is due beyond the effective tax credit[3] but grossing up might be relevant to an individual treaty-resident in a state where the treaty allows repayment of the tax credit.

20.3 Income from non-resident company

20.3.1 *Income dividends: the charge to IT*

Section 402(1) ITTOIA imposes a charge to tax on dividends from non-resident companies:

> Income tax is charged on dividends of a non-UK resident company. ...

Section 403 ITTOIA provides:

> (1) Tax is charged under this Chapter on the amount of the dividends arising in the tax year.
> (2) Subsection (1) is subject to ...[4] Part 8 (foreign income: special rules).

Section 403(2) ITTOIA incorporates the remittance basis for foreign source income dividends. When do income dividends have a foreign source? There are many possible connecting factors, but the House of Lords held in *Bradbury v English Sewing Cotton* 8 TC 481 that the source of income from shares is situated in the place where the company is resident – not where it is incorporated or where the share register is kept. (This is a good illustration of how the income tax source rules may differ from the IHT/private international law situs rules.)

---

3 See 42.1 (Non-residents IT relief – Introduction).

4 Omitted words relate to SIPs (outside the scope of this book).

20.3.2 *Definition of "dividend"*

Section 402(4) ITTOIA provides:

> In this Chapter "dividends" does not include dividends of a capital nature.

I therefore refer to s.402 as a charge on **"income dividends"**

Apart from that, "dividend" is (sensibly) undefined so it has its ordinary meaning, whatever that is. ITTOIA EN provides:

> 187. The term "dividend" is not defined in this Act. "Dividend" is a widely used and understood term and is defined only in very specific circumstances not applicable in this context ... . It is not thought appropriate to attempt to define "dividend" here. It will usually be a matter of referring to the relevant company law to determine whether or not a payment made by a company is a dividend.

20.3.3 *Income distributions: the charge to IT*

Section 687 ITTOIA provides:

> (1) Income tax is charged under this Chapter on income from any source that is not charged to income tax under or as a result of any other provision of this Act or any other Act. ...
> (4) The definition of "income" in s.878(1) does not apply for the purposes of this section.[5]

This includes a charge on what I call **"income distributions"** from a non-resident company. I use this term (perhaps slightly artificially) to mean distributions (other than dividends) from a non-resident company which are of an income nature (not capital receipts).

Section 688 ITTOIA provides:

> (1) Tax is charged under this Chapter on the amount of the income arising in the tax year.
> (2) Subsection (1) is subject to ...[6]
> (c) Part 8 (foreign income: special rules).

---

5 The disapplied definition states:
"'Income' includes amounts treated as income (whether expressly or by implication)."
I would be grateful if any reader could explain what s.687(4) is intended to achieve.

6 The exceptions in (a)(b) are outside the scope of this book.

Section 688(2)(c) ITTOIA incorporates the remittance basis for foreign source income distributions. As for dividends, income distributions have a foreign source if the company is non-UK resident.

Section 689 ITTOIA identifies the person liable:

> The person liable for any tax charged under this Chapter is the person receiving or entitled to the income.

Thus we have two separate charging provisions for receipts from a non-resident company:

(1) Section 402 imposes the charge on income dividends.

(2) Section 687 imposes the charge on income distributions.

ITTOIA EN Vol. II explains why:

> 184. Income which, under the source legislation, is charged to tax under Schedule D Cases IV or V, has, where appropriate, been fully integrated with the equivalent income arising from a UK source. In the case of dividends from non-UK resident companies there is no exact equivalent in terms of UK source income. The closest equivalent is the charge to tax on dividends and other distributions from UK resident companies (section 20 of ICTA, Schedule F in the source legislation). But there is no precise overlap. The UK charge, by the adoption of the definition of "distribution" from Part 6 of ICTA ... can include dividends or distributions of a capital nature and can also operate to convert payments that would otherwise be treated as interest into distributions. Any charge on distributions from non-UK resident companies must be confined to income only. For this reason ... it is not thought appropriate to integrate the charges. So a separate charge is needed to cover dividends from non-UK resident companies. ...
>
> 186. ... It is possible that a non-UK resident company may make a distribution of income which would not fall within Chapter 4 of Part 4 of this Act because it is not a "dividend". But if the distribution comprises income it will fall to be dealt with either under alternative specific charges (eg interest) or within "income not otherwise charged", the charge on which appears in Chapter 8 of Part 5 of this Act.

In practice it does not usually matter whether a receipt from a non-resident company is classified as an income dividend (chargeable under s.402) or as an income distribution (chargeable under s.687). In either case the receipt is only taxable if it is income and not capital in nature.

20.3.4 *Tax credit and grossing up*

The topic of grossing up and tax credits on foreign dividends, in s.397A ITTOIA, needs a chapter to itself. It is not discussed here; though I hope to cover it in a future edition.

20.4 Open-ended investment companies

Corporate residence is important as different rules apply depending on the residence of the company. The topic of corporate residence is not discussed in this book, but some narrow points should be mentioned.

ITTOIA EN Vol II discusses the topic of OEIC income:

> 50. The definition of an open-ended investment company in section 468(10) ICTA carries a limitation that the company should be incorporated in the UK under the OEIC regulations of 1996. Section 468(10) ICTA is inserted in section 468 of ICTA by para 10(4) (Open-ended Investment Companies (Tax) Regulations 1997 SI 1997/1154). All open-ended investment companies within the definition in section 468(10) ICTA are therefore subject to the company residence rule in section 66 FA 1988 ("regarded for the purposes of the Taxes Acts as resident"). Open-ended investment company interest distributions treated as made by a UK resident company will be UK source income. Section 249 FA 1994 could in theory also apply to make such companies non-resident (as explained in connection with industrial and provident societies). In that case interest distributions made will be treated as dividends from non-resident companies.

20.5 Receipt from a non-resident company: Income or capital?

What receipts from non-resident companies are of an income nature and so within the charge under s.403 or s.687? For receipts from UK resident companies the question does not arise. The charge is on "distributions" and the term is defined to include a capital distribution. For receipts from non-resident companies:

(1) The charge on dividends excludes dividends of a capital nature.
(2) The charge on distributions applies only to "income" (which comes to the same thing: it excludes distributions of a capital nature).

There is no guidance in the statute. So the income/capital distinction is one of the general law (eg it applies for trust law purposes) which is adopted by UK tax law. Hence many of the cases are trust cases and not

tax cases.[7]

20.5.1 *General principles*

Courtaulds Investments v Fleming summarises the law as follows:

> The rights and interests of shareholders in the assets and the profits of companies in which they hold shares vary widely in detail, but I think they can all be said to fall under three heads:
> (1) rights to participate in the distributable profits of the company while it is a going concern;
> (2) rights to participate in the division of the assets of the company in a liquidation, and
> (3) rights to participate in any distribution to shareholders on an actual or notional reduction of capital.
>
> Anything received under the first head is treated by English law as income of the recipients for both tax purposes and trust purposes (but subject as to the latter to any special provision of the trust) notwithstanding that the source of the distribution may be a profit not of the company's business but on capital account: see *In re Doughty* [1947] Ch 263 and *IRC v Reid's Trustees* 30 TC 431.
>
> Anything received under the second head is treated by English law as capital both for tax purposes and, subject as aforesaid, for trust purposes. So also is anything received under the third head. That this is so for trust purposes is clear from *In re Duff's Settlements* [1951] Ch 923, where moneys received by trustees on a distribution of part of a share premium account under the Companies Act 1948, s.56, [now s.610 Companies Act 2006] were held to be capital for the purposes of their trust. My attention was not drawn to any case where the same has been held to be so for tax purposes on a distribution of a share premium account under s.56, but in my judgment that must follow.[8]

20.5.2 *Dividend/distribution paid out of capital receipts of company*

In *IRC v Reid's Trustees*, capital profits realised on the sale of properties were distributed to shareholders by way of dividend; the payments were of an income nature. Lord Reid said:

> if a foreign company chooses to distribute its surplus profits as dividend, the nature and origin of those profits does not and cannot be made to

---

7 See Law Commission Consultation Paper 175, "Capital and Income in Trusts" (2004) accessible *http://lawcommission.justice.gov.uk/*.

8 46 TC 111 at p.124.

affect the quality of the receipt for the purposes of income tax.[9]

20.5.3 *Dividend/distribution paid out of share premium account*

In *HMRC v First Nationwide*[10] the Court of Appeal said:

> 11. In the UK, prior to 1948, share premium was freely distributable as 'profits'. It was not assimilated to paid-up share capital. It did not fall within the scope of rules designed to protect against reduction of capital.
> In *Drown v Gaumont-British Picture Co* [1937] 2 All ER 609 a shareholder failed to prevent a company from paying a dividend out of share premium; the premium was additional to and was not part of the capital subscribed on the shares. Subject to any inhibition in the articles of association, there was nothing to prevent a company dividing amongst its shareholders the premium obtained on the issue of the shares (617 A-B). It should be noted that, in that case, the premium was carried to a reserve account, to which the premiums made the major contribution (614H and 616H).
> 12. By s.56 Companies Act 1948 [now s.610 Companies Act 2006] share premium was assimilated to a company's subscribed capital and protected as if it were the paid-up capital of the company. The contrasting effect on the categorisation of payments out of share premium, before and after 1948, was clearly identified by both Harman J and the Court of Appeal in *Re Duff's Settlement* [1951] Ch 721 and 923. The importance of that decision, which concerned the question whether payments out of share premium account should be treated as income or capital, lies in the emphasis the courts placed upon the mechanism of payment in order to draw the distinction between capital and income. By virtue of s.56 of the Companies Act 1948, the repayment of share premium, in that case, was made by order of the court on a petition under that section. It followed, the courts agreed, that in contrast to the position before the 1948 Act, as explained in *Drown*, the payments out of share premium account were payments of capital and not income.
> 13. In giving the judgment of the court, Jenkins LJ described s.56 as the essential provision on which the distinction between share capital and divisible profit depends (928).
>
> > "….."the mechanics" are, in our judgment, an essential factor in determining the character as between capital and income of the sum distributed. A company, having (sic) an artificial person, can (as it

9 30 TC 431 at p.450.
10 81 TC 738.

> has been laid down) make a distribution amongst its members (otherwise than in a winding-up) in one of two ways - but only in one of two ways: that is by a distribution of divisible profit, that is, by way of dividend; and by way of a return of capital pursuant to an order of the court upon a petition for reduction of capital in accordance with the Act." (930).

14. The court continued by reflecting upon the nature of share premium. It recognised that it was essentially capital profit and not income (931). But,

> "if distributed in cash before s.56 came into operation (it) would…have been income in the hands of the shareholders, notwithstanding its capital character when considered as a receipt of the company " (932).

15. Harman J's judgment is to like effect. It is of note that he "ranked" the share premium as profits available for distribution (724) because it represented a profit in the sense that the company got more for its shares than the nominal value (727).

The same applies for an Italian company, where the company law is similar to post-1948 UK law:

> 18. The principle that it is the machinery by which the assets are distributed which determines whether they are capital or income finds expression, yet again, in *Courtaulds Investments Ltd. v Fleming* 46 TC 111. Italian law identified the distribution from a share premium reserve as a distribution of capital. It brought share premium within the scope of the rules for protection of capital in a manner similar to s.56 Companies Act 1948. Share premium could not be distributed while the legal reserve fell below 20% of the company's capital. Italian law introduced a new tax on the payment of dividends. To avoid that tax, the Italian company transferred profits of the year, which would have been distributed as dividends, to the legal reserve and thereby freed the share premium for distribution to shareholders. Such a distribution was, under Italian law, a distribution of capital free from the new imposta cedolare. ... Buckley J rejected the Revenue's contention that once the share premium was freely distributable it was, as in the UK before 1948, income. Italian law regarded the distribution as capital, and grafted the share premium onto the paid-up capital of the company (127B-C).

The position is different for a Cayman Island company whose law is similar to pre-1948 UK law:

> 19. Cayman Island Companies Law has followed the reverse route to

that adopted under UK company law. Prior to 1989, the law protected share premium as if it were paid-up share capital, in the same way as it was protected after s.56 of the Companies Act 1948 was introduced in the UK. But by amendment in 1989, share premium was distributable by dividend. ...

20. If, as is clear, prior to 1948 share premium was distributable by way of dividend as income in the UK, it seems equally plain that it was distributable as income in the Cayman Islands following the freedom from restriction in 1989.

...

25. The character of the payment in the hands of First Nationwide is a matter for UK law, the law of the Cayman Islands being relevant, not determinative, (Upjohn LJ in Rae, (q.v. supra [7]). UK law recognises only two species of payment in respect of shares: capital or income payments. Further, the jurisprudence establishes that it is the form by which the payments are made which determines their character. It is true that, under Blueborder's Articles of Association (Art.5.2(b)), had the First and Second Preference Dividends not been paid, the share premium would have been returned as capital on a winding-up or on a redemption. It is also true that, since those dividends were paid, the value of the capital rights which remained, on a winding-up or otherwise, was drastically diminished to £1m. But those features tell one nothing other than, had the mechanism or machinery adopted for distribution of the share premium account been a return of capital on a winding-up or otherwise, the payments would have been capital. Since the payments were made adopting the mechanism of distribution by way of dividend, ... that mechanism dictates the conclusion that the payments were income and not capital. Under the Articles, the owner of the Preference Shares has rights to income, if the premium is distributed as dividends and, if the premium is not distributed as dividends, equivalent capital rights on a winding-up.

HMRC comment in relation to s.1000(1)B CTA 2010, which provides:

(1) In the Corporation Tax Acts "distribution", in relation to any company, means anything falling within any of the following paragraphs.

A Any dividend paid by the company, including a capital dividend.

B Any other distribution out of assets of the company in respect of shares in the company, except however much (if any) of the distribution—

(a) represents repayment of capital on the shares, or

(b) is (when it is made) equal in amount or value to any new

consideration received by the company for the distribution.

For the purposes of this paragraph it does not matter whether the distribution is in cash or not...

This is not quite the same as the charge on income distributions of non-resident companies, but something which would not be not a distribution under s.1000(1)(B) is not an income distribution chargeable to IT under s.687. HMRC say:

[The statement refers to s.1000(1)B CTA 2010 and continues:] Such distributions are likely to comprise redemptions at premium or repurchases of capital.

What is the capital on the shares?

For companies incorporated in the UK under the Companies Act 2006 or its predecessors, this will usually comprise nominal share capital. In addition, where shares are issued at a premium Part 23 CTA 2010 (see section 1025), consistently with section 610(4) Companies Act 2006, makes it clear that share premium is treated as part of the share capital for this purpose. Amounts subscribed for share capital or paid as share premium will be treated as "capital on the shares".

For companies that do not have share capital, for example, companies limited by guarantee, Part 23 CTA 2010 extends the definition of share to include stock or any other interest of a member of the company.

For foreign companies, it may be less clear what capital on the shares consists of. The facts may vary between cases, but HMRC would normally expect to treat as a distribution an amount that:

- is distributable in accordance with the relevant company law, and
- is not made on winding up or as part of a procedure under the relevant company law for reducing share capital.

This is subject to section 1027A CTA 2010 which for the purposes of determining whether an amount is a repayment of capital on the shares, treats a distribution out of a reserve arising from a reduction of share capital as if it were made out of profits available for distribution otherwise than by virtue of the reduction. This will depend on whether section 1027A(4) applies or not to the reduction of share capital.

With regard to application of section 1025 CTA 2010, which treats a repayment of share premium as forming part of the share capital where the premium account was created in respect of new consideration received on the issue of the share capital, HMRC will normally, depending on application of the foreign company law, not treat a payment of out of a share premium account as a repayment of share capital in circumstances where under the foreign company law share

premium is fully distributable and is not treated as forming part of the share capital.

Fiscal and Administrative consolidation (Organschaft)

Some jurisdictions provide for individual entities to enter into arrangements enabling those entities to consolidate their results for tax or administrative purposes. Such arrangements often involve the transfer or payment of amounts between the parties to consolidate results. HMRC takes the view that payments or transfers made as part of such arrangements and under the terms of a contract can be distributions provided that the:

- arrangement is dependent on the existing shareholder relationship for its existence, and
- payments / transfers between the members of the consolidated unit are made in respect of shareholdings (such that transfers or payments are in proportion to shareholdings).[11]

20.5.4 *Partial liquidation*

In *Rae v Lazard Investment Co*, a Maryland company hived off part of its business by a process, unknown to English company law, of partial liquidation; shares in a new company to which the hived off business was sold were distributed to an English investment company which held shares in the Maryland company. The House of Lords held that shares which the English company shareholders received on the partial liquidation were of a capital nature, not income. That conclusion was dictated by the machinery by which the shares were distributed. Lord Reid said:

> In deciding whether a shareholder receives a distribution as capital or income, our law goes by the form in which the distribution is made rather than by the substance of the transaction. Capital in the hands of the company becomes income in the hands of the shareholders if distributed as a dividend, while accumulated income in the hands of the company becomes capital in the hands of the shareholders if distributed in a liquidation. In the present case, the form of the distribution was one unknown to our law - distribution in a partial liquidation. By the law of Maryland, which governs the company and which authorised this distribution, the shares distributed were capital in the hands of the shareholders. Why, then, should we regard them as income? It is said that, if this had been an English company and it had done what

11 *http://www.hmrc.gov.uk/specialist/guidance-payments-uk-companies.pdf* published December 2012.

> Certain-teed did. these shares would have been income in the hands of the shareholders. But an English company could not do what Certain-teed did, for it could not distribute in a partial liquidation.[12]

20.5.5 *Demergers*

Judges have from time to time said that dividends are *prima facie* income, suggesting circumstances in which they will not be of an income nature.[13] But cases where a dividend is not income are exceptional. One example is *Sinclair v Lee* [1993] Ch 497, where a dividend by ICI by the allotment of fully paid-up shares in the new company Zeneca was part of a company reconstruction by way of de-merger, whereby a single company was replaced by two head companies and the trading entity divided into two smaller trading entities.

20.5.6 *Stock option*

The HMRC view was set out in the former Inspectors Manual. The material was deleted from the current SAI Manual, which deals with the issue only cursorily at 5210. I set out the old Inspectors Manual passages, as they no doubt continue to reflect HMRC practice:

> **1611. Distributions/foreign cos: Not in cash: Option cases**
> Published: 9/95
> Where a foreign company declares a cash dividend but offers its shareholders, on their own initiative, the optSAIon of taking up further shares in lieu of the cash dividend, a shareholder who exercises the option to take up the shares is not assessable under Case V of Schedule D in respect of that dividend. If, however, a shareholder does not exercise the option but takes the dividend in cash, he is assessable under Case V of Schedule D on the amount of the cash dividend. See CG51823 regarding the capital gains position.

20.5.7 *Issue of shares or debentures*

The former Inspectors Manual continued:

> **1612. Distributions/foreign cos: Not in cash**
> Published: 9/95
> Where a foreign company capitalises undivided [ie undistributed] profits and —

---

12 41 TC 1 at p.26.

13 e.g. *Reid's Trustees per* Lord Normand (374,375) and Lord Morton (380).

a) issues to its shareholders the additional capital so created, in the form of its own shares or debentures, in proportion to the number of shares already held by them or
b) satisfies a dividend out of such profits by the issue of its own stocks or shares (for example, a "stock dividend" by a United States company),

such a distribution does not constitute income for Case V purposes in the hands of the shareholder. This principle applies when the distribution is actually made in shares, whether or not an effective option was given to the shareholder to receive cash in place of shares (*IRC v Blott*, 8 TC 101; *Whitmore v IRC* 10 TC 645; *IRC v Fisher's Executors*, 10 TC 302; *IRC v Wright* 11 TC 181). ...

In cases where the distribution is not actually made in shares and the shareholder accepts cash from the company under an option given to him to receive cash in place of shares, the cash is assessable as income in accordance with IM1610.

1614. Distributions/foreign cos: Certificates of indebtedness

Published: 9/95

As regards liability in respect of dividends received in the form of certificates of indebtedness redeemable at a future date, see *Associated Insulation Products v Golder* 26 TC 231.

See also IM4580 as regards liability on the sale or transfer of such certificates.

20.5.8 *Dividend reinvestment plans*

The former Inspectors Manual continued:

1615. Dividend reinvestment plans

Published: 9/95

Some foreign companies, particularly in North America and Australia, establish dividend reinvestment plans for their shareholders. Such plans can be structured in a number of different ways, some of which result in liability under Case V when a dividend is declared, and others which do not. At one extreme is the pure bonus issue, when a dividend is declared payable in shares with no option for the shareholder to take cash. Alternatively a company may arrange for cash dividends to be paid to a third party, typically a bank, which then applies the dividends in the purchase of additional company shares in the market on behalf of the shareholder. The first situation falls within the principle of *IRC v Blott* (8 TC 107) – see IM1612. The second gives rise to a Case V charge because the reinvestment in the company is regarded as a voluntary application of income which has already arisen to the shareholder.

> Between these two extremes lies a variety of situations, each of which must be considered by reference to their own facts to determine whether a Case V charge arises...

20.6 Distribution to non-shareholder

20.6.1 *Company law background*

A payment from a company to a non-shareholder is not a dividend. The question arises as to whether it might be an income distribution, taxable under s.687 ITTOIA.

It is well established that for company law purposes:

(1) Whether a transaction amounts to a distribution is not simply a matter of form (unlike, say, the question of whether a payment is a dividend, for which certain formalities are required).

(2) The label attached to the transaction by the parties (eg a sale, or remuneration) is not decisive.

(3) A transaction between a company and a non-shareholder may constitute a distribution, if the company and the non-shareholder have the same ultimate beneficial owner.[14]

The classic cases involve a sale at an undervalue from one company to another company where both had the same ultimate beneficial owner. This matters for company law purposes because of the company law rules that a distribution from a UK company can only be made out of distributable profits, and in the absence of distributable profits, there is an unlawful distribution. A fortiori, a gift to or for the benefit of a shareholder or ultimate beneficial owner would in principle constitute a distribution.[15] See *Clydebank Football Club Ltd v Steedman*:

> "Distribution" is not further defined than by [s.829 CA 2006] but it would appear that generally a distribution will be a transfer without consideration given by the recipient. The object of the statutory code is to prohibit the (gratuitous) return to shareholders, other than by specified means, of subscribed capital or assets representing the same. However, ... a transfer involving the passing of some consideration may in certain circumstances give rise to a distribution. That is because a

---

14 See Aveling Barford v Perion [1989] BCLC 626: "The fact that the distribution was to Perion rather than to Dr. Lee or his other entities which actually held the shares in Aveling Barford is in my judgment irrelevant."

15 Further consideration is needed in the case of a charitable gift.

> transfer, albeit some consideration is given, may involve in substance a gift of capital to the transferee.[16]

The rule that a sale at an undervalue is a company law distribution has been modified by s.845 CA 2006, to facilitate sales at book value; but that does not affect the rule that a payment from a company to a non-shareholder for no consideration[17] may be classified as a distribution for UK company law purposes, and so unlawful in the absence of distributable profits.

How does one reconcile this with s.829 CA 2006 which provides:

> In this Part [part 23 CA 2006] "distribution" means every description of distribution of a company's assets *to its members*...

The word "to" seems to have been read as "to or at the direction of" or "to or for the benefit of". (Alternatively as there are two sets of company law rules governing distributions, the statutory rules and common law rules, a distribution to a non-shareholder could be said to be at least a "distribution" for the purposes of the latter. But the cases do not make this distinction.)

In practice the tax question arises in relation to foreign companies, whose company law may not impose the same restrictions on distributions as UK law. In Jersey, for instance, a distribution is (in short) permitted as long as the company remains solvent. It might be that some foreign company laws may not classify a gift as a distribution at all. But whether a payment is a distribution within the meaning of a UK tax statute is a matter of UK law and is not determined by the label applied by the foreign law.

20.6.2 *Tax law position*

What is the tax position when a non-resident company makes a distribution to a non-shareholder? Suppose:

(1) the company is owned by A, an individual, and
(2) the company makes a distribution to B.

B cannot be subject to income tax as B has no source of income.

A (if UK resident) will be chargeable to tax on the distribution if A is a

---

16 [2002] SLT 109 at [55] approved in *Progress Property v Moorgarth Group* [2011] 2 All ER 432.

17 or a sale of an asset for consideration which is less than book value.

person receiving or entitled to the income.[18] But there is no reason why A should be such a person.

This is why the rules for UK resident close companies extend the meaning of distribution to include benefits to associates of participators.

What if the company is owned by a discretionary trust, and the company makes a distribution to B, a beneficiary? There are several possible solutions:

(1) The distribution is income of B in the form of a company distribution.
(2) The distribution is income of B in the form of a trust distribution.
(3) The distribution is:
    (a) income of the trustees in the form of a company distribution; and
    (b) income of B in the form of a trust distribution.
(4) The payment is a capital receipt of B.

Solution (1) seems sensible but is inconsistent with two basic principles of tax law:

(a) The source doctrine, which states that one cannot receive income (for tax purposes) unless one has a source of income: B has no interest in the company. (B's interest under the discretionary trust is not an interest in the company.)
(b) The rule that discretionary trusts are not transparent.[19]

So this solution is not available.

Appropriate documentation would of course bring the matter into solution (3) but in the absence of a payment to the trustees, it is wrong to regard them as receiving or entitled to income.

The choice is therefore between solutions (2) and (4). It is clear that a payment from the company to a beneficiary is capable of being a capital payment, as that is assumed in IHT and CGT provisions (which will need separate consideration).[20] It is arguable that such payments are always a capital receipt. However it is considered that the payment may be income (solution (2)) or capital (solution (4)) depending on the circumstances of

---

18 See s.404 and s.689 ITTOIA. In the tax avoidance case of *McGuckian v IRC* 69 TC 1 a shareholder-trustee sold the right to a dividend of £400k for £386k (99% of the value) to a third party purchaser. The receipt of the sale price was held to be a receipt of income, but the trustees (and life tenant) were subject to income tax on the amount the trustees (and life tenant) received, ie the sale price; not the (slightly) greater amount of the dividend (which was received by the purchaser).

19 See 25.3.2 (Discretionary trust payment: what is the source?).

20 See 51.8 (Capital payment from close company); 62.16 (Transfer of value by close company). The transactions in securities code may also need to be considered.

the distribution: the same principles apply as a distribution from the trustees: what power are the trustees using when they authorise the company to make the distribution. See 25.8 (Payment from discretionary trust: income or capital receipt?).

The position is different if a company held by a *Baker* trust makes a distribution to a life tenant. The trust is transparent, the life tenant has an interest in the company, and the distribution is taxable under s.687 ITTOIA.

20.7 DT relief for dividend income

It is necessary to consider separately:

(1) A person treaty-resident in the foreign contracting state who receives UK source dividends.

(2) A person treaty-resident in the UK who receives dividends from a company resident in the foreign state; such a person may be entitled to tax relief in the foreign state, but that is not discussed here.

(3) A person who is UK-law UK resident but treaty-resident in a foreign state and who receives dividends from a company resident in a third country.

20.7.1 *OECD model article 10*

Article 10 OECD Model provides:

> 1. Dividends paid by a company which is a resident of a Contracting State to a resident of the other Contracting State may be taxed in that other State.
>
> 2. However, such dividends may also be taxed in the Contracting State of which the company paying the dividends is a resident and according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other Contracting State, the tax so charged shall not exceed:
>
> a) 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends;
>
> b) 15% of the gross amount of the dividends in all other cases. ...

Actual treaties vary, particularly in the terms of art 10(2).

Persons within art.10(2)(a) are sometimes described as **"direct investors"** and those within art.10(2)(b) as **"portfolio investors"**. The labels aer slightly opaque, but it is difficult to think of better. The effective meaning of those terms in any context varies depending on the

wording of the treaty concerned.

20.7.2 *Person treaty-resident in foreign contracting state*

In practice, non-resident individuals and non-resident companies do not need usually treaty relief. They qualify for non-residents IT relief[21] which restricts the tax on dividends to an amount which is covered by the effective tax credit. Treaty relief is relevant to:

(1) Non-resident trusts (if they do not qualify for non-residents income tax relief, because they have UK resident beneficiaries).[22]
(2) Individuals who are UK-law UK resident, but treaty-resident in the foreign state (under the tie-breaker).
(3) Tax year of arrival and departure.

20.7.3 *Repayment of surplus tax credit*

Section 30(9) F(No.2)A 1997 provides:

> The amendments made by subsections (5) and (6) above and rewritten in section 397(3) of the Income Tax (Trading and Other Income) Act 2005 [tax credit not repayable][23] do not affect the entitlement of a person who is not resident in the UK to payment in respect of a tax credit by virtue of arrangements having effect under section 2(1) TIOPA (relief by agreement with other countries).
>
> (10) Where—
>
> (a) arrangements having effect under section 2(1) TIOPA confer on a person not resident in the UK the right to a tax credit under section 397 ITTOIA in respect of a dividend of a company resident in the UK, and
>
> (b) the arrangements contain provision for permitting—
>
> (i) tax to be charged or deducted, or
>
> (ii) a reduction in the amount of the tax credit that is paid to be made,
>
> by reference to the aggregate of the dividend and the tax credit, and
>
> (c) the amount of that tax or that reduction exceeds the amount of the tax credit,
>
> that provision shall only have the effect of reducing to nil the amount of the payment to which the person is entitled in respect of the tax credit.

---

21 See 42.1 (Non-residents IT relief – Introduction).

22 See 42.5 (Trusts: UK beneficiary rule).

23 See 20.2.4 (Tax credit).

Some older treaties give persons who are treaty non-resident in the foreign state the right to be repaid unused tax credit on UK dividends. However:

(1) The number of treaties with a provision of this kind is small, and is diminishing as new treaties replace the older ones.

(2) The reduction in the amount of the tax credit to one ninth usually means that there is nothing to be repaid.

The International Manual provides:

> **343510. Background** [April 2012]
> ...Dividends do not have income tax deducted but have an amount attached to them (not paid to the shareholder at the time of the dividend) called a tax credit. See CTA10/S1109. Some DTAs provide for payment of tax credit. You need to check the details of each DTA. There are two types of investor
> • portfolio investors (someone who owns less than 10% of the total number of issued shares in a UK company) - the dividend article usually provides that the investor is entitled to a tax credit equal to that to which a UK resident individual would be entitled had he received the dividend. Any excess of the tax credit above a deduction of 15% of the aggregate of the dividend and the tax credit is payable.
> • direct investors (where a company controls 10% or more of the voting power of the UK company paying the dividend) - the dividend articles of a small number of DTAs provide that the investor is entitled to a tax credit equal to one-half of that to which a UK resident individual would be entitled had he received the dividend. The relief allowable is a payment of that half tax credit minus 5% or 10% of the aggregate of the dividend plus the half tax credit.
>
> **343520. Portfolio Investors** [April 2012]
> The expression "portfolio investors" describes the great majority of shareholders. They include individual persons, pension funds, companies and others who have invested money in shares issued by the UK company. The number of shares owned by each investor may range from single figures to several million shares. If a shareholder owns 10% or more of the total number of voting shares that have been issued by a UK company they are called a "direct investor".
> Some DTAs contain provisions that allow a portfolio shareholder to claim payment of part of the tax credit. In these treaties the dividend article usually provides that the amount payable is equal to the tax credit minus 15% of the aggregate of the dividend and the tax credit.
> Where the DTA does not provide for payment of tax credits and the shareholder is an individual (a person) see INTM343530.
> The rate of tax credit that is attached to a UK dividend is one ninth of the dividend. The effect of this rate of tax credit is that there is no amount for a portfolio investor to claim (see Section 30(10) F(No2)A 1997).

Example
Dividend £1,000
Tax credit (one ninth) £111.11
Dividend plus tax credit £1,111.11
15% retained in the UK £166.66
Because the amount to be retained in the UK is greater than the original tax credit there is nothing to pay. £111.11 less £166.66 equals nothing.

343540. Direct investors [April 2012]

A "direct investor" may be defined as a company that controls 10% or more of the voting shares of the UK company that is paying the dividend. Many DTAs that provide for payment of tax credits specifically exclude companies that either alone or together with associated companies control 10% or more of the voting power in the company that is paying the dividend. The claim forms contain a question that will allow you to identify these cases.

However, some DTAs contain provisions that specifically allow for payment of part of the tax credit to direct investors. The amount of relief that may be claimed by the non-resident shareholder is one half of the tax credit a UK resident would be entitled to minus 5% or 10% of the aggregate of the dividend plus half the tax credit.

The treaties that contain these special provisions that allow a direct investor to claim payment of part of the tax credit are

• Belgium, see example 1.
• Italy, see example 1.
• Luxembourg, see example 1.
• Netherlands, see example 1, but no amount is payable for dividends paid on or after 6 April 2011.
•Sweden, see example 1.
• Switzerland, see example 1 but no amount is payable for dividends paid on or after 6 April 2009.

Example 1
Rate of tax credit is one ninth of the dividend.
Dividend £1,000,000
Tax credit £111,111.11
Dividend plus half tax credit £1,055,555.55
5% of dividend plus half tax credit £52,777.77
Payment is calculated as half tax credit (£55,555.55) less 5% of dividend plus half tax credit (£52,777.77) equals £2,777.78.

Example 2
(Direct investor company resident in Canada.) Dividend paid on or after 6 April 1999 rate of tax credit is one ninth of the dividend.
Dividend £1,000,000
Tax credit £111,111.11
Dividend plus half tax credit £1,055,555.55
10% of dividend plus half tax credit £105,555.55
Because the amount to be retained in the UK is greater than the original tax credit there is nothing to pay. £55,555.55 less £105,555.55 equals nothing (see Section 30(10) F(No2)A 1997.

20.7.4 *"Dividends"*

Article 10(3) defines dividends:

> The term "dividends" as used in this Article means income from shares, "jouissance" shares or "jouissance" rights, mining shares, founders' shares or other rights, not being debt-claims, participating in profits, as well as income from other corporate rights which is subjected to the same taxation treatment as income from shares by the laws of the State of which the company making the distribution is a resident.

See Avery-Jones et al "The Definitions of Dividends & Interest in the OECD Model: Something Lost in Translation?" [2009] BTR 406.

20.7.5 *Dividends paid through PE*

Article 10(4) OECD Model provides:

> The provisions of paragraphs 1 and 2 shall not apply if the beneficial owner of the dividends, being a resident of a Contracting State, carries on business in the other Contracting State of which the company paying the dividends is a resident through a permanent establishment situated therein and the holding in respect of which the dividends are paid is effectively connected with such permanent establishment. In such case the provisions of Article 7 shall apply.

20.7.6 *Dividends to company which is treaty resident in foreign state*

Article 10(5) OECD Model provides:

> Where a company which is a resident of a Contracting State derives profits or income from the other Contracting State, that other State may not impose any tax on the dividends paid by the company, except insofar as such dividends are paid to a resident of that other State or insofar as the holding in respect of which the dividends are paid is effectively connected with a permanent establishment situated in that other State, nor subject the company's undistributed profits to a tax on the company's undistributed profits, even if the dividends paid or the undistributed profits consist wholly or partly of profits or income arising in such other State.

20.7.7 *Dual resident receives dividends from co resident in third country*

A person who is domestic-law UK resident but treaty-resident in a foreign state may receive dividends from a company which is not a resident of the foreign state.

A person in this category does not qualify for relief under article 10. However relief from UK tax is available under article 21(1) OECD Model (the "other income" article):

> Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

Dividends from companies in third countries are within this as they are "not dealt with in the foregoing Articles".

CHAPTER TWENTY ONE

ROYALTY INCOME

21.1 Royalties: Introduction

This chapter considers the income taxation of royalties. I use the term **"royalty income"** to mean royalties and other receipts from intellectual property. The topic requires a book to itself, and I focus on matters closest to the themes of this book.

I do not consider corporation taxation of royalties, or the EU interest and royalties directive 2003/49/EC of 3rd June 2003 which concerns interest/royalty payments made between associated companies of different member states. These topics would require long books to themselves.

21.1.1 *Cross references*

The following topics are considered elsewhere:
14.2 (Location of source of income: Territorial scope of IT)
14.9 (Split years: savings & investment & miscellaneous income)

21.2 Classification of royalty income for tax

Royalty income is classified for income tax purposes in one of three ways. Statute does not provide much terminology, so I coin the following terms:
(1) **"Trade royalties"**: royalties which constitute a receipt of a trade (or profession; I use the word "trade" to include a profession).
(2) **"Non-trade royalties"**: royalties which are not trade royalties. These may be:

(a) **"Annual payment royalties"**: royalties which are annual payments
(b) **"Non-annual payment royalties**"

The three categories are recognised in *Noddy Subsidiary Rights v IRC* 43 TC 458 at p.474:

> It seems to me that, where you have this position, that a person owns an asset of any kind, whether physical or not, and grants licences under it,

> the activities which he carries on in connection with the grant of those licences may amount to a trade and then Case I of Schedule D applies. On the other hand, at the other end of the scale, the activities may amount to the mere holding of an investment, so that the receipt of income is in the nature of pure income profit and then Case III of Schedule D applies. There may be intermediate cases in which Case VI of Schedule D might apply.

ITTOIA has changed the terminology but not the underlying categorisation.

21.3 Non-trade royalties

After the (somewhat unnecessary) introduction in accordance with the principles of plain English drafting, s.579(1) ITTOIA provides the charge to tax:

> Income tax is charged on royalties and other income from intellectual property.[1]

Section 580 ITTOIA provides:

> (1) Tax is charged under section 579 on the full amount of the income arising in the tax year.
> (2) Subsection (1) is subject to Part 8 (foreign income: special rules). ...

This incorporates the remittance basis for foreign source royalty income.

Non-trade royalties are taxable under chapter 2 part 5 ITTOIA. This is so whether or not the royalties are annual payments or non-annual payments. The distinction between (non-trade) royalties which are annual payments and those which are not (former DVI income) matters for the following reasons:

(1) Deductibility of expenses: Expenses are only deductible from non-

---

1 Section 579(2) ITTOIA defines intellectual property:
"In this section "intellectual property" means—
(a) any patent, trade mark, registered design, copyright, design right, performer's right or plant breeder's right,
(b) any rights under the law of any part of the UK which are similar to rights within paragraph (a),
(c) any rights under the law of any territory outside the UK which correspond or are similar to rights within paragraph (a), and
(d) any idea, information or technique not protected by a right within paragraph (a), (b) or (c)."

annual payment royalties. Section 582 ITTOIA provides:

> (1) This section applies for calculating the amount of income charged under section 579 other than annual payments.
> (2) Expenses wholly and exclusively incurred for the purpose of generating the income are deductible...

(2) Non-residents income tax relief: Annual payment royalties constitute disregarded income and qualify for that relief. Non-annual payment royalties do not qualify.[2]

"Annual payment" is an opaque and unhelpful label for a technical term whose meaning is discussed in a large and rather difficult body of case law,[3] which cannot be discussed here.

21.4 Where is the source of non-trade royalties?

Foreign source royalties are outside the scope of withholding tax and (unless trade royalties) only taxed (if at all) as RFI, so the question of source matters to both payor and recipient.

What is the test to determine the source of non-trade royalties? The INT Manual provides:

> **342520. Copyright royalties** [April 2007]
> If the copyright is exploited in the UK the royalty payment will be regarded as having a UK source and therefore within the provisions of [what is now s.906 ITA]. This is irrespective of the law governing the contract.

The same view is expressed in Hughes & Payne, "Payments for the use of computer software and the deduction of income tax therefrom" [2000] BTR 5 at p.10. It is considered that this is correct.

Another passage in the INT Manual offers a different test:

> **161130. The source rule – concessions** [June 2013]
> ... If the owner of a right such as a patent, trademark or copyright is not engaged in any trade to which the right relates but derives income by exploiting that right, the source of the income may be regarded for the purpose of credit as located in the country where the right is

2 See 42.8 (Disregarded annual payments).

3 Section 582(7) ITTOIA specifies one rule: "The frequency with which payments are made is ignored in determining whether they are annual payments for the purposes of subsection (1)."

enforceable.

But as a result of developments in private international law, the place of enforcement is no longer a useful connecting factor for tax[4] (even though in most cases it will be the same as the place of exploitation).

21.5 Withholding tax

Section 906 ITA provides:

> (1) This section applies to any payment made in a tax year if—
> (a) it is a payment[5] of
> [i] any royalties, or
> [ii] sums payable periodically, in respect of a relevant intellectual property right (see section 907),[6]
> (b) it is one that is charged to income tax or corporation tax, and
> (c) condition A or B is met.

21.5.1 *Withholding tax conditions A and B*

Section 906(2) provides:

> Condition A is that the usual place of abode of the owner of the right is outside the UK.

---

4 See 18.7.4 (Impact of changes in private international law).

5 Section 909(3) ITA extends withholding to payments on account:
(3) Section 906—
(a) applies to payments on account of royalties as it applies to payments of royalties, and
(b) applies to payments on account of sums payable periodically as it applies to payments of sums payable periodically.

6 Section 907 ITA defines "relevant intellectual property right":
(1) In section 906 "a relevant intellectual property right" means—
(a) a copyright,
(b) a right in a design, or
(c) the public lending right in respect of a book.
(2) In this section—
"copyright" does not include copyright in—
(a) a cinematographic film or video recording, or
(b) the sound-track of a cinematographic film or video recording, except so far as it is separately exploited,
"a right in a design" means the design right in a design, or the right in a registered design.
This definition takes film royalties outside the deduction of tax at source regime.

See 18.15 (Usual place of abode). Note the test is the place of abode of the owner of the right.

Condition B is an anti-avoidance rule. Section 906(3) ITA provides:

> Condition B is that—
> (a) a person ("the seller") has assigned the right to another person,
> (b) the usual place of abode of the seller is outside the UK,
> (c) the seller is entitled to periodical payments in respect of the right, and
> (d) the payments are in respect of that entitlement.

Section 906(4) ITA provides one exception:

> But this section does not apply if the payment is made in respect of copies of works, or articles, which have been exported from the UK for distribution outside the UK.

Section 906(5) ITA imposes the obligation to withhold tax:

> The person by or through whom the payment is made must, on making it, deduct from it a sum representing income tax on it at the basic rate in force for the tax year. ...

21.5.2 *Miscellaneous*

Section 908 ITA provides a deduction for commissions:

> (1) If—
> (a) a payment to which section 906 applies is made through an agent who is UK resident, and
> (b) the agent is entitled as against the owner of the right to deduct a sum as commission for services provided,
> section 906(5) and Chapters 8 (deduction at special rates), 15 and 16 (collection) apply as if the amount of the payment were the amount net of the sum deductible as commission.
> (2) But if the person by or through whom the payment is made does not know the commission is payable, or does not know its amount—
> (a) the sum representing income tax required to be deducted under section 906 must be calculated in the first instance on the total amount of the payment, and
> (b) the return to be made under Chapter 15 or the account of the payment under Chapter 16, must be based on that total amount.

Section 909(1) ITA is a timing provision:

> A payment to which section 906 applies is treated for all income and

> corporation tax purposes as made when it is made by the first person who makes it, not when it is made by or through any other person.

Section 909(2) ITA prevents contracting out:

> If, under section 906, a sum representing income tax must be deducted from a payment, any agreement to make the payment without deduction of that sum is void.

21.6 Trade royalties

21.6.1 *Trading rules apply*

The recipient of trade royalties has income of a dual character.

(1) The recipient has trading profits

(2) The receipt is also classified as "royalties" in the usual sense of the word.

Although the income has a dual character, there is only one charge to tax. The charge on trading profits under part 2 ITTOIA has priority over the charge on royalty income in part 5 ITTOIA. Section 575(1) ITTOIA provides:

> (1) Any income, so far as it falls within—
>
> (a) any Chapter of this Part, and
>
> (b) Chapter 2 of Part 2 (receipts of a trade, profession or vocation),
>
> is dealt with under Part 2.

21.6.2 *Source of trade royalty income*

The question whether the trading income has a UK source is naturally to be decided according to the rules which apply to trades/professions. Thus a UK resident trader has UK source trading profits even if the royalties come from abroad, since the trade is at least in part carried on in the UK.

What about trading income arising to a non-resident? There is commonwealth authority. In *Millin v IRC* a South African author received royalties from publishers in respect of works which were written by her in South Africa, but printed and published in England and the USA. This was trading income (or more accurately, professional income but the trade/profession distinction does not matter here). The Appellate Division held that the income arose wholly from a source within South Africa:

> ... the source of the whole amount received for royalties was in the

> Union.[7] It is true that in this case no capital in the ordinary sense of that term was employed by Mrs. Millin. It was the exercise of her wits and labour that produced the royalties. They were employed in the Union, and it matters not, on the analogy of the *Overseas Trust* case,[8] that the grant to her publishers of the right to publish her book was contained in a contract made in England. Her faculties were employed in the Union both in writing the book and in dealing with her publishers, and, therefore, on the test applied in the cases cited, the source of the whole of her income would be in the Union.[9]

21.6.3 *Position of payor of trade royalties*

If the royalties have a UK source, and the owner of the royalties is not in the UK, the deduction at source rules in principle apply. This is so even if the royalties are trade royalties, ie are taxable as trading receipt of the recipient. The fact that the recipient of the royalties is trading, in the UK or not, does not prevent the payment from being "royalties".

Similar principles apply to interest, which can also have the dual character of being interest and a trading receipt.

21.6.4 *Professional author exemption*

The International Manual provides:

> **342590. Professional authors** [April 2007]
> Copyright royalties that are payable to an author/originator of a literary, dramatic, musical or artistic work that has been created in the ordinary course of his profession (an "author by profession") fall into the same category as fees for professional services and do not come under [deduction at source rules]. Payments that are made to an author by profession who usually lives overseas are therefore not subject to deduction of UK income tax at source. This follows the decisions in *Carson v Cheyney's Executor* (38 TC 240) and *Hume v Asquith* (45 TC 251) ...
> A Professional Author can be classed as such if he is clearly the originator of the work(s) concerned. If the claimant is not the originator of the work but has acquired the rights from that person they may not be treated as a professional author.

---

7 The Union of South Africa (1910-1961) was the predecessor to the present Republic of South Africa.

8 *Overseas Trust Corporation v IRC* [1926] AI 444, 2 SATC 71.

9 [1928] AD 207 at p.216.

This practice goes back to a Parliamentary statement:

> Mr Ashton asked the Chancellor of the Exchequer what steps he takes to recover tax on fees paid to British Nationals living abroad by publishers in this country.
> Mr Roy Jenkins. [The deduction at source rule for royalties] requires any person making such payments to deduct tax at the [basic] rate and to pay it over to the Inland Revenue. I am advised that this does not apply to payments made to those who are authors by profession... [10]

Payments to a professional author are said to be fees for services and not "royalties". This is odd, though the oddity is long-established and based on decisions of high authority. In practice it only matters where the author is resident in a jurisdiction without a DTA conferring relief. That would be fairly unusual, which may why the rule has survived.

The same rule must apply to post-cessation receipts. Payments to the executors of an author which are exempt from deduction at source (because they are not payment of "royalties") continue to be exempt after the death of the author.

21.7 DT relief for royalty income

Art 10.1 OECD model treaty provides:

> Royalties[11] arising in a Contracting State and beneficially owned by a resident of the other Contracting State shall be taxable only in that other State.

Art 10.3 and 10.4 contain two standard exceptions not discussed here.[12]

---

10 Hansard HC debates 10 November 1969 vol 781 col 39.

11 Article 10.2 defines royalties:

> The term "royalties" as used in this Article means payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematograph films, any patent, trade mark, design or model, plan, secret formula or process, or for information concerning industrial, commercial or scientific experience.

12 "3. The provisions of paragraph 1 shall not apply if the beneficial owner of the royalties, being a resident of a Contracting State, carries on business in the other Contracting State in which the royalties arise through a permanent establishment situated therein and the right or property in respect of which the royalties are paid is effectively connected with such permanent establishment. In such case the provisions of Article 7 shall apply.

4. Where, by reason of a special relationship between the payer and the beneficial

21.7.1 *Credit for foreign tax on royalties*

Foreign tax may be deducted at source from foreign trade royalties received by a person subject to UK tax on the trading profits. ESC B8 provides:

> **B8 Double taxation relief: income consisting of royalties and "know-how" payments**
> Payments made by a person resident in an overseas country to a person carrying on a trade in the UK as consideration for the use of, or for the privilege of using, in the overseas country any copyright, patent, design, secret process or formula, trademark or other like property
> [1] may in law be payments the source of which is in the UK,
> [2] but are nevertheless treated for the purpose of credit (whether under double taxation agreements or by way of unilateral relief) as income arising outside the UK except to the extent that they represent consideration for services (other than merely incidental services) rendered in this country by the recipient to the payer.

[1] is wrong or poorly expressed. The payments are not "payments the source of which is in the UK". They are receipts of a trade, and the *trading profits* (which are distinct from the payments) is income whose source is in the UK.
[2] is law and not concession, but it does not matter.
INT Manual expands on this:

> **161130. The source rule – concessions** [June 2013]
> *(B) Extra-Statutory concession ESC/B8 - DTR: royalties and 'know how' payments*]
> [The Manual sets out ESC B8 and continues:]
> b) Traders resident in the UK are not entitled to claim credit for any tax which is levied in the foreign country in respect of payments for services which are rendered in the UK and are not merely incidental services. In any such case the net amount of the payment (after deduction of any

---

owner or between both of them and some other person, the amount of the royalties, having regard to the use, right or information for which they are paid, exceeds the amount which would have been agreed upon by the payer and the beneficial owner in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In such case, the excess part of the payments shall remain taxable according to the laws of each Contracting State, due regard being had to the other provisions of this Convention."

foreign tax borne by them on the payments) is included in the computation of profits for UK tax purposes.
The prohibition on credit for foreign tax charged on payments for services rendered in the UK may be overruled by the terms of those double taxation agreements which have a royalties Article which includes technical services in the definition of royalties (see INTM153130) or a separate technical fees Article (see INTM153140) and those agreements deem the source of such payments to be in the country of which the payer is a resident. In such cases, even though the services are rendered in the UK, credit is due for the foreign tax charged on these payments.

21.7.2 *Withholding tax when DT relief applies*

The UK operates a self-certification system. Section 911 ITA provides:

(1) This section applies if—
(a) a company pays a royalty from which it is required to deduct a sum representing income tax under Chapter 6 or 7,
(b) the income tax in respect of the payment is collectible under Chapter 15 or 16, and
(c) the company reasonably believes that, at the time the payment is made, the payee is entitled to relief in respect of the payment under double taxation arrangements.
(2) The company may calculate the sum to be deducted from the payment under Chapter 6 or 7 by reference to the treaty rate.[13]
(3) But, if the payee is not at the time entitled to such relief, this Part has effect as if subsection (2) had never applied in relation to the payment.

This only applies to company payors. In other cases, advance clearance is needed under the procedure discussed in the context of interest.[14]
Section 912 ITA allows HMRC to require withholding:

(1) This section applies if an officer of Revenue and Customs is not satisfied that the payee will be entitled to relief under double taxation arrangements in respect of one or more payments of royalties that a company is to make.
(2) The officer may direct the company that section 911 is not to apply to the payment or payments.

---

13 Section 911(4) ITA defines "treaty rate": "In this section "the treaty rate" means the rate of income tax appropriate to the payee under the arrangements."

14 See 18.17.6 (Relief from withholding tax when DT relief applies).

(3) A direction under subsection (2) may be varied or revoked by a later direction.

Section 913 provides supplementary definitions:

(1) In sections 911 and 912 "royalty" includes—
(a) a payment received as consideration for the use of, or the right to use, a copyright, patent, trade mark, design, process or information, and
(b) the proceeds of the sale of the whole or part of any patent rights.
(2) In sections 911 and 912 "payee" means the person beneficially entitled to the income in respect of which the payment is made.

21.8 Films and sound recordings

Special rules apply to the exploitation of films and sound recordings. Section 609 ITTOIA provides:

(1) Income tax is charged on income from a business involving the exploitation of films or sound recordings where the activities carried on do not amount to a trade.
Such a business is referred to in this Chapter as a "non-trade business".
(2) Expressions which are used in this Chapter and in Chapter 9 of Part 2 (trade profits: films and sound recordings) have the same meaning in this Chapter as they do in that Chapter.

Section 610 ITTOIA provides:

(1) Tax is charged under this Chapter on the full amount of the income arising in the tax year. ...
(3) This section is subject to Part 8 (foreign income: special rules).

The charge applies to UK and foreign source income, but this incorporates the remittance basis for foreign source income.
Section 612 ITTOIA provides:

(1) This section applies for calculating the amount of income charged under this Chapter.
(2) Expenses wholly and exclusively incurred for the purpose of generating the income are deductible. ...

613 Application of trading income rules to non-trade businesses
The provisions of Chapter 9 of Part 2 apply in relation to non-trade businesses as they apply in relation to trades but as if—
(a) references to a basis period were to a tax year, and

(b) references to anything not constituting trading stock of a trade were omitted.

CHAPTER TWENTY TWO

EMPLOYMENT INCOME

22.1 Employment income: Introduction

The taxation of employment income is mainly governed by ITEPA 2003. Though dwarfed by the CTAs 2009 and 2010, ITEPA was for its day a mammoth Act: the table of contents is 36 pages long. More than two dozen volumes would be required for a full discussion.

The drafter of ITEPA was fond of signpost provisions and repetition, and believed very firmly in the value of dotting *I*'s and crossing *T*'s. That may be useful to a layman reading the statute unmediated by any other assistance: that reader needs all the help they can get! I find this approach makes a textbook exposition of the law rather more difficult, as there is much more statutory text to navigate than need have been. Behind what appear to be stylistic issues lie deeper questions: who are statutes written for? and how best to cater for different classes of readers with different needs? Be that as it may: we must take the text as we find it.

This chapter focuses on matters closest to the themes of this work, but the subject can only be understood in the context of the provisions as a whole, so I begin with a general outline which the more impatient reader may wish to skip.

I do not discuss employment-related securities or the rules for employment income provided through third parties (disguised remuneration), though I hope to do so in a future edition.

22.1.1 *Cross references*

The following topics are considered elsewhere:

23.1 (PAYE – Introduction)
45.5 (Employment-related loans)
48.1 (National insurance contributions)
74.3 (Home owned by company: benefit in kind charge)
74.30 (Chattels held by companies).

22.2 "Employer", "employee" and "employment"

Section 4 ITEPA provides relatively commonsense definitions of these terms.

Section 5 ITEPA extends the concept of "employment" to include offices (because directors need not as a matter of employment law be employees):

> (1) The provisions of the employment income Parts that are expressed to apply to employments apply equally to offices, unless otherwise indicated.
> (2) In those provisions as they apply to an office—
> (a) references to being employed are to being the holder of the office;
> (b) "employee" means the office-holder;
> (c) "employer" means the person under whom the office-holder holds office.

22.3 "Employment income" "general earnings" "specific employment income"

"Employment income" is the general term which is divided into two categories:

(1) general earnings
(2) specific employment income

"General earnings" and "specific employment income" are opaque technical terms.

22.3.1 *"General earnings"*

Section 7 ITEPA provides:

> (1) This section gives the meaning for the purposes of the Tax Acts of "employment income", "general earnings" and "specific employment income"...
> (3) "General earnings" means—
> (a) earnings within Chapter 1 of Part 3, or
> (b) any amount treated as earnings (see subsection (5)),
> excluding in each case any exempt income.
> (5) Subsection (2)(b) or (3)(b) refers to any amount treated as earnings under—
> (a) Chapters 7 to 9 of this Part (agency workers, workers under arrangements made by intermediaries, and workers providing services through managed service companies),

(b) Chapters 2 to 11 of Part 3 (the benefits code),
(c) Chapter 12 of Part 3 (payments treated as earnings), or
(d) section 262 of CAA 2001 (balancing charges to be given effect by treating them as earnings).

22.3.2 *"Specific employment income"*

Section 7 ITEPA provides:

> (1) This section gives the meaning for the purposes of the Tax Acts of "employment income", "general earnings" and "specific employment income"...
> (4) "Specific employment income" means any amount which counts as employment income (see subsection (6)), excluding any exempt income...
> (5) Subsection (2)(c) or (4) refers to any amount which counts as employment income by virtue of—
> (a) Part 6 (income which is not earnings or share-related),
> (b) Part 7 (income and exemptions relating to securities and securities options), or
> (c) any other enactment.

Specific employment income includes payments on termination of employment and employment-related securities.

22.3.3 *"Employment income"*

Section 7 ITEPA provides:

> (1) This section gives the meaning for the purposes of the Tax Acts of "employment income", "general earnings" and "specific employment income".
> (2) "Employment income" means—
> (a) earnings within Chapter 1 of Part 3,
> (b) any amount treated as earnings (see subsection (5)), or
> (c) any amount which counts as employment income (see subsection (6)).

22.4 The charge to tax on employment income

One might expect ITEPA to begin with a provision saying that income tax is charged on employment income. In fact this is implied rather than expressed: s.6 ITEPA provides:

> **Nature of charge to tax on employment income**
> (1) The charge to tax on employment income under this Part is a

charge to tax on—
(a) general earnings, and
(b) specific employment income.

Still, the imposition of the charge is clear enough. Section 6 continues:

(2) The amount of general earnings or specific employment income which is charged to tax in a particular tax year is set out in section 9.

Thus the legislation draws a distinction between what is charged (employment income) and the amount which is charged. This is familiar from other types of income.

22.5 Amount charged to tax (taxable earnings)

So we turn to s.9 ITEPA which provides:

(1) The amount of employment income which is charged to tax under this Part for a particular tax year is as follows.
(2) In the case of general earnings, the amount charged is the net taxable earnings from an employment in the year.

"Net" taxable earnings is a label which brings in rules relating to deductions, not discussed here.

"Taxable" earnings is a label which brings in a large number of rules, for in the various situations where the statute desires to bring earnings into charge in a year it provides that they are "taxable" earnings from the employment in that year.

Section 9(6) ITEPA provides:

Accordingly, no amount of employment income is charged to tax under this Part for a particular tax year unless—
(a) in the case of general earnings, they are taxable earnings from an employment in that year, ...

22.6 Taxable earnings

Section 10 ITEPA provides the starting point of the definition:

(1) This section explains what is meant by "taxable earnings" and "taxable specific income" in the employment income Parts.
(2) "Taxable earnings" from an employment in a tax year are to be determined in accordance with Chapters 4 and 5 of this Part.

So we move on to chapters 4 and 5 part 2 ITEPA. The pace is leisurely.

We eventually find four sections that identify amounts of taxable earnings: ss.15, 22, 26 and 27 ITEPA. There are four bases of taxation of employment income.

(1) The starting point is the arising basis applies to UK residents (unless one of the remittance basis applies).

(2) A remittance basis applies to foreign domiciled UK residents for two types of earnings:
(a) Chargeable overseas earnings **("COE")**
(b) Overseas workday relief earnings **("OWR earnings")**
They might be considered two routes to qualify for the remittance basis, but since the remittance basis rules differ somewhat between the two, they might better be considered as distinct remittance bases, **"the COE remittance basis"** and **"the OWR remittance basis"**.

(3) Non-residents are charged on UK earnings only.

The taxation of general earnings can be summarised in this table:

	UK Resident	UK Domicile	Taxable earnings	ITEPA Section	Part 2 Chap
Arising basis	Yes	n/r	All earnings: AB	15	4
COE Rem. Basis	Yes	No	(1) COE: RB (2) Other earnings: AB	22(2) 15	5
OWR Rem. Basis	Yes	No	(1) OWR earnings: RB (2) Other earnings: AB	26(2) 15	
			(1) Foreign earnings: no tax	27	
Non-resident	No	n/r	(2) UK earnings: AB	–	5

Key
AB: Arising basis
COE: Chargeable Overseas Earnings
OWR: Overseas workday relief
RB: Remittance basis

22.7 Earnings "for" a year, "from the employment in a year" and "received in a year"

ITEPA uses three distinct expressions:
(1) Earnings *"for" a tax year*.
(2) Earnings *from the employment in a tax year*.
(3) Earnings *received in a tax year*.
Earnings which are "for" one year may be earnings from the employment in a different year.

22.8 Earnings "for" a tax year

It is clumsy to refer to the year which earnings are "for". ITEPA sometimes resorts to quotation marks to help the reader grasp the elusive preposition. I adopt the statutory usage as a paraphrase is even more confusing, but sometimes expressions such as earnings "attributable to" or "relating to" or "earned in" a year would be easier to follow.

The concept is fundamental as the taxability of earnings depends on the employee's residence and domicile in the year which the earnings are "for". The policy behind this is that the timing of receipts may be arranged to ensure receipt in a year of non-residence; but one cannot so easily modify the year which earnings are "for".

The concept is (slightly) elucidated in s.16 ITEPA:

> (1) This section applies for determining whether general earnings are general earnings "for" a particular tax year for the purposes of this Chapter.
> (2) General earnings that are earned in, or otherwise in respect of, a particular period are to be regarded as general earnings for that period.
> (3) If that period consists of the whole or part of a single tax year, the earnings are to be regarded as general earnings "for" that tax year.
> (4) If that period consists of the whole or parts of two or more tax years, the part of the earnings that is to be regarded as general earnings "for" each of those tax years is to be determined on a just and reasonable apportionment.
> (5) This section does not apply to any amount which is required by a provision of Part 3 to be treated as earnings for a particular tax year.[1]

Since this section only applies for the purposes of chapter 4, it has to be repeated verbatim in s.29 ITEPA for chapter 5. (If there had been an ITEPA-wide definition the duplication would not have been necessary.)

This is only intended to set out the natural meaning that would have applied in the absence of a definition. EN ITEPA Note 6 provides:

> Sections 16 and 29 of the Act therefore spell out that general earnings are "for" a particular period consisting of the whole or part of a tax year if they are general earnings earned in or otherwise in respect of that period. It is thought that this reflects the meaning that a court would give to "for" if the point ever arose.

---

1 This is a reference to s.72(2) ITEPA; see too s.222(2) ITEPA and 223(4) ITEPA for definitions in specialist circumstances.

The EI Manual provides:

40008. The year that earnings are "for" [January 2010]
... This question has no relevance when deciding the tax year in which the tax charge arises. Earnings are assessed to tax in the tax year in which they are "received". The definition of "received" is set out in Section 18 (see EIM42200).
Why is it important to know the tax year that earnings are "for"?
Section 16 establishes the year that earnings are "for". Once this has been done, the next step is to decide which of the rules in Part 2 Chapters 4 and 5 apply to calculate taxable earnings.
For the majority of UK Resident and Ordinarily Resident (R/OR)[2] and domiciled employees, the question of the year earnings are "for" has little consequence. This is because all of their earnings are chargeable to UK income tax in consequence of their residence and domicile status. In addition, most earn and receive their earnings in the same tax year. However, for those employees who are other than R/OR and UK domiciled and who receive earnings in different years from those in which they earn them, the question continues to be relevant.
Principles from case law
The absence of statutory provision in ICTA 1988 and earlier enactments resulted in various cases being litigated through the 20th century.
• *Edwards v Roberts* (19 TC 618)
• *Hunter v Dewhurst*, (*Henry v Foster*) (16 TC 605)
• *Draycup v Radcliffe* (27 TC 188)
• *Heasman v Jordan* (35 TC 518)
• *Board of Inland Revenue v Suite* ([1986] 2 All ER 577)
• *Griffin v Standish* (67 TC 317)
• *Bray v Best* (61 TC 705)
Before 1989, the year that earnings were "for" also dictated the year in which income tax was assessed. "Receipts basis" replaced "earnings basis" in 1989.
The case of *Bray v Best* (61 TC 705), was heard by the House of Lords in 1988. Lord Oliver set out the preferred approach at page 752:

> "The period to which any given payment is attributed is a question to be determined as one of fact in each case, depending upon all of the circumstances, including its source and the intention of the payer so far as it can be gathered either from direct evidence or from the surrounding circumstances."

Lord Oliver's approach to determining the year that earnings are "for" continues to apply. Section 16 simply confirms the recommended approach.
40009. The year that earnings are "for" - arrangement of guidance [March 2009]
In 2007 and 2008, HMRC consulted with professional advisers with particular expertise regarding the treatment of foreign nationals coming to work in the UK and UK residents leaving the UK to work abroad. Many of the advisers' clients have complex remuneration packages. Some are members of Long Term Incentive Plans or participants in other

2 The manual has not yet been revised following the abolition of ordinary residence in 2013, but that does not affect the points made here.

deferred remuneration schemes. The aim of the exercise was to establish principles for determining the tax year that earnings, delivered by these arrangements, are "for".
The guidelines set out on the following pages were adopted by HMRC with effect from 28 February 2008. They are intended to be comprehensive but do not claim to cover every plan and set of circumstances that will arise.
... The guidance sets out general principles and indicates the views HMRC is likely to take in specified circumstances. It is intended to aid and inform fact finding and decision making. It is not a substitute for obtaining all of the relevant information and exercising good judgment by applying the principles to the facts. This is not an easy task as you may be required to balance one set of conditions against others. (This text has been withheld because of exemptions in the Freedom of Information Act 2000)...

40011. The year that earnings are "for" - the approach to take [March 2009]

[The Manual repeats the quote from *Bray v Best* set out in EIM 40008 above, and continues;]

Finding out the facts

An essential starting point is to obtain contemporaneous evidence. This may include all or any of the following:

- An understanding of the intention of the employer in developing the incentive programmes
- Bonus plans
- Award letters
- Notes of meetings
- Correspondence between the parties
- Obtain an analysis of amounts paid out
- An explanation of how awards are treated in the employer-company accounts

These documents may indicate the understanding of the parties regarding the performance period that awards are intended to be "for". The intention of the employer as disclosed to the employee and the understanding of the employee are particularly significant.
Unsubstantiated recollections of the employee regarding intention should be considered but given less weight than contemporaneous documented statements.
If Plan documents and contemporaneous information do not provide clarity, it is reasonable to make inferences from available evidence.
You may ask the Large Business Team or CRM dealing with the Corporation Tax affairs of the employer company how the bonus awards have been treated in the employer company accounts. The company may claim a deduction for a single year or may create provisions to spread the deduction over a longer period. This may indicate the period the employer considers the award to be "for". The accounting treatment is not conclusive, but it is significant. In the absence of clear statements in the Plan documents the accounting treatment may be evidence of the employer's understanding of what the scheme was intended to achieve.
Lump sums may be made up of amounts arising from different bonus periods and different deferred remuneration plans. If component amounts are "for" different tax years, different rules within Part 2 Chapters 4 and 5 may apply, to produce different liabilities to income tax.

40012. Annual bonuses awarded for meeting corporate, team or personal targets [December 2011]

Many employers operate annual bonus schemes for their employees. There are usually

performance criteria. These may require employees to meet corporate, team or individual targets.

Bonuses may be paid out by the employer or through a trust - usually an employee benefit trust (EBT). The identity of the payer is not relevant when determining the year that the award is "for". However, see the guidance below on "discretion".

In some schemes, particularly those referenced to company performance, employees may accrue entitlement to receive bonuses as the performance period passes. In others, entitlement is conditional on remaining in employment until a specified date (see below). The performance period and therefore the period that the bonus is "for" may be set out in the scheme documents.

If the performance period spans more than one tax year, Section 16(4) ITEPA 2003 applies. The bonus should be apportioned to the relevant tax years on the basis of a just and reasonable apportionment.

Section 16 attributes general earnings to one or more tax years. You should not accept that awards can be "for" a shorter period, even a day, to which the rules in Part 2 Chapters 4 and 5 can be applied. Employers may spontaneously award "spot-bonuses" to all employees in post on a particular date, or entitlement to a performance bonus may crystallise when a particular performance factor is satisfied. Even though these events make take place on a particular day, the resultant awards should be treated as general earnings "for" the tax year in which the event occurred.

Unless there is evidence to the contrary, HMRC takes the view that performance bonuses are "for" the performance period. This may be a calendar year or the company accounting period. In the case of specific projects, it may be the period beginning on the date when work started and ending when the specified outcomes were achieved.

Impact of Extra Statutory Concession A11 (ESC A11)[3]

ESC A11 is a non-statutory concession that permits tax years to be split. It is usually relevant to years in which individuals arrive in or depart from the UK. In consequence of arrival or departure, there are discrete periods of non-residence (NR) and ordinary residence (OR) for tax purposes. If the conditions are satisfied, the tax year is split and each part treated as a separate tax year.

Where entitlement to spot bonuses or conditional bonuses arises on a single day the advice set out above indicates that the award is to be treated as earnings "for" the year in which that days falls. In ESC A11 cases this will be that part of the split year in which the relevant day falls.

Evidence suggests spot bonuses and similar payments are relatively unusual and will be seen infrequently. If you suspect that the timing of entitlement has been manipulated to gain a tax advantage from the use of ESC A11, HMRC may decide to set aside the Concession and treat the individual as resident in the UK for the whole tax year.

40013. Bonuses and deferred remuneration plans - the effect of conditionality and employer's discretion [March 2009]

Conditionality

Many bonus schemes are referenced to performance periods, but awards will not be paid unless employees are in employment on the date of payment. For example, a bonus is

3 The Manual has not yet been revised for the 2013 changes which have put the ESC on to a statutory basis, but the general points made here still apply.

referenced to company profits for year ended 31 December but is not paid until the following 30 June. Employees who worked for the employer during the performance year forfeit their entitlement if they leave employment before 30 June.

Up to 28 February 2008, HMRC took the view that the bonus award could only be "for" the year in which unfettered entitlement to receive it arose. The year that the bonus was "for" was the year in which the employment condition was satisfied. Since 28 February 2008, HMRC has adopted the principles set out in EIM40008 and subsequent pages.

Good and bad leavers

Many of the plans with employment conditions identify "good" and "bad" leavers and prescribe different treatments for the two categories. "Good leavers" are employees who cease employment before the bonus payment date through retirement, redundancy or ill-health. "Bad leavers" are those who are dismissed for cause or resign to join a competitor.

It is possible to take various views on the year that such bonus awards are "for" where there is an employment condition:

- The performance period
- The performance period plus the period from the end of the performance period to the date of payment, sometimes referred to as the "vesting period"
- The year in which the date of payment falls

Your decision should take account of what the bonus scheme is intended to achieve. If this is not clear from the documents, you may base judgments on how the employer treats good and bad leavers.

Plans that:

- are designed to provide incentives to employees for performance periods, but,
- do not pay out unless the participants are still in employment at the specified date, but,
- do not specify any additional performance conditions in the period beginning after the original performance period and ending on the payment date,

are likely to pay out awards that are "for" the original performance period. However, if the Plan introduces additional performance conditions for the second period the period that the award is "for" is likely to be the aggregate of both periods.

If "good leavers" are entitled to receive awards; that may indicate that the awards are "for" the original performance period. Entitlement to pro-rated awards may indicate that entitlement is "for" the performance and the vesting periods.

Some schemes provide for deferred bonuses to be paid out when ownership of the company changes hands. This may be an indicator that the bonus is earned by that date and is "for" the relevant performance period.

Even though these contingencies may not occur for all or any of the plan participants, their existence may shed light on the period the bonus is intended to be "for".

It is sometimes argued that the employment condition is never just about being in employment on the specified date; that the intention of the employer in introducing this condition is to obtain satisfactory performance in the period ending on the date of payment. This may well be the case. If evidence can be found to support the contention you should accept that the period the awards from the Plan are "for" is the combined performance and vesting periods.

Employers' discretion

Some bonus schemes give the employer absolute discretion to award or refuse to award bonuses. The discretion may lie with the trustees if an Employee Benefit Trust (EBT)

pays out the awards. The Courts have held that, whatever the Plan says, an employer's discretion in awarding or withholding a bonus is not unfettered. However wide the discretion appears to be, the employer is required to exercise his discretion rationally and in good faith, and not irrationally or perversely.

There may be a pattern of awards that may indicate the year the awards are "for". Employees may also have an understanding of how the bonus scheme works, and the period awards are referenced to, while accepting the employer's discretion.

A discretionary bonus may therefore be "for" the performance period, the combined performance and "vesting" period or the year in which discretion is exercised and payment is made. It is important to consider all of the relevant information.

40014. Long Term Incentive Plans and Deferred Remuneration [March 2009]

Various schemes exist to reward and provide incentives to employees. Not all intended outcomes will be the same. The intention of the employer and the intended behavioural effect will influence the design of the scheme. For example, plans may be intended to:

- Tie-in valued employees and create a disincentive for leaving and moving to a competitor, or,
- Motivate and reward outstanding performance by aligning the interests of employees with those of the shareholders

Schemes intended to aid retention may include the following features:

- Bonuses are paid after 3 – 5 years of satisfactory employment
- The employer has discretion to award or deny bonuses for good or bad leavers
- Part bonuses are paid year on year with other entitlement remaining in the Plan
- Part entitlement to bonuses "vests" each year, but is not paid until a later year

Schemes intended to motivate and reward outstanding performance may include:

- Employment targets linked to growth in the company's:
  - share price
  - turnover
  - net profits
  - expansion of certain markets
  - market share
- Granting employees real stocks and shares or "phantom" shares in the company. (In the phantom schemes, no stocks or shares are assigned to the employees. Bonus entitlement is calculated by reference to a notional share portfolio.)

Payments may be made up of amounts arising from different bonus periods and different deferred remuneration plans. If component amounts are "for" different tax years, different rules within Part 2 Chapters 4 and 5 may apply, to produce different liabilities to income tax.

Awards from both types of schemes are likely to be "for" the whole performance or reference period. If this is greater than one tax year then the final award should be apportioned over the tax years falling into the performance period on a reasonable basis.

40015. The year that awards from Long Term Incentive Plans and other deferred remuneration arrangements are "for" [March 2009]

Entry to Long Term Incentive Plans (LTIPs)

If employees perform exceptionally well, they may be invited to participate in an LTIP. LTIPs run for pre-determined period that can be as long as 10 years. This process may repeat year after year so that employees are simultaneously members of several Plans. In any particular year they may receive part awards from some and entire awards from

others.

The initial investment is often funded by part of the participant's bonus for the previous year. The employee may be obliged to defer all or part of the previous year's bonus or may do so voluntarily. Plans may require a mixture of the two. The initial contribution may be guaranteed, in the sense that it cannot be lost, and/or it may have the potential to increase and decrease dependant on what the Plan tracks, for example, share price or company turn-over.

Other plans, particularly phantom share schemes, may simply award notional stock without any requirement for deferral from an earlier bonus.

In addition to the anticipated growth in the share price that adds value to the participants' awards, employers may make additional awards of stock to increase the value of the notional portfolio. These "matching awards" may be granted throughout the life of the scheme at times specified in the plan document.

Deferred bonuses and matching awards

Employers may defer the payment of bonuses and make eventual payment subject to conditions. For example, the employer awards a bonus of £100,000 referenced to a performance period. £75,000 is paid in cash immediately following the bonus year; £25,000 is to be paid three years later in cash or shares, if the employee has not resigned or been dismissed before the vesting date. Such a deferral may be imposed by the employer, or it may be entered into voluntarily by the employee. To develop the example, the £25,000 deferral may be required by the employer but the employee has the choice of voluntarily deferring a further £25,000. In both scenarios, the employer may offer an enhancement or matching award. The matching award may be delivered in the form of shares or cash. The matching award may be added to the LTIP at the beginning of the period. Additional matching awards may be added at specified dates during the deferral or vesting period.

What year are LTIP awards "for"?

It is important to consider all of the relevant facts. The deferred bonus may be "for" the original bonus year, or for the whole deferral period. If there is particular emphasis on the employee remaining in service at a future date, it may be for the tax year in which that condition is met. However, this feature is unlikely to exist in isolation as the employer wants to motivate the employee to perform well while remaining in employment. In order to determine the period that the deferred bonus is "for", it is necessary to consider all of the relevant information and weigh the emphasis given to each factor.

In general terms, simple deferred bonuses will remain earnings for the original bonus period, and growth or matching awards will be "for" the deferral period. In more sophisticated schemes where the deferred bonus is "awarded" and "vests" after the bonus year, and especially where there are further performance conditions relating to this period, the deferred bonus may be earnings for the period between award and vest.

There may also be circumstances where "growth" in the value of the fund is treated as being "for" the performance period of the original deferred bonus. This view is likely where no additional performance criteria are imposed during the deferral period or, if there are, the conditions are the same as for the deferred bonus.

If the conditions are significantly different, e.g. the matching awards are conditional upon new performance criteria, the "growth" or matching awards are likely to be "for" the deferral or vesting period itself.

If the conditions of the matching award are referenced solely to the employee remaining

in employment on the vesting or payment date in order to receive payment, the matching award is likely to be earnings for the tax year in which entitlement to receive the award matures.

Enhancements or matching awards may be paid out of LTIPs at the same time as deferred bonuses. Awards may be aggregated amounts that are "for" different periods. It is important to understand how sums are calculated and whether different performance periods should be considered.

40016. Long Term Incentive Plans and Deferred Remuneration – staged vesting [Mar 2009]

Some Long Term Incentive Plans (LTIPs) pay out awards in tranches. The details of different schemes will vary. For example, an LTIP fund containing deferred bonuses and matching awards may pay out 20% per annum over five years or nothing in Years 1 and 2 and 33% per annum in Years 3 to 5. Entitlement may be conditional upon participants meeting performance conditions and remaining in employment.

The period that each tranche is "for" has to be determined. If the evidence shows that the Plan is intended to reward performance over the period from award to vest, each part of the final payment is "for" the period from the original award date until it vests, calculated as per Section 16(4) on a just and reasonable apportionment. In the first example, 20% is "for" Year 1; 20% is "for" Years 1 and 2, and so on. Alternatively, if there are no performance conditions and the Plan emphasises being in employment at each vesting date, each payment may be treated as earnings "for" the tax year of receipt.

22.9 Pre-commencement and post-cessation earnings

There are special rules for pre-commencement and post-cessation earnings. Section 17 ITEPA provides:

> (1) This section applies for the purposes of this Chapter in a case where general earnings from an employment would otherwise fall to be regarded as general earnings for a tax year in which the employee does not hold the employment.
>
> (2) If that year falls before the first tax year in which the employment is held, the earnings are to be treated as general earnings for that first tax year.
>
> (3) If that year falls after the last tax year in which the employment was held, the earnings are to be treated as general earnings for that last tax year.
>
> (4) This section does not apply in connection with determining the year for which amounts are to be treated as earnings under Chapters 2 to 11 of Part 3 (the benefits code).

Since this section only applies for the purposes of chapter 4, it has to be repeated verbatim in s.30 ITEPA for chapter 5.

The EI Manual provides:

> **40005. Special rules for determining the year that general earnings**

> **are "for": Pre-commencement and post-cessation earnings**
> **...** [February 2006]
> It is unlikely the rules will often apply in practice because general earnings can normally be attributed to periods in which the job is held.
> **40006. Effect of non-residence on pre-commencement and post-cessation earnings** [January 2009]
> Where the special rules in [s.17 ITEPA] apply general earnings will be taxable when received if the charging provisions in Sections 15 or 27 apply ... in the last or first year the taxpayer held the job. The same is true if the taxpayer left the job at the time of going abroad.
> ...
> **40007. Effect of non-residence on pre-commencement and post-cessation earnings: Examples** [January 2010]
> This page provides examples of how the above sections apply. ...

The first example concerns pre-commencement earnings of an employee who is resident and domiciled throughout:

> ***Example 1***
> An employee is approached by another employer. She is offered a job by the new organisation. As an inducement to change jobs she is paid £50,000 on 1 April 2009. She commenced work for the new employer on 1 May 2009. The employee is resident, ordinarily resident and domiciled in the UK so the relevant charging provision is Section 15 in Part 2 Chapter 4.
> Section 17 operates to make the payment earnings of the year in which the employment commences. Even though paid in tax year 2008/2009 they are earnings "for" the year 2009/10.

The Manual then considers whether domicile makes any difference:

> The result will be the same if the employee is resident, ordinarily resident but not domiciled in the UK.

It is assumed that the earnings are not chargeable overseas earnings.[4] The Manual now considers someone becoming UK resident:

> ***Example 2***
> An employee worked in Singapore for many years for a UK resident company. The employment ceased on 31 December 2008. For 10 years prior to that date the individual was not resident and not ordinarily resident although domiciled in the UK. On 6 April 2009 the employee

4 See 22.11 (COE remittance basis).

returned to the UK. From the date of arrival he became resident and ordinarily resident.
6 months after the job ended the employer made a payment of £50,000 to the former employee in recognition of the contribution he had made to the expansion of business in the Far East.
Section 17 makes the payment earnings of the year in which the employment was last held, 2008-2009. In that year the employee was not resident in the UK and performed all of the duties in Singapore. In consequence, the payment does not fall into any of the charging provisions in Part 2 Chapters 4 and 5 and is therefore not chargeable to tax as general earnings.

22.10 Resident UK domiciled employee

Section 15 ITEPA provides:

> (1) This section applies to general earnings for a tax year for which the employee is UK resident ...[5]
> (2) The full amount of any general earnings within subsection (1) which are received in a tax year is an amount of "taxable earnings" from the employment in that year.
> (3) Subsection (2) applies whether or not the employment is held when the earnings are received.

Section 15 sets out the general rule: in short, all earnings are "taxable earnings" and taxed on receipt, on an arising basis.

"Receipt" is defined in ss.18, 19 ITEPA (not discussed here).

The s.15 rule has two exceptions:

(1) COE remittance basis[6]
(2) Overseas workday relief[7]

22.10.1 *Split year*

Section 15(1)(1A) ITEPA need to be read together:

> (1) This section applies to general earnings for a tax year for which the employee is UK resident except that, in the case of a split year, it does not apply to any part of those earnings that is excluded.
> (1A) General earnings are "excluded" if they—
> (a) are attributable to the overseas part of the split year, and

5 The omitted words deal with split years and are considered below.
6 See 22.11 (COE remittance basis).
7 See 22.17 (Overseas workday relief).

(b) are neither—

(i) general earnings in respect of duties performed in the UK,[8] nor

(ii) general earnings from overseas Crown employment subject to UK tax...[9]

Section 15(4) ITEPA deals with attribution:

> Any attribution required for the purposes of subsection (1A)(a) is to be done on a just and reasonable basis.

22.11 COE remittance basis

The chargeable overseas earnings (COE) remittance basis is one of the two remittance bases for which UK resident foreign domiciled individuals may qualify.[10]

Section 809F ITA provides:

> (1) This section applies if section 809B, 809D or 809E applies to an individual for a tax year.
> (2) The individual's relevant foreign earnings for that year are charged in accordance with section 22 or 26 of ITEPA 2003.

So we turn to s.22 ITEPA which (somewhat repetitively) provides:

> (1) This section applies to general earnings for a tax year, to the extent that they are chargeable overseas earnings for that year, if—
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year, and
> (b) the employee does not meet the requirement of section 26A for

---

8 Defined by reference: Section 15(5) ITEPA provides:
"The following provisions of Chapter 5 of this Part apply for the purposes of subsection (1A)(b) as for the purposes of section 27(2) ...
(b) sections 38 to 41 (which contain rules for determining the place of performance of duties of employment), and
(c) section 41ZA (which is about determining the extent to which general earnings are in respect of UK duties)."

9 Defined by reference: Section 15(5) ITEPA provides:
"The following provisions of Chapter 5 of this Part apply for the purposes of subsection (1A)(b) as for the purposes of section 27(2)—
(a) section 28 (which defines "general earnings from overseas Crown employment subject to UK tax")"
See 22.31 (Overseas Crown employment).

10 See 22.6 (Taxable earnings).

that year.

The point of para (b) is that Overseas Workday Relief (which is more generous) has priority, if it applies.

> (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year. ...

In short, the remittance basis applies to chargeable overseas earnings. Section 22(7) ITEPA provides:

> Section 15(1) does not apply to general earnings within subsection (1).

Thus earnings which are not chargeable overseas earnings continue to fall under the s.15 arising basis.

22.11.1 *Transitional rules for pre-2008 earnings*

Suppose:
(1) Chargeable overseas earnings accrue to T before 2008/9 and
(2) The earnings are remitted in 2008/9 or later (when T is still resident).
In the absence of a transitional rule, the earnings would not be taxable under s.22 ITEPA because the condition in s.22(1)(a) would not be met. Sections 809B, 809D or 809E did not apply before 2008. Para 82(2)(a) Sch 7 FA 2008 fills that gap:

> (1) This paragraph applies in relation to an individual's general earnings for the tax year 2007–08 or any earlier tax year ("the relevant tax year") if the individual—
> (a) was UK resident in that year, but
> (b) was not domiciled in the UK, or was not ordinarily UK resident, in that year.
> (2) Section 22 or 26 of ITEPA 2003 (as amended by this Part of this Schedule) applies in relation to the general earnings as if—
> (a) section 809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year and
> (b) section 22(7) or 26(6) of ITEPA 2003 were omitted.

I think para 82(2)(b) is misconceived, though it does no harm.

22.12 Chargeable overseas earnings

The expression "chargeable overseas earnings" is a label which brings in two sets of requirements: the earnings must be "overseas" earnings and

they must be "chargeable". The key part of the definition is "overseas earnings".

22.12.1 *"Overseas" earnings*

Section 23(2) ITEPA provides:

> General earnings for a tax year are "overseas earnings" for that year if—
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year,
> (aa) the employee does not meet the requirement of section 26A [OWR] for that year,
> (b) the employment is with a foreign employer, and
> (c) the duties of the employment are performed wholly outside the UK.

22.12.2 *"Chargeable" overseas earnings*

The concept of "chargeable" overseas earnings brings in rules for deductible expenses and associated employments. Section 23(3) ITEPA provides:

> (3) To calculate the amount of "chargeable overseas earnings" for a tax year—
> *Step 1*
> Identify—
> (a) in the case of a tax year that is not a split year, the full amount of the overseas earnings for that year, and
> (b) in the case of a split year, so much of the full amount of the overseas earnings for that year as is attributable to the UK part of the year.
> *Step 2*
> Subtract any amounts that would (assuming they were taxable earnings) be allowed to be deducted from the earnings identified under step 1 under—
> (a) section 232 or Part 5 (deductions allowed from earnings),
> (b) sections 188 to 194 of FA 2004 (contributions to registered pension schemes), or
> (d) section 262 of CAA 2001 (capital allowances to be given effect by treating them as deductions from earnings).
> *Step 3*
> Apply any limit imposed by section 24 (limit where duties of associated employment performed in UK).
> The result is the chargeable overseas earnings for the tax year.

Section 23(4) ITEPA provides:

> Any attribution required for the purposes of step 1 or step 2 in subsection (3) is to be done on a just and reasonable basis.

22.12.3 *Transitional rule for pre-2008 earnings*

Suppose earnings accrue before 2008/09. At first sight the earnings cannot be "chargeable overseas earnings" within the definition of s.23(2) ITEPA since they do not meet the condition in s.23(2)(a): section 809B, 809D, or 809E did not apply before 2008/09. Moreover, para 82 which fills that gap in s.22 does not fill the gap in s.23. Construed strictly, therefore, pre-2008 earnings which were not remitted before 6 April 2008 have fallen out of charge!

However, I expect that the courts will to strive to construe the section avoid that result. After all, it is obvious (and para 82 confirms) that this result was not intended. One way to do that is to say that if income arises before 2008, the question of whether it constitutes chargeable overseas earnings is to be decided by reference to the legislation in the year that it arises and not the legislation in the year that it is remitted. It has to be said that para 82(3) sch 7 FA 2008 would not then be necessary. The alternative is to read para 82(2) as if it applied to s.23 as well as to s.22 and 26. Neither of these solutions is comfortable reading, but the conclusion that all pre-2008 earnings fall out of charge seems even worse. This is only one of many infelicities in the 2008 legislation: but a modern court will strive to make it work.

22.13 Foreign employer

Section 23(2) ITEPA provides:

> General earnings for a tax year are "overseas earnings" for that year if ...
> (b) the employment is with a foreign employer...

The definition is in s.721(1) ITEPA:

> "foreign employer" means an individual, partnership or body of persons resident outside the UK and not resident in the UK.

EI Manual provides:

> **40102 Taxable earnings: Employee resident and ordinarily resident in the UK: "chargeable overseas earnings"** [January 2009]
> An employee may maintain that general earnings are chargeable overseas

> earnings taxable on remittance under section 22 rather than on receipt ... This is likely to lead to a significant reduction in the amount of taxable earnings. You should examine the facts closely before accepting that earnings are chargeable overseas earnings within section 22. In particular you should find out whether the employer has any place of business in the UK. If you can trace an accounts file for the employer, ask the accounts Inspector for instructions on the employer's residence status.

While tax rules often turn on whether a person is resident in the UK, it is rare to see a requirement that they must be resident outside the UK.[11] It is suggested that this should be removed so that the only requirement is that the employer is non UK resident. It should not matter whether or not they are resident elsewhere. In practice I doubt it is possible to be non UK resident without being resident outside the UK, so this simplification makes no practical difference and has no cost implication.

22.14 Incidental duties in UK

Section 23(2) ITEPA provides:

> General earnings for a tax year are "overseas earnings" for that year if ...
> (c) the duties of the employment are performed wholly outside the UK.

Section 39 ITEPA elucidates this concept:

> (1) This section applies if in a tax year an employment is in substance one whose duties fall to be performed outside the UK.
> (2) Duties of the employment performed in the UK whose performance is merely incidental to the performance of duties outside the UK are to be treated for the purposes of this Chapter as performed outside the UK.

In other words, UK duties may be ignored if they are "merely incidental" to the performance of the other duties outside the UK. What are incidental duties? HMRC interpret this strictly. The EI Manual provides:

> **40203 Employee resident, ordinarily resident or domiciled outside the UK: location of duties: "merely incidental" duties** [August 2012]
> The case of *Robson v Dixon* (48 TC 527) involved a pilot, resident and ordinarily resident in the UK, who was employed by a Dutch airline. He flew aircraft from Amsterdam to various parts of the world. There were relatively few take-offs and landings in the UK [on average, seven per annum]. He claimed that the small number of take-offs and landings meant that his duties in this country were

11 For an exception, see 28.4.3 ("Resident outside the UK").

"merely incidental" to those performed abroad. The Courts rejected his claim on the grounds that the test is one of quality, not quantity. The Judge commented that the core duties of a pilot include landing and taking off in aircraft. So when the aeroplane landed in the UK the pilot was performing substantive duties of his employment.

Quality not quantity of duties

The case of *Robson v Dixon* established that it is the quality not the quantity of duties performed in the UK that determines whether or not they are "merely incidental". However, where the employee works in the UK for more than three months in a year, you should not accept that work can be "merely incidental".

Statement of Practice A10: airline pilots

Despite the decision in *Robson v Dixon* a single take off and landing in the UK in any year is disregarded on de minimis grounds in considering whether any duties are performed in this country.[12]

Dealing with cases

It is not possible to list "merely incidental" duties. Substantive and "merely incidental" duties are relative and specific to employments. It is important to obtain as much information about the employment and employee as possible. The following list of documents is not intended to be comprehensive:

- employment contract
- job description
- summary of main duties and responsibilities
- business diaries and travel details.

These may help but if at all possible arrange a meeting with the employee to obtain information first hand. Once you have a clear idea of the main duties you are in a position to take a view as to what are "merely incidental"...

40204. Employee resident, ordinarily resident or domiciled outside the UK: Location of duties: "merely incidental" duties: Examples [August 2012]

The following examples illustrate how particular situations should be treated.

Example 1

An overseas marketing executive of a UK employer spends the majority of each year working overseas. Visits to the UK total less than three months in a year. While in the UK the representative carries out the following duties:

- reports on trade conditions and results in the territory
- establishes questions of policy
- receives instructions
- collects samples in preparation for the next tour.

The duties performed in the UK should be regarded as "merely incidental". If the employee is not ordinarily resident the duties may be disregarded and the general earnings arising from them not charged under Section 15 [ITEPA]. A charge may arise under Section 26 if the earnings are remitted here (see EIM40301).

Example 2

An overseas employee visits the UK and whilst here arranges a meeting with a

12 [Author's Note] SP A10 is officially withdrawn; but there has been no announcement that HMRC now adopt a different practice.

client overseas and the associated travel. As long as the employee does no more than arrange the meeting and travel, the duties performed are regarded as "merely incidental".

Example 3

The director of a limited company usually works abroad, but attends directors' meetings in the UK.

Attendance at board/directors' meetings is a fundamental and joint duty of a board of directors to manage the company. Therefore performance of these duties in the UK can never be "merely incidental" to work done overseas, even if the board member participates from the UK in a board meeting held overseas, for example via a telephone or video conference. Preparation in advance of board meetings (e.g. for a presentation) is also unlikely to be merely incidental to other duties, as preparation is essential to the contribution in the subsequent meeting.

Example 4

A courier for a tour operator visits many countries in the course of the employment. Visits to the UK, however few and however short, are of the same importance to the job as visits to other countries and therefore cannot be "merely incidental".

HMRC say:

Background to the exception for merely incidental duties

15. The Royal Commission Report [on the Taxation of Profits and Income][13] published in 1955 stated (paragraph 300)

"We recommend that work is not the less to be treated as performed wholly in one country because certain ***merely incidental duties,*** *such as returning for report, to acquire samples, etc., are carried out in another."*

16. Subsequently section 11(3) Finance Act 1956 addressed the circumstances where an employee would otherwise be chargeable to tax–

"*(3) Where an office or employment is in substance one of which the duties fall in the year of assessment to be performed outside the UK there shall be treated for the purposes of this section as so performed any duties performed in the UK the performance of which is* ***merely incidental*** *to the performance of the other duties outside the UK."*

17. However, the term "merely incidental" duties was not defined in FA1956 or in subsequent legislation. Following a common dictionary definition of "incidental", as something that is minor, casual or subordinate in nature, the Inland Revenue (as it was at the time) considered that a duty that formed part of the essential or fundamental requirements of the employment could not be incidental.

Robson v Dixon (48 TC 527)

18. This is the only case where the courts have considered the meaning of "merely incidental" duties. It was decided in the High Court in 1972 and concerned section 10 and 11 of the Finance Act 1956. Mr Robson was an airline pilot who lived in the UK but commuted to work in Amsterdam, where he was employed by a Dutch

13 Cmd 9474.

airline.

19. Robson flew aircraft on scheduled flights from Amsterdam to various parts of the world, mainly North and South America. None of the flights in the years under appeal commenced in the UK but of 811 take-offs and landings, 38 were made in the UK of which 16 were charter flights, which were outside his normal duties (he made in total only 22 charter flight landings and take-offs).

20. Robson contended that as his duties were performed substantially outside the UK, any duties in the UK were therefore merely incidental to his substantive duties abroad. Pennycuick VC disagreed –

> *"The expression "merely incidental" is a striking one, and effect must be given to the natural meaning of the words. The words "merely incidental to" are upon their ordinary use apt to denote an activity (here the performance of duties) which does not serve any independent purpose but is carried out in order to further some other purpose.*

The judge set out the duties performed by Robson and went on:

> *In the present case, the duties performed by the taxpayer, apart from his duties on the ground at Schiphol, mainly consisted (putting it shortly) of taking a plane up at Schiphol, flying it to whatever its destination was and then bringing it down. In the case of the flights from Schiphol to some destination (normally in America) on which there was a stop at England, his duties consisted of taking the plane up at Schiphol, flying it to England, bringing it down at Heathrow or elsewhere, and then taking it up again and flying it again to the next destination, in America. With the best will in the world, I find it impossible to say that the activities carried on in or over England are merely incidental to the performance of the comparable activities carried on in or over Holland or in or over the ultimate destination, in America. The activities are precisely co-ordinate, and I cannot see how it can properly be said that the activities in England are in some way incidental to the other activities. Going back to the words of the section, when one asks, 'What exactly are the other duties outside the UK to which the performance of the duties are incidental?', no satisfactory answer can be given. The other duties are simply co-ordinate duties.*

21. Pennycuick was clear as well that the test of "merely incidental duties" is one of quality not quantity –

> *"Again, I think it is impossible to construe s 11(3) in the way in which it was sought to construe it in the taxpayer's contentions in the case stated, as indicating merely relatively short periods of employment in the UK in relation to the period of employment outside the UK. It would have been quite simple for the section so to provide; and it may well be that if the condition were imported only by the expression 'in substance', that would be the result. But the second requirement is expressed in quite different terms and cannot, I think, be treated as referring merely to what has been described as a quantitative, in contra-distinction to a qualitative, basis. ...*
>
> *It would be tempting to say that all the duties performed by a pilot are incidental to the purpose of transporting passengers from one place to another, but that approach clearly would not help here. What has to be shown is that the particular duties in the UK are incidental to the performance of other particular duties outside the UK."*

22. Consequently duties performed in the UK that are the same or similar in nature to those performed overseas are not merely incidental to the overseas duties, even if performed for only a very short time. They are, in Pennycuick's words, "precisely co-ordinate" and therefore of equal importance to the duties performed overseas.

Tax Bulletin 76

23. Inland Revenue published a Tax Bulletin article in April 2005 titled "Non-domiciled employees: dual contract arrangements" which referred to a range of issues relating to dual contract arrangements, including "merely incidental" duties and to the decision in *Robson v Dixon*.

24. TB76 explained that given the ease and speed of twenty first century communications, an employee who performs duties of one employment overseas and another in the UK, is liable to find it increasingly difficult whilst working in the UK to avoid performing substantive duties of their overseas employment. For example, HMRC take the view that an employee working in the UK under a UK contract to service the needs of UK clients, but also responsible under their overseas contract for servicing the business needs of overseas clients, who responds to a telephone call or e-mail from an overseas client performs a substantive duty of the overseas employment. A response sent from the UK to an overseas client, is no different from a response sent from abroad to the same client. It represents a "precisely co-ordinate" duty.

Statement of Practice A10 – de minimis

25. In *Robson v Dixon*, Inland Revenue accepted that a landing in the UK caused by an emergency (e.g. due to weather conditions or mechanical trouble) might be regarded as incidental to duties performed outside the UK.

26. After the decision was handed down, counsel for Robson asked if the de minimis principle could apply to one of the years under appeal in which Robson completed only one take-off and landing in the UK. Despite his decision that the test of "merely incidental" duties was one of quality and not quantity, Pennycuick agreed that this would be "proper" for a single event in a year. SP A10 was published in 1975 as a response to Pennycuick's comments.

> *"Where only a single take-off and landing in this country occurred in a year, the Inland Revenue will normally disregard this on de minimis grounds in considering whether any duties were performed in this country."*

27.However, in another year, in which Robson performed four take-offs and landings in the UK (two for emergencies, plus two others for unspecified reasons) the Judge declined to accept the request for a de minimis exclusion.

Director - duties never merely incidental

28. The general principle in relation to a company director is that the management of a company is vested collectively in the board of directors. Therefore when a director attends a meeting of the board, HMRC takes the view that he or she performs a fundamental duty which is not "merely incidental" to other duties.

29. Consequently a director who in substance performs his duties overseas, except for visits to the UK to attend a meeting (whether as part of a formal board meeting or otherwise) cannot, in the view of HMRC, be within the exception in s39. Attendance at board meetings is part and parcel of a director's core duties and therefore if performed in the UK cannot be incidental to duties performed abroad.

A director's attendance at other meetings (e.g. finance, strategy, personnel) is also likely to represent a substantive duty, because the director would not attend these meetings unless participation was deemed necessary.

[Para 30-32 discuss the former s.830 ITA; this concerns residence, not employment income.

Examples of duties that are "merely incidental"

33. To determine whether duties performed in the UK are "merely incidental" to duties performed overseas, it is necessary to consider both the nature of the duties performed in the UK and their relationship to the duties performed abroad.

34. Ultimately each case will depend on its particular facts but the types of activities, if performed in the UK in relation to the duties of an overseas employment, which can be regarded as "merely incidental" duties include –

- arranging meetings and business travel;
- feedback on employee performance and/or business results, if this does not involve the employee concerned in preparation or analysis whilst in the UK and as long as responsibility for these matters is not part of the employee's core duties of employment;
- input to team restructuring and staff matters, provided that the employee does not have a management role; and
- reading generic business e-mails that do not relate directly to the employee's role/responsibilities.

35. The examples below illustrate some situations where duties are regarded by HMRC as "merely incidental" -

A. A junior employee who works for an overseas subsidiary of a UK company who, on occasional visits to the UK headquarters, presents a report prepared by the overseas business to report on trade conditions or results overseas, and/or receive instructions for the next tour of duty overseas. The employee performs no other duties in the UK and has no control over the overseas activities on which he reports and is required only to pass on the report from his overseas employer and to take instructions from the UK company to take back to the overseas employer. These duties are regarded as "merely incidental" to his overseas duties.

B. An overseas employee visits the UK and whilst here arranges a meeting with a client overseas and the associated travel. As long as the employee does no more than arrange the meeting and travel, the duties performed are regarded as "merely incidental".

C. Whilst in the UK, an employee of an overseas subsidiary receives an e-mail documenting the employer's global business results for the year. The employee is provided with the results for his information and is not required to take any further action or feedback to the sender of the e-mail. The reading of such an e-mail is "merely incidental" to those duties performed overseas. However, if the employee had any role or responsibility in producing the global results, and/or was involved in feedback or in confirming the results, reading the e-mail is not a "merely incidental" duty.

Examples of duties that are not "merely incidental"

36. Types of activities performed by an employee that are not regarded as "merely incidental" duties include -

- instructions and/or guidance to colleagues and/or team members;

- work carried out on issues or projects that do not come to fruition;
- reporting on performance/business results where these matters are part of the employee's core duties;
- analysis of reports/information with the intention to produce results/recommendations that can be reported upwards in the organisation;
- preparation work carried out prior to discussions, meetings or presentations with customers/clients, colleagues, board members or shareholders and follow-up work after such discussions, meetings or presentations;
- discussions and meetings (including by telephone, teleconference or video conference) with customers/clients, colleagues, board members or shareholders; and
- applying generally expertise in any role or function which the employee is contracted to perform in his or her duties for the employer.

37. The examples below illustrate some situations where duties are not "merely incidental" -

A. A courier for a tour operator visits many countries in the course of the employment. Visits to the UK, however few and however short, are of the same nature to the job as visits to other countries and therefore cannot be "merely incidental".

B. Preparation in advance of a presentation to, and/or a meeting/discussion with, customers or potential customers, or actions subsequently which result from decisions taken in the presentation or meeting/discussion are not merely incidental to other duties, as preparation in advance and follow-up work afterwards are essential to an employee's effective participation in a presentation and/or meeting/discussion.

C. A company director, who works overseas for a UK based multinational company, usually participates by video conference in board meetings held each month in the UK. However, sometimes the director visits the company headquarters in the UK and attends in person at monthly board meetings. As attendance at board meetings is a core function and fundamental joint duty of a board of directors to manage the company, attendance at a board meeting cannot represent "merely incidental" duties, regardless of the fact that the director does not normally attend the meeting in person.

D. A company director who is resident in the UK has two directorships within the same overseas based group. One role is as CEO of the UK subsidiary and the other as a board member of the overseas parent company. The parent company's board meetings are held monthly in the overseas location and the director usually attends in person. However, sometimes he participates in the board meetings by telephone or video conference from the UK. As attendance at board/directors' meetings is a fundamental and joint duty of a board of directors to manage the company, participation from the UK in the parent's board meetings can not be "merely incidental" to duties performed overseas.

E. An employee of an international bank based in Frankfurt, visits a UK branch of the bank. Whilst in the UK branch, the employee responds to an investment enquiry sent by email from a customer of the bank in Germany. This represents a duty of his employment in Germany and by answering the email from the UK he performs a duty that is "precisely co-ordinate" with his duties in Germany.

Consequently this cannot be a "merely incidental" duty.

Merely incidental duties: HMRC policy

38. Over more than half a century since the Royal Commission Report was published in 1955 and the introduction of the term "merely incidental" duties in FA1956, working arrangements have changed considerably.

39. At that time it was unusual for one employee to perform duties of two or more employments in different countries. Where such arrangements existed, there was likely to be a physical separation of duties between the two roles because of the restricted availability of effective international communications.

40. Clearly that is no longer the case but should the enormous advances in communications which allow an employee now to perform duties of an overseas employment and an UK employment consecutively, if not concurrently, be sufficient reason for HMRC to change its interpretation of, and policy for, "merely incidental" duties? The Royal Commission provided the example of a junior employee working in one country, returning to another country to report or to collect samples, as the type of duties that it considered should be "merely incidental". These duties would be still regarded as such today – see Example A in paragraph 35 above.

41. On the other hand, where duties performed in the UK are the same as, or similar to, duties performed overseas, they cannot be "merely incidental" because they are "precisely co-ordinate" duties.

42.HMRC accepts that it may be difficult in some circumstances for an employee to avoid performing co-ordinate duties unless, for example, the employee declines whilst in the UK to answer a mobile telephone, or respond to an e-mail, from an overseas client.

43. However, to apply a broader interpretation of "merely incidental" to duties performed in the UK, than would apply otherwise to similar duties performed overseas, in HMRC's view would be not consistent with the Royal Commission in 1955, the case law in *Robson v Dixon* or the legislation.

44. Consequently HMRC does not believe there is good reason to revise its interpretation of "merely incidental" duties set out in the Tax Bulletin in 2005 and reiterated in this paper.[14]

It is in practice just about impossible for a UK resident to satisfy the "incidental duties" requirement if it is understood in this way. HMRC have (more or less) got an arising basis for employment income which, in everyday language, is income of an overseas employment and so foreign income, through the rigorous statutory interpretation of *Robson v Dixon*.[15] So unless the matter comes to be reviewed by the courts, the only solution

14 "Dual contracts: record keeping, enquiries, completion of Self Assessment Returns and interpretation of "merely incidental" duties" published 19/3/2012. *http://www.hmrc.gov.uk/menus/dual-contracts.pdf*

15 A similar process applied to bring foreign trading income on to an arising basis: see 15.3 (Trading income of UK resident).

is dual contract arrangements.

22.15 Dual contract arrangements

EI Manual discusses dual contract arrangements. The manual first explains the planning:[16]

> **77030 Appendix 3: Non domiciled employees: Dual contract arrangements** [February 2006]
> ... The legislative scheme ... is advantageous to employees or office holders who can show that they are:
> - resident and ordinarily resident but not domiciled in the UK and
> - perform duties of an office or employment under a foreign employer wholly outside the UK.
>
> As chargeable overseas earnings are taxed on remittance, there is a clear incentive to ensure that such earnings are paid overseas and to minimise the amount of earnings remitted to the UK. However, the requirement that the duties of the employment are performed wholly outside the UK presents problems to foreign domiciled employees whose jobs require them to work partly in the UK and partly abroad. Earnings from an employment with duties performed in and outside the UK would be taxable under section [15 ITEPA] wherever received. An employee may therefore be offered two employment contracts, for example:
> Contract 1 covering the performance of duties in the UK and
> Contract 2 with an associated employer resident overseas covering duties performed in the rest of the world excluding the UK.
> The intention is that earnings from employment contract 2 will be chargeable overseas earnings and therefore taxable under section 22 only when remitted to the UK. For this reason, dual or multiple employment arrangements are popular with foreign domiciled employees whose duties are performed partly in the UK and partly outside the UK. The arrangement is generally that the individual enters into two separate written contracts, frequently referred to as the UK employment contract and the overseas employment contract.

Assuming the non-resident status of the employer and the non-domiciled status of the employee, HMRC can attack the planning in the following ways:

(1) Allege there is only one contract of employment (see below).

---

16 An earlier version of the text was in Tax Bulletin 76 (also classified as RI 273). See Ladkin, "Domicile: Working at Home and Abroad" *Taxation*, 27 March 2003, p.632.

(2) Allege some duties of the "overseas" employment are performed in the UK; see 22.14 (Where are duties performed: incidental duties).
(3) Apportionment arguments (see below).

22.15.1 *One contract of employment or two?*

The EI Manual continues:

> **77030 Appendix 3: Non domiciled employees: Dual contract arrangements** [February 2006]...
> *Enquiries into dual contract arrangements*
> HMRC offices may make enquiries in order to check whether the earnings under the overseas contract are chargeable overseas earnings. They may also consider whether there is in fact a single employment contract notwithstanding the production of two written contracts. This approach has generally been deployed where there is concern that there has been an attempt to split a single employment to exploit the legislation that provides for chargeable overseas earnings to be taxed on remittance.
> Employers, employees and their advisers maintain that there are separate and distinct employments. They invariably argue that the employee performs a different role with different responsibilities under each contract of employment and that the duties under each do not overlap and are not dependent on each other. In many cases written contracts have been drafted that fairly represent the true employment relationships and include a proper job description along with details of the remuneration package and other entitlements (annual leave etc) relating to each employment. Care has been taken to ensure that the roles described in each contract are capable of independent existence with proper regard given to what would happen on termination of one of the employments. Best practice has recognised the importance of maintaining separate payroll and expenses regimes and different line management and reporting arrangements.
> Where there are two employment contracts and the written contracts reflect this, dual contract arrangements provide a legitimate way to structure an individual's employment relationships. Where the arrangements reflect the true employment relationships, enquiries focus on:
> - whether the employee has in fact performed substantive duties under the overseas contract in the UK
> - whether a section 24 adjustment is needed to address an imbalance between the earnings from the UK and overseas contracts.

22.15.2 *Are some duties performed in the UK?*

The EI Manual goes on to consider this line of attack:

Given the way in which modern business operates and the ease and speed of communication, some employees may find it increasingly difficult to avoid performing substantive UK duties under their overseas contracts. For example, an employee who is responsible under their overseas contract for servicing the business of overseas clients may have to respond to a telephone call or e-mail from a worried overseas client with an urgent problem when the employee is in the UK. Formulating and communicating a response to such a problem would be regarded as a fundamental duty under the overseas contract. It follows that the performance of such duties in the UK will not be merely incidental to the performance of duties outside the UK as they will be of equal importance to the overseas duties. It is the quality of the UK duties and not the time devoted to their performance that determines whether they are merely incidental.

The EI Manual then considers and dismisses a possible defence:

Recent developments

In a number of cases, the duties required under each purported employment contract are defined according to where those duties are performed. For example, the UK contract states that the duties of the employment are all those duties performed in the UK whereas the overseas contract states that the duties of the employment are all those duties performed wholly overseas. Employees and their advisers may contend that all overseas duties are duties of the overseas employment and all UK duties are duties of the UK employment. On that analysis, duties performed in the UK in connection with the business of the overseas employer are performed under the terms of the UK contract and are not duties of the overseas employment.

HMRC does not consider that the existence of separate and distinct employments is determined by the terms of written contracts where the main distinction between the duties required under each contract is geographical. There are concerns that arrangements of this nature artificially divide a single job so earnings attributable to overseas duties can be treated as chargeable overseas earnings. HMRC has received legal advice that supports a robust challenge to such arrangements.

The commercial context

As a result of the legal advice referred to above, HMRC considers that a dual contract arrangement based solely or mainly on a geographical split of employment duties without commercial underpinning is vulnerable to challenge on the grounds that there is in reality a single employment with duties in and outside the UK. In such cases, HMRC offices should fully investigate the facts and circumstances including the commercial rationale and context and assess an employee to tax where the evidence shows that

there is in fact a single employment.

HMRC takes the view that a dual contract arrangement is unlikely to work unless there are two distinguishable jobs. For example, a French resident employer 'A' sends employee 'B' who is domiciled outside the UK to establish an office in London for its UK subsidiary 'C'. A requires B to work in its Paris office servicing their existing portfolio of French clients two days per week. On the other three days, C requires B to work in London. This is likely to constitute a proper basis for B holding separate employment contracts with A and C.

In order to decide whether the arrangements create two employments, rather than artificially divide a single employment for tax purposes, it is appropriate to look at the economic advantage that an employer gains from the employee's activity. If the contractual arrangements are to have any meaning, they must be seen in the context of the underlying commerciality of the arrangements. Regardless of there being two written contracts, HMRC would not accept that there were two employments if the risks and rewards relating to work done in the UK and overseas were in fact substantially borne and received by a single employer. Moreover, an arrangement requiring a written contract between an employee and a UK employer which provides only for the performance of duties in the UK would appear artificial if the employer's business extends outside the UK. An employer's interest does not lie in having the employee work in a defined geographical area but in an economic activity that benefits the employer. An employee may perform duties overseas that directly benefit the business of the UK employer. When performing those duties, the employee is not working for the overseas employer but for the UK employer overseas. If the arrangement were genuine, the employee would not be paid by the overseas employer to work for the UK employer overseas. If that is what the contract requires, it would indicate a lack of commerciality. Conversely, an employee who performs duties in the UK that directly benefit the business of the overseas employer is working for the overseas employer in the UK. It is difficult to imagine circumstances in which contracts that can require an employee to work for the benefit of a UK employer whilst being paid by an overseas employer or vice versa would be offered by employers that were not associated.

Various mechanisms exist for allocating costs to another entity that benefits from an employee's services. These include transfer pricing adjustments. It has been suggested that such adjustments restore the commercial equilibrium and thus support the existence of separate employments. However, the fact that such adjustments are necessary indicates that the employer has misjudged the commercial reality of the arrangements. Separate employers do not for sensible commercial reasons

> pay employees to work for someone else, with or without transfer pricing. Dual contract arrangements are sometimes used when a UK resident employee holding one employment with worldwide duties first becomes ordinarily resident. Some individuals who are self employed before they arrive in the UK become employees with dual contract arrangements on attaining UK resident and ordinarily resident status without any significant change in the way in which they carry out their professional activities. In other cases, recruitment material suggests that the employer has a single vacancy to fill and a dual contract arrangement is only implemented following the appointment of a non-domiciled individual. In such scenarios, HMRC offices will test whether the facts reflect commercial reality.

This is very doubtful. Whether two contracts of employment exist is a matter of contract law, not of commercial reality. Whether or not it is described as artificial is not the test.

The EI Manual continues:

> **77030 Appendix 3: Non domiciled employees: Dual contract arrangements** [February 2006]...
> *Overseas contracts and UK duties*
> Where the commercial reality shows the existence of separate employment contracts, it is sometimes argued that contractual terms that prohibit the performance in the UK of duties connected with the business of the overseas employer, preclude HMRC offices from arguing that the employee has performed duties of the overseas employment in the UK. These arguments are based on the UK duties being "ultra vires".
> HMRC does not consider that the presence of such clauses allows the performance of duties in the UK that clearly benefit the overseas employer to be ignored. To that end, both employers ought to be closely monitoring the employee's UK activities. For example, where the employee has performed substantive duties in the UK that directly benefit the overseas employer, HMRC would expect the UK employer to mark the fact that the employee is effectively abusing its time and take appropriate disciplinary action. And if the UK work in question was valuable, the overseas employer should take it into account when calculating bonus entitlement. It is possible that clauses like this are frequently waived or ignored and may be inserted to create a misleading impression.

This may be correct but it depends on the facts of the case.

> *Tax impact where dual contract arrangements fail*
> Where the facts indicate that there is, in commercial reality, only one employment contract whereby the employee performs duties for the

> benefit of one employer both in and outside the UK, all of the employee's general earnings will be taxable under section 21 ITEPA. As earnings attributable to overseas duties will not be chargeable overseas earnings, tax will be charged on receipt rather than on remittance to the UK. The identity of the "employer" will depend on all the facts and circumstances of the individual case.

As a matter of contract law, I think this is wrong. If the drafting is correct, there will be two separate contracts. The fact that on HMRC analysis it is unclear who is the employer suggests there must be something wrong with it.

The HMRC view might conceivably be defended on the basis of *IRC v Scottish Provident Institution* 76 TC 538: the two contracts being regarded as one composite contract for tax purposes, even though they are (if the drafting is right) separate contracts as a matter of contract law. But that assumes that dual contracts are contrary to the intention of parliament which is (to say the least) very far from clear.

The EI Manual then turns to PAYE:

> However, the UK entity that receives the benefit of an individual's services will be obliged to apply PAYE to all payments of PAYE income made to the employee during the period that the employee works for that entity. This is because the UK entity will either be the employer or (for the purposes of section 689 ITEPA) the relevant person.
>
> If there are genuine separate employments but the employee has performed substantive duties in the UK for the overseas employer, then all earnings from the overseas contract will be taxable under section 21 in the relevant year. They will not qualify as chargeable overseas earnings under section 22 because the duties of employment with a foreign employer will not have been performed wholly outside the UK in the year in question. There is unlikely to be an obligation to operate PAYE on earnings from the foreign employer, as that employer will not have the necessary presence in the UK for PAYE purposes, and the UK employer will not be the relevant person in relation to duties performed by the employee under the separate overseas employment.

The EI Manual concludes with a comment on NIC:

> *National Insurance*
>
> Where for tax purposes the facts indicate that despite the existence of two written employment contracts, there is a single employment covering UK and overseas duties, there could also be National Insurance consequences. If it is found that the earnings relating to overseas duties are attributable

to employment with the UK employer, there will be liability to pay further National Insurance.

The first sentence is tentatively expressed; the Manual wisely does not try to grapple with the complexities of NIC.[17]

22.15.3 *Apportionment*

Section 24 ITEPA prevents an over-generous attribution of income to the foreign contract:

(1) This section imposes a limit on how much of an employee's general earnings are chargeable overseas earnings for a tax year under section 23 if—
(a) in that year the employee holds associated employments as well as the employment to which subsection (2) of that section applies ("the relevant employment"), and
(b) the duties of the associated employments are not performed wholly outside the UK.
(2) The limit is the proportion of the aggregate earnings for that year from all the employments concerned that is reasonable having regard to—
(a) the nature of and time devoted to each of the following—
(i) the duties performed outside the UK, and
(ii) those performed in the UK, and
(b) all other relevant circumstances.
(2A) If the tax year is a split year as respects the employee, subsection (2) has effect as if for "the aggregate earnings for that year from all the employments concerned" there were substituted "so much of the aggregate earnings for that year from all the employments concerned as is attributable to the UK part of that year
(3) For the purposes of subsection (2) "the aggregate earnings for a year from all the employments concerned" means the amount produced by aggregating the full amount of earnings from each of those employments for the year mentioned in subsection (1) so far as remaining after subtracting any amounts of the kind mentioned in step 2 in section 23(3).
(3A) Any attribution required for the purposes of subsection (2A) is to be done on a just and reasonable basis.
(4) In this section—
(a) "the employments concerned" means the relevant employment and the associated employments;
(b) "associated employments" means employments with the same employer or with associated employers.
(5) The following rules apply to determine whether employers are associated—
Rule A An individual is associated with a partnership or company if that individual has control of the partnership or company.

---

17 See 48.1 (National insurance contributions).

Rule B A partnership is associated with another partnership or with a company if one has control of the other or both are under the control of the same person or persons.

Rule C A company is associated with another company if one has control of the other or both are under the control of the same person or persons.

(6) In subsection (5)—

(a) in rules A and B "control" has the meaning given by section 995 of ITA (in accordance with section 719 of this Act), and

(b) in rule C "control" means control within the meaning given by sections 450 and 451 of CTA 2010 (meaning of expressions relating to close companies).

(7) If an amount of chargeable overseas earnings is reduced under step 3 in section 23(3) as a result of applying any limit imposed by this section, the amount of general earnings corresponding to the reduction remains an amount of general earnings within section 15(1).

22.15.4 *Implications for employer*

The former Inspectors Manual para 5348 provided:

> Apart from the Schedule E implications there are other questions to consider:-
>
> [1] Is the cost of remunerating the individual under his contract for overseas duties effectively borne by a UK company and claimed as a deduction in computing profits which are chargeable to Corporation Tax? If so, there is a mismatch which will need to be considered with some care.
>
> [2] Do the individual's activities under the contract for overseas duties generate income, and if so to whom does it accrue? Is income which would otherwise accrue to a company which is liable to Corporation Tax being routed to an overseas company?
>
> [3] If the profits of a company which is liable to Corporation Tax are computed on a cost plus basis are the costs being depressed by reason of the split employment?

Point [1] raises deductibility issues; point [2] raises Controlled Foreign Company issues; point [3] raises transfer pricing issues. All these should be considered before entering into dual contract arrangements.

22.15.5 *Record keeping*

HMRC say:

> 4. For the purpose of enquiries into dual contract arrangements, HMRC considers it is reasonable to require access to the following documents, for some or all of the period under review:

- diaries
- e-mails
- expenses claims and supporting receipts
- telephone records
- client files.

5. A document means anything in which information of any description is recorded. This includes records held on a computer, on magnetic tape, optical disk (CD-ROM/DVD), hard disk, memory stick, flash drive, floppy disk or other recording media.

6. Where such records are in the possession of the employee, HMRC would expect the individual to comply with Section 12B TMA 1970 and retain any documents or information that would have enabled him or her to deliver a complete and correct return, until the later of either the closure of the enquiry window or, if applicable, the date an enquiry into the return is closed.

Section 12B TMA provides:

(1) Any person who may be required by a notice under section 8, 8A …11 or 12AA of this Act …17 to make and deliver a return for a year of assessment or other period shall—

(a) keep all such records as may be requisite for the purpose of enabling him to make and deliver a correct and complete return for the year or period; and

(b) preserve those records until the end of the relevant day ...

HMRC continue:

7. However where the employee does not have power or possession of the documents, HMRC will consider approaching the employer for the records they hold.

8. HMRC has sometimes experienced difficulty in obtaining documents which have not been retained by the employer. In a spirit of collaborative engagement HMRC asks all employers who utilise dual contract arrangements to implement a retention policy that will retain relevant documents for at least two years from the end of the tax year to which the document relates.

9. HMRC has also sometimes experienced difficulties in obtaining documents which have been retained by the employer or the employee. HMRC will not hesitate to use the powers in Schedule 36 Finance Act 2008 to require production of documents. Where the individual is employed by an overseas employer and the information is not available to the individual, HMRC will make full use of Exchange of Information powers with the relevant overseas authorities.

Multiple risks
10.HMRC will address all avenues of enquiry into dual contract arrangements (e.g. those relevant to both employee and employer) as equal risks from the outset of the enquiry; no risks will be deferred pending the outcome of enquiries into others. This should serve to mitigate some of the delays and other problems sometimes faced in obtaining the relevant records.[18]

22.15.6 *Disclosure of dual contracts on tax return*

HMRC say:

Self Assessment
11. An employee who has dual (or multiple) contracts of employment is required to complete a separate Employment page of the Self Assessment Tax Return for each employment, as specified at page EN1 of the Tax Return Guide.[19]

22.16 Statutory dual contract rules

HMRC verbal attack on dual contract arrangements was not altogether successful[20] and HMRC did not feel sufficiently confident in their view to defend it before the Tribunal. Instead the FA 2014 introduces new rules which I call **"the statutory dual contract rules"**. These rules are in addition to the rules set out above, thus adding another layer of legislation. They will prevent use of split year contracts in most cases.

Development of the rules can be traced through draft legislation, together with a TIIN published in January 2014, but that is now of historic interest only.

HMRC have issued guidance **("HMRC dual contract guidance")**.[21]

---

18 "Dual contracts: record keeping, enquiries, completion of Self Assessment Returns and interpretation of "merely incidental" duties" published 19/3/2012.
http://www.hmrc.gov.uk/menus/dual-contracts.pdf

19 "Dual contracts: record keeping, enquiries, completion of Self Assessment Returns and interpretation of "merely incidental" duties" published 19/3/2012.
The reference is to the form SA102 notes (Employment Notes).
http://www.hmrc.gov.uk/menus/dual-contracts.pdf

20 This can be seen from the TIIN estimate of the yield of the statutory dual contract rules:

2015/16	2016/17	2017/18	2018/19	
£75m	£55m	£55m	£60m	*Revised TIIN (19 March 2014)*

21 Restrictions on the remittance basis – dual contracts (18 July 2014)
http://www.hmrc.gov.uk/international/dualcontracts.pdf

22.16.1 *"Relevant" employer/employee and other definitions*

It is helpful first to deal with the definitions used. Section 24A(4) ITEPA provides:

> In this section—
> (a) "the relevant employee" means the employee in respect of the relevant employment,
> (b) "the relevant employer" means the employer in respect of the relevant employment, and
> (c) "UK employment" means an employment the duties of which are not performed wholly outside the UK and "UK employer" is to be read accordingly...

22.16.2 *The statutory dual contract rule*

Section 24A(1) ITEPA provides:

> This section applies in relation to an employment ("the relevant employment") for a tax year ("the relevant tax year") if—
> (a) one or more of the paragraphs in subsection (5) applies,[22]
> (b) conditions 1 to 4 are met, and
> (c) condition 5 is not met.

I refer to **"dual contract conditions 1 - 5"**.

Section 24A(2) ITEPA provides:

> The consequences of this section applying are set out in sections

---

22 This will normally be the case. Section 24A ITEPA provides:

(5) The paragraphs referred to in subsection (1)(a) are—

(a) general earnings from the relevant employment which are for the relevant tax year would, apart from section 23(1A) and Step 3 in section 23(3), be "chargeable overseas earnings" under section 23(3);

(b) employment income in respect of the relevant employment which is treated as accruing in the relevant tax year under section 41C(2) would, apart from sections 41C(4A), 41D and 41E, be "foreign" under section 41C(3);

(c) employment income in respect of the relevant employment which is treated as accruing in the relevant tax year under section 41H(2) would, apart from sections 41H(5), 41I and 41L, be "chargeable foreign securities income" under section 41H(3);

(d section 554Z9(2) would, apart from section 554Z9(1A) and (4) and (5), apply to employment income in respect of the relevant employment which corresponds to the value of a relevant step, or a part of the value of a relevant step, which is "for" the relevant tax year as determined under section 554Z4."

23(1A), 41C(4A), 41H(5) and 554Z9(1A).

The main rule is in s.23(1A) ITEPA which provides:

> But none of an employee's general earnings from an employment for a tax year are to be "chargeable overseas earnings" if section 24A applies in relation to the employment for the tax year.

This disapplies the employment income remittance basis and brings the earnings back to the arising basis.

Section 24A(3) ITEPA provides an exception:

> But, for the purpose of determining if, and the extent to which, any provision of Part 11 (PAYE), or of PAYE regulations, applies in relation to any income, the application of any provision mentioned in subsection (2) in relation to the income is to be ignored.

22.16.3 *Dual contract condition 1: UK employment*

Section 24A(6) ITEPA provides:

> Condition 1 is that the relevant employee holds a UK employment—
>
> (a) at a time in the relevant tax year when the relevant employee also holds the relevant employment, or
>
> (b) if the relevant tax year is a split year as respects the relevant employee, at a time in the UK part of the relevant tax year when the relevant employee also holds the relevant employment.

22.16.4 *Dual contract condition 2: Associated employers*

Section 24A(7) ITEPA provides:

> Condition 2 is that the UK employer is the same as, or is associated with, the relevant employer.

Section 24A(4) ITEPA provides:

> ...the rules in section 24(5) ("associated" persons)[23] apply for the purposes of this section.

22.16.5 *Dual contract condition 3: Related employments*

The definition of related employment is wide and vague. Section 24A

---

23 See 22.15.2 (Apportionment).

ITEPA provides:

> (8) Condition 3 is that the UK employment and the relevant employment are related to each other.
> (9) Without prejudice to the generality of subsection (8), the UK employment and the relevant employment are to be assumed to be related to each other if one or more of the following paragraphs applies—
>
> (a) it is reasonable to suppose that—
>
> (i) the relevant employee would not hold one employment without holding the other employment, or
>
> (ii) the employments will cease at the same time or one employment will cease in consequence of the other employment ceasing;
>
> (b) the terms of one employment operate to any extent by reference to the other employment;

HMRC dual contract guidance provides:

> **When might the terms of employments operate by reference to each other?**
> Employments might operate by reference to each other in lots of different ways, and will depend on the individual circumstances. You should take into consideration the terms of your employment contract, as well as the commercial reality of the relationship between your employments.
> For example, the contracts may take into account hours worked or leave taken under the other contract or may refer directly to duties performed under the other contract. There may be other circumstances in which the employments deal with the same customer or clients, so you will need to consider your individual circumstances.

> (c) the performance of duties of one employment is (wholly or partly) dependent upon, or otherwise linked (directly or indirectly) to, the performance of duties of the other employment;

HMRC dual contract guidance provides:

> **How can the duties of different employments be linked?**
> Generally, employment duties will be linked where one employment's duties enables the other employment duties to be carried out. For example, where an individual carries out research under one employment, and under their other employment carries out marketing

work made possible by the research. Duties of different employments may be linked in a number of different ways, and will depend on the facts of your individual circumstances.

(d) the duties of the employments are wholly or mainly of the same type (ignoring the fact that they may be performed (wholly or partly) in different locations);

HMRC dual contract guidance provides:

When might the duties of the employments be of the same type?
Where the duties of two or more employments are the same, but the client base or geographical location differs, the duties of the employments are of the same type. For example, marketing under a UK contract to UK clients has duties of the same type to an overseas contract involving marketing to clients in the rest of the world. There may be other circumstances in which the duties of the employments are of the same type, and you will need to consider your individual circumstances.

(e) the duties of the employments involve (wholly or partly) the provision of goods or services to the same customers or clients;

HMRC dual contract guidance provides:

When do employments deal with the same customer or clients?
The employments will deal with the same customer or clients where duties are performed in the provision of goods or services to the same customer or client. For example, if you give financial advice to a client under one employment and manage that client's investments under another employment. This might apply equally to an individual client, a group of clients or a client base. There may be other circumstances in which the employments deal with the same customer or clients, and you will need to consider your individual circumstances.

(f) the relevant employee is—

(i) a director (as defined in section 67) of the UK employer or the relevant employer who has a material interest (as defined in section 68) in the UK employer or the relevant employer,

(ii) a senior employee of the UK employer or the relevant employer, or

(iii) one of the employees of the UK employer or the relevant employer who receives the higher or highest levels of remuneration.

The term "senior employee" is not defined; it is a novel concept in tax law (or indeed in any area of the law). HMRC dual contract guidance provides:

> **What does the term senior employee mean?**
> Whether you are a senior employee will depend on the facts of your case, taking into account your responsibilities and the size, nature and structure of your employer's organisation. HMRC will generally consider that employees involved in higher-level management and decision-making will be senior. For example, the following might be classed as activities of senior employees:
> • you are responsible for implementing higher-level or global business strategies
> • you participate in higher-level decision-making relating to management issues, finance, corporate restructuring or governance
> These indicators are not intended as a definitive list and you will need to consider your individual circumstances.
> **What does higher or highest paid mean?**
> The higher or highest levels of pay refers to the total pay from your UK and overseas employments, and whether your pay level is high relative to other employees in the same group of companies. There is no absolute level of pay that is relevant – rather it is a matter of comparing your overall remuneration from all your related employments to that of your fellow employees. HMRC considers that if you would be liable to tax at the additional rate on your combined pay (ignoring personal reliefs like donations to charities), it will be a good indication of an employee who is higher or highest paid. The UK additional rate of Income Tax is the highest rate for the tax year. Follow this link to see the UK's Income Tax rates and taxable bands. Pay includes any amounts which would constitute earnings, an amount treated as earnings or specific employment income.

(10) In subsection (9)(f) references to the UK employer or the relevant employer include references to—

(a) any person with which the UK employer or the relevant employer (as the case may be) is associated, and

(b) if the UK employer or the relevant employer (as the case may be) is a company, the following companies taken together as if they were one company—

(i) the UK employer or the relevant employer (as the case may be), and

(ii) all the companies with which the UK employer or the relevant employer (as the case may be) is associated.

The statute includes a power to amend this by statutory instrument.[24] I am not sure if that is because the drafter did not have complete confidence in this definition, or to anticipate criticism as to its breadth. I do not expect that the power will ever be used.

It is hard to see that many, if any, dual contracts would not be caught by one of dual contract conditions 1 - 3.

22.16.6 *Dual contract condition 4: 65% foreign tax credit*

Section 24A ITEPA provides:

> (13) Condition 4 is that X% is less than Y%.
> (14) "X%" is given by the following formula — (C÷I) × 100%
> See section 24B for the definitions of "C" and "I".
> (15) "Y%" is 65% of the additional rate for the relevant tax year.
> (16) The Treasury may by regulations amend this section so as to amend the definition of "Y%".

So we turn to s.24B ITEPA for the definitions of C and I. In short:

C is foreign tax **C**redit.

I is the dual contract **I**ncome.

In full detail, s.24B ITEPA provides:

> (1) This section applies for the purposes of section 24A(14).
> (2) "C" is the total amount of credit which would be allowed under section 18(2) of TIOPA 2010 (double taxation relief by way of credit) against income tax in respect of all the employment income falling within section 24A(5)(a) to (d) were none of that income to be, as relevant—
> (a) "chargeable overseas earnings",
> (b) "foreign",
> (c) "chargeable foreign securities income", or
> (d) income to which section 554Z9(2) applies.
> (3) For this purpose, assume—
> (a) that all relief is claimed within the applicable time limit given by section 19 of TIOPA 2010, and
> (b) that all reasonable steps are taken to minimise any amounts of tax payable as mentioned in section 33 of that Act.
> (4) "I" is the total amount of all the employment income falling within

24 Section 24A(11)(12) FA 2014.

section 24A(5)(a) to (d).

This takes out cases where the foreign tax rate is 65% × 45% = 29.25%. The effective overseas tax rate will be lower than the headline rate and in practice I expect that few arrangements will be excluded by this condition.

HMRC dual contract guidance provides a straightforward worked example:

Overseas employment income for duties in country Z	£500,000
Country Z tax paid on overseas employment income for duties in country Z (Foreign Tax Credit Relief)	£120,000
Effective rate of country Z tax £120,000 / £500,000 × 100%	24% (X%)
UK additional rate	45%
UK additional rate × 65%	29.25% (Y%)

As X% is less than Y% Condition 4 is met.

The CIOT commented:

> There will also be timing issues in regard to working out available foreign tax credits and in allowing sufficient time for amendments to Self-Assessment returns. In particular, if the arising basis is used on a return and later on it is determined that the remittance basis could be claimed, eg because the final foreign tax credit proves to be higher than expected (which given that the UK and overseas territories will not have coterminous tax years could take a couple of years or so to determine) then might not the taxpayer out of time to amend their return?[25]

HMRC dual contract guidance provides:

> **What if I do not know the foreign tax amount when I have to submit my UK Self Assessment tax return?**
> Different tax laws in overseas territories may mean that you have to file a provisional UK tax return based on expected overseas taxes. When the actual amount of foreign tax is known you should submit an amended Self Assessment return, if necessary. You must do this within 12 months of the 31 January that follows the tax year in question.
> **What should I do if I have paid too much or too little tax to the foreign tax authorities?**

25 CIOT, "Artificial use of dual contracts by non-domiciles: Response" (19 February 2014) *http://www.tax.org.uk/Resources/CIOT/Documents/2014/02/140219%20Dual%20Contracts%20for%20Non-Doms%20-%20CIOT%20comments.pdf*

You must tell HMRC as soon as possible so that any under or overpayment of UK Income Tax can be corrected.

What should I do if I have paid the Remittance Basis Charge but my overseas employment income becomes taxable on the arising basis?

If you are within the time frame to amend your return you may withdraw your claim to the remittance basis.

22.16.7 *Dual contract condition 5: Regulatory requirement to work offshore*

Section 24A(17) ITEPA provides:

Condition 5 is that—

(a) were the duties of the relevant employment to be duties of the UK employment instead, all or substantially all of them could not lawfully be performed in the relevant territory (whether on the meeting of any condition or otherwise) by virtue of any regulatory requirements imposed by or under the law of that territory, and

(b) were the UK duties of the UK employment to be duties of the relevant employment instead, all or substantially all of them could not lawfully be performed in the part of the UK in which they are performed (whether on the meeting of any condition or otherwise) by virtue of any regulatory requirements imposed by or under the law of that part of the UK.

(18) In subsection (17)—

"the relevant territory" means the territory in which the duties of the relevant employment are performed, and

"UK duties" means duties performed in the UK.

HMRC dual contract guidance provides:

Examples of regulatory requirements include:

- in order to get a work permit in some countries, you have to have an employment contract in that country
- in order to provide certain types of financial services in the UK, you have to be employed by a person authorised by the Financial Conduct Authority

22.16.8 *Commencement of dual contract rules*

Para 7 sch 3(1) FA 2014 provides:

Section 23(1A) of ITEPA 2003 (as inserted by paragraph 2) has effect in relation to general earnings which are general earnings from an employment for the tax year 2014-15 or any subsequent tax year.

22.16.9 *Dual contract rules: commentary*

HMRC describe the use of dual contracts as "artificial". In case the reader should miss the point, the word "artificial" occurs 6 times in the two page press release announcing the new rules.[26]

In fact the view that these arrangements are "artificial", in the more pejorative sense of that rather vague expression, is difficult to defend. The 1955 Royal Commission did not consider that there was anything objectionable in dual contract arrangements.[27] In 2004 HMRC said:

> We can confirm again that we do not intend promoters or employers to have to disclose everyday advice and arrangements. In the context of employment products this would include ... standard dual contract arrangements ...[28]

The EI Manual provides:

> **77030 Appendix 3: Non domiciled employees: Dual contract arrangements** [February 2006]
> ... Where there are two employment contracts and the written contracts reflect this, dual contract arrangements provide a legitimate way to structure an individual's employment relationships.

---

26 HMRC, "Artificial use of dual contracts by non-domiciles" (19 March 2014).

27 Report Cmd 9474 para 305 proposed:

"(3) Let the resident be taxed— ...

(c) on the apportioned basis, if he is domiciled outside the UK, in respect of income from an employment which is performed partly inside and partly outside the UK, the part of his income attributed to the work performed outside the UK being itself taxed on the remittance basis;

(d) on the whole income, if he is domiciled in the UK, in respect of income from an employment which is performed partly inside and partly outside the UK.

306. The reason for the special treatment of the non-domiciled resident is that the person most likely to be affected is the employee of a foreign concern who makes his home and headquarters in the UK, while his duties include a good deal of work in Europe. It seems fair to treat his 'European' earnings as if they were truly foreign income, and it is probably to the advantage of this country to recognise the special case. *Even if it did not, most of such employees could get into an equivalent position by having two separate contracts of service, one providing for UK duties and remuneration and the other for European duties and remuneration, in which event the latter income would be taxed on the remittance basis as at present.*" (Emphasis added)

28 Statement to CIOT 23/08/04 accessible *http://old.tax.org.uk/showarticle.pl?id=2704*

Those affected may well feel irritated by HMRC's claim that:

> This measure is expected to have a negligible impact on businesses and civil society organisations. It is directed at a small number[29] of individuals seeking to use artificial tax arrangements in conjunction with their employers. There will be no effect on compliant[30] employers.

The rules are a breach of the promise of stability,[31] though no-one took that seriously.

The ICEAW stated:

> Given that internationally mobile senior employees are the decision makers in a multi-national organisation targeting them in this manner could have significant long term implications for the competitiveness of the UK.[32]

22.17 Overseas workday relief

Before 2013 there was a relief for employees who were UK resident but not ordinarily resident. Following the abolition of ordinary residence the relief was recast without using the term ordinary residence, but it covers similar ground. HMRC call this **"overseas workday relief"** and I adopt that label, though it is not particularly apt.

The development of the relief can be traced in the residence consultation papers,[33] but that is now of historic interest only.

Section 26(1) ITEPA provides:

> (1) This section applies to general earnings for a tax year where
> [i] section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and
> [ii] the employee meets the requirement of section 26A [OWR] for that year,

---

29 The TIIN quantified this as 350 individuals: *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/293818/TIIN_6040__artificial_use_of_dual_contracts_by_non-domiciles.pdf*

30 On this use of the contested word "compliant", see 44.6.4 (Investment manager condition E: customary remuneration). Note in this case non-compliance (if the term is permissible) arose as a result of a change of HMRC policy.

31 See 1.8 (The promise of stability).

32 TAXREP 14/14 *http://www.icaew.com/~/media/Files/Technical/Tax/Tax-faculty/TAXREPs/2014/taxrep-14-14-artificial-use-of-dual-contracts-by-non-domiciles.pdf*

33 See 4.1 (Residence – Introduction).

if the general earnings meet all of the following conditions—

(a) they are neither—
  (i) general earnings in respect of duties performed in the UK, nor
  (ii) general earnings from overseas Crown employment subject to UK tax,[34] and

(b) if the tax year is a split year as respects the employee, they are attributable to the UK part of the year.

I refer to earnings within s.26(1) as **"OWR earnings"**. Section 26(2) ITEPA provides the remittance basis for OWR earnings:

> The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year.

Section 26(6) ITEPA provides:

> Section 15(1) does not apply to general earnings within subsection (1).

Thus earnings which do not qualify for OWR continue to fall under the s.15 arising basis.

In short, under overseas workday relief, a remittance basis taxpayer pays tax:

(1) on an arising basis on general earnings in respect of duties performed in the UK; and
(2) on a remittance basis on other earnings.

If the s.26A requirements are met, it is easier to qualify for OWR than for the COE remittance basis:

(1) It is not necessary to have a foreign employer.
(2) It is not necessary that duties are performed *wholly* outside the UK. (So it is not necessary to consider dual contract arrangements.)

Much of the wording of the OWR remittance basis repeats that found in the COE remittance basis; so the reader is referred back to 22.11 (COE remittance basis).

See too 22.26 (OWR mixed fund rule).

22.17.1 *Section 26A requirements*

The section 26A requirements roughly equate to the pre-2013 requirement to be non-ordinary resident in the UK. Section 26A ITEPA provides:

---

34 See 22.31 (Overseas Crown employment).

(1) An employee meets the requirement of this section for a tax year if the employee was—

(a) non-UK resident for the previous 3 tax years, or

(b) UK resident for the previous tax year but non-UK resident for the 3 tax years before that, or

(c) UK resident for the previous 2 tax years but non-UK resident for the 3 tax years before that, or

(d) non-UK resident for the previous tax year, UK resident for the tax year before that and non-UK resident for the 3 tax years before that.

(2) The residence status of the employee before the 3 years of non-UK residence is not relevant for these purposes.

22.17.2 *HMRC examples*

HMRC have issued guidance in RDR4.[35] The current guidance is based on the Finance Bill 2013. Further guidance will no doubt be issued in due course.

RDR4 provides:

> 6. The number of tax years for which you can be eligible for OWR in your lifetime is not limited. As long as there is a period of three consecutive tax years where you were not resident in the UK, you may be eligible for OWR even if you have already previously benefited from the relief.
>
> 7. Where the tax year for which OWR applies is a split year for you, OWR will only apply to foreign earnings which relate to the UK part of the year. For these purposes it does not matter whether the year is split into a UK part and then an overseas part of the year or the other way round.
>
> 8. Where the tax year for which OWR applies is not a split year, OWR will apply to foreign earnings relating to duties in any part of that tax year.
>
> 9. OWR does not apply to earnings which relate to duties you perform overseas in the overseas part of a split year. Such earnings are not taxable in the UK, even if they are remitted. Earnings which relate to duties you perform in the UK in the overseas part of a split year are taxable in full unless they are exempt from UK tax under the terms of a Double Taxation Arrangement.

---

35 HMRC "Guidance Note: Overseas Workday Relief" (May 2013) *http://www.hmrc.gov.uk/international/rdr4.pdf*

10. OWR does not apply to earnings which relate to duties you perform overseas in a tax year for which you are not resident in the UK. Such earnings are not taxable in the UK, even if they are remitted. Earnings which relate to duties that you perform in the UK in a tax year for which you are not resident in the UK are taxable in full unless they are exempt from UK tax under the terms of a Double Taxation Arrangement.
11. Note that, when calculating your taxable earnings for a tax year in which your are not resident in the UK, or for an overseas part of a tax year of UK residence, special rules apply to the general earnings from overseas Crown employment subject to UK tax.
12. Earnings are usually received at the same time as, or shortly after, you earn them. However you may receive some earnings in a year, such as a bonus, which is for an earlier period because it relates to duties you performed in that period.
13. For instance, you may perform duties in one tax year but receive some of the earnings for those duties in a later tax year. Or you may perform duties in an overseas or UK part of a split year, but receive payment in the other part of the split year (UK or overseas), or indeed in another tax year altogether.
14. It is your circumstances in the period that the earnings are for which determines your eligibility to OWR in relation to those earnings, and not, if they are different, your circumstances in the year you receive them.
15. The following examples demonstrate how the rules apply in practice. In each example, unless otherwise stated, the individual is not domiciled in the UK throughout the period and performs employment duties partly in the UK and partly overseas.

Example 1 (Abdul)
A arrives in the UK on 1 February 2014 to begin a work secondment; he has not previously been to the UK and so has not been resident here before. He leaves the UK on 5 April 2017.
Under the SRT, A is resident in the UK for the tax year 2013-14 and is eligible for split year treatment. The UK part of his split year begins on 1 February 2014.
A is also resident in the UK for the tax years 2014-15, 2015-16 and 2016-17. He claims the remittance basis of taxation for the tax years 2013-14, 2014-15, 2015-16 and 2016-17. He is not resident in the UK for the tax year 2017-18.
A's foreign earnings for 2013-14 (from 1 February 2014), 2014-15 and 2015-16 are eligible for OWR and are only taxable in the UK if and when they are remitted to the UK. In 2016-17 A is not eligible for OWR

as he has received the relief in the three preceding tax years. As such his foreign earnings for 2016-17 are fully taxable in the UK.
Provided A remains not resident in the UK for three consecutive tax years following 2016-17 he may be eligible for OWR again from the 2020-21 tax year.

Example 2 (Burril)
B arrives in the UK on 1 March 2014 to begin a work secondment. He has not been to the UK previously and so has not been resident here. He leaves the UK on 5 April 2017.
He is not resident in the UK under the SRT for the tax year 2013-14. He is resident in the UK for the tax years 2014-15, 2015-16 and 2016-17. He claims the remittance basis of taxation for the tax years 2014-15, 2015-16 and 2016-17. He is not resident in the UK for the tax year 2017-18.
B's foreign earnings for 2014-15, 2015-16 and 2016-17 are eligible for OWR and are only taxable in the UK if and when they are remitted to the UK.
Unlike Abdul, B is not resident in the UK in 2013-14 (the tax year in which his UK secondment commenced). B is therefore eligible for OWR for 2016-17 because this is the third year for which he is UK resident.
Provided B remains not resident in the UK for three consecutive tax years following 2016-17 he may be eligible for OWR from the 2020-21 tax year.

Example 3 (Colar)
C arrives in the UK on 1 February 2014 to begin a work secondment. He has previously been resident in the UK. He ceased to be resident in the UK on 5 April 2011.
He was not resident in the UK for the tax years 2011-12 and 2012-13. He leaves the UK on 5 April 2017.
He is resident in the UK for the tax year 2013-14 under the SRT and is eligible for split year treatment. The UK part of his split year begins on 1 February 2014.
He is resident in the UK for the tax years 2014-15, 2015-16 and 2016-17. He claims the remittance basis of taxation for the tax years 2013-14, 2014-15, 2015-16 and 2016-17. He is not resident in the UK for the tax year 2017-18.
C has not been non-resident in the UK for three consecutive tax years immediately prior to his secondment to the UK. He is not eligible for OWR for 2013-14, 2014-15, 2015-16 or 2016-17. If he remains not resident in the UK for three consecutive tax years following 2016-17 he

may be eligible for OWR from the 2020-21 tax year.

Example 4 (Drey)
D is employed by a US company and has visited the company's group office in the UK on short business projects on a number of occasions in each of several tax years prior to 2013-14. He has not been UK resident prior to 2013-14.
In 2013-14 D works on a short business project in the UK and is resident for the year under the SRT. He has further business visits to the UK during 2014-15 but is not resident in the UK for that year. He is seconded to work at the company's group office in the UK for three years from 1 May 2015. D leaves the UK on 5 April 2018.
D is resident in the UK for the tax year 2015-16 and is eligible for split year treatment. The UK part of his split year begins on 1 May 2015.
He is resident in the UK for the tax years 2016-17 and 2017-18. He does not claim the remittance basis of taxation for 2013-14. He claims the remittance basis of taxation for 2015-16, 2016-17 and 2017-18.
In 2013-14 D was not eligible for OWR because, even though he was not resident in the UK for the three previous consecutive tax years, he had not claimed the remittance basis of taxation for that year.
D's foreign earnings for (the UK part of) 2015-16 are eligible for OWR because 2015-16 is one of three tax years immediately following three consecutive tax years for which he was not resident.
His earnings for 2016-17 and 2017-18 are not eligible for OWR because neither year is one of three tax years immediately following three consecutive tax years for which he was not resident.

Example 5
In January 2017 D receives his 2016 performance bonus which is in respect of his duties throughout the calendar year 2016.
He is not eligible for OWR for 2016-17 when he receives his bonus but as part of it was earned in respect of duties performed in 2015-16, that part is eligible for OWR.

16. If you were ordinarily resident in the UK and so not eligible for OWR for tax years before 2013-14, you may still be eligible for relief for 2013-14 and 2014-15 under the new rules. Even if it was your intention when you came to the UK to settle here and you became ordinarily resident, this does not prevent you from being eligible for OWR from 6 April 2013 under the new rules.
If you were not eligible for OWR at 5 April 2013, the new eligibility rules will apply to you from 6 April 2013.

Example 6 (Estelle)
E arrives in the UK on 6 April 2012 to begin a work secondment which will last for four years. She has not previously been to the UK and so has not been resident here before.
For 2012-13 she is resident and ordinarily resident in the UK and claims the remittance basis of taxation. Her earnings for 2012-13 are not eligible for OWR because she is ordinarily resident for that year.
She is resident in the UK for 2013-14, 2014-15 and 2015-16 and claims the remittance basis of taxation for each of these tax years.
Her foreign earnings for 2013-14 and 2014-15 are eligible for OWR and are only taxable if and when they are remitted to the UK. Her earnings for 2015-16 do not qualify for OWR because this is not one of the three tax years immediately following three consecutive tax years for which she was not resident.

22.17.3 *2013 Transitional relief*

RDR4 provides:

Transitional rules
17. Only eligibility to OWR that commences on or after 6 April 2013 will be subject to the rules contained in this guidance note.
18. If you were resident but not ordinarily resident in the UK at 5 April 2013, and so eligible for OWR at that date under the old rules (see HMRC6, Chapter 3 'Ordinary Residence in the UK'), the new rules will not apply to you. You may still have OWR for 2013-14, 2014-15 and 2015-16 as appropriate, if you would have been entitled to relief under the old rules. However, you must meet these old rules for each year concerned. If your circumstances are such that you would have been ordinarily resident for a year, you will not be eligible for relief for that year even if you are able to meet the new conditions.
If you were in receipt of OWR for:

- 2010-11, 2011-12 and 2012-13, you may continue to be eligible for OWR under the old rules for 2013-14, so long as you were nonresident in the UK for 2009-10
- 2011-12 and 2012-13, you may continue to be eligible under the old rules for 2013-14 and 2014-15, so long as you were non-resident in the UK for 2010-11
- 2012-13, you may continue to be eligible under the old rules for 2013-14, 2014-15 and 2015-16, so long as you were non-resident in the UK for 2011-12

19. The new rules will apply to you after you have been non-resident in the UK for three consecutive tax years.

Example 7 (Francis)
F arrives in the UK on 1 December 2011 to begin a work secondment which is expected to last for 35 months. He has not previously been in the UK and so has not been resident here before.
For the tax years 2011-12 and 2012-13 he is resident but not ordinarily resident in the UK and claims the remittance basis of taxation. His foreign earnings for these years are eligible for OWR and are only taxable if remitted.
However, as F was eligible for OWR for 2012-13, the new rules do not apply to him.
He leaves the UK permanently in 1 November 2014. Under the SRT, F is resident for 2013-14 and 2014-15 and claims the remittance basis of taxation. He would have been not ordinarily resident for 2013-14 and 2014-15 under the old rules.
He may have OWR for 2013-14 and 2014-15 on the same basis as for 2012-13 because he would have been eligible if the rules had not changed.

Example 8 (Greta)
G arrives in the UK on 1 December 2012 to begin a work secondment which is expected to last for 35 months. She has not previously been in the UK and so has not been resident here before.
For 2012-13 she is resident but not ordinarily resident in the UK and claims the remittance basis of taxation. Her foreign earnings for 2012-13 are eligible for OWR and are only taxable if and when they are remitted to the UK. As G was eligible to OWR for 2012-13, the new rules do not apply.
In March 2015 G decides to settle in the UK and buys a house here. As a result, she would have been ordinarily resident in the UK from 6 April 2014 if the rules had not changed.
G may have OWR on her foreign earnings for 2013-14 because she would have been not ordinarily resident and eligible for relief for that year if the rules had not changed.
For 2014-15 she is not eligible for OWR because she would have been ordinarily resident for that year. She is not eligible under the new rules because they do not apply to her.

Example 9 (Herman)
H was born in the UK and is domiciled here. He has lived and worked overseas for eight years before coming here on 1 December 2012 for a work secondment which is expected to last for 30 months. During the secondment H performs some of his employment duties overseas.

For 2012-13 he is resident but not ordinarily resident in the UK and claims the remittance basis of taxation. Although he is domiciled in the UK he is still able to claim the remittance basis of taxation because he is not ordinarily resident. His foreign earnings for 2012-13 are eligible for OWR.

Because H was eligible for OWR for 2012-13, the new rules do not apply.

The work secondment ends on 1 June 2015 when H leaves the UK to live and work overseas for the next five years.

H is resident in the UK for 2013-14, 2014-15 and 2015-16 but is not able to claim the remittance basis of taxation for these years because he is domiciled in the UK. If the rules had not changed he would have been not ordinarily resident for 2013-14, 2014-15 and 2015-16

Under the transitional rules he is able to access the remittance basis and his foreign earnings for 2013-14, 2014-15 and 2015-16 are eligible for OWR on the same basis as for 2012-13.

22.18 Non-resident employee

Section 27 ITEPA provides:

> (1) This section applies to general earnings for a tax year for which the employee is not resident in the UK if they are—
>
> (a) general earnings in respect of duties performed in the UK, or
>
> (b) general earnings from overseas Crown employment subject to UK tax.[36]
>
> (2) The full amount of any general earnings within subsection (1) which are received in a tax year is an amount of "taxable earnings" from the employment in that year.
>
> (3) Subsection (2) applies whether or not the employment is held when the earnings are received.

This applies regardless of domicile. DTAs often override the charge to UK tax.[37]

There are two requirements in para (a):

(1) Duties performed in the UK; and

(2) Earnings in respect of those duties.

These concepts are both relevant for:

(1) Workday relief, where it makes the difference between an arising and

---

36 See 22.31 (Overseas Crown employment).

37 See 22.36 (DT Relief: employment exercised outside UK).

a remittance basis.

(2) A non-resident employee, where it makes the difference between taxable earnings and tax-free earnings.

It is best to consider these separately.

22.19 Duties "performed in the UK"

Section 38 ITEPA elucidates the concept of where duties are performed:

> (1) This section applies if a person ordinarily performs the whole or part of the duties of an employment in the UK.
>
> (2) General earnings for a period of absence from the employment are to be treated for the purposes of this Chapter as general earnings for[38] duties performed in the UK except in so far as they would, but for that absence, have been general earnings for duties performed outside the UK.[39]

EI Manual provides:

> **40202 Employee resident, ordinarily resident or domiciled outside the UK: Location of duties: Absence from duties** [January 2009]
>
> If an employee who ordinarily works in the UK is absent from work, the general earnings for the period of absence must be treated as being for duties performed in the UK, even if the employee is in fact abroad at that time. If, exceptionally, the employee can show that if he had been working, the earnings would have been for working abroad then this rule is not applied.
>
> *Example*
>
> An employee who is not ordinarily resident in the UK performs the duties of the employment in Manchester. Illness meant that a holiday in Florida was unexpectedly extended so the days normally spent in the UK were lost. The Inspector received a calculation of earnings chargeable under s.15 [ITEPA][40] that excluded salary attributable to the days of absence.
>
> The Inspector successfully contended that s.38 [ITEPA] applied on the basis that the duties of the employment were normally performed in the

---

38 S.38 refers to earnings "for" duties performed in the UK, whereas ss.26, 27 ITEPA refer to earnings "in respect of" duties performed in the UK, but the meaning must be the same.

39 Special rules apply for:
(1) duties on board vessels or aircraft: s.40 ITEPA;
(2) duties performed in the UK sector of the Continental Shelf: s.41 ITEPA.

40 The reference from 2008/2009 is now s.26 ITEPA.

> UK. The earnings that had been excluded were therefore UK-based earnings within s.15 [ITEPA]

22.20 Earnings "in respect of" duties performed in the UK

Section 41ZA ITEPA provides:

> The extent to which general earnings are in respect of duties performed in the UK is to be determined under this Chapter on a just and reasonable basis.

The question whether earnings are "in respect of" duties performed in the UK is relevant for non-ordinarily resident employees as earnings in respect of duties performed in the UK are taxed on an arising basis and other earnings are taxed on a remittance basis. SP 1/09 explained how this was applied where duties of a single employment are performed both in and outside the UK and presumably the same principles will continue to apply:

> 13. Where the duties of a single office or employment are performed both in and outside the UK, an apportionment is required to determine how much of the general earnings are attributable to the UK duties. Apportionment of general earnings is essentially a question of fact, but for many years HMRC has accepted time apportionment, based on the number of days worked abroad and in the UK, except where this would clearly be inappropriate. For example, in the case of an employee with 200 working days in the UK and 50 working days outside the UK, the proportion of general earnings attributable to UK duties would be 200/250. This practice does not, of course, apply where the charge arises under Section 15 ITEPA and relief is due under Part 5 Chapter 6 ITEPA (Deductions from seafarers' earnings).

See too *Coxon v Williams* 60 TC 659. EI M77020 provides:

> **77020. Appendix 2: General earnings in respect of duties performed in the UK** [August 2008]
> (Adapted from an article in Tax Bulletin 63 – February 2003. The section headed "Practical issues - international business travel" sets out a methodology that first appeared as Appendix 2 to the Minutes of the meeting of the Joint Forum on Expatriate Tax and NICs held on 18 April 2007.)
> ... Whether general earnings (emoluments) are in respect of UK duties is essentially a question of fact. In *Taylor v Provan* (49 TC 579), the courts agreed that the touchstone must be the wording of the statute. In that case, travel expenses paid to a director to come to the UK in order to perform duties here were considered to be "emoluments in respect of duties performed in the UK". In *Perro v Mansworth* [2001] STC (SCD) 179, a Special Commissioner found that the payment by an employer of an employee's liability to tax on UK-based earnings (Case II Schedule E) was itself "an emolument in respect of duties

performed in the UK".

Where an attribution is required, Statement of Practice 5/84 (SP5/84) approves time apportionment according to the number of days worked abroad and in the UK except where this would clearly be inappropriate. The *Perro* case is an example of where time apportionment is not appropriate. The starting point for the SP5/84 approach to time apportionment is that the employee's contractual right to earnings for the work performed usually accrues from day to day. Authority for this view comes from *Varnam v Deeble* (58 TC 501), although that case was not directly concerned with attributing earnings to UK duties for the purposes of the charge to UK tax. In *Platten v Brown* (59 TC 408), it was held that correct attribution on a time apportionment basis should employ units of days rather than hours.

The courts have consistently taken the view that time apportionment should not be applied to earnings that can be specifically allocated either to duties performed in the UK or to duties performed elsewhere. So time apportionment would be inappropriate in a case where the contract of employment specifically allocated earnings to periods spent working in the UK or overseas. Provisions in a contract of employment that regulate the amount of time to be devoted to the employment, dealing with matters such as the number of days to be worked, the length of holidays or how to calculate compensation do not amount to an allocation of particular parts of remuneration to particular days of work.

This appendix gives examples of how the time apportionment approach envisaged by SP5/84 applies in practice. Self-Assessment Helpsheet IR211 approaches apportionment by calculating the earnings from the employment that are not taxable in the UK. The total earnings are multiplied by a fraction where the numerator is the number of days worked outside the UK and the denominator is the number of days worked in pursuit of the employment during the tax year. Where there are no UK-based earnings taxable under either section 25 or section 27 ITEPA, the resultant figure will be entered at Box 1.31 on the employment page as foreign earnings not taxable in the UK. Although the amount that is not taxable is sometimes referred to as "overseas workday relief", it is not a statutory relief from tax subject to the claims machinery in Section 42 TMA 1970.

Note 4 to IR211 clarifies what is meant by days worked overseas. They are defined as those days that have been spent outside the UK substantially performing the duties of the employment. "Substantially" should be taken as meaning "for the most part". In *Platten v Brown* there is the example of an employee who spends a whole day working in the UK but then leaves the country that evening on an overseas business trip. It would be difficult to say as a matter of contract that the employee's earnings for that day were not attributable on a time apportionment basis to duties performed in the UK. It follows that the earnings for a day spent working overseas before returning to the UK in the evening will be attributable to duties performed overseas.

There are two questions of fact to be addressed in order to attribute the earnings for a particular day. These are:

- whether the day has been spent substantially performing the duties of the employment
- where those duties have been performed.

Employees should retain evidence such as travel documents and business diaries to demonstrate how they have calculated the earnings from overseas workdays. The following comprehensive example illustrates some practical issues.

***Example** (Monica)*

M is resident but not ordinarily resident in the UK. Her salary of £100,000 is paid

directly into an offshore bank account. Her contract of employment provides for a five-day 40-hour working week with 22 days holiday plus public holidays - a total of 230 workdays.

During 2005-06, her employer sent her to work at its branch in India for the whole of October and November, a period of 45 weekdays. She also attended the branch office in India on the first Saturday and Sunday in October and spent three other Saturdays working on her employer's Indian premises. She received a special bonus of £15,000 awarded solely in recognition of her work in India.

In addition, she attended her employer's Munich office on five separate occasions during the year. On four of these occasions, she left the UK after work and stayed overnight before returning to the UK on the following evening. On the final occasion, she left the UK on a Friday evening and spent the weekend in Munich. She spent three hours of the Sunday reading papers relevant to a meeting on the following day. She returned to the UK on Monday evening.

M was substantially performing the duties of her employment on the five non-weekdays spent working in India, giving a total 50 workdays in India. The Sunday in Munich was not an overseas workday so her duties in Germany encompassed five workdays. The special bonus was on the facts solely attributable to the performance of duties in India.

Time apportionment produces the following result –

UK duties - Salary 100,000 × 180/235 = 76,595 (Section 25 ITEPA)

Overseas duties - Salary 100,000 × 55/235 = 23,405 plus 15,000 = 38,405

Example - variation A

Following her return to the UK, M's employer gave her time off in lieu of the weekends spent working in India. The denominator in the fraction would become 230 and not 235.

UK duties - Salary 100,000 × 175/230 = 76,086 (Section 25 ITEPA)

Overseas duties - Salary 100,000 × 55/230 = 23,914 plus 15,000 = 38,914

Example - variation B

Facts are as variation A plus M spent the whole of Sunday 30 September travelling to India and was granted a further day off in lieu when she returned to the UK. That day should also be counted as an overseas workday increasing the numerator by one to 56.

UK duties - Salary 100,000 × 174/230 = 75,652 (Section 25 ITEPA)

Overseas duties - Salary 100,000 × 56/230 = 24,348 plus 15,000 = 39,348

Practical issues – international business travel

The time of departure or arrival and the duration of international business travel can make it extremely difficult to decide whether a particular day should be regarded as a UK or an overseas workday. In these specific circumstances, HMRC is prepared to accept that the following treatment provides a reasonable basis for determining the status of such a day:

International flight or journey lasting no more than seven hours

- Morning arrival – UK workday
- Morning departure – overseas workday
- Afternoon arrival – overseas workday
- Afternoon departure – UK workday

International flight or journey lasting more than seven hours

- Morning arrival – half UK workday and half overseas workday
- Morning departure – overseas workday
- Afternoon arrival – overseas workday

• Afternoon departure – half UK workday and half overseas workday

A morning or afternoon arrival or departure is judged according to the time that the aircraft, vessel or train actually arrives or departs, not the scheduled times.

Where a journey involves more than one international flight, a one hour transfer addition may be added to the actual flight times to determine whether the total flight time lasts more than seven hours. International business travel that takes place on a Saturday, Sunday or Bank Holiday is subject to the same treatment as any other day. Note: HMRC may accept alternative approaches to quantifying overseas workdays if the available evidence indicates that such an approach better reflects the facts.

22.21 Remittance after year which earnings are "for"

Suppose:

(1) T receives earnings for year 1; the earnings are taxed on the remittance basis and are not remitted in that year.

(2) The earnings are remitted in year 2.

For the COE remittance basis, s.22 ITEPA provides:

> (1) This section applies to general earnings for a tax year, to the extent that they are chargeable overseas earnings for that year, if—
>
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year, and
>
> (b) the employee does not meet the requirement of section 26A [OWR] for that year.
>
> (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year. ...

Similarly, for the OWR remittance basis, s.26 ITEPA provides:

> (1) [a] This section applies to general earnings for a tax year where section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and the employee meets the requirement of section 26A [OWR] for that year, if
>
> [b] the general earnings are neither—
>
> (a) general earnings in respect of duties performed in the UK, nor
>
> (b) general earnings from overseas Crown employment subject to UK tax.
>
> (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year.

The earnings are "taxable earnings from the employment in that year" ie year (2). In year (1) the earnings are not "taxable earnings" (as defined).

22.22 Remittance after employment ceases

Section 22(3) ITEPA provides:

> Subsection (2) [charge on remittance of COE] applies whether or not the employment is held when the earnings are remitted.

Section 26(3) ITEPA provides the same rule for the OWR remittance basis.

22.23 Remittance of earnings "for" year that employee is not UK resident

To be "overseas earnings" the earnings must be "for" a year of assessment in which the employee was resident in the UK. Accordingly, any earnings "for" a year during which the employee was not UK resident can be remitted at any time without a charge to tax.

22.24 Remittance when non-resident

Suppose earnings taxable on the remittance basis are remitted in a year when the employee is non-resident. In the HMRC view the earnings are taxable. EI Manual provides:

> **42371. Foreign earnings taxed at time of receipt in UK: *Example***
> [February 2006]
> An employee is resident but not ordinarily resident in the UK in 2004/05. She has earnings for that year of £10,000 in respect of duties performed outside the UK. She is paid the £10,000 in New York in 2005/06. In 2006/07 she remits £5,000 of those earnings to the UK. The result is that this employee is chargeable under Section 26(2) ITEPA 2003 on £5,000 in 2006/07.
> This employee is likely to be resident in the UK in the year of remittance but she is assessable on the remittance even if she is not. What matters is her residence status in the year when the money was earned (see EIM42201). She will also be assessable on any further remittances out of the £5,000 balance that remains.
> Note that the employee is chargeable on any remittances to the UK even if her employment ceases in 2005/06 (see EIM42370).

Is this correct? It is a surprising anomaly compared to the position for RFI, and enforcement may be difficult, but this is the natural reading of the legislation. The TNR rules are drafted on that basis: hence they apply to RFI but not to employment income.

22.25 Receipt or remittance after death of employee

Section 13(4) ITEPA provides:

> If the tax is on general earnings received, or remitted to the UK, after the death of the person to whose employment the earnings relate, the person's personal representatives are liable for the tax.

EI Manual provides:

> **42380. Basis of assessment for general earnings: Earnings received after the death of an employee or office holder** [August 2012]
> When an employee or office holder dies, earnings received (or, if the employee was subject to the special rule for certain foreign earnings, received in the UK) after the date of death are treated as income of the personal representatives and not the income of the deceased. They are assessable on the personal representatives in the same way as if they had been received by the employee or office holder (see generally EIM42201). The earnings will, of course, all have been earned in periods before the date of death even though they are assessable only on receipt.
> If it is contended that earnings cannot be attributed to any particular period during the lifetime of the deceased employee or office holder, see EIM40005. So it is the place where duties were performed and the residence and ordinary residence status of the employee when the remuneration was earned that counts. The residence position of the personal representatives at the time the earnings are received (or, where the special rules for certain foreign earnings apply, received in the UK) is irrelevant.
> In cases where an employee or office holder has died the employer will follow the instructions at page 16 of the Employer's Further Guide to PAYE. By following those instructions the employer will account for tax in the following way:
> - where payments are made in the tax year in which the employee died, and before a P45 is issued, the employer will calculate the tax due using the tax code in use before the employee died
> - where payments are made in the tax year in which the employee died, but after the P45 has been issued, the employer will use code OT Week1/Month1
> - when payments are made in a tax year following that in which the employee died the employer will prepare a new deductions working sheet and will use code OT Week1/Month1.
>
> The statutory assessing position for earnings received by personal representatives after the death of an employee or office holder is set out in EIM42390. In many cases, adopting the statutory position would place an additional burden upon the personal representatives and family of the deceased but would not result in materially different overall tax liability. Sensible administrative procedures should be used in this type of case.
> Normally, you can take the pay and tax shown on the deceased's P45 as received

in the period before the date of death, and follow EIM42410. However you should use the strict basis of assessment, and follow EIM42390, in cases:

- where it is requested, or
- where you know that a substantial amount has been paid after the date of death. For these purposes a substantial amount means a sum in excess of £1,500.

The tax chargeable on the personal representatives is a debt due from and payable out of the deceased's estate.

As regards:

- the strict basis of assessment for the personal representatives of a deceased employee or office holder, see EIM42390
- the time limit for assessments on the personal representatives, see EIM42400
- the treatment of earnings received up to the date of death, see EIM42410.

42390. Earnings received after the death of an employee or office holder: The charge on personal representatives [February 2006]

If an employee or office holder dies and earnings are received after the date of death, the personal representatives are charged to tax on them (see EIM42380). They are charged:

- at the basic rate only
- in the year the earnings are received (or, where the special rules for certain foreign earnings apply, received in the UK)
- without any allowances, deductions or reliefs except for the deductions, reliefs and exemptions that would have been due to the employee had they lived.

The personal representatives cannot claim deductions for expenses that they incur separately themselves. The main deductions due are therefore:

- expenses within Sections 336 to 338 ITEPA 2003 incurred by the employee or office holder (see EIM31620 onwards)
- balancing allowances due to the employee or office holder; balancing charges will also fall on the personal representatives (see EIM36500 onwards)
- foreign travel and accommodation expenses within Sections 341, 342 and 370 to 376 ITEPA 2003 incurred by the employee or office holder (see EIM34000 onwards)
- professional fees and subscriptions within Sections 343 and 344 ITEPA 2003 (see EIM32880 onwards)
- where a lump sum is assessable under the "golden handshake" provisions the various exemptions that are available under Sections 404 to 414 ITEPA 2003 (see EIM13500 onwards).

A deduction that is due is not limited to expenses actually paid by the deceased. The personal representatives can have a deduction for an expense that the deceased was due to pay but that the representatives actually settle.

As regards:

- the time limit for assessing personal representatives, see EIM42400
- the treatment of earnings received up to the date of death, see EIM42410.

42400. Earnings received after the death of an employee or office holder: Time limits for assessments on personal representatives [May 2010]

> The normal 5 year 10 month time limit for making assessments applies where earnings are received after the death of an employee.[41]
> This is because the earnings are deemed to be the income of the personal representatives (see EIM42380). So the 3 year 10 month assessing time limit in Section 40 TMA 1970 relating to income arising or accruing up to the date of death does not apply.
> The SA Manual sets out the procedures relating to personal representatives.
> As regards earnings received before the date of death see EIM42410.
> **42410. Death of employee or office holder: Earnings received up to the date of death** [May 2010]
> When an employee or office holder dies, any earnings received before the date of death are chargeable on the employee in the normal way. But if the employee has died before filing a return for the period in which the earnings were received, the executors or personal representatives will be asked to complete returns to the date of death. In these circumstances the special rules at EIM42380 to EIM42400 do not apply and any assessment on the personal representatives must be made within 3 years and 10 months from the end of the year of assessment in which the employee died.
> With effect from 1 April 2010 the time limit is 4 years from the end of the tax year in which the employee dies.
> The SA Manual sets out the procedures relating to personal representatives.

Where the arising basis applies, there is clearly a tax charge for earnings received after death by the PRs.

Where the remittance basis applies, it is difficult to see how there could be a charge on earnings received in the UK after the death of the employee, since the tax charge only arises on receipt by a relevant person, and there are no relevant persons after the death of an employee.

22.26 OWR mixed fund rule

22.26.1 *The need for an OWR mixed fund rule*

This section considers the position where:

(1) an OWR employee receives earnings for duties which are performed partly in and partly out of the UK.
(2) The earnings are received abroad.

The earnings received constitute a mixed fund consisting of:

(1) Earnings taxed on an arising basis under s.15 ITEPA. Statute calls this "s.15 earnings" but I will use the term **"taxed UK earnings"**
(2) Earnings taxed on the remittance basis under s.26 ITEPA. Statute calls this "s.26 earnings" but I will use the term **"untaxed foreign**

41 [Author's note: This is out of date from 2010/11].

earnings".

In the absence of relief, the statutory position is (in short) taxed UK earnings (mixed fund category (a)) are remitted before untaxed foreign earnings (mixed fund category (b)), but later years' earnings are taxed before earlier years. So employees would need to keep each year's earnings in separate accounts and never remit more than the taxed income in the account.

22.26.2 *OWR mixed fund rule*

In the past, relief was allowed by concession. After consultation and response papers[42] the FA 2013 introduced a statutory rule. HMRC call this the Special Mixed Fund rules, but I will use the term **"OWR mixed fund rule"**. HMRC have issued 11 pages of interim guidance under the title FAQs; (**"OWR Mixed Fund FAQs"**).[43]

Section 809RA ITA provides:

> (1) This section applies if—
>
> (a) an individual has general earnings from an employment for a tax year,
>
> (b) those earnings include both
>
> [i] general earnings within section 15(1) of ITEPA 2003 ("section 15(1) earnings") and
>
> [ii] general earnings within section 26(1) of that Act ("section 26(1) earnings"),
>
> (c) at least some of the section 15(1) earnings, or sums deriving (wholly or in part, and directly or indirectly) from at least some of the section 15(1) earnings, are paid into an account in that tax year at a time (a "relevant time") when the account is a qualifying account of the individual, and
>
> (d) at least some of the section 26(1) earnings, or sums deriving (wholly or in part, and directly or indirectly) from at least some of the section 26(1) earnings, are also paid into the account in that tax year at a relevant time.

In short, we are looking at a mixed account with taxed UK earnings and

---

42 HMRC, *Reform of the taxation of non-domiciled individuals: a consultation* (June 2011).

HMRC, *Legislation of Statement of Practice 1/09 (SP1/09): summary of responses and draft legislation* (October 2012).

43 *http://www.hmrc.gov.uk/international/faqs-special-mixed-fund-rules.htm*

untaxed OWR earnings. This will arise when an employee has mixed UK/foreign duties.

OWR Mixed Fund FAQs provide:

> **I no longer qualify for Overseas Workday Relief but I still have money in what was my qualifying account. Can I still use the Special Mixed Fund rules?**
> No. You are only eligible to use the Special Mixed Fund rules where the conditions set out in the answer to Q1 are met. As one of the conditions is that you qualify for OWR, the special mixed fund rules can't apply to the account after you have ceased to qualify for OWR.

22.26.3 *"Condition A transfer"*

Section 809RA ITA provides:

> (6) A transfer from the account is a "condition A transfer" if and to the extent that—
> (a) condition A in section 809L is met, and
> (b) either—
> (i) the property or consideration for the service is (wholly or in part), or derives (wholly or in part, and directly or indirectly) from, the transfer, or
> (ii) the transfer, or anything deriving (wholly or in part, and directly or indirectly) from the transfer, is used as mentioned in section 809L(3)(c).

In short, a condition A transfer is one where property from the earnings account is received in the UK.

22.26.4 *"Other transfer"*

Section 809RA ITA provides:

> (7) A transfer from the account is an "other transfer" if and to the extent that it is not a condition A transfer.
> (8) Treat a transfer as an "other transfer" if and to the extent that, at the end of the tax year—
> (a) it is not a condition A transfer, and
> (b) on the basis of the best estimate that can reasonably be made at that time, it will not become a condition A transfer.

What is the position if the transfer is not a condition A transfer, but it will become one later, so it is also not an "other transfer"?

22.26.5 *The OWR mixed fund rule*

Armed with these definitions, we can turn to the OWR mixed fund rule. Section 809RA ITA provides:

> (2) If this section applies, the composition of each transfer made from the account in that tax year at a relevant time is to be determined as follows—
> *Step 1* Suppose that all the condition A transfers made from the account in the tax year at a relevant time had been a single transfer made from the account at the end of the tax year.
> *Step 2* Suppose that all the other transfers made from the account in the tax year at a relevant time had been a single offshore transfer made at the end of the tax year immediately after the single transfer mentioned in step 1.
> *Step 3* Applying those suppositions—
> (a) find under section 809Q(3) the extent to which the single transfer mentioned in step 1 is of the individual's income or chargeable gains, and
> (b) find under section 809R(4) the content of the single offshore transfer mentioned in step 2.
> *Step 4* Each transfer made from the account in the tax year at a relevant time is to be treated as containing the specified proportion of each kind of income or capital contained in the relevant deemed transfer.
> "The specified proportion" is the amount of the transfer divided by the amount of the relevant deemed transfer.
> "The relevant deemed transfer" is—
> (a) if the transfer is a condition A transfer, the single transfer mentioned in step 1, and
> (b) otherwise, the single offshore transfer mentioned in step 2.
> (3) Subsection (2) applies in determining the composition of a transfer for the purposes of sections 809Q and 809R but it does not otherwise affect the date on which a transfer is considered to occur for the purposes of this Chapter.
> (4) If the tax year is the tax year in which the account becomes a qualifying account, for the purpose of applying section 809Q(3) in relation to the single transfer mentioned in step 1 of subsection (2), treat the part of the tax year falling before the qualifying date for the account as a separate tax year.
> (5) If the account ceases to be a qualifying account of the individual during the tax year other than as a result of a breach of the deposit rule—
> (a) subsection (2) has effect as if references to the end of the tax

year were to the end of the day on which the account ceases to be a qualifying account, and

(b) for the purpose of applying section 809Q(3) in relation to the single transfer mentioned in step 1 of subsection (2), treat the part of the tax year falling after the day mentioned in paragraph (a) as a separate tax year.

(9) If the account ceases to be a qualifying account of the individual during the tax year other than as a result of a breach of the deposit rule, subsection (8) has effect as if the reference to the end of the tax year were to the end of the day on which the account ceases to be a qualifying account.

(10) "Qualifying account" and "the qualifying date" for an account are defined in section 809RB.

(11) For the purposes of this section and sections 809RB to 809RD—

(a) "employment" is to be read in accordance with section 4(1) of ITEPA 2003, and includes an office (as read in accordance with section 5(3) of that Act),

(b) whether general earnings are "for" a tax year is to be determined as for the purposes of the employment income Parts of ITEPA 2003 (see section 3(2) of that Act),

(c) a reference to anything "paid into" an account includes anything credited to the account by whatever means, and

(d) references to a breach of the deposit rule are to be read in accordance with section 809RC.

22.26.6 *"Qualifying account"*

Section 809RB ITA provides:

(1) An individual may by notice to the Commissioners nominate an account to be a qualifying account of the individual for the purposes of section 809RA.

(2) The notice must specify the qualifying date for the account.

OWR Mixed Fund FAQs provide:

How do I tell HMRC which account is my qualifying account?

You can notify HMRC which account was your qualifying account for the tax year in the whitespace notes of your tax return. Where you have changed qualifying accounts part way through the year, you must include details of all qualifying accounts which you have used during the year.

You will need to set out which accounts you have used as qualifying accounts for the tax year and the dates on which each account was a

qualifying account.

Section 809RB ITA provides:

(3) "The qualifying date" for the account is the first date on which there is paid into the account sums falling within subsection (4) which (in total) are more than £10.
(4) A sum falls within this subsection if it is, or derives wholly (whether directly or indirectly) from, general earnings of the individual from an employment for a tax year which is a relevant tax year in relation to the employment.
(5) A tax year is a "relevant" tax year in relation to an employment if the general earnings which the individual has for the tax year from the employment include both general earnings within section 15(1) of ITEPA 2003 and general earnings within section 26(1) of that Act.
(6) The individual may withdraw the nomination by giving a further notice to the Commissioners, specifying the date with effect from which the nomination is withdrawn.
(7) A notice under subsection (1) or (6) must be in writing and include such information as the Commissioners may reasonably require.
(8) A notice under subsection (1) or (6) must be given no later than—
(a) 31 January in the tax year following the tax year in which falls, as the case may be—
(i) the qualifying date for the account, or
(ii) the date with effect from which the nomination is withdrawn, or
(b) such later date as the Commissioners may allow.
(9) If an individual nominates an account under this section, the account is a "qualifying account" of the individual throughout the period—
(a) beginning with the qualifying date, and
(b) ending with the date before the earliest of the following dates—
(i) the date on which the account is closed or ceases to be an ordinary bank account held by and for the benefit of the individual (alone or jointly with others);
(ii) the date with effect from which the nomination is withdrawn under this section;
(iii) the qualifying date for another qualifying account of the individual;
(iv) 6 April in a tax year in which there is a breach of the deposit rule which is not remedied or cannot be remedied;
(v) 6 April in a tax year for which the individual has no general earnings within section 26(1) of ITEPA 2003.
(10) The account is not to be a qualifying account at all if—

(a) at any time on the qualifying date, the account is not an ordinary bank account held by and for the benefit of the individual (alone or jointly with others), or

(b) immediately before the qualifying date, the account has a credit balance of more than £10.

(11) The account is not to be a qualifying account at all if the qualifying date falls in a tax year—

(a) for which the individual has no general earnings within section 26(1) of ITEPA 2003, or

(b) in which there is a breach of the deposit rule which is not remedied or cannot be remedied.

(12) Subsection (9)(b)(iv) or (11)(b) (as relevant) is to be ignored if the breach occurs on or after a date falling within subsection (9)(b)(i) to (iii).

(13) If, apart from this subsection, an individual might have nominated two or more accounts for which the qualifying date would be the same, the individual may nominate only one of those accounts.

(14) If, apart from this subsection, an account would be a qualifying account of two or more individuals at any time, it is not to be a qualifying account of either or any of them at that time or any other time.

22.26.7 *"Ordinary bank account"*

Section 809RB ITA provides a commonsense definition:

(15) For the purposes of this section an account is an "ordinary bank account" if it is a cash account in a bank (whether a current or savings account) where sums standing to the credit of the account from time to time represent a debt owed by the bank to the account-holder.

22.27 The deposit rule

Section 809RC ITA provides:

(1) There is a breach of the deposit rule if a prohibited sum is paid into the account on or after the qualifying date.

The employee should take care not to pay any dividend income into the qualifying account! But it is (just) possible to remedy a breach of the deposit rule. Section 809RC ITA provides:

(2) A breach of the deposit rule is remedied if, within 30 days beginning with the day on which the individual became or ought reasonably to have become aware of the payment of the prohibited sum, the required

amount is transferred out of the account by way of a single one-off transfer.

(3) "The required amount" is an amount equal to—

(a) the prohibited sum, plus

(b) all the other prohibited sums (if any) that have been paid into the account since that sum was paid in.

But only two breaches are permitted. Section 809RC ITA provides:

(4) If there are 3 breaches of the deposit rule in any 12 month period, subsection (2) does not apply to the third breach and, accordingly, the third breach cannot be remedied.

Section 809RC ITA provides:

(5) The payment of a prohibited sum ("the later prohibited sum") into the account does not result in a breach of the deposit rule if—

(a) a breach resulting from an earlier payment of a prohibited sum into the account is remedied, and

(b) the later prohibited sum is represented by the required amount in relation to that breach.

22.27.1 *"Prohibited sum"*

Section 809RC ITA provides:

(6) A "prohibited sum" is anything other than a sum that is, or derives wholly (whether directly or indirectly) from, any of the following kinds of income or capital—

(a) general earnings of the individual from an employment for a tax year which is a relevant tax year in relation to the employment,

(b) general earnings of the individual from an employment which consist of money and are paid in a tax year which is a relevant tax year in relation to the employment,

(c) an amount of specific employment income which, by virtue of Part 6, 7 or 7A of ITEPA 2003 or any other enactment, counts as employment income of the individual in respect of an employment for a tax year which is a relevant tax year in relation to the employment,

(d) interest on the account, or

(e) consideration for the disposal of employment-related securities or employment-related securities options in the circumstances described in subsection (7).

The rules for employment-related securities are, as one would expect, very

complicated. Section 809RC ITA provides:

(7) The circumstances are—

(a) the securities or options were acquired pursuant to a right or opportunity available by reason of an employment of the individual,

(b) the disposal is or occurs in conjunction with, or as soon as reasonably practicable after, a relevant event involving those securities or options, and

(c) the tax year in which the relevant event occurs is a relevant tax year in relation to the employment.

(8) For the purposes of subsection (7) each of the following is a "relevant event"—

(a) the acquisition mentioned in subsection (7)(a), and

(b) any event on the occurrence of which an amount (if positive) counts as employment income by virtue of Part 7 of ITEPA 2003 or would do so but for—

(i) section 421E or 474 of that Act (exclusions: residence etc), or

(ii) an election under section 430 or 431 of that Act.

22.27.2 *"Relevant tax year"*

Section 809RC ITA provides:

(9) For the purposes of this section a tax year is a "relevant" tax year in relation to an employment if—

(a) the individual has general earnings from the employment for the tax year,

(b) those earnings include both general earnings within section 15(1) of ITEPA 2003 ("section 15(1) earnings") and general earnings within section 26(1) of that Act ("section 26(1) earnings"),

(c) at least some of the section 15(1) earnings, or sums deriving (wholly or in part, and directly or indirectly) from at least some of the section 15(1) earnings, are paid into the account in the tax year, and

(d) at least some of the section 26(1) earnings, or sums deriving (wholly or in part, and directly or indirectly) from at least some of the section 26(1) earnings, are also paid into the account in the tax year.

(10) For the purposes of this section—

(a) "employment-related securities" has the meaning given in section 421B(8) of ITEPA 2003, and

(b) "employment-related securities options" has the meaning given in section 471(5) of that Act.

22.27.3 *Position where 30-day deadline is met*

Section 809RD ITA provides:

(1) This section applies if the required amount in relation to a breach of the deposit rule was transferred out of the account in accordance with section 809RC(2).
(2) Sections 809Q and 809R have effect as if—
(a) the intervening transactions had never taken place, and
(b) each prohibited sum represented by the required amount had instead been transferred directly (at the time that sum was paid into the qualifying account) into the account or other property into which the required amount was transferred by virtue of the single one-off transfer.
(3) Each of the following is an "intervening transaction"—
(a) each payment into the qualifying account of a prohibited sum represented by the required amount, and
(b) the single one-off transfer out of the qualifying account.
(4) If it is supposed under step 1 or 2 of section 809RA(2) that a single transfer had been made in the intervening period, re-apply section 809Q or 809R in relation to that transfer taking account of subsection (2).
(5) "The intervening period" is the period—
(a) beginning with the day on which the breach occurred, and
(b) ending with the day on which the single one-off transfer was made in accordance with section 809RC(2).
(6) If more than one transfer of a sum equal to the required amount was transferred out of the qualifying account within the 30-day grace period, the first of those transfers is assumed to be the single one-off transfer.
(7) "The 30-day grace period" is the period of 30 days mentioned in section 809RC(2).

22.27.4 *HMRC examples:*

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

Remittances from a non-qualifying account only
Assumptions
Individual is paid £120,000 p.a., £10,000 pcm via the US payroll. He is paid 60% into a qualifying US account (US$) and 40% into a non-qualifying account in Jersey (GBP) Despite the fact that the Jersey account is non-qualifying, the only monies that have ever been paid into

the account are assignment related earnings The individual is entitled to OWR and performs 20% of his duties outside of the UK The only money remitted to the UK is £3,600 pcm. from the Jersey account.

Assumed UK tax position

There are no remittances from the US qualifying account so the SMFRs are not in point Per HMRC's analysis, the amount credited to each account would, in the first instance be:?

- US qualifying account - £4,800 of S15 income and £1,200 of S26 income pcm.
- Jersey non-qualifying account - £3,200 of S15 income and £800 of S26 income pcm.

However, £3,600 is remitted to the UK from the Jersey account each month so S809R(4) is overridden by S809R(5) such that the rules in S809Q are applied. The remittance of £3,600 pcm. is less than the amount of S15 received each month and so all of the amount remitted is regarded as S15 income

This analysis is repeated each month so the balance on the Jersey account is:

Month	**S15**	**S26**
April	£3,600	£400
Less remittance	(£3,600)	
Balance	£0	£400
May	£3,600	£400
Less remittance	(£3,600)	
Balance	£0	£800
Etc		

The amounts remaining is each account at the end of the tax year are:

- U S qualifying account – £52,800 of S15 income and £19,200 of S26 income
- Jersey non-qualifying account - £0 of S15 income and £4,800 of S26 income

The above assumes that you do not re-apportion the balance of the two accounts at year end.

HMRC answer: We would agree with the analysis on the facts given and the assumption there are no "other transfers" from the qualifying account. However there may be a different result if there were "other transfers" from the qualifying account. Because the qualifying account must be looked at in priority to the non qualifying account "other transfers" would reduce the amount of section 15 and section 26 income available to remit from the non qualifying account.

To take an example, if you assume that all of the payments made to the

qualifying account were spent overseas in the year (£72,000 in total) it would remove £57,600 section 15 income and £14,400 section 26 income as an "other transfer" within section 809RA(2) ITA. The only monthly amounts available for remittance from the non qualifying account would be £3,200 section 15 income and £800 section 26 income credited to it. Each monthly remittance of £3,600 on a transactional basis would therefore consist of £3,200 section 15 income and £400 section 26 income.

Remittances from both qualifying and non-qualifying accounts

Assumptions

Individual is paid £120,000 p.a., £10,000 pcm via the US payroll. He is paid 60% into a qualifying US account (US$) and 40% into a non-qualifying account in Jersey (GBP) Despite the fact that the Jersey account is non-qualifying, the only monies that have ever been paid into the account are assignment related earnings The individual is entitled to OWR and performs 20% of his duties outside of the UK The individual remits £3,600 pcm. to the UK from the Jersey account and also makes a one-off remittance of £20,000 to the UK from the qualifying US account in December after the earnings for November have been paid into the account but before the earnings for December have been added.

Assumed UK tax position

There is a remittance from the US qualifying account so the SMFRs are in point Per HMRC's analysis, the amount credited to each account would, in the first instance be:

- US qualifying account - £4,800 of S15 income and £1,200 of S26 income pcm. or £57,600 of S15 income and £14,400 of S26 income per annum
- Jersey non-qualifying account - £3,200 of S15 income and £800 of S26 income pcm.

The SMFRs take precedence over the normal MFRs and so the position on the US account needs to be analysed first.

	S15	**S26**
Apportionment of earnings for the year	£57,600	£14,400
Less remittance	£20,000	
Position after applying S809RA but before applying S809R	£37,600	£14,400

The next step is to analyse the Jersey account which must be analysed on a month by month basis. The starting point for the Jersey account is that £3,200 of S15 and £800 of S26 income is paid into the account each month. However, S809R(4) is overridden by S809R(5) which allows us to

apply S809Q to the monthly remittance. This is where we run into difficulty because of the interaction with the SMFRs that have been applied to the US qualifying account. We do not know how HMRC intend to apply the rules but one possible approach is to say that if you ignored the SMFRs there would have been £38,400 of S15 income in the US qualifying account immediately prior to the one-off remittance of £20,000. This leaves £18,400. The amount of 'extra' S15 income we need to allocate to the non-qualifying Jersey account is £400 per month and £18,400/8 is £2,300 which is more than £400 and so the amount remitted each month from the Jersey account is regarded as S15 income only, i.e.

Month	**S15**	**S26**
April	£3,600	£400
Less remittance	(£3,600)	
Balance	£0	£400
May	£3,600	£400
Less remittance	(£3,600)	
Balance	£0	£800
Etc.		

The amounts remaining in each account at the end of the year are:

- US qualifying account – £32, 800 of S15 (£57,600 - £20,000 – (£400 x 12*)) and £19,200 of S26
- Jersey account - £0 of S15 and £4,800 of S26

*£400 is the amount reallocated each month from the US account to the Jersey account as a result of S809R(5).

Our analysis of the example is as follows:

a) We agree you must look at the qualifying account first
b) After the £20,000 condition A transfer has been accounted for, the balance of income remaining is £76,000 section 15 income and £24,000 section 26 income (£100,000 total) - assuming there are no "other transfers" (see example (a)).
c) HMRCs view is the income is apportioned between the 2 accounts proportionately (see the final example in the FAQs) following the offshore transfer rule in section 809R ITA. Of course that will only total £100,000 (£76,000 + £24,000) so the £20,000 already identified as a remittance from the qualifying account must be included to match the apportionment with the amounts paid into the 2 accounts on a monthly basis. For the purposes of this example we will call this "remitted income" as it has already been identified as remitted section 15 income.
d) Each monthly salary payment to the qualifying account will consist of:

- £3,800 section 15 income
- £1,200 section 26 income
- £1,000 "remitted income"

e) Each monthly salary payment to the non qualifying account will consist of:
   - £2,533 section 15 income
   - £800 section 26 income
   - £667 "remitted income"

f) There is enough section 15 income in the monthly payments to the offshore accounts to ensure the £3,600 monthly remittance is entirely of section 15 income. This is the same result as CIOTs calculation, but arrived at via a slightly different methodology.

g) We believe this methodology ensures t he transfers identified by the special mixed fund rules are not double counted when looking at remittances from the non qualifying account and the transaction by transaction basis of the normal mixed fund rules can be calculated accurately.

h) For example, if the condition A transfers from the qualifying account totalled £72,000 rather than £20,000 the monthly payments to the qualifying account would be £1,200 section 15 income:
   - £1,200 section 26 income and
   - £3,600 "remitted income"

   Monthly payments to the non qualifying account would be:
   - £800 section 15 income,
   - £800 section 26 income and
   - £2,400 "remitted income".

   The £3,600 monthly remittance from the non qualifying account would consist of £2,000 section 15 income (£1,200 + £800) and £1,600 section 26 income.[44]

22.28 Earnings from Ireland

In the following discussion:

"Irish earnings" means earnings from an Irish resident employer; it is assumed that the conditions for the remittance basis are in principle all met (duties performed outside the UK, etc).

"Pre-2008 earnings" means earnings arising before 6 April 2008.

The UK/Ireland DTA also needs to be considered but it is not discussed

44 29 January 2014
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf

here.

Similar points arise in relation to RFI; see 10.21 (RFI from Ireland).

22.28.1 *Earnings from 2008/09*

The position for earnings from 2008/09 is straightforward. The ITA remittance basis treats Irish earnings in the same way as any other foreign earnings. The FA 2008 repealed the rule of the pre-2008 remittance basis which provided (unlawfully and probably ineffectively) that Irish earnings were taxed on an arising basis.

22.28.2 *Pre-2008 earnings remitted from 2008/09*

This change raised the problem of transition. Para 82 Sch 7 FA 2008 provides:

> (1) This paragraph applies in relation to an individual's general earnings for the tax year 2007–08 or any earlier tax year ("the relevant tax year") if the individual—
>
> (a) was UK resident in that year, but
>
> (b) was not domiciled in the UK, or was not ordinarily UK resident, in that year...
>
> (3) In relation to the general earnings, the definition of "foreign employer" in section 721(1) of ITEPA 2003 has effect as if at the end there were inserted "and not resident in the Republic of Ireland".

Amended as para 82(3) directs, s.721(1) ITEPA provides:

> "foreign employer" means an individual, partnership or body of persons resident outside the UK and not resident in the UK *and not resident in the Republic of Ireland*.

Thus (although this might surprise the residents of Eire) an Irish resident employer was not (for this purpose) a "foreign employer" so pre-2008 Irish earnings were not "chargeable overseas earnings" so the remittance basis does not apply to them. Para 82(3) is simply a roundabout way of disapplying the remittance basis charge for pre-2008 Irish earnings.

EN FB 2008 provides:

> 395. Subsection (3) ensures that the existing restriction on the application of the remittance basis in the case of employment income from employers resident in the Republic of Ireland continues to apply in relation to the remittance on or after 6 April 2008 of general earnings arising before that date. This will prevent double taxation as the general earnings have already been taxed when they arose.

In short, if:
(1) Irish earnings arose before 2008/09; and
(2) The earnings are remitted on or after 2008/09
there is no tax charge on remittance.

22.28.3 *Why is para 82(3) needed?*

Before 2008, s.721 ITEPA provided:

> *"foreign employer" means*
> *(a) in the case of an employee resident in the UK, an individual, partnership or body of persons resident outside the UK and not resident in the UK* ***or the Republic of Ireland,***

Under this definition, earnings from an Irish resident employer could not have been chargeable overseas earnings so at first it seems that para 82(3) is not needed. It may be that para 82(3) is otiose; it is inserted by mistaken analogy with para 83(3) (which is needed). However para 82(3) is needed on the assumption that where
(1) earnings arose before 2008/09 and
(2) the earnings are remitted from or after 2008/09
the question of whether the earnings qualify as chargeable overseas earnings is to be determined by the legislation as it stands in the year of remittance, and not by the legislation as it stood at the time that the earnings arose.

22.28.4 *Pre-2008 Irish earnings: tax position before 2008/09*

As noted above, according to statute, the remittance basis did not apply if the employer was resident in the Republic of Ireland: pre-2008 Irish earnings were taxable on the arising basis and not the remittance basis. The discrimination against Ireland was contrary to EU law.[45] Under para 82(3) discussed above, pre-2008 Irish source income which was not remitted before 2008/09 escapes UK tax altogether, since unremitted Irish source income was not lawfully taxable when it arose and it is not (from 2008/09) taxable on remittance. But the point will not now often arise.

22.29 Termination payments

A termination payment is charged under part 6 ITEPA. A full discussion

45 The point was discussed in the 6th edition of this book para 9.51 and 10.4.2.

would need a long chapter. The income is categorised as specific employment income rather than general earnings. The consequence is to disapply the usual territorial rules. Instead, s.413(1) ITEPA provides a different territorial exemption:

> (1) This Chapter does not apply if the service of the employee or former employee in the employment in respect of which the payment or other benefit is received included foreign service comprising—
>
> (a) three-quarters or more of the whole period of service ending with the date of the termination or change in question, or
>
> (b) if the period of service ending with that date exceeded 10 years, the whole of the last 10 years, or
>
> (c) if the period of service ending with that date exceeded 20 years, one-half or more of that period, including any 10 of the last 20 years.

The key term is "foreign service". The definition covers the entire history of the taxation of employment income. Section 413(2) ITEPA provides:

> (2) In subsection (1) "foreign service" means service to which subsection (2A), (3), (4) or (6) applies.
>
> (2A) This subsection applies to service in or after the tax year 2013-14—
>
> (a) to the extent that it consists of duties performed outside the UK in respect of which earnings would not be relevant earnings, or
>
> (b) if a deduction equal to the whole amount of the earnings from the employment was or would have been allowable under Chapter 6 of Part 5 (deductions from seafarers' earnings).
>
> (3) This subsection applies to service in or after the tax year 2003–04 but before the tax year 2013-14 such that—
>
> (a) any earnings from the employment would not be relevant earnings, or
>
> (b) a deduction equal to the whole amount of the earnings from the employment was or would have been allowable under Chapter 6 of Part 5 (deductions from seafarers' earnings).
>
> (3ZA) In subsection (2A)(a) "relevant earnings" means earnings for a tax year that are earnings to which section 15 applies and to which that section would apply even if the employee made a claim under section 809B of ITA 2007 (claim for remittance basis) for that year.
>
> (3A) In subsection (3)(a) "relevant earnings" means—
>
> (a) for service in or after the tax year 2008–09, earnings—
>
> (i) which are for a tax year in which the employee is ordinarily UK resident,
>
> (ii) to which section 15 applies, and

(iii) to which that section would apply, even if the employee made a claim under section 809B of ITA 2007 (claim for remittance basis) for that year, and

(b) for service before the tax year 2008–09, general earnings to which section 15 or 21 as originally enacted applies.

(4) This subsection applies to service before the tax year 2003–04 and after the tax year 1973–74 such that—

(a) the emoluments from the employment were not chargeable under Case I of Schedule E, or would not have been so chargeable had there been any, or

(b) a deduction equal to the whole amount of the emoluments from the employment was or would have been allowable under a foreign earnings deduction provision.

(5) In subsection (4) "foreign earnings deduction provision" means—

(a) paragraph 1 of Schedule 2 to FA 1974,

(b) paragraph 1 of Schedule 7 to FA 1977, or

(c) section 192A or 193(1) of ICTA.

(6) This subsection applies to service before the tax year 1974–75 such that tax was not chargeable in respect of the emoluments of the employment—

(a) in the tax year 1956–57 or later, under Case I of Schedule E, or

(b) in earlier tax years, under Schedule E,

or it would not have been so chargeable had there been any such emoluments.

The EI Manual provides:

13690. Exceptions: "Foreign service": Definition [January 2010]
Section 413 ITEPA 2003 (as amended by Section 30 Schedule 7 FA 2008)
EIM13680 explained that a payment or benefit may be fully excepted from the charge under Section 401 ITEPA 2003 if sufficient of the employee's service counts as "foreign service". Foreign service has a special meaning for this purpose.
All periods when an employee is a seafarer eligible for 100% deduction from earnings under Part 5 Chapter 6 ITEPA 2003 (see EIM33000) count as "foreign service".
Otherwise, this guidance deals only with the legislation relating to periods of service after 5 April 2003. For earlier periods after 5 April 1974 the rules are effectively the same but they are expressed in different statutory language (see SE13690 for details if necessary). If service before 6 April 1974 is involved, see EIM13705.
A period of service counts as "foreign service" where the earnings from the employment are not "relevant earnings". Note that this is a negative test so that

if the earnings are found to be "relevant earnings", that period will not count towards the exception.

If there is a period of service when there are no earnings from the employment, apply the guidance as if there were.

Up to 5 April 2008 "relevant earnings" means earnings within Section 15 or Section 21 ITEPA 2003 as then enacted (see EIM40002). So if the earnings fall within any other provision, the period counts as "foreign service".From 6 April 2008, "relevant earnings" means that the employee is ordinarily resident in the UK and the earnings are within Section 15 ITEPA 2003 (see EIM40002). So if any other situation applies to the earnings, the period counts as "foreign service".

Combine the periods that count as "foreign service" by applying the rules above and then give the full exception if any one of the requirements from the table below are met (see example EIM13970):

Total period of service to the relevant date	**Requirement for full exception**
All cases of whatever duration:	3/4 of the whole period of service is foreign service.
More than 10 years:	The last 10 years are foreign service.
More than 20 years:	½ of the whole period of service (including 10 of the last 20 years) is foreign service.

For this purpose treat successive employments with different members of the same group of companies as if they were a single continuing employment where the payment takes account of that service, see example EIM13975.

Note: a taxpayer with some foreign service who does not meet the requirements in the table above may be able to claim a foreign service reduction instead, see EIM13700.

13700. Foreign service: Reduction of charge [May 2010]

EIM13690 explained that if an employee whose service includes foreign service fails to satisfy the conditions for full exception, the employee might still qualify for a reduction in the Section 401 ITEPA 2003 charge.

If service before 6 April 1974 is involved, see EIM13705.

The £30,000 threshold must be deducted before calculating the reduction (see example EIM13980). The result, for this purpose, is called the amount charged to tax (in Section 414(2) ITEPA 2003 it is called the amount that would otherwise count as employment income). It is this amount charged to tax that is reduced if the qualifying conditions are met.

The amount of the reduction is the amount charged to tax multiplied by the length of foreign service and divided by the length of total service before the relevant date (the meaning of relevant date is the same as in EIM13680). See example EIM13985.

Note that:

- the taxpayer can claim the foreign service reduction by notice in writing to the Inspector at any time up to four years from the end of the year of assessment to which the claim relates (for claims made before 2 April 2010

the limit is five years after 31 January following the end of the relevant year of assessment)

13705. Exceptions: Foreign service: Service before 6 April 1974 [February 2006]

This guidance applies only if you have a case involving foreign service (see EIM13680) and it includes service before 6 April 1974.

The rules were different before 6 April 1974. This may affect the calculation of full exemption (see EIM13690) and will affect the calculation of a reduction (see EIM13700).

In testing whether full exemption is due under EIM13690 this difference is now likely to matter only for the first and last tests of exemption bulleted there (namely, where 3/4 of the whole period of service is needed to be foreign service, or where ½ of the whole period including 10 of the last 20 years is needed). So:

- consider the other test in EIM13690 first. If the last 10 years are foreign service give the exemption without considering the pre-6 April 1974 period. If not
- assume that all the pre-6 April 1974 service is not foreign service and see whether either of the other two tests in EIM13690 is satisfied. If either of them is met, give the exemption without considering the pre-6 April 1974 period. Otherwise
- if none of the three tests in EIM13690 are satisfied without considering some of the pre-6 April 1974 period, see SE13710 (last paragraph) to find out whether the service of that period counts as foreign service. Then apply the first (and if necessary the third) bulleted test in EIM13690.

In testing whether reduction of charge is due under EIM13700, any service before 6 April 1974 will affect the calculation. See SE13710 (last paragraph) to find out whether the service of that period counts as foreign service. Then finish the calculation required by EIM13700.

A payment satisfying the above conditions can be remitted free of income tax to the UK. It is a moot point why the payment does not give rise to CGT, but in practice HMRC do not take that point.

HMRC say:

> Attention was drawn to the agreement published in Germany in December 2011, whereby termination payments were to be treated as remuneration falling within the employment services article of the double tax treaty. HMRC confirmed that this treatment would not apply for the purposes of treaties other than the UK/German treaty.[46]

46 Minutes of Joint Expatriate Forum on Tax and NICs (January 2012) *http://www.hmrc.gov.uk/consultations/epf-mins-jan12.pdf*

22.30 Relocation expenses

Section 271(1) ITEPA provides a somewhat limited relief for relocation expenses.

> (1) No liability to income tax in respect of earnings arises by virtue of—
>
> (a) the provision of removal benefits to which this section applies, or
>
> (b) the payment or reimbursement of removal expenses to which this section applies.

A full discussion of this relief requires a chapter to itself, but one point is relevant here. Section 271(2) ITEPA disapplies the relief for employees taxed on the remittance basis:

> Subsection (1) does not apply if (disregarding this section) the earnings are general earnings to which either of the following sections applies—
>
> (a) section 22 (chargeable overseas earnings for year when remittance basis applies and employee outside section 26), or
>
> (b) section 26 (foreign earnings for year when remittance basis applies and employee meets section 26A requirement).

However this is relaxed by informal concession:

> HMRC were asked to clarify whether or not the exemption for relocation expenses within Section 271 ITEPA 2003 was available against earnings taxed on the remittance basis. HMRC confirmed that the current legislation does not provide for relocation exemption to be available where the remittance basis is claimed. However HMRC were aware of existing practice whereby the relocation exemption was applied before apportionment in respect of non-UK workdays. Although this methodology was not consistent with the existing legislation HMRC were content to allow the practice to continue.[47]

22.31 Overseas Crown employment

General earnings from overseas Crown employment subject to UK tax[48] are taxed on an arising basis, regardless of residence, domicile and place of work. In the case of UK resident and ordinarily resident employees,

---

47 Joint Forum on Expatriates Tax and NICs Note of Meeting (September 2008) *http://www.hmrc.gov.uk/consultations/expat-mins-180908.htm*.

48 The expression "general earnings from overseas Crown employment subject to UK tax" is defined in s.28 ITEPA.

such earnings are charged in the normal way under s.15 ITEPA and excluded from the remittance basis because the Crown is not a foreign employer. In the case of a UK resident employee, the earnings are charged in the normal way under s.15 and excluded from OWR by s.26(1)(b) ITEPA.[49] In the case of a non-resident employee, the charge is under s.27 ITEPA.[50]

The 1955 Royal Commission Report explains the reason:

> International comity does not permit the salary of the servant of one State to be taxed by another State: consequently a Crown servant, even if spending his whole time on work abroad, is not amenable to the local taxing jurisdiction and, if he is to be taxed at all, must be taxed by the UK taxing authority. No doubt the scale of remuneration for Crown servants abroad is fixed with these considerations in mind.[51]

22.31.1 *Exception for low paid overseas crown employees*

EIM40209 records that HMRC have made the following orders under s.28(5) ITEPA:

> General earnings from overseas Crown employment in respect of an employee who:
> 1. is not resident in the UK;
> 2. was engaged outside the UK; and
> 3. is employed in a grade the maximum rate of pay of which is less than the maximum rate of pay of an executive officer employed in the same department of the UK Civil Service and working in inner London,
>
> is excepted from the operation of Section 27(2) of the Act.
> With effect from 13 June 2006, the order does not apply to Queen's Gurkha Officers or any other members of the Brigade of Gurkhas who were recruited for that Brigade in Nepal.

This replaces the former concession A25. EN ITEPA provides:

> The concession reflects long-standing practice and is in keeping with international treaty obligations.
> The use of a salary level and grade in the concession is an attempt to focus its benefits on genuinely temporary or unestablished staff. However, enshrining these existing limits in primary legislation is not

49 See 22.17 (Overseas workday relief).
50 See 22.18 (Non-resident employee).
51 Cmd 9474 para 307.

thought to be desirable. Instead it is intended to preserve the existing flexibility of the Inland Revenue to adapt the concession to new circumstances by enabling the Board of Inland Revenue to make an order which sets out the limits of the new statutory exception: see section 28(5) and (6) of the Act. Section 28(7) and (8) of the Act, which deal with the factors by reference to which the statutory exception may be expressed, are intended to reflect the scope of this existing flexibility. Section 717(2) of the Act means that an order does not need to be made by statutory instrument.

The new statutory exception will operate on the charges to tax arising by virtue of section 25(2) of the Act (UK-based earnings for year when employee resident, but not ordinarily resident, in UK) or section 27(2) (UK-based earnings for year when employee not resident in UK). It is intended that it should operate at least as widely as the present exception conferred by ESC A25.

22.32 Seafarers

The rules relating to seafarers and duties performed on vessels and aircraft are too specialist to be considered here; see s.39(3) and ss.40, 372 and Chapter 6 Part 5 ITEPA.

22.33 Lower-paid employee exemption

BN55 (22 April 2009) provides:

Individuals with small amounts of foreign employment income

5. Individuals employed in the UK are currently required to file a Self Assessment tax return if they have also received income from overseas employment in the same tax year. This is the case even where there is little or no tax to pay in the UK because the overseas employment income has already been subject to tax in the other country.

6. This obligation to file a return will be removed with effect from 6 April 2008 where such individuals have overseas employment income of less than £10,000 and overseas bank interest of less than £100 in any tax year, all of which is subject to a foreign tax.

EN FB 2009 provides:

11. This clause introduces a new income tax exemption for low-income employees working in the UK who meet certain conditions. Such individuals will typically be migrant workers employed in seasonal work in the agricultural or service sectors in UK and in other countries in the same tax year and whose overseas income is subject to tax where it is earned. Previously they were required to file a Self Assessment tax

return, even in situations where there was no, or very little, tax to pay. This exemption removes that requirement in most cases.

According, s.828A ITA provides:

> This Chapter provides for an exemption from liability to income tax for an individual for a tax year if-
>
> (a) the individual is UK resident in the tax year but not domiciled in the UK in the tax year,
>
> (b) section 809B does not apply to the individual for the tax year, and
>
> (c) conditions A to F in section 828B are met.

I refer to these conditions as "**LPE conditions A to F"**.

Section 809B will only apply if the individual makes a claim under s.809B, which where the LPE conditions are satisfied will never happen, so the important requirements are the LPE conditions.

22.33.1 *LPE condition A: UK employment*

Section 828B(1) ITA provides:

> Condition A is that in the tax year the individual has income from an employment the duties of which are performed wholly or partly in the UK.

Section 828D ITA defines "employment":

> (1) This section applies for the purposes of this Chapter.
>
> (2) "Employed" and "employment" have the same meaning as in the employment income Parts of ITEPA 2003: see Chapter 1 of Part 2 of that Act.

If these were income-tax wide definitions it would not be necessary to say this here.

22.33.2 *LPE condition B: Cap on RFE*

Section 828B(2) ITA provides:

> Condition B is that, if the individual's income for the tax year consists of or includes relevant foreign earnings—
>
> (a) the amount of the relevant foreign earnings does not exceed £10,000, and

(b) all of that amount is subject to a foreign tax.

Section 828D(5) defines "relevant foreign earnings":

> "Relevant foreign earnings", in relation to an individual, means what would be the individual's relevant foreign earnings for the purposes of Chapter A1 of this Part if section 809B applied to the individual (see section 809Z7(3)).

Section 828D(4) ITA defines "foreign tax":

> "Foreign tax" means any tax chargeable under the law of a territory outside the UK.

See 59.17 ("Subject to tax").

The £10,000 limit for relevant foreign earnings applied for the full year and is not affected by split year treatment. Therefore, an individual who has already earned more than £10,000 abroad in the UK tax year before he or she arrived is not be eligible.

22.33.3 *LPE condition C: Cap on interest received*

Section 828B(3) ITA provides:

> Condition C is that, if the individual's income for the tax year consists of or includes income that is relevant foreign income by virtue of section 830(2)(e) of ITTOIA 2005—
>
> (a) the amount of that income does not exceed £100, and
>
> (b) all of that amount is subject to a foreign tax.

In order to understand the reference to s.830(2)(e) ITTOIA one needs to read it together with s.830(1):

> (1) In this Act "relevant foreign income" means income which—
>
> (a) arises from a source outside the UK, and
>
> (b) is chargeable under any of the provisions specified in subsection (2) (or would be so chargeable if section 832 did not apply to it).
>
> (2) The provisions are ...
>
> (e) Chapter 2 of Part 4 (interest)

22.33.4 *LPE condition D: o other income/gains*

Section 828B(4) ITA provides:

> Condition D is that the individual has no other foreign income and

gains[52] for the tax year.

22.33.5 *LPE condition E: Exclusion of higher rate taxpayers*

Section 828B(5) ITA provides:

> Condition E is that the individual would not for the tax year be liable to income tax at a rate other than the basic rate or the starting rate for savings if this Chapter did not apply to the individual for the tax year.

22.33.6 *LPE condition F: No tax return*

Section 828B(6) ITA provides:

> Condition F is that the individual does not make a return under section 8 of TMA 1970 for the tax year.

Since a return is due if HMRC choose to require it, the position is that HMRC have a power to withdraw the exemption (by requiring a return). The rule is thus: no tax is due unless HMRC happen to ask for it. This is a new development in tax policy; one hopes it does not become standard.

HMRC say:

> HMRC sought to clarify the intention behind the new legislation which was to remove the obligation on overseas migrant workers on low incomes to file an SA return in cases where there was little or no tax to pay in the UK. It was true that such individuals would no longer qualify for the tax exemption if they filed a return to claim a tax repayment, but the tax exemption was merely the vehicle for delivering the administrative saving. External delegates failed to understand why the exemption should also be lost if the individual filed not a tax return but an R40 to claim repayment of PAYE on UK income.[53]

In fact, the R40 form is not a tax return under s.8 TMA: *Osborne v Dickinson* [2004] STC (SCD) 104.

The RDR Manual provides:

---

52 Section 828D(3) ITA incorporates the standard commonsense definition of "foreign income and gains":
""Foreign income and gains", in relation to an individual, means what would be the individual's foreign income and gains for the purposes of Chapter A1 of this Part if section 809B applied to the individual (see section 809Z7(2))."

53 Joint Forum on Expatriates Tax and NICs July 2009, accessible *http://www.hmrc.gov.uk/consultations/expat-mins-160709.htm*.

32070 - Remittance Basis: Accessing the remittance basis: Claiming the remittance basis: Calculation of income tax liability - exemption for non-domiciles with small amounts of foreign employment income
[June 2010]
Individuals employed in the UK are usually required to file a Self Assessment tax return if they have also received income from overseas employment in the same tax year. However in many cases there is little or no tax to pay in the UK because the overseas employment income has already been subject to tax in the other country.
From 6 April 2008 there is no obligation for individuals who are resident but not domiciled in the UK for a tax year to file a return as long as the individual is not claiming the remittance basis under ITA07/s809B and meets all of the following conditions (ITA07/s828A).
[The Manual summarises conditions A - F and continues:] If all of these conditions apply, the individual receives an exemption from liability to income tax, in so far as that liability is attributable to the individual's foreign income or gains for the tax year (termed the 'relevant amount'). Broadly, the relevant amount is deducted from what would otherwise be the amount of the individual's liability to income tax for the tax year under ITA07/s23.
This means that the individual is automatically taxed on the Arising Basis for that tax year, and does not have to complete a return.
Most individuals who fulfil Conditions A to F are expected to use the Arising Basis and not complete a return. However there may be a small number of non-domiciled individuals who fulfil these conditions but who wish to use the remittance basis in respect of their foreign income and gains and are within the 'below £2,000 threshold' user group (ITA07/s809D). Such individuals will have to complete a return in order to claim the remittance basis under s809D; this will of course mean that Condition F of ITA07/s828A is no longer met, refer to RDRM32110 Unremitted foreign income and gains below £2,000 threshold.

22.33.7 *The exemption*

Section 828C ITA provides:

(1) The exemption is given by deducting the relevant amount from what would otherwise be the amount of the individual's liability to income tax for the tax year under section 23.
(2) "The relevant amount" is so much of the amount of the individual's liability to income tax as is attributable to the individual's foreign income or gains for the tax year.

I refer to this as the **"Lower-paid employee exemption."**

22.33.8 *Restriction on exemption*

Section 828C ITA provides:

> (3) But if for the tax year the individual's total income is reduced by any deductions which fall to be made at Step 3 of the calculation in section 23 from the individual's foreign income or gains for the tax year, subsection (2) has effect as if the individual's foreign income or gains for the tax year were reduced by the amount of the deductions.
> (4) And if the individual is entitled under.
> (a) sections 2 and 6 of TIOPA 2010(double taxation arrangements: relief by agreement), or
> (b) section 18(1)(b) and (2) of that Act (relief for foreign tax where no double taxation arrangements),
> to a tax reduction in respect of the individual's foreign income or gains for the tax year, what would otherwise be the relevant amount is reduced by the amount of that reduction.

22.33.9 *Administration: avoiding issue of SA return*

HMRC say:

> HMRC stressed that, whilst the exemption was not designed for employees on inter-company transfers, it had become clear that the exemption could be applied to certain assignees, in particular those from India and China.
> 3 The main issue was the difficulty in identifying the relevant individuals. Unless informed that they qualify for filing exemption, HMRC would issue SA returns, thereby preventing them from taking advantage of s828A. HMRC had designed an election letter for Expats to meet this need: agents should submit this letter at the same time as the 64-8, and after the P46 (Expat) had been filed, which would ensure that no SA return is issued.

This is essential as if a SA return is issued, the relief is lost. For the form of the letter, see Fisher, "Expat Exemption", *Taxation* 3 March 2011 p.18.

HMRC continue:

> There was a separate issue with employers using EPM App 6 with a month 12 adjustment to eliminate any residual liability whose employees are required to submit a SA return. However, as some had very simple tax affairs, there was a case for allowing them to use s828A whilst remaining within EPM6. HMRC will seek to engage with such employers to reach

a suitable agreement for their employee base. In such cases, the election letter will need to be completed but retained by the employer. If there are individuals who do not qualify, the employer or agent will need to submit an SA1 to request a return.
A similar case existed for NR individuals who submit SA returns to get personal allowances under DTAs.[54]

22.33.10 *Commentary*

Almost every requirement of the lower-paid employee exemption is anomalous. If the aim is to remove obligations to file a return where there is little or no UK tax at stake, why is it so limited? The provision presumably reflects effective lobbying by special interest groups concerned with lower-paid employees rather than a serious attempt to address compliance cost issues.

22.34 Tax equalisation

The EIM provides:

77040. Appendix 4: Not ordinarily resident employees: Tax equalisation [February 2006][55]
... In addition to salaries and benefits, employers may also provide their employees with the benefit of tax equalisation. This usually means that the employer undertakes to meet on the employee's behalf any additional tax payable above the tax that the employee would have paid in his home country. It is well established that such payments made on behalf of employees form part of their earnings. But before 2002, there was a difference of view between the then Inland Revenue and a number of accountancy firms about the extent to which such tax equalisation payments represent earnings in respect of duties performed in the UK.

The issue matters for NOR and NR employees: see 22.18 (Non-resident employee).

The view taken by the Inland Revenue and subsequently by HMRC is that tax equalisation payments represent earnings wholly referable to duties performed in the UK where the underlying tax liability is similarly wholly referable to duties performed in the UK. Therefore, where an employer pays a tax liability arising under section 25 on an employee's behalf, that payment will itself represent earnings wholly chargeable under section 25.
This view was approved by a Special Commissioner in 2001 in the case of *Perro v Mansworth* [2001] STC (SCD) 179. The Special Commissioner stated that it was an

54 Joint Expatriate Forum on Tax and Nics: 29 July 2010 Meeting Note *http://www.hmrc.gov.uk/consultations/expat-mins-290710.pdf*

55 The text is derived from Tax Bulletin 59.

inescapable fact that the payment of tax by the appellant's employer was an emolument (earnings) in respect of UK duties since that tax was only payable because of the performance of duties in the UK.

Ms Perro's net earnings were time apportioned in accordance with SP5/84 in order to find the net attributable to UK duties as there was no specific attribution of salary or other benefits between UK and overseas duties. Following *Perro*, it has been accepted practice to gross up this net figure on the basis that the payment of tax on UK-based earnings represents additional earnings wholly referable to duties performed in the UK.

The Special Commissioner did not consider the treatment of reimbursement of tax on income other than employment income chargeable under what is now section 25. The employer of a tax-equalised employee may reimburse UK tax on investment income or capital gains. Employers may also pay foreign tax liabilities on the employee's behalf. Following the decision in *Perro*, the Inland Revenue was asked to give its view on the treatment of such reimbursements.

When apportioning earnings between sections 25 and 26, it is necessary first to consider whether those earnings are wholly referable to UK or non-UK duties on the facts. Clearly if this is so, there is no need to consider time apportionment. If the earnings are not wholly referable either to UK or non-UK duties, then time apportionment will be necessary in accordance with SP5/84.

If an employer reimburses personal tax liability arising on non employment income[56] such as bank interest, dividends or capital gains, then the first question is whether that reimbursement is a payment of earnings that relates wholly to either UK or non-UK duties. We do not consider that the physical presence of the employee in the UK in order to perform employment duties is sufficient justification for treating such reimbursements as wholly in respect of duties performed in the UK. In the absence of unusual facts, we believe that such earnings should be time apportioned. This will produce net section 25 earnings that will then need to be grossed up. The gross up will be on the basis that the payment of UK tax on earnings within section 25 is itself a payment of earnings wholly chargeable under section 25.

With regard to foreign tax payments, the attribution between sections 25 and 26 will depend upon the facts and circumstances. If the foreign tax relates solely to overseas duties, then the payment of that tax by the employer will comprise earnings wholly referable to duties performed outside the UK that cannot be charged to tax under section 25. Alternatively, the foreign tax may be charged on worldwide income so that time apportionment is likely to provide the only practical mechanism for determining the attribution between sections 25 and 26.

With regard to the treatment of employer payment / reimbursement of tax chargeable under section 26, SP5/84 states that provided the earnings chargeable under section 25 are arrived at in a reasonable manner; HMRC is prepared to accept that a charge under section 26 will arise only where the aggregate of earnings received in the UK exceeds the amount chargeable under section 25 for that year. The amount chargeable under section 26 is

---

56 [Author's note]. Employees are likely to claim the remittance basis so the tax charge is only on remitted income and remitted foreign gains. It is not clear that the employee ought to pay the charge on remitted income or gains as remittance is a decision of the employee. However it may be appropriate to do so.

therefore restricted to the excess of the aggregate over the amount chargeable under section 25.

Where the employer meets UK tax liability under section 26, the payment of that tax to HMRC will clearly be remitted to the UK. It is logical that the payment of the section 26 liability will itself be a payment of earnings chargeable under section 26 and as the tax payment will be remitted to the UK, the related gross up will also be wholly chargeable under section 26.

There can be significant practical difficulties in identifying whether earnings relate solely to non-UK duties and therefore fall within section 26. In such cases, HMRC would not generally dispute time apportionment between sections 25 and 26 on the basis of working days. If any earnings were allocated solely to section 26 as attributable wholly to non-UK duties, evidence should be available to justify the attribution, in the event of an HMRC enquiry.

Non resident employees

Some tax-equalised employees are not resident in the UK. They may perform substantive duties of their employment in this country. Unless the specific terms of a Double Taxation Agreement confer an exemption from UK tax on UK source employment income, such employees will be liable under section 27 ITEPA on earnings in respect of duties performed in the UK. Earnings for duties performed outside the UK will fall outside of the charge to UK tax on employment income. HMRC adopts the same approach to tax equalisation for non-resident employees as for those resident but not ordinarily resident employees whose earnings are apportioned between sections 25 and 26.

The following simple examples are intended to illustrate the basic approach to tax equalisation earnings described in this appendix. It is recognised that many cases will have much more complex facts and that the ensuing calculations will be similarly complex.

Example (Tanya)

T has been sent to the UK to work at her employer's UK branch for two years from 1 January 2005. She is resident but not ordinarily resident in the UK from the day of her arrival. In addition to her UK duties, her employer requires her to make regular and extensive visits to an overseas branch of its business in order to monitor an important project. Whilst assigned to the UK, T is subject to her employer's policy on tax equalisation which provides for her to receive the same net salary and benefits as if she had remained in her home state.

During 2005-06, T performed the duties of her employment on 225 days. She spent 158 days working in the UK and 67 days working overseas. Net salary and benefits from her employment were £100,000 of which £60,000 was received in the UK. Her employer was obliged to pay her tax liabilities in accordance with its tax equalisation policy. For simplicity, all calculations assume that T's income is chargeable to UK tax at 40%.

Scenario 1

T's only tax liability was incurred in the UK on the earnings from her employment.

Calculation of UK tax for 2005-06

Net salary and benefits	100,000
Less amount attributable to overseas workdays – 67/225 (30%)	(30,000)
Attributable to the performance of UK duties	70,000
Gross up for UK tax at 4/6	46,666
UK-based earnings taxable under section 25 ITEPA	116,666

Tax at 40% 46,666

Remitted to the UK - 60,000 plus section 25 tax of 46,666	106,666
Section 26 ITEPA - SP5/84	Nil

Scenario 2

Facts as above but T's employer also paid UK tax liability of £5,000 on her investment income. As the £5,000 is not directly referable to the performance of duties inside or outside the UK, it falls to be time apportioned in accordance with SP5/84. Therefore, the £5,000 has been added to net salary and benefits before calculating and deducting the amount attributable to overseas workdays.

Calculation of UK tax for 2005-06

Net salary and benefits	105,000
Less amount attributable to overseas workdays – 67/225 (30%)	(31,500)
Attributable to the performance of UK duties	73,500
Gross up for UK tax at 4/6	49,000
UK-based earnings taxable under section 25 ITEPA	122,500
Tax at 40% 49,000	
Remitted to the UK - 60,000 plus section 25 tax 49,000 and other UK tax 5,000	114,000
Section 26 ITEPA - SP5/84	Nil

Scenario 3

Additionally, T's employer pays overseas tax liability of £5,000 direct to an overseas tax authority. The overseas tax is referable solely to the performance of duties outside the UK and is therefore excluded from the section 25 calculation.

Calculation of UK tax for 2005-06

Net salary and benefits	110,000
Less overseas tax payment	(5,000)
Salary and benefits to be time apportioned	105,000
Less amount attributable to overseas workdays – 67/225 (30%)	(31,500)
Attributable to the performance of UK duties	73,500
Gross up for UK tax at 4/6	49,000
UK-based earnings taxable under section 25 ITEPA	122,500
Tax at 40% 49,000	
Remitted to the UK - 60,000 plus section 25 tax 49,000 and other UK tax 5,000	114,000
Section 26 ITEPA - SP5/84	Nil

Scenario 4

Facts are the same as in Scenario 2 except that £70,000 out of the £100,000 net salary and benefits has been remitted to the UK.

Calculation of UK tax for 2005-06

Net salary and benefits	105,000
Less amount attributable to overseas workdays – 67/225 (30%)	(31,500)
Attributable to the performance of UK duties	73,500
Gross up for UK tax at 4/6	49,000
UK-based earnings taxable under section 25 ITEPA	122,500
Tax at 40% 49,000	
Remitted to the UK - 70,000 plus section 25 tax 49,000 and other UK tax 5,000	124,000

Net section 26 ITEPA - SP5/84	1,500
Gross up for UK tax at 4/6	1,000
Foreign earnings taxable under section 26	2,500
Total taxable earnings (sections 25 and 26)	125,000
Tax at 40% 50,000	

HMRC say:

6.1 HMRC explained the background to the Short Term Business Visitor Arrangement (EP Appendix 4) which has been in place since the early 1990s. The arrangement is specifically for Short Term Business Visitors who come to the UK from countries with which the UK has a Double Taxation agreement, which includes an Employment /Dependant Personal services article. The introduction of the SRT means that some Short Term Business Visitors who visit the UK for less than 6 months may become resident in the UK when previously they would not have been resident.

56.2 HMRC has decided to allow employers to include resident Short Term Business Visitors within the arrangement where the visit(s) are for no more than 150 days in any 12 month period. Those Short Term Business Visitors who stay in the UK between 151 and 183 days may be entitled to exemption but for this small group, named applications must be made. This is a risk based approach which HMRC will monitor and review after the end of 2014/15. Where the employee has let his overseas property and his permanent home for the purposes of the treaty tie-breaker is likely to be in the UK, PAYE must apply. In uncertain cases HMRC will issue an NT code but require a Self Assessment return.

6.3 HMRC welcomes comments on the draft revised arrangement previously circulated and intends to publish the final arrangement by April 2013. It was suggested that as claims to treaty exemption ultimately depend on the application of the employment services article, the PAYE guidance should follow the OECD Commentary.

HMRC insisted that the PAYE relaxation should continue to be denied to earnings borne by the UK employer. Any other claims should be made to HMRC separately.

6.4 HMRC confirmed that new agreements for existing arrangements would not be required but employers would need to take account of the revised wording. Employers who currently rely on the terms of the arrangement without HMRC agreement, will be encouraged to contact HMRC to "sign up". Employers will need to have received HMRC agreement to use the arrangement from April 2013. As such they should not rely on previous Forum notes. The new arrangement will be

publicised via a What's New Article on the HMRC website.[57]

The April deadline was missed and at the time of writing the new rules have not yet been published.

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

> **EP Appendix 4**
> Question: Can an employer operate the arrangements detailed in PAYE82000 known as EP Appendix 4 without written agreement from HMRC?
> HMRC answer: Prior to 2013-14 HMRC did allow employers to rely on the terms of the arrangement without making a formal application to HMRC to use it. This practice was withdrawn from the 6 April 2013. As such, the statements published following the Forum meetings on 30 November 2006 and 18 April 2007 no longer apply. Employers must put an agreement in place with HMRC to operate The PAYE relaxation known as EP Appendix 4 for the ta x year 2013-14 onwards. Applications for 2013-14 onwards should be made by 5 April 2014. Employers who already hold agreements signed by HMRC do not need to sign new application forms but should apply the revised terms in the current version on the HMRC website using the link below:
> *http://www.hmrc.gov.uk/manuals/pommanual/PAYE82000.htm*
> Employers without signed agreements must operate PAYE on the earnings of all their short term business visitors unless they receive a tax code NT from HMRC for the named individual. Those employees may make a claim to HMRC for treaty relief if they meet the relevant criteria in the relevant Double Taxation Agreement.[58]

22.35 Accountancy services benefit

Joint Forum on Expatriates Tax and NICs records a discussion on tax return preparation fee benefits:

> It was made clear that these discussions and any proposals or guidance based on them will relate only to circumstances where:
> - due to tax equalisation arrangements, the employer pays for accountancy services relating to the preparation and submission of the individual assignees' Tax Returns

---

57 Joint Expatriate Forum on Tax and NICs: (January 2013)
http://www.hmrc.gov.uk/consultations/expat-mins-jan2013.pdf

58 29 January 2014
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf

- tax return preparation is part of a wider bundle of services provided by the adviser as negotiated with the employer
- S9A enquiry services are not included as part of the bundle

In such circumstances HMRC accept that the level of benefit in kind should be arrived at by apportionment based on the facts. The mechanics of how the apportionment should be calculated are an operational issue and CPTT had already shared with delegates (within the meeting notes of 30 August 2007) an exchange with Ernst & Young LLP on this topic. CPTT did not have authority to agree fixed round sum figures applicable in all cases. Indeed, it was clear from the evidence submitted that there is no 'one size fits all'. However, CPTT were prepared, in due course, to provide some clarity of the level at which they perceive there to be a risk worthy of enquiry.

The intention therefore would be to:

- establish a level of tax return preparation benefit which if returned or exceeded will not prompt any enquiry
- continue to allow for different figures to be reported based on the available facts
- highlight that where levels of tax return preparation benefits are reported below this level it remains open to HMRC/CPTT to enquire into the precise figures and apportionment methodology to check the accuracy of Returns submitted

CPTT is still analysing the information provided but Martin Dwyer was able to say that the available evidence suggested that a level of around £600 per head would be reflective of a situation where a home and host country Return was completed.

HMRC remain of the view that any accountancy fees paid in respect of S9A enquiry work should be reported as benefits in kind. HMRC will continue to look for evidence of the payment of such fees and their position will be as clarified within the meeting notes of the Forum held on 30 August 2007, as follows:

> 'Where we find evidence to indicate that the costs of accountancy services related entirely to resolving the S9A enquiry, we will regard these costs as giving rise to a taxable benefit in kind. If your clients are unable to accept this treatment, we will need to refer an appropriate case to the Commissioners.'

Subsequent to the meeting HMRC has now completed its analysis of the information provided. From this we conclude that the levels of benefits which appear both realistic and reasonable are £650 per head where a home and host country Return is completed and £250 per head where only the host country (UK) Return is completed. Under existing circumstances these figures will represent levels which if returned or

exceeded will not prompt an enquiry from CPTT. However, it has been recently highlighted by external representatives that the proposed levels of analysis necessary to support access to the remittance basis from 6 April 2008 is likely to lead to increases in the costs charged for UK Tax Return preparation where the remittance basis is claimed. If this proves to be the case there would be a need to recognise this and revise the figures for 2008-09 onwards accordingly.

HMRC reiterate that the sums quoted above are not intended to represent an agreed level of benefits which must be reported across the board. We recognise that there is unlikely to be consistency in the precise make up of the bundle of accountancy services provided across different cases and by the variety of advisers involved. Rather, the aim is to indicate a level at which CPTT perceive the level of risk to be worthy of enquiry.[59]

A subsequent meeting of the forum records:

Q10: Accountancy fees in regard to partially tax-equalised employees

It is not clear which partially tax-equalised cases are covered by the agreement announced in the 18 September 2008 forum notes. By 'partially tax-equalised' we mean when the employer agrees to tax-equalise part of the employee's income/gains but not the whole. This is very common, often employers will tax equalise only employment income and even then might exclude elements such as share options.

The notes mention 'due to tax equalisation arrangements, the employer pays for accountancy services' which perhaps suggests the precise nature of the equalisation arrangements is not in point. However, Appendix 6 of HMRC's Employment Procedures Manual – 'Modified PAYE' arrangements – says that those arrangements may be applied only to tax-equalised employees and, for that purpose, 'tax-equalised' means that:

' ... the employer must equalise liability to UK Income Tax on all general earnings (see note) subject to the rules in part 2 Chapters 4 and 5 ITEPA applying to employees resident, ordinarily resident or domiciled outside the UK.

Note: Where the employee is tax-equalised on all general earnings but not, for example, on taxable awards of securities options or the award of securities at undervalue (which is specific employment income) the employee may still be included within the arrangement as long as all the other conditions are satisfied'.

It would seem rather restrictive to take the same approach in relation to accountancy fees as an employee's tax equalisation computations can be

59 Note of Meeting 18 September 2008, accessible *http://www.hmrc.gov.uk/consultations/expat-mins-180908.htm*

just as (possibly more) complex if only part of the earnings are equalised.
HMRC Answer: It is the case that the guidance contained within the Forum meeting notes of 18 September 2008 was intended to relate to 'fully' tax equalised cases including those capable of inclusion within an EP Appendix 6 agreement.
Where partial tax equalisation applies it seems to me that the extent to which the accountancy advice directly benefits the individual rather than the employer must increase and I would expect this to be reflected within the level of benefits reported.
As in the case of tax equalised individuals, where HMRC wishes to check the amounts reported we will look at the amounts paid for the basket of services provided and seek to establish those parts of this basket which directly benefit the employer. It should then be possible to calculate a benefit in kind figure by reference to the balance on a per head basis.
...
HMRC were asked to give clarification regarding whether or not the levels of accountancy fees, clarified at the meeting held on 18 September 2008, could be applied in respect of the 2008-09 SA Tax Returns. Martin Dwyer confirmed that these amounts were intended to reflect levels below which HMRC perceive there to be a risk and above which it was unlikely that HMRC would make an enquiry into the matter of accountancy fees relating to Tax Return preparation. They were not intended to represent mandatory levels of benefits which should be included on Tax Returns as HMRC accept that there will be cases where the true level of benefit varies from the figures provided for guidance. Against this background, however, HMRC confirmed that the same guidance could be extended to apply to 2008-09 SA Returns. As was confirmed in the answer to Q10, however, that guidance was intended to relate to fully tax equalised cases, including those capable of inclusion within an EP Appendix 6 agreement. Whilst it was accepted that this would include cases where tax equalisation applied to all employment income other than share based remuneration, the guidance was not intended to apply to circumstances where partial tax equalisation arrangements are in place which can often apply to a small proportion of the overall compensation package.[60]

The figures have since been increased:

HMRC has .. taken a view to increase the levels for 2014-15 benefits in kind to £275 for one return and £700 for a home and host country return.

60 Note of meeting July 2009, accessible *http://www.hmrc.gov.uk/consultations/expat-mins-160709.htm*

The next review will be in April 2016.
Members were reminded that the amounts are applied to fully tax equalised employees and are for tax return preparation fees only. Further benefits in kind should be reported where employers also bear the agent's fees for dealing with Section 9A enquires.[61]

22.36 DT Relief: employment exercised outside UK

Article 15(1) OECD Model provides:

> 1. Subject to the provisions of Articles 16,[directors][62] 18 [pensions][63] and 19 [government service][64], salaries, wages and other similar remuneration derived by a resident of a Contracting State in respect of an employment shall be taxable only in that State unless the employment is exercised in the other Contracting State. If the employment is so exercised, such remuneration as is derived therefrom may be taxed in that other State.

To follow this one must bear in mind which Contracting State is which. It is easier to follow if rewritten with the UK in mind, thus:

> 1. ... salaries, wages and other similar remuneration derived by a resident of a *foreign* Contracting State in respect of an employment shall be taxable only in that *foreign* State unless the employment is exercised in *the UK* [the other Contracting State]. If the employment is so exercised *in the UK*, such remuneration as is derived therefrom may be taxed in *the UK* [that other State].

The OECD commentary provides:

> 1. Paragraph 1 establishes the general rule as to the taxation of income from employment (other than pensions), namely, that such income is taxable in the State where the employment is actually exercised. ... One consequence of this would be that a resident of a Contracting State who derived remuneration, in respect of an employment, from sources in the other State could not be taxed in that other State in respect of that remuneration merely because the results of this work were exploited in that other State.

---

61 Joint Expatriate Forum on Tax and NICs (29 April 2014) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/327284/140704_Expat_Forum_Minutes_FINAL.pdf*

62 See 22.43 (DTAs: Directors Fees).

63 See 24.7 (DT relief for pension income).

64 See 22.44 (DT relief: government service).

> 2. The general rule is subject to exception only in the case of pensions (Article 18) and of remuneration and pensions in respect of government service (Article 19). Non-employment remuneration of members of boards of directors of companies is the subject of Article 16....
> 2.2 The condition provided by the Article for taxation by the State of source is that the salaries, wages or other similar remuneration be derived from the exercise of employment in that State. This applies regardless of when that income may be paid to, credited to or otherwise definitively acquired by the employee.

The DTR Manual provides:

> **1920 Employment** [April 2007]
> The employment Article in our double taxation agreements is normally called the Dependent Personal Services Article. In most of the UK's agreements the Article is based on Article 15 (Dependent Personal Services) of the OECD Model Convention (see DT153) and the terms of this Model Article are summarised below. It must, however, always be checked that the Article in the particular agreement with which you are concerned follows the OECD Model Article before reliance is placed upon the guidance below.

22.36.1 *"Salaries, wages and other similar remuneration"*

The OECD commentary provides:

> 2.1 Member countries have generally understood the term "salaries, wages and other similar remuneration" to include benefits in kind received in respect of an employment (e.g. stock-options, the use of a residence or automobile, health or life insurance coverage and club memberships).

The DTR Manual provides:

> **1920 Employment** [April 2007]
> ... The words 'salaries, wages and other similar remuneration' should be understood in the broadest sense as covering all income from an employment, including benefits and share option gains chargeable under Section 135 ICTA 1988 (see DT1925).

22.36.2 *Where is employment exercised?*

The OECD commentary provides:

> 1. ... Employment is exercised in the place where the employee is physically present when performing the activities for which the

employment income is paid.

In *Kljun v HMRC* [2011] UKFTT 371 (TC) the Judge said:

> [18] What does exercised mean? The English is clear and it is where the employee is physically present when performing the activities for which the employee is being paid.

22.37 DT relief: employment exercised in UK

This takes us to Art. 15(2) OECD Model:

> 2. Notwithstanding the provisions of paragraph 1, remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if:
>
> a) the recipient is present in the other State for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, and
> b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the other State, and
> c) the remuneration is not borne by a permanent establishment which the employer has in the other State.[65]

For convenience I set this out as it applies to the UK:

> 2. ... remuneration derived by a resident of a *foreign* Contracting State in respect of an employment exercised in *the UK* [the other Contracting State] shall be taxable only in the *foreign* [first-mentioned] State if:
>
> a) the recipient is present in *the UK* [the other State] for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, and
> b) the remuneration is paid by, or on behalf of, an employer who is not a resident of *the UK* [the other State], and
> c) the remuneration is not borne by a permanent establishment which the employer has in *the UK* [the other State].

---

65 For completeness, article 15(3) continues: "3. Notwithstanding the preceding provisions of this Article, remuneration derived in respect of an employment exercised aboard a ship or aircraft operated in international traffic, or aboard a boat engaged in inland waterways transport, may be taxed in the Contracting State in which the place of effective management of the enterprise is situated." This is not discussed here; see OECD commentary para 9.

The OECD commentary provides:

> 3. Paragraph 2 contains, however, a general exception to the rule in paragraph 1. This exception covers all individuals rendering services in the course of an employment (sales representatives, construction workers, engineers, etc.), to the extent that their remuneration does not fall under the provisions of other Articles, such as those applying to government services or artistes and sportsmen.

22.38 Article 15(2)(a): Limited days of presence

Article 15(2)(a) provides:

> a) the recipient is present in the other State for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned

The OECD commentary provides:

> 4. The three conditions prescribed in this paragraph must be satisfied for the remuneration to qualify for the exemption. The first condition is that the exemption is limited to the 183 day period. It is further stipulated that this time period may not be exceeded "in any twelve month period commencing or ending in the fiscal year concerned". This contrasts with the 1963 Draft Convention and the 1977 Model Convention which provided that the 183 day period should not be exceeded "in the fiscal year concerned", a formulation that created difficulties where the fiscal years of the Contracting States did not coincide and which opened up opportunities in the sense that operations were sometimes organised in such a way that, for example, workers stayed in the State concerned for the last 5 ½ months of one year and the first 5 ½ months of the following year. The present wording of subparagraph 2 a) does away with such opportunities for tax avoidance. In applying that wording, all possible periods of twelve consecutive months must be considered, even periods which overlap others to a certain extent. For instance, if an employee is present in a State during 150 days between 1 April 01 and 31 March 02 but is present there during 210 days between 1 August 01 and 31 July 02, the employee will have been present for a period exceeding 183 days during the second 12 month period identified above even though he did not meet the minimum presence test during the first period considered and that first period partly overlaps the second.
>
> 5. Although various formulas have been used by Member countries to calculate the 183 day period, there is only one way which is consistent with the wording of this paragraph: the "days of physical presence"

method. The application of this method is straightforward as the individual is either present in a country or he is not. The presence could also relatively easily be documented by the taxpayer when evidence is required by the tax authorities. Under this method the following days are included in the calculation: part of a day, day of arrival, day of departure and all other days spent inside the State of activity such as Saturdays and Sundays, national holidays, holidays before, during and after the activity, short breaks (training, strikes, lock-out, delays in supplies), days of sickness (unless they prevent the individual from leaving and he would have otherwise qualified for the exemption) and death or sickness in the family. However, days spent in the State of activity in transit in the course of a trip between two points outside the State of activity should be excluded from the computation. It follows from these principles that any entire day spent outside the State of activity, whether for holidays, business trips, or any other reason, should not be taken into account. A day during any part of which, however brief, the taxpayer is present in a State counts as a day of presence in that State for purposes of computing the 183 day period.

5.1 Days during which the taxpayer is a resident of the source State should not, however, be taken into account in the calculation. Subparagraph a) has to be read in the context of the first part of paragraph 2, which refers to "remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State", which does not apply to a person who resides and works in the same State. The words "the recipient is present", found in subparagraph a), refer to the recipient of such remuneration and, during a period of residence in the source State, a person cannot be said to be the recipient of remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State. The following examples illustrate this conclusion:

— Example 1: From January 01 to December 01, X lives in, and is a resident of, State S. On 1 January 02, X is hired by an employer who is a resident of State R and moves to State R where he becomes a resident. X is subsequently sent to State S by his employer from 15 to 31 March 02. In that case, X is present in State S for 292 days between 1 April 01 and 31 March 02 but since he is a resident of State S between 1 April 01 and 31 December 01, this first period is not taken into account for purposes of the calculation of the periods referred to in subparagraph a).

— Example 2: From 15 to 31 October 01, Y, a resident of State R, is present in State S to prepare the expansion in that country of the business of ACO, also a resident of State R. On 1 May 02, Y moves to State S where she becomes a resident and works as the manager of a newly

created subsidiary of ACO resident of State S. In that case, Y is present in State S for 184 days between 15 October 01 and 14 October 02 but since she is a resident of State S between 1 May and 14 October 02, this last period is not taken into account for purposes of the calculation of the periods referred to in subparagraph a).

The DTR Manual provides:

1921 Short term visitor exemption 183 day rule [June 2009]
The first condition for exemption under Article 15(2) is that the employee must not be present in the UK for more than 183 days either 'in the tax year concerned' (as in Article 15(2)(a) of the 1980 UK/USA agreement) or 'in any period of 12 months' (found in Article 15(2)(a) of the 1985 UK/Norway agreement). It is important to distinguish between these formulae. The latter formula is a much tighter test than that used in the agreement with the USA.
For example, a US resident seconded to work in the UK for a two year assignment arrives here on 15 October 1990 and leaves the UK on 1 October 1992. Depending on all the circumstances, he could be taxable in the UK only for the year 1991-92. For the years 1990-91 and 1992-93 he could meet the condition in Article 15(2)(a) because in both periods he was not present in the UK for 183 days 'in the tax year concerned'.
By contrast, a Norwegian resident working in the UK would be taxable here throughout the period 15 October 1990 to 1 October 1992 under the test in the agreement with Norway.
Our agreements with Azerbaijan, Belgium, Bolivia, Denmark, Estonia, France, Ghana, Guyana, Iceland, Indonesia, Ivory Coast, Kazakhstan, Korea, Latvia, Malta, Mexico, Mongolia, Pakistan, Papua New Guinea, Sweden, Uganda, Ukraine, Uzbekistan, Venezuela and Vietnam also use the wording of the Norwegian agreement; and the agreement with New Zealand is similar. Most of the UK's agreements, however, use the tax/fiscal year formula.
Up until 5th April 2009, when counting to 183 days under Article 15(2)(a), a part day counts as a part day and days of arrival and departure and all other days spent inside the country of activity should be included in the calculation.
From 6th April 2009 onwards, when counting to 183 days under Article 15(2)(a), any part of a day, day of arrival, day of departure, and all other days spent in the UK such as Saturdays, Sundays, national holidays, holidays before during and after the period of work, short breaks (training, strikes, lock-out, delay in supplies), days of sickness (unless they prevent the individual from leaving and he would otherwise have qualified for the exemption) and death and sickness in the family should

be included in the calculation as a day the person is present in the country of activity.

Days spent in the UK in transit in the course of a trip between two non-UK points should be excluded from the computation.

From 2008/09 onwards (this overlaps for a year with the previous day counting method), days during which the tax payer is a resident of the UK should not be included in the calculation. The conditions in the treaty are for remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State and does not apply to a person who is resident and works in the same State. For example if a person is a resident of the UK but is hired by an employer in another State, moves to that State where he becomes resident and is subsequently sent to work for a short period in the UK by his employer, we would only include days in the UK after the taxpayer became a resident of the other State for the purposes of computing whether they had exceeded 183 days in the UK. Days in the UK when the taxpayer was a resident of the UK should not be included.

Similarly if a non-resident taxpayer is seconded to the UK for a short period by their employer and subsequently moves to and becomes a resident of the UK, days in the UK after they became a resident here should not be taken into account for the purposes of the calculation of the 183 days.

22.39 Article 15(2)(b): Payment by non-resident employer

Article 15(2)(b) provides:

> b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the other State, and

The DTR Manual provides:

> **1922 Employment** [June 2011]
>
> The second condition for exemption under Article 15(2) is that the remuneration which is the subject of the claim must be paid by, or on behalf of, an employer who is not UK resident.
>
> What follows is guidance regarding when a claim can be accepted and when an enquiry into the claim may be required. It is not intended to replace or expand the commentary on the application of Article 15 in the OECD Model Tax Convention on Income and Capital.
>
> The fact that an individual formally remains an employee of an overseas company does not on its own satisfy the test in Article 15(2)(b). Not only must the claimant remain an employee of the overseas company but the remuneration in respect of which the exemption is claimed must be paid

by the overseas employer and not, for example, by a UK subsidiary company to whom the employee may have been seconded. Any statement on this aspect of a claim should be checked to ensure that it is consistent with

i) other information in the papers (for example what does the return show?) and
ii) the position in other similar cases involving the same UK employer.

If there is any doubt you should ask the agents to provide a statement from the UK company or the overseas employer, to confirm the extent to which, if at all, the overseas employer has continued to pay the claimant's remuneration either directly or by reimbursing the UK company.

Cases where remuneration continues to be 'paid by' the overseas employer, but there is a recharge of the cost of that remuneration to the UK company to whom the employee has been seconded, are frequently a cause of difficulty. Claims should not be admitted where

- the employee remains formally employed by a company which is not resident in the UK and
- he is seconded to work for a UK resident company and
- the UK company for practical purposes functions as his employer during the UK assignment and
- the UK company bears the cost of the employee's remuneration, either by a direct recharge or as part of a management charge made by the non-resident employer.

When does a UK company function as an employer?

Guidance on the criteria for identifying the employer for the purposes of the Article is to be found in paragraphs 8 to 8.28 of the Commentary on Article 15 of the OECD Model Double Taxation Convention which should be considered in cases of difficulty and CAR PTI advisory will also be able to provide assistance. The starting point is whether under the domestic laws of the State of Source the services rendered in that State are provided in an employment relationship and that will determine how that State applies the Convention, i.e. whether the services are provided under a contract of service or under a contract for services. Where an employee works in the business of a UK company and that company obtains the benefits and bears any risks in relation to the work undertaken by the employee then that company is likely to be treated as his employer.

The mere fact that the UK company has borne the cost of the employee's remuneration is not on its own sufficient for that company to be treated as the employer. A UK company would not be regarded as the employer where the employee continued to work in the business of a non-resident

company even though working at the premises of the UK company - for instance, an employee sent to the UK company to service equipment supplied by a non-resident company.

In this situation the services are being provided under a contract for services between the two companies and not under a contract of service with the UK company.

Paragraphs 8.16 to 8.27 of the Commentary provide other examples of cases where services are rendered under a contract of employment and where, alternatively, they are provided under a contract for services between two enterprises.

The following guidance may also be of assistance in practice. In the case of very short term secondees it is unlikely that an employee would be sufficiently integrated within the business of the UK company for that company to be regarded as his employer. For that reason it may be accepted that a UK company with whom an employee does not have a formal contract of employment should not be treated as the employer for the purposes of Article15 where that employee is in the UK for less than 60 days in a tax year and that period does not form part of a more substantial period when the taxpayer is present in the UK. The 60 days are to be counted using the "days of physical presence method" set out paragraph 5 of the Commentary. Basically, if a person is physically present in the UK during any part of a day then that counts as a day in the UK for the purposes of this rule.

Further details about how this 60 day rule is applied can be found in Tax Bulletin issue 68.

Avoidance cases

Claims should not be admitted where payment by an overseas company forms part of an arrangement to avoid UK tax. PAYE Technical will advise in cases where, for example, the overseas employer is based in a tax haven or the employee is nominally employed by a company which exists to provide his services to the UK user of those services. Cases where an employment which existed prior to the employee's assignment to the UK continues during that assignment usually do not cause difficulty. Cases where the employee has taken up a new formal employment with an overseas company at the time of assignment should be reviewed critically.

'On behalf of'

Payments may be made 'on behalf of' a non-resident employer in cases where the payment is physically made by a UK company. It may be accepted that remuneration has been paid or benefits provided 'on behalf of' a non-resident employer if that non-resident ultimately bears the cost of such remuneration and benefits. Claims should not be admitted where

a UK company pays remuneration or incurs the cost of benefits and does not receive reimbursement from the overseas employer. Such payments and costs are incurred in the interest of the UK company and not on behalf of the overseas employer.

Unless the claimant offers evidence that the UK company was reimbursed the cost of the taxpayer's remuneration and benefits by the non-resident employer (and this can be checked with the relevant HMRC corporation tax specialist or Customer Relationship Manager dealing with the UK company's Corporation Tax affairs) a claim under Article 15(2) should be resisted.

Where it is argued that remuneration has been paid 'on behalf of' an overseas employer, even though a UK company has paid the individual's remuneration and the overseas employer has not reimbursed the cost, it should be pointed out that it is unlikely that, in these circumstances, the cost of the remuneration could be regarded as wholly and exclusively incurred for the purposes of the UK company's trade and that, therefore, no deduction should be claimed for the cost of the remuneration in computing the UK company's taxable profit. Reference should be made to the tax case of *Robinson v Scott Bader and Co* (54TC757) which considers the inadmissibility of remuneration paid on behalf of another employer.

The decision in the Scott Bader case makes clear that the object of the person making the payment is decisive in determining whether or not a deduction is permissible in accordance with Section 74 ICTA 1988.

In relation to seconded employees there are three possible situations

- the payment to the employee is made solely in the interests of the overseas company;
- the payment is made partly in the interests of the UK company and partly in the interest of the overseas company or
- the payment is made solely in the interests of the UK company.

Only in the third case is a deduction available to the UK company in computing its profits.

Benefits

Even where basic remuneration continues to be paid by the overseas employer it is common for benefits (for example, the use of a flat) to be provided at the cost of the UK employer to whom the employee has been seconded. Subject to the other conditions in the Article, the basic remuneration may be exempt from UK tax but the condition in Article 15(2)(b) is not satisfied in relation to benefits in these circumstances because they are not 'remuneration paid by, or on behalf of,'the overseas employer (unless the cost of the benefits is borne by the overseas employer through a recharge).

Kljun v HMRC [2011] UKFTT 371 (TC) offers an illustration of a case within art 15(2)(b).

22.39.1 *Employer a partnership*

The OECD commentary provides:

> 6.1 The application of the second condition in the case of fiscally transparent partnerships presents difficulties since such partnerships cannot qualify as a resident of a Contracting State under Article 4 (cf. paragraph 8.2 of the Commentary on Article 4). While it is clear that such a partnership could qualify as an "employer" (especially under the domestic law definitions of the term in some countries, e.g. where an employer is defined as a person liable for a wage tax), the application of the condition at the level of the partnership regardless of the situation of the partners would therefore render the condition totally meaningless.
> 6.2 The object and purpose of subparagraphs b) and c) of paragraph 2 are to avoid the source taxation of short-term employments to the extent that the employment income is not allowed as a deductible expense in the State of source because the employer is not taxable in that State as he neither is a resident nor has a permanent establishment therein. These subparagraphs can also be justified by the fact that imposing source deduction requirements with respect to short-term employments in a given State may be considered to constitute an excessive administrative burden where the employer neither resides nor has a permanent establishment in that State. In order to achieve a meaningful interpretation of subparagraph b) that would accord with its context and its object, it should therefore be considered that, in the case of fiscally transparent partnerships, that subparagraph applies at the level of the partners. Thus, the concepts of "employer" and "resident", as found in subparagraph b), are applied at the level of the partners rather than at the level of a fiscally transparent partnership. This approach is consistent with that under which other provisions of tax Conventions must be applied at the partners' rather than at the partnership's level. While this interpretation could create difficulties where the partners reside in different States, such difficulties could be addressed through the mutual agreement procedure by determining, for example, the State in which the partners who own the majority of the interests in the partnership reside (i.e. the State in which the greatest part of the deduction will be claimed).

22.40 Article 15(2)(c): Remuneration borne by UK PE

Article 15(2)(c) provides:

> (c) the remuneration is not borne by a permanent establishment which the employer has in the other State.

The OECD commentary provides:

> 7. Under the third condition, if the employer has a permanent establishment in the State in which the employment is exercised, the exemption is given on condition that the remuneration is not borne by that permanent establishment. The phrase "borne by" must be interpreted in the light of the underlying purpose of subparagraph c) of the Article, which is to ensure that the exception provided for in paragraph 2 does not apply to remuneration that could give rise to a deduction, having regard to the principles of Article 7 and the nature of the remuneration, in computing the profits of a permanent establishment situated in the State in which the employment is exercised. In this regard, it must be noted that the fact that the employer has, or has not, actually claimed a deduction for the remuneration in computing the profits attributable to the permanent establishment is not necessarily conclusive since the proper test is whether any deduction otherwise available for that remuneration would be allocated to the permanent establishment. That test would be met, for instance, even if no amount were actually deducted as a result of the permanent establishment being exempt from tax in the source country or of the employer simply deciding not to claim a deduction to which he was entitled. The test would also be met where the remuneration is not deductible merely because of its nature (e.g. where the State takes the view that the issuing of shares pursuant to an employee stock-option does not give rise to a deduction) rather than because it should not be allocated to the permanent establishment.

Kljun v HMRC [2011] UKFTT 371 (TC) offers an illustration of a case within art 15(2)(c).

22.40.1 *Grant of beneficial share options*

Share options granted by reason of employment are in principle earnings and subject to income tax on the grant of the option: *Abbott v Philbin* 39 TC 82. For UK resident employees, s.475 ITEPA overrides that charge. That does not however apply to non-resident employees, and it is not uncommon to find non-resident employees who have taxable duties in the UK. In this case, the grant of an option falls outside of chapter 5 of part 7

ITEPA 2003 and therefore in principle subject to income tax on the grant of the option. DT relief is however likely to be available if the employee is resident in a jurisdiction with a DT relief in OECD model form. In particular, the requirement of article 15(2)(c) is met: the remuneration is will not be borne by a permanent establishment which the employer has in the UK. For the remuneration is not borne by the company over whose shares the share option is issued. If anyone, it is the shareholders in that company who bear the burden of the remuneration.

22.41 Who is the employer?

The identity of the employer matters for condition (b) and (c).

The OECD commentary provides:

> 8. Paragraph 2 has given rise to numerous cases of abuse through adoption of the practice known as "international hiring-out of labour". In this system, a local employer wishing to employ foreign labour for one or more periods of less than 183 days recruits through an intermediary established abroad who purports to be the employer and hires the labour out to the employer. The worker thus fulfils prima facie the three conditions laid down by paragraph 2 and may claim exemption from taxation in the country where he is temporarily working. To prevent such abuse, in situations of this type, the term "employer" should be interpreted in the context of paragraph 2. In this respect, it should be noted that the term "employer" is not defined in the Convention but it is understood that the employer is the person having rights on the work produced and bearing the relative responsibility and risks. In cases of international hiring-out of labour, these functions are to a large extent exercised by the user. In this context, substance should prevail over form, i.e. each case should be examined to see whether the functions of employer were exercised mainly by the intermediary or by the user. It is therefore up to the Contracting States to agree on the situations in which the intermediary does not fulfil the conditions required for him to be considered as the employer within the meaning of paragraph 2. In settling this question, the competent authorities may refer not only to the above-mentioned indications but to a number of circumstances enabling them to establish that the real employer is the user of the labour (and not the foreign intermediary):
>
> — the hirer does not bear the responsibility or risk for the results produced by the employee's work;
> — the authority to instruct the worker lies with the user;
> — the work is performed at a place which is under the control and

responsibility of the user;
— the remuneration to the hirer is calculated on the basis of the time utilised, or there is in other ways a connection between this remuneration and wages received by the employee;
— tools and materials are essentially put at the employee's disposal by the user;
— the number and qualifications of the employees are not solely determined by the hirer.

The DTR Manual provides:

1923 Employment [February 2006]
The third condition for exemption under Article 15(2) is that the remuneration of the employee must not be borne by a permanent establishment or fixed base which the employer has in the UK –see DT1710 onwards and DT219 for general guidance concerning the meaning of these terms.
This condition should be considered carefully in all cases where the employee has not apparently been assigned to work in the UK for a UK-resident company. If an employee has simply been seconded by his overseas employer to work here for a UK-resident company it will not usually be necessary to consider this condition.
A subsidiary company in the UK is not generally a permanent establishment of its overseas parent company (see DT1714). The subsidiary is not in law part of its parent company but is a distinct legal person. A permanent establishment is simply a part of an overseas company which is transplanted in the UK. Customers and employees all contract with the overseas company rather than with a separate legal person in the UK. Company letter-paper often indicates how the UK operations are organised; the registered number and place of registration of a UK company are often given at the head or foot of the paper.
If operations in the UK are carried out through a permanent establishment, it should be assumed in the absence of evidence to the contrary that the cost of remuneration of an employee seconded to the permanent establishment is a deduction in computing the profits of the permanent establishment. This will be the normal basis of allocating costs in accordance with international tax principles. The permanent establishment should therefore be regarded as bearing the cost of that individual's remuneration unless there is evidence that the overseas Head Office continues to pay the employee and the cost is not allocated to the UK permanent establishment for UK tax purposes. A permanent establishment cannot be said to 'bear the remuneration' unless it is charged against its profits without a corresponding credit, for example by

way of a management charge. In doubtful cases advice may be sought from the Inspector dealing with the accounts of the permanent establishment.

Sometimes dealing with the PAYE District may be the first contact which an overseas company has with the UK Revenue and it may not yet have been established whether or not the company has a permanent establishment in the UK. If the company has had no prior contact with the Revenue the Corporation Tax District which would have responsibility for the company (the District dealing with the area where the business premises of the company are located) should be asked to advise whether or not a permanent establishment exists in the UK (see DT1715 in cases of difficulty).

1924 Employment [April 2007]

Refer to Employment Income Technical all claims to the exemption of employment income from UK tax (DT1920 onwards) where

- the tax at stake in that case exceeds £50,000, or
- the company claimed to be the employer is apparently based in a tax haven, or
- difficulty is experienced in applying the guidance at DT1920 onwards in a particular case.

As the instructions in DT410 explain, a claim to exemption under an agreement is a claim to the Board by virtue of Section 788(6) ICTA 1988 and a notice of decision on a claim may not be given by an Inspector. If you reach the point where you are unable to reach agreement with the taxpayer please send the case to Employment Income Technical.

The commentary was changed in 1992. In the absence of the commentary, one might have thought that "employer", being an undefined term, would have its UK law meaning in accordance with article 3(2). For criticisms of this in relation to treaties before the amendments to the commentary, see "Employees and Double Taxation Agreements" [1995] BTR 529; "Debates on Treaties" [1997] BTR 1.

22.41.1 *The 60-day rule*

Tax Bulletin 68 provides:

Non-Residents Working In The UK For Short Periods: The "60-Day" Rule

Most of the UK's double taxation agreements contain a provision which may enable an employee who comes to work here on a short-term basis to be taxed only in his or her home country. An employee must show that he or she fulfils a series of conditions specified in the agreement to make a valid claim to exemption from UK tax. One of those conditions will be that the employee's remuneration must be 'paid by or on behalf of an employer' who is not resident

in the UK. In many cases, it is clear that the employer is the non-resident company for whom the taxpayer was working before he or she came to the UK. In other cases, the employee may have been seconded by his or her overseas employer to work for a UK company, or the overseas employer may carry on a business of hiring out staff to other companies. A formal contract of employment remains with the overseas employer, but the employee works in the business of the UK company, which obtains the benefits and bears any risks in relation to the work undertaken by the employee. In economic terms, this state of affairs is recognised by the overseas employer recharging the cost of the employee's earnings to the UK and the UK company might be described as the 'economic employer'. In such a case, the exemption from UK tax for short-term visitors will not be available. This was explained in Tax Bulletin 17, published in June 1995. However, the position of very short-term visitors caused concern, and Tax Bulletin 25 dealt with this in October 1996. This reproduced a statement by the Financial Secretary to the Treasury (FST) that the Inland Revenue would not consider that a short term business visitor was sufficiently integrated into the business of a UK company for it to be regarded as the employer where:

- the employee concerned is in the UK for less than 60 days in a tax year; and
- that period does not form part of a more substantial period when the taxpayer is present in the UK.

This has become known as the "60-day rule". This article gives further guidance on common situations where it may be an issue.

Does the worker have to be from a country with which we have a full double tax agreement for the 60-day rule to apply?

The 60-day rule is framed in terms of accepting without enquiry that the conditions in a DTA for short-term business visitors to be solely taxed in their country of residence have been satisfied. That exemption, and consequently the 60 day rule, is therefore only relevant if the person is resident in a country with which we have signed a comprehensive double tax agreement. If not, domestic legislation will apply in full.

Is the 60-day exemption available if the employee is on the UK payroll?

No. The FST's statement was made in the context of workers who were paid via a non-resident employer's payroll but whose economic employer might be in the UK.

How do you count the days for the 60-day rule?

It is based on physical presence in the UK in the same way as the 183 days are counted for the purposes of Article 15(2) of the OECD model Tax Convention.

Is the 60 days a fixed limit? For example, an employer has a succession of people who work for him and he bears their wages, but they may be in the UK up to 90 days.

The 60-day rule represents a balance between a loss of tax revenue which may be due to the UK and the compliance costs to both employers and the Revenue of ascertaining and collecting such tax for very short-term visitors. There are no plans for it to be altered. However individuals working in the UK may be exempt under the relevant DTA anyway, for example if their earnings are paid by an overseas company, not recharged in any form to a UK company or permanent establishment and no UK company acts as their employer.

Is the 60-day rule available where the earnings have been recharged to a UK permanent establishment rather than a UK-resident company?
Although not covered in the actual wording of the 1996 statement, the Revenue accepts the 60-day rule should apply in these circumstances also.
How should the phrase "part of a more substantial period" be interpreted?
The aim is to provide consistency:

- Between very short-term workers, regardless of the particular dates involved; and
- Between short-term workers seconded from overseas and the normal workforce of the UK employer.

The most obvious example met is where less than 60 days are worked up to 5th April and less than 60 days after, but the overall period is more than 60 days. In these circumstances, the 60-day exemption will not be available, to be consistent with periods of more than 60 days worked over, say, November to January.
What if there is a gap between two shorter periods of employment?
To consider whether the 60-day period has been exceeded, the following factors may be relevant:

- Is there an expectation that the employee will return to the UK when they depart initially?
- How long is the gap between visits in comparison to the length of those visits?
- How frequently does the employee return to the UK?
- How integral to the business are the duties performed?

It is impossible to give an exact formula that will cover all circumstances. However, the following examples should assist in seeing how the Revenue will approach this question.
Example 1: Alain visits the UK for 35 days in Feb/March 2003, then returns to Austria for a fortnight's holiday, and returns again to the same contract for 40 days in April/May.
The 75 days would be regarded as one period. The gap here is insignificant compared to the two periods either side and liability to UK tax would be consistent with a person who works for 75 days here continuously. As the periods are part of the same contract, the employer would be expected to operate PAYE from day one. If there had been no expectation of returning during the first 35 days we would expect PAYE to be operated only for the second period even though liability to UK tax would exist for both for Alain. This is because the 60 days is an objective test whilst PAYE is based on "reasonable expectation" that payments are liable to UK tax.
Example 2: Beatrice visits the UK for 35 days in Year 1. She returns to Belgium but unexpectedly is asked to return in Year 2, after a 7 month gap, and does so for 40 days.
Each episode in the UK would be regarded as separate periods of less than 60 days. Beatrice's return was unexpected, and after a relatively long gap. So there is no UK liability for either and no PAYE is due.
Example 3: Cedric is the financial controller for a Canadian group. Each year he visits the UK subsidiary for 55-59 days.
Once there is an expectation that this will be the work pattern, the Revenue would

consider that the episodes of work here were part of a more substantial period. A financial controller will be significantly integrated into the business, whether this is of the UK subsidiary or possibly a permanent establishment of the parent company. PAYE will apply from when it is clear that visits will recur as part of a regular and integrated pattern, although Cedric may have to consider whether he is also liable under self assessment to UK tax for an earlier period of work, as for Alain in Example 1. Cedric and the group will then be able to decide the duration and timing of visits to the UK on business grounds rather than for individual tax considerations.

Example 4: Danielle spends 50 days working in UK between 10 April and 15 January, with visits averaging 3 days each. Then from 1 June to 6 October a further 15 days are spent visiting UK for business meetings on the same piece of work.

Although Danielle is taxable from the very start, we would not expect either her or the company to be able to recognise this. However, the Revenue would expect PAYE to be operated in Year 2.

HMRC say:

HMRC were asked to clarify the way in which the economic employer test applies in a number of scenarios in which employment costs are recharged to a UK employer. In each scenario, an individual has a formal employment contract with a person resident outside the UK and is seconded to work in the UK.

The economic employer test is set out in the commentary to Article 15 of the OECD Model Tax Convention on Income and Capital which, subject to certain conditions, enables an overseas employee who comes to the UK to work on a short-term basis to be taxed only in his or her home country. HMRC confirmed that it is not practice to restrict this test for UK resident employers.

This means that, where an employee is present in the UK for less than 60 days and is not on the payroll of a UK resident employer, the 60-day rule set out in Tax Bulletin 68 will normally apply: the individual will not be considered to have an economic employer without any further consideration of the facts being necessary. In other situations, it will be necessary to examine the facts to determine who has the rights on the work produced and bearing the relative responsibility and risks. Where the employee is a resident in another contracting State and is seconded to the UK for a short period, the economic employer will not depend on whether the UK employer is entitled to a Corporation Tax deduction for the remuneration costs: the UK employer might be entitled to a deduction even where they are not the economic employer.

HMRC referred to the recent publication on 21 May 2010 by the OECD of proposed revisions to the Model Treaty Commentary on employment

relationships for the purposes of Article 15.[66]

The minutes of the Joint Forum on Expatriate Tax and NICs record:

> **Short term business visitors**
> With reference to the previous question and answer given in October *(i.e. "With reference to the previous question and answer given in July i.e. 'Some of my UK employees were assigned to a separate foreign legal entity overseas, but continued to hold contracts of employment with the UK Company. Some of those employees subsequently returned to the UK as short term business visitors working for and at the expense of that foreign employer. Can Article 15(2) (b) be satisfied in these situations?' could HMRC:*
> (i) expand the answer to explain the word entity and
> (ii) if an overseas branch of a UK parent company is regarded as an overseas entity.")
> can HMRC further clarify whether a branch of a branch would be considered to satisfy the 60 day rule if in example 2, the overseas employee of an overseas employer comes to work in the UK branch? A branch is simply a place where a company carries out its business and as such a 'branch of a branch' remains a branch of the original company. In the scenario described, an overseas branch of a UK company can not be regarded as the employer. The employer will be the UK comp any regardless of how many branches there may or may not be. The 60 day rule will not therefore apply. [67]

22.42 DTA defence to BiK charge

This section considers whether DTAs may provide a defence to the BiK charge.

It is assumed in this section that although the individual is UK resident,[68] they are treaty-resident in another state ("the foreign state") under the DTA tie-breaker rules. A DTA may well be of assistance in these circumstances.

It is assumed that the foreign state has a DTA with an article in the form of Art. 15 of the OECD Model Treaty; of course the individual treaty will

---

66 Joint Expatriate Forum on Tax and NICS: 26 May 2010 Meeting note *http://www.hmrc.gov.uk/consultations/260510-epf-minutes.pdf.*

67 29 January 2014 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf*

68 Otherwise there is no BiK problem.

need to be reviewed.

To qualify for relief under Art. 15(1) the following conditions must be met.

There must be an employment. A shadow directorship is an employment for UK tax purposes, and it is considered that it counts as an employment for treaty purposes.

The BiK charge must be a tax on "salaries, wages and other similar remuneration." This is the case.

The BiK must be in respect of the employment: it is considered that this condition is satisfied.

Lastly, the employment must be exercised wholly in the foreign state (in which case full relief is applicable) or at least partly in the foreign state (in which partial relief applies). This is more problematic and in typical cases assuming the employment is exercised at all, it will be exercised at least partly in the UK. If that is the case only partial relief is available under article 15(1).

If relief is not available under Art.15(1) we turn to Art.15(2).

In principle this can offer exemption from the charge on benefits in kind, even if the employment is exercised wholly or partly in the UK. The three conditions in (a) to (c) must be met.

> *(a) the recipient is present in the UK for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned*

Whether this condition is met depends on the facts.

> *(b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the UK*

The employer is of course the company owning the property. The employer will not in principle be UK resident. In fact the BiK is not in the strict sense "paid" but it is suggested that the word should not be strictly construed and this requirement is satisfied.

> *(c) the remuneration is not borne by a permanent establishment which the employer has in the UK.*

This condition will be met, since the company will not have a permanent establishment (the UK home is not a permanent establishment as defined).

Accordingly individuals who are treaty-resident in a contracting state and present in the UK for less than 183 days can qualify for DT relief under

Art. 15(2).

22.43 DTAs: Directors fees

Article 16 OECD Model provides:

> Directors' fees and other similar payments derived by a resident of a Contracting State in his capacity as a member of the board of directors of a company which is a resident of the other Contracting State may be taxed in that other State.

The OECD commentary provides:

> 1. This Article relates to remuneration received by a resident of a Contracting State, whether an individual or a legal person, in the capacity of a member of a board of directors of a company which is a resident of the other Contracting State. Since it might sometimes be difficult to ascertain where the services are performed, the provision treats the services as performed in the State of residence of the company.
> 1.1 Member countries have generally understood the term "fees and other similar payments" to include benefits in kind received by a person in that person's capacity as a member of the board of directors of a company (e.g. stock-options, the use of a residence or automobile, health or life insurance coverage and club memberships).
> 2. A member of the board of directors of a company often also has other functions with the company, e.g. as ordinary employee, adviser, consultant, etc. It is clear that the Article does not apply to remuneration paid to such a person on account of such other functions.
> 3. In some countries organs of companies exist which are similar in function to the board of directors. Contracting States are free to include in bilateral conventions such organs of companies under a provision corresponding to Article 16.

22.44 DT relief: government service

Article 19 OECD model provides:

> 1. a) Salaries, wages and other similar remuneration paid by a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.
>
> b) However, such salaries, wages and other similar remuneration shall be taxable only in the other Contracting State if the services are rendered in that State and the individual is a resident

of that State who:

(i) is a national of that State; or

(ii) did not become a resident of that State solely for the purpose of rendering the services.

2. a) Notwithstanding the provisions of paragraph 1, pensions and other similar remuneration paid by, or out of funds created by, a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.

b) However, such pensions and other similar remuneration shall be taxable only in the other Contracting State if the individual is a resident of, and a national of, that State.

3. The provisions of Articles 15, 16, 17, and 18 shall apply to salaries, wages, pensions, and other similar remuneration in respect of services rendered in connection with a business carried on by a Contracting State or a political subdivision or a local authority thereof.

22.45 DT relief: claims

The DTR Manual provides:

1920- Non-residents: Employment [April 2007]

... For years of assessment 1996-97 onwards, claims to exemption from UK tax in respect of employment income are made as part of the taxpayer's self assessment on the claim form attached, depending on the circumstances, to either Help Sheet IR302 (Dual-Residents) or Help Sheet IR304 (Non-Residents - Relief under Double Taxation Agreements). Both forms require the taxpayer to establish the fact of his residence in the other country for the purpose of the agreement (see DT310) and to declare that the relevant provisions of the particular agreement are considered to have been fulfilled. All claims under Article 15(2) should be checked carefully by reference to terms of the agreement and, where appropriate, to the guidance at DT1921 - DT1923, and enquiries raised in suitable cases. See also DT1924 about certain types of cases which must always be referred to Employment Income Technical, before a claim is accepted.

...

CHAPTER TWENTY THREE

PAYE

23.1 PAYE: Introduction

A full discussion of PAYE needs a book to itself. This chapter focuses on matters closest to the themes of this book.

The law is mostly contained in the Income Tax (PAYE) Regulations 2003 (which I call "**the PAYE regulations**").

In outline, the obligation to deduct PAYE is in reg. 21(1) PAYE regulations:

> On making a relevant payment to an employee during a tax year, an employer must deduct or repay tax in accordance with these Regulations by reference to the employee's code, if the employer has one for the employee.

The key term is "relevant payment". "Relevant payment" is a label for a number of rules.

There is the usual cascade of definitions. Subject to some exceptions, not discussed here, reg. 4(1) PAYE regulations provides:

> In these Regulations, any reference (however expressed) to relevant payments means payments of, or on account of, net PAYE income...

"Net" PAYE income is a label to introduce rules for deductions not discussed here.[1]

"PAYE income" is defined in s.683 ITEPA:

> (1) For the purposes of this Act and any other enactment (whenever passed) "PAYE income" for a tax year consists of—

---

1 Regulation 3(1) PAYE regulations provides:
"Net PAYE income means PAYE income less any—
(a) allowable pension contributions, and
(b) allowable donations to charity."

(a) any PAYE employment income for the year,
(b) any PAYE pension income for the year, and
(c) any PAYE social security income for the year.

(2) "PAYE employment income" for a tax year means income which consists of—

(a) any taxable earnings from an employment in the year (determined in accordance with section 10(2)),[2] and
(b) any taxable specific income from an employment for the year (determined in accordance with section 10(3)).

23.2 Non-resident and workday relief employees

In three cases it may be unclear how much income is taxable and so PAYE income:

(1) non-resident employees and
(2) employees who qualify for workday relief
(3) Split years.

Section 690 ITEPA provides a clearance mechanism:

(1) This section applies in relation to an employee in a tax year if the employee—

(a) [i] is either non-UK resident for the tax year or
[ii] is UK resident but meets the requirement of section 26A for the tax year, and
(b) works or will work in the UK and also works or is likely to work outside the UK.

(1A) This section also applies in relation to an employee in a tax year if it appears to an officer of Revenue and Customs that—

(a) the tax year is likely to be a split year as respects the employee, and
(b) the employee works or will work in the United Kingdom and also works or is likely to work outside the United Kingdom.

(2) If in relation to an employee to whom this section applies and any tax year it appears to an officer of Revenue and Customs that—

(a) some of the income paid to the employee by the employer[3] is PAYE income, but

---

2 See 22.6 (Taxable earnings).

3 Section 690(3)(b) ITEPA provides:
"any reference to a payment made by the employer includes a reference to a payment made by a person acting on behalf of the employer and at the expense of the employer or a person connected with the employer."

(b) some of that income may not be PAYE income,

an officer of Revenue and Customs may, on an application made by the appropriate person,[4] give a direction for determining a proportion of any payment made in that year of, or on account of, income of the employee which is to be treated as PAYE income.

I refer to this as **"a s.690 direction."**

(2A) For the purposes of subsection (2) as it applies in relation to an employee who is UK resident for a tax year but not domiciled in the United Kingdom in that tax year, the officer may treat section 809B of ITA 2007 (remittance basis) as applying to the employee for that year, even if no claim under that section has been made.

HMRC Brief 17/09 explains s.690(2A) ITEPA is to correct an oversight in 2008:

Section 690 ITEPA directions
Prior to April 2008 non-domiciled individuals and not ordinarily resident individuals were automatically taxed on the remittance basis on their foreign employment income. However since April 2008 individuals have to make an annual claim to the remittance basis. Section 690 ITEPA was amended in Finance Act 2008 to reflect this change for not ordinarily resident employees. Prior to April 2008 employers were able to ask for a section 690 direction which permitted them not to apply PAYE to certain employment income paid to not ordinarily resident employees entitled to be taxed on the remittance basis. These rules have been amended to allow this procedure to continue.

23.2.1 *Application for s.690 direction*

Section 690 ITEPA continues:

(4) An application under subsection (2) must provide such information as is available and is relevant to the application.
(5) A direction under subsection (2)—
(a) must specify the employee to whom and the tax year to which it relates,
(b) must be given by notice to the appropriate person, and

4 Section 690(3)(a) defines "appropriate person":
"In this section—
(a) "the appropriate person" means the person designated by the employer for the purposes of this section and, if no person is so designated, the employer..."

(c) may be withdrawn by notice to the appropriate person from a date specified in the notice.

(6) The date so specified may not be earlier than 30 days from the date on which the notice of withdrawal is given.

23.2.2 *Effect of s.690 direction*

Section 690 ITEPA continues:

(7) If—

(a) a direction under subsection (2) has effect in relation to an employee to whom this section applies, and

(b) a payment of, or on account of, the income of the employee is made by the employer in the tax year to which the direction relates,

the proportion of the payment determined in accordance with the direction is to be treated for the purposes of PAYE regulations as a payment of PAYE income of the employee.

23.2.3 *Position in absence of s.690 direction*

Section 690 ITEPA continues:

(8) If in any tax year—

(a) no direction under subsection (2) has effect in relation to an employee to whom this section applies, and

(b) any payment of, or on account of, the income of the employee is made by the employer,

the entire payment is to be treated for the purposes of PAYE regulations as a payment of PAYE income of the employee.

(9) Subsections (7) and (8) are without prejudice to—

(a) any assessment in respect of the income of the employee in question, and

(b) any right to repayment of income tax overpaid and any obligation to pay income tax underpaid.

23.2.4 *HMRC practice*

The PAYE Manual provides:

81545. UK employer's duties [July 2013]

...

The employee is resident/not ordinarily resident or not resident in the UK and works both in and outside the UK

The employer can apply under Section 690 ITEPA 2003 for a direction from HMRC to operate PAYE only on the percentage of the employee's

total earnings that are for work in the UK. This applies to all payments made by the employer including termination payments and share based remuneration.

The Section 690 application is only an estimate of the work done in and outside the UK and the employee should complete an SA return to report the actual position. See PAYE81555 - PAYE81565 on how to handle applications under Section 690 ITEPA 2003.

If an employer does not make an application under Section 690 ITEPA 2003, then unless the employee is within an EP Appendix 6 arrangement (see PAYE81740), they must operate PAYE on all payments made to the employee for work done both in and outside the UK. The employee can claim a repayment of the tax deducted on earnings for work done outside the UK on their SA Return.

You must set up an SA record for an employee who works both in and outside the UK, whether or not a Section 690 application is made.

If the employer provides Tax Equalisation arrangements for the employee, you should refer to PAYE81740.

Cases of doubt or difficulty should be referred to Personal Tax Product & Process, PAYE Technical, Shipley for advice.

...

81555. Applications under Section 690 ITEPA 2003 - Who deals with the application? [September 2010]

Arrivals in the UK

On receipt of an application for a direction under Section 690 ITEPA 2003 you must decide which office is responsible for reviewing the application. Use the following table to determine the office and pass the application to them immediately.

Situation	**Responsible Office**
The employee is an Expat	CAR PTI Manchester Expat Unit
All other employees	The Processing Office for the employee

81560. Applications under Section 690 ITEPA 2003 - reviewing the application [June 2012]

Arrivals in the UK

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

Use the flowchart [not published] to review an application under Section 690. It contains links to a number of draft letters you should use depending on the circumstances of the case. These letters are available on SEES Forms and Letters, in the general subdirectory 'Regulation/Payment letters'.

When an application is accepted, you must take the following action

- Set up an SA record for the employee if there is not one already

- Arrange for an SA return with the non-residence and employment pages to be issued for the year(s) the application covers
- Make an SA note as follows 'Sec690 approval given for [year] for earnings from [employer's name]. PAYE to be operated on [%].'
- If the employee is resident/not ordinarily resident
  - Amend their tax code to remove the basic personal allowance (and blind person's allowance if claimed)
- Place all the Section 690 papers in an SA Post batching range

81565. Applications under Section 690 ITEPA 2003 - At the end of the tax year [January 2012]

The employer must complete the employee's form P14, End of Year Summary, to show only

- The pay on which the employer has operated PAYE (this will include the amount representing the UK duties agreed by HMRC under Section 690 ITEPA and any other taxable pay) and the tax deducted from that pay

The employee should, when completing their SA return enter

- The earnings from their P60 / P45 in box 1 on the Employment page including any cash earnings from that employment that have not been included on the P60 / P45
- The tax deducted from their P60 / P45 in box 2 on the Employment page
- The remainder of their earnings in box 3 on the Employment page including paid earnings overseas from an earlier year which were not liable to UK income tax unless they were remitted to the UK during the Tax Return year
- The amount of their total earnings which relates to work done abroad in box 12 under the section 'Share Scheme and Employment Lump Sum, Compensation and Deduction' on the 'Additional Information Page' (SA101)

No equivalent rule is needed for UK resident non-domiciled employees, whose income is either taxable entirely on the remittance basis or on the arising basis.

23.3 PAYE adjustment to recapture lost personal allowance

RDR1 provides:

> **What should you do if you have UK tax allowances and choose to use the remittance basis?**
>
> 8.9 If you decide during a tax year that you are going to use the remittance basis and you are still getting UK personal allowances

> through the PAYE system, you may not be paying enough UK tax.
> 8.10 If you contact us, we can arrange to amend your tax code to one which does not give relief for personal allowances, thus reducing any potential tax bill arising from you getting the benefit of allowances you are no longer entitled to. Your employer can't do this for you as your tax affairs are confidential between you and HMRC. Until they receive a new tax code from us, your employer will continue to deduct tax from you based on the code we originally issued before you were claiming the remittance basis.

It is hard to imagine anyone wishing to do this. But HMRC say:

> Employers have expressed concern that the P46 (Expat) does not allow them to operate a 0T code (no personal allowance) even where they are aware that the employee will claim the remittance basis or has income in excess of £100K.
> HMRC said that it was not the responsibility of employers to withdraw personal allowances and, if they did so, the New PAYE System (NPS) might reinstate the allowances when the P14 is filed and make a repayment to the individual.
> HMRC said that, if employers agree with their employee that they will claim the remittance basis or if the individual's earnings will exceed £100K, they should request a formal change of code number from the Expat Team. This would ensure that HMRC records mirror those of the employer when the P14 is submitted.
> HMRC confirmed that the Modified PAYE rules in EPM6 allows PAs to be withdrawn from remittance basis users but it would be sensible for Employers to notify the Expat Team of situations where that applies. They agreed to make the necessary changes to the EPM6 agreement to make this clear.[5]

23.4 Repayment of overpaid PAYE not a remittance

The minutes of the Joint Expatriate Forum record:

> HMRC had circulated a note explaining that the existing non-statutory practice could continue whereby remittances arising as a result of repayments of overpaid PAYE to non tax-equalised employees were disregarded. This statement was based on new legal advice and meant

5 Joint Expatriate Forum on Tax and NICs: (May 2010) Meeting Note *http://www.hmrc.gov.uk/consultations/260510-epf-minutes.pdf*.

there was no need to provide for this treatment in primary legislation.[6]

This note is dated 7 October 2011 and provides:

> HMRC's long standing practice in relation to repayments of income tax for employees who remain not ordinarily resident in the UK has been to treat PAYE tax overpaid as not constituting a remittance in cases where:
> - under tax equalisation arrangements it would be refunded to the employer; or
> - the employee instructs HMRC to refund the money to an overseas account.
>
> The practice is however not consistent with the FA 2008 remittance basis legislation.
>
> At a Expats Forum sub group meeting held on 18 May 2011, HMRC confirmed that repayments of tax overpaid to an employer under a tax equalisation arrangement would not constitute income as the employee is contractually entitled to net remuneration and the actual UK taxes due on that remuneration. The repayment of the tax overpaid is in effect a refund of overpaid earnings by employee to employer.
>
> However, for gross paid employees, PAYE repayments represent a part repayment of earnings delivered in the UK and as such a remittance to the UK under section 809L ITA. HMRC agreed to consider the views expressed and how the matter could be resolved. In the meantime, the existing practice would continue until at least 5 April 2012.
>
> The suggestion was made at the subgroup that, if the practice was ultra vires HMRC's management discretion, it should be legislated, possibly as part of the current review of non domiciled taxation.
>
> HMRC has since taken further legal advice on this matter. This has confirmed that the current informal practice can continue as an informal concession. As such, there is no need for any legislative fix.

23.5 Short-term business visitors within DTA: PAYE exemption

The PAYE Manual provides:

> **82000 EP appendix 4: criteria for short term business visitors** [April 2013] The CWG2 Employer Further Guide to PAYE and NICs advises employers that it may be possible to relax strict PAYE requirements for employees on short-term business visits to the UK, and tells employers to contact their HMRC Office.

6 Joint Expatriate Forum on Tax and NICs (October 2011); see *http://www.hmrc.gov.uk/consultations/expat-mins-oct-2011.pdf*.

Short Term Business Visitors

This arrangement provides that PAYE can be disregarded in certain circumstances. If an employer has only one or two employees potentially affected they may like to consider applying for an NT code (see PAYE81625) on an individual basis instead.

Conditions

This arrangement must only be applied where individuals are

- Resident in a country with which the UK has a Double Taxation Agreement under which the Dependent Personal Services / Income from Employment Article (Article 15 or the equivalent) is likely to be competent
- Coming to work in the UK for a UK company or the UK branch of an overseas company
- Expected to stay in the UK for 183 days or less in any twelve month period

Provided that it can be shown that for specifically named employees, the UK company or branch will not in fact ultimately bear the remuneration specified. Where agreement is reached and in all other aspects the employee falls within the guidelines, then that part of the remuneration not ultimately borne by the UK company or branch can fall within this arrangement. See also the three 'Notes: Definitions' below regarding employees receiving some remuneration that is ultimately borne by the company or branch and some which is not.

These arrangements will not apply where the expense of the remuneration is passed on to another UK company or branch and not recharged overseas.

Notes: Definitions

- Where used in this arrangement the term remuneration has its widest possible meaning and includes for example, salary, wages, benefits, allowances and expenses
- Where an employee otherwise falling within this arrangement receives remuneration borne by companies in different countries then
  a. Remuneration not ultimately borne in the UK - falls within this agreement
  b. Remuneration ultimately borne in the UK - does not fall within this agreement unless the HMRC Office has agreed a dispensation for it. It is therefore possible for an employee falling within this arrangement to also have a PAYE liability. If otherwise appropriate this PAYE liability can be met using modified PAYE procedures as described in EP Appendix 6, PAYE82002.
- 'Ultimately borne' means the company finally bearing the cost after all recharging of any nature

Although employee remuneration ultimately borne by the UK Company is not covered by this particular arrangement, the OECD commentary provides examples of situations where the UK Company would not be regarded as the economic employer and treaty exemption may therefore apply. In such cases a separate claim should be made.

Notes: Double Taxation Treaties

- Some Double Taxation Treaties (for example that with The Netherlands) specify 183 days in a tax year. When looking at residents of those countries therefore this is the test to apply and not the 183 days in any twelve month

period now more commonly used
- The Double Taxation Manual (DT1920 to DT1924 inclusive) is relevant to this arrangement and should be consulted initially in cases of doubt
- Full Payment Submissions do not need to be completed for EP Appendix 4 employees

Notes: Method of counting days spent in the UK

...

The method of counting days should follow the OECD commentary 'days of physical presence' method. Under this method, the general principle is that any day during any part of which, however brief, the person is present in the UK counts as a day of presence for the purposes or computing the 183 day period. As such

- Any part of a day, day of arrival, day of departure, and all other days spent in the UK such as Saturdays, Sundays, national holidays, holidays before during and after the period of work, short breaks (training, strikes, lock-out, delay in supplies), days of sickness (unless they prevent the individual from leaving and that individual would otherwise have qualified for the exemption) and death and sickness in the family should be included in the calculation
- Days spent in the UK in transit in the course of a trip between two non-UK points should be excluded from the computation

Days during which the taxpayer is a resident of the UK should not be included in the calculation. The conditions in the treaty are for remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State and does not apply to a person who is resident and works in the same State.

For example, if a person is a resident of the UK but is hired by an employer in another State, moves to that State where they become resident and is subsequently sent to work for a short period in the UK by his employer, we would only include days in the UK after the taxpayer became a resident of the other State for the purposes of computing whether they had exceeded 183 days in the UK. Days in the UK when the taxpayer was a resident of the UK should not be included.

Similarly if a non-resident taxpayer is seconded to the UK for a short period by their employer and subsequently moves to and becomes a resident of the UK, days in the UK after they became a resident here should not be taken into account for the purposes of the calculation of the 183 days.

...

General principles of an EP Appendix 4 arrangement

1. It only applies to employees who have not become UK resident for tax purposes or if UK resident, are treaty resident in the treaty partner country
2. In all cases involving short-term assignment of employees to the UK, the employer will put in place some form of internal reporting system to keep as accurate as possible a record of employees visiting the UK on business. It is expected that this system will have the following minimum requirement
    - Employees will periodically report days spent in the UK on business to the central point controlling this arrangement

- Employees should not spend more than 30 days intermittently in the UK in any 12 month period without reporting to that central point

3. All records that are kept under this arrangement are within Regulation 97 IT (Pay As You Earn) Regulations 2003 and so must be retained and produced for inspection
4. Where liability is subsequently found to arise on payments of PAYE income made to an employee the employer will be expected to pay the tax that ought to have been deducted from or otherwise paid in respect of each payment. Late payment of PAYE tax will attract interest in the usual way
5. Should it become apparent that PAYE is not being applied in the case of employees who do not satisfy the relevant criteria, HMRC reserves the right to insist that PAYE be operated strictly for all employees from day 1
6. Any employee who cannot fulfil the conditions set out below should have PAYE operated from day 1
7. The treatment for NICs purposes of employees coming to the UK is covered in the CWG2 Employer Further Guide to PAYE and NICs

The time limits given in EP Appendix 4 are administrative only and are over-ridden by any legislative time limits. For example if a taxpayer needs to complete a Self Assessment return then the normal rules relating to Self Assessment apply.

Visitors to the UK 1 - 30 days

No requirements for either employer or employee to fulfil.

Visitors to the UK 31 - 60 days

For an employee who spends no more than 60 days in the UK during the tax year, PAYE can be disregarded provided it is confirmed that

a. there is no formal contract of employment with the UK employer
b. the 60 days do not form part of a more substantial period. (See DT1922.)

Visitors to the UK 61 - 90 days

For an employee in the UK for not more than 90 days in the tax year, PAYE can be disregarded provided that the employer supplies the information below by 31 May following the end of the tax year

- Full name of employee
- Last known UK and overseas addresses of employee
- Nature of duties undertaken
- Date commenced
- Date ceased
- To which country a tax return covering worldwide income is submitted

And confirms that

a. The UK company does not
    - Ultimately bear the cost of the employee's remuneration
    - Function as the employee's employer during the UK assignment. (See DT1922 for further information)

Visitors to the UK 91 to 150 days

For an employee in the UK for a period of 91 days but not exceeding 150 days in the tax year PAYE can be disregarded provided that

a. All of the information requested for visitors up to 90 days is provided and in addition

b. In the case of non-US citizens and Green Card holders, the employee provides a statement from the overseas Revenue authority confirming residence in the other state for tax purposes during the period in the UK. This statement should be passed to the HMRC Office by 31 May following the end of the relevant overseas tax year. This arrangement is only provisional until the relevant certificate is received

In the case of US citizens it will only be necessary for the employee to provide evidence of continuing residence in the US.

Visitors to the UK 151 to 183 days

Applications will be made on a named individual basis for authority to include the employee in this arrangement. The application will be made as soon as it can reasonably be anticipated that the employee will be present in the UK for more than 150 days. The application will include

a. All of the information requested for visitors up to 90 days and confirmation that the statement from the overseas Revenue authority will follow by the relevant 31 May

b. A statement by the employee giving reasons why he / she considers himself /herself to be treaty resident in the treaty partner country by reference to the appropriate article in the Double Taxation Treaty

Helpsheet HS302 provides more information about dual residence generally and the tests to be applied to determine the country of tax residence.

HMRC will consider the circumstances and will

a. Notify the employer that the individual can be included in the Appendix 4 arrangement, or
b. Authorise code NT and issue a Self Assessment tax return, or
c. Confirm that PAYE should be applied and issue a Self Assessment tax return

23.6 Foreign tax credit relief: PAYE exemption

The PAYE Manual provides:

82001 EP appendix 5: net of foreign tax credit relief [January 2014]

Relaxation on payments of PAYE

This arrangement only applies to employers who are required to deduct foreign tax in addition to UK PAYE from payments being made to employees sent to work abroad. Its aim is to give provisional relief for double taxation to employees who must pay both UK tax and foreign tax from the same payments of earnings.

The CWG2 Employer Further Guide to PAYE and NICs, advises employers to contact HMRC if they have to do this. If they do, HMRC considers the position as set out in PAYE81715, and may authorise the employer to operate the arrangement set out in this appendix.

It is the Employer Technical Team (EP Appendix 5 Application), Customer Operations National Insurance Contributions and Employer Office, Gilbridge House, High Street West, Sunderland, SR1 3HL, who are responsible for authorising the employer to operate these arrangements.

If the employee has to pay foreign tax direct to an overseas Revenue authority

on payments taxed through PAYE, advance DTR can be given through the PAYE code (see PAYE81715).

In many overseas contract situations, where an employee is abroad for less than 6 months no overseas tax is ultimately found to be due. This is because the employee will usually have personal protection under the terms of many Double Taxation Agreements (DTA).

However, it cannot be assumed that DTA protection is available on the basis that the employee works in an overseas country for less than 183 days. The relevant DTA and the other authority should be consulted. In particular, the 183 day protection may not be available where

- The employee works for a resident of the overseas country who functions as their employer; Or
- Their contractual employer has an identifiable `permanent establishment' in the overseas country; Or
- The DTA says so

If these circumstances apply or where no DTA exists, overseas tax is due from day 1. The overseas country may also impose withholding at source obligations on the employer so that they have continuing UK PAYE / NIC responsibilities as well as those arising in the overseas country.

It is in these specific circumstances or where the 183 days period is exceeded but the taxpayer remains UK resident, that we can sanction the relaxation of some PAYE requirements.

The relaxation only applies to UK PAYE that should be deducted from an employee's pay using their UK tax code and UK tax tables. All other PAYE and National Insurance requirements must still be fulfilled by the employer. There can be no question of abandoning PAYE / NIC altogether for the duration of the overseas contract.

You should make it clear to the employer that the relaxation is only being made available here because of the taxing rights of the country concerned and otherwise two amounts of tax would be deducted from the employees gross pay. It should not be used by the employer or agent for any other contract or situation without prior consultation with you. It is not available if an overseas deduction is borne by the employer.

Employers responsibilities under this arrangement

Where you agree the use of this arrangement you must write to the employer to

- Request the name and NINO of each employee included in the arrangement
- Ask the employer to provide a regular update of any changes in the number of employees included. The frequency of these updates must be agreed between you and the employer

Advise the employer that

- For those employees on overseas work in (country name) PAYE/NIC due should be calculated in the normal way
- They must only give credit by this method for foreign tax actually payable on and deducted from the employee's wages and paid to the overseas authority
- Credit is given by reducing the amount of UK PAYE deducted from wages by the amount of foreign tax deducted from gross wages in the same UK tax

year

- Foreign tax will normally be set off against UK PAYE in the same pay period before the employer pays it to the Accounts Office. However, credit can be given retrospectively in the same tax year where pay was double taxed
- The credit available under this agreement is restricted to the amount of UK PAYE deductible from the employees wages (NICs deductions and contributions are not affected in any way)
- Any net UK PAYE tax remaining due is to be returned on the employer's RTI submissions. This net amount will form part of the employer's regular payment and should be paid to the Accounts Office in the normal way with all the NICs due
- Any UK PAYE refunds due during the year because of a change of code number must be restricted to the net UK PAYE deducted from the employee during the year
- The employer and the employee must undertake to provide details of foreign tax that has been refunded

Employee redeployed, no longer overseas

For employees who cease to operate overseas but continue in the same employment in the UK or another location, the employer must

- Submit details of pay and UK tax deducted up to the date of redeployment together with a report of foreign tax credited
- Operate the employees existing code on the Week 1 or Month 1 basis

Employee leaves employment or dies

If an employee who has been given credit under this system leaves the employment, or dies, the employer must should

- Submit the final full payment submission for the employee showing the date of leaving or death as appropriate and showing the code as if it had been operated on a Week1/Month1 basis
- Any P45 issued to a leaver should be completed as if the tax code has been operated on the Week 1 or Month 1 basis, showing the net UK tax deducted. This is to ensure that any new employer does not operate it on a cumulative basis

A statement of the overseas tax deducted, for which credit has been given against UK PAYE, should be issued to the departing employee and it should contain

- The Total Taxable Pay to date
- The Total Taxable Pay subject to UK Tax and foreign tax
- The Total Foreign Tax paid
- The amount of UK PAYE that has been offset by the foreign tax

The employer should keep HMRC up to date with any changes to these arrangements, see 'Notification of employees included in the arrangement' below. So if any employee leaves or dies, this does not mean that we require an in year return immediately. As long as the details above are issued to an employee who leaves, the employer can tell HMRC at the next agreed update or at the year end.

If the employer decides to send HMRC an update when the employee leaves or

dies they can do so. If they do, it should contain the information they have provided to the employee. There is no set format for this information and HMRC does not produce a return. It should be sent to the Edinburgh address quoted under the sub heading 'At the end of the tax year' below.

Action to be taken once the agreement is authorised

Following an agreement to the relaxation of PAYE in accordance with Appendix 5, you must take the following action

- On the employers record, use EBS Function AMEND EMPLOYER NOTES to record that an arrangement under Appendix 5 has been agreed
- The Employers Technical Team will update the database spreadsheet that records these schemes

Notification of employees included in the arrangement

The employer must send details of employees included in this arrangement and keep you up to date with changes to those details on a regular basis (at intervals agreed between you and the employer).

On receipt of these details, you must take the following action to ensure that the taxpayer's liability is reviewed at the end of the year.

In all cases on each employee's record

- Enter a note on Contact History that the employee is included in an arrangement under Appendix 5
- Set the inhibit automatic reconciliation signal on the PAYE Service record for CY and CY+1 (this should be set on the record for every year until the employment ceases)

For redeployments, leavers and deceased cases on receipt of the P45(1) or equivalent on each employee record

- Enter the following note on Contact History 'Total tax to date (enter date of leaving or redeployment) is net of Foreign Tax Credit Relief'
- Update the current year's record to add a Week 1 / Month 1 basis to the latest code on the record

Note: A cumulative code for these cases cannot normally be restored in-year. If you receive a request for a cumulative code or an in-year repayment, you should tell the customer that this is not possible. If they press the matter you should contact Personal Tax Customer, Product & Process, PAYE Technical, Shipley for advice.

At the end of the tax year

The introduction of PAYE reporting in real time does not change the application of Appendix 5, where the employee is liable to pay foreign tax as well as UK PAYE.

Employers should have included any net UK tax deducted on their Full Payment Submissions throughout the year and any errors should have been corrected before the end of the tax year. If not corrected on the last FPS or by 19 April, the employer will have to submit an Earlier Year Update (EYU).

At the end of the tax year the employer should send HMRC a statement showing

- The name and NINO of each employee included in the arrangement
- The amount of income subjected to both PAYE and foreign tax
- The total foreign tax deducted
- The amount of foreign tax deducted and remitted to the overseas authority

which was set off against that employees UK PAYE deductions due (foreign tax credit relief)

The employer should also provide evidence that the foreign tax has been paid. This information should be sent in the first instance to

HMRC, Edinburgh Group, EP Appendix 5 Team, Spur A, Grayfield House, 5 Bankhead Avenue, Edinburgh, EH11 4AE

Action at employer level

When the employer submits details of the foreign tax credit given with the evidence of foreign tax paid for each employee included in the arrangement, Edinburgh will follow their existing guidance and risk assess the cases by checking NPS and SA as appropriate.

Action at employee level

On receipt of details provided by the employer, for each employee you should

- Make a note on Contact History to record the foreign tax credit given by that employer in that year
- Proceed in accordance with the guidance at PAYE93038. ...

HMRC say:

> HMRC has been advised that some software developers have been unable to update their products for EP Appendix 5 but are looking to do so before 6 April 2015. HMRC has therefore decided to extend the period during which employers may operate EP Appendix 5 without compliant software until 6 April 2015. This is a final extension. From 6 April 2015, EP Appendix 5 will only be available where the employer is able to report UK tax paid after the foreign tax credit relief has been deducted in the data items Total Tax to Date and Tax Deducted or Refunded.
>
> Some employers know that their current software will not be updated in 2014-15 and do not intend to change their provider. Those employers may have already made arrangements for employees to apply for tax codes with estimated double taxation relief from 6 April 2014. These employers are encouraged to apply the new tax codes and not revert back to EP Appendix 5 for 2014-15. [7]

23.7 Tax equalisation

The PAYE Manual provides:

> **PAYE82002 - PAYE operation: international employments: EP appendix 6: modified PAYE in tax equalisation cases** [June 2014]

7 29 April 2014
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/327284/140704_Expat_Forum_Minutes_FINAL.pdf

Application for modified PAYE for tax equalised expatriate employees from 6 April 20__

Tax equalisation generally describes an arrangement between an employer (see Note 1) and a foreign national employee who comes to the United Kingdom (UK) to work. Under the terms of an agreement, the employee (see Note 2) is entitled to specified net cash earnings and non-cash benefits. The employer undertakes to meet the UK Income Tax liability arising from the earnings and to ensure that the employee's UK tax affairs will be handled by a professional adviser or by an in-house specialist experienced in tax equalisation issues.

For an employee to be included in an arrangement established under this application, the employer must equalise liability to UK Income Tax on all general earnings subject to the rules in part 2 Chapters 4 and 5 ITEPA applying to employees resident, ordinarily resident or domiciled outside the UK.

An application indicates that the employer agrees to operate PAYE on a gross-up of cash earnings and non-cash benefits for all employees eligible to be included in this arrangement and has undertaken with the employees to pay any residual UK liability on earnings based on each employee's self assessment. Employers should ensure that employees complete their self-assessment returns in accordance with the guidance in Help Sheet IR212.

These arrangements can apply to Real Time Information (RTI) employers as well as non-Real Time Information employers.

Note 1: For the purposes of this application, 'employer' includes a 'relevant person' for whom an employee works in terms of section 689 Income Tax (Earnings and Pensions) Act 2003 (ITEPA).

Note 2: For the purposes of this application, 'employee' includes an 'office holder'.

Note 3: Where the employee is tax equalised on all general earnings but not on specific employment income, for example, on taxable share related events the employee may still be covered by the arrangement as long as all the other conditions are satisfied.

Employer name:……..

Employer address: ……..

Employer PAYE reference: ……..

Calculation of estimated PAYE on tax equalised earnings

1. We will prepare a best estimate of all earnings including cash allowances and non-cash benefits for the year at the beginning of each year, grossed-up for tax purposes and calculate PAYE tax without restriction for the 50 per cent 'overriding limit'. The best estimate will include, where relevant, the annual salary, any cash bonus awards made to 5 April and non-cash benefits provided by a home country employer.
2. We will undertake an in-year review during the period December to April to take account of any material changes, and in particular, to ensure that
   a. Calendar or tax year end bonuses are accounted for
   b. Taxable share related events are accounted for
3. Where we do not equalise liability in respect of awards under 2(b) above
   a. PAYE must be applied in accordance with all relevant statutory provisions

and regulations and

b. In the case of notional payments, where an employee does not make good the due amount within the period of 90 days specified by section 222(1) (c) ITEPA 2003, we will include additional earnings in this arrangement equivalent to the due amount. These additional earnings will be grossed-up for tax purposes.

4. We will update the estimated PAYE calculation during the year to reflect arrivals and departures of employees subject to this application.

5. We will exclude from the estimated PAYE tax calculation contributions we make (employer contributions) to a qualifying overseas pension scheme in respect of an employee who is a relevant migrant member of that scheme. Subject to the conditions specified in paragraph 51 of Schedule 36 to the Finance Act 2004, we will exclude employer contributions to an overseas pension scheme in relation to which the employee received corresponding relief in 2005-06. We will also exclude employer contributions to overseas schemes where the employee is entitled to relief from UK tax under the terms of a Double Taxation Agreement.

6. We will take into account employee contributions to the overseas pension schemes referred to in paragraph 5 where we know the amounts involved and are satisfied that each employee is entitled to relief for contributions as a relevant migrant member or with pre-commencement entitlement to corresponding relief or under the terms of a Double Taxation Agreement.

7. Where we give provisional relief for overseas workdays (apportionment of earnings between UK and non-UK duties for the purposes of sections 15 and 26 ITEPA 2003), based on each employee's workday history or as anticipated by the employees where they join during the tax year, we will withdraw personal allowances, apply code 0T and notify HMRC accordingly. Any tax gross-up will be applied after the earnings have been apportioned between UK and non-UK duties. We will enter code 0T on the payroll record and Full Payment Submissions.

8. Where paragraph 7 does not apply, we will give personal allowances by applying the emergency code on a cumulative basis when calculating PAYE tax. We will enter that code the payroll record and Full Payment Submissions.

9. We will take relief for foreign tax into account in respect of UK residents working abroad where an agreement has been reached with HM Revenue and Customs (HMRC) in accordance with the PAYE Manual EP Appendix 5. We note in particular the requirement that an overseas country imposes a withholding at source obligation on earnings that are subject to PAYE.

10. We will not apply PAYE to the earnings of a tax-equalised employee covered under separate arrangements in EP Appendix 4 of the PAYE Manual. Where it later appears that such earnings are not exempt from UK tax under the terms of the relevant Double Taxation Agreement, we will include the employee in this arrangement and notify HMRC accordingly.

11. We will send one FPS each month no later than the 19th of the month following the end of the tax month. The FPS will show the estimated earnings and income tax calculated in accordance with this agreement. We undertake to pay 1/12th of the estimated PAYE for the tax year each month by the 19th or

22nd of the following month (depending upon the payment method). Where the number of employees covered by this arrangement at any one time is five or fewer, we undertake to pay 3/12ths of the estimated PAYE tax on or before the 19th or 22nd (depending upon the payment method) of July, October, January and April ('the quarterly basis'). If the number of employees covered by this arrangement increases to more than 5 at any one time in the course of a year and is likely to remain at that higher level, we will make payments of estimated PAYE by the 19th or 22nd of each month from the start of the following tax year. If the number of employees covered by this arrangement at any one time reduces to five or fewer in the course of a year and is likely to remain at that lower level, we will make payments of estimated PAYE on the quarterly basis from the start of the following tax year. Late payment penalties under schedule 56 of the Finance Act 2009 will not apply to payments under this arrangement providing that tax is paid at the agreed time. Schedule 56 penalties will be charged if the estimated tax is not paid as specified in this paragraph.

Arrivals and departures

12. We shall submit a Full Payment Submission which will confirm for each employee covered by this agreement

- That the employee is included in a EPM6 agreement
- A relevant starting date
- The length of time the seconded employee intends to work in the UK and if they intend to live here
- If they are from the European Economic area
- A leaving date

The actual leaving date may be entered on the final Full Payment Submission for the year where a month 12 reconciliation is undertaken. In these circumstances, the Irregular Employment Pattern Indicator should be set to keep the record open.

Year end requirements

13. Forms P60 will be given to the employees by 31 May after the end of each tax year. The figure of pay for each employee will comprise all cash payments and non-cash benefits in respect of which PAYE tax has been calculated after grossing-up. The figure of tax will be the total amount of PAYE tax paid under this arrangement in respect of the employee concerned.

14. We accept that due to the inherent nature of these modified arrangements, over and underpayments of tax may arise compared with the amount of tax that would otherwise have been due if normal PAYE procedures had been applied. Provided that the procedures as outlined in these arrangements are followed, interest will not be charged in accordance with the PAYE regulations in respect of any residual income tax liabilities as shown by the employees' tax returns. However, it is accepted that interest will run on any part of the estimated PAYE for a tax year due to have been paid under this agreement which (depending upon the payment method) reaches HMRC after 19 or 22 April, as appropriate, following the end of the tax year.

15. We shall submit in respect of each employee covered by these arrangements a form P11D, or an approved substitute, and associated form P11D(b) by 31 January following the end of the tax year. Where a dispensation has already

been agreed for certain expense items for "local hire" employees, the relevant P11D / substitute will be prepared on the same basis provided the nature of the expense items are the same as those covered by the existing dispensation. We acknowledge that where all statements are not submitted by 31 January following the end of the tax year, penalties under Section 98 TMA 1970 may arise. This is on the basis that the earnings in question ought to have been provided on forms P11D or approved substitutes before 7 July following the end of the tax year.

Submission of employee's self assessment tax return and calculation of tax liability

16. We will have systems and procedures in place to ensure that each employee's self assessment will include actual cash remuneration, all benefits and reimbursed expenses payments not covered by a dispensation and other amounts chargeable to tax as employment income, grossed up on a current year basis. Each employee's tax return will include a note in the notes section of the relevant Employment Page to the effect that the employee is tax equalised and Modified PAYE has been applied.

Payment of residual Income Tax liability

17. We will pay any additional tax found to be due under these arrangements following the submission of the employee's tax return by 31 January following the end of the tax year. Alternatively, if a refund is due, the appropriate repayment claim mandated to us or (if different) to the employee's contractual employer will be submitted. We understand that as a consequence of these arrangements there will be no requirement to make payments on account of tax liabilities. We acknowledge that a tax return for an employee covered by these arrangements should incorporate a claim to cancel payments on account. We further understand that HMRC should not issue Statements of Payments on Account to employees included under these arrangements.

18. We understand that for employees who are not ordinarily resident in the UK, any overpayments of PAYE will not be treated as a remittance of foreign earnings where repayment is mandated to an employer in the UK.

National Insurance Contributions

19. These arrangements do not apply to National Insurance Contributions (NICs). In cases where the employee is liable for Class 1 NICs and taxable benefits are provided that attract Class 1A NICs, NICs must be accounted for in the normal way unless separate arrangements are agreed with HMRC as set out in EP Appendix 7A of the HMRC PAYE Manual.

Statement

20. We acknowledge that HMRC reserve the right to review / cancel these arrangements as a result of changes in the law or should operational difficulties arise or the arrangements are seen to be deficient, for example

- Where significant and / or regular underpayments of income tax on employment income have arisen in respect of employees' self assessment returns and in the opinion of HMRC that tax ought to have been accounted for in the calculation of estimated PAYE provided for under these arrangements
- Where an employer fails to pay tax on time and / or to ensure that returns

and P11Ds are filed on time such that a liability arises to pay interest and / or penalties.

We accept that as a result of a decision to cancel these arrangements, HMRC may require the strict operation of PAYE. Similarly, we reserve the right to cancel these arrangements and adopt the strict operation of PAYE. Cancellation by either party will be confirmed by written notice and will be effective from the following 6 April or an earlier date, as agreed by the parties. If a date cannot be agreed, cancellation will be effective on the earlier of the previously stated 6 April or 3 months from the date when the written notice was given.

PAYE82003 - PAYE operation: international employments: EP appendix 7a: modified class 1 and class 1a national insurance contributions (NICs) for expatriate employees subject to an EP appendix 6 agreement [May 2013]

Application for modified NICs for expatriate employees from 6 April 20__

Employer name: ……..

Employer address: ……..

Employer PAYE reference: ……

Part 1 - Scope of agreement

1. This application applies only to those employees who
   a. Are subject to an EP Appendix 6 agreement, and
   b. Are assigned to work in the United Kingdom (UK) from abroad and have an employer or host employer in the UK liable for secondary UK NICs liabilities, and
   c. Pay NICs on earnings in this employment, above the annual upper earnings limit (UEL) for the year, or on earnings at or above the UEL in each earnings period throughout the year. If an employee joins, commences liability part way through an earnings period, or leaves the employment part way through an earnings period, that shall not invalidate the agreement, provided that
      - For employees with monthly earnings periods, NICs are calculated and paid on earnings at or above the UEL in all months other than the month in which the employee joined or left
      - For employees with an annual earnings period, NICs are calculated and paid on earnings to the person's pro-rata annual or annual UEL. (If an employee with an annual earnings period starts after tax week 1 they will have an annual pro-rata earnings period. If a person starts before or during tax week 1 they will have an annual earnings period

irrespective of if and when they leave the employment)

Part 2 - Operation of agreement

2. We will calculate and pay Class 1 NICs on a best estimate of those elements of earnings that are subject to Class 1 NICs. At the beginning of each year, or if liability commences after the beginning of the year, in the month when NICs liability first occurs, we will prepare the best estimate. The best estimate will include all world-wide earnings paid from whatever source, including where relevant, the annual salary, any cash bonus awards made to 5 April, and any non-cash benefits that attract Class 1 NICs liability.

3. In accordance with Part 3 of this agreement, we will calculate and pay Class 1 NICs on all the estimated earnings which are subject to NICs.

4. We shall for each employee, in respect of every tax month estimated earnings are calculated for that employee, complete and maintain a payroll record and include the details about the payment, the National Insurance category letter and NICs data items on a Full Payment Submission (FPS). The FPS must be submitted to Her Majesty's Revenue and Customs (HMRC) no later than the 19th of the month following the end of the tax month.

5. We will undertake an in-year review during the period December to 5 April to take account of any material changes and in particular, will ensure that amounts that are earnings, as defined in sections 3 and 4 of the Social Security Contributions and Benefits Act 1992, which

- Must be included in the computation of a person's earnings when assessing Class 1 NICs, and
- Are bonuses and / or NICs due on amounts which count as employment income in relation to employment-related securities to which sections 698 or 700 of the Income Tax (Earnings and Pensions) Act 2003 applies, for example, share related events

are accounted for.

We will update the Class 1 NICs payable immediately following the review, amend payroll records and

- When completing the next FPS for submission to HMRC, adjust the year to date NICs data items to show the revised values to date, and
- Adjust the next payment to HMRC if too much or too little NICs have been paid.

6. During the year, we will update the estimated Class 1 NICs to be paid to reflect arrivals and departures of employees who are subject to this application, and changes in the scope of these arrangements as they apply to one or more employee.

7. We understand that where we have employees who are not ordinarily resident in the UK and who meet the conditions set out in Tax Bulletin 79 as workers for whom salary can be apportioned between UK and non-UK days, we can initially compute earnings for Class 1 NICs on the basis of an estimate of UK and non-UK workday that we have used for income tax purposes. When we complete our NIC Settlement Return, this initial estimate must be corrected using the statutory NICs rules for non-UK days set out in Tax Bulletin 79 and the correct NICs must be paid before 31 March following the end of the tax year.

Part 3 - Payment of Class 1 NICs to HM Revenue and Customs (HMRC)

9. We undertake to pay to HMRC each month, the Class 1 NICs due on 1/12th of the estimated earnings. These payments will be made each month, by the 19th or 22nd of the following month (depending upon our payment method).

10. Where the number of employees covered by this arrangement at any one time is 5 or fewer, we undertake to pay the Class 1 NICs due on 3/12ths of the total estimated earnings for the tax year, on or before the 19th or 22nd (depending upon the payment method) of July, October, January and April (the quarterly basis).

11. If the number of employees covered by this agreement increases to more than 5 at any one time in the course of the year, and is likely to remain at the higher level, we will make the payments of Class 1 NICs by the 19th or 22nd of each month, from the start of the following year. If the number of employees covered by this agreement at any one time reduces to five or fewer in the course of the year and is likely to remain at the lower level, we will make payments of Class 1 NICs on the quarterly basis, from the start of the following year.

12. If the NICs are paid in accordance with the terms of this agreement, late payment penalties under Schedule 56 of the Finance Act 2009, will not apply to payments under this arrangement. Schedule 56 penalties will be charged if the NICs due on the estimated earnings are not paid as specified in Part 3 of this agreement.

Part 4 - Arrivals and departures

13. We will notify HMRC of our intention to include new arrivals to the UK covered by this agreement. Similarly, we will notify HMRC of our intention to exclude an employee from the agreement in the event of the employee no longer being subject to PAYE under EP Appendix 6. We will make these notifications to HMRC in writing before the end of the relevant tax year.

Part 5 - Interest

15. We accept that due to the inherent nature of these modified arrangements, over and underpayments of Class 1 NICs may arise, compared with the amount of Class 1 NICs that would otherwise have been due if normal NICs procedures had been applied. Provided that the procedures outlined in these arrangements are followed, interest will not be charged in accordance with the NICs regulations in respect of any residual Class 1 NICs liabilities as shown by the employer's 'NIC Settlement Return'. However, it is accepted that interest will run on any part of the NICs due on estimated earnings for a tax year due to have been paid under this agreement, which (depending upon the method of payment) reaches HMRC after 19 or 22 April following the end of the tax year.

16. It is accepted that if the payment of Class 1 NICs, due on estimated earnings payable by 19 or 22 April is paid late, HMRC will charge interest on amounts paid late.

Part 6 - Class 1A NICs

17. We understand that for individuals covered by this agreement we will have until 31st January following the end of the tax year in which to submit our P11D(b). By the normal statutory time of 19 July following the end of the tax year we will make a payment of Class 1A NICs based on a best estimate of Class 1A NICs due. We will calculate and pay to HMRC the correct amount of

Class 1A by 31 March following the end of the tax year. However, we understand that when we make our best estimate of earnings for Class 1 NICs, it is permissible to include non-cash benefits that would statutorily attract a Class 1A NICs charge. Where our best estimate for Class 1 NICs includes payments and benefits that attract Class 1A NICs under the normal statutory provisions, and we have paid Class 1 NICs using that estimate, we are not then required to pay Class 1A NICs by the normal statutory time of 19 July. Where our best estimate of earnings for Class 1 NICs purposes includes non-cash benefits that would normally be subject to Class 1A NICs, we must correct this after the tax year end and pay the right amount of Class 1 NICs and Class 1A NICs using our NIC Settlement Return. The right amount of Class 1A NICs must be paid by 31 March following the end of the tax year.

18. We will submit form P11D(b) at the latest by 31 January following the end of the tax year. The P11D(b) will show the correct benefits for the tax year computed using the statutory rules. We will annotate the P11D(b) 'Appendix 7A' applies.

19. We understand that if we do not pay the Class 1A NICs due by the date set out in this agreement, then regulation 67B of the Social Security (Contributions) Regulations 2001 may apply (late payment penalties).

20. We understand that where the P11D(b) is not submitted by 31 January following the year end, penalties may arise under Regulation 81(1) Social Security (Contributions) Regulations 2001 and that interest under Regulation 76(1) Social Security (Contributions) Regulations 2001, will accrue from the original 19 July statutory date.

We understand that where we submit an incorrect return under the terms of this agreement, penalties may arise under Regulation 81 of the Social Security (Contributions) Regulations 2001

- On the Class 1A NICs due for payment no later than 19July following the end of the year in which benefits were provided; and
- That the earnings in question ought to have been included on forms P11D or approved substitutes and form P11D(b) before 7 July following the end of the tax year.

Part 7 - Payment of residual Class 1 and Class 1A NICs Liability - NIC Settlement Return

21. We accept that where additional Class 1 or Class 1A NICs are found to be due and are paid after 31 March following the end of the tax year, or errors in the NIC Settlement Return are discovered, interest and penalties will be charged in accordance with the legislation.

22. No later than 31 March following the end of the tax year we will carry out an exercise to establish the correct amount of Class 1 and Class 1A NICs due on all the employee's earnings and benefits both from the UK and abroad. We will calculate and pay to HMRC any additional Class 1 NICs and / or Class 1A NICs found to be due under these arrangements by the 31 March following the end of the tax year concerned. Any additional Class 1 or Class 1A NICs will be paid over to HMRC via a 'NIC Settlement Return' (NSR). An NSR will also account for any NICs due on any primary NICs paid on the employees' behalf under these arrangements, unless already accounted for.

23. We will set out in the NSR the correct Class 1 and Class 1A NICs due for the year for each employee covered by this agreement taking into account what has been paid previously under parts 3 and 7 of this agreement. We will send HMRC the NSR no later than 31 March following the end of the tax year in which earnings were paid.

24. We understand that where the employee is social security equalised, the payment of the primary NICs on the 'best estimate' of gross earnings will represent a payment of earnings. Therefore, earnings should be grossed up to take account of these NICs met on the employee's behalf. Where primary NICs are met on behalf of the employee in respect of earnings included in the NSR, the earnings on the return should be grossed up to take account of the primary NICs met on the employee's behalf.

Part 8 - Overpaid Class 1 NICs

25. We understand that if we discover that NICs have been overpaid in relation to the 'best estimate' we can complete the NSR to reflect any secondary (employers) Class 1 or Class 1A NICs overpaid. We can also claim a refund of any primary (employees) Class 1 NICs overpaid on the 'best estimate', but only where:

a. The Class 1 NICs paid by the employer are paid as part of the equalisation process and have not been recovered from the employee's earnings, or
b. The Class 1 NICs have been paid by the employer and recovered from the employee and the employee mandates the repayment to the employer in writing.

26. We understand that, in all other cases, the NSR must be submitted together with a covering letter asking for a refund. This will be passed to HMRC Personal Tax International for processing. We understand that under this agreement, we cannot recover overpayments by deducting the amounts from future payments to HMRC or by offsetting overpayments of primary NICs in respect of one employee against NICs due in respect of another.

Part 9 - Statement

27. We acknowledge that HMRC reserve the right to review / cancel these arrangements as a result of changes in the law, or should operational difficulties arise, or the arrangements are seen to be deficient, for example

- Where significant and/or regular underpayments of Class 1 and Class 1A NICs have arisen in respect of one or more employees and, in the opinion of HMRC, the Class 1 and Class 1A NICs ought to have been accounted for in the calculation of the estimated Class 1 and Class 1A NICs provided for under these arrangements
- Where an employer fails to pay the Class 1 or Class 1A NICs on time and/or to ensure that returns are filed on time, such that a liability arises to pay interest and/or penalties.

28. We accept that as a result of a decision to cancel these arrangements, HMRC will require the strict operation of the payment of Class 1 and Class 1A NICs. Similarly, we reserve the right to cancel these arrangements and adopt the strict operation of Class 1 and Class 1A NICs.

29. We agree that a separate employer record will be opened with HMRC for this scheme in the name '[Company Name] (Appendix 7A)' under which we will

submit the NSR.

30. Cancellation by either party will be confirmed by written notice and will be effective from the following 6 April or an earlier date, as agreed by the parties. If a date cannot be agreed, cancellation will be effective on the earlier of the aforementioned 6 April or 3 months from the date when the written notice was given.

PAYE82004 - PAYE operation: international employments: EP appendix 7b: modified class 1 national insurance contributions (NICs) for employees assigned from the United Kingdom (UK) to work overseas [May 2013]

Application for modified NICs for expatriate employees from 6 April 20__

Employer name: ……..

Employer address: ……..

Employer PAYE reference: ……..

Part 1 - Scope of agreement

1. This application applies only to those employees who

a. Are employed by a UK employer and are assigned to work abroad for a period of limited duration, but for more than a complete tax year, and

b. Have an ongoing liability to UK National Insurance contributions (NICs) whilst abroad; and

c. Earn above the upper earnings limit (UEL) in every earnings period throughout the tax year. (I understand that it shall not invalidate this agreement if an employee earns less than the UEL in the pay period they join the company, or in the pay period in which they leave, if in all other pay periods during the year, the UEL is exceeded. However, in the case of employees with annual pay periods, covered by the agreement, their earnings must exceed the annual UEL); and

d. Not liable to UK tax on their earnings from employment; and

e. Receive some earnings and benefits derived from the employment from sources other than the UK employer.

Part 2 - Operation of agreement

2. We will calculate and pay Class 1 NICs on a best estimate of those elements of earnings that are subject to Class 1 NICs. At the beginning of each year, or if liability starts after the beginning of the year, in the month when NICs liability first occurs, we will prepare the best estimate. The best estimate will include all world-wide earnings paid from whatever source, including where relevant, annual salary, any cash bonus awards made to 5 April, and any non-cash benefits that attract Class 1 NICs liability.

3. We shall for every payment of estimated earnings calculated for each employee, complete and maintain a payroll record and include the details about the payment, the National Insurance category letter and NICs data items on a Full Payment Submission (FPS). The FPS must be submitted to Her Majesty's Revenue and Customs (HMRC) on or before the payment of regular earnings by the UK employer or no later than the 19th of the month following the end of the tax month where all earnings are paid by the overseas employer.

4. We will undertake an in-year review during the period December to 5 April to take account of any material changes and in particular, will ensure that amounts that are earnings, as defined in sections 3 and 4 of the Social Security Contributions and Benefits Act 1992, which

- Must be included in the computation of a person's earnings when assessing Class 1 NICs, and
- Are bonuses and / or NICs due on amounts which count as employment income in relation to employment-related securities to which sections 698 or 700 of the Income Tax (Earnings and Pensions) Act 2003 applies, for example, share related events

are accounted for.

We will update the Class 1 NICs payable immediately following the review and amend payroll records and

- When completing the next FPS for submission to HMRC, adjust the year to date NICs data items to show the revised values to date, and
- Adjust the next payment to HMRC if too much or too little NICs have been paid

Part 3 - Payment of Class 1 NICs to Her Majesty's Revenue and Customs

5. We undertake to pay to HMRC each month, the Class 1 NICs due on 1/12th of the total estimated earnings for the tax year. These payments will be made each month by the 19th or 22nd of the following month (depending upon our payment method).

6. Where the number of employees covered by this arrangement at any one time is 5 or fewer, we undertake to pay the Class 1 NICs due on 3/12ths of the total estimated earnings for the tax year, on or before the 19th or 22nd (depending upon the payment method) of July, October, January and April (the quarterly basis).

7. If the number of employees covered by this agreement increases to more than 5 at any one time in the course of the year, and is likely to remain at the higher level, we will make payments of estimated Class 1 NICs by the 19th or 22nd of each month from the start of the following year. If the number of employees covered by this agreement at any one time reduces to five or fewer in the course of the year, and is likely to remain at the lower level, we will make payments of estimated Class 1 NICs on the quarterly basis from the start of the following year.

8. If the NICs are paid in accordance with the terms of this agreement, late payment penalties under Schedule 56 of the Finance Act 2009, will not apply to payments under this arrangement. Schedule 56 penalties will be charged if the NICs due on the estimated earnings are not paid as specified in Parts 2 and 3 of this agreement.

Part 4 - Arrivals and departures

9. We will notify HMRC of our intention to include any new employees entering the agreement by providing details of the employees' departures from the UK. Similarly we will notify HMRC of our intention to exclude an employee from the agreement by providing details of the employee's return to the UK. We will make these notifications to HMRC in writing by the end of the relevant tax year.

10. We accept that in cases where an employee is repatriated to the UK before he/she has been overseas for a complete tax year and, as a result, his/her general earnings from the employment become chargeable to UK Income Tax, this agreement will no longer apply to that employee. In such cases, we will cease to use estimates in respect of all earnings paid and benefits received after the employee has returned to the UK, and use the statutory basis of calculating and returning both Class 1 and Class 1A NICs. We will carry out an exercise before the end of the tax year, to establish the correct amount of the earnings in the period covered by our earlier estimate.

For these employees we will include on a Full Payment Submission for every payment of earnings subject to Class 1 NICs paid after the employee returns to the UK and the NICs data items relating to each payment, on or before each payment is made to HMRC. For these same employees, no later than the 19th April following the end of the tax year we will

- Record the correct earnings and NICs details for the period before the employee returned to the UK on that employee's payroll records, and
- Send a Full Payment Submission to HMRC to adjust the year to date NICs totals for each category letter to show the correct details for the year.

Forms P60 will be given to the employees by 31 May after the end of each tax year.

If the correct figures for Class 1 NICs exceed our earlier estimates, we will pay the balance to HMRC with our final payment for the year. Where Class 1A NICs becomes payable, we will make a P11D(b) return and pay Class 1A by 19 July following the end of the tax year.

Part 5 - Employer annual return

11. Forms P60 will be given to the employees by 31 May after the end of each tax year.

Where an employee leaves the UK part way through a tax year, we will

- Calculate Class 1A NICs payable to the date the employee left the UK
- Send HMRC a P11D(b) by the 19 July following the end of the tax year, and (For 2012-13 and later years, this concession will be withdrawn and so the P11D(b) filing date will be 6 July)
- Pay HMRC any Class 1A NICs due by 19 July following the end of the tax year

Part 6 - Interest

12. We accept that, due to the inherent nature of the modified arrangements, over and underpayments of Class 1 NICs may arise compared with the amount of Class 1 NICs that would otherwise have been due if normal NICs procedures had been applied. Provided that the procedures outlined in these arrangements are followed, interest will not be charged in accordance with the NICs

regulations in respect of any residual Class 1 NICs liabilities as shown by the employer's 'NIC Settlement Return' - See Part 8. However, it is accepted that interest will run on any part of the NICs due on the estimated earnings to have been paid under this agreement which (depending upon the method of payment) reaches HMRC after the 19 or 22 of April following the end of the tax year.

13. It is accepted that if the payment of Class 1 NICs, due on estimated earnings payable by 19 or 22 April, is paid late, HMRC will charge interest on amounts paid late.

Part 7 - Impact of HMRC dispensation

14. We accept that the terms of a dispensation will not apply to employees who do not have a 'taxable employment' as defined in Part 2 of the Income Taxes (Earnings and Pensions) Act 2003. Therefore, the 'best estimate' will reflect the total amount of earnings liable to Class 1 NICs taking into account any payments that can be disregarded from Class 1 earnings under the provisions of Regulation 25 and Schedule 3 of the Social Security (Contributions) Regulations 2001.

Part 8 - Class 1A NICs

15. With the exception of paragraph 12 of this agreement, we understand that any benefits provided to employees covered by this agreement will not fall to be chargeable to income tax under ITEPA as 'general earnings', therefore, liability for Class 1A NICs will not arise.

Part 9 - Payment of residual Class 1 NICs liability - NIC Settlement Return

16. No later than 31 March following the end of the tax year we will carry out an exercise to establish the correct amount of Class 1 NICs due on all the employee's earnings, both from the UK and from abroad. We will calculate and pay to HMRC Class 1 NICs on the difference between the correct figures for the year and those figures that we submitted to HMRC on our Employer Annual Return. Payment of the Class 1 NICs will be made by 31 March following the end of the tax year concerned. Any additional Class 1 NICs payable will be shown on our 'NIC Settlement Return' (NSR).

17. We will set out in the NSR the correct Class 1 NICs due for the year for each employee covered by this agreement taking into account what has been paid previously under parts 3 and 7 of this agreement. We will send HMRC the NSR no later than 31 March following the end of the tax year in which earnings were paid.

18. We accept that where the additional Class 1 NICs found to be due are paid after 31 March following the end of the tax year, or errors in the NSR are discovered, interest and penalties will be charged in accordance with legislation.

Part 10 - Overpaid Class 1 NICs

19. We understand that, if we discover that Class 1 NICs have been overpaid in relation to the 'best estimate', we can complete the NSR to reflect any secondary (employers) Class 1 NICs overpaid. We can also claim a refund of any primary (employees) Class 1 NICs overpaid on the best estimate but only where

a. The Class 1 NICs were paid by the employer and have not been recovered from the employee, or
b. The Class 1 NICs are paid by the employer and recovered from the

employee, and then only if the employee mandates the repayment to the employer in writing.

20. We understand that, to claim the overpayment, the NSR must be submitted together with an application for a refund. This will be passed to HMRC Payment Reconciliation in the National Insurance Contributions and Employer Office for processing. We understand that under this agreement, we cannot recover overpayments by deducting the amounts from future payments to HMRC or offsetting overpayments in respect of one employee against underpayments in respect of another employee.

Part 11 - Statement

21. We acknowledge that HMRC reserve the right to review / cancel these arrangements as a result of changes in the law, or should operational difficulties arise, or the arrangements are seen to be deficient, for example, where

- Significant and/or regular underpayments of Class 1 NICs have arisen in respect of one or more employees and, in the opinion of HMRC, the Class 1 NICs ought to have been accounted for in the calculation of the estimated Class 1 NICs provided for under these arrangements
- An employer fails to pay the Class 1 NICs on time and/or to ensure that returns are filed on time such that a liability arises to pay interest and/or penalties.

22. We accept that, if a decision is made by HMRC to cancel these arrangements, HMRC will require the strict operation of the payment of Class 1 NICs. Similarly, we reserve the right to cancel these arrangements and adopt the strict operation of Class 1 NICs.

23. We agree that a separate employer record will be opened with HMRC for this scheme in the name '[Company Name] (Appendix 7B)' under which we shall submit the NSR.

24. Cancellation by either party will be confirmed by written notice and will be effective from the following 6 April, or such earlier date as is agreed by the parties. If a date cannot be agreed, cancellation will be effective on the earlier of the aforementioned 6 April or 3 months from the date when the written notice was given.

CHAPTER TWENTY FOUR

PENSION INCOME

24.1 Pension Income: Introduction

The taxation of pensions requires a book to itself.[1] In this chapter I focus the matters closest to the themes of this book.

The legislation is in part 9 ITEPA. After the usual outline in accordance with the principles of plain English drafting, there follows a cascade of definitions which need to be considered briefly.

24.1.1 *"Pension income"*

This term is defined in s.566(2) ITEPA:

> "Pension income" means the pensions, annuities and income of other types to which the provisions listed in subsection (4) apply.
> This definition applies for the purposes of the Tax Acts.

Section 566(4) sets out 13 categories of income:

These are the provisions referred to in subsection (2)—

Provision	Income	Chapter (of this Part)
Section 569	UK pensions	Chapter 3
Section 573	Foreign pensions	Chapter 4
Section 577	UK social security pensions	Chapter 5
Section 579A	Pensions under registered pension schemes	Chapter 5A
Section 609	Annuities for the benefit of dependants	Chapter 10
Section 610	Annuities under sponsored superannuation schemes	Chapter 10
Section 611	Annuities in recognition of another's services	Chapter 10
Section 615	Certain overseas government pensions paid in the UK	Chapter 11
Section 619	The House of Commons Members' Fund	Chapter 12
Section 629	Pre-1973 pensions paid under OPA 1973	Chapter 14
Section 633	Voluntary annual payments	Chapter 15
Section 636B	Pensions treated as arising from payment of trivial commutation lump sums and winding-up lump sums under registered pension schemes:	Chapter 15A

1 And indeed such a book has been written: Hardy, *Pensions Taxation* (1st ed, 2014).

Section 636C	Pensions treated as arising from payment of trivial commutation lump sum death benefits and winding-up lump sum death benefits under registered pension schemes:	Chapter 15A

Three of these categories are discussed here, those in chapters 3, 4, and 11, which I describe as UK pension, foreign pensions, and commonwealth government pensions.

24.1.2 *"Taxable pension income" and "Net taxable pension income"*

These terms are defined in s.567 ITEPA. "Net" taxable pension income brings in rules for deductions, not discussed here. "Taxable" pension income is a label which brings in a number of rules, for in the various situations where the statute desires to bring pension income into charge it provides that it is "taxable".

24.2 UK pension

Section 569 ITEPA provides:

> (1) This section applies to any pension[2] paid by or on behalf of a person who is in the UK.
> (2) But this section does not apply to a pension if any provision of Chapters 5 to 14 of this Part applies to it.

I refer to this as "**a UK pension**". Section 571 ITEPA provides:

> If section 569 applies, the taxable pension income for a tax year is the full amount of the pension accruing in that year irrespective of when any amount is actually paid.

Thus a UK pension is taxed on an arising basis.

24.3 Foreign pension

Section 573 ITEPA provides:

> (1) This section applies to any pension[3] paid by or on behalf of a

---

2 "Pension" for the taxation of UK pensions is defined in 570 ITEPA. The definition (perhaps for historic reasons) is different from the definition which applies for foreign pensions.

3 "Pension" for the taxation of foreign pensions is defined in 574 ITEPA. The definition (perhaps for historic reasons) is different from the definition which applies for UK pensions.

> person who is outside the UK to a person who is resident in the UK.
> (2) But this section does not apply to a pension if any provision of Chapters 5 to 14 of this Part applies to it.

I refer to this as **"a foreign pension"**.

Section 575(1) ITEPA provides:

> (1) [a] If section 573 applies, the taxable pension income for a tax year is the full amount of the pension income arising in the tax year,
> [b] but subject to subsections (1A)[split years] (2) [10% deduction] and (3) [remittance basis].

An arising basis taxpayer is allowed a 10% deduction from foreign pensions: s.575(2) ITEPA provides:

> [a] The full amount of the pension income arising in the tax year or, as the case may be, the UK part of the tax year is to be calculated on the basis that the pension is 90% of its actual amount,
> [b] unless as a result of subsection (3) the pension income is charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).

The wording is somewhat unmathematical but the meaning is clear. The 10% deduction was introduced when the remittance basis on foreign pensions was abolished (except for foreign domiciliaries) in 1974. It is difficult to see a good reason for it but presumably this was a political douceur to ease the restriction to the remittance basis, and which has survived ever since. The deduction does not apply to a remittance basis taxpayer whose pension is taxed on the remittance basis. One relief was thought to suffice; on the face of it that seems fair enough, though one might argue whether it is EU law compliant.[4] The individual may always choose to be taxed under an arising basis.

Section 575(3) ITEPA provides:

> That pension income is treated as relevant foreign income for the purposes of Chapters 2 and 3 of Part 8 of [ITTOIA] (relevant foreign income: remittance basis and deductions and reliefs).

The significance of treating the income as RFI is that the income can qualify for the remittance basis.

---

4 See 60.8.14 (Option to be treated as resident).

24.3.1 *Split year*

Section 575(1A) ITEPA provides:

> [a] If the person liable for the tax under this Part is an individual and the tax year is a split year as respects that individual, the taxable pension income for the tax year is the full amount of the pension income arising in the UK part of the year,
> [b] subject to subsections (2) [the 10% reduction] and (3) [the remittance basis] and section 576A [temporary non-residents].

24.4 Commonwealth government pensions

24.4.1 *"Commonwealth government pension"*

Section 615 ITEPA provides:

> (1) This section applies to a pension if conditions A, B and C are met.
> (2) Condition A is that the pension—
> (a) is payable—
> (i) to a person who has been employed in overseas government service, or
> (ii) to the widow, widower, surviving civil partner, child, relative or dependant of a person who has been employed in overseas government service, and
> (b) is payable in respect of that service.
> (3) Condition B is that the pension—
> (a) is payable in the UK, and
> (b) is payable to a person who is resident in the UK.
> (4) Condition C is that the pension is payable by or on behalf of the government of—
> (a) a country which forms part of Her Majesty's dominions,
> (b) any other country which is for the time being mentioned in Schedule 3 to the British Nationality Act 1981, or
> (c) any territory under Her Majesty's protection.
> (5) But condition C is not met if the pension is payable out of the public revenue of the UK or Northern Ireland.
> (6) In condition A the references to a person being employed in overseas government service are to the person being employed outside the UK—
> (a) in the service of the Crown, or
> (b) in service under the government of a country or territory which falls within subsection (4).
> (7) In this Chapter "pension" includes a pension which is paid

voluntarily or is capable of being discontinued.

The EI Manual provides:

> **74006. Certain overseas government pensions paid in the UK** [February 2006] ...
> ***Her Majesty's dominions***
> The Dependant Territories are:
> Anguilla, Bermuda, British Antarctic Territory, British Indian Ocean Territory, British Virgin Islands, Cayman Islands, Falkland Islands, Gibraltar, Montserrat, Pitcairn, Henderson, Ducie and Oeno Islands, St Helena, St Helena Dependencies (Ascension Island, Tristan da Cunha), South Georgia and South Sandwich Islands, Turks and Caicos Islands
> ***Countries listed in Schedule 3 BNA 1981***
> Antigua and Barbuda, Australia, The Bahamas, Bangladesh, Barbados, Belize, Botswana, Brunei, Canada, Republic of Cyprus, Dominica, Fiji, The Gambia, Ghana, Grenada, Guyana, India, Jamaica, Kenya, Kiribati, Lesotho, Malawi, Malaysia, Maldives, Malta, Mauritius, Namibia, Nauru, New Zealand, Nigeria, Pakistan, Papua New Guinea, Saint Christopher and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Seychelles, Sierra Leone, Singapore, Solomon Islands, South Africa, Sri Lanka, Swaziland, Tanzania, Tonga, Trinidad and Tobago, Tuvalu, Uganda, Vanuatu, Western Samoa, Zambia, Zimbabwe.
> ***Territories under Her Majesty's protection***
> There are no longer any protectorates or protected states. ...

I refer to pensions within this definition as "commonwealth government pensions" (though that is not a wholly accurate label).

24.4.2 *Taxation of commonwealth government pensions*

Section 616 ITEPA provides:

> If section 615 applies, the taxable pension income for a tax year is the full amount of the pension accruing in that year irrespective of when any amount is actually paid.

Section 617 ITEPA provides for the 10% deduction:

> A deduction of 10% is allowed from an amount of taxable pension income determined under section 616 (see section 567).

The remittance basis is not applicable, perhaps because the pensions are "payable within the UK" and so regarded as received here.

24.5 Double Taxation relief for pension income

Article 18 OECD Model Convention provides:

> Subject to the provisions of paragraph 2 of Article 19 [government service], pensions and other similar remuneration paid to a resident of a Contracting State in consideration of past employment shall be taxable only in that State.

Some pre-OECD model treaties confer relief only if the income is subject to tax in the foreign state; see 59.17 ("Subject to tax").

24.5.1 *Rationale for residence taxation*

Why does the OECD model opt for residence taxation rather than source taxation? The OECD commentary provides:

> 1. [1] According to this Article, pensions paid in respect of private employment are taxable only in the State of residence of the recipient. Various policy and administrative considerations support the principle that the taxing right with respect to this type of pension, and other similar remuneration, should be left to the State of residence.
> [2] For instance, the State of residence of the recipient of a pension is in a better position than any other State to take into account the recipient's overall ability to pay tax, which mostly depends on worldwide income and personal circumstances such as family responsibilities. This solution also avoids imposing on the recipient of this type of pension the administrative burden of having to comply with tax obligations in States other than that recipient's State of residence.

The arguments at [2] are invalid as they apply equally to every type of income, not just pensions. But the commentary later gives a better reason, the old difficulty of identifying the location of the source:

> 19. ... alternative provisions under which there is either exclusive or limited source taxation rights with respect to pensions require a determination of the State of source of pensions. Since a mere reference to a pension "arising in" a Contracting State could be construed as meaning either a pension paid by a fund established in that State or a pension derived from work performed in a State, States using such wording should clarify how it should be interpreted and applied.
> 19.1 Conceptually, the State of source might be considered to be the State in which the fund is established, the State where the relevant work has been performed or the State where deductions have been claimed. Each of these approaches would raise difficulties in the case of

> individuals who work in more than one State, change residence during their career or derive pensions from funds established in a State other than that in which they have worked. For example, many individuals now spend significant parts of their careers outside the State in which their pension funds are established and from which their pension benefits are ultimately paid. In such a case, treating the State in which the fund is established as the State of source would seem difficult to justify. The alternative of considering as the State of source the State where the work has been performed or deductions claimed would address that issue but would raise administrative difficulties for both taxpayers and tax authorities, particularly in the case of individuals who have worked in many States during their career, since it would create the possibility of different parts of the same pension having different States of source.

The OECD model offers the pragmatic solution, but it is not surprising that there is a wide variety of provisions in actual treaties. Some possibilities are discussed in the OECD commentary, but that is not set out here.

24.5.2 *"Pensions and other similar remuneration"*

The OECD commentary provides:

> 3. The types of payment that are covered by the Article include not only pensions directly paid to former employees but also to other beneficiaries (e.g. surviving spouses, companions or children of the employees) and other similar payments, such as annuities, paid in respect of past employment. The Article also applies to pensions in respect of services rendered to a State or a political subdivision or local authority thereof which are not covered by the provisions of paragraph 2 of Article 19.

24.5.3 *One-off payments*

The OECD commentary provides:

> 4. Various payments may be made to an employee following cessation of employment. Whether or not such payments fall under the Article will be determined by the nature of the payments, having regard to the facts and circumstances in which they are made, as explained in the following two paragraphs.
> 5. While the word "pension", under the ordinary meaning of the word, covers only periodic payments, the words "other similar remuneration" are broad enough to cover non-periodic payments. For instance, a lump-sum payment in lieu of periodic pension payments that is made on or after cessation of employment may fall within the Article.

24.5.4 *"Pension income or employment income?"*

The OECD commentary provides:

> 6. Whether a particular payment is to be considered as other remuneration similar to a pension or as final remuneration for work performed falling under Article 15 is a question of fact. For example, if it is shown that the consideration for the payment is the commutation of the pension or the compensation for a reduced pension then the payment may be characterised as "other similar remuneration" falling under the Article. This would be the case where a person was entitled to elect upon retirement between the payment of a pension or a lump-sum computed either by reference to the total amount of the contributions or to the amount of pension to which that person would otherwise be entitled under the rules in force for the pension scheme. The source of the payment is an important factor; payments made from a pension scheme would normally be covered by the Article. Other factors which could assist in determining whether a payment or series of payments fall under the Article include: whether a payment is made on or after the cessation of the employment giving rise to the payment, whether the recipient continues working, whether the recipient has reached the normal age of retirement with respect to that particular type of employment, the status of other recipients who qualify for the same type of lump-sum payment and whether the recipient is simultaneously eligible for other pension benefits. Reimbursement of pension contributions (e.g. after temporary employment) does not constitute "other similar remuneration" under Article 18. Where cases of difficulty arise in the taxation of such payments, the Contracting States should solve the matter by recourse to the provisions of Article 25 [mutual agreement].

24.5.5 *Social security income*

The OECD commentary provides:

> 24. Depending on the circumstances, social security payments can fall under this Article as "pensions and other similar remuneration in consideration of past employment", under Article 19 as "pension[s] paid by, or out of funds created by, a Contracting State [...] in respect of services rendered to that State..." or under Article 21 as "items of income [...] not dealt with in the foregoing Articles". Social security pensions fall under this Article when they are paid in consideration of past employment, unless paragraph 2 of Article 19 applies (see below). A social security pension may be said to be "in consideration of past employment" if employment is a condition for that pension. For instance,

this will be the case where, under the relevant social security scheme:
— the amount of the pension is determined on the basis of either or both the period of employment and the employment income so that years when the individual was not employed do not give rise to pension benefits,
— the amount of the pension is determined on the basis of contributions to the scheme that are made under the condition of employment and in relation to the period of employment, or
— the amount of the pension is determined on the basis of the period of employment and either or both the contributions to the scheme and the investment income of the scheme.

25. Paragraph 2 of Article 19 will apply to a social security pension that would fall within Article 18 except for the fact that the past employment in consideration of which it is paid constituted services rendered to a State or a political subdivision or a local authority thereof, other than services referred to in paragraph 3 of Article 19.

26. Social security payments that do not fall within Articles 18 or 19 fall within Article 21. This would be the case, for instance, for payments made to self-employed persons as well as a pension purely based on resources, on age or disability which would be paid regardless of past employment or factors related to past employment (such as years of employment or contributions made during employment).

24.5.6 *"In consideration of past employment"*

The OECD commentary provides:

3... The Article only applies, however, to payments that are in consideration of past employment; it would therefore not apply, for example, to an annuity acquired directly by the annuitant from capital that has not been funded from an employment pension scheme. The Article applies regardless of the tax treatment of the scheme under which the relevant payments are made; thus, a payment made under a pension plan that is not eligible for tax relief could nevertheless constitute a "pension or other similar remuneration" (the tax mismatch that could arise in such a situation is discussed below)...

7. Since the Article applies only to pensions and other similar remuneration that are paid in consideration for past employment, it does not cover other pensions such as those that are paid with respect to previous independent personal services. Some States, however, extend the scope of the Article to cover all types of pensions, including Government pensions; States wishing to do so are free to agree bilaterally to include provisions to that effect.

24.6 UK/Australia DTA

Article 17(1) of the UK/Australia Convention provides:

> Pensions (including government pensions) and annuities paid to a resident of a Contracting State shall be taxable only in that State.

The Australian Revenue have given two rulings concerning compensation payments.

> **Income tax: are periodic workers' compensation payments made by Comcare, 'pensions' for purposes of the pensions articles in Australia's double taxation agreements?**
> 1. Yes. The term 'pension' is not defined in any of the DTAs and therefore takes the meaning it has under domestic law. A pension is defined in the Macquarie Dictionary as '1. a fixed periodical payment made in consideration of past services, injury or loss sustained, merit, poverty etc. 2. an allowance or annuity.' The meaning of the term 'pension' was considered by Hill J. in the Federal Court in *Tubemakers of Aust Ltd v FC of T* 93 ATC 4207. His Honour concluded that the essential characteristic of a pension is only that there be periodical payments. Payments made by Comcare under [a statutory compensation scheme] are fixed periodical payments made in consideration of injury or loss of wages. They are therefore pensions within the ordinary meaning of that term and fall within the operation of the Pensions Article in Australia's DTAs.
> 2. Under Australia's DTAs, pensions paid by the Australian Government are generally included in the Pensions Article and are taxable only in the country of residence of the recipient. Although, in some DTAs, government pensions paid in respect of services rendered to that government are dealt with under the Government Services Article rather than the Pensions Article, this does not affect the treatment of Comcare payments made under section 19. This is because the Comcare payments are made in consideration of injury or loss of wages and not for past services to the Government.[5]

The second ruling is as follows:

> **Facts** A non-resident individual (the taxpayer) who is a UK resident for the purposes of the [Australia] UK Convention, received loss of earnings

5 TD 93/151
http://law.ato.gov.au/atolaw/view.htm?docid=TXD/TD93151/NAT/ATO/00001

payments from Australia as a result of injury suffered in a transport accident in the State of Victoria.
The payments comprised weekly statutory compensation payments [under a statutory compensation scheme]... for loss of income due to the injury.
The payments are calculated by reference to the recipient's pre-accident earnings.
Reasons for Decision
[The ruling cites art.17 of the DTA and continues:] Therefore, pensions paid from Australia to an individual who is a resident of the UK shall be taxable only in the UK.
Article 3(3) of the UK Convention provides that any term not defined in the Convention shall, unless the context requires otherwise, have the meaning it has under the domestic laws in respect of the taxes to which the Convention applies.[6] The term 'pension' is not defined in the UK Convention or in Australia's domestic taxation law.
[The statement referred to the authorities cited in Taxation Determination TD 93/151 and continued:]
The loss of earnings payments made under [the statutory compensation scheme] have the essential characteristic of a 'pension' as per Hill J. in *Tubemakers* and fall within the Macquarie dictionary definition of 'pension' as they are fixed periodic payments made in consideration of injury or loss sustained. Accordingly, the periodic compensation payments made to the taxpayer ... are a 'pension' for the purposes of the Pension Article of the UK Convention.
Therefore, the Pension Article applies to give the UK, as the country of residence of the taxpayer, sole taxing rights over the compensation payments.[7]

It is different if the OECD model wording is used, which only applies to pensions "in consideration of past employment".

24.7 US/UK DTA

24.7.1 *"Pension scheme"*

Article 3(1)(o) of the US/UK DTA defines "pension scheme":

> the term "pension scheme" means any plan, scheme, fund, trust or other

6 Author's footnote: this is OECD model form; see 57.11 (Undefined terms have domestic law meanings).

7 ATO ID 2008/145.

arrangement established in a Contracting State which is—
(i) generally exempt from income taxation in that State; and
(ii) operated principally to administer or provide pension or retirement benefits or to earn income for the benefit of one or more such arrangements.

The DTA Exchange of Notes provides:

With reference to sub-paragraph (o) of paragraph 1 of Article 3 (General definitions)—
it is understood that pension schemes shall include the following and any identical or substantially similar schemes which are established pursuant to legislation introduced after the date of signature of the Convention—
(a) under the law of the United Kingdom,
[i] employment-related arrangements (other than a social security scheme) approved as retirement benefit schemes for the purposes of Chapter I of Part XIV of ICTA 1988, and
[ii] personal pension schemes approved under Chapter IV of Part XIV of that Act; and
(b) under the law of the United States,
[i] qualified plans under section 401(a) of the Internal Revenue Code,
[ii] individual retirement plans (including
[A] individual retirement plans that are part of a simplified employee pension plan that satisfies section 408(k),
[B] individual retirement accounts,
[C] individual retirement annuities,
[D] section 408(p) accounts, and Roth IRAs under section 408A),
[iii] section 403(a) qualified annuity plans, and
[iv] section 403(b) plans.

The requirement that a pension fund must be "established in" a treaty state requires some nexus between the pension fund and the state, but what that nexus is not stated.

The Tribunal has held that the world bank pension scheme was not "established in" the US:

105. ... the contracting parties meant by the phrase 'established in' a Contracting State the concept of being established under and in conformity with the relevant Contracting State's tax legislation relating to pension schemes.
106. This provides a sensible and workable definition in accordance

> with what we discern as the purpose of the provision, which is to recognise the special categories of pension scheme to which the Contracting States have chosen to give exemption from income taxation under their respective domestic laws because they are schemes operated principally to administer or provide pension or retirement benefits, etc. The exemption from income taxation in the USA which the SRP enjoys does not, we are satisfied, arise from its status as a pension scheme, but from the relevantly unconnected privileges and indemnities enjoyed by the World Bank....
>
> 108. We do not accept that the SRP has a sufficient legal nexus with the USA to support the case that it is 'established in' the USA for relevant purposes. This conclusion follows from our finding above that a US court would not have jurisdiction to exercise primary supervision over the administration of the SRP by virtue of the 'safe harbor' provisions or otherwise....
>
> 110. We do not accept that the purpose of the exemption under article 17(1)(b) of the DTA is to provide equal treatment for pensioners resident in either Contracting State with regard to the taxation of pension income. It is, as we discern it, to give exemption in both Contracting States to pension income which the parties to the DTA have chosen to exempt from income taxation under their respective domestic laws because they are schemes operated principally to administer or provide pension or retirement benefits, etc.[8]

The Australian Revenue takes a more formal approach on whether a fund is "established in Australia" for the purposes of Australian legislation:

> 100. ... there appears to be no case law which provides guidance on the location of the establishment of a superannuation fund. In the absence of such guidance, it is considered that a superannuation fund will be established in Australia when the initial contribution that establishes the fund is paid to and accepted by the trustee in Australia.[9] It is not necessary that the deed for the fund is signed and executed in Australia. Whether the initial contribution to establish the fund occurred in Australia is a question of fact which is determined by reference to the circumstances of each case.

---

8 *Macklin v HMRC* [2014] SFTD 290. The position will need to be reviewed when the case is final.

9 Footnote original: Those superannuation schemes that are established by or under the law of the Commonwealth, or of a State or Territory - see paragraph (a) of the definition of 'public sector superannuation scheme' in section 10 of the SISA - are established in Australia.

101. If there is a situation where the initial contribution to establish the fund occurred outside Australia, notwithstanding that one or more of the signatories executed the deed in Australia, the fund will not be established in Australia.[10]

The DT Manual provides:

19876B. Pension Contribution [September 2011]
The term "pension scheme" is defined for the purposes of the treaty at Article 3(1)(o). This means that Treaty benefits are for approved schemes only. As section 615 ICTA 1988 schemes, which are UK established trusts for non-residents, are not approved they do not come within the definition of "pension scheme" in Article 3(1)(o) because they are not "generally exempt from income taxation in that State". They are therefore not included in the list in the Exchange of Notes.
So called US section 401(k) plans are included within the definition of a pension scheme as they are within the definition of a pension scheme in Article 3(1)(o) because they are a type of section 401(a) plan.

24.7.2 *Pension taxed in residence state*

Article 17(1) of the US/UK DTA provides:

(1) (a) Pensions and other similar remuneration beneficially owned by a resident of a Contracting State shall be taxable only in that State.

The DTA Exchange of Notes provides:—

With reference to paragraph 1 of Article 17 ... it is understood that a payment shall be treated as a pension or other similar remuneration under paragraph 1 of Article 17 if it is a payment under a pension scheme as defined in sub-paragraph (o) of paragraph 1 of Article 3 (General definitions) of the Convention.

---

10 Taxation Ruling TR 2008/9, "Income tax: meaning of 'Australian superannuation fund' in subsection 295-95(2) of the Income Tax Assessment Act 1997" *http://law.ato.gov.au/atolaw/view.htm?DocID=TXR/TR20089/NAT/ATO/00001&PiT=99991231235958*

24.7.3 *Mutual recognition of pension tax exemption*

Article 17(1) of the US/UK DTA continues:

> (b) Notwithstanding sub-paragraph (a) of this paragraph, the amount of any such pension or remuneration paid from a pension scheme established in the other Contracting State that would be exempt from taxation in that other State if the beneficial owner were a resident thereof shall be exempt from taxation in the first-mentioned State.

To make it easier to follow which state is which, this could be paraphrased:

> (b) ... the amount of any such pension or remuneration paid from a pension scheme established in [the USA] that would be exempt from taxation in [the USA] if the beneficial owner were a resident [of the USA] shall be exempt from taxation in [the UK].

The US Department of the Treasury Technical Explanation of the Convention[11] provides:

> ... Thus, for example, a distribution from a U.S. "Roth IRA" to a U.K. resident would be exempt from tax in the United Kingdom to the same extent the distribution would be exempt from tax in the United States if it were distributed to a U.S. resident. The same is true with respect to distributions from a traditional IRA to the extent that the distribution represents a return of non-deductible contributions. Similarly, if the distribution were not subject to tax when it was "rolled over" into another U.S. IRA (but not, for example, to a U.K. pension scheme), then the distribution would be exempt from tax in the United Kingdom.

24.7.4 *Savings clause*

The US Department of the Treasury Technical Explanation of the Convention[12] provides:

> Subparagraph 1(a) is subject to the saving clause of paragraph 4 of Article 1 (General Scope)[13] while subparagraph 1(b) is not, by reason of the exception in subparagraph 5(a) of Article 1. Thus, a U.S. citizen who is a resident of the United Kingdom and receives a pension will be subject to U.S. tax on the payment, notwithstanding the rules in those

---

11 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

12 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

13 See 59.15.1 (US/UK DTA: Savings clause).

> paragraphs that give the State of residence of the recipient the exclusive taxing right. However, a U.S. citizen who receives a distribution from a pension scheme established in the United Kingdom will be taxable on only the portion of the pension distribution that is taxable in the United Kingdom.
>
> Paragraphs 2 and 4 of Article 17 also are subject to the saving clause. Accordingly, a U.S. citizen who is a resident of the United Kingdom will be subject to U.S. tax on a lump-sum distribution from a pension scheme or an annuity, notwithstanding the rules in those paragraphs that give exclusive taxation rights to the State of source or residence, as the case may be. Paragraphs 3 and 5 are exceptions to the saving clause. Accordingly, a U.S. citizen who is a resident of the United Kingdom will not be subject to U.S. tax on any U.S. social security benefits, child support payments or alimony.

24.7.5 *Lump Sums*

Article 17(2) of the US/UK DTA continues:

> Notwithstanding the provisions of paragraph 1 of this Article, a lump-sum payment derived from a pension scheme established in a Contracting State and beneficially owned by a resident of the other Contracting State shall be taxable only in the first-mentioned State.

It may be easier to keep track of this by identifying the states expressly. In the case of a UK resident:

> ... a lump-sum payment derived from a pension scheme established in [the USA] and beneficially owned by a resident of [the UK] shall be taxable only in [the USA].

In the case of a US resident:

> ... a lump-sum payment derived from a pension scheme established in [the UK] and beneficially owned by a resident of [the USA] shall be taxable only in [the UK].

The US Department of the Treasury Technical Explanation of the Convention[14] provides:

> Paragraph 2 is intended to deal with a particular type of double non-taxation that arose under the prior Convention because the United Kingdom does not tax lump-sum distributions from pension funds. Under

14 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

> the prior Convention, a lump-sum payment was treated in the same way as any other pension, and was taxable only in the country of residence of the beneficial owner. Accordingly, a person who anticipated receiving a lump-sum distribution from a U.S. pension scheme with respect to employment in the United States could avoid U.S. withholding tax on the distribution by establishing residence in the United Kingdom for the year in which he received the distribution. The person would not be subject to tax in either the United States or the United Kingdom with respect to the lump-sum distribution, resulting in a significant windfall.
> Paragraph 2 prevents this unanticipated benefit by providing that, notwithstanding the exclusive residence-country taxation of paragraph 1, any lump-sum payment derived by a resident of a Contracting State from a pension scheme established in the other Contracting State shall be taxable in that other State.

The US Department of the Treasury Technical Explanation of the Convention[15] provides:

> Paragraphs 2 and 4 of Article 17 also are subject to the saving clause. Accordingly, a U.S. citizen who is a resident of the United Kingdom will be subject to U.S. tax on a lump-sum distribution from a pension scheme or an annuity, notwithstanding the rules in those paragraphs that give exclusive taxation rights to the State of source or residence, as the case may be.

The DTR Manual provides:

> **19876A. Pensions from 2003** [September 2011]
> ***Lump Sums***
> Under the old Agreement, a lump-sum payment from a pension scheme was taxable only in the country of residence. So if an individual moved from the US to the UK before receiving a lump sum from a US pension scheme, they would be taxable on the lump sum neither in the US (because of the treaty) nor in the UK (which does not tax lump sums anyway).
> The new provision prevents this occurring by providing that a lump-sum payment derived by a resident of one State from a pension scheme established in the other State shall be taxable only in that other State.
> The provision preserves the exemption from income tax of a lump sum relevant benefit where it is paid by a UK approved pension scheme to a beneficial owner who is a US resident. However, Article 1(4) will apply

15 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

in respect of US citizens as the provisions of Article 17(2) are not amongst those listed at Article 1(5). So the US are able to tax lump sums received by US citizens from UK schemes.

The minutes of the Joint Forum on Expatriate Tax and NICs provides:

UK tax charges and transfers to US

Question: It is common practice for funds to be transferred between US pension schemes, particularly from a 401(k) to an IRA (individual retirement account). Although it is not necessarily a requirement, most people transfer their pension savings when they move employment.

Article 18(1) of the UK/US double taxation convention provides: "Where an individual who is a reside nt of a Contracting State is a member or beneficiary of, or participant in, a pension scheme established in the other Contract ing State, income earned by the pension scheme may be taxed as income of that individual only when, and, subject to paragraphs 1 and 2 of Article 17 (Pensions, Social Security, Annuities, Alimony, and Child Support) of this Convention, to the extent that, it is paid to, or fo r the benefit of, that individual from the pension scheme (and not transferred to another pension scheme)."

Where Article 18(1) is otherwise in point, is it HMRC's position that any unauthorised payments charge applies to the whole of the UK tax- relieved contributions deemed to be transferred to the IRA, treating those as transferred in priority to any fund income, or does Article 18(1) somehow confer total or partial exemption from this charge (if so, how)? The cumulative rate of charge on UK tax-relieved contributions (unauthorised payment charge and surcharge) is 55%, which is more than the tax relief originally given on the contributions. Does this mean that part of the tax represents a charge on fund growth, which would be prevented by Article 18(1) if the treaty is allowed to have any application to Schedule 34 Finance Act 2004 charges? Or is Article 17 the provision that would relate to a transfer from a 401(k) to an IRA?

HMRC answer: The provisions of the UK/US double taxation convention will not apply where both the individual and the pension scheme are in the US. Where a member of a US pension scheme is resident in the UK and receives UK tax relief on their pension savings t hat part of their pension savings will be subject to the provisions of Schedule 34 Finance Act 2004 (the member payment provisions). If a transfer is made between a 401(k) and an IRA and the IRA is not a qualifying recognised overseas pension scheme (QROPS), the transfer will be an unauthorised payment. Any tax charge will be on the UK element of the pension savings and not to the investment growth in relation to the contributions. The wording of Article 18 refers to "income earned by the pension scheme" (in this case the US

401(k)). However, the inco me earned by the pension scheme would not be subject to UK tax charges. We do not see a transfer between pension schemes as being within Article 17 of the UK/US double taxation convention.[16]

24.8 US/UK DTA Pension Contributions

24.8.1 *Income accruing to pension schemes*

Article 18 of the US/UK DTA provides:

> (1) Where an individual who is a resident of a Contracting State is a member or beneficiary of, or participant in, a pension scheme established in the other Contracting State, income earned by the pension scheme may be taxed as income of that individual only when, and, subject to paragraphs 1 and 2 of Article 17 (Pensions, social security, annuities, alimony, and child support) of this Convention, to the extent that, it is paid to, or for the benefit of, that individual from the pension scheme (and not transferred to another pension scheme).

The US Department of the Treasury Technical Explanation of the Convention[17] provides:

> Paragraph 1 provides that if a resident of a Contracting State participates in a pension scheme established in the other Contracting State, the State of residence will not tax the income of the pension scheme with respect to that resident until a distribution is made from the pension scheme. Thus, for example, if a U.S. citizen contributes to a U.S. qualified plan while working in the United States and then establishes residence in the United Kingdom, paragraph 1 prevents the United Kingdom from taxing currently the plan's earnings and accretions with respect to that individual. When the resident receives a distribution from the pension scheme, that distribution may be subject to tax in the State of residence, subject to paragraphs 1 and 2 of Article 17 (Pensions, Social Security, Annuities, Alimony, and Child Support).

The US Department of the Treasury Technical Explanation of the Convention[18] provides:

---

16 29 January 2014 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf*

17 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

18 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

> Paragraph 1 is not subject to the saving clause of paragraph 4 of Article 1 (General Scope) by reason of the exception in subparagraph 5(a) of Article 1. Accordingly, a U.S. citizen who is a resident of the United Kingdom will not be subject to tax in the United States on the earnings and accretions of a U.K. pension fund with respect to that U.S. citizen.

The DTR Manual provides:

> **19876A. Pensions from 2003** [September 2011]
> ***IRAs***
> ...An IRA is a trust (or similar arrangement known as a custodial account) set up for the exclusive benefit of the taxpayer and, on his death, nominated beneficiaries, which satisfies certain conditions imposed by United States tax law. Contributions to an IRA are tax deductible in the United States and the funds can be invested in a wide range of investments. IRA funds can be withdrawn at any time, but if withdrawals are made before the taxpayer reaches the age of 59½ he must pay an additional penalty tax of 10% unless he is disabled.
> ...
> ***IRAs: Year 2003/04 et seq.***
> ... The new Agreement ... will mean that no liability will arise until it would have done so under US tax law. Under US law, this will be when distributions are made. As indicated above, this will generally not be before age 59½ but must be before age 70½. The important point to note is that income will no longer be assessable in the UK on the basis of income arising within the IRA.. Any case of doubt or difficulty should be referred to HMRC, Customs & International, Tax Treaty Team.

The taxation of the pension scheme itself is outside the scope of this book, but note that the term "person" is, unusually, defined in the DTA to include pension schemes and employee benefit trusts and arrangements.

24.8.2 *Relief for contribution to pension scheme*

Article 18 of the US/UK DTA provides:

> (2) Where an individual who is a member or beneficiary of, or participant in, a pension scheme established in a Contracting State exercises an employment or self-employment in the other Contracting State—
>
> (a) contributions paid by or on behalf of that individual to the pension scheme during the period that he exercises an employment or self-employment in the other State shall be deductible (or excludable) in computing his taxable income in that other State; and

(b) any benefits accrued under the pension scheme, or contributions made to the pension scheme by or on behalf of the individual's employer, during that period shall not be treated as part of the employee's taxable income and any such contributions shall be allowed as a deduction in computing the business profits of his employer in that other State.

The reliefs available under this paragraph shall not exceed the reliefs that would be allowed by the other State to residents of that State for contributions to, or benefits accrued under, a pension scheme established in that State.

The US Department of the Treasury Technical Explanation of the Convention[19] provides:

> Paragraph 2 provides certain benefits with respect to cross-border contributions to a pension scheme, subject to the limitations of paragraphs 3 and 4 of the Article. It is irrelevant for purposes of paragraph 2 whether the participant establishes residence in the State where the individual renders services (the "host State"). The benefits provided in paragraph 2 are similar to the benefits the U.S. Model provides with respect to contributions.
>
> Subparagraph (a) of paragraph 2 allows an individual who exercises employment or self-employment in a Contracting State to deduct or exclude from income in that Contracting State contributions made by or on behalf of the individual during the period of employment or self-employment to a pension scheme established in the other Contracting State. Thus, for example, if a participant in a U.S. qualified plan goes to work in the United Kingdom, the participant may deduct or exclude from income in the United Kingdom contributions to the U.S. qualified plan made while the participant works in the United Kingdom. Subparagraph (a), however, applies only to the extent of the relief allowed by the host State (e.g., the United Kingdom in the example) for contributions to a pension scheme established in that State.
>
> Subparagraph (b) of paragraph 2 provides that, in the case of employment, accrued benefits and contributions by or on behalf of the individual's employer, during the period of employment in the host State, will not be treated as taxable income to the employee in that State. Subparagraph (b) also allows the employer a deduction in computing business profits in the host State for contributions to the plan. For example, if a participant in a U.S. qualified plan goes to work in the United Kingdom, the participant's

19 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

> employer may deduct from its business profits in the United Kingdom contributions to the U.S. qualified plan for the benefit of the employee while the employee renders services in the United Kingdom.
> As in the case of subparagraph (a), subparagraph (b) applies only to the extent of the relief allowed by the host State for contributions to pension schemes established in that State. Therefore, where the United States is the host State, the exclusion of employee contributions from the employee's income under this paragraph is limited to elective contributions not in excess of the amount specified in section 402(g). Deduction of employer contributions is subject to the limitations of sections 415 and 404. The section 404 limitation on deductions is calculated as if the individual were the only employee covered by the plan.

The US Department of the Treasury Technical Explanation of the Convention[20] provides:

> Paragraph 2 is not subject to the saving clause by reason of subparagraph 5(b) of Article 1. Accordingly, the benefits of paragraph 2 will be available to residents of the United States who are not citizens of the United States nor admitted for permanent resident ("green card" holders) in the United States.

The DT Manual provides:

> **19876B. Pension Contribution** [September 2011]
> ...It is a feature of several UK treaties from 2003 onwards that pension contributions made in one country are recognised for tax purposes in the other.
> The general premise of these is that if a member of a pension scheme established in one country goes to work (as an employee or in a self-employed capacity) in the other country, the state of residence will not tax the scheme member on income earned by the scheme unless it is paid to him (or for his benefit). Nor will tax be payable if income is transferred to another pension scheme until the benefits are actually received.
> Under the new Agreement, contributions to the scheme by that member (or those paid on his behalf) will be tax-deductible in the state of residence. In the same way, benefits accrued under the scheme, or employer contributions to the scheme, will not be treated as part of his taxable income and those contributions will be tax-deductible for the

20 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

employer. The reliefs available cannot exceed those allowed by the state of residence for contributions of the same amount to a scheme established in the state of residence.

The conditions for getting the relief are as follows

- contributions were made by or on behalf of the individual or (in the case of an employee) his employer to the pension scheme (or to a similar scheme for which it was substituted) before the individual began to exercise an employment or self-employment in the other contracting state, and
- the competent authority of the other State agrees that the pension scheme generally corresponds to a pension scheme established in that other State.

Where someone comes to work in the UK we will regard the first condition as having been met if the individual was a member of the US scheme before beginning to exercise an employment or self-employment in the UK.

The types of scheme that would be accepted as "generally corresponding" are those listed in the Exchange of Notes.

24.8.3 *Restriction on pension contribution relief*

Article 18 of the US/UK DTA provides:

> (3) The provisions of paragraph 2 of this Article shall not apply unless—
>
> (a) contributions by or on behalf of the individual, or by or on behalf of the individual's employer, to the pension scheme (or to another similar pension scheme for which the first-mentioned pension scheme was substituted) were made before the individual began to exercise an employment or self-employment in the other State; and
>
> (b) the competent authority of the other State has agreed that the pension scheme generally corresponds to a pension scheme established in that other State.

The DTA Exchange of Notes provides:

> With reference to sub-paragraph (b) of paragraph 3 and sub-paragraph (d) of paragraph 5 of Article 18 (Pension schemes)—
>
> it is understood that the pension schemes listed with respect to a Contracting State in this exchange of notes in connection with sub-paragraph (o) of paragraph 1 of Article 3 (General definitions) shall generally correspond to the pension schemes listed in this exchange of notes with respect to the other Contracting State.

The US Department of the Treasury Technical Explanation of the

Convention[21] provides:

> Paragraph 3 limits the availability of benefits under paragraph 2. Under subparagraph (a) of paragraph 3, paragraph 2 does not apply to contributions to a pension scheme unless the participant already was contributing to the scheme, or his employer already was contributing to the scheme with respect to that individual, before the individual began exercising employment in the State where the services are performed (the "host State"). This condition would be met if either the employee or the employer was contributing to a scheme that was replaced by the scheme to which he is contributing. The rule regarding successor schemes would apply if, for example, the employer has been taken over by a company that replaces the existing scheme with its own scheme, rolling membership in the old scheme over into the new scheme.
> In addition, under subparagraph (b) of paragraph 3, the competent authority of the host State must determine that the recognized plan to which a contribution is made in the other Contracting State generally corresponds to the plan in the host State. According to the notes, it is understood for this purpose that U.S. pension schemes eligible for the benefits of paragraph 2 include qualified plans under section 401(a), individual retirement plans (including individual retirement plans that are part of a simplified employee pension plan that satisfies section 408(k)), individual retirement accounts, individual retirement annuities, section 408(p) accounts and Roth IRAs under section 408A), section 403(a) qualified annuity plans, and section 403(b) plans.

24.8.4 *Interaction of pension contribution relief and with remittance basis*

Article 18 of the US/UK DTA provides:

> (4) Where, under sub-paragraph (a) of paragraph 2 of this Article, contributions to a pension scheme are deductible (or excludable) in computing an individual's taxable income in a Contracting State and, under the laws in force in that State, the individual is subject to tax in that State, in respect of income, profits or gains, by reference to the amount thereof which is remitted to or received in that State and not by reference to the full amount thereof, then the relief that would otherwise be available to that individual under that sub-paragraph in respect of such contributions shall be reduced to an amount that bears the same proportion to that relief as the amount of the income, profits or gains in respect of which the individual is subject to tax in that State bears to the

21 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

amount of the income, profits or gains in respect of which he would be subject to tax if he were so subject in respect of the full amount thereof and not only in respect of the amount remitted to or received in that State.

The US Department of the Treasury Technical Explanation of the Convention[22] provides:

Paragraph 4 limits the availability of benefits under paragraph 2 of this article. Paragraph 4 provides a special rule in cases where income dealt with by the Convention is taxable to a resident of a Contracting State only if and to the extent it is remitted to or received by that person. In such cases, paragraph 4 reduces proportionately the deduction or exclusion of contributions to a pension scheme under subparagraph (a) of paragraph 2 based upon the amount of income subject to tax in the State of residence. Although this rule is written in bilateral fashion, it presently applies to residents of the United Kingdom only, because the United States does not tax on a remittance basis. Paragraph 4 would apply, for example, if a U.S. citizen resident in the United Kingdom earns income in the United States that is not subject to tax in the United Kingdom because the income is not remitted to the United Kingdom. In this case, paragraph 4 would reduce proportionately the amount of any deduction or exclusion allowed in the United Kingdom to the U.S. citizen by subparagraph (a) of paragraph 2 for contributions to a U.S. pension scheme.

The DT Manual provides:

19876B. Pension Contribution [September 2011]
...Relief will be restricted where contributions to a pension scheme are deductible or excludable in computing a person's taxable income in the host country if he is subject to tax there not on his total income but only on amounts remitted to that country. Relief is available only on a corresponding proportion of the pension contributions.

An example

Individual's total income, profits and gains	£100,000
Income, profits and gains remitted to the UK	£90,000
Individual's contributions to US pension scheme	£5,000

Contributions deductible in computing individual's UK taxable income - £4,500 (i.e. 90% of individual's total contributions).

22 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

24.8.5 *Cross border pension contribution relief*

Article 18 of the US/UK DTA provides:

> (5)(a) Where a citizen of the United States who is a resident of the United Kingdom exercises an employment in the United Kingdom the income from which is taxable in the United Kingdom and is borne by an employer who is a resident of the United Kingdom or by a permanent establishment situated in the United Kingdom, and the individual is a member or beneficiary of, or participant in, a pension scheme established in the United Kingdom,
>
> (i) contributions paid by or on behalf of that individual to the pension scheme during the period that he exercises the employment in the United Kingdom, and that are attributable to the employment, shall be deductible (or excludable) in computing his taxable income in the United States; and
>
> (ii) any benefits accrued under the pension scheme, or contributions made to the pension scheme by or on behalf of the individual's employer, during that period, and that are attributable to the employment, shall not be treated as part of the employee's taxable income in computing his taxable income in the United States.
>
> This paragraph shall apply only to the extent that the contributions or benefits qualify for tax relief in the United Kingdom.
>
> (b) The reliefs available under this paragraph shall not exceed the reliefs that would be allowed by the United States to its residents for contributions to, or benefits accrued under, a generally corresponding pension scheme established in the United States.
>
> (c) For purposes of determining an individual's eligibility to participate in and receive tax benefits with respect to a pension scheme established in the United States, contributions made to, or benefits accrued under, a pension scheme established in the United Kingdom shall be treated as contributions or benefits under a generally corresponding pension scheme established in the United States to the extent reliefs are available to the individual under this paragraph.
>
> (d) This paragraph shall not apply unless the competent authority of the United States has agreed that the pension scheme generally corresponds to a pension scheme established in the United States.

The US Department of the Treasury Technical Explanation of the

Convention[23] provides:

> Paragraph 5 generally provides U.S. tax treatment for certain contributions by or on behalf of U.S. citizens resident in the United Kingdom to pension schemes established in the United Kingdom that is comparable to the treatment that would be provided for contributions to U.S. schemes. Under subparagraph (a) of paragraph 5, a U.S. citizen resident in the United Kingdom may exclude or deduct for U.S. tax purposes certain contributions to a pension scheme established in the United Kingdom. Qualifying contributions generally include contributions made during the period the U.S. citizen exercises an employment in the United Kingdom if expenses of the employment are borne by a U.K. employer or U.K. permanent establishment. Similarly, with respect to the U.S. citizen's participation in the U.K. pension scheme, accrued benefits and contributions during that period generally are not treated as taxable income in the United States.
>
> The U.S. tax benefit allowed by paragraph 5, however, is limited to the lesser of the amount of relief allowed for contributions and benefits under a pension scheme established in the United Kingdom and, under subparagraph (b), the amount of relief that would be allowed for contributions and benefits under a generally corresponding pension scheme established in the United States.
>
> Subparagraph (c) provides that the benefits an individual obtains under paragraph 5 are counted when determining that individual's eligibility for benefits under a pension scheme established in the United States. Thus, for example, contributions to a U.K. pension scheme may be counted in determining whether the individual has exceeded the annual limitation on contributions to an individual retirement account.
>
> Under subparagraph (d), paragraph 5 does not apply to pension contributions and benefits unless the competent authority of the United States has agreed that the pension scheme established in the United Kingdom generally corresponds to a pension scheme established in the United States. The notes provide that certain pension schemes have been determined to "generally correspond" to schemes in the other country. Since paragraph 5 applies only with respect to persons employed by a U.K. employer or U.K. permanent establishment, however, the relevant U.K. plans are those that correspond to employer plans in the United States. Accordingly, it applies with respect to retirement benefit schemes for the purpose of Chapter I of Part XIV of the Income and Corporation Taxes Act 1988.

---

23 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

The US Department of the Treasury Technical Explanation of the Convention[24] provides:

> Paragraph 5 is not subject to the saving clause of paragraph 4 of Article 1 by reason of the exception in subparagraph 5(a) of Article 1. Accordingly, U.S. citizens who are resident in the United Kingdom will receive the benefits provided by paragraph 5 with respect to contributions made to pension schemes established in the United Kingdom.

24.9 Canadian RRSP and RRIF

The DT Manual provides:

> **DT4617 Withdrawals from Canadian RRSPs/RRIFs** [Jan 2012]
> Canadian Registered Retirement Savings Plans (RRSPs) and Registered Retirement Income Funds (RRIFs)
> Where a UK resident makes a lump sum withdrawal from an RRSP or an RRIF, Canada imposes a 25 per cent withholding tax. No tax credit relief is allowable in the United Kingdom in respect of the tax withheld, however, because the Canadian tax is imposed upon the lump sum withdrawal (which does not itself give rise to a tax charge in the United Kingdom), whereas any UK tax charge is on the disposal of assets held within the Plan or Fund to enable the lump sum to be withdrawn (and no tax is levied on the disposal of fund assets in Canada). The Elimination of Double Taxation Article (Article 21) obliges the United Kingdom to give credit for Canadian tax paid only against UK tax computed by reference to the same profits, income or chargeable gains by reference to which the Canadian tax is computed. Since no UK tax is computed by reference to the subject of Canadian tax (that is, the withdrawal), no tax credit relief is allowable. Similarly, where the disposal of fund assets to facilitate a withdrawal gives rise to a UK tax charge, no tax credit relief is allowable since the disposal does not attract a tax charge in Canada.

CHAPTER TWENTY FIVE

DISCRETIONARY TRUSTS: INCOME TAX

25.1 Discretionary trusts: Introduction

This chapter is concerned with the income taxation of discretionary trusts. The topic requires a book to itself. This chapter focuses on the matters closest to the theme of this work but it is necessary to review the general rules to understand these matters in their context.

The starting point is to appreciate that a receipt from a discretionary trust may be:

(1) income ("an income distribution" or "an income receipt") or

(2) capital ("a capital distribution")

in the hands of the recipient.

I use the term **"discretionary income payment"** to refer to a payment made from a trust to a beneficiary at the discretion of trustees, which is income (not capital) in the hands of the beneficiary. The statutory term is "discretionary payment" (it being assumed, though not expressly stated, that the payment is an income distribution).

In outline, there are three tiers of IT charges.

Tier (1): Charge on trustees on the receipt of income

At this tier it is necessary to distinguish resident and non-resident trustees:

(a) UK resident trustees are charged on all their income

(b) Non-resident trustees are charged on UK source income only.

Tier (2): Charge on trustees on making a discretionary income payment

At this tier it is also necessary to distinguish resident and non-resident trustees:

(a) UK resident trustees pay this charge.

(b) Non-resident trustees do not pay this charge.

Tier (3): Charge on beneficiaries on receiving a discretionary income payment

At this tier it is necessary to distinguish resident and non-resident beneficiaries:

(a) UK resident beneficiaries: charge on all trust income
(b) Non-resident beneficiaries: charge on UK source trust income (ie UK resident trusts) only.

Two sets of tax credits (more or less) eliminate the triple taxation which would otherwise result.

(1) Tax paid at tier (1) enters a "tax pool" and is allowed as a credit for the tax at tier (2) so that no additional tax may be paid at tier (2). I refer to this as **"the trustees tax pool credit"**.
(2) The tax at tier (2) is a credit for the tax at tier (3), and beneficiaries who are not top rate taxpayers or who are entitled to some reliefs may reclaim this tax. I refer to this as **"the beneficiary's tax credit"**.

Where the trustees tax pool credit fails to provide relief, there are further statutory and concessionary reliefs.

Section 462 ITA provides an overview of the layout of the legislation:

> (1) This Part [part 9 ITA] sets out special rules about settlements and trustees.
> (2) Chapter 2 contains general provision about settlements and trustees, for example, definitions of expressions relating to settlements.
> (3) Chapter 3 provides for income tax to be charged at the dividend trust rate or at the trust rate on certain amounts included in the net income of the trustees of a settlement.
> (4) Chapter 4 provides—
> (a) for expenses of the trustees of a settlement to be set against the trustees' trust rate income (see section 463(2)), and
> (b) consequentially, for the amount of the trust rate income to be reduced.
> (5) Chapter 5 qualifies section 479 (which is in Chapter 3) in the case of the trustees of an approved share incentive plan.
> (6) Chapter 6 provides that the first slice of the trust rate income of the trustees of a settlement is not to be charged at the dividend trust rate or at the trust rate.
> (7) Chapter 7 deals with the treatment of payments made by the trustees of a settlement in the exercise of a discretion ...

In this chapter when I refer to a trust, I am referring to a discretionary trust, and assume that the trust is not settlor-interested (or if it is, that s.624 does not apply).

25.1.1 *Cross references*

The following topics are considered elsewhere:
14.2 (Location of source of income: Territorial scope of IT)
14.9 (Split years: savings & investment & miscellaneous income).
I do not consider the vexed topic of trustees expenses (chapters 4 and 8), share incentive plans (chapter 5) or the standard rate band, which gives relief for the first (small) slice of income (chapter 6). I do not consider the position of corporate beneficiaries.

25.2 Tier 1: Charge on trustees on receipt of income

There are special rules, primarily dealing with the rates of tax on trusts. However the income tax charge itself arises under the usual charging provisions: there is no special charging provision for trusts. Accordingly:
(1) UK trustees are subject to tax on all their income
(2) Non-resident trustees are subject to tax on UK source income (except so far as non-residents income tax relief is available).
The trustees can qualify for the usual reliefs. Insofar as non-resident trustees qualify for reliefs, the position is straightforward, but tax relief for UK trustees (for instance DT relief[1]) affects the tax pool credit system, which therefore has to be supplemented with further reliefs.

25.2.1 *Accumulated or discretionary income*

The TSE Manual provides a rough summary:

> **3011 Amount of trust income chargeable** [September 2011]
> Trustees are chargeable at the basic rate on trust income without any deduction for trust management expenses.
> **Accumulation or discretionary trust**
> If the trust is within ITA/S479, the trustees are liable to tax at the special trust rates. These are the dividend trust rate in respect of dividend type income and the trust rate in respect of other income. TSEM3019 explains which trusts are within ITA/S479.
> The amount of trust income chargeable at the special trust rates is the gross trust income, minus the total of:
> [a] income which before distribution ranks as the income, for tax purposes, of a person other than the trustees

1 See 25.12 (Are discretionary trusts "beneficial owners" for DTA purposes?).

[b] for years to and including 2005-06 only income which is treated, for any purposes of the Taxes Act, as that of the settlor (from 6 April 2006 the exemption for settlor-interested settlements to the special trust rates no longer applies) and
[c] allowable trust management expenses (TSEM8300+).

Section 479 ITA provides:

(1) This section applies if—
(a) accumulated or discretionary income arises to the trustees of a settlement, and
(b) the income does not arise under a trust established for charitable purposes only.
(2) Income tax is charged on the income at the rates referred to in this section instead of at the rates which would otherwise apply (for which see Chapter 2 of Part 2 (rates at which income tax is charged)).
(3) Income tax is charged on the income at the dividend trust rate so far as the income is dividend income.
(4) Otherwise, income tax is charged on the income at the trust rate.

The rates are the top income tax rates (the Blair/Brown administration disapproved of trusts and the coalition administration have not changed the policy). For 2013/14, s.9 ITA provides:

(1) The trust rate is 45%.
(2) The dividend trust rate is 37.5%.

The key term is "accumulated or discretionary income". Section 480 ITA provides:

(1) Income is accumulated or discretionary income so far as—
(a) it must be accumulated, or
(b) it is payable at the discretion of the trustees or any other person,
and it is not excluded by subsection (3).
(2) The cases covered by subsection (1)(b) include cases where the trustees have, or any other person has, any discretion over one or more of the following matters—
(a) whether, or the extent to which, the income is to be accumulated,
(b) the persons to whom the income is to be paid, and
(c) how much of the income is to be paid to any person.

This covers common form discretionary trusts.

25.2.2 *Exception for settlor-interested trusts*

Section 480 continues with 3 exceptions of which only the first is relevant here. Section 480(3) ITA provides:

> Income is excluded for the purposes of subsection (1) so far as—
> (a) before being distributed, it is the income of any person other than the trustees...

I would have thought that this applies to the income of settlor-interested trusts, so far as s.624 ITTOIA applies, but HMRC do not agree: see TSE Manual 3011set out above, at para [b].

25.2.3 *Other trust income taxed at top rates*

Section 481 ITA provides:

> (1) This section applies if—
> (a) the trustees of a settlement are liable for income tax on an amount of a type set out in section 482,
> (b) the trustees are not trustees of a unit trust scheme, and
> (c) the amount is not income arising under a trust established for charitable purposes only.
> (2) Income tax is charged on the amount at one of the rates referred to in this section instead of at the rate which would otherwise apply (for which see Chapter 2 of Part 2 (rates at which income tax is charged)). This is subject to subsection (5).
> (3) If the amount is within Type 1 as set out in section 482, income tax is charged on the amount at the dividend trust rate.
> (4) Otherwise, income tax is charged on the amount at the trust rate.

This applies to all trusts, IIP as well as discretionary, but it is convenient to deal with it here. Section 481 continues with 4 exceptions:

> (5) Income tax is not to be charged as mentioned in subsection (2) so far as the amount—
> (a) is accumulated or discretionary income,
> (b) would be accumulated or discretionary income apart from section 480(3)(a) or (c), or
> (c) is income from property within subsection (6).
> (6) Property is within this subsection if it is held for the purposes of a superannuation fund to which section 615(3) of ICTA (superannuation funds relating to undertakings outside the UK) applies.

Section 482 ITA specifies 11 types of income, mostly fairly exotic

categories, which constitute capital for trust purposes but income for tax purposes:

The types of amount referred to in section 481 are as follows.

Type 1: Purchase of own shares

A payment—

(a) which is made to the trustees or to which the trustees are entitled, and

(b) which is made by way of qualifying distribution by a company on the redemption, repayment or purchase of shares in the company or on the purchase of rights to acquire such shares.

Type 2: Accrued income profits

Accrued income profits treated as made by the trustees under section 628(5) or 630(2) [ITA].

Type 3: Offshore income gains

Income treated as arising to the trustees under regulation 17 of the Offshore Funds (Tax) Regulations 2009.

Type 4: Employee share ownership trusts

Income which the trustees are treated as receiving under section 68(2) or 71(4) of FA 1989 (which relate to employee share ownership trusts).

Type 5: Lease premiums

A sum to which Chapter 4 of Part 3 of ITTOIA 2005 (which provides for certain amounts to be treated as receipts of a property business) applies.

Type 6: Deeply discounted securities

A profit in relation to which the trustees are liable for income tax under section 429 of ITTOIA 2005 (profits from deeply discounted securities).

Type 7: Life insurance gains

A gain in relation to which the trustees are liable for income tax under section 467 of ITTOIA 2005 (gains from contracts for life insurance etc), other than a gain to which subsection (7) of that section applies.

Type 8: Transactions in deposits

A profit or gain in relation to which the trustees are liable for income tax under section 554 of ITTOIA 2005 (transactions in deposits).

Type 9: Futures & options

A profit or gain—

(a) in relation to which the trustees are liable for income tax under section 557 of ITTOIA 2005 (disposals of futures and options), and

(b) which does not meet any of conditions A to C in section 568 of ITTOIA 2005.

Type 10: Foreign dividend coupons

Proceeds in relation to which the trustees are liable for income tax under section 573 of ITTOIA 2005 (sales of foreign dividend coupons).

Type 11: Transactions in land

Income treated as arising to the trustees under Chapter 3 of Part 13 of this Act [ITA] (tax avoidance: transactions in land).

25.3 Tier 3: Discretionary income payment: Charge on beneficiary

Section 683(1) ITTOIA imposes the tax charge on discretionary income payments:

> Income tax is charged under this Chapter on annual payments that are not charged to income tax under or as a result of any other provision of this Act or any other Act. ...

"Annual payment" is an opaque technical term: it is a label for a category (or set of categories) of income, the meaning of which is discussed in a large and in parts difficult body of case law.[2] It is not necessary to discuss that here, as it is well established that income payments from discretionary trusts are annual payments and so are charged under this section.

25.3.1 *Beneficiary a remittance basis taxpayer*

Section 684 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the annual payments arising in the tax year.

---

2 Section 683(3) ITTOIA provides one statutory rule: "The frequency with which payments are made is ignored in determining whether they are annual payments for the purposes of this Chapter."
ITTOIA EN explains: Subsection (3) rewrites "or whether the same is received and payable half-yearly or at any shorter or more distant periods".

(2) Subsection (1) is subject to Part 8 (foreign income: special rules).

This brings in the ITA remittance basis if the discretionary income payments have a foreign source.

25.3.2 *Discretionary trust payment: What is the source?*

Where the trust is a common form discretionary trust, and a beneficiary receives trust income in the exercise of the trustees' discretion, the trust is the source (not the underlying trust assets):

> A discretionary trust ... is not transparent. No beneficiary is entitled unless and until the trustees exercise their discretion in his or her favour, and the trustees' exercise of discretion is regarded as ... creating a new source of income...[3]

The beneficiary's income is categorised as annual payments (regardless of the type of income received by the trustees). HMRC agree. The TSE Manual provides:

> **3756. Individual beneficiary receives discretionary income payment from a resident trust: trust not settlor-interested** [August

---

3 *Memec v IRC* 71 TC 77 (HC) at p.95. The same point was made in *IRC v Berrill* 55 TC 429 at p.444.

For a dissenting view, see Venables, "*Memec v IRC* and the Source of Discretionary Income Payments from Trusts" PTPR (1999) Vol. 7 p.87, accessible *http://www.khpplc.co.uk/reviews*; Venables, *Non-Resident Trusts*, (8th ed., 2000), 16.3 (Taxation of Beneficiary):

"Where there are discretionary trusts of income ...and the trustees distribute income in the exercise of their discretion, the taxability of the recipient beneficiary is a matter of some controversy. My own opinion is that in exercising their discretion the trustees simply perfect the settlor's gift so that the position at the end of the day is the same as if the trust instrument had expressly provided that the beneficiary should receive the income. Thus, the income which the beneficiary receives is the same income as that which the trustees received, the beneficiary's source is the same as the trustees' source and any tax paid by the trustees is to be treated as having been paid on account of the beneficiary."

Before 1973 this view was (I think) generally held though the point was not formally decided. This was assumed to be correct in *Drummond v Collins* 6 TC 525 though the point was not directly considered. However the FA 1973, imposing the additional rate of tax (now chapter 7 part 9 ITA), clearly assumes that a discretionary trust is a separate source, and so provides a statutory basis (if needed) to support the view that discretionary trusts are not transparent. Venables raised the argument in the Court of Appeal in *Memec*, but it was not addressed: 77 TC at p.111.

> 2013]
> In the case of trusts or settlements that are not settor-interested a discretionary income payment is treated as an amount that is net of tax at the trust rate. The beneficiary's income is the net amount grossed at the trust rate. It carries tax credit at that rate. It is available for relief or repayment.
> The gross amount is an annual payment. It is a new source of income, usually not identified with the underlying trust income. *Cunard's Trustees v IRC* (27 TC 122) supported the view that when the trustees exercised their discretion, a new source of income came into existence.
> ...

If a discretionary trust becomes interest in possession in form, the trustees' discretion over income in principle comes to an end and the source has ceased: *IRC v Berrill* at p.444. But the cessation of a source is not now significant for tax purposes.

Memec also considers annuities:

> Similarly, the rights of an annuitant under a trust are regarded as a source of income distinct from that of the underlying trust investments.[4]

However annuities are not now found, so this is of academic interest only.

25.3.3 *Discretionary trust payment: Location of source*

Where the trust is the source, how does one decide its location? There are (as usual) a variety of possible connecting factors, including: the residence of the trustees, the country in whose courts the trust will be enforced, the place where the discretion is exercised. It is suggested that trustee residence is the deciding factor, and this is consistent with s.493(1)(b) ITA. HMRC agree. Normally all these factors will point the same way so the issue will not arise.

25.3.4 *Time income arises*

The TSE Manual provides:

> **3759. Beneficiary receives discretionary income payment from a resident trust: when payment made** [August 2013]
> For tax purposes the beneficiary receives a payment on
> • The date the trustees made the payment or

4 See too *R v Special Comrs ex p. Shaftesbury Homes & Arethusa Training Ship* 8 TC 367; *Inchyra v Jennings* 42 TC 388.

- The date the beneficiary became legally entitled to require the trustees to pay over the income. This could be when the payment indefeasibly vested, following the trustees' resolution.

Tax cases: *Cunard's Trustees v IRC* 27 TC 122

25.3.5 *Entering discretionary trust income in beneficiary's tax return*

Income from non-resident trusts is entered in box 41 of the Foreign pages of the tax return, SA106 (2013/14): the side note to this box refers to "discretionary income from non-resident trusts".

HMRC Helpsheet 262 (2013/14) provides:

> If you have received a discretionary payment from the non-UK resident trust, enter all of the income in box 41 ... [5]

For UK resident trusts, the income is entered in box 1 of the Trusts etc pages, SA107 (2013/14).

25.4 Beneficiaries tax credit

25.4.1 *UK resident trusts*

The tax credit is in s.494 ITA, which is introduced by s.493 ITA:

> (1) Sections 494 and 495 apply for income tax purposes if—
> (a) in a tax year the trustees of a settlement make an annual payment to a person ('the beneficiary') in the exercise of a discretion (whether exercisable by the trustees or any other person),
> (b) the trustees are UK resident for the tax year, and
> (c) condition A or condition B is met.

The usual case is condition A. Section 493(2) ITA provides:

> Condition A is that what is paid to the beneficiary is, only because of the payment, income of the beneficiary for income tax or corporation tax purposes. 'Income' does not include employment income.

Condition B relates to payments to minor children of the settlor,[6] a topic not considered here.

---

5 The helpsheet continues: "... unless the situation mentioned in the next paragraph applies" The next paragraph refers to the special rules for settlor-interested trusts; see 27.7.2 (Relief for non-settlor-beneficiary).

6 Section 494(3) ITA provides: "Condition B is that the payment is treated for income tax purposes as the income of a settlor under section 629 of ITTOIA 2005 (income paid to relevant children of settlor)."

Section 494 ITA provides the beneficiaries tax credit and grossing up. Grossing up comes first:

> (1) The discretionary payment is treated as if it were made after the deduction of a sum representing income tax at the trust rate on the grossed up amount of the discretionary payment.
> (2) The grossed up amount of the discretionary payment is the actual amount of the discretionary payment grossed up by reference to the trust rate.

Then the beneficiaries tax credit:

> (3) The person mentioned in subsection (4) is treated as having paid income tax of an amount equal to the sum deducted as mentioned in subsection (1).
> (4) That person is—
> (a) if condition A in section 493 is met, the beneficiary, and
> (b) if condition B in section 493 is met, the settlor.

Condition B (payments to minor children of the settlor) is not considered here.

25.4.2 *Non-resident trusts*

The beneficiary's tax credit (along with the tier 2 charge on trustees) only apply if the trustees are UK resident: s.493(1)(b) ITA.

EN ITA Change 89 provides:

> This change makes it explicit that the Chapter dealing with the taxation of discretionary payments by trustees applies only to payments made and tax suffered while the trustees are UK resident.
> ... section 493 contains the condition that it only applies to UK resident trustees. It follows that where a payment is made by non-UK resident trustees:
> - the payment does not carry any tax credit in the hands of the beneficiary; and
> - the trustees are not liable for any tax in respect of the payment.
>
> As a corollary to the provisions of section 687 of ICTA not applying to non-UK resident trustees, tax only enters the trustees' tax pool if it is tax suffered on income arising while the trustees are UK resident - see section 497.
> This change does not affect the operation of ESC B18, which enables UK resident beneficiaries who receive discretionary payments to have a credit for the tax paid by non-UK resident trustees on UK source income.

25.5 Tier 2: Charge on trustees making discretionary income payment

Section 496 ITA provides the charge on trustees:

> (1) Income tax is charged for a tax year if—
>
> (a) in the tax year the trustees of a settlement make payments as a result of which income tax is treated as having been paid under section 494, and
>
> (b) amount A is greater than amount B.
>
> (2) Amount A is the total amount of the income tax treated under section 494 as having been paid.
>
> (3) Amount B is the amount of the trustees' tax pool available for the tax year (see section 497).
>
> (4) The amount of the tax charged under this section is equal to the difference between amounts A and B.
>
> (5) The trustees are liable for the tax.

25.6 Trustees tax pool credit

Section 497(1) ITA deals with the trustees' tax pool:

> Take the following steps to calculate the amount of the trustees' tax pool available for a tax year ('the current tax year').
>
> This is subject to subsections (2) and (3).
>
> *Step 1* Take the amount of the trustees' tax pool available for the previous tax year and deduct from that amount (but not so that it goes below nil)—
>
> (a) the total amount of income tax treated under section 494 as having been paid as a result of payments made by the trustees in the previous tax year, and
>
> (b) the amount to which the trustees are entitled under section 496B in respect of the previous tax year.
>
> *Step 2* Add together all amounts of income tax for which the trustees are liable for the current tax year and which are of a type set out in section 498.
>
> *Step 3* Add the sum calculated at Step 2 to the amount resulting from Step 1.

Section 497(2)(3) ITA deal with the special cases of immigrant trusts and new trusts:

> (2) If the trustees were non-UK resident for the previous tax year, references in subsection (1) to the previous tax year are to be read as references to the last tax year prior to the current tax year for which the

trustees were UK resident.
(3) If—
(a) the current tax year is the tax year during which the settlement is established, or
(b) the trustees have been UK resident for no tax year prior to the current tax year,
ignore Steps 1 and 3 and, accordingly, the trustees' tax pool available for the current tax year is the sum calculated at Step 2.

Section 498 ITA provides the list of types of income which qualify fall within the tax pool. It is in short all the tax paid by the trustees. In full detail:

(1) The types of amount referred to at Step 2 in section 497 are as follows.
Type 1 The amount of any tax on income (other than income of a kind mentioned below in relation to Type 2, 3 or 3A) charged at the dividend trust rate or at the trust rate.
Type 2 The amount of tax at the nominal rate on any income which is—
(a) chargeable under Chapter 3 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies),
(b) chargeable under Chapter 5 of that Part (stock dividends from UK resident companies), or
(c) chargeable under Chapter 6 of that Part (release of loan to participator in close company),
and on which tax is charged at the dividend trust rate as a result of section 479.
Type 3 The amount of tax at the nominal rate on any income on which tax is charged at the dividend trust rate as a result of section 481.
Type 3A The amount of tax at the nominal rate on any amount in respect of which—
(a) the trustees are liable to income tax under section 467 of ITTOIA 2005 (gains from contracts for life insurance etc),
(b) the trustees are liable to income tax at the trust rate by virtue of section 482 above, and
(c) tax at the basic rate is treated as having been paid by virtue of section 530 of ITTOIA 2005 (life insurance).
Type 4 The amount of any tax on income on which tax is charged at the basic rate …2 as a result of section 491.
Type 5 The amount of tax on any income determined in accordance with section 26 of FA 2005 (special tax treatment for trusts for the benefit of vulnerable persons).
(2) In relation to Types 2 and 3, references to the nominal rate are

references to a rate equal to the difference between the dividend trust rate and the dividend ordinary rate.

(2A) In relation to Type 3A, the reference to the nominal rate is a reference to a rate equal to the difference between the trust rate and the basic rate.

(3) In relation to Types 1 to 4, references to income do not include income the tax on which is reduced in accordance with section 26 of FA 2005.

25.6.1 *Effect of trustees DT relief on tax pool*

The TSE Manual provides:

3670 Discretionary trust [June 2009]

These instructions apply to taxed overseas income received by a discretionary or accumulation trust. The trustees can claim double taxation relief in respect of overseas tax that qualifies for relief. The trustee's marginal rate is the rate applicable to trusts, or where it applies, the dividend trust rate. INTM367780+ onwards has instructions about calculating relief.

A paying agent may have allowed provisional tax credit relief on overseas income. The computation of double taxation relief must reflect this.

Tax pool

The Section 687 ICTA 1988 tax pool must contain only UK tax paid or suffered by deduction. It must not include UK tax covered by credit for overseas tax.

Section 687(3)(a) ICTA 1988 effectively withdraws the double taxation relief when the trustees make a discretionary payment to a beneficiary.

25.6.2 *Transitional rule for pre-2008 income*

ITA 2007 Sch 2 para 104 provides:

(1) Section 497 applies with the following modifications in relation to the trustees of a settlement established prior to the tax year 2007–08 if the current tax year is the tax year 2007–08.

(2) It also so applies if—

(a) the current tax year is a tax year subsequent to the tax year 2007–08, and

(b) the trustees have been UK resident for no tax year prior to the current tax year or the last tax year prior to the current tax year for which they were UK resident is a tax year prior to the tax year 2007–08.

(3) It applies as if in subsection (1) for Step 1 there were substituted—

'Step 1
Take the amount of the trustees' final section 687(3) tax pool and deduct from that amount (but not so that it goes below nil) the total of all tax (if any) treated under section 687(2)(a) of ICTA as being paid as a result of payments made by the trustees in the tax year 2006–07.
'The amount of the trustees' final section 687(3) tax pool' is the total amount—

(a) available to the trustees under section 687(3) of ICTA for setting against tax assessable on them under section 687(2)(b) of that Act for the tax year 2006–07, or

(b) which would have been so available had tax been so assessable.'

(4) It applies as if subsections (2) and (3) were omitted.

25.7 HMRC example

The TSE Manual provides an example:

3024 The tax pool - trustees calculate maximum discretionary payment [September 2011]
In this example, in the tax year 2010-2011 a trustee of a discretionary trust receives a net dividend of £1,350 (tax credit £150. The trustee is chargeable at 42.5%, which is partly covered by the 10% non-payable tax credit.

Description		
Dividend received	£1,350	
Plus non-payable tax credit	£150	
Gross income	£1,500	
Tax at 10% on first £1,000 (standard rate band)		£100
Tax at 42.5% on the remainder £500×42.5%		£212.50
Total tax		£312.50
Less non-payable tax credit		- £150
Tax payable by trustee - goes into tax pool		£162.50
Net income after tax		£1187.50

The trustee now has net income of £1,187.50 (net dividend of £1,350 less tax paid of £162.50). Only £162.50 of the total tax goes into the tax pool because the £150 dividend tax credit is not payable.
If the trustee pays the net income of £1,187.50 to the beneficiary, the tax credit of 50% on that net payment is £1,187.50 (gross amount of £2,375 at 50%). But if the tax pool has nothing brought forward from the previous year and there is no other income on which tax has been paid, the tax pool of £162.50 will not cover the tax credit of £1,187.50 on the payment made. Under Section 496 the trustee would have to pay £1,187.50 less £162.50 = £1,025, bur there are no funds available.

Instead, the trustees can calculate the maximum amount of discretionary payment as follows:-

Description		
Net income after tax		£1,187.50
Add tax in tax pool		£162.50
Total amount to cover payment to beneficiary & tax credit @50%		£1,350.00
Tax credit at 50%	£ 675.00	£675.00
Less tax paid in tax pool		£162.50
Additional tax to be paid by trustee		£512.50
Net payment to beneficiary	£ 675.00	

The beneficiary is paid net income of £675 with a tax credit of £675, which is equivalent to gross income of £1,350 with tax credit at 50%. The trustee pays a total of £675 tax to HMRC, £162.50 tax on the dividend received and the additional £512.50 under Section 496. So if the trustee is relying on the dividend income to fund both the payment to the beneficiary and the additional tax there are sufficient funds to release only 50% of the actual dividend, that is £1,350×50% = £675.

HMRC offer an online tax pool calculator to do the computations, in simple cases.[7]

25.8 Payment from discretionary trust: Income or capital receipt?

The question whether a trust distribution is an "annual payment" (ie, income) or not (ie, capital) matters for many purposes. In particular:

(1) The IT charge on a beneficiary receiving the distribution (tier 3) only applies if the distribution is income.
(2) The IT charge on trustees making the distribution (tier 2) only applies if the distribution is income.
(3) Section 87 and s.731 only apply if the distribution is capital.[8]

The position depends on the terms of the power under which the payment is made.

25.8.1 *Power over income*

A common form discretionary trust[9] provides this type of power over trust

7 *http://www.hmrc.gov.uk/tools/trusts/calculator.htm*.

8 See 30.11 (S.731 capital condition); 51.6.5 (Payment in form of income (un)taxed on remittence basis).

9 For a discussion of the drafting, see Kessler, *Drafting Trusts & Will Trusts* (12th ed., 2014), Chap 15 (Discretionary Trusts).

income:

> The Trustees may pay or apply the trust income to or for the benefit of any Beneficiaries, as the Trustees think fit.

If trustees receive income and make a payment under such a power, the receipt is income and not capital. This has never been doubted.

25.8.2 *Power over capital*

A common form discretionary trust also provides this type of power over trust capital:

> The Trustees may pay or apply the capital of the Trust Fund to or for the advancement or benefit of any Beneficiary.

If trustees make a payment under such a power the receipt is capital and not income. This is still the case even if:

(1) the payments are made to satisfy an "income purpose", eg maintenance of a beneficiary; and
(2) the payments are recurrent (eg annual or even monthly).

This follows from *Stevenson v Wishart*.[10]

25.8.3 *Accumulated income paid out as capital*

Suppose:

(1) trustees accumulate income and add it to capital; and
(2) the trustees pay that capital to a beneficiary in exercise of a power like that in para 25.8.2 (Power over capital).

The receipt is still capital and not income. This follows from *Stevenson v Wishart.* In that case the distributions which HMRC sought to tax as income represented original trust capital and not accumulated income. It is considered that this makes no difference. *Stevenson v Wishart* is authority for the proposition that the income/capital question is governed by the terms of the power concerned.[11]

---

10 59 TC 740. The judgment of Knox J is clearer on this point than the Court of Appeal; this view is adopted in *Pierce v Wood* [2010] WTLR 253 at [29] "An appointment or advance of trust capital, in exercise of a power over capital, even if it were to meet an income need of the beneficiary, is normally a capital receipt in the beneficiary's hands."

11 Provisions such as ss.631(1)(2) and 633 ITTOIA assume this is correct (deeming payments out of accumulated income to be treated as income).

It might be different in an extreme case, where for tax planning reasons there was an arrangement under which:

(1) income was accumulated;

(2) the trustees pay that capital to a beneficiary (by exercise of a common form power of advancement or appointment) shortly afterwards.

HMRC would have an attractive argument that the receipt should be regarded as income under general principles (or under the GAAR but it would not be necessary to rely on that).

In practice it should be possible to avoid this by ensuring that advances of capital are not neatly identifiable with accumulated income.

25.8.4 *HMRC view*

HMRC agree with the views set out above. The TSE Manual provides:

> **TSEM3781 - Trust income and gains: beneficiaries: payment from trust capital - normally capital in beneficiary's hands** [Aug 2013]
> A payment made out of trust capital including
> - accumulated income
> - a capital receipt that is deemed to be income for tax purposes
>
> is normally regarded as capital of the beneficiary and so is not taxable. This view was supported in the case of *Stevenson v Wishart* (59 TC 740).
> Where
> - there is no pre-existing interest in income, or
> - the payment is made under an interest in capital that is separate from an interest in income
>
> payments out of trust capital constitute capital in the hands of the recipient.
> Examples that illustrate the normal rule are:
> - Anthony has no interest in income at all. But the trustees may advance capital to or for him at their discretion. Payments are capital and not taxable on him.
> - Barbara has a discretionary interest in income. The trustees may also advance capital to or for her at their discretion. Payments are capital and not taxable on her.
> - Carina has an annuity of £10,000 and in addition, the trustees have the power to apply capital at their discretion for her benefit. Payments are capital and not taxable on her.

The Manual notes three exceptional cases:

TSEM3783 - Trust income and gains: beneficiaries: payment from trust capital - exceptions to normal rule [Aug 2013]
There are certain circumstances in which payments from trust capital are treated as income of the beneficiary. They are:
[1] express gift of an annuity (TSEM3784)
[2] payments to supplement or augment an income interest (TSEM3785)
[3] compensation for loss of income (where beneficiary entitled to compensation) (TSEM3786)

Exceptions [1] and [3] are of specialist interest and not considered here. The Manual explains the second exception in this way:

TSEM3785 - Trust income and gains: beneficiaries: payment from trust capital - exceptions to normal rule - payment to supplement or augment income [Aug 2013]
The cases of *Cunard's Trustees v IRC* (27 TC 122) and *Brodie v IRC* (17 TC 432) established that where there is a pre-existing income interest (whether in the form of an annuity or interest in possession) payments out of trust capital to supplement or augment income constitute income in the hands of the recipient.
Where the beneficiary has a pre-existing annual income entitlement, and the trustees can or have to supplement or augment the trust income out of capital:
- if they can use capital in this way, i.e. it is discretionary, ITA/S494 will apply
- if they have to use capital in this way, the annual payments treatment will apply.

Example:
Dilwar lives rent-free in trust property. The deed provides for income to be used to pay rates and other property expenses, while the rest of income is to be used for his benefit. If the income is insufficient, the trustees are empowered to use capital at discretion to keep the beneficiary at same level of comfort as in the past. Dilwar has a pre-existing income entitlement, so the payment from capital is treated as income in his hands. ITA/S494 applies to the capital payments.
Elena has an annuity of £10,000 a year. If the trust income is less than £10,000, the trustees have to make up the shortfall from trust capital. Elena has a pre-existing income entitlement, so the payment from capital is treated as income in her hands. The whole £10,000 is taxable as income and the annual payments treatment applies.

25.8.5 *Accumulated income paid out as income under s.31 TA 1925*

The Manual considers the special case of a payment of trust capital under s.31(2) Trustee Act 1925. In order to follow this, it is necessary to set out the terms of s.31. The section is somewhat intricate, and I set out the relevant parts as they normally apply:

> (1) Where any property is held by trustees in trust for any person for any interest whatsoever, whether vested or contingent, then, subject to any prior interests or charges affecting that property—
>
> (i) during the infancy of any such person, if his interest so long continues, the trustees may, at their sole discretion, pay to his parent or guardian, if any, or otherwise apply for or towards his maintenance, education, or benefit, the whole or such part, if any, of the income of that property as may, in all the circumstances, be reasonable,...
>
> Provided that, in deciding whether the whole or any part of the income of the property is during a minority to be paid or applied for the purposes aforesaid, the trustees shall have regard to the age of the infant and his requirements and generally to the circumstances of the case, and in particular to what other income, if any, is applicable for the same purposes; and where trustees have notice that the income of more than one fund is applicable for those purposes, then, so far as practicable, unless the entire income of the funds is paid or applied as aforesaid or the court otherwise directs, a proportionate part only of the income of each fund shall be so paid or applied.
>
> (2) During the infancy of any such person, if his interest so long continues, the trustees shall accumulate all the residue of that income ... and shall hold those accumulations as follows ...
>
> (ii) In any other case the trustees shall, ... hold the accumulations as an accretion to the capital of the property from which such accumulations arose, and as one fund with such capital for all purposes, ...
>
> but the trustees may, at any time during the infancy of such person if his interest so long continues, apply those accumulations, or any part thereof, as if they were income arising in the then current year.

The Manual argues that a payment under s.31(2) is a capital receipt:

> **TSEM3782 - Trust income and gains: beneficiaries: payment from trust capital - normally capital in beneficiary's hands - S31 Trustee Act 1925** [Aug 2013]
>
> The concluding words of Section 31(2) Trustee Act 1925 allow the

> trustees to apply accumulations 'as if they were income arising'.
> These words do not have the effect of de-capitalising the accumulations concerned. Once accumulated income is forever capitalised. Where such accumulations have been released the money must therefore have been received by the beneficiary as capital. The phrase 'as if they were income arising in the then current year' should be regarded as simply meaning that the trustees are bound by the proviso to Section 31(1), just in the same way as they would be if they were deciding whether or not to release current income to or for the benefit of the minor.
> When paid by virtue of this provision the payment is capital in the beneficiary's hands, so it would not fall within ITA/Ss493-494, i.e. there is no tax credit to the beneficiary. Such a payment may be subject to the application of ITTOIA/S629 to charge the amount as income of the settlor - see TSEM4300+.

The payment of a sum under s.31(2) TA 1925 seems to me a clear case of an income receipt, under the principle of *Cunard's Trustees* to which HMRC refer in the Manual passage set out above. HMRC are correct to say that the accumulated income is capitalised, ie it becomes and remains capital in the hands of the trustees. But that does not answer the question as it is clear that a payment out of trust capital may still constitute income in the hands of the beneficiaries. The important point is that the terms of the relevant provision of the settlement link the payment with an income interest of a beneficiary. See the comment of Knox J in *Stevenson v Wishart* 59 TC 740 at p.757D.

It might perhaps be clearer if the trust accounts recorded an "Accumulated Income Fund" (instead of recording accumulated income as increasing the capital fund). However, this makes no difference.

Perhaps HMRC will reconsider following the repeal of the proviso in the Inheritance and Trustees' Powers Act 2014.

The view that the receipt is a capital receipt will more often favour HMRC, but sometimes it will favour the taxpayer. The taxpayer cannot be criticised for adopting HMRC's official view when it suits them.

It has been said that two Special Commissioners decisions from the 1970s have held that the exercise of the s.31(2) power did not have the effect of making the payments income in the hands of the beneficiary.[12] But unreported special commissioner decisions cannot be cited as

12 Sheasby, "Accumulations of Income" [2000] TACT Review issue 11 accessible *http://www.trustees.org.uk/review-index/Trusts-Accumulations-of-income.php*

precedents.[13]

25.8.6 *Accumulated income paid out as income under express power*

A common form discretionary trust generally has express powers similar to s.31 but without the proviso. This allows trustees to accumulate income, adding it to trust capital, and typically gives the trustees power "to apply the accumulations as if they were income arising in the then current year".

If trustees make a payment out of trust capital under such a power it is considered that the receipt is an income receipt of the beneficiary.

25.9 Discretionary trusts treated as transparent to allow beneficiary reliefs

In some cases discretionary trusts are treated as transparent in order to confer some relief.

25.9.1 *DT relief for UK resident discretionary trust*

Section 111 TIOPA provides:

> **When payment to beneficiary treated as arising from foreign source**
> (1) Subsection (6) applies if each of conditions A to D is met.
> (2) Condition A is that a payment is made by trustees of a settlement.
> (3) Condition B is that income tax is treated under section 494 of ITA 2007 (treatment of discretionary payments by trustees) as having been paid in relation to the payment.

This restricts the relief to UK resident trusts.[14]

> (4) Condition C is that the income arising under the settlement includes taxed overseas income.[15]
> (5) Condition D is that the trustees certify—
> (a) that the payment is one made out of income consisting of, or including, taxed overseas income of an amount, and from a source, stated in the certificate, and
> (b) that the amount of taxed overseas income arose to the trustees not earlier than 6 years before the end of the tax year in which

13 See *Ardmore v HMRC* [2014] UKFTT 453 (TC) at [9] - [23].

14 See 25.4 (Beneficiaries tax credit).

15 This term is defined in s.111(7) TIOPA: "In this section "taxed overseas income", in relation to a settlement, means income in respect of which the trustees are entitled to credit under this Part for tax under the law of a territory outside the UK."

the payment is made.

Where these conditions are satisfied, s.111(6) TIOPA provides the relief:

> The person to whom the payment is made may claim that the payment, up to the certified amount, is to be treated for the purposes of this Part [Part 2 TIOPA headed Double Taxation Relief] as income received by the person—
>
> (a) from the certified source, and
>
> (b) in the tax year in which the payment is made.

The TSE Manual provides:

> **3675. Relief for overseas tax: expenses of discretionary trust** [February 2006]
>
> If trustees are claiming relief for overseas tax they will usually regard expenses as paid out of UK income. This means they can certify the overseas income to the beneficiaries under s.809 ICTA (TSEM3680).
>
> They may sometimes regard expenses as paid from overseas income. This could be because there is not sufficient UK income to cover the expenses. Or maybe certification is not advantageous to the beneficiary. Trustees cannot certify, under s.809, the overseas income they set against the expenses.
>
> **3680. Trustee's certificate of overseas taxed income** [February 2006]
>
> The income of a discretionary or accumulation trust may include overseas taxed income. The trustees can certify that discretionary payments they made to beneficiaries included income from the taxed overseas sources. The certificate must state how much of the payment refers to the overseas income. Trustees issue the certificates under the provisions of s.809(1)(b) ICTA. There is no prescribed wording for the certificate.
>
> Limits of the amounts certified
>
> The trustees must ensure that:
>
> - the amounts they certify do not exceed the gross equivalent of the payments they made
> - the gross amounts they certify do not exceed, in the aggregate, the gross income they received.
>
> Trustees can accumulate, for future certification, overseas income that they have not paid out. Income ceases to be available for certification six years after the start of the tax year in which it arose.
>
> **3685. Relief for overseas tax: mixed trust** [February 2006]
>
> A mixed trust has both a discretionary interest and an interest in possession.
>
> The trustees may claim double taxation relief in respect of overseas tax

that qualifies for relief. The instructions at TSEM3655 apply to income that the beneficiary is entitled to receive. The instructions at TSEM3670 apply to the balance of the income.

25.9.2 *Concessionary relief for UK resident trust*

ESC B18 provides:

> **UK resident trusts**
> A beneficiary may receive from trustees a payment to which [what is now s.494(1) ITA] applies.[16] Where that payment is made out of the income of the trustees in respect of which, had it been received directly, the beneficiary would—
> [1] have been entitled to exemption in respect of FOTRA securities issued in accordance with [what is now s.714 ITTOIA]; or
> [2] have been entitled to relief under the terms of a double taxation agreement; or
> [3] not have been chargeable to UK tax because of their not resident and/or not ordinarily resident status
> the beneficiary may claim that exemption or relief or, where the beneficiary would not have been chargeable, repayment of the tax treated as deducted from the payment (or an appropriate proportion of it).
> For this purpose, the payment will be treated as having been made rateably out of all sources of income arising to the trustees on a last in first out basis.

There are three distinct classes of reliefs here:
(1) Relief for interest on FOTRA securities (beneficiary not resident)
(2) DT relief (beneficiary treaty-resident outside the UK)[17]
(3) Exemptions for non-resident beneficiary

ESC B18 goes on to specify the conditions for the relief:

> Relief or exemption, as appropriate, will be granted to the extent that the payment is out of income which arose to the trustees not earlier than six years before the end of the year of assessment in which the payment was made, provided the trustees—
> [1] have made trust returns giving details of all sources of trust income and payments made to beneficiaries for each and every year for which

16 This reference restricts the relief to UK resident trusts. See 25.4 (Beneficiaries tax credit).

17 But s.111 TIOPA covers this.

they are required, and
[2] have paid all tax due, and any interest, surcharges and penalties arising; and
[3] keep available for inspection any relevant tax certificates.
Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary received the payment from the trustees.

The INT Manual expands on B18 and provides a worked example. The Manual is not up to date, and in example tax rates are those before the increase to the 50% rate in 2010/11; I omit text referring to the position before 2004.

367790. What methods of relief are available on discretionary payments from UK resident trustees [April 2007]
The way in which relief is calculated will depend on the terms of the treaty under which relief is claimed.

- Under an "other income" article which does not exclude payments from trusts, relief is given in full....
- Where there is no other income article or the article excludes trust income, relief is given by "looking through" to the underlying sources of the income. The way in which we "look through" is determined by Extra Statutory Concession (ESC) B18
- Because payments are made at the discretion of trustees, it is not possible to allow relief at source to a beneficiary of a discretionary trust.

...
367820. Extra Statutory Concession B18 [April 2007]
Under ESC/B18, income underlying a discretionary payment is treated as arising from the sources of income received by the trustees in the tax year that the payment is made. Income is considered as arising rateably from the sources of income. By rateably we mean the beneficiary's payment contains the same proportion of each strand of income as the total received by the trustees.
If there is not enough income arising in the year the payment is made to fund all of the payments made by the trustees (that is, if the trustees are drawing on accumulations – that is, income received by trustees in excess of payments out of trust income – made in previous years) we need to apply the proportions of trustees' income from the year(s) in which the accumulations were made. This is known as "spreading back" (see INTM367910).
367830. ESC/B18 and dividends taxed at the dividend trust rate [April 2007]
When the Schedule F trust rate (now the dividend trust rate) was introduced in 1999/2000 at 25%, the wording of ESC/B18 was revised to exclude the element of tax credit included in that tax. For example, where trustees receive a dividend of £90, with a tax credit of £10, their liability is £15 (that is, £25 less £10 tax credit). However, when applying a beneficiary's share of dividends to a dividend article of a treaty, the tax credit is excluded from the calculation. Therefore for

the purposes of ESC/B18, the 'gross' to which the restriction in the dividend article is applied is £90, the tax £15, and the net £75.

A dividend article with a 15% restriction would apply to the dividend element underlying a beneficiary's distribution as follows:

- Restriction: £90 × 15% = £13.50
- Tax £15 less restriction £13.50 = £1.50

367840. ESC/B18 and trustees' tax returns [April 2007]

It is a condition of ESC/B18 that in order to allow a beneficiary's claim to repayment, the trustees must have made their tax return for the year of the distribution, and paid over any tax due to HMRC.

It is therefore possible that a beneficiary's claim form can be received before the conditions of ESC/B18 are satisfied.

367850. ESC/B18 and Self Assessment [April 2007]

As the conditions for relief under ESC/B18 include actions by trustees, we do not consider a claim as being valid until these actions have been carried out. We cannot accept that the beneficiary has made a valid claim until the trustees have met the conditions set out in ESC/B18.

In practical terms this means that a beneficiary's claim is not valid until the trustees have sent in their tax return for the year in which the distribution was made and paid any tax due.

367860. Dealing with claims by non-resident beneficiaries of UK discretionary trusts under ESC/B18 [April 2007]

How to identify a repayment claim

The claim will usually be supported by a tax certificate on form R185, or an equivalent certificate prepared by the payer, showing tax deducted from the payment at 40%...

If the tax certificate is missing, the schedule will show that tax on the income is at 40% ...

Exceptionally, you may receive a claim on a payment from a UK discretionary trust where tax is not shown as having been paid at the Rate Applicable to Trusts (see INTM367950).

Procedure

You will need to request the trust file (the UTR for this should be quoted on the tax certificate) together with the trustees' tax return for the year of the distribution and all earlier years in date for time limit purposes during the year of distribution (you will need these if a 'spreadback' calculation is necessary).

You will need to advise the claimant or their agent that you have requested information from the trust's tax office to enable you to deal with the claim.

367870. Calculating relief due under ESC/B18 [April 2007]

When the trust file is received the information concerning trust income and distributions provided by the trustees in their returns is extracted and used to calculate the relief due to the beneficiary.

Due to the complexity of the calculations, a computer program is used to apportion the trust income to the beneficiary's share.

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

If necessary a calculation can be made manually (INTM367890).

367880. How to manually calculate relief due under ESC/B18 [April 2007]
Although the apportionment of the income will normally be performed using a computer program, if necessary the calculation can be performed manually, as follows:
1. Deduct any expenses and other obligations, for example Trust Management Expenses (see INTM367920) and annuities (see INTM367770), from the income received by the trustees.
2. For each income source (after deductions at 1 above) calculate the net amount available for distribution, that is the amount after deduction of tax at the rate applicable to trusts or the dividend trust rate as appropriate.
3. Calculate the total net distribution made to the discretionary beneficiaries.
4. Check that the total net distribution made to the discretionary beneficiaries is less than (or equal to) the total net available for distribution. If it is greater than the total net available for distribution, you will need to apply a 'spreadback' calculation (see INTM367910).
5. Allocate the net amount of each source of income arising to the trustees to the beneficiary's net distribution, by the following formula (each source of income must be treated separately because of the different tax rates to which the trust income is subjected):

(a ÷ b) × c =beneficiary's share of income source, where

- a = net income from source
- b = total income available to distribute
- c = beneficiary's net distribution

6. Calculate the beneficiary's gross share of each income source by reference to ESC/B18. For UK dividends the calculation for 2004–05 onwards is

(a ÷ 67.5) × 90 = beneficiary's gross share of dividends for the purposes of ESC/B18, where

- a = beneficiary's share of dividends

...
For other income (including foreign dividends) the calculation for 2004–05 onwards is

(a ÷ 60) × 100 = beneficiary's gross share of dividends for the purposes of ESC/B18, where

- a = beneficiary's share of income

...
7. Calculate the tax applying to each income source under ESC/B18 by deducting the net (calculated at 4) from the gross (calculated at 5).
8. Calculate the repayment due by reference to the relevant treaty articles, and/or UK legislation allowing relief to non-residents. Where repayment is restricted under a double taxation agreement, calculate the amount to restrict as a percentage of the ESC/B18 gross (calculated at 5) and deduct it from the tax (calculated at 6).

367890. T applications and claims: Non-resident beneficiaries of UK trusts [April 2007]
Example of a Manual calculation under ESC/B18
In the tax year 2004–2005 a trust had income from the sources shown below (gross except for dividends paid). The trustees made net distributions of £1000

each to one beneficiary in Canada (who has made a claim to us) and to one beneficiary in the UK. [Trust income is:]

- UK dividends paid £1292
- UK interest £1000
- Rents £500
- Foreign dividends £880
- Foreign interest £1000

Trustees net management expenses were £500

First, deduct trust management expenses from dividends: 1292 less 500 = 792

Then calculate income available for distribution:

Dividends	792
plus (tax credit at one ninth of the dividend)	88
less (dividend trust rate 25%)	(220)
	660
Interest	1000
less (tax at rate applicable to trusts 34%)	(340)
	660
Rents	500
less (tax at rate applicable to trusts 34%)	(170)
	330
Foreign dividends	880
less (tax at dividend trust rate 25%)	(220)
	660
Foreign interest	1000
less (tax at rate applicable to trusts 34%)	(340)
	660

Total available for distribution: 2970

Distribution: (2 × 1000) = 2000; this is less than the total available for distribution, so no spreadback required

Allocation to beneficiary:

Dividends: (660 ÷ 2970) × 1000 = 222.22
Interest: (660 ÷ 2970) × 1000 = 222.22
Rents: (330 ÷ 2970) × 1000 = 111.11
Foreign dividends: (660 ÷ 2970) × 1000 = 222.22
Foreign interest: (660 ÷ 2970) × 1000 = 222.22

Grossing up and deducting net to find tax attributable under ESC/B18:

Dividends: (222.22 ÷ 75) × 90 = 266.66 – 222.22 = tax 44.44
Interest: (222.22 ÷ 66) × 100 = 336.70 – 222.22 = tax 114.48

Rents: (there is actually no need to calculate this, as there is no relief, but the calculation would be as follows)

(111.11 ÷ 66) × 100 = 168.35 – 111.11 = tax 57.24
Foreign dividends: (222.22 ÷ 66) × 100 = 336.70 – 222.22 = tax 114.48
Foreign interest: (222.22 ÷ 66) × 100 = 336.70 – 222.22 = tax 114.48

Calculating the repayment due

In this example the claimant is claiming under the Double Taxation Convention with Canada on dividends and interest, and under UK legislation applying to non-residents on foreign income. Under the treaty there is a 15% restriction on dividends and a 10% restriction on interest.

Dividends: Gross 266.64 × 15% = 40 restriction	Tax 44.44 less 40 =	4.44
Interest: Gross 336.70 × 10% = 33.67 restriction	Tax 114.48 less 33.67 =	81.21
Foreign dividends: Gross 336.70	Tax	114.48
Foreign interest: Gross 336.70	Tax	114.48
Total repayment		314.61

This text has been withheld because of exemptions in the Freedom of Information Act 2000.

367900. Notes on types of underlying income in a discretionary trust [April 2007]

UK dividends: includes stock dividends.

UK interest

Dividends and interest are the most common types of income that you will see in discretionary trusts. With the exception of UK dividends, all of the tax associated with a particular source is considered for the purposes of ESC/B18 to be tax on that source. You may also see:

- Foreign income: relief is given under domestic legislation. Although foreign dividends are taxed in the hands of the trustees at the dividend trust rate of 32.5% ... the beneficiary is treated as having been taxed at 40% ....
- Rental income: there are no double taxation agreements that allow relief to individuals on rental income. No repayment is due on any part of the tax applicable to rental income.
- Accrued income: income returned under the 'accrued income' scheme cannot be relieved under double taxation agreements.
- Royalties: these are unusual in discretionary trusts. Relief is given at the appropriate agreement rate.
- FOTRA securities: you may be considering relief under an agreement which has an interest article that restricts relief. However, income shown on the trust return as interest may be derived from FOTRA securities on which full relief is available to non-residents. As there is no indication in the trust return that income is derived from FOTRA securities, you will not usually be able to consider repayment on this as a separate source from interest. However, if there is any indication of the amount of FOTRA securities in the papers submitted with the return, or in figures originating from the trustees and provided by the claimant or their agent, you should use these to allow relief on the FOTRA securities.

367910. What happens if the total net distributed in a year exceeds the total net available for distribution ('overdistribution') [April 2007]

It the trustees have distributed more money in one year than is available to distribute from the income received in that year, you will need to analyse the balance from undistributed income arising in earlier years.

This is known as a 'spreadback' calculation. The income arising in earlier years

can be analysed using the trust report program.
When spreading back we start with the most recent year in which income has been accumulated. If the trustees have over-distributed in earlier years we may have already made a spreadback calculation and used income accumulated in an earlier year. It is important that we do not use that accumulation again in the current spreadback. You cannot go back more than six years before the year in which the distribution was made. So if the trustees have made an excess distribution in 2003/04 you can only go back to 1998/99. But you only go back to accumulations made in that year if you have used up all the income accumulated in 2002/03, then 2001/02 and so on. The residence position of the beneficiary in the year(s) that the income was accumulated is not relevant.

25.9.3 *Confidentiality*

The INT Manual provides:

> **367630. Claims by non-resident beneficiaries of non-resident discretionary trusts** [April 2007]
> ...
> *Confidentiality when advising a beneficiary or agent about a payment*
> A beneficiary of a discretionary trust has no rights against the income of the trust. Trustees may favour one potential beneficiary rather than another. Therefore, to provide information to a beneficiary about the income of a trust that you have used to calculate relief due under ESC/B18 will infringe the confidentiality of the trustees.
> Because of this we cannot provide a breakdown of the underlying income comprising the repayment. The claimant (and their agent) only has a right to the final figure of the repayment we have calculated. However, if the beneficiary obtains the written permission of a trustee we can release information concerning the underlying trust income.
> Sometimes a trustee will act as the nominated agent of the beneficiary. In that case you can release details of the computation to the trustee without seeking further written permission. If you are providing this information, you will need to show a full calculation. If the original apportionment of income was calculated using the computer program, you will need to make a full Manual calculation (see INTM367890).

It is a strange state of affairs where a taxpayer is not entitled to know how his tax is computed, or whether it is correctly computed. No doubt a tribunal would order disclosure in an appropriate case.

25.9.4 *Disclosure of ESC B18 claim on tax return*

HMRC say:

> It is a stand-alone claim and does not affect how the beneficiary

completes his or her Self Assessment tax return.[18]

I think the point is that there is no box in the tax return for the figures to be entered.

25.10 ESC B18 relief for non-resident trust

ESC B18 provides:

> **Non-resident trusts**
> A similar concession will operate where a beneficiary receives a payment from discretionary trustees which is not within [what is now s.494(1) ITA] (ie where non-resident trustees exercise their discretion outside the UK).
> [1] Where a non-resident beneficiary receives such a payment out of income of the trustees in respect of which, had it been received directly, it would have been chargeable to UK tax, then the beneficiary—
> [a] may claim relief under s.278 ICTA (personal reliefs for certain non-residents); and
> [b] may be treated as receiving that payment from a UK resident trust but claim credit only for UK tax actually paid by the trustees on income out of which the payment is made.
> [c] The beneficiary may also claim exemption from tax in respect of FOTRA securities issued in accordance with [what is now s.714 ITTOIA] to the extent that the payment is regarded as including interest from such securities.
> [2] A UK beneficiary of a non-resident trust may claim appropriate credit for tax actually paid by the trustees on the income out of which the payment is made as if the payments out of UK income were from a UK resident trust and within s.687(1) ICTA.

There are three distinct sets of reliefs here:

(1) Personal reliefs for non-resident beneficiaries.
(2) Credit for tax paid by the trust as if the trust were UK resident; this only applies if the trust chooses to comply with UK tax requirements ie it pays trust rate tax on UK source income.
(3) Relief for interest on FOTRA securities: I suspect that this is in practice academic, though strictly it applies if:
    (a) the trust receives income from FOTRA securities;
    (b) the trustees are outside the FOTRA exemption for trustees;[19]

---

18 "HMRC Residency: Non-resident trusts" *http://www.hmrc.gov.uk/cnr/nr_trusts.htm*.

19 Because there are UK beneficiaries: see 19.6.2 (Discretionary trust).

(c) the income is paid to a beneficiary who is not UK resident and so is within the FOTRA exemption; and
(d) the trust complies with UK tax requirements.

ESC B18 goes on to specify the conditions for the relief, which are similar to the conditions for UK resident trusts:

> This treatment will only be available where the trustees—
> – have made trust returns giving details of all sources of trust income and payments made to beneficiaries for each and every year for which they are required; and
> – have paid all tax due and any interest, surcharges and penalties arising; and
> – keep available for inspection any relevant tax certificates.
>
> Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary received the payment from the trustees.
>
> No credit will be given for UK tax treated as paid on income received by the trustees which would not be available for set off under s 687(2) if that section applied, and that tax is not repayable (for example on dividends). However, such tax is not taken into account in calculating the gross income treated as taxable on the beneficiary under this concession.

25.10.1 *Who makes the claim?*

After considering the case of a settlor-interested trust[20] the International Manual continues:

> **339550. Claims by non-resident trustees of discretionary trusts** [December 2011]
>
> You may receive a claim or application from non-resident trustees of a discretionary trust. ...
>
> ***What to do if one or more beneficiaries of the trust has a residential address in the UK***
>
> If the completed form 4467(trustee)/FD shows any beneficiaries with UK residential addresses, Specialist Personal Tax, PT International Advisory will refer the papers to Specialist PT, Trusts & Estates, who will consider whether the trustees will need to make UK tax returns.
>
> ***What to do if all of the beneficiaries are resident in the same country as the trustees and the settlor of the trust is excluded from benefit***

20 See 59.4.3 (Settlor treaty-resident outside UK).

If all of the beneficiaries of the trust are resident in the same country as the trustees and the settlor of the trust is excluded from benefit, you can allow relief to the trustees.

25.11 UK trust - non resident beneficiary: DT relief

25.11.1 *DTAs with OECD model "other income" article*

SP 3/86 provides:

> **Payments to a non-resident from UK discretionary trusts or UK estates during the administration period: double taxation relief**
> **Introduction**
> 1 This statement explains how relief from UK tax under double taxation agreements will be given in respect of payments made to a non-resident [from] a UK discretionary trust or a UK estate.
> **Background**
> ***Discretionary trusts***
> 2 Generally speaking, a non-resident beneficiary receiving payments from a UK discretionary trust is not entitled to repayment of the tax paid by the trustees on the trust income. However, under concession B18 (which embodies a longstanding practice) HMRC 'looks through' the trust income to the underlying component parts of that income. The purpose of this 'looking through' is to allow the recipient of the income any relief that would have been available to him under the Taxes Acts had the income come to him direct instead of through the trustees.
> 3 Where the beneficiary is resident in a country with which the UK has a double taxation agreement, further relief under the 'looking through' principle may be due. Thus, for example, if the agreement provides for a withholding rate on interest of 15% and interest liable to UK tax formed part of the trust income which had suffered tax at 40% (ie the rate applicable to trusts) then, under the 'looking through' principle, the beneficiary would be repaid the amount of tax suffered in excess of the withholding rate, in this case 25%.
> 4 Some of the UK's double taxation agreements include an 'other income' Article. The purpose of this Article is to determine in which country income not expressly dealt with elsewhere in the agreement should be taxed. In the UK's agreement the article sometimes gives sole taxing rights in respect of such income to the recipient's country of residence.

It is in fact standard OECD model form to give sole taxing rights in respect of such income to the recipient's country of residence. OECD Model Article 21(1) provides:

> Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

This wording would apply to income from a discretionary trust.

> 5 It has been the practice of HMRC to apply the 'looking through' principle to all cases where relief in respect of the discretionary payment was sought and to refuse claims where full repayment of UK tax was claimed under the provision of [the] 'other income' Article in the agreement.
> [Para 6 deals with estates: see 79.18 (Non-resident beneficiary of UK estate: DT relief).]
> **Change of practice**
> 7 Following a review of their practice in these two areas, HMRC have accepted that if a payment made by trustees out of a UK discretionary trust falls to be treated as a net amount in accordance with TA 1988 s 687(2) [now s.494 ITA], the 'looking through' principle is not appropriate where the beneficiary is resident in a country with which the UK has a double taxation agreement and the 'other income' Article gives sole taxing rights in respect of such income to that country. (This will usually be the case where income from trusts is not specifically excluded from the Article.) This means that tax paid by the trustees in respect of the discretionary payment will be repayable to the beneficiary, provided that any conditions set out in the 'other income' Article are met. For example, the recipient may be required to show that he is subject to tax on the income in his country of residence.
> 8 [This deals with estates]
> 9 Where the 'other income' Article does not give sole taxing rights to the country of residence in respect of the trust or estate income or there is no double taxation agreement with the country concerned, the existing 'looking through' practice will continue to be applied where it is to the advantage of the beneficiary.

The DTAs which confer relief under the "other income" article on discretionary payments made by UK resident trustees are mostly the older generation of treaties. I think the reason is that before 1973, discretionary trusts were regarded as transparent, so distributed income of discretionary trust was not regarded as falling under the "other income" article.[21] DTAs made from the 1980's onwards usually exclude trust and estate income

21 See 25.3.2 (Discretionary trust payment: what is the source?).

from the "other income" article.

The International Manual sets out a list of the countries whose DTAs provide relief for discretionary payments made by UK resident trustees. It is not however up to date and for convenience I divide it into two parts:

> **INTM367800 - DT applications and claims: Non-resident beneficiaries of UK trusts** [April 2007]
> **DTAs where relief is available under the 'other income' article on discretionary payments made by UK resident trustees**
> The DTTs which currently confer relief under the "other income" article on discretionary payments made by UK resident trustees are:

Austria	Kenya
Bosnia Herzegovina*	Montenegro*
Portugal	Morocco
Romania	Namibia
Croatia*	Serbia*
Egypt	Sudan
Ivory Coast	Swaziland
Israel	Tunisia
Jamaica	Zambia

* Bosnia-Herzegovina, Croatia, Montenegro, Serbia: relief is given under the terms of the old UK/Yugoslavia DTT: see SP 3/07.

In the following former USSR states, DTT relief ceased in 2002: Armenia, Belarus, Georgia, Kyrgyzstan, Lithuania, Moldova, Tajikistan, Turkmenistan; see SP 4/01 [2002] STI 32.

The following countries are still mentioned in the INT Manual list but should be deleted following new treaties (date of treaty in brackets):

Barbados (2012)
Hungary (2011).
France (2008)
Germany (2010)
Macedonia (2007)
Poland (2006)
Slovenia (2007)
South Africa (2002)
Spain (2013, in force 12 June 2014)

25.11.2 *DTAs with restrictions on "other income" article*

UK DTAs from the 1980's onwards mostly exclude trust and estate

income from the "other income" article. Art 23(1) of the France/UK DTA is typical:

> Items of income beneficially owned by a resident of a Contracting State, wherever arising, which are not dealt with in the foregoing Articles of this Convention, *other than income paid out of trusts or the estates of deceased persons in the course of administration,* shall be taxable only in that State.

This leaves relief to be claimed under ESC B18.[22]

Interestingly, the UK/Germany treaty (2010) deals with the point expressly.[23] Article 21 provides:

> 1) Items of income beneficially owned by a resident of a Contracting State, wherever arising, which are not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.
> 2) Notwithstanding the provisions of paragraph 1, the following provisions shall apply with respect to income paid out of trusts or the estates of deceased persons in the course of administration:
> Where such income is paid to a beneficiary who is a resident of Germany by trustees or personal representatives who are residents of the UK out of income received by those trustees or personal representatives which would, if those trustees or personal representatives had been residents of Germany, have fallen within other Articles of this Convention, the beneficiary shall be treated as having received an amount of the income received by the trustees or personal representatives corresponding to the income received by him and any tax paid by the trustees or personal representatives on that amount shall be treated as having been paid by the beneficiary.

Why? Presumably the German authorities do not like German residents to be taxed by law and untaxed by HMRC extra-statutory concessions

---

22 The US/UK DTA has this exclusion and the Exchange of Notes on that DTA comments:"With reference to paragraph 1 of Article 22 (Other income) - it is understood that the purpose of the exclusion from the paragraph for income paid out of trusts or the estates of deceased persons in the course of administration is to allow a recipient of such income the relief that would have been available to him under the provisions of the Convention had they received the income direct instead of through the trust or estate." More accurately, the purpose is to prevent the recipient of such income from receiving *more than* the relief that would have been available to a person under the provisions of the Convention and ESC B18 had they received the income direct instead of through the trust or estate. But it comes to the same thing.

23 Barbados (2012) is the same, so perhaps this will be the new standard form.

such as ESC B18 and A14. Those who believe that tax law should be statutory and not concessionary will say: quite right too.

It is curious that the programme to legislate ESCs, which has legislated many trivial ESCs, has not covered the important ESC B18. No explanation has been given, so it is tempting to speculate. Perhaps it has been filed as too difficult; perhaps HMRC are planning changes to the law; perhaps legislation will come eventually.

In the USA/UK DTA the treaty excludes trust and estate income in the standard wording, and point is dealt with by the DTA Exchange of Notes:

> With reference to paragraph 1 of Article 22 (Other income)—
> it is understood that the purpose of the exclusion from the paragraph for income paid out of trusts or the estates of deceased persons in the course of administration is to allow a recipient of such income the relief that would have been available to him under the provisions of the Convention had he received the income direct instead of through the trust or estate.

25.12 Are discretionary trusts "beneficial owners" for DTA purposes?

25.12.1 *Meaning(s) of "beneficial ownership"*

The expression "beneficial ownership" has (at least) three possible meanings:

(1) The English property law/trust law meaning, where it is contrasted with bare legal ownership and is (more or less) synonymous with equitable ownership.[24]

(2) An international tax law meaning, in the context of DTAs.

---

24 For this meaning, see 62.6 ("Beneficial ownership" of FOTRA securities).
This is not of course to say that "beneficial ownership" in an English statute always has the the English law meaning: the context governs the sense. The CG Manual offers an example of a case where "beneficial" was used in a tax statute with a wider, DTA-style meaning. The former s.210(2) TCGA provided an exemption on the disposal of a life policy with (in short) an exception where the person making the disposal was "not the original beneficial owner". But trustees qualified for the exemption as they were the "beneficial owner" for this purpose:

> "**69055 Exemption for second hand policies: Disposals before 9 April 2003** [February 2010]
> ... Where trustees took out a life insurance policy ... it could be accepted that they were the beneficial owners of the policy within the old s.210(2) TCGA."

(3) A meaning (or set of meanings) in the context of money laundering.[25]
These are all quite distinct and discussion of the meaning in one context has almost no relevance in other contexts. It would have been better to have three distinct expressions, but the usages are now too well established to alter that, and the context will generally show which meaning is intended.

A full discussion would require three long chapters.

25.12.2 *Discretionary trusts: Beneficial owners for DTA purposes*

Relief under DTAs is frequently limited to the beneficial owner.

It is clear that the trustees are the "beneficial owner" of income of a discretionary trust in the DTA sense and so can qualify for DT relief.

The OECD are at present consulting on a revised commentary which will make this clearer. The proposed commentary is as follows (the point is made in the footnote but the entire passage is important):

> **Commentary on Article 10 (Dividends)**
> 12. The requirement of beneficial owner was introduced in paragraph 1 of Article 10 to clarify the meaning of the words "paid ... to a resident" as they are used in paragraph 1 of the Article. It makes plain that the State of source is not obliged to give up taxing rights over dividend income merely because that income was paid direct to a resident of a State with which the State of source had concluded a convention.

---

25 See (1) reg.6 Money Laundering Regulations 2007 (Meaning of beneficial owner). This is too long to set out in full, but it includes "the class of persons in whose main interest the trust is set up or operates."
(2) The Glossary to the Financial Action Task Force's 40 Recommendations defines beneficial owner as: "the natural person(s) who ultimately owns or controls a customer and/or the person on whose behalf a transaction is being conducted. It also incorporates those persons who exercise ultimate effective control over a legal person or arrangement." See *http://www.fatf-gafi.org/media/fatf/documents/FATF%20Standards%20-%2040%20Recommendations%20rc.pdf*
(3) OECD "Behind the Corporate Veil: Using Corporate Entities for Illicit Purposes", (2001) *http://www.oecd.org/dataoecd/0/3/43703185.pdf*, p.14 has a related definition: In this Report, "beneficial ownership" refers to ultimate beneficial ownership or interest by a natural person. In some situations, uncovering the beneficial owner may involve piercing through various intermediary entities and/or individuals until the true owner who is a natural person is found. With respect to corporations, ownership is held by shareholders or members. In partnerships, interests are held by general and limited partners. In trusts and foundations, beneficial ownership refers to beneficiaries, which may also include the settlor or founder."

12.1 Since the term "beneficial owner" was added to address potential difficulties arising from the use of the words "paid to … a resident" in paragraph 1, it was intended to be interpreted in this context and not to refer to any technical meaning that it could have had under the domestic law of a specific country (in fact, when it was added to the paragraph, the term did not have a precise meaning in the law of many countries). The term "beneficial owner" is therefore not used in a narrow technical sense (such as the meaning that it has under the trust law of many common law countries[26]), rather, it should be understood in its context, in particular in relation to the words "paid … to a resident", and in light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance.

12.12 Where an item of income is paid to a resident of a Contracting State acting in the capacity of agent or nominee it would be inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption merely on account of the status of the direct recipient of the income as a resident of the other Contracting State. The direct recipient of the income in this situation qualifies as a resident but no potential double taxation arises as a consequence of that status since the recipient is not treated as the owner of the income for tax purposes in the State of residence.

12.3 [This paragraph deals with the controversial topic of conduit companies, and need not be set out here.]

12.4 In these various examples (agent, nominee, conduit company acting as a fiduciary or administrator), the recipient of the dividend is not the "beneficial owner" because that recipient's right to use and enjoy the dividend is constrained by a contractual or legal obligation to pass on the payment received to another person. Such an obligation will normally derive from relevant legal documents but may also be found to exist on the basis of facts and circumstances showing that, in substance, the recipient clearly does not have the right to use and enjoy the dividend unconstrained by a contractual or legal obligation to pass on the payment received to another person. This type of obligation must be related to the payment received; it would therefore not include contractual or legal obligations unrelated to the payment received even if those obligations could effectively result in the recipient using the payment received to satisfy those obligations. Examples of such unrelated obligations are those unrelated obligations that the recipient may have as a debtor or as a party to financial transactions or typical distribution obligations of pension schemes and of collective investment vehicles entitled to treaty benefits under the principles of paragraphs 6.8 to 6.34 of the Commentary on Article 1. Where the recipient of a dividend does have the right to use and enjoy the dividend unconstrained by a contractual or legal obligation to pass on the payment received to another

---

26 [Footnote original] For example, where the trustees of a discretionary trust do not distribute dividends earned during a given period, these trustees, acting in their capacity as such (or the trust, if recognised as a separate taxpayer), could constitute the beneficial owners of such income for the purposes of Article 10 0 even if they are not the beneficial owners under the relevant trust law.

> person, the recipient is the "beneficial owner" of that dividend. It should also be noted that Article 10 refers to the beneficial owner of a dividend as opposed to the owner of the shares, which may be different in some cases. ...[27]

See too OECD Commentary on OECD model article 11, para 9-11.

25.13 Scots trusts and Scots beneficiaries (from 2016)

HMRC say:

> 45. Income from discretionary and accumulation trusts is distributed to beneficiaries at the discretion of the trustees. The trustees of UK resident trusts are currently charged on their income at the trusts tax rate (50 per cent - this will fall to 45 per cent in 2013-14) or dividend trust rate (42.5 per cent - this will fall to 37.5 per cent in 2013-14). The beneficiaries' income is treated as being received net of tax at the trust rate, so they currently receive a tax credit of 50 per cent.
>
> 46. Income flowing through these trusts loses its character - in other words, irrespective of whether the income arising to the trust was savings or non-savings income all the income would be treated as non-savings income in the hands of the beneficiaries. Income payments from discretionary trusts will therefore be liable at the Scottish rate when paid to Scottish beneficiaries.
>
> 47. In broad terms the trustees of non-resident discretionary trusts are only liable to income tax at the trust rate on the UK source income that they receive. They are not liable to UK income tax on foreign source income although they may be liable to tax on this income in the overseas jurisdiction. Discretionary income distributions from non-UK resident

trusts are treated as untaxed income of the beneficiary irrespective of whether the trustees have suffered tax on the trust income. The beneficiary may if certain conditions are met claim credit for some of the tax paid by the trustees. Such income should be included by Scottish taxpayer beneficiaries as part of their total income in the normal way, and this would be liable at the Scottish rate of income tax. This would be consistent with the current tax treatment and simple to administer (!).[30]

30 HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (May 2012).

CHAPTER TWENTY SIX

IIP TRUSTS: INCOME TAX

26.1 Introduction and terminology

This chapter considers the income taxation of interest in possession trusts (**"IIP trusts"**), that is, in short, trusts where the income is paid to a beneficiary. I call that beneficiary **"the life tenant"**; HMRC use the term "IIP beneficiary" which is more accurate, but perhaps more opaque. The trustees may be called **"IIP trustees"**.

26.2 Taxation of IIP trustees

Trustees are in principle subject to tax on income arising to them if it is UK source income or if they are UK resident. This applies even to trustees of transparent IIP trusts. There are however a number of exceptions for trustees of IIP trusts as exemptions for life tenants enure for the benefit of the trustees.

26.2.1 *Income mandated to life tenant*

The TSE Manual provides:

> **3040. Trust income mandated to a beneficiary** [March 2013]
> Trustees of interest in possession trusts (IIPs) (TSEM1564) exclude from the Trust and Estate Tax Returns income mandated to beneficiaries. The beneficiaries include this on their personal returns.
> This practice has been extended to trustees of settlor interested trusts (TSEM4000+) where the settlor (or the settlor's spouse or civil partner) is also an IIP beneficiary and the trust income is mandated to them.[1]

The TSE Manual later expands on this:

> **3763. Trust income and gains: beneficiary entitled to trust income - mandated income** [August 2013]

---

1 On this point see 27.8 (Taxation of trustees of settlor-interested trust).

Sometimes the trustees mandate trust income to a beneficiary. If the trustees mandate income to a beneficiary, it means that the beneficiary receives it and the trustees do not. So in such a case there is no statutory basis (see TSEM3761) for taxing the trustees as being in receipt of the income. The beneficiary both receives the income and is entitled to it. The trustees exclude the income from the Trust and Estate Tax Return, even if it is untaxed. The beneficiary's trust income is

- a share of the net taxed income as calculated on normal basis, and
- the gross amount of untaxed income directly chargeable on him.

The beneficiary (or, where the settlor has retained an interest, the settlor) includes the income on his personal return.

9310. Ownership and income tax: income tax principles - receiving or entitled to [July 2011]

There is specific tax legislation in ITTOIA 2005 saying who is liable for tax on income:

S271 for rental income

S371 for interest

S385 for dividends and other distributions

S581 for income from intellectual property, for example royalties.

For rent, interest and income from intellectual property the legislation says that the person liable for income tax is the person receiving or entitled to the income. For dividends and other distributions the legislation says the person liable for income tax is the person to whom the distribution is made or is treated as made, or the person receiving or entitled to the distribution. Further detail about particular types of income from property is given in TSEM9900.

The 'receiving' basis enables you to tax the person in receipt of the income, even if you cannot trace the person entitled to it. But ultimately you want to tax the person who is entitled. For example, in an interest in possession trust (TSEM1105), the trustees are initially taxable on the trust income because they receive it. But the IIP beneficiary is ultimately taxable on the trust income because he or she is entitled to it. So you tax the beneficiary on the income on the 'entitled' basis, and give credit for any tax paid by the trustees who received it.

In sum, for the purpose of taxation of income, you want to establish who is 'entitled to' the income.

26.2.2 *Life tenant non-resident*

The taxation of UK trustees of an IIP trust (assuming they have not mandated the income to a life tenant) is affected by the residence of the life tenant. TSE Manual provides:

3160. Resident trustees with trust income from abroad: beneficiary is not resident [February 2011]
These instructions apply only if the beneficiary has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant.
The trustees' income tax liability is based on the beneficiary's residence position. Trustees are not chargeable in respect of the share of income from abroad payable to the non-resident beneficiary. They exclude it from the Trust and Estate Tax Return. [See] *Williams v Singer* 7 TC 387

26.2.3 *Life tenant remittance basis taxpayer*

The taxation of UK trustees of an IIP trust (assuming they have not mandated the income to the life tenant) similarly depends on whether the life tenant is a remittance basis taxpayer. TSE Manual provides:

3165. Resident trustees with trust income from abroad: beneficiary is resident but not domiciled [April 2010]
These instructions apply only if the beneficiary has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant.
The trustee' income tax liability is based on the beneficiary's domicile. The beneficiary must make a claim for any year that the remittance basis is to apply.
If in any year the beneficiary claims the remittance basis the trustees' liability on the share of income from abroad payable to the beneficiary is limited to the amount remitted to the UK. Trustees exclude from the Trust and Estate Tax Return any such overseas income that is not remitted to the UK.
If in any year the beneficiary does not claim the remittance basis the trustees are assessable on the amount arising.
[See] *Williams v Singer & others* 7 TC 387
3170. Resident trustees with trust income from abroad - beneficiary is resident but not ordinarily resident [April 2011]
These instructions apply only if the beneficiary:
- has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant;
- is a citizen of the Commonwealth or the Republic of Ireland.[2]

The trustees' income tax liability is based on the beneficiary's not

2 The Manual is out of date here: the requirement to be a citizen of the Commonwealth or the Republic of Ireland does not apply from 2005/06.

ordinarily resident status.
The beneficiary must make a claim for any year that the remittance basis is to apply.
If in any year the beneficiary claims the remittance basis the trustees' liability on the share of other income from abroad payable to the beneficiary is limited to the amount remitted to the UK. Trustees exclude from the Trust and Estate Tax Return any such overseas income that is not remitted to the UK.
If in any year the beneficiary does not claim the remittance basis the trustees are assessable on the amount arising.
[See] *Williams v Singer & others* 7 TC 387

Form SA904(Notes) Notes on Trusts & Estate Foreign for the year ended 5 April 2013 directs:

If the beneficiary(ies) of the trust has an absolute interest in the trust (including a life tenant) and it is known that they will make a claim to be taxed on the remittance basis, include on page TF 2 (not page TF 1) only amounts of foreign income that have been 'remitted'.
Add up all the dividends and distributions from overseas sources included in column E on Page TF 2. Use the 'Additional information' box 4.39 on page TF 5 to make the following declaration.
The amount in box 4.4 on Page TF 2 includes a total of £ (x) in dividends and distributions from overseas sources.

The reason for this is that where dividend income is taxed on a remittance basis the rate of tax on trustees is the basic rate and not the dividend ordinary rate. Section 14 ITA provides:

(1) Income tax is charged at the dividend ordinary rate on the income of persons other than individuals which—
(a) is dividend income,
(b) would otherwise be charged at the basic rate, and
(c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).

This is consistent with the statutory rules for the taxation of individuals: see 46.4 (Rates of tax on dividend income). It is somewhat impractical for trustees to know whether income has been remitted.

What if income is remitted in a year after receipt? In practice I expect tax is paid by the life tenant and such income is not entered on the trust tax return.

26.2.4 *Life tenant entitled to tax credit relief*

The TSE Manual provides:

> **3655. Relief for overseas tax: Beneficiary entitled to trust income** [June 2009]
> These instructions apply to taxed overseas trust income that is treated as a beneficiary's income as it arises.
> The trustees can claim, and receive, tax credit relief on behalf of the beneficiary. The amount is based on the beneficiary's marginal rate and residence status. INTM367730+ onwards has instructions about tax credit relief.
> If the trustees do not claim relief, the overseas income chargeable is the net amount after deduction of overseas tax.
> A paying agent may have allowed provisional tax credit relief on overseas income. If that provisional relief is excessive, the beneficiary accounts for the excessive relief.

The Manual continues with a comment on annuities, but that is so rare in practice it is not set out here.

26.3 Taxation of life tenant

26.3.1 *What is source of income of beneficiary?*

The life tenant is of course subject to tax on income received from the trust if it is UK source income or if the life tenant is UK resident. For this purpose it is necessary to identify the source. The choice is between:

(1) regarding the trust as the source of trust income; or
(2) regarding the trust assets as the source, in which case one "looks through" the trust and it is described as "transparent".[3]

The answer depends on the terms of the trust, construed in accordance with the proper law of the trust.

Similar issues arise for unit trust income, see 39.1 (Unit Trusts – Introduction).

For the position where the life tenant pays the income (eg pays interest or rent to the trustees) see 30.4.7 (Interest-bearing loan to life tenant).

26.3.2 *England and other "Baker" jurisdictions*

The source of the life tenant's income is the underlying trust assets (not

---

3 See 84.2 ("Transparent" and "opaque").

the trust) if, under the terms of the trust, construed in accordance with the proper law of the trust, the beneficiary is entitled to the income of each trust asset as it arises. This is the case for a standard form interest in possession trust governed by English law.[4] In other words, an IIP trust is transparent for IT purposes.

Rather surprisingly, this applies even if the life interest is subject to an annuity: *Nelson v Adamson* 24 TC 36. But in practice annuities are not used so the point is of academic interest only.

For completeness: it has been suggested, tentatively and *obiter,* that this does not apply to trading income, at least for the purposes of DTAs;[5] however there is no sound basis for that distinction and the correct view is that the transparency principle applies generally.

It is possible to draft an English law trust so that under the terms of the trust the beneficiary is not entitled to a proprietary interest in the income as it arises, but merely has the right to call on the trustees to transfer to them a sum equal to the net income.[6] Then the trust (not the underlying assets) will be the source. In practice this is not normally done.[7]

26.3.3 *New York and other "Garland" jurisdictions*

Common form interest in possession type trusts governed by some foreign trust laws do not give the beneficiary the right to income as it arises, but only the right to recover a sum from the trustees. The right is *in personam* not *in rem*. In this case the trust is not transparent and the beneficiary's income is classified as an annual payment (regardless of the type of income arising to the trustee).[8]

This is so even if the beneficiary is described as "life tenant" and is, in

---

4 *Baker v Archer-Shee* 11 TC 749. This issue has given rise to academic debate ever since the House of Lords reached its 3:2 decision in *Baker.* See Waters, "The Nature of the Trust Beneficiary's Interest" (1967) 45 Can Bar Rev 219; Schabe, "The Trust Conduit Principle: A Foundationless Theory?" [1999] Journal of Australian Taxation 17, accessible *http://www.austlii.edu.au/au/journals/JATax/1999/17.html.*

5 *R (oao Huitson) v HMRC* [2010] STC 715 at [54]. The point was not considered on appeal, see [2011] STC 1860.

6 *R v Special Comrs ex p Shaftesbury House & Arethusa Training Ship* 8 TC 367 appears to be an example. But that case was decided before *Baker*, and it should be decided differently now.

7 Except perhaps unit trusts: see 39.3 (Unauthorised unit trust: foreign trustees).

8 *Garland v Archer Shee* 15 TC 693.

economic reality, in the same position as a life tenant under an English law trust. In this respect, a *Garland* trust is like an English law estate of a deceased person, not an English law trust.

26.3.4 *Scots trusts*

A liferent (the Scottish term for a life interest) under a Scots trust in common form is not transparent.[9]

This has been reversed for UK resident Scots trusts; s.464 ITA provides:

> (1) This section applies if—
>
> (a) income arises to trustees under a trust having effect under the law of Scotland,
>
> (b) the trustees are UK resident, and
>
> (c) a beneficiary under the trust ("B") would have an equitable right in possession to the income if the trust had effect under the law of England and Wales.
>
> (2) B is treated for income tax purposes as having an equitable right in possession to the income (even though B has no such right under the law of Scotland).

It is difficult to see why the statutory rule only applies to UK resident trusts. It is difficult to see why it applies to Scotland and no other *Garland* jurisdictions. The reason is that it is not part of a coherent regime for the taxation of trusts but a late Finance Bill amendment to deal with a narrow domestic anomaly.[10] In practice it will not often matter.

---

9 "There is no difference between the law of Scotland as regards the beneficiary's rights and the law which is admitted in the record to be the law of the State of New York;" "the right of property in the estate of the trust is vested in the trustees to the exclusion of any competing property, and the right of the beneficiary, ... as under the law of New York, is merely a right *in personam* against the trustees to enforce their performance of the trust." *Inland Revenue v Clark's Trustees* [1939] SC 11 at p.24 accessible *http://www.kessler.co.uk/tfd-archive* approved *Leedale v Lewis* 56 TC 501 at p.538. See too Scottish Law Commission, *Discussion Paper on the Nature and the Constitution of Trusts* para 2.5:

> "The beneficiary has a … right to compel the trustee to administer the trust funds in accordance with the provisions of the declaration of trust. This is a personal right. It is axiomatic that in Scots law the beneficiaries do not have a real right or a quasi-real right in the trust property. They have no proprietary interest in the trust fund."

Scottish Law Commission 2006 accessible *http://www.scotlawcom.gov.uk*.

10 See Discussion Paper on Apportionment of Receipts and Outgoings para 4.5, Scottish Law Commission, 2003, accessible *http://www.scotlawcom.gov.uk/download_file/view/49/*.

One can create a transparent Scots law trust with appropriate wording.[11]

26.3.5 *Commentary*

The UK rules strictly require one to ask whether every trust jurisdiction is:
(1) a *Baker* jurisdiction (where the life tenant of a standard form IIP trust has a right to income as it arises); or
(2) a *Garland* jurisdiction (where the life tenant only has a right against the trustee).

That is a somewhat metaphysical question as it is difficult to pin down any practical consequence (other than tax) which arises from the answer.

The distinction between *Baker* and *Garland* trusts should be abolished. It has no economic substance and precious little legal basis. It is to a large extent undone by concession. This could easily be done by extending s.464 ITA to apply to all *Garland* trusts.

26.4 Beneficiary's credit for tax paid by trustees

26.4.1 *Income taxed on trustees or taxed at source*

The TSE Manual provides:

> **3764. Beneficiary entitled to trust income - grossing up** [August 2013]
> If the trustees receive income that is taxed at source, or if they pay tax on it under self assessment, the beneficiary will receive a net amount. But he or she is entitled to the gross amount. Consequently he or she is taxable on the gross amount.
> For example, the trustees have gross bank interest of £1,000 on which tax is deducted at source £200.They pay £800 to the beneficiary. The beneficiary is entitled to the gross amount £1,000, and is taxable on that amount.
> **3765. Beneficiary entitled to trust income - credit for trustees' tax** [August 2013]
> If the trustees have paid tax or have received income with tax taken off, the beneficiary is given credit for that tax.
> For example, in 2009-10 the trustees have gross rental income of £2,000 on which they pay tax £400. They pay £1,600 to the beneficiary. The beneficiary is entitled to the gross amount £2,000, and is taxable on that

11 "Scottish Trust beneficiaries are not entitled to specific items of trust property *unless that is expressly provided for in the Trust Deed*." Discussion Paper on Apportionment of Receipts and Outgoings para 4.5.

amount. He or she is given credit for the £400 tax paid by the trustees. If the beneficiary is a higher rate taxpayer, he or she will have further tax to pay see example in TSEM3766. If the beneficiary is a non-taxpayer, he or she may claim a repayment.

The beneficiary is given credit for trustees' tax only if the beneficiary is taxable on the same item. If the IIP trustees receive an amount that is capital in trust law and deemed to be income for tax purposes (see TSEM3201 and TSEM3768), the beneficiary is not given credit for the trustees' tax. The IIP beneficiary would not be entitled to such a receipt, as it would not be trust income, and would not be taxable on the receipt...

3766. Beneficiary entitled to trust income - grossing up and credit for trustees' tax example [August 2013][12]

An IIP trust where the Settlements legislation does not apply (see TSEM3765) receives income in 2009-2010: rental income £2,000 and bank interest £800 (basic rate tax of £200 deducted at source).

Trustee's position

	Rent	interest
gross income	2,000	1,000
tax due	400	200
net income	1,600	800

The trustee receives credit for the tax deducted at source from the bank interest (£200) so has to pay £220 tax.[13]

Beneficiary's position (***Beneficiary is a higher rate taxpayer***)[14]

	Rent	interest
net income (as above)	1,600	800
grossed up (@ 20%)	2,000	1,000
Beneficiary is a higher rate taxpayer		
tax at 40%	800	400
less credit	-400	-200
further tax to pay	400	200

For an example involving TMEs, see TSEM8345-8350.

3767. Beneficiary entitled to trust income - form R185 (Trust Income) [August 2013]

In the example in TSEM3766 the entries on the form R185 (Trust Income) given by the trustees to the beneficiary would be:

---

12 [Author's footnote] I have slightly altered the wording of the examples to enhance clarity.

13 [Author's footnote] The correct figure is £200.

14 [Author's footnote] If the beneficiary is a basic rate taxpayer, there is no further tax due.

	Net amount	tax paid
Box 3 non-savings income	£1600	£400
Box 4 savings income	£800	£200

The beneficiary uses the information on form R185 (Trust Income) to make his or her tax return or to claim repayment.

26.4.2 *Mandated income*

The TSE Manual provides:

> **3763. Beneficiary entitled to trust income - mandated income** [August 2013]
> Sometimes the trustees mandate trust income to a beneficiary. If the trustees mandate income to a beneficiary, it means that the beneficiary receives it and the trustees do not. So in such a case there is no statutory basis (see TSEM3761) for taxing the trustees as being in receipt of the income. The beneficiary both receives the income and is entitled to it. The trustees exclude the income from the Trust and Estate Tax Return, even if it is untaxed. The beneficiary's trust income is
> - a share of the net taxed income as calculated on normal basis, and
> - the gross amount of untaxed income directly chargeable on him.
>
> The beneficiary (or, where the settlor has retained an interest, the settlor) includes the income on his personal return.

26.5 Trustees expenses

26.5.1 *Deduction for trustees*

The TSE Manual provides:

> **8310. IIP trustees: basic rate, etc tax** [April 2011]
> In taxing the trustees of an IIP trust at rates up to basic rate, the usual deductions against various sources of income (e.g. deductions to arrive at net trading profit or rental income) are allowed. But the trustees do not get relief at those rates of tax for any 'trustees' expenses' whatsoever. The tax case of *Aikin v Macdonald's Trustees* (3 TC 306 -1894), concerned with income remitted to the UK from abroad, confirmed the general principle that trust management expenses are not to be taken into account in arriving at the measure of taxable income of the trustees. The case found that the full amount of income received in the UK was taxable without any deduction in respect of expenses incurred in this country in managing the trust. As Lord McLaren said, 'the only kind of deductions allowed is expenditure incurred in earning the profits, there is no deduction under any circumstances allowable for expenditure

incurred in managing profits which have already been earned and reduced into money' (p309).

8315. IIP trustees: deemed income [April 2011]

Unlike the trustees of accumulation/discretionary trusts, the trustees of IIP trusts are not normally chargeable to the special trust rates. Consequently there is generally no equivalent question of allowing TMEs against the special trust rates - but see 'Practical considerations' below.

For IIP trusts, there are certain items that are capital in trust law but deemed to be income for tax purposes, and are also taxable at the special trust rates. (See TSEM3201.)

...

From 6 April 2007 Section 484 ITA provides for all the deemed income items in ITA/482, now including accrued income, to be given relief for allowable TMEs

Practical considerations

In practice, if an IIP trust incurs allowable TMEs, they will reduce the beneficiary's entitlement to trust income and will not normally be taken into account for the trustees' deemed income purposes. A capital receipt would normally not find its way into the hands of an IIP beneficiary, as it would not be trust income. So, the fact that the trustees were liable to the special trust rates on certain receipts would have no direct effect on the income beneficiary, and Section 484 ITA TMEs would not come into question. But if there is a high enough level of allowable income expenses such that they reduce the IIP beneficiary's entitlement to nil, and at the same time there is deemed income taxable on the trustees at the special trust rates, excess income expenses could be used against the trust rate income.

26.5.2 *Deduction for life tenant*

The TSE Manual provides:

8320. IIP beneficiaries: case law [April 2011]

There is case law in *Murray v CIR* (11 TC 133), *MacFarlane v CIR* (14 TC 540), and *CIR v Dewar* (16 TC 93-94). A beneficiary with an absolute interest in income (for example a life tenant) is entitled to the amount arising to the trustees that is available after any management and administration expenses etc. of the trustees have been provided for. Consequently the beneficiary is taxable on the net amount - *CIR v Hamilton of Dalzell (Lord)* (10 TC 406).

8325. IIP beneficiaries: TMEs not a tax deduction [December 2011]

In an IIP trust, the income beneficiary is entitled to the income as it

arises out of trust assets, with the exception of any part of that income that is properly paid away on trust expenses and some other items (see TSEM3761A). TMEs are considered as part of establishing what net income the beneficiary is entitled to in law. That entitlement then provides the measure on which to tax the beneficiary. So, 'allowable' TMEs for an IIP beneficiary do not constitute a tax deduction or a tax relief, because they represent sums of money that the beneficiary was not entitled to in the first place.

8330. IIP beneficiaries: tax law [April 2011]

ITA Sections 499 to 503 provide generally for the IIP beneficiary's income to be reduced by allowable TMEs for tax purposes.

ITA Sections 501 and 502 provide for relief for allowable TMEs for non-resident IIP beneficiaries.

Section 500 ITA provides:

(1) Expenses of the trustees can be used to reduce the beneficiary's income for income tax purposes only so far as—

(a) the expenses are incurred by the trustees in the current tax year or in an earlier tax year, and

(b) as a result of the expenses being chargeable to income as mentioned in subsection (2) or (3), the beneficiary's entitlement to the beneficiary's income is reduced by reference to the expenses.

"Chargeable to income tax" is defined in s.500 ITA:

(2) Expenses are chargeable to income for the purposes of subsection (1)(b) if they are chargeable to income by the trustees under a term of the settlement (subject to any overriding law which prevents the expenses from being so chargeable).

(3) Expenses are also chargeable to income for the purposes of subsection (1)(b) if they—

(a) are not chargeable to income by the trustees under a term of the settlement, but

(b) are chargeable to income by the trustees in accordance with any law (subject to any overriding term of the settlement which prevents the expenses from being so chargeable).

Section 500(4) ITA prevents double counting (for the avoidance of doubt):

Expenses cannot be used to reduce the beneficiary's income for income tax purposes so far as they are expenses which have fallen, or may fall, to be taken into account for the purpose of calculating the trustees' liability to income tax for any tax year.

26.5.3 *Non-resident beneficiaries*

Section 501 ITA provides:

> (1) This section applies if—
>
> (a) expenses of the trustees are to be used to reduce the beneficiary's income for income tax purposes, and
>
> (b) a proportion of the beneficiary's income is untaxed income (see section 502).
>
> (2) A proportion of those expenses is not to be so used.
>
> (3) That proportion is the same as the proportion of the beneficiary's income which is untaxed income.
>
> (4) In subsection (3) the references to the beneficiary's income and untaxed income do not, in either case, include so much (if any) of that income as is equal to the amount of income tax, or of any foreign tax, for which the trustees are liable on that income.
>
> (5) "Foreign tax" means any tax which—
>
> (a) is of a similar character to income tax, and
>
> (b) is imposed by the laws of a territory outside the UK.

Section 502 ITA provides a commonsense definition of "untaxed income":

> (1) For the purposes of section 501 the beneficiary's income is untaxed income so far as the beneficiary is not liable to income tax on it wholly or partly because the beneficiary—
>
> (a) has been non-UK resident, or
>
> (b) has been treated as resident in a territory outside the United Kingdom under double taxation arrangements.
>
> (2) If the income tax charged on the beneficiary for the beneficiary's income is limited under Chapter 1 of Part 14 (limits on liability to income tax of non-UK residents), the untaxed income includes so much of the beneficiary's income which is disregarded income (within the meaning of that Chapter) except so far as the disregarded income is within subsection (3).
>
> (3) The disregarded income is within this subsection so far as—
>
> (a) sums representing income tax have been deducted from the income,
>
> (b) sums representing income tax have been treated as deducted from or paid in respect of the income, or
>
> (c) there are tax credits in respect of the income.

Against which income does one set expenses? This question did not arise when all types of income were taxed at the same rates. Now we need s.503 ITA which provides the answer:

(1) This section applies if the beneficiary's income is to be reduced for income tax purposes by expenses of the trustees.
(2) The beneficiary's income is to be reduced in the following order—
first, reduce dividend income within subsection (3) (if any),
second, reduce dividend income not within that subsection (if any),
third, reduce savings income (if any), and
fourth, reduce other income (if any).
(3) Income is within this subsection so far as it is—
(a) chargeable under Chapter 3 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies),
(b) chargeable under Chapter 5 of that Part (stock dividends from UK resident companies), or
(c) chargeable under Chapter 6 of that Part (release of loan to participator in close company).
(4) If the trustees are liable for income tax charged on a component of the beneficiary's income at a particular rate, then any reduction of that component is to be made in accordance with the steps set out in subsection (5).
(5) Here are the steps.
Step 1 Deduct from the component the amount of income tax charged on it at the particular rate for which the trustees are liable.
Step 2 Take the result from Step 1 and reduce it (but not below nil) by the amount of the trustees' expenses so far as they have not already been used to reduce other components of the beneficiary's income.
Step 3 Take the result from Step 2 and gross it up by reference to the particular rate. The result is the reduced amount of the component of the beneficiary's income.

ITA change 91 provides:

Change 91: Settlements: trustees' expenses reducing beneficiary's income: sections 500, 503 and Schedule 1 (section 646A of ITTOIA)
This change makes explicit some of the rules about the way expenses incurred by trustees in connection with income to which a beneficiary is entitled reduce the amount of the beneficiary's income for tax purposes.
There are only two provisions in ICTA that concern the tax treatment of expenses in relation to income to which a beneficiary is entitled before it is distributed (where the beneficiary is regarded as having an interest in possession). These are:

- section 689A, which deals with the disregard of some expenses in the case of a non-resident beneficiary; and
- section 689B, which concerns the order in which expenses reduce the beneficiary's income.

While there are additional provisions in section 686(2AA) of ICTA that give some rules on the treatment of trustees' expenses in relation to accumulation or discretionary income, there is no corresponding provision for interest in possession trusts. The practices that have become established and which are reflected in these sections are based on the principle that the income of a beneficiary is the income arising to the trustees so far as the beneficiary is entitled to it.

There are two ways in which this principle operates.

First, if the trustees' expenses are chargeable to income under a provision of the settlement, then irrespective of whether they would be so chargeable in the absence of that provision, the expenses are to be taken into account. This is subject to the existence of any law that in a particular case (for example by way of a court order) overrides the provision in the trust deed.

This is different from the rule that operates in relation to accumulated or discretionary income where the terms of the settlement are to be ignored, and from what it appears that section 689A of ICTA provides for in this context.

If the deed is silent on whether a particular expense is chargeable to income then the expense is taken into account if it would be chargeable to income under general trust law.

These rules are reflected in section 500. They mean that an expense is allowable if it is chargeable to income under the trust deed, even if it would be chargeable to capital under general trust law. Conversely, in cases where general trust law would require an expense to be charged to income, but the trust deed charges it to capital, then the change means that the expense is not allowable.

The second area concerns how trustees' expenses are taken into account in such cases.

The expenses do not affect the amount of income on which the trustees are chargeable to tax, but operate to reduce the amount of the beneficiary's income. It is not that the beneficiary gets relief for the expenses as such; it is simply that the beneficiary is not entitled to the income used to pay the expenses. So, the beneficiary's income (as reduced by allowable expenses) is grossed up at the normal rate appropriate to that income to arrive at the gross amount which is to be treated as part of the beneficiary's total income.

This is not set out in the source legislation but, based on the decision in *CIR v Lord Hamilton of Dalzell* (1926), 10 TC 406 CS, it is the accepted way that expenses are taken into account. Section 503 reflects this.

This change also provides rules about cases where the trustees' expenses exceed a beneficiary's income. Section 500(1) applies in relation to the tax year in which the beneficiary's entitlement to income is reduced, whether the expense was incurred in that tax year or an earlier tax year. The reference to an earlier tax year means that the section covers cases where the trustees' expenses in an earlier tax year exceed the income in that earlier year and so the trustees are

carrying forward the excess.
This change is in principle adverse to some taxpayers and favourable to others. But it is expected to have no practical effect as it is in line with current practice.

The TSE Manual continues:

8335. IIP beneficiaries: tax law: Section 500 ITA [April 2011]
Section 500 provides that if, as a result of the expense being chargeable to income it reduces the beneficiary's entitlement to income, it reduces the measure of the beneficiary's income for tax purposes.
An expense can reduce the beneficiary's entitlement in two ways:
If it is chargeable to income under general trust law and there is no specific provision about the expense in the trust deed.
If it is chargeable to income under the trust deed, whether it is chargeable to income or capital in general trust law.
In cases where general trust law would require an expense to be charged to income, but the trust deed charges it to capital, the expense is not allowable, as it does not reduce the beneficiary's entitlement to income
In sum:

- if an expense is properly chargeable to capital in general trust law, but charged to income under the trust deed, the expense is allowed;
- if an expense is properly chargeable to income in general trust law, but charged to capital under the trust deed, the expense is not allowed.

The legislation for interest in possession trusts specifies that one must give priority to the provisions of the trust deed over general trust law when establishing whether the expense is an allowable trust management expense for tax purposes. In practical terms the provisions result in the IIP beneficiary being taxed on his or her entitlement to income.
8340. IIP beneficiaries: trust deed [April 2011]
The IIP beneficiary is taxed on the income of the trust net expenses properly chargeable to income.
'Properly chargeable to income' in the IIP trust context means properly chargeable to income under all four sources of trust law referred to in TSEM8020. By contrast with discretionary trusts, where Section 484 ITA specifically excludes provisions in the trust deed, this term for IIP beneficiaries includes expenses whose final incidence falls on income by virtue of the terms of the trust deed - Section 500(2) ITA.
So if an IIP trust deed allows the trustees to pay what are normally capital expenses out of income, those expenses reduce the measure of the beneficiary's income. If an IIP trust deed allows trustees to pay what are in general trust law income expenses out of capital, again the trust deed has priority over general trust law, and consequently the IIP beneficiary's income is not reduced by such expenses.

In the absence of a specific provision in the trust deed, general trust law applies. If the trustees pay expenses out of income that are properly chargeable to capital in general trust law, then the IIP beneficiary is taxable on the amount of income used to pay the expenses, even though he or she does not receive it.

8345. IIP beneficiaries: measure of income: net and gross amounts [April 2011]

Tax is charged on the beneficiary's entitlement. The beneficiary receives

- income net of tax and income expenses including TMEs (that receipt referred to below as 'the net amount'), but is actually entitled to
- the untaxed amount of the income, net of income expenses including TMEs (that entitlement referred to below as 'the gross amount').

So the net amount is grossed up at the appropriate tax rates to arrive at the amount included in the beneficiary's income for income tax purposes.

Example

Trustees income is £1,000; allowable TMEs are £250, income tax due is £200 (£1,000 at 20%).

The 'net amount' is £550

The 'gross amount' is £687.50 (£550 grossed up × 100 ÷ 80).

8350. IIP beneficiaries: measure of income: tax paid by trustees [April 2011]

The income tax paid by the trustees on that part of the income used for TMEs and other items excluded from the IIP beneficiary's entitlement is not part of the beneficiary's entitlement, because the income out of which the tax is paid is not part of the beneficiary's entitlement. But the rest of the tax paid by trustees represents income to which the IIP beneficiary is entitled.

The beneficiary is given credit for the tax already paid by the trustees (or deducted at source) on the amount included in the beneficiary's income for income tax purposes. That credit, i.e. tax already paid on the income to which the beneficiary is entitled, will necessarily be represented by the difference between the gross amount and the net amount as described in TSEM8345.

8355. IIP beneficiaries: Section 500 ITA: basis of allowance [April 2011]

Section 500(1)(a) ITA provides that allowable TMEs are allowed on the 'incurred' basis. So the beneficiary's entitlement in any tax year is income arising less allowable TMEs incurred.

Section 500 provides for unused allowable TMEs incurred in an earlier year to be used against the current tax year. In a year where allowable TMEs incurred exceed income arising the beneficiary's income entitlement will be nil. The excess allowable TMEs will be taken into account in later year/s.

For an expense to be properly chargeable to income in trust law the trustees must have authority to put the final burden of that expense on the income fund. Which fund they use to pay it out of temporarily is not relevant.

In a year where there is not enough income, trustees may borrow from capital to pay income expenses, and in the next year reimburse capital from income.

If an expense is properly chargeable to income, but the trustees pay all or part of it from trust capital in year 1 because there is no income or not enough income that year, the beneficiary's net income in year 1 will be reduced to nil. If in year 2 the trustees reimburse capital from income, that amount will be allowable against the beneficiary's income for tax purposes in year 2.

Example

Year 1, trust income £1,000, allowable TMEs £2,000.

Trustees pay £1,000 TMEs out of income, and £1,000 out of capital. Beneficiary's taxable income £1,000 less TMEs £1,000 = nil.

Year 2, trust income £3,000, allowable TMEs £1,000.

Trustees pay £1,000 TMEs of current year out of income, and reimburse capital £1,000 for income expenses of previous year.

Beneficiary's taxable income £3,000 less £2,000 = £1,000.

8360. IIP beneficiaries: tax law: order of set-off [April 2011]

Section 503(2) ITA provides the order of set-off for TMEs to reduce the income of an IIP beneficiary. The order of set-off of TMEs in an IIP beneficiary's tax calculation is the same as for accumulation/discretionary trustees (TSEM8250). But there is no grossing up of expenses as there is for accumulation/ discretionary trustees.

8365. IIP beneficiaries: tax law: order of set-off [June 2011]

Example

An IIP trust receives income in 2010-11:

rental income £1,000

bank interest £800 (basic rate tax of £200 has been deducted at source).

Trustee pays TMEs properly chargeable to income of £250.

Trustee's position

	Rent	Interest
Gross income	£1,000	£1,000
Tax due	£200	£200
Net income	£800	£800

The trustee receives credit for the tax deducted at source from the bank interest (£200) so has to pay £200 tax on the rent. TMEs do not affect the trustee's position.

Beneficiary's position

	Rent	interest
Net income (as above)	£800	£800
Minus TMEs (set first against savings income)		(£250)
	£800	£550
grossed up (@ 20%)	£1,000	£687.50

8370. IIP beneficiaries: tax law: form R185 (Trust Income) [April 2011]

In the example in TSEM8365 the entries on the form R185 (Trust Income) given by the trustees to the beneficiary would be:

	Net amount	Tax paid
Box 3 non-savings income	£800.00	£200.00
Box 4 savings income	£550.00	£137.50

The beneficiary uses the information on form R185(Trust Income) to make his or her tax return or to claim repayment.

8375. IIP beneficiaries: mandated income [April 2011]

Where trustees mandate income (see TSEM3762) and the beneficiary pays TMEs that are properly chargeable to income, such a beneficiary may set the TMEs against income chargeable at higher rate only. This practice of charging such income at no higher than the basic rate necessarily follows from the case law propositions that

- there is no income tax relief at basic rate for income used to meet TMEs (see TSEM8310)
- although an IIP beneficiary receives income mandated to him, to the extent that it is used to meet expenses properly borne by income it is not a part of his entitlement (see TSEM8325).

26.6 Scots trusts (from 2016)

HMRC say:

> 41. [Trust residence] is already a complex area and the Government wishes to avoid additional complexity. The introduction of "Scottish resident" trusts and estates would add another layer of complications for trustees and personal representatives. The Government therefore proposes that trusts should retain their current (UK or non-UK) residence status and be taxed at UK rates where appropriate.
>
> 42. Trusts and deceased estates are not generally affected by the Scottish rate of income tax. Income arising to trusts will not be chargeable to the Scottish rate, which applies only to individuals. A body of trustees (on whom liability for tax due on trust income falls), is treated as a single 'person' for tax purposes, and is not an individual. Neither is the personal representative of the deceased acting in an individual capacity.
>
> 43. However, trust or estate income arising to or received by an individual Scottish beneficiary would be chargeable to the Scottish rate. There are a number of different types of trust though and there are implications in relation to the Scottish rate when income is paid out to beneficiaries. These would be treated in the following ways.
>
> ...
>
> *Deceased Estates and Interest in Possession Trusts*
>
> 48. A UK-resident Interest in Possession (IIP) trust is one where the beneficiary has a legal right to the trust income as it arises. Under Scots law the beneficiaries have no such right to the income as it arises, but

they do have rights which they can enforce against the trustees to ensure that the trust purposes are carried out, and trustees have an obligation to account to the beneficiaries. Despite these differences in trust law, section 464 of ITA ensures consistency of treatment across the UK for tax purposes. Prior to making a payment to the beneficiary, the trustee is required to pay tax at the UK basic rate of tax.

49. Personal representatives dealing with estates of deceased persons will not be liable at the Scottish rate of income tax on income arising during or at the end of the administration of the estate. When paying income from the residue of a deceased estate to the beneficiary they will similarly have paid basic rate tax on that income.

50. In either case, the beneficiary could be receiving non-savings income which has borne tax at the basic rate. Currently beneficiaries liable at the basic rate of tax may have no need to do anything further - they would not need to submit a tax return merely to report the IIP or residuary estate income because there would be no additional tax to pay (although some basic rate IIP beneficiaries may feel it worthwhile to reclaim tax in cases where the trustees have borne expenses out of the income to which the beneficiary is entitled). Beneficiaries liable to tax at the higher or additional rates will have further tax to pay and will be required to complete tax returns.

51. If the Scottish and UK rates were to diverge, this would cause a potential difficulty for Scottish taxpayer beneficiaries whose marginal rate of tax is the Scottish basic rate of income tax and who receive some income under the deduction of tax at the UK basic rate. If, for example, the Scottish main rates of income tax were higher than the main UK rates then, strictly, they will have a further small liability. This would need to be collected via PAYE coding adjustments or through Self Assessment. Few of these beneficiaries will currently complete a tax return so it would be a significant exercise to identify them and adjust tax codes to collect the income. The costs of collecting these small amounts would often outweigh the amount collected. If the divergence in tax rate were reversed there would be similar issues for beneficiaries wanting to reclaim overpayments.

52. Since savings income will still be charged at the UK rates of income tax this would only be a problem at the moment for non-savings income, such as income from rented properties. Income paid through an IIP trust or deceased estate will therefore be excluded from a charge under the Scottish rate of income tax - in other words the UK rates should always apply to such income. Beneficiaries whose marginal rate of tax is derived from the Scottish basic rate of income tax would have no further liability in relation to the income received in respect of which the

trustees or personal representatives had paid basic rate tax.

53. With non-UK resident interest in possession trusts the issues are different as the trustees will only be liable to UK income tax on UK source income and that income will not be subject to the trust rate. The trustees will not be liable to UK income tax on any foreign income that they receive. It should also be noted that the beneficiary's right to income under foreign law in respect of interest in possession trusts can differ from that described above for UK trusts and consequently the treatment of the income in the hands of the beneficiary can differ. In some foreign law jurisdictions the beneficiaries are entitled to their appropriate share of each item of trust income when it arises to the trustees. These are known as Baker type trusts. In such circumstances the beneficiaries are chargeable on their share of trust income. If the trust income has borne UK tax it is treated as taxed income of the beneficiaries and each beneficiary's share is income that has been taxed at whatever rate of tax it has borne. Once the Scottish rate is introduced, this income will be taxed at the beneficiary's appropriate tax rate - if they are a Scottish taxpayer, they will therefore pay tax at the Scottish rate on non-savings income from the trust.

54. Under some other foreign law jurisdictions beneficiaries of interest in possession trusts are entitled only to their appropriate share of the net trust income that remains after the trustees have paid trust expenses; these are referred to as Garland type trusts. The beneficiaries are chargeable on the arising basis by reference to the income receivable by them from the trust. This applies whether or not it was paid out by the trustees. The income is treated as a new source of income and will be returned by the beneficiary as untaxed foreign income. If the beneficiary is a Scottish taxpayer, they will therefore pay tax at the appropriate Scottish main rate on this income.

55. If trustees have already paid UK or foreign tax on the trust income, the beneficiary can claim relief for this tax, subject to certain conditions being met. This must be outside of their Self Assessment return though.

56. Once the Scottish rate is introduced, such claims would be able to be set against tax charged at the Scottish main rates, in the same way as is currently allowed.

Settlor interested trusts

57. Settlor interested trusts are trusts where the settlor (the person who put funds into the trust), or certain family members, can benefit from the trust. The trustees are required to pay tax at the appropriate rate. The settlor will be liable at their marginal rate, although they will receive a tax credit for the tax paid by the trustees.

58. Income in the hands of the settlor will continue to be charged at their

marginal rate - therefore, if the settlor is a Scottish taxpayer, this income will be chargeable at the Scottish main rates. This will also be the case if there is an offshore structure and the transferor or beneficiary are assessable to tax under the Transfer of Assets legislation at sections 720 and 731 of ITA.[15]

26.7 DT reliefs

In relation to trusts, three states may be concerned:
(1) The state where the income arises
(2) The state where the trustees are resident
(3) The state where the beneficiary is resident

In this book I only consider the matter from a UK perspective: it will be necessary to consider foreign law viewpoints but that is outside the scope of this book.

In this chapter "beneficial ownership" is used in the treaty sense.[16]

26.7.1 *Reliefs where beneficial ownership of income is required*

Article 10 OECD model convention provides:

> 1. Dividends paid by a company which is a resident of a Contracting State to a resident of the other Contracting State may be taxed in that other State.
> 2. However, such dividends may also be taxed in the Contracting State of which the company paying the dividends is a resident and according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other Contracting State, the tax so charged shall not exceed:
> a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25 per cent of the capital of the company paying the dividends;
> b) 15 per cent of the gross amount of the dividends in all other cases.

Thus relief for UK dividends requires that the beneficial owner of the dividends is treaty-resident in the foreign jurisdiction.

Article 11 OECD model convention provides:

> 1. Interest arising in a Contracting State and paid to a resident of the other Contracting State may be taxed in that other State.

---

15 HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (May 2012).

16 See 25.12.1 (Meaning(s) of "beneficial ownership").

> 2. However, such interest may also be taxed in the Contracting State in which it arises and according to the laws of that State, but if the beneficial owner of the interest is a resident of the other Contracting State, the tax so charged shall not exceed 10 per cent of the gross amount of the interest.

Thus relief for UK interest similarly requires that the beneficial owner of the interest is treaty-resident in the foreign jurisdiction.

Article 12(1) OECD model convention provides:

> Royalties arising in a Contracting State and beneficially owned by a resident of the other Contracting State shall be taxable only in that other State.

Thus relief for UK royalties similarly requires that the beneficial owner of the royalties is treaty-resident in the foreign jurisdiction.

In some treaties beneficial ownership is added as a requirement even where it is not in the OECD model.

26.7.2 *Baker trusts*

In the case of Baker trusts, for the purposes of DT reliefs:

(1) The trust is transparent ie the underlying trust income is regarded as the income of the beneficiary.

(2) The life tenant is the beneficial owner of the trust income payable to the life tenant. So if the trust receives (say) interest income, the income of the beneficiary is classified as interest, and if the beneficiary is treaty-resident in a treaty jurisdiction with an article providing exemption from UK source interest, the income qualifies for this DT relief.

(3) The trustees (if otherwise taxable) qualify for DT relief to the extent that the beneficiary qualifies for the relief. This is another case of the trustees enjoying reliefs applicable to life tenants.

(4) The position is different for a receipt which is income for tax purposes and capital for trust law purposes: in that case the trustees are the beneficial owner of the income.

HMRC agree. International Manual provides:

> **339540. Baker and Garland Trusts** [December 2011]
>
> ...
>
> ***Baker trusts***
>
> Where 'Baker' applies, you cannot treat the trustees as being beneficial owners of a trust's income as it arises. Instead it is the beneficiaries who

are the beneficial owners.

That is correct. The Manual continues:

> Strictly, each beneficiary should claim in his or her own right.

This is not strictly correct. A trustee could claim indirect DT relief in a case where a beneficiary failed to do so. But nothing turns on that since HMRC do not apply what they identify as the strict law:

> In practice it is acceptable to allow relief to the trustees, provided that you can be satisfied that the beneficiaries are entitled to relief under the same double taxation agreement as that under which the trustees have claimed. If this is not the case you may allow partial relief to the trustees by reference to the percentage of the interests that are relievable under the same DTA as the trustees. The beneficiaries who are not resident in the same country as the trustees will need to make their own claims against the income distributed to them.

26.7.3 *Garland trusts*

In the case of *Garland* trusts, for the purposes of DT reliefs:

(1) The trustee is the beneficial owner of the trust income.

(2) The income of the beneficiary will qualify for DT relief under the "other income" article in the OECD model form (but not under the UK preferred form): see 25.11 (UK trust - non resident beneficiary: DT relief).

(3) Point (2) would cause great difficulties. However by concession HMRC will regard a *Garland* trust as transparent *Baker* trust for DT purposes. I refer to this as "**the Garland concession"**.

International Manual provides:

> **339540. Baker and Garland Trusts** [December 2011]
>
> **...**
>
> ***Garland trusts***
>
> Where 'Garland' applies, you can, for the purposes of the double taxation agreement, treat the trustees as the beneficial owners of trust income as it arises and allow relief. This treatment is given because we consider that the beneficiary's right to income from the trust is against the trustees, rather than in the underlying assets held in trust. However, you should still establish the identity and residence of the beneficiaries. If any beneficiary is in the UK you should notify their tax office.

International Manual provides:

166030. Garland trusts [September 2011]
In the case of income of a non-discretionary foreign trust of the type considered in the case of *Garland v Archer Shee* 15 TC 693, the beneficiaries are not concerned with the source of the trust income and whether or not it has borne UK tax. It is the practice to allow relief to beneficiaries, other than annuitants, in respect of the proportion of the income assessable as foreign income which is regarded as being derived from trust income which has borne United Kingdom tax. It is a condition of the relief that the amount of the income for higher rate purposes is to be treated as the sum of the amount assessable and the amount of tax on a grossed up basis which is applicable to the part of the assessment on which relief has been given.
Submit the first claim from a beneficiary for this relief to the Offshore Personal Tax Team (part of Charity, Assets & Residence), before admitting the claim.
166040. Foreign tax [February 2006]
Where foreign tax has been paid on trust income (including, in the case of dividends, any underlying tax where, exceptionally credit for such tax is due under the terms of an agreement – see INTM164410), it is the practice, in the case of a trust of a type referred to in INTM166030, to allow credit relief to beneficiaries, other than annuitants, for that foreign tax. Credit relief is given in the same way and to the same extent as if each beneficiary were entitled to his proportionate share of the underlying investments of the trust.

26.8 Baker or Garland trust jurisdiction?

The English courts assume that foreign trust jurisdictions apply English law principles in the absence of evidence to the contrary. But the Scottish courts will, I expect, assume Scots law principles, in the absence of evidence, with the opposite result. In practice HMRC have helpfully published a list which would constitute evidence on which (in the absence of other evidence) a tribunal should be expected to rely.[17] This list only represents the HMRC view and could be challenged on the basis of expert evidence. The list assumes the trust has standard form wording. It is in principle possible to draft a non-transparent trust in a *Baker* jurisdiction. It may be possible to draft a transparent trust in a *Garland* jurisdiction by using non-standard wording.

The HMRC list is as follows. The endnotes are my own.

1 The list omits Tasmania, Northern Territory and Australian Capital Territory. It is considered that these are *Baker* jurisdictions.

2 This seems correct: see *Minister of National Revenue* [1956] SCR 49 especially [1953] Ex CR 292 at p.297, accessible *http://www.kessler.co.uk/tfd-archive* The list of Canadian jurisdictions omits Alberta, Manitoba, New Brunswick, Newfoundland and Labrador, Northwest Territories, Nunavut, Prince Edward Island and Yukon. It is suggested that these are the same as the other Canadian common law jurisdictions, i.e. *Baker* jurisdictions.

3 This seems well founded in Art. 1261 Code Civil Québec: "Le patrimoine fiduciaire, formé des biens transférés en fiducie, constitue un patrimoine d'affectation autonome et distinct de celui du constituant, du fiduciaire ou du bénéficiaire, sur lequel aucun d'entre eux n'a de droit réel." [The trust patrimony, consisting of the property transferred to the trust, constitutes a patrimony by appropriation, autonomous and distinct from that of the settlor, trustee or beneficiary *and in which none of them has any real right*]. See also Gretton, "Trusts without Equity" ICLQ 49, No.3 (July 2000).

4 France was omitted (accidentally?) from the version of the list published 1 April 2008, but the comment in the earlier version of the list is printed here as it is correct.

5 *Duncan's Executors v Adamson* (1935) 14 ATC 22 so held. This seems soundly based on s.3 [India] Trusts Act 1882: "The 'beneficial interest' or 'interest' of the beneficiary is his right against the trustee as owner of the trust-property."

6 The list omits Northern Ireland: this is a *Baker* jurisdiction.

7 This is wrong: Italy does have a trust law.

8 Harriet Brown agrees: see *Jersey Law of Trusts* (4th ed., 2013), 2.52.

9 It is not clear whether HMRC are referring to a Stiftung or a Treuhandschaften; see 84.8 (Foundation: Stiftung); 84.11 (Liechtenstein Treuunternehmen).

10 This is wrong: Malta does have a trust law.

11 This is wrong: The Netherlands does have a trust law.

12 Honoré agrees: *South African Law of Trusts*, (5th ed., 2002), para 349.

13 New York was (rather implausibly) found to be a *Garland* jurisdiction in *Garland v Archer-Shee* 15 TC 693. The finding of fact in *Garland* was also made in *Timpson's Executors v Yerbury* 20 TC 155 at p.157, and was accepted as common ground in *Astor v Perry* 19 TC 255. See "Taxing Foreign Income from Pitt to the Tax Law Rewrite – The Decline of the Remittance Basis", John Avery Jones in *Studies in the History of Tax Law*, 2004 p.46 accessible on *http://www.kessler.co.uk/tfd-archive* for contrary views as to US law. Since foreign law is a question of fact, a court would not be bound by those decisions, but in practice they are not likely to be challenged.

14 This may not be correct for all the other states. In particular, Ohio and New Jersey have been found to be *Garland* jurisdictions. See *The Marchioness of Ormond v Brown* 17 TC 333 at p.341, *Kelly v Rogers* 19 TC 692 at p.696. But see the above footnote. In *Lawson v Rolfe* 46 TC 199 it was common ground that California was a *Baker* jurisdiction.

CHAPTER TWENTY SEVEN

SETTLOR-INTERESTED TRUSTS

27.1 Settlor-interested trusts: Introduction

Chapter 5 Part 5 ITTOIA contains a code of anti-avoidance provisions known as the Settlement Provisions. A full discussion would need a book to itself. This chapter focusses on the matters closest to the theme of this book.

The most important of the settlement provisions is s.624(1) ITTOIA which provides:

> Income which arises under a settlement is treated for income tax purposes as the income of the settlor and of the settlor alone if it arises—
>
> (a) during the life of the settlor, and
>
> (b) from property in which the settlor has an interest.

I refer to income which is treated as the settlor's income under this section as **"s.624 income"**.

27.1.1 *Cross-references*

The following topics are considered elsewhere:

46.5 (Settlor-interested trust: rates of tax on settlor)
59.4 (DT reliefs: s.624 ITTOIA)
80.1 (Who is the settlor?)
80.2 (Definitions of "settlement")
81.2 (Two or more settlors of settlor-interested trust: IT).

For specialist types of income accruing to settlor-interested trusts, see:

- Chargeable event gain: see 33.8
- Offshore income gain: see 35.8.2 (UK resident settlor-interested trust) and 35.10.1 (Non-resident settlor-interested trust)
- Accrued income profits: see 37.1 (Accrued income profits: Introduction)

- Deeply discounted security income: see 37.13.1 (UK resident settlor-interested trust) and 38.11 (Non-resident trust).

This chapter considers the IT rules. For CGT see 50.1 (Gains of non-resident settlor-interested trusts).

27.2 Meaning of "income arising under a settlement"

Section 648(1) ITTOIA provides:

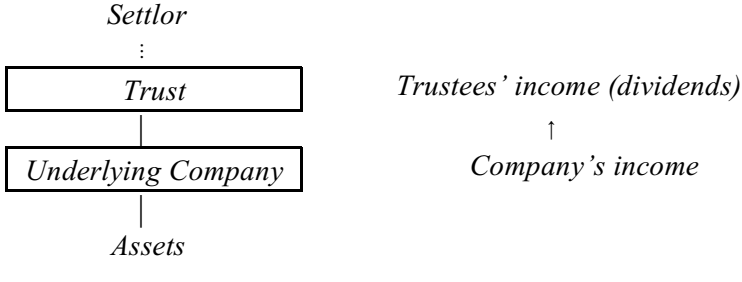
> References in this Chapter to income arising under a settlement include— [1]
>
> (a) any income chargeable to income tax by deduction or otherwise, and
>
> (b) any income which would have been so chargeable if it had been received in the UK by a person domiciled and resident there.

The points made in 28.13 (Capital receipts deemed to be income) and 28.14 (The amount of income of person abroad) apply also for the purposes of ascertaining what is the "income arising under a settlement".

The income may be deemed to be the income of the settlor under s.624 even if the settlor is paying the income (eg if the settlor pays rent or interest to a settlor interested discretionary trust).[2]

27.2.1 *Income of company, unit trust or partnership held by trustees*

Suppose a settlor-interested trust holds an underlying company, thus:



The trustees' income is "income arising under a settlement" and taxed under s.624.

The company's income is not "income arising under the settlement" and

---

1 The context suggests this is an exhaustive definition, ie the word "include" really means "mean".

2 See *Ang v Parrish* 53 TC 304. But it is different if the settlor is also life tenant; see 30.4.7 (Interest-bearing loan to life tenant).

not within the scope of s.624. This follows from the repeal by Sch 17 FA 1989 of s.681(2)(b) ICTA (which formerly brought company income into the scope of that expression).[3] This was assumed to be correct without argument in the film star case *Mills v IRC*.[4]

Where (as a matter of fact) the trust and the company constitute one arrangement, one might have thought at first sight that both the company income and the trustees income (dividends) could be described as income arising under the settlement-arrangement. But the context shows that only the trustees' income should be regarded as "income arising under the settlement" for the purposes of the IT settlement provisions. The background is explained in the first film star case, *Crossland v Hawkins*:

> The heavy incidence of Surtax [now higher rate income tax] on large incomes has for some time led artistes and others in the world of entertainment to adopt the device of forming a limited company which they control, and giving the company, by means of a service agreement, the right to their services. In return the company pays the artiste some modest salary. The company then hires the artiste out to whomsoever requires his services and itself obtains the consideration for them. ... In this way Surtax on the whole of the artiste's earnings is reduced to Surtax on the salary he gets from the company plus such dividend as is distributed to him; and when eventually the company is wound up the accumulated reserves of past years will come to him as capital.[5]
>
> All this is perfectly legitimate and indeed, in the case of persons whose high earnings may be short-lived, understandable. ... The present appeal is not concerned with that scheme, but it may be useful to bear its existence in mind.[6]

If the company is UK resident, it is within the scope of corporation tax and

---

3 This was part of the repeal of the close company apportionment provisions.

4 For the film star cases, see 80.18 (Provision of services).

5 If winding up the company now, one would need to consider chapter 4 part 13 ITA (sale of occupation income).
At the time of *Crossland v Hawkins* there were close company apportionment rules, but they were not so harsh. The Court explained: "From its profits the company must distribute a reasonable dividend if it is to avoid Surtax on the whole of its profits - see Section 245 of the Income Tax Act, 1952 - but it is allowed to make such reserves as are required for the maintenance and development of the business; and where the business depends on the fortunes of a particular artiste these reserves may be considerable."

6 39 TC 493 at p.502.

the CTA provides a further reason why the settlement provisions do not apply. Section 3(1) CTA 2009 provides:

> The provisions of the Income Tax Acts relating to the charge to income tax do not apply to income of a company if—
> (a) the company is UK resident, or
> (b) the company is not UK resident and the income is within its chargeable profits as defined by section 19.

Section 624 is a "provision of the income tax acts relating to the charge of income tax" so it does not apply to income of a UK resident company.

This makes good sense, because if the profits are subject to corporation tax, HMRC do not need the settlement provisions. This view is also supported by CTA 2009 EN:

> **Clause 3: Exclusion of charge to income tax**
> 46. This clause ensures that income of a company within the charge to corporation tax is not chargeable to income tax as well as corporation tax. It is based on section 6(2) of ICTA.

This argument was put in *IRC v Levy* but the judge expressed no view.[7]

It is considered that income of a unit trust held by trustees is similarly not "income arising under a settlement" (unless the unit trust is transparent in which case the income arises to the trustees).

It is suggested that the position is different where trustees have an interest in a partnership. Insofar as income is distributed by the partnership to the trust it obviously constitutes income arising under the settlement. But even if income is retained by the partnership, it is still income of the trustees since partnership income is regarded as accruing to the partners.

Income of a non-resident company or unit trust which is not "income arising under a settlement" may fall within s.720 ITA.

27.2.2 *Income of life tenant (not the settlor)*

Income payable under the trust to a life tenant is "income arising under a settlement". Admittedly, such income is usually regarded for tax purposes as the income of the life tenant, not of the trustees.[8] But that is not

---

7 56 TC 58 at [87]. HMRC's answer was to rely on s.9 ICTA 1988, but I cannot see how that helps.

8 See 26.3 (Taxation of life tenant).

relevant, because:

(1) the expression is "income arising under a settlement", not "income accruing to trustees"; and

(2) "settlement" is very widely defined: see 80.2.3 (Settlement-arrangement definition of settlement).

This can be seen to be the case by considering a trust made by S, revocable by S, under which income is payable to B for life. It could hardly be argued that such income falls outside the scope of s.624 ITTOIA.

27.2.3 *Income of life tenant settlor*

Where the settlor has an interest in possession, trust income actually received by the settlor is not within s.624 ITTOIA. It is subject to income tax under general principles. But from 2006/07 the rates of tax are the same in either case,[9] so the issue does not now arise.[10]

27.2.4 *Property business income*

Property Income Manual 1045 discusses how one calculates property income for the purposes of the settlement provisions:

> **1045. Life interest trusts** [October 2011]
> *Trusts and the settlor - losses*
> ... Various special provisions may apply to trusts and to those who set them up (the 'settlor'). In particular, there is a rule to prevent tax avoidance which can treat trust income as being, for tax purposes, the income of the settlor. Such income is taxed on the settlor under s.619(1) ITTOIA. Where the income is property income, the normal property income rules apply in calculating the income. (S.623 ITTOIA).

This is correct. It follows that interest paid by the trustees is in principle deductible in computing the quantum of property income for s.624 purposes.

27.2.5 *Property business losses*

The Property Income Manual then considers the treatment of losses:

---

9 See 46.5 (Settlor-interested trust: rates of tax on settlor).

10 The point was discussed in the 4th ed. of this book at 11.4.3. Trust income not received by the life tenant settlor is within s.624 ITTOIA. That applies to income used for trust expenses and income for tax purposes which is capital for trust law purposes.

1045. Life interest trusts [October 2011]
Trusts and the settlor - losses
The more common case is where the trustees carry on the rental business but the settlor is caught by Section 619(1). Under these circumstances the settlor can't set any trust rental business losses against personal rental business income.
Similarly the settlor can't merge personal rental business losses and the trust rental business profits which are deemed to be the settlor's income and charged under Section 619(1). Thus:

- Where the trustees have a rental business loss and the settlor has a personal rental business profit, the trust loss is carried forward and the settlor is taxed on their personal rental business profit; the amount of the trustees' rental business profit charged on the settlor in the following year under Section 619(1) will be reduced by the trust loss carried forward.
- Where the trustees have a rental business profit and the settlor has a personal rental business loss, the settlor is taxed on the trust rental business profit under Section 619(1); the settlor's personal rental business loss can't be merged with the trust profit; but, as a separate matter, the settlor may in some cases be able to set a personal rental business loss sideways against other income, including any Section 619(1) income deemed to arise from the trustees' rental business; see PIM 4205.

The position is different where the taxpayer is:

- the settlor; and
- the life tenant; and
- carries on the rental business.

Under these circumstances the settlor can merge their personal property losses with the deemed income from the trust and vice versa.

This is thought to be correct. See too 16.4 (Losses of overseas property business).

27.2.6 *Trustee expenses*

Section 624(1A) ITTOIA provides:

> If the settlement is a trust, expenses of the trustees are not to be used to reduce the income of the settlor.

ITA EN provides:

> 3323.New subsection (1A) makes it explicit that trustees' expenses are not taken into account in measuring the income of a settlor under section

> 624 of ITTOIA. This follows from the fact that it is the income arising that is deemed to be the settlor's and the income arising is the gross amount out of which the trustees may pay expenses.

This is important because if s.624 does not apply, expenses do reduce the income of the life tenant.[11]

27.2.7 *Settlor's deductions and reliefs*

Section 623 ITTOIA provides:

> For the purpose of calculating liability to tax under this Chapter (but for no other purpose), a settlor shall be allowed the same deductions and reliefs as if any amount treated under this Chapter as income of the settlor had actually been received by the settlor.

As far as I can see, this is not needed (except perhaps for the avoidance of doubt). Deductions and reliefs should be available in any event under general principles. There are no deductions or reliefs which would otherwise be disallowed on the basis that the settlor did not actually receive the income arising under the settlement. Perhaps that may not have been the case in 1938 when the provision was first introduced. If so, the provision survives mainly for historical reasons, and, perhaps, for the avoidance of doubt.

27.2.8 *Income arising under the settlement must be identifiable*

Section 624 assumes that one can *identify* the amount of income which arises under the settlement. If that identification is not possible then it is considered that s.624 does not operate.[12] In straightforward cases this is not a problem. The issue tends to arise where there are two settlors; see 81.4.2 (Beneficial loans, guarantees, payments of trust expenses).

27.3 Meaning(s) of "settlor-interested"

27.3.1 *The concepts of "settlor-interested"*

The term "settlor-interested", first coined in the FA 2000, is used in connection with various provisions of which the most important are:
(1) The IT settlor-interested trust rules(discussed in this chapter).

---

11 See 26.5 (Trustees expenses).

12 The same point applies to the ToA provisions; see 28.7.2 (Income arising must be identifiable).

(2) The CGT settlor-interested trust rules.[13]

Consistent with the patchwork nature of UK tax, these provisions have significant differences, though they share a common framework. "Settlor-interested" is a convenient label, but not a wholly accurate one.

27.3.2 *"Settlor-interested" for IT purposes*

Section 625(1) ITTOIA provides:

> A settlor is treated for the purposes of section 624 as having an interest in property if there are any circumstances in which the property or any related[14] property—
>
> (a) is payable to the settlor or the settlor's spouse or civil partner,
>
> (b) is applicable for the benefit of the settlor or the settlor's spouse or civil partner, or
>
> (c) will, or may, become so payable or applicable.

Sections 625 - 628 ITTOIA contain about a dozen complex exceptions which are not discussed here as they are not relevant to the themes of this book. In practice the settlor and spouse are usually expressly included as beneficiaries or expressly excluded.[15]

27.3.3 *Beneficial loan or guarantee*

Beneficial loans and guarantees to trustees potentially raise three distinct questions, so far as the settlor-interested trust are concerned:[16]

(1) Is the lender/guarantor a settlor by virtue of the loan/guarantee? (This question generally arises only if the lender/guarantor is not the original settlor, though it could also arise if one had to consider whether the settlor has provided additional property and so tainted the

---

13 See 50.4 (Settlor-interested condition). Other examples, not discussed in this book, are s.169F TCGA (restriction of holdover relief for settlor-interested trusts); Sch 4A TCGA (disposal of interest in settlor-interested trusts). In addition, "power to enjoy" for s.720 ITA is a similar concept, with a different label. GWR is a comparable but not identical concept.

14 "Related property" is defined in s.625(5) ITTOIA:

> In this section "related property", in relation to any property, means income from that property or any other property directly or indirectly representing proceeds of, or of income from, that property or income from it.

15 For further discussion see Kessler, *Drafting Trusts and Will Trusts* (12th ed., 2014), Chapter 13 (Settlor exclusion and default clauses).

16 For other issues raised by loans to trustees, see 52.1.1 (Cross references).

settlement).
(2) If so, what property has the lender/guarantor provided?
(3) Does the lender/guarantor have an interest in the trust property by virtue of the loan/guarantee? (This question does not arise if the lender/guarantor already has an interest in the trust property.)

It is necessary to distinguish between loans which are (1) interest-free (2) beneficial but not interest-free, eg, at low interest; and (3) commercial loans. Guarantees are not the same as loans, but the issues overlap, so I also consider them in this section.

There are many possible permutations, which makes an exposition rather more difficult.

To start with the simplest case: suppose the settlor lends interest-free to a trust from which he or she is otherwise excluded. The HMRC view is that the trust is settlor-interested as the settlor may benefit by repayment of the loan:

> In *Jenkins v IRC* (26 TC 265) the Court of Appeal found that the making of an interest-free loan brought the settlement into what is now [s.624]. In the *Jenkins* case, the dispute was about whether certain income received by the trustees of the settlement could be assessed on the settlor under the provisions of FA 1938 s38(4). That provision contained an extended definition of retaining an interest in income that is in similar terms to the definition [in s.624].
>
> The effect of the decision in *Jenkins* was that a settlor who has made an interest-free loan to his/her trust has brought himself or herself within the scope of s38(4), and by implication [s.624] (albeit that there would be no charge unless income actually arose to the trustees).[17]

The contrary is faintly arguable[18] but for practical purposes this should be accepted as correct.

The same applies if the settlor lends on terms which are beneficial but not interest-free, eg at a low rate of interest. However a settlor (if otherwise excluded) has no interest if the loan is on commercial terms, as

---

17 Letter from HMRC to the Association of British Insurers, September 2004, accessible *http://www.kessler.co.uk/tfd-archive*. For other issues arising on settlor loans to trusts, see 27.11 (Settlor receives capital sum) and 29.11 (Transferor receives capital sum).

18 The point was conceded in *Jenkins v IRC* 26 TC 265 but the concession was held to be correct in *Wachtel v IRC* 46 TC 543. So the issue remains (just) arguable in the Court of Appeal.

repayment of such a loan is not a benefit.

If someone other than the original settlor lends interest-free to a trust, the loan makes the lender a settlor.[19] There is then a trust with two settlors, the original settlor and the lender. The lender will be within the scope of s.624 on the income originating from the lender, if one can identify it.[20]

If someone other than the original settlor lends on terms which are beneficial but not interest-free, eg at a low rate of interest, the loan still makes the lender a settlor. However the lender will not be within the scope of s.624 unless one can identify the income originating from the lender, which is not usually the case.[21]

If the settlor ("the guarantor") guarantees a loan or other obligation of the trustees, the trust is not settlor-interested (assuming the settlor is otherwise excluded). A guarantor's claim against a solvent trust would only arise if the trustees failed to meet their primary contractual obligations and the words "in any circumstance whatsoever" do not extend to a breach of contract of that kind.

If someone other than the settlor gives a guarantee, the guarantor would not fall within s.624, unless:

(1) one could identify the income originating from the guarantor (which is not usually the case) and
(2) the guarantor had an interest in that income under the trust (the existence of the guarantee alone does not constitute an interest).

27.3.4 *Meaning of "spouse/civil partner" in settlor-interested trust provision*

Section 625(4) ITTOIA gives the expression "spouse/civil partner" an artificial and slightly narrow meaning:

> In subsection (1) "the settlor's spouse or civil partner" does not include—
>
> (a) a spouse or civil partner from whom the settlor is separated under an order of a court or a separation agreement,
> (b) a spouse or civil partner from whom the settlor is separated where the separation is likely to be permanent,
> (c) the widow or widower or surviving civil partner of the settlor, or

---

19 A person who is not otherwise a settlor in principle becomes a settlor by virtue of making an interest-free loan: see 80.19 (Interest-free or back-to-back loan).

20 See 81.4.2 (Beneficial loans, guarantees, payments of trust expenses).

21 See 81.4 (Multiple settlors: cases where apportionment not possible).

(d) a person to whom the settlor is not married but may later marry or a person of whom the settlor is not a civil partner but of whom the settlor may later be a civil partner.

The ToA provisions and the s.86 provisions do not contain the same provision, which is anomalous, but that is the patchwork nature of UK tax. Fortunately it does not often matter.

For the general meaning of spouse, see App 1.3 ("Spouse" and related expressions).

27.3.5 *Settlor interested in part of trust fund*

The IT settlor-interested trust provisions only apply to income from property in which the settlor has an interest. So if the settlor is excluded from part of the trust fund, the IT provisions do not apply to that part. HMRC agree. The TSE Manual provides:

> **TSEM4200 settlor retains an interest** [January 2011]
> **...Settlement only partially settlor-interested**
> Where the settlor has retained a clearly defined interest in a distinct part of the settlement, for example in one fund forming part of a trust, only a corresponding part of the income is caught. In other cases of a settlor retaining a partial interest in a trust, you should submit the case to HMRC Trusts & Estates Technical Edinburgh for advice.

The TSE Manual provides:

> **TSEM4513 - Tax paid by trustees where trust is not wholly settlor interested** [December 2011]
> Trust is partially settlor interested
> The income tax paid by trustees for a tax year may be paid partly on income attributable to a settlor and partly on income from property from which a settlor is excluded from benefit. The tax paid on income attributable to the settlor does not enter the tax pool - see TSEM4512. Tax paid on other income enters the tax pool in the normal way - see TSEM3756 onwards,
> **Example**
> A settles property into the A discretionary settlement. The settlement consists of two funds.
> Fund A contains a house which is let and a block of shares in A plc.
> Fund B contains a block of shares in B plc.
> Under the terms of the settlement the settlor and any spouse or civil partner of the settlor are excluded from benefiting from Fund B.
> In 2009-2010 the income of the trustees (and tax paid on that income) is

as follows:

Fund A		*Tax due from trustees*	
Rental Income	£10,000	£1,000 @ 20%	£200
		£9,000 @40%	£3,600
Dividend Income	£ 5,000	£5,000 @ 32.5% (of which 10% satisfied by tax credit)	£1,625
Tax paid			£5,425

The settlor is given credit for the tax paid on the income attributable to the settlor - £5,425. Where the tax paid by the trustees exceeds the settlor's own income tax liability the tax (excluding the £500 non payable tax credit attached to the dividends) may be repaid to the settlor.

Fund B			
Dividend Income	£15,000	£15,000 @ 32.5% (of which 10% satisfied by tax credit)	£4,875
Tax paid			£4,875

As the settlor is excluded from benefiting from Fund B, this tax is not available to the settlor. The normal rules apply and £3375 of the tax paid (4875 less 1500 non payable tax credit attached to the dividends) enters the tax pool.

27.3.6 *Settlement ceasing to be settlor-interested*

If the settlor originally had an interest in trust property but is later excluded (together with the settlor's spouse) then s.624 ITTOIA ceases to apply to income arising after the date of the exclusion.[22]

If the settlor is excluded from part of the trust fund, then they are within the scope of s.624 only on the income arising from the part in which they still have an interest.

The TSE Manual provides:

> **TSEM4513 - Tax paid by trustees where trust is not wholly settlor interested** [December 2011]
>
> **... Trust ceases to be, or becomes, settlor interested**
>
> A trust may cease to be settlor interested part way through a tax year, for example when the settlor dies. Similarly, a trust may become settlor interested part way through a tax year, for example the settlor may marry or enter into a civil partnership with an existing beneficiary of the trust. Where this happens the tax paid by the trustees should be apportioned on a time basis so the part is available to cover the settlor's liability and the other part dealt with in the normal way.

22 Contrast 29.5 (Section 721 Condition A (power to enjoy).

Example
In 2009-2010 the income of the trustees (and tax paid on that income) is as follows:

		Tax due from trustees	
Savings Income	£10,000	1,000 @ 20%	£200
		9,000 @ 40%	£3,600
Tax paid			£3,800

The settlor of the trust dies on 5 January 2010. The trust ceases to be settlor interested on that date because Section 624 ITTOIA applies only to income arising under a settlement during the life on the settlor.
The settlor is taxed on £7,500 and is given credit for £2,850 (75% of £3,800).
The balance of the tax, £950 goes into the tax pool.

27.3.7 *Transfer to new settlement*

If the trust fund is transferred to a new settlement from which the settlor is not excluded, then s.624(1) ITTOIA continues to apply. The original settlor is the settlor of the new trust.[23]

If the entire trust fund is transferred to a new trust from which the settlor (and spouse) are excluded then s.624 ceases to apply, and if they are excluded from part, it ceases to apply in part.

27.4 Section 624 remittance basis

Section 648 ITTOIA provides a relief which I call "**the s.624 remittance basis**".

The legislation uses the clumsy but effective drafting technique of restricting the definition of "income arising under a settlement". That term is defined in a commonsense way in s.648(1)[24] and s.648(3) then provides:

> And if, for a tax year, section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the settlor, references in this Chapter to income arising under a settlement include in relation to any relevant foreign income arising under the settlement in that tax year only such of it as is remitted to the UK (in that tax year or any subsequent tax year) in circumstances such that, if the settlor remitted it, the settlor would be chargeable to income tax.
> (4) See Chapter A1 of Part 14 of ITA 2007 for the meaning of "remitted

23 See 80.8 (Transfer from trust A to trust B by exercise of trustees' power).
24 See 27.2 (Meaning of "income arising under a settlement").

> to the UK" etc.

This applies to "relevant foreign income" arising under the settlement. The drafter has overlooked the definition of RFI, which means foreign income of a UK resident. Foreign source income of non-resident trustees is not RFI.[25] Taken literally, s.648(3) would never apply to income of non-resident trustees. But the context shows that "relevant foreign income" means income which would be RFI if received by a UK resident.

Section 648(5) provides a timing provision:

> Where subsection (3) applies the remitted income is treated for the purposes of this Chapter as arising under the settlement in the tax year in which it is remitted.

In short, foreign income qualifies in principle for the s.624 remittance basis if it is not remitted to the UK.

The charge under s.648(5) arises if two conditions are satisfied:

(1) The income "is remitted to the UK".
(2) The circumstances are "such that, if the settlor remitted it, the settlor would be chargeable to income tax".

In practice this mainly concerns settlor-interested discretionary trusts. Income of a trust where the settlor has an interest in possession is in principle outside the scope of s.624,[26] though s.624 could apply to a receipt which was income for tax purposes but capital for trust purposes.

27.4.1 *Transitional rule for pre-2008 settlor-interested trust income*

In the following discussion I use the term **"pre-2008 s.624 income"** to mean foreign income arising under a settlor-interested settlement before 6 April 2008, which

(1) fell within s.624 ITTOIA, but
(2) qualified for relief under s.648(3) ITTOIA, the s.624 remittance basis (which in earlier editions of this work I called "the foreign domicile defence").

There was no tax charge when the income arose if it was not received in the UK.

Para 86(4) Sch 7 FA 2008 provides (so far as relevant):

> ... in relation to an individual's income ... for the tax year 2007–08 or

---

25 See 10.3.1 (Relevant foreign income).

26 See 27.2.3 (Income of life tenant settlor).

> any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

The point is that there is a taxable remittance of pre-2008 s.624 income only if it is received/used/enjoyed by the settlor in the UK. Receipt (etc) by a relevant person does not count.[27]

For this purpose it is necessary to decide whether s.624 income is income of the individual for the tax year 2007/08 or before. The timing rule in s.624(5) might treat pre-2008 income as post-2008 income and so disapply the transitional relief. Para 86(4A), inserted with retrospective effect by the FA 2009, deals with this:

> For the purposes of sub-paragraph (4), section 648(2) to (5) of ITTOIA 2005 (and corresponding earlier enactments) do not apply (so that relevant foreign income which arose under a settlement in the tax year 2007-08 or any earlier tax year is to be treated as income for the tax year in which it arose).

The RDR Manual provides:

> **31490 Relevant persons and foreign income and gains arising to a settlement before 6 April 2008** [March 2011]
> *Background*
> As explained in RDRM31480 s.809L ITA has introduced the concept of 'relevant person' RDRM33030 which, broadly, provides that a taxable remittance will occur when foreign income or gains are brought into or otherwise used in the UK by relevant persons.
> Where a settlor creates a settlement and retains an interest in the property in that settlement the income arising to the trust is treated, for income tax purposes, as the income of the settlor alone under s624 ITTOIA. This is the case even where the trust income is paid to someone other than the settlor. Refer to RDRM33590 Settlements: Chapter 5 Part 5 ITTOIA.
> Where a settlor claims to use the remittance basis, section 648 provides for the trust income to be treated as arising in the year in which it is remitted. Because of the narrower definition of remittance which applied before 6 April 2008 this would produce an inequitable result where relevant foreign income that arose to a settlement before 6 April 2008 is remitted and becomes chargeable on the settlor after 6 April 2008.
> *Transition*
> The transitional rule provides that in establishing whether there has been

27 See 11.9 (Relevant person transitional rule: for pre-2008/09 income and gains).

> a remittance of an individual's income and gains for 2007-08 or any earlier year Conditions A and B, Condition C and Condition D at s.809L ITA (refer to RDRM33020 Meaning of Remittance) are applied as if references to 'relevant person' are to the individual.
> For the purpose of applying this transitional rule only, that is, for the purpose of determining whether there is any benefit under the provisions of paragraph 86(4) only the income is treated as arising in the year that it arose to the settlement.
> *Effect*
> This means that income arising under a settlement in tax years prior to 5 April 2008 but which is remitted after 6 April 2008 is not treated as remitted by the settlor unless it has been brought to, received by or used in the UK for his benefit.

I had previously thought that under the pre-2008 rules, there was taxable remittance if the trustees of a settlor-interested trust brought s.624 income into the UK - even though the settlor was never actually entitled to the income. However HMRC presumably did not agree, as that is not now the position for pre-2008 s.624 income. There is a remittance only if the settlor actually becomes entitled to the pre-2008 income and brings/receives/uses it in the UK.

27.4.2 *Post-2008 trust income*

For post-2008 trust income, the usual ITA remittance basis applies, so the s.624 income is treated as remitted if it is brought/received/used in the UK by any relevant person (including the trustees).

27.5 S.624 remittance basis planning

Practical ways of avoiding the s.624 remittance basis charge are as follows:

(1) Give the settlor an interest in possession, so trust income is taxed on the RFI remittance basis, and is outside s.624.[28]
(2) The trustees do not remit any trust funds to the UK and if the trustees pay the income in any form to the settlor, the settlor does not remit that income.
(3) The trustees segregate trust income and trust capital and remit trust capital, not trust income. There is no charge under the s.624

28 See 27.2.3 (Income of life tenant settlor).

remittance basis if trustees remit to the UK a sum which is not income arising under the settlement.

27.6 Non-resident settlor

The legislation again uses the clumsy but effective drafting technique of restricting the definition of "income arising under a settlement". That term is defined in a commonsense way in s.648(1)[29] and s.648(2) then continues:

> But if, in a tax year, the settlor is not UK resident, references in this Chapter to income arising under a settlement do not include income arising under the settlement in that tax year in respect of which the settlor, if actually entitled to it, would not be chargeable to income tax by deduction or otherwise because of not being UK resident.

Where the settlor is non-resident, UK source trust income is within the scope of s.624, but foreign income is not.[30] Contrast s.720 ITA which does not apply at all unless the transferor is resident.

27.6.1 *UK resident trust, non-resident settlor*

The trustees are taxed in full on foreign source income. This prevents s.624 applying where it might benefit the taxpayer.

However the settlor is taxed on UK source income. This is beneficial if the settlor's marginal rate is less than the top rate of income tax, or if non-residents income tax relief applies.[31]

27.6.2 *Non-resident trust, non-resident settlor*

Neither the trustees nor the settlor are taxed on foreign source income.

The settlor is taxed on UK source income. This is beneficial if the settlor's marginal rate is less than the top rate of income tax, or if the circumstances are that non-residents income tax relief is available to the settlor and not to the trustees, which could happen because of the UK beneficiary rule.[32]

---

29 See 27.2 (Meaning of "income arising under a settlement").

30 This is clear on the words of the section, but if authority is needed, see *IRC v Countess of Kenmare* 37 TC 383.

31 See 42.1 (Non-residents IT relief).

32 See 42.1 (Non-residents IT relief).

27.6.3 *Remittance of trust income*

It does not matter for the non-resident settlor if trust income is remitted.

Suppose:-

(1) Income arises to the trustees of a settlor-interested trust while the settlor is non-resident (**"non-resident period income"**).

(2) The income is remitted by the trustees when the settlor is resident and a remittance basis taxpayer.

Section 648 ITTOIA provides:

> (3) And if, for a tax year, section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the settlor, references in this Chapter to income arising under a settlement include in relation to any relevant foreign income arising under the settlement in that tax year only such of it as is remitted to the UK (in that tax year or any subsequent tax year) in circumstances such that, if the settlor remitted it, the settlor would be chargeable to income tax...
>
> (5) Where subsection (3) applies the remitted income is treated for the purposes of this Chapter as arising under the settlement in the tax year in which it is remitted.

It may seem at first sight that the non-resident period income is caught as it is treated under s.648(5) as arising in the year of remittance. That is however, not the case, for two reasons:

(1) The circumstances are not "such that, if the settlor remitted the non-resident period income, the settlor would be chargeable to IT". Unless the settlor is UK resident when the income arises, the settlor would not be taxed on it when remitted later, even if it had been the settlor's income all along.

(2) Non-resident period income is not "income arising under the settlement" by virtue of s.648(2).

The result is sensible and consistent with rule that income of an individual arising during a non-resident period is not taxable if remitted during a resident period.[33]

27.7 Taxation of beneficiaries of settlor-interested trust

If income of a settlor-interested trust is paid to a beneficiary there could in principle be a double charge to tax:

---

33 See 10.20 (RFI/gains arising when non-resident, remitted when resident).

(1) The settlor is taxed under s.624.
(2) The beneficiary could be taxed under normal trust tax principles.

Section 685A ITTOIA avoids the double charge by giving relief to the beneficiary; hence I refer to this as **"s.624 beneficiary relief"**.

For completion of tax returns when this relief applies, see 25.3.5 (Entering discretionary trust income in beneficiary's tax return).

27.7.1 *Conditions for relief*

Section 685A(1) ITTOIA provides:

> This section applies if—
> (a) a person receives an annual payment in respect of income from the trustees of a settlement,
> (b) the payment is made in the exercise of a discretion (whether of the trustees of the settlement or any other person), and
> (c) a settlor is charged to tax under section 619(1) on the income arising to the trustees of the settlement (whether in the current year of assessment or in a previous year of assessment) out of which the annual payment is made.

A settlor is not charged to tax (within the meaning of (c)) if the s.624 remittance basis applies and the income is (un)taxed under the remittance basis. Where that relief applies, s.624 beneficiary relief is disapplied.

Section 685A(2) ITTOIA provides:

> This section applies only in respect of that proportion of the annual payment which corresponds to the proportion of the total income arising to the trustees of the settlement in respect of which a settlor is chargeable to tax under section 619(1).

Section 685A(2) may apply where:
(1) A settlement is partly settlor-interested (because there are two settlors or the only settlor is partly excluded).
(2) A non-resident settlor is charged on part of the trust income (UK source income only).
(3) A remittance basis taxpayer settlor is charged on part of the trust income (UK source and remitted income only).

27.7.2 *Relief for non-settlor-beneficiary*

Section 685A(3) ITTOIA provides relief for the beneficiary in the form of a tax credit:

> If and in so far as this section applies, the recipient of the annual payment shall be treated for the purposes of this Chapter as having paid income tax at the additional rate in respect of the annual payment.

Section 685A(4) ITTOIA prevents the beneficiary from using the tax credit except against the charge on the trust income:

> But—
>
> (a) tax which the recipient is treated by virtue of this section as having paid is not repayable,
>
> (b) tax which the recipient is treated by virtue of this section as having paid may not be taken into account in relation to a tax liability of the recipient in respect of any other income of his...

EN FB 2008 provides:

> 7. The income of a 'settlor-interested' trust is deemed, for the purposes of income tax, to be the settlor's income as it arises.
> 8. In non settlor-interested discretionary trusts, where income payments are made to beneficiaries, the income constitutes a new source, and is taxed on the beneficiary. The tax paid by trustees is available to the beneficiaries in the form of a tax credit.
> 9 . In a settlor-interested trust, an income payment to a beneficiary is still a new source of income taxable in the beneficiary's hands. However the tax paid by the trustees of such trusts is treated as paid on behalf of the settlor. Because the settlor has already been taxed on the whole amount, charging the beneficiary to additional tax would result in a form of double taxation.
> 10. Section 685A ITTOIA 2005 provides that income paid by trustees of a settlor-interested trust to (non-settlor) beneficiaries comes with a non-repayable 'notional' tax credit equal to the higher rate of tax (currently 40 per cent) which covers all the tax liability on that income.

The TSE Manual provides:

> **4570 Payments to beneficiary other than the settlor** [December 2011]
> ... For 2006-07 onwards the law provides that discretionary payments to the beneficiary are treated as though the beneficiary had paid tax at the higher rate (see TSEM3755). The amount of the actual payment (it is not grossed up) should be shown in the beneficiary's return and it is included in the calculation of that person's total income. The tax credit ensures the beneficiary has no further liability in respect of the payment but it is ring-fenced so that no part of it can be repaid or set against liability arising from any other income of the beneficiary.

Section 685A(5A)(5B) ITTOIA provide:

> (5A) If the recipient of the annual payment is treated by subsection (3) as having paid income tax in respect of the annual payment, the amount of the payment is treated as the highest part of the recipient's total income for all income tax purposes except the purposes of sections 535 to 537 (gains from contracts for life insurance etc: top slicing relief).
> (5B) See section 1012 of ITA 2007 (relationship between highest part rules) for the relationship between—
> (a) the rule in subsection (5A), and
> (b) other rules requiring particular income to be treated as the highest part of a person's income.

EN FB 2008 explains subsections (5A)(5B):

> 10. Section 685A ITTOIA 2005 provides that income paid by trustees of a settlor-interested trust to (non-settlor) beneficiaries comes with a non-repayable 'notional' tax credit equal to the higher rate of tax (currently 40 per cent) which covers all the tax liability on that income.
> 11. However, under current statutory ordering rules income from a trust is charged before savings and/or dividend income. The result is that a beneficiary of such a trust who also has savings and/or dividend income may find that the non-trust income is pushed into higher rates so that more tax is due overall.
> 12. The measure amends this ordering rule, so that income from a settlor-interested trust is treated within section 1012 ITA 2007 as one of the highest slices of income instead of being treated as part of the lowest slice.
> 13. The amending legislation backdates the correct position to 6 April 2006 to ensure that those affected are not disadvantaged by the omission.

The problem arose because the relief takes the form of a non-repayable tax credit rather than an exemption for the trust distribution (which comes to the same thing but seems simpler). The reason for that drafting technique is not clear to me.

Two points arise from this which ought to raise serious questions about the rule of law in relation to the UK tax system. First the tax system is so complex that it took two years for the error in the FA 2006 to be noticed. (I confess I did not notice it myself.) Secondly, the error was corrected by casual retrospective legislation.

Section 685A(6) ITTOIA confers relief for the charge on trustees making

the trust distribution:[34]

> Sections 494 and 495 of ITA shall not apply in relation to an annual payment if and in so far as this section applies.

27.7.3 *Relief for settlor-beneficiary*

Section 685A(5) ITTOIA provides:

> If the recipient of the annual payment is a settlor in relation to the settlement, if and in so far as this section applies the annual payment shall not be treated as his income for the purposes of the Income Tax Acts (and subsection (3) does not apply).

The TSE Manual provides:

> **4570 Payments to the settlor** [December 2011]
> Where you tax the settlor on the income arising to the trust, discretionary payments out of the trust to the settlor are not further taxable. For years up to and including 2005-06 the phrase in Section 687(1) 'but would not be his income if it were not made to him' means Section 687 does not apply to payments that fall to be treated as the income of the settlor under Section 624 ITTOIA. For 2006/07 onwards discretionary payments made by the trustees to the settlor are taken out of charge by Section 685A(5) ITTOIA.

The legislation distinguishes between non-settlor beneficiaries and the settlor. In the one case the beneficiaries are given a credit, and in the latter case the income is exempt. At first sight this seems strange, but a reason will emerge.

The payment is not a capital payment for s.87 purposes: see 51.6.5 (Payment in form of income (un)taxed on remittance basis).

27.7.4 *Taxation of life tenant (not settlor) of settlor-interested trust*

Suppose a settlor-interested settlement under which a beneficiary ("B", not the settlor) has an interest in possession. Section 624 beneficiary relief only applies to discretionary trusts. But if a trust confers an interest in possession (not on the settlor) then no relief is needed: the life tenant is not taxable as the trust income is the income of the settlor and of the settlor alone, so that B cannot be taxable on it.

B is in principle taxable on income not within s.624, that is, income

---

34 See 25.5 (Tier 2: Charge on trustees making discretionary income payment).

within the s.624 non-residence defence or s.624 remittance basis.

27.8 Taxation of trustees of settlor-interested trust

If s.624 applies, the trust income is the income of the settlor "and of the settlor alone". So one might think then the trustees are not subject to tax. However s.646(8) ITTOIA provides:

> Nothing in sections 624 to 632 is to be read as excluding a charge to tax on the trustees as persons by whom any income is received.

Thus:

(1) The trustees enter the income in their return and pay tax (including tax at the trust rate, if a discretionary trust).
(2) The settlor enters the income on his or her return, and (allowing a credit for the tax paid by the trustees) pays further tax or reclaims tax.

Malcolm Gunn describes these rules as "quite frankly ridiculous"[35] and the reader will probably agree; but there it is. It is suggested that trustees should be liable only if the settlor fails to pay (IHT liability rules offer a precedent).

The problem is mainly for discretionary trusts. For IIP settlor-interested trusts, the trustees are similarly liable, but two factors mitigate the severity of the rule:

(1) In general trustees are liable at the basic rate (or the dividend ordinary rate) only; and that liability may be covered by deduction at source (or a tax credit).
(2) Mandating income can avoid the liability. HMRC Trusts and Estates Newsletter (December 2010) provides:

> **Trusts and Estates - mandated income of settlor-interested trusts**
> ... Step 1 of the Trust and Estate Tax Return (SA900 page 2) does not require a full return to be made, nor income tax to be paid, where all income is mandated to an IIP beneficiary.[36] However, that practice does not currently apply where the trust is settlor interested. Following a review of that practice, HMRC has concluded that where income is mandated to an IIP beneficiary of a settlor-interested trust there is no statutory basis for taxing the trustees as being in receipt of the income. The settlor is taxed on any income (or income from property) in which he or she has a retained interest...

---

35 Gunn, "Tax Charge Doubled!" Taxation 22 Feb 2007.

36 See 26.2.1 (Income mandated to life tenant).

> HMRC will no longer require a fully completed return from trustees of settlor interested trusts in respect of income that is mandated to an IIP beneficiary.[37]

A discretionary trust which wishes to distribute all income to a beneficiary (typically, but not necessarily, the settlor) may consider creating a non-estate IIP and mandating the income to the life tenant,[38] in order to avoid the administrative costs of annual tax returns.

27.9 Settlor indemnity and tax repayment

Section 646(1) ITTOIA provides:

> A settlor is entitled to recover from—
> (a) any trustee, or
> (b) any other person to whom the income is payable in connection with the settlement,
> the amount of any tax paid by the settlor which became chargeable on the settlor under section 624 or 629.

Conversely if the trustees pay tax which the settlor reclaims, the tax must be paid back to the trustees. Section 646 ITTOIA provides:

> (5) The settlor must pay an amount equal to the repayment to—
> (a) the trustee, or
> (b) the other person to whom the income is payable by virtue of or as a result of the settlement.
> (6) If there are two or more such persons, the amount must be apportioned among them as the case may require.

For the tax implications see 30.4.10 (Reimbursement of tax under statutory indemnity); 30.22 (Relevant income used to pay expenses) and 80.24 (Failure to exercise right of reimbursement).

27.10 Sections 624 and 720: comparison

Sections 624 ITTOIA and 720 ITA cover some similar ground. For a full comparison one would need to read all the relevant chapters in this book. It may be helpful to summarise the major differences:

---

37 *http://www.hmrc.gov.uk/cto/newsletter-april11.pdf* accepting the argument in Malcolm Gunn's article.

38 Or indeed to anyone else, at the direction of the life tenant.

Section 624	**Section 720**
Applies to trusts	Applies to non-resident trusts *and companies*
No motive defence	Motive defence
Settlor indemnity	No indemnity for transferor
Applies generally	Applies to resident transferor

The rates of tax are slightly different, a (probably accidental) result of the FA 2006.[39]

Section 624 has priority over s.720: see 29.15 (Interaction with s.624 (and other anti-avoidance provisions?)).

27.11 Settlor receives capital sum

Section 633 ITTOIA provides:

> (1) Any capital sum paid directly or indirectly in any tax year by the trustees of a settlement to the settlor is treated for income tax purposes as follows.
> (2) The sum is treated as the income of the settlor for the tax year so far as the amount of the sum falls within the amount of income available up to the end of the year.

Section 634 ITTOIA defines "capital sum" and "sums paid to the settlor", but is not sufficiently important to discuss in full here.[40]

The key term is "available income." Section 635 ITTOIA provides the definition:

> (1) For the purposes of section 633 the amount of income available up to the end of any tax year is, in relation to any capital sum paid as mentioned in subsection (1) of that section by the trustees of a settlement, calculated as follows.
> (2) Add together the amount of income arising under the settlement in that year and any previous year which has not been distributed.
> (3) Deduct from that figure—
> (a) the amount of that income taken into account under section 633 in relation to that sum in any previous year or years,
> (b) the amount of that income taken into account under section 633 in relation to any other capital sums paid to the settlor in any

39 See 46.5 (Settlor-interested trust: rates of tax on settlor).

40 The definition of capital sum is the same as for the transfer of asset rules; see 29.12.2 ("Capital sum"). The definition of paid to the settlor is discussed in the context of s.87: see 51.7 (Receipt from the trustees).

year before that sum was paid,

(c) any income arising under the settlement in that year or any previous year which has been treated as income of the settlor under section 624 or 629 ...

Section 633 is generally irrelevant to settlor-interested trusts. The trust income will fall into one of two categories:

(1) It will be treated as accruing to the settlor under s.624, or

(2) (if the s.624 remittance basis applies or the settlor is non-resident) it will not be "income arising under the settlement".

In either case there is no "available income".

Section 633 is (in short) intended to catch capital sums paid to the settlor from a trust which is not settlor-interested. Accordingly I shall not discuss the section further here. Where such payments are in point, see too 29.11 (Transferor receives capital sum).

27.12 Interaction of s.624 and s.37 TCGA

Section 37(1) TCGA deals with the relationship between IT and CGT:

> There shall be excluded from the consideration for a disposal of assets taken into account in the computation of the gain any money or money's worth
> [a] charged to income tax as income of, or
> [b] taken into account as a receipt in computing income or profits or gains or losses of,
> the person making the disposal for the purposes of the Income Tax Acts…

Thus IT has priority over CGT.

The section does not work when s.624 applies as the income is treated for IT purposes as income of the settlor and not the trustees! HMRC suggest a creative application of s.32 TMA may solve the problem. CG Manual para 14304 provides:

> **14304. Sums chargeable as income** [February 2006]
> This exclusion does not apply to … situations where the income in question is not treated as the income of the person making the disposal. Typically this is a case of a settlor interested trust where the income is taxed on the settlor. If in this situation the settlor is assessable to both income tax and capital gains tax then relief may be available under s.32 TMA 1970.

Suppose a settlor-interested discretionary trust. Income accrues to the

trustees. The settlor pays income tax. What stops the trustees realising a chargeable gain, on which the trustees may be chargeable if UK resident, or which may be s.2(2) amounts if the trust is not UK resident? Ths solution does not lie in s.32 TMA as it is not the case that the settlor is assessable to both IT and CGT. There is nothing obvious to stop the trustees realising a chargeable gain. But no-one suggests that there is a charge. The solution must be in a general implied rule that receipts of an income nature are not within the scope of CGT.

27.13 Corporate settlor

It is possible (though not usual[41]) for a company to make a settlement (in the settlement-arrangement sense).

Section 627(4) ITTOIA provides:

> The rule in section 624(1) does not apply in relation to income which—
> (a) arises under a settlement, and
> (b) originates from any settlor who was not an individual.

This provisions was introduced in 2012. EN FA 2012 provides:

> The purpose of the amendments to the settlements legislation is to confirm that income arising under a settlement is treated as that of the settlor only where the settlor is an individual. The proposed changes would close avoidance schemes that seek to exploit the settlements legislation by using corporate settlors of 'interest in possession' settlor-interested trusts to try to avoid income tax at higher or additional rates which would otherwise be due on dividends paid by a subsidiary of the corporate settlor. The amendments would ensure that the relevant provisions do not apply to settlors who are not individuals and hence that the income would not be treated as that of the settlor in those situations.

Even before 2012, the correct view was that s.624 did not apply to a corporate settlor.[42] It is helpful to have clarified the law, even if the reason for the change was to stop a tax avoidance scheme which did not work.

---

41 See 80.34 (Pension trusts and employee benefit trusts).

42 The point is now of historic interest only; but see the 10th edition of this work para 24.16 (Corporate Settlor); Kessler & Marre, *Taxation of Charities and Nonprofit Organisations* (9th ed., 2013), para 20.2.2 (Loans by company) (online version *http://www.taxationofcharities.co.uk*).

27.14 Tax return: disclosure of s.624 income

The trustees may inform the settlor of the s.624 income by completing form R185(Settlor) (Statement of trust income chargeable on settlor).

The settlor reports s.624 income in boxes 7-14 of form SA107 (Trusts etc) 2013/14. SA107 Notes (2013/14) provides:

> **Income arising to trustees of a trust or settlement**
> **Boxes 7 to 12**
> Copy the figures from form R185(Settlor). If you have not been provided with one you may need to ask the trustees of the trust or settlement for the information to go in boxes 7 to 12. Use the appropriate box according to the rate of tax taken off by the trustees. You get credit for tax paid by the trustees.
> Do not enter foreign income in these boxes – use the Foreign pages instead.
> If you are both the settlor and the beneficiary of a non-discretionary settlor-interested trust, the amount of your entitlement as beneficiary may be less than the total trust income because the trustees have used some of the income to pay the trust management expenses. But as a settlor you are taxable on all the income so you must enter the total trust income in boxes 7 to 12.
> **Income arising from a non-trust settlement**
> **Boxes 9, 13 and 14**
> If you are taxable as settlor on income arising to another person in a non-trust settlement or arrangement, enter dividend type income in box 9, non-savings income in box 13 and savings income in box 14. Helpsheet 270 Trusts and settlements – income treated as the settlor's explains more about this and will help you to work out these amounts. If, exceptionally, tax has been deducted from the income, enter it in box 7 or box 8. If the income is foreign, use the Foreign pages.

See Rance, "Settlor-interested settlements and how to report income", Taxation 16 January 2014 p.14.

CHAPTER TWENTY EIGHT

TRANSFER OF ASSETS ABROAD: INTRODUCTION

28.1 ToA: Introduction

Non-resident trusts and companies pay no UK tax on foreign income. A non-resident company may pay less tax on UK income. These rules present an obvious means of income tax avoidance. HMRC's first answer to this is Chapter 2 Part 13 ITA, entitled "Transfer of assets abroad" (**"the ToA provisions"**).

There are two main charging provisions:

(1) **"The s.720 charge"** on the transferor; the ToA guidance calls this "the income charge".[1]

(2) **"The s.731 charge"** on individuals (other than the transferor) who receive benefits; the ToA guidance calls this "the benefits charge".

This chapter considers the requirements these charges have in common. The next two chapters consider them individually.

The 2013/14 edition of this work grumbled about the absence of HMRC guidance.[2] Be careful what to wish for! In 2013 HMRC published 150

---

1 There is a third charging provision in s.727 ITA but that is is only a minor supplement to s.720. Some commentators regard the charge on enjoyment condition C as a separate charge, in which case there are said to be four charging provisions; but I prefer to classify that as a sub-rule of the s.720 charge.

2 at para 28.1: "the discussion of the provisions in International Manual 600000 contains almost nothing significant, but thirty eight paragraphs are withheld "because of exemptions in the Freedom of Information Act 2000". Information is withheld if disclosure would be likely to prejudice the collection of tax. No doubt parts of the withheld text identify tax avoidance possibilities or procedures to detect evasion and are correctly withheld. I expect that the bulk of the withheld text is simply a discussion of the law. Disclosure only prejudices tax collection if one takes the view that uncertainty in the scope of anti-avoidance law is desirable. This is constitutionally wrong. The principle of legal certainty is an important aspect of the

pages of draft guidance **("ToA draft guidance")** which will be inserted into the International Manual.[3] I set out relevant passages in this book. As a result, the 5 chapters dealing with this topic have increased from 285 pages in the last edition to about 350 pages in the present edition. The most difficult issues are hardly addressed and every important statement is qualified by words such as *normally, generally, likely, usually, broadly, depending on,* etc. Overall, I do not think public knowledge of the provisions is much improved. Perhaps it was naive to expect otherwise. But recognising the difficulty and the importance of the subject, HMRC have set up a working group to review the guidance. The optimistic reader may hope for the best.

In 2009 HMRC published guidance on the ITA remittance basis rules as they apply to the ToA provisions. This is headed TAH (presumably for Transfer of Assets Handbook). Perhaps it will eventually be incorporated into the rest of the ToA guidance.

The ToA provisions are expressed in mandatory terms, and do not only apply at the option of HMRC. This view was rightly accepted by HMRC (despite the irritation of the judge) in *Anson v HMRC*.[4] What is source for the goose is source for the gander.

28.2 "Relevant transfer"

The key concept is "relevant transfer". The ToA charges only apply if a relevant transfer occurs. Section 716(1) ITA provides:

> A transfer is a relevant transfer for the purposes of this Chapter if—
> (a) it is a transfer of assets, and
> (b) as a result of—
> (i) the transfer,
> (ii) one or more associated operations, or
> (iii) the transfer and one or more associated operations,

---

rule of law. (That is the reason why the Manuals are published.) It is also pragmatically wrong. Legal certainty is in the interest of HMRC as well as private citizens. If HMRC are not prepared to state their view then private citizens must do as best they can. They can hardly be guilty of neglect if they form wrong views in this difficult area in which HMRC are themselves not prepared to comment, and this is likely to lead to loss of tax."

3 *https://www.gov.uk/government/consultations/reform-of-an-anti-avoidance-provision-transfer-of-assets-abroad*

4 [2012] STC 1014 at [18]. For the difficulties which would arise on any other view, see 32.48 (Can an individual disclaim the motive defence?).

income becomes payable to a person abroad.

This sets out the following basic conditions:
(1) *A transfer of assets*.
(2) *Income becomes payable to person abroad*.
(3) *Causation*: Condition (2) is caused by (i) the transfer, or (ii) associated operations, or (iii) both. I refer to this as "**the relevant transfer causation conditions (i), (ii) and (iii)**", or together "**the relevant transfer causation conditions**".

These basic conditions are the subject of this chapter. However the fact that there is a relevant transfer is not sufficient in itself to cause a tax charge. The further conditions in the various charging sections must be satisfied. These are considered in the next two chapters.

28.3 A "transfer" of "assets"

Section 717(a) ITA provides:

> In this Chapter—
> (a) "assets" includes property or rights of any kind

Section 716(2) ITA provides:

> In this Chapter "transfer", in relation to rights, includes the creation of the rights.

If two parties enter into a contract there are *two* transfers of assets as both parties acquire rights.

In *Brackett v Chater*[5] T entered into a contract of employment with an offshore company. Rights under a contract of employment are an "asset". Entering into a contract of employment is a "transfer". T had power to enjoy the income of the company (which was held on trusts under which T was interested) so T was taxed on all income accruing to the company as a result of the transfer.

If B borrows from L there are two transfers of assets, for B acquires the money borrowed and L acquires the benefit of the debt. If L is non-resident, then the interest is income accruing to a person abroad.

Note that there may be a "transfer of assets" in circumstances where there is no individual who is the "transferor".

---

5 60 TC 134.

28.4 Person abroad

Section 718(1) ITA provides:

> In this Chapter "person abroad" means—
> (a) a person who is resident outside the UK, or
> (b) an individual who is domiciled outside the UK.

28.4.1 *UK resident foreign incorporated company*

A UK resident foreign incorporated company is not a person abroad. For the law before 2012/13, see the 2013/14 edition of this work para 28.4.1.

28.4.2 *Non-resident company with UK PE*

A non-resident company with a UK permanent establishment is subject to corporation tax on its PE income.[6] Section 3(1) CTA 2009 provides:

> The provisions of the Income Tax Acts relating to the charge to income tax do not apply to income of a company if—
> (a) the company is UK resident, or
> (b) the company is not UK resident and the income is within its chargeable profits as defined by section 19.

It is considered that s.720 and s.731 are "provisions of the income tax acts relating to the charge of income tax" so they do not apply to PE income of a non-resident company.

This makes good sense, because if the profits are subject to corporation tax, HMRC do not need the ToA provisions. This view is also supported by CTA 2009 EN:

> **Clause 3: Exclusion of charge to income tax**
> 46. This clause ensures that income of a company within the charge to corporation tax is not chargeable to income tax as well as corporation tax. It is based on section 6(2) of ICTA.

This argument was put in *IRC v Levy* but the judge expressed no view.[7] In practice the point may never arise, as it would be unusual for a company within the ToA rules to have a UK PE.

---

6 See 86.1 (Why does permanent establishment matter?).

7 56 TC 58 at [87]. HMRC's answer was to rely on s.9 ICTA 1988, but I cannot see how that helps.

28.4.3 *"Resident outside the UK"*

In practice this expression has not given rise to much difficulty, but there are some interesting possible questions here. Tax statutes usually refer to a person as being "resident in the UK" or "not resident in the UK" and those are well understood expressions, usually with an express definition. "Resident outside the UK" is unusual[8] and not quite the same as "not resident in the UK".

It is suggested that:

(1) A person who is not UK resident must be resident outside the UK.[9]

(2) A person who is UK resident but also resident in another state[10] - a kind of dual residence - will be resident outside the UK.

Section 718(2) ITA provides:

> For the purposes of this Chapter, the following persons are treated as resident outside the UK–
>
> (b) the person treated as non-UK resident under section 475(3) (trustees of settlements),[11] and
>
> (c) persons treated as non-UK resident under section 834(4) (personal representatives).

This is needed because the statutory definitions which determine that trustees (and PRs) are "not resident" in the UK do not (or at least do not expressly) determine that those trustees (or PRs) are "resident outside the UK." It might perhaps have been argued that trustees who are not resident in the UK are not resident anywhere, so they are not "resident outside the UK."

The corporate residence provisions in ss13-18 CTA 2009 only apply for the purposes of Corporation Tax and so do not specifically apply for the

---

8 Another example is s.721(1) ITEPA which defines "foreign employer" as "an individual, partnership or body of persons resident outside the UK and not resident in the UK."

9 Contrast *UCL v Newman* The Times, 8 January 1986 accessible *http://www.kessler.co.uk/tfd-archive*. This concerned "a rather aimless drifter who has spent his time ... "bumming" around Europe. He had never really settled anywhere." Mr Newman was not ordinarily resident in any specific state; but he was *ordinarily resident in the EU* as all his time was spend in one member state or another.

10 Most statutory residence definitions do not expressly apply to determine whether a person is resident in a foreign state, so we must muddle through without them.

11 See 5.4 (Trustee residence for income tax and CGT).

definition of "person abroad".

28.5 Income "becomes payable" to person abroad

The condition here is that income becomes payable to a non-resident or foreign domiciled person (the person abroad).

This condition is satisfied where the transfer is to a UK resident and domiciled person who later becomes non-resident or foreign domiciled.[12]

In *Latilla v IRC*[13] a partnership share was transferred to a company abroad which received its share of the partnership profits. It was argued that trading profits could not be described as income *payable* to the company. Trading "income" is the result of a computation in trading accounts. The gross receipts of the trade (or indeed gross rents of a property business) are not the income. The House of Lords rejected this argument and held that there was no difference between trading income and other types of income.[14] It seems surprising today that this technicality was thought arguable, so far has the pendulum swung from literal to purposive construction.

Suppose T transfers money to a person abroad, and the person abroad uses the funds to repay a debt. In principle, no income arises to the person abroad as a result of the transfer, so the transfer does not satisfy the transfer of asset provisions.[15]

---

12 *Congreve v IRC* 30 TC 163 (a gift to a company which became non-resident), approved on this point in *IRC v Willoughby* 70 TC 57.

13 25 TC 107. I mention for completeness only that this was followed in *Brackett v Chater* 60 TC 134 & 639.

14 The same argument had been rejected in *IRC v Thompson (Receiver for Debenture Holders of John A Wood*) 20 TC 422 at p.429: "[The taxpayer's argument] was that "income" in that Rule meant the balance of profits and gains, and that the Receiver in receiving the money of the Company as it came in from time to time was not receiving the balance of profits and gains, and that therefore he was not the person who received within the meaning of that Rule. But there appears to me to be nothing in that contention. The Receiver in fact receives the proceeds of all the assets of the Company, whether they are capital or whether they are income, and in receiving the proceeds of assets which are income assets he receives the income within the meaning of that Rule."

15 The example is based on the facts of *Fynn v IRC* 37 TC 629 where the Revenue did not argue that s.720 applied, presumably, because they accepted this view was correct. Instead the Revenue argued s.727 applied: see 29.12.3 ("Connected with any relevant transaction").

28.5.1 *Transfer from one person abroad to another*

Suppose assets are transferred from one person abroad to another, eg from offshore trustees to an offshore company. Can one argue that there is no relevant transfer because one cannot say that income *becomes* payable to a person abroad? It was payable to a person abroad even before the transfer! The argument is linguistically possible, but the context shows that it is wrong. If the argument was right then a transfer by a non-resident or foreign domiciled transferor would never be a relevant transfer, which is certainly not the case.

28.6 Situs of transferred assets

The heading "transfer of assets abroad" might suggest a requirement that UK situate assets must become non-UK situate, but that is obviously not the case. After all the creation of rights may be a transfer of assets, and newly created assets are not situate anywhere before the transfer.

HMRC agree. The ToA draft guidance provides:

> **INTM600280 Where are assets located and does it matter?**
> The location of assets either before or after a transfer does not affect the application of the provisions if one of the required outcomes of a transfer is present. ...
> The heading of Chapter 2 Part 13 ITA is 'Transfer of Assets Abroad' but in fact there is nothing within the legislation itself requiring that assets have to be located outside the UK or moved from the UK abroad. In his decision in the case of *IRC v Willoughby* (70 TC 57) at page 81 the Special Commissioner appears to share this view, saying, 'In my opinion, and I so hold, this language [what was section 739(1) ICTA] may be satisfied whether the assets are transferred from the UK to outside the UK, or being outside the UK they are transferred to a person outside the UK'.

The taxpayer in *Willoughby* wisely abandoned this argument on appeal.

28.7 Transfer for full consideration

A relevant transfer may be made for full consideration and need have no element of "bounty" or gratuitous intent. (Contrast the settlement provisions.)[16] HMRC agree. The ToA draft guidance provides:

---

16 See 80.2.3 (Settlement-arrangement definition of settlement).

> **INTM600240 Relevant Transaction: What is a transfer?**
> ... The fact that an individual may receive a payment or consideration in full for a movement of some form of property from one person to another does not preclude that action from being a transfer for the purposes of the transfer of assets rules.

28.7.1 *Purchase of asset from person abroad*

Suppose T buys an asset from a person abroad for cash ("the purchase price"). At first glance, the payment of the cash purchase price is a relevant transfer. The payment is a transfer of assets; as a result of the payment, income (from the cash) will normally accrue to the person abroad. However, it is suggested that this is not the case if:

(1) the asset would otherwise have yielded income to the person abroad;[17]

(2) the purchase price does not exceed the value of the asset.

In these circumstances, the person abroad acquires the income of the cash purchase price T transfers to them, but T loses the income from the asset which they sell to T. If the two (broadly) cancel each other out, it cannot be said that any "income becomes payable" to the person abroad. If that is right, the transfer of asset conditions are not satisfied every time someone sells an asset to (or buys an asset from) a non-resident person. That would be a sensible result. If T sells assets to an offshore trust, say, or to an offshore company, it would be surprising if T's only defence to ToA was the motive defence.[18]

28.7.2 *Income arising must be identifiable*

The provisions assume that one can *identify* the amount of income which arises to the person abroad as a result of the transfer. If that identification is not possible then the ToA provisions do not - indeed cannot - operate.

John Avery Jones raises this question:

> What about buying a ticket from a foreign airline, buying a meal or paying for a hotel room when abroad? There is a transfer of assets and

---

17 The position would be different if T transfers assets to an offshore company in consideration of an issue of shares or debentures, or a life policy.

18 In such cases T would often have "power to enjoy". Unless this is right, there is double taxation. T may be liable under s.720 for income tax on the income arising from the asset sold to the person abroad. T is also liable to income tax on income arising from the proceeds which T receives on the sale of the same asset.
If my view is wrong, then the motive defence should be generously applied in cases of a sale for full consideration.

> it is clear that "income becoming payable" includes the receipt of sums which form part of the recipient's trading profits. Oh, and there is my IFA subscription, my subscription to *European Taxation*, my purchase of that overpriced new edition of *OECD Model Tax Convention*, and the new edition of *Klaus Vogel on Double Taxation Conventions* direct from the publisher. Foreign entities all of them. I expect if I think for a moment I shall think of lots more. What about my (foreign) car? Did I buy it from an agent for the manufacturer or from a UK subsidiary, and does it make any difference anyway?[19]

These payments are all transfers of assets, as a result of which (additional) trading[20] income in principle becomes payable to the person abroad. But none of these transfers are relevant transfers because one cannot identify the amount of income which becomes payable as a result of them.[21]

The question whether one can identify the income which arises to the person abroad as a result of a transfer sometimes overlaps with the question whether one can identify a transferor. In *IRC v Pratt* 57 TC 1 where a company made a transfer, the taxpayers were held not to be transferors because one could not identify income arising to the person abroad from what each individual taxpayer had contributed or done.[22] But the two questions are in principle distinct. An individual who subscribes for shares in (say) Microsoft Inc is clearly a transferor, but one cannot identify what income becomes payable to Microsoft as a result of that transfer, so the ToA provisions do not apply.

28.7.3 *Deposit in offshore bank account*

If T deposits money with a bank, the trading receipts of the bank are increased, though that may be reduced or almost cancelled by the interest the bank pays to T. There is still a profit overall, if the bank is profitable, but that element of profit cannot be identified. The deposit is a transfer of assets but it is not a relevant transfer because one cannot identify the income which becomes payable as a result of it.

---

19 [1998] BTR 392.

20 Except in the case of the purchase of the foreign car from a UK subsidiary, where the income arising to the person abroad would be the dividend (if any) from the subsidiary.

21 Of course in practice considerations of materiality might also arise.

22 See 29.3.2 (Transfer procured by individual).

28.7.4 *Transfer for issue of shares or debentures*

Suppose T transfers an asset to a foreign company in exchange for the issue of shares or debentures in that company (set up for the purpose and wholly owned by a trust or structure set up by T). This may well be transfer for full consideration. It is nevertheless a relevant transfer. Indeed it is the archetypal ToA situation. Tax avoidance arrangements set up in the 1920s and 1930s typically involved the transfer of assets to a Canadian company in consideration of debentures issued by that company.

Contrast the position if T subscribes for shares or debentures in (say) a large quoted foreign company or collective investment scheme. This is not a relevant transfer as one cannot identify the income which arises as a result of the transfer.

28.7.5 *Transfer for issue of bond or life insurance policy*

The same applies if T subscribes for a bond or life insurance policy from a large foreign institution. One cannot normally identify the income arising to the institution as a result of the transfer so this is not a relevant transfer. However, if the transfer is linked to particular investments actually made by the institution (as is usually the case for a personal portfolio bond), it would in principle be possible to identify the income, and there would be a relevant transfer.

28.7.6 *HMRC view*

EN FB 2006 states:

> [1] The [ToA] provisions do not affect an individual's personal direct offshore investments. They only apply where an individual is able to enjoy income in a form that would otherwise be non-taxable (or subject to a lower rate of taxation), and there is a purpose to avoid UK tax.
> [2] So the legislation would not apply where, for example,
> [a] a UK resident invests directly in an offshore bank account or
> [b] buys shares in a company quoted on an overseas stock exchange,
> because the income arising from such investments remains liable to UK tax in the usual way.[23]

23 EN to s.79, para 63.

Example [a] is the person who invests[24] in an offshore bank account. That person makes a transfer of assets to a person abroad (the bank). It is broadly[25] true that the income from such investments (ie bank interest) "remains liable to tax in the usual way". But while this explains why HMRC do not wish to apply s.720 ITA, it does not actually offer any defence to the provisions.[26] (This fact is relevant to the motive defence, but it would be surprising if the only defence to s.720 was the motive defence.)[27] The true reason is that one cannot identify any income of the bank which becomes payable as a result of the transfer, so the transfer is not a relevant transfer.

Example [b] is the person who buys shares on an overseas stock exchange. The example is misconceived and perhaps the less one says about it the better. But in brief: a person who buys shares does not make a relevant transfer, unless the vendor is abroad; and the fact that the shares are "quoted on an overseas stock exchange", like the flowers that bloom in the spring, has nothing to do with the case. If the vendor is abroad (perhaps the EN assumes this) the transfer is not a relevant transfer for the reason set out above.

Whatever one thinks of the reasoning of the EN, it does appear that the conclusions reached in this section would generally be acceptable to HMRC.

28.8 Income accruing to person abroad: Causation conditions

There is not a relevant transfer merely because there has been a transfer of assets and income has become payable to a person abroad. The income must become so payable as a result of the transfer (or associated operations). The test is one of causation.

28.8.1 *Purchase of secondhand company by individual*

Suppose T (UK resident) buys the shares of an already existing non-

---

24 A loan or deposit in a bank account may not be an "investment" in the strict sense of the term, but the EN is not using the term "invest" in its strict sense.

25 It is not strictly true that income from an offshore bank account remains liable to UK tax "in the usual way". A remittance basis taxpayer may invest in a foreign account to qualify for the remittance basis. An arising basis taxpayer obtains the tax advantage that tax is not deducted at source, and DT relief may apply.

26 See 29.4 (Must the transferor avoid or intend to avoid IT?).

27 No-one expects the depositor to claim the motive defence in their tax return.

resident company ("**a secondhand company**"). Assume the company owns assets. That purchase involves a transfer of assets by T – payment of the purchase price[28] – is described in the following discussion as "**the purchase price transfer**".

It is the case that income accrues to a person abroad (the company). However, it cannot be said that the income became payable to the company as a result of the purchase price transfer. The company merely continues to receive the income from its own assets, as it did before, and is not in any way affected by the change in ownership of its shares. Thus if the vendor is UK resident and domiciled, the purchase price transfer is not a relevant transfer.

Now suppose T purchases the shares from a person abroad. In that case the purchase price transfer may be a relevant transfer because the vendor may invest the proceeds of sale and receive income as a result of that transfer. However, the income arising as a result of the purchase price transfer would be the income accruing to the vendor, not the company's income.

In these cases there will have been (at least) one other transfer of assets, the transfer of assets to the secondhand company (eg on a subscription for the company's shares). I call this "**the company funds transfer**". The company funds transfer is a relevant transfer. If T is the transferor of that transfer then T will in principle be within s.720 and taxed on the secondhand company's income.[29] If T is not the transferor, T may be subject to tax under s.731 if T receives benefits (unless the company funds transfer qualifies for the motive defence).

The secondhand company may later make a relevant transfer.[30] If T procures that transfer, T is its transferor.

28.8.2 *Purchase of secondhand company by holding company*

Now suppose:

(1) T transfers assets to H Ltd, an offshore company ("**the H transfer**").

(2) H uses its funds to purchase a secondhand company ("**the purchase**

---

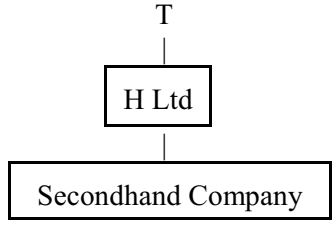
28 The sale in fact involves two transfers of assets: payment of the purchase price to the vendor and transfer of the shares to T.

29 As to whether T is the transferor, see 29.3 (Who is the transferor?).

30 For instance, a transfer to a non-resident subsidiary. A straightforward sale of assets by the company may not be a relevant transfer because no income becomes payable. See 28.7.1 (Purchase of asset from person abroad).

price transfer").

Thus the position is:



A similar analysis applies:

(1) The H transfer is in principle a relevant transfer. However, no income arises to a person abroad as a result of that transfer.[31]

(2) The purchase price transfer is not a relevant transfer. No income accrues to a person abroad as a result of that transfer. Income does arise to the secondhand company, but not as a result of the H transfer or the purchase price transfer.

Suppose H Ltd then provides additional funds for the secondhand company, directly or indirectly. It appears then that the secondhand company will receive income as a result of the H transfer[32] and T will be subject to tax under s.720 on the income accruing to the secondhand company from the additional funds, if that income can be identified.

28.9 Associated operation: Definition

Section 719(1) ITA provides just about the widest definition the drafter could devise:

> In this Chapter "associated operation", in relation to a transfer of assets, means an operation of any kind effected by any person in relation to—
>
> (a) any of the assets transferred,
>
> (b) any assets directly or indirectly representing[33] any of the assets

---

31 Assume no income accrues to H (the secondhand company does not pay a dividend).

32 Together with an associated operation (the provision of funds by H).

33 "Representing" is defined in s.717(b) ITA:

> "references to assets representing any assets, income or accumulations of income include references to—
>
> (i) shares in or obligations of any company to which the assets, income or accumulations are or have been transferred, or
>
> (ii) obligations of any other person to whom the assets, income or accumulations are or have been transferred."
>
> Thus if (1) T transfers assets to a company and (2) T transfers the shares in the

transferred,

(c) the income arising from any assets within para (a) or (b), or

(d) any assets directly or indirectly representing the accumulations of income arising from any assets within para (a) or (b).

I refer to items (a) to (d) as **"the assets transferred"**.

An associated operation does not exist in isolation, it exists in relation to a transfer. I refer to that as being associated with the transfer. There are two requirements:

(1) It must be an "operation".

(2) It must be "effected in relation to" the assets transferred by the transfer.

The term "associated operations" is also used in the IHTA. However the definition is different, so only limited assistance can be drawn from IHT cases.

28.9.1 *"Operation"*

"Operation" is (rightly) not defined but is clearly a word of wide import. It includes a company becoming non-resident.[34] It does not include death, but that does not matter because it does include the act of making a will.[35]

In *Herdman v IRC* 45 TC 394 there was a sale (ie transfer) of assets to an Irish company. The company then "accumulated" income and "managed" its assets so as to be able to repay a loan to the transferor. These were held to be "operations" by most of the judges but this is obiter and difficult to accept. Unlike IHT, operation does not include an omission. A company does not "accumulate" income (in the legal sense). If "management" is an operation then everything is an operation (all assets must be "managed") and the expression makes no sense. Lords Pearce and Reid (more judiciously) left open the question of whether these were "operations".

---

company to another person, the second transfer is an associated operation in relation to the first. This would not have been clear without the definition.

34 *Congreve v IRC* 30 TC 163.

35 *Bambridge v IRC* 36 TC 313. This case contains Harman's aphorism: "Death, as we know, is an awfully big adventure, but even the Crown admits that it is not an associated operation." More analytically, death is not an associated operation as it is not "effected by a person in relation to assets".

28.9.2 *Effected "by any person"*

The ToA draft guidance provides:

> **INTM600300 Relevant Transaction: Associated operations**
> ... An operation effected by someone other than the transferor can be an associated operation as the legislation states it can be effected by any person. This is demonstrated in a number of tax cases. *Corbett's Executrices v IRC* 25 TC 305 involved the transfer of an interest in an estate to a UK resident company which subsequently sold some of the investments transferred to a company resident overseas. It was held that the transfer to the overseas company was associated with the transfer to the UK resident company. In *Herdman v IRC* 45 TC 394 it was held that following a transfer to a company the accumulation of income by that company and the management of the assets transferred was an operation associated with the original transfer.

28.9.3 *"Effected in relation to" the assets transferred*

In *Fynn v IRC*:[36]

(1) In 1948 T transferred assets to an Irish company ("the original transfer").
(2) In 1952 T lent money to the company ("the 1952 loan").

The 1952 loan was not an associated operation in relation to the original transfer, because it was not effected "in relation to" the assets transferred by the original transfer.

In *Carvill v IRC*:[37]

(1) T transferred assets to a Bermudian company (B Ltd) in exchange for shares, and so became a majority shareholder in B Ltd ("the original transfer").
(2) T became a 100% shareholder in B Ltd by (a) purchasing shares and (b) B Ltd purchasing its own shares.
(3) B Ltd entered into arrangements to remunerate T via a personal services company and a brokerage sharing agreement.

Steps (2) and (3) were not associated operations, as they were not effected in relation to the assets transferred by the original transfer.

---

36 37 TC 629.
37 [2000] STC (SCD) 143 at [80]-[85], 75 TC 477 (Special Commissioners).

28.9.4 *Associated operation preceding the transfer*

Section 719(2) ITA provides:

> It does not matter whether the operation is effected before, after, or at the same time as the transfer.

This provision (introduced in 2006) gives statutory effect to the view formerly expressed in RI 201.[38] I cannot think of a practical case where it would matter and would be grateful to any reader who could explain why HMRC thought this point was worth legislating for.

28.9.5 *Is mere historical association enough?*

On a simply reading of the definition, an operation can be associated with an earlier transfer even if the two were not part of any plan and many years apart. Suppose:

(1) A transfers an asset to B (who is UK resident) in 1970; and
(2) B transfers the asset in the year 2010 to an offshore trust under which A may benefit.

On a simple reading, B's disposition is an associated operation in relation to A's transfer even though:

(1) they are not part of a single arrangement;
(2) A is unaware of B's disposition;
(3) B's disposition is itself a relevant transfer;
(4) one or both transfers is a sale on arm's length terms.

The same would apply if A's transfer was made in 1870 or 1670. Indeed, anyone who purchases or disposes of an estate in English land is only effecting the most recent operation of a series of associated operations (dispositions of the land) which may perhaps be traced back to the Norman Conquest if not before, and only a lack of records prevents one tracing the sequence of associated operations to the dawn of civilisation. In fact this simple reading cannot be right, for reasons given below.

28.10 Significance of associated operations

It is never enough to establish that there is an associated operation in

---

38 "... an associated operation does not necessarily have to take place after a transfer of assets. A transaction undertaken 'in relation to' a transfer of assets can precede the transfer."
That seemed right. The FA 2006 gave no thought to transitional provisions but in the circumstances it does not matter.

relation to a transfer. This is just the first step. One must then go on to ask what (if anything) follows. The term "associated operations" is used in the definition of "relevant transfer"[39] and it is used in the definition of "relevant transaction"; s.715(1) ITA provides:

> A transaction is a relevant transaction for the purposes of this Chapter if it is—
>
> (a) a relevant transfer, or
>
> (b) an associated operation.

The existence of associated operations is therefore relevant to the following:

(1) *Section 716 ITA*: Income becomes payable to person abroad as a result of transfer and/or associated operations.[40]

(2) *Section 721 ITA*: Individual has "power to enjoy" as a result of transfer and/or associated operations.

(3) *Section 729 ITA*: Individual receives capital sum connected with any relevant transaction.

(4) *Section 732 ITA*: Individual receives a benefit as a result of the transfer or associated operations.[41]

(5) *Section 733 ITA*: "Relevant income" is income which can as a result of the transfer or associated operations be used for providing a benefit.[42]

(6) *Motive defence*: All relevant transactions must satisfy the conditions of the motive defence.[43]

The ToA draft guidance provides:

> **INTM600300 Relevant Transaction: Associated operations**
>
> ... The same associated operations do not have to be taken into account in every context where it is necessary to consider 'associated operations'. For example, a transfer together with an associated operation may result in income becoming payable to a person abroad, but it may be a quite different associated operation in relation to a transfer that results in the power to enjoy that income.

---

39 See 28.2 ("Relevant transfer").

40 See 28.11 (Person abroad receives income as indirect consequence of transfer).

41 See 30.8 (Benefit causation condition).

42 See 30.31 (Is income of company held by a trust relevant income?).

43 See 32.39 (Associated operations and motive defence before 5 December 2005) and 32.40 (Transfer and associated operations both after 4 December 2005).

28.11 Person abroad receives income as indirect consequence of transfer

28.11.1 *Transfer from A to B followed by transfer from B to person abroad*

Suppose:

(1) In 1970 A transfers an asset to B (who is a UK resident individual) ("A's transfer").
(2) In 2000 B transfers the asset to an offshore trust ("B's trust") under which A may benefit ("B's transfer").
(3) A's transfer and B's transfer are not part of a single arrangement and A is unaware of B's transfer.

B's transfer is obviously a relevant transfer. The question is whether A's transfer is a relevant transfer.

It may be helpful to recap the definition. Section 716(1) ITA provides:

> A transfer is a relevant transfer for the purposes of this Chapter if—
> (a) it is a transfer of assets, and
> (b) as a result of—
> (i) the transfer,
> (ii) one or more associated operations, or
> (iii) the transfer and one or more associated operations,
> income becomes payable to a person abroad.

I refer to (i) to (iii) as "causation conditions (i) to (iii)".

A's transfer meets condition (a): it is a transfer of assets. Income becomes payable to a person abroad. Causation condition (i) is not satisfied, that is, it is not as a result of A's transfer alone that income has become payable to the offshore trustees. However, B's transfer is at first sight an "associated operation" in relation to A's transfer. It seems at first sight that causation condition (ii) is satisfied: income becomes payable to the trustees as a result of the associated operation (B's transfer); so A's transfer is a "relevant transfer" and A is taxable under s.720 on the income of B's trust! This clearly cannot be right; but why not? The motive defence is not a satisfactory solution to this problem:[44] one must conclude that A's transfer is not a relevant transfer, that is, it does not satisfy causation condition (ii) or (iii). How do we reach this result?

---

44 The motive defence could not help if either A's transfer or B's transfer was made for tax avoidance reasons; or even if B's transfer was innocent but A was unable to prove it: see 32.39 (Associated operations and motive defence before 5 December 2005).

28.11.2 *Position before 2007/08*

Before 2007/08 the ToA provisions applied a more limited causation test. They only applied to:

> transfer of assets *by virtue or in consequence* of which, either alone or in conjunction with associated operations, income becomes payable to persons resident or domiciled outside the UK.

This applied causation condition (i) and (iii) but not causation condition (ii).

In the 5th edition of this book I said:[45]

> ... the key to making sense of "associated operations" everywhere in the ToA provisions rests on the concept of causation. In the example above, although income accrues to the offshore trustees, it does not do so "in consequence" of A's transfer *in conjunction* with B's transfer. The only cause is B's transfer.
>
> But for A's transfer, B's transfer would not have happened, and so income would not become payable to the person abroad. However, causation in law (and indeed in ordinary English usage) does not apply a simple "but for" test. B's transfer as an independent act will "break the chain of causation". That is, the reference to words of causation requires one to identify the real or effective or operative cause of the fact that income accrues to a person abroad (which in this case is B's transfer). There must be "sufficient causal connection."

So I concluded:

> Although the statutory words are different, it is suggested that the appropriate test is the "clean break" test, i.e. is A a settlor of B's trust, did A provide the property indirectly?

28.11.3 *Position from 2007/08*

Unfortunately the key which allowed the reader to make sense of the provisions was discarded in the tax law rewrite.[46] I infer that HMRC found causation an inconvenience, so they relaxed it, by adding causation condition (ii). But no consideration was given to the consequences. The

---

45 5th edition, para 14.11. Footnotes omitted.

46 The rewrite team might say that s.742(1A) ICTA (introduced in 2006) made this change. That was arguably not the correct view of that provision, but it does not now matter.

result is a gap which the courts will have to fill up as best they can. It continues to be the case, in the example above, that A *cannot* be the transferor and within s.720. But on what grounds can one reach that result? Something must be read into the statutory wording.

One solution is to say that there can only be one transferor; since B is clearly a transferor, A is not to be regarded as transferor. This has some support in *Vestey* 54 TC 503.

The best solution, now the key to understanding associated operation rules, is to say that an operation cannot be associated with a transfer unless the transfer and the operation are "put in train" by one person. Mere historic association is not enough to constitute "associated operations" for the purposes of the Act. There must be something more.[47] In an ideal world, Parliament should have identified that "something more" and not leave the job of constructing workable legislation to the courts. But there it is. It is suggested that the test for associated operations is the "clean break" test, ie is A a settlor of B's trust, did A provide the property indirectly?[48] If not, the operations are not associated.

This view is supported in *Corbett*:

> The interval during which the beneficiaries were thinking out their "associated operations" could not make any difference to the legal conclusion, *unless the Special Commissioners had found as a fact that it negatived the "conjunction" or association between the two operations* - the transfer to and the transfer by Woodgate.[49]

28.11.4 *Transfer to UK trust followed by migration of trust before 6 April 2006*

Suppose:

(1) In 1970, A transfers assets to a discretionary trust with UK trustees ("A's transfer");

(2) In 2000, the UK trustees appoint foreign trustees in their place and transfer the trust assets to them ("the appointment of foreign

---

47 Contrast the approach to "disposition by associated operations" in *IRC v Brandenburg* [1982] STC 555, where Special Commissioners added a gloss that a disposition made by associated operations (for IHT purposes) must be "put in train" by one person: see Venables, "Gifts by Associated Operations" 5 PTPR 11, accessible *http://www.khpplc.co.uk/reviews*

48 See 80.4 (Gift from A to B followed by gift to trust by B).

49 25 TC 305 at p.394.

trustees").

The appointment of foreign trustees is a relevant transfer. (The appointment of foreign trustees involves a transfer of assets, as a result of which income accrues to the non-resident trustees.) The question is whether A's transfer does likewise. That is, is it a relevant transfer?

A's transfer alone does not satisfy causation condition (i). Income becomes payable to a person abroad. But causation condition (i) is not satisfied because it is not as a result of A's transfer alone that income has become payable to the offshore trustees. However, the appointment of foreign trustees is an "associated operation" in relation to A's transfer. Before the ITA 2007, the question was whether A's transfer in conjunction with the associated operation together satisfied the causation condition. It is considered that it was as a result of the transfer in conjunction with the associated operation that the income accrued to the foreign trustees. This was so even if the appointment was not envisaged at the time of the transfer to the original settlement. With the current wording, the literal reading is that A's transfer is a "relevant transfer". This is simply because the appointment of foreign trustees is an associated operation, and income becomes payable to a person abroad as a result of that operation; causation condition (ii) is satisfied. Although some gloss is required to make the section work, in other cases, as discussed above, that gloss is not likely to alter the result in this case.[50]

28.11.5 *Transfer to trust followed by transfer from trust to offshore company*

This is in principle the same as 28.11.4 (Transfer to UK trust followed by migration of trust before 6 April 2006). This applies whether the transfer by the trustees is gratuitous or in exchange for shares, debentures or an offshore life policy. But if the investment is for wholly commercial

---

50 The position in 28.11.1 (Transfer from A to B followed by transfer from B to person abroad) is different. There B's transfer is independent in a way that trustees are not, because trustees are constrained by the fiduciary nature of their powers.
This view is also supported by obiter dicta in *Congreve v IRC* 30 TC 163. This concerned a gift to a UK company which became non-resident. This was a relevant transfer without the association operations rule. See 28.5 (Income "becomes payable" to person abroad). But the House of Lords also held (at p.206) that the company becoming non-resident was an associated operation; and (by inference) income arose to the company abroad as a result of the transfer and associated operation.
HMRC would have further arguments, if necessary, based on *Muir v Muir* [1943] AC 468.

reasons, it may be argued that is not the case and so the income of the underlying company is not within the ToA provisions, but this requires the Courts to read words into the statute, and the case for doing so here is not strong enough.

28.11.6 *Transfer to company followed by migration of company*

This is a relevant transfer even without the associated operations rules.[51]

28.11.7 *Transfer to UK trust followed by migration of trust from 6 April 2006*

Suppose the facts of 28.11.4 (Transfer to UK trust followed by migration of trust before 6 April 2006), but assume the migration occurred after 6 April 2006. The trust is deemed to be a single person. The analysis is therefore different. The appointment of foreign trustees does not involve any transfer. Instead the analysis is the same as 28.11.6 (Transfer to company followed by migration of company). The end result is the same, though the route to that destination is different.

28.12 Income of person abroad

The concept of "income of the person abroad" is relevant for several purposes of the ToA provisions:

(1) There is a relevant transfer only if "income becomes payable" to a person abroad. If *no* such income becomes payable then there is no relevant transfer and the ToA provisions cannot come into effect.

(2) The *identity* of the income payable to the person abroad as a result of the transfer is relevant:
   (a) for s.720 ITA, as one must ask whether the transferor has power to enjoy that income;
   (b) for s.731 ITA, as one must ask whether that income can be used to benefit an individual.

(3) The *amount* of income payable to the person abroad as a result of the transfer is relevant as ascertaining that amount is the first step in computing the amount on which tax is charged under s.720 or relevant income for s.731.

28.13 Capital receipts deemed to be income

The transfer of asset rules refer to "income". This means "income for

51 See above footnote

income tax purposes" which is a different concept from "income for trust law purposes" or "income for accountancy law purposes".

The ToA draft guidance provides:

> **INTM600400 Income becomes payable to person abroad: Income**
> ... As well as items that are specifically treated as income there are also items treated as income for some income tax purposes but which may not be income of a person abroad for the purpose of transfer of assets. In considering whether any item is income it is relevant to consider its character in the hands of the person who actually receives it. In the absence of a specific provision that identifies a particular item as income for all UK tax purposes or specifically for the purpose of the transfer of assets legislation, if it is not income in the hands of the person abroad who actually receives it then it is unlikely to be income for the purpose of transfer of assets....

28.13.1 *Dividends, etc*

Section 383 ITTOIA provides:

> (1) Income tax is charged on dividends and other distributions of a UK resident company.
> (2) For income tax purposes such dividends and other distributions are to be treated as income.
> (3) For the purposes of subsection (2), it does not matter that those dividends and other distributions are capital apart from that subsection.

This applies for the purposes of the ToA provisions and s.624 ITTOIA, so the distribution on a purchase of own shares, for instance, is income for those purposes[52] even though it is a capital receipt for trust law purposes. Likewise income deemed to accrue on a stock dividend under s.410 ITTOIA and a gain deemed to be income under s.688 ITA (transactions in land). But HMRC do not agree. The ToA draft guidance provides:

> **INTM601160 the income charge: what is the measure of income: stock or scrip dividends**
> Where an individual owns shares in a UK resident company that makes a stock or scrip dividend payment (see CTM17005), in respect of those shares, that individual is treated for UK income tax as having received an amount of income equal to the appropriate amount in cash. The amount is however only regarded as the income of the individual and is

52 This is assumed to be the case in the drafting of s.482 ITA.

not regarded as income for all purposes of the Taxes Acts. Thus if the person abroad is, for example, a company, that stock dividend from a UK company would not on the face of it be income in the company's hands. As such it would not be taken into account as income that becomes payable to a person abroad for the purposes of transfer of assets.

The position for a stock dividend from a foreign company may however be different. The provisions relating to stock dividends in Chapter 5 Part 4 ITTOIA only apply in respect of stock dividends from UK companies. In considering such an item received from a foreign company regard would need to be taken of the relevant foreign law as well as the character in the hands of the receiver. If it is not income in the hands of the person abroad or otherwise specifically treated as income it will fall outside the transfer of assets provisions.

On gains from offshore funds: see 35.10 (OIG arising to non-resident trust). On gains from life policies see 33.7 (Non-resident trusts and companies) and 33.7.2 (Non-resident company or institution).

28.14 The amount of income of person abroad

This section considers the amount of the income arising to the person abroad as a result of the transfer and associated operations.

28.14.1 *Dividend income of person abroad: Net or grossed up?*

In order to follow the discussion one needs to bear in mind the usual rules for taxing a UK dividend.[53] In short, a UK resident or EEA national receives a tax credit and the dividend is grossed up. For instance:

Dividend £1,000 **("net amount")**
Tax credit (one ninth) £111
Dividend plus tax credit £1,111 **("gross amount")**

A person abroad who is not resident in the EU is not normally entitled to a tax credit and the income is not grossed up.

For s.720 purposes, it is considered that dividend income should be grossed up: see 46.6 (Rates of tax on transferor within s.720 ITA).

For s.731 purposes:

(1) If the person abroad was not entitled to a tax credit, the amount of a

53 See 20.2 (Income from UK resident company). References in this section to dividends also include other company distributions.

dividend would be the net amount.

(2) If the person abroad was entitled to a tax credit the amount of a dividend would be the gross amount. However, the relevant income is only the amount which can be applied for the benefit of any person so the amount of relevant income is the net amount.

HMRC agree. The ToA draft guidance provides:

> **INTM601240 what is the measure of income: dividends**
> Income tax is charged on dividends and other distributions from UK companies under section 383 ITTOIA 2005. If the income of the person abroad is dividend income it is unlikely that the person abroad will be entitled to a tax credit on the dividend and the amount included in the accounts is likely to be the net dividend. Where the income charge applies to this see (INTM602520)
> In arriving at the amount of UK source dividends to be taken into account in the amount of income charge, the net dividend should be grossed up by reference to the tax credit and the gross dividend taken into account. Such income is treated as arising to the individual, and being ordinarily resident in the UK, would be entitled to the tax credit.
> ...
> **INTM602520 Deductions and reliefs**
> If the income of person abroad is UK source dividends, the dividends would have to be grossed up before allocating the tax credit. For years up to and including 1998-99 the recipient of the distribution was entitled to a tax credit equal to such proportion of the amount or value of the distribution as corresponded to the rate of advance corporation tax in force for the financial year in which the distribution was made. Dividends for subsequent years carry a notional tax credit. This treatment would not normally apply to non-resident shareholders, but if the income is notionally treated (for example under the income charge provisions) as that of a UK resident, the same consequences follow as for an actual recipient.
> Where the income of the person abroad is foreign source dividends there would not normally be a tax credit available. However from 2008-09 section 397A ITTOIA 2005 provides for tax credits in respect of distributions from non-UK resident companies. Where the distributions are treated under any of the provisions of the Taxes Acts as the income of a person other than the recipient then that person is treated as receiving it This means that where the income charge under the transfer of assets provisions is in point a tax credit of 1/9th of the amount or value of the grossed up distribution is available to persons holding less

> than 10% of the share capital of the company concerned, and subject to certain other conditions within that legislation. ...
> As far as the benefits charge is concerned no tax credits are available either in respect of UK or of foreign source dividends of a person abroad. However the amount of relevant income will be the net dividend after any tax charge.

28.14.2 *Deduction of administration costs against investment income*

In *Chetwode v IRC* 51 TC 647 an offshore company received dividends and interest of about £3,000 per annum. The transferor was taxed on the gross amount of that income, without deduction for (i) investment advisory fees, (ii) management fees, (iii) safekeeping charges, (iv) security handling fees and bank charges, (v) registered office and executive office fees, totalling about £1,000 per annum. The approach of *Chetwode* was that s.720 should be construed so as to put the transferor in the same position as if he had retained the assets himself. Had he done so he could not have deducted these investment costs for the purposes of calculating his income. So there was no deduction for s.720 purposes. This is consistent with s.624.[54]

HMRC allowed deductions in respect of estimates of such costs of collecting the investment income as would have been incurred had the investment income been instead received by the transferor in person. This was calculated (how?) at about £20 per year. There is no statement on whether this concessionary practice still obtains but it is (perhaps) worth claiming it to see.

For s.731 purposes expenses will be deducted in computing relevant income.

28.14.3 *Trading income and trading losses of person abroad*

It was accepted in *Chetwode* that trading income of the person abroad is calculated by setting trading receipts against trading expenses.[55] The case does not discuss whether trading income is calculated:

(1) by accountancy principles, under which statutory non-deduction provisions such as s.34 or s.45 ITTOIA would not apply, and depreciation would in principle be allowed; or

---

54 See 27.2.6 (Trustee expenses).

55 See at p.687 "In the case of a trade, it is necessary to strike a balance, in respect of a period, before any taxable "income" arises."

(2) by tax principles applicable to calculating trading profits.

The approach of *Chetwode* suggests that the second is the correct view.

HMRC agree. The ToA draft guidance provides:

> **INTM601120 the income charge: trading companies**
> The income of a trading company which is to be taken into account for the purposes of the income charge is generally the balance of profits that would be chargeable to tax in the UK. Therefore in arriving at this amount regard should be had to the provisions in Part 2 ITTOIA 2005. It may be that deductions are claimed in respect of emoluments paid by a company to the individual who is subject to the income charge. If a deduction is allowable under 'normal principles' as above then, although the amount within the income charge is effectively reduced, emoluments are within the direct income tax charging rules.

Profits are computed on a current year basis[56] but that does not much matter after the abolition of the preceding year basis (which used to apply to trading income).

For losses, RI 201 provides:

> The Revenue's practice is only to allow trading losses to be carried forward and set against future trading profits. They cannot be offset against investment income of the same, previous or future years.[57]

The ToA draft guidance makes the same point:

> **INTM601120 the income charge: trading companies**
> ...In circumstances where an offshore company's trading expenses exceed its income the result will be a loss. The transfer of assets provisions are charging provisions only and, specifically, charge income treated as being that of the individual. There is no provision for treating such a loss as that of the individual.
> However it is HMRC's practice to allow an offshore company's trading losses to be carried forward and to be set off against the future profits of the company. They cannot be offset against the company's investment income of the same, previous or future years. ...

For s.731, losses will be deducted in computing relevant income if paid out of relevant income. There is no group relief.

---

56 *Vestey v IRC* 54 TC at p.528 (Special Commissioners).

57 This is consistent with the position for property income losses. See 27.2.5 (Property business losses).

28.14.4 *Property income of person abroad*

The rules for measuring property income are the same as for the settlement provisions; see 27.2.4 (Property Business Income). Transfer pricing may also need consideration here.

The ToA draft guidance provides:

> **INTM601280 what is the measure of income: income from property**
> Where there is rental income, any profits should be arrived at in accordance with the rules in Part 3 ITTOIA 2005 [and Part 4 Corporation Tax Act 2009?].

28.14.5 *Loan relationship and Forex income*

Since income is computed on IT principles, "income" does not include profits computed under loan relationship or Forex rules which apply for the purposes of corporation tax and not for IT purposes. This is so even if the person abroad is a company.

HMRC agree. The ToA draft guidance provides:

> **INTM601120 the income charge: trading companies**
> It should be noted that forex and loan relationship rules apply for Corporation Tax purposes only.

28.14.6 *Exchange rate profits/losses*

The ToA draft guidance provides:

> **INTM601260 what is the measure of income: profit on exchange**
> If the accounts of a person abroad show a profit on exchange, this should not be treated as income of the person abroad for the purposes of the income charge. The profit usually derives from a difference between the exchange rates in force when the income is credited in the accounts of the person abroad and the rates ruling:
> - when that income is actually remitted to the person abroad, or
> - if not remitted, at the date to which the accounts are made up.
>
> The income as it arises to the person abroad is to be deemed to be that of the individual (*Chetwode v IRC*, 51 TC 647) and we are therefore concerned only with the exchange rates in force at the time when the income is receivable by the person abroad. A profit on exchange is merely a book-keeping entry necessary to ensure that the cash position of the person abroad tallies with the income actually remitted, or which could be remitted at the date at which the accounts are made up.

> On the same basis, any loss on exchange should not reduce the income of person abroad in arriving at the income charge.

28.15 ToA EU law defence

28.15.1 *EC infringement proceedings*

In 2011 the European Commission formally requested the UK to amend the ToA provisions and s.13 TCGA.[58] The request took the form of reasoned opinions, the second step of the infringement procedure.[59] The text of the reasoned opinions was not published, but an EC press release provided the main details:

> The first infringement relates to the UK's "transfer of assets abroad" legislation. Under this legislation, if a UK resident individual invests in a company by transferring assets to it, and if this company is incorporated and managed in another Member State, then the investor is subject to tax on the income generated by the company to which he/she contributed the assets. However, if the same individual invested the same assets in a UK company, only the company itself would be liable for tax.

The EC analysis was as follows:

> In both cases, the Commission considers there to be discrimination, seeing as investments outside the UK are taxed more heavily than domestic investments. The difference in tax treatment between domestic and cross-border transactions restricts two fundamental principles of the EU's Single Market, namely of the freedom of establishment and the free movement of capital ....
> The Commission is of the opinion that both restrictions are disproportionate, in the sense that they go beyond what is reasonably necessary in order to prevent abuse or tax avoidance and any other requirements of public interest.[60]

The ToA rules (unlike s.13 TCGA) have no *de minimis* exception so the provisions potentially fall within the free movement of capital and not just freedom of establishment. This is significant in relation to non-EU states.

In response Parliament enacted s.742A ITA; I refer to this as **"the EU law defence"** (or where comparing it to other EU law defences, "the ToA EU law defence").

---

58 See 35.15 (EU law compliance).

59 Art.258 TFEU.

60 IP/11/158, 16 February 2011. The CIOT had lobbied the EC to take this step.

The background can be traced through HMRC consultation and response documents[61] but these are now mainly of historic interest.

28.15.2 *The EU law defence*

Section 742A(1) ITA provides:

> Subsection (2) applies for the purpose of determining the liability of an individual to tax under this Chapter by reference to a relevant transaction if—
>
> (a) the transaction is effected on or after 6 April 2012, and
>
> (b) conditions A and B are met.

I refer to **"EU law conditions A and B"**.

Assuming these conditions are satisfied, s.742A(2) ITA provides the relief:

> Income is to be left out of account so far as the individual satisfies an officer of HMRC that it is attributable to the transaction.

The EU law defence shares some common features with the ToA motive defence, so the following issues are considered elsewhere:
32.45 (Tax return: Disclosure of motive or EU law defence claim).
32.47 (Appeals).
32.48 (Can an individual disclaim the motive or EU law defence?).

28.15.3 *Attribution of income*

The EU law defence requires one to ascertain what income is attributable to the transaction. Suppose:

HMRC, "Reform of an anti-avoidance provision: Transfer of Assets Abroad Outcome of Consultation" (December 2013)
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/267976/Transfer_of_assets_outcome_of_consultation.pdf

(1) Before 2012, T makes a transfer of assets to non-resident company within s.720.
(2) After 2012, the company uses the funds in a transaction which meets EU law conditions A and B, and which generates income. For instance:
  (a) the company buys and sells (in a trading transaction).
  (b) the company acquires income producing assets.

It is suggested that the income is attributable to the post-2012 transaction.

28.15.4 *EU law condition B: Genuine transaction*

It is convenient to deal first with EU law condition B.

Section 742A(5) ITA provides:

> Condition B is that the individual satisfies an officer of Revenue and Customs that, viewed objectively, the transaction must be considered to be a genuine transaction having regard to any arrangements under which it is effected and any other relevant circumstances.

The requirement is that the transaction must be "genuine". The rest is just verbiage.

"Genuine" is best regarded as a label for a complex set of rules. In order for a transaction to qualify as genuine:

(1) (a) The transaction must meet the arm's length requirement in s.742A(6); or
  (b) The transaction must meet the non-arm's length requirement in s.742A(11).

(2) The transaction must meet the commercial substance requirement in s.742A(8).

These rules are expressed to be "without prejudice to the generality of subsection (3)(a) or (5)" so the transaction must also be "genuine" in the ordinary meaning of the word. The word "genuine" has various meanings,[62] but none of them make sense here so it is suggested that a transaction which meets these conditions is "genuine".

28.15.5 *"Genuine": Arm's length requirement*

Section 742A(6) ITA provides:

---

62 In a legal context, the meanings are primarily: (1) not a sham; (2) not tax avoidance (3) an intensifier; see 32.17.3 ("Genuine").

> Without prejudice to the generality of subsection (3)(a) or (5), in order for the transaction to be considered to be a genuine transaction the transaction must not—
>
> (a) be on terms other than those that would have been made between persons not connected with each other dealing at arm's length, or
>
> (b) be a transaction that would not have been entered into between such persons so dealing,
>
> having regard to any arrangements under which the transaction is effected and any other relevant circumstances.

I refer to this as **"the arm's length requirement"**.

The wording is derived from s.738(3) ITA; for discussion see 32.6.2 (Arm's length requirement).

28.15.6 *"Genuine": Non-arm's length transactions*

Section 742A(11) ITA provides:

> Subsection (6) does not apply if—
>
> (a) the relevant transfer is made by an individual who makes it wholly—
>
> (i) for personal reasons (and not commercial reasons), and
>
> (ii) for the personal benefit (and not the commercial benefit) of other individuals, and
>
> (b) [i] no consideration is given (directly or indirectly) for the relevant transfer or otherwise for any benefit received by any individual mentioned in paragraph (a)(ii), and
>
> [ii] all assets and income falling within subsection (12) are dealt with accordingly.

It is difficult to see what the legislation is trying to stop here. In practice straightforward gifts to trusts will qualify. EN FB 2013 offers this case as its sole example (though even that is expressed tentatively – note the *may*):

> This may be the case where, for example, an individual settles assets into a non-resident trust for the benefit of his family.

This would not apply if trustees or a company make the relevant transfer. It would not apply if there were some consideration as opposed to nil consideration. But why? The legislation seems disproportionate here, which would be another basis for saying that it is not EU law compliant.

28.15.7 *Assets within subsection (12)*

The expression "assets and income falling within subsection (12)" is used:
(1) In the non-arm's length transaction test (above); and
(2) In the commercial substance requirement (below).
Section 742A(12) ITA provides:

> The assets and income falling within this subsection are—
> (a) any of the assets transferred by the relevant transfer;
> (b) any assets directly or indirectly representing any of the assets transferred;
> (c) any income arising from any assets within paragraph (a) or (b);
> (d) any assets directly or indirectly representing the accumulations of income arising from any assets within paragraph (a) or (b).

The drafting is taken from the definition of associated operation: see 28.9 (Associated operation: definition).
Section 742A(13) ITA provides:

> In subsections (11) and (12) references to the relevant transfer are to—
> (a) if the transaction mentioned in subsection (1) is a relevant transfer, the transfer, or
> (b) if the transaction so mentioned is an associated operation, the relevant transfer to which it relates.

28.15.8 *"Genuine": Commercial substance requirement*

Section 742A(7)(8) ITA must be read together to follow the sense:

> (7) [a] Subsection (8) applies if any asset or income falling within subsection (12)
> [b] is used for the purposes of, or is received in the course of, activities carried on in a territory outside the UK
> [c] by a person ("the relevant person")
> [d] through a business establishment which the relevant person has in that territory.
> (8) Without prejudice to the generality of subsection (3)(a) or (5), in order for the transaction to be considered to be a genuine transaction the activities mentioned in subsection (7) must consist of the provision by the relevant person of goods or services to others on a commercial basis and involve—

(a) the use of staff[63] in numbers, and with competence and authority,
(b) the use of premises and equipment, and
(c) the addition of economic value, by the relevant person, to those to whom the goods or services are provided,

commensurate with the size and nature of those activities.

I refer to this as **"the commercial substance requirement"**.

"Goods and services" should be construed widely to include letting of property or the licensing of intellectual property rights. Otherwise the provision would not be EU law compliant.

The wording is derived from the ECJ judgment in *Cadbury Sweppes*: see 60.5.3 (Justification). There is not much guidance on how much is needed to be commensurate. *Columbus Container Services* offers an example of a case where there was sufficient commercial substance. The Advocate General said:

> 180. ...[the] court should, in particular, determine whether, during the tax year in question, Columbus continued to meet all the conditions applying to coordination centres ... including ... requirements concerning the level of employment in Belgium.[64]
>
> 181. ... I do not think that the fact that an establishment such as Columbus devotes its activities to holding and managing capital and may, where necessary, make financial investments in other member states, can be decisive as regards finding that a purely artificial arrangement exists, in so far as that establishment does not engage in actual economic activities in the host member state.
>
> 182. Not only are financial activities excluded in principle from the freedoms of movement, it cannot be totally ruled out that capital investments will be made by an establishment like Columbus for its partners in the host member state or, at least, through financial or banking intermediaries established in Belgium.[65]
>
> 183. I consider that these circumstances, combined with an actual physical establishment in the host member state, are sufficient to rule out the existence of a purely artificial arrangement.[66]

---

63 Section 742A(9) ITA defines "staff" widely: "In subsection (8)(a) "staff" means employees, agents or contractors of the relevant person."

64 [Footnote original] Co-ordination centres must employ in Belgium the equivalent of at least ten full-time staff once they have been in business for two years.

65 I wonder if something has gone wrong in the translation of this paragraph.

66 [2008] STC 2554.

28.15.9 *"Business establishment"*

Section 742A(10) ITA provides:

> To determine if a person has a "business establishment" in a territory outside the UK, apply sections 1141, 1142(1) and 1143 of CTA 2010 as if in those provisions—
>
> (a) references to a company were to a person, and
>
> (b) references to a permanent establishment were to a business establishment.

In short, "business establishment" means the same as (in my terminology) a UK-law PE. See 86.2 (Meaning(s) of "permanent establishment").

In Parliament, David Gauke (Exchequer Secretary to the Treasury) said:

> The legislation does not distinguish between trading and investment activities as such. It specifies that if there is an overseas business establishment the activities must consist of the provisions of goods or services on a commercial basis. The threshold for commercial activity can be met by an investment or holding company that provides services, as well as a trading entity. If unusually an investment or holding company does not carry out its activities though an overseas business establishment, a transaction may still be genuine, and the activities will not be subject to the test in subsections (7) and (8) of proposed new section 742A, but will be subject to the rest of the proposed new section and will be exempted if genuine. That means that it will always be possible for an investment or holding company to be exempt in accordance with EU law, if the overall arrangements are genuine and serve EU treaty aims.[67]

28.15.10 *Partial relief*

Section 742A ITA provides:

> (14) Subsection (15) applies if—
>
> (a) subsection (2) would apply in relation to a transaction but for the individual being unable to satisfy an officer of Revenue and Customs for the purposes of condition B that the transaction meets the requirements set out in subsection (6), but
>
> (b) the individual does satisfy an officer of Revenue and Customs

---

67 Public Bill Committee 21 May 2013 *http://www.publications.parliament.uk/pa/cm201314/cmpublic/financeno2/130521/pm/130521s01.htm*

that those requirements are met in relation to a part of the transaction.

(15) Subsection (2) applies as if the reference to the transaction were to that part of the transaction.

28.15.11 *EU law condition A*

Section 742A(3) ITA provides:

> Condition A is that—
>
> (a) were, viewed objectively, the transaction to be considered to be a genuine transaction having regard to any arrangements under which it is effected and any other relevant circumstances, and
>
> (b) were the individual to be liable to tax under this Chapter by reference to the transaction,
>
> the individual's liability to tax would, in contravention of a relevant treaty provision, constitute an unjustified and disproportionate restriction on a freedom protected under that relevant treaty provision.

The hypotheses in 742A(3)(a)(b) add nothing:

(a) Para (a) repeats EU law defence condition B.

(b) If there is no liability (para (b)) then the EU law defence is not needed.

So condition A amounts to the condition that:

> the individual's liability to tax [under the ToA provisions] would, in contravention of a relevant treaty provision, constitute an unjustified and disproportionate restriction on a freedom protected under that relevant treaty provision.

The relevant treaty is TFEU or the EEA agreement.[68] For the EU law, see 60.1 (EU law and UK taxation – Introduction).

The ToA draft guidance provides:

> **INTM603160 Genuine transactions exemption: Examples**
> Creating an establishment overseas, whether or not the activities are carried on by a company, will attract exemption provided the activities

68 Section 742A(4) ITA provides: "In subsection (3) "relevant treaty provision" means—

(a) Title II or IV of Part Three of the TFEU,

(b) Part II or III of the EEA agreement, or

(c) the provision of any subsequent treaty replacing a provision mentioned in paragraph (a) or (b)."

are genuinely commercial and transactions take place at arm's length. But HMRC will examine the arrangements to ensure that, for example, they do not in reality reflect a UK establishment which is fronted by the foreign arrangements. Where activities do take place both overseas and in the UK, the UK activities will not fall within the exemption, as the arrangements in this respect would constitute artificial profit shifting and an abuse.

For the purpose of determining where activities take place, the principles of profit attribution will be applied, having regard to actual situation of assets which generate profit, where key decisions are taken, where key decision making persons habitually reside, and where decisions are truly taken.

Assets managed abroad

The offshore funds legislation in Part 8 of TIOPA 2010 is designed to charge offshore income gains and prevent the avoidance of tax on income accruing. The Transfer of Assets provisions, among other things, prevent this legislation being circumvented through the transfer of assets into the hands of a manager based offshore. Although the overseas management activity may itself be rewarded on an arm's length basis, this does not mean that returns on the assets will escape UK tax where the conditions of the Transfer of Assets provisions are satisfied. There will be a movement of capital but in order to benefit from the engagement of freedom of movement of capital it will be necessary to demonstrate that the purpose of the freedom is served. The purpose of freedom of movement of capital is to secure its effective allocation, and that requires a link to the place of investment and not simply seeking to balance return and risk as a manager normally does according to instructions given. In order to engage the freedom it will be necessary to demonstrate that the beneficiary has influence over the disposition of the capital in a particular State in contrast merely to arranging for its management offshore.

28.15.12 *Commencement of EU law defence*

Para 9(2) Sch 10 FA 2013 provides:

> The amendments made by paragraphs 3 to 8 above have effect for the tax year 2012-13 and subsequent tax years.

The relief applies retrospectively to 2012/13.

Section 736(2A) ITA provides:

> The exemption given by section 742A applies only in the case of a relevant transaction effected on or after 6 April 2012.

The same rule is imposed by s.742A(1)(a) ITA. Thus what matters is the date of the transaction, not the date that the income arises.

This seems a strange commencement rule, as taxpayers can still rely on EU law in relation to pre-2012 transactions. When UK law is amended to become EU-law compliant, the amendment is usually made prospectively, leaving taxpayers to pursue EU law remedies for earlier years, but one might have expected the new law to apply to income from 2012, not to transactions from 2012.

28.15.13 *Is the current law EU compliant?*

In February 2014 the CIOT asked the EC to pursue its complaint on the grounds that the rules are still not EU law compliant. The CIOT's main complaint is EU law condition B (genuine transaction). If condition A is met, there is necessarily a breach of EU law and it is a breach of EU law, to specify any further conditions which have to be satisfied as a defence to the ToA code. The EC has not withdrawn its complaint so the issue is ongoing. Further changes to the ToA rules can be expected.

28.15.14 *EU law defence: Commentary*

It is melancholic to compare the complexities of the ToA EU law defence with the relative simplicity of the CGT equivalent.[69] It is suggested that the whole vast apparatus of s.742A should be replaced by a simple provision:

> This section shall not apply in relation to ...
> (ca) income arising from economically significant activities carried on by the person abroad wholly or mainly outside the UK.

There may be a good reason why this cannot be done: but I cannot see what it could be.

69 See 53.18 (Economically significant activities).

CHAPTER TWENTY NINE

TRANSFER OF ASSETS ABROAD: TRANSFERORS

29.1 Section 720 charge on transferor

This chapter considers the IT charge on transferors who have an interest in offshore entities, or receive capital payments from them. There are strictly two charges: s.720 and s.727 ITA, but s.720 is by far the most important.

Section 720 ITA imposes the charge to tax:

> (1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are UK resident by means of relevant transfers.
> (2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions).
> (3) Tax is charged under this section on the amount of income treated as arising in the tax year.

In this book:

"The s.720 charge" is the charge under this section. The ToA draft guidance calls this "the income charge".

"s.720 income" is income which is treated as arising to the individual under s.721. (It might be called "s.721 income" but the charge is under s.720.)

29.1.1 *Cross references*

The following points are considered elsewhere:

27.10 (Sections 624 and 720: comparison)

46.6 (Rates of tax on transferor within s.720 ITA)

29.2 Who is liable?

Section 720(5) ITA provides:

> The person liable for any tax charged under this section is the individual to whom the income is treated as arising.

ITA EN provides:

> 2141. Subsection (5) provides that the individual to whom income is treated as arising is the person liable. This person is defined in section 721.

So we turn to s.721 ITA but we find a referential definition:

> (1) Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A to C are met.

The charge is imposed on "such an individual as is mentioned in s.720(1)". There are different views possible of how much of s.720(1) is incorporated by the requirement that the individual to be taxed must be "such an individual as is mentioned in s.720(1)". The wise words of Garner are worth quoting here:

> *Such* is a deictic (pointing) term that must refer to a clear antecedent.[1]

The failure to observe this point – obvious though it may seem – has given rise to a good deal of case law. The intention of the ITA rewrite was to preserve the case law and, so far as the law was unclear, to preserve the ambiguities. (It is because the rewrite had such limited objectives that it achieved relatively little.)

ITA EN provides:

> 2144. Sections 739(2) and (3) of ICTA indicate the person liable by using the expression "such an individual" – but do not make it clear how much of section 739(1) is implied by that expression. [Sections 721] and 728 ITA, which are based on section 739(2) and (3) ICTA, reproduce

---

1 Garner's *Dictionary of Legal Usage* (3rd ed., 2011), entry under "Such". Pinter exploits the ambiguity in *No Man's Land* (2001):

> "... there are some people who appear to be strong, whose idea of what strength consists of is persuasive, but who inhabit the idea and not the fact. What they possess is not strength but expertise. They have nurtured and maintain what is in fact a calculated posture. Half the time it works. It takes a man of intelligence and perception to stick a needle through that posture and discern the essential flabbiness of the stance. I am *such a man*."

> the expression "such an individual", which has been the subject of case law: see, in particular, *Vestey v IRC* 54 TC 503.

What, then, are the requirements to be "such an individual" as is mentioned in s.720(1)? There are two:

(1) The individual must be resident in the UK; that seems clear.
(2) The individual must be "the transferor"; that was decided in *Vestey*.

29.3 Who is the transferor?

The next question is to identify the transferor (if there is one). Clearly, anyone who actually makes a transfer is a transferor, but the expression is a little wider than that.

29.3.1 *Transfer made by individuals jointly*

If A and B together own an asset, as tenants in common or as joint tenants, and together transfer their interest to a person abroad, each is transferor of their share. RI 201 states:

> Where the same assets are transferred by several individuals, the Revenue's practice is to assess the transferors in proportion to their share of the assets transferred. Thus, where, for example, shares of a UK company are held by three shareholders in the proportion 40%, 40% and 20% and there is [s.720 ITA] liability in respect of the income of an overseas person to which the shares are transferred, the liability is assessed on each of the three shareholders in proportion to their respective holdings.

That seems obvious. It is somewhat theoretical as it would be usual for shares to be held outright rather than jointly, ie (on the figures of the example) one would expect shareholder A and B to hold 40 shares each, and shareholder C to hold 20 shares, rather than A, B and C to be registered as joint holders of 100 shares held by them beneficially in the proportions 40/40/20.

29.3.2 *Transfer procured by individual*

In *Congreve v IRC* the Court of Appeal said in an obiter comment:

> But even if we were prepared to accede to the argument that the preamble [now s.720(1) ITA] connoted activity by the individual concerned, we think this condition would be fulfilled if the execution of the transfer were procured by the individual concerned, even though it

> was not actually executed by him or his agent.[2]

In *Vestey v IRC*, the question of who is a transferor did not arise, because the taxpayers (beneficiaries of a discretionary trust) were clearly not transferors. The House of Lords discussed the question in passing, and the answer was expressed in a variety of different ways. Lord Wilberforce said s.720 applies:

> only where the person sought to be charged
> [1] made [the transfer]
> [2] or, may be, was associated with, the transfer.[3]

The context clearly shows that the meaning at [2] is that Lord Wilberforce was floating a possible view that a person could be charged if they were associated with the transferor, but did not commit himself to that view: "may be" means "possibly".[4]

Lord Wilberforce was not saying:

(1) that there *would* be a s.720 charge if the taxpayer was associated with the transfer. He expressed a doubt on the point.
(2) that there would be a s.720 charge if the taxpayer may be associated (= was possibly associated) with the transfer.

HMRC sometimes like to read the passage in sense (1) or even in sense (2) but that cannot be correct.

The doubts intended to be raised by Lord Wilberforce were resolved in *IRC v Pratt* which decided that an individual who did not make the transfer may be within s.720 if and only if they "procured" the transfer.[5] The term used in *Pratt* is "quasi transferor" but I suggest it is better to use the term "transferor" and to define that term to mean anyone to whom s.720 applies, that is, both those who make a transfer and those who procure it.

The classic example of procuring a transfer is if T owns all the shares in a company and uses power of control to procure the company to make a transfer to a person abroad.

---

2 30 TC 163 at p.197.

3 54 TC 503 at p.587A. Lord Salmon agreed. Lord Keith said he agreed with Lord Wilberforce but in his speech he actually put the matter differently.

4 The STC and All ER versions of the report change this (slightly literary) use of the words "may be" into the more usual form "maybe".

5 57 TC 1 at p.51 B –D and p.55 E–F.

> Something of the sort might even be possible in the case of quasi transferors, where two or three of them own the company which makes the transfer, but where it is not possible to do just that, s [720] does not bite at all. ... Where an identifiable portion of the asset transferred can be attributed to a particular transferor then, of course – at any rate in any normal case – that part actually transferred will produce a similar part of the income, and in no case is there any difficulty in applying the section, since one will apply it separately to each of the individual transfers, or each identifiable portion.[6]

This is tentatively expressed, and might perhaps be challenged.

The position would in any event be different if shareholders had different classes of shares with different interests. In that case it may not be possible to separate out their interests in which case the shareholders would not be transferors.

In *Pratt,* a company sold land to an offshore company.[7] That was clearly a transfer. The taxpayers alleged to be transferors were (i) were three directors out of eight; and (ii) held 30% of the company. They had influence but no control at board (director) level or shareholder (general meeting) level. They could not "procure" the transfer of assets made by the company, and so they were not "quasi transferors" in relation to that transfer. So they were not transferors.

The ToA draft guidance provides:

> **INTM600800 Multiple Income charges - Multiple Transferors**
> Where there is a choice of persons who may be taken into account in charging the income then the income is apportioned on a "just and reasonable" basis as referred to in section 743 (2) 2007.
> This has not always been the case. In *CIR v Pratt* (1982) 57 TC 1 the Respondents (in 1964) owned 29% of a company's shares between them. There were 15 other shareholders and 5 other directors. An

---

6 *IRC v Pratt* 57 TC 1 at p.50.

7 The sale was at market value but the offshore company resold at a substantial profit after planning permission was granted. So one can see why the Revenue wanted to assess. The sale was before the introduction of the transactions in land rules (in 1969) so the (somewhat far-fetched) application of the ToA rules was perhaps the only option.
The time taken in the appeal is remarkable: assessments from 1965/6 were finally determined by the High Court in 1982.

avoidance scheme was set up which included a number of offshore companies and two offshore trusts, one of which was a family discretionary trust. The Respondents each received loans of £2,000 which were assessed to tax under what was then section 412 ITA 1952 (now section 720 ITA 2007). Walton J dismissed the Revenue's appeal on the basis that it was not possible to do otherwise in this case as there was a plurality of transferors whose respective interests could not be separated out.

He accepted that the House of Lords decision in the case of *Vestey* (1979) 3 WLR 915 did not preclude a person, who was not the transferor, from being liable under section 412 ITA 1952 (now section 720 ITA 2007) if he "procured" the transfer. He also accepted that there could be multiple quasi-transferors, but only to the extent that an identifiable portion of the asset transferred could be attributed to a particular transferor. In the absence of such identifiable portions section 412 ITA 1952 did not provide the means to arrive at an apportionment, or the authority to tax it, and in the absence of any legal basis for such action the section could not apply.

Section 45 Finance Act 1981 was enacted to provide for the apportionment of income.

HMRC's practice (RI 201) where the same assets are transferred by several individuals is to assess the transferors in proportion to their share of the assets transferred. For example, where the shares of a UK company are held by three individuals in the proportions of 40%, 40% and 20% and there is a liability under section 720 ITA 207 in respect of the income of an overseas person to which the shares are transferred, the liability is assessed on each of the three individuals in proportion to their respective holdings.

An officer of Revenue and Customs must be satisfied that the apportionment of income to be taken into account between individuals is on a "just and reasonable" basis (section 743(2) ITA 2007). Of course, taxpayers have the usual rights of appeal against decisions on this point, which are the jurisdiction of the Tax Tribunal (section 751 ITA 2007).

But it is doubtful whether the new legislation reversed the decision in *Pratt* as it did not affect the question of who is the transferor.

Suppose the facts of *Pratt* HMRC had assessed all the shareholders and directors on the grounds that between them they controlled the company and as a matter of fact did procure the transfer. But even if they were (together) transferors, it would be impossible to apportion the income of the person abroad between them; in the words of the judge, “a mind-

boggling exercise of the first water".[8]

In *Carvill v IRC*, T transferred a majority shareholding to a person abroad, and the minority shareholders transferred their shares. HMRC argued (implausibly) that T was the "transferor" of the minority shareholding. But this was (rightly) rejected:

> For an individual to be the transferor in relation to a transfer by another individual would be a considerable extension of this principle. However, there might be cases where, as a matter of fact, one individual's influence over another was so strong that he was the transferor of the other's share but this would clearly be an exceptional case. ...
>
> 72. [Counsel] contends that the taxpayer was the transferor of the old minority shares. In order to find that this was an exceptional case where the taxpayer did in effect force his will on the other shareholders so as to become the transferor of their shares, one would need strong evidence that this was so. Of course, the taxpayer as majority shareholder and one of the founders of a company bearing his name was in a position of some influence. However, the influence did not go as far as telling other shareholders what to do with their shares. Here the decision by the old minority to transfer their shares was one which they came to after discussion, having started with different points of view as to the merits of the transfer. There is no evidence that the taxpayer leaned on any of them heavily, for example, by threatening to sack them if they did not. ... Accordingly, there is no evidence that the taxpayer did anything in relation to the old minority shares which would make him the transferor of them, and I find that he was not the transferor of the old minority shares.[9]

What about a gratuitous transfer from A to B and from B to the person abroad? The question whether A has procured B's transfer does not arise, for A is a transferor by virtue of the transfer to B. The true question for A is whether B's transfer is an associated operation in relation to A's transfer.[10]

Contrast the position where:

(1) T transfers assets to A, in consideration for which A transfers assets to a person abroad.

---

8 *IRC v Pratt* 57 TC at p.52.

9 *Carvill v IRC* 75 TC 477, Special Commissioners decision at [71]-[72].

10 See 28.11.1 (Transfer from A to B followed by transfer from B to person abroad).

(2) T transfers assets to a company, in consideration for which the company issues shares to a person abroad.
(3) T (an employee entitled to a bonus) waives the right to the bonus, in consideration for which the employer transfers assets to a pension scheme abroad.

In the first two cases, T is not just a quasi-transferor, T is an *actual* transferor for T has made a transfer of assets. In the third case, T has procured the transfer so is within the scope of s.720.

The ToA draft guidance provides:

> **INTM600820 Transferors: The transfer**
> ... This section considers the link between relevant transfers and the individual who is potentially avoiding liability to income tax by means of relevant transfers. It is the individual who is avoiding liability to income tax who is potentially liable for any tax charged under the income charge and to whom the income is treated as arising. However, there is nothing directly within the income charge provisions to say that individual must also be the person who has undertaken the transactions that have resulted in income becoming payable to a person abroad.
> Notwithstanding this, the general approach is that an income charge will only apply where the individual who is subject to the charge is also the person who has made, or is associated with, the transfer of assets. Where a person other than the individual who made the transfer is treated as having income arising to them then it is the benefits charge that may be in point (see INTM601400 onwards). This link between the transfer and the individual who is potentially subject to tax under the income charge effectively comes from the interpretation placed upon the income charge by the courts.
> The leading case in this respect is *Vestey v CIR* (54 TC 503), in which Lord Wilberforce says (pages 583 and 584):
>
> > 'There are undoubtedly two possible interpretations of (what became section 739 ICTA), particularly having regard to the preamble. The first is to regard it has having a limited effect; to be directed against persons who transfer assets abroad; who by means of such transfers avoid tax, and who yet manage when resident in the United Kingdom to obtain or to be in a position to obtain benefits from those assets. For myself I regard this as being the natural meaning of the section…..The second is to give the whole section an extended meaning, so as to embrace all persons, born or unborn, who in any way may benefit from assets transferred abroad by others…This I regard as a possible but less natural meaning of the section.'

He later added (page 587) that 'the section (what became section 739) (should be) interpreted as applying only where the person sought to be charged made, or may be, was associated with, the transfer.'

In most cases determining whether the individual has made a transfer of assets will be relatively straightforward, but what is meant by 'or may be associated with' the transfer? This is likely to depend on the facts and circumstances of the matter. For example, an individual may wholly own and direct a company. If the company makes a relevant transfer which results in the shareholder having power to enjoy the income of a person abroad, even though the individual has not made the transfer, HMRC would take the view that he, maybe, was associated with it by virtue of his position. The individual can therefore be regarded as having made the transfer such that the connection is made and the income charge applies. Equally if an individual in someway 'procured' a transfer to be made HMRC may regard the relevant connection as made. In the case of *Congreve v CIR* (30 TC 163 at page 197) Cohen LJ observes:

> 'But even if we were prepared to accede to the argument that the preamble connoted activity by the person concerned, we think this condition would be fulfilled if the execution of the transfer were procured by the individual concerned, even though it was not actually executed by him or his agent.'

In this context 'procured' is considered to include 'organised, engineered or brought about' as indicated by the views of Lord Wilberforce in the *Vestey* case at page 583 where he speaks of the individual as having 'organised or engineered transfers' and in the same case at page 602, Lord Keith speaks of transfers 'organised or brought about ' by the individual.

Factors which may need to be considered in determining whether the individual is or may be associated with a transfer of assets or has procured a transfer of assets include:-

- whether the individual had any bargaining power with the person who actually makes the transfer;
- whether there was a contractual connection between the individual and the actual person making the transfer; and
- whether the individual had any proprietary interest, actual or potential, in the assets transferred.

This list is not intended to be exhaustive and it will be relevant to consider all of the facts and circumstances of the matter if there is doubt about whether there is an appropriate connection for an income charge to be applied.

If more than one individual appears to have effected, procured or is, may

be, associated with a transfer of assets, then see INTM600800.
If after consideration of the facts doubt remains about whether the appropriate connection exists such that an income charge applies the views of Trusts & Estates Technical, Bootle should be sought before any charge to tax is raised.

29.3.3 *Can trustees and fiduciaries be transferors?*

A trustees may make a transfer of assets (eg transferring trust property to a foreign company). There are two independent reasons why s.720 does not apply:

(1) A trustee is not an individual so not within the ToA rules.
(2) A trustee is not a transferor as a transferor must be the person beneficially entitled to the assets transferred:

> I think that for the purposes of s [720], it must be the beneficial transfer - the transfer of the beneficial interest - which is in question, and not the bare transfer of the legal title. A trustee, for example, who was directed by his beneficiaries to effect a transfer would not, even if he knew full well what was on foot, become himself liable to fall foul of the section merely on that account.[11]

A person exercising fiduciary powers is not a transferor, eg a person with power of appointing new trustees does not become a transferor if they exercise the power by appointing foreign trustees, because the power is fiduciary.

What if A (perhaps a principal beneficiary but not the settlor) encourages trustees to make a transfer? It is considered that A (not being in control of the trust) cannot be said to procure the transfer made by the trustees.

So the concept of "procuring" a transfer in practice applies to individuals controlling companies which make a transfer; other cases, if theoretically possible, will be rare. An individual who is not a transferor (such as the successful appellants in *Pratt*) might instead fall within s.731 if they receive benefits.

29.3.4 *HMRC practice*

RI 201 provides:

> [1] Section [720 and 727 ITA] can potentially apply not only to an individual who transfers assets but to someone who is "associated

11 *IRC v Pratt* 57 TC 1 at p.49.

with" a transaction (according to the decision of the Courts in *Vestey v IRC*).

[2] The Revenue regard this as including anyone who procured the transfer of assets.

There is not much to say in favour of proposition [1]. It can hardly be said to be "according to the decision of the Courts in *Vestey v IRC*" as it relies on one of the views expressed in *Vestey*[12] where it was qualified by the word "maybe". In fact, if "associated" here has its normal, rather wide sense, point [1] is clearly wrong in the light of *Pratt* and *Carvill*. It is considered that a person is a transferor only if they have made or procured the transfer, and being associated with a transfer (without procuring it) does not make a person a transferor. In a loose sense of "associated" point [1] cannot possibly be correct, for many individuals may be "associated" with a transfer who cannot possibly all be transferors.

It appears that HMRC would now agree, for HMRC Brief 18/11 provides:

> 5.1.1 ... For the income charge provisions [s.720] to apply the individual on whom the charge arises must be the person who transfers the assets or procures the transfer.

In practice HMRC have not generally taken ToA points when UK companies make transfers abroad, even if there is a 100% shareholder who could be regarded as procuring the transfer. There is no significant reference to the ToA provisions in *Bramwell on Corporation Tax* and none in the Company Taxation Manual. If the UK company has a sufficient interest in the non-resident company, the CFC legislation is designed to address the avoidance possibilities. It is not the case that the ToA rules could not apply; just in practice no-one takes any notice of them.[13] But if a UK company makes a transfer to an entirely separate entity, the CFC rules will not apply, and HMRC may fall back on ToA. An example where HMRC say they might raise the point relates to employee benefit trusts. HMRC Brief 18/11 provides:

---

12 The comment of Lord Wilberforce is set out at 29.3.2 (Transfer procured by individual).

13 It is noteworthy that the CFC legislation followed shortly after *Pratt*. Though s.725 ITA (reduction in amount charged when CFC involved) acknowledges possible overlap between the CFC rules and s.720. The ToA draft guidance discusses these rules: INTM600720.

5.1.1 ... [1] If the offshore Employee Benefit Trust is a normal commercial arrangement by a company to reward its employees,

[a] the transferor is the employer company;

[b] and in such circumstances the income charge [s.720] is unlikely to be applicable as the transferor and beneficiaries are different people.

[2] However, it may be that the employee has transferred a right to receive a bonus into the offshore Employee Benefit Trust and is therefore the transferor. If this is the case the ToA legislation may apply and the employee will be liable to tax on any income arising in the trust.

[3] If the employer company is controlled by its shareholder/directors and the offshore Employee Benefit Trust was formed solely for their benefit, the director/shareholders may have procured the transfer into the offshore Employee Benefit Trust and could be considered transferors for the purposes of the income charge. Whether or not the ToA income charge is then applied will depend on the facts of each case.

There is a good deal of confusion here:

[1] [a] The fact that the trust is a normal commercial arrangement should be a reason for allowing the motive defence, but does not affect the identity of the transferor. It appears that HMRC are not interested in applying s.720 to "normal commercial arrangements" so they do not care who is the transferor (even in the case of non-resident EBTs).

[b] It is correct that the s.720 charge is unlikely to be applicable. The reason is not exactly that "the transferor and beneficiaries are different people" but that the transferor is a company (not within s.720) and the beneficiaries are non-transferors. Probably that is what the author meant to say.

[2] This is approximately correct; though s.624 may also be in point, and the individual's liability is not on "any income arising in the trust" but income arising from the transferred asset.

[3] This is correct as far as it goes but it is rightly tentative ("may have procured...") and does not explain very much.

The ToA draft guidance returns to this theme:

INTM600580 - The income charge: The transfer

... However, the general approach is that an income charge will only apply where the individual who is subject to the charge is also the person who has made or is associated with the transfer of assets. It is the benefits charge that is more likely to apply where the person who is

treated as having income arising to them is not the person who has made the transfer of assets (INTM601400). This link between transfer and the individual who is potentially subject to tax under the income charge effectively comes from the interpretation placed upon the income charge by the Courts.

The leading case in this respect is *Vestey v CIR* (54 TC 503), in which Lord Wilberforce says (pages 583 and 584):

> 'There are undoubtedly two possible interpretations of (what became section 739 ICTA), particularly having regard to the preamble. The first is to regard it has having a limited effect; to be directed against persons who transfer assets abroad; who by means of such transfers avoid tax, and who yet manage when resident in the United Kingdom to obtain or to be in a position to obtain benefits from those assets. For myself I regard this as being the natural meaning of the section…..The second is to give the whole section an extended meaning, so as to embrace all persons, born or unborn, who in any way may benefit from assets transferred abroad by others…This I regard as a possible but less natural meaning of the section.'

He later added (page 587) that 'the section (what became section 739) (should be) interpreted as applying only where the person sought to be charged made, or may be, was associated with, the transfer.'

In most cases determining whether the individual has made a transfer of assets will be relatively straightforward, but what is meant by 'or may be, was associated with' the transfer? This is likely to depend on the facts and circumstances of the matter. For example, an individual may wholly own and direct a company. If the company makes a relevant transfer which results in the individual who owns the company having power to enjoy the income of a person abroad, even though the individual has not made the transfer, by virtue of his position HMRC would take the view that he, may be, was associated with it and thus that the individual can be regarded as having made the transfer such that the connection is made and the income charge applies. Equally if an individual in someway 'procured' a transfer to be made HMRC may regard the relevant connection as made. In the case of *Congreve v CIR* (30 TC 163 at page 197) Cohen LJ observes:

> 'But even if we were prepared to accede to the argument that the preamble connoted activity by the person concerned, we think this condition would be fulfilled if the execution of the transfer were procured by the individual concerned, even though it was not actually executed by him or his agent.'

In this context 'procured' is considered to include 'organised, engineered or brought about' as indicated by the views of Lord Wilberforce in the *Vestey* case at page 583 where he speaks of the individual as having 'organised or engineered transfers' and in the same case at page 602, Lord Keith speaks of transfers 'organised or brought about 'by the individual.

Features which may need to be considered in determining whether the individual is, may be, associated with a transfer of assets or has procured a transfer of assets are factors such as:-

- whether the individual had any bargaining power with the person who actually makes the transfer;
- whether there was a contractual connection between the individual and the actual person making the transfer; and
- whether the individual had any proprietary interest, actual or potential, in the assets transferred.

This list is not intended to be exhaustive and it will be relevant to consider all of the facts and circumstances of the matter if there is doubt about whether there is an appropriate connection for an income charge to be made.

29.4 Must the transferor avoid or intend to avoid IT?

29.4.1 *The statutory provisions*

Section 720 ITA provides:

(1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are UK resident by means of relevant transfers.

(2) Income tax is charged on income treated as arising to *such an individual* under section 721. ...

The Special Commissioners say:

185. It is clear that the meaning of the phrase "such an individual" must be found in the preamble [now s.720(1)] and that it is not confined to an individual "ordinarily resident in the UK". Once you go beyond that restricted meaning in order to ascertain what individuals are comprised in the phrase "such an individual" it seems to us difficult to find any logical stopping place short of importing the whole of [s.720(1)].

186. In our view it therefore follows that "such an individual" is an individual ordinarily resident in the UK who, *by means of a transfer* of assets in consequence of which income becomes payable to a non-resident, *avoids liability to income tax apart from the operation of*

> *these provisions*.[14]

This is, with respect, clearly right. The question which arises is whether a person who "by means of transfers of assets avoids liability to income tax" means:

(1) a person who in fact avoids income tax (in the absence of the ToA provisions); or
(2) a person who in fact avoids and intends to avoid IT; or
(3) a person who intends to avoid IT (whether or not they in fact do so).

I am inclined to think that solution (1) is the most natural reading, as the word "avoids" suggests avoidance in fact. However the words "by means of" might be thought of as involving some element of intention, so there is also much to be said for solution (2), ie s.720 only applies to a person who in fact avoids and intends to avoid income tax, (though this does overlap with the motive defence).

In *Vestey*, Lord Keith said the section only applied to an individual:

> who has *sought* to avoid liability to income tax by means of such transfers of assets as are mentioned in [s.720(1)].[15]

Lord Dilhorne said the section applied to an individual:

> who has *sought* to avoid income tax[16]

though in the same paragraph he also approved the Court of Appeal's comment in *Congreve* (which one might have thought a somewhat different approach).

Likewise Lord Edmund-Davis:

> individuals whose *purpose* is the avoidance of liability to tax ...[17]

29.4.2 *Position before 1996*

In order to understand the present law, it is necessary first to consider the position before the law was changed in 1996. Case law and statutory reform have complicated what ought to be a simple question with a simple answer.

The starting point is the decision of the House of Lords in *McGuckian v*

---

14 *IRC v Botnar* 72 TC 205.
15 p.602G.
16 p.591E.
17 p.601B.

IRC.[18] This was (in short) a case where a transaction was made which was intended to avoid income tax but did not actually do so (because another anti-avoidance provision was overlooked).[19] The Revenue raised an assessment under s.720. The taxpayer argued that s.720 did not apply since income tax was not actually avoided. The argument failed. Lord Steyn said:

> I would reject the argument that it is a condition precedent to [s.720] applying that there must be proof of an actual avoidance of tax liability. Such a construction treats [s.720] as a power of last resort and it substantially emasculates the effectiveness of the power under [s.720]. Nothing in the language or purpose of [s.720] compels such a construction. Properly construed the opening words of [s.720] merely provide that *there must be an intention to avoid liability for tax*. The sensible construction is that [s.720] can be applied even if there are other provisions which could be invoked to prevent the avoidance of tax. That the revenue authorities should have overlapping taxation powers is an unremarkable consequence. And such a construction cannot cause any unfairness to the taxpayer since he cannot be taxed twice in respect of the same income.[20]

Lord Browne-Wilkinson said:

> [Counsel for the taxpayer] submitted that since the dividend would in any event have been taxable under s 470, [s.720] does not apply. He based this submission on the words in [s.720(1)],
>
> > "For the purpose of preventing the avoiding by individuals ordinarily resident in the UK of liability to income tax …".

---

18 69 TC 1.

19 The actual facts were not so simple. An interest in possession trust owned a company, and a dividend would have been taxable income of the life tenant. Instead the trustees sold the right to the dividend for a lump sum. This sum was trust capital as a matter of trust law (though it was regarded as income for tax purposes under the *Ramsay* principle). This sale was intended to avoid income tax on the dividend.
It was assumed that the transaction did not actually avoid IT, since the sale of a dividend was caught by anti avoidance provisions (s.730 ICTA 1988) now repealed. Is this right? One might have argued that income tax *was* in fact avoided since even though it was assessable under s.730, no assessment was actually made, but the Revenue did not argue that point. The taxpayer was however assessed under (what is now) s.720 ITA rather than s.730. The simple answer to this should have been to raise the assessment under s.730, as the Court of Appeal decided, but HL did not pursue that approach.

20 69 TC 1 at p.82E.

> He submitted that [s.720] does not apply unless tax has *in fact* been avoided. In my judgment, there is no warrant for this submission. ... the words of subs (1) make it clear that the actual avoidance of tax is not a precondition to the application of the section. The income is deemed to be the income of the UK resident
>
> > "whether it would or would not have been chargeable to income tax apart from the provisions of this section".
>
> It is therefore clear [!] that [s.720] can still apply even though the effect of the transfer of assets abroad would not have been successful in avoiding UK income tax.[21]

It is an understatement to say that the reasoning is not compelling,[22] but the decision is still binding. The position before 1996 was settled. The majority of the House of Lords[23] decided that it was not a requirement of s.720 that income tax had to be avoided, though there did have to be an *intention* to avoid income tax.[24]

Thus the law until 1996 was that:

(1) section 720 only applied to a person who intended to avoid income tax; but

---

21 69 TC 1 at p.76.

22 The reason given by Lord Steyn is not compelling since s.720 is not a "power". The reason given by Lord Browne-Wilkinson is not compelling, since the words he cites (which became s.721(5)(a) ITA, repealed 2013 and replaced by s.721(3C)) are needed for where a transfer reduces the rate of income tax (without avoiding it completely). It is significant that neither judge cites the reason given by the other. Unfortunately, it was impossible to have any sympathy with the taxpayer or his advisors, whose actions ("disingenuous in the extreme") were held to be the reason why no assessment was made under the correct section in the first place and whose appeal had "no ethical merit". One suspects that this was a case where the decision was made first and the reasons were found later. The issue was first raised in the House of Lords (it is not mentioned in the lower judgments) and so the Lords did not have the benefit of the consideration of the lower courts on the issue.

23 Lord Lloyd agreed with the other judgments; the other two judges did not consider the point.

24 This area was considered in a thorough Special Commissioners decision just before *McGuckian*: *Botnar v IRC* [1998] STC 38 at pp.63–67. Here the *Revenue* submitted (and the SCs accepted) that s.720 only applies if there is avoidance of IT *in fact.* See para 180. But this has now been overtaken by *McGuckian*. The Special Commissioners also inclined to the view that s.720 only applied if the transferor intended to avoid Income Tax. Had *McGuckian* been decided first, they would no doubt have cited and followed the comment of Lord Steyn set out above. But this has now been overtaken by the statutory reform.

(2) actual avoidance of income tax was not necessary.

29.4.3 *Position from 1996*

Section 721(5) ITA provides:

> It does not matter for the purposes of this section ...
> (c) whether the avoiding of liability to income tax is a purpose for which the transfer is effected.

This applies to income arising on or after 26 November 1996 regardless of the date of the transfer. This does not affect the operation of the motive defence but it reverses point (1): s.720 applies even it there is no purpose of avoiding income tax.

The provision does not expressly deal with point (2) - actual avoidance. It is suggested that the consequence of this amendment is that the question of whether there must *in fact* be an avoidance of income tax needs to be revisited. For Parliament retained the statutory words set out in 29.4.1 (The statutory provisions) which refer to avoiding income tax. The words should be taken to mean something. If they no longer refer (as Lord Steyn thought they did) to the intention to avoid income tax, they should be taken to require that income tax is *in fact* avoided.[25] Thus it is tentatively suggested that the effect of s.721(5) is to reverse the decision of *McGuckian* on this issue.

---

25 This is consistent with the view that HMRC take of s.752(1) ITA (transactions in land) which provides: "This Chapter has effect for the purpose of preventing the avoidance of income tax by persons concerned with land or the development of land." BIM provides:

60315. Conditions: Avoidance

Section 776 ICTA 1988 is anti-avoidance legislation (Section 776(1) ICTA 1988). The test for avoidance is an objective one, i.e. has tax been avoided, and not a subjective one relating to the intentions of the participants.

The avoidance need not, therefore, be deliberate, it can be accidental or unwitting ...

60320. Conditions: Avoidance: Straightforward transactions of purchase and sale

Section 776 ICTA 1988 cannot be used to catch straightforward transactions of purchase and sale of land that do not amount to a trade, or adventure in the nature of trade. ...

Section 776 ICTA 1988 is not applicable because the necessary avoidance of tax is not present.

The position for income arising from 1996 is therefore that:

(1) an intention to avoid income tax is not a requirement for s.720 to apply.

(2) income tax must in fact be avoided for the section to apply.

This raises the question of what amounts to the avoidance of income tax in fact. If the taxpayer avoids an assessment (especially by dubious means) then it is suggested that income tax is avoided. Thus the assessment in *McGuckian* would still be upheld under s.720, though for slightly different reasons.

29.4.4 *The HMRC view*

The ToA draft guidance provides:

> **INTM600700 General conditions Legislative purpose**
> ...So, whilst it is clear that the preamble sets the purpose of the legislation; as Lord Browne-Wilkinson says in the *McGuckian* case (69 TC 1 at page 76), "…the words quoted (section 739(1) ICTA) refer not to the intention of the transferor of the assets … but to the intention of Parliament in enacting the section" and in the same case Lord Clyde (at page 85) affirms that, "The opening few lines of that section set out the purpose to be served by the enactment. That purpose is the prevention of avoidance by individuals ordinarily resident in the United Kingdom of liability to income tax by means of certain kinds of transaction"; because of the links to the income charges it does much more, forming an integral part in construing the section as Lord-Browne Wilkinson goes on to say, "That Parliamentary intention is certainly relevant in construing the section".
> However these provisions are not only aimed at transactions whose purpose is avoiding income tax. The first bullet of INTM600620 makes clear that it does not matter whether the avoiding liability to income tax is a purpose for which the transfer is effected. Clarification to this effect was first inserted into the legislation in Finance Act 1997 and applying irrespective of when the transfer or associated operations took place but only in relation to income arising on or after 26 November 1996.
> The Budget Press Release in relation to the amendment introduced in Finance Act 1997 records:
>
> > "The existing provisions which prevent individuals ordinarily resident in the United Kingdom avoiding income tax by the transfer of assets abroad will be amended to clarify their application and ensure that they work effectively. The changes will confirm

long-standing practice in this area.
The amendments will ensure that, for income arising on or after today, the legislation applies where a purpose of the transfer is to avoid any form of direct taxation.
The new measure will have the effect of removing any possible implication in the legislation that the provisions only apply if:
the avoiding of income tax is the purpose, or one of the purposes, for which the transfer is effected."

The provision appears to reflect exactly the sentiments of Lord Clyde in McGuckian expressed in his judgement in June 1997 where he says, continuing on from the quotation above, "It is not required that the transaction should be carried out with that purpose".

Further affirmation of the nature of these introductory words can be gleaned from the speech of Lord Steyn in the McGuckian case, at page 82 where he comments, "I would reject the argument that it is a condition precedent to [what became section 739 ICTA] applying that there must be proof of actual avoidance of tax liability. Such a construction treats [section 739 ICTA] as a power of last resort and it substantially emasculates the effectiveness of the power under [section 739 ICTA]. Nothing in the language or purpose of [section 739 ICTA] compels such a construction. Properly construed the opening words of [the section] merely provide that there must be an intention to avoid liability for tax. The sensible construction is that [section 739 ICTA] can be applied even if there are other provisions which could be invoked to prevent the avoidance of tax. That the revenue authorities should have overlapping taxation powers is an unremarkable consequence. And such a construction cannot cause any unfairness to the taxpayer since he cannot be taxed twice in respect of the same income."

These words should not however be taken to suggest that the income charge provisions apply to any and every transaction that may be a relevant transfer. The provisions remain for preventing the avoiding of liability to income tax. And thus at the heart of the jigsaw puzzle remains the need to identify that there is or would be avoidance of UK income tax before the provisions can be applied.

...

INTM600760 - The income charge Such an individual

The person who is liable for any tax charged under the income charge is the individual to whom the income is treated as arising (INTM600620 bullet 3). That individual is described as 'such an individual'. This is not just any individual but specifically the individual described in the preamble (INTM600700).

The importance of the phrase 'such an individual', which also appeared in the earlier legislation, is evidenced by the consideration that the courts have given to it over the years. For example Lord Nolan records in the case of *Willoughby v CIR* (70 TC at page 114), "The crucial words, as it seems to me, are those in subsection (1) which state that the section is to 'have effect for the purpose of preventing the avoiding by individuals ordinarily resident in the United Kingdom of liability to income tax by means of transfer of assets', coupled with the identification, in subsection (2), of "such an individual" as the subject of liability. What can the words "such an individual" refer to save for an individual of the kind described in subsection (1), that is an individual ordinarily resident in the United Kingdom seeking to avoid liability by means of transfers of assets?"

In context, Lord Nolan was considering here the issue of ordinary residence, see INTM600780, but what is clear is the special significance of the phrase and the fact that it encompasses far more than just any individual. As the Special Commissioner observes in *CIR v Botnar* (72 TC at page 239) "it therefore follows that "such an individual" is an individual ordinarily resident in the United Kingdom who, by means of a transfer of assets in consequence of which income becomes payable to a non-resident, avoids liability to income tax apart from the operation of these provisions"

Whilst it may therefore be the case that there is no 'condition precedent' that there must be actual avoidance of tax liability for an income charge to arise to such an individual, it must be the case that an outcome of the transactions is that, absent the income charge, a liability to income tax would be avoided. And that the individual who is the subject of charge is the one who would, without the income charge, have avoided income tax as a result of relevant transactions. Where, therefore, there is no avoiding of liability to income tax, or otherwise the relevant conditions are not met, there can be no application of the income charge, there being no 'such an individual' as is chargeable by the provisions

A very simple example may illustrate the situation.

Example

Two UK resident individuals each plan to invest in an offshore bank deposit account. The first individual invests directly in the account and receives interest which is part of his income and on which he pays tax through his self assessment. Even though on the face of it there is a relevant transfer he is not 'such an individual' as the income charge applies to as there is no avoiding of a liability to income tax. The transfer of assets provisions therefore do not apply.

By contrast the second individual sets up an offshore entity in a territory

where it will not be charged to tax on its income. This entity places the money on deposit and receives the income. The income that arises to the entity cannot be charged directly on the individual. In this context the individual is 'such an individual' as would avoid liability to income tax apart from the operation of these provisions. Therefore, the transfer of assets income charge applies to prevent the avoiding of liability to income tax if all other conditions are also met.

29.5 Section 721 Condition A (power to enjoy)

Section 721(1) ITA provides:

> Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A to C are met.

I refer below to **"s.721 conditions A to C**".

Section 721(2) sets out condition A:

> Condition A is that the individual has power in the tax year to enjoy income of a person abroad as a result of—
>
> (a) a relevant transfer,
>
> (b) one or more associated operations, or
>
> (c) a relevant transfer and one or more associated operations.

Once one has identified the transferor one asks whether they have "power to enjoy" income of the person abroad.

If the transferor has power to enjoy during part of the tax year, condition A is satisfied for the whole of the tax year.[26] This is an accidental change from the pre-ITA position.

Statutory tax indemnities do not confer power to enjoy, see 30.4.10 (Reimbursement of tax under statutory indemnity).

On a transfer from a UK domiciled person to their foreign domiciled spouse, see 73.12 (Income tax planning for mixed marriage).

29.6 "Power to enjoy"

Section 722 ITA provides:

---

26 The usual case will be if the settlor has power to enjoy and is then excluded and so ceases to have power to enjoy; but it could also happen that the settlor acquires power to enjoy during the tax year.

Contrast 27.3.6 (Settlement ceasing to be settlor-interested); 50.4 (Settlor-interested condition).

> (1) For the purposes of section 721, an individual is treated as having power to enjoy income of a person abroad if any of the enjoyment conditions are met.
> (2) In subsection (1) "the enjoyment conditions" means conditions A to E as specified in section 723.

I adopt the statutory terminology and refer to "**enjoyment conditions A to E**".

Section 722(1) states that an individual is *treated* as having power to enjoy if any of the enjoyment conditions is satisfied. It is considered that this is a comprehensive definition of "power to enjoy" but it is impossible to think of any power to enjoy (in the general sense) which does not also fall within one of the enjoyment conditions, so the point is academic.

"Power to enjoy" is elaborately defined and has given rise to a large case law. But in practice there is not often an issue here. In outline, the transferor has "power to enjoy" if they may possibly enjoy any of the income of the person abroad. A transferor has no power to enjoy if they (and their spouses) are excluded from benefit and have no power of control. A widow or widower of the transferor may be included as a beneficiary.

The test is slightly wider than that of a "settlor-interested" trust for the purposes of s.624 ITTOIA[27] though for most practical purposes they are the same. It is hard to see the reason for the distinction, but that is the patchwork nature of income tax.

The enjoyment conditions frequently use the word "benefit". For the meaning of "benefit" in the context of s.731 and s.87 see 30.4 (Benefit). Most of that discussion is relevant here, but there is one difference. In those sections one had to ascertain the value of the benefit. In the case of power to enjoy, all that matters is that there is a benefit, regardless of its value: the value of the benefit does not usually matter.

29.6.1 *Substance*

Section 722(3) ITA provides:

> In determining whether an individual has power to enjoy income for the purposes of section 721, regard must be had to the substantial result and effect of all the relevant transactions.

---

27 See 27.3 (Meaning(s) of "settlor-interested").

Section 722(4) provides:

> In making that determination all benefits which may at any time accrue to the individual as a result of the transfer and any associated operations must be taken into account, irrespective of—
>
> (a) the nature or form of the benefits, or
>
> (b) whether the individual has legal or equitable rights in respect of the benefits.

I cannot think of any case where s.722(3) has made or could make any difference, though it has occasionally been referred to. Section 722(4)(a) is likewise otiose. The drafter is only stressing (which need hardly be stressed) that the provisions should not be narrowly construed. In *Vestey* the House of Lords say:

> the direction that regard shall be had "to the substantial result and effect of the transfer and any associated operations" does not in my view authorise any laxity in construing any of the documents by which the transfer or the associated operations are effected. The Court must first determine the meaning and effect of the documents before this provision is applied and it must then consider whether their effect, though in form not beneficial to the settlor, is so in substance. The contrast is between substance and form, so if it can be shown in the present case that the effect of the transfer and the associated operations is to vest a benefit in (for example) a company over which the settlor has complete control, the Court may then say that, though in form the company benefits, in substance the company and the settlor are one and the settlor therefore benefits. But the Court cannot take this last step unless it is shown that the settlor has himself the legal control and no reliance must be placed on his influence over others who are not in law bound to follow his directions.[28]

The example is not a case where s.722(3) is in point, as a benefit to the company held by the beneficiary would constitute power to enjoy under usual principles. An unsympathetic commentator would say that the drafter is simply striving for effect, or expressing exasperation.

Could s.722(4)(b) ever make any difference? An example is a Cayman Island exempted trust, under which it is said that a beneficiary has no

---

28 *Vestey v IRC* 31 TC 1 at p.89.

rights,[29] or perhaps a Cayman Island STAR trust.[30]

29.6.2 *Time of enjoyment*

Section 721(4) ITA provides:

> For the purposes of subsection (2), it does not matter whether the income of the person abroad may be enjoyed immediately or only later.

29.6.3 *Enjoyment condition A: Income dealt with to benefit T*

Section 723(1) provides:

> Condition A is that the income is in fact so dealt with by any person as to be calculated at some time to enure for the benefit of the individual, whether in the form of income or not.

"Calculated..."

The nuance of this un-lawyer-like expression was discussed by the Special Commissioners in *Botnar v IRC*:

> 222. [Enjoyment condition A] is concerned with how particular income is dealt with when it arises. [Counsel for the taxpayer] however conceded that this is not confined to its immediate handling on receipt or even to what happens in the year of assessment, if for example it is received late in the year, but that we should look at how it is dealt with within a reasonable time of receipt. ...
> 224. It seems to us that, when the word "calculated" is considered in the context that it refers to income which is "in fact so dealt with", the meaning "likely" is to be preferred to "thought out" in the sense of "intended"; however we are not sure that either "likely" or "intended" gives exactly the same flavour as "calculated". "Calculated" here combines an element of objectivity with an element of forethought.
> 225. It may not however make much difference because if any income was intended to enure for the benefit of [the transferor] it is obviously more probable that it was likely to so enure and that it would be seen

29 See s.83 [Cayman] Trusts Law (2009 Revision); exempted trusts were introduced in the [Cayman] Trust Law 1967 specifically in the hope of avoiding the ToA rules which then applied if the transferor had "rights". The UK responded with the 1969 reforms removing the reference to "rights".

30 It has been argued that a beneficiary of a foundation has no rights, but a sceptical Court refused to accept that; see 84.8.3 (Foreign law views on Foundations).

objectively as likely to so enure.[31]

The ToA draft guidance provides:

> **INTM600880 power to enjoy - condition A**
> ... The meaning of the word 'calculated' in this test was considered briefly by Mr Justice Walton in *Vestey v CIR* (54 TC 503 at page 555) where he observes "that it was submitted to me that "calculated" … meant "likely". This is, of course, one of its possible meanings, although a glance at the Shorter Oxford English Dictionary makes it quite clear that this is not a precise translation of the word "calculated". On the other hand, its primary meaning is "reckoned, estimated, or thought out", and I would think that this is the meaning which is intended here." Walton J went on to say that he thought a stricter interpretation than "likely" is called for. And that is the approach which HMRC have continued to follow in relation to this test.

"...to enure for the benefit"

The ToA draft guidance provides:

> **INTM600880 power to enjoy - condition A**
> ... The benefit may be present or future. It may be in the form of income or not, and may include a payment of any kind (prior to April 2007 the transfer of assets legislation Chapter included a meaning of 'benefit' for the purposes of the Chapter saying - "benefit" includes a payment of any kind). Therefore provided some benefit enures to the individual it need not be a money payment at all. In this context 'enure' means to take, or have effect or serve to the use, benefit, or advantage of a person.
> Some examples taken from Case Law illustrate this point.
> In *Latilla v CIR* (25 TC 116), a non-UK company paid over income to the individual by repaying debentures held by her. Such a capital payment, if it results from dealing with the income of the person abroad, may come within this test. A capital payment may also trigger the income charge - receipt of/entitlement to capital sums further dealt with at (INTM600990).
> In *Lord Chetwode v CIR* (51 TC 647) the whole share capital of a Bahamas company was held by the Bahamas trustee of a settlement for the benefit of Lord Chetwode and his family. Lord Chetwode had a life interest in the trust fund and had very wide powers, including power to

31 72 TC 205. The wording is also discussed *obiter* in *Vestey v IRC* 54 TC 503 at P.555G.

> remove or appoint trustees, and to re-vest in himself the title to the trust fund. The House of Lords said in their Judgement that, in view of the terms of the settlement, in addition to power to enjoy under other conditions, the income of the underlying company was so dealt with as to be calculated to enure for Lord Chetwode's benefit, and thus he had power to enjoy under this condition.

29.6.4 *Enjoyment condition B: Income increases value of T's asset*

Section 723(2) ITA provides:

> Condition B is that the receipt or accrual[32] of the income operates to increase the value to the individual—
>
> (a) of any assets the individual holds, or
>
> (b) of any assets held for the individual's benefit.

First one must identify an asset held by T or for T's benefit. Having identified the asset, one asks whether the receipt of the income increases the value of that asset.

The concept of "assets held by T" is straightforward but what about assets held "for T's benefit"? In *Howard de Walden v IRC* 25 TC 121 a promissory note held by trustees on trust for T for life was considered to be held for T's benefit. One could reach the same result by a different route since T's life interest in the note was itself an "asset" held by T. If the asset is held on a discretionary trust under which T is merely a beneficiary, it is probably not held "for T's benefit". What if the asset is held on interest in possession trusts for T subject to an overriding power of appointment?

The second requirement is that the receipt of the income must increase the value of the asset. This was also considered in *Howard de Walden v IRC*. Here T transferred assets to offshore companies and held (1) a life interest in promissory notes issued by the companies and (2) the benefit of debt due from the companies (T had lent money to the companies).[33] The Court of Appeal held:

> The receipt of the income by each company operates to increase the

---

32 The words "or accrual" appeal to be otiose, but it does not matter.

33 In some but not all cases T also held a few shares in the companies. The Court of Appeal did not rely on this because if it had held that T was caught only by virtue of these shares, T would not have been assessable on the income of all the companies.

value of the notes and of the deposit debt...[34]

However it is a question of fact in each case. The question is whether there was a risk of default which is reduced by the receipt of further income. If a debt is sufficiently covered by existing assets of a company, the receipt of further income by the company does not increase the value of the debt and enjoyment condition B is not satisfied. It will not usually matter, as s.727 is likely to apply in cases of this kind.[35]

The ToA draft guidance provides:

> **INTM600900 power to enjoy - condition B**
> ... This heading covers, for example, situations where:-
> a. the individual holds shares in a foreign company, and the accrued income or profits of the company increase the value of its shares;
> b. the individual receives debentures in exchange for transferred assets (see *Howard de Walden v CIR* 25 TC 121);
> c. the consideration for the transferred assets is left as a debt owing to the individual by the company (see *Ramsden v CIR* 37 TC 627).
>
> In these examples the receipt of income by the foreign company increases the value of the shares, debenture or debt, so income need not be remitted, nor even accumulated, for the benefit of the individual. If in fact the income is received by, or accrues due to, the person abroad, and operates to increase the value of any assets held by or for the benefit of the individual, then the test may be considered met for the purpose of applying the income charge.
>
> In the *Howard de Walden* (25 TC 121) case mentioned above, assets had been transferred by a series of transactions to companies resident abroad, and in exchange the individual had effectively received a series of promissory notes. The Court of Appeal held that the income of the non-resident companies increased the value of the promissory notes by increasing the general assets of the companies issuing them and therefore that the test was met for the purpose of the income charge.
>
> In the *Ramsden* case (37 TC 619) an individual transferred assets to a foreign company and left the cost of the assets credited to his account. Although it was held that the income charge - receipt of/entitlement to capital sums did not apply as the unpaid purchase money was not a loan nevertheless the power to enjoy condition was met under this heading and so an income charge arose. The individual's right to recover his debt was an asset held by him, and the value of that right was increased by

34 25 TC 121 at p.133. *Brackett v Chater* 60 TC 134 & 639 is another example.

35 See 29.11 (Transferor receives capital sum).

anything tending to increase the value of the company's assets (that is by the company's receipt of income). Under this heading therefore the individual would have "power to enjoy" income of the company while the debt remained unpaid.
In the *Lord Chetwode* case (51 TC 647) a trust for the benefit of *Lord Chetwode* held shares in a non-UK resident company which received dividends. The House of Lords found that in the circumstances of that case the receipt of dividends by the underlying company operated to increase the value to Lord Chetwode of the assets held by the trustees for his benefit, and he therefore had power to enjoy within this heading as well as within other heads of the test.

29.6.5 *Enjoyment condition C: Individual receives benefit*

Section 723 ITA provides:

(3) Condition C is that the individual receives or is entitled to receive at any time any benefit provided or to be provided out of the income or related money.
(4) In subsection (3) "related money" means money which is or will be available for the purpose of providing the benefit as a result of the effect or successive effects—
(a) on the income, and
(b) on any assets which directly or indirectly represent the income,
of the associated operations referred to in section 721(2).

For completeness, this question also arose in *Howard de Walden*. The Court of Appeal said:

> ... the payments made and to be made in respect of the notes and deposits are "benefits" within the meaning of (c) since "benefit" as defined ... includes a payment of any kind.

There are two issues here. First, is the payment of a debt to T (or payment of the promissory note) a "benefit" in the general sense? The Court of Appeal rightly thought it was not, since they relied on the former definition clause.[36] Secondly, did the former statutory definition of benefit extend the meaning of benefit to include a payment that is not a benefit in the normal sense? The Court of Appeal held that it did. However, the ITA does not contain the definition of benefit on which the court relied, so this argument no longer arises. However the repayment of an interest-

36 For the meaning of "benefit" see 30.4 (Benefit).

free loan is in principle a benefit.[37]

See 29.10.3 (Amount of charge when enjoyment condition C applies).

The ToA draft guidance provides:

> **INTM600920 power to enjoy - condition C**
> ...This test is designed to cover, for example, the individual who holds redeemable debentures; or who is entitled to other capital payments, where these are satisfied out of income or out of assets representing income; and also cases where a chain of companies is involved or a shareholder is entitled to receive dividends.
> In one example the Special Commissioners took the view that a capital sum payable to an individual by annual instalments in consideration for the transfer of assets to a foreign company met this condition and gave a power to enjoy income, as the test was not confined to payments which left the company as income. The test includes a sum received as capital as well as any income received. In such a case the income charge - receipt of/entitlement to capital sums provision may also apply.
> Another example is the case of *Earl Beatty's Executors v CIR* (23 TC 574). Assets were transferred by a series of transactions to a non-resident company in consideration for the issue of debentures repayable in successive years without interest. It was argued that, since these debentures were to be repayable only to the extent of the value of the assets transferred to the company, the individual was getting back nothing but his capital; that is he was receiving no benefit from the income derived from the assets transferred. It was held that since the debentures were charged on both the income and capital of the issuing company, the individual must be deemed to be entitled to a benefit provided out of income within the meaning of this condition. This decision was approved in *Howard de Walden v CIR* (25 TC 121). In that case the individual had a life interest in certain promissory notes issued by a non-resident company, and also had an interest in certain sums of cash on deposit with the company and repayable on demand. It was held that the payments made, and to be made, in respect of the notes and deposits were benefits provided out of the income of the company, the whole of which income could be traced to the assets originally transferred.
> And a final example of where this condition applies is that of an individual who is a shareholder of a non-UK resident company. In *Lee v CIR* 24 TC 207, the individual, as a result of a transfer of assets, held shares in a non-resident company which because of the rights attached

37 See 27.3.3 (Beneficial loan or guarantee).

to them entitled him to receive a dividend out of the income of the company. This was held to be a benefit provided, or to be provided, out of the income of company within this condition. Similarly in the Lord Chetwode case (51 TC 647) the House of Lords found that the terms of the deed of settlement entitled Lord Chetwode to receive a benefit out of the income received by the underlying company, and thus he had power to enjoy within this condition as well as within other heads of the power to enjoy provisions.

In some circumstances where power to enjoy is satisfied because of the receipt of a benefit the extent of the income charge may be affected by the amount or value of that benefit. More details on this are at INTM600980.

29.6.6 *Enjoyment condition D: Possibility of benefit*

Section 723(5) ITA provides:

> Condition D is that the individual may become entitled to the beneficial enjoyment of the income if one or more powers are exercised or successively exercised.
>
> (6) For the purposes of subsection (5) it does not matter—
>
> (a) who may exercise the powers, or
>
> (b) whether they are exercisable with or without the consent of another person.

This would apply to a discretionary trust where T was a beneficiary (or could be added to the class of beneficiaries).

"Income" here includes any asset representing the income, even if that asset does not constitute the actual income (in the strict sense) of the person abroad. In *Vestey v IRC*:

(1) The individual could receive accumulated trust income. Walton J held that the individual had no power to enjoy the trust income within enjoyment condition D because what the individual could receive was trust capital and so no longer "income".[38]

(2) The trust held a company. Walton J held that the individual had no power to enjoy the company's income within enjoyment condition D because what they could receive was dividends from the company and that was not the same as the income of the company.[39]

---

38 *Vestey v IRC* 54 TC 503 at p.555.

39 *Vestey v IRC* 54 TC 503 at pp.562-3.

This is bizarre and in the House of Lords Viscount Dilhorne rejected it.[40] It is considered that Dilhorne's reasoning is to be preferred.

The ToA draft guidance provides:

> **INTM600940 power to enjoy - condition D**
> ...Perhaps the most common example of where this test may apply is to the income of a company underlying a settlement whose shares are acquired by the settlement trustees. The individual who made the settlement remains a beneficiary and as such has power to enjoy the income of such a company by becoming entitled to its beneficial enjoyment through the successive exercise of powers, for example, the declaration of a dividend by the company of which the trustees are shareholders, followed by an exercise of discretion as to the application of the dividend, by the trustees.
> This power to enjoy and with it the income charge can apply notwithstanding that income arising to the trustees of a settlement may be caught under the settlements provisions (Chapter 5, Part 5 ITTOIA 2005) and deemed to be that of the settlor. See INTM602360 where more than one set of charging provisions may appear to apply in relation to the same income.
> In another example (*CIR v Botnar* (72 TC 205)) the individual's counsel argued that even if the individual did become entitled to the beneficial enjoyment of income which could be traced to the companies underlying the settlement involved it had not been the income of those companies when it was beneficially enjoyed. The HMRC argument, which was accepted by the Court of Appeal, was that the income which the individual beneficially enjoyed had simply to have been the income of the companies at some earlier stage. It was not necessary that it still possessed the characteristics of being income of the underlying companies when it was beneficially enjoyed. What this condition is concerned with is the beneficial enjoyment in the future of what in the past was the income of the companies.

29.6.7 *Enjoyment condition E: Control*

Section 723(7) ITA provides:

> Condition E is that the individual is able in any manner to control directly or indirectly the application of the income.

---

40 p.595. Strictly, Dilhorne only rejected point (1). He did not address point (2). But the reason is the same in both cases so it logically follows he rejected Walton's view on both points. No other judge considered this aspect.

A power to appoint the capital or income of a fund among a defined class (not including the appointor) does not satisfy enjoyment condition E, even if the power is not a fiduciary power.[41]

"Control" means non-fiduciary control and so does not include the powers of control of a trustee or a protector with fiduciary powers. It also does not include the power to appoint new trustees:

> The question is whether he was able to control the application of the income, and to answer that question affirmatively it must in my judgment be possible to say at least that he was in a position to ensure that the trustees would act in accordance with his wishes without themselves giving any independent consideration and accordingly to act in disregard of their fiduciary duty.[42]

This is discussed by the Special Commissioners in *Botnar v IRC*:

> 260. It seems to us that due importance must be given to the words "able… to control" in [enjoyment condition E] bearing in mind the words "in any manner whatsoever, and whether directly or indirectly"...
> 261. In our judgment the ability to control must go beyond an assumption that those controlling the companies will comply with the transferor's wishes and the fact that they do comply is immaterial. We accept the question posed by [Counsel], viz whether [the transferor] was in a position to ensure that the companies would act in accordance with his wishes.

The Special Commissioners then applied this statement of principle to the facts of the particular case:

> 262. There was in fact no material before us to indicate that [the transferor] could have done anything if Dr. Lenz had declined to do what he wanted. The position might have been different if Dr. Lenz was for example an employee who might have been dismissed in the event of failing to cooperate. There was however no evidence to suggest this. We are satisfied that the directors of the companies would have carried out his instructions. We have no doubt that [the transferor] was justified in assuming that Dr. Lenz would do what he wanted. However we do not consider that the mere fact that Dr. Lenz was in the saddle of the settlement meant that [the transferor] was able to ensure that the income

41 *IRC v Schroder* 57 TC 94 at p.116.

42 *IRC v Schroder* 57 TC 94 at p.125, followed in the non-tax case *R v Radio Authority ex p. Guardian Media Group* [1995] 1 WLR 334 at p.345.

> would be applied for his benefit. On the authority of *Schroder* even decisive influence is not enough.
> 263. We readily accept [Counsel's] submission that [the transferor] wished to ensure that the shares would remain in friendly hands. In a sense it could be said that he did in fact control the settlement and the Companies because in fact Dr. Lenz did comply with his wishes: there was no evidence of any action by Dr. Lenz which was contrary to [the transferor]'s wishes. That is not however the same as [the transferor] having the ability, even indirectly, to ensure that the income would be applied in accordance with his wishes.[43]

This is sensible, because a transferor will know whether they have power of control in this sense; whereas if the section were read more loosely, then power of control would come and go from time to time.

Lee v IRC 24 TC 207 offers an example: condition E is satisfied if the transferor holds management shares conferring votes (and so power to appoint and dismiss directors) even if the shares confer no right to dividends or capital. At first sight it may seem illogical that a power to appoint or remove directors should constitute a power to enjoy, when power to appoint or remove trustees does not. Directors and trustees are both fiduciaries. *IRC v Schroder* explains the difference:

> Mr. Lee had power to appoint and remove directors. That power was not a fiduciary power. He could have appointed himself. ... directors do not owe any fiduciary duty to the shareholders. They are trustees of their powers for the company. Mr. Lee was for all practical purposes the company. ... Thus Mr. Lee was in practice securely in the saddle.[44]

In such a case, enjoyment condition B is also satisfied, as company income would tend to increase the value of the voting shares (voting shares do have some value). In practice it is difficult to think of a case where enjoyment condition E is satisfied and none of the other enjoyment conditions would be satisfied. Possibly, condition E had more role to play before 1969, when (what is now) s.720 only applied when the individual had *rights* which conferred power to enjoy; and being an object of a discretionary trust was not enough as the discretionary beneficiary had no rights within the meaning of that section.

The ToA draft guidance provides:

---

43 72 TC 205 (Special Commissioners) at p.250.

44 *IRC v Schroder* 57 TC 94 at p.123.

INTM600960 power to enjoy - condition E

...This test covers, amongst other things, the situation where the individual has a controlling interest in a foreign company, either by controlling the voting rights or other rights under company's Articles of Association.

An example of indirect control is found in the case of *Lee v CIR* (24 TC 207). In that case an individual transferred shares to a Canadian company in exchange for the issue to him of shares in the company. The individual was not a director but under the company's bye-laws he had power to elect and remove its directors, and his consent was necessary for any amendment to the bye-laws and for the allotment and transfer of shares. It was decided that the individual had power to control the application of the income of the Canadian company within the meaning of this test because of his power to appoint or remove the company's' directors (who in turn were able to control the company's income).The fact that control was indirect was immaterial.

In *Lord Chetwode v CIR* (51 TC 647) the House of Lords found that, because Lord Chetwode retained extensive powers over the assets of a foreign settlement in which he had a life interest, he had power to enjoy within this condition because he could control the application of the income of the foreign underlying company whose shares were held by the trustees.

It may sometimes be thought that an individual who has transferred assets to a non-UK settlement for example, or who is associated with such a transfer, continues to have power to enjoy the income of the structure by virtue of this condition because of powers expressed in the settlement deed, with or without associated arrangements, such as, for example, a 'letter of wishes' or being a 'protector' in relation to the settlement.

However the Special Commissioners decided in the case of *CIR v Schroder* (57 TC 94) that on the particular facts in that case the test was not met. They found that 'Mr Schroder was able to appoint trustees who…could be expected to deal with the trust income in accordance with his wishes: but he could not compel them to do so and there is no suggestion that any of them would have acted in breach of their fiduciary duties under the settlements.' In dismissing HMRC's appeal against the Commissioners' decision The High Court appears in effect to have distinguished a position of influence from a position of control. Vinelott J said (page 125):

'But the question in the instant case is not whether the settlor was likely to be able to influence or even to exercise a decisive influence over the

> exercise by the trustees of their fiduciary powers. The question is whether he was able to control the application of the income, and to answer that question affirmatively it must in my judgement be possible to say at least that he was in a position to ensure that the trustees would act in accordance with his wishes without themselves giving any independent consideration and accordingly to act in disregard of their fiduciary duty.'
> As Mr Schroder was within the category of persons defined as excluded from benefit under the settlements, so there was no possibility of establishing a power to enjoy by any of the other tests in the particular circumstances of the case.

IRC v Schroder raised a further question on the scope of enjoyment condition E which remains open:

> [Counsel for the taxpayer] submitted that ... para (e) was not intended to apply unless the taxpayer is able to secure that income is applied in a way which produces at least an indirect benefit or in the words of Lord Morton in the first *Vestey* case that his control over the application of income is a power which he is entitled to use to serve his own ends ...

The judge found the Revenue's response "less than compelling" but did not decide the issue:

> ... the question whether para (e) applies to a case where a settlor has a power to direct the application of income for the benefit of others and to the exclusion of any benefit direct or indirect to himself does not arise for decision, and I express no concluded opinion upon it.[45]

The ToA draft guidance shows that HMRC continue to take that point:

> **INTM600960 power to enjoy - condition E**
> ... The test does not however require that the individual is able to derive personal benefit from the power of control. If in fact therefore a settlor of a settlement, for example, does continue to have power to direct the application of income for the benefit of others, even though he himself may be specifically excluded from benefit, this power to enjoy condition may well be met.

The fact that this point remains undecided only goes to show the very limited importance of enjoyment condition E. The ToA draft guidance concludes with the same point:

---

45 *IRC v Schroder* 57 TC 94 at p.125-126.

> In most cases it is unlikely that satisfaction of the power to enjoy test will rest on the basis of this condition alone.

29.6.8 *Minority shareholding in offshore company*

If T holds a majority shareholding in an offshore company, T has power to enjoy all the income of the company since enjoyment condition E is satisfied. The same applies if T and T's spouse together have a majority shareholding. What is the position if T has a minority shareholding, say, 10% of the ordinary shares? At first sight one might think that T has power to enjoy all the income of the company, since the income of the company increases the value of T's minority shareholding. But it is suggested that T has only power to enjoy one tenth of the company's income. This was assumed in *Bambridge v IRC*.[46]

29.7 Power to enjoy: Causation condition

It is not sufficient that the transferor has power to enjoy the income of the person abroad. A causation condition must also be satisfied. Section 721(2) ITA provides:

> Condition A is that the individual has power in the tax year to enjoy income of a person abroad *as a result of*—
>
> (a) a relevant transfer,
> (b) one or more associated operations, or
> (c) a relevant transfer and one or more associated operations.

Suppose:

(1) In 1970 A transfers an asset to a non-resident company wholly owned by B, who is not UK resident ("A's transfer").
(2) in 2010 B transfers the company to an offshore trust under which A may benefit ("B's transfer").

A has made a relevant transfer. However, before 2010, A is not within s.720 since A does not have "power to enjoy" the income of the company.

From 2010 onwards, A does have "power to enjoy". A does not have that power as a result of A's transfer alone. However, B's transfer appears at first sight to be an associated operation in relation to A's transfer.[47] It seems at first sight that s.721 condition A is satisfied and A is taxable

---

46 36 TC 313. See Boyd, "Requiem for a Man of Straw" [1980] BTR 442 at p.457.
47 See 28.9 (Associated operation: definition).

under s.720 on the income of B's trust! This clearly cannot be right, but why not? This raises questions similar to those discussed in para 28.11.1 (Transfer from A to B followed by transfer from B to person abroad). Before the ITA, the legislation dealt with this by applying a more limited causation test. If B's transfer was an independent act, it "broke the chain of causation" and A's transfer was not the real or effective or operative cause.

From 2007/08, the foundation of that argument has been knocked away. But the courts will have to fill in the hole with a gloss, or the legislation simply does not work. It is suggested that B's transfer is not an associated operation, so A is not within s.720 if there is a "clean break" between A's transfer and B's transfer (the same test as applies elsewhere).

Suppose:

(1) In year 1, T transferred assets to an offshore company ("the original transfer of assets").

(2) In year 2, T lent money to the company interest-free (" the loan").

Suppose in year 1 T has no interest in the shares of the company and so has no power to enjoy its income and is outside s.720.

In year 2, T probably does have power to enjoy the income of the company by virtue of the interest-free loan.[48] However T is not taxed on the income arising from the original transfer of assets in year 1, since that power to enjoy does not arise *as a result* of the transfer or any associated operation. The loan is not an associated operation.[49]

However, T is in principle subject to tax under s.720 on the income arising to the offshore company as a result of the loan in year 2 (if there is any) as the loan is itself a transfer of assets.[50]

On the same facts, if income is used to repay the loan, then enjoyment condition A is satisfied. (So is enjoyment condition C, but that does not matter.)

29.8 Income chargeable: Section 721 Condition B

Section 721(3) ITA provides:

---

48 Inter alia, enjoyment condition D is satisfied as income may be used to repay the loan, and (depending on the facts) enjoyment condition B may also be satisfied.

49 See 28.9.2 ("Effected in relation to" the assets transferred).

50 This point did not arise on the facts of *Fynn* as the loan was used to repay a debt, so no income arose to the offshore company as a result of the loan.

> Condition B is that the income of the person abroad would be chargeable to income tax if it were the individual's and received by the individual in the UK.

I cannot think of income which would not be chargeable if received by a UK resident individual in the UK. Perhaps the rule had some historical purpose when enacted in 1936 which has since been lost; but that is speculation.[51]

In practice condition B will always be satisfied. So it does not matter that s.727 has no equivalent condition.

29.9 Section 721 Condition C: Transferor UK resident

Section 721(3A) ITA provides:

> Condition C is that the individual is UK resident for the tax year.

29.9.1 *Transferor not resident when income arises*

Section 720 does not apply to income which arises in a year when the transferor is not resident in the UK.

A non-resident individual is subject to tax at their personal rates on their UK rental income. That individual can transfer UK land to an offshore company in order to avoid higher rate income tax.[52] (It is not usually necessary for a non-resident individual to transfer other assets to a company in order to avoid higher rate tax as income of a non-resident from most other sources is not subject to tax at the higher rates.)[53]

If the individual later becomes UK resident they do not retrospectively become liable under s.720 for income accruing while non-resident. This is consistent with the usual IT position.[54]

Formerly the ToA rules only applied to a person who was *ordinarily* UK resident. The abolition of ordinary residence in 2013 led to a significant extension of the rules. Until 2015/16, there is a transitional relief for transferors not ordinarily UK resident as at 5 April 2013: see 4.30

---

51 One possible case (prior to the abolition of ordinary residence in 2013) was a transferor who was ordinarily resident but not resident. If that were possible (which was doubtful) the individual could have benefited from condition B as (being non-resident) they would not have been chargeable on foreign income.

52 Of course, CGT, VAT, IHT and SDLT all need consideration.

53 See 42.1 (Non-residents income tax relief: Introduction).

54 See 10.20 (RFI/gains arising when non-resident, remitted when resident).

(Ordinary residence).

29.9.2 *Transferor not resident when transfer made*

The intention of those responsible for the legislation was that s.720 should only apply if the transferor was (ordinarily) resident in the UK at the time of the transfer.[55] After some vacillation, this was upheld in *IRC v Willoughby*.[56] But that is only of historical interest, as the position now is governed by s.721(5) ITA:

> It does not matter for the purposes of this section ...
> (b) whether the individual is UK resident for the tax year in which the relevant transfer is made (if different from the tax year mentioned in subsection (1))...

Thus non-residence at the time of the transfer is not a defence: s.720 may apply to any person after they become resident, regardless of residence at the time of the transfer. This applies to income arising from 1996 regardless of the date of the transfer.[57]

29.9.3 *Split year*

There is no express split year rule, so the default rule applies: s.720 income is taxable even if it arises during the overseas part of a split year of the transferor.[58] There is no good reason for that. Section 720 income ought to be taxed in the same way as ordinary foreign income.

29.10 Amount of s.720 charge

29.10.1 *Power to enjoy part of income of person abroad*

Section 720 ITA provides:

> (2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions)...
> (3) Tax is charged under this section on the amount of income treated as arising in the tax year.

---

55 "There has to be a transfer of assets abroad by an individual resident in this country." (W.S. Morrison, then Financial Secretary) 313 HL Official Reports 5th series col 685, cited *IRC v Willoughby* 70 TC 57 at p.113.

56 70 TC 57 reversing *Herdman v IRC* 45 TC 394.

57 Also see 30.10.1 (Transferor not resident when transfer made; pre-1996 income).

58 See 7.1 (Default rule: individual regarded as resident throughout tax year).

Section 721(3B) ITA provides:

> (3B) The amount of the income treated as arising under subsection (1) is equal to the amount of the income of the person abroad (subject to sections 724[59] and 725).

Prior to 2013, s.720 did not tell us *what* is the amount of income treated as arising. Construction and common sense had to fill the gap.[60] Now we have s.721(3B) but it does not clearly address the problems which arise.

A person may have "power to enjoy" (as defined) over all the income of an offshore person even though their power to enjoy (in the natural sense of that expression) is limited to an unidentifiable part[61] or even none[62] of the income. In such a case T is taxed on all the income. The s.720 income is not limited to the income that T is actually entitled or able to receive. Section 721(3B) ITA confirms the pre-2013 law.[63]

However, if T has power to enjoy (as defined) over only part of the income, T is only taxed on the income which T has power to enjoy:

> The only question is: What income of the non-resident does the resident individual have power to enjoy by reason of the transfer either alone or in conjunction with associated operations? It is that income which is deemed to be income of that individual for all purposes of the Income Tax Acts.[64]

It is suggested that s.721(3B) has not altered this.

29.10.2 *Person abroad with independent source of income*

Suppose:

(1) T transfers assets to an offshore company.

(2) The offshore company has two sources of income:

---

59 A narrow exception: see 29.10.3 (Amount of charge when enjoyment condition C applies).

60 See R.S. Boyd "Requiem for a Man of Straw" [1980] BTR 442. See also 28.13 (Capital receipts deemed to be income) and 28.14 (The amount of income of person abroad).

61 eg if T transfers assets to a company in which T holds debentures. If all the income of the company increases the value of the debentures just a little, T has "power to enjoy" all the income within enjoyment condition B.

62 eg if T has control within enjoyment condition E.

63 *Howard de Walden v IRC* 25 TC 121.

64 *Congreve v IRC* 30 TC 163 at p.199.

(a) income from the assets transferred by T;
(b) income from other sources which have nothing to do with T.

(3) T has power to enjoy all the income of the offshore company.

What income is treated as arising to the individual. Is it any income of the person abroad? Or is it only the income which arises as a result of the transfer of assets or associated operations?

The relevant provisions are in s.721:

> (1) Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A to C are met.
> (2) Condition A is that the individual has power in the tax year to enjoy income of a person abroad as a result of—
> (a) a relevant transfer,
> (b) one or more associated operations, or
> (c) a relevant transfer and one or more associated operations...
> (3B) The amount of the income treated as arising under subsection (1) is equal to the amount of the income of the person abroad (subject to sections 724 and 725).

RI 201 states:

> It has not been determined by the Courts whether all the income of the overseas person should be assessed, or only the income of that person to the extent that it arose by virtue or in consequence of the relevant transfer of assets and any associated operation(s). It has been the Revenue's practice (since the decision in *Vestey v IRC* 54 TC 503) to assess on the second of these two possible bases.

The Revenue practice is correct, though in fact the issue has been determined by the Courts: the view that all the income of the person abroad is taxed was dismissed as "quite ridiculous".[65]

This view is supported by s.714(2) ITA which provides:

> The charges apply only if a relevant transfer occurs, and they operate by reference to income of a person abroad that is connected with the transfer or another relevant transaction.

This clearly rejects the view that all income of the person abroad is caught.

---

65 Walton J in vehement form in *Vestey v IRC* 54 TC 503 at p.562, followed in *Carvill v IRC* [2000] STC (SCD) 143 at [97] - [98]. The point had been left open in *Howard de Walden v IRC* 25 TC 119.

It suggests however that the measure of income caught is not that which arises as a *result* of the relevant transfer or associated operation, it is income which arises that is *connected* with the transfer or associated operation. "Connected" is not defined. However, while the wording was perhaps designed to give HMRC scope to take one step back from the position stated in RI 201, I cannot think of a case where it would arise in practice.

It is suggested that s.721(3B) has not altered this. The reference to "the income of the person abroad" must be taken as a reference to the income within s.721(2).

29.10.3 *Amount of charge when enjoyment condition C applies*

A special rule applies for a transfer who has power to enjoy under enjoyment condition C.[66] Section 724 ITA provides:

> (1) This section applies if an individual has power to enjoy income of a person abroad for the purposes of section 721 because of receiving any such benefit as is referred to in section 723(3) (benefit provided out of income of person abroad).
> (2) Despite anything in section 720, the individual is liable to income tax under that section for the tax year in which the benefit is received on an amount equal to the whole of the amount or value of that benefit.
> (3) But subsection (2) does not apply so far as it is shown that the benefit derives directly or indirectly from income by reference to which the individual has already been charged to income tax for that tax year or a previous tax year under this Chapter.

This was introduced in 1969 and upsets the reasoning of *de Walden* where repayment of a loan was held to fall within enjoyment condition C. Since the charge is now on the value of the benefit, and the value of a payment for full consideration (such as the repayment of a loan) is nil, there would be no charge under s.720 by reference to enjoyment condition C.

In *Botnar* the Special Commissioners said:

> 245. ... Where the power to enjoy arises the tax is charged not on the income which the taxpayer has power to enjoy but on the value of the benefit. This may bear no relationship whatsoever to the income of the non-resident as long as it originated from it even indirectly. We do not accept that [s.724 ITA] only operates where the benefit received in a

66 See 29.6.5 (Enjoyment Condition C: individual receives benefit).

year exceeds the relevant income.

It is considered that the charge is on the lower of the value of the benefit and the amount of income of the person abroad. The value of a benefit in excess of the income does not come into charge, and if the transferor has power to enjoy the income apart from enjoyment condition C, then this provision does not apply.[67]

The ToA draft guidance provides:

> **INTM600980 Special rule where benefit provided out of income of person abroad**
> This provision [Section 724 ITA] was considered in the case of *CIR v Botnar* (72 TC 205). Although it did not affect the outcome in that case, there is some helpful comment on it. The views expressed there appear to confirm that in the case of actual receipt of a benefit (as opposed to mere entitlement to receive) the provision is determinative of the charge to tax which could produce a radically different result than what might otherwise be the charge under the income charge. Further that where the power to enjoy arises on this basis the tax is charged not on the income which the individual has power to enjoy but on the value of the benefit. This may bear no relationship whatsoever to the income of the person abroad as long as it originated from it even indirectly. The Commissioner rejected the view that the provision only operates where the benefit received in a year exceeds the income of the person abroad. From this it seems clear that where the conditions are met the provision could have the effect of either extending the amount of charge for the tax year beyond the actual income of the person abroad of that year or of limiting the amount of the charge to the amount or value of the benefit where that is less than the income of the person abroad of the tax year.

29.10.4 *Transferor's deductions and reliefs*

Section 746 ITA provides:

> (1) This section applies for the purpose of calculating the liability to income tax of an individual charged under section 720 or 727.
> (2) For the purpose of determining the deductions and reliefs allowed to the individual, the individual is to be treated as if the individual had actually received the amount by reference to which the income treated

67 See Venables, "Section 739 and benefits in kind", OTPR Vol 11 Issue 3 p.1, accessible *http://www.khpplc.co.uk/reviews*

as arising to the individual under section 721 or 728 is determined.

This is needed (at least from 2013/14) to confer tax credits on the transferor, where the income of the person abroad is dividend income.

29.11 Transferor receives capital sum

Sections 727 and 728 ITA must be read together:

> **727 Charge to tax on income treated as arising under section 728**
> (1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are UK resident by means of relevant transfers.
> (2) Income tax is charged on income treated as arising to such an individual under section 728 (individuals receiving capital sums as a result of relevant transactions).
> (3) Tax is charged under this section on the amount of income treated as arising in the tax year. ...
> (4) The person liable for any tax charged under this section is the individual to whom the income is treated as arising. ...
> **728 Individuals receiving capital sums as a result of relevant transactions**
> (1) Income is treated as arising to such an individual as is referred to in section 727(1) in a tax year for income tax purposes if—
> (a) income has become the income of a person abroad as a result of—
> (i) a relevant transfer,
> (ii) one or more associated operations, or
> (iii) a relevant transfer and one or more associated operations, and
> (b) the capital receipt conditions are met in respect of the individual in the tax year (see section 729) , and
> (c) the individual is UK resident for the tax year.
> (1A) The amount of the income treated as arising under subsection (1) is equal to the amount of the income of the person abroad (subject to subsection (2))...
> (2A) Subsection (1) does not apply if—
> (a) the individual is liable for income tax charged on the income of the person abroad by virtue of a charge not contained in this Chapter, and
> (b) all that income tax has been paid...

Section 727 ITA is an independent charging section. Lord Greene explains its purpose in *Howard de Walden v IRC* 25 TC at p.135:

> The provision was made ... to meet devices by which a transferor took care to give himself no "power to enjoy" any income of a non-resident transferee company within the meaning of [s.723 ITA], but obtained the money he required, for example, by borrowing from the company, all the shares being vested (for example) in his children.

Another example would be a non-resident trust or underlying company making an (arm's length) loan to a transferor who was excluded from benefit.

Many of the rules applying to s.720 also apply to s.727. In ITA they are set out twice, but I do not discuss them again here. In particular, the words "such an individual" in s.727(2) restrict the charge to the transferor (just as s.720).

Where the settlor receives a capital sum, it is also necessary to consider the settlor-interested trust rules: see 27.11 (Settlor receives capital sum).

29.11.1 *Nature of s.727 charge*

ITA EN Change 111 provides:

> Section 739(3) ICTA [now s.727] does not deem the capital sum to be income; instead, it takes income which has become payable to persons abroad as a result of the transfer and deems that income to be the transferor's.

In *Vestey v IRC* 54 TC 503, Lord Wilberforce said:

> It is "any income" of the foreign transferees which is deemed to be the income of the recipient of a capital sum, [*indeed of each and every recipient of any capital sum*,][68] small or large, whenever received. From these words there is no escape.

29.11.2 *Relationship of s.720 and s.727*

The ToA draft guidance provides:

> **INTM600680 General conditions Which charge applies?**
> It is possible that for the same tax year an individual could meet the conditions to be potentially chargeable under either of the income charge provisions. The 'no duplication of charge' provisions described at INTM602360 ensure that the same income cannot be taken into account more than once for the purpose of an income charge. The result

68 The words in italics are wrong since s.727 is limited to the transferor.

> would be that if the conditions for both charges were in fact met, only one charge would be made.

This was the case even before the double counting rule was enacted in 1981:

> [Sections 720 and 727 ITA] are ... concurrent and not cumulative. A person cannot be taxed in any one year on the same sum under both [s.720 and also s.727]. Like Warren Hastings, the Crown, in making this concession, doubtless stood amazed at its own moderation ... but make it it did.[69]

In practice it is rare for s.727 to apply in a case where s.720 does not, that is, the transferor receives a capital sum without having power to enjoy. So it is rare to have to look at s.727.

29.12 The capital receipt conditions

Section 729(1) ITA provides:

> For the purposes of section 728(1), the capital receipt conditions are met in respect of the individual in a tax year ("the relevant year") if—
>
> (a) either—
>
> (i) in the relevant year the individual receives or is entitled to receive any capital sum, whether before or after the relevant transfer, or
>
> (ii) in any earlier tax year the individual has received any capital sum, whether before or after the relevant transfer, and
>
> (b) the payment of that sum is (or, in the case of an entitlement, would be) in any way connected with any relevant transaction.

29.12.1 *"Receives or is entitled to receive"*

"Receives or is entitled to receive" is given an artificial meaning in s.729(4) ITA:

> For the purposes of subsection (1), a sum is treated as a capital sum which the individual ("A") receives or is entitled to receive if another person receives or is entitled to receive it—
>
> (a) at A's direction, or
>
> (b) as a result of the assignment by A of A's right to receive it.

---

69 *Vestey v IRC* 54 TC 503 at p.556.

It is considered that a person is not "entitled to receive" a sum until it is due; so if a transferor lends on terms that the loan is repayable on a fixed date, the capital receipt condition is not met before that date.[70] But if the debt is repayable on demand, the transferor is entitled to receive it even if they have not formally demanded it: the notice of demand is a merely administrative matter.

The ToA draft guidance provides:

> **INTM601040 Meaning of 'capital sum'**
> ... This might include, for example, a situation whereby an individual is able to direct an overseas person to make a payment to one of his creditors; or, is able to direct that a loan be made to a third party. The payments being 'capital' in nature may amount to a capital sum for the purpose of this test.

29.12.2 *"Capital sum"*

"Capital sum" is artificially defined. Section 729(3) ITA provides:

> In subsection (1) "capital sum" means—
> (a) any sum paid or payable by way of loan or repayment of a loan, and
> (b) any other sum paid or payable—
> (i) otherwise than as income, and
> (ii) not for full consideration in money or money's worth.

If T lends, repayment of the loan to T is a capital sum. If T sells an asset at market value, payment of the purchase price to T is not a capital sum. The distinction between a loan and a sale is therefore important. "Loan" is a fairly narrow term and does not include the right to an unpaid purchase price even if the purchase price is left outstanding: *Ramsden v IRC* 37 TC 619.

In *Botnar v IRC* 72 TC 205 at p.266 the Special Commissioners say:

> In our judgment the entitlement to use the flat is not a capital sum within the definition in [s.729(3)]; in particular we hold that the entitlement to use was not a "sum" within any normal use of English.

---

70 So in the definition of control, express provision is needed to deal with this; see 85.3.9 ("Entitled to acquire"). But enjoyment condition B also needs consideration in these cases: See 29.6.4 (Enjoyment condition B: income increases value of T's asset).

The ToA draft guidance provides:

> **INTM601060 examples of capital sum**
> ...Other examples might include:-
> e. The situation where an asset is transferred to a person abroad at an inflated price. Where an individual transfers an asset and receives full consideration in money or money's worth even though by general nature that consideration may be a 'capital' receipt it would not be a 'capital sum' for the purpose of these provisions because of the specific wording in the legislation defining the meaning of the term for this purpose. Hence it is only where an inflated price is received that there could be a capital sum for this purpose.
> f. A capital distribution from a foreign company. A foreign company may, under the law of the jurisdiction in which it is established, be able to make a so-called 'capital distribution'. Where such a distribution received by the individual is found in fact not to be an income receipt, and so satisfies the condition to be any other sum payable otherwise than as income, it can be a capital sum for this purpose. In considering whether any such payment or entitlement from a 'foreign possession' (the share holding that results in the payment) is a capital sum due regard must be had to United Kingdom tax law dealing with 'income' from foreign possessions.
> The following are examples of situations where there may not be a capital sum for the purpose of this charge.
> g. If an individual transfers assets to a person abroad for full consideration and leaves the cost of the assets credited to his account with that person, the unpaid purchase money will not normally be regarded as a loan following the decision in *Ramsden v CIR* (37 TC 619).
>
> However although the capital sum test may not be met for the purpose of this income charge, the presence of an account with a person abroad to which sums are credited may be indicative of that individual having the power to enjoy income for example (as in the Ramsden case) through [enjoyment] Condition B.
> h. Where promissory notes or debentures payable on demand are issued to the individual as part of the consideration for the transfer of assets the amount payable under the notes, not being payable by way of loan, and being payable for full consideration is unlikely to be a capital sum for this purpose, as was found in the case of *Lee v CIR* (24 TC 207).
>
> However as discussed at INTM600900 such an issue of promissory notes may give rise to a power to enjoy the income of the person abroad and bring the individual within that income charge.

29.12.3 *"Connected with any relevant transaction"*

In *Fynn v IRC* 37 TC 629:

(1) In 1948, T transferred assets ("the original assets") to an Irish company ("the original transfer").
(2) The company charged the assets for a debt ("the charge").
(3) In Jan 1952, T lent the company £12,000 ("T's loan").

The Revenue assessed T on the income accruing to the company in 1951/2 and 1952/3 under (what is now) s.727.[71]

During those years T was entitled to receive a capital sum (repayment of T's loan). However, the (hypothetical) payment of that sum would not be "in any way connected" with the original transfer or the charge (an operation associated with the original transfer). So the condition in s.729(1)(b) was not satisfied, ie, the capital receipt conditions were not satisfied.

Suppose the same facts but the loan were repaid out of the original assets. In that case T actually receives a capital sum, and the actual receipt is connected with the original transfer; so it is considered that the capital receipt condition would satisfied. (This did not happen in *Fynn*: T wisely released the loan, two years after it was made.)

This is the only use of the expression "connected with" in the ToA provisions (though the definition of associated operations uses the comparable expression "in relation to" and it is suggested that the meaning is the same). "Connected with" is of course an expression used in other anti-avoidance provisions[72] but it is such a vague and context-sensitive expression that no useful guidance can be expected from cases on other provisions.

29.12.4 *Relief where transferor repays loan*

Section 729(2) ITA provides relief where the capital sum takes the form of a loan to the transferor which is repaid:

> But subsection (1)(a)(ii) does not apply merely because of the receipt of a sum by way of loan if the loan is wholly repaid before the relevant year begins.

---

71 These facts raise interesting s.720 issues, which were not discussed in the case; see 29.7 (Power to enjoy: causation condition).

72 For instance, the transactions in securities provisions.

29.13 Time extent of s.727 charge

29.13.1 *Historic income*

It can happen that at one time the capital receipt conditions are not satisfied, and later they become satisfied. The common example would be if the person abroad makes a loan to the transferor who is otherwise excluded from benefit: until the loan is made the transferor may not have received (or been entitled to receive) a capital sum); but on making the loan, the transferor does receive a capital sum so the capital receipt conditions become satisfied at that time.

A transferor who receives a capital sum in this way is not taxed on income arising to the person abroad in a year before the year that the capital receipt conditions are satisfied ("historic income"). Section 727 is not in that sense retrospective:

> While the income of the non-resident trustees would be deemed to be the income of [the taxpayer] on her receipt of the £100,000 [capital sum] on 2 May 1966, *in that and subsequent financial years*, I see nothing in [s.727] which gives it retrospective effect. It does not provide that the income of the non-resident in any year before the person receives or is entitled to receive is to be deemed to be that person's income.[73]

HMRC agree. The ToA draft guidance provides:

> **INTM600660 receipt of/entitlement to capital sum**
> ... It should be noted that no liability can arise under this charge for a tax year before receipt or entitlement to a capital sum. But where there is such a receipt or entitlement liability continues for any subsequent year for which there is income (there need be no further receipt of a capital sum). If, however, entitlement to a capital sum completely ends, and there are no other grounds for an income charge, liability under this charge will not normally be extended beyond the tax year in which that entitlement ceases.
> Where this charge applies for the first time it is the whole of any income of the tax year that is potentially chargeable not merely income arising from the date of receipt or entitlement to the capital sum. This is also the case for any tax year where the entitlement to the capital sum ends; the whole of any income of the tax year is potentially chargeable.

---

73 *Vestey v IRC* 54 TC 503 at p.594.

An alternative view is that s.727 could apply so that the historic income should retrospectively be deemed to be income of the transferor in the year that the income actually arose. That seems unworkable: it would require an unlimited number of past years to be reopened.

Another possible view that s.727 could apply so that the historic income should be deemed to be the income of the transferor in the year of the receipt of the capital sum. That would still require all the past years of the person abroad to be reviewed. There is also the conundrum of how to treat income arising to the person abroad if the transferor was not UK resident during some of those years.

This explains why the capital receipt conditions are satisfied if a transferor is entitled to receive a capital sum, even though they have not actually received it. The application of s.727 makes sense here because on the subsequent receipt of the capital sum the historic income would not otherwise be caught.

29.13.2 *Present and future income*

The s.727 charge applies to income arising in the year in which the capital receipt condition is met. However once that condition is met in one year, it is generally met in all future years, so s.727 in principle applies to the income of the person abroad in the year that the capital receipt condition is first met and all future years.

There are two narrow exceptions to this rule. The first relates to loans to the transferor which the transferor has repaid.[74] The second is this: The capital receipt condition in s.729(1) (so far as relevant) requires that:

> either—
>
> (i) in the relevant year the individual receives or is entitled to receive any capital sum, whether before or after the relevant transfer, or
>
> (ii) in any earlier tax year the individual has received any capital sum, whether before or after the relevant transfer

The condition in (a) is satisfied in a year if the individual receives *or is entitled to receive* a capital sum in that year. The condition is satisfied in a year if the individual received a capital sum in an earlier year.

The condition is not satisfied if:

---

74 See 29.12.4 (Relief where transferor repays loan).

(1) the individual was entitled to receive a capital sum in an earlier year but
(2) the entitlement has ceased[75] and the individual did not actually receive anything.

This was deliberate. ITA EN Change 111 provides:

> But the wording of section 739(3) of ICTA [now s.727] leaves the timing of the charge rather unclear. It reads:
>
> > Where, whether before or after any such transfer, such an individual receives or is entitled to receive any capital sum …
>
> Section 739(6) ICTA [now s.729(2) ITA] provides that income is not deemed to be the individual's under section [727] for any tax year "by reason only of his having received a sum by way of loan if that sum has been wholly repaid before the beginning of that year".[76] Therefore income may be deemed to be the individual's in other cases where there has been an actual receipt of a capital sum in a previous tax year. But [the source legislation] makes no provision about whether section [727] imposes a charge if the individual was merely entitled to receive a capital sum in a previous tax year. In practice, where entitlement to a capital sum has ceased HMRC do not pursue further liability under section [727]. Section 729 ITA gives effect to this practice by providing that the individual must either receive or be entitled to receive a capital sum in the tax year or have received a capital sum in an earlier tax year.

However it must be rare that a transferor is entitled to receive a capital sum without ever receiving a capital sum. An example would be if a transferor lent money to the person abroad and later waived the right to repayment.

In general, therefore, the capital receipt conditions are met in a year if the transferor has received a capital sum in an earlier year. This raises the spectre of a transferor being taxed for all time because they have received a small capital sum. Suppose:

(1) A company under which the transferor has power to enjoy, and under which they are taxed under s.720 ITA.
(2) The transferor receives a capital sum. This does not give rise to any (or any additional) charge under s.727 since all the income is taxed as the transferor's anyway.

---

75 An assignment by the transferor does not count: see 29.12.1 ("Receives or is entitled to receive").

76 See 29.12.4 (Relief where transferor repays loan).

(3) The transferor is then excluded from benefit and ceases to have power to enjoy.

It has been suggested in these circumstances that all future income arising in the company will be deemed to be that of the unfortunate transferor. The same point would apply to a non-resident trust if a capital sum was paid to the settlor, even though the settlor was subsequently excluded from benefit and ceased to be liable under the IT settlor-interested trust provisions. That would be absurd. For good measure, the overlap with s.633 ITTOIA would also lead to a double charge. In practice HMRC do not take that point. It is suggested that s.727 does not normally apply in a situation where s.720 applies, so a capital sum received at that time should be disregarded. A court would no doubt look at the matter differently if there were arrangements under which the transferor effectively enjoyed the income of future years.

The same problem arises if:

(1) Trustees hold a company under which the transferor has power to enjoy, and under which they are taxed under s.720 ITA.
(2) The transferor receives a capital sum.
(3) The trustees then sell the company to a third party.

It has been suggested that all future income arising in the company will be deemed to be that of the unfortunate transferor (though they may not have any right to know from the purchaser what that income will be). That would be absurd. In practice HMRC do not take that point. It is suggested that s.727 does not normally apply in this situation. A court would no doubt look at the matter differently if there were arrangements under which the transferor effectively enjoyed the company's future income.

Walton J proposed a sensible solution to this conundrum. He said in *Vestey* that the charge under s.727 was limited to the amount of the capital sum. Unfortunately his view was rejected by two judges in the House of Lords who commented on the point.[77] However it remains arguable, as the comments in *Vestey* were obiter, the approach to statutory construction is now looser, and the problems which arise were not explored. The disproportionate nature of the rules on any other view would constitute a breach of EU law, and an EU compliant construction should be preferred.

The ToA draft guidance provides a straightforward example of a loan from the person abroad to the individual:

---

77 See the comment of Lord Wilberforce set out in 29.11.1 (Nature of s.727 charge).

> **INTM601040 Meaning of 'capital sum'**
> ... Example
> In years 1 to 4 income arises to a person abroad as a result of a relevant transfer by an individual A. The individual does not have any power to enjoy the income or entitlement to a capital sum; but in year 2 receives a loan. In year 3 the loan is repaid in full and there is no ongoing entitlement to further loans or other capital sums.
> In these circumstances there would be an income charge in years 2 and 3. There would also be ongoing charge for year 4 because of the terms of (a)(ii) in INTM601020 but for the proviso above relating to repayment of a loan where that is in effect the only feature that triggers the income charge - receipt of/entitlement to capital sums.

The TOA draft guidance then considers the position of a loan from the individual to the person abroad:

> ... Not only is the receipt of a loan by the individual a capital sum, the making of a loan by the individual to a person abroad can also satisfy this meaning, carrying as it does an entitlement to repayment. That entitlement would be entitlement to a capital sum and thus the condition would be met from the time that the loan is made to the person abroad. Any repayment of such a loan would itself be a capital sum, it is not however itself a loan and thus will not stop the income charge from running under the proviso described in the first paragraph above. In order to stop this income charge from continuing the individual would need to demonstrate that there was no ongoing entitlement of any description to a capital sum.

29.14 Section 720 remittance basis

Section 726 ITA provides a relief which I call "**the s.720 remittance basis**". Section 726(1) provides:

> This section applies in relation to income treated under section 721 as arising to an individual in a tax year ("the deemed income") if section 809B, 809D or 809E (remittance basis) applies to the individual for that year.

In short, the relief applies to remittance basis taxpayers. Section 726(2) ITA defines the term "foreign" deemed income:

> For the purposes of this section the deemed income is "foreign" if (and to the corresponding extent that) the income mentioned in section 721(2) would be relevant foreign income if it were the individual's.

"The income mentioned in s.721(2)" is the income of the person abroad (or that part over which the individual has power of enjoyment). Section 726(3) ITA provides the relief:

> Treat the foreign deemed income as relevant foreign income of the individual.

In the HMRC view s.720 income is fictional income distinct from the actual income of the person abroad. Since fictional income cannot be remitted, the remittance basis would not work. So s.726(4) ITA provides:

> For the purposes of chapter A1 of part 14 (remittance basis), treat so much of the income within section 721(2) as would be relevant foreign income if it were the individual's as deriving from the foreign deemed income.

In short, the remittance basis applies as if the income accruing to the person abroad were the income of the transferor. There is a tax charge if the income of the person abroad is received/brought/used in the UK by the transferor or by a relevant person (in relation to the transferor).

It is desirable for trusts and companies within s.720 to segregate (1) foreign income and (2) capital. They can then remit capital (IT-free) rather than income (chargeable at IT rates). If they fail to do so then the mixed fund rules will apply.

29.14.1 *Remittance during overseas part of split year*

Section 726(5) ITA provides:

> In the application of section 832 of ITTOIA 2005 to the foreign deemed income, subsection (2) of that section has effect with the omission of paragraph (b).

To see the significance of this we need to turn to s.832(2) ITTOIA:

> For any tax year for which the individual is UK resident, income tax is charged on the full amount of so much (if any) of the relevant foreign income as is remitted to the UK—
>
> (a) in that year, or
>
> *(b) in the UK part of that year, if that year is a split year as respects the individual.*

The significance is that (contrary to the usual rule) s.720 income is taxable if it is remitted during the overseas part of a split year. There is no good

reason for that. It is considered that the s.720 and s.731 remittance bases ought to operate in the same way as for ordinary foreign income.

29.14.2 *Payment of s.720 income to transferor while non-resident*

Suppose:

(1) Year 1: Income accrues to a company within s.720. The transferor ("T") receives s.720 income but that income is (un)taxed under the s.720 remittance basis.
(2) Year 2:
    (a) T becomes non-resident.
    (b) The company distributes its income by way of dividend. T receives actual income (a dividend) but because this dividend is received in a non-resident year, it is not taxed either on receipt or when remitted to the UK.
(3) Year 3:
    (a) T becomes UK resident.
    (b) T remits that dividend to the UK.

The question is whether the dividend received in the UK in year 3 constitutes a remittance of the s.720 income of year 1. Is the dividend which the individual received derived from the s.720 income. The answer is that the dividend received is derived from the income of the person abroad, and so is taxable on receipt in the UK in year 3.[78]

The position is no better if T remits the dividend in year 2, as this is in principle caught by the temporary non-residence rules.

In short, one cannot "wash" income taxable on the s.720 remittance basis by a distribution to T in a year of T's temporary non-residence. That view fits the object of s.720 which is to put the transferor in the same position as if they had not made the transfer: see *Chetwode v IRC* 51 TC 647.

29.14.3 *Pre-2008 s.720 income and transitional rules*

In the following discussion I use the term **"pre-2008 s.720 income"** to mean foreign income arising before 6 April 2008, which

(1) fell within s.720 ITA or its predecessor, s.739 ICTA, but
(2) qualified for relief under s.726 (in its 2007/08 form), or its predecessor, s.743(3) ICTA, a kind of remittance basis which in

78 See s.726(4). This seems even clearer if one remembers that distribution relief would be available, had the dividend in fact been taxable; see 31.4 (Distribution relief).

earlier editions of this work I called "the foreign domicile defence." There was no tax charge when the income arose if it was not received in the UK.

Before 2008/09 it is considered that there was no charge under these sections if such income was received outside the UK but later brought to the UK. This was so whether the income was brought to the UK by:

(1) the person abroad who received it; or
(2) the transferor (if they received the income outside the UK from the person abroad).[79]

Para 170 Schedule 7 FA 2008 provides:

> The amendments made by paras 161 to 179 have effect for the tax year 2008-09 and subsequent tax years.

Pre-2008 s.720 income remitted after 2008/09 is not caught by s.726 in its current form, as the condition in s.726(1)(a) is not met.[80] So there is still no charge on the remittance of pre-2008 s.720 income. This is right and fair, since there was no charge on remittance before 2008. However (given the retrospective operation of some other 2008 reforms) this may have been an oversight. A passage in the TAH suggests its author thought that pre-2008 s.720 income is taxable on remittance after 6 April 2008.[81] But it seems to me that this is clearly wrong.

---

79 See *Taxation of Foreign Domiciliaries* 6th edn para 16.14 (s.720 foreign domicile defence). There were good reasons for this: see *Taxation of Foreign Domiciliaries* 6th edn para 14.12 (Critique of s.648 clawback). Needless to say, no reason was given for changing the position.

80 Contrast the usual RFI remittance basis, where para 83 Sch 7 FA 2008 fills that gap: see 10.15.1 (Transitional rules for pre-2008 RFI/gains).

81 TAH para 1224 provides:
"The provisions described in TAH 1223 [including the current s.720 remittance basis] have effect for the tax year 2008-09 and subsequent years. There are no specific transitional arrangements for introduction of the new provisions. As the [s.720] income charge only looks at income arising to the person abroad in the tax year it should not be necessary to have regard to income of earlier years in determining whether there is an amount that is to be regarded as foreign deemed income. However if there is foreign deemed income then in considering any possible charge under Part 8 ITTOIA it will be appropriate to consider all sums remitted to the UK in the tax year even if they arise, for example, from income of periods prior to the introduction of these provisions. Those remittances will fall to be tested against the rules in Chapter A1 Part 14 ITA 2007 as to whether they are taxable remittances."

29.14.4 *s.720 income of years 2005/06 to 2007/08: HMRC view*

In the following discussion I use the term "**2005-2008 s.720 income**" to mean foreign income arising in the years 2005/6 to 2007/8 (inclusive), which fell within (what was then) s.739 ICTA.

TAH para 1222 records the bizarre view that ITTOIA absent-mindedly abolished the foreign domicile defence, formerly in s.743(3) ICTA, so that 2005-2008 s.720 income was always charged on an arising basis:

> Following the tax law rewrite [ITTOIA] new and separate charging provisions were introduced for all types of foreign income replacing the general charge under what was Case IV/V of Schedule D. The new provisions, included in ITTOIA, also provided, on a claim, an alternative basis for calculating certain income categorised as 'relevant foreign income' and the amount on which an individual would be taxed.
>
> From the introduction of ITTOIA non-UK domicile status could impact this relevant foreign income and resulted broadly speaking in the income subject to the claim being taxed only when received in the UK.
>
> Apart from minor adjustments consequential upon the introduction of ITTOIA the transfer of assets provisions giving exclusion from charge for certain income of non-UK domiciled individuals remained largely unchanged. However the exclusion [s.743(3) ICTA] was only for income that would not be chargeable to tax on the basis of domicile status alone. It could be argued that following the new charging provisions brought into effect by ITTOIA, which carried no distinction on the basis of domicile, that from 6 April 2005 there was no such income that fell to be excluded on the basis of domicile under the transfer of assets provisions.

I have not come across any reference to this argument before the publication of the TAH in 2009, nor do HMRC say expressly whether they regard it as correct. I find it hard to imagine that anyone could take the argument seriously. But in practice the point is academic as HMRC will not usually take any notice of it:

> However the introduction of ITTOIA was not intended to change the law under transfer of assets in this way and as a result HMRC continues to operate the income charge provisions in this interim period in the same way that they were operated prior to April 2005, subject to cases where there appears to be manipulation of the interaction of the new provisions. Where you identify a case that appears to involve manipulation refer it to the Transfer of Assets Technical Adviser in CAR (Residency) Offshore Personal Tax Team.

If the argument were actually right, so 2005-2008 s.720 income was by

law taxed on an arising basis, without any foreign domicile defence, then HMRC could not of course assess the income in a subsequent year when it was remitted. They could only assess it in the year that it arose. One could envisage circumstances when taxpayers would want to raise the argument. Similar issues would arise in relation to the s.624 remittance basis. However I doubt if these wider ramifications of the argument will ever need to be considered.

ToA draft guidance provides:

> **INTM602000 Non-UK domiciled individuals: The position between 6 April 2005 and 5 April 2008**
> The approach that will therefore be taken in this period will generally be that described in Examples 1 and 2 at INTM601980

29.15 Interaction with s.624 (and other anti-avoidance provisions?)

Section 721(3C) ITA provides:

> Subsection (1) does not apply if—
> (a) the individual is liable for income tax charged on the income of the person abroad by virtue of a charge not contained in this Chapter, and
> (b) all that income tax has been paid.

Thus s.624 has priority over s.720. That matters as s.624 confers an indemnity, which s.720 does not.

Although the provision refers to any "charge not contained in this Chapter" I cannot think of any case to which it could apply, apart from s.624.

Previously s.720 was simply described as overlapping with other anti-avoidance provisions.[82]

29.16 No indemnity for transferor

The transferor has no express statutory indemnity against the person abroad for tax paid under s.720. It is considered that no indemnity can be implied.

29.17 Tax return: Disclosure of s.720 income

S.720 income is returned in Boxes 10-13 in the Foreign pages (form

82 *McGuckian v IRC* 69 TC 1.

SA106) 2013/14. SA106 Notes 2013/14 provides:

> ***Dividends and all other income received by a person abroad***
> **Boxes 10 to 13**
> If you have transferred, or taken any part in the transfer of assets, as a result of which income has become payable to a person abroad, you may need to complete these boxes. All items chargeable as income under the transfer of assets provisions should be entered in this section only. Helpsheet 262 *Income and benefits from transfers of assets abroad and income from non-resident trusts* has more details on how you complete these boxes.

Helpsheet 262 (Income and benefits from transfers of assets abroad and income from non-resident trusts - 2013/14) provides:

> **How do you report the income?**
> Unless you are completing box 46 on page F 6 of the Foreign pages[83] ... report the amount of income as follows:
> - enter in box 11 on page F 3 of the Foreign pages details of all dividends received on which you are chargeable including any allowable UK or foreign tax credit
> - enter in box 13 on page F 3 of the Foreign pages all other income including any tax paid on that income.
>
> You should enter details of the relevant transactions that have given rise to the income, and the offshore structures involved, in the 'Any other information' box, box 19 on page TR 7 of your tax return.
> You should enter all income that is chargeable to tax under the transfer of assets provisions at boxes 11 and 13 of the Foreign pages not in the corresponding boxes elsewhere in the return for the type of income involved. For example, if interest income arose to a foreign company and that income is treated as yours under the transfer of assets provisions, then you should enter the income at box 13 not in the relevant boxes for interest. If you are non-UK domiciled then you may not have to enter all of the income if some of the income arising to the person abroad is from a source outside the UK and not remitted to the UK. See 'How do you report income or benefits if you are non-UK domiciled?' on page 6.

This reflects the rule that s.720 income is distinct from the income of the person abroad.

I do not see what box 10 is for. Perhaps it is a mistake from amending the 2009/10 version of the form.

Chapter **Page**

CHAPTER THIRTY

TRANSFER OF ASSETS ABROAD: NON-TRANSFERORS

30.1 Non-transferors: Introduction and terminology

This chapter considers the IT charge on non-transferors, ie beneficiaries other than the transferor, who receive benefits from non-resident entities.

Section 731 ITA imposes the charge to tax:

> (1) Income tax is charged on income treated as arising to an individual under section 732 (non-transferors receiving a benefit as a result of relevant transactions).
> (2) Tax is charged under this section on the amount of income treated as arising for the tax year. ...
> (3) The person liable for any tax charged under this section is the individual to whom the income is treated as arising. ...

In this book:

"The s.731 charge" is the charge under this section. The ToA guidance calls this "the benefits charge".

"s.731 income" is the income treated as arising to an individual under s.732. (It might be called "s.732 deemed income" but the charge is under s.731.)

The charge applies if income is treated as arising under s.732, to which we must turn as the second stage of our journey. Section 732(1) ITA sets out five sets of conditions. I refer to them as **"the fundamental s.731 conditions"**. They are as follows:

> *(a) a relevant transfer occurs.*

I refer to this as **"the relevant transfer condition"**.

> *(b) an individual who is UK resident for a tax year receives a benefit in that tax year.*

his contains two aspects, the receipt of a benefit and residence. So far as the residence aspects are concerned, I refer to this as **"the 731 residence condition"**.

> *(c) the benefit is provided out of assets which are available for the purpose as a result of—*
> *(i) the transfer, or*
> *(ii) one or more associated operations.*

I refer to this as **"the benefit causation condition"**.

> *(d) the individual is not liable to income tax under section 720 or 727 by reference to the transfer and would not be so liable if the effect of sections 726 and 730 were ignored.*

I refer to this as **"the transferor's s.731 defence"**.

> *(e) the individual is not liable to income tax on the amount or value of the benefit (apart from section 731).*

I refer to this as **"the s.731 capital condition"**.

Where there is a relevant transfer to a trust or company, and the motive defence and ss.720 and 727 do not apply, I describe this trust or company as being **"within section 731"**.

If all five fundamental conditions are satisfied one moves on to s.732(2) ITA:

> Income is treated as arising to the individual for income tax purposes for any tax year for which section 733 provides that income arises.

The third stage is to compute the amount of income treated as arising: this is dealt with in s.733 ITA (and s.734).

Lastly, there are some defences to the charge: in particular the s.731 remittance basis and the motive defence.

30.2 Relevant transfer condition

The first fundamental s.731 condition is the relevant transfer condition. Section 732(1) ITA provides:

> This section applies if—
> (a) a relevant transfer[1] occurs,

1 See 28.2 ("Relevant transfer").

Despite the present tense ("occurs") this condition is met in a year if a relevant transfer occurred in an earlier year. Grammarians call this "the historic present".

30.3 S.731 residence condition

The second fundamental s.731 condition requires residence. Section 732(1) ITA provides:

> This section applies if ...
>
> (b) an individual who is UK resident for a tax year receives a benefit in that tax year,

If an individual receives a benefit in a year but is not resident for the year there is no charge under s.731 in relation to that benefit in that year.

What if B later becomes UK resident? Suppose:

(1) Year 1: B is not resident in the UK, but receives a benefit.

(3) Year 2: B becomes resident in the UK but receives no benefit in that year.

The fundamental condition in s.732(1)(b) is still not met in year 2: the individual must be resident for the year that they receive a benefit.

Residence at the time that relevant income arises is not in principle necessary. Suppose:

(1) Year 1: B is non resident and relevant income arises.

(2) Year 2: B is UK resident and receives a benefit.

The s.731 residence condition is satisfied so there is in principle a charge under s.731 by reference to the income of year 1.

Formerly the ToA rules only applied to a person who was *ordinarily* UK resident. The abolition of ordinary residence in 2013 lead to a significant extension of the rules. Until 2015/16, there is a transitional relief for non-transferors not ordinarily UK resident at 5 April 2013: see 4.30 (Ordinary residence).

30.3.1 *Split year*

There is no express split year rule, so the default rule applies: s.731 income is taxable even if it arises during the overseas part of a split year of the individual who receives a benefit.[2] There is no good reason for that. Section 731 income ought to be taxed in the same way as ordinary foreign

2 See 7.1 (Default rule: individual regarded as resident throughout tax year).

income.

30.4 Benefit

The second fundamental s.731 condition requires (in short) that the individual receives a benefit. Section 732(1) ITA provides:

> This section applies if ...
>
> (b) an individual who is UK resident for a tax year *receives a benefit* in that tax year.

The word benefit is very common in tax statutes and in other areas of law.[3] So there is plenty of material for discussion, though it is always necessary to consider the word in its context.

In this section I discuss the meaning of "benefit" for the purposes of s.731 and for the purposes of s.87 TCGA as the issues are (more or less) the same.

Similar issues arise in other contexts. It would be impossible to write a full list, but they include:

(1) Cases where there is a tax charge on the value of a benefit:
   (a) s.394 ITEPA (charge on benefit from retirement benefit scheme)
   (b) s.201 ITEPA (employment-related benefits)

(2) Cases where there is a tax charge if there is a possibility of "benefit" in any circumstances (regardless of its amount or value):
   (a) s.624 (settlor-interested trusts)
   (b) s.86 (settlor-interested trusts)
   (c) s.720 (power to enjoy)

There is (sensibly) no statutory definition of benefit for our purposes.[4] It is well established that "benefit" is a word of wide import.

For the benefit of funding a beneficiary's tax appeal, see 32.47 (Appeals).

30.4.1 *Arm's length transaction*

A transaction for which the individual gives full consideration is not a

---

3 For discussion of "benefit" in a trust law context see Kessler, *Drafting Trusts and Will Trusts* (12th ed., 2014), para 13.12 (What does a settlor exclusion clause cover?).

4 For completeness: The pre-ITA legislation stated that "benefit" included a payment of any kind: s.742(9)(c) ICTA. This had (more or less) no practical effect, and was sensibly omitted in the ITA rewrite.

benefit.[5] It does not matter if the other party is a connected person (eg a sale to or from a family trust or company).

What if the parties act at arm's length and have no gratuitous intent but owing to some mistake the individual gives less than full consideration? This is not a benefit.[6]

30.4.2 *Receipt or sale of equitable interest*

RI 201 states:

> For the purposes of [s.731 ITA] a benefit is treated as not including
> [1] either the giving[7] of a life interest to a beneficiary or
> [2] the receipt by a beneficiary of the proceeds of selling a life interest.

Point [1] (conferring a life interest) is not a benefit if the interest is revocable (or else the value of the benefit is nil). If the interest is not revocable, then its receipt is in the widest sense a benefit, but for tax purposes it should be regarded as a right to a future benefit, rather than a immediate benefit. To tax a "benefit" of this kind is clearly outside the scheme of the Act. Otherwise there would be a double charge, eg, when trustees appointed assets to a beneficiary contingently on attaining the age of 21 and again when the beneficiary reached 21 and became absolutely entitled.[8]

---

5 This is self-evident; but if authority is needed, see *IRC v Lactagol* 35 TC 230 and *Wilson v Clayton* 77 TC 1. For CGT the position is dealt with by statute, but only for the avoidance of doubt: see 51.6.4 (Arm's length transaction).

6 *Wilson v Clayton* 77 TC 1 decided that this is the case in the context of employment-related benefits. Note the reference to arm's length transactions in the passage from *Cooper* cited at 30.4.8 (Benefit to which a beneficiary becomes entitled under terms of trust); the same should apply for s.731.

7 "Giving" a life interest is informal, lay language. The term must refer to the conferring of a life interest by exercise of a power of appointment. Presumably it also includes the conferring of a life interest by exercise of a power of advancement or re-settlement.

8 The Special Commissioners reached this conclusion in the context of employment-related benefits: *Dextra Accessories v Macdonald* 77 TC 146 at [9]-[12]. The point was (rightly) not appealed. In the context of s.731, one could also reach the same conclusion by saying that the "benefit" (if there was one) was not "provided out" of trust assets. In the context of s.87 TCGA, one could reach the same conclusion by saying that the "benefit" (if there was on) is not "from the trustees". But the better analysis is simply that there is no "benefit" within the meaning of the charging provision.

Point [2] (receipt of proceeds of sale of a life interest) is outside the scope of s.731 because a sale at market value is not a "benefit" to the vendor, or because the value of the "benefit" (if there was one) is zero.[9] If the sale was for more than market value there is a benefit but the benefit is not provided out of trust assets so it is not within s.731.[10]

Although RI 201 refers to a life interest, the same reasoning must apply to the conferring of any type of interest under the settlement.

30.4.3 *Sale of company within s.731*

The same reasoning applies on the sale of shares or securities in a company within s.731. This leads to an interesting anomaly:

(1) B holds shares in a company which has accumulated relevant income within s.731. B sells the shares. No charge arises under s.731 as B does not receive a benefit (even when B spends the proceeds of sale).

(2) Trustees hold shares in a company which has accumulated relevant income. They sell the company. The sale proceeds represent the relevant income[11] and so if the trustees appoint the proceeds to B, B receives a benefit taxable under s.731.

30.4.4 *Interest-free loan and enjoyment of asset in kind*

RI 201 continues:

> But it ["benefit"] is otherwise treated as including all benefits taken into account in determining whether an individual has power to enjoy income for the purposes of [s.720 ITA]. It therefore includes for example receipt of a loan at less than a commercial rate of interest, and the use of trust property at less than an open market rental.

Interest-free loans and use of property at less than full rent are benefits: *Cooper v Billingham* 74 TC 139. On valuation of that benefit, see 30.7 (Valuation of benefits).

---

9 The drafter of FA 1984 Sch 14 para 5(4) reached the same conclusion for the purpose of (what is now) s.87 TCGA.

10 On a sale of an equitable interest, watch:
(1) CGT on the disposal of the interest; and
(2) Schedule 4A TCGA.

11 See 30.28 (Relevant income reinvested: tracing).

30.4.5 *Loan (not to life tenant): Interest paid at commercial rate*

A loan on commercial terms is not a benefit. That is clear on first principles, but if authority is needed, see *Vestey v IRC:*

> … a loan may well benefit a person even if it is made at a commercial rate of interest, as it may tide him over a difficult period, but I do not think that if money is so lent it is applied "for the benefit" of the debtor within [the forerunner of s 624].[12]

> I find it impossible to hold that a sum of money lent at a commercial rate of interest is "payable to or applicable for the benefit of" the borrower in the sense of this Section.[13]

A relatively simple way of avoiding a benefit (and hence avoiding s.731 and s.87) is:

(1) a trust makes a loan at a market rate of interest;
(2) if appropriate, provide the beneficiary with funds to pay the interest; and
(3) the beneficiary pays the interest.

Take care that the interest does not have a UK source.[14] The same may be done for the use of property in kind provided the property is not in the UK.

Similarly, repaying a loan is not a benefit.

30.4.6 *Loan (not to life tenant): Interest rolled up*

What if interest at a commercial rate is rolled up unpaid? There is no income tax charge on unpaid interest.[15] In principle there is still no benefit. However, if the intention is that the interest will never be paid, the provision for payment of interest is a sham and ineffective for tax purposes. There are many trust law issues: do the trustees have power to make the loan? Unwinding the arrangement after the death of the beneficiary needs careful thought.

30.4.7 *Interest-bearing loan to life tenant*

It is in general not possible to have an interest-bearing loan to a life tenant,

---

12 *Vestey's Executors v IRC* 31 TC 1 at p.114.

13 31 TC 1 at p.121.

14 See 18.5 (Interest: location of source).

15 *Girvan v Orange Personal Communications Services* 70 TC 602.

under a transparent *Baker*-type[16] trust, because a person cannot pay interest to himself. Accordingly one cannot avoid a charge on a benefit in kind by purporting to charge interest, whether the "interest" is purportedly paid[17] or purportedly rolled up.[18] It would be different if:

(1) interest was payable after the death of the life tenant;
(2) the loan was issued at a discount instead of at interest;
(3) the trustees had expenses which were met by the interest (so the interest was not paid to the life tenants).

There is a school of thought that maintains (to my mind over-optimistically) that interest-bearing loans to life tenants offer a solution to the problem of extracting trust funds free from s.731 and s.87. HMRC do not take that view.

30.4.8 *Benefit to which a beneficiary becomes entitled under terms of trust*

Suppose:

(1) A beneficiary is entitled to trust property absolutely subject to satisfying some contingency (eg attaining the age of 25).
(2) The contingency is satisfied (the beneficiary reaches 25 and becomes entitled to the trust property).

There is a "capital payment" for the purposes of s.87 TCGA: see s.97(2) TCGA.[19] There is no equivalent provision in the transfer of asset rules. However, it is considered that the beneficiary does receive a "benefit" and the value of the "benefit" is equal to the value of the trust property. The concepts of "value" and "benefit" can (just) be stretched to support this conclusion[20] and any other view would be inconsistent with the scheme of

---

16 It would be different if the trust was a non-transparent *Garland*-type trust. See 26.3 (Taxation of life tenant).

17 Even if the parties go through a ceremony under which:
(1) the life tenant pays "interest" to the trustees; and
(2) the trustees return it to the life tenant.
Even if the parties do this there is no IT charge on the "interest": *Styles v New York Assurance* 2 TC 460. This point was overlooked in *Rogge v HMRC* [2012] UKFTT 49 (TC) (where the taxpayer was not represented by counsel).

18 However, if interest accrues unpaid and the life tenant dies, the position alters and outstanding interest becomes payable to the trust (unless Apportionment Act 1870 principles apply, which will be rare).

19 See 51.6.3 (Termination of settlement).

20 Contrast *R v Allen* [2000] 2 All ER 142 [2000] 1 Cr App R(s) 497 accessible *http://www.kessler.co.uk/tfd-archive*, where the Court of Appeal stretched the word in a comparable way in order to uphold a confiscation order.

the provisions. This view is supported by *Cooper v Billingham* 74 TC 139 CA at [39]:

> The whole scheme of the legislation requires the Court to see what benefit a beneficiary actually receives, in cash or in kind, otherwise than as income or under an arm's-length transaction. Any pre-existing beneficial interest belonging to the beneficiary is irrelevant. The Judge dealt with this point shortly[21] but there was no need for him to say more.

Likewise, if L is entitled to a life interest, and a trust asset is transferred to L, the value of the benefit received is the value of the asset, not the value of the reversionary interest in the asset.[22]

30.4.9 *Benefit on liquidation or redemption of shares or securities*

A similar point arises where:

(1) A shareholder holds shares in a company within s.731.
(2) The shareholder receives assets of the company on the liquidation of the company or on the redemption of its shares.

It is arguable that the shareholder does not receive a "benefit" since they merely receive the property to which they are entitled in the liquidation or redemption; or (which comes to the same thing) that the value of the "benefit" is nil. After all, a sale of the shares would not be a benefit, and is commercially similar. And no-one would say that there is a benefit for the purposes of employment income benefit in kind rules. On the other hand, the liquidation is analogous to becoming entitled under a trust. The better view, consistent with the scheme of the Act, is that the receipt of funds from the company is a "benefit" for the purposes of s.731. Similar points apply on the redemption of debt securities.

30.4.10 *Reimbursement of tax under statutory indemnity*

SP 5/92 provides:

> 8 The settlor's right, under Para 6 Sch 5 TCGA, to reimbursement (or any payment in reimbursement) of tax paid under that Schedule is not regarded as creating an interest in a trust for the settlor under the provisions of [Chapter 5 part 5 ITTOIA] where the settlor, the settlor's

---

21 The judge said: "... The recipient's existing interest under the trust has to be left out of the calculation for the purpose of valuing the benefit ...", 74 TC 139 at p.155.

22 This was stated (*obiter*) by the judge in *Cooper v Billingham* 74 TC 139 at p.155. It is the converse of the rule that the receipt of a life interest is not a benefit: see 30.4.2 (Receipt or sale of equitable interest).

> spouse, and any companies in which they are participators cannot otherwise benefit from the trust, eg where the only beneficiaries are the settlor's children. Similarly, this statutory right to, or payment in, reimbursement is not regarded as bringing the settlor within the provisions of [s.633 ITTOIA, and the ToA provisions], nor as a capital payment for the purposes of s.97 TCGA.
>
> 9 Further, this statutory right is not regarded as a reservation of benefit for inheritance tax purposes; nor is a provision in the trust deed either requiring the trustees to recognise the settlor's right to reimbursement under Para 6 Sch 5 TCGA or to reimburse the settlor. But where a settlor does not pursue the statutory right to reimbursement, the failure to exercise this right may give rise to an inheritance tax claim under s.3(3) IHTA, in which case the usual rules for lifetime transfers would apply.
>
> 10 A provision written into a settlement deed requiring the trustees to recognise the settlor's right to reimbursement under Para 6 Sch 5 TCGA, or to reimburse the settlor, is not, of itself, regarded as giving the settlor an interest in the settlement for the purposes of Sch 5, nor as bringing into play the provisions of [s.624 ITTOIA, and the ToA Provisions].

HMRC have suggested that this does not apply if reimbursement is made before the settlor has paid the tax for which they need reimbursement. But it is submitted that there is never a benefit (or the value of the benefit is nil) when trustees pay a sum to a settlor in a *bona fide* settlement of a claim or prospective claim for reimbursement.[23]

30.4.11 *Payment of IHT*

No individual receives a benefit when trustees pay IHT charges on the trust. This is the case for the IHT 10-year charges and the IHT charges on the death of a life tenant with an estate, but it is necessary to consider them separately:

(1) The IHT 10-year charges are payable by the trustees of the settlement concerned: s.201(1)(a)IHTA.

Beneficiaries[24] who receive capital payments are also liable for the

---

23 In practice this is an issue for s.87 but not for s.731 (because the settlor will be the transferor and qualify for the transferor's s.731 defence in any event). For other issues relating to reimbursement, see 30.22 (Relevant income used to pay expenses); 80.24 (Failure to exercise right of reimbursement).

24 For non resident trusts, settlors are also liable.

IHT, but:

(a) They have a right to recover from the trust fund: s.212 IHTA.

(b) Also they are only liable if the tax remains unpaid after it ought to have been paid: s.204(5) IHTA.

Accordingly the payment of IHT 10-year charges by the trustees (or by anyone else) is not a benefit to any individual beneficiary.

This is so even if that beneficiary was (secondarily) liable for the tax under s.201(1).

(2) The IHT charge on the termination of an estate (during the life of the life tenant or on the death of a life tenant) is likewise payable by the trustees of the settlement concerned: s.201(1)(a) IHTA.[25] But the same points apply:

(a) The life tenant has a right to recover from the trust fund: s.212 IHTA.

(b) The life tenant is only liable if the tax remains unpaid after it ought to have been paid: s.204(5) IHTA.

Accordingly the payment of IHT by the trustees (or by anyone else) is not a benefit to the life tenant. It cannot be a benefit to be relieved of a secondary liability of this kind, where one has an effective right of indemnity. Further, in the case of a wide common form trust, even if the class of beneficiaries as a whole may be said to receive a benefit, no individual receives a quantifiable benefit.

30.4.12 *Moral, sentimental and other benefits difficult to quantify*

The word "benefit" is used with two distinct meanings, a strict or narrow meaning, and a wide meaning:

(1) *Financial advantage only* In the narrow sense, "benefit" means a benefit which can be valued, that is, it can quantified in financial terms. The usual case will be the provision to a person of an asset, or services, where the benefit to the person is quantifiable as the value of the asset, or the value of the services.

(2) *Non-financial benefit also* In the wide sense, "benefit" includes not only financial advantage, but also non-financial advantages, ie something which confers some mental satisfaction, which meets a moral obligation, or which may be described as indirect or intangible.

An example is a contribution of (say) £5,000 to charity. The charity

25 In this case the life tenant is also liable for the IHT, under s.201(1)(b) IHTA.

receives a financial advantage of £5k, a straightforward benefit in the narrow sense. Someone who wishes to support the charity, or feels a moral obligation to do so, may receive a benefit in the wider sense. The payment may satisfy their wish or moral obligation; but one cannot value their benefit as £5k. It is a non-financial benefit.

A similar example is the provision of a fund for the benefit of a person's children.

Another example is the payment of (say) £5,000 school fees. The child receives a service (education). This is a straightforward benefit in the narrow sense; it can be valued at £5k.[26] The parent (assuming the parent wants the children to be privately educated) receives a benefit in the wider sense. They have a wish or moral obligation satisfied; but one cannot value their benefit as worth £5k. It is a non-financial benefit.

The context must decide which meaning of "benefit" is applicable.

In the *trust* law context of common form powers of advancement or appointment, such as a power to apply for the advancement or "benefit" of a beneficiary, the word "benefit" has the wider meaning. Thus a power to apply funds for the benefit of a beneficiary can in principle be exercised by making a payment to a charity which the beneficiary wishes to support.[27]

In a *tax* law context, the narrow meaning is normal and the wide meaning is exceptional. For instance, the word "benefit" in the context of s.624 ITTOIA or s.86 TCGA (settlor-interested trusts), or the IHT gift with reservation provision, refers to financial benefits only. No-one has ever suggested that a payment for a person's minor children could be a "benefit" to the parent, so as to bring those sections into application, though it normally would be a benefit in the wider (non-financial) sense: one would normally expect the parent to be gratified by the payment.[28] (It may alternatively be said that if the parent receives a benefit, its value is nil. I would prefer the view that a "benefit" of nil value should not be called a "benefit" at all. But the end result would be the same, at least in

---

26 It is considered that the basis of valuation of a benefit should be the cost to the provider. But the detail of the basis of valuation of the benefit does not alter the point being made here that the benefit is one of a financial nature, which can be valued.

27 The leading case is *Re Clore* [1966] 1 WLR 955; see Kessler, *Drafting Trusts & Will Trusts* (11th ed., 2012), para 11.11 (Power of advancement used to create new trusts).

28 If it were a benefit to one parent, it would similarly be a benefit to the other parent, and indeed grandparents godparents and family friends; that can hardly be right.

a s.731 or s.87 context, where the charge is on the value of the benefit.)

If a power to apply funds for the benefit of a beneficiary is exercised by making a payment to a charity which the beneficiary wishes to support, the payment is a benefit (in the narrow sense) to the charity[29] so s.87 gains may accrue to the charity (though the charity would normally qualify for CGT charity relief).

All this is clear on principle, and does not need authority, but for completeness, the Tribunal took this view in *Burton v HMRC*:

> [60] 'Benefit' in s 97(5)(b) [TCGA] must be construed in the context of these taxing provisions rather than for the purpose of deciding the validity of an advancement or appointment under powers contained in a settlement. The legislation forms a detailed self-contained code to impose a tax charge on capital payments received by a beneficiary. This requires the benefit received or treated as received to be identifiable and quantifiable if there is to be sufficient certainty to impose a tax charge for any particular year of assessment....
>
> [62] The wider concept of benefit is difficult to apply in the context of s 87 in a way that the concept of a benefit which is identifiable and quantifiable is not. For example, a gift to charity by the trustees of a settlement may not give rise to a charge to tax on the trustees so as to create trust gains, but has been held to be for the benefit of a beneficiary as regards validity as it discharges a moral obligation (*Re Clore* ... [1966] 1 WLR 955). The beneficiary is surely not chargeable in those circumstances under s 87... What has been received or treated as received in those circumstances by the beneficiary for tax purposes notwithstanding its validity as being for the benefit of the beneficiary? Nothing in the sense of a capital payment received other than possibly a moral satisfaction has materially benefited the beneficiary such that a tax charge can be imposed in respect of it.... [30]

Burton concerned a s.86 flip-flop scheme.[31] HMRC argued that the beneficiary received a benefit in a year ("year 1") of a very subtle nature:

---

29 This view is supported by a comment in *Fuller v Evans* [2000] 1 All ER 636, [2000] WTLR 5, accessible *http://www.kessler.co.uk/tfd-archive* that a common form settlor exclusion clause prohibits trustees from applying property for the benefit of beneficiaries by conferring a financial benefit on the settlor (eg in a situation where parents were in need of assistance and children-beneficiaries recognise a moral obligation to help them).

30 *Burton v HMRC* [2009] SFTD 682; Judge Wallace took a similar view at [44].

31 See 52.2 (Outline of flip-flop schemes).

the avoidance of a CGT liability under s.86 on a disposal anticipated in the following tax year ("year 2"). So this was not a case of mental satisfaction benefit, though it was a case of a benefit whose value was difficult or impossible to quantify. The two-judge Tribunal disagreed on whether that was a "benefit" at all, but both judges agreed that if it were, the value of the benefit *in year 1* (the year assessed) was nil, so there was no s.87 charge.[32] But these facts are not likely to recur; so it is not necessary to consider this aspect further.

30.4.13 *Payment of school/university fees*

Suppose trustees pay school fees for a child in circumstances where the parents have no obligation to pay the fees. The child receives a benefit from the trust. The parents merely receive an intangible, non-financial advantage (if they regard the education with approval). We have already noted that this is not a "benefit" to the parents for tax purposes.

Suppose trustees pay school fees in circumstances where a parent has a family law obligation to meet the fees (such as may arise on a divorce or in other family law proceedings). It might be said that the parent receives a benefit (being relieved of legal obligation). However it is considered that the benefit to the parent is outside the scope of s.731 because it is merely incidental.[33]

Suppose trustees pay school fees in circumstances where a parent (or both parents) are under a contractual obligation to pay the school fees (ie the parent has entered into the contract with the school). The position here depends on the facts:

(1) It may be that the parent is entitled to reimbursement from the trustees (eg if the parent entered into the contract at the request of the trustees and on terms that the trustees will meet the fees, or as agent for the trustees). In that case the trustees provide the benefit to the children and the parent does not receive a benefit from the reimbursement.[34] It does not matter that the school are not party to the arrangement (eg the parent may be acting as agent for an undisclosed principal).

(2) It may be that the trustees are voluntarily meeting a liability of the parent; in that case, the parent is providing the benefit to the child, and the trustees are providing a benefit to the parent.

---

32 HMRC's argument that the benefit was an outright payment was rightly rejected.

33 See 30.6.2 (Trust makes payment to meet divorce order: H not a beneficiary).

34 Contrast 30.4.10 (Reimbursement of tax under statutory indemnity).

In practice (assuming it is desired to arrange that the benefit is received by the child, not the parent) it is recommended that the contract should be between the trustees and the school, or (if that is not desired) there should be an agency agreement between the trustees and the parent,
Then the position should be clear.

If a parent is the settlor, s.629 ITTOIA needs consideration.

See too App 6.1 (Students).

30.4.14 *Use of house or chattels*

Suppose a house (or chattels) is provided to a life tenant who then allows their spouse (or partner or children) to live there (and to enjoy the chattels). The same analysis applies. The indirect benefit which the spouse (or partner or children) receive is not a "benefit" for tax purposes, or, alternatively, the benefit is disregarded as merely incidental.

30.4.15 *"Benefit" provided in breach of trust*

Suppose trustees transfer an asset to a person in breach of trust. In principle the recipient holds the asset on constructive trust for the trustees, so the transfer is not a benefit, or (even if it were a benefit) the value of the benefit is nil.

While the context may show that the word benefit is (mis)used to include a transfer of an asset which the transferee is required to return to the transferor,[35] that is not the case here.

It is possible for an act which is a breach of trust to confer a benefit on the recipient, eg if trustees allow their claim against the recipient to become statute barred.

Trustees may confer a benefit in breach of trust (without transferring an asset) eg allowing an individual who is not a beneficiary to occupy trust property. Whether that confers a benefit on the individual depends on whether the trustees have a claim against the individual to recover the value of the benefit.

Thus whether an act in breach of trust constitutes a benefit requires an examination of the rights of the parties; it cannot be answered yes or no as a general proposition.

---

35 An example is *Venables v Hornby* 75 TC 553 CA at [26]. The point was not considered on appeal.

30.5 Who is the recipient of a benefit?

It is important to identify the recipient of a benefit because the individual who receives the benefit is the one who is taxable. It is especially important where some beneficiaries are and others are not UK resident, or remittance basis taxpayers, because the identity of the recipient may affect not only who pays the tax but whether any tax is payable at all.

There may be scope for tax saving by arranging that the benefit is received by the beneficiary who is a remittance basis taxpayer.

There are many possible permutations of circumstances and the documentation is very important.

30.5.1 *Who receives benefit of occupation of property?*

Suppose trust property is held by a common form discretionary trust:

(1) The property is occupied by H and W (who are living together).
   (a) If the trustees grant a H licence to occupy, W occupying jointly, but as licencee of H, then the benefit from the trust is received by H.
   (b) If the trustees grant a licence to H and W, each receives the benefit of joint occupation. How does one value that? In normal cases, the value of each benefit is half the value of sole occupation.

(2) The property is occupied by H (or H and W) together with C (a child of H). If the trustees grant a H licence to occupy, the benefit is enjoyed by H alone, not by C.

(3) The property is occupied by C (an adult) alone. If the trustees grant a licence to H, who permits C to occupy, the correct analysis should be that C has received the benefit indirectly (for s.87 purposes) or as a result of an associated operation (for s.731 purposes).

The same applies if the property is held by a company held by the discretionary trust (except the licence would be granted by the company at the direction of the trustees).

Suppose property is held on trusts under which H has an interest in possession. If H occupies, he receives the benefit. If H and W occupy, H alone receives the benefit. What if H choses not to occupy? In such a case H may not be entitled to occupy in which case there will be no benefit. If H permits C to occupy alone, C has received the benefit indirectly.

Suppose property is held on trusts under which H and W have joint interests in possession. If they both occupy they receive the joint benefit

equally. Suppose H and W have interests in possession in unequal shares. It is suggested that they receive the benefit of occupation equally, notwithstanding the inequality in their interests in possession.

In all these cases the position is of course different if the person in occupation is required to pay some form of compensation to the trustees or to the life tenant or joint life tenant.

30.5.2 *Who receives benefit of payment of money?*

Likewise with money. If the trustees pay a capital sum to H, and H uses it for family expenditure, the benefit is received by H; but if paid by H under an arrangement whereby it is transferred on to W, or to a child, the benefit may be received indirectly by the child. See 30.8 (Benefit causation condition).

For the purposes of s.87 TCGA charge, the concept of "receipt" is explained by s.97(5) TCGA.[36] There is no statutory equivalent for s.731 but it is suggested that the same rules apply: s.97(5) merely states the natural meaning of "receipt".

As the discussion of school fees above illustrates, the question of who receives a benefit may overlap with the question of whether there is a benefit at all.

30.6 Benefit conferred in context of divorce

30.6.1 *Trust makes payment to meet divorce order: H a beneficiary*

Suppose a trust where H is a beneficiary and W is not.

(1) A court orders H to make a payment to W.

(2) A trust makes a payment to H to allow him to meet the obligation.[37]

That is a straightforward benefit to H. W does not receive a benefit; she gives full consideration.[38]

Suppose a slightly different step (2): The trust makes the payment to H directly in satisfaction of W's obligation. The result is the same.

Suppose a slightly different step (1): the court order requires that H shall *pay or cause to be paid* to W a specified sum. That is a standard form of order. But the result is the same.

The same applies if H and W are both beneficiaries.

---

36 See 51.7 (Receipt from the trustees).

37 As a matter of trust law, this is permitted even though H is not a beneficiary.

38 It is important to understand the family law background, as to which see 11.35.1 (Is a transfer on divorce made for "consideration"?).

30.6.2 *Trust makes payment to meet divorce order: H not a beneficiary*

Suppose:
(1) W is a beneficiary of the trust and H is not.
(2) A court orders H to make a payment to W.
(3) The trust makes the payment to W.

I find it difficult to see how this problem could arise. The trustees could make a payment to W but not in satisfaction of the court order, as H cannot *cause* the payment to be made.[39] There is also a benefit to H, which would be a breach of trust.

The trust law case of *Fuller v Evans* seems at first sight to contradict this analysis.[40] In this case the Court ordered:

> [H] do pay or cause to be paid to [W] … periodical payments
> (a) for [the children's] general maintenance £9,000 per annum
> (b) such amount as is sufficient to defray their school fees...

There was a common form accumulation and maintenance trust for the children. H was the settlor, and so excluded. The judge said:

> 4. The issue before me is whether the trustees may in their discretion exercise their power to provide moneys out of the trust to pay for the children's maintenance and education, though the effect of such payment may be in whole or in part to relieve the settlor from the burden of his obligations under the consent order to pay for his children's maintenance and education.

The judge concluded:

> 9 [The settlor exclusion clause under which H was excluded from benefit] does not preclude the trustees from exercising the power conferred upon them by reason of any incidental (and unintended) conferment of relief on the settlor. This conclusion of course does no more than leave it open to the trustees to exercise a discretionary power to make provision for the education and maintenance of the two children out of the settlement funds. The trustees can only exercise that power if they consider that to do so is in the best interests of the beneficiaries despite the existence of the consent order and the obligations of the settlor thereunder. The trustees must have regard to the obligation of the

---

39 If H is a trustee it may be said that he causes the payment to be made, but the conflict of interest would make the payment void.

40 [2000] 1 All ER 636.

> settlor to provide for the beneficiaries' maintenance and education when undertaking the decision-making process but the existence of that obligation is no more than a consideration to which due weight must be given .... If the trustees reach the conclusion that it is in the best interests of the beneficiaries to make such provision out of trust funds, they are free to do so.

No doubt trust income so applied would in principle[41] be the income of the children. This decision gives a sensible result. It would be surprising if the effect of the common form court order was to sterilise trust funds which prior to the divorce had been intended for the maintenance and education of the children. Moreover if the trust bore the cost then H had to be discharged from the court order: the children did not need two sets of school fees. But that case represents a high water mark: payments from H to W are different from payments for the maintenance of children. If the trust makes the payment to W, it is considered that H would not be discharged. If H were discharged, the benefit to H from the trust if it makes a payment to W is not "incidental".

30.6.3 *Court order against company*

The 2012/13 edition of this work considered the position where a court orders a company within s.731 to transfer property to the spouse of the shareholder. But it seems that the Court does not have jurisdiction to make an order of that kind, except in the case where the company is a nominee,[42] so this issue should not arise.

30.7 Valuation of benefits

The amount of s.731 income depends on the "amount or value" of the benefit.[43] "Amount" refers to cash benefits (outright payments of money) and "value" refers to non-cash benefits.

The amount of s.87 gains depends on the amount of the capital payment and s.97(4) TCGA provides:

> For the purposes of sections 86A to 96 and Schedule 4C the amount of
> [a] a capital payment made by way of loan, and
> [b] of any other capital payment which is not an outright payment

41 In practice s.629 ITTOIA would need consideration.

42 *Prest v Petrodel Resources* [2013] 2 AC 415.

43 See step 1 of s.733 discussed 30.13.2 (Step 1: Total Benefits).

of money,

shall be taken to be equal to the value of the benefit conferred by it.

In this section I discuss the valuation of benefits for the purposes of s.731 and for the purposes of s.87 TCGA as the issues are (more or less) the same.

Arguments that the value of the benefit is nil tend to overlap with arguments that there is no benefit at all.

There are no statutory valuation rules for s.731 or for s.87.[44] Lord Reid rightly says:

> "Value" is an elusive word: it may mean market value, it may mean value in money to the owner, or it may have other meanings like the value of the work necessary to produce it, or even sentimental value.[45]

The ToA draft guidance provides:

> **INTM601600 examples of the amount or value of a benefit**
> ...a. Receipt of a monetary payment: where the benefit received is money, generally speaking the amount or value of the benefit is likely to be the amount received. As INTM601560 explains where the payment is received in foreign currency the amount or value will generally be determined by applying the appropriate sterling exchange rate at the date of receipt.

30.7.1 *Value of living accommodation*

In *IRC v Botnar* the Special Commissioners discuss the valuation of living accommodation for the purposes of what is now s.724(2) ITA (enjoyment condition C) but the same applies for the purposes of s.731 and s.87. They say:

> 28. It seems to us that the whole of the value of a non-convertible benefit should, in the absence of any other objective means of valuation, be measured by reference to what it would have cost the individual receiving it. ... When measuring what benefit an individual receives it is not in our view relevant to ask whether he would have purchased the benefit himself. If that were the test a penurious individual receiving a non-money benefit under [enjoyment condition C, where the charge is on the value of the benefit] would escape tax however substantial the benefit

---

44 Contrast the elaborate valuation rules for employment-related benefits; such is the patchwork nature of UK taxation.

45 *Heaton v Bell* 46 TC 211 at p.246.

since he could not have paid for it.
29. The measurement of the benefit by reference to what it would have cost the individual will take account of the terms on which it was provided. In this case although nothing was recording in writing, there is a clear inference that the use of the property was provided on the footing that Mr and Mrs Botnar bore the recurrent outgoings.
30. It may be that it will not be easy for a valuer to assess what the cost of a benefit such as this would have been since it is wholly hypothetical there being no market for such benefits. However, it seems to us that one approach may be to take the open market rental and to adjust this by reference to the lack of security of tenure, non-assignability and outgoings born by Mr and Mrs Botnar and any other special factors.[46]

The ToA draft guidance provides:

INTM601600 examples of the amount or value of a benefit
b. Rent free accommodation: where the benefit received is the provision of accommodation without charge to the individual the amount or value of the benefit is likely to be determined from a consideration of the market rental that the property may have fetched at the time the benefit is received.
However, it must be kept in mind that the language of the provision is of an individual who 'receives' a benefit. Therefore where, as in the case of rent free accommodation, the individual goes on receiving the benefit by continuous occupation of the property there is in effect an ongoing and continuous benefit. As taxation of a benefits charge is for a tax year it will generally be appropriate to consider the amount or value of the benefit for that entire period where there is a continuous provision of a benefit for the whole or part of that period. It will therefore be appropriate in such instances to consider the 'annual value', or appropriate proportion thereof, of the benefit received not merely any value at the point of first receipt. Thus in the case of rent free accommodation it will not only be appropriate to consider the amount or value of the benefit during the particular tax year, but if that benefit continues to be provided to consider its value for each subsequent period during which there is continuing provision and to have regard to any changes that may occur in the value of the benefit (for example because of changes in market place for rental values). These principles of continuous provision are likely to apply to most situations where an asset is made available for use over a period of time (see (c) below).

46 Supplementary Special Commissioners Decision at p.262.

c. Asset made available for use: the principles to be applied where an asset is made available for use by an individual are likely to be similar to those described above for rent free accommodation. Where the benefit provided is on an ongoing and continuous basis it will generally be appropriate to look at the tax year as a whole and consider the 'annual value' of the use of the asset in relation to that tax year (or part thereof) together with any ongoing costs to the person providing the benefit of its provision for use by the individual. Subject to obtaining any necessary professional valuation advice, as a rule of thumb it might be appropriate to adopt methodology for the benefits charge in this area similar to that which may apply in the employment related benefits field where an asset is made available for use (see for example section 205 ITEPA 2003).

30.7.2 *Value of other assets*

The ToA draft guidance provides:

INTM601600 examples of the amount or value of a benefit

...

d. Asset passed to the individual: where the benefit received is in the form of an asset, other than cash, and the ownership of that asset actually passes to the individual, as opposed to an asset being made available for use which remains in the ownership of the provider, the amount or value of the benefit is likely to be determined by reference to the value of the asset at the point in time when it is received by the individual. In most cases this is likely to be similar to the approach that may be adopted for capital gains purposes where it may be appropriate to determine the open market acquisition value of the asset to the individual.

e. Satisfying a debt: where the benefit received takes the form of a personal debt or liability of the individual being settled on the individual's behalf, the amount or value of the benefit is likely to be determined as if the individual had received an equivalent amount of money. There are a variety of circumstances that may come under this heading from the provision of credit or debit cards, making direct payments to a third party service provider (such as for children's school fees), or the settling of an outstanding personal liability (such as a utility bill, or personal tax liability for example).

30.7.3 *Interest-free loans*

Cooper v Billingham raises the question of the valuation of interest-free loans:

[Counsel for the taxpayer] argued that the value of the benefit conferred

> as required for the purposes of s.97(4) [TCGA] would vary according to the circumstances of the borrower, for example how creditworthy he might be and therefore his ability to borrow at better or worse rates on the market, and that those circumstances might differ from time to time. That may be true and could in theory cause difficulties of qualification in a particular case.[47]

The status of the borrower as life tenant is disregarded in determining the existence or valuation of the benefit. This is not stated expressly but follows from the scheme of the Act.[48] There is not much point in having a charge on benefits if interest-free loans are untaxed.

ToA draft guidance raises the question, but the author had no idea what the answer may be:

> **INTM601620 Examples of the amount or value of a loan**
> One of the most common examples of a benefit involves loans of one form or another. These loans can take the following forms:
> - interest free loans
> - loans made charging interest at a rate below commercial rates
> - loans made charging interest at a commercial rate
> - loans made charging interest which remains unpaid
> - back to back arrangements.
>
> Interest free loans are considered to be within the provisions, the charge being calculated by reference to the amount of interest forgone by the lender. This position was challenged in the courts where it was argued that in effect where a loan was payable on demand there was no benefit. The judges disagreed with this and said that the focus needed to be not on the making of the loan but on the Trustees successive acts in not calling the loan in. (Cooper v Billingham and Fisher v Edwards 54 TC 139) Similarly where there are loans at interest rates lower than those that would be charged by banks or other commercial lenders a benefit may arise.
>
> In the case of an interest free loan made to the individual, the amount of the benefit would normally be considered to be equivalent to the interest payable at a commercial rate on a similar loan from an unconnected third party. For this purpose we treat the 'official rate' of interest as being the appropriate rate to use. Where interest is paid but at less than commercial rates, the amount of the benefit will be that interest payable at a commercial rate less the interest paid.

---

47 74 TC at p.155.

48 74 TC at p.154F. The reasoning was upheld by the Court of Appeal.

A loan made to an individual for full commercial consideration, is a 'benefit' but such a loan would in practice normally be regarded as a nil benefit, and therefore have no taxable value. If the interest payable on the loan is not paid, consideration should be given as to whether the 'unpaid' interest in each year should be the amount of benefit in each year. Regard should be had to the circumstances under which the interest is unpaid. For example, has the payment of interest been waived? If repayment of interest (or capital) is waived then this will be regarded as a benefit received by the individual for the year in which waiver takes place.

There may be instances of so called 'back to back' arrangements which should be carefully considered. For example, an individual who is a beneficiary of a trust may borrow money from a bank at commercial rates of interest. The trustees may deposit substantial funds with the bank (lender) as collateral for the loan. The arrangements may mean that repayments of capital and interest on the bank loan are rolled up and on maturity the loans are either renegotiated or replaced by larger loans from other banks. The end result is that the individual, although legally responsible for the repayments of capital and interest payments, has had, perhaps for many years, the benefit of substantial loans without a cost. In such circumstances, the value of the benefit may be considered on the basis that the loans were interest free and the benefit arrived at as referred to above.

The above assumes that monies made available to the individual were in fact by way of loan and, in appropriate cases, evidence of a loan having been made, should be obtained. If, on enquiry, it transpires that the payment was not a loan, or if a loan there is little likelihood of a demand for repayment (Williams v CIR 54 TC 257), then the payment should be treated as a cash payment, as referred to earlier.

30.7.4 *Payment for benefit*

The ToA draft guidance provides:

INTM601600 examples of the amount or value of a benefit

...If the individual receiving a benefit makes any contribution towards that benefit the contribution will normally be taken into account in determining the amount or value of the benefit. For example, an individual is provided with accommodation that is a benefit for the purpose of the benefits charge. It is agreed that the value of the use of the accommodation based on rental is £10,000 for the tax year. In that year the individual pays a rental of £5,000. It will normally be

appropriate to take account of the contribution such that the amount or value of the benefit is regarded as £5,000.

30.8 Benefit causation condition

The third fundamental s.731 condition is the benefit causation condition. Section 732(1) ITA provides:

> This section applies if ...
>
> (c) the benefit is provided out of assets which are available for the purpose as a result of—
>
> (i) the transfer, or
>
> (ii) one or more associated operations ...

There are two alternative conditions here:

(i) the benefit is provided out of assets which are available for the purpose as a result of the transfer; or

(ii) benefit is provided out of assets which are available for the purpose as a result of associated operations.

I refer to these as benefit causation conditions (i) and (ii). They are comparable to the relevant transfer causation conditions.

Thus, not every benefit that an individual receives falls within s.731: there must be a nexus between the benefit and the transfer.

Contrast the s.87 charge which applies where a beneficiary receives a benefit directly or indirectly from the trustees. The wording is different but the concept is similar.[49]

30.8.1 *Benefit to B1, used by B1 to benefit B2*

Suppose:

(1) A discretionary trust within s.731 has accumulated relevant income.

(2) In 1970, a beneficiary ("B1") receives a trust asset ("B1's asset"). Although B1 receives a benefit assume B1 does not pay tax under s.731 because he is non-resident, or qualifies for the s.731 remittance basis.[50] This seems on a simple reading to be an associated operation (in relation to the transfer of assets to the trust).

(3) In 2000 B1 (independently and not as part of a prior arrangement)

---

49 See 51.7.1 (Indirect receipt from trustees).

50 Although strictly the position of B2 is the same even if B1 *is* taxed on B1's benefit, whether as a capital benefit under s.731 or as an income benefit under ITTOIA.

gives the asset to another beneficiary[51] ("B2") who is UK resident. B2 has received a benefit. Benefit causation condition (i) is not satisfied. However, it seems at first sight that benefit causation condition (ii) is satisfied, so B2 is at first sight subject to tax under s.731. This clearly cannot be right; but why not? It is necessarily part of the scheme of s.731 that when one beneficiary ("B1") receives a benefit, and uses the benefit to benefit another ("B2") only the first benefit counts. Otherwise what should be regarded in economic reality as a single benefit may give rise to a series of tax charges as it passes from one beneficiary to another and to another.[52] But why is this the case? The best answer is that the operations are not associated. Mere historic association is not enough. These must be something more.[53] It is suggested that the principles to apply are those of a "clean break" test.[54]

Consider a trust where the settlor ("S") is a beneficiary and the settlor wishes to make a payment to another beneficiary ("B"). A direct payment from the trustees to B may be within the scope of s.731. In that case the solution may be to make regular payments to S who may subsequently make a gift to B, but this can only succeed if the gift by S is genuinely independent, which may be impossible to arrange.

In *Denny v HMRC*:

(1) S (son of the taxpayer T) created a trust in the 1990's.
(2) The trust property was appointed to S (then non-resident); the date of this is not recorded.
(3) In 2000 S used the funds to lend £0.5m to his father, T. T repaid over the following year.

The Tribunal dealt with the s.731 issue in a single sentence:

> We find that section [731] does not have effect because even if the loan to [T] could be considered a "benefit" within [s.732] it was not provided out of "assets which were available for the purpose", but rather from

---

51 If B1 transfers the asset to a person ("C") who is not a beneficiary of the trust (in the sense that trust income cannot be used to benefit C) then C cannot be subject to tax under s.731 as there is no relevant income in relation to C. But in a standard form discretionary trust there is a wide power to add beneficiaries; so trust income is relevant income in relation to every person in the world (whether or not they are specifically identified as "Beneficiaries" in the trust deed).

52 Assume there is sufficient relevant income.

53 The argument would be the same as in 28.11 (Person abroad receives income as indirect consequence of transfer).

54 See 80.4 (Gift from A to B followed by gift to trust by B).

funds owned by Mr Lyster Denny available for his own purposes. No charge arises under its provisions.[55]

30.8.2 *Transfer between trusts*

Suppose:

(1) A trust ("trust 1") within s.731 has accumulated relevant income.
(2) Trust 1 transfers funds ("the transferred funds") to a new UK trust on similar terms ("trust 2").
(3) A beneficiary ("B") receives a benefit from trust 2 out of the transferred funds.

The transfer from trust 1 to trust 2 is an operation associated with the earlier transfer to trust A.[56] B has received a benefit and the benefit is provided out of assets which are available as a result of the transfer and the associated operation. So B is taxed under s.731. The benefit causation condition is satisfied.

Suppose trust 2 was an established trust with a trust fund ("fund 2"). If B receives a benefit from fund 2 B is not taxable under s.731 because that fund is not available as a result of the transfer of assets to trust 1.

It follows that a transfer between settlements will not in principle avoid s.731 charge. There is no reason why it should (except a misconceived analogy with the s.87 statutory rules which have no equivalent in the ToA code.

30.9 Benefit causation condition: Two transfers of assets

(1) A settlor by a single disposition transfers assets to a trust within s.731.
(2) Part of the trust fund is invested in assets which yield relevant income.
(3) Another part of the trust fund consists of a house occupied rent-free by B.

B pays tax on the benefit by reference to the relevant income.

By contrast, suppose:

(1) A settlor by *two* separate transfers creates *two* trusts within s.731:
    (a) a trust which holds income-producing assets and accumulates relevant income; and

---

55 [2013] UKFTT 309 (TC) at [96]. There is no analysis, but this was a case where the taxpayer appeared in person, and HMRC did not instruct counsel.

56 A transfer between trusts is not a "clean break". After all, trustees are expected to pay close attention to the wishes of the settlor, and in doing so they are merely filling in the blanks left by the settlor: see *Muir v Muir* [1943] AC 468.

(b) a trust which holds the family home.

(2) B enjoys the benefit of free occupation in the home.

B is not subject to tax under s.731 as there is no relevant income in relation to this benefit. Thus the use of two trusts may avoid a tax charge under s.731 which would have arisen if there were one.

Indeed, it is not necessary to use two trusts. The same applies if there are two separate transfers of assets to one trust.

30.10 Transferor's s.731 defence

The fourth fundamental s.731 condition is the transferor's s.731 defence. Section 732(1) ITA provides:

> This section applies if—...
>
> (d) [i] the individual is not liable to income tax under section 720 or 727 by reference to the transfer
>
> [ii] and would not be so liable if the effect of sections 726 and 730 were ignored ...

This is sensible. There is no need to apply s.731 to a transferor to whom s.720 applies. The application of s.720 gives HMRC all they should need.

Section 732(1)(d)[ii] makes clear that this defence applies to a transferor who is a remittance basis taxpayer even though the s.720 income is (un)taxed under the s.720 remittance basis.[57] Section 732(1)(d)[ii] is only for avoidance of doubt, and the position would be the same if those words were omitted.

30.10.1 *Transferor not resident when transfer made; pre-1996 income*

It has never been a requirement of s.731 that the transferor was (ordinarily) resident, at the time of the transfer, but this was a requirement of s.720 until 1996.[58]

RI 201 provides:

> Similarly, a transferor of assets who is outside the charge to tax under Section 739 ICTA [now s.720 ITA] in respect of income arising before 26 November 1996 through being not ordinarily resident in the UK at the time of the transfer, is not assessed under [what is now s.731 ITA].

---

57 See 29.14 (Section 720 remittance basis).

58 See 29.9.2 (Transferor not resident when transfer made).

This is looking at a transferor "T" (wherever domiciled) who:
(1) makes a transfer of assets before 26 November 1996;
(2) is not UK (ordinarily) resident when T made the transfer;
(3) later becomes UK (ordinarily) resident.
T was not taxable under s.720 until 26 November 1996. I refer to income arising before that date as "pre-1996 income". If T receives a benefit after 26 November 1996[59] T is not taxable under s.731. This is right because the transferor's s.731 defence does not apply to *income* liable to tax under s.720. It applies to an *individual* liable to tax under s.720. In the example, T (once resident and after 26 November 1996) becomes an individual who is "liable to tax under s.720". This is something of a windfall for T, but of course non-transferors may be taxed as the pre-1996 income is relevant income.

30.10.2 *Transferor not resident at other times*

RI 201 does not address the situation where T is outside the scope of s.720 only because T is not resident for a period. Suppose:
(1) T is resident when T makes the transfer;
(2) T is non-resident for a period ("the non-resident period");
(3) T returns to the UK.
The reasoning above shows that on these facts T is also outside s.731; T qualifies for the transferor's s.731 defence in relation to income of the non-resident period as well as the income arising while resident.

30.10.3 *Spouse of transferor*

Section 714(4) ITA provides:

> In this Chapter references to individuals include their spouses or civil partners.

Accordingly the spouse/civil partner of the transferor also qualifies for the transferor's s.731 defence. This only applies during the life of the transferor as a former spouse/civil partner is not a "spouse" or a "civil partner".[60]

---

59 I need not now consider the position if the benefit was received before 26 November 1996 but the result was probably the same.

60 See App 1.3 (Meaning of "spouse") and App 1.4 (Meaning of "civil partner").

30.11 S.731 capital condition

The fifth fundamental s.731 condition is (in my terminology) the s.731 capital condition. Section 732(1) ITA provides:

> This section applies if ...
>
> (e) the individual is not liable[61] to income tax on the amount or value of the benefit (apart from section 731).

This is sensible. There is no need to apply s.731 to a benefit liable to IT. The IT liability is all that HMRC should need.

30.11.1 *Benefit (un)taxed under remittance basis*

For this purpose a remittance basis taxpayer is "liable" to income tax on unremitted foreign income.[62] In particular, an income receipt from a trust is taxed (if at all) under general principles[63] and not under s.731.

This question arises because the s.731 remittance basis is more limited than the ordinary ITA remittance basis. For instance, suppose:

(1) A discretionary trust within s.731 receives UK source income (or both UK and foreign source income).

(2) A remittance basis taxpayer ("B") receives income ("unremitted foreign trust income") from the trust.

B is taxable on the unremitted foreign trust income on the ITA remittance basis but assume the income is not remitted, so no tax is due. Can HMRC argue that B is subject to tax on the unremitted foreign trust income under s.731?[64] The answer is, no, because B is "liable" to IT on the benefit. By

---

61 The word in the pre-ITA legislation was "chargeable" not "liable" but the change has not altered (and has perhaps clarified) the position.

62 This might not seem to accord with the natural meaning of "liable"; but it is consistent with the well established rule that pension schemes and charities are "liable" to tax for the purposes of DTAs even though they qualify for pension scheme or charity exemptions; see Kessler & Marre, *Taxation of Charities and Non-Profit Organisations*, (9th ed., 2013), para 14.2.2 (Liable to tax) (online version *http://www.taxationofcharities.co.uk*). *Stonor v IRC* [2001] STC (SCD) 199 might be cited against this view but a Special Commissioners decision on other provisions, arguably obiter, and not fully argued, does not count for much. This view is also consistent with the rule that unremitted foreign income is "chargeable" to IT; see 51.6.1 (Definition of capital payment).

63 See 25.3 (Tier 3: Discretionary income payment: charge on beneficiary).

64 The s.731 remittance basis is not in point if the benefit relates to UK source relevant income: see 30.35 (Section 731 remittance basis).

contrast, if B had received capital instead of income from the same trust, B would have been subject to tax on the benefit under s.731!

Of course, the word "liable" (like all words) takes its meaning from the context. So perhaps here HMRC may argue that unremitted foreign income is not "liable" to income tax, for the purposes of the s.731 capital condition? There is no good reason to construe the word in that wider way. This result is consistent with the rule that the transferor's s.731 defence applies even to income (un)taxed on the remittance basis.[65] Anti-avoidance provisions, like hypotheses, should not be multiplied unnecessarily.

30.12 Is a benefit within s.731 a capital payment?

The definition of "capital payment" for s.87 purposes is discussed in 51.6 (Capital payment). For present purposes the relevant part of the definition is that a capital payment is any payment "which is not chargeable to income tax on the recipient".

In the following discussion "**a non-capital payment**" is a payment which is not a capital payment.

30.12.1 *Benefit giving rise to s.731 charge in year of receipt*

The pre-ITA position was straightforward. Section 740 ICTA was, I think, tax on the benefit.[66] If a person received a benefit which was subject to tax in the year of receipt, under s.740 (ie assume there was relevant income) then the benefit was a non-capital payment for CGT purposes.

---

65 See 30.10 (Transferor's s.731 defence). A further objection to this HMRC argument is that there may be a double charge to tax:

(1) Tax under s.731 on receipt of the unremitted foreign trust income.

(2) Tax under general principles when the foreign trust income is later remitted to the UK.

Arguably, double counting relief applies: see 31.6 (Double-counting relief). But there is no provision allowing tax paid under s.731 to be reclaimed.

66 Section 740(2) ICTA provided:

"(2) ... the amount or value of any such benefit as is mentioned in subsection (1) above, if not otherwise chargeable to income tax in the hands of the recipient, shall -

(a) to the extent to which it falls within the amount of relevant income of years of assessment up to and including the year of assessment in which the benefit is received, be treated for all the purposes of the Income Tax Acts as the income of the individual for that year... "

It is not immediately obvious that the position is the same from 2007/08. For s.731 is not expressed as a charge on the benefit. It appears at first sight to be a charge on fictional, deemed income: the amount or value of the benefit is merely an element in the computation of the amount of the s.731 income. However it cannot be the case that the same benefit gives rise to CGT on the benefit and deemed income on an amount equal to the benefit. A strained construction is needed to avoid absurdity. There are two possible solutions:

(1) Either (contrary to first appearances) s.731 is in fact a charge on benefits; or
(2) The reference (in the definition of capital payment) to a payment which is "chargeable to IT" should be read as including a benefit giving rise to deemed income.

Section 97(3) TCGA (see below) adopts the first view and so does s.734(1)(c) ITA.[67] Ultimately it makes no difference for present purposes which solution one adopts, but the better view is that s.731 is a tax on the benefit.

30.12.2 *Benefit matched to relevant income after year of receipt*

The pre-ITA position was straightforward. In the absence of express provision, a benefit which is not taxable under s.740 ICTA only for lack of relevant income might arguably have been a non-capital payment. But this argument was ruled out by s.97(3) TCGA. I set out the text of s.97(3) indicating the ITA amendments in track-change format:

> The fact that the whole or part of a benefit is by virtue of ~~section 740(2)(b) of the Taxes Act~~ section 733 of ITA 2007 treated as the recipient's income for a year of assessment after that in which it is received—
>
> (a) shall not prevent the benefit or that part of it being treated for the purposes of sections 86A to 96 and Schedule 4C as a capital payment in relation to any year of assessment earlier than that in which it is treated as his income; but
> (b) shall preclude its being treated for those purposes as a capital payment in relation to that or any later year of assessment.

Post ITA this wording is not apt because under s.731 (on a first reading) a benefit is not "treated as the recipient's income". Section 731 is a charge

67 See 30.14 (Section 733 computation when benefit subject to CGT).

on deemed income. But a strained construction is required to give effect to the obvious intention, that a benefit outside s.731 (for lack of relevant income) is a capital payment for CGT and it is considered that s.731 should be regarded as a tax on the benefit.

Thus if:

(1) a benefit is conferred,

(2) the benefit is not subject to s.731 in year of receipt for lack of relevant income the benefit can be taxed as a capital payment in year of receipt. If:

(3) the benefit is not subject to s.87 in year of receipt (for lack of s.2(2) gains) the s.731 charge in the following year has priority over the s.87 charge in that year; and so on.

30.12.3 *Benefit where s.731 remittance basis applies*

A benefit which falls within s.731 but qualifies for the s.731 remittance basis is taxed on the remittance basis, but is nevertheless "chargeable" to tax, so it is a non-capital payment. HMRC agree. Residence and Domicile: FAQ provides:

> **Interrelation between s727 or s731 ITA and s87**
> **Q** Could it be clarified that where a payment has been made - such as one under s731 which has attracted relevant income but has been protected from tax by non remittance - such a payment will not be regarded as a capital payment for s87 purposes?
> **A** Where a payment (benefit) results in an amount becoming taxable by virtue of s731 ITA 2007, but the charge is deferred by a remittance basis claim because no relevant amount has at that time been remitted to the UK, the benefit will not also be taken into account for the purpose of s87 TCGA. Where the 'capital receipt' condition is met for the purpose of a charge under s727 ITA, even though the charge may be deferred by a remittance basis claim, nothing in that section alters the nature of any payment that triggered the charge.[68]

By contrast, s.731 does not apply to a benefit which does not meet any of the five fundamental s.731 conditions (for instance a benefit to a transferor) and such a benefit is a capital payment.

---

68 *http://www.hmrc.gov.uk/cnr/res-dom-faqs.htm* The rubric to the FAQ explains: "Most of the FAQs have now been incorporated into the new guidance. Those that have not are reproduced below."

30.12.4 *Benefit where motive defence applies*

The pre-2006 wording was that "Sections 739 and 740 *shall not apply*" where the motive defence applied, so it was clear that a benefit where the motive defence applied could be a capital payment.

Under the current legislation, where the motive defence applies, the individual who receives a benefit "is not *liable to income tax*" under the ToA provisions. It might be argued that the benefit is chargeable (even if the individual is not liable) but is considered that a benefit where the motive defence applies is a capital payment: it is not chargeable to IT within the meaning of the capital payment definition.

30.12.5 *Interaction with IHT exit charge income exemption*

Section 65(5) IHTA provides an exemption from the exit charge otherwise payable under s.65:

> (5) Tax shall not be charged under this section in respect of—
> (b) a payment[69] which
> [i] is (or will be) income of any person for any of the purposes of income tax or
> [ii] would for any of those purposes be income of a person not resident in the UK if he were so resident ...

I refer to this as **"the exit charge income exemption"**.

If a UK resident beneficiary receives a benefit which is taxable in the year of receipt under s.731, it is considered that this exemption applies. The benefit is income of the recipient.

Suppose:

(1) at the time the benefit is received there is no relevant income; but
(2) the person abroad receives relevant income later in the tax year.

It is considered that the exemption still applies: the benefit is still taxable. This explains why s.65(5) refers to a payment which is *or will be* income.

Similarly, if a UK resident beneficiary receives a capital payment which is subject to income tax under OIG s.87, the capital payment is subject to income tax and the exit charge income exemption applies.

This is consistent with the object of the relief, which is to prevent a double charge to IT and IHT.

---

69 Section 63 IHTA provides:
"In this Chapter, unless the context otherwise requires ... "payment" includes a transfer of assets other than money".

What if the beneficiary is non-resident? The relief applies because the payment "would for IT purposes be income of a person not resident in the UK if he were so resident."

30.13 Computation of charge

30.13.1 *Introduction*

In outline, where an individual receives a benefit, s.731 imposes a charge on the lesser of:
(1) the value of the benefit; and
(2) the amount of relevant income in relation to that individual.[70]
However, the details are more complicated than this outline suggests.

The computation is governed by s.733 ITA. This is only a computation provision. It does not apply unless the five fundamental conditions of s.732 are met. I refer to the computation made under s.733 as "**the s.733 computation**". There are six steps in the computation.

The rewrite legislation is defectively drafted (it reproduces defects from the source legislation and adds some new ones). It could serve as a case study as to how much obscurity can be found in step-based drafting, an innovation of the tax law rewrite in their search for clarity.[71] The task here is to find a construction which (if loose) will yield a workable scheme of taxation.

30.13.2 *Step 1: Total benefits*

In order to follow Step 1, we need to read it in the context of s.732 and the opening words of s.733

> **732(1)** This section applies if—
> (a) a relevant transfer occurs,
> (b) an individual who is UK resident for a tax year receives a *benefit* in that tax year.
> (c) the *benefit* is provided out of assets which are available for the purpose as a result of—
> (i) the transfer, or
> (ii) one or more associated operations,
> (d) [in short - the individual is not the transferor]

70 Contrast s.720, which in general imposes a charge on the whole of the income accruing to the person abroad.

71 See 51.10.7 (Commentary: step-based drafting).

(e) the individual is not liable to income tax on the amount or value of the *benefit* (apart from section 731).

...

733(1) To find the amount (if any) of the income treated as arising under section 732(2) for any tax year in respect of *benefits provided as mentioned in section 732(1)(c)* take the following steps.

Step 1

Identify the amount or value of *such benefits* received by the individual

[1] in the tax year and

[2] in any earlier tax years *in which section 732 has applied*.

The sum of those amounts and values is "the total benefits".

I (slightly reluctantly) adopt the statutory terminology and refer to benefits within step 1 as "**Total Benefits"**. I refer to benefits within Step 1[1] as **"present year Total Benefits"** and benefits within [2] as **"earlier year Total Benefits"**.

There are two obscure references in Step 1:

(1) Which benefits are counted as Total Benefits? One does not identify *all* benefits received by the individual, but only "such benefits". The drafter has overlooked the basic rule that "such" ought only to be used when it refers to a clear antecedent.

(a) On one view, "such benefits" refers back to the words in the first sentence of s.733(1): "benefits provided as mentioned in s.732(1)(c)". So "such benefits" refers to all benefits which meet the benefit causation condition.

(b) On another view,"such benefits" refers back to s.732(1) which uses the word benefit three times. "Such benefits" means benefits in respect of which all five fundamental s.731 conditions are satisfied (not just the benefit causation condition).

The difference between the two views is, for instance, that on the first view an income-taxable benefit can count as "such benefits" and on the second view an income-taxable benefit does not count (because of the s.731 capital condition). Likewise, on the first view a benefit received by a non-resident can count as "such benefits" but on the second view it cannot (because of the s.731 residence condition).

The second view is to be preferred as it yields more sensible results.[72]

(2) Which benefits from earlier years are Total Benefits? One does not

72 If one adopted the first view one could avoid the problems which arise by a generous application of s.743 ITA (no duplication of charges) but it is better to avoid that solution since the relief depends on HMRC discretion.

count *all such benefits* received by the individual, but only such benefits in tax years "in which s.732 has applied". It is not of course enough that *section 732 applies,* for the section no doubt applies every year to some taxpayer or other. Section 732 must apply having regard to the circumstances of the transfer or the individual in the earlier year.

If this is right, the definition of "Total Benefits" can be expanded to mean the following:

[1] *Present year total benefits* must meet the following conditions (in order to be "such benefits"):

(a) a relevant transfer has occurred
(b) an individual who is UK resident for the present tax year ("B") receives a benefit in that tax year
(c) the benefit is provided out of assets which are available for the purpose as a result of—
  (i) the transfer, or
  (ii) one or more associated operations,
(d) B is not the transferor; and
(e) B is not liable to income tax on the benefit (apart from section 731).

[2] *earlier year benefits* must meet the following conditions (in order to be "such benefits" and to meet the requirement that s.732 applies in the year):

(a) The relevant transfer has occurred
(b) B was UK resident for the earlier year and received a benefit in the earlier year ("the earlier year benefit").
(c) the earlier year benefit is provided out of assets which are available for the purpose as a result of -
  (i) the same transfer as [1] (a) above, or
  (ii) the same associated operations as [1] (c) above
(d) B is not the transferor, and
(e) B is not liable to income tax on the earlier year benefit (apart from section 731).

30.13.3 *Step 2: Total untaxed benefits*

"Total Untaxed Benefits" has a relatively commonsense definition. Step 2 provides:

> Deduct from the total benefits the total amount of income treated as arising to the individual under section 732(2) for earlier tax years as a result of the relevant transfer or associated operations.
> The result is "the total untaxed benefits".

We need a label to describe the deduction, as it is impossible to follow a discussion which refers more than once to "the total amount of income treated as arising to the individual under section 732(2) for earlier tax years as a result of the relevant transfer or associated operations". I refer to the deduction as "**prior year s.731 income**".

A straightforward example is if:

(1) Year 1: B receives benefit £100.

(2) Year 2: B receives benefit £100.

The Totals Benefit is £100 + £100 = £200. But assuming in year 1 B was treated as receiving £100 s.731 income, then the prior year s.731 income is deducted, so Total Untaxed Benefits are computed thus:

Total Benefits	£200
Prior year s.731 income	-£100
Total Untaxed Benefits	**£100**

Section 734 ITA provides for another deduction from Total Untaxed Benefit: since this only arises infrequently I deal with it separately below; see 30.14 (Section 733 computation when benefit subject to CGT).

30.13.4 *Steps 3 and 4: Relevant income and total relevant income*

Steps 3 and 4 concern relevant income and total relevant income, and are discussed as a separate topic below.

30.13.5 *Step 5: Available relevant income*

Step 5 provides:

> Deduct from total relevant income—
>
> (a) the amount deducted at Step 2 [ie prior year s.731 income], and
>
> (b) any other amount which may not be taken into account because of section 743(1) and (2) (no duplication of charges).
>
> The result is "the available relevant income".

The deduction in Step 5(b) is discussed in 31.6 (Double-counting relief).

What is the reason for the deduction in Step 5(a)? ITA EN explains a double taxation problem in the pre-ITA law:

> Section 740 of ICTA [now s.731 ITA] leaves several questions unanswered.
>
> It provides that
>
> [a] if the relevant income exceeds the benefit, the amount or value of the benefit is chargeable to income tax in the individual's

hands,

[b] but does not make provision about the treatment of the excess of the relevant income over that amount.

[c] Taken literally and in isolation, section 740(2)(a) suggests that whenever a benefit is received the amount or value of the benefit must be compared with *all* the relevant income that has arisen on or after 10 March 1981, regardless of whether the receipt of previous benefits has involved charges by reference to that income before.[73]

For instance, if the relevant income is only £100, and T receives benefits of £100 annually, T would appear to be taxed each year on £100, so the relevant income in effect comes into charge again and again. I refer to this as **"the RI multiple counting problem"**. I confess I had not noticed the problem, but point [c] seems correct if one takes the words "literally and in isolation" (which is of course never the right approach to a statute).

The EN then give two independent reasons why no problem arose, that is, it identifies two pre-ITA solutions to the RI multiple counting problem:

> But
>
> [1] relevant income is defined as income that can directly or indirectly be used to provide a benefit in the tax year [ie in the year that the tax charge arises], and
>
> [2] section 744(1) and (2)(c)[74] of ICTA [now s.743 ITA] prevent the same relevant income being taken into account more than once.
>
> It is therefore considered that the *surplus* relevant income *(if it continues to be available)* has not been taken into account and so must be carried forward year by year until extinguished by a benefit or benefits. Section 733 of this Act gives effect to this view by providing [only] for *surplus* relevant income to be carried forward.[75]

Note that it is assumed in solution [1] that in order to identify the amount of relevant income, one asks whether income can be used to provide a

---

73 Section 740(2) ICTA provided so far as relevant:
" ... the amount or value of any such benefit as is mentioned in subsection (1) above, ... shall— (a) to the extent to which it falls within the amount of relevant income of years of assessment up to and including the year of assessment in which the benefit is received, be treated for all the purposes of the Income Tax Acts as the income of the individual for that year".

74 The original erroneously reads: (2)(b).

75 Change 1113, p.472; emphasis added.

benefit at the time the tax charge arises, ("if it continues to be available") not at the time that the relevant income accrues.

Example 1: one beneficiary

Suppose a trust with Total Relevant Income of £200 and:
(1) Year 1: B receives a benefit (£100) and £100 s.731 income. Assume the benefit is not paid out of relevant income.
(2) Year 2: B receives another benefit (£200).
The computation in year 2 goes as follows:
Step 1: The Total Benefits of B are £300.
Step 2: The Total Untaxed Benefits of B are computed thus:

Total Benefits	£300
Prior year s.731 income	- £100
Total Untaxed Benefits:	**£200**

Steps 3 and 4: The Total Relevant Income is £200.
Step 5: The Available Relevant Income is computed thus:

Total Relevant Income	£200
prior year s.731 income	- £100
Available Relevant Income:	**£100**

Step 6: the amount of s.731 income in year 2 is the lower of Total Untaxed Benefits and Available Relevant Income = £100.

That is fair and reasonable and tax law rewrite's solution to the RI multiple counting problem has worked.

Example 2: two beneficiaries

Now suppose a trust with Total Relevant Income of £200 and:
(1) Year 1: B receives a benefit (£100) and £100 deemed income under s.731.
(2) Year 2: C (not B) receives a benefit (£200).
The computation for C in year 2 goes as follows:
Step 1: The Total Benefits of C are £200.
Step 2: The Total Untaxed Benefits of C are £200 (nothing is deducted).
Step 5: Total Available Income = £200: There is no deduction from the Total Relevant Income under Step 5(a) because nothing is deducted at Step 2.
Here the Step 5(a) deduction does not prevent double taxation. The tax law rewrite team have only partly solved the RI multiple counting problem which (on a literal reading and taken in isolation) they identified. They have solved the problem where the *same* beneficiary receives benefits in

different years. They have not solved it where *different* beneficiaries receive benefits in different years. Why is C not taxed on £200?

C must fall back on one of the two pre-ITA solutions identified by the tax law rewrite team:

(1) that distributed income ceases be relevant income (because it ceases to be available); so the amount of relevant income is only £100 (assuming B's benefit is a distribution of relevant income); or (if relevant income is not distributed):
(2) Step 5(b): double counting relief.

Solution (2) applies if the distribution to B did not consist of relevant income. It depends on HMRC discretion, but that was the position before the ITA rewrite, so nothing has changed.

Example 3: one beneficiary receives a distribution of relevant income

The second difficulty is that the rewrite team solution – a deduction for prior year s.731 income – does not link in with the first of the pre-ITA solutions to the RI multiple counting problem. Suppose a slight variant to example 1: a trust with Total Relevant Income of £200 and:

(1) Year 1: B receives a benefit (£100) and £100 s.731 income. Assume the benefit *is* paid out of relevant income.[76]
(2) Year 2: B receives another benefit (£200).

The computation in year 2 goes as follows:

Step 1: The Total Benefits of B are £300.

Step 2: The Total Untaxed Benefits of B is computed thus:

Total Benefits	£300
Prior year s.731 income	- £100
Total Untaxed Benefits:	**£200**

Steps 3 and 4: The Total Relevant Income is £100 (because £100 has already been distributed and is not available to provide a benefit.)

Step 5: The Available Relevant Income appears to be:

Total Relevant Income	£100
prior year s.731 income	- £100
Available Relevant Income:	**£0??**

B should have £100 s.731 income in year 2, not £0! I think that the best solution is to say that where relevant income is distributed, no further deduction is allowed at Step 5, so there is no double deduction. Though

76 For instance, trust income is accumulated and then paid to the beneficiary as capital.

this is reading a good deal into the provision.

30.13.6 *Section 733 computation where s.731 remittance basis applies*

Where the s.731 remittance basis[77] applies, s.731 income is still treated as accruing to the foreign domiciled individual under s.731, even though not remitted. So the s.731 remittance basis does not prevent a deduction under Step 2 (and Step 5(a)) if applicable.

Suppose the facts of example 1 or 3 above, but the benefit which B received in year 1 was an unremitted foreign benefit which qualified for the s.731 remittance basis. The computations are exactly the same. Thus benefits to B within the s.731 remittance basis reduce available relevant income in relation to B (whether or not made out of relevant income) just as where the arising basis applies.

Suppose the facts are as in example 2 above, but the benefit which B received in year 1 was a foreign benefit which qualified for the s.731 remittance basis. There is as before no deduction under Step 2 or Step 5, but C must fall back on the two pre-ITA solutions to the RI multiple counting problem:

(1) that distributed income ceases be relevant income (because it ceases to be available); or (if relevant income is not distributed):
(2) Step 5(b): double counting relief.

Solution (2) depends on HMRC discretion, but it is considered that the relief ought to apply to relieve C. Of course, B may not agree. Suppose a variant of example 2:

Example 4: two beneficiaries (one taxed on remittance basis)

Suppose a trust with Total Relevant Income of £200 and:

(1) Year 1: B receives a benefit (£100) and £100 deemed income under s.731. B is a remittance basis taxpayer and does not remit the benefit so no tax is due.
(2) Year 2: C receives a benefit (£200).
(3) Year 3: B receives the benefit in the UK.

The computation for C in year 2 is the same as example 2:
Step 1: The Total Benefits of C are £200.
Step 2: The Total Untaxed Benefits of C are £200 (nothing is deducted).
Step 5: Total Available Income = £200: There is no deduction from the

77 See 30.35 (Section 731 remittance basis).

Total Relevant Income under Step 5(a) because nothing is deducted at Step 2.

Is C taxed on £200? C must fall back on one of the two pre-ITA solutions identified by the tax law rewrite team:

(1) that distributed income ceases be relevant income (because it ceases to be available); so the amount of relevant income is only £100 (assuming B's benefit is a distribution of relevant income); or (if relevant income is not distributed):

(2) Step 5(b): double counting relief.

If the distribution to B did not consist of relevant income solution (2) is the only one available. It depends on HMRC discretion but it is considered that it ought to be allowed. It follows that C will be taxed in year 3. C may argue that B ought to be taxed and B's may be subject to tax remittance should be tax free, but that seems less "just and reasonable". That is consistent with the s.87 rules where a s.2(2) amount (trust gain) may be matched to a capital payment to a remittance basis taxpayer.

30.13.7 *Step 6: Computation of charge*

We have at last reached the final step of the s.733 computation. Step 6 is as follows:

> Compare the total untaxed benefits and the available relevant income.
> The amount of the income treated as arising under section 732(2) for any tax year is the total untaxed benefits unless the available relevant income is lower.
> If the available relevant income is lower, it is the amount of income treated as so arising.

That is, the s.731 income is the lesser of:

(1) Total Untaxed Benefits; and

(2) Available Relevant Income.

30.13.8 *Section 733 computation: Commentary*

The reader who has laboriously followed the text to this point will agree that s.733 needs to be rethought and rewritten.

30.14 Section 733 computation when benefit subject to CGT

Section 734 ITA provides:

> **Reduction in amount charged: previous capital gains tax charge**
> (1) This section applies if—

(a) benefits provided as mentioned in section 732(1)(c) are received in a tax year,

That is, the benefit is in principle taxable under s.731.

(b) for that tax year the whole or part of any benefits so provided is a capital payment to which section 87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 applies (chargeable gains: gains attributed to beneficiaries),

That is, the benefit is in principle taxable under s.87.

(c) it is such a payment because the total untaxed benefits[78] exceed the available relevant income (see Step 6 in section 733(1)) and so it is not treated as income arising to the individual under section 732(2), and

That is, the benefit was not subject to income tax for lack of relevant income.

(d) because of that capital payment chargeable gains are treated as accruing to the individual in that or a subsequent tax year under any of the provisions referred to in para (b).

The CGT charge applies under the rules set out in 30.12 (Is a benefit within s.731 a capital payment?).

(2) For any tax year after one in which such chargeable gains are so treated, the amount of income treated as arising to the individual under section 732(2) in respect of benefits provided as mentioned in section 732(1)(c) as a result of the transfer or operations in question is calculated as follows.
(3) The amount is calculated under section 733(1) as if the total untaxed benefits were reduced by the amount of those gains.

This ensures that a benefit charged under s.87 is not later also charged to IT.

30.15 "Relevant income": Definition

"Relevant income" is a central but perplexing concept. The absence of litigation on the subject is because HMRC have in practice generally

78 Section 734(4) provides:
"In this section 'the total untaxed benefits' and 'the available relevant income' have the same meaning as in section 733(1) (see Steps 2 and 5)."

applied the legislation in a way which leads to a sensible result.

Section 733(1) Step 3 provides the definition:

> *Step 3*
> Identify the amount of any income which—
> (a) arises in the tax year to a person abroad, and
> (b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.
> That amount is "the relevant income of the tax year" in relation to the individual and the tax year.

The condition in Step 3(a), income arising to a person abroad, is the same as in the transfer of asset conditions.[79]

Strictly one should not use the term "relevant income" in the abstract. Relevant income can exist only *in relation to an individual*. There may be relevant income in relation to A which is not relevant income in relation to B (eg income of a discretionary trust under which A can benefit and B cannot). There may be relevant income in relation to anyone in the world (eg income of a discretionary trust with a power to benefit anyone in the world). But where the context is clear, one may refer to "relevant income" in isolation (leaving the words "in relation to the individual" and the identity of that individual to be inferred from the context).

The s.731 concept "relevant income" must not be confused with "relevant foreign income."

30.16 Deemed income of person abroad

30.16.1 *Capital deemed to be income*

Although the statute refers to "income", capital receipts of the person abroad are sometimes treated for tax purposes as income of the person abroad, and such receipts can therefore be relevant income.[80]

30.16.2 *Stock dividends and accrued income profits*

Suppose non-resident trustees receive a stock dividend from a UK

---

79 See 28.5 (Income "becomes payable" to person abroad).

80 See:
(1) 28.13 (Capital receipts deemed to be income).
(2) 33.7.2 (Non-resident company or institution).
(3) 35.10 (OIG arising to non-resident trust).

company. In that case "income is *treated* as arising to the trustees": see s.410(3) ITTOIA. The amount is deemed "income" for ToA purposes, but it is considered that it is not relevant income. The amount is fictional so one cannot say that it "can" be used for the benefit of any beneficiaries. The shares issued in the stock dividend can be used for that purpose, but they are not the same income.[81] The distinction between a gain and an amount equal to the gain is one on which HMRC insist in a DTA context;[82] here the distinction between the actual stock dividend and the fictional income is similar but clearer.

The same point arises if a person abroad is treated as receiving AIP income. The amount is treated as income becoming payable to the person abroad for ToA purposes[83] but it is considered that it is not relevant income. The amount is fictional so one cannot say that it "can" be used for the benefit of any beneficiaries. The proceeds of the AIP securities can be used for that purpose, but that is not the same income.

HMRC may argue that one should carry through the deeming:[84] if the person abroad is treated as receiving income, the (deemed) income must be treated as if it can be used to benefit beneficiaries (even though it does not exist). If that were right, however, two difficulties would arise:

(1) How would the rule that distributed income is not relevant income[85] operate in this context? In order to distribute the AIP income would it be necessary to distribute the entire proceeds of the transfer (sale) of the security? Perhaps the matter would be analogous to the DDS scheme.[86] Then the only way to avoid relevant income by distribution would be to distribute the entire proceeds of the securities. Perhaps a division would be possible as it is under the mixed fund rules.[87]

(2) How does one deal with AIP loss relief? This tends to support the view that AIP income is not relevant income.

---

81 See to 28.13 (Capital receipts deemed to be income).

82 See 59.2 (Characterisation).

83 See 37.14 (Transfer of assets abroad).

84 For the general approach to deeming provisions, see App 2.1 (Construction of deeming provisions).

85 See 30.23 (Relevant income of trust distributed as income in year it arises) to 30.27 (Distributed income: HMRC view).

86 See 38.12.1 (Section 731 ITA).

87 See 37.9.2 (Mixed funds and separating income/capital: sale with accrued interest).

30.17 Is income of life tenant relevant income?

Consider an interest in possession trust: one where the trust income is payable to a beneficiary ("L").

If L is UK domiciled and resident, the trust income is not relevant income because it does not meet the condition in Step 3(a). It does not arise to a person abroad.

If L is not UK domiciled then the condition in Step 3(a) is satisfied. Nevertheless, the trust income is not relevant income because it is distributed.[88]

There is nothing surprising in this conclusion: there is no need for s.731 in these circumstances, and one would not expect it to apply. If it did apply there could be double taxation – L being taxed on the income L receives, and on other benefits (if L receives any) to the value of the relevant income.

30.18 Is trust income within s.624 relevant income?

One must consider UK resident and domiciled settlors separately from those who are non-resident or domiciled.

30.18.1 *UK resident and domiciled settlor*

Suppose:

(1) a non-resident discretionary trust within s.731;

(2) a UK resident and domiciled settlor ("S") has an interest in the trust.

All the trust income is within the scope of s.624 ITTOIA. Section 624 ITTOIA provides in such a case:

> Income which arises under a settlement is treated for income tax purposes as the income of the settlor *and of the settlor alone* ...
> (Emphasis added)

---

88 See 30.23 (Relevant income of trust distributed as income in year it arises). Even if that were wrong:

(1) The trust income is not relevant income in relation to L. One would not say in ordinary language that the trust income *can* be used for providing a benefit for L. The income *is* the property of L.

(2) The trust income is not relevant income in relation to any other person. Since the income belongs to L, one cannot say that the income "can" be used to benefit anyone else. See 30.20 (Income which "can" be used to benefit another person).

The trust income is not relevant income as it does not meet the condition in Step 3(a): the income is treated by s.624 as accruing to S, so it cannot be regarded as arising to a person abroad. This is so even if S (wrongly) fails to pay the tax due on the income.

30.18.2 *UK resident foreign domiciled settlor*

Now suppose:

(1) a non-resident discretionary trust within s.731;
(2) a UK resident but not UK domiciled settlor ("S") has an interest in the trust; and
(3) the trust income is actually subject to tax under s.624 ITTOIA (the s.624 remittance basis does not apply).[89]

In this case the condition in Step 3(a) is satisfied since even applying s.624 the income is treated as accruing to S. However, it is considered that the condition in Step 3(b) is not satisfied: if the income is treated as that of S, and of no other person, it is not income which "can be used for providing a benefit" for anybody else. So the income is not relevant income.

The position is different if and to the extent that the income is within the s.624 remittance basis. Section 624 does not apply to income which qualifies for the s.624 remittance basis.[90] Accordingly the trust income can, in principle, be relevant income for s.731. What happens then if the income is later remitted, so it becomes taxable on S under s.624? It is tentatively suggested that the income retrospectively ceases to be relevant income, so that tax paid under s.731 can be recovered by a beneficiary. In practice this could arise only in fairly unusual circumstances, eg where:

(1) Year 1
    (a) a beneficiary ("B") receives a benefit;
    (b) foreign source income arises on which the settlor ("S") is not subject to tax as the s.624 remittance basis applies. This is relevant income in relation to B, so B pays tax under s.731.
(2) Year 2: that income is remitted to the UK, so S pays tax under s.624.

Where s.720 applies (as well as s.624) see 30.19 (Is income within s.720 relevant income?).

---

89 This may be because there is UK source income, or foreign income is received in the UK, or S does not claim the remittance basis. See 27.4 (Section 624 remittance basis).

90 See 27.4 (Section 624 remittance basis).

30.18.3 *Non-resident settlor*

Suppose now:
(1) a non-resident discretionary trust within s.731; and
(2) a non-resident settlor ("S") has an interest in the trust.
Section 624 does not apply to foreign source trust income.[91] Accordingly foreign source income may in principle be relevant income.

Section 624 does apply to UK source income. Here too it is submitted that the condition in Step 3(b) is not satisfied: if the income is treated as that of S, and of no other person, it is not income which "can be used for providing a benefit" for anybody else. So UK source income is not relevant income.

30.19 Is income within s.720 relevant income?

The analysis is different if income falls within s.720 and not s.624 because the wording of the provision is different.

The application of s.720 does not prevent income from being relevant income, as the s.720 income is different income from the income of the person abroad,; see 59.5 (DT reliefs: s.720 ITA). Double-counting relief prevents a double charge.[92] This is surprising, because it is not clear who qualifies for the relief: the transferor or a beneficiary who receives a benefit. But it is difficult to construe the legislation any other way.

30.20 Income which "can" be used to benefit another person

An essential feature of the definition of relevant income in relation to an individual is the condition in Step 3(b) that the income "can be used for providing a benefit" for the individual.

"Can", like most common words, has a variety of meanings, but the meaning here must be:

> Expressing a possible contingency; = May possibly.[93]

---

91 See 27.6 (Non-resident settlor).

92 See ? (Section 720 and s.731 overlap).

93 *Oxford English Dictionary* (2nd ed., 1989). Another meaning of "can" is "to be able; to have the power, ability or capacity". This meaning applies where one says that a *person* "can" do something. This meaning is not applicable here where the subject of "can" is the income. *Income* does not have any power, ability or capacity: only a *person* does. There is a fine discussion of *can* in Williams, *Tradition & Change in Legal English* (2005), at 2.8.

30.20.1 *Income of individual*

Of course, any income "can" be used for the benefit of any individual in the world if it is received by a beneficial owner who so directs. That contingency must plainly be ignored or the definition does not work.[94]

30.20.2 *Income received by company owned by individual*

Suppose an individual, T, transfers assets to a non-resident company all the shares of which T owns absolutely. Assume the transfer does not qualify for the motive defence. So long as T remains owner of the company, the income of the company is not relevant income in relation to any person (other than T[95]).

For the position if T later gives the company to a trust, see 30.31 (Is income of company held by a trust relevant income?).

30.20.3 *Income of trust only payable to B on remote contingency*

Now consider this type of trust,[96] divided into two sub-funds:

(1) A's sub-fund: income to be applied for the benefit of A or accumulated; capital to be paid to A at the age of 25; if A dies under

---

94 The issue is not so much the meaning of the word "can": if income is paid to A it is obvious that it "can" (in the sense of "may possibly") be paid to B if A so directs. The better way to put the issue is: which hypothetical contingencies should be taken into account in order to ask the question whether or not income "can" be used for providing a benefit?

The question is similar to the issue which arises for the purposes of the settlement provisions, whether income "may" be used to benefit the settlor "in any circumstances whatsoever". These words do not include the possible circumstance that there may be "a mere voluntary application of income by a beneficiary to the settlor": see *Glyn v IRC* 30 TC 321 at 329. A similar question arose in reverse in *Inglewood v IRC* [1983] STC 133. The question was whether one could say that a beneficiary "will" become entitled to an interest in possession: held that one should ignore the contingency that the beneficiary may not become entitled by virtue of the beneficiary voluntarily assigning the interest to another person.

Another way to reach this conclusion is to say that the income "can" be used to benefit the individual, but not "as a result of the relevant transfer or associated operations" (the application of the income by the beneficial owner not counting as an associated operation).

95 Strictly the income of the company may be relevant income in relation to T, but T is not concerned with s.731 as T will qualify for the transferor's s.731 defence.

96 This was quite a common form before the abolition of relief for Accumulation and Maintenance trusts in 2006.

25, the share accrues to B's share.

(2) B's sub-fund is held on similar terms: income to be applied for the benefit of B or accumulated; capital to B at 25 with accrual to A if B dies under 25.

Suppose income is accumulated on A's sub-fund. It is relevant income in relation to A. Is it relevant income in relation to B? It is payable to B only on the contingency that A dies under 25. It is suggested that this income is not relevant income in relation to B. One would not, in normal language, say that the income "can" be used to benefit B just because A may die under 25. The contingency is too remote.

If A dies under 25:

(1) income of A's sub-fund arising after the death of A is (of course) relevant income in relation to B;

(2) income of A's sub-fund arising before the death of A subsequently becomes relevant income in relation to B if the "timing" issue discussed below is correctly answered.

If this is correct, the concept here is not the same as in s.624 ITTOIA, where the issue is whether income "may become payable" to the settlor *in any circumstances whatsoever*.[97] Applying (as one should) a purposive approach, this is the fair and just result and consistent with the general scheme of s.731. A settlor or transferor has the opportunity to exclude themselves completely in a straightforward manner, and is taxed if they fail to do so. A beneficiary (not the settlor/transferor) does not have the same opportunity. To tax B on income of A's fund (on the facts of the above example) would not be just or fair.[98]

30.20.4 *Income of discretionary trust*

Conversely, consider a common form discretionary trust. In principle, all trust income "can" (in the sense of "may possibly") be used to benefit any beneficiary, if the trustees exercise their discretion, and that is a

---

97 See Williams, *op. cit.* p.139; *may* (compared with *can*) "tends to convey a more hypothetical degree of possibility". It is reasonable to assume that the drafter of the transfer of assets provisions did not copy the language of the settlement provisions because a different result was intended.

98 Some support can be found in the discussion of "can" (albeit in a different context) in *Mandla v Dowell Lee* [1983] 2 AC 548 at p.565. A similar unfairness does arise for CGT under s.87 TCGA. However, it is possible to avoid that by transfers to another settlement.

contingency which naturally should be taken into account. Trust income is relevant income in relation to all beneficiaries.

Suppose, however, the trustees (perhaps guided by a letter of wishes) regard the fund as divided into (say) two shares for separate families. If there is no practical possibility that more than one half of the income will be used for one particular beneficiary, there is a reasonable argument that only one half of the income is relevant income in relation to that beneficiary.

Trustees of a common form discretionary trust have power to benefit anyone in the world. However, in practice the trustees will wish to identify a more limited class, and it is arguable that trust income is not relevant income in relation to other (theoretically) potential beneficiaries.

30.21 When does one ask?: The timing issue

One must ask whether income "can" be applied for the benefit of an individual. *At what moment in time does one ask this question?*

(1) It often happens that, at the moment it arises, income can be used to provide a benefit for a person, B, but at a later point in time it cannot be so used; for instance if income of a discretionary trust is:
   (a) distributed to another individual (not B);
   (b) transferred to another trust (under which B cannot benefit); or
   (c) retained by the trustees, but on terms under which B cannot benefit; or
   (d) used to pay trust expenses.

(2) The converse also sometimes happens: at the moment it arises income cannot be used to provide a benefit for B, but at a later time it can be so used; for instance:
   (a) if B is born after the income arises;
   (b) if one share of a trust fund later accrues to another share (eg on the death of a beneficiary);[99] or
   (c) (arguably) where a company within s.731, wholly owned by A, which has accumulated income during A's ownership, is later given to B or to a trust under which B can benefit.[100]

So it is often important to ask at what moment in time one puts the question. I refer to this as **"the timing issue"**. There are in principle

---

99 See 30.20.3 (Income of trust only payable to B on remote contingency).

100 See 30.31 (Is income of company held by a trust relevant income?).

several possible answers:
(1) the moment that the income arises;
(2) the moment that the benefit is provided, if later than (1);
(3) after a "reasonable" period (whatever that might be);
(4) the end of the tax year in which either (1) or (2) or (3) occurs;
(5) the earlier or later of some combination of the above.
An important consequence of all solutions except (1) is that trustees of a discretionary trust or company within s.731 would usually have some period of time after income has accrued, during which they may:
(1) distribute income; or
(2) apply the income in the payment of expenses.
Then the income will not be relevant income in relation to the beneficiaries because *at the moment when one asks the question* it is no longer income which "can" be applied for the benefit of the beneficiaries.

To answer the timing question we must return to the legislation. Section 733 ITA Steps (3) and (4) provide:

> *Step 3*
> Identify the amount of any income which—
> (a) arises in the tax year to a person abroad, and
> (b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.
> That amount is "the relevant income of the tax year" in relation to the individual and the tax year.
> *Step 4*
> Add together the relevant income of the tax year and the relevant income of earlier tax years in relation to the individual (identified as mentioned in Step 3).
> The sum of those amounts is "total relevant income".

Steps 3 (taken with step 4) can be read in various ways:

> *Step 4*
> Add together
> [1] the relevant income of the tax year *being the amount of any income which—*
> *(a) arises in the tax year to a person abroad, and*
> *(b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.*

and
[2] the relevant income of earlier tax years in relation to the individual *being the amount of any income which—*
(a) arises in the [earlier] tax year to a person abroad, and
(b) as a result of the relevant transfer or associated operations can
[i] [at any time in that earlier year] **or**
[ii] [at the end of the earlier year] **or**
[iii] [at the time that the benefit is conferred, or the time that the income arises if later]
be used directly or indirectly for providing a benefit for the individual.

(In this quote the words in normal font are the words of Step 4; the words in italics are the words of Step 3; the words underlined are added; note that some words must be added in any event.)

In clause [2][b] readings [i] [ii] [iii] are alternatives.

It is considered that one looks to the position at the later of:
(1) the end of the tax year in which the relevant income has accrued, or
(2) the end of the tax year in which the benefit accrues.
One asks whether *at that time* the income:

> can ... be used for providing a benefit for the individual.

Another way to put it is that one asks the question with the benefit of hindsight, taking into account facts known at the time that the question matters.

The main reason for this view is that it is more sensible to ask the question at the time it matters.

The moment the income arises is not a suitable moment to ask the question. In some cases it is impossible to ascertain the moment at which income arises and all that the tax system attempts is to attribute income to an accounting period or year of assessment.[101] In other cases it is only possible to ascertain a moment at which income arises by rules of a somewhat arbitrary kind.[102] Similarly, the moment that the benefit arises is not a suitable moment. Some benefits (such as interest-free loans) also arise over a period. Moreover it is not practical to have to compute relevant income on every separate occasion that a benefit is provided during the year.

---

101 eg trading or property income.
102 eg the rules in ss.18–19 ITEPA (When general earnings are received).

The legislation does not provide an express answer, but it does offer at least a hint in support of this view. Step 3 does not refer to "relevant income" in isolation. It refers to relevant income *of the tax year in relation to ... the tax year*. It is obviously necessary to attribute relevant income to a tax year, eg to deal with the situation where:

(1) an individual receives a benefit in year 1;
(2) the benefit is not taxed because there is no relevant income in year 1;
(3) relevant income arises in year 2.

There is only relevant income *of year 2* and so the s.731 charge arises in year 2 and not in year 1. However, the reference in Step 3 is to income of the tax year *in relation to the tax year*. These extra words suggest that the relevant income of tax year 2 in tax year 2 may be different from the relevant income of tax year 2 in tax year 3. In year 3 one must ask again what is the relevant income of year 2.[103]

The Tax Law Rewrite agree. ITA EN provides:

> It is therefore considered that surplus relevant income (*if it continues to be available*) has not been taken into account and so must be carried forward year by year until extinguished by a benefit or benefits.[104]

30.22 Relevant income used to pay expenses

HMRC practice is that income used to pay trust or company administration expenses will reduce relevant income.

ToA draft guidance provides:

> **INTM601680 relevant income**
> *Example 1*
> A foreign company with investment business has interest income of £100,000 for a tax year. It pays costs for management of the company of £25,000 out of its income. Assuming all other conditions for a benefits charge are met, the relevant income of this company for that purpose would be considered to be £75,000, the amount that can be used for providing a benefit.
> It is worth noting that if the income of this company fell to be taken into account for the purpose of the income charge [s.720] the amount of the income for that purpose would be considered to be £100,000.

---

103 I have considered whether any guidance is to be found in the principle that income tax is an annual tax. However, that does not shed much light on the problem.

104 The EN passage is discussed in 30.13.5 (Step 5: Available Relevant Income).

This applies even to income used for capital (rather than income) expenditure. Income used to meet a statutory indemnity ceases to be relevant income (even a CGT indemnity, ie a capital liability):

> **CIOT Letter (extract)**
> It would also be helpful if the Revenue could confirm that if the trustees do in fact make a payment to the settlor in response to a request for reimbursement, either under [s.646 ITTOIA] or under para 6 of Schedule 5 to TCGA, such a payment would not be regarded as: ...
> (b) Taken into account for [s.731 ITA] purposes...
> **The Revenue reply** ...
> (b) *it will reduce the relevant income if paid out of income* but will not be a payment [ie not a benefit.][105]

Income used to pay a sum in lieu of interest ceased to be relevant income (even though the payment is of a capital nature). Tax Bulletin 8 provides:

> ESC D41 allowed, inter alia, demand loans made to offshore trustees on better than commercial terms before 19 March 1991 to be put on commercial terms after that date. This enabled a trust to remain outside the condition in para 9(3), Schedule 5, TCGA 1992. In order to meet the terms of this concession, it may have been necessary to pay a sum in lieu of interest in respect of periods ended 5 April 1992. Where this was the case, such a payment would ... qualify as a deduction ... *for the purposes of [s.731 ITA] provided it was paid out of trust income*.
> Where the amount in lieu of interest was paid to a person who is not a beneficiary under the terms of the trust, it would nevertheless be treated as a capital payment to that individual under TCGA 1992, Section 97. If the amount in lieu of interest was paid by a company underlying the trust, that payment would not qualify for a deduction from the profits of that company [because it is capital and not income].

Thus income used to pay interest ceases to be relevant income. Income used to repay borrowed capital also ceases to be relevant income; though if this principle was pushed to extremes in a tax avoidance scheme, the sum borrowed might be regarded as representing the relevant income: see 30.28 (Relevant income reinvested: tracing).

---

105 *Taxation Practitioner*, April 1996 p.25 accessible *http://www.kessler.co.uk/tfd-archive* emphasis added. For other issues relating to reimbursement see 80.24 (Failure to exercise right of reimbursement). See too 30.4.10 (Reimbursement of tax under statutory indemnity).

30.23 Relevant income of trust distributed as income in year it arises

Suppose income ("the trust income") accrues to trustees of a discretionary trust within s.731, and is distributed (as income) to a beneficiary, "B1", in the same tax year.

30.23.1 *Position of other beneficiaries*

The trust income is not relevant income in relation to any other beneficiary, since the income was distributed to B1. One cannot say that the income "can" be applied for the benefit of anyone else – if my answer to the timing issue is correct. This is significant for the other beneficiaries who receive a benefit within s.731 (whether before or after the year in which the income arises and is distributed). They will not pay tax on the benefit by reference to the distributed income, because it is not relevant income. (They may pay tax on the benefit by reference to other relevant income if there is any.)

That must be correct, because otherwise there could be double taxation (B1 taxed on trust income and another beneficiary taxed under s.731).[106]

30.23.2 *Position of recipient beneficiary*

It is suggested that the income is not relevant income in relation to B1: it is not income which *can* be used for B1's benefit; it is income which *is* used for B1's benefit.[107] This is significant for B1 if:

(1) B1 is a remittance basis taxpayer, and
(2) B1 received a benefit in the UK, and
(3) the trust income is paid to B1 and not remitted to the UK.

B1 is taxed on the RFI remittance basis on the income B1 receives from the trust. B1 is not taxed on the benefit by reference to the distributed income, because it is not relevant income. (B1 may pay tax on the benefit by reference to other relevant income if there is any.)

30.24 Relevant income of trust distributed as income after year it arises

Suppose income accrues to trustees of a discretionary trust, within s.731, and is retained (without being accumulated) in that tax year, but is

---

106 Arguably s.743 ITA would provide relief: see 31.6 (Double-counting relief). But this is not a satisfactorily solution as it is not clear who pays the tax.

107 The same argument as 30.17 (Is income of life tenant relevant income?) but not so strong.

distributed (as income) to beneficiary B1 in a subsequent year. If:

(1) a UK resident beneficiary ("B2") had received benefits in a past year, and

(2) had not paid tax under s.731 in the past year, for lack of relevant income,

B2 will pay tax under s.731 in the year in which the income arises.

Suppose, however, that there have been no earlier benefits so this is not in point. The position is then the same as in the above paragraph, if my answer to the timing issue is correct:

(1) The income is not relevant income of B1.

(2) The income is not relevant income of any other beneficiary.

It seems that this is the generally held view. STEP say:

> In our experience, most advisers take the view that, where actual income
> [1] has been segregated[108] and
> [2] in a future year is used to pay a disbursement or to make an income distribution to an individual,
> it will cease to be relevant income in relation to other individuals because it is no longer available to provide a benefit to them. HMRC have been known to accept this view.
> In practice, trustees often do not pay all relevant disbursements or make decisions regarding the use of income during the tax year in which the income arises, preferring to wait until the trusts accounts have been finalised. This may not be until some time after the tax year end and it seems inequitable to treat beneficiaries differently on the basis that the trustees have taken this view.[109]

In the ToA draft guidance, HMRC expresses a different view:

> **INTM601680 relevant income**
> *Example 1*
> A foreign company with investment business has interest income of £100,000 for a tax year. It pays costs for management of the company of £25,000 out of its income. Assuming all other conditions for a benefits charge are met, the relevant income of this company for that purpose would be considered to be £75,000, the amount that can be used for

108 Author's note: it is doubtful whether segregation of income is necessary.

109 Response to HMRC Consultation "Reform of an anti-avoidance provision: Transfer of Assets Abroad" (October 2013) *http://www.step.org/sites/default/files/response_letterhead_TransferOfAssetsAbroad.pdf*

providing a benefit...

Example 2

The same company decides at the end of the tax year to add its 'net profit' of £75,000 to its reserves. Two years later it makes a payment of £50,000 and contends this reduces relevant income. As relevant income has to be considered on a tax year by tax year basis HMRC would take the view that relevant income of the tax year remained £75,000 as in Example 1 above.

30.25 Relevant income of trust accumulated

30.25.1 *Income accumulated and retained on wide discretionary trusts*

If trustees of a common form discretionary trust accumulate income, it remains relevant income in relation to all beneficiaries as long as it is retained by the trustees, because the trust capital (which represents the accumulated income) can be used to benefit any beneficiaries.

30.25.2 *Income accumulated and retained on narrower trusts*

The position would be different if under the terms of the trust:

(1) B was in the class of beneficiaries to whom income could be paid; but
(2) B could not benefit in any way from income after it had been accumulated.

Accumulated income would cease to be relevant income in relation to B. This may happen automatically under the terms of the trust; for instance, a formerly common form of accumulation and maintenance trust provided:

(1) Income as it arises may be used for the benefit of any beneficiary under 25 ("B12", "B2" or "B3").
(2) If not so used, it is accumulated and added to the share of one particular beneficiary (B1) and can only be used for the benefit of B1 (not B2 or B3).

On receipt the income is relevant income in relation to B1, B2 and B3. After accumulation it is relevant income only in relation to B1.

A similar point arises in relation to a common form discretionary trust. Accumulated income is relevant income in relation to all the beneficiaries. Suppose the trustees exercise their overriding power to exclude B from the accumulated income, not from other trust capital. The income ceases to be relevant income in relation to B. It makes no difference whether this is done in the year of receipt or later.

Similar points arise if the income is transferred to a new trust, or if the income of a company within s.731 is capitalised by the issue of bonus

shares.

30.25.3 *Income accumulated but later distributed as income*

It has been suggested that once income is accumulated, it is forever relevant income in relation to all the beneficiaries to whom it could have been paid. Subsequent distribution is irrelevant (unless it gives rise to a s.731 charge). This view gives rise to anomalies:

(1) Some receipts which are capital for trust law purposes are treated as income for s.731,[110] and these cannot be "accumulated" in the normal trust sense. It would be odd if they were treated differently from ordinary income for s.731 purposes.

(2) Income of a company within s.731 cannot be "accumulated" in the trust sense. It would be odd if companies were treated differently from trusts.

It is considered that the process of accumulation does not by itself make any difference to the s.731 position. If income of a common form discretionary trust is accumulated, and later distributed as income to B1, it ceases to be relevant income in relation to other beneficiaries. This only applies if the sum distributed is (or represents) the accumulated relevant income. This raises tracing issues discussed below.

30.25.4 *Income accumulated and distributed as capital*

Suppose income of a common form discretionary trust is accumulated and distributed as capital to a beneficiary, B. It is considered that the income ceases to be relevant income in relation to any beneficiary except B. (It is relevant income in relation to B so that B is in principle subject to tax under s.731 if B is resident in the UK. Any other conclusion would be absurd.)

A capital distribution out of accumulated relevant income to a UK resident individual is taxable under s.731. It is not a capital payment and so does not reduce s.2(2) amounts. However the same payment to a charity or a non-resident individual will reduce s.2(2) amounts and relevant income.

30.26 Corporate income distributed to trust

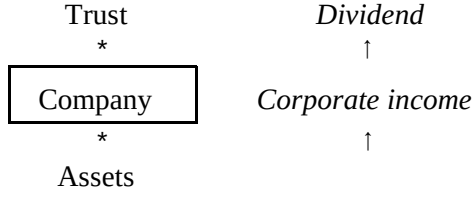
Suppose a company within s.731 is held by a common form discretionary

110 See 28.13 (Capital receipts deemed to be income).

trust within s.731:

(1) the company receives income ("**corporate income**");
(2) the corporate income is distributed by way of dividend and retained by the trustees.

Thus:



The corporate income ceases to be relevant income so it is not counted twice. One cannot say that the corporate income and the dividend income are *both* available to provide a benefit.[111]

Suppose:

(1) a company within s.731 is held by a common form discretionary trust;
(2) the company's income is distributed by way of liquidation and retained by the trustees.

Double counting relief does not apply. It is suggested that the trustees receipt represents the relevant income, so the liquidation does not affect the s.731 position. (Any other view would allow tax avoidance and not be attractive to a court.)

30.27 Distributed income: HMRC view

RI 201 states:

> For the purposes of Section 740(3) ICTA [now s.733 ITA] the measure of "relevant income" is treated as not including such part of the income as has already been genuinely paid away to a beneficiary or to a bona fide charity.
>
> Once relevant income has arisen *and continues to be available to provide a benefit*, it must in the Revenue's view be carried forward year by year until extinguished by such a benefit, even if it is capitalised in the accounts of the overseas person.
>
> (Emphasis added)

---

111 Even if that were wrong, it is suggested that double counting relief prevents the corporate income and the dividend income from counting as relevant income; see 31.10 (Section 731 trust/company structure).

This does not address all the permutations discussed above, but it seems to be generally consistent with the above.

ToA draft guidance provides:

> **INTM601680 relevant income**
>
> Only income arising on or after 10 March 1981 can be taken into account as relevant income as the benefits charge only applied from that date (INTM601440).
>
> The different language of the benefits charge highlights the fact that what is taken into account as relevant income for the benefits charge may be somewhat different to the measure of income that may fall to be taken into account for the income charge. As it is only income that can be used which is taken into account it will be appropriate to look in most cases at any factors that may prevent income being so used. For example, any part of the income that has been genuinely paid away may not be capable of being termed as income that can be used for providing a benefit.
>
> It should however be kept in mind that relevant income has to be considered on a tax year by tax year basis so that once an amount has been determined as being relevant income of a tax year it will fall to be taken into account as relevant income in any subsequent years benefits charge calculation. It cannot be amended by, for example, a subsequent disbursement, neither will it cease to be relevant income if, for example, it ceases to be regarded as income within the structure perhaps because it has been capitalised.
>
> In considering whether any part of the income has been genuinely paid away in a manner such as it could not be regarded as income that can be used for providing a benefit, there are three broad categories of disbursements that will generally be taken into account:-
>
> - income genuinely paid away in meeting legitimate expenses;
> - income distributions paid out of income;
> - taxes paid by the person abroad out of income.
>
> It is likely to be largely a question of fact whether income can be used for providing a benefit, and regard should be had, where necessary, to relevant constituting documentation of the person abroad as well as any applicable foreign law that may have a bearing on the way the person abroad acts and operates.
>
> The following examples may help to illustrate how relevant income will generally be determined...
>
> *Example 3*
>
> A foreign trust has no income of its own, but owns a foreign company which has rental income of £100,000. The trustees make a payment out of trust capital to a beneficiary of £30,000. In considering what is

relevant income for the purposes of the benefits charge the income of both the company and the trustees is taken into account. The relevant income will thus be £100,000 as it is income that can indirectly be used for providing a benefit. The payment out of the trust does not impact that.

30.28 Relevant income reinvested: Tracing

The requirement is that "income" can be used to provide a benefit. "Income" here includes any asset representing income, even if that asset does not constitute "income" (in any sense) of the person abroad.[112] Thus it makes no difference if the relevant income is invested in another asset.

Suppose:

(1) A non-resident company held by a trust has received relevant income ("**the corporate relevant income**").

(2) The trustees sell the company to a purchaser.

It has been suggested that the corporate relevant income ceases to be relevant income in relation to the beneficiaries, because (after the sale) that income can no longer be used to benefit them. That would be absurd, but there is no difficulty in construing the legislation to avoid that absurdity. The proceeds of sale represent the corporate income, so the sale has not affected the relevant income position at all: as long as those proceeds can still be used for the benefit of the beneficiaries there is still relevant income in relation to the beneficiaries.

30.29 Tracing: distributions from mixed funds including relevant income

The principle that distributed income ceases to be relevant income applies only if the asset distributed constitutes or includes the relevant income. Whether or not this is the case raises questions of tracing.

The ideal approach is for a trust or company within s.731 to keep relevant income in a separate account. Then funds distributed from that account must be identified as the relevant income.

This section considers what happens if relevant income is mixed with other funds, and there is a distribution from the mixed fund. This is unchartered territory, but it is suggested that the law should follow the case

---

112 Similar principles apply for the RFI remittance basis; see 10.3.6 (Income/capital terminology in remittance basis context) example 4. A similar principle applies in ascertaining what is income for the definition of power to enjoy; see 29.6.6 (Enjoyment Condition D: possibility of benefit).

law and practice on pre-2008 remittance basis mixed fund rules.

30.29.1 *Distribution from trust within s.731*

Suppose:

(1) Trustees of a discretionary trust within s.731 receive relevant income and pay it to a mixed fund (ie holding income and trust capital together).
(2) They pay a sum out of that fund in exercise of a power over trust income.

It is considered that the sum distributed would be (or represent) the relevant income. Income comes out first.

Suppose:

(1) The trustees receive relevant income, accumulate it and pay it into a mixed fund (ie holding accumulated income and trust capital together).
(2) They pay a sum out of that fund in exercise of a power to apply accumulated income as income.

It is suggested that the sum distributed would be (or represent) the relevant income.

Suppose:

(1) The trustees receive relevant income, accumulate it and pay it into a mixed fund (ie holding accumulated income and trust capital together).
(2) They pay a sum out of that fund in exercise of a power to distribute capital.

It is suggested that the trustees could by appropriate documentation identify the sum distributed as the relevant income.[113] Otherwise there must be an apportionment.

30.29.2 *Distribution from company within s.731*

Suppose:

(1) A company within s.731 receives relevant income and pays it to a mixed fund (ie holding relevant income and other company funds together).
(2) The company declares a dividend.

In the absence of documentation, it is suggested, on analogy with a trust, that income comes first out of the mixed fund. If the company has only

113 See 13.12.1 (Remittance from mixture of taxed and untaxed income).

received income (ie has not realised capital gains), the dividend clearly represents the relevant income rather than share capital.

Suppose:

(1) A company within s.731 receives relevant income and pays it to a mixed fund (ie holding relevant income and other company funds together).

(2) The company repays a loan or buys in redeemable shares out of that fund.

In principle the repayment of a loan or a share buy back comes out of capital. It is tentatively suggested that the company could by appropriate documentation earmark the sum repaid as the relevant income. In that case relevant income could be distributed by repayment of a loan and so cease to be relevant income.

30.29.3 *Distribution of company shares*

Suppose a non-resident company held by a trust has received relevant income ("**the corporate income**"). If the trust transfers the company to an individual, the corporate income ceases to be relevant to beneficiaries (except the individual). If the trust transfers the company to a new trust, the corporate income is relevant income in relation to the beneficiaries of the new trust but not in relation to beneficiaries of the old trust who cannot benefit under the new trust. This is a sensible rule as it allows different branches of a family to separate their interests fairly.

30.30 Avoiding relevant income: Tax planning

One possible approach is:

(1) distribute all income (from a discretionary trust or underlying company within s.731) to a foreign domiciled settlor immediately it arises;

(2) the settlor may re-settle the income on the same trusts.

This avoids relevant income in the trust or company.[114] It would be better to have an interest in possession trust so income at the trust level will be distributed automatically. Watch the GAAR: it is best to avoid provocative circularity.

A variant of this idea is to distribute income to a beneficiary who is not the settlor/transferor, but who is non-resident (or domiciled) and so outside s.731. Watch the GAAR here.

---

114 Also this ensures that the settlor receives the benefit of distribution relief (if applicable); see 31.4 (Distribution relief).

30.31 Is income of company held by a trust relevant income?

30.31.1 *Income accruing while company held by trust*

Suppose a trust with a common form power of appointment holds an underlying company to which s.731 applies.[115] Income of the company is in principle relevant income in relation to all beneficiaries. It remains so as long as the company retains the income.

30.31.2 *Income accruing before company is acquired by trust*

Suppose:

(1) An individual ("T") owns all the shares of a company within s.731.
(2) T gives the shares to a trust with a common form power of appointment.

Income of the company arising after the gift of T is in principle relevant income in relation to the beneficiaries of the trust.

What is the status of income arising before the gift ("old income")? HMRC say that old income is also relevant income in relation to all the beneficiaries. HMRC's argument is simple: at the relevant time (when benefits are received) the old income "can" be used for the benefit of beneficiaries. The tax consequences of this are so severe that one feels it cannot be right, but what is the flaw in the argument?

At the time when the old income accrued to the company, that income "can" only be used to benefit T, the sole shareholder, so it is not relevant income in relation to anyone else. After the company has been given to the trust the same income "can" be used to benefit others. That is sufficient to meet the "can" condition, if my answer on the timing issue is correct.

However, it is not enough that income "can" be used to benefit a person. The definition of "relevant income" requires that the income can be used to benefit an individual:

> as a result of
> (i) the relevant transfer or
> (ii) associated operations.[116]

I refer to this as "**relevant income causation conditions (i) and (ii)**".

---

115 In practice the motive defence may apply to the transfer to the company; see 32.31 (Transfer from non-resident trust to underlying company).

116 The reference here is to the reference to associated operations in s.732(1)(c).

Now, in this case there are two transfers:

(1) The transfer of assets to the company ("transfer 1").

(2) The transfer of the shares in the company to the trust (an associated operation) ("transfer 2").

It is suggested that where the two transfers are not part of a single arrangement, but entirely independent, transfer 2 is not an associated operation in relation to transfer 1. So relevant income causation condition (ii) is not satisfied. Relevant income causation condition (i) is not satisfied since transfer 1 is not the cause of the fact that the income can be used to benefit the beneficiaries. The reasoning is the same as 28.11.1 (Transfer from A to B followed by transfer from B to person abroad).

30.32 Individual not a beneficiary when income arises

30.32.1 *Beneficiary unborn when income arises*

Suppose:

(1) In Year 1 a discretionary trust within s.731 receives and accumulates relevant income.

(2) In Year 2 a beneficiary is born.

Is the income accumulated in year 1 before the birth relevant income in relation to that beneficiary? The answer depends on the timing issue. If my view is right, undistributed income accumulated before birth can be relevant income in relation to the newborn beneficiary, and that view does make more sense, having regard to the general scheme of the legislation.

30.32.2 *Individual in existence but not a beneficiary when income arises*

Suppose:

(1) In Year 1 a discretionary trust within s.731 receives and accumulates relevant income. The class of beneficiaries consists of the issue of the settlor and their spouses.

(2) In Year 2 an individual ("W") marries a beneficiary and so joins the class of beneficiaries.[117]

Is the income accumulated in year 1 before the marriage relevant income in relation to W? The answer depends again on the timing issue. If my view is right, undistributed income accumulated before the marriage can be relevant income in relation to W. Those who take the view that pre-

117 It is assumed there is no power to add beneficiaries so the income could not be applied for the benefit of the individual before the marriage.

birth income is not relevant income might consistently take the view that this pre-marriage income is not relevant income. This is not quite a *reductio ad absurdum*, but it is surely a bold view. If necessary, a court would hold that W "can" benefit in year 1 because of the possibility that W may marry a beneficiary in year 2. See *IRC v Tennant* 24 TC 215. But this contingency may be very remote, so my preferred analysis is less artificial.

30.32.3 *Beneficiary dead when income arises*

Now suppose the opposite situation:

(1) Year 1: a beneficiary receives a benefit from a trust (which is not taxable for lack of relevant income).
(2) Year 2: the beneficiary dies.
(3) Year 3: relevant income accrues.

Here it is plain that there is no tax charge on the beneficiary. Income cannot be deemed to have accrued to them once they are dead.

The same applies in relation to income which accrues in the tax year of death, but after the death. One cannot say that income accruing after the death of a person "can" be applied for their benefit.

30.32.4 *Individual excluded from benefit*

Income arising after a former beneficiary is excluded from benefit cannot (on any view) be relevant income in relation to that beneficiary. It is not necessary that the beneficiary should be excluded from benefit altogether: just that they are excluded from benefit from the income.

30.33 Transfer between trusts

Section 90 TCGA provides a code dealing with transfers between settlements for the purposes of s.87 TCGA.[118] This is needed because a s.2(2) amount is computed in relation to settlements. Each settlement has a s.2(2) amount attributed to it.

Section 731 by contrast has no such need. Relevant income is *not* computed in relation to settlements. It is computed in relation to individuals. Thus a transfer of relevant income from trust 1 to trust 2 does not reduce the relevant income if the beneficiaries of trust 1 and trust 2 are the same.

---

118 See 51.32 (Rebasing: transfers between trusts).

30.34 Tax and tax credits of person abroad

This topic is not difficult to understand – at least it does not seem difficult once one has understood it. But it is impossible to summarise briefly. In order to understand the law one must carefully distinguish three concepts:

(1) The actual income of the person abroad.
(2) Relevant income for s.731.
(3) The income which is deemed under s.731 to accrue to the UK resident individual who receives a benefit ("s.731 income").

These must not be confused!

The *actual income* of the person abroad is taxed (if at all) under general principles.

Relevant income is not taxed as such: it is merely something computed as a part of the process of ascertaining the amount of s.731 income.

Section 731 deemed income is taxed at the beneficiaries marginal rate.

This section considers the complications which arise if the actual income of the person abroad is subject to UK tax or foreign tax. How does this affect the s.731 income? What (if anything) is there to prevent double taxation: (1) tax on the person abroad and (2) tax on the beneficiary.

It is necessary to consider separately the position where the person abroad is:

(1) A discretionary trust.
(2) Any trust, on the purchase of own shares.
(3) A company owned by an individual.
(4) A company owned by a non-resident trust.

30.34.1 *Tax and tax credits of non-resident discretionary trust within s.731*

A non-resident discretionary trust will normally pay tax on its actual UK source income at the rate applicable to trusts. The amount of tax paid reduces the relevant income so that if the gross income is £100 and tax is 45%, the relevant income is reduced to £45. However, s.731 makes no further allowance for a beneficiary. So if a beneficiary receives a benefit of £55, taxable under s.731, they pay tax at their marginal rate on the £55. The effective rate of tax on the actual income of the person abroad can therefore reach 69.75%. Section 743 ITA probably does not help. It would be much better if the beneficiary received an income receipt from the

trust.[119] Then s.731 would not apply[120] and instead the beneficiary will effectively obtain some credit for the UK tax paid by the offshore trust under the regime of Chapter 7 Part 9 ITA.[121]

The same point applies where the income accruing to the offshore trustees is subject to foreign tax which can qualify for double taxation relief in the UK under ESC B18. It is best to arrange that the income is received by a UK resident beneficiary in the form of income, avoiding s.731 income where the possibility of any double taxation relief is lost.

An IIP trust is better still for dividend income.

30.34.2 *Purchase of own shares*

The receipt on a purchase of own shares by a UK company is income.

Any trust, discretionary or IIP, is subject to additional rate tax on a purchase of own shares. This raises the same tax problems as income of a discretionary trust under ss.481, 482 ITA. One solution is to alter the terms of the trust before the purchase, so the proceeds of sale belong to the life tenant. Another solution may be to make the trust UK resident for income tax purposes.

30.34.3 *Tax and tax credits of non-resident company within s.731*

A non-resident company will normally pay tax on its actual UK source income at the basic rate. The amount of tax paid reduces the relevant income so that if the gross UK source income is £100 and tax is 20%, the relevant income is reduced to £80. Once again, s.731 makes no further allowance. So if an individual receives a benefit of £80, on which they are taxed under s.731, they pay tax at the appropriate rate on the £80. The effective rate of tax on the actual income of the person abroad is therefore nearly 52% for a higher rate taxpayer and 60% for an additional rate taxpayer.

A similar point arises in relation to dividend income, which is not taxable in the hands of the company.

It would be slightly more efficient if the beneficiary received a dividend from the company. Then s.731 would not apply. The individual may still

---

119 As to how to achieve this, see 25.8 (Payment from discretionary trust: income or capital receipt?).

120 See 30.11 (S.731 capital condition).

121 Unfortunately the credit is less than full credit in the case of dividend income. The regime is too complex to set out here.

not receive any credit for the tax paid by the offshore company but their dividend income would at least be taxed at the slightly lower dividend rates.

30.34.4 *Tax planning by means of UK resident company*

Further tax planning is to make the company UK resident (or to acquire a UK resident company). Then the actual income of the company is paid out by way of dividend (assuming this is possible as a matter of company law) and taxed at the dividend upper rate with the benefit of the UK tax credit. Watch s.1071 CTA 2010. The benefit of this kind of planning varies with the applicable rates of tax which depend on the circumstances of the beneficiaries and whether it is s.731 or s.87 which would apply on a capital payment.

30.34.5 *Section 731 credit for tax of person abroad: Commentary*

In the 6th edition of this book I said:

> These are harsh rules, but the unfairness of s.731 is generally avoidable in practice and any other rule would certainly be extremely complicated to draft and to administer.

The complexity arises in matching s.731 income with the taxable income of the person abroad. But now the FA 2008 has introduced matching rules. (Complexity was not a serious concern to the architects of the 2008 reforms.) What is sauce for the goose is sauce for the gander. If the matching rules must be retained, fairness requires that there should also be a system of credit for tax on the relevant income.

The better solution would be the rough and ready but simpler rules which took effect from 1981 to 2008, but at present we have the worst of both worlds: complexity and unfairness.

30.35 Section 731 remittance basis

Section 735 ITA[122] provides a relief which I call "**the s.731 remittance basis**". Section 735(1) provides:

> This section applies in relation to income treated under section 732 as

122 Flagged (somewhat unnecessarily) by s.731(2A) ITA:
"(2A) But see section 735 (non-UK domiciled individuals to whom remittance basis applies)."

> arising to an individual in a tax year ("the deemed income") if section 809B, 809D or 809E (remittance basis) applies to the individual for that year.

In short, the relief applies to remittance basis taxpayers.

30.35.1 *"Foreign" income*

In order to understand the law one must carefully distinguish:
(1) relevant income (in short, income arising to the person abroad); and
(2) income treated under section 732 as arising to an individual. Statute calls this "the deemed income" but I use the term "**s.731 income**" to distinguish it from the myriad types of deemed income in the taxes acts.

Further, the legislation distinguishes between two types of relevant income and two types of s.731 income.
(1) Relevant income may be:
  (a) foreign relevant income or
  (b) not foreign (which one might call UK relevant income).
(2) S.731 income may similarly be:
  (a) foreign: the statutory term is "foreign deemed income" but I will use the term "**foreign s.731 income**".
  (b) not foreign.

The crucial term is "foreign s.731 income". Section 735(2) ITA provides:

> For the purposes of this section the deemed income is "foreign" if (and to the extent that) the relevant income to which it relates would be relevant foreign income if it were the individual's.

I deal with the concept of "relates" in the next section.

30.35.2 *Operation of the s.731 remittance basis*

Assuming we have identified foreign s.731 income, we can turn to s.735(3) ITA which provides the relief:

> Treat the foreign deemed income as relevant foreign income of the individual.

This incorporates the RFI remittance basis. It would not work by itself as the s.731 income (being fictional) does not exist and cannot be remitted. So s.735(4) ITA provides:

> For the purposes of chapter A1 of Part 14 (remittance basis) treat relevant income, or a benefit, that relates to any part of the foreign deemed income as deriving from that part of the foreign deemed income.

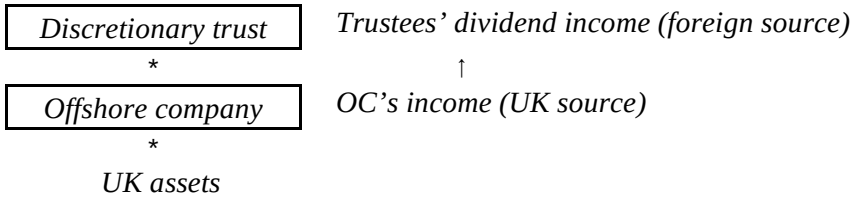
This means:

> For the purposes of the remittance basis provisions treat *both*
> [a] relevant income *that relates to any part of the foreign deemed income*[123] *and*
> [b] a benefit that relates to any part of the foreign deemed income as deriving from that part of the foreign deemed income.[124]

Thus we have three fictions. First we pretend that the individual receives s.731 income. Secondly, we pretend that that s.731 income is RFI. Thirdly, we pretend that certain relevant income *and* certain benefits derive from that RFI.[125] The third fiction feeds into remittance condition B. If anything derived from that benefit (or from that relevant income) is received in the UK by the individual or by a relevant person (in relation to the individual), there is a taxable remittance.

30.35.3 *Distribution of UK source income*

Suppose an offshore company ("OC") within s.731 is owned by a trust within s.731:



If OC receives and retains UK source income, that is not foreign relevant

---

123 If relevant income relates to s.731 income then the s.731 income relates to the relevant income: that is, "relates" is a transitive concept and if A relates to B then B relates to A.

124 That is, the phrase "that relates to any part of the foreign deemed income" qualifies "relevant income" as well as "benefit".

125 Contrast the solution adopted for the s.87 remittance basis, where the capital payment (corresponding to the remittable benefit) is deemed to derive from the s.87 gains, but the s.2(2) amount (corresponding to remittable relevant income) is not. So there is no charge on the remittance of the trust's gain, only on remittance of the capital payment.

income. However, if OC distributes the income to the trust, OC's income ceases to be relevant income. Instead the income of the trust is relevant income (unless distributed), but this income is foreign source income and so in principle excluded relevant income. So where UK source income is received by an underlying company, the s.731 remittance basis can be made available by distribution of that income from the company. This seems anomalous. However, s.731 provides a rough justice in other areas where that favours HMRC, so it is not altogether surprising if on this occasion an anomaly may favour the taxpayer.

30.35.4 *Remittance during overseas part of split year*

Section 735(5) ITA provides:

> In the application of section 832 of ITTOIA 2005 to the foreign deemed income, subsection (2) of that section has effect with the omission of paragraph (b).

The significance is that (contrary to the usual rule) foreign s.731 income is taxable if it is remitted during the overseas part of a split year; see 29.14.1 (Remittance during overseas part of split year).

30.35.5 *2008 transitional rules*

Para 170 Sch 7 FA 2008 provides:

> The amendments made by paras 161 to 169 have effect for the tax year 2008-09 and subsequent tax years.

Section 735 does not apply to benefits accruing to a person abroad before 2008/09 because the condition in s.735(1)(b) is not met.

30.36 Section 731 matching rules

In order to decide whether the remittance basis applies, we need to identify the foreign s.731 income, so we need to identify the relevant income to which the s.731 income "relates", to see if it is foreign relevant income.

In order to operate the remittance basis if it applies, we need to identify the benefits that relate to s.731 income in order to see if it has been remitted.

Although statute uses the word "relate" the rules are better described as matching rules.

These rules are set out in s.735A ITA. This works in four stages.

30.36.1 *Place benefits in date order*

Section 735A(1) ITA provides:

> For the purposes of section 735—
>
> (a) place the benefits mentioned in Step 1 [benefits within s.731][126] in the order in which they were received by the individual (starting with the earliest benefit received)

Some benefits are not received at any particular moment in time, eg the benefit of rent-free accommodation, and it is not possible to place them in the order in which they are received. Perhaps there should be a time apportionment.

One then makes certain deductions from the benefits:

> (b) deduct from those benefits so much of any benefit within section 734(1)(b) as gives rise as mentioned in section 734(1)(d) to chargeable gains or offshore income gains.

See 30.14 (Section 733 computation when benefit subject to CGT).

30.36.2 *Place UK/foreign relevant income in due order*

Section 735A(1) ITA continues:

> (c) place the income mentioned in Step 3 for the tax years mentioned in Step 4 ("the relevant income") in the order determined under subsection (3)

Note that Steps 3 and 4 here refer to the steps in s.733; confusingly the reference is not to the steps in s.735A(3) which immediately follow.

This takes us to s.735A(3) ITA:

> The order referred to in subsection (1)(c) is arrived at by taking the following steps.
>
> *Step 1*
>
> Find the relevant income for the earliest tax year (of the tax years referred to in subsection (1)(c)) [ie the tax years where s.731 applies]
>
> *Step 2*

126 Section 735A(2) ITA provides:

> "In subsection (1) references to a step are to a step in section 733(1)."

> Place so much of that income [relevant income] as is not foreign[127] in the order in which it arose (starting with the earliest income to arise).
> *Step 3*
> After that, place so much of that income as is foreign in the order in which it arose (starting with the earliest income to arise).

In order to carry out Steps 2 and 3 it is necessary to distinguish between:
(1) foreign relevant income; and
(2) other relevant income ("**UK relevant income**").
It is then necessary to ascertain the date that the relevant income arises. Some income is not received at any particular moment in time, eg trading and property income, where the income is computed as a net figure after allowing deductions. Section 735A(5) ITA deals with this:

> For those purposes [for purpose of putting relevant income into date order] treat income for a period as arising immediately before the end of the period.

TAH para 1234 provides:

> ... For example, business profits accrue over an accounting period to say 31 December so for the purpose of this provision the income would be treated as arising on 31 December. Therefore if in a tax year there was say interest income arising on 30 September and business profits accruing over an accounting period to 31 December, for the purpose of this provision they would be placed in the order interest first and profits second.

The author probably assumed that interest is not "income for a period" and so the interest is not affected by s.735A(5). In fact, interest is income for a period to which it relates, even though it is only charged when it arises. But normally interest is paid in arrears, ie interest arising on (say) 30 September is for a period ending 30 September, so the end result is the same.

Then one carries out Steps 1–3 for subsequent years, year by year:

> *Step 4*
> Repeat Steps 1 to 3.
> For this purpose, read references to the relevant income for the earliest

---

127 Section 735A(4) ITA gives a commonsense definition to "foreign" relevant income: "For the purposes of subsection (3) relevant income is 'foreign' where it would be relevant foreign income if it were the individual's."

tax year as references to the relevant income for the first tax year after the last tax year in relation to which those Steps have been undertaken.

Amended as step 4 requires, steps 1-3 provide:

Step 1
Find ~~the relevant income for the earliest tax year~~ *the relevant income for the first tax year after the last tax year in relation to which those Steps [Steps 1-3] have been undertaken* (of the tax years referred to in subsection (1)(c)) [ie the tax years where s.731 applies]
Step 2
Place so much of that income [relevant income] as is not foreign in the order in which it arose (starting with the earliest income to arise).
Step 3
After that, place so much of that income as is foreign in the order in which it arose (starting with the earliest income to arise).

30.36.3 *Deduction from relevant income*

Section 735A(1)(d) ITA provides:

(d) deduct from that income any income that may not be taken into account because of section 743(1) or (2) (no duplication of charges),

Section 735A(6) ITA provides:

Subsection (1)(d) does not apply if the income may not be taken into account because the individual has been charged to income tax under section 731 by reason of the income.

30.36.4 *Place s.731 income in date order*

Section 735A(1)(e) provides:

place the income treated under section 732(2) as arising to the individual in respect of the benefits in the order in which it is treated as arising (starting with the earliest income treated as having arisen),

30.36.5 *The matching rule*

Having identified all these matters, and placed them in date order, we can at last turn to the matching rule itself. Section 735A(1)(f) ITA provides:

treat the income mentioned in para (e) [s.731 income] as related to—
(i) the benefits, and
(ii) the relevant income,

by matching that income with the benefits and the relevant income (in the orders mentioned in paras (a), (c) and (e)).

30.36.6 *Summary*

In short, the matching rules are:

(1) Match to relevant income of earlier years before later years.

(2) Within the years, match to UK relevant income before foreign relevant income.

Why does the legislation not simply say that? For a discussion of the drafting issues see 51.10.7 (Commentary: step-based drafting).

The rule is arbitrary (but any matching rule is arbitrary).

30.36.7 *HMRC examples*

ToA guidance provides:

INTM601760 The benefits charge: Example

This example assumes all years are after April 2007 but before April 2013 and that all of the conditions necessary for a benefits charge to apply are met.

A transfer of assets is made in Year 1 as a result of which income arises to a person abroad. An individual who is resident in the United Kingdom and who did not make the transfer receives cash benefits, as set out below, out of assets which are available for the purpose as a result of the transfer and associated operations. The benefits are not otherwise liable to income tax and the individual is not liable to an income charge [the s.720 charge].

Year	Relevant income	Benefits received
1	£10,000	£5,000
2	£20,000	£10,000
3	£10,000	£10,000
4	£10,000	£5,000
5	£50,000	£100,000

To determine whether there is income treated as arising to the individual in Year 5 and if so what amount apply the Steps formula. Assume for this that the formula was also applied in Years 1 – 4 and resulted in income being treated as arising of £5,000 Year 1, £10,000 Year 2, £10,000 Year 3, and £5,000 Year 4.

Step 1 – 'the total benefits'

Add together the benefits received in the tax year (Year 5) and in any earlier year in which benefits charge could or has applied. The earlier years to take into account are Years 1 – 4.

Year 5	Benefit	£100,000
Years 1 – 4	Benefits	£30,000
The total benefits		£130,000

Step 2 – 'the total untaxed benefits'

Deduct from the total benefits, the amount of income treated as arising to the individual in any earlier tax years:

The total benefits		£130,000
Income for benefits charge	Years 1 - 4	- £30,000
The total untaxed benefits		£100,000

Step 3 – 'the relevant income of the tax year'

The income of year 5 which can be used for providing a benefit for the individual is £50,000, which is 'the relevant income of the tax year'.

Step 4 –'total relevant income'

Add together the relevant income of year 5 and the relevant income of years 1-4.

Relevant income of year 5	£50,000
Relevant income of yr 1-4	£50,000
Total relevant income	£100,000

Step 5 – 'the available relevant income'

Deduct from the total relevant income, the amount deducted at Step 2. In this example there are no other deductions to be taken into account.

Total relevant income	£100,000
Deducted at Step 2	- £30,000
The available relevant income	£70,000

Step 6 – the amount of income treated as arising for the tax year

Compare the result of Step 2 with the result of Step 5:

Total untaxed benefits	£100,000
Available relevant income	£70,000
The lower of the two is	£70,000

The amount treated as income arising to the individual in year 5 is therefore £70,000. This is neither the relevant income of that year nor the benefits received in that year.

It may be noted that there are still £30,000 of benefits unmatched in this example therefore if for example there was further relevant income in a subsequent year a further Steps calculation would be made for that year.

INTM601780Example - where modifications apply

The income and benefits set out in the table below result from a transfer of assets in 2000-01. It is agreed that an exemption applies to the transfer such that there is no income or benefits charge. Following the death of the transferor a transaction is undertaken in 2007-08 in relation to the assets of the fund, designed for the purpose of tax avoidance. It is agreed no exemption applies to prevent a potential benefits charge for 2007-08. What is the benefits charge for that year?

Year	Relevant income	Benefits received
2000-01	£50,000	£10,000
2001-02	£50,000	£10,000
2002-03	£50,000	£10,000
2003-04	£50,000	£10,000
2004-05	£50,000	£10,000
2005-06	£50,000	£10,000
2006-07	£50,000	£10,000
2007-08	£5,000	£10,000

First there is no charge under either the income or benefits charge for 2000-01 to 2006-07 as an exemption applies in relation to the original transfer

For 2007-08 there would be no benefits charge if an exemption applies.

As there are both pre-5 December 2005 and post-4 December 2005 transactions, the relevant exemption is in section 740 ITA 2007. (see INTM602840).

As the transaction after 4 December 2005 does not meet the conditions for exemption section 740(3) requires the modifications described at INTM601740 to apply for the purpose of the benefits charge.

To determine the amount of income (if any) to be treated as arising to the individual for 2007-08 the Steps approach has to be applied and with the specified modifications (INTM601720).

Step 1 – 'the total benefits'

Add together the benefits received in the tax year (2007-08) and in any earlier year in which benefits charge could or has applied.

In this example there are two possible approaches to 'earlier years'. Either that there are no earlier years to be taken into account under this Step as there was an exemption and thus the provisions did not apply (all earlier years were pre-ITA 2007). Or that the benefits of all earlier years have to be taken into account and that the modifications provided by section 740(6)-(7) ITA 2007 apply to this Step. The modification if applied in this way would seem to require 2000-01 – 2004-5 benefits to be left out and that for 2005-06 to be time apportioned. If applied in this way the benefit received in 2006-07 would also be taken into account so that "the total benefits" would then become £10,000 + £10,000 plus £3,333 (4/12 * £10,000). Such an approach would not seem to be consistent with an exemption applying for 2006-07, as it would in effect bring those benefits back into the calculation in 2007-08 and result in an equivalent amount of income being charged. HMRC take the view that the apportionment required by section 740(7) will only be relevant where there are transactions in 2005-06 post-4 December, with a pre-5 December transaction in that or an earlier year. In this example therefore there are no earlier years to take into account in this Step as there are no earlier years to which a benefits charge applied, or to which a benefits charge would have applied but for an insufficiency of relevant income to match against benefits.

2007-08	Benefit	£10,000
2000-01 to 2006-07	Exemption for all yrs	£0
The total benefits		£10,000

Step 2 – 'the total untaxed benefits'

Deduct from the total benefits, the amount of income treated as arising to the individual in any earlier tax years:

The total benefits		£10,000
Income for benefits charge	2000-01 – 2006-07	£0
The total untaxed benefits		£10,000

Step 3 – 'the relevant income of the tax year'

The income of 2007-08 which can be used for providing a benefit for the individual is £5,000, which is 'the relevant income of the tax year'.

Step 4 –'total relevant income'

Add together the relevant income of 2007-08 and the relevant income of years 2000-01 – 2006-07. The modification provided by section 740(5) requires the earlier years' income be taken into account even though there was an exemption.

Relevant income of 2007-08	£5,000
Relevant income of 2000-1 to 2006-07	£350,000
Total relevant income	£355,000

Step 5 – 'the available relevant income'

Deduct from the total relevant income, the amount deducted at Step 2. In this example there are no other deductions to be taken into account.

Total relevant income	£355,000
Deducted at Step 2	£0
The available relevant income	£355,000

Step 6 – the amount of income treated as arising for the tax year

Compare the result of Step 2 with the result of Step 5:

Total untaxed benefits	£10,000
Available relevant income	£355,000
The lower of the two is	£10,000

The amount treated as income arising to the individual in 2007-08 is therefore £10,000.

If in this example the 'tainting' transaction had taken place after 4 December 2005 and before 5 April 2006, then even though the ITA 2007 Steps approach did not apply for that year (see INTM601800) the effect would have been the same and applying the 'modifications' would have resulted in a comparison of time apportioned benefits of 2005-06 with relevant income of that and all earlier years. If the facts above for 2007-08 had been those of 2005-06 the result would have been a benefits charge of £3,333 for 2005-06 regardless of when after 4 December 2005 (and before 5 April 2006) the tainting transaction took place.

TAH gives a number of examples, most of which are self-evident, but two are worth setting out here. Para 1234 Example 10 involves UK and foreign relevant income (7 items of income altogether) and non-UK benefits (2 benefits altogether):

			Relevant income		**Benefits**
Item	**Date**		*UK*	*Foreign*	**(non-UK)**
1	*Year 1*	30 Sept	500		
2		31 Dec		500	
3	*Year 2*	31 Dec		1,000	750
4	*Year 3*	30 Sept		500	
5		31 Dec	500		
6	*Year 4*	30 Sept		500	
7		31 Dec	500		750 *[or 1,500]*

The HMRC analysis is:

> There are potential transfer of assets benefits charges in Yr 2 of 750 and Yr 4 of 750.

More analytically, the individual receives s.731 income of £750 in years

2 and 4.

> In Yr 2, 250 will be foreign deemed income and ring fenced to be charged under Part 8 ITTOIA as and when there is an amount remitted to the UK. 500 is charged under transfer of assets.

More analytically, the £750 s.731 income of year 2 is matched as follows:
£500 is matched to income item 1: that £500 is not deemed RFI and so is charged on an arising basis.
£250 is matched to income item 2: that £250 is deemed RFI and taxed on the s.731 remittance basis, ie on a future remittance of the benefit or the foreign relevant income. I would not use the term "ring-fenced" to describe this, but it might serve as a loose metaphor.

> In Yr 4 the whole 750 will be deemed foreign income [*recte* foreign deemed income].

More analytically, the £750 s.731 income of year 4 is matched to the remaining unmatched £250 of item 2 and to the first £500 of item 3. The £750 is deemed RFI and taxed on the s.731 remittance basis.

> If however the benefit in Yr 4 was 1500, then only 1250 would be ring fenced as foreign deemed income and 250 would be charged under transfer of assets.

More analytically, if the benefit in Yr 4 was 1500, the individual receives s.731 income of £1,500 in year 4. That is matched as follows:
£250 is matched to the remaining unmatched part of income item 2.
£1,000 is matched to income item 3.
The total of £1,250 is deemed RFI and taxed on the s.731 remittance basis.
£250 is matched to income item 5 and is taxed on the arising basis.

TAH para 1236 Example 11 is a slightly more complex example with:
(1) UK and foreign relevant income - 12 items altogether.
(2) UK and foreign benefits - 4 benefits altogether.
An individual who is ordinarily resident, but not domiciled, in the UK has received cash benefits from an offshore structure in circumstances where the conditions for the transfer of assets provisions to apply are met. The 'remittance basis' of taxation applies for each year.

			Relevant income		**Benefits**	
Item	**Date**		*UK*	*Foreign*	*UK*	*Foreign*
1	*Year 1*	30 Sept	500			
2		31 Mar		800		1,000

3	*Year 2*	31 Mar	100			1,400
4		31 Mar		1,000		
5	*Year 3*	31 Mar		500		
6		31 Mar	500			
7		31 Mar	500			
8	*Year 4*	30 Sept	200		1,000	
9		31 Mar		500		
10	*Year 5*	30 Sept	500			600
11		30 Sept		100		
12		31 Mar		400		

The HMRC analysis is (to say the least) informal in its use of terminology and it should be recast along the lines of example 10. This is done here by adding only brief comments in italics as the text is long and the reader will have the idea.

Year 1

The potential benefits charge [*s.731 income*] is 1000 (being the lesser of 1300 relevant income and 1000 benefits received).

As all of the conditions for Section 735 to apply are met, consider whether any of the potential charge [*s.731 income*] is foreign deemed income. The principles in Section 735A are used for this purpose.

- First match the 1000 with the UK [*relevant*] income of 500. As this income cannot be relevant foreign income then 500 cannot be foreign deemed income and thus is charged under the transfer of assets benefits charge [*on an arising basis*].
- The remaining benefit [*£500 s.731 relevant income*] is then matched with the foreign [*relevant*] income of 800. This [*relevant*] income would be relevant foreign income if it was the individuals and thus 500 of the deemed amount [*s.731 income*] is foreign deemed income. This is treated as relevant foreign income and becomes potentially chargeable under Part 8 ITTIOA 2005 [*ie is taxed on the s.731 remittance basis*].
- There is a balance of 300 relevant income that remains unmatched.

Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

The total taxable amount for the year under transfer of assets benefits charge is therefore 500.

Year 2

The potential benefits charge [*s.731 income*] is 1400 (being the lesser of the total relevant income 2400 and the total benefits 2400 less 1000 already charged).

Calculate how much of the total potential charge [*s.731 income*] can be regarded as foreign deemed income applying Section 735A-

The potential chargeable amount [*s.731 income*] is in effect matched with-

(a) 300 of foreign [*relevant*] income from year 1. This gives foreign deemed income of 300 chargeable [*on the s.731 remittance basis*] under Part 8.
(b) 100 UK income of year 2. As this income cannot be relevant foreign income this amount of 100 remains chargeable [*on an arising basis*] under the transfer of assets benefits charge.
(c) The foreign [*relevant*] income of year 2 of 1000. As this would be relevant foreign income if it were the individual's this amount can [*must*] be regarded as foreign deemed income and so chargeable [*on the s.731 remittance basis*] under Part 8.

The result is that of the potential charge [*s.731 income*] of 1400, 100 is charged under transfer of assets benefits charge [*on the arising basis*] and 1300 is ring fenced and treated as relevant foreign income chargeable [*on the s.731 remittance basis*] under Part 8 ITTOIA.

The total charge under the transfer of assets benefits charge is therefore 100.

Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

Year 3

Although there is further relevant income in this year there are no unmatched benefits so there can be no potential charge [*s.731 income*] under transfer of assets benefits charge so a consideration of S735 is not applicable.

Year 4

The potential charge [*s.731 income*] is 1000 (being the lesser of the total relevant income 4100 and the total benefits 3400 less 2400 already charged).

Work out the deemed foreign income [*foreign s.731 income*] applying Section 735A-

The potential chargeable amount [*s.731 income*] is in effect matched with

(a) The UK relevant income 500 from year 3.
(b) The foreign [*relevant*] income of 500 from year 3.

The total amount charged under the transfer of assets benefits charge is therefore 500.

500 is ring fenced as foreign deemed income and treated as relevant foreign income *charged on the s.731 remittance basis*].

Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731*

remittance basis] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.
There is 700 of unmatched relevant income to take forward.

Year 5
The potential charge [*s.731 income*] is 600 (being the lesser of the total relevant income 5100 and the total benefits 4000 less 3400 already charged).
Work out the deemed foreign income [*foreign s.731 income*] applying Section 735A-
The potential chargeable amount [*s.731 income*] is in effect matched with
(a) The UK relevant income 200 from year 4.
(b) 400 of the foreign relevant income from year 4.
The total amount charged under the transfer of assets benefits charge is therefore 200.
400 is ring fenced as foreign deemed income and treated as relevant foreign income.
Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.
As the benefit was received in the UK a minimum of the ring fenced amount of this year will be charged under Part 8 ITTOIA and consideration would need to be given to whether there are further untaxed amounts of ring fenced income that would be charged for this year applying the relevant remittance basis rules.
There is 1100 of unmatched relevant income to take forward.

The ToA draft guidance provides further examples at IHTM602420.

30.36.8 *Planning implications*

Where the s.731 remittance basis applies the best planning by far is to arrange that the person abroad (the foreign trust or company):
(1) does not have any UK source income and
(2) does not remit its foreign income.
Then there is no need to worry about the complex s.735A matching rules.
The relatively simple position is that there is a remittance if the benefit is received in the UK.

This also avoids the double charge to UK tax which arises when benefits are matched to UK source relevant income.

The next best planning is to arrange that:
(1) UK source income arises in years where no s.731 benefit is provided; and

(2) In a year where a s.731 benefit is provided, the person abroad has no UK source relevant income *and* has foreign source relevant income of an amount sufficient to match the value of the benefit (ie the foreign source relevant income will frank the benefit). If the trust property is held through an underlying company, a dividend from the company may conveniently achieve that.

30.36.9 *Section 731 remittance basis: Commentary*

The reader who has followed the text to this point will agree that the s.731 remittance basis is unworkably complicated. The rule should simply be that there is a tax charge if the benefit is remitted, and the matching rules completely abandoned. That would be fairer, consistent with the principle of the remittance basis, consistent with the s.87 remittance basis, and a simplification.

The 2013 ToA consultation raised a proposal to amend the matching rules, but this has been abandoned.[128]

30.37 Where is a benefit received?

The s.731 remittance basis requires one to identify:

(1) where a benefit is received (or at least, whether it is received in the UK); and

(2) where anything derived from that benefit is received.

Identifying a place of receipt of a benefit is comparable to identifying the situs of property or the location of a source of income. There are no satisfactory solutions to these problems which can only be solved by somewhat arbitrary selection of connecting factors. But while situs and source rules are mostly long established and workable rules, the place of receipt of a benefit is a wholly new question on which there is no guidance to be found.

It may be that some benefits are not received in any identifiable place; but just as every asset has a situs (and only one situs),[129] and every source of

---

128 HMRC, "Reform of an anti-avoidance provision: Transfer of Assets Abroad Outcome of Consultation (December 2013): "Having carefully considered the views put forward in the consultation and through the working group, the Government has decided not to pursue legislative change to the matching rules at present." *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/267976/Transfer_of_assets_outcome_of_consultation.pdf*

129 See 82.3 (Every asset has one situs).

income has a location (and only one location) for IT purposes,[130] it is considered that every benefit should have one (and only one) place of receipt for s.731 purposes. However to identify that place will sometimes require an arbitrary selection of connecting factors.

The benefit of the transfer of money paid to a beneficiary's bank account is received where the account is kept.

It is suggested that the benefit of the transfer of a debt or shares is received where the debt or shares are situated under private international law principles. As an alternative, it is arguable that the benefit might be received in the jurisdiction whose law governs the transfer of the asset.

30.37.1 *Interest-free (or low-interest) loan*

Where is the benefit of an interest-free (or low-interest) loan received? The most attractive possible solutions are:

(1) where the money lent is received; or

(2) where the debt is situate under private international law principles.[131]

To find the answer one must first identify exactly what is the benefit. The benefit may be said to be:

(a) The money received by the borrower

(b) The contract of loan

(c) The lender's decision to leave the loan outstanding

(d) The interest foregone

Solution (a) is wrong: the benefit is not the money received. The benefit is (in some way) receiving the money on advantageous terms.

Solution (d) is wrong as the interest foregone does not exist, so cannot be a benefit (and it cannot be received anywhere).

It is considered that in the case of a fixed term loan, the benefit is the contract of loan; and in the case of a loan repayable on demand, the benefit is the decision to leave the loan outstanding. In either case, it is suggested that the benefit is received where the debt is situate.[132]

The same solution would apply if the benefit was leaving outstanding a

---

130 See 14.3 (Approach to locating a source of income).

131 For these principles, see 82.13 (Simple contract debt); 82.15 (Specialty obligation).

132 Another possible solution is to ask where the situs of the source of the interest would be for IT purposes, if interest were payable on the loan. But this should be rejected since (1) the rules for identifying the source of interest are hopelessly unclear and (2) when interest is not payable this would be a difficult hypothetical question to answer.

debt which was not a debt for money lent, for instance, if the offshore person sold an asset for full value to the individual and left the purchase price outstanding.

It is arguable that the money lent (although not the benefit) is derived from the benefit but even that seems difficult to sustain.[133]

30.37.2 *Rent-free (or low-rent) use of chattel or land*

The position is different if the benefit is rent-free (or low-rent) use of a chattel or land. The chattel or land does not belong to the bailee (unlike money lent under an interest-free loan, which does belong to the borrower). So the benefit is received where the land is situated, or where chattel is for the time being.

30.37.3 *Release of debt*

Suppose:
(1) money is lent to a beneficiary;[134]
(2) the loan is later released (a benefit).
Where is this benefit received? Again the choice is:
(1) where the money lent (or property representing it) was received
(2) where the money lent (or property representing it) is situate from time to time;
(3) where the debt is situate.
The argument is similar to the discussion above on interest-free loans. The better view is that the place of receipt is where the debt is situate. The same applies on the waiver of interest, but there it is even clearer that solution (1) is not correct. The money lent is not, strictly, derived from the benefit.

30.37.4 *Payment of debt*

Suppose:
(1) A beneficiary owes money to a third party.
(2) The debt is paid by the person abroad (a benefit).
where is this benefit received? It is suggested that it is received where the

133 Contrast 11.15.6 (T lends income/gains to R).

134 It makes no difference whether the loan is at a commercial rate (not a benefit), or an interest-free loan (which confers the separate benefit of interest foregone until the date of release).

debt is situate.

30.37.5 *Receipt of benefit outside UK and subsequent remittance*

Suppose:

(1) a UK resident foreign domiciled individual receives a benefit in the form of the transfer of money (or a chattel) outside the UK, and

(2) later remits that money (or chattel) to the UK.

The benefit becomes taxable under the s.731 foreign domicile remittance basis. Before 2008 the contrary was arguable.

For this reason, the tax consequence of a benefit received by one beneficiary may depend on whether *other* beneficiaries have remitted their benefits (and so used up relevant income). One might expect one beneficiary (with access to trust documents) to be able to find out what benefits other beneficiaries have received and where. But a beneficiary is not entitled to find out, and often will be unable to find out, whether benefits received by other beneficiaries have been remitted. The legislation is in many cases unworkable. But in 2008 workability was not regarded as a requirement of anti-avoidance legislation.

If the beneficiary is not resident when they receive the benefit but resident when it is received in the UK, there is no tax charge.

30.38 Section 720 and 731 remittance basis compared

Sections 720 and 731 both offer a form of remittance basis. The s.720 remittance basis is more generous. So a transferor (chargeable under s.720 but not s.731) will often be in a better position than other beneficiaries (chargeable under s.731)! For example:

(1) Suppose T (UK resident, foreign domiciled) creates a trust within s.720. T occupies a property owned by the trust. The trust also receives and accumulates foreign income. There is no tax charge. T is not subject to tax under s.720.

(2) Now suppose T dies and B occupies the same property. B is taxed on the benefit of the rent-free accommodation under s.731. The s.731 remittance basis does not help B because the benefit is received in the UK.

30.39 Summary of responses to s.731

(1) Avoid relevant income by
  (a) distributing income:
    (i) as it arises; or

(ii) in a year before a beneficiary receives a benefit; or

(b) using interest in possession settlements in preference to discretionary; or

(c) not using trusts and companies where inappropriate.

(2) Motive defence.

(3) Remittance basis.

(4) Arrange that foreign domiciled beneficiaries receive benefits of an income nature (outside s.731).

30.40 Tax return: Disclosure of s.731 income

S.731 income is returned in Box 42 in the Foreign pages (form SA106) 2013/14. The note by this box reads:

> If you have received a benefit from a person abroad, enter the value or payment received.

The reference to a benefit is a reference to an income taxable benefit, so if a foreign domiciled individual received a benefit which is not subject to IT (because of the remittance basis or for lack of relevant income) then the figure here should be nil. HMRC agree.

Helpsheet 262 (Income and benefits from transfers of assets abroad and income from non-resident trusts - 2013/14) provides:

> **How do you report benefits?**
> Unless you are completing box 46 of the Foreign pages – see 'How do you qualify for an exemption from charge on income or benefits?' on page 6 – you should enter the amount computed at Step 6, in box 42 on page F 6 of the Foreign pages.
> Please enter in the 'Any other information' box, box 19 on page TR 7 of your tax return:
> - the full name and address of the person abroad receiving the available relevant income
> - the details of the relevant transactions that have given rise to the income
> - how you have calculated the benefits included on the return.
>
> Where the benefit has come from a UK resident trust in the circumstances described in the previous section, also give details of those circumstances including the full name of any other trust involved.

CHAPTER THIRTY ONE

TRANSFER OF ASSETS ABROAD: RELIEF FROM OVERLAPPING CHARGES

31.1 Relief from overlapping ToA charges: Introduction

The transfer of asset rules could often give rise to double UK taxation, and there are four reliefs to prevent this. Statute does not provide names for the reliefs, so I coin the following terminology:

Name of Relief	ITA Section	Outline of Relief
Transferor's credit	745(1)	Credit for tax paid by transferee
Transferee's credit	unclear	Credit for tax paid by transferor
Distribution relief	743(2A)(2B)	Relief on distribution to transferor
Double-counting relief	743(1)	General DT relief

These provisions were rewritten in 2013 as part of the programme to ensure that s.720 income was distinct from the income of the person abroad, in order to override DT relief.[1] As far as concerns the double taxation issues discussed in this chapter, it is considered that the changes have not had any impact.

31.1.1 *Cross references*

This chapter considers rules which prevent double UK taxation; for the separate issues of DTAs and foreign tax credit relief, see:
59.5 (DT reliefs: s.720 ITA)
59.6 (DT reliefs: s.731 ITA).

31.2 Undistributed UK taxable income of offshore company

Suppose an offshore company ("OC") receives and retains UK taxable

1 See 59.5.2 (Person abroad treaty-resident outside UK).

income.[2] If s.720 ITA did not apply, there would be one charge to tax: income tax borne by OC. However, if s.720 applies, it appears at first sight that there are two charges to tax:

(1) OC pays income tax at the basic rate under ordinary principles.

(2) The transferor ("T") pays income tax on the same income under s.720.

What is there to prevent double taxation?

31.2.1 *Transferor's credit*

Section 745(1) ITA provides relief for T:

> Income tax at the basic rate, the starting rate for savings or the dividend ordinary rate is not charged under section 720 or 727 in respect of any income if (and to the corresponding extent that) the income mentioned in section 721(2) or 728(1)(a) [the income of the person abroad] has borne tax[3] at that rate by deduction or otherwise.[4]

I refer to this as "**transferor's credit**".

HMRC Helpsheet 262 (income and benefits from transfers of assets abroad) 2013/2014 provides:

> **What if tax has been paid on the income?**
> If the amounts included in boxes 11 and 13 of the Foreign pages include tax credits or other tax paid on the income of the person abroad, then you may be able to claim a deduction against your liability for that tax. You will only be entitled to relief for the tax paid by the person abroad if it is in effect tax on 'the same' income, and only to the extent that the tax has actually been paid by, and not refunded to, the person abroad. You should include the amount of tax for which you can claim relief in Column C and also include it in box 2 of the Foreign pages. You should

---

2 OC's income would be UK taxable if the income has a UK source and so is subject to income tax, eg UK rental income. (Perhaps another possibility may be that OC is carrying on a trade in the UK through a PE, and so is subject to corporation tax; but the better view is that the ToA rules do not apply to income within the charge to CT).

3 The statute assumes that OC would pay income tax. In *R v Dimsey & Allen* 74 TC 263 at [55] Lord Scott suggested (without deciding) that transferor's credit would also apply if the person abroad paid corporation tax on the income and not income tax. But after 2013 that would be rarely if ever arise.

4 This was considered in *R v Dimsey & Allen* 74 TC 263 at [53]:
"This provision would have dealt with the case where the transferee's income included income sourced in the UK and from which tax had already been deducted at source. But the words 'or otherwise' show that the provision would have covered also any case in which the transferee had paid tax on its income."

> note Column E of your claim. In addition, you should send a schedule with the Foreign pages, showing the amount of each item of income, and tax credit/tax paid on that income, which has been included in boxes 11 and/or 13, and Column C.
> ... If you do not yet know the final amount of tax paid by the person abroad, you should estimate the amount of credit available and amend your tax return when the final details are known. You must draw attention to the estimate and explain the circumstances in the 'Any other information' box, box 19, of your tax return. If any additional tax becomes payable as a result of using an estimate the usual provisions for charging interest on tax paid late will apply.
> If the income on which you are liable to tax under these provisions is a 'foreign dividend', then you may be entitled to a non-payable UK tax credit (see page FN 7 of the Foreign notes).

31.2.2 *Transferee's credit*

The limitation of the transferor's credit was explained in *R v Dimsey & Allen* 74 TC 263 at [56]:

> Section [745(1)] ... is looking at the double taxation problem from the point of view of the transferor on whom the liability to pay tax on deemed income is being imposed. There is no comparable provision protecting the transferee in a case where, under s [720], the transferor has paid tax on his deemed income.

In the course of argument in *R v Dimsey & Allen*, HMRC announced a practice to solve this problem:

> **The Inland Revenue's Practice on section [720]**
> [1] If in any case tax is paid by the transferee, the Inland Revenue will give credit for that tax against any charge to tax on the transferor under section [720 ITA] on the same income;
> [2] and conversely, if in any case tax is paid on any income by the transferor under section [720], the Inland Revenue will not tax the transferee on that income.
> So that in every case, the Treasury received in all the full amount of tax chargeable on the transferor as if he were the only person liable.

Point [1] is the transferor's credit. I refer to point [2] as "**the transferee's credit**". The consequence is that either:

(1) T pays all the tax on the income (and OC pays none); or
(2) (a) OC pays tax (usually basic or dividend ordinary rate); and
    (b) T has the credit for OC's tax (so T usually pays higher/

additional rate tax only).

This statement does not say whether (1) or (2) is to be the case. As far as HMRC are concerned it does not matter because the amount of tax collected will generally be the same. If T is the beneficial owner of OC, it may likewise not make much economic difference to T whether T or OC pay the tax. But T may have "power to enjoy" the income of OC while only having a remote and not particularly valuable interest in it.[5] One can imagine a situation where T and OC each ask HMRC to assess the other! There is no mechanism for tax paid by T to be recovered from OC or vice versa. HMRC have a broad discretion, subject to judicial review if they act unreasonably. How in practice should HMRC collect tax? It is suggested that HMRC's starting point should be that tax is to be borne by OC, where tax is reasonably collectible from OC, ie if:

(1) the income is dividend income with a tax credit (in this case, of course, no one has any choice about the matter);
(2) tax is collectible under the non-resident landlord regulations, ie if OC complies with those regulations; or
(3) OC is prepared to complete UK tax returns and pay the tax on its income.

It is fair that OC, which receives the income, should pay the tax on it. Then only higher/additional rate tax is normally collected from T. Only in cases where OC refuses to pay should all the tax be collected from T. This seems consistent with the extract from "Notes on Foreign" cited above.

It is arguable that double-counting relief[6] is the statutory basis for the transferee's credit. If that is correct, the transferee's credit is law and not a concession.

31.2.3 *Taxpayer confidentiality*

The use of transferor's credit and transferee's credit require that transferor or the person abroad knows details of tax paid by the other person. Section 18 Commissioners for Revenue and Customs Act 2005 authorises HMRC to disclose this information:

> (1) Revenue and Customs officials may not disclose information which is held by the Revenue and Customs in connection with a function of the

5 For instance, if OC owes T a small debt.

6 See 31.6 (Double-counting relief).

Revenue and Customs.

(2) But subsection (1) does not apply to a disclosure—

(a) which—

(i) is made for the purposes of a function of the Revenue and Customs, and

(ii) does not contravene any restriction imposed by the Commissioners...

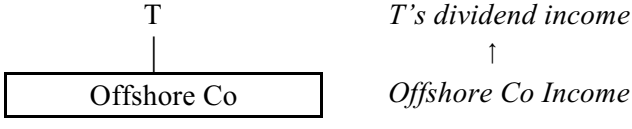
31.3 Distribution to T of income of company within s.720

So far we have been considering undistributed income of OC. I now turn to consider the position where the income is distributed to T by way of dividend. Suppose:

(1) An offshore company ("OC") within s.720 receives income ("OC's income").

(2) T owns all the shares in OC.[7]

(3) The income of OC is distributed by way of dividend to T ("T's dividend income"):



Possible charges to tax here are:

(1) IT on OC's income (paid by T) under s.720.[8]

(2) IT on the dividend (paid by T) on normal principles.

Is there any relief from economic double taxation?

31.4 Distribution relief

Section 743 ITA provides:

(2A) Subsection (2B) applies if—

(a) in the case of an individual, an amount of income is taken into account in charging income tax under section 720 or 727, and

(b) the individual subsequently receives that income.

(2B) The income received is treated as not being the individual's

---

7 The position is not materially different if the shares in OC are held in a trust under which T has an interest in possession.

8 Or IT on OC's income paid by OC and T, but with credit to avoid double taxation: see above. That makes no difference for the purpose of this example. It is assumed here that T is not a remittance basis taxpayer.

income for income tax purposes.[9]

I refer to this as "**distribution relief**". There are three conditions for this relief to apply:

(1) Income treated as arising to the individual is taken into account in charging income tax under s.720.
(2) The individual receives the income.
(3) The dividend income which the individual receives is "that income", ie the same as the income taken into account in charging IT, ie the same as the income of the person abroad..

Condition (1) would normally be satisfied.[10] Condition (2) is *ex hypothesi* satisfied.

31.4.1 *When is income "the same" for purposes of distribution relief?*

At first sight condition (3) is more doubtful. The income which the individual actually receives is the dividend income. The income which is taken into account in charging IT under s.720 is the income of the person abroad. The two are not the same. But if that is correct, then distribution relief can never apply at all, which cannot be correct.

OC's income and the dividend income are in substance or economic reality the same income. It is true that they are usually regarded for tax as separate sources of income, not the same income. "The income of the company and the income derived from the company by the shareholders are two quite different incomes."[11] However for this purpose one looks to the substance and does not apply a formalistic view. This would be reasonably clear even in the absence of authority, because (on the

---

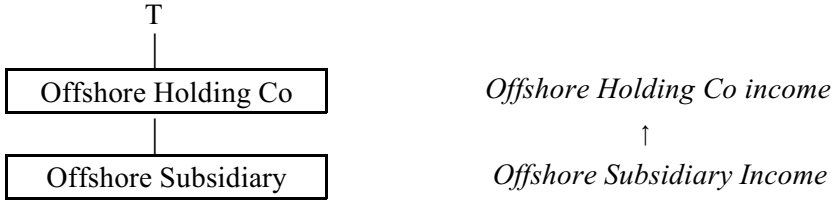
9 A historical note. FA 2013 rewrote distribution relief, which was formerly in s.743(4) ITA, which provided: "If income treated as arising to an individual is *charged to income tax* under section 720 or 727 and the individual subsequently receives that income, it is treated as not being the individual's income again for income tax purposes."
For the reasons for the change, see 31.1 (Relief from overlapping ToA charges – Introduction).

10 See 31.2 (Undistributed UK taxable income of offshore company); 31.7.1 (When is income taken into account in charging IT under s.720?).

11 *Vestey v IRC* 54 TC 503 at p.562. This is obvious but if further authority is needed, see *Canadian Eagle Oil v The King* 27 TC 205 at p.257: "for the purposes of Income Tax, the income of a foreign company and the income received from it in dividends by its British shareholders are not to any extent or effect one and the same income, but are two distinct incomes".

formalistic view of income identity) it is impossible for T to receive the "same" income as OC. The source must change when T receives it.

This is confirmed by *Aykroyd v IRC*.[12] The facts were relatively simple. T (UK domiciled) held an offshore holding company (within s.720) which held an offshore subsidiary (within s.720):[13]



(1) In 1936/7 the offshore subsidiary received income within s.720 ("the offshore subsidiary income").
(2) In 1937/8 the offshore subsidiary paid that income by way of dividend to the offshore holding company ("the offshore holding co income"). This income was also within s.720.
(3) The transferor ("T") was assessed on the offshore holding co income in 1937/8. T was not assessed on the offshore subsidiary income in 1936/7.

This was not an individual/company structure but a company/subsidiary structure, but in the context of distribution relief the issue is the same.

T argued that T could be assessed at stage (1) and so could not be assessed at stage (2). T relied on distribution relief. Macnaghten J accepted (rightly) that the relief could apply to the sequence of two dividends:

> If the Appellant had in fact been charged in the year 1936–37, he could not have been charged again in the year 1937–38.

---

12 24 TC 515. The substance (as opposed to a formalistic) view of income identity is also applied in other contexts in the transfer of assets code. In *Vestey v IRC* Walton J held that a shareholder had no "power to enjoy" the income of the company in which he held shares because (applying the formalistic view of income identity) the shareholders had power to enjoy *different* income! However, this view was rejected in the House of Lords. See 29.6.6 (Enjoyment condition D: possibility of benefit). Similarly the court looked at the economic substance in order to determine whether two assets were "the same" (for the purposes of stamp duty subsale relief) see *Fitch Lovell v IRC* [1962] 1 WLR 1325.

13 More accurately, there were several holding and subsidiary companies, but nothing turns on that.

That is, the offshore holding co income was (for the purposes of distribution relief) the same income as the offshore subsidiary income.

The ToA draft guidance provides:

> **INTM602380 Income to be taken into account once**
> ... Income that arises to a person abroad may be distributed to another person who is also a person abroad – for example a group company may make a distribution to its parent company. HMRC generally accept that in such situations the legislation should not be construed so as to effectively duplicate the amount of income that may be taken into account for the transfer of assets provisions. In such situations it will be appropriate to consider to what extent the distribution and the underlying income from which is paid are the same income.
> Specific cases of difficulty concerning the amount of income to be taken into account should be referred to SPT Trusts and Estates Technical in accordance with the instructions at INTM [ ] to [ ].
> **INTM602440 Subsequent receipt of income**
> ... Issues can arise when an individual who has been taxed under section 720 or section 727 ITA 2007 in relation to the income of a non-resident trust or company and the entity concerned makes a subsequent distribution of income to the individual. HMRC accept that generally the reference to income in section 740 (4) and sections 743 (2A) and (2B) can be construed to cover such situations. ...
> **INTM602520 Deductions and reliefs**
> ... Where the income of a foreign company has been subject to the income charge and subsequent dividend left out of account, it may be that the dividend is charged to tax by a UK paying agent such as a bank before being paid to the individual concerned. If this is the case relief should be given for that tax or repayment made, whichever is appropriate.

31.4.2 *Distribution relief: Conclusion*

Thus, even though OC's income is distributed to T:

(1) there is only one charge to income tax, the charge under s.720;

(2) T has the benefit of tax credits or DT Relief relating to OC's income.

At first sight this seems anomalous. If s.720 did not apply (eg because the individual owning OC was not the transferor or because the motive defence applied) then the position is quite different:

(1) there will be two charges to tax if OC's income is UK source:

(a) income tax on OC's income paid by OC under ordinary

principles; and

(b) income tax on the dividend paid to T.

(2) T does not have the benefit of tax credits or DT Relief relating to OC's income.

On reflection, this is not an anomaly. The object of s.720 is to put the transferor in the same position as if they had not made the transfer: see *Chetwode v IRC* 51 TC 647. This view is rightly accepted by HMRC (despite the irritation of the judge in *Anson v HMRC* but the issue may not have been fully explained to him).[14]

31.4.3 *Identifying income qualifying for distribution relief*

It may happen that the income of OC for company law purposes is greater than the income of OC for tax purposes (eg because of capital allowances). Distribution relief applies only so far as the income of the company has been taken into account in charging income tax under s.720. For example, OC may have taxable income of 10, but accounting profits of 100. If OC declares a dividend of 100, then the charges to tax are:

(1) IT on OC's income of 10 on T under s.720.

(2) IT on the dividend on the amount of 90 (ie 100–10).

In these circumstances, the use of an offshore company does give rise to tax on the distribution which would not have arisen if there were no company.

Suppose OC receives £100 and spends £20 on expenses, but, the company having spare assets available for distribution, £100 is nevertheless distributed. It is suggested that the dividend of £100 should be identified with OC's income of £100 and so qualifies for distribution relief in its entirety. The £20 spent on expenses is attributed to other assets, even though as a matter of tracing it was paid for out of the s.720 income. The position is analogous to the *Duke of Roxburghe* case.[15]

31.4.4 *Planning: Distribution and re-settlement*

Where distribution relief applies it is generally worthwhile distributing income to T; T may re-settle the income if desired. If this is not done during T's life, the benefit of the relief is lost, as distribution relief will not

---

14 [2012] UKUT 59 (TCC). For the motive defence aspects of this case, see 32.48 (Can an individual disclaim the motive defence?).

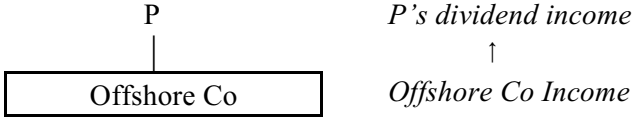
15 20 TC 711. See 13.12.1 (Remittance from mixture of taxed and untaxed income).

apply later.[16]

31.5 Distribution (*not* to T) of income of company within section 720

Suppose:

(1) An offshore company ("OC") within s.720 receives income ("OC's income").
(2) The transferor ("T") is not a shareholder in OC but has "power to enjoy" the income.[17]
(3) P (a UK resident third party) owns all the shares;[18]
(4) The income of OC is distributed by way of dividend to P.



In these circumstances it appears that there is economic double taxation:

(1) OC's income is subject to tax in the hands of T (or T and OC) under s.720.
(2) P is subject to tax on the dividend.

Distribution relief does not apply because that relief only applies where OC's income is subsequently received by the transferor, T. The transferor credit and the transferee credit do not cover this situation. However, double-counting relief applies.

31.6 Double-counting relief

Section 743 ITA provides:

> (1) No amount of income may be taken into account more than once in charging income tax under this Chapter.
> (2) If there is a choice about the persons in relation to whom any amount of income may be taken into account in charging income tax[19] under this

16 This may also be done to avoid relevant income accumulating in a company held by a trust; see 30.31 (Is income of company held by a trust relevant income?).

17 T may have power to enjoy by holding a debenture or through being a beneficiary of the trust which holds OC. Similar points arise if T receives a capital sum.

18 The position is not materially different if the shares in OC are held in a trust under which P is life tenant, and to which s.624 ITTOIA does not apply.

19 Section 744 ITA provides:

"**744 Meaning of taking income into account in charging income tax for s.743**
(1) References in section 743 (no duplication of charges) to an amount of income

Chapter, it is to be taken into account—

(a) in relation to such one or more of them as appears to an officer of Revenue and Customs to be just and reasonable, and

(b) if more than one, in such respective proportions as appears to the officer to be just and reasonable.

I refer to this as "**double-counting relief**". This provision is vaguely worded, but I suggest it prevents double taxation:

(1) Where T1 is charged under s.720 and T2 is charged under s.720; ie there were two transferors (but *Vestey* decided that there can only be one transferor).

(2) Where T1 is charged under s.731 and T2 is charged under s.731; eg where two different individuals receive benefits, the s.733 computation often prevents a double charge (but not always).[20]

(3) Where T1 is charged under s.720 and T2 is charged under s.731.[21]

(4) Where T1 is charged under general principles and T2 is charged under s.720 or s.731.

This therefore applies in the circumstances of the example of 31.5

---

taken into account in charging income tax are to be read as follows.

(2) In the case of tax charged on income under section 720 (charge where income enjoyed as a result of relevant transactions)—

(a) if section 724(1) (benefit provided out of income of person abroad) applies, they are references to an amount of the income out of which the benefit is provided equal to the amount charged, and

(b) otherwise they are references to the amount of the income mentioned in section 721(2).

(3) In the case of tax charged on income under section 727 (charge where capital sums received as a result of relevant transactions), they are references to the amount of the income mentioned in section 728(1)(a).

(4) In the case of tax charged under section 731 (charge to tax on income treated as arising to non-transferors where benefit received as a result of relevant transfers), they are references to the amount of relevant income taken into account under section 733 (income charged under section 731) in calculating the amount to be charged in respect of the benefit for the tax year in question."

20 See 30.13.5 (Step 5: Available Relevant income).

21 Although the words in s.743(1) could be construed to apply to situation (3) only, that would be absurd. Indeed, it is unusual that income could be taxed under s.720 and s.731. An example might be if income accrues which is not within s.720 because it is not remitted to the UK, then there is a charge under s.731, and then there is a remittance. Another example might possibly be if s.720 does not apply (because the transferor has no "power to enjoy") but subsequently there is a capital payment within s.727. Another possible case is in 30.19 (Is income within s.720 relevant income?).

(Distribution (*not* to T) of income of company within s.720). Before the enactment of double-counting relief in 1981, there was economic double taxation in these circumstances. Lord Greene did not regard this as double taxation. In an obiter comment in *Howard de Walden v IRC* 25 TC at 131, decided in 1940, he said:

> [Counsel] pointed out that in so far as the right to enjoy income of the four companies is vested in the Appellant's son, who holds the majority of the shares, income received by the son will be taxed in his hands in the ordinary way and at the same time the Appellant will be liable to tax on the whole income of the companies which is deemed to be his. This, said [Counsel], involves double taxation since no relief is afforded by [distribution relief, now s.743(2B) ITA]. There is a short answer to this argument. There is no double taxation since the subject-matter of tax is different, the income of the son being one thing and the income of the companies being another.

Several passages of *Howard de Walden* exhibit an anti-taxpayer ethos which may be attributable to the war-time background; "as we are at war", as Darling J said in another context, "the ordinary mode of construing legislation has been suspended".[22]

Formalistically Lord Greene is right, the situation is one of economic rather than juristic double taxation. However, since the purpose of distribution relief is to avoid economic double taxation, both fairness and the scheme of the Act suggest that double-counting relief should do the same work in this context. It is considered that Lord Greene's comment does not support the contrary view.

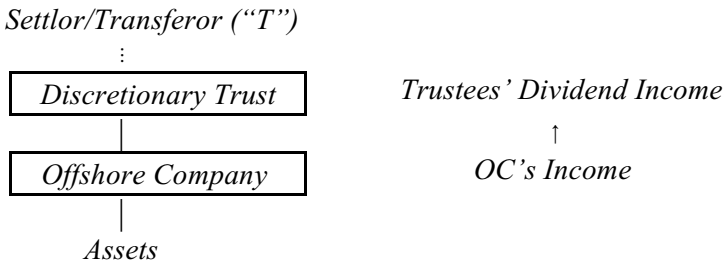
In practice this situation is rare as T either has no "power to enjoy" and so is outside s.720, or else T is life tenant/shareholder and receives the dividends personally and distribution relief applies.

31.7 Section 720 trust/company and company/subsidiary structure

So far we have been considering the (relatively) simple situation of an offshore company (OC) held by an individual (or an IIP trust). We now turn to consider the position where OC is held by a non-resident settlor-interested discretionary trust. That is, trustees of a discretionary trust within s.720 ITA and s.624 ITTOIA hold a non-resident company within s.720:

---

22 Cited in Foxton, "*R v Halliday* in Retrospect" [2003] LQR 455.



Suppose:

(1) Income is received by the OC ("OC's income" at "stage 1").
(2) OC's income is paid to the trustees as dividend income ("the trustees' dividend income" at "stage 2").

In principle this might give rise to two tax charges on T:

(1) OC's income charged under s.720 at stage 1;
(2) The trustees' dividend income charged under s.720 or s.624, stage 2.

Distribution relief should prevent double taxation? It will be recalled that distribution relief applies if:[23]

(1) OC's income is within s.720;
(2) the trustees' dividend income is received by T;
(3) the trustees' dividend income is "that income" (ie the same income as OC's income);
(4) OC's income is taken into account in charging income tax on the individual under s.720.

Condition (1) is satisfied. Condition (2) is satisfied because income is treated as received by T. Condition (3) is also satisfied: see 31.4.1 (When is income "the same" for purposes of distribution relief?).

31.7.1 *When is income taken into account in charging IT under s.720?*

The next requirement of distribution relief is that the income must be taken into account in charging IT under section 720. In *Aykroyd*[24] T failed because T had not been "charged":

> It was suggested that, if the [offshore subsidiary's income] were liable to assessment for the year 1936–37, that provision [s.743(2B)] prevented them being chargeable in the following year. But that argument depended on the substitution of the word "chargeable" for the word "charged". There is no ground that I can see for making any such substitution. ... as he had not been charged in the previous year,

---

23 See 31.4 (Distribution relief).

24 See 31.4.1 (When is income "the same" for purposes of distribution relief?).

> there was nothing to prevent him being charged in the year in question.

This is not obiter, but it is at first sight surprising and it certainly does not appear from the Judge's terse comment that the Court had the benefit of a full argument on the point. Perhaps the position is clearer after the 2013 reforms, though I do not think anyone had much doubt even before.

This does not mean that HMRC have an unfettered discretion:

(1) to assess T on the subsidiary company's income; or
(2) to assess T on the holding company's income.

Under self-assessment, T will normally self-assess T's income and should in principle return the income of the offshore subsidiary as T's income and distribution relief applies. However, where T does not pay tax due on the offshore subsidiary's income HMRC can collect tax on the offshore holding company's income and distribution relief does not apply.

Often it may not matter whether tax is charged on the offshore subsidiary's income or the offshore holding company's income. However, it may matter:

(1) For identifying the source of the income to which s.720 applies. Is the transferor taxed under s.720 in respect of the subsidiary's income or the holding company's income? This may affect:
    (a) rates of tax, eg if the underlying company receives interest or rental income it may makes a difference of 7.5% (the difference between the higher or additional rates and the dividend upper or dividend additional rates).
    (b) availability of transferor's credit for UK tax paid by the company and double tax relief.
    (c) source of income.
(2) It may also affect the year in which the income is subject to tax.

31.7.2 *Double-counting relief*

This provision is discussed in 31.6 (Double-counting relief). It will apply in a s.720 trust/company or company/subsidiary structure but where distribution relief covers the same ground it should not be needed.

31.7.3 *Trust/company structure: HMRC practice*

RI 201 provides:

> where income arises in an offshore company underlying a settlement and the income is not paid up immediately to that settlement the provisions of section [720 ITA] will be invoked where necessary to

assess the income of the underlying company.

The position therefore depends on whether income is paid up "immediately".

(1) *If the income is not paid up immediately*. The provisions of s.720 will be invoked. This is straightforward. RI 201 does not address the question (discussed above) of relief for a subsequent dividend by the underlying company.

(2) *If the income is paid up immediately*. RI 201 implies that:
   (a) s.720 will not be applied so the settlor/transferor will not be taxed on OC's income; and
   (b) the settlor will be taxed on the trust income (as life tenant or under s.624) in the normal way.

An important question is exactly the moment when one moves from (1) to (2). What is the meaning of "immediately"? Does it mean within a day? Or a week? Or at any time within the same tax year? Or at any time before the relevant returns are due or submitted? Do HMRC have a discretion? Does the answer depend on the type of income? One must bear in mind that some forms of income cannot be quantified until the end of an accounting period (eg trading and rental income).

If income is distributed immediately, RI 201 does not expressly address the question whether the settlor is taxed on OC's income or on the dividend. It makes a difference because OC's income may have a tax credit and the rates of tax may be different. But by implication if s.720 is not "invoked" then the tax must be charged on the dividend.

This is a sorry muddle. In practice, the author suspects that HMRC apply the "immediately" concept with latitude and are not concerned as long as they can see that income comes into tax in one year or another, in one form or another.

31.7.4 *Trust/company structure: Further example*

Suppose in the trust/company structure illustrated at 31.7 (Section 720 trust/company and company/subsidiary structure) the company:

(1) receives £100 income;
(2) spends £20 of the £100 it received on expenses (not deductible for the purposes of s.720); and
(3) distributes £80.

It is suggested that £100 is taxable at stage (1) and the £80 is tax free at stages (2) and (3). Close examination of RI 201 (see above) suggests HMRC might assess £20 at stage (1) and £80 at stage (2). It is doubtful

whether the statement is meant to bear close examination, but it makes little difference in practice.

31.8 Life policies

In *IRC v Willoughby* 70 TC 57 Professor Willoughby ("T") transferred assets to a non-resident life insurance company as a premium for a life policy. T was not taxed on the income accruing to the insurance company as the motive defence applied. Had the defence failed, there would in principle have been double taxation:

(1) T would pay income tax on income arising to the life insurance company (to the extent that it arose as a result of T's premium); and
(2) T would pay income tax on the gain arising from the policy under the chargeable event provisions.

HMRC argued that relief was available under two provisions, s.547(2) ICTA and distribution relief.

The Special Commissioner rightly rejected the argument that distribution relief applied:

> ... s.743(2B) only relieves from tax income which is subsequently received by an individual whose income it has been deemed to be in earlier years under s.739(2).

The s.720 income is not the same as the chargeable event income.

Section 547(2) ICTA then provided:

> Nothing in subsection (1) above [deeming chargeable event gains to be taxable income] shall apply to any amount which is chargeable to tax apart from that subsection.

The Commissioner rightly dismissed the argument that this conferred relief:

> So far as double taxation is concerned, in my view s.547(2) [ICTA] and s.743(4) [ICTA] do not provide relief. The former gives relief if the amount of the gain arising in connection with a policy on the happening of a chargeable event, which is deemed to form part of the individual's total income for the year in which the event happens, is chargeable to tax apart from subs (1) of s 547. This does not provide relief for the taxation of income under s.739 [ICTA] in the years before the chargeable event occurs.

That is not the end of the story, as the tax law rewrite have expanded the scope of the relief. Section 527 ITTOIA provides:

(1) This section applies if the whole or part of any receipt or other credit item is taken into account in calculating both—
  (a) the amount of a gain treated as arising under this Chapter, and
  (b) an amount on which income tax is charged otherwise than under this Chapter or on which corporation tax is charged.
(2) The amount of the gain on which tax is charged under this Chapter is reduced by so much of the amount of that receipt or other credit item as is taken into account in both those calculations.

It appears from EN ITTOIA change 95 that this change was intended to benefit traders in policies[25] but it could arguably apply here. There is also a hint in *Willoughby* at p.84 that relief may be available by concession, but that would obviously not bind HMRC. In practice, fortunately, it will be rare for the ToA rules apply to income arising as a result of policy premiums or other payments to life companies.[26]

31.9 Section 731 charge followed by income distribution

I now turn to consider double taxation issues relating to s.731. The transferor's credit, the transferee's credit and distribution relief only apply to s.720, so they have no relevance here.

---

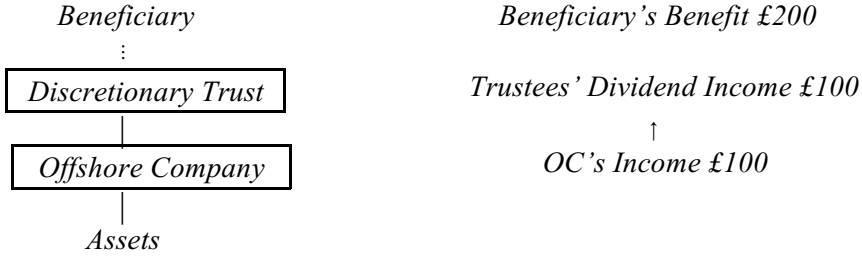
25 "**Change 95: Gains from contracts for life insurance etc: reductions for sums chargeable to tax apart from section 547(1) of ICTA: section 527**
This clarifies the meaning of the exception from the charge to tax under section 547(1) of ICTA given by section 547(2) of ICTA for any amount chargeable to tax apart from section 547(1) of ICTA.
Section 547 of ICTA deals with the method of charging chargeable event gains to tax. This differs according to the person who is interested in the policy. For example, under section 547(1) of ICTA where the rights in a policy or contract are held by an individual as beneficial owner the gain forms part of the individual's total income. However, section 547(2) of ICTA states "Nothing in subsection (1) shall apply to any amount which is chargeable to tax apart from that subsection.".
In practice, the words "amount which is chargeable to tax" in section 547(2) of ICTA are taken to mean the amount of the receipts and credits taken into account for the purposes of ascertaining the overall taxable profit under another provision, rather than the actual amount that is charged to tax under another provision, which in the case of a trader, for instance, will be the net profits of the trade.
Section 527 which rewrites section 547(2) of ICTA makes it clear that the amount chargeable to tax under Chapter 9 of Part 4 of this Act is reduced by the amount of the receipt or other credit item that is taken into account in calculating the amount on which income tax is charged otherwise than under Chapter 9 of Part 4 or the amount on which corporation tax is charged."

26 See 33.7.5 (Income accruing to life company).

Suppose:
(1) trustees of a trust receive income and do not distribute it;
(2) a beneficiary receives a benefit taxable under s.731;
(3) the income is later distributed to the beneficiary as income.
It is understood that the distributed income is not taxed. This might be regarded as informal concession but the better view is that double-counting relief applies here.

31.10 Section 731 trust/company structure[27]

The problem is best illustrated by example:



Trustees of a discretionary trust within s.731 hold a non-resident company within s.731.
(1) £100 income is received by the company ("the company's income" at "stage (1)").
(2) The £100 is paid to the trustees as dividend income ("the trustees' dividend income" at "stage (2)").
(3) A beneficiary ("B") receives a benefit of £200.
Is the relevant income £100 or £200? That is, does the interposition of the company double the relevant income? If so, then the s.731 charge on B is in principle on £200.

It is suggested that double-counting relief applies; see 31.6 (Double-counting relief).[28]

---

27 Contrast 31.7 (Section 720 trust/company and company/subsidiary structure).

28 If that is wrong, then a second argument is that after the company's income is distributed it ceases to be relevant income. See 30.26 (Corporate income distributed to trust). This argument will not avail if the facts are a variant of the above example:
(1) £100 income is received by the company;
(2) a beneficiary receives a benefit of £200;
(3) the £100 is subsequently paid to the trustees as dividend income.
For then even if the company's income ceases to be relevant income after being distributed, it does so too late.

31.11 Section 720 and s.731 overlap

Suppose:
(1) A transferor ("T") is taxed on income of a person abroad under s.720
(2) A beneficiary ("B") within s.731 receives a benefit.

The starting point is that the income of the person abroad (although within s.720) is also relevant income;[29] but double-counting relief applies; see 31.6 (Double-counting relief).

There are four permutations:
(1) T and B are both arising basis taxpayers
(2) T is a remittance basis taxpayer and B is an arising basis taxpayer
(3) T is an arising basis taxpayer and B is a remittance basis taxpayer
(4) T and B are both remittance basis taxpayers

31.11.1 *T and B both arising basis taxpayers*

ITA EN provides:

> Where a non-UK domiciled individual transfers assets but is not chargeable to tax under section 739 ICTA [now s.720 ITA] owing to section 743(3) ICTA [the s.720 remittance basis, now replaced by the somewhat different s.735 ITA], there is no bar in HMRC's view on the application of section 740 ICTA [now s.731] to others who did not themselves make the transfer but were beneficiaries of it. HMRC interpret section 732 ITA in the same way.[30]

It appears from this that where the s.720 remittance basis does not apply (so the transferor is taxed under s.720 on an arising basis) there is a bar on taxing the beneficiaries under s.731. The reason is not given, but could have been:
(1) The income was not relevant income; (but this was doubtful and is not the case from 2013).
(2) Double-counting relief.

Now HMRC practice has changed, and the rule to charge the transferor in priority to the beneficiary is said to be a normal rule but not an absolute one. The ToA draft guidance provides:

> **INTM602480 Just and reasonable basis**
> Where there is a choice of individuals in relation to whom any amount of income

29 See 30.19 (Is income within s.720 relevant income?).

30 See Change 105 in ITA EN Vol III, annex 1. The same point was made in RI 201.

> of a person abroad may be taken into account in arriving at the amount of an income charge or benefits charge, it can sometimes be difficult to determine the amount of income taxable on each individual. To alleviate such difficulties, the legislation provides for the income to be apportioned on a 'just and reasonable' basis
>
> How this is done will depend on the circumstances. For example, individual A may be chargeable on the whole of the income of an overseas company under the income charge. Individual B may receive a benefit from the same company that falls to be charged under the benefits charge. In this situation the income of the company should only be taken into account once (INTM602380) and it will normally be just and reasonable to include the whole of the income arising as an income charge, as the individual who has sought to avoid tax in setting up the structure in the first place will be charged to income tax and will therefore suffer no inequity in bearing the full brunt of the legislation. In this example, individual B may not have a benefit charge for the particular tax year, although the benefit may be subject to a charge in a subsequent year (INTM601700).
>
> However, there may be exceptional circumstances where the benefit charge is seen as being just and reasonable, for example where the income charge arises due to an individual receiving a loan from the person abroad which is repaid after a very short period so that there is no continuing liability on that individual.
>
> ... Each case must be dealt with on its merits and the 'just and reasonable' basis is that which appears to be so to an officer of Revenue and Customs. Appeals against such decisions are the jurisdiction of the Tribunal (previously the Special Commissioners.) (INTM603560)

In practice there will be few if any cases where the beneficiary is taxed instead of the transferor.

The same will apply if T is a remittance basis taxpayer and B is an arising basis taxpayer.

31.11.2 *T is a remittance basis taxpayer and B is an arising basis taxpayer*

The ITA EN passage cited above shows that HMRC have historically regarded B as taxable. Before the 2008 reforms T was wholly exempt on income not received in the UK, so that was sensible and probably correct. Since 2008 the position has changed, as T is now taxable on the income on a remittance basis. It is not probably just and reasonable to tax B on an arising basis, in accordance with standard practice.

31.11.3 *T and B are both remittance basis taxpayers*

There is no guidance on the position where T is taxed on the s.720 remittance basis and B is taxed on the s.731 remittance basis. It is suggested that it is just and reasonable to tax whoever is first taxable, ie to tax T if the income is remitted but to tax B if the benefit is remitted without a remittance of the income. The contrary is arguable.

31.12 Overlapping s.731 charges: Benefits exceed relevant income

The ToA draft guidance provides:

> **INTM602480 Transfer of assets: General provisions: Just and reasonable basis**
>
> ...
>
> Where more than one individual is subject to the benefits charge in respect of benefits which they receive in the same year, it will be necessary to apportion the relevant income (INTM601680) among the individuals. Only by considering the facts of the particular case will it be possible to decide fairly the amount of income to be treated as arising to each individual and subject to the benefits charge. In cases where the total benefits are fully covered by the relevant income, each individual will be potentially subject to charge on the amount or value of the benefits received. Where the relevant income is less than the total amount or value of the benefits, the most appropriate apportionment of the relevant income is by reference to the ratio of the benefits received by each individual in the year to the total of the benefits provided in the year.
>
> However, in a case where it was clearly intended that A's benefit be provided out of the relevant income of the year, and B's benefit out of that of a subsequent year (if, for example, A's benefit was paid three quarters through the year and represented the whole income of the year, while B's benefit was paid nearly at the end of the year to deal with some unexpected contingency) then A might justifiably be taxed on the whole of the benefit in the year of receipt, and B taxed in subsequent year.

31.13 Overlapping s.720 charges

The ToA draft guidance provides:

> **INTM602480 Transfer of assets: General provisions: Just and reasonable basis**
>
> ...
>
> When looking at the just and reasonable basis for apportionment, where there is more than one individual with power to enjoy the income of the person abroad, account should be taken as to who actually made, procured or was associated with the transfer as these parameters may affect the quantum and the nature of the charge. In addition, it is necessary to have regard to the intended outcome of the arrangements which have resulted in income becoming payable to a person abroad. For example, if individual X subscribes for shares in a Jersey company

> for £1000 and individual Y enters into a service agreement with that company, then each individual may be subject to the income charge. However, it may well be that the asset of real value is the service agreement and that should be reflected in any apportionment of the income between the individuals.
>
> Where the same assets are transferred by several individuals the transferors would normally be assessed in proportion to their share of the assets transferred. For example, where shares of a UK company are held by three individuals in the proportions 40%, 40% and 20% and there is liability under Section 720 ITA 2007 in respect of the income of an overseas person to which the shares are transferred, the liability is assessed on each of the three shareholders in proportion to their respective holdings. This example demonstrates both the requirement to avoid duplication of charge (INTM602380) and the 'just and reasonable' basis.

It is considered that double-counting relief is not applicable as there no overlap here, the transferors are only charged on income from their own transfer.

CHAPTER THIRTY TWO

TRANSFER OF ASSETS ABROAD: MOTIVE DEFENCE

32.1 Motive defence: Introduction

Sections 736 to 742 ITA provide a defence to the ToA provisions which I call "**the motive defence**" (or where comparing it to other purpose tests, "the ToA motive defence").[1] The ToA draft guidance calls it "the avoidance purpose exemption".

The ToA motive defence is one of a large number[2] of unallowable purpose tests in UK tax legislation. Although there is a wide variation in matters of detail, they share a common framework, and cases on these other provisions can shed light on the ToA motive defence. The most litigated is the purpose test for the transactions in securities rules.

32.1.1 *Terminology*

Section 736(3) ITA provides two self-explanatory terms:

> In this section and sections 737 to 742—
> "**post-4 December 2005 transaction**" means a relevant transaction effected on or after 5 December 2005, and
> "**pre-5 December 2005 transaction**" means a relevant transaction effected before 5 December 2005.

---

1 A note on terminology. The word "motive" is not used in the legislation, and is perhaps not ideal because a distinction is sometimes drawn between purpose and motive. However the label is convenient, reasonably accurate, and sufficiently well established that it is not worth looking for any alternative. It originates from the Inland Revenue's Notes on clause 18 Finance Bill 1936, accessible *http://www.kessler.co.uk/tfd-archive*.

2 HMRC Discussion Document "Simplifying Unallowable Purpose Tests" (2009) p.7 gave the number as "over 200" but many have been added since then, and no-one could compile a full list.

In this chapter:

(1) "**Old Conditions A and B**" are conditions A and B in s.739 ITA (applying to pre-5 December 2005 transactions).

(2) "**New Conditions A and B**" are conditions A and B in s.737 ITA (applying to post-4 December 2005 transactions).

References to Condition A or B (without more) means either the old or the new version of the Conditions.

There have been two explanations of the 2006 clauses: Explanatory Notes on the Draft Clauses, published 5 December 2005, and Explanatory Notes on the Finance Bill 2006. I refer to these as "**EN Draft Clauses (2005)**" and "**EN FB 2006**".

I distinguish between:

(1) An "**innocent**" transaction, one which satisfies Condition A or B (in short, no tax avoidance purpose); and

(2) a "**tainted**" transaction, one which does not satisfy Condition A or B.

For the definition of "**relevant transactions**" see 28.10 (Significance of associated operations).

32.2 Motive defence condition A

Section 737 ITA sets out New Condition A:

> (1) This section applies if all the relevant transactions are post-4 December 2005 transactions.
>
> (2) An individual is not liable to income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs—
>
> (a) that Condition A is met, or
>
> (b) in a case where Condition A is not met, that Condition B is met.
>
> (3) Condition A is that it would not be reasonable to draw the conclusion, from all the circumstances of the case, that the purpose of avoiding liability to taxation was the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.

Section 739 ITA sets out Old Condition A:

> (1) This section applies if all the relevant transactions are pre-5 December 2005 transactions.
>
> (2) An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs that condition A or B is met.

(3) Condition A is that the purpose of avoiding liability to taxation was not the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.

32.3 Motive defence condition B

Section 737(4) ITA sets out New Condition B:

> Condition B is that—
> (a) all the relevant transactions were genuine commercial transactions (see section 738), and
> (b) it would not be reasonable to draw the conclusion, from all the circumstances of the case, that any one or more of those transactions was more than incidentally designed for the purpose of avoiding liability to taxation.

Section 739(4) ITA sets out Old Condition B:

> Condition B is that the transfer and any associated operations—
> (a) were genuine commercial transactions, and
> (b) were not designed for the purpose of avoiding liability to taxation.

32.4 Enactment history

The original wording was much simpler. It provided exemption if:

> the transfer and any associated operations were effected mainly for some purpose other than the purpose of avoiding liability to taxation.[3]

The Solicitor-General explained why the text was changed to (what is now) Old Conditions A & B:

> A taxpayer[4] transferred a large amount – he was not one of the small people for whom my hon. and learned Friend was pleading – of foreign securities to a trust company abroad on certain trusts under which the income was to be accumulated until the death of the taxpayer. There was a discretion to the trustees to pay certain portions of the income to

---

3 Section 18 FA 1936. Section 28 FA 1938 substituted the text which is now Old Conditions A and B.

4 Presumably a UK resident and domiciled transferor. (HMRC did not contend at that time that (what is now) s.720 applied to a transferor unless UK resident at the time of the transfer, and a foreign domiciled transferor would have qualified for the remittance basis.) So one can see why HMRC found the case troubling.

> the taxpayer or to his son. The deed gives to the taxpayer and his son power, with the consent of the trustees, to revoke the trust, or, alternatively, they can withdraw all or any part of the trust property for their own benefit. The trust income has been accumulated, and none of it has been distributed. The vigilant Revenue authorities pursued this taxpayer, and he contended, successfully, as it transpired, on appeal, that the foreign trust was born because of his fears as to the financial position of this country and the dangers of the situation on the Continent ... in 1936. He stated that he wanted to find a stable country where he could make safe provision for his family. The Special Commissioners decided that the main purpose of the transaction was occasioned by A's pessimistic view of the European situation at the time; that, arising out of that, his main intention was to make provision for his family in a safer country; and that, if there was any intention of avoidance of taxation, it was incidental to the main purpose. They therefore decided that there was no liability under Section 18 FA 1936. That instance has only to be cited to the Committee for the Committee to realise that on this particular matter the hon. Member for Chesterfield (Mr. Benson) was a true prophet in 1936, when he said that the word "mainly" would be too wide.[5]

A case on similar facts might still succeed today, but the test is stiffer. The taxpayer would need (in short) to show that tax avoidance was not even one of the purposes of the transfer.

32.5 "Commercial" in Old Condition B

Commercial is a requirement for Condition B but not Condition A.

In Old Condition B the term is not defined. "Commercial" is an imprecise word.[6] The epithet "genuine" does not add anything.[7] In New Condition B there is a complex definition which is considered in the next section.

It is considered that there is no single factor which determines what is "commercial" but a number of factors may indicate one way or the other.

---

5 Hansard 27 June 1938, col 1610. It is impressive that an income tax dispute relating to 1936/7 was resolved by a Special Commissioners' decision early in 1938.

6 *IRC v Plummer* 54 TC 1 at p.48: "What exactly is comprehended in the phrase ... 'a bona fide commercial transaction', I do not know" (Viscount Dilhorne). Cf *IRC v Goodwin* 50 TC 583 at p.598.

7 See 32.17.3 ("Genuine").

32.5.1 *Transfer with element of bounty*

A transaction made with bounty (gratuitous intent) is not commercial.[8] By contrast, a transfer intended to make money is commercial.[9]

For instance, a gift to a trust for the benefit of the settlor's family is not commercial. The same applies even if the class of beneficiaries includes the settlor and the trust is revocable. By contrast, a transfer of assets to a company wholly owned by oneself may be a "commercial transaction" even if the transfer is for less than full (or nil) consideration, and a transfer to an employee trust may be commercial.[10]

---

8 *Bulmer v IRC* [1967] Ch 145, citing *IRC v Goodwin* 50 TC 583 at p.607. HMRC adopt this approach in Venture Capital Schemes Manual:
11040. EIS: income tax relief: the investor: no tax avoidance [December 2012]
ITA07/S165
An investor in a company is not eligible for relief unless the subscription is made for genuine commercial reasons and not as part of a scheme or arrangement the main purpose or one of the main purposes of which is the avoidance of tax.
Commerciality
This requirement rules out any subscription which is motivated by considerations of benevolence. This could be the case if, for example, the company were the proprietor of an unsuccessful professional football club and a supporter of the club paid a large premium for shares in the company; that may well [interestingly, the text formerly said *would clearly*] not be a commercial subscription. Similarly, if the company is owned by a person whom the investor wishes to benefit, and the investor pays a large premium for the shares with the object of increasing the value of the other person's shares, that too would not be a commercial subscription. Deathbed investments are unlikely to be made for genuine commercial reasons."

9 Ambrose Bierce makes the same point in The Devil's Dictionary (1911) defining "Merchant": "A commercial pursuit is one in which the thing pursued is the dollar." Likewise *C&E Commrs v Morrison's Academy* [1978] STC 1: "I am not at all quite clear what is meant by a 'commercial element' if it is something different from the pursuit of profit...".
For an interesting empirical study of how the word commercial is understood, see Creative Commons, *Defining "Noncommercial"A Study of How the Online Population Understands "Noncommercial Use"*(2009) accessible *http://mirrors.creativecommons.org/defining-noncommercial/Defining_Noncommercial_fullreport.pdf*

10 This is supported by *Wannell v Rothwell* 68 TC 719 at p.733B, a case on loss relief which uses the word "commercial". See too *IRC v Levy* 56 TC 68 at p.87. The issue arose in a case on the meaning of settlement-arrangement. The definition of settlement-arrangement does not include the word "commercial" but the case law "bounty" requirement overlaps with the concept of "commercial".

32.5.2 *Non-business transaction*

In *Carvill v IRC* the Special Commissioner ventured this explanation:

> There was not much difference between the parties about what constituted a bona fide commercial transaction. [Counsel for the taxpayer] contended that this was any genuine transaction which implements or facilitates a business end; [Counsel for HMRC] contended that the transaction must be in furtherance of commerce, ie a trade or business. I shall follow these two meanings.[11]

This seems a fair paraphrase though one should always beware of a paraphrase. At first sight it does not seem to take us very far because the word "business" is notoriously wide and slippery. Nevertheless, one can suggest examples of transactions which should not be classified as commercial because they are not in furtherance of a business. One is the transfer to a trust to avoid the hazards of war, discussed in 32.4 (Enactment history). Another example is a transfer to avoid claims by non-business creditors, eg a claim on divorce or forced heirship. These transfers involve an element of bounty (and may be classified as non-commercial for that reason) but in any event they should be classified as non-commercial transactions because they are not in furtherance of a business purpose.

The HMRC draft guidance for unallowable purpose tests correctly states at para 10110:

> Often, a business will take the view that tax is a commercial cost and minimising it is a commercial aim. ... However, in deciding whether a "purpose test" is triggered, minimising tax is not regarded as a business or commercial purpose.[12]

32.5.3 *Making or managing investments*

RI 201 provides:

> The expression "bona fide commercial" in [Old Condition B] is taken to apply [1] only to the furtherance of trade or business, and [2] not to

11 [2000] STC (SCD) 143 at p.166.

12 HMRC Discussion Document "Simplifying Unallowable Purpose Tests" (2009) *http://www.hmrc.gov.uk/ria/unallowable-purpose-tests.pdf*.

the making or managing of investments.[13]

The TOA draft guidance provides:

> **INTM603020 Commercial transactions**
> ... In this context, HMRC have treated 'commercial' as applying only to the furtherance of trade or business, and not to the passive holding of investments (RI 201 refers).

Proposition [2] (that "commercial" does *not* apply to making or managing investments) is untenable:

(1) The statement does not say what the position is if the making or management of investments constitutes a business. A transfer may be both in the furtherance of a business *and* in the course of making or managing investments.[14] The intended meaning seems to be that investment transactions in the course of a business are commercial, but investment transactions which are not in the course of a business are not commercial. The (elusive) concept of business is distinct from the concept of what is commercial.

(2) More fundamentally, making or managing investments *is* generally regarded as "commercial" even if it does not constitute a business. What can be more "commercial" than the management to maximise investment return? This point is recognised in *Lewis v IRC*:

> It is trite law that in exercising their duties trustees must use as much diligence as a prudent man of business ... Faced with the self-investment problem their duty was to act in a business-like manner: this they did. Put another way, they acted commercially as was their duty. In our view it would be construing the statute too narrowly to hold that they did not carry out the transactions for bona fide commercial reasons, unless an investment decision cannot be for

---

13 RI 201. This was perhaps the view of the drafter of s.724 CTA 2010 which refers to transactions:

"(a) for genuine commercial reasons *or* (b) in the ordinary course of making or managing investments."

But para (b) might have been added for the avoidance of doubt, or for some exceptional case, and it is not clear that the drafter really thought that making or managing investments would not usually be commercial.

14 The proposition that making or managing investments may constitute a business is self-evident; but if authority is needed, see s.105(3) IHTA which refers to the business of making or holding investments; and s.1218 CTA 2009 which refers to "a company whose business consists wholly or partly of making investments".

commercial reasons.[15]

(3) Section 738(4) ITA assumes that making/managing investments may be "commercial" (in the ordinary sense of the word).[16]

Proposition [1] (that the expression "commercial" applies *only* to the furtherance of trade or business) was put to the Commissioners in *Carvill*, where it obtained some support, see above. Nevertheless, it is too narrow. In practice, commercial transactions will normally further trades or businesses so the issue will not often arise. But there are counter examples, as discussed above: making or managing investments is in principle a commercial transaction even if it is not in the course of a business.

The most that can be said is that a transaction which is not in furtherance of a trade/business is less likely to be commercial than one which is in furtherance of a trade/business, but this factor is not decisive.

32.5.4 *Commercial from whose viewpoint?*

From whose viewpoint does one assess commerciality? The answer is that it should be looked at from the viewpoint of the transferor, but it would be a rare arrangement under which one party is and another party is not acting commercially. In *IRC v Willoughby* HMRC accepted that bonds were commercial transactions for Royal Life who issued them but argued that they were not for Professor Willoughby who acquired them. The Special Commissioner did not agree:

> If a contract is entered into by two people and it is a bona fide commercial transaction for one of them, it cannot be not a bona fide commercial transaction for the other party to the contract in the absence of any reason for impeaching the latter's good faith.[17]

The point was not discussed on appeal.

32.6 "Commercial" in New Condition B

Section 738 ITA contains a definition of "commercial" for the purposes of New Condition B. The definition is artificial in that it excludes some transactions that are "commercial" in the normal sense of the word. New Condition B is therefore rather narrower than Old Condition B.

---

15 [1999] STC (SCD) 349 at p.362.

16 See 32.6.3 (Investments restriction).

17 70 TC at p.86H.

Section 738(1) ITA provides:

> For the purposes of section 737, a relevant transaction is a commercial transaction only if it meets the conditions in subsections (2) and (3).

Is s.738 an *exhaustive* definition of "commercial" or is it merely a partial, exclusory definition? That is, if a transaction meets the requirements set out in the section, is it necessarily "commercial" or must the transaction also be "commercial" in the ordinary sense of the word? The wording in s.738(1) ("a ... transaction is a commercial transaction only if ...") could be read as an exhaustive or a partial exclusory definition. It is suggested that s.738 is an exhaustive definition. The legislation is intended to make the law clearer, and a partial definition does not do that. In practice it is difficult to think of a transaction which meets the definition which is not commercial in the ordinary sense of the word, so the issue may not arise.

32.6.1 *Course of business*

Section 738(2) ITA sets out the first requirement of "commercial":

> It [the relevant transaction] must be effected—
> (a) in the course of a trade or business and for its purposes, or
> (b) with a view to setting up and commencing a trade or business and for its purposes.

In the following discussion I use the word "business" to mean "trade or business".[18]

At first sight this more or less encapsulates the natural meaning of "commercial". But in fact it is restrictive. An individual may make an investment which is not in the course of a business, eg a purchase of a company. This is commercial in the general sense of the word, but it is not "commercial" within the new definition. Section 738(2) thus gives effect to HMRC's proposition [1] of the meaning of "commercial" in Old Condition B.[19]

If a transaction is made between X and Y, it may be in the course of a business of X but not in the course of a business of Y. For example, if Y (an individual) subscribes for shares in X Ltd, an investment company, the issue of shares may be in the course of the business of X Ltd. That is

---

18 For HMRC views on what constitutes a business, see CG Manual para 65715 [April 2011] and Shares and Assets Valuation Manual para 111110 [July 2013].

19 See 32.5.3 (Making or managing investments).

sufficient to meet the requirement of s.738(2).

32.6.2 *Arm's length requirement*

Section 738(3) ITA sets out the second requirement of "commercial":

> It [the relevant transaction] must not—
> (a) be on terms other than those that would have been made between persons not connected with each other dealing at arm's length, or
> (b) be a transaction that would not have been entered into between such persons so dealing.

Taken literally, this would exclude an interest free loan to a wholly owned company (even if it is a trading company). Such loans are commercial in the normal sense of the word. One wonders whether that was foreseen by the drafter. EN Draft Clauses (2005) claims that the change merely "clarifies and confirms" the correct interpretation of the existing statute. It is suggested that the provisions should be construed purposively, so that an interest free loan to a wholly owned company *is* a commercial transaction.

A dividend is a commercial transaction, as such transactions are often entered into between companies and minority shareholders (who are in principle not connected to the company).

The ToA draft guidance provides:

> **INTM603020 Commercial transactions**
> ... The above provisions [s.738(2)(3)] ensure that transactions taking place other than at arm's length will not satisfy the terms of Condition B. This will prevent individuals claiming exemption on contrived grounds of 'commerciality'.
> [1] An example of this might be where an offshore company is established as a conduit or 'money box' for personal fee income.

The metaphors of conduit and moneybox are imprecise, but I take this example as a reference to the facts of *Brackett v Chater*,[20] where the transfer of assets was that T entered into a service contract, at an undervalue, with a non-resident company which was held by a settlor-interested discretionary trust made by T. This is an example of a transfer which fails the commerciality test of s.738(3)(a). On the other hand, that

20 60 TC 134 & 639.

contract was not a commercial transaction in the ordinary sense, and the commissioners rejected the taxpayer's argument that the motive defence applied, so this is not a case where the new definition was needed, or would have made any difference.

> [2] It will also prevent claims that the establishment of a non-resident family trust was for 'commercial' reasons.

The statutory definition is not needed here: no-one suggests that the establishment of a family trust is "commercial" in the normal sense.[21]

> [3] HMRC accept that the creation of some trusts will satisfy the 'commerciality' tests, for example an employee benefit trust established for the benefit of a group of employees and funded on arm's length terms.

32.6.3 *Investments restriction*

Section 738(4) ITA restricts the definition of commercial by providing an artificial definition of "trade or business":

> For the purposes of subsection (2), making investments, managing them or making and managing them is a trade or business only so far as—
>
> (a) the person by whom it is done, and
>
> (b) the person for whom it is done,
>
> are persons not connected with each other and are dealing at arm's length.

First one must identify: (a) "the person *by* whom it is done". "It" must refer to the making or managing of investments. Thus we must identify the person carrying on the business.

Next one must identify: (b) "the person *for* whom it (the business) is done". This is gibberish. A business is not in normal English "done for" anyone. Presumably the reference is to the customers of the business. For example, if the business is a property business perhaps it is done for the tenants? Is the business of buying and selling shares done for counterparty vendors and purchasers?

If one can identify a person within (b), the making/managing of investments is only business "so far as" it is done for unconnected persons. Normally an activity is or is not a business: it cannot be a business to a limited extent? If it is, what follows: what if most but not all

---

21 See 32.5.1 (Transfer with element of bounty).

of the customers are unconnected?

While one might, charitably, rewrite the subsection so that it meant that the business must be substantially carried on between unconnected persons, the proper course would be for a court to dismiss it as meaningless.

The subsection does not apply to a company *trading* in financial assets since these are not "investments".[22]

Suppose T subscribes for shares or debentures in (or makes a loan to) an investment company. The transaction satisfies s.738(2) since the company is carrying on a trade or business. The transaction satisfies s.738(3) if it is on arm's length terms. The business satisfies s.738(4) provided the company's business is conducted with third parties: it does not matter that T and the company are connected.

The ToA draft guidance provides:

> **INTM603020 Commercial transactions**
> ...The aim of this is to distinguish between asset management activity (which is a business chargeable for reward) and merely holding assets for possible increase in value.

If that is the aim, s.738(4) ITA does not seem aptly worded to achieve it.

32.6.4 *"Commercial": Commentary*

When one contemplates the difficulties raised by the statutory definition, one appreciates the wisdom of the 1938 drafter in leaving "commercial" undefined. The word "commercial" is often used motive defence tests[23] and nowhere else is it defined. It is suggested that the statutory definition of commercial in s.738 ITA serves no useful purpose, and unless some such purpose can be identified, it should be repealed.

32.7 "Avoidance", "mitigation", "tax reduction", "evasion": Introduction

I turn to discuss the complicated, emotionally charged, and in practice constantly abused term "tax avoidance." It is helpful to begin with a fourfold categorisation:

---

22 See 44.11.1 ("Investment": Terminology).

23 There are too many to give a full list but among the most important are s.138 TCGA; s.734 CTA 2010.

(1) *Tax evasion*: Conduct which constitutes a criminal offence (fraud on HMRC or similar offences). This normally involves dishonest submission of an incorrect tax return. Dishonesty is essential to the offence.
(2) *Honest misdeclaration*: The submission of an incorrect tax return without dishonesty. Those involved may be culpable (guilty of neglect or wilful default) but not dishonest.
(3) *Tax avoidance*: Arrangements that reduce tax liability in a manner contrary to the intention of Parliament (I come later to consider this concept in more detail).
(4) *Tax mitigation*: Conduct which reduces tax liabilities without "tax avoidance" (not contrary to the intention of Parliament).

The distinctions between these concepts (especially avoidance/evasion and avoidance/mitigation distinctions) are now commonplace. They may appear obvious. They are taught to every student. No policy debate would be possible without them. However, these concepts and their associated terminology have only emerged after a gradual process of development and even now the terminology is not always adopted. It is essential to bear this in mind on reading sources on this subject.[24]

32.7.1 *Avoidance/evasion distinction*

An avoidance/evasion distinction very similar to the present was recognised very early (and was surely self-evident at any time) but at first there was no terminology to express it. In 1860 Turner LJ suggested evasion/contravention (where evasion stood for the lawful side of the divide).[25] In 1900 the distinction was noted as two meanings of the word

---

24 eg the 1920 Royal Commission on the Income Tax Cmd. 615 discussed evasion, honest mis-declaration and avoidance in one chapter headed "The Prevention of Evasion". In this discussion the words "avoidance" and "evasion" were used quite indiscriminately, see para 625. It is an interesting question whether the absence of terminology hampered discussion of the issues or whether the lack of discussion or interest led to the absence of suitable terminology. I suggest the latter: in the 1920s, criminal prosecution for tax evasion was rare, and only in blatant cases. Thus the avoidance/evasion distinction was not relevant. Likewise, tax avoidance (in the modern sense) was then still in its infancy so the avoidance/mitigation distinction also had little relevance.

25 *Fisher v Brierly* (1860) 1 de G F&J 643 at p.663. It is a pity this terminology did not catch on because it is more transparent than avoidance/evasion.

"evade".[26] The technical use of the words avoidance/evasion in the modern sense originated in the USA where it was well established by the 1920s.[27] It was slow to be accepted in the UK. By the 1950s, knowledgeable and careful writers in the UK had come to distinguish the term "tax evasion" from "avoidance/mitigation".[28] The distinction is now accepted internationally:

> 72. The terms "tax evasion" and "tax avoidance" have not always been

---

26 *Bullivant v AG* [1901] AC 196 at p. 207:

> "The word 'evade' is ambiguous. ... there are two ways of construing the word 'evade': one is, that a person may go to a solicitor and ask him how to keep out of an Act of Parliament – how to do something which does not bring him within the scope of it. That is evading in one sense, but there is nothing illegal in it. The other is, when he goes to his solicitor and says, 'Tell me how to escape from the consequences of the Act of Parliament, although I am brought within it'. That is an act of quite a different character."

27 It is found in the scholarly Sears, *Minimising Taxes*, 1922, Vernon Law Book Co and can be traced to Oliver Wendell Holmes in *Bullen v Wisconsin* (1916) 240 US 625 at p.630. It is regarded as basic in Dennis Hartman, *Tax Avoidance*, Legal Publishing Soc, Washington (1930) which cites two textbook definitions in similar terms. The practice of tax avoidance was more advanced in the USA; the first published work on the subject in England was Moore, *The Saving of Income Tax Surtax and Death Duties*, (1935) (the publication of which lead to the enactment of the ToA provisions).

28 The 1955 Royal Commission Cmd. 9474 para 1016:

> "It is usual to draw a distinction between tax avoidance and tax evasion. The latter denotes all those activities which are responsible for a person not paying the tax that the existing law charges upon his income. *Ex hypothesi* he is in the wrong, though his wrongdoing may range from the making of a deliberately fraudulent return to a mere failure to make his return or to pay his tax at the proper time. By tax avoidance, on the other hand, is understood some act by which a person so arranges his affairs that he is liable to pay less tax than he would have paid but for the arrangement. Thus the situation which he brings about is one in which he is legally in the right, except so far as some special rule may be introduced that puts him in the wrong."

Note that "evasion" is used here (unlike present usage) to describe dishonest criminal evasion and honest mis-declaration. Lord Templeman used this (by then old-fashioned) terminology in *IRC v Challenge Corporation* [1986] STC 548: "Tax evasion occurs when the commissioner is not informed of all the facts relevant to an assessment of tax. Innocent evasion may lead to a re-assessment. Fraudulent evasion may lead to a criminal prosecution as well as re-assessment." It does aid clarity if the term "evasion" is restricted to what Lord Templeman terms "fraudulent evasion".

used precisely or with a uniform meaning.[29] Strictly speaking, tax evasion is considered to consist of wilful and conscious non-compliance with the laws of a taxing jurisdiction. Tax evasion is an action by which a taxpayer tries to escape legal obligations by fraudulent or other illegal means. The illegal conduct might involve simply failing to report income or fabricating deductions, or it may involve highly sophisticated tax planning that is premised on false or intentionally deceptive representations to the tax authorities. Tax evasion may arise as a result of a failure to properly report income that is legally earned. It may also result from the evasion of tax on income that arises from illegal activities, such as smuggling, drug trafficking, and money-laundering. In a broader sense, tax evasion may encompass a reckless or negligent failure to pay taxes legally due, even if there is no deliberate concealment of income or relevant information.

73. Tax avoidance, in contrast, involves the attempt to reduce the amount of taxes otherwise owed by employing legal means.[30] However, the borderline between evasion and avoidance in specific cases may be difficult to define. For one thing, the criminal laws of countries differ, so that behaviour that is criminal under the laws of one country may not be criminal under the laws of another.[31] In addition, the definitions of civil and criminal tax fraud may overlap, so that it is within administrative discretion whether or not to pursue a criminal fraud case in a specific instance. In reality, there is a continuum of behaviour, ranging from criminal fraud on one extreme, to civil fraud, to tax avoidance that is not fraudulent but which runs afoul of judicial or statutory anti-avoidance rules and therefore does not succeed in minimizing tax according to law, and finally to tax-planning behaviour which is successful in legal tax reduction. ...[32]

---

29 [Footnote original] Part of the problem is a linguistic one. In English, "tax evasion" is synonymous with tax fraud, and means criminal activity. In French, "evasion" means avoidance. Tax evasion should therefore be translated into French as "fraude fiscal". ...

30 [Footnote original] Black's Law Dictionary (Fifth Edition) has defined "tax avoidance" as: "The minimization of one's tax liability by taking advantage of legally available tax planning opportunities. Tax avoidance may be contrasted with tax evasion, which entails the reduction of tax liability by using illegal means".

31 [Footnote original] While most countries define criminal tax fraud fairly broadly, there are some exceptions. For example, Switzerland has a narrow concept of "tax fraud", which is an offence subject to imprisonment, defining it as the use of "forged, falsified or substantially incorrect documents". See Direct Federal Tax Law, art. 186.

32 United Nations Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries) 2003.

A discussion of evasion in the criminal sense is outside the scope of this book. It is important for our purposes to note that the term "evasion" was regularly used (by modern standards, misused) in the sense of avoidance, in law reports and elsewhere, at least up to the 1970s.[33] Now that the terminology has received official approval in the UK[34] this usage can be condemned as erroneous; but it still happens, in the language of lawyers[35] as well as in the language of politicians.[36] It is sometimes helpful to use the expressions "legal avoidance"[37] and "illegal evasion", to make the meaning clearer.

---

33 Examples include: *Coutts v IRC* [1964] 1 AC 1393 at p.1420; *Jamieson v IRC* (1963) 41 TC 43 at p.70; *Cory v IRC* [1965] AC 1088 at p.1107; *Greenberg v IRC* (1971) 47 TC 240 at p.271: "Parliament attempted to prevent this and other methods of tax evasion by provisions in the Finance Act 1960". This usage seems to have stopped in the 1970s; at this time UK economists were giving increasing attention to the subject of tax avoidance and evasion (*Tax Avoision*, p.1, IEA 1979) and perhaps their work had an effect on legal usage. Note that this is purely a semantic and not a substantive point that is being made here. The old usage certainly does not reflect the view that the evasion/avoidance distinction is unreal or unclear or that one can shade into the other. The legal distinction between the two is tolerably clear since evasion involves dishonesty, a tolerably well defined and understood concept. The term "avoision" used in the IEA publication referred to was coined as a convenient term to mean avoidance/evasion. The book noted the lack of *economic* distinction between the two concepts; the economic similarity was the justification for the new coinage. (The book also noted the blurring of a moral distinction between the two concepts either because avoidance was seen by some as immoral or because evasion was seen by some as not immoral; the book did not suggest a lack of a legal distinction which was unquestioned then and still should be now.)

34 *Craven v White* 62 TC 1 at p.197; OED 2nd edition (1989) entry under "Taxation."

35 For example, see *R v Charlton* [1996] STC 1418 at p.1421.
This is particularly common in EU case law, which regularly uses "evasion" where avoidance is meant; eg *Cadbury Schweppes v IRC* [2006] STC 1908 at [50]; *Thin Cap Claimants v HMRC* [2007] STC 326 at [37] discussed 60.8.4 (Need to prevent tax avoidance)). Either EU translators do not know the UK distinction or they do not know the UK terminology, perhaps being mislead by the French word *evasion* which means (in UK terminology) avoidance.
Similarly, s.482 United States Internal Revenue Code refers to allocation of income that "is necessary to prevent evasion of taxes" but the intended concept is one of avoidance.

36 Eg The Progress Tackle Tax Avoidance Charter: "HMRC HAS GOT TO GET A GRIP … 4. Get tough on tax avoiders by mounting more prosecutions." See *http://www.progressonline.org.uk/campaigns/tackle-tax-avoidance*

37 "Legal avoidance" is a standard term in recent double tax conventions.

32.7.2 *Avoidance/mitigation distinction*

The clear[38] articulation of the *concept* of an avoidance/mitigation distinction goes back only to the 1970s[39] and the concept originated from economists, not lawyers. In 1973 C.T. Sandford wrote:

> A government may have one of three attitudes to a particular 'avoidance' measure – using the wide definition of avoidance.
> It may welcome it; the government may have deliberately offered a tax concession to promote some objective, e.g. tax concessions on mortgage interest ... in order to encourage owner-occupation; or investment and initial allowances to stimulate new investment in development areas.
> Second, without having sought positively to encourage a particular 'avoiding' action the government may find it entirely acceptable as when an income tax payer reduces his tax liability by taking a wife or having children; or when a person on retirement transfers savings from a building society to some other form of investment in order to reclaim income tax.[40]
> Third, the government may deplore certain actions as contrary to its intentions; the action is in accord with the letter of the law but not its spirit. *Only actions in this third category should rank as 'avoidance'*.[41]

---

38 One can find some earlier examples: *Mangin v IRC* [1971] AC 739 is a moderately clear example; the concept is embryonically present in *Newton v Commissioner of Taxation of Australia* [1958] AC 450. But these cases do not draw the line as clearly or quite on the same basis as Sandford and modern cases following him.

39 In 1946, Wrottesley J was unaware of it. Discussing the motive defence, he said: "There cannot, I think, be two opinions as to what 'avoiding' means. Where what is to be avoided is a liability, it must mean to evade, or to keep out of the way of, whether it be as in Richard III, 'The censures of the carping world', or anything else unpleasant that might befall a man, such as a tax": *Congreve v IRC* 30 TC 163. This is describing avoidance in the loose or etymological sense (including mitigation).

40 Child allowance was abolished in 1979, and one can now reclaim tax deducted from building society interest; but that does not spoil the validity of the examples.

41 *Hidden Costs of Taxation*, IFS, 1973, p.113 (emphasis added). Sandford proposed a second requirement of "avoidance" which he related to the taxpayer rather than to the legislature:

> "It is reasonable to confine 'avoidance' to action which results in the would-be avoiders substantially achieving the objective to which the tax had become an obstacle. Let us give some examples. If a man ceases to buy cigarettes because of tobacco tax he has not achieved his pre-tax objective, i.e. to smoke. Buying sweets instead of cigarettes therefore, is not avoidance. Again, if a taxpayer decides to use most of his wealth for a consumption spree because estate duty makes it not worth

The use of the *terminology* avoidance/mitigation to express this distinction is an innovation of Lord Templeman in 1986.[42] The expression "tax avoidance" has very often been used in the loose sense, meaning or including mitigation.[43] The reason may be either that the author does not have any avoidance/mitigation distinction in their mind or (if they do) that they are not using the modern terminology to express it. Even now, the term "tax avoidance" is sometimes still used in a loose or etymological sense to include mitigation but nowadays this usage is sometimes jocular, which suggests that the technical meaning is seeping into public consciousness.[44] Likewise "mitigation" was and sometimes still is used in the sense of "avoidance".[45]

In this book I use the words "avoidance" and "mitigation" in the strict sense. It would be convenient to have a neutral term to describe both avoidance and mitigation (what is described above as the loose

---

while saving for heirs, he is not 'avoiding' for he has abandoned his objective of passing property to heirs. On the other hand, if he reacts to estate duty by making *inter vivos* gifts (assuming he survives for seven years), this is avoidance; it has achieved, though by a more circuitous route, the objective of passing to heirs an intact property."

This is problematic, because there is no obvious way to identify the "objective to which the tax has become an obstacle", and it has not been adopted into the law.

42 *IRC v Challenge* [1986] STC 548. Lord Templeman was describing a concept relatively new to tax jurisprudence and framing terminology altogether new to describe it. But in accordance with the (according to Austin, "childish") declaratory theory of law, he did not say so.

43 C.T. Sandford:

"Amongst tax practitioners the generally accepted definition of avoidance ... is any legal method by which a person can reduce his tax bill... this definition can cover almost anything... I can legally reduce my income tax bill by buying a more expensive house (on which I get additional mortgage interest relief), getting married, having more children, taking out more insurance or simply stopping work."

(*Hidden Costs of Taxation*, IFS, 1973).

44 The author once saw an advertisement for PEPs: "Be a tax avoider!" (PEPs were a tax free investment now replaced by ISAs.) For another example, see *Board of Inland Revenue v Hoe*, A.P. Herbert's *More Uncommon Law*: "Evidently those who do not smoke or drink are ... avoiding taxation."

45 eg C.T. Sandford wrote in 1973 that tax avoidance (in the strict sense) "is often referred to by expressions such as tax planning or tax mitigation": *Hidden Costs of Taxation*, IFS, 1973, p.104. *Craven v White* 62 TC at p.203 (a requirement of *Furniss v Dawson* is that a transaction "had no other purpose than tax mitigation").

etymological sense of "tax avoidance"). There is no agreed term, but "tax reduction",[46] "tax saving", "tax planning" and "tax advantage" might all be used in this sense. It may be less confusing if less elegant to refer to "avoidance/mitigation" where one wishes to refer to the two.

32.8 Meaning of "avoidance" in motive defence

The House of Lords in *IRC Willoughby* decided that "avoidance" in motive defence meant tax avoidance in the strict sense and not mitigation:

> ... it was essential to understand what was meant by "tax avoidance" for the purposes of s 741 ICTA [now Conditions A and B]. Tax avoidance was to be distinguished from tax mitigation. ... My Lords, I am content for my part to adopt these propositions.[47]

This would have surprised those who framed the legislation in 1936/8; they were unaware of any avoidance/mitigation distinction. But the enormously increased complexity of the tax system since 1936 makes the distinction sensible, perhaps necessary. HMRC accepted that the purchase of an ordinary offshore bond should be taxed under the chargeable event provisions and not under the ToA provisions. One way[48] to reach that result is to give a narrow meaning to tax avoidance and so to widen the motive defence.

32.8.1 *Purpose of tax evasion*

Suppose an individual transfers assets abroad with the dishonest purpose of *evading* UK taxation. Can one apply the avoidance/evasion distinction and say that the individual did not intend to *avoid* taxation, so that – while they may be liable to criminal sanctions – the motive defence applies and

---

46 INT Manual provides:

> **208010 Introduction to the motive test** [April 2011]
> ... Despite numerous valiant attempts there has never been a consensus about what is meant by 'tax avoidance' ...
> The [CFC] motive test attempts to solve the first problem by avoiding any mention of the term 'tax avoidance', settling instead for the rather more neutral concept of a 'reduction in tax' ...

47 [1997] STC 995 at p.1003.

48 An alternative, less satisfactory, would be to refuse to recognise the tax purpose of the acquisition, by saying that it is merely incidental, or by applying a *Brebner* or choice principle: see 32.14.1 (A choice principle?). Another solution is to say there is no relevant transfer.

excludes the transfer of assets rules? The answer is plainly no. The argument is anachronistic, since in 1936 and for 40 years afterwards, the word "evasion" was used in English jurisprudence to describe avoidance. More fundamentally, the context shows that the expression "tax avoidance" includes (criminal) tax evasion. This was assumed without argument in *R v Dimsey & Allen* 74 TC 263.

32.9 Meaning of "taxation" in the motive defence

"Taxation" in Old Conditions A and B means any form of UK taxation, and not only income tax: *Sassoon* v *IRC*:

> In my view the nature of the [motive defence], instead of requiring a strict interpretation of the word 'taxation' in favour of the taxpayer, calls for a liberal interpretation in favour of the Crown. The draughtsman no doubt had in mind to cover what he would have called all bona fide transfers, that is to say transfers which would be regarded by the Revenue as not made for any fiscal purpose which they would regard as improper. The word 'taxation' is a short expression of such an idea and I think a happy one. Death duties, National Defence Contribution, perhaps other taxes or duties would all be within the Revenues mind in deliberately choosing the wide word 'taxation', in order to make sure that their concession of transfers for other purposes should not be used to deprive the Revenue of other taxes than income tax or Sur-tax.[49]

The International Manual provides:

> **600040 Transfer of assets abroad** [June 2014]
> **Overview of ITA 2007/S736 - 742 - exemption from liability**
> ..In the context of this test "taxation" includes any UK tax liability, for example, Inheritance Tax, Capital Gains Tax, Corporation Tax as well as Income Tax.

Sassoon, though criticised,[50] is a decision of the Court of Appeal and

---

49 25 TC 154 at p.159 cited in ToA draft guidance para INTM603000.

50 For the following reasons:

(1) The rule that an intention to avoid (say) stamp duty should have *income* tax consequences gives rise to obvious anomalies. The usual principle is that each tax must be considered separately. This is the approach usually adopted by anti-avoidance provisions: eg s.682 ITA (transactions in securities), or s.137 TCGA. But see s.75(5)(a) FA 1986 for an exception.

(2) Since *Sassoon* was decided, the word "tax" has been given a limited definition. Section 989 ITA provides:

should be taken to represent the law.

Foreign tax is not "taxation" for this purpose. The House of Lords assumed that this was so without argument in *Herdman v IRC* 45 TC 394. This must be right since (1) it is illogical that the purpose of avoiding foreign taxes should have UK tax consequences and (2) it would be impractical to apply an avoidance/mitigation distinction to foreign taxes (where the distinction would depend on the foreign tax culture and attitudes). the ToA draft guidance provides:

> **INTM603000 Avoidance purpose exemption: Taxation**
> The case [Sassoon] also established the taxation meant UK taxation. If it is intended to avoid foreign tax and only foreign tax is avoided the transfer of assets provisions will not apply.

For the purposes of New Conditions A and B these rules are set out in s. 737(7) ITA:

> In this section—
> "revenue" includes taxes, duties and national insurance contributions,
> "taxation" includes[51] any revenue for whose collection and management the Commissioners for HMRC are responsible.

"'tax', if neither income tax nor corporation tax is specified, means either of those taxes".

There are two reasons why this statutory change does not affect the position:

(a) A definition of *tax* does not in principle determine the meaning of the cognate word *taxation*. (Would a definition of "engine" determine the meaning of the cognate word "engineer"?)

(b) The decision in *Sassoon* was given the implied approval of Parliament in the 1952 consolidation and it is not likely that the 1970 consolidation was intended to alter that.

(3) Section 720(1) ITA refers only to the avoidance of income tax; but see s.721(5)(c) ITA.

(4) Dicta in *Vestey v IRC* 54 TC 503 are said to be inconsistent with *Sassoon*; but this point was not an issue in *Vestey*.

(5) A reversal of *Sassoon* would cut down considerably the multitude of issues that the motive defence currently raises: see 32.21 (Practical examples: introduction).

While of course "context is king", it is clear that the word "taxation" is sometimes used in an IT context to mean any tax; see for instance s.22 F(No 2)A 1931.

51 This is not an exhaustive definition. At present it is difficult to see what other tax may be caught, but this could be relevant if there was a change in the responsibilities of HMRC (eg a new tax was introduced which was managed by a different Government department).

32.10 Identifying and classifying purpose: The old conditions

It is considered that the identification of a tax avoidance purpose requires a two-stage approach: identifying and classifying purpose.

32.10.1 *Identify purpose of transferor: Stage 1*

One must look into the mind of the transferor to ascertain whether their purpose was (to use the neutral term) to reduce tax. If they had no purpose to reduce tax then the motive defence applies.

In *IRC v Pratt* [1982] STC at p 795, Walton J observed:

> It is not 'the transferor's purpose in effecting the transfer' but 'the purpose for which the transfer was effected'.

But surely one cannot say:
(1) "the purpose for which the transfer was effected"
could be different from
(2) "the transferor's purpose in effecting the transfer"?
(1) is equivalent in meaning to (2). A transfer itself cannot have a purpose: only a human being (or at least, a sentient mind) can have a purpose. "Purpose", if it means anything, is an attribute of a mind.[52] If one says that an inanimate but man-made object such as a tool has a purpose, one is only attributing to the tool the purpose in the mind of the maker or user of the tool. I do not think that Walton J's statement (read in context) contradicts this view.

HMRC agree:

> **10200 Whose purpose?**
> A purpose test will define the person whose purpose is being considered. Some purpose tests refer to the purpose of a scheme or transaction: in this case, the purpose of the parties to the transaction needs to be considered.[53]

---

52 The issue here overlaps with the objective/subjective issue discussed below.

53 HMRC Discussion Document "Simplifying Unallowable Purpose Tests" (2009). *http://www.hmrc.gov.uk/ria/unallowable-purpose-tests.pdf*
Similarly at p.14: "One particular difficulty with testing the purpose of arrangements rather than the purpose of a person is that arrangements are self-evidently inanimate. Any purpose inherent in such arrangements must usually be derived from the purposes of a person or persons who are party to the arrangements." Similarly the draft guidance for unallowable purpose tests at para 10110.

32.10.2 *How to ascertain the purpose of the transferor?*

The issue is subjective in that it depends on what is in the mind of the transferor.

How does one ascertain the transferor's subjective purpose? All facts which may shed light on their purpose must be taken into account. Exemption is not due solely on the basis of an assertion by individuals that tax avoidance was not their subjective intention, because that (self serving) assertion may not be credible in the light of other relevant facts.

It is highly relevant to consider the objective questions:

(1) whether the transfer did reduce tax significantly; and

(2) whether the tax reduction was foreseeable at the time of the transfer.

If the tax reduction was not foreseeable, it is not likely to have been the purpose to achieve it. Conversely the fact that a tax advantage is objectively foreseeable as a consequence of the transfer may be cogent evidence of subjective purpose. We normally have the purpose of achieving the foreseeable consequences of our acts. However, this is not necessarily so. First the transferor may not have foreseen the advantage even though a "reasonable person" might have done so: no-one at all times acts with the foresight of the "reasonable man".[54] Secondly, the transferor may have been aware of (or even have wanted) the advantage but it may nevertheless not properly be classified as their "purpose".[55]

Before *Willoughby* identifying a purpose of reducing tax was the beginning and end of the matter because an avoidance/mitigation distinction had not been recognised in this context. Now there is a second stage.

32.10.3 *Classifying purpose: Stage 2*

If the transferor did have the purpose of reducing tax, one must (applying *Willoughby*) categorise that purpose as "avoidance" or "mitigation". This is determined objectively (in the sense that the issue is independent of the mind of the transferor).

It would be wrong at stage (2) to ask whether the transferor subjectively thought their purpose was "tax avoidance" (as opposed to mitigation) because avoidance/mitigation is a question of law, a decision for the Court

---

54 Contrast s.8 Criminal Justice Act 1967, the principle of which is also part of the common law: *Frankland v The Queen* [1987] AC 576.

55 See 32.13 (Foresight and purpose) and 32.14 (Consequence and purpose).

and not for them. Indeed, it would generally be pointless, since (unless the individual is a tax lawyer) they will not know the correct meaning of the terms.

The motive defence therefore involves a mixture of objective and subjective elements, as often happens.

Stage (1) – the mind of the transferor – is a question of fact, decided by the first-tier tribunal, which conveniently allows the appellate courts to say very little about it:

> The question whether in fact one of the main objects was to avoid tax is one for the Special Commissioners to decide on a consideration of all the relevant evidence before them and the proper inferences to be drawn from that evidence....
> ... the Special Commissioners came to a reasonable conclusion on the evidence before them. They could have reached a contrary conclusion, which would have been equally unassailable, had they taken a different view of the evidence;. ..[56]

Anything said on the subject of tax avoidance in motive defence cases before *Willoughby* needs to be reviewed because it will not have considered stage (2).

32.10.4 *HMRC view(s): Objective purpose*

RI 201 states:

> [1] If a transaction involves tax avoidance, that is considered by the Revenue to be at least one of its purposes
> [2] even if the transferor did not form the subjective intention[57] of avoiding tax.[58]

---

56 *IRC v Brebner* 43 TC 705.

57 RI 201 is (I think) using "intention" as a synonym for the statutory word "purpose", but the difficulty of RI 201 becomes more apparent if one disallows that move. It is surely nonsense to say:

> "If a transaction involves tax avoidance, that is considered by the Revenue to be at least one of its purposes even if the transferor did not form the subjective purpose of avoiding tax."

58 This is loosely based on a dictum of Lord Nolan in *IRC v Willoughby* [1997] STC 995 at p.1003:

> "Where the taxpayer's chosen course is seen upon examination to involve tax avoidance (as opposed to tax mitigation), it follows that tax avoidance must be at least one of the taxpayer's purposes in adopting that course, whether or not the taxpayer has formed the subjective motive of avoiding tax."

This is a rejection of the stage (1) test set out above. In the HMRC view a transfer may have been effected for a tax avoidance purpose even though the transferor did not have the subjective purpose of obtaining a tax reduction. That must be wrong for several reasons. First, the natural meaning of "purpose" is to connote a subjective concept. This meaning is supported by high authority.[59] Of course context may show the word is used in an unusual sense, but that is not the case here. Secondly, this is the way that the motive defence has always been applied and understood.[60]

While the HMRC statement clearly rejects a subjective purpose test, it is not clear what test HMRC wish to apply instead. What is meant by a transaction "involving" tax avoidance? Sometimes HMRC have argued that the statute requires one to identify the "objective purpose" of the transfer. The attraction of putting the matter this way is that it is close to the wording of the statute. The difficulty is that the expression "objective purpose" is an oxymoron. If that means anything, it means, I think, the purpose which an ordinary reasonable person would have if they had made the same transfer in the circumstances of the transferor. It is difficult to identify purpose in this way because different people may do the same act with different purposes. And which circumstances are relevant? For instance, take the example of the transferor concerned as to the situation

---

59 "I shall begin by considering the word 'purpose', for both sides have relied on this word in different senses. Broadly, the appellants contend that it is to be given a subjective meaning and the Crown an objective one.
I have no doubt that it is subjective. A purpose must exist in the mind. It cannot exist anywhere else."
Chandler v DPP [1964] AC 763 at p.804. *Dicta* apparently to the contrary in *Newton v Commissioner of Taxation* [1958] AC 450 at pp.465–466 are rightly criticised and distinguished in John Avery Jones [1983] BTR 22–24. Twenty years later, Avery Jones had the opportunity to make the same point judicially in *Carvill v IRC* [2000] STC (SCD) 143, 75 TC 477. A subjective test also applies for the escape clause in the transactions in securities rules; see *Addy v IRC* 51 TC 71 at p.81E.

60 The drafter of s.33(3) FA 1944 and s.32(3) FA 1951 plainly agreed. This provided (in short) that where "the main benefit which might have been expected to accrue" from a transaction was tax avoidance, then tax avoidance "was *deemed* to have been the purpose of the transaction". This imposed an objective standard and only makes sense on the assumption that the word "purpose" (in text based on what is now Condition A) was otherwise determined subjectively. The point is made expressly in *Crown Bedding v IRC* 34 TC 107 at p.115.

in Europe in 1936.[61] Their subjective purpose was not tax avoidance. Was their objective purpose tax avoidance? I do not know how to begin to answer the question.

The test that HMRC ultimately wanted to apply is that a transfer has a tax avoidance purpose if it has a tax saving *result*, if its *effect* has been to save tax, or at least if it was reasonably foreseeable that it would do so. This test does make sense (unlike "objective purpose") and it is practical to apply. The difficulty with this test is that it is not consistent with the wording of the statute. Purpose and result/effect are two entirely different concepts, and there is no getting away from that.

The ink had hardly dried on the HMRC statement when the Special Commissioners rejected it: *Beneficiary v IRC*,[62] *Carvill v IRC*.[63] Until 2008 HMRC contended that these cases were wrongly decided. However, HMRC sensibly abandoned that position before the Tribunal in *Burns v HMRC*,[64] where the Commissioner said:

> It seems to me to be settled law that what I must address is "purpose", rather than objectively ascertained effect, or presumed effect.

In practice the "objective purpose" argument is now (I think) resolved. This is confirmed in the HMRC draft guidance for unallowable purpose tests para 10030:

> Thus, where there is a purpose test, the consequences of a transaction will be dependent on the subjective purpose of the taxpayer. It is entirely possible that two taxpayers entering into similar transactions, but with different purposes, will be taxed differently....[65]

The draft guidance cites with approval a comment in a VAT case where a manufacturing company purchased a horse for promotional purposes:

---

61 See 32.4 (Enactment history).

62 "We reject counsel's submission that we should look at effect. Purpose is not effect and in our view it is essential to look into the minds of the actors to discover their purpose". But: "The question of whether there was tax avoidance must be looked at objectively". *Beneficiary v IRC* [1999] STC (SCD) 134 at [143].

63 [2000] STC (SCD) 143 at [9]–[13], 75 TC 477 (Special Commissioners). The dictum of Lord Nolan in *IRC v Willoughby* mentioned above which appears to favour an objective approach is, as *Carvill* demonstrates, inconsistent with a long line of authority and has to be ignored (as in *Carvill*) or explained (as in *Beneficiary*).

64 [2009] STC (SCD) 165.

65 HMRC Discussion Document "Simplifying Unallowable Purpose Tests" (2009) *http://www.hmrc.gov.uk/ria/unallowable-purpose-tests.pdf*.

> The Tribunal must not substitute the test of what the average businessman would do for the test of what was in the mind of the witness at the time of the expenditure. Once the Tribunal accepted Mr Flockton's evidence that the company's only purpose in purchasing the racecourse was to further its business, the question whether Mr Flockton and the other directors ought to have believed that the purchase and running of the horse would be for the company's benefit became irrelevant.[66]

Para 10050 of the draft guidance is worth setting out in full:

> **10050 Avoidance - what is purpose?: effects do not determine purpose**
>
> There is a clear difference between the purpose of a transaction and its effects. The effects are the advantages or benefits actually obtained (whether intended or not); these benefits can often be computed mathematically and can usually be measured objectively.
>
> In *IRC v Brebner* 43 TC 705, Lord Clyde states:
>
> > "The material question is not what was the effect of each or all of the inter-related transactions, the question is what was the main object or objects for which any of them was adopted. Section 28(1) of the Finance Act, 1960 [now s.734 CTA 2010], draws a clear distinction between effect and object."
>
> In the Special Commissioners' decision of *Snell v HMRC* [2008 SpC 699], it was observed that the implications of the case were that:
>
> > "That case is also authority for the proposition that there is a clear distinction between the effect and the object of a transaction. I take that to mean that however directly a transaction leads to a tax advantage the question whether that was one of its objects is not answered by that clarity of effect"
>
> In *Mallalieu v Drummond* [1983 BTC 380] (see BIM 37910) Lord Brightman said:
>
> > "The object of the taxpayer in making the expenditure must be distinguished from the effect of the expenditure."
>
> Thus, merely reviewing the effects of a transaction will not usually enable a conclusion to be drawn as to the taxpayer's purpose.

This is subject to one qualification:

> However, in the *Vodafone* case (see BIM 38220) Millett LJ said that:
> "Some consequences are so inevitably and inextricably involved in the payment that unless merely incidental they must be taken to be a purpose

66 *Ian Flockton Developments v C&E Commrs* [1987] STC 394.

> for which the payment was made."[67]
> So, in some circumstances, the "inevitable consequences" of a payment do allow the inference to be drawn that a particular purpose existed, even if that was only an unconscious motive of the taxpayer.

32.11 Identifying and classifying purpose: The New Conditions

Old Conditions A and B refer simply (?) to the purpose for which the transactions were effected or designed. New Condition A is that:

> *it would not be reasonable to draw the conclusion, from all the circumstances of the case*, that the purpose of avoiding liability to taxation was the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.

New Condition B is that:

> *it would not be reasonable to draw the conclusion, from all the circumstances of the case*, that any one or more of those transactions was more than incidentally designed for the purpose of avoiding liability to taxation.

The new words are italicised. What difference do they make? Perhaps we should look first to see what HMRC said they intended to achieve:

> 59. The new section 741A ICTA [New Conditions A and B] aims to ensure that all relevant factors are taken into account in deciding whether exemption is due. That is the normal way of applying any purpose test, but in relation to section 741 [Old Conditions A and B] the view is sometimes expressed by tax practitioners that the present test should be interpreted more narrowly. They contend that
> [1] it is only necessary to look at the subjective intentions of the individual, and
> [2] that no account need be taken of any other circumstances, even if they included for example the fact that a particular transaction might have been structured in such a way that it directly resulted in a significant tax reduction that was not on the face of it intended by Parliament.

There are two distinct "contentions" here. The first is correct. The second cannot be taken seriously: see 32.10.1 (Identify purpose of transferor: stage 1).

---

67 *Vodafone Cellular v Shaw* 69 TC 376

> 60. HMRC has consistently taken the view that such a narrow interpretation of section 741 is not a correct reading of the law. If such an interpretation is accepted, the purpose of the transfer of assets abroad legislation to prevent individuals avoiding income tax in the way defined [*sic*] in sections 739 and 740 could not be properly achieved. The new test makes it the condition for exemption that the individual must broadly show that it would not be reasonable to conclude from all the circumstances of the case that any of the transactions had a tax avoidance purpose. The wording of the test is intended to put it beyond doubt that exemption will not be due solely on the basis of an assertion by individuals that tax avoidance was not their subjective intention. Evidence of individuals' subjective intention will be one factor to take into account. However, all other relevant circumstances of the particular case must also be considered, including the actual objective outcome of the transactions.[68]

These paragraphs are somewhat muddled. I think it is making the point made at 32.10.1 (Identify purpose: stage 1). All relevant circumstances must be taken into account in order to identify an individual's purpose. A particularly significant fact is whether the transaction resulted in a significant tax reduction, that is, the actual objective outcome of the transactions.

I have wondered whether the drafter's aim here is something different: to replace the subjective purpose test (which clearly applies to the Old Conditions) with an objective results test. However this is inconsistent with what the EN actually said. First, the current (subjective) test is not the view "sometimes expressed by tax practitioners": it is the view of the two most distinguished Special Commissioners of the day and firmly grounded in the law. Moreover, if it were the intention to substitute a subjective purpose test with an objective results test, then "evidence of individuals' subjective intention" should cease to be "one factor to take into account". It will be completely irrelevant. However, the one thing that is clear is that the passage is unclear. It is wrong to try to construe a muddled explanatory note in order to understand a statutory provision. We do not wish to move to the position, sometimes said to apply in the USA, that "if the legislative history is unclear, you read the words of the statute".

---

68 EN Draft Clauses (2005). The point is made more briefly in EN FB 2006 para 66.

Turning, as we must, to the legislation itself, we find that the test still depends on the purpose of the transactions. It is reasonably clear that:
(1) this means the purpose of those who carried out the transactions, and
(2) purpose means subjective purpose.
What the new legislation stresses (if only for the avoidance of doubt) is that all the circumstances of the case must be taken into account in order to ascertain the subjective purpose.

Had the drafter sought to replace a purpose test with an objective results test, then they would have used quite different wording, and, indeed, a precedent existed in s.33(3) FA 1944 and s.32(3) FA 1951.

This view is confirmed in the HMRC discussion paper "Simplifying Unallowable Purpose Tests" (2009) p.18:

> An alternative test to a "main purpose" test would be to assess whether "it is reasonable to assume that the main, or one of the main purposes is unallowable". In this way, purpose can be assessed objectively and the test can potentially penetrate purported subjective purposes which do not stand up to objective scrutiny. The potential impact of such drafting is currently being examined. In the future, such an approach may be recommended if the outcome of internal consideration and external comment is positive.

The outcome was not positive, and the response document provided:

> There was widespread opposition to any use of a 'reasonable to believe' test in respect of any purpose threshold.
> The proposed framework will therefore recommend that policy owners do not use a 'reasonable to believe' test.[69]

32.12 Transfer made for tax and non-tax purposes

32.12.1 *Condition A*

Condition A depends on whether the purpose of avoiding liability to taxation was the purpose *or one of the purposes* for which the transfer or associated operations were effected.

If one of these purposes is tax avoidance, the transfer fails condition A. It does not matter what the other purposes are.[70]

---

69 HMRC Discussion Response Document "Simplifying Unallowable Purpose Tests (2009), p.7.

70 This is plain from the terms of the statute but if authority is needed, see *Philippi v IRC* 47 TC 75 at p.110.

32.12.2 *Old Condition B*

Old Condition B contains two requirements; both must be satisfied. The first is that the transfer and any associated operations were commercial transactions. Secondly that the transfer and associated operations were not designed for the purpose of avoiding liability to taxation.

What happens if a commercial transaction has two or more purposes? HMRC say in RI 201:

> The Revenue's view is that one of the essential conditions of s 741(b) ICTA would not be satisfied where there was a significant element of tax avoidance purpose in the design of the transfer and any associated operations.

This paraphrase is rather[71] too generous to HMRC. The Special Commissioner stated:

> One must ask in para (b) whether the transfer was designed for the purpose of avoiding tax or not. This seems to me to require that the main purpose was not tax avoidance because if one has to categorise a transaction as being either designed for the purpose of tax avoidance or not, when it is clearly accepted that a transaction may be designed for more than one purpose, the only way to categorise the design into one purpose is to look at the main purpose of the design. I think, therefore, that the taxpayer's contention of sole purpose is too loose a test and the Revenue's contention of significant purpose is too stringent a test although it will in practice be difficult to determine the difference between a significant and a main purpose.[72]

The point of Condition B is that (if one passes the "commercial" requirement) the "no tax avoidance" requirement is easier to satisfy. Otherwise there is no reason to have two Conditions.

32.12.3 *New Condition B*

The wording has changed in New Condition B. The test is now whether:

---

71 Depending to an extent what nuance one gives to the malleable word "significant".

72 *Carvill v IRC* [2000] STC (SCD) 143 at [89], 75 TC 477. The same Special Commissioner cited and followed this passage in *4Cast v Mitchell* [2005] STC (SCD) 280 at [12].

> any one or more of those transactions was *more than incidentally* designed for the purpose of avoiding liability to taxation.

This brings the law into line with RI 201.[73] At first I thought (like the Special Commissioner) the difference is relatively slight. But (depending what nuance is given to the malleable word "incidentally") the change does make a difference. Since a merely incidental motive is not likely to amount to a "purpose" at all, a claim which fails Condition A will rarely (if ever) qualify under Condition B. For this reason (and because the "commercial" requirement in New Condition B is so narrow) New Condition B is dead letter law.

32.12.4 *Condition B: Commentary*

Why did Parliament not simply repeal Condition B, rather than amend it out of existence in a way which needs pages to analyse and discuss? Perhaps the full extent of what was done was not realised. Perhaps it was, but it was thought that repeal would raise fiercer objections. However that may be, the rational course would either be to repeal Condition B completely and gain the benefit of simplicity or to return to old Condition B, which had a role to play in aiding commercial life and the economy.

32.13 Foresight and purpose

32.13.1 *Terminology*

In ordinary English usage, and in general legal usage, the words "object", "purpose" and "intention" are used synonymously and interchangeably. (The word "motive" often has a slightly different nuance, but there is no need to pursue that here.)

Sometimes an attempt is made to desynonymise the terms, in order to find labels for some distinction. However none of these attempts have found general acceptance. So although distinctions in meaning may be proposed, or agreed, there is no agreed terminology to express them. Nothing has changed since Lord Simon commented in 1975:

> A principal difficulty in this branch of the law is the chaotic terminology, whether in judgments, academic writings or statutes. Will, volition, motive, purpose, object, view, intention, intent, specific intent

---

73 I take "more than incidental" in New Condition B to have the same meaning as "significant" in RI 201.

> or intention, wish, desire; necessity, coercion, compulsion, duress – such terms, which do indeed overlap in certain contexts, seem frequently to be used interchangeably, without definition ....[74]

It seems to me that this should not cause too much difficulty - indeed in the absence of substantial law reform we have no choice but to cope with it - provided that one remembers that these terms are occasionally given narrower and more precise meanings, but those meanings should not be regarded as generally applicable.

For instance, clause 14(1) of the draft Offences Against the Person Bill[75] defines intention in a way which illustrates one possible meaning of the word "purpose":

> A person acts *intentionally* with respect to a result if—
> (a) it is his *purpose* to cause it, or
> (b) although it is not his purpose to cause it, he knows that it would occur in the ordinary course of events if he were to succeed in his purpose of causing some other result.

This draws out an important distinction, but it is unfortunate that the terminology used to express is "intention" and "purpose".[76] In this sense, purpose is narrower. If a person has the purpose of causing another result, but knows the tax saving would occur if they succeed in their purpose of causing the other result, they have the *intention* to obtain the tax saving but not the *purpose*.

However the word "purpose" is not usually understood this way:

> The word [purpose] can be used to designate either
> [1] the main object which a man wants or hopes to achieve by the contemplated act, or ...
> [2] those objects which he knows will probably be achieved by the act, whether he wants them or not.
> I am satisfied that in the criminal law ... its ordinary sense is the *latter* one.[77]

---

74 *DPP v Lynch* [1975] AC 653 at p.688.

75 A Home Office consultation paper, 1998, never implemented.

76 Bentham's terminology was direct and oblique intention: *The Principles of Morals & Legislation*, Chapter VIII (Of Intentionality). See Kaveny's excellent "Inferring Intention from Foresight" 120 LQR 81 and Bratman, "Intention, Plans & Practical Reason", (1987), Chapter 10 (Intention and expected side effects). See Avery Jones "The mental element in anti-avoidance legislation" [1983] BTR 22.

77 *Chandler v DPP* [1964] AC 763 at p.804, emphasis added.

Here the same distinction is drawn, but the words "purpose" and "object" are used to express it.

Generally, however, "object" and "purpose" are regarded as the same. HMRC rightly say:

> For example, Romer LJ in the *Bentleys Stokes* case[78] uses the words 'object', 'motive' and 'purpose' quite indiscriminately... there is no difference between purpose and object.[79]

The significance of this is that cases on the transactions in securities purpose test can be and often are cited as relevant to the ToA motive defence. The ToA motive defence refers to purpose and the TiS motive defence refers to object, but that makes no difference. A more significant difference is that the TiS motive defence refers to the *main* object; the ToA motive defence refers to purpose and not to the *main* purpose. But although there is perhaps a difference in nuance, I do not think that makes a great deal of difference.[80] In the HMRC view it makes no difference at all:

> Whether a purpose is more than incidental, and if so whether it is a main purpose, will be a question of fact for the Tribunal to decide. In HMRC's view, any purpose which is more than incidental is prima facie a main purpose.[81]

32.13.2 *"Purpose" in the motive defence*

In RI 201 HMRC say:

> "Purpose" is taken to be the end it is sought to achieve by the transaction.[82]

---

78 *Bentleys, Stokes and Lowless v Beeson* 33 TC 491.

79 HMRC Discussion Document "Simplifying Unallowable Purpose Tests" (2009) , para 10040 *http://www.hmrc.gov.uk/ria/unallowable-purpose-tests.pdf*.

80 This was presumably the view adopted in *Willoughby* in the Court of Appeal where *Brebner* , a TiS case, was cited in a case on the ToA motive defence Condition.

81 HMRC Discussion Document "Simplifying Unallowable Purpose Tests" (2009) para 10140 *http://www.hmrc.gov.uk/ria/unallowable-purpose-tests.pdf*.

82 This is based on *Newton v Commissioner of Taxation of the Commonwealth of Australia* [1958] AC 450 at p.465. Note by the way how use of the passive voice ("it is sought to achieve") ducks the issue of whose purpose one is looking for. See George Orwell's essay, "Politics and the English Language" accessible *http://orwell.ru/library/essays/politics/english/e_polit*.

This adopts (I think) the narrower concept of purpose and it is suggested that this is correct. Purpose in the motive defence is what a person wants or hopes to achieve (not merely foresight). In practice, the issue arises in Condition A cases.[83]

the ToA draft guidance provides:

> **INTM602960 Avoidance purpose exemption: Purposes**
> ...Over the years there has been long debate about exactly how a test of purpose should be construed, in particular whether the test is an objective or a subjective one. Purpose is that which an individual is seeking to achieve or the end the individual intends to reach. It must be distinguished from motive which focuses on why an individual does something (see Lord Denning in *Newton v Commissioners of Taxation of the Commonwealth of Australia* [1958] AC 450).
> HMRC take the view that the proper way to apply a purpose test is to consider all of the facts in an objective manner, but that is not the same as saying the test is 'objective'. It is clearly wrong to assert that it is only necessary to look at the purpose individuals ascribe to their actions in deciding whether exemption is due; but it is equally wrong to say that only the outcome is relevant. It is essential to consider both. Thus, purpose or intention is essentially a subjective concept, but in practice the objective facts must be examined to draw an inference: see Pennycuick J in *Lloyd's Bank v Marcan* [1973] 2 All ER 359 at 367-8: The word 'intent' denotes a state of mind. A person's intention is a question of fact. Intent may be proved by direct evidence or may be inferred from surrounding circumstances. Intent may also be imputed on the basis that a person must be presumed to intend the natural consequences of his or her act: see Hatherley LC and Giffard LJ in *Freeman v Pope*.
> This approach is borne out by the construction of the new exemption test, referring as it does to all the circumstances of the case in considering purposes including the intentions and purposes of any person who designs, effects, or provides advice in relation to the relevant transactions or any of them.
> Although the words within the current provisions may be new, 'purposes' is not new. And, as was said when the newly worded purpose

83 The issue should not arise in a Condition B case (commercial transactions). In a situation where one wanted the commercial transaction, and merely had foresight that a tax saving would follow, even if the tax saving was regarded as *a* purpose (as in the wide *Chandler* sense of purpose) it would not be the main (or significant) purpose.

test was introduced, its aim was to 'clarify' the law. In other words the new language aimed to better reflect or make clearer the existing understanding and approach to the test.

32.14 Consequence and purpose

A consequence of a transaction is not necessarily its purpose. This was stated in a "celebrated"[84] passage in *IRC v Brebner*:

> [1] My Lords, I would only conclude my speech by saying, when the question of carrying out a genuine commercial transaction, as this was, is reviewed, the fact that there are two ways of carrying it out - one by paying the maximum amount of tax, the other by paying no, or much less, tax - it would be quite wrong, as a *necessary* consequence, to draw the inference that, in adopting the latter course, one of the main objects is, for the purposes of the section, avoidance of tax.
> [2] No commercial man in his senses is going to carry out a commercial transaction except upon the footing of paying the smallest amount of tax that he can.
> [3] The question whether in fact one of the main objects was to avoid tax is one for the Special Commissioners [now the first-tier tribunal] to decide upon a consideration of all the relevant evidence before them and the proper inferences to be drawn from that evidence.[85]

---

84 *IRC v Willoughby* [1995] STC at [167], 74 TC at [89].

85 *IRC v Brebner*; emphasis original but paragraph numbers added. There are minor stylistic differences between the law reports [1967] 2 AC 18 at p.30, and 43 TC 705 at p.718. I here set out the AC version which is more authoritative and more correct (in particular, using the word *speech* rather than *judgment* in the first line).
Another way to read this passage in *Brebner* is to see it as an early recognition of an avoidance/mitigation distinction but that would be anachronistic because the distinction was not then made. It would also be wrong because that distinction is irrelevant in the transactions in securities code. This is stated in *Marwood Homes v IRC* [1999] STC (SCD) 44 at [20]:
"Taking steps to obtain relief under s 242 following payment of a dividend outside a group election is clearly within the spirit of the ACT code in the tax legislation. But the fact that a transaction has been carried out to achieve a benefit conferred by a statutory provision will not of itself exclude the application of s 703 [transactions in securities rules]. This follows from the definition of tax advantage in [what is now s.732 CTA 2010] which covers both everyday tax planning and transactions, such as traditional dividend stripping, which fall more obviously within the mischief that s 703 was introduced to counteract. The only safeguards available to the taxpayer are the clearance procedures and the escape clause. It cannot therefore avail

The point being made here is not (or not just) that mere foresight of a tax advantage does not entail a tax avoidance purpose.[86] Lord Upjohn goes further in point [3]: he states that where there is a "commercial transaction", *a conscious choice* of the tax advantageous course over an alternative does not "necessarily" entail that tax is the main purpose or even one of the purposes of the transaction.

At what point does a conscious choice of a tax advantageous course become a tax avoidance purpose in its own right in addition to the commercial purpose? Lord Upjohn does not give an answer to this: to say at [3] that it is a question of fact for the Commissioners, if true, is not exactly helpful.

It is suggested that a useful approach may be to ask: does the tax advantage form an incidental or subsidiary consequence of achieving the commercial transaction (as opposed to being an end in its own right)? If so, there is no tax avoidance purpose. This is an evaluative test which is perhaps easier to state than to apply, but it may sometimes be helpful. It overlaps with an avoidance/mitigation distinction, since an advantage which is judged to be incidental or ancillary to a commercial or family transaction is less likely to be contrary to the intention of Parliament: it is more likely to constitute mitigation than avoidance.

I suggest the point made in *Brebner* is really this: where one of the reasons for a transaction is a commercial (non-tax) reason, one should be slow to conclude that another purpose is tax avoidance than in the case of a purely tax motivated transaction. This reflects the reasonable assumption that a purely tax motivated transaction is more likely to be contrary to the intention of Parliament and a commercial transaction is less likely to be. I refer to this as the *Brebner* principle.

The *Brebner* principle applies not only to commercial transactions, but also to any transaction carried out for primarily non-tax reasons including "ordinary family dealing", which would include most trust transfers, at

---

Marwood to rest its case on the simple proposition that the dividends ... were directly within the spirit of s 242."

This does follow from a natural reading of the definition of "tax advantage" now in s.732 CTA 2010 (the income tax equivalent has changed). This term includes a relief from or repayment of tax, as well as the avoidance or reduction of a charge to tax. The concept thus includes both tax avoidance and mitigation.

86 The point made at 32.13 (Foresight and purpose) and 32.14 (Consequence and purpose).

least those where the settlor is excluded.[87] In practice, this issue arises in motive defence Condition A cases.[88] It is considered that the *Brebner* principle continues to apply to New Conditions A and B. It is true that the terms of New Condition B (that incidental purposes are to be disregarded) suggest that incidental purposes in New Condition A are *not* to be disregarded. But the *Brebner* principle is identifying matters that are not "purposes" at all.

32.14.1 *A choice principle?*

The *Brebner* dictum is sometimes regarded as supporting a "choice principle":

> Choosing between two alternatives – if one is carrying out a commercial or a family or an investment transaction, choosing the most tax-efficient – is not avoidance.[89]

But this formulation goes too far: if a UK settlor creates a trust for their family – a family transaction – they have to choose between UK and foreign trustees; but the choice of foreign trustees by the UK settlor is avoidance.[90]

One can accept a choice principle if it is combined with the concept of the intention of Parliament, ie if the settlor makes choices within the intention of Parliament, there is no tax avoidance; this is equivalent or very similar to the concept of "special tax regime".[91]

In an earlier edition I suggested a distinction between:

(1) a tax saving which arises because the transfer *is made* (ie it would not arise if the transfer had not been made)[92]; and

---

87 *Mangin v IRC* [1971] AC 739 at p.751 and p.756, restating the *Brebner* principle in the context of an extremely free reading of a New Zealand provision.

88 Because in a commercial transaction, incidental tax avoidance purposes are in any event disregarded.

89 Baker "Tax avoidance, tax mitigation and tax evasion", accessible *http://www.taxbar.com*.

90 It seems that the choice principle has been abandoned in Australia, as a "false dichotomy": see Myers "Tax avoidance and the High Court since Sir Garfield Barwick" accessible *http://www.law.unimelb.edu.au/files/dmfile/Myers1.pdf*.

91 See 32.16.2 (Special tax regime).

92 Such as the saving of the settlor's own tax liabilities arising from the transfer; see 32.22.1 (No avoidance of settlor's tax liabilities).

(2) a tax saving which arises because the transfer is made *in one particular way* (ie it would not arise if the transfer were made in some other way).[93]

This does not work, because classifying a transfer in category (1) or (2) is an arbitrary or evaluative exercise.

32.15 Purpose: Advisors and agents of transferor

In a case where a transferor is acting by attorney, the purpose of the attorney should, on normal agency principles, be attributed to the transferor.

In the case where:

(1) a company makes a transfer, and

(2) there is no quasi transferor,[94]

usual company law principles must be applied to attribute to the company the purpose of the individuals acting on its behalf.

If a person relies wholly on advisors (eg parents, professionals) and executes documents without more than a vague idea of approving proposals put to them and not properly understood, they have adopted the purpose of their advisors or (which comes to the same thing) the purpose of their advisors is to be attributed to them. In *IRC v Pratt*, a transferor (who had transferred £80k to a Bahamian company) "did not understand the scheme: it was masterminded by his own professional advisors". Nevertheless, "he, *through his advisors*, was fully acquainted with the fact that what was to follow was a tax avoidance scheme, he must fall fairly within the section".[95]

---

93 Such as the saving of the beneficiaries' tax liabilities on a transfer to foreign trustees (which would not arise on a transfer to UK trustees).

94 In such a case of course there would be no *individual* "transferor" who is within s.720: see 29.3.2 (Transfer procured by individual). The purpose of the company which makes the transfer is still relevant for the application of the motive defence to s.731 ITA.

95 57 TC 1 at pp.47, 49. The same point is made in *Burns v HMRC* [2009] STC (SCD) 165 at [20] and [39]: "The purpose for which the two girls effected the transactions was simply to do what their parents suggested, and it seems appropriate to me to proceed on the basis that the two girls effectively sought to achieve those purposes that influenced their parents."

The same principle applies for the transactions in securities rules; see *Addy v IRC* 51 TC 71 at p.81g. Likewise for the definition of "settlor": see 80.28 (Purpose of advisors and agents of settlor). In *Federal Commissioner of Taxation v Consolidated Press Holdings* (2001) 207 CLR 235 the High Court of Australia said it was "both

For the purposes of New Conditions A and B, s.737 ITA provides:

> (5) In determining the purposes for which the relevant transactions or any of them were effected, the intentions and purposes of any person within subsection (6) are to be taken into account.
> (6) A person is within this subsection if, whether or not for consideration, the person—
> (a) designs or effects, or
> (b) provides advice in relation to,
> the relevant transactions or any of them.

This only restates the law applicable to the Old Conditions A and B; it makes no difference to the position.

The significance of taking tax advice is discussed in *Ebsworth v HMRC* [2009] UKFTT 199 (TC):

> 13. Much was made, particularly in cross-examination, of certain of the notes made by Mr. Ebsworth's tax advisers. For the reasons discussed below I did not find them particularly illuminating in reaching my decision as they were what one would expect from a tax adviser engaged to advise on tax rather than as a commercial or other adviser. Taking tax advice does not of itself make tax avoidance one of the main objects of the transactions concerned....
> 62. The fact that Mr. Ebsworth sought tax advice (with Mrs. Ebsworth) does not of itself mean that tax avoidance was a main object of the transactions. [The paragraph then cites Lord Upjohn in *Brebner*].

The GAAR guidance makes the same point:

---

possible and appropriate to attribute the purpose of a professional advisor to the taxpayer". I stress this because the opposite view was taken in *Philippi v IRC* 47 TC 75 where the Court of Appeal said at p.114:

"Young Mr. Philippi ... said that he never had any idea of tax in his mind when he made that transfer. It was true that it was saving him a great deal in UK tax ... but that had not occurred to him; the only reason why he had made the transfer was because his father and other members of the family had told him that he ought to do so. He appears to have had no idea why they gave him that advice. The Commissioners accepted ... his evidence that what he had done he did on his father's advice."

Assuming that this implausible story is true (though "young Mr Philippi" was aged 23 at the time of the transfer) the Court should have held that he had adopted the (tax avoidance) purpose of his father. The point was not argued and *Philippi* should not be followed on this issue.

> C3.7 It is important to note that the fact that tax advice has been obtained is not, of itself, an indication that the obtaining of a tax advantage is a main benefit[96] of the arrangement. Where large sums are involved many taxpayers will routinely seek professional advice, including tax advice.[97]

The ToA draft guidance provides:

> **INTM602960 Avoidance purpose exemption: Purposes**
> ... If any professional advice obtained in a particular case is treated as a relevant factor and the individual states that they had no intention to avoid tax, it is reasonable to see whether the advice they acted on is consistent with that contention. If the individual proceeds in accordance with advice obtained (or simply instructs the agent to proceed), the purpose of the adviser would on normal principles be attributed to the individual, whether they understood the implications of the advice or not. For example, if evidence emerged that an individual's adviser or agent had devised a particular structure or recommended or arranged the creation or use of a particular non-resident entity for the purpose of saving United Kingdom tax, that purpose should be taken into account in determining, from all the circumstances of the case, the purposes for which the transactions were effected. That is the case whether or not the adviser had expressly informed the client of the purposes behind the transactions. It would be sufficient for example if evidence emerged from third parties or from the agent's working papers.

32.16 Avoidance/mitigation distinction

This section sets out the most important judicial and other statements on the avoidance/mitigation distinction, which is at the core of the concept of "tax avoidance".

I would first of all note a widespread misconception. It is the misconception that the term "tax avoidance" has a single, relatively clear-cut referent; that subject perhaps to some borderline cases, to classify a transaction as tax avoidance is as straightforward and unproblematic as to identify the colour of a dye. This may relate to a wider misconception about the nature of language, namely the mistake that the meaning of

---

96 This is a loose paraphrase of the relevant statutory test, which is whether obtaining a tax advantage was the main purpose, or one of the main purposes, of the arrangements: s.207(1) FA 2013.

97 HMRC, "GAAR Guidance" (Approved by the Advisory Panel, April 2013) *http://www.hmrc.gov.uk/avoidance/gaar-part-abc.pdf*.

words is given by the existence of things in the world to which they correspond, so that, with any contested term, one can always find a core referent and establish what the word really means.

32.16.1 *Intention of Parliament*

IRC v Willoughby is now the authoritative general statement on the subject:

> Tax avoidance within the meaning of section 741 ICTA is a course of action designed to conflict with or defeat the evident intention of Parliament.[98]

The Tax Law Review Committee used a similar definition of "avoidance":

> We have regarded tax avoidance as action taken to reduce or defer tax liabilities in ways that Parliament plainly did not intend or could not possibly have intended had the matter been put to it.[99]

HMRC have also adopted this approach:

> Tax avoidance is any action taken to obtain a tax advantage in a way that Parliament did not intend or would not have intended had the matter been put before it. This definition is based upon the report on tax avoidance produced by the Tax Law Review Committee in 1997.[100]

There have been some attempts to be more specific.

32.16.2 *Special tax regime*

Morritt LJ said:

> The genuine application of the taxpayer's money in the acquisition of a species of property for which Parliament has *determined a special tax regime* does not amount to tax avoidance merely on the ground that the taxpayer might have chosen a different application which would have subjected him to less favourable tax treatment.
> (*IRC v Willoughby* [1995] STC at 183, emphasis added)

---

98 70 TC 57 at p.117.

99 Tax avoidance: A Report by the Tax Law Review Committee (1997) para 1.13, citing *IRC v Willoughby*.

100 IR152 Trusts: An Introduction (withdrawn on 30/09/04) accessible *webarchive.nationalarchives.gov.uk/20070402085841/hmrc.gov.uk/pdfs/ir152.htm*. HMRC have altered the nuance by deleting the words "plainly" and "possibly" from the TLRC formulation, but that does not alter its essential nature.

This repeats the test of the intention of Parliament (what Parliament has "determined" is, I think, the same as what Parliament has intended). It brings the added refinement of identifying the "special tax regime" which Parliament intended to apply. Professor Willoughby's offshore bonds seem a reasonably clear[101] example of a "species of property for which Parliament had determined a special tax regime".

This approach can be generalised into all occasions where Parliament has determined a "special tax regime" (regardless of whether there is any particular "species of property" involved):

> The adoption of a course of action which avoids[102] tax should not fall within section 99 if the legislation, upon its true construction, was intended to give the taxpayer the choice of avoiding it in that way.[103]

The existence of a special relieving regime is neither a necessary nor a sufficient condition of tax mitigation. It is only a factor to consider. There is no relieving provision for bed and breakfast transactions, which are accepted as mitigation.[104] Conversely, as the Special Commissioner rightly said in *Carvill v IRC*:

> It is not enough to say that if you find a relieving provision then it is the evident intention of Parliament that the taxpayer should be entitled to use it whatever the circumstances. As *Furniss v Dawson* [1984] AC 474 shows it is quite possible to mis-use a relieving provision. To give an example in the same area as this case, suppose the Appellant had formed [the non-resident company] solely to give him a non-resident employer in order to obtain the foreign emoluments deduction. If that company had been funded entirely by the UK companies and had done nothing other than employ the Appellant, it might be the case that the Appellant would have been avoiding tax because he was misusing a relieving provision. ... the taxpayer must do more than point to the existence of a relieving provision; he must be using, rather than misusing, the relieving provision in a way consistent with Parliament's evident intention.[105]

---

101 It might be argued that Parliament had intended the chargeable events regime for normal bonds but not for personal portfolio bonds.

102 Lord Hoffmann has here used "avoid" in the loose etymological sense (to include mitigation). Section 99 provided that an arrangement was void as against the Commissioner for Income Tax if its purpose or effect was "tax avoidance".

103 *O'Neil v IRC* [2001] STC 742.

104 See 32.16.4 (Other indicia of tax avoidance).

105 [2000] STC (SCD) 1543 at [91].

32.16.3 *Economic consequences*

Lord Nolan said in *Willoughby*:

> The hallmark of tax avoidance is that the taxpayer reduces his liability to tax without incurring the *economic consequences* that Parliament *intended* to be suffered by any taxpayer qualifying for such reduction in his tax liability. The hallmark of tax mitigation, on the other hand, is that the taxpayer takes advantage of a fiscally attractive option afforded to him by the tax legislation, and genuinely suffers the *economic consequences* that Parliament *intended* to be suffered by those taking advantage of the option.[106]

This repeats the test of the intention of Parliament with the added refinement of identifying "economic consequences". This is based on two Templeman judgments:

> The material distinction in the present case is between tax mitigation and tax avoidance ... Income tax is mitigated by a taxpayer who reduces his income or incurs expenditure in circumstances which reduce his assessable income ...Income tax is avoided ... when the taxpayer reduces his liability to tax without involving him in the loss or expenditure which entitles him to that reduction. The taxpayer engaged in tax avoidance does not reduce his income or suffer a loss or incur expenditure but nevertheless obtains a reduction in his liability to tax as if he had.[107]

The non-recourse loan in *Ensign Tankers* is an example of a transaction without economic consequences and in *Challenge* Lord Templeman gave another example which will be particularly relevant to the practical examples considered below:

> When a taxpayer makes a settlement, he deprives himself of the capital which is a source of income and thereby reduces his income. If the settlement is irrevocable and satisfies certain other conditions the reduction in income reduces the assessable income of the taxpayer. The

---

106 70 TC 57 at p.116 (emphasis added).

107 *IRC v Challenge* [1986] STC 548 cited in *Ensign Tankers v Stokes* [1992] STC at p.240. Lord Millett (whose decision in the High Court was reversed in *Ensign Tankers*) took the opportunity in *Collector of Stamp Revenue v Arrowtown Assets* [2003] HKCFA 46 accessible *http://www.ird.gov.hk/eng/pdf/facv4_2003.pdf* to cast doubt on the correctness of *Ensign Tankers*, but that does not affect the point here.

> tax advantage results from the reduction of income.[108]

These are transactions with obvious economic consequences.

Professor Willoughby's investment in his bond had some "economic consequences" as compared to a direct investment in the underlying assets though one might have thought they were not very substantial.[109]

The GAAR also uses an "economic" criteria. Section 207(4) FA 2013 provides:

> Each of the following is an example of something which might indicate that tax arrangements are abusive—
>
> (a) the arrangements result in an amount of income, profits or gains for tax purposes that is significantly less than the amount for economic purposes,
>
> (b) the arrangements result in deductions or losses of an amount for tax purposes that is significantly greater than the amount for economic purposes...

Incidentally, one wonders what economists would think of the terms "economic consequences" and "economic purposes". Lawyers are not economists, and there is some risk in what John Kay derides as "DIY economics".[110]

32.16.4 *Other indicia of tax avoidance*

It is suggested that "economic consequences" and "special tax regime" are categories of tax saving steps which do accord with the intention of

---

108 *IRC v Challenge* [1986] STC at p.554–555.

109 Lord Nolan identified the following economic consequence:
"The reality in truth is that the bond holder has a contractual right to the benefits promised by the policy, no more and no less. It is therefore quite wrong to describe the bond holder as having, in the words of the Appellants' printed case 'in substance all the advantages of direct personal ownership without the tax disadvantages'. The significance of this misdescription would become all too apparent if—perish the thought—Royal Life were to become insolvent and unable to meet its obligations to the bond holders."
Before 2008 I described this as unconvincing, as the insolvency of Royal Life seemed so remote a possibility as to be discounted. But the 2008 recession showed that Lord Nolan was right.

110 See Kay, *The Truth About Markets* (2003). "Economic consequences" is, I suggest, a form *v* substance distinction under a more appealing name. This is a classification and not a criticism. There is nothing necessarily wrong with a form *v* substance distinction if it is recognised for what it is.

Parliament but are not an exhaustive categorisation of mitigation. They should be regarded as indicia or "badges" of mitigation (like the badges of trade). One can think of others. The Tax Avoidance Schemes (Prescribed Descriptions of Arrangements) Regulations are interesting series of attempts to identify indicia of tax avoidance for the purposes of disclosure obligations. The fact that the regulations (originally made 2004) were amended in 2006, 2009, 2010 and 2013 shows that the exercise was not an easy one. The indicia in the Regulations include:

(1) confidentiality from other promoters; and

(2) premium fees (typically linked to tax savings).

The OECD also identified secrecy[111] as a common characteristic of avoidance:

> Secrecy may also be a feature of modern avoidance. In some cases tax advisers sell ready-made avoidance devices, one term of the contract of sale being that the taxpayer keeps the facts secret for as long as possible. It is in the interest of the avoiders to keep the administration from learning about new schemes because official and public knowledge may be followed by legislation to counter that kind of avoidance.[112]

Neither secrecy nor premium fees are normally associated with the commonplace transactions discussed below. But if, exceptionally, that was the case then it would be a factor suggesting that the transaction should be characterised as tax avoidance.

---

111 There are different types of secrecy:

(1) Secrecy (better described as confidentiality) against other tax advisers (the scheme vendor wishing to keep the profits of a scheme to himself).

(2) Secrecy against HMRC (as the OECD envisage) in order to postpone the time when HMRC are informed for as long as lawfully possible.

(3) Secrecy against HMRC in order to avoid or frustrate any investigation. Of course dishonest breach of a duty of disclosure marks a point where avoidance becomes evasion.

Concealment in category (3) is not primarily characteristic of tax avoidance schemes. It is a problem which may affect all aspects of tax collection (whether or not involving avoidance). The Keith Committee recognised this: Enforcement Powers of Revenue Departments (1983) Cmnd 8822 para 7.3.5. By contrast, lawful concealment in category (1) and (especially) category (2) is an indicia of tax avoidance.

112 OECD Report by Committee of Fiscal Affairs (1980) cited in OECD International Tax Avoidance and Evasion (1987), p.17.

32.16.5 *Established practice*

An important indicia is familiarity and use. Once a tax avoidance arrangement becomes common, it is almost always stopped by new legislation within a few years. If something commonly done is contrary to the intention of Parliament, it is only to be expected that Parliament will stop it. So that which is commonly done and not stopped is not likely to be contrary to the intention of Parliament. It follows that tax reduction arrangements which have been carried on for a long time are unlikely to constitute tax avoidance.

There are arguments against this view.

(1) It may seem strange that an act might be stigmatised as tax avoidance if challenged by HMRC or Parliament promptly after it is first done; but if such acts become the general practice over a period of time then the intention of Parliament is decided differently.

(2) Common practice may not be easily identified, It may be quickly forgotten (especially given a swift turnaround of HMRC staff).[113] Whether it is recorded may be a matter of chance.

Nevertheless, the better view is to have close regard to this factor. Judges have a strong intuitive sense that that which everyone does, and has long done, should not be stigmatised with the pejorative term of "avoidance". This, I suggest, is the true reason why the courts classify bed-and-breakfast transactions and back-to-back loans as mitigation and not tax avoidance.[114] An example in this category is a transfer to an offshore company to avoid IHT, a standard practice since the inception of CTT.

This is consistent with the approach of the GAAR. Section 207(5) FA 2013 provides:

> The fact that tax arrangements accord with established practice, and HMRC had, at the time the arrangements were entered into, indicated its acceptance of that practice, is an example of something which might indicate that the arrangements are not abusive.

Professor Sandford drew another categorisation of tax savings which offers a related indicia of avoidance. He refers to:

(1) Tax savings offered by government to induce a certain kind of

---

113 For an example, see 22.16.9 (Dual contract rules: commentary).

114 *Ensign Tankers (Leasing) v Stokes* 64 TC 617 at 739. Back-to-back loans have been accepted by HMRC for decades: International Tax Handbook, para 1201.

behaviour or to fulfill what it feels to be an obligation.

(2) Methods of saving that a government dislikes, but allows to remain for administrative reasons.

(3) Tax savings deriving from technical loopholes unforeseen at the time of drafting.[115]

Category (1) is obviously mitigation and category (3) is obviously avoidance. It is suggested that category (2) should be classified as mitigation rather than avoidance. An example is a transfer of a land-owning company (instead of its land) to reduce the rate of stamp duty from land rates (in short, 7%) to share rates (0.5%). The Government considered imposing stamp duty at land rates on shares in land-owning companies to prevent this, but decided not to proceed with the idea.[116] ATED is said to be aimed at these transactions, but is restricted to residential property. Transfers involving other property should be considered mitigation rather than avoidance. This category is particularly important to the practical examples considered below. An example is the use of offshore companies to hold UK assets to save IHT (even though the suggestion to impose IHT on such companies did not reach the level of formal discussion).

32.16.6 *Relationship between tax avoidance and tax abuse*

Section 207(2) FA 2013 provides the statutory definition of tax abuse, for the purpose of the GAAR:

> Tax arrangements are "abusive" if they ... cannot reasonably be regarded as a reasonable course of action...

32.17 Failed indicia of tax avoidance

32.17.1 *Spirit of the statute*

Other approaches in distinguishing tax avoidance and tax mitigation are to seek to identify "the spirit of the statute" or "misusing" a provision. I take this to mean exactly the same as the "evident intention of Parliament" properly understood. If that is right, the expression adds nothing but rhetoric and confusion. If it means anything vaguer or more intuitive than

---

115 *Tax Avoision* (1979, IEA) p.81.

116 Modernising Stamp Duty (HMRC, Consultative Document 2002) para 2.34. Contrast Australia where the transfer of shares in "land-rich" companies is subject to stamp duty at the rates applicable to land.

that, then the concept deserves the ridicule expressed in *Norglen v Reeds Rains Prudential*.[117] Either way, the expression is best avoided in this context (and indeed in any context).

32.17.2 *"Artificial" transactions and devices*

Another approach is to seek to identify "artificial" transactions. This raises a number of difficulties.

First, while tax avoidance frequently involves transactions that can be described as "artificial", this is not always the case. You can have tax avoidance without much (if any) artificiality[118] and, of course, artificiality without tax avoidance. That in itself would not be a fatal objection if we are merely seeking badges of avoidance and not a test which will work every time.

However, the unlawyerlike term "artificial" is too vague to be useful even as a badge of tax avoidance. The 1955 Royal Commission on the Taxation of Profits and Income commented on s.44 F(No. 2)A 1915 ("A person shall not, for the purpose of avoiding payment of excess profits duty, enter into any fictitious or artificial transaction ..."):

> A transaction is not well described as "artificial" if it has valid legal consequences, unless some standard can be set up to establish what is "natural" for the same purpose. Such standards are not readily discernible.[119]

The Royal Commission is right. The problem is not that the word "artificial" is meaningless. But it can only be used where there are standards of what is non-artificial (or "natural" or "normal").

For a striking illustration, see the comment of a MP opposing the proposal in the Married Women's Property Bill 1868, that a married woman should own property, as creating:

> an *artificial* and an unnatural equality between men and women.[120]

The Courts have recognised this:

---

117 "It is not that the statute has a penumbral spirit which strikes down devices or strategies designed to avoid its terms or exploit its loopholes. There is no need for such spooky jurisprudence." [1999] 2 AC 1 at p.14.

118 eg an appointment of non-resident trustees or a transfer to a non-resident company.

119 Cmd. 9474 para 1024.

120 Cited in Holford, "Victorian Wives and Property" in Vicinus, *A Widening Sphere* (1980). The proposal did not become law until 1882.

> 'Artificial' is an adjective which is in general use in the English language. It is not a term of legal art; it is capable of bearing a variety of meanings according to the context in which it is used. In common with all three members of the Court of Appeal their Lordships reject the trustees' first contention that its use by the draftsmen of the subsection is pleonastic, that is, a mere synonym for 'fictitious'. A fictitious transaction is one which those who are ostensibly the parties to it never intended should be carried out. 'Artificial' as descriptive of a transaction is, in their Lordships' view a word of wider import.

No further definition was attempted:

> Where in a provision of a statute an ordinary English word is used, it is neither necessary nor wise for a court of construction to attempt to lay down in substitution for it, some paraphrase which would be of general application to all cases arising under the provision to be construed. Judicial exegesis should be confined to what is necessary for the decision of the particular case. Their Lordships will accordingly limit themselves to an examination of the shares agreement and the circumstances in which it was made and carried out, in order to see whether that particular transaction is properly described as 'artificial' within the ordinary meaning of that word.[121]

In *Commissioner of Taxpayer Audit and Assessment v Cigarette Company of Jamaica* the Privy Council cited this and continued:

> 22. ... a transaction is an abstract construct. Every transaction is in a sense artificial in that it is put together by two or more parties in order to create or alter legal rights and obligations as between them. While mindful of Lord Diplock's warning against too much judicial exegesis the Board consider that in this context a transaction is "artificial" if it has, as compared with normal transactions of an ostensibly similar type, features that are abnormal and appear to be part of a plan. They are the sort of features of which a well-informed bystander might say, "This simply would not happen in the real world." Recognising a transaction as artificial in this sense is an evaluative exercise calling for legal experience and judgment. It is certainly not an ordinary question of primary fact....
> 23. A transaction is not artificial merely because it is not commercial, or not fully commercial. Income tax affects transactions by way of

121 *Seramco Superannuation Fund Trustees v IT Commissioner* [1977] AC 287.

> bounty as well as commercial transactions. But if a transaction effected in a commercial context is attacked as uncommercial that may be a reason for looking at it closely. To repeat what Lord Diplock said in the passage quoted above, it is necessary to examine the particular transaction and the circumstances in which it was made and carried out.[122]

A distribution of profits to a shareholder by interest-free loan (rather than dividend) was held not to be artificial. I think one could have written an equally convincing judgment in favour of the opposite view (which had been upheld by the court at first instance.) The word "artificial" is of no use in marginal cases because there are no clear standards. It is of no use in determining whether any of the practical examples considered below are tax avoidance.

In practice the word "artificial" is often used to describe a transaction carried out for tax avoidance purposes. A transaction is not categorised as tax avoidance because it is artificial: it is described as artificial because it is tax avoidance. For instance:

> such elaborate arrangements would not have been entered into other than for the purpose of tax avoidance. The arrangements had no genuine commercial purpose. ... The arrangements can, therefore, correctly be described as artificial.[123]

The same objection applies to that particular obstacle to clear thinking, the term "device".[124]

32.17.3 *"Genuine"*

The word "genuine" is used in three distinct senses.

(1) It is used to describe a transaction which is not a sham (in the strict legal sense of the term). For instance:

> It was thought that if the steps were genuine, ie. not sham or simulated documents or arrangements, the court was not entitled to go behind the form of the individual transactions.[125]

(2) "Genuine" is often used to describe the antithesis to a tax avoidance

---

122 [2012] STC 1045, [22]-[23].

123 *R (oao Huitson) v HMRC* [2010] STC 715 at [11].

124 *Norglen v Reeds Rains Prudential* [1999] 2 AC 1 at 13: "I do not think that it promotes clarity of thought to use terms like stratagem or device."

125 *McGuckian v IRC* 69 TC 1 at p.78.

transaction. For instance:

> Genuine commercial transactions (i.e. those where gaining or obtaining a tax advantage was not a main purpose, or one of the main purposes) ...[126]

A transaction is not categorised as tax avoidance because it is non-genuine: it is described as non-genuine because it is tax avoidance.

(3) "Genuine" in expressions such as "genuine commercial transaction". The word here reflects the drafter's sense of a risk that (because of the vagueness of the word *commercial*) a transaction which is not actually commercial may wrongly be presented as if it was. The word might be regarded a slight intensifier (a term applied to round Anglo-Saxon expletives as well as words such as *very*) but it seems to me that is no difference between "commercial transaction" and "genuine commercial transaction" even as a matter of indefinable nuance. The word is (more or less) otiose. In this context the older expression *"bona fide* commercial", and the new expression "*real* commercial (reason)" have the same connotation.

In none of these senses is the word or concept "genuine" of any assistance in drawing the line between what is and is not tax avoidance. In this respect it is like the word "real" which requires serious unpacking: see App 3 (What do we mean by "real"?)

32.18 Intention of Parliament v intention of Government

I suggest two broad approaches to "tax avoidance" can usefully be distinguished:

(1) "Tax avoidance" as politicians, civil servants (and perhaps most non-tax lawyers) use the term. This means a tax reduction arrangement which is contrary to the intention or wish of the *Government of the day* (ministers or civil servants, primarily HMRC). For a revealing example of this usage see the National Audit Office Report (Countering VAT Avoidance, 1992):

> Avoidance involves complex issues and the position is constantly changing. A policy change in the UK, or a ruling from the European

126 HMRC Consultation Document, *Simplifying Transactions in Securities Legislation* (July 2009) para 3.3. For another example see 32.25 (UK settlor and UK beneficiaries).

> Commission or European Court of Justice, can easily result in today's unacceptable avoidance becoming tomorrow's acceptable tax mitigation, and vice versa.

This is "tax avoidance" for the purposes of politics and administration.[127] For example, accumulation & maintenance trusts[128] which between 1974 and 2006 were a paradigm example of mitigation, suddenly became tax avoidance in the political vocabulary of the Blair Government when it imposed new IHT charges in 2006.

Similarly when lobbyists (particularly those in favour of higher taxation) use the term tax avoidance to mean any tax behaviour of which they disapprove, often including behaviour which neither government nor HMRC regard as objectionable.

(2) "Tax avoidance" in the sense used by tax lawyers. This means a tax reduction arrangement which is contrary to the intention of *Parliament*. The view of the Government or HMRC should not come into it.

This lawyer's concept of "tax avoidance" is better in law because it is consistent with the rule of law: the rule of law requires that tax liabilities are to be determined by settled rules derived from statute and other sources of law, and not by the opinion or decision of a civil servant or politician. This concept is also less volatile. It is right, indeed necessary, for it to be so. If the meaning of "tax avoidance" were "constantly changing" as a result of a mere "policy change in the UK or ruling from the European Commission" then the concept is unworkable for tax.

My distinction was openly accepted in the former ITH:

> **103. Avoidance in international context**
> *Within the Revenue we do not categorise avoidance in quite the narrow way that the Courts have done.* Of course we make a distinction between mitigation and avoidance. However, if a taxpayer takes advantage of the law to get a tax advantage which is not, *in our understanding*, within the spirit of the legislation, we tend to look on

---

127 A purist may say this usage is incorrect or debased; that takes us to the debate as to whether or not there is such a thing as "correct" English usage (where different groups use English differently) and how one determines it if there is. But the purist cannot stop the word being used in this political sense.

128 These trusts qualified for IHT relief under s.71 IHTA 1984.

> that as avoidance.[129]

The avoidance/mitigation distinction is not self-explanatory, it is not a given. It is a construct defined and determined by reference to values and attitudes of the tax culture in which we live. The difference between the approaches (1) and (2) is partly: *whose* values and tax culture does one apply, and: *to what materials* does one refer to ascertain these values?

The taxation of PETs offers an example. In 1973, C.T. Sandford wrote:

> At present gifts made more than seven years prior to death pay no tax (with the possible exception of capital gains tax). ... Is there evidence that such gifts are contrary to the intention of Parliament? Both circumstantial evidence and logic point to this conclusion. Thus if Parliament were indifferent to the making of gifts prior to death, would there have been successive increases in the gifts *inter vivos* period, which, since 1894, has risen in four successive stages from one to the present seven years?

Sandford considered and dismissed some policy arguments in favour of an estate duty and concluded:

> A reasonable interpretation would be that the gifts *inter vivos* provision was intended to prevent as many gifts as possible from circumventing estate duty.[130]

The repeal of CTT and return to an estate duty under the name of Inheritance Tax shows that lifetime giving since 1986 cannot now be regarded as "tax avoidance". I suggest that even in 1973 lifetime giving was not "avoidance" of estate duty (in the strict sense). If Parliament intended to tax all lifetime gifts it would *not* have increased the lifetime gift period to seven years. It is obvious that such an increase would not stop tax-free lifetime giving. Parliament would certainly not have enacted a taper relief under which gifts made more than four years before death pay a reduced rate! How then did Professor Sandford reach the wrong conclusion? Perhaps because he wished to advocate the imposition of a capital transfer tax. When one wishes to support a tax reform, the temptation to describe the old law as permitting "avoidance" is irresistible (as a tool of advocacy) and also has a certain underlying logic. There is

---

129 Emphasis added.

130 IFS, *Hidden Costs of Taxation*, 1973, p. 113.

tax avoidance in a political if not a lawyer's sense. If some future Government abolishes PETs, and returns to some form of CTT, it seems safe to predict that those supporting the reform will castigate lifetime giving as tax avoidance.

One point to note is that a comment from the Government (or any proponent of a tax reform) that existing law permits "avoidance" needs special scrutiny because it is easy to conflate the intention of Parliament (tax avoidance in the strict sense) with the intention of Government (or of the proponent), which I would call tax avoidance in a political sense.

Understood strictly, the term "tax avoidance" is still vague but not, I think, hopelessly so, as, for instance, the currently popular phrase "the right amount of tax".

32.19 How to ascertain "the evident intention of Parliament"?

This is the problem at the heart of the concept of "tax avoidance". If this term means an action contrary to the intention of Parliament, one must identify that intention. C.T. Sandford addressed the problem:

> But here we meet the major difficulty. ... As individuals we may feel certain that a particular action is contrary to the intention of the law; but the *objective* interpretation of that intention can only be found in the words the law uses.[131]

Sandford was right. The issue is statutory interpretation and the principles of statutory interpretation should be applied. The intention of Parliament should be decided primarily from the words of the statutes. Other material may be relevant on the usual principles of statutory interpretation: White and Green Papers, Royal Commission Reports, Hansard on *Pepper v Hart* principles, textbooks and the occasional learned article.

Lord Nolan refers to the *evident* intention of Parliament. Unless there *is* an "evident" intention, there is no tax avoidance. This qualification does not remove a penumbra of uncertainty, but perhaps it helps to reduce it.

32.19.1 *Two levels of intention*

It has been said that a concept of "tax avoidance" based on what is contrary to "the intention of Parliament" is not coherent. The object of statutory construction is always said to be to find "the intention of

131 IFS, *Hidden Costs of Taxation*, 1973, p.114 (emphasis in original).

Parliament".[132] A successful tax avoidance scheme, even as blatant a scheme as *Fitzwilliam v IRC*[133] or *Mayes v HMRC*[134] is a scheme where a Court has concluded that the intention of Parliament was not to impose a tax charge in the circumstances which the tax avoiders had placed themselves. A.A. Shenfield made this point:

> What is meant by the intentions of the law and in what sense does avoidance circumvent them? Courts of law in our system seek to find the intention of a law in the words it uses. In this sense the avoider does not circumvent its intentions but abides by them.[135]

The answer is that the expression "intention of Parliament" is being used in two senses. It is perfectly consistent to say that the *Fitzwilliam* scheme:
(1) escapes IHT (there being no provision to impose an IHT charge); and yet
(2) constitutes the avoidance of IHT.
One is seeking the intention of Parliament at a higher, more generalised level. A statute may fail to impose a tax charge, leaving a gap that even a court cannot fill even by purposive construction, but nevertheless one can conclude that there would have been a tax charge had the point been considered. An example is the notorious case of *Ayrshire Employers Mutual Insurance Association v IRC* 27 TC 331 where the House of Lords held that Parliament had "missed fire".[136] A.A. Shenfield

132 See *Cross on Statutory Interpretation*, Oxford University Press (3rd ed., 1995), Chapter 2.

133 67 TC 614.

134 [2011] STC 1269.

135 A.A. Shenfield, *The Political Economy of Tax Avoidance*, Institute of Economic Affairs, Occasional Paper 24, 1968, pp.20–21. Lord Hoffmann made the same point in "Tax Avoidance" [2005] BTR 197 at p.206: "tax avoidance in the sense of transactions successfully structured to avoid a tax which Parliament intended to impose should be a contradiction in terms. The only way in which Parliament can express an intention to impose a tax is by a statute which means that such a tax is to be imposed."

136 It might be objected that this case is wrongly decided by modern standards of statutory interpretation: "I venture respectfully to suggest that if, as in this case, the Courts can identify the target of Parliamentary legislation their proper function is to see that it is hit: not merely to record that it has been missed"; "The Courts as Legislators", Presidential Address of Sir Kenneth Diplock, The Holdsworth Club, 1965 accessible *http://www.kessler.co.uk/tfd-archive*. However, in *Cooper v Billingham* 74 TC 139 para 35 the Court of Appeal was prepared to say that the same result could happen today (albeit rarely).

recognised this (perhaps grudgingly):

> What the complainant against avoidance means by the intentions of a law is not what may be deduced from what it says, but what parliament intended it to say, or what parliament ought in the complainant's opinion to have intended it to say, or what in his opinion it would have been equitable for it to say. Now I do not say that this can never have substance. We all know that, quite apart from outright errors of draftsmanship, there is a distinction between the letter and the spirit of a law. But the spirit of a law is elusive. It is tempting to believe that one has grasped the spirit of a law when in truth one is moved by prejudice or preconception. We ought to be extremely careful ...[137]

32.20 Reduction, deferral and unsuccessful avoidance

32.20.1 *Reduction*

The motive defence provisions refer to "avoidance" alone but comparable statutory provisions refer to "avoidance *or reduction*" of tax.[138] In this expression it could be that avoidance is used in the strict sense and reduction is referring to mitigation, but that is anachronistic (since the distinction was not known at the time). The word "reduction" was probably added to forestall an argument that the mere reduction of tax was not avoidance as long as some tax remained payable.[139] But nowadays a court would not be so literal and there is no doubt that (for the purposes of the motive defence) a reduction of tax from £10 to £6 amounts to the avoidance of £4.

32.20.2 *Deferral*

Arrangements to defer tax may constitute "avoidance".[140] Indeed the classic avoidance case *Furniss v Dawson* might be characterised as involving mere "deferral" of tax. However, the fact that tax is merely deferred, and will or may later be paid, may be a factor which supports the conclusion that the arrangement is to be characterised as mitigation and

---

137 *Ibid*, note 94.

138 The earliest of these was s.35 FA 1941 (Excess Profits Tax); the formula is found in modern provisions: s.773(2)(b) ITA and as part of the more lengthy formula in s.732 CTA 2010.

139 Contrast the statutory expression "mitigate or remit" a penalty.

140 The Special Commissioner so held in *IRC v Willoughby* 70 TC at p.84. There was wisely no appeal on this point.

not avoidance.

32.20.3 *Unsuccessful avoidance*

A purpose may exist independently of its success. HMRC correctly say:

> ... even if the transaction does not achieve its expected result, there may still be a tax avoidance purpose.[141]

The OECD agree:

> Successful tax reduction is neither a sufficient nor a necessary test of tax avoidance. It is not sufficient because this would cover acceptable tax planning [ie mitigation] and it is not necessary because an avoidance scheme designed to reduce tax may not succeed.[142]

32.21 Practical examples: Introduction

We can test these general principles by trying to apply them in some practical cases. There is no test like the test of practice. I first consider transfers to six types of non-resident trust (here called "trust transfers"):

(1) Trusts where settlor is excluded:[143]
   (a) Foreign settlor: UK and foreign beneficiaries;
   (b) Foreign settlor: only UK beneficiaries;
   (c) UK settlor: UK beneficiaries;
   (d) UK settlor: foreign beneficiaries.

("Foreign" here refers to someone not resident or domiciled in the UK and not expecting to become resident or domiciled.)

(2) Trusts where the settlor is a beneficiary:
   (a) Settlor foreign domiciled but UK resident;
   (b) Settlor foreign domiciled and non-UK resident.

This by no means covers all the possible circumstances of trust transfers, but one can extrapolate from these to others which may arise.

It may be helpful to summarise the questions that arise on a trust transfer. One must ask: Is the purpose to avoid (1) income tax? (2) CGT? (3) inheritance tax? It is obviously necessary to consider each tax separately; I will consider CGT and IT first, and then IHT. Thus what seemed like a single issue (is there tax avoidance?) raises 3 sub-issues; that is an

---

141 Draft guidance to unallowable purpose tests para 10050.

142 OECD Report by Committee of Fiscal Affairs (1980) cited in OECD's International Tax Avoidance and Evasion (1987), p.17.

143 It is assumed that the spouse of the settlor is also excluded.

inevitable consequence of the rule that taxation includes any tax.[144]

However, a tax charge does not arise in isolation, but is charged in different ways on the settlor, trustees[145] or beneficiaries. It is best to consider these three classes of taxpayer separately, though the issues partly overlap. So in the case of a trust transfer one must ask whether the purpose is avoidance of IT/CGT/IHT liabilities of (1) the settlor; (2) the trustees; (3) the beneficiaries. Thus what seemed like three issues raises nine sub-issues. Further, post-*Willoughby* one must consider whether there is a factual subjective purpose to reduce any of these tax liabilities and then whether the purpose (if present) is to be classified as avoidance or mitigation. So what seemed like a single issue (is the purpose of a trust transfer to avoid taxation?) actually turns out to raise 18 sub-issues (is the purpose to save IT/CGT/IHT by settlor/trustees/beneficiaries and, if so, is it mitigation or avoidance?).

32.22 Trust transfers where settlor excluded

Transfers to a trust from which the settlor is excluded have two common features which are relevant for the motive defence:

32.22.1 *No avoidance of settlor's tax liabilities*

The trust transfer will usually bring a tax advantage to the settlor (compared to the position if there is no transfer). As far as the settlor's tax liabilities are concerned, since she is excluded from the trust, any tax advantage she might obtain in this way is mitigation not avoidance. It is not in principle the intention of Parliament that she should pay tax in respect of income/gains/capital from which she is excluded.[146] However, HMRC rightly say that the purpose of a trust transfer may be to avoid tax liabilities of the trustees and beneficiaries and here closer investigation is needed.

32.22.2 *Non-tax reason for creating trust*

There will usually be non-tax reasons for the settlor to make a trust, rather

144 See 32.9 (Meaning of "taxation" in the motive defence).

145 Although trustees are in economic reality paying tax on behalf of beneficiaries, the rules for taxation of trustees are distinct from the rules for taxation of beneficiaries so it is best to consider trustees separately.

146 See Lord Templeman's dictum in 32.16.3 (Economic consequences). The exceptional case of s.86 TCGA is discussed below.

than making absolute gifts. The advantages are asset protection in the broadest sense: protecting the trust fund from profligate beneficiaries, divorcing spouses, and sometimes forced heirship or foreign exchange control. These are good reasons but not commercial ones. So a trust transfer must pass Condition A, not Condition B, but it does so in the context of a transaction which is not usually wholly tax driven. In the absence of tax considerations the usual form would normally be (and in practice generally is) a discretionary trust.

32.23 Foreign settlor; UK and non-UK beneficiaries

This section considers a transfer to a trust whose beneficiaries include (but are not primarily) UK resident and domiciled beneficiaries, and exclude the settlor.

32.23.1 *Avoidance of trustees' tax*

In deciding whether the trust transfer yields a tax advantage for the trustees, one obviously cannot compare the actual position (appointment of foreign trustees) with the position if the transfer had not taken place. One must compare it with something else the settlor might have done (which in this context must be the appointment of UK trustees). That seems a reasonable comparable; the settlor has a choice: to transfer to trustees in the UK or elsewhere and they must do one or the other. In the absence of UK tax, there will often be no reason to prefer the one to the other.

The choice of UK trustees (rather than foreign trustees) would not in principle yield any greater CGT before 2007/08.[147] There is no question of CGT avoidance for dispositions before the FA 2006.

The position is slightly more complicated for dispositions after 2006. The choice of exclusively UK trustees of a discretionary trust will yield CGT (and income tax on foreign source income) not due from non-resident or mixed resident trustees.[148] However, if one trustee (even a minority trustee) is resident outside the UK, the trustees are not (in short) subject to CGT or income tax on foreign income. Does that mean that the

---

147 As long as the UK trustees were professionals: see the 4th edition of this book at 5.8 (Professional trustees treated as non-resident).

148 See 5.4 (Trustee residence for income tax and CGT). The IT position for trustees before 1989 was thought by HMRC to be the same, and was held in *Dawson v IRC* 62 TC 301 to be only slightly (and for present purposes not materially) different.

choice of non-resident trustees is income tax avoidance? It is submitted that the answer is plainly no. Section 475 ITA assists in the appointment of non-resident trustees, suggesting that this cannot be contrary to the intention of Parliament. To hold otherwise would be to suggest that the settlor has a duty to maximise UK income tax and CGT liability. Any tax saving here must be mitigation. It is relevant to note that the reason for the abolition of the rule that professional trustees should be regarded as non-resident was not to prevent avoidance: it was to satisfy a requirement of EU law.[149]

32.23.2 *Avoidance of beneficiaries' income tax liabilities*

In deciding whether the trust transfer yields an income tax advantage for the beneficiaries, one obviously cannot compare the actual position (transfer to trust) with the position if the transfer had not taken place. One must compare it with something else the settlor might have done.

The actual position of UK resident and domiciled beneficiaries is that they will pay tax on income distributions from the trust, but no tax on accumulated income and (in the absence of s.731 ITA) no income tax on capital payments. This is a clear income tax advantage if the transfer to a discretionary trust is compared with a transfer to the beneficiaries or to a transfer to an interest in possession trust.

Is the purpose of the transferor to obtain this advantage? Normally their purpose will be to obtain non-tax advantages, and even foresight of the tax advantage may not constitute purpose, but it depends on the facts.[150]

The actual position of UK resident foreign domiciled beneficiaries is that they will pay tax on remitted income distributions from the trust, and (in the absence of s.731 ITA) no income tax on capital payments even if remitted. This could be an income tax advantage if the transfer to a discretionary trust is compared with a transfer to the beneficiaries or to a transfer to an interest in possession trust, but the advantage may be small or nil.

Is the purpose of the transferor to obtain this advantage? Normally their purpose will be to obtain non-tax advantages, and even foresight of this somewhat attenuated tax advantage will not constitute purpose.

---

149 HMRC announcement 23 March 2006.

150 See 32.13 (Foresight and purpose).

32.23.3 *If there is a tax saving purpose is it avoidance or mitigation?*

Returning to the practical example of a transfer to a trust by a foreign settlor, with both UK and foreign beneficiaries. Is the purpose (if it exists) of saving income tax by the beneficiaries to be classified as avoidance? The difference between being a beneficiary of a discretionary trust and owning capital outright is normally[151] a difference with "economic consequences". On an economic consequences test this should be mitigation.

There is another indication that the intention of Parliament is not infringed. If s.731 ITA applies, in this class of case, the result is unfair and sometimes extremely unfair. The UK beneficiaries will pay income tax on capital payments on an amount by reference to relevant income which may greatly exceed their "share" of the income of the trust computed on any just and reasonable basis.

If there is avoidance of UK tax there is likely to be avoidance of tax in every other jurisdiction where beneficiaries are resident;[152] it is impossible for the settlor to make a discretionary trust anywhere without tax avoidance elsewhere – which, if not absurd, is somewhat startling.

32.23.4 *Avoidance of beneficiaries' CGT liabilities*

The CGT position is complicated by tax reforms. Before 1998, capital payments from the trust would be free of tax to the beneficiaries (because the usual charge did not apply to a trust with a foreign domiciled settlor). This was expressly set out in s.87 TCGA.[153] One must take that as a special tax regime intended by Parliament. Pre-1998 transfers cannot be regarded as involving CGT avoidance by the beneficiaries.

After 1998, capital payments to UK domiciled beneficiaries give rise to CGT by reference to trust gains regardless of the domicile of the settlor and in 2008 the charge was extended further. This could be taken to suggest that post-1998 transfers constitute CGT avoidance by the beneficiaries. But the points made in relation to IT avoidance/mitigation apply here too. For dispositions before 2006, s.69(2) TCGA is even stronger than it is now. So the better view is that any CGT saving is

---

151 It would be different if the trustees (perhaps guided by a strongly worded letter of wishes) closely follow the wishes of a beneficiary.

152 Assuming they are in a jurisdiction with a tax system comparable to the UK.

153 And in the predecessor legislation: s.17 Capital Gains Tax Act 1979.

mitigation.

32.24 Foreign settlor; only UK beneficiaries

The next case to consider is a transfer to a trust whose beneficiaries are all UK resident and domiciled. A trust transfer primarily motivated by non-tax advantages (asset protection) should not normally be regarded as having the purpose of tax reduction.

In an unusual case, however, that might be one of the settlor's purposes. Indeed, it could be their primary purpose. It can happen be that the settlor creates a trust primarily for a UK beneficiary, and the only reason they do this is tax considerations. Asset protection does not concern every settlor. They would make an absolute gift to a UK beneficiary but for UK tax reasons only they make a transfer to a trust for their benefit. The transfer is solely UK tax driven.[154]

In these (factually unusual) circumstances the question arises whether the tax saving purpose is avoidance or mitigation. Section 69(2) TCGA and s.475 ITA show the intention of Parliament to be that the choice of foreign trustees by a non-resident and non-domiciled settlor should not be regarded as avoidance of trustees' IT or CGT. These sections apply regardless of the residence and domicile of the beneficiaries. The inference should probably be carried across that there is likewise mitigation not avoidance of beneficiaries' IT and CGT liabilities; but the point is arguable.

32.25 UK settlor and UK beneficiaries

Contrast now a settlor who is UK resident and domiciled, making provision for UK beneficiaries. Assume the settlor is not to be a beneficiary. Again, they will often prefer a trust to outright gifts, for non-tax reasons, and the choice is UK or non-resident trustees. If they choose the latter, their purpose (or one of their purposes) is likely to be to reduce CGT or Income Tax and this purpose will be tax avoidance rather than mitigation. This is not an invitation to partake in a statutory regime; we all know that this income tax saving is what s.731 is intended to stop.

The distinction is therefore between:

---

154 This might be made evidentially clear by contemporary correspondence, or if, perhaps, the settlor's gift to a UK child is settled and their gift to other children outside the UK is absolute; but such details only go to identify the settlor's purpose, and are not otherwise significant for tax.

(1) foreign settlors (whose offshore trusts are not in principle regarded as tax avoidance), and
(2) UK settlors (whose offshore trusts are in principle regarded as tax avoidance).

This distinction is clearly drawn in the 1974 Green Paper on Wealth Tax:

> **Overseas trusts**
> 22. Trusts where the trustees are not resident in the UK and the administration of the trust is ordinarily carried on outside this country fall into two broad categories.
> **"Genuine" overseas trusts**
> 23. The first category includes all those trusts set up with non-resident trustees by settlors who have little or no connection with this country. *In such a case even if there are one or more beneficiaries or discretionary objects resident in this country there are no grounds on which it would be right to bring the trustees or the whole of the trust assets within the charge to the tax.* But a UK resident individual with an interest in such a trust, whether in possession or reversion, has a realisable asset which should be included in his personal wealth at its actuarial value. If such a trust is discretionary however its objects generally have no interests in the trust assets on which they should be assessed.
> **"Artificial" overseas trusts**
> 24. The second category includes those trusts where a *UK settlor* arranges for the trustees to be non-resident or where the administration of an existing resident trust passes overseas. The legal ownership of the settled property is thus vested in persons outside UK jurisdiction and *the arrangement is very frequently prompted by tax avoidance considerations*. Accordingly, where settled funds are provided directly or indirectly by a person who at the time the funds were provided was domiciled or ordinarily resident in the UK, the trustees will be liable to the same extent as if the trust had been resident.[155]

While the Paper was addressing the issue of what the Wealth Tax should cover, this passage illustrates very well the general understanding of the concept of tax avoidance in the context of offshore trusts.

Note the terminology of genuine *v.* artificial to describe tax avoidance. The author of the Green Paper had sufficient intellectual rigour to

155 Wealth Tax, Cmnd 5704, 1974 paras 22–4 (emphasis added). The fact that the Wealth Tax proposal was abandoned does not affect the relevance of the passage.

recognise the difficulties in these words and put them in quotation marks accordingly.[156] If only this were done more often!

32.26 UK settlor; foreign beneficiaries

Now consider a UK settlor making a trust (from which they are excluded) for foreign beneficiaries.

What about liabilities of the beneficiaries? Since they are not UK resident, they are largely outside the scope of IT and CGT, so there is no avoidance.

In deciding whether the trust transfer yields a tax advantage for the trustees, one can again compare the actual position (appointment of foreign trustees) with the appointment of UK trustees. UK trustees would pay IT if the trust were discretionary but not (for all practical purposes) if it were interest in possession. Any IT saving must be mitigation. CGT is different: UK trustees will pay the tax, and foreign trustees will not. However, trustees are in economic reality paying tax on behalf of the beneficiaries. Where the beneficiaries are not within the scope of the tax then any tax saving by the trustees must be mitigation. This is consistent with the rule that the anti-avoidance provisions of s.87 TCGA and s.731 ITA will not in principle apply on payments to beneficiaries outside the scope of CGT and IT.

32.27 UK settlor; UK and foreign beneficiaries

Where there is a mixture of UK and non-UK beneficiaries I suggest the starting point is that one would expect the settlor to make their trust here, so a transfer to foreign trustees would be regarded as avoidance. (In such a case there is something to be said in income tax terms for the creation of two separate trusts for two separate classes of beneficiaries, the residents and the non-residents, so one at least qualifies for the motive defence. But CGT considerations point the other way.)

32.28 Transfer to trust; settlor a beneficiary

32.28.1 *Remittance basis taxpayer settlor-beneficiary*

The next case concerns remittance basis taxpayer settlor who transfers assets to a non-resident trust under which they are the principal beneficiary.

---

156 See 32.17.2 ("Artificial" transactions and devices); 32.17.3 ("Genuine").

Income tax is not avoided since trust income continues to be taxed on a remittance basis under s.624 ITTOIA. There may be an IT reduction after the death or exclusion of the settlor but it will not (normally) be the purpose (or even one of the purposes) of the settlor to obtain that (normally very long term) advantage, quite apart from the question of whether the advantage is avoidance or mitigation.

There is in principle a CGT advantage that the settlor moves from the remittance basis to the s.87 capital payment remittance basis. To obtain that advantage may well one of the purposes of the trust. If so, is it CGT "avoidance"? It must have been a decision of Parliament *not* to apply s.86 TCGA to a foreign domiciled settlor and the decision was confirmed in 2008 (where a proposal to extend s.86 to foreign domiciled settlors was contained in FD Draft Clauses (January 2008) and dropped in the Finance Bill). It is suggested that there is no CGT "avoidance". This is a "statutory invitation" in plain terms.

32.28.2 *Non-resident non-domiciled settlor-beneficiary*

Where the settlor is the principal beneficiary and neither domiciled nor resident then UK tax saving is not likely to be a purpose during the life of the settlor, because no saving in fact arises. After the death of the settlor there may be a saving if there are UK beneficiaries. The position then becomes like that of a trust where the settlor is excluded, and the discussion above is relevant.

32.29 Appointing non-UK trustees of UK trust: Avoiding IT or CGT?

Similar principles apply. One case is where the settlor and beneficiaries are wholly UK based, the settlor has created a UK trust, and foreign trustees are later appointed. The inference that the appointment has the purpose of saving UK income tax or CGT is very strong and this purpose is avoidance not mitigation.

At the other end of the scale is the case where the settlor and the principal beneficiaries have gone to live abroad permanently and local trustees are appointed. One reason for the export of the trust is that the settlor may (or may continue to be) a trustee. If so, the appointment may have no tax saving purpose at all. But if (as is likely) it has a tax saving purpose, that is mitigation and not avoidance.

What if all the beneficiaries are abroad but the settlor remains in the UK? The same tax savings could in principle be had by winding up the trust with outright appointment to beneficiaries, and that transfer is not likely

to constitute avoidance. So the appointment of foreign trustees should not be avoidance.

What if the settlor goes abroad and the beneficiaries remain in the UK? It is tentatively suggested that a tax saving purpose (if it exists) is likely to be avoidance.

A more borderline case is where the settlor and beneficiaries go to live abroad for a medium term period (say five years[157]). Non-UK resident trustees are appointed with the intention that the trust will continue to be non-resident even after the settlor returns to the UK. This is probably to be classified as tax avoidance, albeit long-term tax avoidance, but views may differ, especially if the time spent abroad is longer than five years.

32.30 When is a trust transfer made for the purpose of avoiding IHT?[158]

32.30.1 *Change of situs without alteration of ownership*

The transfer of money by a foreign domiciled person from a UK bank to a foreign bank in order to make the money excluded property, is an act of tax mitigation, not avoidance. See *Beneficiary v IRC* [1999] STC (SCD) 134 at p.145. The same would apply if the transfer is made by trustees of a trust with a non-domiciled settlor. The same would apply to a sale of UK situate property and re-investment in non-UK situate property.

32.30.2 *Transfer to trustees*

The residence of trustees is almost wholly irrelevant for IHT.

A gift by a settlor to a trust from which they are excluded is mitigation of their own IHT[159] but it is also necessary to consider the IHT savings of trustees and beneficiaries.

If a foreign domiciled settlor gives, and the trustees retain, non-UK property, any IHT saving purpose which may exist is mitigation. This is so even if the beneficiaries are UK domiciled (so an absolute gift to them would have brought the trust property into the scope of IHT). Section 48 IHTA provides that foreign property in a trust made by a foreign domiciliary is excluded property. Any IHT advantage conferred by the

---

157 There is no particular significance in selecting five years as illustrative of a medium term period, but it is consistent with the CGT temporary non-residence rules; see 9.1 (Temporary non-residence).

158 For transfers before 27 March 1974 it would be necessary to consider Estate Duty.

159 See 32.22.1 (No avoidance of settlor's tax liabilities).

trust, so far from being contrary to the evident intention of Parliament, would appear to be in accordance with Parliament's evident intention. The argument to the contrary amounts to an argument that the settlor has a duty to maximise IHT liabilities.[160]

A gift by a settlor to a trust from which they are not excluded, in circumstances where the settlor is anticipating becoming UK domiciled, is borderline. Section 48 IHTA makes it plain that such a gift carries substantial IHT advantages. But is it "contrary to the evident intention of Parliament" to enjoy these advantages? The author tentatively suggests that such a gift should be regarded as IHT mitigation not avoidance. This is consistent with the rule that the GWR provision does not apply here.[161]

32.31 Transfer from non-resident trust to underlying company

I use the term**"underlying company"** to mean a company wholly owned by trustees, which holds beneficially what might in substance be regarded as trust assets. The company would not be UK resident.

32.31.1 Is the transfer a commercial transaction?

Transfers to underlying companies arise in a wide variety of circumstances and may be made for the purpose of obtaining non-tax advantages:

(1) Advantages of trust administration:
   (a) Segregation of trust funds of trustee (or occasionally combining trust funds) for ease of management.
   (b) Avoiding conflict of law and other problems of trustees holding assets (especially land) in foreign jurisdictions. (The problem is most serious in civil law jurisdictions which may not understand or even recognise trusts, but problems could also arise in common law jurisdictions.)

(2) In the case of land (or other onerous property), avoiding personal liabilities of trustees arising from direct ownership.

---

160 The avoidance/mitigation issue did not arise in connection with the gift to a trust in *Beneficiary v IRC*, because reducing tax was not a purpose in the mind of the transferor/settlor, even though it was a consideration for his advisers, and even though the principal beneficiary was UK resident at the time; see [1999] STC (SCD) 134 at [145h] - [146].

161 See 63.14 (GWR death charge: excluded property rules for settled property).

(3) In the case of interest in possession trusts, to allow retention of income (to avoid distributing income to life tenant).

It is a question of fact in each case whether the purpose of a transfer to a company is to obtain these non-tax advantages and a question of law whether they should be regarded as commercial.

Purpose (1) is commercial: it arises in the ordinary course of managing investments. A transfer from trustees to a company is more often than not a commercial transaction, and for the motive defence one applies Condition B and not Condition A. Purpose (2) is rarer but certainly commercial when it occurs. Purpose (3) is not commercial. Where it is the policy of trustees that all its trust funds should be held in separate underlying companies,[162] the conclusion that the transfer has a commercial purpose seems factually likely. But if one is looking at New Condition B, the additional statutory requirements must be met, in particular, the trustees must carry on a business.

32.31.2 *Is the transfer for tax avoidance?*

Transfer of UK assets[163] from trustees to an underlying company may offer significant tax advantages. It is a question of fact whether any of these advantages are purposes of the transfer and a question of law whether the purpose is avoidance or mitigation.

I begin with a case where s.624 ITTOIA does not apply. There are three possible tax advantages

(1) Obtaining IHT excluded property status (where the settlor was not domiciled in the UK).

This should normally[164] be regarded as mitigation. There is of course no economic difference between owning a UK asset directly (non-excluded property) and holding it via a company (effectively converting it into

---

162 The Edwards report suggests that 80–90% of Jersey trusts hold their assets through underlying companies: *Review of Financial Regulation in the Crown Dependencies* Cm 4109 (1998) para 12.5.2 accessible *http://www.archive.official-documents.co.uk/document/cm41/4109/4109-i.htm*. Trusts managed in Switzerland generally use underlying companies for Swiss law reasons.

163 Similar considerations apply to a transfer of foreign assets with a view to realisation and re-investment in UK assets.

164 An exceptional case would be if the property was put in the company shortly before a ten year anniversary and taken out shortly thereafter.

excluded property). But the principle that companies are not transparent for tax purposes is very deep in the tax system. Planning of this kind has been possible since the repeal of the Mortmain Acts (which were enacted to prevent tax avoidance by vesting land in companies) and cannot be regarded as contrary to the intention of Parliament.

The transfer to a company also has a likely CGT disadvantage,[165] and a possible income tax disadvantage,[166] so any tax reduction may be regarded as part of a "package deal", with advantages and disadvantages. This does not savour of tax "avoidance".

The contrary view is taken in *Burns v HMRC*:

> I would certainly accept that if a non-domiciled person arranged to hold foreign situs, rather than UK situs, assets, and then died, no tax advantage would have been sought. Thus if a UK house was sold, and a French house purchased, that would simply be a case of genuinely changing the assets held, and were some [ToA] point to hinge on whether the change was effected for the purpose of avoiding UK tax, the answer would be that it was not. And if UK bank deposits were withdrawn and deposits placed elsewhere, then again, that would be a pure investment switch, and not a step the purpose of which would involve the purpose of achieving a UK tax advantage. Indirectly retaining a UK real property, and simply achieving the technical change in status by putting the property into a non-UK resident company in a case where one of the purposes is to achieve the potential Inheritance Tax advantage, implicit by effecting those steps, does seem to me to cross the border between mitigation and tax avoidance. This is because it has involved no real change of investment, as in the two previous examples, but the retention of the UK property, accompanied by a step to change the normal tax consequences of that. Thus where it is shown that the CTT or IHT considerations were one of the purposes of the transfer, or other where the appellants have not displaced the reasonable presumption that UK advantages were one of the purposes, I conclude that those purposes involve tax avoidance and not merely mitigation.[167]

This is obiter (for on the facts of the case there was clearly income tax avoidance). The Commissioner has confused tax avoidance with tax

---

165 See 51.33.4 (Should trustees hold assets through an underlying company?)

166 Loss of tax credits and double taxation relief; sometimes, possible charge under income tax benefit in kind rules.

167 [2009] STC (SCD) 165 at [59].

advantage.

The opposite view was taken on comparable facts in *Mehjoo v Harben Barker*[168] where tax planning involved converting UK registered shares to bearer shares and removing them from the UK, in order to make then non-UK situate. That was described as tax mitigation, not tax avoidance, I think rightly, as any tax advantages is inherent in the scheme of the legislation. The decision to legislate on the point for CGT but not for IHT rather confirms the point.

The relevant cases and materials were not discussed in either of these cases. At some time the point will need to be judicially considered in more depth.

(2) Escaping additional rate income tax (on UK source income of discretionary trust)

The striking thing about this tax is that there is generally[169] no effective method for HMRC to collect it and in practice no one expects it to be paid in cases where all the beneficiaries are outside the UK.[170] Perhaps this supports a conclusion of mitigation.

(3) Escaping higher rate income tax (on income of interest in possession trust).

I suggest that a distinction should be drawn between UK resident life tenants (tax advantage is avoidance) and non-residents (tax advantage is mitigation). In many circumstances, however, non-residents do not pay income tax at the higher rate.

In *Burns v HMRC* [2009] STC (SCD) 165 at [58] the Special Commissioner said:

> I deal first with the feature of trying to cap the level of charge to income tax at the basic rate. This advantage seems to me to be in the category of tax avoidance. ... it seems to me to be difficult to argue that a transaction designed to reduce income tax by the mechanism of the transfer of UK property to a non-resident person (virtually a paraphrase of the opening wording of section 739) is mere mitigation.

---

168 [2013] EWHC 1669 (QB) at [447]; the point was not considered on appeal.

169 Except in the case of UK land.

170 It is considered that non-payment is not in principle dishonest, and so not a fraud on HMRC, though this conclusion depends to some extent on the facts of the case.

32.31.3 *Transfer by trust to which s.624 applies*

If the purpose of the transfer to an underlying company is to avoid a charge under s.624 ITTOIA, this is considered to be avoidance and not mitigation.

32.31.4 *Transfer of non-UK assets to underlying company*

When non-UK assets are transferred to an underlying company, the UK tax advantage may be less or nil or there may only be tax disadvantages in the loss of double taxation reliefs. In the absence of an intention to re-invest in the UK the purpose cannot as a matter of fact be a tax reduction purpose.

32.32 Non-resident foreign domiciled individual transfers UK property to offshore company

A foreign domiciled non-UK resident individual who transfers UK assets to a non-resident foreign incorporated company may also enjoy comparable tax advantages:

(1) Obtaining IHT excluded property status.

(2) Avoiding higher rate income tax.

Such transfers also give significant advantages which have nothing to do with tax. In particular, in the case of UK land, avoiding personal liabilities arising from direct ownership. In such cases, the motive defence may well apply. But if a purpose of the transfer is to reduce IHT or IT, it is considered that this is mitigation not avoidance; the arguments are the same as above.

32.33 Transfer by UK resident foreign domiciled individual to offshore company

Suppose a foreign domiciled UK resident individual transfers UK assets to a non-resident foreign incorporated company.

If a purpose was to reduce IHT, the transfer is considered to be IHT mitigation. A transfer to reduce income tax (because the company pays only basic rate income tax) is considered to be IT avoidance.

32.34 Transfer to UK resident foreign incorporated company

There are many reasons why assets may be transferred to UK resident foreign incorporated companies.

A foreign domiciliary starting a new UK resident company for trade or

investment would prefer a non-UK incorporated company so as to own non-UK situate property. This is a commercial transaction and clearly satisfies Old Condition B. New Condition B is (almost) a dead letter,[171] but in an appropriate case there is a reasonable case that New Condition A (or A and B) is satisfied.

A foreign domiciliary (F) wishing to sell a UK unincorporated business may enter into an arrangement under which:

(1) F gives the business to a UK resident foreign incorporated company.
(2) F sells the company (not UK situate property).

If the purpose is to avoid CGT (by utilising s.162 TCGA relief) then the claim for the motive defence is weak.

32.35 Transfer from one trust to another trust

There are many reasons why funds may be transferred between trusts. It is impossible to generalise as to whether such transfers are made for tax avoidance: one must look at the reason for the transfer.

One reason such transfers are made is where a single trust holds several sub-funds for different branches of a family. The transfer avoids the unfairness which arises under a single trust, that gains accruing to one share are taxable on a beneficiary of another share who receives a capital payment. It is considered that a transfer for this reason does not have the motive of CGT "avoidance".

32.36 Time to ascertain purpose of transferor

What matters is the purpose of the transferor at the time of the transfer.[172] It is quite common that a transfer is made by a foreign settlor for foreign beneficiaries, unimpeachably for non-UK tax reasons, and later some of the beneficiaries move to the UK. Then they will find the trust qualifies for the motive defence and is a useful vehicle for income tax purposes. There are three possibilities:

(1) The change of purpose may be accompanied by a new transfer of assets carried out for a tax avoidance purpose. In that case the transfer of asset provisions may apply in relation to the new transfer.
(2) There may be no further transfer of assets but there may be associated operations carried out for a tax avoidance purpose. The question

171 See 32.12.3 (New Condition B).

172 The point was made in *Herdman v IRC* 45 TC 394; but it is plain from the terms of the statute.

whether this brings the transfer of asset rules into operation is discussed in para 32.38 (Associated operations: introduction).

(3) There may be a change of purpose without any new transfer or associated operation. In that case the motive defence remains available and the transfer of assets provisions do not bite at all.

32.37 Time to ascertain intention of Parliament and changes in law

The concept of tax avoidance as an act contrary to the intention of Parliament raises the question of *at what time* Parliament's intention is to be ascertained. The intention of Parliament may change and the same act could be tax avoidance at one time but not at another. Of course, it needs an Act of Parliament to make this change. For the purpose of the motive defence, tax avoidance must mean an act contrary to the intention of Parliament at the time the transfer took place. This is consistent with the rule that one examines the purpose of the transferor at the time of the transfer.[173] Otherwise changes in the intention of Parliament would often have considerable retrospective effect: a transfer which was not tax avoidance when it was made would retrospectively be treated as made for a tax avoidance motive (or indeed vice versa).

Of course this rule may also favour HMRC. A transfer to avoid (say) Selective Employment Tax would fail the motive defence and that would continue to be the case even after the abolition of that tax.

A distribution or disposal made in 2007/08 to avoid the new rules in the FA 2008 from 2008/09 is not tax avoidance because (1) it is not contrary to the intention of parliament to avoid *future* tax laws: the intention of Parliament is to be determined at the date of the transfer;[174] (2) Parliament clearly anticipated and accepted that such disposals and appointments would be made and took no steps to counteract them.

32.37.1 *Transfer by non-resident before 1996*

Parliament decided in 1936 not to apply s.720 ITA to transfers made by non-resident transferors, and that was (after some vacillation) held to be the law.[175] In principle, a transfer of assets by a non-resident between 1936 and 1996 could not be said to be contrary to the intention of

---

173 See 32.36 (Time to ascertain purpose of transferor).

174 See 32.37 (Time to ascertain intention of Parliament and changes in law).

175 See 29.9.2 (Transferor not resident when transfer made).

Parliament, and so it could not constitute income tax avoidance.[176] However, the legislation which reversed *Willoughby* and brought transfers by non-residents into the scope of the transfer of asset provisions applies to pre-1996 transfers.[177] The explanation is that a transfer by a non-resident before 1996 does not normally involve income tax avoidance. However, there are special circumstances where a transfer by a non-resident may be for income tax avoidance[178] and, of course, a pre-1996 transfer made for CGT or IHT avoidance would also be caught.

32.37.2 *Transfer before 1981; transferor having no power to enjoy*

Similar considerations apply to a transfer before 1981 to which s.720 ITA did not apply (because the transferor had no power to enjoy the income of the asset transferred). Parliament decided in 1936 not to apply the transfer of asset provisions to transfers unless the transferor had power to enjoy, and that was (again after some vacillation) held to be the law.[179] So such a transfer should not constitute income tax avoidance. In 1981 Parliament brought in s.731 ITA which applied to pre-1981 transfers.[180] The better view is that a transfer outside s.720 made before the 1981 reforms is not to be regarded as income tax avoidance in the absence of special circumstances. A pre-1981 transfer may be within s.731 where it was made for IT avoidance (one example would be where the settlor did have power to enjoy but later died) or where it was made for CGT or IHT avoidance purposes.

---

176 Contrast pre-1936 transfers by UK resident individuals; these were caught by the new 1936 legislation, but Parliament had never made a decision that such transfers should not be taxed so it would be correct to regard such transfers as made for tax avoidance purposes.

177 s.81 FA 1997. There is an exemption only for income arising before 1996.

178 Examples of special cases are:

(1) a transfer in anticipation of becoming UK resident or

(2) a transfer made just before the enactment of the new legislation (when the change of the law was predictable).

Another view could be that such transfers constitute tax avoidance from after the 1952 and 1970 consolidations, which Parliament enacted on the basis of the *Congreve* and *Herdman* decisions (later reversed) that transfers by non-residents were caught. But that offends common sense and the principle that a consolidation does not alter the law.

179 See 27.3 (Meaning(s) of "settlor-interested").

180 s.45 FA 1981; there is an exception for income arising before 1981.

32.38 Associated operations: Introduction

The motive defence is relatively straightforward when there is a single transfer. It becomes more complicated if there are also associated operations to consider. It is necessary to consider separately the cases where:

(1) The transfer and associated operations are all made before 5 December 2005 (see the next section).
(2) The transfer and the associated operations are all after 4 December 2005.[181]
(3) The transfer is before 5 December 2005 and the operation is on or after that date.[182]

32.39 Associated operations and motive defence before 5 December 2005

Section 739 ITA provides:

> (1) This section applies if all the relevant transactions are pre-5 December 2005 transactions.
> (2) An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs that condition A or B is met.
> (3) Condition A is that the purpose of avoiding liability to taxation was not the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.
> (4) Condition B is that the transfer and any associated operations—
> (a) were genuine commercial transactions, and
> (b) were not designed for the purpose of avoiding liability to taxation.

Old Condition A refers to any "relevant transactions" and Old Condition B refers to "the transfer and any associated operations" (which comes to the same thing).[183] I will use the expression "any associated operations".

The transfer and associated operations in issue must each separately satisfy the motive test if the motive defence is to apply. One does not

---

181 See 32.40 (Transfer and associated operations all after 4 December 2005).

182 See 32.44 (Transfer before and operation after 5 December 2005).

183 Because the term "relevant transactions" is defined to mean the transfer and associated operations; see 28.10 (Significance of associated operations). The difference in the wording of old condition A and B is just a quirk of the drafting, there is no difference in meaning.

group the transfer and the associated operations together, and look for a single main purpose of the group.

32.39.1 *Associated operations subject to motive test: Critical operations*

The first task to identify the associated operations to which the motive test must be applied. For pre-2005 transactions (which are not affected by the 2006 reforms) the statute refers to "*any* associated operations" but this is a reference only to associated operations as a result of which a charge arises under s.720 or s.731 ITA. That is, in other words, the associated operations which must be relied on in order to satisfy the conditions set out in those sections. That is, the transfer and operations as a result of which:

(1) (in any case) income accrues to the person abroad; and
(2) (a) (in a s.720 case) the transferor has power to enjoy; or
(b) (in a s.731 case) the individual receives a benefit, or income can be used to benefit them.

I refer to an associated operation which meets these criteria as a "**critical operation**".

There may and generally will be many operations associated with the transfer, but unless they are critical operations they are irrelevant and should be ignored.

In *Herdman v IRC* 45 TC 394:

(1) T transferred shares to an Irish company (the person abroad) in consideration of an issue of new shares and a loan. This was an innocent transfer (the purpose was to avoid Irish tax).
(2) The company accumulated income. This was (arguably) an operation associated with the transfer, and the purpose was (then) regarded as UK tax avoidance.[184]

The motive defence was upheld. Lord Reid said:

> [1] It was admitted by Counsel that [what is now s.720] can only apply if [T] has "by means of" these operations "acquired any rights by virtue of which" he had "power to enjoy" this income during the relevant period. I think that Counsel was clearly right in making this admission.[185]

---

184 After *Willoughby* the purpose should be regarded as mitigation and not avoidance.

185 Section 412 ITA 1952 then provided (so far as relevant):
"For the purpose of preventing the avoiding by individuals ordinarily resident in the UK of liability to income tax by means of transfers of assets by virtue or in

> [2] I cannot see how it can be said that [T] acquired any rights at all by means of these associated operations. By means of the transfer of the shares to the new company he acquired two rights. He acquired shares in the new company in the Republic and he became an unsecured creditor of that company for over £76,000. Neither right gave him any right in or to particular assets of the new company. The way in which that company dealt with its assets did not alter either of these rights. It may have made them more valuable and it may have made it easier for the company to pay its debts, but it did not change [T's] rights.[186]

Point [1] states the law (only critical operations need pass the motive test) and point [2] applies it to the facts of the case (the operations in that case were not critical).

The statement of law at [1] needs to be translated to reflect the revised statutory wording, which was recast in 1969, and rewritten in 2007, but the principle (that only critical operations need pass the motive test) survived the 1969 reforms.[187] In fact, perhaps the principle was (slightly) more clearly stated under ITA than it was under ICTA, because of the words in s.739(2): An individual is not liable for income tax under this Chapter ... *by reference to the relevant transactions* if condition A or B is met. It is only the transactions *by reference to which the ToA provisions apply* which need to meet old condition A and B.

In *Carvill v IRC:*[188]

(1) T transferred assets to a Bermudian company (B Ltd) in exchange for its shares, so T was a majority shareholder in B Ltd ("the original transfer").
(2) T became a 100% shareholder in B Ltd by (a) purchasing shares from other shareholders and (b) B Ltd purchasing its own shares.
(3) B Ltd entered into arrangements to remunerate T via a personal

---

consequence whereof, either alone or in conjunction with associated operations, income becomes payable to persons resident or domiciled out of the UK, it is hereby enacted as follows:- (1) Where *such an individual has by means of any such transfer, either alone or in conjunction with associated operations, acquired any rights by virtue of which he has ... power to enjoy* ... any income of a person resident or domiciled out of the UK ... that income shall, ... be deemed to be income of that individual ...."

186 45 TC 394 at p.413.

187 See 32.40.1 (The 1969 reforms).

188 [2000] STC (SCD) 143 at [80]–[85], 75 TC 477 (Special Commissioners).

services company and a brokerage sharing agreement.

Steps (2) and (3) were held not to be associated operations, but if they had been associated operations it would not have mattered as they were not critical operations. No income arose to B Ltd because of the operations and T did not acquire a power to enjoy because of them.[189]

HMRC accept this. RI 201 provides:

> The law was amended in 1969 following a decision of the Courts (in *IRC v Herdman* 45 TC 394) that only the transfer and any associated operations giving a power to enjoy at the outset were relevant for determining whether the terms of [the motive defence] were satisfied. The amendment to the legislation sought to bring all associated operations into consideration when [the motive defence] was invoked. Because of doubts[190] expressed as to the effectiveness of this amendment, it has been the Revenue's practice in considering whether a defence under [the motive defence] is available to *consider only the transfer and any associated operations which directly establish a power to enjoy the income of the overseas person under any particular sub-head in [s 723 ITA]*.

The last sentence goes too far and is not to be taken literally. Suppose:

(1) T transfers assets to a UK trust by an innocent transfer, and
(2) Foreign trustees are appointed (an associated operation)[191] for tax avoidance purposes.

It may be said that the associated operation does not establish a power to enjoy the income of the trust. But the associated operation is a critical one (since it causes income to accrue to the person abroad) so the motive defence does not apply.

Suppose:

(1) T transfers assets to a non-resident company in return for shares in that company ("the first transfer"). Suppose the first transfer is innocent (no tax avoidance purpose). Income accruing to the company is not caught by the ToA provisions as the motive defence applies.

---

189 See [81]-[83].

190 The "doubts" were in fact a decision of the Special Commissioners on the point; see 32.40.1 (The 1969 reforms).

191 See 28.11.4 (Transfer to UK trust followed by migration of trust before 6 April 2006) and 28.11.6 (Transfer to company followed by migration of company).

(2) T transfers the shares in that non-resident company to a non-resident trust ("the second transfer"). The second transfer has a tax avoidance purpose.

The second transfer is an operation associated with the first. But that associated operation is not a critical operation. Income accrues to the non-resident company as a result of the first transfer. It does not accrue as a result of the first transfer in conjunction with associated operations.[192]

Take the same transactions, but assume that the first transfer (to the company) had a tax avoidance motive, and the second transfer (to the trust) was innocent. Income of the company is within the ToA provisions. The motive defence does not apply. It is not enough to find an innocent associated operation. Dividends from the company to its shareholders are caught since the income arises by virtue of the tainted transfer to the company and an associated operation (the dividends).

The ToA draft guidance provides:

> **INTM602720 By reference to transactions**
> ...Taking each of the potential charges this can perhaps be summarised as:-
> Income charge – power to enjoy; the transactions to be taken into account are those that result in income becoming payable to a person abroad together with those other associated operations, if different, which result in the individual having the power to enjoy the income.
> Income charge – receipt of/entitlement to capital sums; the transactions to be taken into account are those that result in income becoming payable to a person abroad together with those other associated operations, if different, which result in the individual receiving or being entitled to receive a capital sum.
> Benefits charge - the transactions to be taken into account are those that result in income becoming payable to a person abroad together with those other associated operations, if different, which result in the individual receiving a benefit provided out of assets available for the purpose by reason of such transactions.
> From this it can be seen that in some instances the same transactions

192 Of course income arising to the trustees as a result of the second transfer is caught by the ToA provisions. The fact that the first transfer was innocent does not help. This is self-evident but if authority is needed see the decision of the Special Commissioners in *IRC v McGuckian* [1994] STC 900. There was (wisely) no appeal on that point.

may result in income becoming payable and also give the power to enjoy the income, the entitlement to a capital sum or result in receipt of a benefit. In other instances there may be two sets of transactions one leading to the income that becomes payable, the other to the power to enjoy, entitlement to capital sum or receipt of benefit. Whichever circumstance applies the individual will need to have regard to all of the transactions in showing how the particular test is met.

In examining the actual conditions for exemption at INTM602760 and forward it will be seen that there may also be further associated operations apart from those described above that fall to be taken into account in considering whether particular conditions are met. Where that is the case, then the individual will need to satisfy HMRC in relation to all those transactions.

Although constructed differently the former legislation also took a transactional approach to the avoidance purpose exemption test requiring the individual to show that the conditions were met in relation to the transfer of assets or associated operations or any of them or in relation to the transfer of assets and any associated operations. There is more about this at INTM602760 onwards, which consider the conditions for exemption.

Not every transaction will however necessarily fall to be taken into account. Normally it will only be those that contribute to an outcome that falls within the conditions for a charge, such as those transactions which result in income becoming payable or those which give the power to enjoy income, entitlement to capital sum or receipt of a benefit. For those that are within the provisions the individual will be required to show that the conditions for exemption are met.

The principle that it is only transactions that lead to the particular outcomes which fall to be considered is demonstrated by the 1969 decision of the House of Lords in *Herdman v CIR* (45 TC 394). Although that case was on legislation (ITA 1952) constructed somewhat differently from that in ITA 2007 or ICTA 1988 the broad thrust of the principles demonstrated is the same as the approach set out in the bullets above. In that case the Special Commissioner had found that a transaction which brought about income becoming payable to a person abroad and which gave power to enjoy it satisfied on the evidence available the conditions for exemption. There were however further transactions whose purpose would not have satisfied the test for exemption, but those transactions neither resulted in income becoming payable to a person abroad nor gave the individual any new or additional power to enjoy income. The House of Lords accepted the reasoning of the Court of Appeal in concluding that these additional

transactions did not fall to be taken into account. Lord Chief Justice MacDermott in giving his decision, which was endorsed by the House of Lords, said (at pages 406/407) in commenting on and accepting the exposition given by Counsel for the Appellant:

> "My reasons for this view may be enumerated as follows (i) The conditions which bring subsection (1) [section 412(1) ITA 1952] into force and make the income of the non-resident person chargeable as that of the individual concerned depend upon a true alternative, upon the effect of either (i) the transfer of assets alone or (ii) that transfer in conjunction with associated operations. If (i) applies (ii) does not. (II) If subsection (1) is brought into force by the transfer of assets alone, subsection(3) [the exemption provision] must be applied accordingly and so that the taxpayer will escape from liability under subsection (1) on proving that the purpose of the transfer was not tax avoidance. In such a case any operation which is an "associated operation", in the sense of being within the definition in subsection (4), will fall outside subsection (1) and outside subsection (3) as well".

He went on to expand his reasoning into the facts of the particular case which indicated the extent of the transactions that resulted in income becoming payable and the individual having the power to enjoy that income. No other transactions fell to be considered.

HMRC confirmed the use of this principle in a Tax Bulletin article in 1999 in relation to the 'power to enjoy', saying that, "it has been the Revenue's practice in considering whether a defence under section 741 [ICTA 1988] is available to consider only the transfer and any associated operations which directly establish a power to enjoy the income of the overseas person under any particular sub-head in section 742(2) [ICTA 1988]".

But there are some instances within the specific conditions where a wider approach is required and individuals will need to take this into account in providing the information required about transactions in their tax returns. Specifically, Finance Act 2006 introduced a new provision (section 737(8) ITA 2007), which will be considered further in the detailed conditions, which means that the individual may now have to disclose to HMRC additional associated operations which may not result in outcomes that meet the requirements for a charge. It is important therefore that the individual who is seeking to show that the conditions for exemption are met properly identifies all of the transactions that must be taken into account, and provides the appropriate facts about each.

32.40 Transfer and associated operations all after 4 December 2005

32.40.1 *The 1969 reforms*

To understand the post-2005 regime, it is helpful to go back to 1969, when the first attempt at reform was made. Harold Lever (then Financial Secretary to the Treasury) argued:

> If we are to have a section [720 ITA], it has to bite on all settlements abroad which at any time are used for avoidance of tax even though originally started for innocent purpose. Supposing a man has transferred money to set-up a Bible society in Bulowayo and his heir being more sophisticated and perhaps more materialistic, finds himself with a settlement set up for unimpeachable purposes and decides that it would make a useful vehicle for the avoidance of all income tax and surtax. The *Herdman* decision meant that section [720] would not prevent this. Clause 27 [FB 1969] therefore knocks out the *Herdman* decision and I think that the hon. and learned Gentleman would be fair enough to say that that is reasonable.[193]

The example is facetious (Lever was known for his wit). The common (if less exotic) example is that:
(1) a settlement is set up by a foreign settlor for foreign beneficiaries; and
(2) subsequently beneficiaries come to the UK.
If this was not envisaged at the time of the settlement, even HMRC must concede that condition A was satisfied by the original transfer. Nothing that happened later would alter that defence. So, as Morritt LJ commented (obiter) in *IRC v Willoughby* 70 TC at p.97:

> In the FA 1969, legislation was enacted, s.33, to nullify the [Herdman] decision ... on the point.

However, the Special Commissioners rejected this in an unreported decision.[194] Thus the 1969 Act failed to achieve its intention.

32.40.2 *The 2006 reforms*

HMRC tried again in what I call **"the 2006 reforms"** (because they were introduced in the FA 2006, though with effect from December 2005).

---

193 Hansard, 17 July 1969, cols 955–6.

194 If any reader could supply a copy, it would be interesting to see it (although unreported special commissioner decisions cannot be cited as precedents: *Ardmore v HMRC* [2014] UKFTT 453 at [9] - [23].

Section 737(8) ITA provides:

> If—
>
> (a) apart from this subsection, an associated operation would not be taken into account for the purposes of this section, and
>
> (b) the conditions in subsections (2) to (4) [New Conditions A and B] are not met if it is taken into account, because of—
>
> (i) the associated operation, or
>
> (ii) the associated operation taken together with any other relevant transactions,
>
> it must be taken into account for those purposes.

EN Draft Clauses (2005) explained:

> certain associated operations that might potentially be disregarded when applying the [pre-2005 motive defence] have to be taken into account for the purposes of the new test. These are associated operations that have an avoidance purpose, but might not directly affect the application of the charging provisions.[195]

A post-4 December 2005 transfer which qualifies for the motive defence loses that defence if:
(1) there is an associated operation;
(2) that operation does not satisfy New Condition A or B.
Trusts and companies which qualify for the motive defence must ensure that from 5 December 2005 any acts by them meet Condition A (or Condition B if relevant). In short, they should do no act which might be regarded as having a tax avoidance purpose. It is important that new associated operations do meet the New Conditions. The transitional rules are harsh.

These conditions are extremely difficult to apply; this may be why almost 40 years passed before the second attempt to alter law established in 1969. The Blair/Brown administrations, it seems fair to say, were unaware or unconcerned about uncertainty and complexity in tax legislation, particularly anti-avoidance legislation.

---

195 Para 62.The explanation in EN FB 2006 is more curtailed. The provision alters the former law. EN Draft Clauses (2005) claimed (outrageously) that this change was "clarifying and confirming the correct interpretation of the existing statute" but that was inconsistent with RI 201 and EN FB 2006 more or less abandoned that position.

32.40.3 *Associated operations subject to motive test: Significant operations*

The first task to identify the associated operations to which the motive test must be applied. For post-2005 transactions the statute refers to "*an* associated operation" and it is clear that some operations which are not critical operations (under the old law) are now made subject to the motive test.

The task is to identify what counts as "an associated operation" for the purposes of s.737(8) ITA. The statutory definition of associated operation does not answer this as if it is read literally it is far too wide to be workable. Suppose in 1096 a Crusader transferred land to trustees to avoid feudal duties, and in 2000 the land is again transferred to trustees. At first sight the 1096 transfer is an operation associated with the 2000 transfer.[196] It cannot be that the Crusader's (arguable)[197] tax avoidance purpose would prevent the transfer in 2000 from qualifying for relief!

There must obviously be some connection between the associated operation and the transfer: the mere fact that they relate to the same property cannot be enough. The position is reminiscent of the definition of "settlement" (the settlement-arrangement definition) which includes any disposition, leaving the Courts to devise their own test for what is caught (in that case, the Courts eventually settling on a "bounty" test).

Here, it is suggested, the test that the Courts ought to impose should be that the transfer and associated operations form part of one arrangement, or are "put in train" by the transferor.[198] I refer to associated operations which meet that requirement as **"significant operations"**. Thus all significant operations must satisfy new conditions A and B, in order to qualify for the motive defence.

In short, in my terminology the effect of the 2006 reforms is to extend the motive test from critical operations to significant operations.

The ToA draft guidance provides:

> **INTM602800 all relevant transactions post-4 December 2005 transactions**

---

196 See 28.9 (Associated operation: definition).

197 Feudal duties would be "taxation"; see 32.9 (Meaning of "taxation" in the motive defence). I forbear to consider the question whether the 1096 transfer should be regarded as avoidance or mitigation of feudal duties (and would that depend on attitudes to taxation in the Middle Ages or contemporary attitudes?).

198 See 28.11.1 (Transfer from A to B followed by transfer from B to person abroad).

> ...The new provisions reverse the effect of Herdman (INTM602640) which found that associated operations are in broad terms only taken into account in applying the purpose test if they involve avoidance and create either a new source of income or a new power to enjoy income. The new provision requires all associated operations with an avoidance purpose to be taken into account when applying the exemption test.
> In the past structures such as family trusts were sometimes transformed into avoidance vehicles, with the associated operations carefully designed so that they could not be said to create new income flows or new power to enjoy income. The tax planners contended that HMRC could not apply the legislation against these structures, even though they were as clearly abusive.
> Where a structure meets the requirements for exemption and an associated operation involves only a minor element of avoidance, if the associated operation producing 'tainted' income is only a small proportion of the income of the total structure it may be appropriate to charge only the income from the 'tainted' source, thus applying the legislation in a proportionate way.

32.41 When do associated operations have a tax avoidance purpose?

Note the extreme consequences of an associated operation motivated by tax avoidance. Even if the associated operation concerns only a small amount, the *entire* trust may lose the benefit of the motive defence. This unfairness ought to colour the approach of the courts to construing the section.

32.41.1 *Investment strategy*

Buying and selling investments in the ordinary course of managing investments is not tax avoidance.

Suppose trustees wish to invest in UK equities, but do so via a UK unit trust or OEIC in order to hold property which is excluded property for IHT. The acquisition of a unit trust or OEIC is not tax avoidance. It is considered that the position is the same if the trustees acquire a non-UK unit trust or OEIC to avoid UK source income.

Suppose a trust, all of whose beneficiaries are abroad, wishes to invest in UK land. The trustees invest via an underlying company in order to avoid inheritance tax and the trust rate of income tax on the rent. It is suggested that this is mitigation rather than avoidance. If this is not the case, then the effect on the UK economy could be quite remarkable. It would often be the case that well advised trustees would avoid investing

in UK land in order to retain the motive defence. On the other hand, if the land was purchased using an artificial SDLT avoidance scheme, that would be caught.

32.41.2 *Distribution strategy*

It is considered that retention of income within a company is not an "operation" but even if it is, it would not be tax avoidance. It is considered that accumulation of income in a common form discretionary trust[199] is not an "operation" but even if it is, it would not be tax avoidance.

Suppose a discretionary trust is within the motive defence. A foreign domiciled beneficiary (not the settlor) is UK resident. If the trustees pay capital to that beneficiary instead of distributing income, in order to avoid an IT charge, this is not tax avoidance. If the trustees lend to the beneficiary interest free in order to avoid an income receipt or reduce the amount of a capital payment, this is not tax avoidance. If the loan is at interest, to avoid a capital payment, this is not tax avoidance. An arrangement might be avoidance if trustees lend unsecured to a beneficiary in circumstances where the beneficiary is either insolvent or so lacking in assets that the beneficiary is not in practice ever likely to be able to repay the sum lent.[200]

An arrangement may be avoidance where the trustees accumulate income and then immediately distribute it as capital, in circumstances where the straightforward course would be to distribute as income.[201]

Suppose a discretionary settlor-interested trust is within the motive defence, and the settlor comes to the UK. The trustees retain trust income abroad (if it was remitted to the UK there would be a tax charge under the s.624 remittance basis). This is not tax avoidance.

Suppose a non-resident company owned by a non-resident individual pays a large dividend the year before the individual becomes UK resident. That is not tax avoidance.[202] But if the individual lends the proceeds back

---

199 A trust to accumulate income with power to distribute. If there were a trust to distribute with power to accumulate, then accumulation would be an "operation".

200 Alternatively the loan in such a case may in fact be categorised as an outright distribution.

201 Alternatively the distribution may in fact be categorised as income.

202 That will be clearer from 2012/13 when the temporary non-resident rules govern this area.

to the company, that is a circular and artificial transaction, and the loan may be regarded as for a tax avoidance purpose.

32.41.3 *Inter-group transactions*

For company group transactions, it is useful to refer to the "white list" of transactions which HMRC accept as outside para 2(4A) Sch 7 FA 2003[203] (so they qualify for SDLT group relief). Para 23040 SDLT Manual provides:

> **23040. Restrictions on availability Paragraph 2(4A) Schedule 7 FA 2003** [June 2013]
> ... This guidance gives some examples of transactions where it is accepted that group relief is not denied by Para 2(4A) Schedule 7 FA 2003.
> It should be noted that the examples are intended only to give general guidance and do not use technical or statutory language, nor should they be interpreted as if they were a statute.
> They also assume that the transactions described do not form part of any larger scheme or arrangement which might have tax consequences....
> Examples of transactions where group relief is not denied by Para 2(4A) Schedule 7 FA 2003
> (1) The transfer of a property to a group company having in mind the possibility that shares in that company might be sold more than three years after the date of transfer
> (2) The transfer of a property to a group company having in mind the possibility that shares in that company might be sold within three years of the date of transfer, with a consequent claw-back of group relief, in order that any increase in value of the property after the intra-group transfer might be sheltered from SDLT
> (3) The transfer of property to a group company having in mind the possibility that either (1) or (2) might occur
> (4) The transfer of a property to a group company prior to the sale of shares in the transferor company, in order that the property should not pass to the purchaser of the shares

---

203 This provides:
Group relief is not available if the transaction—
(a) is not effected for bona fide commercial reasons, or
(b) forms part of arrangements of which the main purpose, or one of the main purposes, is the avoidance of liability to tax.
"Tax" here means stamp duty, income tax, corporation tax, capital gains tax or [SDLT].

(5) The transfer of property to a group company in order that commercially generated* rental income may be matched with commercially generated losses from a Schedule A business
(6) The transfer of property to a group company in order that commercially generated* chargeable gains may be matched with commercially generated allowable losses
(7) The transfer of property to a non-resident group company in the knowledge that future appreciation or depreciation in value will be outside the scope of corporation tax on chargeable gains
(8) Transactions undertaken as part of a normal commercial securitisation
(9) The transfer of the freehold reversion in a property to a group lessee in order to merge the freehold and the lease, and thus prevent the lease being subject to the wasting assets rules as respects corporation tax on chargeable gains
(10) The transfer of property to a group company in order that interest payable on borrowings from a commercial lender on ordinary commercial terms may be set against commercially generated* rental income
(11) Borrowings on ordinary commercial terms
  (a) from a commercial lender, or
  (b) intra-group in circumstances which would have been commercial had they arisen between unconnected third parties

*Including income, gains and losses which are generated intra-group on transactions which would have been commercial had they been entered into by unconnected third parties

"Transfer" means the transfer of a freehold, in Scotland ownership of land, or the assignment, in Scotland assignation, of a lease.

Cases involving the grant of a lease will need to be considered on their facts.

It is difficult to take item (7) seriously, but even apart from that, it is clear that HMRC do not strain to classify ordinary tax planning as avoidance.

32.42 Consequences of tainted operation

Where there is a tainted operation associated with a transfer, all the income arising as a result of the transfer in principle comes within the scope of ss.720 and 731. If there is an innocent transfer of £10m, and a tainted operation of £10,000, all the income of the £10m comes into charge.

Section 741 ITA provides a very limited relief:

(1) Section 742 (partial exemption where later associated operations fail conditions) applies if—

(a) an individual is liable to tax[204] because of section 720 or 727 for a tax year (the "taxable year") because condition B in section 737(4) (genuine commercial transaction: post-4 December 2005 transactions) is not met, and

(b) subsections (2) and (3) apply.

The relief only applies for s.720 (and 727) and not for s.731 ITA. Section 741 continues:

(2) This subsection applies if—

(a) since the relevant transfer there has been at least one tax year for which the individual was not so liable by reference to the relevant transactions effected before the end of the year, and

(b) the individual was not so liable for that year because—

(i) condition B in section 737(4) was met, or

(ii) condition B in section 739(4) (genuine commercial transaction: pre-5 December 2005 transactions) was met.

The relief only applies if Condition B is satisfied; not if Condition A is satisfied. In practice New Condition B is hardly ever satisfied. Section 741 continues:

(3) This subsection applies if the income by reference to which the individual is liable to tax for the taxable year is attributable—

(a) partly to relevant transactions by reference to which one of those conditions was met for the last exempt tax year,[205] and

(b) partly to associated operations not falling within para (a).

Assuming the conditions of s.741 are satisfied one moves on to the relief in s.742:

---

204 "Liable to tax" is defined in s.741(5) ITA:

"References in this section to a person being liable to tax for a tax year because of section 720 or 727 include references to the individual being so liable had any income been treated as arising to the individual for that year under section 721 or 728."

205 Defined in s.741(4) ITA:

For the purposes of this section a tax year is exempt if—

(a) it is one of the tax years mentioned in subsection (2), and

(b) there is no earlier tax year for which the individual was liable to tax because of section 720 or 727 by reference to the relevant transactions or any of them.

...

> (1) If this section applies, the individual is liable to tax under this Chapter only in respect of part of the income for which the individual would otherwise be liable.
> (2) That part is so much of the income as appears to an officer of Revenue and Customs to be justly and reasonably attributable to the operations mentioned in section 741(3)(b) in all the circumstances of the case.
> (3) Those circumstances include how far those operations or any of them directly or indirectly affect—
> (a) the nature or amount of any person's income, or
> (b) any person's power to enjoy any income.

The drafter has given up here. Draft ToA guidance INTM602880 has an example, not set out here as it raises more questions than answers.

32.43 Income arising before tainted operation

This section considers how the ToA provisions apply where an innocent post 4-December 2005 transfer is followed by a tainted operation subsequently.

The position where a pre-5 December 2005 transfer is followed by a tainted operation on or after 5 December 2005 raises additional issues discussed at 32.44 (Transfer before and operation after 5 December 2005).

32.43.1 *Income before tainted operation: s.720*

Suppose:
(1) an innocent transfer is made on or after 5 December 2005, and
(2) an associated operation made today fails the New Conditions ("the tainted operation").

At first sight *all* income back to the date of the transfer comes into charge under s.720 ITA.[206] HMRC say in a letter dated 7 April 2006 to the representative bodies that only income of the year in the year of the tainted operation and subsequent years is charged:

> **Transitional arrangements, whether income charged retrospectively**
> Representation: It is suggested that the transitional arrangements of [s.740 ITA] have the effect that income could be brought into charge retrospectively. [Section740(4) ITA] could be interpreted as meaning

206 In practice HMRC would be limited to a four year period.

> that if an associated operation after 5 December 2005 fails the exemption test in [s.737 ITA], all of the income arising from 5 December 2005 could be charged (even where the subsequent associated operation takes place many years later).
> Response: The legislation does not apply retrospectively in the manner suggested. [Section 741C ICTA][207] provides the general rule that section [720] applies in this type of case as it would apply apart from section [736 to 742 ITA]. In those circumstances section [720] would take the income arising in the relevant year of assessment.

This is far from clear in the legislation, but it is a sensible result.

32.43.2 *Income before tainted operation: s.731*

Suppose:
(1) An innocent transfer was made on or after 5 December 2005.
(2) A tainted associated operation is made subsequently.
(3) An individual (not the transferor) receives a benefit in the same year as the associated operation or subsequently.

The individual is taxable under s.731 ITA by reference to all the income which has arisen backdated to the date of the transfer.

Suppose the order of transactions were reversed:
(1) An innocent transfer was made on or after 5 December 2005.
(2) An individual (not the transferor) receives a benefit on or after 5 December 2005.
(3) A tainted associated operation is made in a tax year after the benefit is received.

That is, the benefit was received in the year before the tax motivated associated operation. Is the benefit retrospectively subject to tax? There is no indication either way but it is suggested that the answer is, no. This is consistent with how HMRC understand s.720 to work.

32.44 Transfer before and operation after 5 December 2005

Section 740 ITA provides:

> (1) This section applies if the relevant transactions include both pre-5 December transactions and post-4 December transactions.
> (2) An individual is not liable to tax under this Chapter for the tax year

---

207 Now s.740(3) ITA. The wording is not quite the same, but that has not altered the position.

by reference to the relevant transactions if—

(a) the condition in section 737(2) (exemption where all relevant transactions are post-4 December 2005 transactions) is met by reference to the post-4 December 2005 transactions, and

(b) the condition in section 739(2) (exemption where all relevant transactions are pre-5 December 2005 transactions) is met by reference to the pre-5 December transactions.

Thus in principle one applies the New Conditions to post-4 December 2005 transactions and the Old Conditions to pre-5 December 2005 transactions.

An important question is whether the motive defence test must be met:
(1) by all significant associated operations; or
(2) only by critical operations (my terminology).
At first s.737(8) ITA appears to answer the question,[208] but it does not, because s.737(1) provides:

> This section applies if all the relevant transactions are post-4 December transactions.

It is suggested that the *Herdman* principle still applies to pre-5 December 2005 transfers even if the operation takes place subsequently. That is, only critical associated operations have to pass the motive test and other associated operations are ignored.[209] This does not deprive s.740 ITA of meaning, for it now governs the position where there are post-4 December 2005 critical operations. For instance, suppose:
(1) there was a transfer to a UK trust (an innocent transfer) before 5 December 2005;
(2) non-resident trustees are appointed (a critical association operation) post-4 December 2005.
In deciding whether the motive defence applies one asks whether the associated operation satisfies New Conditions A and B.

The position is not clear cut and HMRC could make the following points:
(1) Section 740(2)(b) incorporates s.737(2) the New Conditions A and B,

---

208 See 32.40.2 (The 2006 reforms).

209 ICAEW agree: see response to HMRC consultation "Transfer of assets abroad: draft guidance" (October 2013) para 82, 83.
http://www.icaew.com/~/media/Files/Technical/Tax/Tax-faculty/TAXREPs/2013/taxrep-57-13-transfer-of-assets-abroad-draft-guidance.pdf

but by doing so it necessarily incorporates s.737(3) to (7) which supplement s.737(2). So it is possible to say that s.740(2)(b) also incorporates s.737(8).

(2) The transitional rules in s.740, see below, arguably make better sense if s.727(8) is applied. But the rules are so harsh that it is suggested that the taxpayer-favourable construction is to be preferred.

32.44.1 *Transitional rules*

Section 740(3) ITA provides:

> If subsection (2)(b) applies but subsection (2)(a) does not, this Chapter applies with the modifications in subsections (4) to (6).

This brings in three transitional rules where:
(1) the pre-5 December 2005 transactions met the Old Conditions; but
(2) post-4 December 2005 transactions do not meet the New Conditions.
The provision in s.740(4) ITA is not discussed because it was spent even before the ITA took effect; see the 9th edition of this work para 28.44.2.

32.44.2 *Transitional rule: s.731*

Section 740(5) ITA provides a transitional rule for s.731 ITA:

> In determining the relevant income of an earlier tax year for the purposes of section 733(1) (see Step 4),[210] it does not matter whether that year was a year for which the individual was not liable under section 731 because of section 739 or this section.

Suppose:
(1) An innocent transfer was made before 5 December 2005.
(2) A tainted associated operation is made on or after 5 December 2005.
(3) An individual (not the transferor) receives a benefit in the same year as the associated operation or subsequently.[211]
The beneficiary is taxable under s.731 ITA by reference to all the relevant income from the date of the transfer (or from 1981, if later). This harshly retrospective rule was actually intended. EN FB 2006 para 33 provides:

> [The effect of s.740(5) ITA is:] for the purposes of [s.731 ITA] where the individual receives a benefit in a year of assessment ending after 5

---

210 See 30.13 (Computation of charge).

211 There is no charge if the benefit is received in a tax year before the operation: see 32.43.2 (Income before tainted operation: s.731).

> December 2005, the process of determining relevant income under the general rule for years up to and including that year must take account of relevant income that arose in years of assessment ending before that date, as well as later years.

It will often be impossible for the quantum of relevant income to be ascertained exactly, as the records will not exist. But the issue may in practice be fudged by agreement with HMRC.

Section 740(6)(7) ITA which deal with this were also spent before ITA took effect; see the 6th edition of this work para 19.48.3.

32.45 Tax return: Disclosure of motive or EU law defence claim[212]

The motive and EU law exemptions do not require a formal claim. If there has been an innocent transfer, a taxpayer is entitled and indeed required to complete tax returns on that basis.[213]

However, if an individual completes a self assessment return, it is necessary to indicate on that return that they have taken advantage of the defence.

In the 2013/14 tax return, notification that the motive defence is in point is given by completing box 46 in the Foreign pages (form SA106). The words next to box 46 state:

> If you have omitted income from boxes 11, 13 and 42 because you are claiming an exemption in relation to a transfer of assets, enter the total amount omitted (and give full details in the 'Any other information' box on your tax return)

This relates to the two reliefs which the ITA describes as exemptions[214]: the motive defence and the EU law defence.

It is only correct to put an entry in the box if the motive defence is needed. It is not correct to put an entry in the box if the ToA provisions do not apply to impose a charge for some other reason, such as the remittance basis, because that is not an "exemption".[215] If there is an entry in the

---

212 See also 29.17 (Tax return: Disclosure of s.720 income) and 30.40 (Tax return – disclosure of s.731 income).

213 See 32.48 (Can an individual disclaim the motive or EU law defences?).

214 Section 736(1) ITA provides: "Sections 737 to 742A deal with exemptions from liability under this Chapter."

215 HMRC agree. SA106 Notes (2013/14) provides:
"**If you have omitted income from boxes 11, 13 and 42 because you are claiming an exemption in relation to a transfer of assets, enter the total amount omitted**

box, but the remittance basis provides a full defence, HMRC practice (understandably) is not to investigate or provide a ruling on the exemptions, as nothing turns on the issue. Otherwise the figure to enter in the box is the sum of (1) UK source income of the person abroad, and (2) foreign income which is remitted in the year.

The International Manual provides:

> **600040 - Transfer of assets abroad** [June 2014]
> **Overview of ITA2007/S736 - 742 - exemption from liability**
> ...There is no provision for a "clearance" or other advance ruling on the application of the exemption provisions. Details of the amount considered to be exempt from charge should be entered on the Foreign Pages of the Self Assessment tax return. In the "white spaces" of the return, the individual should enter particulars of transfers and associated operations that would result in a charge absent an exemption, and provide factual details about the transaction explaining the basis for considering a condition for exemption to be met.

There is strictly no obligation to give precise figures or indeed any figures for the income which (assuming the claim is valid) will not be taxable. However, a failure to give figures may lead to further enquiries. If estimated figures are given, this should be stated. On the occasion when the claim is first made, sufficient details should be given for HMRC to review the case. Once a claim is agreed, I see no reason to give any details at all in subsequent tax returns. I suggest the words "n/r" be put in box 46 (or if the tax return software does not permit that, leave it blank) and note in the additional information section that since the claim has been agreed, no figure need be provided in the relevant box as it is

---

> The provisions described at boxes 10 to 13 and 42 do not apply if you can show from all the circumstances that none of the purposes of the transfer and any associated operations were to avoid tax. Or alternatively, for transactions occurring on or after 6 April 2012, income attributable to genuine transactions is exempt where any liability imposed would constitute a restriction on the EU Treaty freedoms. For example, of freedom of establishment or freedom of movement of capital. But an exemption is only due if actual income would otherwise be chargeable. If you omit income for this reason from boxes 11, 13 and 42, you must enter the total amount of income you have omitted in box 46. You must also provide relevant details and an explanation in the 'Any other information' box of your tax return, or on a separate schedule, including details of the assets transferred and any associated operations, the person abroad concerned, the circumstances of the relevant transactions and the basis for your claim to exclusion...."

irrelevant.

It often happens that the box is left blank when it should be completed, as the need to do so in this very complicated area is overlooked. There is no penalty, provided the claim is valid, as no additional tax is thereby due. It is suggested that an entry should be made in the box on the next tax return, with a note in the "additional information" box to explain the position.

32.45.1 *HMRC response when motive defence box is filled in*

RI 201 provides:

> Where such a disclosure has been made and [motive defence] exemption claimed, the Revenue will make any necessary enquiries about that exemption in the statutory period allowed, and will not seek to reopen that year's return on discovery grounds if the [motive defence] exemption has to be reconsidered in later years.

International Manual explains HMRC's administrative arrangements for dealing with a claim:

> **600050 - Transfer of assets abroad: Mandatory referral to SPT Trusts & Estates Nottingham** [July 2014]
> SPT Personal Tax International Advising Bootle is responsible for the operation of the legislation contained in Chapter 2 Part 13 ITA 2007, the provision of Technical Advice thereon and any litigation involving transfer of assets legislation.
> All enquiry work involving possible application of the transfer of assets legislation is undertaken by or in conjunction with the specialist team in SPT Personal Tax International (Individual Compliance) Bootle. Special Investigations offices and SPT High Net Worth Units also undertake review work in this area in relation to cases handled by them. The individual Self Assessment tax return will often be the first point of identification of cases where the legislation may apply, and as such those handling receipt of returns have a vital role to play in identifying potential application of this legislation. Offices should not however attempt to determine liability to the Income Charge (INTM600020) or the Benefits Charge (INTM600030) or discuss the application of the provisions with agents without first contacting **(This text has been withheld because exemption in Freedom of Information Act 2000)**. Any case in which it is identified that transfer of assets does or may apply must be referred to SPT Personal tax international Advising, (Risk) Nottingham who will arrange any necessary risk assessment of

> the case and advise on whether and how this aspect is to be taken forward.
> SPT HNWU and Special Investigations offices do not have to make a referral of their own cases in accordance with the previous paragraph but should consult with SPT Personal Tax International, Advising Bootle for advice as necessary, and in every case where litigation may be a possibility....
> **(This text has been withheld because of exemptions in the Freedom of Information Act 2000)**
> You must also submit your papers if you receive an application to exemption from liability under 'Income Charge' or 'Benefits Charge'. See INTM600640. You should not enter into correspondence with the taxpayer or his agent oao the exemption provisions. Any enquiry from a taxpayer or professional adviser about the scope and effect of the legislation, or its application to a particular taxpayer, should be referred directly to SPT Personal Tax International Advising Bootle. You may also contact SPT Personal Tax International Advising Bootle for general advice on this legislation at any time if you feel you need it.

On this basis, one should expect an enquiry to be opened, unless the issue has been resolved in earlier years, but in practice that does not always happen.

32.46 Dealing with HMRC enquiries

The individual must "satisfy an officer of HMRC" that Condition A or B is met.[216] This imposes the burden of proof on the taxpayer. That makes no difference as the burden of proof generally rests on the taxpayer, and in any event, disputes are rarely decided by the burden of proof.[217]

Contemporary correspondence and background documentation may be relevant to the factual issue of whether the transferor had the purpose of reducing tax. It will not shed much light on the issue of whether the purpose should be classified as avoidance or mitigation. Some factors such as confidentiality or tax related agreements may shed light on this, or at least, on whether the parties regarded the matter as tax avoidance.[218] In *IRC v Willoughby* 70 TC 57 for instance, the Special Commissioner reviewed sales literature relating to the offshore bonds. In practice, expect HMRC to ask for contemporary documentation. The advisors should

---

216 ss.737(2), 739(2) ITA.

217 See 3.5.4 (Proof of intention).

218 See 32.16.4 (Other indicia of tax avoidance).

review it before making a claim. In the case of a transfer to a trust, this includes:

(1) Trust documentation and letters of wishes.
(2) If not evident from the above, details of intended beneficiaries.
(3) Details of assets transferred.
(4) Contemporary correspondence between trustees, accountants and settlor. (Legal advice should be privileged.)

Often the issue arises many years after the transfer of assets, and the contemporary records have been lost. That should not matter, as secondary material and inferences from common sense should suffice, but efforts should be made to recover original documentation, if only to avoid the suspicion that damaging documents may have been suppressed. The EC say:

> However, in order to ensure that genuine establishments and transactions are not unduly sanctioned it is imperative that where the existence of a purely artificial arrangement is presumed, the taxpayer is given the opportunity, without being subject to undue administrative constraints, to produce evidence of any commercial justification that there may be for that arrangement. The extent to which the onus to demonstrate that their transactions served bona fide business purposes can be placed on the taxpayer can only be determined on a case-by-case basis. In this regard the Commission considers that burden of proof should not lie solely on the side of the taxpayer and that account should be taken of the general compliance capacity of the taxpayer and of the type of arrangement in question.[219]

ToA draft guidance provides:

> **INTM602700 Show or satisfy**
> It is often the case that where transactions have taken place that result in potential liability under the transfer of assets provisions professional advice will have been taken in relation to the transactions. It is sometimes suggested that such advice cannot be disclosed to HMRC because of legal and professional privilege. More is said on this in section "information powers" (see INTM603200). But there is no specific restriction on the information that an individual can provide to demonstrate that the exemption test is met, and an individual who is

219 EC Communication "The application of anti-abuse measures in the area of direct taxation" COM(2007) 785
http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:52007DC0785

> entitled to exemption can be expected freely to provide it. Where an individual chooses to hold back particulars that may contain material evidence about transactions that would otherwise result in a charge to tax it may well lead the officer of Revenue and Customs to conclude that the conditions for exemption are not met.

It is wrong for HMRC to draw any inference from a taxpayer's decision to exercise a right to privilege.

32.47 Appeals

Section 751 ITA provides:

> On any appeal that is notified to the tribunal, the jurisdiction of the tribunal includes jurisdiction to affirm or replace any decision taken by an officer of Revenue and Customs in exercise of the officer's functions under—
>
> (a) section 737 (exemption: all relevant transactions post-4 December 2005 transactions),
> (b) section 738 (meaning of "commercial transaction"),
> (c) section 739 (exemption: all relevant transactions pre-5 December 2005 transactions),
> (d) section 742 (partial exemption where later associated operations fail conditions),
> (da) section 742A (post-5 April 2012 transactions: exemption for genuine transactions),
> (e) section 743(2) (no duplication of charges: choice of persons in relation to whom income is taken into account).

The wording makes clear that jurisdiction of the tribunal is appellate and not supervisory. The wording of New Conditions A and B ("not be reasonable to draw the conclusion ...") does not impose a *Wednesbury* unreasonableness test.

A decision of the first-tier tribunal is, on ordinary principles, binding on the parties (subject to an appeal) only in relation to the assessments under appeal. It does not bind the parties in other respects, and in *Carvill v IRC* [2000] STC (SCD) 143, a Special Commissioner allowed a motive defence appeal even though a previous appeal relating to earlier years had been decided against the taxpayers. The taxpayers then sought to recover from HMRC the tax paid under the earlier assessments, but this rightly failed. There must be some finality in tax, even when wrong decisions are reached by the courts. See *Carvill v IRC (No. 2)* [2002] STC 1167 and *R (oao Carvill) v IRC* [2003] STC 1539. That issue will rarely, if ever,

arise again in practice.

A more common problem is where tax has been paid under the ToA provisions for a number of years without consideration being given to the motive defence, and then it occurs to a taxpayer that a motive defence is applicable. It is considered that the principle in *Carvill (No. 2)* only applied where a motive defence had been litigated and decided by the tribunal, and in the absence of litigation on the point it should be possible to put in an error or mistake claim under usual principles.

An appeal will be made by the individual subject to tax (not the trustees or company within s.731 ITA who have no *locus standi*). If the trustees fund an appeal by the individual against assessment under s.731, will that funding constitute a benefit? If so that benefit would be subject to income tax under s.731, if the appeal is unsuccessful. The position depends on the facts. If the reason the trustees fund the appeal is in order to sort out their tax planning for the future, or in order to benefit the entire class of UK resident beneficiaries, then no taxable benefit is received by the appellant: any benefit is received by all UK beneficiaries and there is no rational means of apportionment. At the other extreme, if the trust fund is (more or less) wound up by a capital payment, and the appeal procedure is specifically to benefit one beneficiary, then the trustees financing the appeal would constitute a benefit.[220]

32.48 Can an individual disclaim the motive or EU law defences?

There are circumstances where the application of the ToA provisions may reduce a tax charge. In particular, a UK resident transferor who receives a distribution from a non-resident company may be more lightly taxed under s.720: they are taxed on the company's income but has the benefit of tax and tax credits paid by the company, and the distribution is tax free.[221]

AIs it possible for an individual to disclaim the motive defence? It seems arguable that the words "the individual satisfies an officer of HMRC" etc., suggest that the benefit of the motive defence can be

---

220 Or else it may be subject to CGT as a capital payment.

221 See 31.4 (Distribution relief).

Also, a beneficiary who received a capital payment from an offshore trust before 2008/09 would prefer to be taxed under s.731 than under s.87 TCGA, because the IT rate under s.720 (40%) was lower than the effective CGT rate under s.87 (then, 64%).

disclaimed. The individual may choose not to satisfy an officer even though there was no tax avoidance purpose. If the motive defence is compulsory, we would have the surprising result that a transfer for tax avoidance may be less harshly taxed than one which was not.

However, this view would cause considerable difficulties. Suppose a non-resident trust has relevant income of £1m and trust gains of £1m, and capital payments of £1m are made in Year 1 to beneficiary A and in Year 2 to beneficiary B. A and B are both resident and domiciled in the UK. Suppose the trust is in principle within the motive defence because the transfer to it was not for tax avoidance purposes. Before 2008/09 A would probably wish to disclaim the motive defence, if A could, so the capital payment to A was subject to income tax, and they avoided the s.87 interest surcharge. However, it would be in the interest of B to argue that the motive defence did apply, so that the payment to A "washed" the capital gain and the payment to B was tax free. It is evident that the offshore trust rules simply do not work if the motive defence can be disclaimed by one beneficiary and claimed by another. Nor do they work fairly if it can be disclaimed by one beneficiary in a manner which binds all the others. So the better view is that the motive defence (if applicable on the facts) is compulsory and binds all parties.

The same applies where it suits HMRC to argue that the motive defence is satisfied, and the taxpayer argues that it is not. This in fact happened in *Swift v HMRC*[222] and *Anson v HMRC*[223] where HMRC successfully argued that the motive defence applied. In neither case did the taxpayer seek to argue that the motive defence could be disclaimed, so the point may now be regarded as settled law.

HMRC agree. The ToA draft guidance provides:

> **INTM602660 Applying for exemption**
> ...The exemption applies automatically if the facts show that the conditions are met. It is not therefore the subject of a 'claim' under the normal claims mechanism of the Tax Acts (section 42 TMA 1970).

32.49 Motive defence: Commentary

32.49.1 *Can a satisfactory concept of tax avoidance be devised?*

Littlewood made a survey of the privy counsel cases on tax avoidance

---

222 [2010] SFTD 553 at [22] - [28]. The case is not yet final.

223 [2012] UKUT 59 (TCC).

and his conclusion was gloomy:

> ... on the basic issue—what is tax avoidance?—very little progress has been made. In particular, no one (neither the Privy Council, nor the courts of Australia or New Zealand, nor anyone else) has yet devised a satisfactory definition of tax avoidance. Worse, the Privy Council (like the Australian and New Zealand courts and the various commentators who have addressed the problem) has not only failed to *define* tax avoidance; it has failed even to produce a coherent set of guidelines as to how it might be recognised. In *Newton*, Lord Denning said that ''ordinary" transactions do not count as avoidance.[224] In *Challenge*, Lord Templeman said that ''mitigation" does not count as avoidance.[225] And in *Peterson*, Lord Millett said that the obtaining of ''acceptable" tax advantages does not count as avoidance.[226] Clearly this does not constitute a complete solution.[227]
>
> Nor is that all. Of the 13 cases, some were found by the Privy Council to fall on one side of the line, and some on the other. Surely, then, it might be said, these cases must provide *some* guidance as to where the line is to be drawn? Even this, however, seems unduly optimistic. In other areas of the law, judges (and commentators) might disagree as to how particular cases should be resolved, but at least they generally agree as to what constitutes a marginal case (as with, for example, the distinction between capital and revenue). This is not so, however, of the distinction between tax avoidance and tax mitigation. Rather, the judges tend to present whichever outcome they prefer not only as correct, but as clearly so—even when they fail to agree. This is perhaps the strangest feature of these cases. For example, in *Challenge* Lord Templeman (for the majority) said ''a clearer case. . .cannot be imagined",[228] though this was evidently less clear to Lord Oliver who dissented. Similarly in *Peterson* the majority regarded it as clear that the anti-avoidance rule did not apply; and the minority as equally clear that it did: ''a clearer case", said Lord Bingham and Lord Scott in their

---

224 [1958] AC 450 at p.466.

225 See 32.7.2 (Avoidance/mitigation distinction).

226 [2005] STC 448 at [35]–[37].

227 [Footnote original] *Simms, Payne* and *Townend* established that there is a difference between avoidance and evasion. This is important, but provides no guidance as to the distinction between avoidance and mitigation.

228 [Footnote original] [1987] 1 AC 155 at 164.

> joint *dissenting* judgment, ''can hardly be imagined".[229]
> The cases thus confirm what is notorious: that the idea of tax avoidance is one of the most difficult in the whole of the law. To describe the distinction between avoidance and mitigation as ''vague" is to understate the problem, for it suggests that there is general agreement as to roughly where the line lies and that the disagreement is only as to marginal cases. But none of their Lordships appear to have regarded any of the cases as marginal. It is difficult, therefore, to extract from them any guidance as to where the line lies. Notable, too, is the frequency of disagreement: of the eight cases decided after the Privy Council started permitting dissents in 1966, only two were decided unanimously (*Ashton* and *O'Neil*). Dissents tended, moreover, to be colourful. Lord Wilberforce, dissenting in *Mangin*, accused the majority of ''interpretative astigmatism".[230] Lord Oliver, in *Challenge*, described the majority view as ''eccentric".[231] And, in *Peterson*, Lord Bingham and Lord Scott said the majority view was ''extraordinary"[232] and required ''shutting one's eyes to the obvious."[233]
> It would seem reasonable to conclude that the idea of tax avoidance is simply not susceptible to coherent explication. This conclusion is not novel, but the Privy Council cases throw the dimensions of the problem into stark relief.[234]

Technical Teams Operational Guidance Manual reaches the same conclusion:

> **TTOG3435 Identification of Code 8 cases: Tax avoidance** [Apr 2014] 'Avoidance' is not defined in the Taxation Acts and attempts to define it have not in the past been successful.

32.49.2 *Should we abandon the search for a satisfactory definition?*

Littlewood continues:

> If the idea of tax avoidance is incoherent, however, it might be

---

234 Littlewood "The Privy Council and the Australasian Anti-Avoidance Rules" [2007] BTR 175.

concluded also: that rules against it amount to taxation by discretion; that this entails a departure from the rule of law; that the search for a satisfactory anti-avoidance rule should therefore be abandoned; and that existing anti avoidance rules should be repealed. Arguments along these lines are indeed common. Perhaps they are sound. But there are nonetheless grounds upon which anti-avoidance rules might be defended.

The first of these is expediency: the rules might be radically indeterminate, but they work. Secondly, the complaint is based on a fallacy. The scope of anti-avoidance rules is obviously uncertain, but it does not follow that *not* having such a rule results in any less uncertainty: even in the absence of a rule against avoidance, the courts seem inevitably (as in the United Kingdom) to be called upon to determine whether taxing statutes should be interpreted in such a way as to give efficacy to, or to negate, taxpayers' attempts to avoid tax. The United Kingdom's experience, in particular the *Ramsay* line of cases, suggests that the degree of uncertainty might be much the same, or worse. For, although the scope of the *Ramsay* principle remains uncertain, it seems that the idea of avoidance (and presumably also, therefore, the distinction between avoidance and mitigation) is embedded in it; and yet the UK courts have made no more progress in defining avoidance than has the Privy Council, and perhaps less, for it was in the Privy Council (in *Challenge* and *Peterson*) that their Lordships formulated the distinction between avoidance and mitigation. Consequently there seems to be little reason to suppose that anti-avoidance rules *add to* the level of uncertainty from which taxing statutes suffer. In other words, the uncertainty may be a feature not of the anti-avoidance rule, but of the rules defining the scope of the tax. The effect of the anti-avoidance rule, therefore, is perhaps to tilt the field in favour of the Revenue, whilst leaving the degree of uncertainty more or less unchanged (or perhaps ameliorating it a little).

Thirdly, the unpredictable scope of general anti-avoidance rules seems appropriately selective in whom it inconveniences. Taxpayers and their representatives in Australia and New Zealand routinely complain that this unpredictability deters taxpayers from undertaking economic activity which is not tax-driven and which would be beneficial to society.[235] The 13 Privy Council cases, however, suggest that this is not so, since in every one of them (including those in which the rule was held not to apply) the taxpayer plainly went out of his way to structure

235 [Footnote original] See, e.g. *CIR v Challenge Corp Ltd* [1987] 1 AC 155 at 167.

> his affairs in a manner calculated to reduce his liability to tax. The cases thus suggest that it is only those who sail close to the wind who get wet. On this last point, however, it is necessary to acknowledge that the taxpayers who have ended up in the law reports may not be typical of all those against whom the Australian and New Zealand Revenues have invoked their general anti-avoidance rules. In particular, it is possible that the rules have been invoked in cases in which the amount of tax in dispute was too small to be worth litigating, or in which the taxpayer could not afford to litigate.
>
> In other words, it is possible that the general anti-avoidance rules *have* served as a basis for arbitrary taxation even though the law reports contain no evidence of it. It is possible that in the United Kingdom the *Ramsay* principle has functioned in this way also. It would be useful, therefore, to study the cases in which taxpayers have been assessed on the basis of a general anti-avoidance rule or the *Ramsay* principle but which have *not* proceeded to litigation. The Revenue (in all three countries) might welcome an investigation of this kind, because they might prefer to dispel any suspicion that they have been using either the statutory rules or the judge-made one in this way.[236]

32.49.3 *Abolish the 2006 rules*

This topic was never easy, but the FA 2006 made it twice as complicated: it introduced wider and more obscurer rule which apply to transactions from 2005, while retaining the old rules for earlier transactions.[237]

The reader who studies this long and difficult chapter will almost certainly agree with the author that the 2006 reforms were wrong headed in policy though (as so often) clumsy drafting adds its mite to the confusion.

What should be done? One step forward would be to return to the (relatively) simple pre-2006 position, though it would be helpful to have a statutory statement of what I take to be the pre-2006 rule, that the motive test must be satisfied by all critical associated operations.

---

236 Littlewood "The Privy Council and the Australasian Anti-Avoidance Rules" [2007] BTR 175.

237 EN FB 2006 stated:

> "The new provisions recast the test for exemption in cases not involving a tax avoidance purpose to make its meaning clearer."

But no-one was intended to take that seriously.

CHAPTER THIRTY THREE

LIFE POLICIES AND CONTRACTS

33.1 Policies: Introduction

This chapter considers:
(1) life insurance policies
(2) life annuity contracts
(3) capital redemption policies
ITTOIA refers to these as "policies and contracts". I abbreviate the expression to **"policies"**. The asset is often described in the insurance industry as a bond; statute has adopted that term in the expressions "personal portfolio bond" and "guaranteed income bond". I prefer not to use the word "bond" since it is also used to describe debentures and indeed strictly includes any obligation undertaken by deed.

Policies fall within Chapter 9 Part 4 ITTOIA, sometimes called the "chargeable event" regime. This contains almost 100 sections: it is the longest chapter in ITTOIA. The reader will not be surprised if I say that a full discussion needs a very long book to itself. This chapter focuses on the matters closest to the theme of this work.

The provisions are sometimes very crude. Partial surrender is a particular trap.[1] This is the only place I have seen in the HMRC Manuals where districts are warned "not to attempt any discussion or explanation as to the equity of the treatment for tax".[2]

It is common to structure an investment in the form of a life insurance policy (with only a nominal element of life insurance). So one can effectively opt into the chargeable event regime by choosing to invest in a policy rather than in some other form.

---

1 In practice this is avoided by life companies issuing a cluster of separate policies, instead of one single policy.

2 In the former Assessment Procedures Manual para 3147a (withdrawn in 2009).

Where the value of the policy is linked to specific assets or funds, this is sometimes called a life insurance wrapper, though wrapper is not a legal or technical term with any fixed or precise meaning. As far as I am aware, the Swiss Tax Agreement 2011 represents the first use of the word in tax legislation.[3]

33.1.1 *Cross references*

The following issues are dealt with elsewhere see:
59.14 (DT reliefs: policy held by trust or by company)
82.25 (Situs of insurance policy for IHT)
83.15 (Situs of Insurance policy for CGT).

The taxation of policies held by UK resident companies is not discussed.

33.2 Definitions

33.2.1 *"Policy"*

The IPT Manual provides:

> **1115 Fundamental Concepts: what is a life policy** [August 2008]
> The word policy in connection with insurance has a long history. It is the formal document in which an insurer (that is, insurance company or friendly society) sets out the terms of its obligations in consideration of the stipulated premiums. For an insurance contract to be made, or varied, between an insurer and policyholder requires the completion of the standard contract law offer and acceptance. There is no practical distinction between contract and policy; the latter simply evidences the former. Lord Donaldson confirmed this in the judgment referred to at IPTM1110. [*Scher v Policyholders Protection Bond* [1994] 2 AC 57.]

33.2.2 *"Life insurance"*

The definition of life insurance[4] needs a long chapter to itself. IPT

---

3 Article 2(1)(f) STA; see 88.3.3 ("Relevant assets").

4 A note on terminology. The General Insurance Manual provides
"**1060. Legal basis of insurance: Indemnity** [January 2009]
It used to be said that there was a distinction between
[1] insurance, meaning insurance against a financial loss, and
[2] assurance, meaning the assurance of a fixed or minimum sum upon the occurrence of a specified event that is bound to occur.
The text of the [Policies of Assurance] Act 1601, however, shows that the term "assurance" was applied to what is manifestly indemnity insurance. More recently

Manual provides:

> **1115. What is a life policy?** [August 2008]
> According to the 1774 Life Assurance Act, a policy of life insurance is an insurance policy on life. There is no further definition in the Taxes Acts. If a policy pays benefits on the death of an individual, either whenever it happens, or within a specified term, then it is potentially within the scope of the chargeable event legislation.
> It is not relevant for tax purposes that such a policy may also provide insurance against other risks, such as disability and critical illness, although that might affect its regulatory or accounting treatment.
> Funeral plan contracts where a customer pays a sum to a funeral provider to provide a funeral in due course are not contracts of insurance, although similar arrangements if made with an insurer as a whole of life policy are, according to the regulatory rules of the Financial Services Authority.[5]

33.2.3 *"Capital redemption policy"*

A full discussion of the term "capital redemption policy" (defined in s.473(2) ITTOIA) is not attempted here. IPT Manual provides:

> **1120. What is a capital redemption policy?** [March 2011]
> Capital redemption policies, though issued by insurance companies, are not strictly speaking insurance products. They were once known as investment bond contracts, which is more descriptive but needs to be distinguished from the type of life policy investment bond described at IPTM1100. Under capital redemption policies, one or more fixed sums is paid to an insurer under a contract pursuant to which one or more specified amounts is paid out at some later time or times, on the basis of an actuarial calculation. Typically the contracts take the form of
> - an annuity certain, where a capital sum is used to buy an annuity for a fixed term not contingent on life, see IPTM4200, or
> - a sinking fund where regular sums are paid in to secure a capital sum at some later date, for example against the need to find a premium payment to renew a lease.
>
> The statutory definition of capital redemption business is at Section 458(3) ICTA 1988. Contracts within such business are long term insurance business but not life business. A capital redemption policy that creates a debtor/creditor relationship, with an agreement to return the sum advanced, is known as a capital

---

the distinction has faded further under the influence of the EU, where the official English texts of the relevant Directives consistently use the term "life insurance". For most practical purposes therefore insurance and assurance can be treated as interchangeable terms. In the Taxes Acts, however, the term "assurance" is usually confined to life business.

5 There is also an interesting discussion in the General Insurance Manual [January 2009] para 1010, not set out here for reasons of space, and in part 7 of the Law Commission paper "Insurable Interest" (14 January 2008).

redemption bond and is similar in nature to a relevant or deeply discounted security, see SAIM3000. However, such bonds, which may only be sold by an insurer, are removed from the scope of the deeply discounted securities income tax charge of Section 427 ITTOIA onwards.[6]

33.2.4 *"Annuity"*

A full discussion of the term "life annuity" (defined in s.473(2) ITTOIA) is not attempted here. IPT Manual discusses the meaning of "annuity", a word used in many tax contexts:

> **1130. What is an annuity?** [July 2006]
> There is no single definition in the taxes acts. There is an ancient definition in Stroud's Judicial Dictionary, quoting Coke on Littleton:
>
> > An annuity is a yearly payment of a certaine summe of money granted to another in fee, for life, or yeares, charging the person of the grantor onely.
>
> From an early case called *Foley v Fletcher*[7] the judgment of Watson B at 784-5 is often quoted:
>
> > But an annuity means where an income is purchased with a sum of money, and the capital has gone and has ceased to exist, the principal having been converted into an annuity.
>
> From this and other cases, notably *Southern-Smith v Clancy*, 24 TC 1, the following factors emerge as needing to be present
> - the payments must be made under a legal obligation
> - those payments must be 'pure income profit'
> - they must be capable of being characterised as 'annual', so being capable of recurrence on a periodic basis by reference to an annual time frame
> - the purchase sum must pass absolutely to the provider
> - no debtor/creditor relationship is created in relation to that sum; it is

---

6 See too the explanatory notes to the draft legislation published in the Pre-Budget Report, 5 December 2005:

> 15. A capital redemption policy is a contract, issued by an insurer, which is made in the course of capital redemption business. Under a capital redemption policy, for consideration of a sum or sums of money, the issuer of the policy guarantees to pay out a larger sum on a specified future date or to make a series of payments. Payment is independent of any contingency linked to human life.
>
> Examples of such contracts include—
> - an annuity certain - an annuity payable for a set period not contingent upon the survival of a life,
> - a leasehold redemption policy - which builds up a fund to be used in some way on the expiry of a lease, and
> - a sinking fund policy - this accumulates a fund for the eventual replacement of a wasting asset.

7 (1858) 157 ER 678; 28 LJ Ex 100; 3 H & N 769 accessible *http://www.commonlii.org/uk/cases/EngR/1858/1107.pdf*

replaced by the annuity
- the annuitant's only right is to demand payments when due
- the payments must not be instalments of pre-existing debt.

33.2.5 *"Surrender"*

In this chapter:
"A full surrender" is a surrender of all the rights under the policy.
"A part surrender" is a surrender of part of the rights under the policy.
Section 500 ITTOIA provides:

> The following events are treated for the purposes of this Chapter as a surrender of a part of the rights under the policy or contract in question—
> (a) the falling due of a sum payable as a result of a right under a policy or contract to participate in profits where further rights remain under it,
> (b) in the case of a contract for a life annuity which provides for a capital sum to be taken as an alternative in part to the annuity payments, taking the capital sum,
> (c) the making of a loan to which section 501 applies, and
> (d) the making of a payment to which section 504 applies (payments by insurers under guaranteed income bonds etc.).

33.2.6 *"Insurance year"*

Section 499 ITTOIA provides:

> (1) In this Chapter "insurance year", in relation to a policy or contract, means the 12 months beginning with—
> (a) the date on which the insurance or contract is made, or
> (b) any anniversary of that date.

Special rules apply on the termination of a policy:

> (3) An event referred to in section 484(1)(a)(i) or (iii) or (b) to (e)[8] ... is treated as ending the insurance year in which it occurs.
> (4) In this Chapter "final insurance year" means an insurance year that is ended as a result of subsection (3).
> (5) But if, as a result of subsection (3), an insurance year would begin and end in the same tax year—

8 In my terminology this is a termination-event: see 33.3.4 (Categories of chargeable event).

(a) that insurance year and the previous insurance year are treated as one insurance year, and
(b) "final insurance year" needs to be read accordingly.

The IPT Manual provides:

IPTM3505 - Chargeable events: calculating gains: 'insurance year'
[February 2014]
'Insurance year' - sometimes called policy year - begins on the day a policy is taken out and on the same date in subsequent years. It ends on the day before the anniversary of the start date and each subsequent year.
For example, a policy taken out on 1 June 2004 has an 'insurance year' ending on 31 May 2005. A part surrender giving rise to an 'excess event' taking place on 1 April 2005 would fall in tax year 2004-05. But the gain on the 'excess event' would be treated as arising at the end of the 'insurance year', on 31 May 2005, and consequently would be assessable for tax year 2005-6.
If an event brings a policy or contract to an end - full surrender of rights, death, maturity or taking a capital sum as a complete alternative to annuity payments - the 'insurance year' is treated as ended on that date. It is then referred to as the 'final insurance year'.
If that rule would result in an 'insurance year' beginning and ending within the same tax year, then the 'final insurance year' is extended to include the previous 'insurance year'.
For example, if there is an 'insurance year' running from 1 June 2004 to 31 May 2005 and the policy is fully surrendered on 30 June 2005, the 'final insurance year' runs from 1 June 2004 to 30 June 2005.
The extended period of a 'final insurance year', coupled with the requirement on the insurer to issue a chargeable event certificate broadly within three months of the event, may result in the issue of a certificate for an event that turns out not to be chargeable. This may happen where the event is swept up in a calculation for a terminal event that brings the 'final insurance year' to an end, see IPTM3570. In this case the insurer should notify the policyholder that the earlier certificate should be disregarded - see IPTM7210.

33.2.7 *Rights, parts and shares*

Section 464(3) ITTOIA provides:

If there has been a surrender or assignment of only a part of or share in rights under the policy or contract, the references in this section and

those sections to the rights are references to that part or share.[9]

ITTOIA EN comments:

417. *Subsection (3)* provides that references in sections 464 to 467 to a surrender or assignment of rights refer, where appropriate, to a surrender or assignment of a part of, or share of, the rights. A *part* of the rights means one or more discrete rights provided by the policy or contract. A *share* in the rights means part of the ownership, where there are multiple owners, of such a discrete right or rights or of all the rights in the policy or contract.

33.3 Outline of provisions

ITTOIA EN summarises the layout of the provisions:

409. The Chapter is laid out as follows-

- charge to tax under Chapter 9 (sections 461 to 463)
- person liable etc. (sections 464 to 472)
- policies and contracts to which Chapter 9 applies (ss.473 to 483)
- when chargeable events occur: general (sections 484 to 490)
- calculating gains: general (sections 491 to 497)
- part surrenders and assignments: periodic calculations and excess events (sections 498 to 509)
- transaction-related calculations and part surrender or assignment events (sections 510 to 514)
- personal portfolio bonds (sections 515 to 526)
- reductions from gains (sections 527 to 529)
- income tax treated as paid and reliefs (sections 530 to 538)
- deficiencies (sections 539 to 541)
- supplementary (sections 542 to 546)

33.3.1 *The charge*

The charge is in s.461(1) ITTOIA:

Income tax is charged on gains treated as arising[10] from policies and

---

9 This is repeated in s.468(6) ITTOIA. (If s.464(3) had ITTOIA-wide application this would have been unnecessary.)

10 The general usage of the tax legislation is that chargeable gains "accrue" but income "arises". In the chargeable events legislation, gains are regarded as income and so the word used is "arise". There is no difference in meaning.
Under the chargeable events legislation gains are sometimes said to "arise" and sometimes described as "treated as arising". Again, there is no difference in meaning.

contracts to which this Chapter applies.

Section 463(1) ITTOIA provides:

> Tax is charged under this Chapter on the amount of the gains arising in the tax year.

33.3.2 *Policies and contracts to which chargeable event provisions apply*

This takes us to s.473(1) ITTOIA:

> This Chapter applies to—
> (a) policies of life insurance,
> (b) contracts for life annuities, and
> (c) capital redemption policies.

Sections 478–483 ITTOIA (not discussed here) specify various types of policies to which the provisions do not apply.

33.3.3 *When gains arise*

The time that the gain arises is particularly important for a beneficiary who becomes or ceases to be UK resident, as a gain arising to a non-resident (or in the overseas part of a split year) is not taxable.

Section 462(1) ITTOIA provides:

> For the purposes of this Chapter, a gain from a policy or contract arises when a chargeable event occurs in relation to the policy or contract (see section 484).

For full surrenders the chargeable event occurs, and the gain arises, at the time of the surrender.

For part surrenders the event occurs, and the gain arises, at the end of the insurance year[11] for the policy concerned. The reason is perhaps so that only one chargeable event computation is needed, even if there are several part surrenders during the year.

33.3.4 *Categories of chargeable event*

"Chargeable event" is a label which brings in a complex set of rules. Section 484(1) ITTOIA sets out the starting point:

---

11 See 33.2.6 ("Insurance year").

Chargeable event: text of s.484	**Type**
The following are chargeable events—	
(a) in the case of any kind of policy or contract—	
(i) the surrender of all rights under the policy or contract,	
(ii) the assignment of all those rights for money or money's worth,	Termination Event[12]
(iii) the falling due of a sum payable as a result of a right under a policy or contract to participate in profits, if there are no remaining rights under it	
(iv) a chargeable event treated as occurring under section 509(1) (chargeable events in certain cases where periodic calculations show gains),	
(v) a surrender or assignment treated as a chargeable event under section 514(1) (chargeable events where transaction-related calculations show gains), and	Calculation Event
(vi) a chargeable event treated as occurring under section 525(2) (chargeable events where annual personal portfolio bond calculations show gains)	
(b) in the case of a policy of life insurance, a death giving rise to benefits under it,	
(c) in the case of a policy of life insurance or a capital redemption policy, its maturity,	
(d) in the case of a contract for a life annuity which provides for the payment of a capital sum on death, the death, and	Termination Event
(e) in the case of a contract for a life annuity which provides for a capital sum to be taken as a complete alternative to the annuity payments (or any further annuity payments), taking the capital sum.	

Thus there are ten types of chargeable event. They fall into two categories:

(1) **Calculation events:** s.491(4) ITTOIA provides the terminology:

> In this Chapter—
> "calculation event" means an excess event, a part surrender or assignment event or a personal portfolio bond event,

12 My terminology.

Thus there are three types of calculation event: Section 491(4) then defines these three types:

> [a] "excess event" means a chargeable event within section 509(1),
> [b] "part surrender or assignment event" means a chargeable event within section 514(1), and
> [c] "personal portfolio bond event" means a chargeable event within section 525(2).

The terminology of [a] is opaque, and [b] is misleading, but it is hard to think of better labels for the tortuous statutory rules. Calculation events are therefore within s.484(1)(a)(iv), (v) or (vi).

(2) Other events: that is, chargeable events other than calculation events. It is useful to have a label for these, but no short label fits the bill. I call them "**termination-events**". Termination-events are those within s.484(1)(a)(i)-(iii) and (b)-(e), in short:
(a)(i) full surrender
(a)(ii) full assignment
(a)(iii), (e) final payment
(b)(d) death giving rise to benefits
(c) maturity

Logically there should be two stages, first to ascertain whether there is a chargeable event and secondly to compute the gain. But in the three calculation event cases the two stages overlap, because the question of whether there is a chargeable event depends on whether there is a gain.

It should be noted that an assignment for no consideration is not a chargeable event. This is the opposite of the CGT position.

Sections 484-489 ITTOIA contain exemptions. These are not discussed here, but s.487 is important because it contains an exemption for inter-spouse transfers (based on the CGT spouse exemption).

33.3.5 *Computation of gains*

The computation of gains is complex and artificial and often bears no relation to the commercial gain.[13] It is not the same as the computation of gains for CGT purposes, so one must take care not to confuse chargeable gains (the CGT term) and gains under the chargeable events legislation.

---

13 See *Lobler v HMRC* [2013] UKFTT 141 (TC) discussed at 2.3 (Views on morality of tax avoidance).

It is confusing that the legislation calls them both "gains". The term "**chargeable event gains**" is useful when one needs to distinguish the two types of gains.

There are five different methods of computation for different types of chargeable event. The computation rules are not discussed here.

SA904(Notes) (Notes on Trusts & Estate Foreign for the year ended 5 April 2013) comments on how to deal with foreign currency gains:

> You should calculate gains on foreign life insurance policies, life annuities and capital redemption policies in the currency in which the policy or life annuity is denominated. You should then convert the gain into sterling at the rate of exchange applicable at the time of the chargeable event (which may not be at the time the transaction occurred).[14]

This is different from method of computation of chargeable gains.

33.4 Liability of individuals and individual "creators"

Once one has identified a chargeable event, and computed the chargeable event gain, the next stage is to ascertain the person liable for the charge.

---

14 Similarly, the IPT Manual provides:

9220 Calculation of gains and other amounts for policies in foreign currencies [July 2006]

Where a tax representative or insurer reports a gain in sterling, it should compute the gain by calculating the amount of the chargeable event gain in the currency in which the policy is denominated and then convert it into sterling at the conversion rate on the date of the event. This method ensures that currency fluctuations during the life of the policy are disregarded.

Where a tax representative or insurer reports other amounts in sterling, for instance the premiums paid where there has been an assignment, they should be translated at the rate applying on the date of the chargeable event.

Similarly, IPT Manual:

3700 Foreign policies: differences in treatment [February 2014]

Some policies are denominated in a foreign currency. In such cases, any chargeable event gain should be computed in the foreign currency and then converted to sterling at the rate that applies at the date of the chargeable event. This method should be adopted rather than any other method such as converting each transaction to sterling at the rate applying on the date the transaction occurred.

For instance, if premium of €10,000 was paid into a policy on 10 May 2002 and the policy was surrendered for €12,500 on 3 January 2005, the chargeable event gain on the surrender is €2,500. This should then be converted to sterling at the conversion rate applying on 3 January 2005 to arrive at the amount of taxable gain.

Section 464 ITTOIA provides an introduction:

> (1) The person liable for any tax charged under this Chapter is the person indicated by—
> section 465 (person liable: individuals),
> section 466 (person liable: personal representatives), and
> section 467 (person liable: UK resident trustees),
> according to how the rights under the policy or contract are owned or held immediately before the chargeable event in question occurs.
> (2) References in those sections to the ownership or holding of those rights are references to their ownership or holding at that time.

Section 465(1) ITTOIA provides:

> An individual is liable for tax under this Chapter if the individual is UK resident for the tax year in which the gain arises and condition A, B or C is met.

I call these conditions "**individual bond conditions A to C**".

33.4.1 *Individual bond condition A: Individual beneficial owner*

Section 465(2) ITTOIA provides:

> Condition A is that the individual beneficially owns the rights under the policy or contract in question.

Individual bond condition A – gain charged on individual if they are beneficial owner – is natural and sensible.

Sections 469–471 ITTOIA deal with joint ownership.

33.4.2 *Individual bond condition B: Trust ownership*

Section 465(3) ITTOIA provides:

> Condition B is that those rights are held on non-charitable trusts which the individual created.

There are two strange features about individual bond condition B, where a policy or contract is held in a trust. First, it does not refer to the "settlor", which is the normal tax terminology, but to trusts "created" by a person. In practice, the settlor will usually be the creator.[15]

---

15 The reason for the non-standard term was, possibly, (1) to avoid the rule that a "settlor" must have provided an element of bounty or (2) a concern that a company may not be a "settlor"; see 80.34 (Pension trusts and employee benefit trusts), or

Secondly the creator is charged on the chargeable event gain arising to their trust regardless of the identity of the beneficiaries. The individual has a right of recovery against the trustees[16] so ultimately it is the beneficiaries who bear the burden of the charge, but they do so at the creator's marginal rates. At first sight this seems surprising: the approach more commonly adopted in taxation is only to charge the settlor in the case of settlor-interested trusts, ie if the settlor or (more or less) closely connected persons are beneficiaries. However:

(1) One approach is not necessarily better than the other.[17]

(2) The approach adopted for policies and contracts can only favour the taxpayer, in relation to UK resident trusts, because chargeable event gains would otherwise be taxed at the trust tax rate of 45%; so in a very rough and ready way the rule can mitigate the unfairness of taxing trusts at the top trust rate, whose beneficiaries may be lower taxpayers.

Section 545 ITTOIA provides a commonsense definition:

> "non-charitable trust" means a trust other than a charitable trust.

What if X creates a bare trust for the benefit of Y, and the trust holds a policy on which a gain arises? Condition A is satisfied, so Y is taxed on the gain: condition A refers to beneficial ownership. At first sight, condition B is also satisfied! "Trust" is not defined; the usual tax term is "settlement" or "settled property" (which excludes a bare trust). However the two conditions cannot both be satisfied, and the context shows that condition B is not intended to be satisfied. Bare trusts are invariably transparent for tax purposes. So a bare trust does not count as a trust for this purpose and "trust" has the same meaning as the usual tax term "settlement". HMRC agree. The IPT Manual provides:

> **IPTM3250 - Chargeable events: person liable to charge: summary of the position in relation to trusts** [February 2014]
> **... Rights held on a bare trust - beneficiary chargeable**
> Here the beneficiary is absolutely entitled as against the trustee and the

---

(most likely) (3) a rough and ready way to deal with the two-settlor situation. That is, if A created a trust and B added property, A alone was the creator and was formerly subject to tax on the whole of the gain. But s.472 ITTOIA now provides a more sensible rule in this case.

16 Section 538 ITTOIA.

17 See App 9.9.2 (Definitions of "settlor-interested").

rights are vested in the beneficiary as beneficial owner. The bare trust is ignored and the beneficiary is chargeable by virtue of ITTOIA05/S465 (2). This applies equally where the beneficiary is a minor - however, in line with practice generally prevailing for life insurance policies, settlors remain liable for income tax on chargeable event gains arising for years up to and including 2006/07.

Section 472 ITTOIA deals with trusts with two or more settlors. The IPT Manual discusses the meaning of "creator":

IPTM3250 - Chargeable events: person liable to charge: summary of the position in relation to trusts [February 2014]
... 'Settlor' or 'creator' of a trust has a wide meaning and includes any person who settles property on the trust. So, for instance, where a person pays sums to the trustees to use as current or future premiums for a policy held in the trust, that person is a creator of the trust.

IPTM3290 - Chargeable events: person chargeable: multiple interests: trusts created by more than one person [February 2014]
... If property is contributed by different persons at different times, for instance where property is added to an existing settlement, each is treated as a creator in relation to the trust and consequently as a sole settlor.
The share is taken to be the same as the proportion of property contributed by the creator to the trust as it stands immediately before the chargeable event. Property is contributed for this purpose if it originates from the creator, meaning provided directly or indirectly by that person, unless under reciprocal arrangements with another person. A just and reasonable apportionment may be made where necessary.

33.4.3 *Individual bond condition C: Debt charged on security*

Section 465(4) ITTOIA provides:

> Condition C is that those rights are held as security for the individual's debt.

Individual bond condition C – gain charged on individual if held as security for the individual's debt – is a rough and ready solution to the problem of imposing the tax charge where the economic ownership lies. CGT has the opposite rule: s.26 TCGA.

33.4.4 *Gains arising to remittance basis taxpayer*

Section 465(5) ITTOIA provides:

> For the purposes of calculating the total income of an individual liable for tax under this Chapter, the amount charged is treated as income.

The drafting technique is that the gain is added to the individual's "total income". The gain is taxed on an arising basis. The remittance basis does not apply even if the individual is a remittance basis taxpayer and the gain arises from an offshore policy.

It follows that a policy or contract which will give rise to a gain under the chargeable event provisions is not a suitable form of investment for:

(1) an individual who is a remittance basis taxpayer or

(2) a trust whose creator is a remittance basis taxpayer[18]

unless the individual expects to be non-resident in the year that the chargeable event gain arises. If the individual has no short or medium term intention of realising a gain (ie the policy is a long term investment) then the tax disadvantage may be set against the practical convenience of the policy.

The RDR Manual correctly provides:

> **33540 - Remittance Basis: Identifying Remittances: Specific Topics: Chargeable Event gains** [June 2010]
> Gains arising on a chargeable event, for example, the surrender of all rights under a policy of life insurance are chargeable to tax on the arising basis regardless of whether the policyholder is domiciled in the UK or not. The remittance basis does not apply.
> ...
> **Withdrawals in excess of 5% or full surrenders**
> If the individual withdraws more than 5% of accumulated premiums then, the amount in excess of 5% or the actual gain if a full surrender, will be chargeable to income tax under the chargeable event legislation. It is charged on the arising basis whether it is remitted or not.

This is at first sight a surprising inconsistency with the general scheme of taxation for foreign domiciliaries.

For completeness: some might suggest the following justification for taxing chargeable event gains on an arising basis. A remittance basis taxpayer may take out a foreign policy, whose value is linked to a UK asset held by the life insurance company.[19] If the chargeable event gain was taxed on the remittance basis, then use of a policy "wrapper" would

---

18 But it may be suitable if held by a non-resident company held by the trust: see below.

19 For an example, see *Foulser v MacDougall* [2007] STC 973.

allow what is in economic terms UK source income or gains to be taxed on a remittance basis. I doubt if that is the historic reason for the rule, which is probably due to oversight. However that may be, this possibility does not justify the rule. It is suggested that gains on foreign policies should be taxed on the remittance basis. The problem does not even call for a targeted anti-avoidance, for the planning which only amounts to deferral, and turns capital into income should be regarded as unobjectionable; deferral is in any case available in a number of different ways.

As with most anomalies, the current rule does not affect the well advised. Nevertheless, long term residents who pay the remittance basis charge and who have acquired foreign policies may well feel short-changed, though if the figures are large enough, there may be some scope for planning.

33.4.5 *Premiums paid out of unremitted income/gains of remittance basis taxpayer*

The RDR Manual provides:

> **33540 - Remittance Basis: Identifying Remittances: Specific Topics: Chargeable Event gains** [June 2010]
> ...Under a special rule (ITTOIA05/s507) policyholders are able to make partial surrenders or assignments of broadly up to 5% of accumulated premiums with any tax charge postponed until maturity or other later realisation. This is known as the '5% deferral rule' or the 'excess rule'. When the policy comes to an end any earlier withdrawals are taken into account in calculating the end gain.
> However when considering the position of a remittance basis user you will need to consider what income or gains they used to pay the premium due under the contract or policy. Where an individual purchases an overseas life insurance, or other income-generating, policy and subsequently part of that policy is surrendered for a cash payment and that money is brought to the UK, such payments will be treated as taxable remittances to the extent that the purchase of the original premium was made with the individual's untaxed foreign income and gains that would have been taxed on the remittance basis if remitted to the UK.
> So if the premium was paid using the individual's foreign income or foreign gains that were untaxed when they arose, because the individual was a remittance basis user in that year, then any of the 5% withdrawal will be a taxable remittance if the money is brought to, or received or used in, the UK. The amount attributable to the '5% withdrawal'

> indirectly derives from the original premium paid, so Conditions A and B of s809L apply.

For mixed fund issues where a policy is bought out of foreign income/gains, see 13.3.4 (Finding the income and capital for the year).

33.4.6 *Gains arising to non-resident individual*

The charge only applies "if the individual is UK resident for the tax year in which the gain arises": s.465(1) ITTOIA.

33.4.7 *Gains arising in split year*

Section 465(1A) ITTOIA provides the usual split year rule:

> But if the tax year is a split year as respects the individual, the individual is not liable for tax under this Chapter in respect of gains arising in the overseas part of that year (subject to section 465B).[20]

33.5 Non-resident period relief

There is a relief for the individual who is UK resident in the year that the gain arises (so they are within the charge) but who has formerly been non-resident. I refer to this as "**non-resident period relief**".

The development of the current law can be traced from a Consultation document Life Insurance - Time Apportioned Reductions (August 2012).[21]

EN FB 2013 provides:

> Clause 24 introduces Schedule 8 which amends the rules for time apportioned reductions from gains made on life insurance policies for periods when the policyholder is resident outside the UK. Current rules only provide for time apportioned reductions where a life insurance policy has been issued by a foreign insurer. Time apportioned reductions will be extended to life insurance policies issued by UK insurers. Time apportioned reductions will be calculated by reference to the residence history of the person liable to income tax on the gains and not by reference to the residence history of the legal owner of the policy.

The position, with transitional relief and provision for temporary non-residents, has become very complicated. I hope to address this in the next

---

20 The words in brackets refer to the TNR rules: see 9.19 (Gains from policies and contracts).

21 *http://customs.hmrc.gov.uk/channelsPortalWebApp/downloadFile?contentID=HMCE_PROD1_032250*

edition.

33.6 Liability of UK trust

If the creator of the trust is alive and UK resident, they will be taxed on the gain.[22] Section 467 ITTOIA provides for the situations where the creator is not taxable:

> (1) Trustees are liable for tax under this Chapter if immediately before the chargeable event in question occurs they are UK resident and condition A, B, C or D is met.

I refer to **"trust policy conditions A, B, C or D"**. It is considered that these conditions must be satisfied immediately before the event, ie "immediately before" governs the phrase"they are UK resident" and "condition A, B, C or D is met".

> (1A) If trustees are liable for tax under this Chapter, the gain is treated for income tax purposes as income of the trustees.

The rate of tax is in principle 45%.[23]

An appointment to UK resident beneficiaries before the chargeable event may reduce the rate of tax and an appointment to non-resident beneficiaries may avoid tax altogether.

A trust migration may be effective if done before the chargeable event; it is not necessary to wait until the following tax year.

33.6.1 *Trust policy condition A (charitable trust)*

Section 467 ITTOIA provides

> (2) Condition A is that the rights under the policy or contract are held by the trustees on charitable trusts.

33.6.2 *Trust policy condition B (absent settlor)*

Section 467 ITTOIA provides

> (3) Condition B is that—
>
> (a) those rights are held by the trustees on non-charitable trusts, and
>
> (b) one or more of the absent settlor conditions is met.
>
> (4) The absent settlor conditions are that the person who created the

---

22 See 33.4 (Liability of individuals and individual "creators").

23 Section 482 ITA type 7: see 25.2.3 (Other income taxed at top rates).

trusts—

(a) is non-UK resident,

(aa) is UK resident but the gain arises in the overseas part of a tax year that is, as respects the person who created the trusts, a split year,

(b) has died, or

(c) in the case of a company or foreign institution (see section 468(5)), has been dissolved or wound up or has otherwise come to an end.

33.6.3 *Trust policy conditions C and D*

Section 467 ITTOIA provides:

(5) Condition C is that—

(a) the rights under the policy or contract are held by the trustees on non-charitable trusts,

(b) condition B does not apply, and

(c) neither section 465 nor section 466 applies.

(6) Condition D is that the rights under the policy or contract are held as security for a debt owed by the trustees.

33.7 Non-resident trusts and companies

Non-resident trustees are outside the scope of the charge on a chargeable event because s.467 (which imposes the charge on trustees) applies only to UK resident trustees.

A non-resident company is outside the scope of the charge under ITTOIA (which does not apply to companies). It is outside the scope of the charges in CTA 2009 (which only apply to corporation tax).[24]

---

24 For completeness, ESC C33 provides:

"Non-UK resident companies and chargeable event gains on life insurance policies, life annuity contracts and capital redemption policies

1 A "gain" may be treated as arising in connection with a policy of life insurance, a life annuity contract or a capital redemption policy when a "chargeable event" occurs or is treated as occurring. Chapter 2 of Part 13 of ICTA defines "chargeable events" and sets out how a "gain" is calculated where the chargeable person is a company. It also contains the other provisions relating to chargeable events referred to below. A gain may also be treated as arising on a company in connection with a personal portfolio bond under the Personal Portfolio Bond (Tax) Regulations, SI 1999/1029 reg 5.

2 This concession is about the circumstances in which a gain may be treated as part of the total income of a company.

In the absence of express provision, the chargeable event gain would not fall within the ToA provisions because the receipt by the person abroad (assuming they are non-resident) is capital and not income or (more fundamentally) the chargeable event gain is not income.[25] However, s.468 ITTOIA deals with this. It is helpful to consider trusts and companies separately.

33.7.1 *Non-resident trust*

Section 468 ITTOIA provides:

> (1) This section applies if a gain is treated as arising under this Chapter and ...
>
> (a) trustees who are non-UK resident would be liable for tax in respect of the gain as a result of section 467 if the trustees were UK resident immediately before the chargeable event in question occurs, ...
>
> (2) Chapter 2 of Part 13 of ITA 2007 (which prevents avoidance of tax where a UK resident individual benefits from a transfer of assets) applies with the modifications specified in subsection (3) or (4).
>
> (3) In a case within subsection (1)(a), Chapter 2 of Part 13 of ITA 2007 applies as if—
>
> (a) the gain were income becoming payable to the trustees, and
>
> (b) that income arose to the trustees in the tax year in which the

---

These are when—
– a company is the beneficial owner of the rights conferred by a policy or contract;
– the rights are held on trusts created by an individual or a company; or
– the rights are held as security for a debt owed by a company.
3 The provisions that deem a gain to be part of the income of an individual or a company are not restricted to UK residents. Except as set out in para 4, however, HMRC will not pursue liability to tax on a gain that is treated as income of a company that is not resident in the UK at any time during the period for which the gain would otherwise have been charged.
4 A tax liability may arise if a policy or contract is held as property used by, or held by, a UK branch or agency of a company that is not resident in the UK.
5 Nothing in this concession affects—
– a gain that is treated as constituting income payable to non-resident trustees or to a company or other institution resident or domiciled outside the UK; and
– the tax treatment of a benefit that an individual ordinarily resident in the UK receives from the trustees, the company or other institution."

The concession is now redundant following the rewrite of the ICTA provisions and the rule is statutory rather than concessionary.

25 See 28.13 (Capital receipts deemed to be income).

gain arises. ...

This incorporates ss.720[26] and 731 ITA.

33.7.2 *Non-resident company or institution*

Section 468 ITTOIA provides (so far as relevant):

> (1) This section applies if a gain is treated as arising under this Chapter and ...
>
> (b) immediately before that event occurs—
>
> (i) a foreign institution[27] beneficially owns *a share* in the rights,
>
> (ii) the rights are held for the purposes of a foreign institution, or
>
> (iii) *a share* in them is held as security for a foreign institution's debt.
>
> (Emphasis added)

It is curious that (i) and (iii) refer to *shares* in rights. Contrast ss.465(2) and 467(2) ITTOIA.[28] On a traditional approach to statutory construction the (i) and (iii) do not apply if the foreign institution beneficially owns the *entire* policy. The gap is more or less filled by s.468(1)(b)(ii) as if a foreign company owns a policy, the rights are held for its purposes. If necessary a court might decide there was a slip in the drafting, which on a modern approach to construction could be corrected. Perhaps the drafting will be corrected some time.

Assuming s.468(1)(b) ITTOIA is satisfied, we read on:

> (2) Chapter 2 of Part 13 of ITA 2007 (which prevents avoidance of tax where a UK resident individual benefits from a transfer of assets) applies with the modifications specified in subsection (3) or (4). ...
>
> (4) In a case within subsection (1)(b), Chapter 2 of Part 13 of ITA 2007 applies as if—
>
> (a) the gain were income becoming payable to the institution, and

---

26 Section 720 ITA is not needed here because a transferor within s.720 would normally be taxed as the creator of the settlement, but the overlap does not matter. It is similar to the overlap of s.624 ITTOIA and s.720 ITA.

27 "Foreign" is defined in s.468(5) ITTOIA: "In this Chapter 'foreign institution' means a company or other institution resident or domiciled outside the UK." The word institution is not defined.

28 See 33.4 (Liability of individuals and individual "creators") and 33.6 (Liability of UK trust).

(b) that income arose to the institution in the tax year in which the gain arises.

Section 720 ITA is needed here, as the transferor would not otherwise be taxed on the gain. The extension of the scope of s.720 in 2005 caught those described in the 4th edition of this work as "bold enough to plan on the assumption that the current law will still apply when a policy is surrendered at some time in the future".

33.7.3 *Transferor's s.731 defence: Gains arising before 5 December 2005*

Suppose:

(1) gains arose before 5 December 2005 to a foreign company or trust within s.731; the transferor was not subject to tax on those gains as they arose;[29] and

(2) the *transferor* receives a benefit.

A transferor is outside the scope of s.731: see 30.10 (Transferor's s.731 defence). Under the pre-5 December 2005 law, I suggested that the transferor's s.731 defence would not apply when s.720 did not apply. Now that s.720 does apply, the transferor's defence should apply even to pre-5 December 2005 gains. This could be something of a windfall for transferors; but since unrealised gains were brought within the s.720 charge from 5 December 2005, HMRC can hardly complain that realised gains now fall within the transferor's defence.

33.7.4 *Section 720 and s.731 remittance bases*

The s.720 remittance basis does not apply to a chargeable event gain within s.720, because the gain does not meet the requirement that the income of the person abroad "would be relevant foreign income if it were the individual's".[30]

For the same reason, a benefit which relates to the gain does not qualify for the s.731 remittance basis.[31]

33.7.5 *Income arising to life company*

So far we have considered the taxation of chargeable event gains arising to non-resident trusts or companies which hold policies.

---

29 See the 4th edition of this book, para 20.5.

30 See 29.14 (Section 720 remittance basis).

31 See 30.35 (Section 731 remittance basis).

The payment to a non-resident life company (or a subsidiary of such a company) is in principle a transfer of assets within the ToA provisions. The ToA provisions would in principle apply if:
(1) income arising as a result of the payment can be identified (ie if the sum paid is segregated); and
(2) the motive defence does not apply.
In a straightforward case of the payment of a premium, the application of the motive defence is well established: *IRC v Willougby.*[32] If there were a tax avoidance purpose, however, the ToA provisions would in principle apply: the fact that a policy is taken out does not preclude the possibility of tax avoidance. As to whether this could lead to double taxation, see 31.8 (Life policies).

33.8 Section 624 and chargeable event gains

Section 624 ITTOIA never applies to a chargeable event gain. To see why, it is helpful to distinguish:
(1) UK resident settlor;
(2) non-UK resident settlor:
    (a) non-resident trustees;
    (b) UK resident trustees.

here the settlor is UK resident they are taxed on the gain under basic principles as a creator. Section 624 does not apply because the gain is not income of the trustees.

Where the settlor is non-resident and the trustees are non-resident, section 624 does not apply because the gain is not "income" and so it is not "income arising under a settlement".

Where the trustees are UK resident, but the settlor is not resident, the gain is deemed to be income of the trustees. In these circumstances the s.624 non-resident settlor defence will apply.[33]

33.9 Liability of personal representatives

Section 466 ITTOIA provides:

---

32 70 TC 57.

33 That is, the gain is such that if the settlor were actually entitled thereto, they would not be chargeable to income tax by reason of being non-resident: see 27.6 (Non-resident settlor).

(1) Personal representatives are liable for tax under this Chapter if
[a] the rights under the policy or contract are held by them and
[b] the condition in subsection (2) is met
(and accordingly the gain is treated for income tax purposes as income of the personal representatives in that capacity).
(2) The condition is that if an individual were liable for tax on a gain in respect of the policy or contract, section 530(1) (individual treated as having paid tax at the basic rate) would be disapplied as a result of—
(a) section 531(1) (exceptions from section 530 for policies and contracts specified in section 531(3)), or
(b) para 109(2) of Schedule 2 (contracts in accounting periods beginning before 1st January 1992).
(3) For cases where the condition in subsection (2) is not met, see section 664 of this Act and [section 947 of CTA 2009] (under which the gain is treated as part of the aggregate income of the estate for the purposes of Chapter 6 of Part 5 of this Act and [Chapter 3 of Part 10 of CTA 2009] respectively).

The condition in subsection (2)(b) is a transitional rule now of limited scope.

In order to understand the condition in subsection (2)(a) one needs to follow a trail of statutory provisions. First, ss.530 and 531 ITTOIA:

530 Income tax treated as paid etc.
(1) An individual or trustees who are liable for tax on an amount under this Chapter are treated as having paid income tax at the basic rate on that amount.
...

I refer to this as a "**s.530 tax credit**".

531 Exceptions to section 530
(1) Section 530 does not apply to gains from the kinds of policies and contracts specified in subsection (3), except for the purposes of calculating relief under section 535 (top slicing relief).
(2) Subsection (1) is subject to—
section 532 (relief for policies and contracts with European Economic Area insurers), and
section 534 (regulations providing for relief in other cases where foreign tax chargeable).
(3) The policies and contracts are—
(a) a policy of life insurance issued or a contract for a life annuity made by a friendly society in the course of tax exempt life or

endowment business[34],

(b) a foreign policy of life insurance that does not meet conditions A and B,

(ba) a contract the effecting or carrying out of which constitutes protection business within the meaning of section 62 of FA 2012,

(bb) a contract which is not within paragraph (ba) but which, as a result of subsection (4) of that section, is treated for the purposes of that section as being made at any time,

(c) a contract for a life annuity (other than one within para (a)) which has at any time not formed part of any insurance company's or friendly society's basic life assurance and general annuity business the income and gains of which are subject to corporation tax, and

(d) a foreign capital redemption policy.

If we focus on foreign life policies, the relevant provision is (3)(b). The question is whether the foreign policy does not meet conditions A and B (which I will call "**foreign policy conditions A and B**"). Section 531(5) provides:

> Condition A is that the policy falls within para (a) of the definition of "foreign policy of life insurance" in section 476(3) (policy issued by a non-UK resident company).

So we turn to s.476(3) ITTOIA:

> In this Chapter—
> "foreign policy of life insurance" means—
> (a) a policy of life insurance issued by a non-UK resident company, and
> (b) a policy of life insurance which forms part of the overseas life assurance business of an insurance company or friendly society ...

A foreign policy will typically fall within that definition, so it will meet the condition in s.476(3)(a). The meaning of "overseas life assurance business" can be found in s.431D(1) ICTA:

> **431D Meaning of "overseas life assurance business"**
> (1) In this Chapter "overseas life assurance business" means so much of

34 Terms defined in subsection (4); the definitions need not be considered here.

> a company's relevant life assurance business as is with a policy holder or annuitant not residing in the UK (but not including the reinsurance of such business).

I think we conclude that most foreign policies will satisfy foreign policy condition A. That takes us to foreign policy condition B:

> (6) Condition B is that the conditions in para 24(3) of Schedule 15 to ICTA (conditions that are required to be met for certain policies issued by non-UK resident companies to be qualifying policies) are met throughout the period between—
>
> (a) the date on which the policy was issued, and
>
> (b) the date on which the gain arises.

It is easy to become tangled in the double double negatives, but I think the chain of reasoning goes as follows:

(1) Foreign policies will not (usually) satisfy condition B.
(2) So they fall within s.531(3)(b) ("a foreign policy of life insurance that does not meet conditions A and B").
(3) So they do not qualify for a s.530 tax credit.
(4) So they do meet the condition in s.466(2).
(5) So that PRs are liable for the chargeable event gain.

This could be avoided by an assent to a beneficiary.

Section 466 ITTOIA is not expressed to be limited to UK resident PRs. However s.368 ITTOIA provides:

> (1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.
>
> (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK....
>
> (3) References in this section to income which is from a source in the UK include, in the case of any income which does not have a source, references to income which has a comparable connection to the UK.
>
> (4) This section is subject to any express or implied provision to the contrary in this Part (or elsewhere in the Income Tax Acts).

Thus non-resident PRs are not chargeable. ITTOIA EN confirms that this is intended:

> 421. Chapter 1 of Part 4 of this Act provides a general territorial limitation on the scope of the Part. As regards income arising outside the UK, it limits the charge to such income arising to a UK resident. See section 368 (territorial scope of Part 4 charges) and the related commentary on that Chapter. [Section 465 ITTOIA] overlaps and

supplements that Chapter to ensure that a non-UK resident individual is not liable to tax under this Chapter on any gains, whether arising in the UK or elsewhere.

33.10 Planning for immigrant to UK

33.10.1 *Immigrant policyholder who has become resident in the UK 7 May 2014*

The advisers of a foreign domiciled person who has recently come to the UK should check whether they or any trust they have created has a policy or contract. If so, the position needs to be reviewed.

An assignment of the policy or contract from an individual to a trust (resident or not) does not help, since the individual remains liable as creator.

One simple form of planning is to arrange there is no chargeable event in a year when the individual is UK resident. The part surrender of up to 5% of the premium paid for the policy or contract per year is not a chargeable event. The surrender, assignment for money or money's worth and maturity of the policy or contract is normally a chargeable event but this can be anticipated and perhaps postponed to a year when the individual is non-resident. A death giving rise to benefits under the policy is also a chargeable event unless the policy is a qualifying policy. In such a case the individual may be at risk as death while UK resident may give rise to a tax charge.

Another course is for the individual to surrender their policy shortly after becoming UK resident; most of the gain will qualify for non-resident period relief.[35]

If a chargeable event is anticipated, the policy or contract could be assigned to a non-resident company, perhaps held by a trust. An assignment for no consideration is not a chargeable event. But the transfer of asset rules will need consideration.

33.10.2 *Planning before becoming UK resident*

There are further possibilities if the individual acts before the tax year in which they become UK resident. One possibility is to surrender the policy. A part surrender may also be a possible option.

---

35 See 33.5 (Non-resident period relief).

33.11 Personal portfolio bonds

Urgent action needs to be taken if a UK resident individual (or trust created by them) holds a "personal portfolio bond" as defined in s.516 ITTOIA. The definition of "personal portfolio bond" requires a chapter to itself; it falls too far from the themes of this book to be pursued here.

33.12 CGT exemption for policies

Sections 204 and 210 TCGA provide exemptions for policies and contracts. In outline, policies are exempt unless assigned for consideration (known as secondhand policies).

33.13 DT relief on chargeable event gains

Suppose an individual who is UK resident and treaty-resident in a foreign state disposes of a policy so that chargeable event gains arise directly to them. The position is similar to OIGs: see 35.24 (DT relief on offshore income gain). It is an interesting question whether the individual claims relief under Art.13 or Art.21. At first sight chargeable event gains are "gains" which arise from the alienation of property, even though not chargeable gains and even though subject to income tax rather than CGT. But the gains are also "income" if that word is given its UK tax meaning. Of course it does not normally matter which of the articles apply, if the treaty has both. But if a particular treaty has an equivalent of art.21 (other income) but no capital gains article, then it is considered that treaty relief is still in principle available.

If a chargeable event gain arises without an alienation, relief is not available under Art.13 but may be available under Art 21.

33.14 IHT on policy held by foreign domiciliary

The IHT Manual provides:

> **30039 - Policies effected by a person who dies domiciled outside the UK** [January 2008]
> Under the proviso to the [Revenue Act][36] 1884 s.11 as amended by the [Revenue Act] 1889 s.19 a grant of representation (IHTM05001) in the UK is not necessary in order to recover money payable under a policy of life assurance effected with any insurance company by a person who

36 The Manual wrongly refers to the Customs & Inland Revenue Acts.

dies domiciled[37] outside the UK. For the purposes of this section, any policy under which a sum of money becomes payable on a death may be treated as a policy of life assurance, and any association of persons which issued policies in the ordinary course of its business, whether incorporated or not, may be treated as an insurance company.

These provisions do **not** confer any exemption from IHT. Where policy moneys are situate in the UK, tax is nonetheless payable though the moneys may be receivable without the production of a UK grant of representation.

The insurance company can however be liable for the tax where

[1] it retains policy moneys for the benefit of the beneficiary for investment purposes, outside the terms of the life assurance contract, in which case IHTA s.200(1)(c) may apply to the company as a vestee, or

[2] it received prior notice that the policy in question is subject to a statutory charge for tax under s.237 IHTA.[38]

Where there is other estate in the UK in respect of which a UK grant is necessary, but the UK representatives are only administrators acting under a power of attorney and in point of fact have not intermeddled with the policy moneys and, without knowledge of the claim for tax in respect of such moneys, have parted with the assets collected by them to their principal (the foreign executor), the claim in respect of the policy moneys should not be pursued against the UK administrators.

Similar conditions apply in Scotland to a Factor or Attorney authorised by executors abroad to give up an Inventory (in such cases it is the executors who are confirmed, not the Factor or Attorney).

Refer to TG [Technical Group] for consideration

- all enquiries on this topic
- any case where it is apparent that policy moneys have been paid out without a grant being produced.

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

The withheld text may well state that IHT in many cases is uncollectable and set out the circumstances in which no attempt should be made to collect it. In practice a well advised foreign domiciliary (not IHT deemed domiciled) will not acquire or retain a UK situate policy. However a person who is deemed UK domiciled may find this useful, as the executors

37 The IHT deemed domicile rule does not apply for this purpose.

38 In practice it is unlikely that either [1] or [2] will be the case.

can fund IHT more easily if they can first recover the money due under the policy and then pay the IHT and obtain a grant.

CHAPTER THIRTY FOUR

OFFSHORE FUNDS: DEFINITIONS

34.1 Offshore funds: Introduction

Before December 2009 I wrote that this subject needed a long book to itself. That is no longer the case: several volumes would now be needed to cover the subject properly.

I formerly added that it would be an unrewarding work because the rules are not well observed in practice. However this is true of many of the areas touched on by the FA 2008, so offshore funds are not now so different.

The background to the current law can be traced through a series of consultation papers in 2007/8[1] but these are now mainly of historic interest.

This chapter considers the definition of offshore fund and associated expressions. The following chapters consider the taxation of offshore funds.

The definitions discussed in this chapter were introduced by the FA 2009, which introduced s.40A - 40E FA 2008,[2] where they survived for one year before being rewritten into TIOPA.

The tax legislation is in the Offshore Funds (Tax) Regulations ("OFTR"). The OFTR naturally referred to the then current provisions in the FA 2008. Rewrite Acts did not update statutory references in secondary legislation so those references will remain indefinitely in the regulations. The obsolete references take effect as references to the corresponding new

---

1 Offshore funds: a discussion paper (October 2007); Offshore funds: next steps (March 2008); Offshore funds: further steps (December 2008).

2 The FA 2009 sensibly jettisoned the reform in the FA 2007, which was thoroughly botched. The 2007 definition (discussed at 23.3 of the 7th edition of this work) is still relevant for transitional relief.

provisions[3] but readers need to work out for themselves what those are (I insert them in brackets). The Offshore Funds Manual is similarly out of date though eventually its references might be updated.

While the drafting in the FA 2008 was not beyond criticism, the reader may well question whether this rewrite was worthwhile, and be grateful that the rewrite project has come to an end; but there it is.

34.2 Meaning of "participant"

Section 362 TIOPA provides a commonsense definition:

> (1) In this Part references to "participant", in relation to arrangements (or a fund), are to a person taking part in the arrangements (or the arrangements constituting the fund), whether by becoming the owner of, or of any part of, the property that is the subject of the arrangements or otherwise.
> (2) In this Part references (however expressed) to participation, in relation to arrangements (or a fund), are to be read in accordance with subsection (1).

This definition only applies for the purposes of Part 8 TIOPA so it needs to be incorporated by reference when the same term is used elsewhere.

34.3 Meaning of "offshore fund"

34.3.1 *Basic definition*

Section 355(1) TIOPA provides:

> In section 354 "offshore fund" means—

---

3 Para 5(1) Sch 9 TIOPA provides:
"Any reference (express or implied) in any enactment, instrument or document to a superseded enactment in its application for relevant tax purposes is to be read, so far as is required for those relevant tax purposes, as including, in relation to times, circumstances or purposes in relation to which any corresponding rewritten provision has effect, a reference to the rewritten provision."
Para 9(1) Sch 9 TIOPA provides: "In this Part—
"enactment" includes subordinate legislation (within the meaning of the Interpretation Act 1978),
"relevant tax purposes" means, in relation to a superseded enactment, tax purposes for which the enactment has been rewritten by this Act, and
"superseded enactment" means an earlier enactment which has been rewritten by this Act for certain tax purposes (whether it applied only for those purposes or for those and other tax purposes)."

(a) a mutual fund constituted by a body corporate resident outside the UK,
(b) a mutual fund under which property is held on trust for the participants where the trustees of the property are not resident in the UK, or
(c) a mutual fund constituted by other arrangements that create rights in the nature of co-ownership[4] where the arrangements take effect by virtue of the law of a territory outside the UK.

This definition only applies for the purposes of s.354, so it needs to be incorporated when the expression "offshore fund" is used elsewhere.[5]

In this work:

(1) **"a corporate fund"** means an offshore fund within (a) - a company.
(2) **"a non-corporate fund"** means an offshore fund within (b) or (c) - a unit trust or co-ownership arrangement.

34.3.2 *Residence of EU funds*

For completeness: Section 363A TIOPA provides a special residence rule for the benefit of EU offshore funds (in short, deeming such funds to be non-UK resident and thus disapplying the usual residence tests.) EN FB 2011 provides:

> The UCITS IV directive provides that an investment fund authorised under the provisions of Article 5 of that directive may have a manager which is not resident in the same State as that in which the fund is established and regulated.
> 6. [Section 363A] ensures that the affected offshore funds and their investors will not be subject to any tax consequences in the UK as a result of having a UK resident management company.

For the residence of trustees of a unit trust, see 39.3.2 (Residence of trustees of unit trust).

---

4 Section 355(3) TIOPA provides:
"In this section ... "co-ownership" is not restricted to the meaning of that term in the law of any part of the UK."

5 So reg.3(1) OFTR provides:
"In these Regulations "offshore fund" has the meaning given by section 40A(2) of FA 2008 [now s.355(1) TIOPA] (read with the provisions of the relevant group of sections)."
The definition is similarly incorporated in s.378A(7) ITTOIA.

34.3.3 *Partnerships*

A general or limited partnership might fall within limb (c) of the definition but s.355(2) TIOPA takes it out:

> Subsection (1)(c) does not include a mutual fund constituted by two or more persons carrying on a trade or business in partnership.

It is assumed that a general or limited partnership does not fall within limb (b) of the definition.

A LLP might fall within limb (a) of the definition but s.355(3) TIOPA takes it out:

> In this section—
> "body corporate" does not include a limited liability partnership.[6]

Partnerships are excluded because partnership income and gains accrue to the partners: there is no scope or need for offshore fund rules.

34.3.4 *Luxembourg Fonds Commun de Placement*

Offshore Funds Manual 04400 [January 2012] provides:

> Types of mutual funds that come within the definition of an offshore fund at s.355(1)(c) TIOPA 2010 would include, for example, contractual arrangements such as Luxembourg Fonds Commun de Placement ...

On this topic see 39.7 (Luxembourg Fonds Commun de Placement).

34.3.5 *Power to vary definition*

The drafter (perhaps as a result of the lack of success of the earlier statutory definitions) did not have much confidence in the present statutory definition, and conferred wide powers to vary the rules by statutory instrument. These powers have not yet been exercised.

34.4 "Mutual fund"

The key term is "mutual fund". Section 356(1) TIOPA provides:

> (1) In section 355 "mutual fund" means arrangements with respect to property of any description (including money) that meet conditions A, B and C.

---

6 This is otiose but it does not matter.

(2) Subsection (1) is subject—
(a) to the exceptions made by or under sections 357 and 359, and
(b) to sections 360 and 361.

I refer to "**mutual fund conditions A to C**".

34.4.1 *Mutual fund condition A: Mutuality*

Section 356(3) TIOPA provides:

> Condition A is that the purpose or effect of the arrangements is to enable the participants—
> (a) to participate in the acquisition, holding, management or disposal of the property, or
> (b) to receive profits or income arising from the acquisition, holding, management or disposal of the property or sums paid out of such profits or income.

The intention, broadly, is that mutual funds should have the characteristics of pooled investments.

34.4.2 *Mutual fund condition B: Day-to-day management*

Section 356 TIOPA provides:

> (4) Condition B is that the participants do not have day-to-day control of the management of the property.
> (5) For the purposes of condition B a participant does not have day-to-day control of the management of property by virtue of having a right to be consulted or to give directions.

34.4.3 *Mutual fund condition C: Realisation at NAV*

Section 356(6) TIOPA provides:

> Condition C is that, under the terms of the arrangements, a reasonable investor participating in the arrangements would expect to be able to realise all or part of an investment in the arrangements on a basis calculated entirely, or almost entirely, by reference to—
> (a) the net asset value of the property that is the subject of the arrangements, or
> (b) an index of any description.

Offshore Funds Manual provides:

> **OFM05600 - Meaning of mutual fund: conditions: condition 'C': meaning of realisation of investment by reference to NAV or an index - S356(6) TIOPA 2010** [January 2012]

There is no definition within the legislation of 'almost entirely' as any sort of percentage limit of variation from NAV could be susceptible to arrangements seeking to avoid the intention of the offshore funds rules. It depends on what the arrangements are intended to provide. For example, buy-back arrangements normally take effect when there is a large discount to NAV, but may also be used in very exceptional circumstances to buy back at a very small discount or at NAV which, on its own, may not mean that the arrangements constitute a mutual fund. OFM10500 provides further guidance on share buy-backs and share issuance.

Realisation of investment on a basis calculated at or close to NAV

It is not necessary that the investor obtains NAV directly from the fund. Where a reasonable investor could expect to receive NAV on selling their interest on a secondary market the fund will be an offshore fund if all other conditions are satisfied. For example, Exchange Traded Funds (ETFs) are usually operated in such a way that the quoted prices are at NAV or very close to NAV because market makers are able to create or redeem units (and in that sense such funds are open-ended), and so ETFs would be expected to qualify as mutual funds. On the other hand, arrangements where a fund offered to buy back shares to keep a discount on the share price within a reasonable limit would not make the fund a mutual fund unless it was clear to a reasonable investor at the time that they invested (or on alteration of the terms of an investment) that there were such arrangements and that they were intended to ensure that such purchases were at NAV or almost or very close to NAV.

Where an investment is designed to produce a return for investors that equates in substance to a return on capital invested at interest none of the possible exceptions will apply (S357 (4)(c) TIOPA 2010) - see OFM06300.

Shares trading close to NAV

The mere fact that shares in a closed-ended arrangement sometimes trade at or close to NAV does not mean that Condition C is satisfied unless that is as a result of arrangements being in place such that a reasonable investor could expect to receive NAV or close to NAV on selling their interest.

Warrants and options

Warrants or options that give an investor the right to sell shares back to an issuer for a particular price will not cause Condition C to be satisfied unless the price is determined by reference to NAV so that the investment can be realised at or close to NAV. Similarly, rights that carry the option to convert to other classes of interest would only satisfy Condition C if the new rights themselves permitted an investor to realise their investment at or close to NAV.

Realisation of investment by reference an index

In some cases an investor may have a right to redeem an investment at an amount not representing the assets directly invested in, but which is expressed in terms of an index. The fund manager may then invest the assets so as to produce a return as nearly as possible matching the index which is offered. In such a case Condition C will also be met. Again, this is subject to exceptions where conditions 'E' or 'F' apply.

Offshore Funds Manual provides:

OFM04200 - Meaning of an offshore fund: Corporate entities - S355(1)(a) TIOPA 2010 [January 2012]

It is expected that relatively few fixed share capital companies will fall within the new definition. So, for example, an investment in a trading or investment company or group with fixed share capital and that was not limited life (even if local law provides for continuation votes) would not come within the definition. But under the characteristics based approach, entities that have fixed share capital and that are structured in such a way that they share characteristics of open-ended share capital arrangements will be within the definition. So, fixed share capital companies that are predicated on the basis that investors will get a net asset value return or a return which is very close to net asset value may fall within the new definition. That will also be the case where there are no redemption rights but the arrangements have a limited life and a reasonable investor could expect to get a net asset value return on winding up (unless one of the exceptions in S357 TIOPA 2010 applies).

34.5 Winding-up exemption

There are some exceptions to mutual fund condition C.

Section 357(1) TIOPA provides:

> Arrangements are not a mutual fund for the purposes of section 355 if—
> (a) condition D is met, and
> (b) condition E or F is met.

I refer to **"winding-up conditions D to F"** to avoid confusion with the other conditions.

Offshore Funds Manual provides:

OFM05600 - Meaning of mutual fund: conditions: condition 'C': meaning of realisation of investment by reference to NAV or an index - S356(6) TIOPA 2010 [January 2012]

... Open-ended and closed-ended arrangements

Condition C, when read in conjunction with section S357(2) TIOPA 2010 provides a clear distinction between a mutual fund and a company organised in the way that, for example, an investment trust company in the UK is organised. Such a company is a closed-ended company, in the sense that it does not allow investors to redeem their shares on request, nor does it issue new shares on request (but see OFM10600 onwards where such closed-ended companies have a limited life). This contrasts with an open-ended investment company which is designed to enable investors to realise NAV and does so through its ability to issue or redeem shares.

A reasonable investor in what may generally be regarded as a closed-ended company that meets Conditions A or B would normally only expect to be able to realise NAV on the liquidation of the company. So section S357(2) excludes from section S356 ('meaning of 'mutual fund' etc') any case where a reasonable investor would only be able to realise the investment in the arrangements in the

event of a winding-up, dissolution or termination of the arrangements, and where certain other conditions (condition 'E' or 'F') apply (section S357(1)(b) - see OFM06000 onwards).

Offshore Fund Manual provides:

OFM06100 - Exceptions to meaning of mutual fund: introduction - Section 357(3) TIOPA 2010 [January 2012]

...Section 357(2) has the effect that 'open-ended' arrangements (i.e. those that enable investors to realise NAV by disposing of their interest) cannot come within the exceptions provided by S357.

The conditions E or F do, however, except certain types of closed-ended arrangements from the meaning of a 'mutual fund'.

The exceptions can also apply to arrangements where a reasonable investor could expect to realise their investment at or close to NAV as a result of the intention of a fund to dispose of its assets in tranches followed by a final distribution of any remaining assets, as opposed to a liquidation of all of the fund's assets on a winding-up (see OFM05700).

34.5.1 *Winding-up condition D (no liquidation date)*

Section 357 TIOPA provides:

(2) Condition D is that, under the terms of the arrangements, a reasonable investor participating in the arrangements would expect to be able to realise all or part of an investment in the arrangements on a basis mentioned in section 356(6) only in the event of the winding up, dissolution or termination of the arrangements.....

(8) For the purposes of this section the fact that arrangements provide for a vote or other action that may lead to the winding up, dissolution or termination of the arrangements does not, by itself, mean that the arrangements are designed to wind up, dissolve or terminate on a date stated in or determinable under the arrangements.

Offshore Funds Manual provides:

OFM06200 - Exceptions to meaning of mutual fund: condition E - Section 357(3) TIOPA 2010 [January 2012]

The most important exception, provided by condition E (section 357(3)), is that a reasonable investor cannot expect the arrangements to terminate on or by a date fixed in advance.

This condition means, for example, that ordinary shares in any company with defined share capital (that is, not an open-ended company with variable share capital) and which does not have a limited life, will not be an offshore fund.

Condition E requires that the arrangements are not such that they are designed to terminate on a date that is stated or determinable under the arrangements. As elsewhere "arrangements" has a wide meaning and is not limited to the documents establishing the fund, so can include all agreements and

understandings. Similarly, "determinable" has a wide meaning. So for example, if a fund prospectus stated that the fund was intended to wind-up after it had realised all of its assets, but those assets consisted of debt instruments none of which was longer dated than 5 years then the termination date would be determinable (unless, of course, it was clear that the fund would reinvest the proceeds of asset realisations and was not 'limited life' in any other regard).

Asset realisations

It will not be sufficient to satisfy condition E for a fund to state that an intention to dispose of its assets on or by a certain date is subject to market conditions or some similar caveat where it is clear that a long-stop date exists, or there is no specific and realistic possibility that would lead a reasonable investor to conclude that the fund would not necessarily be able to dispose of its assets by the date stated. For example, if a fund's assets consist of short-dated debt instruments, or commercial leases with a life of 20 years then, unless the fund was reasonably likely to re-invest funds from disposals, condition E could not be satisfied. Where there is no such long-stop date implicit from the nature of the assets themselves then condition E may still not be satisfied if a fund stated an intention to dispose of its assets in, say, four years' time 'subject to market conditions' or some other broad statement.

HMRC will consider particular cases where a fund manager or its advisers believe that there are tangible and specific reasons why such a statement should lead to condition X being satisfied but this is expected to apply in exceptional circumstances only. An example of the circumstances when a broad statement relating to whether assets could be realised on or by a given date may be sufficient to satisfy condition X would be if a fund held significant assets in a country about which there were real and significant concerns regarding any future government's policy in respect of the assets in question (such as public declarations of an intention to nationalise particular industries or companies in which the fund holds significant investments).

Continuation votes

Where arrangements provide for a continuation vote or similar action to determine whether they will persist beyond a given date that will not, in itself, mean that condition E is not met. So, if a reasonable investor, considering all of the facts, could not have any expectation that a continuation vote would fail then, provided the continuation vote was not for a determinable period and absent any other factors, the arrangements could not be said to have a determinable life and condition E could then be satisfied. HMRC accept that it could usually be expected that condition E would be satisfied where continuation votes are provided for because continuation resolutions may well be passed if a fund is performing well, and a reasonable investor would be expected to invest on the basis that a fund would be successful. However, if arrangements or understandings are in place so that it could be expected that a continuation vote would not be passed then there would be a determinable date. Even if a date of termination is stated or determinable, so that condition E could not be satisfied, it is still necessary to consider Condition F to determine if the arrangements amount to a 'mutual fund' - see OFM06300 to OFM06600.

34.5.2 *Winding-up condition E (no fixed termination date)*

Section 357(3) TIOPA provides:

> Condition E is that the arrangements are not designed to wind up, dissolve or terminate on a date stated in or determinable under the arrangements.

34.5.3 *Winding-up condition F (no income)*

Section 357(4) TIOPA provides:

> Condition F is that—
> (a) the arrangements are designed to wind up, dissolve or terminate on a date stated in or determinable under the arrangements,
> (b) subsection (5), (6) or (7) applies, and
> (c) the arrangements are not designed to produce a return for participants that equates, in substance, to the return on an investment of money at interest.

34.5.4 *Subsection (5): No income-producing assets*

Section 357(5) TIOPA provides:

> This subsection applies if none of the assets that are the subject of the arrangements is a relevant income-producing asset (see section 358).

Section 358 TIOPA provides the definition:

> (1) This section has effect for the purposes of section 357.
> (2) An asset is a relevant income-producing asset if it produces income on which, if it were held directly by an individual resident in the UK, the individual would be charged to income tax (but see subsections (3) and (4)).
> (3) An asset is not a relevant income-producing asset if the asset is hedged, provided that no income is expected to arise from—
> (a) the asset (taking account of the hedging), or
> (b) any product of the hedging arrangements.
> (4) Cash awaiting investment is not a relevant income-producing asset, provided that the cash, and any income that it produces while awaiting investment, is invested as soon as reasonably practicable in assets that are not relevant income-producing assets (as defined by this section).

This is designed to exclude funds which invest in assets intended to give a purely capital growth based return.

Offshore Funds Manual provides:

OFM05600 - Meaning of mutual fund: conditions: condition 'C': meaning of realisation of investment by reference to NAV or an index - S356(6) TIOPA 2010 [January 2012]

Realisation of investment by reference an index

...In many cases investments designed to produce an indexed return are likely to be non-income producing (that is, they reflect capital growth only) in which case the exception provided by S357(5) - condition F - will apply (see OFM06200 onwards).

Where an investment is by reference to an index that reflects both capital growth and income returns then S357(5) would not apply, but condition F may still apply due to S357(7) - see OFM06600.

34.5.5 *Subsection (6): No entitlement to income*

Section 357(6) TIOPA provides:

> This subsection applies if, under the terms of the arrangements, the participants in the arrangements are not entitled to the income from the assets that are the subject of the arrangements or any benefit arising from such income.

Offshore Funds Manual provides:

OFM06500 - Exceptions to meaning of mutual fund: condition F: no entitlement to income or any benefit arising from income - Section 357(6) TIOPA 2010 [January 2012]

An example of an arrangement satisfying this condition might be the capital shares or units in an arrangement which splits the rights to capital and income between the holders of different classes of interest, where the holders of capital shares or units are not entitled to any of the income or any benefit arising from the income.

34.5.6 *Subsection (7): Income distributed*

Section 357(7) TIOPA provides:

> This subsection applies if—
>
> (a) under the terms of the arrangements, after deductions for reasonable expenses, any income produced by the assets that are the subject of the arrangements is required to be paid or credited to the participants, and
>
> (b) a participant who is an individual resident in the UK would be charged to income tax on the amounts paid or credited.

34.6 Share buy-backs and share issuance

Offshore Funds Manual provides:

OFM10500 - Particular arrangements: share buy-backs and share issuance
[January 2012]
The price or value of shares in fixed share capital companies may reflect either a discount or a premium to the net asset value of the underlying assets. It may also be the case in some circumstances that there is either directors' or investors' discretion to allow or require the buy-back of shares if there is a discount of a certain level between the net asset value of the arrangements and the share price. Provided the share buy-back arrangements are made to prevent the discount becoming too large by reference to net asset value, and provided a reasonable investor cannot expect to realise their investment either entirely or almost entirely by reference to net asset value (or by reference to an index), and there is no determinable termination date, then such arrangements will be outside the definition of an offshore fund for UK tax purposes (as Condition C at TIOPA2010/S356 will not be satisfied). Similar considerations apply where the shares trade at a premium.
For example, if a foreign equivalent of an investment trust was trading at a discount of 15% to NAV and bought its own shares on the open market to reduce the discount then, absent any factors that could lead to an investor being able to expect to redeem their investment at or close to NAV, this would not cause Condition C at TIOPA2010/S356(6) to be satisfied: it is clear that before the company commenced to buy its own shares that some investors would not have been able to redeem their interest at NAV and that any subsequent reduction in the discount would be due to normal operation of the market. Without any factors indicating that the company would act to reduce the discount either having been in place prior to this market activity or at some point in the future, a reasonable investor could not expect to realise their investment at or close to NAV.
However, share buy-back arrangements that are specifically designed to provide tracking to net asset value will cause the company or share class to come within the definition of offshore fund. This would include any arrangements introduced as a result of changes to the constitution of a scheme. If a change in the terms of a scheme result in it coming within the definition of an offshore fund then UK investors are treated as if they had always held an interest in an offshore fund. If the fund becomes a reporting fund then investors may be able to make an election under regulation 48(2) to crystallise any offshore income gain at that point, with any subsequent gain being subject to chargeable gains treatment (provided the fund remains a reporting fund). See OFM15200 and OFM19000 for further guidance.
When considering an investor's rights, account should be taken of all scheme documents, promotional documentation or communications to determine what guarantees or undertakings may have been given to the investor.
An undertaking or guarantee, etc, to buy back or redeem only a part of an investor's holding entirely or almost entirely by reference to the net asset value of the property or an index of any description can still constitute an expectation, so for example if the fund manager undertook to redeem or buy back an investor's shares in tranches the arrangements could still be within the definition.

Warrants or options that give an investor the right to sell shares back to an issuer for a particular price will not cause Condition C to be satisfied unless the price is determined by reference to NAV so that the investment can be realised at or close to NAV. Similarly, rights that carry the option to convert to other classes of interest would only satisfy Condition C if the new rights themselves permitted an investor to realise their investment at or close to NAV.

34.7 Companies in course of liquidation

Offshore Funds Manual provides:

OFM10630 Particular arrangements: limited life companies: company liquidations [January 2012]

An investor may have invested in a company or other arrangement which subsequently goes into liquidation, at which point the investor might reasonably expect to realise their investment at net asset value. However, if a company or other arrangement is outside the definition of an offshore fund before it goes into liquidation, then being in liquidation will not by itself bring that company or arrangement into the definition of an offshore fund. This also applies in the case of self-managed wind downs with the subsequent appointment of a liquidator to complete the liquidation.

This treatment would also extend to the purchase of shares in a company after it has entered a self-managed wind down or liquidation. This may not be the case, though, for wind downs and liquidations that are intentionally extended or contrived.

Some overseas companies can be liquidated or reconstructed at any time. If there is a decision to do so, at the point of the approval of the reconstruction or liquidation the investors may obtain net asset value. However, the relevant point is whether a reasonable investor can expect the company to be liquidated or reconstructed in order to deliver net asset value. It is necessary to consider the reasonable investor's expectation to realise their investment either entirely or almost entirely by reference to net asset value (or by reference to an index) when the company was established (or when there was a change in the investor's rights).

34.8 Umbrella arrangements

34.8.1 *Meaning of "umbrella arrangements"*

Section 363 TIOPA provides:

(1) In this Part "umbrella arrangements" means arrangements which provide for separate pooling of the contributions of the participants and the profits or income out of which payments are made to them.

(2) In this Part references to a part of umbrella arrangements are to the arrangements relating to a separate pool.

34.8.2 *Treatment of "umbrella arrangements"*

Section 360 TIOPA provides:

> (1) This section has effect for the purposes of this Part.
> (2) In the case of umbrella arrangements (see section 363)—
> (a) each part of the umbrella arrangements is to be treated as separate arrangements, and
> (b) the umbrella arrangements are to be disregarded.
> (3) Subsection (2)(a) is subject to section 361.

Regulation 5 OFTR provides:

> In these Regulations, in relation to an offshore fund constituted by a part of umbrella arrangements (within the meaning of section 40C of FA 2008)—
> (a) a reference to the assets of an offshore fund is to such of the assets of the umbrella arrangements as under the arrangements form part of the separate pool to which that part of the umbrella arrangements relates;
> (b) a reference to the income of an offshore fund is to the income arising from those assets; and
> (c) a reference to a participant in an offshore fund is to a person for the time being owning an interest in that separate pool.

Offshore Funds Manual provides:

> **OFM08000 - Definition of an offshore fund: umbrella funds & protected cell companies - Section 363 TIOPA 2010** [January 2012]
> 'Umbrella arrangements' means arrangements which provide for separate pooling of the contributions of investors and the profits or income out of which payments are made to them (S363(1) TIOPA2010). References to part of an umbrella arrangement are to the arrangements relating to a separate pool (or 'sub-fund'). Umbrella arrangements will not themselves be treated as an offshore fund. Instead -
> - Each sub-fund and each class of interest is treated as an offshore fund in its own right,
> - The umbrella fund is not treated as an offshore fund,
> - The overall arrangements are disregarded.
>
> The same approach applies to an individual cell of a protected cell company.
> For umbrella arrangements and protected cell companies, it would usually follow that each sub-fund has the same residence status as the overall arrangement. In the case of a non-resident company it would be expected that each sub-fund would also be non-resident if it was under the "central management and control" of the directors of the company which constitutes the overall arrangement. In the case of a unit trust scheme, the trustees of the overall trust arrangements will usually also be the trustees of each separate arrangement, and so their residence

status determines the residence of the fund, but where there are different trustees for each sub-fund then each must be considered separately. The "central management and control" test is also applicable to unit trusts.

34.9 Arrangements comprising more than one class of interest

Section 361 TIOPA provides:

(1) This section has effect for the purposes of this Part.
(2) Where there is more than one class of interest in arrangements (the "main arrangements")—
(a) the arrangements relating to each class of interest are to be treated as separate arrangements, and
(b) the main arrangements are to be disregarded.
(3) In relation to umbrella arrangements, "class of interest" does not include a part of the umbrella arrangements (but there may be more than one class of interest in a part of umbrella arrangements).

Regulation 6 OFTR provides:

In these Regulations, in relation to an offshore fund constituted by a class of interest in the main arrangements (within the meaning of section 40D of FA 2008)—
(a) a reference to the assets of an offshore fund is to the assets of the main arrangements;
(b) a reference to the income of an offshore fund is to such of the income of the main fund as is attributable to interests of that class under the arrangements constituting the main arrangements; and
(c) a reference to a participant in an offshore fund is to a person for the time being owning an interest of that class.

Offshore Funds Manual provides

OFM09000 - Definition of an offshore fund: classes of interest - Section 361 TIOPA 2010 [January 2012]
"Class of interest" is not limited to share classes. There may be other forms of interest which entitle an investor to realise their investment on a basis calculated entirely or almost entirely by reference to the net asset value of the scheme property or an index. For example, certain types of loan may give a return which tracks NAV or is based on an index. A class of interest may also be created as a result of new issues or conversions of existing rights.
It is possible for an entity, particularly a company, to have a class of interest such as ordinary shares which does not constitute a mutual fund and another class of interest which does constitute such a mutual fund.
However, a particular class of shares can only constitute a single class of interest even if different types of holders of those shares enjoy different rights. For

example, in the case of an exchange traded fund, the creation unit holders who act as market makers might have the right to redeem or issue shares directly but if that same class of shares were acquired by another investor on the secondary market then they would still form part of the same class of interest and satisfy Condition C (s356 TIOPA 2010) because, as a consequence of the market makers' ability to redeem or create units, all other investors would expect to be able dispose of their interest at or close to NAV. (See also OFM10200 regarding exchange traded funds).

34.10 "Reporting" and "non-reporting" funds

Regulation 4 OFTR provides:

> (1) Offshore funds consist of—
>
> (a) non-reporting funds (see Part 2 of these Regulations), and
>
> (b) reporting funds (see Part 3 of these Regulations).
>
> (2) In a period of account, an offshore fund is a non-reporting fund unless it is a fund to which Part 3 of these Regulations applies...

Regulation 50 OFTR provides:

> In these Regulations a "reporting fund" means an offshore fund to which this Part applies for a period of account.

The requirements to qualify as a reporting fund are not discussed here. HMRC provide a list of reporting funds.[7] This list is quite short. Presumably fund managers do not generally think it is worth the trouble.

CHAPTER THIRTY FIVE

OFFSHORE INCOME GAINS

35.1 Taxation of offshore funds: Introduction

The next two chapters consider the taxation of offshore funds. This chapter considers offshore income gains arising on the disposal of an offshore fund (it is assumed that the relevant conditions are met, in short, that the fund is a non-reporting fund). The next chapter considers income from offshore funds.

The tax legislation is mainly in the Offshore Funds (Tax) Regulations 2009 ("OFTR"). It is unfortunate that this important matter was left to regulations, since the drafting and opportunity for consideration are of lower quality, but there it is. The ink of the regulations had hardly dried before they were amended, first in 2009, with a more substantial rounds of amendments in 2011 and 2013.

The OFTR's obsolete references to the FA 2008 take effect as references to the legislation now in TIOPA.[1]

I do not consider in full the position of offshore funds held by UK resident companies.

35.1.1 *Cross references*

For OIGs of temporary non-residents, see 9.20 (Offshore funds).

For OIGs of charities, see Kessler & Marre, *Taxation of Charities & Non-profit Organisations* (9th ed., 2013), para 3.16 (Offshore Funds) (online version *http://www.taxationofcharities.co.uk*).

35.2 Definitions

See 34.2 (Meaning of "participant"); 34.3 (Meaning of "offshore fund"); 34.4 ("Mutual fund").

---

1 See 34.1 (Offshore funds – Introduction).

35.2.1 *Meaning of "interest in an offshore fund"*

Regulation 8(1) OFTR provides a commonsense definition:

> For the purposes of these Regulations the interest of a participant in an offshore fund is the investment held by a participant taking part in arrangements (or arrangements constituting a fund) to which the relevant group of sections applies.

35.3 Charge to tax on OIGs

The legislation distinguishes:

(1) Offshore income gains ("**OIGs**"), which arise on a disposal of a non-reporting offshore fund and fall within the offshore funds rules.

(2) Chargeable gains, within the scope of CGT. I refer to this for clarity as "**CGT chargeable gains**" though strictly the term "chargeable gains" is only applicable to CGT. The HMRC Manuals sometimes use the term "capital gains" which is slightly inapt, but reasonably clear.

Regulation 17(1) OFTR provides the charge to tax:

> There is a charge to tax if—
>
> (a) a person disposes of an asset,
>
> (b) either condition A or condition B is met, and
>
> (c) as a result of the disposal, an offshore income gain arises to the person making the disposal.

I refer to **"non-reporting fund conditions A and B"**.

This provision refers to a "person" so it applies to individuals, trustees, companies and PRs.

35.3.1 *Non-reporting fund condition A*

Regulation 17(2) OFTR provides:

> Condition A is that the asset is an interest in a non-reporting fund at the time of the disposal.

35.3.2 *Non-reporting fund condition B*

Condition B concerns funds changing from non-reporting to reporting fund status. Regulation 17(3) OFTR provides:

> Condition B is that—
>
> (a) the asset is an interest in a reporting fund at the time of the disposal,

(b) the reporting fund was previously a non-reporting fund (becoming a reporting fund as the result of an application under regulation 52),
(c) the interest was an interest in a non-reporting fund during some or all of the material period,[2]
(d) an election under regulation 48 was not prevented by paragraph (5) of that regulation, and
(e) no election has been made under regulation 48(2).

35.3.3 *Treatment of OIGs*

Regulation 18(1) OFTR provides:

> The offshore income gain arising is treated for all the purposes of the Tax Acts as income which arises at the time of the disposal to the person making the disposal (or treated as making the disposal).[3]

An OIG is not income for trust law purposes, for instance proceeds of sale of an offshore fund represent an OIG but are not payable to a life tenant.

> (2) The tax is charged on the person making the disposal (or treated as making the disposal).
> (3) In the case of a person chargeable to income tax, tax is charged under Chapter 8 of Part 5 of ITTOIA 2005 (miscellaneous income: income not otherwise charged) for the year of assessment in which the disposal is made ...

This incorporates s.687(1) ITTOIA:

> Income tax is charged under this Chapter on income from any source that is not charged to income tax under or as a result of any other provision

---

2 Defined regulation 17(4) OFTR:
"For the purposes of paragraph (3)(c) the "material period" means a period beginning with the day on which consideration was given for the acquisition of the asset or on 1st January 1984 (whichever is the later) and ending with the day on which the fund became a reporting fund."

3 In accordance with the principles of plain English drafting, reg.18(5) (somewhat unnecessarily) flags up some cross references:
"Paragraph (1) is subject to—
(a) regulation 19 (income treated as arising under regulation 17: remittance basis);
(b) regulation 20(1) (offshore income gain arising to non-resident trustees not treated as income of settlor);
(c) regulation 20(5) (application to gains of non-resident settlements);
(d) regulation 24(6) (application of section 13 of TCGA 1992)."

of this Act or any other Act.[4]

This is the charge on miscellaneous income (in pre-ITTOIA terminology, schedule D case VI).

Regulation 18(3) continues:

> but sections 688(1) and 689 of ITTOIA 2005 (income charged and person liable) do not apply.

The disapplied sections provide (so far as relevant here):

> ***688 Income charged***
> *(1) Tax is charged under this Chapter on the amount of the income arising in the tax year.*
> *(2) Subsection (1) is subject to ...*
> *(c) Part 8 (foreign income: special rules).*
> ***689 Person liable***
> *The person liable for any tax charged under this Chapter is the person receiving or entitled to the income.*

At first sight this is worrying since the disapplied sections (among other things) incorporate the remittance basis for miscellaneous income. However these sections are only disapplied because regulations 18(2) and 19 OFTR cover the same area.

35.4 Meaning of "disposal"

It will be recalled that there is a charge to tax if a person disposes of an offshore fund. "Disposal" is defined in chapter 4 part 2 OFTR. Regulation 32 provides:

> This Chapter applies if a participant disposes of an asset and at the time of the disposal—
> (a) the asset is an interest in a non-reporting fund, or
> (b) the asset is an interest in a reporting fund and the requirements specified in paragraph (3) of regulation 17 (read, as appropriate, with paragraphs (4) and (5) of that regulation) are met.

I cannot see the point of this, as if a participant disposes of an asset which is not within (a) or (b) then there is no charge under the OFTR and the

---

4 Similarly for CT, reg.18(4) OFTR provides:
"In the case of a person chargeable to corporation tax, tax is charged under Chapter 8 of Part 10 of CTA 2009 (miscellaneous income: income not otherwise charged) for the accounting period in which the disposal is made."

question of whether there is a disposal for the purposes of the OFTR does not arise. I would be grateful to any reader who could explain. However that may be, reg.32 does no harm.

We can move on to reg.33(1) which defines disposal:

> There is a disposal of an asset for the purposes of these Regulations if there would be a disposal of an asset for the purposes of TCGA 1992.

It is considered that this incorporates the CGT rules on the timing of disposals, as well as the CGT definition of disposal.

OFTR contains four rules where the position differs from the CGT rules.[5] Regulations 35-37 relate to reorganisations and are not discussed here. Regulation 34 concerns the position on death.

35.5 Death of individual

For CGT purposes, there is no disposal on death. Section 62(1) TCGA provides:

> For the purposes of this Act the assets of which a deceased person was competent to dispose—
>
> (a) shall be deemed to be acquired on his death by the personal representatives or other person on whom they devolve for a consideration equal to their market value at the date of the death, but
>
> (b) shall not be deemed to be disposed of by him on his death (whether or not they were the subject of a testamentary disposition).

Regulation 34(1) OFTR undoes this and provides for a deemed disposal on death:

> Notwithstanding anything in paragraph (b) of subsection (1) of section 62 of TCGA 1992 (general provisions applicable on death: no deemed disposal by the deceased), where a person dies and the assets of which the deceased was competent to dispose[6] at the time of death include an interest in a non-reporting fund, then, for the purposes of these Regulations—

---

5 Flagged by reg.32(2) OFTR.

6 Regulation 34(2) defines this expression by reference:

"... the reference in that paragraph to the assets of which a deceased person was competent to dispose are to be construed in accordance with [s.62(10) TCGA]."

Section 62(10) provides a commonsense definition; see 78.4 (Acquisition by PRs).

> (a) immediately before the acquisition referred to in paragraph (a) of that subsection, that interest shall be deemed to be disposed of by the deceased for such a consideration as is mentioned in that subsection; ...

For completeness, reg.34(1) concludes:

> but (b) nothing in this regulation affects the determination, in accordance with regulation 32, of the question whether that deemed disposal is one to which this Chapter applies.

I cannot see the point of that, just as I cannot see the point of regulation 32, but it does no harm.

Regulation 34(2) incorporates other rules of s.62 TCGA:

> (2) Subject to paragraph (1), section 62 of TCGA 1992 applies for the purposes of these Regulations as it applies for the purposes of that Act...,

The following provisions of s.62 therefore apply for OIGs; I set out the section highlighting the amendments that the context requires when applying the section to OIGs:

> [(2) and (2A) deal with losses and are not relevant to OIGs.]
> (3) In relation to property forming part of the estate of a deceased person the personal representatives shall for the purposes of this Act be treated as being a single and continuing body of persons (distinct from the persons who may from time to time be the personal representatives), and that body shall be treated as having the deceased's residence and domicile at the date of death.
> (4) On a person acquiring any asset as legatee (as defined in section 64)—
> (a) no ~~chargeable~~ offshore income gain shall accrue to the personal representatives, and
> (b) the legatee shall be treated as if the personal representatives' acquisition of the asset had been his acquisition of it.
> (5) Notwithstanding section 17(1) no ~~chargeable~~ offshore income gain shall accrue to any person on his making a disposal by way of donatio mortis causa.
> [Subsections (6) to (9) deal with IoVs and need not be set out here.]

The OF Manual correctly provides:

> **OFM14200 Investors in non-reporting funds: disposals of interests: death of participant – regulation 34** [January 2012]
> ...An offshore income gain arises and resulting tax becomes payable

> before the estate of the deceased person is valued for inheritance tax purposes.

There is scope for deathbed planning: a lifetime gift to charity or to a spouse avoids the OIG charge on death, because no OIG arises on the disposal (applying CGT rules which brings into effect the CGT spouse exemption and the CGT charity exemption). By contrast if there is a gift by will to charity or to a spouse the OIG comes into charge on the death.

It seems that a gift by way of donatio mortis causa also avoids the charge on death.

35.6 OIG accruing to partnership

Partnerships are transparent for IT and CGT, and this rule applies to OIGs. SAI Manual provides:

> **6370 Offshore income gains: The tax charge** [November 2011]
> Where an offshore income gain is realised by a partnership, each partner should be separately assessed in respect of his share of the ... income.

35.7 OIG remittance basis

Regulation 19 OFTR provides:

> (1) This regulation applies to income treated as arising under regulation 17 to an individual in a tax year if—
>
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
>
> (b) the individual is not domiciled in the UK in that year.
>
> (2) The income is treated as relevant foreign income of the individual.

The significance of treating the income as RFI is that the income can qualify for the remittance basis. I refer to this as "**the OIG remittance basis**".

The remittance basis applies even if the offshore fund is a UK situate asset (the CGT situs rules are not relevant) but in practice that is not likely to happen.

So long as the gain is not remitted, the foreign domiciled individual will not care if the gain is a chargeable gain or an OIG, ie they will not care whether or not the asset disposed of is an offshore fund.

Regulation 19(3) contains two rules:

> For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis)—

(a) any consideration obtained on the disposal of the asset[7] is treated as deriving from the income

At first sight it is not clear why reg.19(3)(a) is needed. It seems self-evident. There is no equivalent in the CGT charge on gains accruing to individuals. But a reason will emerge.[8]

Regulation 19(3) continues:

> For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis) ...
>
> (b) unless the consideration so obtained is of an amount equal to or exceeding the market value of the asset, the asset is treated as deriving from the income.

Regulation 19(3)(b) is the equivalent of the CGT rule for deemed gains.[9]

35.8 OIG arising to UK trust

35.8.1 *UK resident trust (not settlor-interested)*

A UK resident trust is in principle subject to income tax on its OIGs.[10] Tax is charged at the trust rate, 45%: it falls within s.482 type 3, see 25.2.3 (Other trust income taxed at top rates).

35.8.2 *UK resident settlor-interested trust*

An OIG arising to UK trustees is not "income" in the general sense and in the absence of express provision it would not fall within s.624 ITTOIA which only applies to income. However reg.18 OFTR directs that the OIG is "treated for all the purposes of the Tax Acts as income" so it does fall within s.624 ITTOIA.

If the settlor is a remittance basis taxpayer the s.624 remittance basis applies, ie an unremitted OIG is not taxed on the settlor but on the trustees.[11]

---

7 Reg 19(4) provides two somewhat unnecessary definitions:
"In paragraph (3)—
(a) "the asset" means the asset the disposal of which causes the income to be treated as arising, and
(b) "the disposal" means the disposal mentioned in sub-paragraph (a) of that paragraph."

8 See 35.13.6 (OIG s.87 TCGA remittance basis).

9 See 11.30 (CGT disposal not for market value).

10 See 35.3 (Charge to tax on OIGs).

11 See 27.4 (Section 624 remittance basis).

The rate of tax in the absence of s.624 is the trust rate (2013/14 = 45%), so s.624 can only reduce the tax rate (or make no difference).

35.9 OIG non-residence defence

Regulation 22(1) OFTR provides a territorial limitation for non-residents:

> The following enactments have effect in relation to income tax or corporation tax in respect of offshore income gains as they have effect in relation to capital gains tax or corporation tax in respect of chargeable gains—
>
> (a) section 2(1) of TCGA 1992 (persons chargeable to capital gains tax) ...

Amended as reg. 22(1) directs, s.2(1) TCGA provides (so far as relevant):

> ... a person shall be chargeable to *income tax* in respect of *offshore income gains* accruing to him in a year of assessment if the residence condition is met.

This incorporates the CGT territorial limitations by reference.[12] By implication, a person not resident is not chargeable to IT on offshore

---

12 See 49.1.2 (CGT residence condition). For completeness: Regulation 22 OFTR also incorporates s.10 TCGA which would apply if a non-resident carried on a trade through a branch or agency and used the offshore funds for the purposes of the trade. This gives a neat symmetry with the CGT rules but it is hard to imagine that this will ever apply in practice. The regulation provides:

"(1) The following enactments have effect in relation to income tax or corporation tax in respect of offshore income gains as they have effect in relation to capital gains tax or corporation tax in respect of chargeable gains—

(a) section 2(1) of TCGA 1992 (persons chargeable to capital gains tax) ...

(b) section 10 of TCGA 1992 (non-resident with a UK branch or agency);

(c) section 10B of TCGA 1992 (non-resident company with UK permanent establishment).

(2) Paragraph (1) is subject to paragraphs (3) and (4).

(3) In the application of section 10 of TCGA 1992 in accordance with paragraph (1), paragraphs (a) and (b) of subsection (1) (assets on the disposal of which chargeable gains are taxable) have effect with the omission of the words "situated in the UK and".

(4) In the application of section 10B of TCGA 1992 in accordance with paragraph (1), paragraphs (a) and (b) of subsection (1) (assets on the disposal of which chargeable profits arise for the purposes of corporation tax) have effect with the omission of the words "situated in the UK and"."

Section 1015 ITA could also restrict the territorial scope of the OIG charge, but the rules discussed here leave it no room to operate.

income gains. I refer to this rule as "**the OIG non-residence defence**".

35.10 OIG arising to non-resident trust

Where an OIG arises to a non-resident trust, the trustees are not subject to tax on the gain because of the OIG non-residence defence.

35.10.1 *Non-resident settlor-interested trust*

An OIG arising to a non-resident settlor-interested trust is not within s.624 ITTOIA, unlike a UK resident trust. Regulation 20(1) OFTR provides:

> If an offshore income gain arises to a settlement in a tax year and the trustees of the settlement are not resident in the UK in the tax year, the gain is not regarded as income for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor).

The consequence is that a settlor (if liable under s.720) does not have an indemnity against the trust for the tax. One wonders if this has been thought through.

The whole of chapter 5 is disapplied, so where a capital payment is made to a minor child of the settlor, the settlor is not taxable under s.629 ITTOIA (instead the child would be taxable at the appropriate rate. This could lead to a significant saving).

35.11 Outline of OIG anti-avoidance provisions

The rule that non-resident trusts and companies are not subject to tax on OIGs presents an obvious means of tax avoidance. HMRC might have applied either the income tax ToA provisions or the CGT anti-avoidance provisions to deal with this. In fact they have applied both:

(1) The ToA provisions apply: reg.21
(2) The CGT anti-avoidance provisions apply (with some amendments):
    (a) Regulation 20 applies s.87 TCGA.
    (b) Regulation 24 applies s.13 TCGA.

Further rules are needed to deal with the many possible ways in which the anti-avoidance provisions may interact:

(1) Interactions between these IT and CGT anti-avoidance provisions potentially applying to the same OIG; and
(2) Interactions between:
    (a) the applicable anti-avoidance provision relating to an OIG and
    (b) s.731 or CGT s.87 TCGA (where a beneficiary receives a benefit and there is also relevant income or a CGT s.2(2) amount).

35.11.1 *Commentary*

The result of applying two sets of overlapping anti-avoidance provisions is so complicated that no-one could expect the rules which I seek to explain below to be applied in practice, except by the largest trusts with a large budget for UK professional advice. It also introduces a full set of anomalies and scope for tax planning.

Although it was the case before 2008 that both the ToA and the CGT anti-avoidance provisions applied, the 2008 reforms made both sets of provisions very much more complicated, so that the dual application presents much more complexity than before.

The drafting of the OIG provisions was even more rushed than the rest of the 2008 legislation, leaving no time even for HMRC to properly consider the issues, let alone for consultation. There was an opportunity to rethink in the 2009 regulations, but HMRC had no desire to take it up. It seems to me that there can be no more devastating criticism of the rules than an attempt to explain them. The reader who labours through this chapter is likely to agree that the law ought to be simplified by applying either the income tax or the CGT anti-avoidance rules – CGT would be the better of the two, as OIGs are more like capital gains – but not both.

35.12 OIG ToA provisions

An OIG arising to a non-resident is not "income" so in the absence of express provision it would not fall within the ToA provisions even if it arose to a person abroad within s.720 or s.731. Regulation 21(1) OFTR deals with this and thus applies the ToA provisions to OIGs:

> Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person.

It is helpful to distinguish the ordinary transfer of asset rules and the rules as they apply to OIGs. I use the following terminology:

(1) **"OIG s.720"**: the provisions of s.720 ITA which apply when:
   (a) a person abroad receives OIGs, treated as income within the scope of s.720, and
   (b) the transferor is deemed to receive income (**"OIG s.720 income"**).

(2) **"OIG s.731"**: the provisions of s.731 ITA which apply when:
   (a) a person abroad receives OIGs, treated as relevant income within

the scope of s.731, and

(b) a non-transferor is deemed to receive income **("OIG s.731 income")**.

Regulation 21(2) OFTR provides:

> Income treated as arising under that Chapter by virtue of paragraph (1) is regarded as "foreign" for the purposes of section 726, 730 or 735 of that Act.

This feeds into s.726 and 735 ITA which impose a remittance basis for OIG s.720 income and OIG s.731 income. The motive and EU law defences may also apply.

There are only limited differences between the way that sections 720 and 731 work for OIGs and for ordinary income.

35.13 OIG s.87 TCGA charge

An OIG is not a chargeable gain, and so not a s.2(2) amount (trust gain), so in the absence of express provision it would not give rise to a charge under s.87 TCGA. Regulation 20(3) OFTR deals with this and applies the s.87 rules with modifications. Because there are modifications, there are significant differences between OIG s.87 TCGA and CGT s.87 TCGA.

35.13.1 *OIG s.87 TCGA charge*

Regulation 20(3) OFTR incorporates the s.87 TCGA rules in this manner:

> Sections 12,[13] 87 to 90A and 96 to 98 of, and Schedule 4C to, TCGA 1992 apply in relation to OIG amounts as if—
>
> (a) references to section 2(2) amounts (except those in paragraph 7B(2)(b) and (4) of Schedule 4C) were to OIG amounts,
>
> (b) references to chargeable gains (except the one in paragraph 1(5) of Schedule 4C) were to offshore income gains,
>
> (c) references to anything accruing were to it arising[14] (and similar references, except the one in paragraph 1(5) of Schedule 4C, were read accordingly),

---

13 The reference to s.12 TCGA in regulation 20(3) makes no sense, and must be a drafting error. However no great harm is done by the error. What matters is the incorporation of s.87 ff TCGA.

14 The terminology of the Taxes Acts is that CGT chargeable gains *accrue;* but OIGs *arise.* There is no difference in meaning so it seems slightly pedantic to make the change of terminology when incorporating the CGT s.87 TCGA provisions for OIGs; but it does no harm.

(d) sections 87(4), 88(2) to (5) and 97(6) and paragraphs 1(3A), 3 to 7 and 12 of Schedule 4C were omitted, and
(e) regulation 21 did not apply.

In this section I consider the application of s.87-98 TCGA to OIGs.

I do not set out all of s.87-98 TCGA, as amended, because the text would be too long for the exercise to be useful. The key provision is s.87(2)(3) TCGA which (amended as reg.20(3) directs) provides:

[2][a] *Offshore income gains* are treated as *arising* in the relevant tax year to a beneficiary of the settlement
[b] who has received a capital payment from the trustees in the relevant tax year or any earlier tax year
[c] if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the *OIG amount* for the relevant tax year or any earlier tax year.
(3) The amount of *offshore income gains* treated as *arising* is equal to—
(a) the amount of the capital payment, or
(b) if only part of the capital payment is matched, the amount of that part.

It is necessary to distinguish CGT s.87 TCGA and OIG s.87 TCGA because the rules are not identical. I use the following terminology:

(1) "**CGT s.87 TCGA**", the provisions of s.87 TCGA which apply when:
(a) a trust has a "**CGT s.2(2) amount**" (trust gains) and
(b) a beneficiary is deemed to receive a CGT chargeable gain ("**the s.87 CGT gain"**).
(2) "**OIG s.87 TCGA**", the provisions of s.87 as amended, which apply when:
(a) a trust has "**OIG amounts**"; and
(b) a beneficiary is deemed to receive an OIG ("**the s.87 OIG"**).

For a discussion of CGT s.87 TCGA, see 51.1 (Gains of Non-resident Trusts: section 87). I concentrate here on points where OIG s.87 TCGA is different from CGT s.87 TCGA. But note one area where the two rules are the same. If a trust with OIG amounts makes a capital payment to a non-resident beneficiary, a s.87 OIG is treated as accruing to the beneficiary under OIG s.87 TCGA(2). But no income tax charge arises since the beneficiary qualifies for the OIG non-residence defence.[15] Thus capital payments to non-resident beneficiaries reduce (or "wash") OIG

15 See 35.9 (OIG non-residence defence).

amounts, as they do for CGT s.2(2) amounts.

35.13.2 *"OIG amount"*

Regulation 20(2) OFTR defines the term "OIG amount":

> If—
>
> (a) offshore income gains arise to the trustees of a settlement in a tax year, and
>
> (b) section 87 of TCGA 1992 (gains of non-resident settlements) applies to the settlement for that year,
>
> the OIG amount for the settlement for that year is the amount of the offshore income gains.

"OIG amount" is the OIG equivalent of the CGT concept "s.2(2) amount" (formerly called trust gains).

The definition is not identically worded.[16] It is necessary to have a different definition, since the definition of s.2(2) amounts (trust gains) caters for losses, and for CGT chargeable gains within s.86 TCGA; the definition of OIG amounts does not do this because there is no relief for OIG losses and s.86 does not apply to OIGs.

One (I expect, unintended) consequence of the difference in drafting is that there is no double taxation relief where the OIGs are subject to a foreign capital gains tax.[17]

The drafter has correctly provided in reg. 20(3)(d) OFTR that s.87(4) TCGA does not apply for OIG s.87 TCGA, because it has no role in that context.

35.13.3 *"Capital payment"*

"Capital payment" is defined in s.97(1) TCGA. The OFTR does not amend this. It provides:

---

16 Section 87 TCGA provides:

> "(4) The section 2(2) amount for a settlement for a tax year for which this section applies to the settlement is—
>
> (a) the amount upon which the trustees of the settlement would be chargeable to tax under section 2(2) for that year if they were resident in the UK in that year, or
>
> (b) if section 86 applies to the settlement for that year, the amount mentioned in para (a) minus the total amount of chargeable gains treated under that section as accruing in that year.
>
> (5) The section 2(2) amount for a settlement for a tax year for which this section does not apply to the settlement is nil."

17 See 59.12 (DT reliefs: s.87 TCGA).

> In sections 86A to 96 and Schedule 4C and this section "capital payment"—
> (a) means
> [i] any payment which is not chargeable to income tax on the recipient
> [ii] or, in the case of a recipient who is not resident in the UK, any payment received otherwise than as income...

Suppose a trust within OIG s.87 TCGA makes a capital payment (or what appears to be a capital payment) to a UK resident beneficiary. The definition does not actually work for OIG s.87 TCGA, since what would otherwise be a capital payment falling within OIG s.87 TCGA *is* chargeable to IT under OIG s.87 TCGA! But for the purposes of OIG s.87 TCGA the definition must be taken to read that "capital payment" means:

> [i] any payment which is not chargeable to income tax on the recipient *[apart from OIG s.87 TCGA]*
> [ii] or, in the case of a recipient who is not resident in the UK, any payment received otherwise than as income...

I refer to a capital payment which is subject to income tax under OIG s.87 TCGA as an **"OIG capital payment"**.

35.13.4 *Deemed disposal*

If OIG s.87 TCGA applies, a beneficiary receives a s.87 OIG. OIG s.87 TCGA does not directly impose a charge on the s.87 OIG: the deeming feeds into reg.17 which imposes the charge when an OIG arises to the person making the disposal of an offshore fund.[18] A further deeming is needed, because the beneficiary who receives the s.87 OIG does not make a disposal. Therefore reg.20(5) OFTR provides for a deemed disposal, to bring the s.87 OIG into charge under reg.17:

> If this regulation applies, the person to whom the offshore income gain arises is treated as the person making the disposal.

(The same rule applies for OIG s.13.)

35.13.5 *OIG s.87 TCGA: Miscellaneous points*

The deemed disposal rules of Schedule 4B TCGA do not apply to OIGs,[19]

---

18 See 35.3 (Charge to tax on OIGs).

19 See 52.12.1 (Chargeable asset).

but the harsh provisions of Schedule 4C TCGA may apply.

The interest supplement rule in s.91 TCGA applies only to CGT s.87 TCGA and not to OIG s.87 TCGA.

A capital payment from a trust with OIG amounts does not give rise to an IHT exit charge as the exit charge income exemption applies.[20]

I deal with the 2008 transitional rules elsewhere because they are best considered together with the CGT s.87 TCGA transitional rules.[21]

For sch 4C, see 52.27 (OIG sch 4C).

35.13.6 *OIG s.87 TCGA Remittance basis*

If a remittance basis taxpayer receives a s.87 OIG, s.87B TCGA applies to bring in a remittance basis just like the CGT s.87 TCGA remittance basis.

Reg.19(5) OFTR provides:

> This regulation does not apply for the purposes of regulation 20.

That disapplies the ordinary OIG remittance basis.[22] That is needed because the OIG s.87B remittance basis applies instead.

35.13.7 *HMRC views*

HMRC agree with the above. The OF Manual provides:

> **OFM09315 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: section 87 (and 87A) TCGA attribution rules: effect of residence and domicile status of beneficiary** [January 2012]
>
> **... Beneficiary is UK resident but non-UK domiciled**
>
> Where attributions are made to a beneficiary who is UK resident or ordinarily resident but non-UK domiciled then, under section 87 (and 87A) TCGA rules, the full amount attributed may not be chargeable to income tax for the following reasons
>
> - Such an individual will not be chargeable to income tax on offshore income gains attributed to them to the extent that in the matching process
>   - a capital payment received before 6 April 2008 is matched, or
>   - an OIG amount for the tax year 2007-08, or earlier, is matched

---

20 See 30.12.5 (Interaction with IHT exit charge income exemption).

21 See 51.21.1 (Pre-2008 OIG amounts); 51.24 (Pre-2008 inter-trust transfer); 51.31 (Rebasing - OIG amounts).

22 See 35.7 (OIG remittance basis).

(paragraph 100 Schedule 7 FA 2008).

- If the trustees have made a "rebasing" election under paragraph 126 Schedule 7 FA 2008 then such an individual will not be chargeable on the pre-6 April 2008 element of the offshore income gain attributed to them (paragraph 101 Schedule 7 FA 2008).
- If such an individual is a remittance basis user they can have the benefit of the remittance basis via the rules in section 87B TCGA.

The full amount of the offshore income gain attributed to the individual reduces the OIG amount of the non-resident settlement structure that is available to match with future capital payments. That is so even though less than the full amount may be chargeable to income tax on the individual.

Beneficiary is non-UK resident

Offshore income gains can still be attributed to a beneficiary who is not resident or ordinarily resident in the UK using the section 87 TCGA attribution rules. This applies even though they may not be chargeable to tax on such an individual. Any such attribution reduces the OIG amount of the non-resident settlement structure that is available to match with future capital payments.

35.14 OIG s.13 charge

An OIG is not a chargeable gain, so in the absence of express provision it would not fall within s.13 TCGA. Regulation 24(1) OFTR deals with this and applies s.13 TCGA to OIGs with modifications:

> (1) Section 13 of TCGA 1992 (chargeable gains accruing to certain non-resident companies) applies for the purposes of this Part with the following modifications.
> (2) The section applies as if—
> (a) for any reference to a chargeable gain there were substituted a reference to an offshore income gain; and
> (b) for any reference to anything accruing there were substituted a reference to it arising[23] (with similar references being read accordingly).
> (3) The section applies as if, in subsection (5), paragraphs (b) and (c) were omitted.
> (4) The section applies as if, in subsection (7), for the reference to

23 The terminology of the Taxes Acts is that CGT chargeable gains *accrue;* but OIGs *arise.* There is no difference in meaning so it seems slightly pedantic to make the change of terminology when incorporating the CGT s.13 provisions for OIGs; but it does no harm.

capital gains tax there were substituted a reference to income tax or corporation tax.

(5) The section applies as if subsection (8) were omitted. ...

I refer to this as **"the OIG s.13 charge"**. It is necessary to distinguish the CGT s.13 rules and the OIG s.13 rules because the rules (though similar) are not identical. I refer below to:

(1) "**CGT s.13**", the provisions of s.13 TCGA which apply when:
   (a) a non-resident close company receives CGT chargeable gains, and
   (b) a participator is deemed to receive the gain ("**the s.13 CGT gain"**).

(2) "**OIG s.13**", the provisions of s.13 as amended, which apply when:
   (a) a non-resident close company receives OIGs, and
   (b) a participator is deemed to receive the OIGs ("**the s.13 OIG"**.)

Amended as reg.24 directs, s.13 TCGA provides:

Attribution of [OIGs] to members of non-resident companies

(1) This section applies as respects *offshore income gains arising* to a company—

(a) which is not resident in the UK, and

(b) which would be a close company if it were resident in the UK.

(1A) [Interaction with ATET-CGT; not relevant here]

(2) Subject to this section, every person who at the time when the *offshore income gain arises* to the company is resident in the UK, and who is a participator in the company, shall be treated for the purposes of this Act as if a part of the *offshore income gain* had *arisen* to him.

(3) That part shall be equal to the proportion of the gain that corresponds to the extent of the participator's interest as a participator in the company.

(3A) Subsection (2) does not apply in the case of a participator who is an individual if—

(a) the tax year in which the *offshore income gain arises* to the company is a split year as respects the participator, and

(b) the *offshore income gain arises* to the company in the overseas part of that year.

(4) Subsection (2) above shall not apply in the case of any participator in the company to which the *offshore income gain arises* where the aggregate amount falling under that subsection to be apportioned to him and to persons connected with him does not exceed one quarter of the gain.

(5) This section shall not apply in relation to—

~~(b) *an offshore income gain* accruing on the disposal of an asset used,~~

~~and used only—~~

~~(i) for the purposes of a trade carried on by the company wholly outside the UK, or~~

~~(ii) for the purposes of the part carried on outside the UK of a trade carried on by the company partly within and partly outside the UK, or~~

(ca) *an offshore income gain arising* on the disposal of an asset used, and used only, for the purposes of economically significant activities carried on by the company wholly or mainly outside the United Kingdom, or

(cb) *an offshore income gain arising* to the company on a disposal of an asset where it is shown that neither—

(i) the disposal of the asset by the company, nor

(ii) the acquisition or holding of the asset by the company,

formed part of a scheme or arrangements of which the main purpose, or one of the main purposes, was avoidance of liability to capital gains tax or corporation tax, or

(d) to *an offshore income gain* in respect of which the company is chargeable to tax by virtue of section 10B.

[*Subsections 5A to 7A relate to company distribution relief and company disposal relief and need not be set out here.*]

~~(8) So far as it would go to reduce or extinguish chargeable gains accruing by virtue of this section to a person in a year of assessment this section shall apply in relation to a loss accruing to the company on the disposal of an asset in that year of assessment as it would apply if a gain instead of a loss had accrued to the company on the disposal, but shall only so apply in relation to that person; and subject to the preceding provisions of this subsection this section shall not apply in relation to a loss accruing to the company.~~

(9) If a person who is a participator in the company at the time when the *offshore income gain arises* to the company is itself a company which is not resident in the UK but which would be a close company if it were resident in the UK, an amount equal to the amount apportioned under subsection (3) above out of the *offshore income gain* to the participating company's interest as a participator in the company to which the gain *arises* shall be further apportioned among the participators in the participating company according to the extent of their respective interests as participators, and subsection (2) above shall apply to them accordingly in relation to the amounts further apportioned, and so on through any number of companies.

(10) The persons treated by this section as if a part of an *offshore income gain arising* to a company had *arisen* to them shall include the trustees of a settlement who are participators in the company, or in any

> company amongst the participators in which the gain is apportioned under subsection (9) above, if when the gain *arises* to the company the trustees are not resident in the UK.
> (10B) [*This relates to pension schemes and need not be set out here*]
> (11) [*This confers relief where tax is paid by the non-resident close company and need not be set out here]*
> (11A) For the purposes of this section the amount of the gain or loss[24] *arising* at any time to a company that is not resident in the UK shall be computed (where it is not the case) as if that company were within the charge to corporation tax on *offshore income gains*.
> [*Section 13(12) to (14) contain definition and administrative provisions which need not be set out here*]

For a full discussion of CGT s.13, see 53.1 (Gains of Non-resident companies). I concentrate here on areas where OIG s.13 is different from CGT s.13.

The most important difference is that a s.13 CGT gain is subject to CGT at CGT rates; a s.13 OIG is subject to IT at IT rates.

The deletions in s.13(5)(8) make sense as those CGT rules would not be appropriate for OIG s.13.

DT relief may apply where a UK resident trustee holds a treaty non-resident company to which an OIG applies: s.79B TCGA disapplies the relief for CGT[25] but not for OIG.

Offshore group relief does not apply to OIG s.13 because reg.24 does not incorporate s.14 TCGA.

35.14.1 *Deemed disposal*

If OIG s.13 applies, a participator receives a s.13 OIG. OIG s.13 does not directly impose a charge on the s.13 OIG: the deeming feeds into reg.17 which imposes the charge when an OIG arises to the person making the disposal of an offshore fund.[26] A further deeming is needed, because the participator who receives the s.13 OIG does not make a disposal. Therefore reg.24(6) OFTR provides for a deemed disposal, to bring the s.13 OIG into charge under reg.17:

---

24 The words "or loss" are otiose here. Presumably the drafter overlooked the need to delete them as the legislation takes the trouble to delete them elsewhere. But nothing turns on that.

25 See 59.8 (Disallowance of DT relief for trust participator).

26 See 35.3 (Charge to tax on OIGs).

> If this regulation applies, the person to whom the offshore income gain arises is treated as the person making the disposal.

(The same rule applies for OIG s.87 TCGA.)

35.14.2 *OIG s.13 remittance basis*

Section 14A TCGA provides the CGT s.13 remittance basis, but that section does not apply for the purposes of OIG s.13. Instead the ordinary OIG remittance basis in reg.19 applies,[27] but the end result is the same. This explains reg.19(3)(a) which provides:

> (3) For the purposes of Chapter A1 of Part 14 of ITA 2007(10) (remittance basis)—
>
> (a) any consideration obtained on the disposal of the asset is treated as deriving from the income. ...

This is the equivalent of s.14A(3)(a) TCGA which similarly provides:

> (3) For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis)—
>
> (a) treat any consideration obtained by the company on the disposal of the asset as deriving from the deemed chargeable gain. ...

35.15 OIGs and s.86 TCGA

An OIG is not a chargeable gain so it does not fall within s.86 even if it arises to a non-resident trust. There is no provision which extends s.86 to apply. So a settlor of a non-resident trust is not subject to tax on trust OIGs under s.86 TCGA; but s.720 may apply where the settlor has power to enjoy.

35.15.1 *Planning: Settlor excluded but children included so trust is within s.86*

Suppose a non-resident trust where:

(1) the settlor and spouse are excluded, but

(2) s.86 applies (because the settlor is UK domiciled and the settlor's children are beneficiaries)

It may be attractive for a trust to invest in offshore funds (which give rise to OIGs outside s.86) rather than other assets (which give rise to CGT

---

27 See 35.7 (OIG remittance basis).

chargeable gains within s.86). Similarly, the trustees may invest for income and not capital growth. It may however be a balancing exercise, as to do so does increase the rate of tax on capital payments from CGT rates to IT rates.

35.16 Interaction of anti-avoidance provisions

35.16.1 *Priority between OIG s.87 TCGA and CGT s.87 TCGA*

Suppose a capital payment is made to a UK beneficiary from a trust with OIG amounts and CGT s.2(2) amounts. This would in principle give rise to a charge under OIG s.87 TCGA and CGT s.87 TCGA, or at least it might not be clear which of the two applied.

It matters which applies because in one case the OIG is taxed at income tax rates and in the other the CGT chargeable gain is taxed at CGT rates.

Regulation 20(4) OFTR deals with this:

> Section 87A of TCGA 1992 applies for a tax year by virtue of paragraph (3) before it applies for that year otherwise than by virtue of that paragraph.

In short, OIG s.87 TCGA has priority to CGT s.87 TCGA. Where OIG s.87 TCGA applies to a capital payment, there is no "capital payment" for the purposes of CGT s.87 TCGA as the payment is subject to income tax.

The OF Manual offers the following example:

> **OFM15640 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: section 87 (and 87A) TCGA attribution rules: example regulation 20** [January 2012]
> **Allocating capital payments between offshore income gains and chargeable gains arising in non-resident settlements – regulation 20(4)**
> **Example where both offshore income gains and capital gains received**
> A settlement with non-UK resident trustees has never been settlor interested and has never received any income.

This simplifies matters as it is not necessary to consider the ToA rules or s.86 TCGA. In real life, the position would generally be much more complicated.

> The following OIG amounts and capital gains have been received by the settlement:

	OIG amount	Chargeable gains
2008-09	£30,000	
2009-10		£40,000
2010-11	£50,000	£60,000
Total	£80,000	£100,000

> The first capital payment out of the settlement is made in 2010-11. That is a capital payment of £70,000 to a UK resident and domiciled beneficiary.

The HMRC analysis for 2010/11 is as follows:

> Regulation 20(4) tells you that you match any capital payments with OIG amounts arising in the non-resident settlement before matching with chargeable gains. This applies even if the OIG amount arose in an earlier year than the capital gain.
> Using the section 87A TCGA attribution rules the capital payment is matched first with the entire £50,000 OIG amount arising in 2010-11. Then the remaining £20,000 (£70,000 - £50,000) is matched with £20,000 of the £30,000 OIG amount arising in 2008-09.
> The beneficiary is treated as receiving £70,000 offshore income gains chargeable to income tax in 2010-11.

HMRC note that the £70k capital payment is matched with (1) the £50k OIG in 2010/11 and (2) £20k of the OIG in 2008/09. But it does not matter, as on the facts of the example, it makes no difference to which OIG the capital payment is matched. It matters for CGT chargeable gains, because of the interest surcharge, but that does not apply for OIG.

HMRC do not seek to argue that s.731 OIG applies.

HMRC then turn to consider the position going forward:

> There are unmatched OIG amounts and chargeable gains in the settlement to carry forward at 5 April 2011 of:
> 2008-09 OIG amount £10,000 (£30,000 less £20,000 matched with capital payment)
> 2009-10 Capital gains £40,000
> 2010-11 Capital gains £60,000.

The HMRC example is an easier case as there was one capital payment which was less than the total OIGs. Suppose there was more than one capital payment, and the total amount exceeded the OIGs. For instance, on the facts of the above example, suppose in the same year but on different days:

Capital payment 1: £80k
Capital payment 2: £20k.

Does one say:
(a) Capital payment 1 is matched with the OIG and capital payment 2 is matched with the CGT chargeable gains? or
(b) Each capital payment is matched with 80% of the OIG and 20% of the CGT chargeable gains?

It is considered that solution (b) is correct. That is consistent with the rule for s.2(2) amounts (trust gains).

35.16.2 *Priority between OIG s.13 & ToA provisions: Company not held by trust*

Suppose an OIG arises to a non-resident company (the company not being held by a trust). This could give rise to a charge under OIG s.720 (on the transferor) and under OIG s.13 (on the participators), or at least it might not be clear which of the two charges applies.

It may not matter which applies, as the OIG is taxed at income tax rates in either event, but it could matter eg if the transferor is not the sole participator.

Regulation 21(3) OFTR deals with this but it needs to be read with reg.21(1) to follow the sense:

> (1) Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person...
> (3) Paragraph (1) does not apply in relation to an offshore income gain if (and to the extent that) it is treated, by virtue of regulation 24 [OIG s.13], as arising to a person resident in the UK.

In short, a s.13 OIG charge has priority over the OIG ToA provisions. Regulation 24(7) OFTR provides:

> To the extent that an offshore income gain is treated, by virtue of this regulation [reg 24 = OIG s.13], as having accrued[28] to any person resident in the UK, that gain shall not be deemed to be the income of any individual for the purposes of Chapter 2 of Part 13 of ITA 2007 (transfer

28 The terminology of the Taxes Acts is generally that CGT chargeable gains *accrue;* but OIGs *arise.* There is no difference in meaning so it does not matter that the wrong word is used here.

of assets abroad).

35.16.3 *Priority between OIG s.13 and ToA provisions: Company held by trust*

Suppose an OIG arises to a company held by a settlor-interested trust. Suppose the company is within s.720. The trustees make a capital payment to a UK resident beneficiary. This could give rise to:

(1) a charge under OIG s.720 on the transferor and
(2) under OIG s.87 TCGA on the beneficiary, on the basis that the OIGs arise to the trustees under s.13(10) and constitute OIG amounts which are matched to the capital payments.

Is relief available under reg. 24(7) OFTR? That provides:

> To the extent that an offshore income gain is treated, by virtue of this regulation [reg 24 = OIG s.13], as having accrued to any person resident in the UK, that gain shall not be deemed to be the income of any individual for the purposes of Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad).

One would have to argue that the gain accruing to the individual is the same gain as that accruing to the company. It is suggested that this is the case, since otherwise there would be a strange anomaly between this case and the simple case where the OIG arises to the trust directly (without a company). The purpose of s.13 is to put the taxpayer in the same position as if there were no company.

35.17 Priority between OIG s.87 TCGA and OIG ToA provisions

Suppose an OIG arises to a non-resident trust which makes a capital payment to a beneficiary. This could give rise to a charge under OIG s.87 TCGA and the ToA provisions, or at least it might not be clear which of the two applies.

It matters which applies because:

(1) OIG s.87 TCGA qualifies for:
  (a) rebasing relief
  (b) 2008 transitional relief.
(2) Different remittance basis rules apply.

Regulation 21(5) deals with this but one first needs to read reg.21(4) OFTR which provides:

> The following provisions apply if regulation 20 [OIG s.87 TCGA] applies in relation to an offshore income gain (the "relevant offshore

income gain").

In short, the two provisions which follow – reg.21(5)(6) – apply where an OIG arises to a non-resident trust.

Regulation 21(5) needs to be read with reg.21(1) to follow the sense:

> (1) Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person...
> (5) If—
> (a) by virtue of regulation 20 [OIG s.87 TCGA] an offshore income gain is treated as arising in a tax year to a person resident in the UK, and
> (b) it is so treated by reason of the relevant offshore income gain (or part of it),
> for that and subsequent tax years paragraph (1) does not apply in relation to the relevant offshore income gain (or that part).

In short, the OIG s.87 TCGA charge has priority over the ToA provisions if the OIG amount is matched to a capital payment to a *UK resident*. I refer to this provision as "**The OIG s.87 priority rule**". This applies even if the s.87 OIG is matched to a remittance basis taxpayer and (un)taxed on the s.87 OIG remittance basis, because an OIG is nevertheless treated as arising to a UK resident.

The OIG s.87 priority rule applies for Chapter 2 of Part 13 of ITA 2007 but it is necessary to consider s.720 and s.731 separately.

35.17.1 Priority between OIG s.720 and OIG s.87

The following examples are based on this situation:

(1) A non-resident settlor-interested trust is within s.720. The transferor/settlor (for the purposes of these examples the terms are interchangeable) is UK resident. The motive defence does not apply.
(2) The trust has realised an OIG in year 1 of £1m.
(3) The trust has no relevant income. (It would be unusual for a trust within s.720 to have relevant income.)

Example 1 (no capital payment)
The trustees make no capital payment to any beneficiary in the year that the OIG arises.
The settlor as transferor is taxed on the OIG under OIG s.720 (subject to the s.720 remittance basis if applicable).

Regulation 21(6) OFTR prevents a double charge to tax under OIG s.87 TCGA, if there is a capital payment in a subsequent tax year. It provides:

> If, by virtue of paragraph (1) [OIG s.720] as it applies in relation to the relevant offshore income gain, income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year, the OIG amount in question must be reduced (with effect from the following tax year) by the amount of the income.

Example 2 (capital payment to settlor)
The trustees make a capital payment of £1m to the settlor in year 1.
The settlor is taxed on the capital payment under OIG s.87 TCGA (subject to the s.87 OIG remittance basis).
The ToA provisions are disapplied for OIG because the OIG s.87 priority rule applies.
It may make no difference whether it is OIG s.720 or OIGs.87 which is used to tax the settlor but it may matter for the following reasons:
(1) rebasing relief
(2) 2008 transitional relief
(3) mixed fund rules.

Example 2a (capital payment of part of OIG to settlor)
The trustees make a capital payment of £0.5m to the settlor in year 1.
The settlor is taxed on the £0.5m capital payment under OIG s.87 TCGA (subject to the s.87 OIG remittance basis).
The settlor is taxed on £0.5m under OIG s.720.

Example 3 (capital payment to UK beneficiary)
The trustees make a capital payment of £1m to a UK resident beneficiary (not the settlor) in year 1.
The beneficiary is taxed on the capital payment under OIG s.87 TCGA (subject to the s.87 OIG remittance basis if applicable).
The ToA provisions are disapplied because the OIG s.87 priority rule applies.
So the result of the capital payment is to shift the tax charge from the settlor to the beneficiary. This would be particularly important if the beneficiary was a remittance basis taxpayer and the settlor was not. In such a case a capital payment to the beneficiary would save tax. The capital payment also affects the quantum of the charge if rebasing relief applies or 2008 transitional relief.

If the capital payment had been to a non-UK resident beneficiary, the settlor would be taxed on £1m under OIG s.720.

Example 3a (capital payment of part of OIG to beneficiary)
The trustees make a capital payment of £0.5m to a UK resident beneficiary (not the settlor) in year 1.
The beneficiary is taxed on the capital payment under OIG s.87 TCGA (subject to the s.87 OIG remittance basis if applicable).

Planning for trust within s.720 which realises an OIG
In short, where an OIG arises to a trust within s.720, it is advantageous for the trustees to make a capital payment equal to the OIG amount to a UK beneficiary, if:
(1) the settlor is not a remittance basis taxpayer and the beneficiary is a remittance basis taxpayer; or
(2) rebasing relief or 2008 transitional relief applies.
This planning point will often require a distribution to be made in the year that the OIG arises. The sum distributed need not be the proceeds representing the OIG. Other capital payments (eg the use of living accommodation) may suffice as that capital payment may be matched with the OIG.

If there is no time to make a payment in the form of a bank transfer, a resolution of the trustees to exercise their power to make a distribution will suffice. If the figures are not available, a resolution to distribute an amount equal to the offshore income gains will suffice. In order to make a distribution, it may be necessary to make a deed of appointment, or obtain consent of a protector: that depends of course on the terms of the trust.

35.17.2 *Priority between OIG s.731 and OIG s.87 TCGA over same OIG*

I turn to consider whether OIG s.87 TCGA takes precedence over OIG s.731.

The effect of the OIG s.87 priority rule is that if the OIG amount is matched to a capital payment to a UK resident then:
(1) an OIG is treated as arising in the year to that beneficiary and
(2) this disapplies OIG s.731.
In this situation, the OIG s.87 TCGA charge has priority over OIG s.731. This applies even if the OIG s.87 TCGA charge is (un)taxed on the s.87 OIG remittance basis because the s.87 OIG is nevertheless treated as arising.

Examples

The following examples are based on this situation:

(1) A non-resident trust is within s.731 (UK resident beneficiaries) but not within s.720 (transferor has no power to enjoy or is not UK resident.) The motive defence does not apply.
(2) The trust has realised an OIG in year 1 of £1m.
(3) The trust has no relevant income (leaving aside the OIG).

Example 1 (capital payment to UK beneficiary in year 1)
The trustees make a capital payment of £1m to a UK resident beneficiary in year 1.
The beneficiary is taxed on the capital payment under OIG s.87 TCGA (subject to the s.87 OIG remittance basis).
The ToA provisions are disapplied, ie, the OIG does not count as relevant income for s.731.

Example 1a (capital payment of part to UK beneficiary)
The trustees make a capital payment of £0.5m to a UK resident beneficiary in year 1.
It is considered that the beneficiary is taxed on the capital payment under OIG s.87 TCGA (subject to the s.87 OIG remittance basis). HMRC agree: see the HMRC example set out in para 34.16.1 (Priority between OIG s.87 TCGA and CGT s.87 TCGA), where a trust with an OIG amount of £80k made a capital payment of £70k and the capital payment was said to fall within OIG s.87. It is not entirely clear from the wording of the OIG s.87 priority rule that this is the case. That provides:

> (5) If—
> (a) by virtue of regulation 20 [OIG s.87 TCGA] an offshore income gain is treated as arising in a tax year to a person resident in the UK, and
> (b) it is so treated by reason of the relevant offshore income gain (or part of it),
> for that and subsequent tax years paragraph (1) [applying the TOA rules] does not apply in relation to the relevant offshore income gain (or that part).

Now, the position is clear if a capital payment is equal to the entire OIG amount (as in example 1). But if the capital payment is equal to half the OIG amount, one might say that half the OIG remains to count as relevant income so the capital payment falls within s.731 OIG. But that would be

an anomalous inconsistency with the position which applies when the capital payment equals the entire OIG. It would be particularly difficult to apply if the capital payment is more than half the OIG. So the better view is that OIG s.87 applies. If that is correct, then OIG s.731 will never apply.

Example 2 (capital payment to UK beneficiary in year 2)
(1) The trustees make no capital payment in year 1.
No-one is subject to tax in year 1 as:
(a) OIG s.87 TCGA only applies if there is a capital payment.
(b) OIG s.731 only applies if there is a benefit (which means (more or less) the same as a capital payment).
(2) *The trustees make a capital payment of £1m to a UK resident beneficiary in year 2.*
The beneficiary is taxed on the capital payment under OIG s.87 TCGA (subject to the s.87 OIG remittance basis). The beneficiary is not taxed under OIG s.731 as the OIG s.87 priority rule applies.

I have considered whether reg. 21(6) OFTR overrides this rule. Reg 21(6) OFTR provides:

> If, by virtue of paragraph (1) as it applies in relation to the relevant offshore income gain, income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year, the OIG amount in question must be reduced (with effect from the following tax year) by the amount of the income.

Does this apply in year 1? Only if *income is treated under Chapter 2 of Part 13 of ITA as arising* in year 1. Chapter 2 part 13 uses the expression *income is treated as arising* in s.731 (income treated as arising to a non-transferor) and in s.720 (income treated as arising to a transferor). However these sections do not apply in year 1. So reg.21(6) does not apply.

I have considered the argument that income is treated as arising in year 1 to the *person abroad* (the OIG) because of reg.21(1). But this is not correct, for such income is not treated as arising under Chapter 2 Part 13. This is confirmed, I think, by reg. 21(2) OFTR which uses the expression "treated as arising" where the reference is clearly to income treated as arising to the transferor under s.720 or to a beneficiary under s.731.

It follows that if capital payments are made only to UK resident beneficiaries, they are all taxed under OIG s.87 TCGA and not OIG s.731.

Example 2a (capital payment of part of OIG to UK beneficiary in year 2) The facts are the same as example 2, but the trustees make a capital payment of only £0.5m to a UK resident beneficiary in year 2.
It is considered that the beneficiary is taxed on the capital payment under OIG s.87 TCGA (subject to the s.87 OIG remittance basis). The beneficiary is not taxed under OIG s.731 as the OIG s.87 priority rule applies.

Example 3
(1) Year 1: The trustees make a capital payment of £1m (ie an amount equal to the OIG) to a non-resident beneficiary
No-one is subject to tax in year 1 as OIG s.87 TCGA and OIG s.731 only apply if there is a capital payment or benefit to a UK resident beneficiary.
(2) *Year 2: The trustees make a capital payment of £1m to a UK resident beneficiary.*

(a) The UK beneficiary is not taxed on the capital payment under OIG s.87 TCGA because the trust's OIG amount is matched to the capital payment in year 1.
(b) As the OIG constitutes relevant income, the UK beneficiary may be taxed under OIG s.731 as the OIG s.87 priority rule does not apply:
(i) If the capital payment to the non-resident beneficiary in year 1 distributed the relevant income, there is no OIG s.731 charge.
(ii) If the capital payment to the non-resident beneficiary in year 1 did not distribute the relevant income, the UK beneficiary is subject to tax under OIG s.731.

35.17.3 *OF Manual example: OIG s.87 TCGA: 2008 transitional relief*

The OF Manual provides:

> **OFM15650 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: attribution rules: example of non-UK domiciled beneficiary not chargeable on offshore income gain arising prior to 6 April 2008** [January 2012]
> **Example showing how a UK resident but non-UK domiciled beneficiary may not be chargeable to tax on an offshore income gain arising in a non-resident settlement prior to 6 April 2008 – paragraph 100 Schedule 7 FA 2008**
> **Example of effect of paragraph 100 Schedule 7 FA 2008**
> A settlement with non-UK resident trustees has never been settlor interested. The trustees own all the share capital of a non-UK resident company. Neither the trustees nor the company has received any income

nor made any chargeable gains.
The non-resident company held a material interest in an offshore fund. When that was disposed of in 2005-06 an OIG amount of £60,000 arose.
The first capital payments to beneficiaries were made in 2010-11 which were:
£40,000 to a UK resident and domiciled beneficiary
£40,000 to a UK resident but non-UK domiciled beneficiary
£40,000 to a non-UK resident beneficiary.

The HMRC analysis is as follows:

There is a matching of £20,000 of each of these capital payments with the 2005-06 OIG amount. Each beneficiary has £20,000 of offshore income gain attributed to them via section 87 TCGA rules. There are no unmatched OIG amounts to carry forward within the non-resident settlement structure.
The UK resident and domiciled beneficiary is chargeable to income tax in 2010-11 on the £20,000 offshore income gain attributed to them.
The UK resident but non-UK domiciled beneficiary is not chargeable to income tax on any of the £20,000 offshore income gain attributed to them. This is because the OIG amount used in the section 87 matching process arose before 6 April 2008 - paragraph 100(2)(b) Schedule 7 FA 2008.
The non-UK resident beneficiary is not chargeable to income tax on any of the £20,000 offshore income gain attributed to them.
There are unmatched capital payments of £20,000 to each beneficiary to carry forward at 5 April 2011.

What is the position for OIG s.731? Para 21(5) OFTR (the OIG s.87 priority rule) provides:

If—
(a) by virtue of regulation 20 [OIG s.87 TCGA] an offshore income gain is treated as arising in a tax year to a person *resident in the UK*, and
(b) it is so treated by reason of the relevant offshore income gain (or part of it),
for that and subsequent tax years paragraph (1) does not apply in relation to the relevant offshore income gain (or that part).

Of the £60k OIG, only £40k is treated as arising to persons resident in the UK, so one might think that £20k remained as relevant income, taxable on the UK resident beneficiaries. That is a surprising result, for contrast the situation where the same payments are made to the UK beneficiaries and

no payment to the non resident. The UK domiciled resident is taxed on £30k and the foreign domiciled resident is not taxed. It seems strange if the tax should be more because of the payment to the non-resident. The author of the OF Manual presumably thought so. Presumably the reason is that the payment to the non-resident is regarded as distributing the relevant income.

The same point applies to the next example.

35.17.4 *OF Manual example: Non-settlor interested trust; OIG s.87 rebasing relief*

The OF Manual provides:

> **OFM15660 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: attribution rules: example of effect of 'rebasing' election** [January 2012]
> **Example showing how a UK resident but non-UK domiciled beneficiary may benefit from a 'rebasing' election – paragraph 101 Schedule 7 FA 2008**
> **Example of effect of 'rebasing' election - paragraph 101 Schedule 7 FA 2008**
> A settlement with non-UK resident trustees is settlor interested because the settlor can benefit. The trustees own all the share capital of a non-UK resident company. Neither the trustees nor the company has received any income nor made any chargeable gains. The trustees have made a 'rebasing' election under paragraph 126 Schedule 7 FA 2008.
> The non-resident company purchased a material interest in an offshore fund in 2000-01. This is disposed of in 2010-11 resulting in an OIG amount of £60,000. The post 5 April 2008 element of that OIG amount is £15,000.
> The first capital payments made to beneficiaries were made in 2010-11. They were:
> £40,000 to a UK resident and domiciled beneficiary
> £40,000 to a UK resident but non-UK domiciled beneficiary
> £40,000 to a non-UK resident beneficiary.

The HMRC analysis is as follows:

> There is a matching of £20,000 of each of these capital payments with the 2010-11 OIG amount. Each beneficiary has £20,000 of offshore income gain attributed to them via section 87 TCGA rules. There are no unmatched OIG amounts to carry forward within the non-resident settlement structure.

The UK resident and domiciled beneficiary is chargeable to income tax in 2010-11 on the £20,000 offshore income gain attributed to them.
The UK resident but non-UK domiciled beneficiary (where the remittance basis is used) is only chargeable to income tax on £5,000 (£20,000 × £15,000/£60,000) of the £20,000 offshore income gain attributed to them. That is the post 5 April 2008 element of the £20,000 offshore income gain attributed to them. This is by virtue of paragraph 101 Schedule 7 FA 2008.[29]
The non-UK resident beneficiary is not chargeable to income tax on any of the £20,000 offshore income gain attributed to them.
There are unmatched capital payments of £20,000 to each beneficiary to carry forward at 5 April 2011.

35.17.5 *OF Manual example: OIG s.720: Loss of rebasing relief*

The OF Manual provides:

OFM15670 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: attribution rules: example of 'rebasing' election having no effect [January 2012]
Example showing how a UK resident but non-UK domiciled beneficiary may not benefit from a 'rebasing' election – paragraph 101 Schedule 7 FA 2008
Example of 'rebasing' election having no effect - paragraph 101 Schedule 7 FA 2008
This example has similar facts as that in OFM15650 with the exception that capital payments are not made to beneficiaries until a year after that in which the OIG amount arises in the offshore trust structure. In such a case there may be no benefits of a 'rebasing' election to a non-UK domiciled beneficiary in respect of any offshore income gain attributed to them.
A settlement with non-UK resident trustees is settlor interested because the UK resident and ordinarily resident, but non-domiciled, settlor can benefit. The trustees own all the share capital of a non-UK resident company. Neither the trustees nor the company has received any income nor made any capital gains. The trustees have made a 'rebasing' election under paragraph 126 Schedule 7 FA 2008.
The non-resident company purchased a material interest in an offshore fund in 2000-01. This is disposed of in 2010-11 resulting in an OIG amount of £60,000. The post 5 April 2008 element of that OIG amount is £15,000.

29 [Author's note:] it is assumed that the remittance basis does not apply.

The first capital payments made to beneficiaries were made in 2011-12. They were:

- £40,000 to a UK resident and domiciled beneficiary
- £40,000 to a UK resident but non-UK domiciled beneficiary (who was also the settlor)
- £40,000 to a non-UK resident beneficiary.

In 2010-11 there have been no capital payments in that year, or earlier years, to beneficiaries. So there can be no attribution of the OIG amount to beneficiaries under the section 87 attribution rules in regulation 20.

We then have to consider if there can be an attribution under the transfer of assets rules in regulation 21 for 2010-11. The entire £60,000 OIG amount can be attributed to the settlor as an offshore income gain for that year. The non-UK domiciled settlor is chargeable to income tax in 2010-11 on the £60,000 offshore income gains attributed to them, subject to any remittance basis considerations. The 'rebasing' election has no effect on the amount chargeable to income tax as the attribution has not been made via the section 87 attribution rules.

The OIG amount is reduced to Nil (regulation 21(6)). There are no unmatched OIG amounts to carry forward to 2011-12. There is nothing to match with the capital payments made in 2011-12 so the full amount of those payments are unmatched capital payments to carry forward at 5 April 2012.

Was this result intended in 2008? Since HMRC gave no indication of their thinking, it is hard to tell.

35.18 Interaction of OIG s.87 TCGA and OIG ToA provisions where motive defence applies

EN FB 2008 provides:

> 46. Offshore income gains that are not matched in that year [the year they arise] will be chargeable to tax by reason of the provisions relating to the transfer of assets abroad legislation in Chapter 2 of Part 13 of the Income Tax Act 2007. *There is an exception to this rule where the motive or purpose defence in sections 736 to 742 applies to the gain.*

The legislation has not however achieved this result. Regulation 21(6) disapplies OIG s.87 TCGA:

> If, by virtue of paragraph (1) as it applies in relation to the relevant offshore income gain, income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year,...

We must ask whether "income is treated under Chapter 2 of Part 13 of ITA 2007 as arising" if the motive defence applies. In fact even where the motive defence does apply, income is treated as arising *to the person abroad*. Regulation 21(1) OFTR provides:

> Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person.

But reg.21(6) is perhaps intending us to ask if income is treated as arising *to the transferor or to a non-transferor* under s.720 or s.731. Section 739(2) ITA provides the relief where the motive defence applies to pre-2006 transactions:

> An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs that condition A or B is met.

Section 737(2) ITA is identically worded for post-2006 transactions. Now, even though the individual is not liable for IT, the terms of reg.21(6) are still satisfied: "income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year" even if the individual is not liable for income tax on that income. The result is not absurd, especially since the motive defence may be retrospectively lost by a tainted associated operation.

A court may find this too literal an approach. But as the legislation becomes more and more complex (and the OFTR is as complex as tax can get), it is less and less appropriate to apply anything but a literal interpretation to find what it means.

35.19 Computation of OIGs

Regulation 38 OFTR provides:

> (1) An offshore income gain arises to a person on the disposal of an asset if a basic gain arises on the disposal.
> (2) The disposal gives rise to an offshore income gain of an amount equal to the basic gain on the disposal.
> (3) The following provisions of this Chapter explain how the basic gain is computed.

35.19.1 *"Basic gain"*

So we move on to reg.39(1) OFTR:

> In the case of a participant chargeable to income tax,[30] the basic gain is a gain of the amount which would be the gain on that disposal for the purposes of TCGA 1992 if the gain were computed without regard to any charge to income tax arising under this Part.

The amount of the "basic gain" is the same as the amount of a CGT chargeable gain would be had the asset not been an offshore fund.

There is no relief for tax credits or foreign tax paid by the offshore fund (except that such tax reduces the value of the fund and so reduces the OIG). But this is also the case for CGT.

Regulation 39(3) flags up eight special cases:

> The computation of the basic gain is subject to—
> (a) regulation 34 (provisions applicable on death);[31]
> (b) regulation 35 (application of section 135 of TCGA 1992);
> (c) regulation 36 (application of section 136 of TCGA 1992);
> (d) regulation 37 (exchange of interests of different classes);
> (e) regulation 40 (earlier disposal to which the no gain/no loss basis applies);
> (f) regulation 41 (modifications of TCGA 1992);
> (g) regulation 42 (losses);
> (h) regulation 43 (special rules for certain existing holdings).

In these cases the amount of the OIG may exceed the basic gain.

I do not discuss regulations 35-37.

Regulation 41(1) disapplies rollover relief:

> If the disposal forms part of a transfer to which section 162 of TCGA 1992 (roll-over relief on transfer of business) applies, the basic gain arising on the disposal is computed without regard to any deduction which falls to be made under that section in computing a chargeable gain.

It would be a rare case where rollover relief would be in point.

Regulation 41(2) OFTR disapplies holdover relief:

> If the disposal is made otherwise than under a bargain at arm's length and a claim for relief is made in respect of that disposal under section 165 or 260 of TCGA 1992 (relief for gifts), the claim does not affect the computation of the basic gain arising on the disposal.

---

30 Also see 35.19.2 (Computation of OIGs for company within corporation tax).

31 See 35.5 (Death of individual).

35.19.2 *Computation of OIGs for company within corporation tax*

For completeness: reg.39(2) OFTR provides:

> In the case of a participant chargeable to corporation tax, the basic gain is a gain of the amount which would be the gain on that disposal for the purposes of TCGA 1992 if the gain were computed—
>
> (a) without regard to any charge to corporation tax arising under this Part, and
>
> (b) without regard to any indexation allowance on the disposal under TCGA 1992.

Separate provision is needed to disapply the indexation allowance (which is available to companies but not to individuals).

Regulation 40 OFTR prevents indexation relief creeping in by the back door:

> (1) This regulation applies if—
>
> (a) a participant is chargeable to corporation tax, and
>
> (b) the amount of any chargeable gain or allowable loss which would arise on the disposal would fall to be computed in a way which, in whole or in part, would take account of the indexation allowance on an earlier disposal to which section 56(2) of TCGA 1992 (disposals on a no gain/no loss basis) applies.
>
> (2) The basic gain on the disposal is computed as if—
>
> (a) no indexation allowance had been available on any such earlier disposal, and
>
> (b) subject to that, neither a gain nor a loss had arisen to the person making such an earlier disposal.

35.20 Computation of CGT chargeable gain on disposal of offshore fund

A disposal for the purposes of the offshore funds rules is generally also a disposal for CGT.[32] The OFTR provides relief against a double charge. Regulation 44 sets the scene and provides terminology:

> (1) This Chapter applies if—
>
> (a) a material disposal[33] gives rise to an offshore income gain, and
>
> (b) that disposal also constitutes the disposal of the interest

---

32 See 35.4 (Meaning of "disposal").

33 Defined in reg.15OFTR: "In these Regulations a 'material disposal' means a disposal to which this Part applies." Since the expression "material disposal" is only used once in reg.44, it could have been more concisely expressed, but the meaning is clear.

concerned for the purposes of TCGA 1992.
(2) In this Chapter the disposal specified in paragraph (1)(b) is called the "TCGA disposal".

Regulation 45 OFTR provides:

(1) This regulation applies for the purposes of the computation of the chargeable gain arising on the TCGA disposal.
(2) The provisions of this regulation have effect in relation to the TCGA disposal in substitution for section 37(1) of TCGA 1992 (deduction of consideration chargeable to tax on income).
(3) In the computation of the gain arising on the TCGA disposal, a sum equal to the offshore income gain shall be deducted from the sum which would otherwise constitute the amount or value of the consideration for the disposal.

Regulation 45(2) disapplies s.37(1) TCGA which normally avoids a double charge of IT and CGT. In its place, reg45(3) introduces its own rules. I am not sure why, because s.37 would seem to have had the same effect.[34] I would be grateful to any reader who could explain.

35.20.1 *Part disposals*

Regulation 45(5)(6) OFTR deals with part disposals:

(5) Paragraph (6) applies if the TCGA disposal is of such a nature that, by virtue of section 42 of TCGA 1992 (part disposals), an apportionment falls to be made of certain expenditure.
(6) No deduction is to be made by virtue of paragraph (3) in determining the amount or value of the consideration for the purposes of the fraction in section 42(2) of TCGA 1992.

The OF Manual provides:

OFM18200 Investors in non-reporting funds: deduction of offshore income gains in computing capital gains: treatment of the disposal - general – Regulation 45 [January 2012]
Where there is a part-disposal so that section 42 of TCGA applies to determine the apportionment of acquisition costs to the disposal then the full amount of disposal consideration is taken into account for the

34 Section 37(1) TCGA provides: "There shall be excluded from the consideration for a disposal of assets taken into account in the computation of the gain any money or money's worth charged to income tax as income of, or taken into account as a receipt in computing income or profits or gains or losses of, the person making the disposal for the purposes of the Income Tax Acts."

> purposes of the calculation required by that section – that is, the offshore income gain is not deducted from the disposal consideration for the purposes of calculating the part disposal fraction at section 42(2).

Why is that?

35.21 Losses

Regulation 42 OFTR provides:

> (1) If the effect of any computation under regulations 39 to 41 would be to produce a loss, the basic gain on the disposal is nil.
> (2) Paragraph (1) applies notwithstanding section 16 of TCGA 1992 (losses determined in like manner as gains).
> (3) Accordingly, for the purposes of these Regulations, no loss is to be treated as arising on the disposal.

An offshore income gain is charged to IT but where a loss arises on the disposal, there is no income tax relief.[35] The loss will be allowable for CGT if ordinary CGT principles permit. HMRC agree. The OF Manual provides:

> **OFM 09050 Investors in non-reporting funds: charge to tax on disposal of an interest: overview** [January 2012]
> ...Losses
> Where there is a loss on disposal then the gain for the purposes of tax on an offshore income gain is nil, that is there is no recognition of losses for the purposes of the regulations (regulation 42). Accordingly, in a case where there is also a disposal for the purposes of TCGA, any loss made (calculated in accordance with that Act) may be treated as a capital loss for the purposes of TCGA.

This means that remittance basis taxpayers and non-residents will generally have no loss relief.[36]

The allowable loss (if there is one) is computed on CGT principles (not the OIG computation rules) but the amount is the same.

35.22 Exemptions

Chapter 3 part 2 OFTR set out 11 exemptions from the charge to tax on OIGs. The following are only mentioned here:

(1) UK companies owning offshore funds which are:

---

35 Section 152(8) ITA prevents miscellaneous losses being set against OIGs.

36 See 54.1 (Capital losses).

(a) loan relationships (the loan relationship rules prevail)
(b) derivative contracts (the derivative rules prevail)
(c) intangible fixed assets (the intangible rules prevail)

(2) Excluded indexed securities
(3) Policies of insurance: the chargeable events regime prevails.
(4) Trading stock
(5) Exemption for insurance companies
(6) Loan other than a participating loan
(7) Transparent funds: see 35.23 (Exemption for transparent fund)
(8) Transitional relief; see 36.8 (2009 Transitional rules)
(9) Charities: see Kessler and Marre, *Taxation of Charities and Nonprofit Organisations* (9th ed., 2013), para 3.16 (online version *http://www.taxationofcharities.co.uk*).

35.23 Exemption for transparent fund

Regulation 29 OFTR provides an exemption:

(1) No liability to tax arises under regulation 17 if—
  (a) the disposal is the disposal of an interest in an offshore fund falling within paragraph (b) or (c) of section 40A(2) of FA 2008 [now s.355 TIOPA][37], and
  (b) the fund is a transparent fund.
  This is subject to paragraphs (2) and (3).

The regulation continues with two exceptions:

(2) But there is a charge to tax under regulation 17 if—
  (a) there is a disposal of an interest in a transparent fund, and
  (b) during a period beginning with the date the interest (or any part of it) was acquired and ending with the date of the disposal, the offshore fund has at any time held interests in other non-reporting funds which amounted in total to more than 5% by value of the offshore fund's assets.
(3) And there is a charge to tax under regulation 17 if—
  (a) there is a disposal of an interest in a transparent fund,
  (b) the fund is a non-reporting fund, and
  (c) the fund fails to make sufficient information available to participants in the fund to enable those participants to meet their tax obligations in the UK with respect to their shares of

37 See 34.3.1 (Basic definition). The wording makes sense, as a fund within para (a) of the section cannot be a transparent fund, but it could have been more simply drafted.

the income of the fund.

(4) If, on the disposal by an offshore fund of an interest in another non-reporting fund, no liability would arise under regulation 17 by virtue of this regulation, that interest is not taken into account for the purposes of paragraph (2)(b).

The OF Manual provides:

OFM16500 Investors in non-reporting funds: exceptions to the charge to tax: interests in certain transparent funds - Regulation 29 [January 2012]

... Other types of arrangements that are transparent for income purposes but not transparent for capital gains purposes (Section 99 and 103A TCGA - see OFM07000 onwards) such as, for example, certain unit trusts (following the case of *Archer-Shee v Baker*) or certain foreign contractual arrangements (such as Fonds Commun de Placement ("FCPs")) fall within the definition of an offshore fund. They are therefore subject to the Offshore Funds (Tax) Regulations 2009 (SI2009/3001) generally, with certain modifications as described below.

The purpose of the offshore fund regime is to ensure that income cannot be rolled up free of tax, with any subsequent gain on disposal being charged only as a capital gain. If a fund is transparent for income, such as would be the case for certain unit trusts and contractual funds, then any income arising to the fund is treated as arising to an investor in proportion to his rights. This means that income is charged to tax as it arises.

However, it might be the case that an income transparent fund that came within paragraph (b) or (c) of section 355(1) of TIOPA 2010 itself invested in a non-reporting fund, and if that were the case then income could be rolled up in the underlying fund, because income would only be credited to the top fund if it was distributed.

In order to prevent unnecessary administrative burdens for transparent arrangements coming within the definition of an offshore fund and for their investors, any gain on disposal of an interest in an income transparent offshore fund will not be taxed as an offshore income gain unless -

- during a period beginning on the date the interest (or any part of it) was acquired and ending on the date of the disposal, the offshore fund at any time held interests in other non-reporting funds (except for certain other transparent funds (see below) which amounted in total to more than 5% by value of the offshore fund's assets (Regulation 29(2)), or
- the transparent fund is a non-reporting fund, and the fund fails to make sufficient information available to participants in the fund to

enable those participants to meet their tax obligations in the United Kingdom with respect to their shares of the income of the fund (Regulation 29(3)).

Whilst this does mean that such 'special category' funds will have to monitor their underlying investments, it allows such funds to avoid the need to apply for reporting fund status. UK investors will be charged capital gains tax or corporation tax on a capital gain arising, rather than incurring an offshore income gain, provided the fund has complied with Regulation 29(2)).

It follows that if a transparent offshore fund is invested by more than 5% by value of its total investments in non-reporting non-transparent funds it may apply for reporting fund status in order to allow UK investors to be charged to tax on capital gains on disposal rather than to an offshore income gain. If reporting fund status is granted then the fund will be subject to the requirements of the regulations, including those relating to the calculation of income from non-reporting funds (see regulations 69 to 71).

Provision of 'sufficient information' to participants - Regulation 29(3)

If a fund is unable to provide sufficient information to its UK investors to enable them to meet their UK tax obligations then an offshore income gain will be charged on any gains realised on subsequent disposals of relevant interests. The provision of 'sufficient information' would include details of an investor's proportionate share of both income arising to the fund and reported income or offshore income gains arising to it, as well as confirmation as to whether or not the fund has invested more than 5% by value of its assets in non-reporting funds.

In practice, many existing income transparent funds with UK investors already provide vouchers to those clients detailing income arising to the fund, for example interest income, and foreign or UK dividends.

HMRC consider that, for the purposes of regulations 29 and 92D only, sufficient information will have been provided by the fund to a UK investor if the information provided would enable the UK investor to compute their final UK tax liability (arising from their interest in the offshore fund) correctly.

UK investors will still be required to complete their tax returns in the required format under self-assessment. For example a unit holder would need to know whether the source of their income is land and property income, trading income, interest, UK dividends, foreign dividends etc. Where transparent funds have complex structures and a number of sources of income, this can lead to complex tax issues arising for an individual completing their tax return.

Some UK investors may be able to sidestep the requirement to disclose

details of whether dividends are UK or foreign sourced. This may be the case if the unit holder is entitled to total dividends of less than £300 and ticks the appropriate box on their self assessment return.

If in the course of an enquiry into a UK investor, it is asserted that 'sufficient information' had not been provided by the fund to a UK investor, the caseworker should contact the CISC team (See OFM01000) as this could have an impact on other UK investors in the same fund.

Investments by transparent non-reporting funds in other transparent non-reporting funds - Regulation 29(4)

There is one important relaxation to the requirements of regulation 29(2). That is, if a transparent non-reporting fund ("TNRF1") invests in another TNRF (TRNF2) then, where a disposal of an interest in TNRF2 would not itself give rise to an offshore income gain (under regulation 17) for a UK investor, the interest held by TNRF1 in TNRF2 is ignored in determining whether TNRF1 is invested in non-reporting funds by more than 5% of the value of its assets in total. This is because in such circumstances there can be no significant roll-up of income in the underlying fund(s).

This means that a TNRF's investments could, for example, consist wholly of interests in other underlying TNRFs that themselves held only, say, UK property. Or, a TNRF could be the top layer fund in a fund of funds structure with multiple layers of other TNRFs below the top fund, provided that each of those underlying TNRFs themselves did not hold more than 5% by value of their assets in total in other non-transparent, non-reporting funds.

In deciding whether the investee fund qualifies under this regulation this rule may be applied to the investee fund and to any funds in which it, in turn, holds investments.

35.24 DT relief on offshore income gain

Suppose an individual who is UK resident and treaty-resident in a foreign state disposes of offshore funds so that OIGs arise directly to them.

Article 13(5) OECD Model provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

Article 21(1) OECD Model provides:

> Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

It is an interesting question whether the individual claims relief under Art.13 or Art.21. At first sight OIGs are "gains" which arise from the alienation of property, even though not chargeable gains and even though subject to income tax rather than CGT.[38] But OIGs are also "income" if that word is given its UK tax meaning. Of course it does not normally matter which of the articles apply, if the treaty has both. But if a particular treaty has an equivalent of art.21 (other income) but no capital gains article, then it is considered that treaty relief is still in principle available.

38 See 49.9.1 (Gain subject to income tax).

CHAPTER THIRTY SIX

INCOME FROM OFFSHORE FUNDS

36.1 Introduction

This chapter considers the taxation of income distributed by offshore funds, and some subsidiary tax issues. The taxation of offshore income gains is considered in the previous chapter..

36.2 Distributed income of offshore fund

In the absence of express provision, the taxation of income distributed by funds would depend on the nature of the fund:

(1) Distributions from corporate funds would be taxed as dividends.
(2) Distributions from transparent funds would be taxed as the income of the underlying assets.
(3) Distributions from non-transparent non-corporate funds (ie non-transparent unit trusts) would be taxed as annual payments.

In each case the income will in principle be RFI and so can qualify for the remittance basis.

36.2.1 *Bond Funds*

The first dent in this position is s.378A ITTOIA which reclassifies some dividends as interest:

> (1) This section applies where—
> (a) a dividend[1] is paid by an offshore fund, and
> (b) the offshore fund fails to meet the qualifying investments test at

---

1 Defined in s378A(7):
"In this section—
"dividend" includes any distribution that (but for this section) would be treated as a dividend for income tax purposes".

any time in the relevant period.[2]

(2) The dividend is treated as interest for income tax purposes.

Section 378A(3) defines the qualifying investments test:

> For the purposes of this section, an offshore fund fails to meet the qualifying investments test if the market value of the fund's qualifying investments exceeds 60% of the market value of all of the assets of the fund (excluding cash awaiting investment)...
> "qualifying investments" has the meaning given in section 494 of CTA 2009.

I refer to offshore funds within s.378A as **"bond funds"**. EN FA 2009 explains:

> Certain distributions from offshore funds are economically similar to payments of yearly interest. Section 39 [inserting s.378A] charges distributions of this type to tax as if they were yearly interest.
> ... The test in subsection (3) is similar to that which applies to corporate investors for the purposes of the loan relationships legislation. (See sections 490 and 493 CTA 2009). A distribution is treated as interest if the offshore fund, at any time during the 'relevant period', holds more than 60 per cent of its assets in the form of qualifying investments. The definition of a qualifying investment is set out in section 494 CTA 2009 and, in summary, refers to interest bearing and economically similar investments.
> ... The purpose of the clause is to prevent a tax advantage being gained by holding interest bearing assets within an offshore fund structure....
> ... where a distribution from an offshore fund takes the form of a dividend the rate will be the dividend tax rate after taking into account the dividend tax credit. However, where the offshore fund is substantially invested in interest bearing, or economically similar, assets

---

2 Defined in s.378A(4)(5):

(4) "The relevant period" means—

(a) the relevant period of account of the offshore fund, or

(b) if longer, the period of 12 months ending on the last day of that period.

(5) "The relevant period of account" means—

(a) the last period of account ending before the dividend is paid, in a case in which the profits available for distribution at the end of that period (and not used since then by distribution or otherwise) equal or exceed the amount of the dividend (aggregated with any other distribution made by the offshore fund at the same time), and

(b) the period of account in which the dividend is paid, in any other case.

as described in paragraph 4 above then any distribution will be treated as interest for income tax purposes.

The OF Manual provides:

> **OFM27310 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to income tax: corporate funds - Regulation 95** [January 2012]
> **...Bond funds**
> From 22 April 2009 there is a change to the way dividends from offshore funds which are substantially invested in interest-bearing assets (commonly known as 'bond funds') are treated for tax purposes. Where an offshore fund holds more than 60% of assets in interest-bearing (or economically similar) form, any distribution or excess of reported income is treated as a payment of yearly interest (section 378A ITTOIA 2005 / regulation 95(3)). Such sums do not qualify for a dividend tax credit and the tax rates that apply are those applying to interest. Fund managers should be able to tell UK investors if a fund is a bond fund...

36.3 Undistributed income of reporting funds (deemed RF income)

In the absence of express provision, undistributed income of offshore funds would not be subject to tax. However the OFTR alters that. The legislation distinguishes between three types of funds:

(1) Non-transparent funds:
  (a) corporate funds (corporate funds cannot be transparent)
  (a) non-corporate non-transparent funds
(2) Transparent funds

36.3.1 *Meaning of "transparent"*

Regulation 11 OFTR provides:

> For the purposes of these Regulations a fund is a "transparent fund" if, in the case of holders of interests in the fund who are individuals resident in the UK, any sums which form part of the income of the fund are of such a nature that those holders—
>
> (a) are chargeable to tax under a provision specified in section 830(2) of ITTOIA 2005[3] in respect of such of those sums as are referable to their interests, or
>
> (b) if any of that income is derived from assets within the UK,

3 Section 830(2) ITTOIA specifies the list of 24 categories of RFI; see 10.3.1 (Relevant foreign income).

would be so chargeable had the assets been outside the UK.

I am not sure why the definition is expressed in such a convoluted fashion. But in practice this comes down to the usual tax sense of the word "transparent".

36.3.2 *Undistributed income of reporting non-transparent funds*

Regulation 94(1) OFTR provides:

> In the case of a reporting fund which is not a transparent fund, the Tax Acts have effect as if the excess (if any) of
> [a] the reported income of the fund in respect of a reporting period over
> [b] the distributions made by the fund in respect of the reporting period
> were additional distributions made to the participants in the fund in proportion to their rights.

I refer to this as **"deemed RF income".**

Reg.94(3) OFTR identifies the date and recipient of deemed RF income:

> The excess specified in paragraphs (1) and (2) is treated as made, on the fund distribution date,[4] to participants holding an interest in the fund at the end of the reporting period.

36.3.3 *Corporate reporting funds*

Regulation 95 OFTR provides:

> (1) This regulation applies if—
> (a) a reporting fund makes a distribution to a participant chargeable to income tax in respect of a reporting period, and
> (b) the fund falls within section 40A(2)(a) of FA 2008 [now s.355(1) TIOPA, referring to corporate funds].

In short, the regulation applies to corporate reporting funds.

> (2) This regulation also applies if some or all of the excess specified in regulation 94(1) is treated as made by such a fund to such a participant.
> (3) If section 378A of ITTOIA 2005 (offshore fund distributions)[5] applies to any amount falling within paragraph (1) or (2), the amount is

---

4 This term is defined in reg.94(4) OFTR:
> In these Regulations the "fund distribution date" for a reporting period of a reporting fund means the date six months following the last day of the reporting period.

5 See 36.2.1 (Bond Funds).

charged to income tax in accordance with that section.

This does not seem to need saying for distributed income, but it is necessary to classify deemed RF income as interest. So deemed RF income of bond funds is "treated as interest for income tax purposes." If the recipient is a remittance basis taxpayer, this type of income qualifies for the remittance basis, just like ordinary interest.

What about deemed RF income of corporate non-bond funds? This is treated as "distributions" so it is treated as a dividend. Reg.54, 95(4) assumes this and confers the right to tax credits as other dividends:

> (4) If paragraph (3) does not apply to any amount falling within paragraph (1) or (2), but the participant is entitled to a tax credit on receiving a distribution falling within paragraph (1), section 397A of ITTOIA 2005 (savings and investment income: dividends from non-UK resident companies) also applies to the excess falling within paragraph (2).

This income qualifies for the remittance basis just as ordinary dividends. HMRC agree. The OF Manual provides:

> **OFM13400 Investors in non-reporting funds: income & distributions: the charge to tax: remittance basis** [January 2012]
> Where an investor in a (non-transparent) non-reporting offshore fund is taxed on the remittance basis then the remittance basis rules apply to income arising from the holding in that fund as they apply to other income from non-UK sources.
> Where the fund is transparent for tax-purposes, then the income will arise from the underlying assets and not from the fund. In such a case the income may sometimes arise in the UK (even though the fund itself is domiciled offshore). Where the income arises in the UK the remittance basis does not apply. Where the income arises offshore then the remittance rules will apply.

36.3.4 *Non-corporate non-transparent reporting funds*

Regulation 96 OFTR provides:

> (1) This regulation applies if—
> (a) a reporting fund makes a distribution to a participant chargeable to income tax in respect of a reporting period,
> (b) the fund falls within paragraph (b) or (c) of section 40A(2) of FA 2008 [now s.355(1)(b)(c) TIOPA referring to unit trusts and co-ownership funds], and
> (c) the fund is not a transparent fund.

(2) This regulation also applies if some or all of the excess specified in regulation 94(1) is treated as made by such a fund to such a participant.
(3) Any amount to which paragraph (1) or (2) applies is charged to income tax—
(a) under section 378A of ITTOIA 2005 (offshore fund distributions),[6] or
(b) (if that section does not apply) under Chapter 8 of Part 5 of ITTOIA 2005 (miscellaneous income: income not otherwise charged) for the year of assessment in which the distribution is made ...

This does not apply to a non-resident participant as such a person is not chargeable to income tax on a distribution from an offshore fund.

Regulation 96(3) continues:

but sections 688(1) and 689 of ITTOIA 2005 (income charged and person liable) do not apply.

The disapplied sections would have provided:

688 *(1) Tax is charged under this Chapter on the amount of the income arising in the tax year.*
(2) Subsection (1) is subject to ...
(c) Part 8 (foreign income: special rules).
689 *The person liable for any tax charged under this Chapter is the person receiving or entitled to the income.*

36.3.5 *HMRC views*

The OF Manual provides:

OFM27310 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to income tax: corporate funds - Regulation 95 [January 2012]
Where a reporting fund takes corporate form, any sums distributed together with any excess of reported income will be treated as foreign dividends (unless the fund is a 'bond fund' – see below). Until 22 April 2009, dividends received from offshore funds did not carry any entitlement to a dividend tax credit but from that date they will do so unless the distribution is from a bond fund (section 378A ITTOIA 2005). Any sums treated as an excess of reported income also carry an entitlement to a foreign tax credit, unless the fund is a bond fund

6 See (Bond Funds).

(regulation 95(4))...

Remittance basis users

Where individuals not domiciled in the United Kingdom are taxed on the remittance basis then the normal remittance basis rules will apply to income arising from the reporting fund.

In the case of income that is reported but is not distributed then that income has not been remitted to the UK.

OFM15670 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to income tax: other non-transparent funds - Regulation 96 [January 2012]

Arrangements that are non-transparent for income purposes and that come within the definition of an offshore fund under section 355(1) TIOPA 2010 (that is, funds that do not take corporate form) will be foreign unit trusts. Foreign unit trusts that are not transparent for income purposes are sometimes referred to as 'Garland' unit trusts (following the case of *Garland v Archer-Shee* (15 TC 693)).

Non-transparent unit trusts

UK investors in foreign unit trusts that are non-transparent for income purposes are taxable on their proportionate share of income (as ascertained after the trustees have met the expenses of administering the trust) when it is indefeasibly allocated to them, regardless of whether the income is paid to them or accumulated. Unlike the position for transparent unit trusts, that income is taxable as miscellaneous foreign income (under Chapter 8 of Part 5 of ITTOIA 2005) and the tax rates applying will be those applying to such income.

If there is an excess of reported income over the amount allocated (for example if the unit trust has invested in another reporting fund and has itself received reports of income which was not actually distributed to it) then the excess must be treated by the participant in the same way as the allocated income (that is as miscellaneous foreign income (under Chapter 8 of Part 5 of ITTOIA 2005).

Remittance basis users

Where individuals not domiciled in the United Kingdom are taxed on the remittance basis then the normal remittance basis rules will apply to income arising from the reporting fund.

In the case of income that is reported but is not distributed then that income has not been remitted to the UK.

OFM27330 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to income tax: transparent funds [January 2012]

...Income: UK tax treatment of investors

No matter what the legal form of a transparent reporting fund, for UK

tax purposes the income of an income transparent fund is treated as arising directly to its investors (UK investors are charged to tax on income arising net of a deduction for proper expenses of the management of the fund in question, and this is the case for both unit trusts and contractual arrangements). So, for example, if a fund receives interest income then UK investors are charged to tax on their proportionate share of that income as it arises, irrespective of whether or not it is actually distributed to them. Investors should receive a "voucher" or other report from the fund to tell them what proportion of the fund's income they are entitled to, and the split between interest, dividends, property income, etc. Investors should ask their fund manager for such a voucher or report if they do not receive one.

If a transparent reporting fund holds investments in other reporting funds then investors are also taxable on their proportionate share of any income reported but not actually distributed by the underlying fund (regulation 94(2)). This will become part of the excess to be reported by the transparent reporting fund. Such excess reported income is charged to tax as miscellaneous foreign income under Chapter 8 of Part 5 ITTOIA 2005 (regulation 97(2)), and it is chargeable at investors' highest tax rate.

Remittance basis users

In a case where the reporting fund is transparent for UK tax purposes then the income will arise from the underlying assets and not from the fund. In such a case the income may sometimes arise in the UK (even though the fund itself is domiciled offshore). Where the income arises in the UK the remittance basis does not apply. Where the income arises offshore then the remittance rules will apply.

OFM27400 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to corporation tax - Regulation 98 [January 2012]

Corporate investors in offshore funds will be chargeable to corporation tax on any distributions received from reporting funds under general principles, and on any excess of reported income of the fund invested in under regulation 94(1) and (2). Where such investors are taxable under regulation 94(1) on excess reported income, that amount will be treated as exempt if it would be exempt had it been an actual distribution.

The bond fund rules in Chapter 3 of Part 6 CTA 2009 (relationships treated as loan relationships) may apply if a reporting fund held more that 60% by value of its investments in debt type assets at any time during an investing company's accounting period – see the Corporate Finance Manual ('CFM')).

36.3.6 *Can deemed RF income be remitted?*

Legislation frequently deems an individual to receive income or gains (eg deemed s.13 gains, deemed s.624 income, deemed s.720 income). In these cases the legislation always has a provision which deems some actual funds to be derived from the individual's deemed income. So if those actual income or gains are received by the individual (or a relevant person) there is a taxable remittance. In this case however there is no such provision. So it appears at first sight that the deemed RF income cannot be remitted. While the actual income in the hands of the offshore fund could be received in the UK, those funds do not derive from the deemed RF income. The deemed RF income perhaps derives from those funds.

This does lead to a result that might be thought too good to be true. So it is more than possible that a court might read in an implied provision that the actual income of the offshore fund is derived from the deemed RF income, though that verges on legislation rather than construction.

HMRC may not agree. The OF Manual provides:

> **OFM27950 Reporting funds: tax treatment of participants in reporting funds: remittance basis** [January 2012]
> Where individuals not domiciled in the United Kingdom are taxed on the remittance basis then the normal remittance basis rules will apply to income arising from the reporting fund.
> In the case of income that is reported but is not distributed then that income has not been remitted to the UK.
> **Transparent Funds**
> In a case where the reporting fund is transparent for UK tax purposes then the income will arise from the underlying assets and not from the fund. In such a case the income may sometimes arise in the UK (even though the fund itself is domiciled offshore). Where the income arises in the UK the remittance basis does not apply. Where the income arises offshore then the remittance rules will apply.
> **Disposals**
> The proceeds of a disposal of a reporting fund will normally constitute a 'mixed fund' for the purposes of the remittance basis rules. This is because the proceeds may have been funded by undistributed reported income as well as by the original investment and any capital growth.

36.4 Transparent reporting funds

Regulation 97 OFTR provides:

> (1) This regulation applies if—

(a) a reporting fund is a transparent fund, and
(b) some or all of the excess specified in regulation 94(2) is treated as income of a participant by virtue of that provision.

(2) Any amount to which paragraph (1) applies is charged to income tax under Chapter 8 of Part 5 of ITTOIA 2005 as relevant foreign income within the meaning given by section 830 of ITTOIA 2005 for the year of assessment in which the distribution is made, but sections 688(1) and 689 of ITTOIA 2005 do not apply.

36.5 Non-reporting fund with interest in reporting fund

Regulation 16 OFTR provides:

(1) This regulation applies if a non-reporting fund which is a transparent fund has an interest in a reporting fund.
(2) In the case of any excess specified in regulation 94(1) or (2) which is treated, under that regulation, as made to the non-reporting fund, the Tax Acts have effect as if the excess were additional income of the participants in the non-reporting fund in proportion to their rights.
(3) The additional income is treated as arising on the same date as the excess is treated as made to the non-reporting fund.
(4) If a participant in the non-reporting fund is chargeable to income tax, the additional income is charged as relevant foreign income within the meaning given by section 830 of ITTOIA 2005.

The OF Manual provides:

OFM13200 Investors in non-reporting funds: distributions: the charge to tax: 'transparent' funds [January 2012]
... **Transparent non-reporting funds with interests in reporting funds (regulation 16)**
There is a further point to consider with regard to transparent non-reporting funds that hold interests in reporting funds. That is, where the underlying reporting fund does not distribute all of its 'reportable income' (see OFM24000 and OFM27000 onwards) then the excess would, if a UK investor held a direct interest in the fund, be treated as income (regulation 94). To ensure that principle is maintained, regulation 16 provides that where the interest is held by a non-reporting fund which is transparent for income purposes then the reportable excess will be similarly treated as additional income in proportion to each investor's rights.

36.6 Fund transactions treated as non-trading

This topic is dealt with in chapter 6 part 3 OFTR. A full discussion needs

a long chapter to itself. In short, reg.80 OFTR provides:

> (1) This regulation applies if a diversely owned fund carries out an investment transaction in an accounting period.
> (2) The investment transaction is treated as a non-trading transaction.

The consequence of non-trading status is that the profit of the transaction is not income and need not be distributed by reporting funds.

The definitions of diversely owned and investment transaction are not considered here. HMRC argue that reg.80 is not to be taken to mean what it says:

> HMRC is aware that there has been recent industry speculation as to whether regulations contained within Chapter 6 of Part 3 of The Offshore Funds (Tax) Regulations 2009 (the 'regulations'), setting out when transactions by certain offshore 'reporting' funds are not treated as trading transactions for the purposes of computing 'reportable income', has any relevance to matters relating to the taxation of such funds potentially trading in the UK through a permanent establishment or agent. HMRC is therefore confirming that there is no such relevance.
> Regulation 80(2) of the regulations, which confirms that certain transactions are treated as non-trading transactions, applies only for the purposes of Chapter 5 of the regulations; that is for the purposes of computing an offshore fund's reportable income in order to establish the UK tax position of participants in the fund.
> The regulations are made under powers enabling provision to be made about the tax treatment of participants in an offshore fund (section 41 FA 2008) and they should be read in that context. Specifically, the regulations do not make or purport to make rules that affect the taxation of any of the funds referred to therein as 'offshore funds'; only to regulate the taxation of the returns from those funds to persons taxable under UK legislation. Funds that are taxable in the UK are dealt with by other legislation.
> It is a question of fact whether or not, for the purposes of that other legislation, a non-resident fund is carrying on a trade in the UK. Where such a fund is carrying on a trade in the UK through an investment manager operating here, the protection of the Investment Manager Exemption may be available in relation to any 'investment transaction' specified in the Investment Manager (Specified Transaction) Regulations 2009.[7]

36.7 Conversion from non-reporting fund to reporting fund

Regulation 48 OFTR provides:

---

7 Accessible *http://www.hmrc.gov.uk/ctsa/invest-man-exempt.htm* published 2 Feb 2010.

(1) This regulation applies if an offshore fund ceases to be a non-reporting fund and becomes a reporting fund.
(2) A participant in the fund may make an election to be treated—
(a) as disposing of the interest owned by the participant in the non-reporting fund at its market value on the disposal date, and
(b) as acquiring a holding in the reporting fund at the beginning of the reporting fund's first period of account.
This is subject to paragraph (5).
(3) Chapter 5 of this Part applies to determine the offshore income gain arising on the deemed disposal referred to in paragraph (2)(a).
(4) The deemed acquisition referred to in paragraph (2)(b) is treated as made for the same amount as the deemed disposal referred to in paragraph (2)(a).
(5) An election may not be made under paragraph (2) unless the offshore income gain arising on the deemed disposal referred to in paragraph (2)(a) (determined in accordance with paragraph (3)) is greater than zero.
(6) If the participant is chargeable to income tax, the election mentioned in paragraph (2) must be made by being included in a return made for the tax year which includes the disposal date.
(7) If the participant is chargeable to corporation tax, the election mentioned in paragraph (2) must be made by being included in the participant's company tax return for the accounting period which includes the disposal date.
(8) In this regulation—
"company tax return" has the same meaning as in Schedule 18 to the Finance Act 1998(a);
the "disposal date" means the final day of the last period of account before the fund becomes a reporting fund.

36.8 2009 transitional rules

I do not attempt to discuss transitional rules in detail.[8]

---

8 Note also the following HMRC statement: "HMRC regrets that ... the Statutory Instrument (SI 2009/3139) ... contained an error with respect to long periods of account.
The intention was that the transitional rules, which provide for an existing fund to apply for distributing status for periods ended on or after 1 December 2009, would not apply to any period ending after 31 May 2012 (not 2011 as provided for in the instrument).
The government intends to amend the cut-off date given in sub-paragraph 3(3B) of Schedule 1 to The Offshore Funds (Tax) Regulations (SI 2009/3001 as amended by SI 2009/3139) to read 31 May 2012.

Reg.30 OFTR provides:

(1) No liability to tax arises under regulation 17 in respect of any rights in an offshore fund to which this regulation applies if the rights are acquired by a person—
  (a) before 1st December 2009, or
  (b) in accordance with paragraph (2).

(2) Rights are acquired in accordance with this paragraph if—
  (a) the rights are acquired by the participant in accordance with a legally enforceable agreement in writing that was entered into by the participant before 30th April 2009,
  (b) in the case of an agreement which was conditional, the conditions are met before that date, and
  (c) the agreement is not varied on or after that date.

(3) Rights of a person in a fund are rights in an offshore fund to which this regulation applies if, on the date on which the person acquired the rights, those rights did not constitute a material interest in an offshore fund within the meaning of that expression given by section 759 of ICTA.

Reg.43 OFTR provides for the case where a person holds an offshore fund before 2009 and purchases more of the same fund:

(1) This regulation applies if—
  (a) a person acquired rights (the "protected rights") in an offshore fund—
    (i) before 1st December 2009, or
    (ii) in accordance with paragraph (2),
  (b) immediately before 1st December 2009 those rights did not constitute a material interest in an offshore fund within the meaning of that expression given by section 759 of ICTA, and
  (c) on or after 1st December 2009 the person acquires additional rights in the offshore fund (the "non-protected rights").

(2) Rights are acquired in accordance with this paragraph if—
  (a) the rights are acquired by the participant in accordance with a legally enforceable agreement in writing that was entered into by the participant before 30th April 2009,
  (b) in the case of an agreement which was conditional, the conditions are met before that date, and
  (c) the agreement is not varied on or after that date.

This announcement therefore gives notice of the intended amendment, which will be made at the first convenient opportunity."

(3) For the purposes of tax in respect of chargeable gains—

(a) section 104 of TCGA 1992 (share pooling: general interpretative provisions) applies as if the protected rights were assets of a different class from the non-protected rights, and

(b) all the protected rights must be treated as disposed of before any of the non-protected rights may be so treated.

CHAPTER THIRTY SEVEN

ACCRUED INCOME PROFITS

37.1 Accrued income profits: Introduction

This subject needs a book to itself. It would be an unrewarding labour since the rules are "widely ignored by both taxpayers, their advisors and within HMRC".[1] This chapter focuses on the questions closest to the themes of this book, but one can only approach those questions after understanding how the provisions operate, at least in the standard case (I do not consider specialist topics such as variable rate securities or conversions of securities).

The provisions apply on a transfer of securities. The AIP provisions do not apply for corporation tax.

37.1.1 *Cross references*

The following topic is discussed elsewhere:

1.7 Unremittable income: accrued income profits

37.2 AIP securities

Section 619(1) ITA defines "securities":

> In this Chapter "securities" includes—
>
> (a) any loan stock or similar security other than an excluded security, and
>
> (b) shares in a building society which are qualifying shares for the purposes of section 117(4) of TCGA 1992 (qualifying corporate bonds),

---

1 Responses to Consultation Exercise on Reform of the AIP, Inland Revenue, December 2004; consistent with that, several of the worked examples in the SAI Manual are difficult to justify.

Reform was promised in 2006 but radical change was rejected and the matter was dropped.

but (subject to para (b)) it does not include any shares in a company.[2]

I refer to securities within this definition as "**AIP securities**". Section 619(3) ITA sets out seven categories of "Excluded securities":

> (3) In this section "excluded securities" means—
> (a) national savings certificates (including Ulster Savings Certificates as defined in section 693(7) of ITTOIA 2005),
> (b) war savings certificates,
> (c) uncertificated eligible debt security units as defined in section 986,
> (d) certificates of deposit (see section 1019),
> (e) a security which is a right falling within section 552(1)(c) of ITTOIA 2005 at the time of the transfer in question,
> (f) a security that meets the redemption conditions (see subsection (5))[3], and
> (g) a security that is a deeply discounted security within the meaning of Chapter 8 of Part 4 of ITTOIA 2005.[4]

Thus deeply discounted securities are not AIP securities: (subject to the 2003 transitional rule) the DDS rules take priority over the AIP rules.

37.2.1 *Securities "of the same kind"*

This expression is strictly understood. Section 619(6) ITA provides:

---

2 Section 619(2) ITA adds:
"(2) For the purposes of subsection (1)(a), it does not matter—
(a) whether the security is of the government of the UK, any other government, any public or local authority in the UK or elsewhere, or any company or other body,
(b) whether or not the security is secured,
(c) whether or not the security carries a right to interest of a fixed amount or at a fixed rate percentage of the nominal value of the security, or
(d) whether or not the security is in bearer form."
This can only be for the avoidance of doubt, because it only expresses the usual meaning of "security".

3 Defined s.619(5) ITA:
"The redemption conditions are that—
(a) the security is redeemable,
(b) the amount payable on its redemption exceeds its issue price, and
(c) no return other than the amount of that excess is payable on it."

4 Section 619(4) ITA contains a transitional exception: "But subsection (3)(g) does not include a security if, on its transfer, Chapter 8 of Part 4 of ITTOIA 2005 would apply subject to the rules in sections 454 to 456 of that Act (listed securities held since 26 March 2003)."

Securities are treated as being of the same kind for the purposes of this Chapter if they—

(a) are treated as being of the same kind by the practice of a recognised stock exchange, or

(b) would be so treated if dealt in on such an exchange.

SAI Manual provides:

4040 Accrued Income Scheme: what are "securities" [October 2008] ... For example, Treasury 5% 2004 is not the same kind as Treasury 5% 2012. This is similar to the capital gains tax concept of securities of a particular class.

37.3 "Transfer"

In outline, the definition is in s.620(1) ITA:

References in this Chapter to the transfer of securities are—

(a) to the transfer of securities by way of sale, exchange, gift or otherwise,

(b) to the conversion of securities in any case where there is no transfer of the securities within para (a),

(c) to the redemption of variable rate securities in any case where there has been a transfer of the securities at any time before redemption, or

(d) to a transaction or event treated as a transfer under—

(i) section 648(1) or (3) (strips of gilt-edged securities),

(ii) section 649(4) (new securities issued with extra return),

(iii) section 650(2), (4) or (6) (trading stock appropriations etc),

(iv) section 651(2) (owner becoming entitled to securities as trustee), or

(v) section 652(2) (securities ceasing to be held on charitable trusts).

Thus there are altogether eight types of transfer. In this book I consider only the first type, which are transfers in the normal sense of the word. Section 620(2) provides one exception:

But subsection (1)(a) does not include—

(a) the vesting of securities in personal representatives on death...[5]

5 Paragraph (b) is a transitional rule for pre-2003 DDS (not discussed here).

37.4 Transfer "with accrued interest"

37.4.1 *The commercial background*

The Debt Management Office explains the terminology **"clean"** and **"dirty"** price:

> The following example is taken from the DMO website for 30 November 2004 and shows close of business data for 5% Treasury Stock 2014:
> **5TY145 | Treasury 2014 | GB0031829509 | 103.17 | 104.344033 | 4.592604**
> The first three fields are all means of identifying the gilt. The first is the DMO's internal identifier code and the second a shortened form of the gilt's name. The third field is the ISIN number (the International Security Identification Number – an identifier number used by the London Stock Exchange).
> The next three fields give price and yield information. The two prices shown of £103.17 and £104.344033 are known as the 'clean' and 'dirty' price respectively. Clean prices do not include accrued interest whereas dirty prices do (see the section on accrued interest on page 15). The clean price is typically the price, which is quoted when agreeing a purchasing or selling price. However, the actual amount of money which will change hands is based on the dirty price and will reflect settlement on the business day after the transaction.
> So, on the basis of the reference price on 30 November 2004, every £1,000 nominal of 5% Treasury Stock 2014 was worth £1,043.44.[6]

Note that for tax purposes the consideration for a gilt is "the actual amount of money which will change hands" - the dirty price.

SAI Manual explains the terminology ex-dividend and cum-dividend:

> **4020. Transfers "with accrued interest" and "without accrued interest"** [July 2007]
> **... Sales with accrued interest ("cum div")**
> Most sales of marketable securities are "cum div". That is, the buyer is entitled to the next interest due. As an interest payment date on a security approaches, its market price increases to reflect the increase in value of the buyer's right to the interest. In other words, the price reflects accrued interest.
> For example, £100,000 8% Treasury Stock 2002–06 is transferred cum div on 19 April. 14 days' interest has accrued since interest was last paid

6 A Private Investor's Guide to Gilts, Dec 2004, accessible *http://www.dmo.gov.uk*.

on 6 April. Accrued interest is £307 (14/365 × 8% × 100,000)...

Sales without accrued interest ("ex div")

Not all sales of securities are "cum div". This is because gilt-edged securities, and some corporate bonds, have an "ex div" or "ex coupon" date. The next interest coupon is paid to the person who is registered as the holder of the security at that date. So if the security is sold in the "ex div" period, the seller collects and keeps the next interest due after the sale. For gilts, the "ex div" period is 7 business days before the coupon date (except for 3 ½% War Loan stock, for which it is 10 business days). Other securities may have a similar, or shorter, "ex div" period.

Consequently the market price of a security sold "ex div" reflects the fact that the purchaser will own the security for a short period from the date of purchase to the next interest payment date. This is a period over which interest accrues but for which the interest is received not by him but by the seller. The interest accrued over such a period is known as rebate interest. It is treated in the opposite way to the more normal accrued interest associated with a "cum div" sale.

For example, £100,000 8% Treasury Stock 2002–06 is transferred ex div on 29 March. 7 days' interest has accrued from the day after the transfer to the next interest date, 6 April. Accrued interest is £153 (7/365 × 8% × 100,000). ...

37.4.2 *Definition of with/without accrued interest*

Section 623(1) ITA provides a commonsense definition:

> The general rule is that securities are transferred with accrued interest for the purposes of this Chapter if they are transferred with the right to receive interest payable—
>
> (a) in a case where the settlement day is an interest payment day, on the settlement day, and
>
> (b) in any other case, on the first interest payment day after the settlement day.

Section 624(1) ITA provides the corresponding definition of a transfer "without accrued interest":

> The general rule is that securities are transferred without accrued interest for the purposes of this Chapter if they are transferred without the right to receive interest payable as mentioned in section 623(1)(a) or (b).

The definitions are comprehensive so every transfer must be either with or without accrued interest, and they are simply English paraphrases of the

technical expressions *cum dividend* and *ex dividend* (or cum-div and ex-div).

The terms "interest" "settlement day" and "interest period" are defined but the definitions are not considered here.

Thus whether a market sale is with or without accrued interest depends only on the date of the sale, whether it is before or after the ex div date. Vendors and purchasers have no choice in the matter except by timing the sale. Whether an off-market sale is with or without accrued interest is a matter for the parties to agree.

37.5 Deemed interest payment, credit and debit

Section 632(1) ITA provides:

> In the case of a transfer of securities with accrued interest, for the purposes of this Chapter a payment is treated as made by the transferee to the transferor in the interest period in which the settlement day falls.

It is useful to have some terminology to describe this. I refer to this payment as "**a deemed interest payment**". The transferor (deemed to receive the payment) has **"a deemed interest credit"**. The transferee (deemed to make the payment) has **"a deemed interest debit"**.

Section 632 then defines the amount of the deemed payment. In outline:

> (2) The amount of that payment depends on whether the transfer is under an arrangement by which the transferee accounts to the transferor separately—
>
> (a) for the consideration for the securities, and
>
> (b) for gross interest accruing to the settlement day.
>
> (3) If the transfer is under such an arrangement, the amount of the payment is the amount of gross interest which the transferee accounts for.
>
> (4) If—
>
> (a) the transfer is not under such an arrangement, and
>
> (b) the settlement day is itself an interest payment day for the securities,
>
> the amount of the payment is the amount of interest payable on the securities on that day.
>
> (5) If—
>
> (a) the transfer is not under such an arrangement, and
>
> (b) the settlement day is not an interest payment day for the securities,
>
> the amount of the payment is an amount equal to—
>
> $I \times (A \div B)$
>
> where—
>
> I is the interest payable on the securities on the first interest payment day after the settlement day ("the payment day"),
>
> A is the number of days in the period beginning with the first day on which that interest accrues and ending with the settlement day, and

B is the number of days in the period beginning with the first day on which that interest accrues and ending with the payment day.

Why are there two alternative methods of ascertaining the amount of the deemed interest payment, in subsections (3) and (4)(5)? SAI Manual provides:

> **4140. Payments on transfers with accrued interest** [July 2007]
> **...** The [deemed interest] payment is the amount of the gross interest accruing to the settlement day, which in most cases is shown separately from the consideration for the securities, under the arrangement (that is, the contract note) by which the transferee accounts to the transferor. This is commonly known as the "clean price" basis.
> In exceptional cases – for example, sales off market, gifts, settlements, and deemed transfers – there will be no contract note and it will it be necessary to compute the amount of the [deemed interest] payment. Where this is done, the formula I × A/B is used...

The Manual offers a straightforward example of the two methods of computation on a single sale with accrued interest:

> *Example*
> Harriet sells corporate bonds to Howard on 15 March 2005. Interest is paid on the bonds on 31 March, 30 June, 30 September and 31 December. Howard will receive the interest coupon due on 31 March 2005, that is, the sale is cum div. The interest Howard receives is £200.
> If Harriet agrees to sell the bond to Howard for a "clean price" of £10,000 plus an additional £165 for accrued interest, she is taxable on accrued income profits of £165 in 2004–05. Howard will reduce his accrued income profits by £165.
> Suppose that, instead, Harriet simply agrees to sell the bond to Howard for £10,165. The relevant interest period is 1 January to 31 March 2005, so B is 90 days. The number of days up to and including 15 March (A) is 74. So the "accrued amount" is £200 × 74/90 = £164.44. Again, Harriet's taxable accrued income will be £164, and Howard's reduced by £165 (following the principle of rounding in the taxpayer's favour).

In practice the two methods normally give the same result (as is the case in the HMRC example) though there could be cases where the parties account for accrued interest in some manner which is not the same as the formula I × A/B.

It is possible for the amount of the deemed interest payment to be nil, eg in the case of a transfer on the interest payment day.

Section 633 ITA contains corresponding rules on a transfer without

accrued interest.

The SAI Manual gives a straightforward example of a sale with accrued interest:

> **4160. Examples of transfers with and without accrued interest** [July 2007]
> *Example 1*
> Anthony has a holding of £100,000 Treasury Stock 8¼% 2007, a British Government security which pays interest on 16 January and 16 July each year. He arranges for his holding to be sold on the Stock Exchange on 19 March 2006. The contract note from his stockbroker, dated 19 March 2006 contains the following information:
>
> | | |
> |---|---|
> | £100,000 Treasury Stock 8¼% 2007 sold @ 114 | £114,000 |
> | Plus 56 days' accrued interest | £1,315 |
> | Payable to you on 20 March 2006 | £115,315 |
>
> The contract note contains all the information that is needed for the purposes of the AIS.
> - Treasury Stock 8¼% 2007 falls within the definition of "securities" – Section 619 ITA 2007
> - the securities have been transferred, and the transfer is treated as taking place on 19 March because there was a contract for their sale made on that date – Section 620 ITA 2007
> - the settlement day for the transfer is 20 March because under Stock Exchange rules bargains in gilt-edged securities are settled on the next business day – Section 674 ITA 2007
> - the transfer is with accrued interest because the purchaser gets the right to the interest payable on 16 July 2006, the next interest payment day to fall after 20 March 2006 – Section 623 ITA 2007
> - under Stock Exchange rules, accrued interest on gilts is accounted for separately from the bargain price, so the accrued amount is £1,315 – Section 632 ITA 2007
> - the interest period in which the settlement day falls is the period 17 January 2006–16 July 2006 – Section 673 ITA 2007.
>
> Accordingly in this interest period Anthony (the transferor) is treated as having received a payment £1,315 and the transferee as having made a payment of £1,315 (Section 632 ITA 2007).

The Manual then gives a straightforward example of a sale without accrued interest (ex-div):

> *Example 2*
> Facts as in Example 1, except that the sale takes place on 1 July 2006 which falls within the "ex-dividend" period for the stock.[7] The contract note from the

7 This is not factually correct: a sale 15 days before the interest payment date would not be ex dividend. That does not spoil the illustrative force of the example but using correct figures would emphasise the triviality of the amounts involved, even in

stockbroker shows:

£100,000 Treasury Stock 8¼% 2007 sold @ 114	£114,000
Minus 15 days' rebate interest	- £352
Payable to you on 2 July 2006	£113,648

The transfer of securities is treated as made on 1 July 2006. The settlement day is 2 July 2006. The transfer is without accrued interest because this is an "ex-div" sale where the seller retains the right to the interest payable on 16 July 2006 (Section 633 ITA 2007). The rebate amount is £352 and the relevant interest period is that from 17 January–16 July 2006

Accordingly in this interest period Anthony (the transferor) is treated as having made a payment of securities of £352 and the transferee as having received a payment of £352.

The Manual then gives a straightforward example of an off-market sale with accrued interest (cum-div):

Example 3

Stuffed Dodos Ltd is a UK company which has issued unquoted unsecured loan stock paying interest each year on the Tuesday following Easter Day. Thus in 2005 interest is payable on 5 April and in 2006 interest is payable on 18 April. Joe Smith owns £10,000 nominal of this stock and agrees to sell £4,000 to his aunt Matilda. Under the agreement, which was made on 8 July 2005, Matilda is to pay £5,000 for the stock on 19 August. The interest payable on 18 April 2006 is at the rate of £5.50 per £100 nominal (5.5%).

Even though the loan stock is unsecured, it constitutes "securities" for the purpose of the scheme. The securities are treated as transferred on 8 July 2005 – Section 620(3) ITA 2007.

The settlement day is 19 August because that is the day Matilda has agreed to pay for the securities and it falls before the next interest payment day following the agreement – Section 674(3) ITA 2007. The transfer is with accrued interest (Section 623 ITA 2007).

Because the accrued interest is not accounted for separately, in calculating the accrued amount, the formula in Section 632(5) ITA 2007 is used. A is the period from 5 April 2005 to 19 August 2005. B is the period from 5 April 2005 to 18 April 2006. I is the interest applicable to the securities for the period (5.5% × £4,000 = £220). The accrued amount is thus 137/379 × £220 = 79.

The interest period in which the settlement day falls is that from 5 April 2005 to 4 April 2006. Accordingly in that interest period Joe is treated as receiving as payment of £79 and Matilda as having made a payment of £79.

37.6 Accrued income profits and losses

Tax is *not* charged on deemed interest credits. But armed with the concept of deemed interest payments, we can turn to the terms "accrued income

---

substantial transactions.

profits" (and "accrued income losses") which are defined in ss.628 and 629 ITA:

> **628 Making accrued income profits and losses: general rule**
> (1) This section sets out the general rule for determining whether a person is treated as making accrued income profits or accrued income losses where securities are transferred by or to the person. ...
> (3) A separate calculation is to be made for each kind of security that is transferred by or to the person and for each interest period of each such kind of security.
> (4) Each such calculation is to find—
> (a) the total amount ("A") of the payments treated under this Chapter as made to the person in the interest period in question in respect of transfers of securities of the particular kind, and
> (b) the total amount ("B") of the payments treated under this Chapter as made by the person in that period in respect of such transfers.
> (5) A person is treated as making accrued income profits in an interest period as a result of transfers of securities of a particular kind if A exceeds B.
> (6) A person is treated as making accrued income losses in an interest period as a result of transfers of securities of a particular kind if B exceeds A. ...
> **629 Calculating accrued income profits and losses where section 628 applies**
> (1) If section 628(5) applies, the amount of the accrued income profits treated as made is equal to the excess mentioned in section 628(5).
> (2) If section 628(6) applies, the amount of the accrued income losses treated as made is equal to the excess mentioned in section 628(6).

Thus deemed interest debits are first set against deemed interest credits of the interest period for securities of the same kind. If or so far as they cannot be set against those interest credits, they constitute accrued income losses.

37.7 Charge on AIP income

I refer to the accrued income profits treated as made under s.628 ITA as "**AIP income**".

Section 616 ITA imposes the charge on AIP income:

> Income tax is charged on accrued income profits.

37.8 Relief for accrued income losses

Section 679 ITA allows accrued income losses to be set against interest from securities of the same kind:

> (1) This section applies if—
>
> (a) a person is liable for income tax on interest on securities of any kind which is due at the end of an interest period of the securities,
>
> (b) in that period accrued income losses are made as a result of transfers of those securities, and
>
> (c) the period ends with an interest payment day.
>
> (2) No liability to income tax arises in respect of the interest to the extent that it does not exceed the losses.

SAI Manual provides:

> **4120. Calculating accrued income profits and losses: relief for losses** [July 2007]
>
> **...** In other words, the losses always reduce the interest subsequently received on those securities, and cannot be used to offset accrued income profits for earlier interest periods or arising on securities which have different interest periods. Where the interest period spans the tax year, losses are therefore not allowed until the interest on the securities is taxed in the following tax year.

For the interaction of loss relief and DTR, see 37.15 (Double taxation relief).

37.8.1 *HMRC examples*

SAI Manual provides 3 examples. The first example is a straightforward sale and purchase of one kind of security with accrued interest, looking at the position of the seller:

> **4130 Calculating accrued income profits and losses: examples** [July 2007]
>
> Antoinette has £100,000 Treasury Stock 7¾ % 2006, which has interest dates of 8 March and 8 September. She makes the following transactions in the stock.

Transaction	**Profit/loss**[8]
19 March 2006 sells £100,000	£2,107
21 March 2006 buys £50,000	(£1,361)

8 This refers to deemed interest credits/debits, not the commercial profit/loss but I am unable to see how the figures of 2107, 1361 and 131 are derived: can any reader explain?

12 May 2006 sells £50,000	(£131)
	£615

The aggregate [accrued income] profit is £615, taxable for 2006–07, the tax year in which the interest period ended, even though two of the transactions occur in 2005–06.

The second example includes purchases and sales, with and without accrued interest, and involving two different kinds of security, looking at the position of the seller:

Jean made the following transactions in securities between 28 February 2005 and 5 April 2006:

19 Mar 2005	bought £100,000 Treasury Stock 7½% 2006 (interest payment dates 7 June and 7 December)
26 May 2005	bought £50,000 Treasury Stock 7½% 2006 ex div
15 Sept 2005	sold £20,000 Treasury Stock 7½% 2006
22 Sept 2005	bought £50,000 Treasury Stock 4½ % 2007 (interest payment dates 7 March and 7 September)

The [accrued income] profits and losses arising on these transactions are:

Transaction date	**Interest period**	**Profit/loss**
19 March 2005	08/12/04–07/06/05	(£1,395)
26 May 2005	08/12/04–07/06/05	£82
15 Sept 2005	08/06/04–07/12/05	£271
22 Sept 2005	08/09/04–07/03/05	(£778)

The profits and losses for 2005–06 are:

- Loss of £1,313 (1,395 minus 82) against interest of £3,750 (£100,000 × 7½% × ½) received on Treasury Stock 7½% 2006 on 7 June 2005.
- Profit of £271 (Treasury Stock 7½% 2006, interest period 8 June 2005–7 December 2005)
- Loss of £778 against interest of £2,250 received on Treasury Stock 4½ % 2007 on 7 March 2006.

The third example is a straightforward sale of a security with accrued interest, looking at the position of the purchaser:

Example 3

See Example 3 in SAIM4160 [set out below]. Joe Smith sells £4,000 unsecured loan stock in Stuffed Dodos Ltd to his Aunt Matilda on 19 August 2005. Interest is payable on 5 April 2005 and 18 April 2006. Neither Joe nor Matilda had any other transactions in securities.

The settlement day falls within the interest period 5 April 2005 to 4 April 2006. Joe is taxable on £79 for 2005–06 in respect of this interest period.

Matilda's loss of £79 is carried forward to 2006–07 to be set against the interest receivable for the period 5 April 2005 to 18 April 2006 (Section 637 ITA 2007 – see SAIM4120).

37.9 AIP remittance basis

Section 670A ITA provides:

> (1) This section applies if—
>
> (a) accrued income profits are made by an individual as a result of a transfer of foreign securities, and
>
> (b) section 809B, 809D or 809E (remittance basis) applies to the individual for the tax year in which the profits are made.
>
> (2) Treat the accrued income profits as relevant foreign income of the individual. ...
>
> (4) For the purposes of this section securities are "foreign" if income from them would be relevant foreign income.

This brings in the remittance basis. AIP income is fictional, deemed income, which could not be remitted. This is dealt with by s.670A(3) ITA which provides different rules depending on whether the individual receiving the AIP income is the transferor (the usual case of a sale with accrued interest) or the transferee. It is helpful to consider these two cases separately.

For the transferor, s.670A(3) ITA provides:

> For the purposes of Chapter A1 of Part 14 (remittance basis)—
>
> (a) if the individual[9] is the transferor—
>
> (i) treat any consideration for the transfer as deriving from the accrued income profits...

Thus the proceeds of sale of the securities are treated as containing the AIP income.

> (ii) if on the transfer the individual does not receive consideration of an amount equal to or exceeding the market value of the securities, treat the securities as deriving from the accrued income profits

Section 670A(3)(a)(ii) is the equivalent of the CGT rule for deemed gains on non-market value disposals.[10]

For the transferee, s.670A(3) ITA provides:

> (b) if the individual[11] is the transferee, treat the securities as deriving from the accrued income profits.

---

9 That is, the individual who makes the accrued income profits.

10 See 11.30 (CGT disposal not for market value).

11 That is, the individual who makes the accrued income profits.

If the taxpayer is the transferee, the AIP securities in the hands of the transferee are deemed to contain the AIP income. It makes no difference whether or not the sale is for market value.

The SAI Manual provides:

> **4380 - Accrued Income Scheme: remittance basis** [January 2010]
> ... In some cases, a remittance basis taxpayer will make an accrued income profit on a transfer of securities, but will not receive consideration equal to the market value of the securities.
> [1] This may happen when the securities are transferred 'ex-div' and the taxpayer is the transferee.
> [2] It may also happen where the taxpayer is the transferor, and makes a gift of the securities, or where the AIS rules treat an event as a transfer (for example, an appropriation of securities to trading stock).
> In such cases s.670A(3) ITA 2007 provides that the securities themselves are treated as deriving from the accrued income profits. This means that a charge will arise on the taxpayer when they, or some other 'relevant person', either bring the securities to the UK (if they are held in bearer form) or remit money or property deriving from the securities.

37.9.1 *Relief for losses*

What about accrued income losses accruing to a remittance basis taxpayer? The SAI Manual provides:

> **4380 - Accrued Income Scheme: remittance basis** [January 2010]
> ... Remittance basis taxpayers are able to obtain relief for accrued income losses. Losses arising on transfers of securities of a particular kind are set against interest received on securities of the same kind at the end of the relevant interest period, and will therefore reduce the amount of an individual's interest on those securities. There is an example of the interaction of the accrued income loss rules and the remittance basis rules at SAIM4390.

37.9.2 *Mixed funds and separating income/capital: Sale with accrued interest*

The consideration received by the transferor (vendor) for the sale of AIP securities with accrued interest will be a mixed fund, consisting in part of AIP income, and the mixed fund rules will apply. In strict law one cannot separate the AIP income from the other proceeds of sale. There are three reasons for this.

First, assume that:

(1) P will pay a single sum for the security to V's broker (the total price).

(2) The broker will then divide the total price into two parts (accrued interest and clean price) and pay the two parts into two separate accounts of the vendor.

There is already a mixed fund on receipt of the payment by the broker on behalf of the client at stage (1), and the broker's act in transferring the single payment into two accounts is an offshore transfer under the mixed fund rules. In theory one might avoid this difficulty if P could pay two separate sums, one in respect of accrued interest and one in respect of the clean price; but in practice on a market sale that would not be possible.

Secondly, the AIP income is a fictional, notional amount which is distinct from the sum paid for the accrued interest. It is like the CFC income in *Brikom*.[12]

Even if that were wrong, however, there is a third obstacle in s.670A(3) ITA, which provides:

> For the purposes of Chapter A1 of Part 14 (remittance basis)
> (a) if the individual is the transferor –
> (i) treat *any* consideration for the transfer as deriving from the accrued income profits.

Thus even if (contrary to my view) the amount that V, the transferor, received for the accrued interest could in principle be separated and did in principle constitute the AIP income, the effect of s.670A(4) is that any consideration for the securities sold by V is treated as deriving from the AIP income.

However HMRC do not take that view. The RDR Manual provides:

> **33550 - Remittance Basis: Identifying Remittances: Specific Topics: Accrued Income Scheme** [July 2010]
> Where a security is sold with accrued income and the proceeds paid into an account, the part of the proceeds representing accrued income will be taxable as income and subject to income tax under the Accrued Income Scheme (AIS)....
> Where an individual is chargeable on the remittance basis, accrued income profits arising from on transfers of a 'foreign security' are treated as relevant foreign income...
> For consistency of treatment between the AIS and the remittance basis regime, HMRC will follow the tax treatment delivered by the AIS and accept that an 'income amount' can be transferred to a separate 'income

12 See 59.2 (Characterisation).

> account' immediately upon transfer, that is, the proceeds are 'split' into two separate accounts immediately upon receipt into the individual's account. This 'income' could then be identified and taxed as such, without creating a mixed fund....
> To the extent that the remainder of the proceeds consist of capital or UK or non-taxable income (as opposed to, say, untaxed foreign income or gains) originally used in the purchase of the security ... the remainder of the proceeds could therefore be separately identified and remitted as such.[13]

37.9.3 *Mixed funds & separating income/capital: Sale without accrued interest*

The Manual does not expressly consider the alternative situation where a security is sold without accrued interest and the transferee makes an accrued income profit. There is no difference between the two situations, so the purchaser (transferee) could divide up the purchased securities into an AIP income fraction and a clean capital fraction and hold the two in separate security accounts. However the amounts involved will generally be trivial.

37.9.4 *Mixed funds and separating income/capital: Actual interest payment*

A similar problem arises on receipt of the interest payment after the sale. I refer to this as **"the actual interest payment"**. The recipient will be the purchaser (on a sale with accrued interest) or the seller (on a sale without accrued interest). Either way, the recipient will not normally be subject to income tax on the full amount of the interest as an deemed interest debit will normally generate an accrued income loss which can be set against the interest. The actual interest payment will therefore be a mixed fund. It is suggested that one can separate the actual interest payment on receipt

---

13 Similarly SAI Manual:

> "**4400. Remittance basis: Further examples** [January 2010]
> The disposal of a bond may be structured such that separate payment is made for the capital and the accrued income elements which may be paid into separate accounts. In this situation Section 632 ITA 2007 provides that the taxable amount shall be taken as the amount of gross interest accruing to the settlement day, which is separately identified as such.
> An individual who has received separate payments into two separate accounts in this way will not be regarded as having two mixed funds. In this situation a remittance of the capital element will not be regarded as a remittance of relevant foreign income."

into income and capital elements.

37.9.5 *HMRC examples*

The SAI Manual provides:

> **4390 - Accrued Income Scheme: remittance basis: examples**
> [January 2010]
> The application of the remittance basis to the AIS is not without complication.

The problem is identifying what is or represents the AIP income where there are deemed interest debits (in the statutory terminology, amount B's) to set against deemed income credits (amount A's.) There is no statutory solution.

> The following examples set out line HMRC takes in particular circumstances.
> *Example 1*
> Ann holds foreign securities 'of the same kind' X and Y which are disposed of in an interest period. They realise the following A and B amounts.

Security	**Proceeds**	**Amount A**	**Amount B**
X	100,000	10,000	
Y	60,000		(5,000)

> There is an accrued income profit of £5,000 which will be treated as deriving from the proceeds of sale of security X. Assuming the proceeds are paid into a new bank account, there will be a mixed fund comprising capital of £95,000 and an accrued income profit of £5,000.
> *Example 2*
> Isabelle has 3 holdings of the same kind of foreign security, X, Y and Z. They are disposed of in an interest period and the proceeds are paid into separate accounts. They realise the following A and B amounts.

Security	**Proceeds**	**Amount A**	**Amount B**
X	100,000	7,000	
Y	200,000	-	(10,000)
Z	70,000	4,000	

> In this situation there is an accrued income profit of £1,000. If the proceeds of disposal of all 3 bonds are paid into a single account there will be a mixed fund with capital of £369,000 and an accrued income profit of £1,000.

That is the easy case as there is only one possible answer.

> If the proceeds were paid into separate accounts HMRC would expect

> the accrued income profit to be allocated pro rata in proportion to the Amount A of securities X and Z or, if this would create an unreasonable result, by any reasonable method.

Careful time of purchases and sales would avoid the problem. The last example is somewhat theoretical and I set it out for completeness only:

> **4400. Remittance basis: Further examples** [January 2010]
> It is unlikely that there are many situations where UK and foreign securities will be 'securities of the same kind' for the purposes of the AIS scheme. It may, however, happen in the case of bearer securities. The following example outlines such a situation.
> Sam has both overseas and UK bonds 'of the same kind' and they are disposed of in the same interest period with the following results.
> *Example 3*

Security	**Proceeds**	**Amount A**	**Amount B**
X (overseas)	100,000	7,000	
Y (overseas)	200,000	-	(10,000)
Z (UK)	70,000	4,000	

> In this case the accrued income profit of £1,000 does not arise as the result of a transfer of foreign securities. There is a net Amount B of £3,000 as the result of the transferred foreign securities. There is therefore no relevant foreign income which Sam might remit to the UK. There is a UK accrued income profit of £1,000 which is taxable on an arising basis.

There are several odd things in this example. First it is assumed that if the bearer security is in the UK, the interest is UK source. That is not the test of the location of a source of interest. Perhaps it is assumed that the income is received in the UK. Secondly, one would have expected the deemed interest debit (amount B) to be set against the deemed interest credits pro rata, not set against foreign income first. But since in practice the point will never arise, it is not necessary to pursue that further.

37.9.6 *Position before 2008 and transitional rules*

Until 2008/09 a foreign domiciled individual was wholly outside the scope of the AIP rules on foreign securities.

Para 160 Sch 7 FA 2008 provides:

> The amendments made by paras 156 to 159 have effect in relation to transfers of securities where the settlement day is on or after 6 April 2008.

The new rules therefore catch all AIP securities even if held before the law changed in 2008.

37.9.7 *Commentary*

When one contemplates the complications of the AIP remittance basis, one appreciates the wisdom of the rule, which applied from the inception of the accrued income scheme in 1985 until 2008, under which the accrued interest scheme did not apply to foreign securities of remittance basis taxpayers. CGT filled the gap. The problems were not discussed, and as far as is known were not even considered, when the law was changed in 2008.

Most if not all readers who have studied the text to this point will agree that the current rule does not give sufficient weight to the desiderata of simplicity and administrative workability. The pre-2008 rule ought to be restored.

37.10 Excluded persons

The AIP exemptions use the concept of excluded transferor/transferee. Section 638 ITA provides:

> (1) This section applies if there is a transfer of securities in relation to which a person ("P") is an excluded transferor or excluded transferee.
> (2) In determining whether P has made accrued income profits or accrued income losses under section 628 (making accrued income profits and losses: general rule) and the amount of any such profits or losses, no account is to be taken of any payment treated as made by or to P on the transfer.

A person is not an excluded transferor/transferee in isolation. One is excluded in relation to a transfer of securities. An excluded person is broadly outside the AIP scheme.

37.11 AIP non-residence defence

Section 643 ITA provides:

> (1) A person is—
> (a) an excluded transferor in relation to a transfer by the person, and
> (b) an excluded transferee in relation to a transfer to the person,
> if the person is non-UK resident throughout the tax year in which the

transfer occurs.

The exemption avoids the AIP charge on UK and foreign AIP securities.[14] It also withholds the AIP relief. EN ITA explains the policy behind the rule:

> 1897. In practice it would be very difficult to apply the scheme to such non-residents consistently. While non-residents could take the benefit of relief for accrued income losses to get repayments of tax suffered if tax is deducted at source, it would be difficult to enforce the charge to tax on accrued income profits.

A person coming to or leaving the UK might time disposals to obtain AIP relief while UK resident, while making disposals on which a charge would apply while non-resident.

The temporary non-residence rules do not apply. However CGT may fill some of the gap left by the AIP non-residence defence. The gain on the disposal of AIP securities may be subject to CGT if the CGT temporary non-residence rules apply.

37.12 Trusts

37.12.1 *Application to trustees*

The TSE Manual provides:

> **3325. Do AIS provisions apply to trustee or beneficiary?**[March 2013]
>
> ***Accrued Income Scheme charge***
>
> If trustees (other than bare trustee – TSEM3320) transfer securities, any Accrued Income Scheme charge is that of the trustees. The trustees are chargeable at the trust rate, under Sections 481 and 482 ITA.
>
> The Accrued Income Scheme profit on a transfer of securities does not form the income of any beneficiary.
>
> ***Accrued Income Scheme allowance***
>
> The treatment of the loss depends on who received the income against which relief is due. If the trustees received the interest, they are entitled to the relief.
>
> The trustees may have mandated the interest to a beneficiary. The beneficiary should claim the loss against the interest.

14 Section 1015 ITA (if needed) could also restrict the territorial scope of the AIP charge, but the rules discussed here leave it no room to operate.

37.12.2 *Transfer to trust*

The TSE Manual provides:

> **3330.Securities go into trust: Accrued Income Scheme** [March 2013]
> When securities go into trust there is a transfer, for Accrued Income Scheme purposes. The transfer is from the settlor to the trustee.
> This includes
> - a settlor creates a new trust by transferring securities to the trustee
> - a person who holds securities for his own benefit declares he will in future hold them as trustee
> - at the end of an administration period, a personal representative starts to hold securities as trustee of a will trust.

37.12.3 *Transfer from trustees*

The TSE Manual provides:

> **3335. Beneficial interest in trust changes: Accrued Income Scheme** [March 2013]
> ***Change results from the terms of the trust***
> The terms of a trust may often result in changes in beneficial interests. For example, on the death of a life tenant the trust assets may pass absolutely to another beneficiary. Such changes in beneficial interest have no accrued income scheme consequences. Either there is no actual transfer, or the transfer simply produces self-cancelling deemed sums and reliefs.

SAI Manual makes the same point:

> **4050. What is a transfer?** [October 2007]
> ... The AIS is based on transfers of the legal ownership of securities, not the transfer of the underlying beneficial ownership. Thus, for example, there is no transfer for the purposes of the AIS if a beneficiary under a trust becomes absolutely entitled as against the trustees to securities forming part of the trust fund.

Returning to the TSE Manual:

> **3335. Beneficial interest in trust changes: Accrued Income Scheme** [March 2013] ...
> ***Change follows an action by the trustees***
> Sometimes a change is not a direct result of the terms of the deed. Trustees can use their powers to advance interests or appoint property. The exercise of these powers can amount to a transfer.

That seems inconsistent with what was said above.

> ***'Stranded' Accrued Income Scheme Allowance***
> A change in beneficial owner can result in an Accrued Income scheme allowance being 'stranded'. It is no longer available to set against the interest. For example, the trustee could have bought securities 'cum dividend' (with a right to the dividend). Shortly afterwards a beneficiary could become absolutely entitled to the trust assets following a contingency. The contingency does not involve any transfer for Accrued Income Scheme purposes. This means the trustee's Accrued Income Scheme loss is lost. The beneficiary was never entitled to the loss, so cannot set it against subsequent interest.

37.12.4 *Appointment of new trustees*

The TSE Manual provides:

> **3340. Accrued income scheme: change of trustees** [March 2013]
> ***Trustees remain resident in the UK***
> There are no accrued income scheme consequences when trustees change, but the trustees of the settlement (see TSEM1461) remain resident in the UK. The change simply produces self-cancelling deemed profits and losses.
> ***Trustees change from resident to non-resident***
> As the new trustees are not resident, they do not satisfy the 'residence requirement' of the accrued income scheme. The appointment of non-resident trustees is a transfer of the securities by the resident trustees. ...
> ***Trustees change from non-resident to resident***
> As the old trustees were not resident, they do not satisfy the 'residence requirement' of the accrued income scheme. The change of trustees is a transfer of securities to the resident trustees.

This may have been right before 2006, but now that trustees are treated as a single person (distinct from the actual trustees) it is considered that the appointment of new trustees (wherever resident) is not a transfer for AIS purposes.

37.13 Settlor-interested trusts

37.13.1 *UK resident settlor-interested trusts*

Section 667(1) ITA provides:

> If the trustees[15] of a settlement are treated as making qualifying accrued income profits,[16] those profits are to be taken to be income arising under the settlement for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor).

I am not sure if this is necessary, but perhaps it could have been argued that although "tax is charged on accrued income profits" (s.616) such profits are nevertheless not "income arising under a settlement". Perhaps the provision is just for symmetry with the provision which follows for non-resident trusts.

The rate of tax in the absence of s.624 is 45%, so s.624 can only reduce the tax rate (or make no difference).

37.13.2 *Non-resident trusts*

In the absence of express provision, AIP income of non-resident trustees would not fall within the settlement provisions because the trustees would qualify for the AIP non-residence defence. Section 667 ITA provides:

> (2) Subsection (3) applies if the trustees of a settlement—
>
> (a) are non-UK resident or domiciled outside the UK throughout a tax year in which an interest period or part of an interest period falls, and
>
> (b) would have been treated as making an amount or an additional amount of qualifying accrued income profits in the interest period if the trustees had been UK resident or domiciled in the UK during a part of each such tax year.
>
> (3) The amount or additional amount of qualifying accrued income profits that the trustees would have been treated as making is to be taken to be income arising under the settlement for the purposes of Chapter 5 of Part 5 of ITTOIA 2005.

Thus the AIP income of a settlor-interested trust is within the scope of s.624 ITTOIA. However, the s.624 remittance basis can apply.

---

15 Defined in s.667(4)(b) ITA.

16 Defined in s.667(4)(a) ITA:

> "'qualifying accrued income profits' means accrued income profits which are treated as made—
>
> (i) under section 628(5), or
>
> (ii) under section 630(2) in respect of a transfer of variable rate securities."

The drafting is misleading: as far as I can see, all accrued income profits are "qualifying" accrued income profits.

Non-resident trustees would not qualify for AIP loss relief,[17] so s.680 ITA extends the relief:

> (1) This section applies if—
>
> (a) the trustees of a settlement are non-UK resident or domiciled outside the UK throughout a tax year in which an interest period or part of an interest period of securities falls,
>
> (b) the trustees' income is or includes interest from those securities,
>
> (c) the interest falls due at the end of that interest period, and
>
> (d) had the trustees been UK resident, or domiciled in the UK, during a part of each such tax year the interest would have been wholly or partly exempt from income tax under section 679.
>
> (2) No liability to income tax arises as a result of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor) in respect of so much of the interest as would have been exempt from income tax under section 679.

The references to domicile in ss.667 and 680 ITA is otiose because after the 2008 reforms domicile of trustees is irrelevant. The reference to "an additional amount" is also otiose. But no harm is done by these infelicities.

37.14 Transfer of assets abroad

In the absence of express provision, AIP income would not fall within the ToA provisions because the person abroad would qualify for the AIP non-residence defence (assuming the person abroad is non-resident). However, s.747 ITA deals with this:

> (1) This subsection applies if a person—
>
> (a) would have been treated as—
>
> (i) making qualifying accrued income profits, or
>
> (ii) making qualifying accrued income profits of a greater amount,
>
> in an interest period, but
>
> (b) is not so treated because of being resident or domiciled outside the UK throughout any tax year in which the interest period (or part of it) falls.
>
> (2) If subsection (1) applies, this Chapter applies as if the amount which the person would be treated as making or, as the case may be, the additional amount were income becoming payable to the person.

---

17 See 37.8 (Relief for accrued income losses).

(3) Accordingly, any reference in this Chapter to income of (or payable or arising to) a person abroad must be read as including a reference to such an amount.

It has been suggested that this leaves a gap where AIP securities are held by a non-resident company. Section 747(1) ITA applies only if the company would have fallen within the AIP rules but did not do so "because of being resident outside the UK". But if the company had been UK resident, it would be within the charge to corporation tax and outside the scope of AIP. That is correct on a literal construction. However, the context shows that the deeming is not intended to be applied that way, and a comparable argument in a CGT context was resoundingly dismissed in *de Rothschild v Lawrenson* 67 TC 300 ("I do not believe that our processes of statutory construction are so wanting in technique and imagination ...").

The reference to domicile is otiose from 2008 but it does no harm.

The person abroad (if non-resident) would not qualify for AIP loss relief, so s.747(4)(5) ITA extends the relief:

(4) This subsection applies if income consisting of interest which falls due at the end of an interest period—

(a) would have been income as respects which a person is entitled to an exemption, or an exemption of a greater amount, from liability to income tax under section 679 (interest on securities involving accrued income losses: general), but

(b) is not such income because it is income of a person who is resident or domiciled outside the UK throughout any tax year in which the interest period (or part of it) falls.

(5) If subsection (4) applies, for the purposes of this Chapter the interest is treated as reduced by the amount of the exemption or, as the case may be, the additional exemption.

37.14.1 *Definitions*

Section 747 ITA provides definitions for s.747:

(6) In this section—

(a) expressions which are also used in Chapter 2 of Part 12 (accrued income profits) have the same meaning as in that Chapter (but see subsection (7)), and

(b) "qualifying accrued income profits" means accrued income profits which are treated as made—

(i) under section 628(5), or

(ii) under section 630(2) in respect of a transfer of variable rate securities.

(7) In the case of qualifying accrued income profits within sub-paragraph (ii) of the definition of that expression in subsection (6)(b)—

(a) references in subsection (1)(a) to making qualifying accrued income profits in an interest period are to be read as making them in the tax year in which the settlement day falls, and

(b) the reference in subsection (1)(b) to the interest period is to the period—

(i) beginning with the day after the last day of the only or last interest period of the securities, and

(ii) ending with the settlement day.

The expression "qualifying" accrued income profits is misleading: as far as I can see, all accrued income profits are qualifying.

For the interaction with s.731, see 30.16.2 (Stock dividends and accrued income profits).

37.15 Double taxation relief

In the absence of express provision there would be no double taxation relief, as the AIP income is not taxable in the other state.

Section 10 TIOPA provides relief:

(1) Subsection (2) applies if—

(a) a person is treated under section 628(5) of ITA 2007 as making accrued income profits in an interest period,

(b) the person would, were the person to become entitled in the relevant tax year[18] to any interest on the securities concerned, be liable in respect of the interest to tax chargeable under ITTOIA 2005 on relevant foreign income, and

(c) the person is liable under the law of the territory to tax in respect of interest payable on the securities at the end of the interest period or the person would be so liable if the person were entitled to that interest.

I cannot see the need for (b) as it will be satisfied whenever (a) is satisfied. Section 10(2) provides the relief:

(2) Credit is to be allowed against income tax calculated by reference to

18 Defined subsection (5): "In subsection (1)(b) 'the relevant tax year' means the tax year in which, under section 617(2) of ITA 2007, the accrued income profits are treated as made."

the accrued income profits.

(3) The amount of the credit allowed under subsection (2) is given by—

AIP × FTR

where—

AIP is the amount of the accrued income profits, and

FTR is the rate of tax to which the person is or would be liable as mentioned in subsection (1)(c)...

Section 39 TIOPA restricts DT relief where there is relief for accrued income losses.[19]

The SAI Manual provides:

4370. Double taxation relief [January 2010]

Where an AIS charge arises on a foreign stock on which the interest would have suffered foreign tax eligible for credit relief if interest had been received, credit for foreign tax is allowable for the lower of

- the rate of UK tax charged on the accrued income profit, and
- the rate of foreign tax suffered on the interest payable at the end of the interest period for which the charge arises.

If there is an accrued income loss to be set against foreign interest, reduce the credit for foreign tax in the proportion which the allowance bears to the interest.

Example

Taxpayer holds foreign stock on which the interest suffers tax eligible for credit at 15%. Interest paid on 30 June and 31 December.

In the interest period to 30 June 2005, the taxpayer makes transactions resulting in an AIS loss of £200. He receives interest (gross) of £1,000 less £150 foreign tax.

In August 2006 he sells the entire holding and there is an AIS profit of £300. He is liable to UK tax at 22%. His double taxation relief is as follows

Foreign interest		£1,000
Less Accrued Income relief		– £200
		£800
Foreign tax deducted	£150	
Credit restricted to	£1000 – £200 × £150/£1000	= £120
Accrued income profit		£300
Allow credit for foreign tax on AIS charge £300 @ 15%		= £45
Total double taxation relief £120 + £45		= £165

19 See 37.8 (Relief for accrued income losses).

The double taxation relief given can exceed the foreign tax suffered (£165 exceeds the £150 suffered).

37.16 Interaction with CGT

Section 119(1) TCGA disapplies the normal CGT rules in ss.37 and 39 TCGA:

> (1) Where there is a transfer of securities within the meaning of Chapter 2 of Part 12 of ITA 2007 (accrued income profits)—
>
> (a) if a payment is treated as made to the transferor under section 632 of that Act or by the transferor under section 633 of that Act, section 37 shall be disregarded in computing the gain accruing on the disposal concerned;
>
> (b) if a payment is treated as made by the transferee under section 632 of that Act or to the transferee under section 633 of that Act, section 39 shall be disregarded in computing the gain accruing to the transferee if he disposes of the securities;
>
> but subsections (2) and (3) below shall apply.

Section 119 TCGA goes on to set out its own rules:

> (2) Where the securities are transferred with accrued interest (within the meaning of that Chapter)—
>
> (a) if a payment is treated as made to the transferor under section 632 of ITA 2007, an amount equal to the amount of that payment shall be excluded from the consideration mentioned in subsection (8) below;
>
> (b) if a payment is treated as made by the transferee under that section, an amount equal to the amount of that payment shall be excluded from the sums mentioned in subsection (9) below. ...
>
> (8) The consideration is the consideration for the disposal of the securities transferred which is taken into account in the computation of the gain accruing on the disposal.

Section 119(3)(9) contains corresponding rules for a transfer without accrued interest:

> (3) Where the securities are transferred without accrued interest (within the meaning of that Chapter)—
>
> (a) if a payment is treated as made by the transferor under section 633 of ITA 2007, an amount equal to the amount of that payment shall be added to the consideration mentioned in subsection (8) below;
>
> (b) if a payment is treated as made to the transferee under that

section, an amount equal to the amount of that payment shall be added to the sums mentioned in subsection (9) below...

(9) The sums are the sums allowable to the transferee as a deduction from the consideration in the computation of the gain accruing to him if he disposes of the securities.

37.17 Foreign currency securities

SAIM provides:

4310. Special calculations: Foreign currency securities [July 2007]
Foreign securities: Translation into sterling
Section 664 ITA 2007 provides rules for translation into sterling of the payments made on the transfer of securities where the interest on securities is payable in a currency other than sterling.
If the interest is accounted for separately between transferor and transferee, and the parties specify in their contact what the sterling equivalent of the accrued or rebate interest is, the sterling amount so specified is to be used in the AIS calculations. Otherwise, the amount is to be determined in the foreign currency according to the usual rules, and then translated into sterling at the rate of exchange prevailing on the settlement day for the transfer, calculated by reference to the London closing rate of exchange for the day concerned.
The nominal value of foreign securities is also determined (under Section 677 ITA 2007) as the sterling equivalent of that value on any day, calculated by reference to the London closing rate for that day.
Where unrealised interest is payable in a foreign currency, Section 665 ITA 2007 provides that the amount the accrued income profits under Section 631 ITA 2007 is the sterling equivalent on the settlement day, or in the case of interest in default (SAIM4290), the value on the day of receipt.
Although the London closing rate should in strictness be used in all the above cases, figures of rates of exchange supplied by taxpayers or their agents should normally be accepted, provided that they come from a reputable source (for example, an exchange rate quoted by the taxpayer's bank for the day in question) and the basis is used consistently.

CHAPTER THIRTY EIGHT

DEEPLY DISCOUNTED SECURITIES

38.1 DDS: Introduction

A full discussion of this topic would need half a book. The following is a general outline with a focus on the issues closest to the themes of this work.

In outline, the profits arising on the disposal of a deeply discounted security ("DDS") are subject to income tax (rather than CGT). The rules only apply to a holder of a DDS who is subject to income tax. They do not apply to the issuer and they do not apply for the purposes of corporation tax.

The following specialist aspects are not discussed:

- securities issued in tranches
- earn-out rights
- strips
- exchanges and conversions

38.2 Meaning of "deeply discounted security"

38.2.1 *"Security"*

SAI Manual states:

> **3010 Introduction** [July 2013]
> ... The term 'security' is not defined in the legislation. It may be taken to have a broad meaning comparable to the definition in TCGA s.132(3)(b) (CG53420) ...

The word "security" is often used in tax legislation. The CG Manual provides:

> **CG53420 - Securities: debts: definition of debt on a security** [February 2006]
> TCGA92/S251 (1) refers to '... the debt on a security (as defined in Section 132).' In fact TCGA92/S132 does not define the phrase 'the debt on a security.'

But it does define the word 'security', as including any loan stock or similar security whether of the Government of the United Kingdom or of any other government, or of any public or local authority in the United Kingdom or elsewhere, or of any company, and whether secured or unsecured.'

CG53421 - Securities: debts: definition of debt on a security [February 2006]
This definition is of limited use because there is no statutory guidance on the meaning of 'loan stock or similar security.' However, the final words make it clear that the debt does not have to be secured to be the debt on a security. Therefore 'debt on a security' is not the same as 'secured debt.'

CG53422 - Debt on a security: Tax Case guidance [February 2006]
The meaning of debt on a security has been considered by the Courts a number of times. The leading case is *Ramsay v CIR* 54TC101. In that case the House of Lords acknowledged this is a difficult subject. Lord Wilberforce said 'Many learned judges have found it baffling both on the statutory wording and as to the underlying policy'. These instructions approach these problems by looking at the decision in Ramsay and considering what guidance can be drawn from the speeches of Lords Wilberforce and Fraser.

CG53423 - Debt on a security: Ramsay v CIR 54TC101 [February 2006]
The Ramsay case involved a company which had incurred an agreed gain on the sale of a farm. It then entered into an avoidance scheme designed to produce an allowable loss to set off against the gain. The scheme removed value from a chargeable asset (shares) to produce an allowable loss on their disposal. The value passed into a loan, known as L2. This loan was also disposed of. If L2 was not a debt on a security, it would not be a chargeable asset. Therefore the gain on the disposal of the loan would not have been chargeable. However, the House of Lords held that the loan L2 did amount to a debt on a security. The gain on the disposal of L2 was thus a chargeable gain and the scheme failed.

CG53424 - Debt on a security: House of Lords decision: marketability [February 2006]
In Ramsay the House of Lords considered the underlying purpose of the distinction between debts and debts on a security in TCGA92/S251 (1). Both Lord Fraser and Lord Wilberforce suggested the essential feature of the debt on a security is that it should be marketable.

At page 194 Lord Fraser says 'the distinction in [Section 251(1)] is, I think, between a simple unsecured debt and a debt of the nature of an investment, which can be dealt in and purchased with a view to being held as an investment.' Later having analysed the essential features of the loan he says 'it possessed the characteristic of marketability.'

At page 189 Lord Wilberforce says 'it can be seen, however, in my opinion, that the Legislature is endeavouring to distinguish between mere debts, which normally (though there are exceptions), do not increase but may decrease in value, and debts with added characteristics such as may enable them to be realised, or dealt with at a profit.'

CG53425 - Debt on a security: essential characteristics of [February 2006]
Both speeches in the House of Lords emphasised that for a debt to be the debt on a security it should be capable of being

- held as an investment; and

- realised at a profit.

These conditions are, to some extent, interrelated, but it is important that both should be satisfied. For example, a debt may be regarded as a good investment. But if it cannot be realised at a profit it cannot be a debt on a security. These points are discussed in the following paragraphs.

CG53426 - Debt on a security: essential characteristics of: held as an investment [February 2006]

For a debt to be held as an investment it should either

- carry a commercial rate of interest; or
- carry a premium on repayment, equivalent to the interest which would have been paid; or
- be issued at a discount, so that repayment at face value again reflects the interest which would have been paid on the debt.

Where these criteria are not met and the return on the investment is clearly uncommercial, debt on a security status should not be accepted.

CG53427 - Debt on a security: essential characteristics of: sold at a profit [February 2006]

Whether a debt can be realised at a profit will depend, in part, on the premium, or rate of interest which the debt carries. But even if a debt carries an attractive rate of interest, it may not be regarded as a worthwhile investment by a potential purchaser. For example, the terms of the loan may enable the borrower to repay the debt early. A potential purchaser would need to consider whether the loan would last long enough to cover the costs of acquisition, and obtain a worthwhile return on the investment.

CG53428 - Debt on a security: essential characteristics of: structure of permanence [February 2006]

This point was made by Lord Wilberforce, in Ramsay, where he commented (at page 190) that the relevant loan had 'a structure of permanence such as fitted it to be dealt in ....' In fact, the loan in that case was repaid early. But it had been issued on terms which meant that a large penalty would be payable in the event of early repayment. It is not possible to set any precise limits for the 'life' of a debt, which would enable it to be regarded as a debt on a security. The attractiveness of any particular debt will depend upon the other terms of the loan, and on the type of market in which the debt would normally be traded. You can accept that any loan which could not be terminated by the borrower within a year from the date of commencement will have the required 'structure of permanence'. But a debt will not have a 'structure of permanence' merely because the borrower is not in a position to repay the debt in the foreseeable future.

CG53429 - Debt on security: essential characteristics of: repayment at short notice [February 2006]

You cannot say that a debt is not a debt on a security simply because it can be repaid at short notice. But it is reasonable to suggest that in such cases there should be some compensation for the creditor to counterbalance the uncertainty as to the term of the loan. For example, a penalty can turn an otherwise uncertain, and therefore inherently unattractive, loan into a worthwhile investment. If a loan can be repaid at short notice, but there is no compensating

benefit for the creditor, this would count against accepting the loan as a debts on a security.

CG53430 - Debt on security: essential characteristics of: events of default [February 2006]

Some agreements include standard clauses requiring the debt to be repaid immediately if certain events happen. For example, if the borrower defaults on repayment, or goes into liquidation. These standard clauses should not be taken as displacing any stated terms for repayment for the debt set out in the agreement.

CG53431 - Debt on security: when conditions satisfied [February 2006]

You should consider whether any debt amounts to the debt on a security by reference to the circumstances prevailing at the time the debt was created. For example, you should consider whether a rate of interest is commercial by reference to the market conditions at the time the debt was created. Thus, you may take into account any market opinion, at the time the debt was created, as to the likely future changes in the market rate of interest. Changes in the rate of interest which were not anticipated at the time the debt was created cannot be taken into account.

CG53432 - Debt on security: when conditions satisfied: changes in terms [February 2006]

You should not accept that a debt can be regarded as the debt on a security because the terms of the loan could have been amended to make the debt marketable. If the terms of the debt have changed this cannot affect the status and tax treatment of the debt prior to the changes. You may, however, need to consider whether or not the changes had the effect of bringing to an end the original debt, and creating a new one, to which a different tax treatment may apply.

CG53433 - Debt on security: exchange gains [February 2006]

If a debt is denominated in a foreign currency, exchange gains (or losses) can arise if the currency fluctuates against the pound. You should consider whether any such debt is the debt on a security purely in terms of the currency in which the debt is denominated. Neither realised, nor potential, exchange gains or losses should be taken into account in deciding whether a debt is the debt on a security.

CG53434 - Debt on security: documentation [February 2006]

The existence of a formal document constituting or evidencing the debt is not an essential feature of the debt on a security. At page 194 in Ramsay Lord Fraser says 'Further consideration has satisfied me that the existence of a document or certificate cannot be the distinguishing feature between the two classes of debt'. However, cases where debt on a security status is claimed for debts where no documentation exists need to be examined carefully to check whether or not the required features are present. Equally you should resist any suggestion that a debt MUST be a debt on a security if it is acknowledged by a document described as loan stock. This would be inconsistent with the approach taken in Ramsay, that the marketability test will be appropriate in deciding in ANY case whether a debt amounts to the debt on a security.

CG53435 - Debt on security: loan stock or similar security [February 2006]

In Ramsay Lord Wilberforce did not regard it as necessary to decide whether the

loan L2 was, in fact, within the meaning of 'loan stock'. He observed that TCGA92/S132 (3)(b) 'includes within 'security' any 'similar security' to loan stock: in my opinion these words cover the facts. This was a contractual loan, with a structure of permanence such as fitted it to be dealt in ...' (page 190). Lord Fraser took a similarly broad approach in his judgment (page 194).

CG53436 - Debt on security: loan accounts [January 2010]

Debt on loan account, for example between associated companies, may well not amount to the debt on a security. See CTM51220 for the treatment of inter-company loan accounts under the loan relationships regimes.

38.2.2 *"Deeply discounted"*

In outline, the definition is in s.430 ITTOIA:

(1) The general rule is that a security is a "deeply discounted security" for the purposes of this Chapter if, as at the time it is issued, the amount payable on maturity or any other possible occasion of redemption ("A") exceeds or may exceed the issue price by more than A×0.5%×Y,
where Y is the number of years in the redemption period or 30, whichever is the lower.
(2) If the redemption period is not a number of complete years, for the purposes of subsection (1) the incomplete year is expressed as twelfths, treating each complete month and any remaining part of a month as one-twelfth.
(3) In this section "redemption period" means the period between the date of issue and the date of the occasion of redemption in question.
(4) Interest payable on an occasion of redemption is ignored in determining for the purposes of this section the amount payable on that occasion.

SAI Manual gives three examples:

3020 Meaning of deeply discounted security [July 2007]

Example 1

Company A issues securities for £1,000 which are redeemable in 10 years time for the subscription amount increased by the percentage movement in the Retail Price Index over the same period. As the linkage to the RPI may give more than a 5% increase in value (10 years × 0.5%) over that period, the securities are deeply discounted securities.

Example 2

Company B issues a 12-month security for £950. It is redeemable for £950 at maturity or, depending on events, for £1,000 after 6 months. The occasion of early redemption is not disregarded under Section 431 ITTOIA 2005 (SAIM3030). The difference between the issue and early redemption prices is more than £2.50 (£1,000 × 0.5% × 6/12). The

security is therefore a DDS.

Example 3

Bank C issues a 5-year security that is linked to the FTSE 100 share index. Each security has a nominal value to £100. If the index rises, the investor receives on redemption £100 multiplied by the percentage rise in the index. For example, the index has risen to 150% of its starting value, the investor receives £150. If the index falls, the investor is guaranteed to receive back his or her £100, so the security is not an excluded indexed security (SAIM3050). Since the security may give more than a 2.5% increase in value over the period (5 years × 0.5%), it is a DDS, even though there is no certainty as to the redemption amount.

38.2.3 *Securities dealt with under other regimes*

Section 432(1) ITTOIA provides:

> The following are not deeply discounted securities—
> (a) shares in a company,
> (b) gilt-edged securities that are not strips,
> (c) life assurance policies, and
> (d) capital redemption policies.[1]

38.2.4 *Securitised derivatives*

The SAI Manual provides:

> **3040. Securities which are not deeply discounted securities** [November 2011]
> ... In practice, therefore, most deeply discounted securities will be securities in the nature of debts, that is, where the issuer has an obligation to make some form of return to the investor.

The same SAI Manual entry formerly provided:

> **Securitised derivatives**
> Securitised derivatives present particular problems. These are investment products where the amount which the investor gets back at the end depends on the performance of a share index, or a particular share or shares, or (less commonly) some other asset. The capital initially subscribed by the investor may be completely or partly protected, or it may be possible for the investors to lose the whole of

1 Section 432(3) ITTOIA provides:
"In this section 'capital redemption policies' has the same meaning as in Chapter 9 of this Part (see section 473(2))."

their money.

Some such products, properly analysed, are options, for which the investor pays a premium (these are often described as 'warrants'). Others may be contracts for differences, or other derivatives. These will not be deeply discounted securities; disposal of an option, or of a financial future within Section 143 TCGA 1992, will give rise to a capital gain or allowable loss. See also SAIM7000 on the tax treatment of derivatives that generate an interest-like return.

Other securitised derivatives, however, create a debt (in technical terms, they are structured as a debt security plus one or more options or other derivatives). These will be deeply discounted securities, unless they fulfil the stringent conditions to be 'excluded indexed securities' (SAIM3050). You should seek advice from CT & VAT (Financial Products and Services Team) if it is unclear whether or not a particular instrument is a deeply discounted security.

There are some deep conceptual issues here.

38.3 Securities denominated in foreign currency

In the following discussion **"a foreign currency denominated security"** is one issued for a foreign currency and redeemable in that currency.

38.3.1 *Is a foreign currency denominated security necessarily a DDS?*

Consider for instance a US Treasury Note issued for $1,000 and redeemable on maturity at $1,000 and carrying interest at a market rate. Is a security of that kind deeply discounted? The question (in short) is whether:

> the amount payable on maturity may exceed the issue price

This raises a currency translation issue. If:

(1) "issue price" means the sterling equivalent of the issue price at the time of issue; and

(2) "the amount payable on maturity" means the sterling equivalent at the time of maturity

then a foreign currency denominated security is a DDS since currency fluctuations could lead to a gain measured by £sterling. If "issue price" means the dollar price and "the amount payable on maturity" means the dollar amount, then the two are equal and the security is not a DDS.

The statutory words could be understood either way, so the context must resolve the issue. The context shows that the second view is correct. This

is for several reasons. First, the object of the DDS rules is to tax discounts, which are commercially similar to interest. It is not to tax currency fluctuations. The absence of relief on losses would operate very unfairly. Secondly, if that were not the case, all foreign currency denominated securities would be within the DDS regime.[2] That would be surprising (and indeed contrary to EU law).[3]

HMRC agree. SAI Manual provides:

> **3020 Meaning of deeply discounted security** [July 2007]
> The test for deep discount is carried out in the currency of issue.

38.3.2 *Foreign currency denominated DDS*

The above paragraph is considering a security whose dollar issue price equals its dollar maturity price. Of course, a foreign currency denominated security would in principle be a DDS if the redemption price may sufficiently exceed the issue price. It is understood that US treasury bills (which do not carry interest) are normally DDSs. I refer to such a security as **"a foreign currency denominated DDS".**

How does one compute the profit on the disposal of a foreign denominated DDS? The profit is:

> the amount by which the amount payable on the disposal exceeds the amount paid by the person to acquire the security.

This raises another currency translation issue. Suppose a person acquires a security on issue for dollars and redeems it for dollars. Is the amount paid to acquire the security:

(1) The sterling equivalent of the purchase price at the time of issue? Or
(2) The dollar amount? If so, it is deducted from the dollar amount payable on disposal, to give a dollar profit, translated into sterling at the time of disposal.

The statutory words could be understood either way, so the context must resolve the issue. The context shows that the second view is correct. This is consistent with the approach to the definition of a DDS: see above. The same point applies: the object of the DDS rules is to tax discounts, which

---

2 Unless they contained a cap to limit the gain to a sterling amount, which would not normally be the case.

3 The arguments are more fully set out in Ghosh, "Corporate Bonds: If The Cap Does Not Fit" *Taxation*, 7 Feb 2002 p.439 but since HMRC have accepted this view since the publication of Tax Bulletin 9, it is not necessary to consider that here.

are commercially similar to interest. It is not to tax currency fluctuations. The solution to the same problem for CGT is different.[4] The reason for this is explained in *Capcount Trading v Evans* 65 TC 545. One important factor in that decision was the provision in the CGT legislation that currency other than sterling is an asset for CGT. There is no similar provision for IT.

38.4 Excluded occasions of redemption

Section 431(1) ITTOIA provides:

> An occasion of redemption of a security other than maturity is ignored for the purposes of section 430(1) if the third-party option conditions or the commercial protection conditions are met.

38.4.1 *The third-party option conditions*

Section 431(2) ITTOIA provides:

> The third-party option conditions are that—
> (a) the security may be redeemed on the occasion at the option of a person other than its holder,
> (b) the security is issued to a person who is not connected with the issuer, and
> (c) the obtaining of a tax advantage by any person is not the main benefit, or one of the main benefits, that might have been expected to accrue from the provision in accordance with which the security may be redeemed on the occasion.

38.4.2 *The commercial protection conditions*

Section 431(3) ITTOIA provides:

> The commercial protection conditions are that—
> (a) the security may be redeemed on the occasion as the result of an exercise of an option that is exercisable only on the occurrence of—
> (i) an event adversely affecting the holder (see subsection (8))[5],

---

4 See 55.2 (CGT: currency conversion date).

5 "(8) In this section "event adversely affecting the holder", in relation to a security, means an event the occurrence of which appears, as at the time of the security's issue, likely to have an adverse effect on the interests of its holder at the time of the event if there were no provision for redemption on its occurrence."

or

(ii) a default by any person, and

(b) as at the time of the security's issue it appears unlikely that the option will be exercisable on the occasion.

38.4.3 *Restrictions on conditions*

Section 431(4) ITTOIA provides:

> Subsection (1) does not apply to an occasion just because the occasion coincides or may coincide with an occasion meeting the third-party option conditions or the commercial protection conditions.
>
> (5) If—
>
> (a) the only reason that a security is not a deeply discounted security is that an occasion on which it may be redeemed is ignored because the third-party option conditions are met, and
>
> (b) at some time after its issue the security is acquired by, or its holder becomes, a person connected with the issuer,
>
> in relation to that time and later this Chapter applies as if the security were a deeply discounted security.
>
> (6) If a person ("P") who is not connected with the issuer acquires—
>
> (a) a security which is only a deeply discounted security because it was issued to a person connected with the issuer and so fails to meet the condition specified in subsection (2)(b), or
>
> (b) a security within subsection (5),
>
> this Chapter applies in relation to P as if the security ceased to be a deeply discounted security on the acquisition.
>
> (7) For the purposes of the application of this section to a security, the question whether persons are connected is determined without regard to the security or any other security issued under the same prospectus.

38.5 Meaning of "disposal"

Section 437(1) ITTOIA provides:

> References in this Chapter to the disposal of a deeply discounted security are—
>
> (a) to its redemption,
>
> (b) to its transfer by sale, exchange, gift or otherwise, including a transfer treated as made by subsection (3), and
>
> (c) so far as not covered by para (a) or (b), to its conversion under its terms into shares in a company or other securities (including other deeply discounted securities).

38.5.1 *"Person making a disposal"*

Section 437(2) ITTOIA provides:

> The person treated as making a disposal is—
> (a) in the case of a disposal within subsection (1)(a), the person entitled as the security's holder to any payment on the disposal,
> (b) in the case of a disposal within subsection (1)(b), the transferor, and
> (c) in the case of a disposal within subsection (1)(c), the person who would be entitled as the security's holder to any payment on the disposal, if such a payment were made.

38.5.2 *Death of holder*

Section 437(3) ITTOIA provides:

> A person who dies while entitled to a deeply discounted security is treated as transferring it immediately before death to the personal representatives.

38.6 Meaning of "profit"

Section 439 ITTOIA provides:

> (1) A person's profit on a disposal is the amount by which the amount payable on the disposal exceeds the amount paid by the person to acquire the security.
> (2) No account is to be taken of any incidental expenses incurred in connection with the disposal or acquisition.

I refer to this as the DDS profit. The DDS profit is greater than a chargeable gain on a disposal because expenses are disallowed.

38.6.1 *Deemed DDS profit*

Section 440 ITTOIA provides:

> (1) On the disposal of a deeply discounted security by a transfer of a kind specified in subsection (2), for the purposes of this Chapter an amount equal to the market value at the time of the disposal is treated as payable.
> (2) The transfers are—
> (a) a transfer made otherwise than by a bargain at arm's length,
> (b) a transfer between connected persons,
> (c) a transfer for a consideration which is not wholly in money or money's worth,

(d) a transfer treated as made by section 437(3) (death), and
(e) a transfer by personal representatives to a legatee. ...

I refer to the profit on a disposal within this section as "**deemed DDS profit**".

38.7 Charge to tax on disposal of DDS

Sections 427 and 428 ITTOIA impose the charge:

> **427 Charge to tax on profits from deeply discounted securities**
> (1) Income tax is charged on profits on the disposal of deeply discounted securities.
> (2) The profits are treated as income for income tax purposes if they would not otherwise be income.
> **428 Income charged**
> (1) Tax is charged under this Chapter on the full amount of profits arising in the tax year.
> (2) The profits on a disposal are to be taken to arise when the disposal occurs.
> **429 Person liable**
> (1) The person liable for any tax charged under this Chapter is the person making the disposal.

38.8 DDS remittance basis

Section 428(3) ITTOIA provides:

> If the profits arise on a disposal of securities that are outside the UK—
> (a) they are treated for the purposes of section 830 (meaning of "relevant foreign income") as arising from a source outside the UK, and
> (b) subsection (1) is subject to Part 8 (foreign income: special rules).

This brings in the ITA remittance basis for a DDS that is outside the UK.

The section uses the words "treated as" because DDS income does not have a source, at least in the traditional sense.[6]

How does one decide whether a security is "outside the UK"? In the HMRC view the test is the residence of the issuer. The former Inspectors Manual para 1541 provided:

> Where the security was issued by a UK resident any profit is assessable

6 See 14.6 (Location of source of income when there is no source).

> under Case III of Schedule D. Where the security was issued by a non-UK resident, any profit is assessable under Case IV of Schedule D.

This is not obviously right, but it is as good a test as any other and (in relation to a non-resident issuer) at least we should know where we stand.[7] This passage is omitted in the SAIM but there is no indication that HMRC practice has changed.

An alternative approach is to say that a security is in the UK if income from it has a UK source and outside the UK if income from it has a non-UK source.[8] This will usually come to the same thing[9] and I doubt if the point will ever need to be decided.[10]

For completeness: another possible approach is that "outside the UK" means situated outside the UK applying common law situs rules. This too would usually come to the same thing, but it would allow some scope for tax planning. This view is less attractive since (1) common law situs is not generally relevant for IT; (2) one would have expected the drafter to use the word "situate" if it was intended to incorporate a situs rule.

Strictly, one cannot segregate income from capital (for no identifiable part of the proceeds represents the income). But since HMRC do not apply that rule for the accrued income scheme,[11] they should logically not take the point in this context either. There is however no discussion in the RDR Manual.

A deemed DDS profit (eg on a gift) cannot be remitted and so is tax free.[12]

---

7 The position if the issuer changes residence is less clear, but perhaps this does not arise in practice.

8 This would be consistent with the AIP scheme, where the test is whether income from the security has a foreign source: see 37.9 (AIP remittance basis). However, the two cases are not the same, because a DDS may not yield any income, so the question whether income from the DDS has a foreign source could be a hypothetical question.

9 See 18.7.5 (Interest from securities). Because the rules concerning the location of the source of interest are so unclear, it is impossible to say in what (if any) circumstances the source of the income might be different from the residence of the issuer.

10 If it mattered, the view that income source was the test should be rejected, for if the drafter intended to apply an income-source test, one would have expected the wording to match that used elsewhere for income-source tests. The wording is not very far from the former case IV in s.18 ICTA 1988 ("income arising from securities out of the UK") but there the words "out of the UK" govern "arising" and not "securities".

11 See 37.9 (AIP remittance basis).

12 The CGT rule does not apply here; see 11.30 (CGT disposal not for market value).

38.9 UK resident trust

38.9.1 *UK resident trust (not settlor-interested)*

A UK resident trust is in principle subject to income tax on its DDS profits. Tax is charged at the trust rate, 50%: s.482 ITA.

38.9.2 *UK resident settlor-interested trust*

A DDS profit accruing to UK trustees is not "income" in the general sense and in the absence of express provision it would not fall within s.624 ITTOIA which only applies to income. However s.427(2) ITTOIA directs that the profits are "treated as income for income tax purposes" so it does fall within s.624 ITTOIA. For good measure, s.457 ITTOIA provides:

> (1) This section applies if profits are taken to arise on a disposal of a deeply discounted security by trustees.
> (2) For the purposes of Chapter 5 of Part 5 (settlements: amounts treated as income of settlor), the profits are to be taken to be income arising under the settlement from the security. ...

Thus DDS profits do fall within the settlement provisions.

If the settlor is a remittance basis taxpayer the s.624 remittance basis is available, ie the settlor is not taxed on an unremitted foreign DDS profit.[13]

The rate of tax in the absence of s.624 is 45%, so s.624 can only reduce the tax rate (or make no difference).

38.10 Non-resident individual

Section 368 ITTOIA provides the necessary exemption for non-residents.[14] In short non-resident individuals are not chargeable if the security is out of the UK. They are theoretically chargeable if the security is in the UK but non-residents IT relief is usually available.[15]

38.11 Non resident trust

In the absence of express provision, non-resident trustees would not be charged on foreign DDS profits but could be charged on UK DDS profits. However s.458(1) ITTOIA provides:

---

13 See 27.4 (Section 624 remittance basis).

14 See 14.2 (Location of source of income: Territorial scope of IT).

15 See 42.1 (Non-residents IT relief).

> Tax is not charged under this Chapter if the disposal is made by the trustees of a settlement[16] and they are non-UK resident.

So non-resident trusts are not subject to tax on DDS, whether UK or foreign.

It is considered that s.624 applies to non-resident settlor-interested trusts as it applies to UK resident trusts. Section 458 does not provide relief since the charge on settlor-interested trusts is not a charge "under this chapter".

38.12 Transfers of assets abroad

A DDS profit accruing to a non-resident is not "income" so in the absence of express provision it would not fall within the ToA provisions even if it accrued to a person abroad within s.720 or 731. However s.427(2) ITTOIA directs that the profits are "treated as income for income tax purposes" so it does fall within the ToA provisions. For good measure, s.459 ITTOIA provides:

> (1) This section applies if profits are taken to arise on the disposal of a deeply discounted security by a person resident or domiciled outside the UK ("A").
> (2) For the purpose of determining whether a UK resident individual is liable for income tax in respect of the profits, Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) has effect as if the profits, when arising, constituted income becoming payable to A.
> (3) For this purpose it does not matter if A is not liable to income tax under this Chapter because of section 458 (non-UK resident trustees).

Thus DDS profits do fall within the scope of the ToA provisions.

38.12.1 *Section 731 ITA*

The charge is on the actual profit, not a fictional profit. The proceeds of the disposal represent that profit.

How does the rule that distributed income is not relevant income[17] operate in this context? Is it necessary merely to distribute an amount

---

16 "Settlement" here means settlement-arrangement: see s.458(3) which provides: "In this section 'settlement' has the same meaning as in Chapter 5 of Part 5 (see section 620)."

17 See 30.23 (Relevant income of trust distributed as income in year it arises) to 30.27 (Distributed income: HMRC view).

equal to the DDS profit or is it necessary to distribute the entire proceeds of the transfer (sale) of the security? The matter is analogous to the CGT issue which arose when a UK resident foreign domiciled beneficiary sold a non-UK situate asset and realised a chargeable gain. Prior to the 2008 mixed fund rule, if the individual remitted (say) one-half of the proceeds of sale, their were regarded as remitting one-half of the gain.

Inspectors Manual para 1567 explained:

> This is because, whilst the income content of any fund is a separate and distinguishable part of that fund, a capital gain is merely part of the whole proceeds of a disposal transaction that has no separate identifiable existence within those proceeds.

The same reasoning would apply here. Thus the only way to avoid relevant income by distribution would be to distribute the entire proceeds of an arm's length disposal. It is conceivable that HMRC will not apply the law on this point strictly, but do not rely on this without clearance.

If there are only fictional profits, because the market value rule applies[18] then s.731 does not apply because fictional income cannot be used to benefit a beneficiary, so it cannot be relevant income.

38.13 Non-resident company

Section 368 ITTOIA provides the necessary exemption for non-residents.[19] In short, they are not chargeable if the security is outside the UK. They are theoretically chargeable if the security is in the UK, but see 42.1 (Non-residents IT relief). The company DDS income is within the scope of the ToA provisions. There is no group relief so an inter-group transfer may give rise to a charge.

38.14 Interaction with CGT

A DDS is taken out of CGT by being given the status, and CGT exemption, of a qualifying corporate bond ("QCB").

Section 117(1) TCGA provides the usual definition of corporate bond. Section 117(2AA) provides:

> For the purposes of this section "corporate bond" also includes any asset
> [i] which is not included in the definition in subsection (1) above

---

18 See 38.6 (Meaning of "profit").

19 See 14.2 (Location of source of income: Territorial scope of IT).

and

[ii] which is a deeply discounted security for the purposes of Chapter 8 of Part 4 of ITTOIA 2005 (see section 430).

Section 117(7) TCGA defines qualifying corporate bond as (in short) any corporate bond issued after 13 March 1984. Thus any DDS is in principle a QCB.

Section 115(1) TCGA provides exemption for QCBs:

> A gain which accrues on the disposal by any person of—
>
> (a) gilt-edged securities or qualifying corporate bonds, or
>
> (b) any option or contract to acquire or dispose of gilt-edged securities or qualifying corporate bonds,
>
> shall not be a chargeable gain.

CHAPTER THIRTY NINE

UNIT TRUSTS

39.1 Unit Trusts: Introduction

This chapter considers unit trusts and Luxembourg Fonds Commun de Placement (which are treated in a similar way).

The taxation of unit trusts needs a book to itself. This chapter focuses on the matters closest to the themes of this book.

39.1.1 *Definition(s) of "unit trust"*

The High Court of Australia rightly say:

> "unit trust" ... in the absence of an applicable statutory meaning, does not have a constant, fixed, normative meaning ... [1]

However for most tax contexts there is a statutory definition.

Section 1007(1) ITA provides:

> In the Income Tax Acts "unit trust scheme" has the meaning given by section 237 of FSMA 2000.
> This is subject to subsection (2).

CGT is effectively the same. Section 99(2) TCGA 1992 provides:

> Subject to subsection (3) and sections 99A and 151W(a) below, in this Act—
>
> (a) "unit trust scheme" has the meaning given by section 237(1) of the Financial Services and Markets Act 2000 ...

So we turn to s.237(1) FSMA, which provides:

> In this Part "unit trust scheme" means a collective investment scheme under which the property is held on trust for the participants.

---

1 *CPT Custodian Pty v State Revenue* (2005) 221 ALR 196 at [15] accessible *http://www.austlii.org*.

That is pleasingly short, but the definition of "collective investment scheme" needs a book to itself and is not discussed here.

39.1.2 *Exemption for limited partnerships*

Section 99(3) TCGA 1992 provides:

> The Treasury may by regulations provide that any scheme of a description specified in the regulations shall be treated as not being a unit trust scheme for the purposes of this Act; and regulations under this section may contain such supplementary and transitional provisions as appear to the Treasury to be necessary or expedient.

The regulations are Capital Gains Tax (Definition of Unit Trust Scheme) Regulations 1988 which provide:

> 2 In these Regulations unless the context otherwise requires—
> "limited partnership" means a limited partnership registered under the Limited Partnerships Act 1907 and "general partner" and "limited partner" have the same meanings as in that Act;
> "limited partnership scheme" means a unit trust scheme of the description specified in regulation 4;
> "participant", in relation to a unit trust scheme, shall be construed in accordance with section 235 of the Financial Services and Markets Act 2000;
> "the principal Act" means the Capital Gains Tax Act 1979;
> "scheme property" means, in relation to a unit trust scheme, property of any description, including money, which is held on trust for the participants in the scheme;
> "unit trust scheme" means a scheme which, apart from these Regulations, is a unit trust scheme for the purposes of the principal Act.
> **3 Exception of certain unit trust schemes from the principal Act**
> A unit trust scheme which is—
> (a) a limited partnership scheme ...[2]
> shall be treated as not being a unit trust scheme for the purposes of the principal Act.
> **4 Description of a limited partnership scheme**
> A unit trust scheme is a limited partnership scheme when the scheme property is held on trust for the general partners and the limited partners in a limited partnership.

---

2 The omitted words relate to approved profit sharing schemes and employee share ownership plans, which are not discussed here.

There is similar provision for IT. Section 1007(2) ITA provides:

> The Treasury may, in relation to a unit trust scheme within the meaning given by section 237 of FISMA 2000 whose trustees are UK resident, by regulations provide that the scheme is not to be a unit trust scheme for the purposes of the definition in section 989 of "unauthorised unit trust" if it is within a specified description. ...

The regulations are Income Tax (Definition of Unit Trust Scheme) Regulations 1988 which provide:

> **3 Exception of certain unit trust schemes from section 354A**
> Subject to the provisions of these Regulations, a unit trust scheme which is ...
>
> (c) a limited partnership scheme ... [3]
>
> shall be treated as not being a unit trust scheme for the purposes of section 354A [ICTA 1970, now s.504 ITA and s.621 CTA 2010.]
>
> **8 Description of a limited partnership scheme**
> A unit trust scheme is a limited partnership scheme when the scheme property is held on trust for the general partners and the limited partners in a limited partnership.

This does not apply in terms to a foreign law limited partnership, though in the case of an EU law limited partnership, the discrimination is in breach of EU law so it is considered that HMRC cannot tax an EU law limited partnership as a collective investment scheme.

39.2 Income accruing to unit trust

39.2.1 *Authorised unit trust*

Section 617(1) CTA 2010 provides:

> In respect of income arising to the trustees of an authorised unit trust, and for the purposes of the provisions relating to relief for capital expenditure, the Tax Acts shall have effect as if—
>
> (a) the trustees were a UK resident company; and
>
> (b) the rights of the unit holders were shares in the company.

So authorised unit trusts are not transparent for IT purposes.

---

3 The omitted words relate to enterprise zone property schemes, charitable unit trust schemes, approved profit sharing schemes and approved employee share ownership plans, which are not discussed here.

ITTOIA EN Vol II discusses the location of AUT income:

> 51. It is possible for the FSA to recognise a non-UK unit trust scheme for marketing into the UK. However, only those UK tax resident unit trusts that are "authorised" by the FSA come within section 468 of ICTA. Section 468(1) of ICTA provides that the Tax Acts apply to UK authorised unit trusts and shall have effect as if the trustees of the authorised unit trust were a company resident in the UK. Although the application of section 468(1) of ICTA is by reference to the trustees' income (and relief for capital expenditure), the treatment of the trustees as a UK resident company carries through for the purposes of taxing interest distributions treated as made to unit holders. That is because section 468L(2) of ICTA provides that the Tax Acts shall have effect as if such interest distributions were made "by the company referred to in section 468(1)". As these distributions are treated as made by such a company, that is a UK resident company, they can only be UK source income.

The taxation of AUTs is not discussed here.

39.2.2 *Unauthorised unit trust: UK trustees*

Section 504 ITA provides:

> (1) This section applies for income tax purposes in relation to an unauthorised unit trust if the trustees are UK resident.[4]
> (2) If income arises to the trustees, the income is treated as the income of the trustees and not of the unit holders.
> ...
> (5) Sections 494 and 495 and 496B do not apply in relation to payments made by the trustees.

So unauthorised unit trusts with UK resident trustees are not transparent for IT purposes. The taxation of these unit trusts is not discussed here.

39.3 Unauthorised unit trust: Foreign trustees

This leaves the question of unauthorised unit trusts with non-resident trustees. There is no statutory provision so we are thrown back to first principles. It is considered that ordinary interest in possession trust rules apply. For IT purposes, depending on the drafting and proper law, a unit

4 The CT equivalent is s.621 CTA 2010.

trust may be a transparent, *Baker* style trust or non-transparent.[5]

HMRC agree. The Offshore Funds Manual discusses *Baker* unit trusts:

> **OFM27330 - Reporting funds: tax treatment of participants in reporting funds: participants chargeable to income tax: transparent funds - Regulation 97** [January 2012]
> ***... Income: UK tax treatment of investors***
> No matter what the legal form of a transparent reporting fund, for UK tax purposes the income of an income transparent fund is treated as arising directly to its investors (UK investors are charged to tax on income arising net of a deduction for proper expenses of the management of the fund in question, and this is the case for both unit trusts and contractual arrangements). ...

The OF Manual also discusses *Garland* unit trusts:

> **OFM27320 Participants chargeable to income tax: other non-transparent funds - Regulation 96** [January 2012]
> ... Foreign unit trusts that are not transparent for income purposes are sometimes referred to as 'Garland' unit trusts (following the case of *Garland v Archer-Shee* (15 TC 693))...
> ***Non-transparent unit trusts***
> UK investors in foreign unit trusts that are non-transparent for income purposes are taxable on their proportionate share of income (as ascertained after the trustees have met the expenses of administering the trust) when it is indefeasibly allocated to them, regardless of whether the income is paid to them or accumulated. Unlike the position for transparent unit trusts, that income is taxable as miscellaneous foreign income (under Chapter 8 of Part 5 of ITTOIA 2005, or Chapter 8 of Part 10 CTA 2009) and the tax rates applying will be those applying to such income.

A Garland trust may be a reporting or a non-reporting fund.

39.3.1 *Baker or Garland?*

This depends on the applicable law[6] and the drafting. Appropriate drafting may create a *Garland*-style non-transparent unit trust even in a *Baker*

---

5 See 26.1 (IIP trusts: income tax). This view is supported by *Minister of National Revenue v Trans-Canada Investment Co* [1956] SCC 49 accessible *http://www.kessler.co.uk/tfd-archive*, where the Canadian Supreme Court applied *Baker* to a unit trust arrangement.

6 See 26.8 (Baker or Garland trust jurisdiction?).

jurisdiction.

39.3.2 *Residence of trustees of unit trust*

The residence of the trustees of a unit trust is important for IT purposes, because the rules set out above depend on whether or not the trustees are UK resident. However, there is no definition of residence for this purpose. The standard IT/CGT definition of residence of "trustees of a settlement"[7] does not apply, because a unit trust is not a "settlement".[8] Ordinary rules of residence apply to determine the residence of the trustees in their private capacities.

The residence of the trustees of a unit trust is also important for determining whether the unit trust is an offshore fund, and (more or less)[9] the same principles apply.

39.4 Gains accruing to unit trust

Section 99(1) TCGA provides:

> This Act shall apply in relation to any unit trust scheme as if—
>
> (a) the scheme were a company,
>
> (b) the rights of the unit holders were shares in the company, and
>
> (c) in the case of an authorised unit trust, the company were resident in the UK,
>
> except that nothing in this section shall be taken to bring a unit trust scheme within the charge to corporation tax on chargeable gains.

There are three categories of unit trust for CGT:

(1) Authorised unit trust: gains are exempt from CGT.[10]

(2) Unauthorised unit trusts:

  (a) UK resident unauthorised unit trust: gains are subject to CGT

  (b) Non-resident unauthorised unit trust: gains not generally[11] subject to CGT.

So residence of a unit trust is therefore important for CGT purposes.

---

7 See 5.1 (Residence of trustees).

8 The term "settlement" in this context is not expressly defined, but property in a unit trust is not "settled property" for the purposes of IT: s.466 ITA. It is considered that "settlement", in this context, requires settled property (as defined).

9 For an exceptional case, see 34.3.2 (Residence of EU funds).

10 Section 100 TCGA.

11 The usual exceptions apply, for UK trades with a UK PE, and residential property above £2m.

Statute states that authorised unit trusts are UK resident but does not define the test of residence for unauthorised unit trusts. Since a unit trust is treated as a company, it is considered that the test of residence for CGT is the corporate test, ie, central management and control.[12]

Gains accruing to a non-resident "close" unit trust fall in principle within the scope of s.13 TCGA, and may be attributed to UK resident unit holders.[13]

39.5 Situs of unit

39.5.1 *Situs for IHT*

The situs of a unit in an authorised unit trust is not normally relevant for IHT.[14] The situs of a unit in an unauthorised unit trust is important for IHT.

A unit is unlike an equitable interest under a conventional trust. The rights of a unit holder arise from contract as well as trust, and a unit is in many ways analogous to a share in a company.[15] One should not apply rules governing other kinds of equitable interests without considering this.

It is considered that share/security situs rules should normally be applied, so that the place of the register is normally the determining factor. HMRC accept this.[16]

Another possible view is that situs depends on the residence of the trustees. In practice a situation where the place of residence of the trustees is different from the place of the register would be rare so the priority between the two tests may never need to be decided. Trustee residence

---

12 There is some relevant discussion at 6.18.2 (Comparison with "central management and control").

13 Ghosh agrees: "When is a company not a company?" PTPR Vol 7 p. 241, accessible *http://www.khpplc.co.uk/reviews*

14 See 62.3 (Non-settled property: authorised unit trusts and OEICs).

15 Thomas & Hudson, *The Law of Trusts*, (2nd ed., 2010), paras 53.28, says that the rights are *primarily* contractual, but to classify overlapping rights as "primary" and "secondary" seems to me somewhat arbitrary.

16 Press Release 16 October 2002 (OEICs and AUTs) para 9 stated (before the introduction of IHT relief for AUTs):

> "[OEICs and units in Authorised Unit Trusts] are treated as situated in the UK in the same way as other UK registered shares. That is so even if the 'underlying' assets of the collective investment fund are non-UK assets."

See too [1998] PCB 172. This conclusion is supported by *CPT Custodian Pty v Commissioners of State Revenue* (2005) 2 ALR 196 accessible *http://www.austlii.org* (unit trust holders not joint "owner" of land for purposes of Australian rating laws).

determines whether a unit trust is treated as a company or offshore fund for IT and CGT purposes.[17] It might therefore be said to be consistent with the tax legislation if situs of a unit for IHT depends upon the residence of the trustees. However, situs for IHT is based on private international law, not tax law, so the relevance of the unit trust tax provisions is very marginal.

What is reasonably clear is that situs of the unit does not depend on the situs of the underlying assets of the unit trust. The idea that one looks at the underlying assets, at first sight seems sensible, as it is consistent with the traditional test for situs of a bare trust. But it is unsound for two reasons:

(1) If the underlying assets are spread across different jurisdictions it would be impossible to ascertain the situs of the unit (if a unit is regarded as a single asset). The unit should not be regarded as several separate interests in as many assets as are held by the unit trust, looking through the unit trust like a bare trust, as this is to ignore the nature of the unit.[18]

(2) The proposal to look to the situs of the underlying assets is unworkable because the unit holder will not normally be able to ascertain what the underlying assets are at any particular moment. (Accounts of the unit trust may disclose the position at the end of an accounting period but that will not help as assets are normally bought and sold constantly by the trustees of the unit trust. The unit holder normally has no further right to information.)

Although the consequence is that one can alter situs by interposition of a unit trust, that is not so surprising: one can do the same with an OEIC.

39.5.2 *Situs of unit for CGT*

If the unit trust is not subject to UK law, registered units are situate where they are registered, because that is the rule for shares[19] and the unit is deemed to be a share. This is the same as the private international law rule.

If the unit trust is subject to UK law, a unit is probably UK situate under

---

17 See 34.3 (Meaning of "offshore fund") and 39.2.2 (Unauthorised unit trust: UK trustees).

18 A similar argument applies in relation to the situs of an equitable interest under a substantive trust.

19 See 83.6 (Registered securities: non-UK company).

the UK law rule,[20] or under CGT situs rules for shares in UK incorporated companies.[21] However, a UK law unit trust will in practice have a register here, so the question of priority between the place-of-register rule and the UK law rule will not arise.

The situs of the underlying assets is not relevant. Section 99 clearly overrides s.60 TCGA. A unit is an asset for CGT purposes, rather than an interest in an asset, so that the co-ownership rule is not relevant.[22]

39.5.3 *Residence of trustees and situs*

The residence of the trustees is not relevant for situs, though non-resident trustees are required if it is desired that the units are not to be chargeable securities for SDRT purposes.[23]

39.6 Gain accruing on disposal of unit

An offshore unit trust will be an offshore fund. It may qualify as a reporting fund. If it does not, a gain accruing on a disposal of a unit will be an offshore income gain.[24]

39.7 Luxembourg Fonds Commun de Placement

Section 103A TCGA provides:

> (1) This Act applies in relation to a relevant offshore fund as if—
>
> (a) the fund were a company, and
>
> (b) the rights of the participants in the fund were shares in the company.
>
> (2) An offshore fund is a relevant offshore fund if—
>
> (a) it is not constituted by a company or by two or more persons carrying on a trade or business in partnership, and
>
> (b) it is not a unit trust scheme (see section 99).
>
> (3) In this section and section 103B, "participant", in relation to an offshore fund which is not a collective investment scheme, has the meaning given in section 362(1) of TIOPA 2010.

---

20 See 83.13.4 (The UK-law rule).

21 See 83.5 (Securities of UK incorporated company). This assumes that a unit trust with a UK proper law should be regarded for CGT as a company incorporated in the UK. That seems the better view, though the contrary is arguable.

22 See 83.3 (Co-owned assets).

23 See s.99(5A) FA 1986.

24 See 34.3 (Offshore funds).

Offshore Funds Manual provides:

> **OFM07100 Application of S103A TCGA 92 to interests in arrangements that create rights in the nature of co-ownership-Section 103A TCGA 1992** [January 2012]
> Certain contractual arrangements have historically been treated as transparent for both income and capital gains purposes (for example, Luxembourg Fonds Commun de placement ('FCPs')). But whilst such funds came within the previous definition of an offshore fund, the offshore funds regime for taxing offshore income gains was not applicable as investors were treated as holding, for capital gains purposes, interests in the underlying assets rather than in the fund itself. This led to considerable difficulties for investors when they disposed of their interests, or when new investors were admitted to the fund, as capital gains computations could become very complex. This is not the case for interests in offshore unit trusts which were and are subject to section 99 TCGA 1992, so that for the purposes of tax on chargeable gains a unit trust is treated as if the fund was a company, and the rights of the participants in the fund were shares in that company.
> Section 103A TCGA 1992 was introduced by Part 2 of Schedule 22 Finance Act 2009 to align the treatment of interests in arrangements that create rights in the nature of co-ownership with that of interests in unit trusts. That is, those arrangements are treated as opaque for capital gains purposes from the operative date, so that Section 103A shifts the taxation of gains arising to UK residents to the time when they dispose of their interest in a fund.
> Section 103A does not change the tax treatment of such arrangements for income purposes – they remain fiscally transparent. Therefore, investors are entitled to income as it arises (from whatever source or country) and UK investors are taxable on such income as it arises, regardless of whether income is actually distributed. Income arising retains its character where arrangements are fiscally transparent, so for example if a fund receives income from property situated in the UK then UK investors would be chargeable to tax as if they had received that income directly. ...

CHAPTER FORTY

INTERMEDIATED SECURITIES

40.1 The securities law background

The Law Commission explain:

> 2.7 ...immobilisation entails depositing securities in paper form with a depository linked to a settlement system so that they are held indirectly. Where a new issue of securities is immobilised from the outset, the entire issue will be typically constituted by a single 'global' or 'jumbo' certificate which remains in the vaults of the depository.[1] The depository (or its nominee) becomes the owner of the securities either by registering the securities in its name with the issuer (in the case of registered securities) or by physical possession of the global certificate (in the case of bearer securities).
>
> 2.8 Participants in the settlement system keep interests in the immobilised securities by holding an account with the securities depository. These account holders are able to transfer and pledge their interests in the securities through book entries on the depository's books rather than by re-registration or by delivery of the underlying securities. Following the computerisation of settlement systems in the late twentieth century, the depository's 'books' that record ownership are now electronic records....
>
> 2.11 Recording investors' interests in securities as electronic bytes of information enables these interests to be transferred with ease from one account holder to another simply by a credit and debit in the computerised accounts of an intermediary. As long as the legal system

---

1 Footnote original: Interests in the global note may be exchangeable for definitive certificates, so that the investor can acquire a direct relationship with the issuer. Usually, however, the global note is intended to be permanently immobilised and cannot be split into definitive certificates other than in extreme circumstances, such as the failure of a bond trustee to act on the instructions of the investors upon a default.

recognises this as a valid transfer of an interest in securities, traditional formalities associated with the transfer of underlying securities (for example, the execution of stock transfer forms and the issuance of new certificates) can be avoided. Greater transferability of securities enhances liquidity and consequently their value.

Pooled Accounts

2.17 ... Where an intermediary holds fungible securities for more than one investor it will typically pool these securities in a single client account. To do so, the intermediary opens an account with the issuer or intermediary above it in its own name and records in its own books each individual investor's allocation in the pooled account. In most legal systems, the only reference to an investor's specific allocation is made in its intermediary's accounts and not in the accounts of any higher-tier intermediary or in the register of the issuer...

Central Securities Depositories in indirect holding systems

2.19 The efficiencies generated by intermediation led the Group of Thirty to recommend in 1989 that each domestic market should establish a central securities depository (CSD) to hold both physical and dematerialised securities in the relevant market. Immobilisation of securities is therefore centralised in a single depository (or through a nominee of the CSD). An indirect holding system based on the immobilisation of securities in a domestic CSD is the most common model in advanced countries[2] and there are about thirty systems operating in this manner in Europe alone.

National CSDs do not usually raise issues for situs as the situs of the register of the CSD is usually the same as the situs of the underlying securities. However the issue does arise for international CSDs and other intermediaries.

2.20 In addition to national CSDs, Euroclear in Brussels and Clearstream in Luxembourg operate as international central securities depositories (ICSDs). ICSDs were originally established to manage clearing and settlement of Eurobonds for which there was no supporting market infrastructure. Since their creation over thirty years ago, the business of ICSDs has expanded to also cover most domestic and internationally traded securities. Euroclear and Clearstream maintain links to CSD counterparts in all the significant domestic financial markets, facilitating

2 Footnote original: In America, the Depository Trust and Clearing Corporation has custody, through its nominee Cede & Co, of between 60% to 80% of all publicly traded securities in the US. In 1999, this amounted to securities worth $23 trillion.

cross-border securities trading, clearing and settlement...[3]

A note on terminology. It is apparent from the above that the terms "depository" and "intermediary" may be used synonymously. I prefer the word "**intermediary**" as an asset may be held through a number of intermediaries and "depository" only seems apt for the first of the chain.

I use the word "**investor**" to describe the ultimate holder of the securities through one or more intermediaries. I refer to the investor's assets as "**intermediated securities**"; the term sometimes used (particularly in the USA) is **"depositary receipts"** but I do not think there is any difference in meaning.

I refer to the asset held by the ultimate depository as "**the underlying security**".

Securities held through CREST are not intermediated securities: see 82.9 (CREST) .

40.2 Transparent and contract-based intermediated securities

In order to determine tax treatment of an asset one must first identify the asset and its legal nature.

There are in principle two types of depository receipts:

(1) The depository may hold the underlying security in such a manner that the investors have a proprietary interest in it. In a common law jurisdiction, that will normally involve the depository holding the underlying security on trust for the investor. In a civil law jurisdiction the relationship will not be described as a trust, but the end result will be the same: the investors have a proprietary interest. I refer to that as a **"transparent"** intermediated security ("proprietary" intermediated security would be another possible term and "transparent for IT/CGT" would be a slightly more accurate label).

(2) The depository may hold the underlying investment beneficially, and have a merely contractual obligation to transfer money or assets to the investor. I refer to that as a **"contract-based"** intermediated security ("opaque" would be an alternative term.)

Where there are a series of intermediaries, each may hold their interest on the basis of transparent or contract-based obligations in favour of the next in the chain, or some may hold on one basis and others on another.

---

3 Law Com., *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (May 2008).

Whether an intermediated security is transparent or contract-based depends on the documentation and the law which governs it. This subject is made more complicated by the variety of jurisdictions which may be involved.

40.2.1 *English law*

If English law applies one would expect the underlying security to be held on trust, so the intermediated security is transparent, though that depends of course on the documentation. The position is summarised by Briggs:

> 7. ... [Dematerialized securities] are a form of intangible asset represented by an entry in the account of the legal owner of the security, recognizing the beneficial owner (or some intermediary between the legal and ultimate beneficial owner) as entitled to a stated number or fraction of an otherwise undifferentiated block of those securities held by the legal owner. There may commonly be a long chain of intermediaries between the legal and ultimate beneficial owner of a particular number of (say) ordinary shares in BP. In English law this tiered structure works, and only works for the purpose of creating proprietary interests at all levels, by the recognition of a trustee / beneficiary relationship between each member of the structure. Otherwise the separation of legal and beneficial ownership, and the creation of intermediate layers of proprietary holders, just does not work conceptually.
> 8. Lehman group companies featured in these chains, often being the first level beneficiary (or account holder) beneath the depositary holding legal title to the securities, often holding its interest as custodian for its customers on the street ("clients"), and often for one of its affiliates within the group, either for the affiliate's house account as ultimate beneficial owner, or for the affiliate as custodian (i.e. trustee) for one or more of its own clients.
> 9. But the group was not content just to hold property of this kind in safekeeping, either for street clients or affiliates, in some virtual electronic version of a vault at Gringotts, in the way that a traditional trustee might be expected to do under English law (leaving on one side duties to invest and to transpose investments). There is no reason to suppose that the Lehman group was unique, or even unusual, in having this - let's call it restless - attitude to its clients' property. It wanted to put it to work in the meantime, for itself rather than for its clients, for example by what is known as 'lending it to the street'. So it bargained with its street clients, and arranged with its affiliates, for what are called rights of use and rights of substitution, in relation to property thus held. So far did these rights or (between affiliates) practices go that in one case they came near to destroying, and in another case actually did destroy, the very substratum or essential features of a trustee beneficiary relationship, so that the client (or affiliate) risked losing (or actually did lose) any proprietary interest

in the security, in exchange for purely personal contractual rights as against the Lehman entity holding the security.

10. For as long as the Lehman group remained a going concern, good for its personal undertakings, this mattered little. The substitution of personal for proprietary rights as against the mighty Lehman entities secured for clients and affiliates the enjoyment of the economic fruits of beneficial ownership just as well. The exercise by the group of rights of use and of substitution no doubt usually swelled its profits in good times, and may even have led to a reduction in fees charged to clients (well, maybe…). But of course the onset of insolvency within the group made the difference between a personal and proprietary right of the utmost importance, not only to street customers, but also as between Lehman companies in a quasi trustee / beneficiary relationship with each other. As a result the potentially fine line in English law between derogations from the 'normal' duties of a trustee which do or do not prevent the recognition of a trust relationship altogether (or prevent it from arising in the first place) became of crucial importance. That distinction is part of the common law of trusts which originated in the context of family estates and succession, as far removed from the modern world (or jungle) of investment banking as it is possible to get.

11. ... Whether a relationship between two persons in connection with particular property is that of trustee and beneficiary is ultimately a question of intention. ... I want to illustrate the point by reference to three cases. In the first case *Lomas v RAB Market Cycles (Master Fund)* [2009] EWHC 2545 (Ch) the standard form of Lehman International Prime Broker Agreement (Charge version) gave LBIE rights of substitution and use in relation to client property which the agreement otherwise described as being beneficially owned by the client, while held by LBIE. A representative of LBIE's unsecured creditors argued with force that these rights were irreconcilable with LBIE being the client's trustee in relation to the property, so that it all fell into LBIE's insolvent estate, leaving the clients only with claims for its value as unsecured creditors. I concluded that, taken as a whole, the agreement did disclose a sufficient intention to make LBIE the client's trustee of the property or its substitute, notwithstanding the conferral of rights on LBIE in relation to it which would have made a 19th century trust lawyer turn in his grave. There was no appeal.

12. In the second case, *Pearson v Lehman Brothers Finance SA* [2010] EWHC 2914 (Ch), generally known as RASCALS (an acronym for Regulation and Administration of Safe Custody and Global Settlement), the Lehman group set up a system for the acquisition and holding by hub companies (i.e. LBIE in Europe) of all securities which any Lehman company wished to acquire in the relevant territory, so that the hub company held all the securities, between acquisition and sale, for the account of its Lehman affiliates. But the practice within the group was for the hub company to use the securities for its own purposes, including lending to the street for liquidity management, selling to

meet short positions of its own or of other affiliates, and generally acting in a comprehensively un-trusteelike manner in relation to the holding, while crediting the relevant affiliate (for whom the security was held) with both its value and with any intermediate income, such as dividends on shares.

13. Regulatory and capital adequacy concerns in the mid 1990s led to the erection of a remarkable and complex computer automated structure whereby the relevant securities were made the subject of daily repos or open ended stock loans between the hub company and the relevant affiliate (for the account of which they had been purchased) for the whole of the period between acquisition from and disposal to the street. It operated on a daily basis without any human intervention at all. This structure only made sense on the assumption that the parties intended the beneficial interest to start with the affiliate, i.e. that they were acquired by LBIE for the affiliate as its trustee. The purpose of the repos and stock loans was then to transfer beneficial ownership of the security in question back to the hub company for the whole period of its holding within the group.

14. ... The question then arose: who then beneficially owned the underlying securities, LBIE or its relevant affiliates? In the end the answer turned on the intricate mechanics of the automated scheme, coupled with the group's centralized book entries, spiced with a crucial bit of estoppel. But LBIE's administrators alleged that there had could never have been a trust between LBIE and the affiliates in the first place, so that the automated structure was both misconceived and completely unnecessary.

15. I concluded that, prior to the erection of the automated structure, that submission would have succeeded. The use which the affiliates allowed LBIE to make of the securities was inconsistent with LBIE being intended to be a trustee. All the affiliate got was a personal right against the hub company to the economic fruits of the underlying securities, which belonged from purchase until re-sale to the hub company, legally and beneficially. But since the automated structure only made sense on the assumption that the parties assumed they had transferred the beneficial interest to the affiliate, this disclosed, for the first time, a sufficient intention to create a trust so as actually to achieve that result. The Court of Appeal agreed....[4]

40.2.2 *New York law*

The position may be different under US law(s). Briggs J comments:

> 17. By contrast in the USA there has been devised a new artificial legal

4 Briggs, Denning Lecture 2012 *http://www.bacfi.org/files/Denning%20Lecture%202012.pdf*; see too *HSBC Holdings v HMRC* [2012] UKFTT 163 (TC) at [85].

> structure as the conceptual basis for the holding of dematerialized securities which does not depend upon traditional concepts of the separation of legal and beneficial interests by a trust, as part of the Uniform Commercial Code. It remains to be seen which will work best for all concerned.[5]

Until 2012 it was, I think, generally accepted that American depositary receipts used in practice were transparent, and this was the view expressed in the CG Manual.

HSBC Holdings v HMRC[6] concerned ADRs governed by the law of New York. It suited HMRC to argue that HSBC depository receipts were contract-based. The tribunal heard expert evidence and clearly preferred the view that the ADRs, which were "fairly typical",[7] were contract-based, though the conclusion is tentatively expressed:

> 148. Overall our conclusion is that we are not satisfied as a matter of fact that under the law of the State of New York the holder of an HSBC ADR has a beneficial interest in the underlying fund of HSBC shares

While in the HSBC litigation it suited HMRC to argue for contract-based ADRs, that conclusion would often favour the taxpayer. Accordingly HMRC now seek to return to what was formerly understood to be the position. The CG Manual provides:

> **50240 Depository receipts** [August 2012]
> **... DRs issued outside UK**
> Where a DR is issued outside the UK the question of whether the holder of the DR is the beneficial owner of the underlying shares will be determined by reference to the law of the territory in which the DR is issued.

More accurately, whether the holder of the DR is the beneficial owner of the underlying securities would depend on the terms of the deposit agreement construed in accordance with the law governing the agreement. The CG Manual continues:

> Information on beneficial ownership may be provided to investors by the depository.

---

5 *http://www.bacfi.org/files/Denning%20Lecture%202012.pdf.*

6 [2012] UKFTT 163 (TC).

7 at [97].

That seems unlikely.

> **Beneficial ownership not conclusively determined by overseas law**
> Where beneficial ownership of the underlying shares cannot conclusively be determined by reference to the law governing the arrangements relating to the issue of the DRs, for tax purposes HMRC will continue to determine beneficial ownership according to its understanding of the principles of UK law.[8] This means that HMRC will continue to apply its longstanding practice of regarding the holder of a DR as holding the beneficial interest in the underlying shares.
> The ADRs referred to in the HSBC decision fall into this category.

Thus HMRC first disregarded their longstanding practice, and now disregard the tribunal's decision which was based on HMRC's expert evidence. The reader may think this a not very impressive display of administration. Now it is done, the genie is not so easily returned to the bottle. If it suits them, taxpayers may properly proceed on the basis that the Tribunal correctly decided that the HSBC ADRs, and any others in standard form, are contract-based.

40.2.3 *Belgium and Luxembourg*

I concentrate on Belgium and Luxembourg as they are the homes of Euroclear and Clearstream. The Law Commission say:

> **LEGAL ANALYSIS OF INTERMEDIATED SECURITIES**
> 2.24 Intermediation has had a substantial effect in transforming the legal nature of investor's rights in securities. In the UK and elsewhere, the traditional analysis of an investor's rights arising from its direct relationship with an issuer and based on its physical possession of securities or by an entry in the issuer's register no longer reflects the reality of the market place....
> 2.31 Belgium[9] and Luxembourg[10] are each home to major ICSDs

---

8 Author's note: There is no such thing as UK trust law. It is possible that Scots law on this point, if applicable, is the same as English law I would be interested to hear from Scottish readers who could assist on this aspect. Perhaps Scots law is not often used in this context.

9 Footnote original: Belgian Royal Decree No. 62, as co-ordinated by Royal Decree of 27 January 2004.

10 Footnote original: Luxembourg Law of 1 August 2001 on the circulation of securities and other fungible instruments, Articles 6.7 and 15.

(Euroclear and Clearstream respectively) and both have recently clarified their respective securities laws. Investors that hold securities through an intermediary in an omnibus account are treated as having a co-ownership right in the pool of fungible securities, exercisable only against the intermediary. Should the intermediary fall insolvent, the investor is given a right of revendication, that is to say, a claim for the return of property enforceable against the intermediary and its creditors...

Direct enforcement versus indirect enforcement

2.35 In all common law jurisdictions (such as the UK and the US) and a number of civil law countries (for example Belgium and Luxembourg), an investor that holds through an intermediary is unable to exercise the rights it may have in the underlying securities directly against the issuer of those securities.[11] The investor can only enjoy the fruits of its investment by enforcing its rights against its intermediary. Furthermore, the investor will be generally prohibited from making a claim against securities held in the account of a higher tier intermediary but must rely on the contractual and fiduciary obligations of its own intermediary to pursue such claims....

2.49 The effect of commingling securities in a pooled account is generally to preclude the continuing existence of direct property rights of individual owners in the specific securities held prior to commingling...

LEGAL PROTECTION BASED ON CO-OWNERSHIP

2.51 In a number of EU Member States, account holders are given proprietary rights (or the equivalent protection) by treating their interests in a commingled account as co-ownership (or co-proprietary) interests in a fungible pool.

2.52 In Belgium[12] and Luxembourg,[13] statute converts what would otherwise be a mere contractual claim against the intermediary into an intangible co-ownership right in a pool of fungible book-entry securities held by the intermediary.[14]

That comes down to transparent intermediated securities (though not based on a common law trust).

---

11 Footnote original: Unless the issuer permits otherwise by contract or provisions in a deed poll or trust deed.

12 Footnote original: Belgium Royal Decree No 62, Article 2.

13 Footonte original: [Luxembourg] Securities Act 2001, Article 7.

14 Law Com. *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (May 2008).

40.2.4 *Denmark, Germany and the Netherlands*

The Law Commission say:[15]

> An investor may be granted a right to enforce its claim against an upper tier intermediary in circumstances where its own intermediary has acted in breach of duty or is insolvent. This is the case in Denmark and Germany[16] and possibly also in the Netherlands.[17]

Thus it seems that intermediated securities in these jurisdictions are also transparent.

40.3 Situs of transparent intermediated security for IHT

There are no relevant statutory provisions, so the common law rules apply for IHT.

The relevant principle is that an asset is situate where it can be dealt with. An intermediated security is dealt with (ie transferred) in the jurisdiction of the intermediary. That is the jurisdiction where litigation over the transfer of the intermediated security would normally take place. So that is the situs of the intermediated security; the situs of the underlying security is irrelevant.

It might be argued that in the case of a transparent intermediated security, the situs of the investor's asset (the intermediated security) must be that of the underlying security since:

(1) A simple bare trust or nomineeship is transparent for IHT situs.[18]

(2) The underlying security is held on a bare trust.

However the trust (if any) which has effect under a transparent intermediated security is not a simple bare trust since (1) it allows pooling and (2) change of title is effected by registration; in fact it is not properly

---

15 See Issues Affecting Account Holders and Intermediaries para 1.239 (June 2006) accessible *http://lawcommission.justice.gov.uk/docs/Intermediated_securities_seminar_2.pdf*

16 Footnote original: If an intermediary refuses to enforce a claim against the intermediary above for the return of securities, German law permits the investor to bring a direct action for return against the upper tier intermediary under the Securities Deposit Act, sections 7-8.

17 Footnote original: Sections 7:420 and 421 of the Netherlands Civil Code which relate to agency contracts could give the investor a right against an upper tier intermediary in the event of a breach of duty or insolvency of its own intermediary.

18 See 82.31 (Interest under bare trust or nomineeship).

described as a bare trust in the strictest sense of that expression.[19]

Dicey agrees:

> ... the *situs* of immobilised securities should be regarded as the place where the depository is established and where it keeps the database in which the entitlements of the depositors are recorded.[20]

This is also supported by Canadian authority:

> The place where the central securities depository control account is located could [and should] be considered the situs of "dematerialized" securities. In a multi-tiered holding system, the account would be situated at the financial investment intermediary on whose books the interest of the debtor appears. This is the place where the record that determines title is to be found.[21]

The Law Commission agree:

> 21.6 The concentration of the investor's interests into one account *with a single situs* can also greatly simplify conflicts of laws issues. This is of particular benefit to lenders wishing to take security over a portfolio of securities. Provided that the choice of law rules applied to the different intermediated securities are clear, the lender need only concern itself with the perfection requirements of the jurisdiction in which the account is located rather than the requirements of each of the jurisdictions applicable to the various underlying securities.[22]

Thus the situs of the intermediated security (the asset held by the investor) may be different from the situs of the underlying securities. Such differences are not surprising since, as the Law Commission say, "Intermediation has had a substantial effect in transforming the legal nature of investor's rights in securities." Investors may ignore the difference between intermediated securities and underlying securities, but

---

19 See 84.5.1 (Definition(s) of bare trust and associated terminology).

20 *Dicey, Morris & Collins on the Conflict of Laws* (15th ed., 2012), para 22-043 (Immobilised securities). This view is enthusiastically supported by Benjamin, *Interests in Securities* (2000), Chap 7. See too the Trusts Discussion Forum archive accessible *http://www.trustsdiscussionforum.co.uk* under the thread "Will for Shares of British Virgin Islands (IBC) Holding".

21 *Re Bloom* [2004] BCSC 70, 27 BCLR (4th) 176, accessible *http://www.canlii.org*.

22 Law Com. *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (May 2008). *http://lawcommission.justice.gov.uk/*

if so they may be surprised on the insolvency of an intermediary, as actually happened in the Lehman Brothers litigation.

40.3.1 *HMRC view*

HMRC take a different view. HMRC regard intermediated securities which are transparent for income tax as transparent for situs; what matters is the situs of the underlying security:

> ... where a financial institution or other intermediary has purchased Eurobonds or similar fungibles through Euroclear or Cedel [now Clearstream] on behalf of a client-investor, the Revenue will treat the financial institution or intermediary as the nominee or agent of the client-investor, unless the terms of the particular issue prescribed otherwise. So, save in the excepted circumstances, the Revenue will look through the intermediary and treat the beneficiary-investor as owning the underlying Eurobonds or similar fungibles.[23]

The IHT Manual makes the same point, slightly more tersely:

> **27077 Eurobonds and American depository receipts** [January 2014] We regard the situs of securities dealt with through computerised clearing systems (for example, Euroclear; CEDEL [which became Clearstream in 2002]) as determined by the terms of issue of the particular security. ...

There is a certain common sense in (what I take to be) the HMRC view that situs of the intermediated security is determined by the situs of the underlying security. However, situs is not a matter of common sense, and that view cannot stand against the authorities set out above. The common law situs rules looks to the situs of the intermediated security, not the underlying security.

It must be frustrating for HMRC to see a significant part of the economy taken out of the scope of IHT by means of clearing systems and depository receipts. But in practice the loss of tax will be nil or next to nil, for well advised UK resident foreign domiciliaries will not hold UK situate investments, above the nil rate band, and for non-residents, IHT on such assets is largely uncollectable. Indeed the current law could aid the UK economy by encouraging UK investment, or at least it could do so if HMRC acknowledged it.

---

23 [1994] PCB 139.

Curiously, the CG Manual in 2012 deleted the passage which formerly stated that the situs of the DR is the situs of the underlying security. That might reflect a hesitant change of view or just an accident. But as far as I know, HMRC practice has not changed.

40.4 Situs of proprietary intermediated security for CGT

In the absence of a statutory provision, the IHT situs rule will apply for CGT. Six statutory provisions need consideration: the co-ownership situs rules, s.60 TCGA, the UK-law rule, and three rules dealing with securities in s.275(1)(d)(da)(e).

40.4.1 *Intermediated securities of non-UK companies*

The reader will recall that s.275(1)(e) TCGA provides:

> subject to paras (d) [government securities] and (da) [UK incorporated companies] above, registered shares or debentures are situated where they are registered and, if registered in more than one register, where the principal register is situated.[24]

In this paragraph I assume we are not concerned with government securities or UK incorporated companies within paras (d) or (da).

I first consider debentures and then shares.

As far as debentures are concerned, there are two questions:

(1) are intermediated debentures (the interests held by investors) properly described as "debentures" within the meaning of s.275(1)(e)?

(2) if so are intermediated debentures "registered" debentures?

Since debenture stock count as "debentures"[25] it seems reasonably clear that the intermediated debentures are properly described as "debentures".

Intermediated debentures are registered in the sense that the investors interests are recorded on the intermediary's register.[26] At first sight one might think that the register referred to in s.275(1)(e) must be a register kept by the company which issued the debentures. However a company does not have to keep a register of its debenture holders (unlike a shareholder register). The distinguishing feature of a register is that it

---

24 See 83.6 (Registered securities: non-UK company).

25 See 83.2.4 (Meaning of "debenture").

26 Benjamin, *Interests in Securities* (2000) para 2.91: "Interests in securities [Intermediated securities] may properly be characterised as a form of registered securities, even where the underlying securities are in bearer form."

determines or provides evidence of ownership.[27] So it is considered that intermediated debentures are "registered" on the intermediary's register. It follows that:

(1) If the underlying debenture is not registered, the intermediary's register is the only register, and the investors interests are situate where the intermediary's register is situated.
(2) If the underlying debenture is registered, there are two registers:
    (a) The company's register of the underlying debenture (which will record the intermediary as the registered holder).
    (b) The intermediary's register of the intermediated debenture (which will record the investor as the registered holder).

It is considered that the company's register does not come into the picture, since the asset which the investor owns is the intermediated debenture and not the underlying debenture. But even if that is not correct, the intermediary's register should be regarded as the principal register so that is the one which governs situs.

For these reasons, an intermediated debenture of a non-UK incorporated company is situate where the intermediary keeps its register.

In practice it does not often matter whether the situs of an intermediated debenture (of a non-UK incorporated company) is in the place of the intermediary's register or the situs of the underlying debenture. Either way, the asset will not usually be UK situate. But it could matter, for instance, if the debenture is a bearer debenture and the document is in the UK. In such a case it is sensible to look to the intermediary's register rather than to the place of the document of the underlying debenture, since an investor could not be expected to know where the document of the underlying debenture is situated.

The same applies when the underlying security is shares in a non-UK incorporated company, rather than debentures.

40.4.2 *Securities of UK incorporated companies*

It is considered that intermediated securities of UK incorporated companies are properly described as shares or debentures and so fall within the rules in s.275(1)(d) TCGA. If that is correct, the registered securities rule in 275(1)(e) does not apply: it does not matter whether the

---

27 The intermediary's register is not open to inspection, unlike a register under s.744 Companies Act 2006, but open access is not an essential feature of a register, and there is no reason to expect foreign law to apply English company rule principles.

securities are regarded as registered. Intermediated securities of UK incorporated companies are UK situate for CGT purposes.

40.4.3 *Municipal and government securities*

For the same reason, intermediated securities of government or municipal authorities are situated in the authority concerned: s.275(1)(d) TCGA.

40.4.4 *Another view*

In the case of co-ownership interests the co-ownership situs rules[28] in s.275C TCGA provide:

> (2) The situation of the interest in the asset shall be taken to be the same as the situation of the asset, as determined in accordance with subsection (3) below.
> (3) The situation of the asset for the purposes of subsection (2) above shall be determined on the assumption that the asset is wholly-owned by the person holding the interest in the asset.

Do investors hold interests in the underlying securities as co-owners (within the meaning of the co-ownership rule)? That depends on the terms of the agreement with the intermediary but it is likely to be the case.[29] If so, it appears at first sight that these rules override the common law situs rule, so the situs of the investor's interest for CGT is that of the underlying security.

Section 60(1) TCGA provides another route to the same destination:

> In relation to property held by a person
> [a] as nominee for another person, or
> [b] as trustee
> [i] for another person absolutely entitled[30] as against the trustee,
> [ii] or for any person who would be so entitled but for being an infant or other person under disability
> [iii] (or for 2 or more persons who are or would be jointly so entitled),
> this Act shall apply as if the property were vested in, and the acts of the nominee or trustee in relation to the property were the acts of, the person or persons for whom he is the nominee or trustee ....

---

28 See 83.3 (Co-owned assets).

29 See 40.1 (The securities law background).

30 Section 60(2) TCGA defines "absolutely entitled" but need not be set out here.

Does the intermediary hold for the investors as bare trustee (within the s.60 sense of that expression)? That depends on the terms of the agreement with the intermediary but it is likely to be the case. If so, it appears at first sight that the effect of s.60 TCGA is to treat the investors as co-owners of the underlying security, so the situs of the investor's interest is that of the underlying security.

It is considered however that these deeming provisions do not alter the fact that the investor's intermediated securities are "registered" so that s.275(1)(e) continues to apply. This also overrides the UK-law rule[31] even if the underlying security was subject to UK law, or if the intermediary arrangement was subject to UK law.

40.4.5 *Conclusion*

The CG Manual formerly stated that the situs of an intermediated security for CGT purposes is that of the underlying security rather than that of the intermediary's register.[32] That is correct for securities of UK incorporated companies. It is considered that situs of securities of non-UK companies depends on the place of the intermediary's register. That could be different from the situs of the underlying security, though circumstances in which the difference matters will be rare.

40.5 Other CGT aspects of transparent intermediated securities

The CG Manual discusses the issue under the heading "depository receipts". The Manual first discusses the securities law background and practice:

> **50240 Depository receipts** [August 2012]
> You may come across assets referred to as Depository Receipts (DRs). The commonest are American Depository Receipts (ADRs).
> DRs are used as substitute instruments indicating ownership of securities such as shares. Although DRs may be owned by anyone, they are designed primarily to enable investors to hold and deal in shares of companies located in countries other than their own. Such activities might otherwise be inhibited by difficulties in transferring original share certificates from one country to another. The investors hold or trade the DRs rather than the share certificates themselves.

---

31 See 83.13.1 ("Intangible asset").

32 See 40.3.1 (HMRC view).

> A person holding shares for which DRs are available can convert them into DR form by depositing the share certificates with a local branch of a depository (a financial institution such as a bank). The depository issues a DR. This document certifies that the depository, or an appointed custodian in the country of the underlying shares, holds the share certificates and that the owner of the DR is entitled to the share certificates on surrender of the DR. The precise detail of the arrangements may vary, but the holder of a DR will generally have many of the benefits associated with share ownership. In particular:
> - the DR can be exchanged for the underlying shares on demand by the DR holder
> - any dividends, subject to a handling fee, flow through to the DR holder.
> - the holder of shares in DR form may at any time cancel the arrangement by asking for delivery of the share certificates in respect of their underlying shares, and surrendering the DRs at a local branch of the depository.
>
> This guidance applies to DRs that display such characteristics.
> We have been asked to clarify how holding shares via DRs will affect liability to Capital Gains Tax or Corporation Tax on chargeable gains following the decision of the First Tier Tribunal in the Stamp Duty Reserve Tax case of *HSBC v HMRC*, [2012] UKFTT 163 (TC).
> **UK-issued DRs**
> Where a DR is issued in the UK the HMRC view is that the holder of a DR is the beneficial owner of the underlying shares.

More accurately, as discussed above, whether a trust is created would depend on the terms of the deposit agreement construed in accordance with the law governing the agreement.

Assuming there is a transparent intermediated security, the CG Manual goes on to set out the tax implications:

> ... the practical implications include that:
> [1] a transfer of shares by a shareholder to a depository in exchange for an issue of DRs is not a disposal of the shares for capital gains purposes because the shareholder retains beneficial ownership of the shares
> [2] a disposal of the DRs is a disposal of both the DRs themselves and a disposal of the underlying shares.[33]

33 [Author's note]. This assumes that the investor holds two distinct assets, (1) "the DRs themselves" and (2) the underlying securities. That is not correct. A DR should be regarded as a matter of general law as one asset and not two. Admittedly a DR

> In practice the value of a DR will track the value of the underlying shares very closely and to that extent the consideration for the disposal of the DRs should be regarded as consideration for the disposal of the shares
> [3] in a share exchange or company reconstruction in which shareholders have an option to receive DRs instead of being issued with shares we accept that the shares are to be treated for the purposes of TCGA92/S135 as being issued to the shareholders, see CG52500+.
> [4] if the holder of DRs converts them back into the underlying shares there is no change of ownership of those shares and so no disposal of the shares. There will have been a disposal of the DRs and the usual computational rules will apply. If no consideration is received for the disposal of the DRs there will be no chargeable gain.

40.5.1 *Voting rights on intermediated securities*

The holder of intermediated securities may or may not have the voting rights attached to the shares: that depends on the documentation. Normally it makes no difference for tax purposes, but occasionally that matters.

Section 169S(3) TCGA defines "personal company" for the purposes of entrepreneurs' relief:

> For the purposes of this Chapter "personal company", in relation to an individual, means a company—
> (a) at least 5% of the ordinary share capital of which is held by the individual, and
> (b) at least 5% of the voting rights in which are exercisable by the individual by virtue of that holding.

So where entrepreneurs' relief may be applicable, care needs to be taken or the relief may be lost.

40.6 Taxation of contract-based intermediated securities

The CG Manual also considers the tax position of contract-based intermediated securities:

---

confers a number of different rights, but that is also true of a share, a unit in a unit trust, an equitable interest, and most if not all types of property which are nevertheless regarded as single items of property and not as two or more distinct items. However, it does not matter as the Manual goes on to effectively ignore the two-asset analysis. In the view of the Manual, the beneficial interest in the underlying share is effectively the only asset.

50240 Depository receipts [August 2012]

...Beneficial ownership determined by overseas law

Where the relevant law means that the holder of a DR is not the beneficial owner of the underlying shares the practical implications include that:

[1] a transfer of shares by a shareholder to a depository in exchange for an issue of DRs is a disposal of the shares for capital gains purposes because the shareholder loses beneficial ownership of the shares

[2] a disposal of the DRs is not a disposal of the underlying shares

[3] in a share exchange or company reconstruction in which shareholders have an option to receive DRs instead of being issued with shares the conditions of TCGA92/S135 will not be met by shareholders who take DRs as they have not been issued with shares.

[4] where a holder of DRs converts them into the underlying shares there will be a disposal of the DRs and an acquisition of shares. The usual computational rules will apply.

In addition:

(1) The situs of the intermediated security for IHT purposes will be the relevant jurisdiction.

(2) The intermediated security will be UK situate for CGT purposes if governed by UK law, under the UK law rule, or if it is a future or option. Otherwise it will be non-UK situate.

(3) The income from the ADR would be foreign source income (but subject to the manufactured dividend rules, if applicable).

CHAPTER FORTY ONE

PARTNERSHIPS

41.1 Partnerships: Introduction

Before 2014 I wrote that a full discussion of partnership taxation would require a book to itself; after the FA 2014 reforms, it would now require two volumes. In this chapter I focus on aspects relevant to the themes of this book.

I do not consider losses, or the position of corporate partners within the scope of corporation tax.

41.1.1 *Cross references*

This chapter considers aspects of partnerships which are more conveniently addressed in isolation. I have generally preferred to deal with partnership issues as they arise in the context of other topics see:

11.34 (Partnerships: remittance issues)
34.3.3 (Whether partnerships are offshore funds)
35.6 (OIG accruing to partnership)
75.23 (Partnerships: ATED)
76.22 (Partnerships - POA issues)
82.34 (Situs of partnership share for IHT)
84.18 (Jersey general and limited partnerships)
84.19 (Foreign limited liability partnership).

41.2 "Partnership" "trade" and "firm"

41.2.1 *Partnership*

"Partnership" is not usually defined in tax legislation so the starting point is the general (partnership law) meaning. This is qualified by statutory definitions for LLPs,[1] SDLT[2] and ATED.

---

1 See 41.8 (Limited liability partnership).

2 See 75.4.1 ("Partnership").

41.2.2 *"Trade"*

Before discussing "firm" we need to consider ITTOIA's idiosyncratic definitions of "trade". Section 847 ITTOIA provides:

> (2) The provisions of this Part which are expressed to apply to trades also apply, unless otherwise indicated (whether expressly or by implication)—
>
> (a) to professions, and
>
> (b) in the case of this section and sections 849, 850, 857 and 858 to businesses that are not trades or professions.
>
> (3) In those sections as applied by subsection (2)(b)—
>
> (a) references to a trade are references to a business, and
>
> (b) references to the profits of a trade are references to the income arising from a business.

Thus the word "trade" in part 9 ITTOIA always includes profession (it would be appropriate to simplify the law by abolishing all distinctions between professions and trades). The word "trade" sometimes includes "business". Since it is not convenient to use the same word in two different senses, when trade is used in the wider sense, I refer to it as "**trade (including business)**".

41.2.3 *"Firm"*

We can now turn to the definition of "firm". Section 847(1) ITTOIA provides:

> In this Act persons carrying on a trade [including business] in partnership are referred to collectively as a "firm".

This is the same as the definition of "firm" in the Partnership Act 1890.[3] In practice "partnership" and "firm" are used interchangeably.

41.3 Is a partnership a "person"?

The use of the word "person" always requires some care.

The starting point is that "person" has a legal sense, distinct from the

---

3 The Partnership Act 1890 provides:

"1(1) Partnership is the relation which subsists between persons carrying on a business in common with a view of profit. ...

4(1) Persons who have entered into partnership with one another are for the purposes of this Act called collectively a firm ..."

ordinary meaning (if there is such a thing). This is sometimes reflected by the expression "legal person" (ie something that the law regards as a person). Garner comments:

> "So far as legal theory is concerned, a person is any being whom the law regards as capable of rights and duties. Any being that is so capable is a person, whether a human being or not..."[4] Lon Fuller, among others, has questioned whether *person* is the most desirable word for the concept. What term might be better? Fuller suggests *legal subject* or *right-and-duty bearing unit.*[5] On second thought, perhaps *person* is not quite so bad.[6]

An English[7] partnership is not a legal person, that is, it is not a legal entity distinct from the partners; the law does not regard the partnership (as opposed to the partners) as capable of rights or duties.

The rule that English partnerships are not legal persons could have been (more or less) undone by sch.1 Interpretation Act 1978 which provides that for the interpretation of statutes from 1889:

> "Person" includes a body of persons corporate or unincorporate.

A partnership is a "body of persons" in the ordinary sense of that phrase,[8] and is "unincorporate"[9] and so an English partnership is a person in the Interpretation Act sense. Although the position strictly is that references to person in statutes prima facie include even an English partnership, the rule that English partnerships are not legal persons is very deeply ingrained and in practice no-one usually takes much notice of the Interpretation Act definition; its application is more or less optional since it does not apply "where the context otherwise requires." I suspect that this definition is directed to unincorporated associations rather than partnerships.

---

4 Garner cites Salmond, *Jurisprudence* (12th ed., 1966), p.299.

5 Garner cites Fuller, *Legal Fictions* (1967), p.12-14.

6 Garner, *Dictionary of Legal Usage* (3rd ed., 2011), entry under *Person*.

7 The same applies to a Northern Ireland partnership. For the purposes of this chapter, I use the expression "partnership" to include a general partnership and a limited partnership, as no difference is to be drawn between them.

8 "A partnership is, as a matter of the ordinary use of English, plainly a body of persons"; *Padmore v IRC* 62 TC 352 at p.377. However it appears that a partnership is not a body of persons within the definition in s.989 ITA: see at p.377.

9 I think "unincorporate" is just an archaic term for "unincorporated".

A Scottish partnership is a legal person.

The difference between England and Scotland is not in practice as important as might appear at first sight:

> In considering whether a partnership or a group of persons associated in partnership constitutes "a person charged" within the meaning of the Rule,[10] I think it right to lay aside any preconceptions derived either from the law of England or from the law of Scotland as to the technical legal nature of a partnership. In Scotland a firm is "a legal person distinct from the partners of whom it is composed" (Partnership Act, 1890, Section 4 (2)), but this is not so under English law. For the present purpose this distinction should, in my opinion, be disregarded. The Income Tax Acts are ... equally applicable on both sides of the border and the language which they employ ought to be construed so as to have, as far as possible, uniform effect in England and in Scotland alike.[11]

Fundamentally, the context governs the sense and may show that the word "person" in any particular provision is used in a way which does or does not include a partnership.

A LLP is a legal person, and a body corporate, but for tax purposes it is usually treated in the same way as an ordinary partnership: see 41.8.3 (Income tax treatment of LLP).

As to whether a partnership is a person for the purposes of the OECD model treaty, see 6.15.1 (Is a partnership a "person" for treaty purposes?).

In practice the starting point for the IT and CGT status of partnerships is to be found in s.848 ITTOIA and s.59 TCGA which lay down, or confirm, the principles of transparency and non-personality.

41.4 Transparency of partnership for IT

Section 848 ITTOIA provides:

> Unless otherwise indicated (whether expressly or by implication), a firm is not to be regarded for income tax purposes as an entity separate and distinct from the partners.

ITTOIA EN provides:

---

10 Rule 9 of the rules applicable to Schedule D cases I and II, ITA 1918; there is no equivalent in current legislation, but this does not affect the point being made.

11 *R v General Commissioners of Income Tax for The City of London ex p. Gibbs* 24 TC 221 at p.247; the point is also made at p.244.

> 1711. This section makes it clear that, for income tax purposes, a firm is not an entity distinct from the partners in the firm. It is based on section 111(1) of ICTA.
> 1712. In the case of firms established under English law this provision merely confirms their position under that law. But Scottish firms, for example, are legal entities. This provision ensures that all firms are treated in the same way.

So partnerships are transparent for IT, ie partnership income is regarded as income of the partners and not of the partnership as such.

IT transparency follows from basic principles, not from this statutory provision.[12] In England this is clearly the case. IT transparency is a necessary consequence of the partnership law rule that the partners are joint owners of the partnership assets, and that an English law partnership does not have legal personality, ie it is not itself a person. For unless partnership income accrued to the partners, it would not accrue to anyone, and the partnership income must accrue to some person or persons if it is to be taxed.

In Scotland too, IT transparency follows from basic principles and not from the statutory provision. The Law Commission Report on Partnership Law provides:[13]

> The Inland Revenue justify their approach to UK partnerships[14] by reference to the following three characteristics:
> (1) the partners carry on the business of the partnership with a view to profit;
> (2) every partner is liable jointly or jointly and severally with the other partners for all the debts and obligations of the partnership; and
> (3) the partners own the business, each having at least an indirect share

12 Section 848 ITTOIA only dates from the FA 1995. Yet the IT transparency of partnerships has been settled tax law since early times: *Dreyfus v IRC* 14 TC 560. The predecessor provision, s.111 ICTA 1988, perhaps assumed but did not prescribe IT transparency. ("Where a trade or profession is carried on by two or more persons jointly, income tax in respect thereof shall be computed and stated jointly, and in one sum, and shall be separate and distinct from any other tax chargeable on those persons or any of them, and a joint assessment shall be made in the partnership name.")

13 Law Com 283 (2003) para 4.18.

14 [Footnote original] This covers both the English law partnership and the Scots law partnership notwithstanding that the former has no separate legal personality and the latter has separate legal personality.

in the net assets of the partnership.[15]

That is, the fact that a Scots partnership does have legal personality does not entail the conclusion that income accrues to the partners and not to the partnership. Underlying this issue is some vagueness or ambiguity in what the concept of legal personality does mean or entail. The Courts' inclination to minimise taxation differences between English and Scots partnerships may have been an influence in reaching this legal analysis.

The practical reader might ask impatiently whether it matters that IT transparency follows from basic nature of a partnership or from the statutory provision. It does not matter so far as the settled rule is that partnership income or gains accrue to the partners; but identifying the nature of a partnership is the first step when any questions arise relating to partnerships, so the question often does matter.[16]

41.4.1 *Allocation of profits/losses between partners*

Section 850 ITTOIA provides:

> (1) For any period of account a partner's share of a profit or loss of a trade carried on by a firm is determined for income tax purposes in accordance with the firm's profit-sharing arrangements during that period.
> This is subject to sections 850A and 850B.
> (2) In this section and sections 850A and 850B "profit-sharing arrangements" means the rights of the partners to share in the profits of the trade and the liabilities of the partners to share in the losses of the trade.

Sections 850A and 850B concern losses and are not discussed here. Section 851 ITTOIA extends the rule to non-trading income:

> (1) This section applies if—
> (a) sections 849 and 850 apply in relation to the profits or losses of a trade carried on by a firm, and

---

15 [Footnote original] See *Memec PLC v IRC* 71 TC 77 and in particular Peter Gibson LJ at pp.111-113. Neither the separate personality of the Scottish partnership nor the absence of mutual agency in Scots law prevented the conclusion that in substance the position of the partners in a Scottish partnership in relation to the profits was the same as in an English partnership (p.113B–C).
See too 84.2.2 (How to categorise an entity as transparent or opaque).

16 See 11.34 (Partnerships).

(b) the firm has other income or losses.

(2) Those sections also apply as if references to the profits or losses of the trade were references to the other income or losses.

41.5 Partnership income: remittance basis

Section 857 ITTOIA provides:

(1) This section applies if—

(a) a firm carries on a trade [including business] wholly or partly outside the UK,[17]

(b) the control and management of the trade [including business] is outside the UK, and

(c) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to a partner for a tax year.

(2) The partner's share of the profits of the trade [including business] arising in the UK is determined in accordance with sections 849 to 856.

(3) The partner's share of the profits of the trade [including business] arising outside the UK is treated as relevant foreign income.

The significance of s.857(3) – treating partnership income as RFI – is that the income can qualify for the remittance basis.

41.5.1 *Segregating partnership profits*

Suppose:

(1) profits of a partnership trade arise partly in and partly outside the UK; and

(2) a partner receives a share of those profits.

There is an apportionment to determine the profits arising in/outside the UK.[18] The profits that the partner receives constitute a mixed fund, partly RFI (mixed fund category (d)) and partly other income (mixed fund category (i)). A remittance from such a fund follows the mixed fund rule; later years before earlier, and RFI of a year before the other income of the year.

On the other hand, suppose:

(1) profits of a partnership trade arise partly in and partly outside the UK; and

(2) a partner receives a share of profits arising outside the UK only.

---

17 Section 857(1)(a) appears to be otiose because if the condition in s.857(1)(b) is met the condition in s.857(1)(a) must be met. But it does not matter.

18 See 15.22 (Trade partly in UK: apportionment).

In that case all the income that the partner receives is RFI. If a partnership includes partners who are remittance basis taxpayers, it may therefore be important for a partnership, if it can, to segregate the two parts of its trade so it can identify which parts of its profits arise in and which parts arise outside the UK.

41.5.2 *Control and management*

The test is control and management of the trade, not control and management of the partnership, but that will make not usually make any difference.

Normally a remittance basis taxpayer will want to argue that a partnership trade is controlled abroad, to qualify for the remittance basis, and HMRC will want to argue that control is here. However, if the partnership makes losses the boot may be on the other foot: UK partners may argue for control in the UK, to obtain more generous loss relief.

The expression "control and management" is of course from the company residence test, and it is considered that it should be given the same meaning here. Thus the company residence case law gives guidance.[19] The former International Tax Handbook provided at para 1612:

> Generally speaking we follow the thinking on companies and look at the place of the highest level of management rather than day-to-day management. Outside textbooks follow the same line.
>
> In deciding the location of the control and management of a firm with both UK and overseas partners, we would usually regard as significant such factors as the comparative seniority of the partners in age and experience (a simple head count will not do of course), the extent of their interests in the firm, the source and control of the finance, the places of decision on policy and major transactions, the places and locations of partners' meetings and what was done at those meetings. The place of meetings incidentally is not a conclusive factor any more than it is – or ought to be – for companies. So the nature of the business done at the meeting is important. Is it really about control and management or just part of a facade to mislead us about the place of actual control and management?

---

19 There was a discussion in the former International Tax Handbook at para 1614 as to whether "control and management" are two distinct tests with distinct meanings, or a composite phrase. If my approach is right, the words are a single composite phrase.

The former International Tax Handbook continued with another interesting point at para 1613:

> [Section 857 ITTOIA] refers simply to control and management being abroad and the view which we have, in general, adopted in determining whether the Section applies is that this means control etc must be wholly abroad. The strength of this view has never been tested in the Courts and the word 'wholly' does not appear in the Act. It is sometimes put to us that where control and management is partly abroad then [section 857] applies. On the other hand, we have argued that because the Section says 'is situated abroad' it means just that and if control is partly here then it is not abroad.

The Commissioners would normally adopt a broad approach, looking at the whole picture in order to identify one overall place of control where possible, and situations where control was located in the UK and abroad would be rare. If it did arise, the HMRC view seems sound.

In *Mark Higgins Rallying v HMRC* [2011] SFTD 936 the Tribunal said:

> 51. We consider the appropriate test for the location of control and management of the business of a partnership is that adopted by the courts in relation to residence of companies. We note the same conclusion was reached by HMRC and stated in their Manual; also that it was the one argued for before us by the Partnership.
>
> 52. We have found helpful the summary put forward by the Special Commissioners in *Untelrab*[20] (at [74]):
>
> > "From these authorities we have identified the following principles: that the residence of a company is where the directors meet and transact their business and exercise the powers conferred upon them; that if the directors meet in two places then the company's residence is where its real business is carried on and the real business is carried on where the central management and control actually abides; that a determination as to whether a case falls within that rule is a pure question of fact to be determined by a scrutiny of the course of business and trading; that the actual place of management, and not the place where a company ought to be managed, fixes the place of residence of a company; … and that when deciding the issue of residence one should stand back from the detail and make up one's mind from the picture which the whole of the evidence presents."

20 *Untelrab v McGregor* [1996] STC (SCD) 1.

53. Also, the views of the Tribunal in *Laerstate*[21] (at [27]-[29]):

> "There is no assumption that [central control and management] must be found where the directors meet. It is entirely a question of fact where it is found. Where a company is managed by its directors in board meetings it will normally be where the board meetings are held. But if the management is carried out outside board meetings one needs to ask who was managing the company by making high level decisions and where, even where this is contrary to the company's constitution.
>
> It is significant, we think, that Lord Loreburn (in *De Beers*[22]) referred to the test as being where central management and control 'abides'. This is a test that does not confine itself to a consideration of particular actions of the company, such as the signing of documents or the making of certain board resolutions outside the UK if, in a given case, a more general overview of the course of business and trading demonstrates that as a matter of fact central management and control abides in the UK. As Lord Loreburn said (at 212-213), the factual question must be considered 'upon a scrutiny of the course of business and trading'.
>
> This is consistent with the analogy with individual residence which was the basis on which Lord Loreburn propounded the central management and control test. Just as for an individual, for example, where a temporary departure from the UK would not of itself give rise to a change of residence, the residence of a company will not fluctuate merely by reason of individual acts of management and control taking place in different territories. The whole picture must be considered in each case."...

55. The position must be considered for each tax year under appeal but, as per *Laerstate,* the place of residence of the Partnership will not fluctuate from year to year merely by reason of individual acts of management and control taking place in different territories....

62. We find that the place where certain contracts – even important ones such as the manufacturers' works team agreements – were signed is not in itself a determining factor. It is evidence towards where decisions were being made but it is the location of the decision-making, rather than where the contracts were signed, which is important.

---

21 *Laerstate BV v HMRC* [2009] SFTD 551.

22 *De Beers Consolidated Mines v Howe* 5 TC 198.

41.5.3 *HMRC practice*

The former International Tax Handbook provided:

> **1622. Normal professional partnership: foreign partnership treatment**
> In the *Frost* case[23] we tried to argue before the Commissioners that control and management was not abroad. That is our approach to any case where partnerships appear to have been set up for the purpose of avoidance and Case V is of advantage, which, as ITH1630 indicates, it may yet be though to a much lesser extent than in earlier years.
>
> **1623. Foreign partnership treatment: artificial arrangements**
> But a common situation in professions such as engineers and accountants is one where there is a UK partnership and a separate partnership formed abroad with one or more non-UK resident partners in which some or all of the UK partnership partners are members. Generally speaking where the non-resident partners are professionally qualified and the overseas partnership takes on work which is reasonably local to the place where the partnership is based, it is possible to take a fairly relaxed view and accept a claim to Section [857] treatment. That was so even when Case V was on the remittance basis. If, however, the prima facie evidence against this view were very strong, we would look much more closely.
>
> It seems obvious that in these cases there will be some control in the UK – although proving that that is so is a different matter – but usually the UK resident partners will make visits to the overseas office and there is a case for saying that the management of the partnership is abroad. (This harks back to the Solicitor's Opinion considered in ITH1614.) It may be that some of the overseas partnership work is done in the UK by the UK partnership but this normally happens – or is said to happen – through the UK partnership acting as subcontractor for the overseas partnership.
>
> **1624. Foreign partnership treatment: income that of partnership?**
> If, however, one reaches the position that the ultimate control is in the UK and the bulk of the work is actually done here – albeit under subcontract – then that would be a case for a possible challenge. Cases have been seen where the arrangements were plainly offensive and amounted to no more than attempts to park UK-earned profits in a Section [857] partnership with the admitted intention of avoiding UK tax.
>
> We would certainly want to attack these devices and argue, for example, that the work done in the UK by partners who were also members of the overseas firm was done in their capacity as members of that overseas firm. We could then establish that the profits from those activities could be assessed under Case II. Our Solicitor, on particular cases, has not been discouraging about the chances that we may succeed and in the days of the remittance basis there was some success in settling cases on Case II lines rather than Case V. However, these cases turn crucially on questions of fact and degree and there is the usual

23 *Newstead v Frost* 53 TC 525.

difficulty of obtaining information.

1625. Foreign partnership treatment: income that of partnership?

Sometimes we have had to consider whether there is in fact an overseas partnership and/or whether amounts claimed to be receipts of an overseas partnership are in fact receipts of the UK partnership which is seeking to avoid tax. We have had some success with the latter line under circumstances which gave grounds for quiet satisfaction. A firm of UK solicitors which had profited from its fees for advice about the setting up of a well-known tax avoidance scheme, sought to avoid tax on those fees by arranging to park them in a Channel Islands finance and brokerage partnership to which Section [857] was said to apply. This was insult added to injury with vengeance.

Our Solicitor's advice was that we could not challenge the view that control and management was abroad. However, there was considerable artificiality in the arrangements which led ultimately to the fees landing in the accounts of the Jersey partnership. We argued that the amounts were in fact receipts of the UK solicitor's practice and we were aided in this by the fact that it was probably improper for a UK solicitor to enter into a partnership with a non-solicitor to do what they claimed to do in Jersey. This line was eventually conceded and we got tax on the Channel Island profits accruing to the UK partners.

41.6 Partnership with resident and non-resident partners

Section 849 ITTOIA provides:

(1) If—

(a) a firm carries on a trade, and

(b) any partner in the firm is chargeable to income tax,

the profits or losses of the trade are calculated on the basis set out in subsection (2) or (3), as the case may require.

(2) For any period of account in which the partner is a UK resident individual, the profits or losses of the trade are calculated as if the firm were a UK resident individual.

(3) For any period of account in which the partner is non-UK resident, the profits or losses of the trade are calculated as if the firm were a non-UK resident individual...

(4) In calculating under subsection (2) or (3) the profits of a trade for any period of account no account is taken of any losses for another period of account.

ITTOIA EN explains:

1714. If some of a firm's partners are resident in the UK and some are not, the profits of the firm's trade must be calculated on different bases. For the resident partners, the calculation includes profits arising outside the UK; for the non-resident partners, the calculation is restricted to profits arising in the UK.

1715. Section 111 of ICTA is not explicit that the profits may have to be calculated on more than one basis. This section brings together the rules for resident and non-resident partners. Subsection (1) introduces the idea that more than one calculation may be needed.

1716. The source legislation refers to the computation of the profits from the actual trade "for any period". Profits are calculated for a period of account. So subsections (2) and (3) make it clear that the section applies to a period of account. It is possible for a partner to be both resident (for one tax year) and non-resident (for another) within a single period of account. In such a case, the firm's profit has to be calculated twice to arrive at the partner's share of the profits.

1717. Subsection (2) sets out the normal basis for calculating the profits, for an individual resident in the UK. The profits are calculated as if the firm were an individual resident in the UK.

1718. Subsection (3) sets out an additional basis for calculating the profits. If the partner (who may be a non-resident company liable to income tax) is not resident in the UK the profits of the firm are calculated as if the firm were an individual not resident in the UK.

The BI Manual provides:

BIM72235 - Partnerships - computation and assessment: individual, company and non-resident members [December 2013]

... where one or more of the partners is a non-resident individual then the share of profits allocated to any such partner must be computed as if the partnership were a non-UK resident individual. In such case the partnership may need to submit an additional set of computations.

Example (Mr Armstrong and Mrs Beeton)

Mr A, a UK resident, and Mrs B, a non-resident, are in partnership. The partnership's world-wide trade profit amount to £10,000 and included in that sum is its UK profit of £7,500. Partnership profits are shared equally. Two tax computations are required on the following lines

Computation for resident partner			
Step 1	Trade profits		£10,000
Step 2	Allocation	Mr A	£5,000
		Mrs B	£5,000
Step 3	Profit taxable on Mr A		£5,000
Computation for non-resident partner			
Step 1	Trade profits		£7,500
Step 2	Allocation	Mr A	£3,750
		Mrs B	£3,750
Step 3	Profit taxable on Mrs B		£3,750

41.6.1 *Split years*

Section 849(3A) ITTOIA provides the usual split year rule:

> For any tax year that is a split year as respects the partner, this section has effect as if the partner were non-UK resident in the overseas part of the year.

41.7 Transparency of partnership for CGT

Readers who find this topic difficult may take comfort in the opinion of the OTS: "no-one understands CGT in relation to partnerships."[24]

Section 59(1) TCGA provides:

> Where 2 or more persons carry on a trade or business in partnership—
>
> (a) tax in respect of chargeable gains accruing to them on the disposal of any partnership assets shall, in Scotland as well as elsewhere in the UK, be assessed and charged on them separately, and
>
> (b) any partnership dealings shall be treated as dealings by the partners and not by the firm as such.

This is somewhat scanty foundation for the CGT treatment of partnerships.[25] It is supplemented by SP D12:

> **Disposals of assets by a partnership**
> Where an asset is disposed of by a partnership to an outside party each of the partners will be treated as disposing of his fractional share of the asset.

So partnerships are transparent for CGT: gains on disposals of partnership assets accrue to the partners (not to the partnership). For reasons similar to those discussed above for IT,[26] this result follows from first principles, and the statutory provision merely confirms that, but it does not matter.

In determining whether gains are foreign chargeable gains (which may

---

24 "Review of partnerships: interim report" (2014) para 6.1 *https://www.gov.uk/government/publications/partnerships-review*

25 The Law Commission put the point more tactfully: "The working out of this concept in practice has not been easy, and has had to be regulated by extra-statutory guidance;" Law Com 283, *Partnership Law* (2009) para 3.51.

26 See 41.4 (Transparency of partnership for IT).

qualify for the remittance basis) one has regard to the situs of the partnership assets; the situs of the partnership share is irrelevant.

The question then is to identify the fractional share of each partner, and that can be tricky as partners do not always have easily identifiable fractional shares. SP D12 continues:

> In computing gains or losses the proceeds of disposal will be allocated between the partners in the ratio of their share in asset surpluses at the time of disposal. Where this is not specifically laid down the allocation will follow the actual destination of the surplus as shown in the partnership accounts; regard will of course have to be paid to any agreement outside the accounts. If the surplus is not allocated among the partners but, for example, put to a common reserve, regard will be had to the ordinary profit sharing ratio in the absence of a specified asset-surplus-sharing ratio.

The statement then turns to base cost:

> Expenditure on the acquisition of assets by a partnership will be allocated between the partners in the same way at the time of the acquisition. This allocation may require adjustment, however, if there is a subsequent change in the partnership sharing ratios (see para 4).

Assignments of partnership interests, and changes in partnership sharing ratios, are interesting topics, but they are not discussed here.

41.8 Limited liability partnership

41.8.1 *Definition of LLP*

Section 1(2) Limited Liability Partnerships Act 2000 provides the definition:

> A limited liability partnership is a body corporate (with legal personality separate from that of its members) which is formed by being incorporated under this Act; and—
>
> (a) in the following provisions of this Act (except in the phrase "oversea limited liability partnership"), and
>
> (b) in any other enactment (except where provision is made to the contrary or the context otherwise requires),
>
> references to a limited liability partnership are to such a body corporate.

Thus in UK legislation the expression "LLP" in principle means a UK LLP (one incorporated under the LLPA 2000) and does not include a

foreign LLP.[27]

41.8.2 *Nature of LLP*

A LLP is a body corporate. A LLP (despite its name) is not a partnership in the strict sense of the word.[28] So a LLP is in principle classified as a company for tax purposes.[29] However this default position is subject to such wide exceptions that it hardly ever applies.

41.8.3 *Income tax treatment of LLP*

Section 863 ITTOIA provides:

> (1) For income tax purposes, if a limited liability partnership carries on a trade, profession or business with a view to profit—
>
> (a) all the activities of the limited liability partnership are treated as carried on in partnership by its members (and not by the limited liability partnership as such),
>
> (b) anything done by, to or in relation to the limited liability partnership for the purposes of, or in connection with, any of its activities is treated as done by, to or in relation to the members as partners, and
>
> (c) the property of the limited liability partnership is treated as held by the members as partnership property.
>
> References in this subsection to the activities of the limited liability partnership are to anything that it does, whether or not in the course of carrying on a trade, profession or business with a view to profit.
>
> (2) For all purposes, except as otherwise provided, in the Income Tax Acts—
>
> (a) references to a firm or partnership include a limited liability partnership in relation to which subsection (1) applies,
>
> (b) references to members or partners of a firm or partnership include members of such a limited liability partnership,
>
> (c) references to a company do not include such a limited liability partnership, and
>
> (d) references to members of a company do not include members

27 See 84.19 (Foreign limited liability partnership).

28 The drafter assumed this in s.863(2) ITTOIA. This view is also supported by s.1(5) Limited Liability Partnerships Act 2000 ("Accordingly, except as far as otherwise provided by this Act or any other enactment, the law relating to partnerships does not apply to a limited liability partnership.")

29 See 84.4 (Meaning of "company").

of such a limited liability partnership.

Thus a LLP is treated like a general partnership (provided it is carrying on a business with a view to profit). Section 863 then deals with the position where the LLP ceases to do that:

> (3) Subsection (1) continues to apply in relation to a limited liability partnership which no longer carries on any trade, profession or business with a view to profit—
>
> (a) if the cessation is only temporary, or
>
> (b) during a period of winding up following a permanent cessation, provided—
>
> (i) the winding up is not for reasons connected in whole or in part with the avoidance of tax, and
>
> (ii) the period of winding up is not unreasonably prolonged.
>
> This is subject to subsection (4).
>
> (4) Subsection (1) ceases to apply in relation to a limited liability partnership—
>
> (a) on the appointment of a liquidator or (if earlier) the making of a winding-up order by the court, or
>
> (b) on the occurrence of any event under the law of a territory outside the UK corresponding to an event specified in paragraph (a).

41.8.4 *CGT treatment of LLP*

Section 59A(1) TCGA deals with limited liability partnerships:

> Where a limited liability partnership carries on a trade or business with a view to profit—
>
> (a) assets held by the limited liability partnership are treated for the purposes of tax in respect of chargeable gains as held by its members as partners, and
>
> (b) any dealings by the limited liability partnership are treated for those purposes as dealings by its members in partnership (and not by the limited liability partnership as such);
>
> and tax in respect of chargeable gains accruing to the members of the limited liability partnership on the disposal of any of its assets shall be assessed and charged on them separately.[30]

---

30 Section 59A(2) TCGA is the equivalent of s.863(2) ITTOIA:

"(2) For all purposes, except as otherwise provided, in the enactments relating to tax in respect of chargeable gains—

This puts a LLP in the same position as a general partnership. Section 59A(3)–(5) deal with the position where a limited liability partnership ceases to carry on a business with a view to profit, or is wound up; they are equivalent to s.863(3)(4) ITTOIA.

41.8.5 *HMRC practice*

SP D12 provides:

> The enactment of the Limited Liability Partnership Act 2000, has created, from April 2001, the concept of limited liability partnerships (as bodies corporate) in UK law. In conjunction with this, new capital gains tax provisions dealing with such partnerships have been introduced through s.59A TCGA. Section 59A(1) TCGA mirrors s.59 TCGA in treating any dealings in chargeable assets by a limited liability partnership as dealings by the individual members, as partners, for capital gains tax purposes. Each member of a limited liability partnership to which s 59A(1) applies has therefore to be regarded, like a partner in any other (non-corporate) partnership, as owning a fractional share of each of the partnership assets and not an interest in the partnership itself.
> This statement of practice has therefore been extended to limited liability partnerships which meet the requirements of s.59A(1) TCGA, such that capital gains of a partnership fall to charged on its members as partners. Accordingly, in the text of the statement of practice, all references to a "partnership" or "firm" include reference to limited liability partnerships to which s.59A(1) TCGA applies, and all references to "partner" include reference to a member of a limited liability partnership to which s.59A(1) TCGA applies.
> For the avoidance of doubt, this statement of practice does not apply to the members of a limited liability partnership which ceases to be "fiscally transparent" by reason of its not being, or its no longer being, within ss.59 and 59A(1) TCGA.

(a) references to a partnership include a limited liability partnership in relation to which subsection (1) above applies,
(b) references to members of a partnership include members of such a limited liability partnership,
(c) references to a company do not include such a limited liability partnership, and
(d) references to members of a company do not include members of such a limited liability partnership."

41.9 Residence of partnership

The residence of a partnership is not often important for tax, but it matters occasionally:

(1) The provision relating to the disallowance of partnership DTR refers to a firm which resides outside the UK.[31]

(2) In order to be a "foreign employer" (and so have chargeable overseas earnings) a partnership must be resident outside the UK and not resident in the UK.[32]

(3) One may need to identify UK-law residence of a partnership in order to determine its treaty-residence.[33]

Until 1995 the position was governed by s.112(1) ICTA 1988:

> *Where a trade or business is carried on by two or more persons in partnership, and the control and management of the trade or business is situated abroad, ... the partnership shall be deemed to reside outside the UK ...*

This was absent-mindedly repealed, and now there is no statutory definition, but it is considered that the test of partnership residence is still control and management. This is consistent with the general scheme of UK taxation of partnerships. ITTOIA EN agrees, in the passage set out above ("For UK tax purposes, if it is necessary to consider where a firm is resident, the question is likely to be decided by the place where the firm's business is controlled and managed. ..."). [34] HMRC agree. The former International Tax Handbook provided:

> **1609. Residence**
> In English law a partnership is not a person and it has long been assumed that it cannot in fact have a residence. Although Scottish partnerships are persons we have not made any distinction. ... But there has been some nibbling away of the principle that a partnership does not have a residence. The concept of residence and partnerships appears in other Sections of the Taxes Acts. For example in [the definition of chargeable overseas earnings] there is the concept of a partnership, 'resident outside and not resident in the UK'. The transfer pricing provisions ... apply to

---

31 See 41.10 (DT relief for partnership).

32 See 22.13 (Foreign employer).

33 See 6.15 (Treaty residence: Partnerships). This is no longer relevant for UK tax because of the treaty override, but may be relevant for foreign tax.

34 See 41.10 (DT relief for partnership).

partnerships but their effect may depend on whether or not the buyer or seller is resident in the UK. It is probable that if residence of a partnership in these contexts ever had to be put to the test the criterion of control and management would be used.

More important is the case of *Padmore v IRC* 62 TC 352. This concerned the effect of the Double Taxation Agreement with Jersey on the liability of UK resident partners of a partnership controlled and managed in Jersey. Jersey law has a provision very similar to Section 112. Both the High Court and the Court of Appeal considered that it must be deduced from the respective Sections that both Jersey and UK law attach tax consequences to the residence of partnerships and that residence is determined by control and management.

41.10 DT relief for partnership

For the question whether a partnership can be a treaty-resident for DTA purposes, see 6.15 (Partnerships).

Section 858 ITTOIA disapplies DT relief on partnership income of UK residents. Section 858(1) provides:

> This section applies if—
>
> (a) a UK resident ("the partner") is a member of a firm which—
>
> (i) resides outside the UK, or
>
> (ii) carries on a trade [including business] the control and management of which is outside the UK, and
>
> (b) by virtue of any arrangements having effect under section 2(1) of TIOPA 2010 ("the arrangements") any of the income of the firm is relieved from income tax in the UK.

ITTOIA EN explains the need for s.858(1)(a)(ii):

> 1777. For UK tax purposes, if it is necessary to consider where a firm is resident, the question is likely to be decided by the place where the firm's business is controlled and managed. But it is possible that, under foreign law, a firm may be considered to be resident elsewhere, for example, by reference to where the firm was established. So the section uses both the "control and management" test and the "resides" test.

Section 858(2) ITTOIA provides:

> The partner is liable to income tax on the partner's share of the income of the firm despite the arrangements.

This disapplies treaty relief. It survived an attack in *Padmore v IRC (No 2)* [2001] STC 280.

ITTOIA EN provides:

> 1774. This section ensures that a UK resident partner's share of the income of a foreign firm remains liable to UK tax even though the income of the firm as a whole is exempt from UK tax in accordance with a double taxation agreement. It is based on section 112(4) and (5) of ICTA.
> 1775. The business profits article of the UK/Jersey double taxation arrangement exempts the profits of a Jersey firm from UK tax. In the case of *Padmore v IRC* 62 TC 352, the Court of Appeal decided that the exemption extended to the share of the profits arising to a UK resident individual. The rules in section 112(4) and (5) of ICTA were enacted in 1987 to remove the exemption.
> 1776. Subsection (1) sets out the type of individual and firm with which the section is concerned. It goes on to identify the sort of exemption from tax that was considered in the Padmore case. ...
> 1778. Subsection (2) makes it clear that the section does no more than remove any exemption under a double taxation arrangement. It does not deny other reliefs, such as tax credit relief. See Change 145 in Annex 1.[35]

This provision dates back to 1987. Interestingly, in those days retrospective legislation and breach of treaty obligations were thought to

---

35 Change 145 is as follows:
"This change enacts the Inland Revenue practice of giving a narrow interpretation to the word 'affect' in section 112(4) of ICTA.
The business profits article of the UK/Jersey double taxation agreement exempts the profits of a Jersey firm from UK tax. In the case of *Padmore v IRC* 62 TC 352 the Court of Appeal decided that the exemption covered the share of the profits arising to a UK resident partner. The rules in section 112(4) and (5) of ICTA were enacted in 1987 to remove the exemption.
It was intended, in the case of income tax, that the 1987 legislation should do no more than remove the exemption claimed in the *Padmore* case. The words used in section 112(4) of ICTA are 'shall not affect any liability to tax'. On the face of it, these words could deny the partner any relief, including tax credit relief, under a double taxation treaty. Section 858(2) of this Act makes it clear that it is only the partner's chargeability to tax that is preserved, overriding any provision to the contrary in a double taxation treaty. No other effect of the treaty is overridden.
This change is in principle in taxpayers' favour but is expected to have no practical effect as it is in line with current practice."

require special justification.[36]

Section 858(3) ITTOIA provides:

> If the partner's share of the income of the firm consists of or includes a share in a qualifying distribution—
>
> (a) made by a UK resident company, and
>
> (b) chargeable to tax under Chapter 3 of Part 4,
>
> the partner (and not the firm) is, despite the arrangements, entitled to the share of the tax credit which corresponds to the partner's share of the distribution.

ITTOIA EN provides:

> 1779. Subsection (3) deals with UK tax credits. A double taxation arrangement may give a non-resident person an entitlement to payment of a tax credit on a distribution by a UK company. The entitlement is restricted to the share of the distribution that arises to a UK resident partner.

41.10.1 *"Members of a firm"*

Section 858(4) defines "members of a firm":

> For the purposes of this section, the members of a firm include any person entitled to a share of income of the firm.

Section 58(4) FA 2008 provides:

> The amendments made by subsections (1) to (3) are treated as always having had effect.

---

36 The former International Tax Handbook para 1660 provided:

"The retrospective nature of the legislation [in 1987] provoked comment in the professional press and in Parliament. The Government, and later the House, were persuaded as to the propriety of this action because the Section does no more than restore the general understanding of the law and retrospection prevents third parties suddenly deriving a substantial windfall benefit for six years. Although the Section protects from retrospection only those taxpayers who gained a Commissioners' or Court decision before 17 March 1987, similar treatment was allowed to a small number of other taxpayers who were told by the Revenue that their cases would follow the Padmore decision. Criticism was also made because the legislation is intended to override the effect of the Jersey Arrangement and any other treaty which the Courts might have found to have similar effect. This 'treaty override' was defended on similar grounds – that it merely puts into effect what was generally understood to be the position. It has not met with any objection from treaty partners."

Retrospective legislation without limit of time! This is aimed at a tax avoidance scheme which involved trustees of 2 IIP trusts trading in partnership.[37] The EN to the draft clause provided:

> 11. The users of the scheme claim that, under the terms of the relevant Double Taxation Treaty, the UK is not entitled to tax the partnership income of the foreign trustees. As that income is precisely the same income as that received by the UK individuals as beneficiaries of the trust, they argue that the UK is not entitled to tax the UK individuals on it.
>
> 12. Legislation was introduced in Finance (No 2) Act 1987, which provided that (as had almost universally been assumed to be the case until a High Court decision to the contrary,) a Double Taxation Treaty did not affect UK residents' liability to UK tax on their share of income or gains from a foreign partnership.
>
> This new avoidance scheme purports to get round that legislation by claiming that the foreign trustees are the partners rather than the UK individuals.
>
> 13. The Government believes that a partner for the purposes of that legislation has always included all those persons entitled to a share of income or capital gains of the partnership. As such, the UK individuals remain liable to UK tax despite the elaborate, artificial structure designed to exempt them. This clause will put it beyond doubt that the legislation has always had that effect.

This justification of the retrospective nature of the 2008 amendment raises issues of tax law, fact, policy, practice and human rights.

As a matter of tax law, was it the case (before the retrospective legislation) that "member of a firm" for the purposes of that legislation has

---

37 The EN to the draft clause published 12 March 2008 provides a somewhat untechnical explanation:

"8. An avoidance scheme purports to exempt from UK tax income received by UK resident individuals by using certain provisions in the UK's bilateral Double Taxation Treaties.

9. This scheme involves the establishment of offshore trusts, (of which the UK individuals are both settlors and beneficiaries) and partnerships (of which the foreign trustees of those trusts are partners).

10. The partnerships acquire the rights to receive the UK individuals' income but the terms of the trusts are such that, as beneficiaries of the trust, the UK individuals retain beneficial entitlement to the income – with the trustees obliged to remit the income to the UK individuals as it arises."

always included all those persons entitled to a share of income or capital gains of the partnership? The answer is, no.[38]

As a matter of fact, did the Government believe that to be the case? I think it is a safe bet that if HMRC received expert and impartial advice on the point, it would have been hedged with caveats such that the terms of EN para 13 would not represent a fair and accurate summary of the position.[39]

The question of policy is whether the reasons given justify retrospective legislation.[40] One might discern two reasons from the EN. The first is that the scheme will fail (or so the Government believe). If that is true, the 2008 change is unnecessary; if false (and it is certainly debatable) it is not a good reason. The only reason worth considering is that the scheme is "elaborate and artificial", or, HMRC might fairly have said, abusive (however that flexible term may be understood). Whether that justifies retrospective legislation is ultimately a political question on which views differ depending on how one values the rule of law. It is arbitrary and unfair in that this scheme was retrospectively stopped and others – no less elaborate, artificial and abusive – were not. Pragmatists (to whom constitutional proprieties such as the rule of law are of little interest) should bear in mind that retrospective legislation increases the "legal risk", a measure under which the UK falls low on international surveys, and the lowering of the UK's reputation in that regard has a significant albeit intangible cost. I suspect a major factor in picking on this arrangement, not mentioned in the EN, was the amount of money involved.

---

38 Partner is a term of partnership law, and in the partnership law sense a person who is entitled to income or gains of a partnership is not as such a partner. HMRC would have to argue that "partner" in s.858 was not used in its partnership law sense, which is a difficult line to take even in these times of purposive interpretation, though in a tax avoidance case nothing is impossible. This is confirmed in *R oao Huitson v* HMRC [2010] STC 715 at [71]; the point was not considered by the Court of Appeal.

39 In Parliament the statement was described as "disingenuous": Public Bill Cttee debate on Finance Bill, 22 May 2008 Hansard col 371. In *Huitson* HMRC wisely claimed legal professional privilege: [2010] STC 715 at [71].

40 For an illuminating discussion of the policy issues in a US context, see Shaviro, *When Rules Change*, University of Chicago Press (2000). Taxpayers may on this point look with envy to the USA, where a norm opposing retrospective legislation is "strongly rooted in popular sentiment, legislative practice, and perhaps even the Constitution as the Courts are likely to interpret it" (p.104).

Does the retrospective legislation breach the Human Rights Act and (regardless of retrospectivity) is it EU law compliant? HMRC have won these battles.[41]

The question of practice is how often retrospective legislation will be used in the future. What advice can anyone give to clients seeking to know their position? The answer of course is that one cannot give a clear answer. Much depends on the politics of the day, but I guess that retrospective legislation will continue to be a rare response; a popular scheme carried out by many taxpayers and involving larger sums is certainly more at risk than others.

A pressure group continues to lobby on the issue[42] but has not produced more than a House of Commons paper on the topic.[43] Even if it is not successful in repealing s.58 FA 2008, it may have the effect of reducing government enthusiasm for future retrospective legislation.

41.10.2 *DT relief for partnership gains*

Section 59 TCGA sets out the same rules for CGT:

> (2) Subsection (3) applies if—
>
> (a) a person resident in the UK ("the resident partner") is a member of a partnership which resides outside the UK or which carries on any trade, profession or business the control and management of which is situated outside the UK, and
>
> (b) by virtue of any arrangements that have effect under section 2(1) of TIOPA 2010 ("the arrangements") any of the capital gains of the partnership are relieved from capital gains tax or corporation tax in the UK.
>
> (3) The arrangements (so far as providing for that relief) do not affect any liability to capital gains tax or corporation tax in respect of the resident partner's share of any capital gains of the partnership.
>
> (4) For the purposes of subsections (2) and (3) the members of a partnership include any person entitled to a share of capital gains of the

41 *R oao Huitson v HMRC* [2011] STC 1860 raises the HR point and *R oao Shiner v HMRC* [2011] STC 1878 raises the EU law point, which is based on free movement of capital.

partnership.

41.11 SD and SDLT position of partnerships

SD and SDLT are outside the scope of this book, but an HMRC statement **("the SD Partnership statement")**[44] is of wider importance as it discusses the nature of partnerships which is relevant for many tax purposes.

41.11.1 *LLPs*

The SD Partnership statement provides:

> **Group relief for SDLT and Stamp Duty: partnerships**
> **Stamp Duty Land Tax - a change in HMRC's view of the law**
> Where land transactions take place between members of a group, relief for Stamp Duty Land Tax (SDLT) is available (Part 1 Schedule 7 Finance Act 2003). Companies are members of the same group for the purposes of the relief if one body corporate is a 75% subsidiary of another or if both are 75% subsidiaries of a third body corporate. Broadly, the 75% relationship refers to the beneficial ownership of the subsidiary company's issued ordinary share capital.
> A 'company' for group relief purposes is defined in Schedule 7 FA 2003 as a 'body corporate'. HMRC did not consider that a 'body corporate' for the purposes of Part 1 Schedule 7 FA 2003 included a Limited Liability Partnership incorporated under the Limited Liability Partnership Act 2000 (LLP), so that LLPs were disregarded ('looked through') when considering whether a group relationship existed, the members of the LLP being treated as the beneficial owners of the LLP assets.
> This view has recently been challenged. Following legal advice, HMRC now accepts that, for the purposes of SDLT group relief, a 'body corporate' does include an LLP. An LLP can therefore be the parent in a group structure. However, as an LLP does not itself have issued ordinary share capital it cannot be the subsidiary of other companies. This also means that any subsidiaries of the LLP cannot be grouped with the companies that are the corporate members of the LLP.
> This revised view does not affect which party can claim group relief, but does affect which entities are regarded as forming part of a group. An LLP cannot claim group relief itself because its chargeable interests in land are treated as held by or on behalf of the individual members

44 *http://www.hmrc.gov.uk/so/group-rel-sdlt-sd.htm* (2010).

(Paragraph 2 Schedule 15 FA 2003), and this position is unchanged. As such, in broad terms, an LLP continues to be disregarded if it is the vendor or purchaser in a transaction. In such a transaction group relief may be, in part at least, available if some or all of its members (which are incorporated companies) are themselves grouped. It also follows that if an LLP transfers land to a company that it owns, and that is within the LLP headed group, no group relief will be available as the land is deemed to be owned by the members of the LLP, and those members are not within the same group as the company owned by the LLP.

If SDLT group relief has been incorrectly claimed solely as a result of an LLP in the group structure being disregarded or looked through for the purposes of establishing group relationships then HMRC will not seek to revisit the claim.

Stamp Duty

Group relief for Stamp Duty is available to bodies corporate that are associated (Section 42 FA 1930). Bodies corporate are associated if one is a 75% subsidiary of another or if both are 75% subsidiaries of a third body corporate. Broadly, the 75% relationship refers to the beneficial ownership of the subsidiary company's issued ordinary share capital. In general, HMRC has taken the view that an LLP, as a body corporate, can be the ultimate parent of a group for the purposes of Section 42 FA 1930. Furthermore, as an LLP does not itself have issued ordinary share capital it cannot be the subsidiary of another company.

Transfers of stock and marketable securities may be made to the parent LLP from a subsidiary body corporate in the same group and qualify for group relief and vice versa. Group relief cannot be claimed on the transfer of stock and marketable securities from a body corporate parent of an LLP to the LLP or to a body corporate subsidiary of the LLP.

41.11.2 *English and Scottish partnerships*

The SD Partnership statement provides:

English partnerships

As English limited and general partnerships do not have legal personalities separate from the persons who are the partners they must be 'looked through' when establishing bodies corporate that form a group for Stamp Duty Land Tax and Stamp Duty purposes. As such the companies that are the partners of an English general or limited partnership can, depending upon the facts, be grouped with those companies that are below the partnership in the group structure.

According to HMRC, the position is different in Scotland:

> **Scottish partnerships**
> Both Scottish limited and general partnerships have legal personalities separate from the persons who are the partners. They cannot therefore be 'looked through' when establishing bodies corporate that form a group. But they are not bodies corporate and so cannot be the parent of a group of companies.

The legal personality of a Scots partnership does not carry the implication, and the better view is that the position of a Scots partnership is the same as an English one: see 41.4 (Transparency of partnership for IT).

41.11.3 *Foreign partnerships*

The SD Partnership statement provides:

> **Non-UK partnerships**
> The principles set out in the earlier section on UK partnerships will be applied case by case to non-UK partnerships.

CHAPTER FORTY TWO

NON-RESIDENTS INCOME TAX RELIEF

42.1 Non-residents IT relief: Introduction

This chapter considers the IT relief for UK source income of non-residents. I use the following terminology:

"Non-resident individual/trustee IT relief" is the relief in s.811 ITA, which applies to individuals and trustees.

"Non-resident company IT relief" is the relief in s.815 ITA, which applies to companies.

I refer to them together as **"non-residents IT relief"**.

In accordance with the principles of the tax law rewrite, the two reliefs are written out separately, though the rules are more or less the same.

The relief is worded in a convoluted manner. In short, the relief is that UK source interest, dividend and pension income of non-residents is not subject to UK tax beyond withholding tax (where applicable).

42.2 Non-resident individual/trustee IT relief

In the absence of relief, non-resident individuals and trustees are subject to tax on UK source income at the same rates as UK residents. Thus non-resident individuals may be subject to income tax at the higher or additional rates, and non-resident trustees may be subject to tax at the trust rate. Section 811 ITA provides relief.

Section 811(1) ITA provides:

> This section applies to income tax to which—
> (a) a non-UK resident, other than a company, is liable, or
> (b) a non-UK resident company is liable as a trustee.[1]

---

1 Section 811(1)(b) is otiose since a trustee is a separate person for income tax; see 5.3 Trustees treated as single and distinct person). But it does no harm.

Section 811(3) ITA sets out the relief:

> The non-UK resident's liability to income tax for a tax year is limited to the sum of amounts A and B.

There is no equivalent CGT relief but that is not needed as a non-resident is not usually subject to CGT. It is possible to envisage a case where a non-resident would be subject to CGT on gains made through an investment manager, but it would be unusual, in practice no-one would expect compliance, and HMRC probably turn a blind eye. The former International Tax Handbook stated at para 970:

> it would be very rare to find a situation where a non-resident would be liable on capital gains made through an investment manager.

42.2.1 *Split years*

Section 810(4) ITA provides:

> In relation to an individual—
>
> (a) a reference in this Chapter to a non-UK resident's liability to income tax is a reference to the liability of someone who is non-UK resident for the tax year for which the liability arises, and
>
> (b) accordingly, enactments under which income arising to a UK resident in the overseas part of a split year is treated as arising to a non-UK resident are of no relevance to this Chapter.

Thus there is no relief for a split year of an individual. This seems unfair and inconsistent with the general scheme of the split year rules. Perhaps the reason is that a tax return is needed for the split year, one object of the relief is to save the need for a tax return, so the relief is not appropriate in a split year.

The planning moral is that taxpayers should where possible defer UK source income until after the end of a split year.

42.3 Amount A (tax deducted at source)

Section 811(4) ITA defines amount A:

> Amount A is the sum of—
>
> (a) any sums representing income tax deducted from the non-UK resident's disregarded income for the tax year (see section 813),
>
> (b) any sums representing income tax that are treated as deducted from or paid in respect of that income, and

(c) any tax credits in respect of that income.

The legislation distinguishes:
(1) Disregarded income.
(2) Other income. I refer to this as **"non-disregarded income"** which is a clumsy term but I cannot find anything better.

In short, amount A is tax deducted at source on disregarded income.

42.4 Amount B (tax on non-disregarded income and reliefs)

We turn to amount B. Section 811(5) ITA provides:

> Amount B is the amount that, apart from this section, would be the non-UK resident's liability to income tax for the tax year, if the following were left out of account—
> (a) the non-UK resident's disregarded income for the tax year, and
> (b) any relief mentioned in subsection (6) to which the non-UK resident is entitled for the tax year as a result of—
> (i) section 56(3) or 460(3) of this Act (residence etc of claimants), or
> (ii) double taxation arrangements.

Thus one has a hypothetical tax computation which differs from the individual's normal tax computation by ignoring two sets of facts.

The effect of ignoring (a) is to decrease the tax liability but the effect of ignoring (b) is to increase it.

42.4.1 *Disregarded income and non-disregarded income*

Since one only ignores disregarded income in computing amount B, UK tax on non-disregarded income is included in computing amount B, ie tax on non-disregarded income remains payable in full.

Moreover although amount B is computed by ignoring disregarded income, tax deducted at source on disregarded income comes into amount A, so the effect at the end of the day is that UK tax on disregarded income is limited to withholding tax.

42.4.2 *Disallowed reliefs*

I refer to the reliefs within s.811(5)(b) as "**disregarded reliefs**". These reliefs are not disapplied. The individual can in theory claim them. But that claim increases amount B, so reduces the benefit of non-residents IT relief. A higher rate taxpayer will often be no better off at all; sometimes there may be a small saving but insufficient to justify the accountancy

costs of making the claim.

Section 811(6) ITA sets out the list of disregarded reliefs:

> The reliefs referred to in subsection (5) are—
>
> (a) an allowance under Chapter 2 of Part 3 of this Act (personal allowance and blind person's allowance),
>
> (b) a tax reduction under Chapter 3 of Part 3 of this Act (tax reductions for married couples and civil partners),
>
> (c) relief under section 457 or 458 of this Act (payments to trade unions and police organisations),
>
> (d) a tax reduction under section 459 of this Act (payments for benefit of family members), and
>
> (e) relief under section 266 of ICTA (life assurance premiums).

In general non-residents are not entitled to these reliefs but some are entitled (eg EU citizens)[2] and others are entitled by virtue of DTAs.[3]

In short, a non-resident must chose between claiming disregarded reliefs and non-residents IT relief: they cannot have both.

42.5 Trusts: UK beneficiary rule

Section 812(1) ITA provides:

> Section 811 does not apply to income tax to which non-UK resident trustees are liable for a tax year, if there is a beneficiary of the trust who is—
>
> (a) an individual who is UK resident, or
>
> (b) a UK resident company.

I refer to this as **"the UK beneficiary rule"**. One UK beneficiary may disqualify the entire trust from the relief.

Non-resident's IT relief is available if:

(1) The trust is settlor-interested and the settlor is non-UK resident as the income is treated as the income of the settlor, not the trustees.[4]

(2) The trust is an IIP trust and the life tenant is non-resident.

It does not matter if the trustees do not qualify for relief in their own capacity, due to the UK beneficiary rule. The trustees may take the benefit of the non-resident individual's IT relief applicable to the settlor or life tenant.

---

2 See 47.6 (Persons entitled to IT personal allowances).

3 See 47.7.1 (Personal allowances under DTAs: Non-residents).

4 See 27.6.2 (Non-resident trust, non-resident settlor).

42.5.1 *"Beneficiary"*

Section 812 ITA defines "beneficiary":

> (2) For the purposes of subsection (1) a person is a beneficiary of the trust if—
>
> (a) the person is an actual or potential beneficiary of the trust, and
>
> (b) condition A or B is met in relation to the person.
>
> (3) Condition A is that the person is, or will or may become, entitled under the trust to receive some or all of any income[5] under the trust.
>
> (4) Condition B is that some or all of any income under the trust may be paid to or used for the benefit of the person in the exercise of a discretion conferred by the trust.
>
> (5) The references in subsections (3) and (4) to any income under the trust include a reference to any capital under the trust so far as it represents amounts originally received by the trustees as income.

This definition is the same as 18.20.3 (Non-resident discretionary trust)).

At first sight it appears that a trust with power to add beneficiaries would not qualify for relief, since UK residents are potential beneficiaries. But such powers are standard form in offshore trusts, so if that were right, offshore trusts would not normally qualify. In practice I understand that HMRC do not take that point.

42.6 Disregarded income

The definition of "disregarded income" is crucial since disregarded income qualifies for non-residents IT relief and other income does not.

In practice, the most important categories are dividends and interest.

The definition is complex. There are six categories of disregarded income. Section 813(1) ITA provides:

> For the purposes of this Chapter income arising to a non-UK resident is "disregarded income" if it is—
>
> (a) disregarded savings and investment income (see section 825),
>
> (b) disregarded annual payments (see section 826),
>
> (c) disregarded pension income,
>
> (d) disregarded social security income,

---

5 Income is in turn defined in s.812(5) ITA:

"The references in subsections (3) and (4) to any income under the trust include a reference to any capital under the trust so far as it represents amounts originally received by the trustees as income."

(e) disregarded transaction income (see section 814), or
(f) income of such other description as the Treasury may by regulations designate for the purposes of this section. [No regulations have been made].

Thus we have to turn to another five definitions. But first, s.813(2) ITA brings in an important exception:

> But income in relation to which the non-UK resident has a UK representative for the purposes of Chapter 2B is not disregarded income.

See 43.3 (UK representative).

42.7 Disregarded savings and investment income

Section 825 ITA provides the definition:

> (1) For the purposes of this Chapter income is "disregarded savings and investment income" if—
> (a) it is chargeable under Chapter 3 or 5 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies and stock dividends from UK resident companies), or
> (b) it is within subsection (2) and is not relevant foreign income.
> (2) Income is within this subsection if it is chargeable under—
> (a) Chapter 2 of Part 4 of ITTOIA 2005 (interest),
> (b) Chapter 7 of that Part (purchased life annuity payments),
> (c) Chapter 8 of that Part (profits from deeply discounted securities),
> (d) Chapter 10 of that Part (distributions from unauthorised unit trusts), or
> (e) Chapter 11 of that Part (transactions in deposits).

42.8 Disregarded annual payments

Section 826 ITA provides the definition:

> For the purposes of this Chapter income is "disregarded annual payments" if it is not relevant foreign income and is chargeable under—
> (a) section 579 of ITTOIA 2005, so far as it relates to annual payments (royalties etc from intellectual property),
> (b) Chapter 4 of Part 5 of that Act, so far as it relates to annual payments (certain telecommunication rights: non-trading income), or
> (c) Chapter 7 of Part 5 of that Act (annual payments not otherwise charged).

Thus royalties which are annual payments are disregarded income, but royalties which are not annual payments are not.[6] In practice DT relief will often apply in which case the distinction will not matter.

42.9 Disregarded pension/social security income

Section 813 ITA provides:

> (3) Income is "disregarded pension income" if it is chargeable under Part 9 of ITEPA 2003 (pension income) because any of the following provisions of that Act applies to it—
> section 577 (UK social security pensions),
> section 579A (pensions under registered pension schemes) (but see subsection (4) below),
> section 609 (annuities for the benefit of dependants),
> section 610 (annuities under non-registered occupational pension schemes), or
> section 611 (annuities in recognition of another's services).[7]
> (5) Income is "disregarded social security income" if—
> (a) it is a taxable benefit listed in Table A in section 660 of ITEPA 2003, other than income support or jobseeker's allowance, and
> (b) it is chargeable under Part 10 of that Act (social security income).

42.10 Non-resident company IT relief

42.10.1 *Income tax limit*

Non-resident companies are in principle subject to income tax on UK source income at the basic rate or dividend ordinary rate. Section 815 ITA provides relief:

> (1) This section applies to income tax to which a non-UK resident company is liable, otherwise than as a trustee.
> (2) The non-UK resident company's liability to income tax for a tax year

---

6 For the distinction, see 21.3 (Non-trade royalties).

7 Section 813(4) ITA provides:
"Income chargeable under Part 9 of ITEPA 2003 because section 579A of that Act applies to it is disregarded pension income only if the registered pension scheme in question—
(a) falls within para 1(1)(f) of Schedule 36 to FA 2004, and
(b) was, immediately before 6 April 2006, a retirement annuity contract to which section 605 of ITEPA 2003 applied."

is limited to the sum of amounts A and B.

So far this is the same as non-resident individual/trustee IT relief. There are slightly different definitions of amounts A and B.

Section 815(3) ITA provides:

> Amount A is the sum of—
>
> (a) any amounts representing income tax deducted from the non-UK resident company's disregarded company income for the tax year,
>
> (b) any amounts representing income tax that are treated as deducted from or paid in respect of that income, and
>
> (c) any tax credits in respect of that income.

This is the same as non-resident individual/trustee IT relief except that the reference is to disregarded company income, (and for some reason the word *sums* has become *amounts*).

Section 815(4) ITA provides:

> Amount B is the amount that, apart from this section, would be the non-UK resident company's liability to income tax for the tax year if the non-UK resident company's disregarded company income for the tax year were left out of account.

This is the same as non-resident individual/trustee IT relief except that there is no reference to the disregarded reliefs (which makes sense as those reliefs only apply to individuals).

42.10.2 *Disregarded company income*

There are five categories of disregarded company income. Section 816 ITA provides:

> (1) For the purposes of this Chapter income arising to a non-UK resident company is "disregarded company income" if it is—
>
> (a) disregarded savings and investment income (see section 825),
>
> (b) disregarded annual payments (see section 826),
>
> [(c) and (d) relate to the IME, see 44.1 (Investment manager exemptions - Introduction).]
>
> (e) income of such other description as the Treasury may by regulations designate for the purposes of this section.

This is effectively the same as the definition of "disregarded income" which applies for non-resident individual/trustee IT relief. There are two apparent differences:

(1) It omits references to pension or social security income (which do not apply to companies).
(2) There are differences in the wording of s.816(1)(c)(d) which are the equivalent of the individual's exemption for "transaction income" but I cannot see they are of any significance.

42.11 Commentary

Non-residents IT relief originated in a long standing concession, put on a statutory basis in 1995. As far as I know, no public discussion of the reasons for non-residents IT relief has taken place. Several different policy aspects can be identified.

(1) The tax competition consideration that non-residents would not invest in UK securities if they had to pay progressive IT rates and even the imposition of the basic rate would be a major deterrent.
(2) The practical difficulty in seeking to collect tax in excess of tax deducted at source. Tax collection may be practical in the EU (under the mutual assistance directive) and in some other countries (under the relevant DTAs) but it would be odd to have one rule for the those countries and another for the rest of the world.
(3) Various policy considerations tend to suggest that higher and additional rates of UK tax ("progressive rates") are not appropriate for non-resident individuals:
    (a) Progressive rates of UK tax would not be applied to all non-residents income (most of their income may be foreign source income and not subject to UK tax).
    (b) Non-resident individuals are likely to be taxed in their country of residence, with credit for UK tax.
    (c) If every country applied its own progressive rates, taxpayers would have to fill in tax returns in as many countries as they held investments, which would be an enormously difficult exercise for a worldwide portfolio.
    (d) Insofar as the right to tax is justified by the benefit principle,[8] the benefit provided to a non-resident individual is less than that provided by a UK resident.

These considerations form the basis for a general international acceptance

8 That is, the principle that in an equitable tax system, taxpayers should contribute in proportion to the benefits they receive from government expenditure.

that progressive rates are mainly a matter for the country of residence.[9]

Two important categories of UK income are not disregarded income and so do not qualify for non-residents IT relief: employment income and property income.

The treatment of employment income is understandable since (1) tax competition may be less of a concern; (2) PAYE makes collection of tax a practicality; and (3) disparity compared to other employees might be regarded as unacceptable.

The treatment of property income is strange. Deduction at source on rent is limited to the basic rate, though enforcement of progressive rates would theoretically be possible because of the situation of assets in the UK (not to mention mutual enforcement treaties). In the past, the Inland Revenue did not attempt to collect progressive rates on UK property income of non-residents.[10] This is not the current practice, at least officially. However one wonders how much tax strictly due is actually collected. Of course well advised non-residents will normally invest via non-resident companies so there will not often be much progressive rate tax even strictly due.

Logically:

(1) the collection of tax at source rules on UK property ought to be extended to progressive rates, where land is vested in an individual or a trust; or (if this is thought to be too onerous to administer)
(2) property income ought to be disregarded income and so qualify for non-residents IT relief.

This aspect of non-residents IT relief reflects a lack of consistent thinking or an unhappy compromise conflating different policy considerations.

The rule that non-residents IT relief effectively disallows personal

---

9 This view is expressed in "A Platform for Consultation" (Australia) para 30.61 (2010) accessible *http://www.rbt.treasury.gov.au/publications/paper3/index.htm*.

10 The point arose in *Burns v HMRC* [2009] STC (SCD) 165 where HMRC argued that transfers of land from (supposedly) non-resident individuals to non-resident companies in 1980 and 1982 were made to avoid higher rate income tax on UK property income. The taxpayers responded that that could not be correct since the Inland Revenue did not collect higher rate tax. The Special Commissioner stated that in the 1980's there was "a certain level of expectation" that HMRC did not seek to collect higher rate tax on UK source rental income of non-residents. The practice was perhaps one of HMRC routinely turning a blind eye, rather than anything more formal; though a thorough review of Inland Revenue files would be needed to find the answer.

allowances ensures that what can be deducted at source is retained in full, and simplifies administration for HMRC and for taxpayers.

CHAPTER FORTY THREE

COLLECTION OF TAX FROM UK REPRESENTATIVES

43.1 Collection of tax directly from non-residents

The former International Tax Handbook provided:

903. Machinery of assessment: direct charge on non-residents

It always was and still is possible to assess a non-resident directly if, in the words of the Courts, he can be reached. A simple example of such a situation arose in the case of *Tischler v Apthorpe* [2 TC 89]. Mr Tischler was not resident. He was a partner in a French wine firm who spent four months or so a year in England. He lived then in a London hotel and sold wine to English customers. His firm also employed London agents and the question was whether the English profits could be assessed directly on Mr Tischler or whether such assessments should, Mr Tischler being non-resident, be made only on the English agents. The High Court held that an assessment made directly on the firm was good and that Mr Tischler was obliged to make a return served on him. In the words of Mathew J 'If the principal can be got at there is no need to have recourse to Section 41 (of the 1842 Act which was consolidated in Section 78 TMA 1970)'.

An individual, clearly, can be physically present in this country without being resident here and we used to have to rely on the principle established by the Tischler case in reaching the profits made by overseas sportsmen and women and artistes who come to this country for quite brief engagements. The modern view certainly, is that a non-resident company which trades here equally is here and that it may similarly be reached. If the company has a branch presence here with all the physical trappings of its trade it is visibly here and will have a registered place of business, an address at which it may be found and at which legal notices may be served.

The principle of direct assessment is not confined to non-residents who actually come here. There is no bar on direct assessment of non-residents who are not here whether or not they have agents in the UK. This was made clear in the case of *Werle v Colquhoun* [2 TC 402]. The difficulty with direct assessment on a person who is not here lies in recovering the tax, although now that the Supreme Court rules allow service of writs abroad this may be a little easier provided there are assets in the UK. But it is still true to say that if a non-resident company acting through an agent has no such physical presence here and has nothing here

> the Revenue cannot, in practice, impose its charge effectively without more adequate machinery including that for the service of notices and returns as well as for the actual gathering of the tax. It was in such situations – where the non-resident had only an agent here – that the original form of Part VIII was intended to come to the Revenue's aid. In practice Part VIII is normally used today even in those cases where the taxpayer can be reached directly ...

This was written before the 1995 changes and before the mutual collection of tax agreements but the point is still valid.

43.2 Collection of tax from UK representative

The rules are set out three times:

(1) For IT the rules are in chapters 2B and 2C part 14 ITA. This does not apply to companies[1] so effectively this applies to non-resident individuals and trusts.

(2) For CGT the rules are in part 7A TCGA.

(3) For CT the rules are in chapter 6 part 22 CTA 2010.

This does make a coherent discussion somewhat harder. In this chapter I set out the IT rules in full, and (in the absence of material differences) give the CGT and CT references in a footnote only.

Section 835U(1) ITA provides the basic rule:

> The obligations and liabilities of a non-UK resident are to be treated, for the purposes of the enactments to which this Chapter applies,[2] as if they were also the obligations and liabilities of the UK representative of the non-UK resident.

This is a collection provision (the metaphor often used is "machinery provision") and not a charging provision: the UK representative is only subject to tax if there is a charge to tax on usual principles on the non-resident principal. The INT Manual provides:

---

1 Section 835D ITA provides:
"This Chapter does not apply in relation to income tax chargeable on income of a company otherwise than as a trustee."

2 This relates back to s.835T ITA which provides:
(1) This Chapter applies to the enactments relating to income tax so far as they make provision for or in connection with the assessment, collection and recovery of tax, or of interest on tax.
(2) Those enactments have effect in accordance with section 835U in relation to amounts in respect of which a branch or agency is to be treated as the UK representative of a non-UK resident under Chapter 2B.

268010 Introduction - What are the machinery provisions for assessment and collection? [September 2011]
The machinery provisions alone cannot create or extend a tax liability on the non-resident. There has to be a charge to tax in respect of the non-resident under the domestic provisions in the first place. The provisions work by treating the tax obligations and liabilities of the non-resident as though they were additionally the obligations and liabilities of the UK representative. This provides a practical assessment and collection mechanism for non-residents. Once either the non-resident or the UK representative has paid the liabilities both parties are treated as having met their liabilities.

Section 835U goes on to deal with the discharge of obligations:

(2) Subsection (3) applies if—
(a) the UK representative of a non-UK resident discharges an obligation or liability imposed by this section that corresponds to one to which the non-UK resident is subject, or
(b) a non-UK resident discharges an obligation or liability that corresponds to one to which the non-UK resident's UK representative is subject by virtue of this section.
(3) The corresponding obligation or liability—
(a) of the non-UK resident (in a case within subsection (2)(a)), or
(b) of the UK representative (in a case within subsection (2)(b)),
is discharged.
(4) A non-UK resident is bound, as if they were the non-UK resident's own, by acts or omissions of the non-UK resident's UK representative in the discharge of the obligations and liabilities imposed on the representative by this section. ...

43.3 UK representative

43.3.1 *Why does it matter who is a UK representative?*

A UK representative is important for the two reasons:
(1) A UK representative is liable for tax due from the non-resident principal, the topic of this chapter.
(2) Income in relation to which a non-UK resident has a UK representative falls outside non-residents IT relief: see 42.6 (Disregarded income).

43.3.2 *Definition of "UK representative"*

Section 835E ITA gives the basic definition for IT:

> (1) This section applies if a non-UK resident carries on (alone or in partnership) any trade, profession or vocation through a branch or agency in the UK.
> (2) The branch or agency is the UK representative of the non-UK resident in relation to—
> (a) the amount of any income from the trade, profession or vocation that arises (directly or indirectly) through or from the branch or agency, and
> (b) the amount of any income from property or rights which are used by, or held by or for, the branch or agency.

Thus for IT and CGT a UK representative is in short a branch or agency.

For CT, the term PE is used instead of branch/agency. Section 969(3) CTA 2010 provides:

> For the purposes of this Chapter, the following rules apply to a permanent establishment in the UK through which a non-UK resident company carries on a trade.
> *Rule 1*
> The permanent establishment is the UK representative of the non-UK resident company in relation to chargeable profits of the company attributable to that establishment.

In the following discussion "**the non-resident principal**" is the person for whom the UK representative is a representative (who the statute calls "the non-UK resident").

The question whether the non-resident principal is trading is crucial for the UK representative rules, because these rules only apply if the non-resident principal is carrying on a trade, profession or vocation.[3]

The INT Manual provides:

> **268030 Extent of UK representative's liability** [September 2011]
> A person can only be the UK representative in respect of the permanent establishment/branch or agency with which they are linked. Where a non-resident has more than one UK permanent establishment/branch or agency, then it is possible that each will have a different UK representative. In those circumstances, each UK representative would only be responsible in respect of the part of their non-resident's liabilities and obligations arising from their own permanent establishment/branch or agency [*Neilsen Andersen v Collins,* and *Tarn*

3 See 44.11 (When is there a trade in financial assets?).

v Scanlan 13 TC 91].

The former International Tax Handbook explained "directly or indirectly" in s.835E(2)(a):

> **914. General**
> Section 79 [TMA 1970] is another 1915 amendment. It provides that a non-resident shall be chargeable on profits or gains arising directly or indirectly through any branch, agency etc here. The sort of thing that was happening, before this provision was introduced, was that an agent for a non-resident would negotiate a contract here and at the end of the oral negotiations the agent and the third party would agree to sign the formal documents abroad. The view the Revenue took, and defensibly so, was that in substance all had been done here apart from signing a piece of paper and that it was wrong for liability so to be avoided.
> Problems of that sort are really problems of fact and proof as was mentioned in chapter 8 (ITH822). If the Revenue could have proved that there was an unwritten agreement made in London, it would have succeeded in a claim that the non-resident was trading here, and that is what we would argue today. Millions of pounds worth of business are done in the City of London every day on the basis of spoken agreements which are later confirmed in writing and nobody wishes to deny that the word is the contract. But, when the parties to the contract do not wish to act openly, proof is difficult to come by. What these words were meant to do was to enable the Revenue to say – "we must accept that this contract was made abroad because we cannot prove otherwise but a lot of negotiation took place in London and we want to look at the substance of the matter and the words 'directly or indirectly' will enable us to do that".

43.3.3 *Representative ceasing to act*

Rule 1 s.835E(3) ITA provides for the UK representative ceasing to act:

> *Rule 1*
> The UK representative continues to be the UK representative of the non-UK resident in relation to the amount even after ceasing to be a branch or agency through which the non-UK resident carries on the trade, profession or vocation concerned.

The INT Manual provides:

> **268040 What assessments should be raised and how is that done?**
> [September 2011]
> Where the trading activities in the UK have ceased, the UK permanent

establishment / branch or agency retains the obligations and liabilities as the UK representative even after the cessation. This provision is at ITA07/S835E Rule1 and ITTOIA05/Sch6 Para 3 (old FA95/S126 (3)) for income tax and at CTA10/S969(3) Rule 3 (old FA03/S150(2)(c)) for corporation tax. So assessments can still be raised on the UK representative subject to the usual assessing time limits. Where however the trading was conducted through a branch or fixed place of business and that presence has discontinued there may be difficulties identifying any person as the UK representative or any assets within the UK upon which recovery may rely. It is therefore recommended that assessments for such UK branches are raised and tax brought into charge at as early a stage as possible.

Additionally, by EU Directive member states of the European Union are able to seek the assistance of another member state in the recovery of direct and indirect taxes (see the guidance at DMBM560010).

43.3.4 *Separate personality*

Rule 2 s.835E(3) ITA provides for deemed separate personality:

Rule 2
The UK representative is treated in relation to the amount as a distinct and separate person from the non-UK resident (if the representative would not otherwise be so treated).

The SALF Manual provides:

704 UK representatives of non-residents chargeable under Case I and II Schedule D [February 2011]
UK representative is treated as a separate person
The UK representative and the non-resident are treated as separate persons. This allows, for example, service of notices and collection to take place at the branch or agency/permanent establishment.

43.4 Partnerships

Rule 3 s.835E(3) ITA provides:

Rule 3
If the branch or agency is carried on by persons in partnership, the partnership, as such, is treated in relation to the amount as the UK representative of the non-UK resident.

Section 835F ITA provides:

(1) Subsection (2) applies if a trade or profession carried on by a

non-UK resident through a branch or agency in the UK is carried on by the non-UK resident in partnership.

(2) The trade or profession carried on through the branch or agency is, for the purposes of section 835E and Chapter 2C, to be treated as including the notional trade or profession.

(3) Subsection (4) applies (in addition to subsection (2) if that subsection also applies) if—

(a) a trade or profession carried on by a non-UK resident in the UK is carried on by the non-UK resident in partnership, and

(b) any member of the partnership is resident in the UK.

(4) The notional trade or profession is, for the purposes of section 835E and Chapter 2C, to be treated as being a trade carried on in the UK through the partnership as such.

(5) In this section "the notional trade or profession" means the notional trade from which the non-UK resident's share in the partnership's profits or losses is treated for the purposes of section 852 of ITTOIA 2005 as deriving.

The INT Manual provides:

268020 Who can be the non-resident's UK representative? [September 2011]

Partnerships can be the UK representative of a non-resident

A partner in a partnership can be the UK representative of a non-resident. This will occur, for example, where a non-resident trades in the UK though the agency of a UK partnership (of which he or she is not a member). In such circumstances, the partners in the UK partnership will be jointly liable, as UK representative, for the tax payable by the non-resident. This provision is at ITA07/S835E and TIOPA10/S835E for income tax and is implicit in CTA10/S969 for corporation tax.

Where a business that is carried on by a partnership that includes non-resident partners is carried on in the UK through a permanent establishment / branch or agency, the permanent establishment / branch or agency is the UK representative of each non-resident partner. This provision is at ITA07/S835F and TIOPA10/S835F for income tax and is implicit in CTA10/S969 for corporation tax.

Where a business is carried on in the UK by a partnership that includes both resident and non-resident partners, the partnership is treated as the UK representative of each non-resident partner. The partners are thus jointly liable for the tax payable by the non-resident partners on their shares of the partnership profit. This provision is at ITA07/S835F and TIOPA10/S835F for income tax and is implicit in CTA10/S969 for

corporation tax.

The SALF Manual provides:

> **704 UK representatives of non-residents chargeable under Case I and II Schedule D** [February 2011]
> *A partnership can be the UK representative of a non-resident*
> A partner in a partnership can be the UK representative of a non-resident. This will occur, for example, where a non-resident trades in the UK though the agency of a UK partnership (of which he or she is not a member). In such circumstances, the partners in the UK partnership will be jointly liable, as UK representative, for the tax payable by the non-resident.
> *Partnership, which includes non-resident partners, trading in the UK through a branch or agency/permanent establishment: the branch or agency/permanent establishment is treated as the UK representative of non-resident partners*
> Where a business that is carried on by a partnership that includes non-resident partners is carried on in the UK through a branch or agency/permanent establishment, the branch or agency/permanent establishment is treated as the UK representative of each non-resident partner.
> *Partnership trading in the UK which includes resident and non-resident members is treated as UK representative of non-resident partners*
> Where a business is carried on in the UK by a partnership which includes both resident and non-resident partners, the partnership is treated as the UK representative of each non-resident partner. The partners are thus jointly liable for the tax payable by the non-resident partners on their shares of the partnership profit.

43.5 Casual agent exemption

Section 835G ITA provides:

> (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through an agent in the UK.
> (2) The agent is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) arising to the non-UK resident from—
>
> (a) so much of the non-UK resident's business as relates to disregarded transactions, or
> (b) property or rights which, as a result of disregarded transactions, are used by, or held by or for, the agent on behalf of the non-UK resident.

(3) "Disregarded transactions" are transactions—
  (a) carried out through the agent in the UK, and
  (b) in respect of which the agent does not act in the course of carrying on a regular agency for the non-UK resident.

I call this "**the casual agent exemption**".

The INT Manual provides:

> **268020 Who can be the non-resident's UK representative?** [September 2011]
> Schedule 6 paragraphs 5-9 TIOPA 2010 and Subsections 835G-835K ITA 2007 (old section 127(1) FA 1995) lists the persons who cannot be the UK representative for income tax and capital gains tax:
> 1) Agents who are not regular agents. In general if a non-resident is trading in the UK through an agent that agent should be regarded as a regular agent. This was considered in the cases of *Neilsen Andersen v Collins* and *Tarn v Scanlan* (13 TC 121–2) when Scrutton LJ considered "the contrast intended to be drawn is between casual employment, temporary employment, for a transaction or few transactions, and regular appointment of a permanent agent who is there as representing the foreigner". ...

The former International Tax Handbook provided:

> **942. NRs: accepting TMA 70 s.82 exemption: regular agency**
> ... casual agents are protected from assessment. As a general rule if there is UK source income and there is an agent we would want to assess the agent. A non-resident trading here through an agent will usually clearly do so through a regular agency.
> It may be less clear whether an agent is a regular agent when he acts for his principal in only one transaction. This was the issue in the case of *Willson v Hooker* 67 TC 585. Acting for an Isle of Man company, Mr Willson instructed a firm of surveyors to bid for some land in the UK and instructed solicitors concerning the purchase and sale of the land. The Court said that a regular agency is any agency that is not a casual or occasional agency and that it was impossible to regard Mr Willson as a casual or occasional agent. He was the person through whom all the transactions of the company in the UK were carried out in the relevant period and so did not enjoy protection.

CT does not need the same exemption, as a casual agent is not within the concept of PE.

43.6 Subsidiary points

43.6.1 *HMRC procedures*

The INT Manual para provides:

> **268040 What assessments should be raised and how is that done?** [September 2011]
> As already explained above (INTM268030)) both the non-resident and their UK representative have a personal responsibility for the tax obligations and liabilities arising from the UK permanent establishment/branch or agency. Either party is able to discharge those obligations and liabilities. So we can assess either or both parties if necessary. Once one party has paid the personal responsibility on the other party lapses for that self assessment period. Obviously in cases where self assessments are returned by or for a non-resident taxpayer and tax payments are made at the appropriate times no further action would be needed. This guidance concerns the practicalities of how to handle cases where obligations and liabilities are not met.
> Because the UK representative is personally responsible for the non-residents tax obligations and liabilities, a unique tax reference should be allocated to the UK representative in that capacity. Where the UK representative is an agent (rather than a branch or fixed place of business permanent establishment) that unique tax reference should be a distinct and different reference to the one allocated to the agent for their own business. Non-resident companies intending to set up places of business in the UK are obliged to notify Companies House (see **Self assessment** at INTM261000). The consequential process in place automatically generates tax references and allocates them to the office responsible for the UK registered office address. Where that process has not happened, or for non-corporates, a taxpayer record with unique tax reference will need to be created on notification or discovery of liability.
> The High Court held in the case of *Tischler v Apthorpe* [2 TC 89] that a non-resident could be assessed directly "wherever he could be reached" including the UK branch address. The decision in that case was that an assessment raised directly on the non-resident at the UK branch address was valid, even though there was also a UK representative who could have been assessed under the machinery provisions (the TMA 1970 version *see* INTM268010). It is probably unusual for a non-resident to have both a physical UK branch and an appointed UK agent but the reasoning in that case supports the equal validity of assessments made on the non-resident either directly at their UK branch or at the overseas address. In that case, of course, the UK agent could not be responsible for the tax assessed as he had not been notified.
> So, on a practical level, assessments should be addressed in the manner most suited to the facts of the case and with the object of informing the relevant persons of the liability and securing the necessary payment of tax. Depending upon how near to expiry the assessing time limits are this could include any but possibly all of the following:
> Assessment for a branch or fixed place of business in the UK

Assessment for UK trade carried out through an agent
Partners and partnerships
Recovery action

Assessment for a branch or fixed place of business in the UK

- Assess in the name of the non-resident individual or company at the UK business address.
- Send a copy also, for information, to the non-resident's address abroad if known.
- Assess any person who clearly has the capacity of "UK representative" e.g. the manager of the UK operations, as "Mr X as UK representative of XYZ".

Assessment for UK trade carried out through an agent

- Assess in the form "Mr X as agent for XYZ" sent to the agent's address.
- Send a copy of the assessment on the agent, for information, to the non-resident at their address abroad if known.
- Assess the non-resident individual or company at their address abroad if known.

Partners and partnerships

Where the UK representative is a UK partnership the partnership itself is the UK representative. In such circumstances the partners in the UK partnership will be jointly liable for the tax payable by the non-resident. It follows that any assessment that is required should be made on the partnership as agent for the non-resident. Where a non-resident is a partner in a partnership which trades in the UK directly, typically through a UK branch or fixed place of business, the form of assessment depends on whether there is a partner resident in the UK. If there is a UK resident partner the assessment should be made on the partnership as a whole but the UK resident partner will be jointly liable for the tax payable by the entire partnership. Where there is no UK resident partner then assessments on the branch profits of the non-resident partners should be made on the UK branch of the partnership.

The SALF Manual provides:

704 UK representatives of non-residents chargeable under Case I and II Schedule D [February 2011]

General rule for the obligations and liabilities of UK representatives

The general rule is that UK representatives are jointly responsible with the non-resident for all the tax obligations and liabilities in relation to the trade, profession or vocation carried on through the branch or agency/permanent establishment.

This joint responsibility extends to all matters relating to the assessment of tax and to the collection and recovery of tax. For example, it extends to all the mechanisms of self assessment, including notification of chargeability, the obligation to make a tax return and self assessment, liability to make interim and final payments of tax, and liability to surcharges, interest and penalties in connection with those obligations and liabilities.

Either party is able to discharge the obligations and liabilities arising, but equally any acts or omissions of the non-resident are treated as acts or omissions of the UK representative (but see also the first two paragraphs under Offences below in relation to tax offences).
Where the trigger for an obligation or liability is the receipt of formal notification, then the obligation or liability only falls on the UK representative once they have received the relevant notification (or a copy).

43.6.2 *Notices and information*

Section 835V ITA provides:

(1) An obligation or liability attaching to a non-UK resident ("X") by reason of a notice or other document having been given or served on X does not also attach to the UK representative of X by virtue of section 835U unless the notice or other document (or a copy of it) has been given to or served on the representative.
(2) An obligation or liability attaching to X by reason of a request or demand having been received by X does not also attach to the UK representative of X by virtue of section 835U unless the representative has been notified of the request or demand.
(3) Subsection (4) applies to obligations relating to the provision of information that are imposed on the UK representative of X by section 835U in a case where the representative is X's independent agent.
(4) The obligations do not require the UK representative to do anything except so far as it is practicable for the representative to do so.
(5) For this purpose, the representative must act to the best of the representative's knowledge and belief after taking all reasonable steps to obtain the necessary information.
(6) An obligation of X to provide information is not discharged by virtue of section 835U in a case where the UK representative of X has discharged the obligation only so far as required by subsection (4) of this section.
(7) X is not bound by virtue of section 835U by mistakes in information provided by the UK representative of X in discharging, so far as required under subsection (4) of this section, an obligation imposed on the representative by section 835U unless—

(a) the mistake is the result of an act or omission of X, or

(b) the mistake is one to which X consented or in which X connived.

(8) In this section "information" includes anything contained in a return, self-assessment, account, statement or report required to be provided to the Commissioners for Her Majesty's Revenue and Customs or to any

officer of Revenue and Customs.

The SALF Manual provides:

> **704 UK representatives of non-residents chargeable under Case I and II Schedule D** [February 2011]
> *Obligations and liabilities are limited where the UK representative is independent of the non-resident*
> Paragraphs 4 and 7 Schedule 23 FA 1995 & Section 148(3) and Section 150(5) FA 2003
> Where the UK representative is an independent agent of the non-resident acting in the ordinary course of business, its obligations to provide information are limited to ones within its competence to act for the non-resident.
> 'Independent agent' is defined at Paragraph 7 Schedule 23 FA 1995. The definition is based on that used in the OECD Model Tax Convention and UK double taxation agreements. Broadly, to be an 'independent agent', the agent must be both legally and economically independent of the non-resident. As an independent agent is not within the definition of permanent establishment for corporation tax purposes such an agent could not become the UK representative of a non-resident company.
> The rules recognise that, where the UK representative is an independent agent, the agent may not be able to provide complete information about the affairs of the non-resident. The agent is therefore required to provide any information requested, for example a return, to the best of its knowledge and belief after taking all reasonable steps to obtain the information. The non-resident remains responsible for completing or correcting the information where necessary.
> However, the non-resident can correct any error or omission made by the UK representative provided the non-resident did not know about it or participate in it.

43.6.3 *Criminal offences and penalties*

Section 835W ITA provides:

> (1) A person is not by virtue of section 835U liable to be proceeded against for a criminal offence unless the person— (a) committed the offence, or (b) consented to or connived in its commission.
> (2) An independent agent of a non-UK resident is not by virtue of section 835U liable to any civil penalty or surcharge in respect of an act or omission if conditions A and B are met.
> (3) Condition A is that the act or omission is not—

(a) an act or omission of the independent agent, or
(b) an act or omission to which the agent consented or in which the agent connived.

(4) Condition B is that the independent agent is able to show that the amount of the penalty or surcharge will not be recoverable out of the sums mentioned in section 835X(3) (after being indemnified for any other liabilities under section 835X).

The SALF Manual provides:

704 UK representatives of non-residents chargeable under Case I and II Schedule D [February 2011]
Offences
Paragraph 5 Schedule 23 FA 1995 & Section 150(6) FA 2003
The criminal and civil liabilities of a UK representative in respect of the non- resident's tax affairs are limited in certain circumstances.
UK representatives cannot be guilty of a criminal offence under these rules as a result of something done by the non-resident unless:
- they committed the offence
- consented to its commission, or
- connived in its commission.

The same applies for the non-resident in relation to the acts of the UK representative.
UK representatives who are independent agents are not liable to civil penalties and surcharges unless:
- they committed an act or omission or consented to, or connived in, its commission, or
- they will be able to recover the penalty out of monies of the non-resident.

43.6.4 *Indemnities*

Section 835X ITA provides:

(1) An independent agent of a non-UK resident is entitled to be indemnified for the amount of any liability of the non-UK resident which the agent has discharged by virtue of section 835U.
(2) An independent agent of a non-UK resident is entitled to retain, from the sums mentioned in subsection (3), amounts sufficient to meet any liabilities which by virtue of section 835U the agent has discharged or to which the agent is subject.
(3) The sums are those which—
(a) (ignoring subsection (2)) are due from the independent agent to the non-UK resident, or

(b) are received by the independent agent on behalf of the non- UK resident.

43.7 Independent agents, investment managers and brokers

An "independent agent" has three advantages:

(1) Lower information requirements; see 43.6.2 (Notices and information)

(2) Lower liabilities for penalties: see 43.6.3 (Criminal offences and penalties)

(3) A right to an indemnity: see 43.6.4 (Indemnities)

Section 835Y ITA provides the definition:

> (1) In this Chapter "independent agent", in relation to a non-UK resident ("X"), means a person who is the UK representative of X in respect of any agency in which the person is acting on behalf of X in an independent capacity.
>
> (2) For this purpose a person does not act in an independent capacity on behalf of X unless the relationship between them, having regard to its characteristics, is a relationship between persons carrying on independent businesses dealing with each other at arm's length.

This is based on the definition in the IME rules; see 44.6.2 (Investment manager condition C: independent relationship) and 86.6 (Independent agent exemption).

Investment managers and brokers may qualify for the IME exemptions, see 44.1 (Investment manager exemptions).

CHAPTER FORTY FOUR

INVESTMENT MANAGER EXEMPTIONS

44.1 Investment manager exemptions: Introduction

This chapter considers three related exemptions where an investment manager or broker ("**broker/IM**") acts for non-resident clients.

In order to understand the exemptions, it is helpful first to note the tax issues which a non-resident person would face (in the absence of relief) if it carried on a trade in the UK through a broker/IM. It is necessary to consider separately (1) a non-resident company and (2) a non-resident individual or trust.

In the absence of these exemptions, if a non-resident *company* carried on a trade in the UK through a UK broker/IM, the non-resident company would face a UK tax charge arising from the fact that it might be trading in the UK through a permanent establishment (e the broker/IM might be an agency PE). If so:

(1) The non-resident company would (in short) be subject to corporation tax on its profits.[1]

(2) The broker/IM would be a "UK representative" and that tax could be collected from it.[2]

Similarly, in the absence of these exemptions, if a non-resident *individual or trust* carried on a trade in the UK through a UK broker/IM, the non-resident would face a UK tax charge arising from the fact that it might be trading in the UK through a branch or agency (ie the broker/IM might be a branch or agency). If so:

(1) The non-resident individual or trust would (in short) be subject to income tax and CGT[3] on its profits.

---

1 See 15.7 (Trading income of non-resident companies).

2 See 43.3 (UK representative).

3 See 49.8 (Non-resident trade with UK branch).

(2) The broker/IM would be a "UK representative" and that tax could be collected from it.[4]

Alternatively the position might be that the broker/IM was not a branch or agency or PE of the non-resident, but nevertheless the non-resident was trading in the UK. In that case (whether a company or an individual or trust) the non-resident person would in principle[5] be subject to income tax on its trading profits.

Clearly, if there were no relief, non-residents would not use a UK broker/IM (at least if there were a risk that their activities might be characterised as trading). The investment management exemptions override these tax charges. Assuming the various requirements are met the exemptions are as follows:

(1) A broker/IM is not a permanent establishment of a non-resident company. The main significance of this is:
   (a) to disapply the corporation tax charge which applies when a non-resident company trades through a UK PE.
   (a) to disapply the provisions allowing collection of tax from a PE (as its "UK representative").

   This exemption is in ss.1145-1151 CTA 2010. I refer to it as **"IME PE relief"**.

(2) A broker/IM is not a UK representative for IT and CGT. The main significance of this is to disapply the rules allowing the collection of IT/CGT from UK representatives of non-residents. This exemption is in chapter 2B part 14 ITA and chapter 7A TCGA.

   I refer to it as "**IME UK-representative relief".**

(3) UK source income generated through a broker/IM is one of the classes of income which qualifies for non-residents IT relief. This exemption is part of the code of non-residents IT relief set out in Chapter 1 Part 14 ITA.[6] I refer to it as "**IME non-residents IT relief**".

I refer to the exemptions together as "**the investment manager exemptions"** abbreviated to "**IME**". (References to investment managers in this label include brokers.) The term used in the HMRC Manuals is "investment management exemption", in the singular. They are however best regarded as three separate (though linked) exemptions.

The rules are written out *four* times in four different places. The rules

---

4 See 86.13 (Why does branch/agency matter?).

5 In practice a DTA would often provide relief.

6 See 42.1 (Non-residents IT relief - Introduction)

for brokers are similar to investment managers, but are set out separately each time, so there are eight sets of rules. This does make a coherent exposition rather difficult. Where the rules repeat or overlap, I set out the text of IME non-residents IT relief, citing the statutory equivalents for the other rules in footnotes, unless there are material differences.

It would be simpler and shorter if branch/agency were abolished and the PE rules applied to non-companies as it does to companies.[7]

44.1.1 *The policy background*

SP 1/01 explains the policy considerations behind the investment management exemptions:

> 1. There are two policy objectives underlying the tax treatment of UK resident investment managers and their overseas clients. These objectives are that overseas investors should not be charged to UK tax in relation to investment transactions conducted on their behalf and that any fees earned by a UK resident investment manager for services performed for the non-resident should be fully chargeable to UK tax.
> 2. The UK tax system seeks to achieve these objectives by granting what is termed the Investment Manager Exemption. The exemption enables non-residents to appoint UK-based investment managers without the risk of UK taxation and is one of the key components of the UK's continuing attraction for investment managers. HMRC is committed to maintaining this environment by improving the exemption to meet developments in the investment management industry through providing greater flexibility and better explanations for investment managers and expanding the scope of exempt activities.

Other countries adopt the same approach:

> The highly mobile nature of the funds management business suggests that income from portfolio foreign investments flowing to non resident investors should not be taxed in Australia. Even modest amounts of Australian tax on these investors is likely to impede the growth of this business. Only the income of the Australian funds manager should be subject to Australian tax.[8]

---

7 See 86.16 (Commentary: Let's abolish branch/agency).

8 This view is expressed in "A Platform for Consultation" (Australia) para 30.61 December 2010 accessible *http://www.rbt.treasury.gov.au/publications/paper3/index.htm*.

44.2 IME PE relief

I discuss IME PE relief in this chapter, though to see the topic in the round one needs to be familiar with the meanings and functions of PE, for which see 86.2 (Meaning(s) of "permanent establishment").

The key points to bear in mind for present purposes are as follows. Firstly, the term "permanent establishment" is used in different places with different definitions. It is strictly necessary to distinguish between:

(1) "**UK-law PE**" defined in s.1141 CTA 2010.

(2) "**OECD Model PE**" defined in the OECD Model.

Secondly, an independent agent is not a PE (**"the independent agent exemption"**). The wording of the independent agent exemption differs slightly between UK-law PE and OECD model PE so it is strictly necessary to distinguish between:

(1) "**UK-law independent agent exemption"** defined in s.1142 CTA 2010.

(2) "**OECD Model independent agent exemption**" defined in the OECD Model.

Section 1142 CTA 2010 provides:

> (1) A company is not regarded as having a permanent establishment in a territory by reason of the fact that it carries on business there through an agent of independent status acting in the ordinary course of the agent's business.
>
> (2) Sections 1145 to 1151 apply for the purpose of supplementing subsection (1) in relation to transactions carried out on behalf of a non-UK resident company by a person in the UK acting as—
>
> (a) a broker (section 1145),
>
> (b) an investment manager (sections 1146 to 1150)...

Section 1145 CTA 2010 provides IME PE relief for a broker:

> (1) This section applies if a transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the UK acting as a broker.
>
> (2) In relation to the transaction, the broker is regarded for the purposes of section 1142(1) as an agent of independent status acting in the ordinary course of the broker's business if (and only if) each of conditions A to D is met. ...

Section 1146 CTA 2010 provides IME PE relief for an investment manager:

> (1) This section applies if an investment transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the UK acting as an investment manager.
> (2) In relation to the investment transaction, the investment manager is regarded for the purposes of section 1142(1) as an agent of independent status acting in the ordinary course of the investment manager's business if (and only if) each of conditions A to E is met ("the independent investment manager conditions"). ...

If the conditions for IME PE relief are met:

(1) The broker/IM is not a UK-law PE.
(2) It will not normally matter whether the broker/IM is an OECD Model PE.[9]

If the conditions for IME PE relief are *not* met the broker/IM is not "an agent of independent status acting in the ordinary course of the investment manager's business" and does not qualify for the UK-law independent agent exemption. Thus the broker/IM may be a UK-law PE – if the general requirements of a PE are met, that is, if the broker/IM is "an agent acting on behalf of the non-resident company and has and habitually exercises there authority to do business on behalf of the company". In other words, failure to meet the conditions for IME PE relief disapplies the independent agent exemption, but does not automatically turn the broker/IM into a UK-law PE:

(a) If the broker/IM is not a UK-law PE, it will not normally matter whether the broker/IM is an OECD Model PE.
(b) If the broker/IM is a UK-law PE, it is possible that it is not an OECD Model PE, in which case treaty relief might apply.

These are the complications which arise from having distinct definitions of PE.

In short, IME PE relief offers a safe harbour, in which one can be reasonably sure of the tax position. SP 1/01 explains:

> 10. The Investment Manager Exemption legislation now only has relevance for corporation tax by providing greater clarity about what constitutes independence of investment managers in relation to the non-residents for which they act.

---

9 For completeness: where the conditions for IME PE relief are met, (1) it is likely that the broker/IM qualifies for the is an OECD Model PE; (2) It is not likely that HMRC would seek to argue that the broker/IM is an OECD Model PE.

44.3 IME non-residents IT relief

I discuss the IME aspects of non-residents IT relief in this chapter, though to follow it one needs to be familiar with the background rules of non-residents IT relief, for which see 42.1 (Non-residents income tax relief). SP 1/01 explains:

> 10. ... For income tax [the investment manager exemption] raises the threshold for chargeability so that the same criteria apply when there is no treaty protection in the form of a permanent establishment article.[10]

For individuals and trustees, non-residents IT relief applies to "disregarded income".[11] This term includes "disregarded transaction income". This is where IME non-residents IT relief comes into play. For individuals and trusts, s.814(1)(2) ITA provides relief for a broker:

> (1) Subsection (2) applies if a non-UK resident carries on (alone or in partnership) a business through a broker in the UK.
> (2) Income is "disregarded transaction income", subject to subsection (6), if—
> (a) it is transaction income, and
> (b) the independent broker conditions are met in relation to the transaction in question.

For individuals and trusts, s.814(3)(4) ITA provides relief for an investment manager:

> (3) Subsection (4) applies if a non-UK resident carries on (alone or in partnership) a business through an investment manager in the UK.
> (4) Income is "disregarded transaction income", subject to subsection (6), if—
> (a) it is transaction income, and
> (b) the independent investment manager conditions are met in relation to the transaction in question.

---

10 That is, IME non-residents IT relief provides roughly the same relief as article 7 OECD Model Treaty: "The profits of an enterprise carried on by a resident of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein."

11 See 42.6 (Disregarded income).

For non-resident companies the drafting is similar and the result is the same. Non-residents IT relief applies to "disregarded company income". Section 816 ITA provides:

> (1) For the purposes of this Chapter income arising to a non-UK resident company is "disregarded company income" if it is ...
>
> (c) income arising from a transaction carried out through a broker in the UK acting as an agent of independent status in the ordinary course of the broker's business,
>
> (d) income arising from a transaction carried out through an investment manager in the UK acting as an agent of independent status in the ordinary course of the investment manager's business, ...

44.4 IME UK-representative relief

I discuss IME UK-representative relief in this chapter, though to see it in the round one needs to be familiar with the UK representative rules, for which see 43.2 (Collection of tax from UK representative).

Section 835H ITA provides relief for brokers:

> (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through a broker in the UK.
>
> (2) The broker is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) if—
>
> (a) the amount is transaction income in relation to a transaction carried out through the broker in the UK on behalf of the non-UK resident, and
>
> (b) the independent broker conditions are met in relation to the transaction (see section 835L).

Section 835I ITA provides relief for investment managers:

> (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through an investment manager in the UK.
>
> (2) The investment manager is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) if—
>
> (a) the amount is transaction income in relation to an investment transaction carried out through the investment manager in the UK on behalf of the non-UK resident, and
>
> (b) the independent investment manager conditions are met in relation to the investment transaction (see section 835M).

44.5 Defined terms in IME exemptions

44.5.1 *"Investment manager"*

Section 827(1) ITA provides a commonsense definition:

> In this Chapter "investment manager" means a person who provides investment management services.[12]

An investment manager who merely gives advice would not be a PE. However an investment manager with discretionary management powers would be a PE, at least if the principal was carrying on a trade.

44.5.2 *"Broker"*

There is no statutory definition. The former International Tax Handbook provided:

> **926. NRs: Machinery of assessment: commodity markets: broker**
> A few words are called for about an important market operator, the broker. London has been a great market for centuries. Until a few decades ago vast amounts of produce were landed in, or trans-shipped in London docks and it was here and in other ports that the markets grew. They are run by Trade Associations which lay down rules designed to secure a fair, orderly and open market; to provide for membership, and to consider things like rates of brokerage. The actual constitution of the different markets varies but one would normally find as members some big producers, some major users, both of whom may have a seat in the market ring, the place of business. But the central character is the broker. A broker is a negotiator for commission, who will sell or buy for clients. Brokers have a long history, but, in modern usage, Bowstead, the writer of the standard work on agency, describes the broker in this way–
>
> "A broker is an agent whose ordinary course of business is to negotiate and make contracts for the sale and purchase of goods and other property of which he is not entrusted with the possession or control."[13]
>
> Payne, a writer on British Commercial Institutions, says this of an import broker–
>
> "The function of a broker is to bring two parties together for the purpose of concluding a contract. Brokers are generally produce brokers with whose aid very large transactions take place at the chief importing ports. They are often specialists who, through long experience of markets ... are able to buy and sell to better advantage than could the general import merchant ... he (the broker) is not associated with the physical movement of the goods, nor with clearing them through Customs. After selling a consignment by auction, or by private treaty, the broker is paid a commission or fee (brokerage) which, with the

12 The equivalent for IME PE relief is s.1150(1) CTA 2010.

13 *Bowstead and Reynolds on Agency*, (19th ed., 2013), 1.035.

other expenses of sale is deducted from the gross selling price."

Brokers are thus associated with the great commodity markets and exchanges, professional negotiators who will act for buyers and sellers and have nothing to do with the work-a-day business of handling or insuring the goods. They constitute an essential link in the market mechanism, in making the function of the market-place in determining price, available to their clients. Another odd quality of brokers is that the same broker can, by the custom of certain markets, act both for buyer and seller.

This means in practice that if A has asked a broker to sell something and B has asked the same broker to buy the same thing, the broker can match the two. The market rules would require that the broker does this business in the open (so that any other broker can step in if he wishes) and that preserves the idea of open market dealing and the natural protection which it gives to buyer and seller. Although the broker has acted for both parties the open nature of the market mechanism ensures that the price is a fair market price. ...

939 NRs: when to accept the TMA 70 s.82 broker exemption - General

Brokers and general commission agents take a very limited part in the marketing process. They are there to make the advantages of the market-place available to their clients. Whatever the terms mean, we do not accept as a broker or as a general commission agent a man who does everything the client himself would do in running the business were he himself here to do it, even if the agent acts for more than one client. Both expressions are primarily to do with commodity markets and that is what they were really intended for.

But over the years the application of the broker and general commission agent exemption has been extended. Stockbrokers, for example, will generally fall within Section 82(1) [TMA].[14] We have certainly accepted that there can be general commission agents and brokers in the field of shipping and that the exemption is sometimes appropriate. In insurance, on the other hand, we resist the suggestion that an underwriting agent can be a general commission agent. Insurance brokers will not normally be carrying on a non-resident's trade. If it seems that they do then they will arguably be acting in the capacity of underwriting agents and we would deny the exemption. If, in Districts, there are cases outside the usual commodity markets, where exemption under Section 82(1) appears to have been given but this treatment has not definitely and fairly recently, say within the last twenty years, been approved or condoned by International Division, it would be sensible to consider asking for advice on the next convenient occasion.

44.5.3 *"Transaction income"*

Section 814(5) ITA provides the definition:

---

14 Section 82 (now repealed) provided: "Nothing in this Part of this Act shall render a non-resident person chargeable in the name of a broker ...In this subsection, 'broker' includes a general commission agent."

> In this Chapter "transaction income", in relation to a transaction carried out through a broker or investment manager in the UK on behalf of a non-UK resident, means income which arises to the non-UK resident from—
>
> (a) so much of the non-UK resident's business carried on (alone or in partnership) through the broker or investment manager as relates to the transaction, or
>
> (b) property or rights which, as a result of the transaction, are used by, or held by or for, the broker or investment manager on behalf of the non-UK resident.

44.5.4 *"Investment transaction"*

Section 827(2) ITA provides the definition:

> In this section "investment transaction" means any transaction of a description specified for the purposes of this section in regulations made by HMRC.[15]

The regulations are the Investment Manager (Investment Transaction) Regulations 2014.[16] A full discussion would be a lengthy affair.

The label "*investment* transaction" is not strictly appropriate because the transaction will be a *trading* transaction and the so-called investment will be trading stock;[17] but it does not matter.

44.6 Investment manager conditions

For IME non-residents IT relief, s.818(1) ITA provides:

> The independent investment manager conditions are met in relation to an investment transaction carried out on behalf of a non-UK resident by an investment manager in the UK if conditions A to E are met.

For IME PE relief, s.1146 CTA 2010 provides:

> (1) This section applies if an investment transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the UK acting as an investment manager.

---

15 IME PE relief equivalent is s.1150(1) CTA 2010.

16 The background can be traced in consultation and response papers "Investment Management Exemption and Collective Investment Schemes - expanding the 'white list'" (2013).

17 See 44.11.1 (Terminology).

> (2) In relation to the investment transaction, the investment manager is regarded for the purposes of section 1142(1) as an agent of independent status acting in the ordinary course of the investment manager's business if (and only if) each of conditions A to E is met ("the independent investment manager conditions").

I refer to these as "**investment manager conditions A to E**".

44.6.1 *Investment manager conditions A and B*: *Investment manager*

Section 818 ITA provides:

> (2) Condition A is that at the time of the transaction the investment manager is carrying on a business of providing investment management services.
> (3) Condition B is that the transaction is carried out in the ordinary course of that business.[18]

These are the equivalent of broker conditions A and B.

44.6.2 *Investment manager condition C: Independent relationship*

Section 818(4) ITA provides:

> Condition C is that, when the investment manager acts on behalf of the non-UK resident in relation to the transaction, the relationship between them, having regard to its legal, financial and commercial characteristics, is a relationship between persons carrying on independent businesses dealing with each other at arm's length.[19]

The requirement is equivalent to the rule that an independent agent is not a PE. According to the INTM, an agent's "legal financial and commercial characteristics" is relevant to determine whether the agent has "independent status" (so as to qualify for the independent agent exemption to the PE rule). So guidance on what is an independent agent for PE is relevant to condition C.[20]

This is imprecise, so the SP offers a bright line test which may offer a safe harbour for collective funds.[21] If the bright line test is not satisfied

---

18 The equivalent for IME PE relief is s.1146(3)(4) CTA 2010.

19 The equivalent for IME PE relief is s.1146(5) CTA 2010.

20 See 86.6 (Independent agent exemption).

21 SP 1/01 provides: 36. The relationship will be considered to be independent if the non-resident has the following characteristics:
(a) the non-resident is a widely held collective fund or, if not,

one is back to the vagueness of the law:

> 41. If none of the above tests are satisfied HMRC will have regard to the overall circumstances of the relationship between the non-resident and the investment manager in determining whether they are carrying on independent businesses that

---

(b) the non-resident is not a widely held collective fund but is either being actively marketed with the intention that it become one or is being wound up or dissolved.

37. A fund will be regarded as widely held if either no majority interest in the fund is ultimately held by five or fewer persons and persons connected with them, or no interest of more than 20% is held by a single person and persons connected with that person. The fund may need to establish a track record before new investors are obtained and will therefore have 18 months from the commencement of trading in the UK to meet the widely held test. Where investment management services are provided to a collective investment scheme constituted as a partnership, participants in the scheme will not be regarded as connected persons for this purpose if their only connection is membership of the partnership. This means that if the investment manager is a partner in the fund it will not be treated as connected with the other partners in the fund for the purpose only of the Independent Capacity Test, although there may still otherwise be connection under s 839 TA 1988/s 993 ITA 2007 between the participants, for example as partners in another capacity.

38. Actively marketed means there must be evidence of ongoing genuine attempts to obtain third party investment into the fund in order to meet the widely held test and that the terms on which interests in the fund are offered are not prohibitive or discriminatory for that class of business.

39. If the fund has one of the above two characteristics the independent capacity test will be met without the need to refer to any other factors.

40. In other cases the independent capacity test will be met:

(a) where the provision of services to the non-resident and persons connected with the non-resident is not a substantial part of the investment management business. Where that part does not exceed 70% of the investment manager's business, either by reference to fees or to some other measure (where that would be more appropriate), it will not be regarded as substantial. Further, if in the first 18 months from the start of a new investment management business the services provided to the non-resident exceed 70% of the business, they will not be treated as a substantial part of the business provided that they are consistently below 70% in subsequent periods.

(b) where the provision of services to the non-resident represents more than 70% of the investment manager's business 18 months after the start of a new investment management business but that was for reasons outside the manager's control and the manager had taken all reasonable steps to bring it below 70%. The investment manager will be expected to provide all relevant information to support a contention that the services are a substantial part of the manager's business for reasons beyond the manager's control and to demonstrate what steps have been taken to rectify that position.

deal with each other on arm's length terms. It is not possible to describe every scenario in which the relationship may still meet this test but the guidance in this Statement of Practice should provide certainty to the vast majority of non-residents trading in the UK through an investment manager and HMRC will also continue to provide advice for any other circumstances.

42. Some funds adopt a master/feeder structure. Where the investment manager manages an opaque master fund, eg a company, which has feeder funds then the independence test will be applied as if the master fund were transparent by looking at the beneficial ownership of each feeder fund to determine whether the master fund is independent.

43. Similarly, if the investment manager acts for one or more sub-funds owned by an umbrella fund it is the beneficial ownership of the latter that will determine whether the independence test is met.

44. It should be noted that a subsidiary may be considered independent of its parent company for the purposes of the test, notwithstanding the parent's ownership of the share capital.

44.6.3 *Investment manager condition D: 20% rule*

Section 818(5) ITA provides:

> Condition D is that the requirements of the 20% rule are met (see s.819).[22]

44.6.4 *Investment manager condition E: Customary remuneration*

Section 818 ITA(6) provides:

> Condition E is that the remuneration which the investment manager receives in respect of the transaction for the provision of investment management services to the non-UK resident is not less than is customary for that class of business.

This is the equivalent of broker condition C. It overlaps with investment manager condition C since an arm's length relationship would normally involve customary remuneration.

SP 1/01 explains the meaning of "customary remuneration":

> 60. The UK investment manager must receive remuneration at a rate that is not less than customary for the services. The legislation does not define what is "customary" nor does it specify from whom remuneration must be received although, as already explained, HMRC will not regard a UK investment manager as acting in an independent capacity on behalf of the non-resident unless the

22 See 44.7 (The 20% rule). The equivalent for IME PE relief is s.1146(6) CTA 2010.

relationship between them is that of persons carrying on independent businesses and dealing with each other at arm's length.

61. HMRC will be guided by the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations when determining whether a pricing structure applies the customary rate and will look at whether the net effect of any provision made or imposed by means of a transaction or series of transactions provides the UK investment manager with a level of remuneration which would have been achieved at arm's length. All circumstances will be taken into consideration, including whether that remuneration has been reduced below the arm's length rate in any way either before or after payment to the UK investment manager.

62. HMRC recognises that remuneration structures through which the non-resident pays fees in a particular class of investment management take numerous forms, with variations including, for example, investment terms intended to attract certain investors or to "lock in" an investment. The arm's length definition of customary rate for the independent investment manager means that such arrangements between unconnected parties would not jeopardise this test. Transactions made at arm's length may include directly or indirectly reduced or rebated fees for unconnected investors in the non-resident[.] Similarly, rebated, reduced or zero fee arrangements which are made between the manager and the unconnected non-resident for genuine commercial reasons, such as where the manager is receiving a separate fee in respect of the assets in which the non-resident is investing, would be regarded as transactions made at arm's length.

63. In determining whether remuneration has been reduced below the arm's length rate in any way HMRC will consider both the remuneration received by the UK investment manager and any amounts payable to any person:

– for services provided to the non-resident, or
– in connection with the non-resident, or
– that relate to the performance of the non-resident.

These amounts, which may be payable by either the non-resident or the UK investment manager, will be treated as reducing the remuneration received in the UK below the customary rate unless they can be shown to be at an arm's length rate.

64. HMRC consider that in order to meet the customary rate test fees payable to a UK investment manager should be recognised for UK tax purposes when earned. A cash payment may be deferred or reinvested in the fund but this should not affect the recognition of the fee income. As a result, the UK manager would pay tax on the fee for the period when earned and no difficulty with the customary rate test is envisaged in these circumstances. If cash settlement of management fees is deferred the manager may have effectively made a loan to, or investment in, the non-resident, as a result of which the return on that loan or investment would be attributable to the manager and may need to be taken into account for the 20% test.

Paras 64 onwards do not stand up to much examination.

65. Where a UK investment manager, a partner, director or employee of that

manager, or a person connected with any of these, acquires a security or an interest of some other kind, in the non-resident or in another entity, for services provided by the manager:

– to the non-resident, or
– in connection with the non-resident,

the customary rate test will only be met if it can be shown that the manager or partner brings the security or other interest into charge to UK tax at its market value or, in the case of a director or employee, that the security or other interest is taxed as employment income in accordance with Part 7 ITEPA 2003. The definition of "security" here will be that found in s420 ITEPA 2003. An interest is intended to apply to an interest in a security or securities and any other interest not within the s420 ITEPA definition.

66. Where an option is brought into UK tax charge at full market value at the time it is exercised HMRC will not regard this remuneration as less than the arm's length rate for the purposes of the customary rate test.

67. Preferential investment terms involving reduced or rebated fees for directors or staff of the investment manager may be a benefit provided by reason of employment and thus may give rise to an employee income tax charge under ITEPA 2003. Similarly, where the investment manager is a partnership, preferential fee terms may be offered to partners who acquire interests in the non-resident, in which case the ensuing personal tax consequences will apply. HMRC will not ordinarily regard these terms as reducing the investment manager's fees for services below the arm's length amount unless significant UK tax avoidance or evasion is suspected, in which case all the facts and circumstances will be considered to determine whether the rate of remuneration is below the arm's length amount.

68. The vast majority of non-residents easily meet the customary rate test. However, HMRC has occasionally encountered structures in which offshore arrangements have been used to evade or avoid UK tax. Commonly, such structures involve arrangements whereby fees charged to the non-resident are diverted to an offshore vehicle at a non-arm's length rate. Such arrangements represent an abuse of the exemption, place compliant[23] UK managers at a competitive disadvantage and may result in a non-resident failing to meet the terms of the exemption unless remedial action is taken.

---

23 A note on terminology. The word "compliant" has become an essentially contested concept, that is, it admits of two distinct conceptions that are a battleground for profound substantive disagreements. HMRC use the term to mean those who comply with the legal rules of taxation *and* a more insubstantial spirit of the legislation (of which one suspects HMRC consider themselves the arbiter). This was a novel linguistic turn in 2001 and most practitioners would regard "compliant" as apt to describe everyone who comply with the legal requirements of taxation. Contrast the two views of the taxpayer/HMRC relationship discussed in 87.9 (Voluntary disclosure for sake of good relations with HMRC).

The SP then turns to consider what evidence may be required:

> 69. HMRC has published guidance in its International Manual on what documentation and evidence is required to demonstrate an "arm's length" reward. At the time of publication of this Statement that guidance appears at INTM483030 [August 2012] of the Manual which can be found at *http://www.hmrc.gov.uk/manuals/intmanual/intm483030.htm* and it is advisable to check that the most up to date advice is being followed.
> 70. The legislation considers the obligations and liabilities of the non-resident and whether the non-resident is exempt from UK tax on its UK trading profits. A non-resident may be a taxable person and in considering whether that is the case, and whether the UK agent has been rewarded with an arm's length rate, it may be appropriate in some circumstances for HMRC to ask for information such as statutory financial statements of the non-resident and its agents and a full and factual functional analysis of all services provided to the non-resident.
> 71. In circumstances where such information is requested to ascertain whether the remuneration has been at the customary rate HMRC would normally ask the UK investment manager, but in some circumstances may ask the non-resident, to provide such information as may reasonably be considered necessary. The information powers available to HMRC would include those relevant to the tax liabilities of the non-resident but where reasonable cooperation is provided by the UK investment manager and/or, where appropriate, the non-resident it is intended that a reasonable opportunity will be given to supply the information voluntarily before the use of information powers is considered.
> 72. Where appropriate documentation, including a factual functional analysis and an acceptable transfer pricing methodology, is in place to support a tax return, the investment manager will have an opportunity to agree an adjustment to the return to meet the customary rate test or for any other reason, or to have adjustments determined through litigation where such an agreement has not been reached, without the non-resident having thereby failed the customary rate test.
> 73. However, where the investment manager does not have the appropriate documentation and methodology in place at the time of making a return and the remuneration for that period is less than the arm's length rate, it is possible that the customary rate test has not been met. HMRC would expect the non-resident and the investment manager to ensure that adequate measures are taken to prevent the fund or its investors being exposed to UK tax and will give reasonable notice of possible action, and the reasons for it, to both the non-resident and its agents if it discovers any circumstances in which the non-resident may not have met the Investment Manager Exemption tests.
> 74. Each case will be considered on its own facts and it is possible that appropriate corrective action through adjustment to the customary rate will still enable the test to be met. It is not possible to describe every scenario but this general approach is intended to provide certainty on what the legislation requires and to reassure non-residents that a disproportionate outcome will not arise from a corrected failure to meet the test.

44.7 The 20% rule

Section 819(1) ITA provides:

> The requirements of the 20% rule are met if conditions A and B are met.[24]

I refer to these as "**20% rule conditions A and B**". Section 819(2) ITA defines condition A:

> Condition A is that in relation to a qualifying period[25] it has been or is the intention of the investment manager and the persons connected with the investment manager that at least 80% of the non-UK resident's relevant disregarded income should consist of amounts to which none of them has a beneficial entitlement.

Section 819(3) ITA defines condition B:

> Condition B is that, so far as there is a failure to fulfil that intention, that failure—
>
> (a) is attributable (directly or indirectly) to matters outside the control of the investment manager and persons connected with the investment manager, and
>
> (b) does not result from a failure by any of them to take such steps as may be reasonable for mitigating the effect of those matters in relation to the fulfilment of that intention.[26]

SP 1/01 provides:

> 48. The 20% test is treated as satisfied throughout any period, not exceeding five years, for which it is met in respect of the total taxable

---

24 The equivalent for IME PE relief is s.1147(1) CTA 2010.

25 Section 820 ITA provides:

> "(1) This section applies for the purposes of this Chapter.
>
> (2) If section 819 applies for the purposes of section 813, a "qualifying period" means—
>
> (a) the tax year in which the transaction income is chargeable to income tax, or
>
> (b) a period of not more than 5 years comprising two or more tax years including that one.
>
> (3) If section 819 applies for the purposes of section 816, a "qualifying period" means—
>
> (a) the accounting period of the non-UK resident company in which the transaction in question is carried out, or
>
> (b) a period of not more than 5 years comprising two or more complete accounting periods including that one."

26 The equivalent for IME PE relief is s.1147(2)(3) CTA 2010.

income of the period arising from transactions carried out through the investment manager. It is also treated as satisfied if the manager intended to meet that test but failed to do so, wholly or partly, for reasons outside the manager's control, having taken any reasonable steps to fulfil that intention. This means that the manager must fulfil the intention to keep its beneficial entitlement within 20% of the total taxable income for the period insofar as it is reasonable to do so, but is not required to get within that figure at any cost, for instance where there are good commercial reasons for not achieving that.

44.7.1 *"Relevant disregarded income"*

For IME non-residents IT relief, s.821 ITA provides:

(1) This section applies for the purposes of this Chapter.
(2) If section 819 applies for the purposes of section 813,[27] the "relevant disregarded income" of the non-UK resident for the qualifying period is the total of the non-UK resident's income for the tax years comprised in the qualifying period which derives from the transactions mentioned in subsection (4).
(3) If section 819 applies for the purposes of section 816,[28] the "relevant disregarded income" of the non-UK resident company for the qualifying period is the total of the non-UK resident company's income for the accounting periods comprised in the qualifying period which derives from the transactions mentioned in subsection (5).
(4) The transactions referred to in subsection (2) are investment transactions—
  (a) carried out by the investment manager on the non-UK resident's behalf, and
  (b) in relation to which the independent investment manager conditions are met, ignoring the requirements of the 20% rule.
(5) The transactions referred to in subsection (3) are transactions—
  (a) carried out by the investment manager on the non-UK resident company's behalf, and
  (b) in relation to which the investment manager does not fall to be treated as a permanent establishment of the non-UK resident company, ignoring the requirements of the 20% rule.

Section 1148(4)(5) CTA 2010 provides the equivalent for IME PE relief in identical wording.

---

27 This applies to individuals and trusts: see 42.6 (Disregarded income).

28 This applies to companies: see 42.6 (Disregarded company income).

44.7.2 *"Beneficial entitlement"*

For IME non-residents IT relief, s.822(1) ITA provides:

> This section applies for the purposes of this Chapter.

In fact the expression "beneficial entitlement" only appears in the 20% rule condition A, so the definition is only needed for that purpose.

> (2) A person has a "beneficial entitlement" to relevant disregarded income if the person has or may acquire a beneficial entitlement that is, or would be, attributable to the relevant disregarded income as a result of having an interest or other rights mentioned in subsection (3).
> (3) The interests and rights referred to in subsection (2) are—
> (a) an interest (whether or not an interest giving a right to an immediate payment of a share in the profits or gains) in property in which the whole or any part of the relevant disregarded income is represented, or
> (b) an interest in, or other rights in relation to, the non-UK resident.

Section 1148 CTA 2010 provides the equivalent for IME PE relief:

> (4) A person has a "beneficial entitlement" to relevant disregarded income if the person has or may acquire a beneficial entitlement that is, or would be, attributable to the relevant disregarded income as a result of having an interest or other rights mentioned in subsection (5).
> (5) The interests and rights referred to in subsection (4) are—
> (a) an interest (whether or not an interest giving a right to an immediate payment of a share in the profits or gains) in property in which the whole or any part of the relevant disregarded income is represented, or
> (b) an interest in, or other rights in relation to, the non-UK resident company.

44.7.3 *Position where 20% rule not met*

Section 823 ITA provides:

> (1) This section applies in the case of an investment transaction in relation to which the independent investment manager conditions are met, except for the requirements of the 20% rule.
> (2) This Chapter has effect as if the requirements of that rule were met in relation to the transaction but only in relation to—
> (a) so much of the transaction income of the non-UK resident as falls within subsection (3), if this section applies for the

purposes of section 813, or

(b) so much of the income of the non-UK resident company deriving from the transaction as falls within subsection (3), if this section applies for the purposes of section 816.

(3) Income falls within this subsection if it does not represent income—

(a) which is relevant disregarded income of the non-UK resident, and

(b) to which the investment manager or a person connected with the investment manager has or has had any beneficial entitlement.

SP 1/01 provides:

> 47. Where the 20% threshold is exceeded, the part of the income of the non-resident to which the investment manager and connected persons are beneficially entitled is excluded from the limitation of charge. The limitation of charge will apply to the part to which they are not beneficially entitled provided the other tests in the investment manager provisions are met.

Section 824 ITA (non-resident collective investment scheme) is not discussed here.

44.7.4 *HMRC practice on 20% rule*

SP 1/01 provides:

> 45. In essence the requirement is that the investment manager and persons connected with it, including connected charities, must not have a beneficial entitlement to more than 20% of the non-resident's chargeable profit arising from transactions carried out through the investment manager. The definition of connected persons is that in s 839 TA 1988/s 993 ITA 2007.
>
> 46. Management fees paid to the investment manager and persons connected with it are not included in the chargeable profit provided they would be allowable in computing the profit of the non-resident were it chargeable to UK tax. This applies equally to incentive fees, performance fees or incentive allocations which are calculated by reference to any increase in the net asset value or profits of the relevant non-resident. This treatment of incentive allocations is explained further below...
>
> 49. This is an example of how the test may be met throughout a period of five years:

Years	1	2	3	4	5
Taxable income of non-resident	£100	£200	£200	£250	£250
Entitlement of manager to above	£32	£58	£40	£35	£5
Expressed as percentage for each year	32%	29%	20%	14%	2%
Average % over qualifying period	32%	30%	26%	22%	17%

It may be assumed that the test is satisfied for year one because (a) in this example it was the manager's intention to have a beneficial entitlement to an average of 20% or less in aggregate over a five year period and (b) that intention was fulfilled. Had the 20% beneficial entitlement been achieved before the five years were up, then that shorter period would have been the qualifying period. A second qualifying period of up to five years could include years two, three, four, five and six and so on.

50. As with any other tests for the exemption, unless specified otherwise, the UK tax rules regard companies, including LLCs, as opaque and the FA 2003 rules apply, while partnerships are transparent and FA 1995 applies. In addition, the rule for non-resident companies at Schedule 26(5) FA 2003 treats partnership collective investment schemes in which they invest as assumed companies for the purposes of the 20% test.

51. In relation to a tax-transparent fund having overseas investors, the non-residents will be participants in the fund. In such circumstances the 20% test would be automatically broken where a non-resident participant is connected to the investment manager since this would mean that all the non-resident participants were connected under s 839(4) TA 1988/s 993(4) ITA 2007 by virtue of their being partners in the same partnership. The investment manager and connected persons would then be entitled to all the income of that non-resident. Accordingly, where the investment management services are provided to a collective investment scheme (as defined in the Financial Services and Markets Act 2000) the 20% test is applied by looking at the scheme as a whole rather than at the individual participators. It is not then relevant that the investment manager may be connected to the non-resident as partner (s 127(10) and paragraph 5 Schedule 26 FA 2003) or that the non-resident participants themselves carry on a financial trade as the availability of the exemption is instead tested solely by reference to the nature of the activities of the notional company represented by the scheme.

52. In certain circumstances the investment manager may be connected with the participants because both are partners in one or more partnerships which have an interest in the fund in question. Where the 20% test is failed as a consequence of aggregating the manager's income with that of certain partners who are not connected persons otherwise than as a result of s 839(4) TA 1988/s 993(4) ITA 2007, ie by being partners in a partnership, the failure will be regarded as a failure under s 127(4)(b) FA 1995 and paragraph 4(b) Schedule 26 FA 2003 to fulfil an intention to satisfy the test. But in certain situations that failure will be considered as—

(a) attributable to matters outside the control of the manager and persons connected with it; and
(b) as not being the result of a failure to take reasonable steps to mitigate the effect of those matters in relation to the fulfilment of that intention.

In those situations the 20% test will be met. The legislation will be applied in this way where:

– the connected persons are partners other than solely in a fund under consideration; and

– partnership is the only reason that the manager is connected with them.

This is a fudge to avoid undesirable consequences of the ultra-wide definition of connected person.[29]

> 53. Where overseas pension funds are set up under trust the trustees do not have beneficial ownership of the pension fund income although they may be the legal owners. The 20% test will not therefore apply where the trustee is connected to the UK investment manager. In practice it would be unusual for an overseas pension fund to be carrying on a financial trade. ...[30]
>
> 55. Some non-residents remunerate investment managers with profit or incentive allocations and in consultations HMRC, investment managers and advisors reached a consensus that these are performance fees in substance. As such, these are income in nature and where they are recognised by the UK manager as fee income the allocations may be treated as fees payable by the non-resident when computing the chargeable profit. Furthermore, where HMRC is satisfied that some of the allocations are due to an overseas service provider as remuneration for those services at the arm's length rate those allocations will have the same treatment in computing relevant excluded income.
>
> 56. Deferred fees, or securities or interests provided as reward, may in turn generate some form of return. The legislation draws no distinction between the forms in which the profits of the fund are attributed to deferred fees or other investments as the test is based on beneficial entitlement to the chargeable profits of the non-resident and if the manager's beneficial entitlement to those profits, including the return on the securities, interests or deferred fees, exceeds 20% the test will not have been met.
>
> 57. Options to acquire any securities or interests in the non-resident, within the meanings at s 420 ITEPA 2003, need only be considered in the context of the 20% test when the options are exercised.
>
> 58. Some investments in a non-resident may be linked to structured products issued to customers which provide a return based on the performance of the non-resident, an example of which would be a bank investing in a non-resident fund and selling a product to a customer on which the return is linked to the performance of the fund. In such circumstances the beneficial entitlement to the income of the non-resident remains with the investor in the non-resident, in this example the bank, and not the holder of the structured product, ie the customer.

44.7.5 *Interaction of the 20% test and the independence test*

SP 1/01 provides:

> 59. The independence test and the 20% test apply quite separately. For example, a UK investment manager acts for an overseas trading fund

---

29 See 85.7.3 (Commentary: An excessively wide definition).

30 The paragraph omitted here discusses "control"; see 85.3.2 (Control over a company's affairs).

constituted as a company. If the investment manager is not acting in an independent capacity in relation to the fund company then the whole of the income of the fund is liable to assessment. If the independence test is satisfied, then the 20% test must be separately addressed. If the investment manager's interest in the fund company is 25% then that share of the fund's trading income is liable to assessment.

44.8 Independent broker conditions

Section 817 ITA provides:

> (1) The independent broker conditions are met in relation to a transaction carried out on behalf of a non-UK resident by a broker in the UK if—
>
> (a) conditions A to D are met, if this section applies for the purposes of section 813 [individuals/trustees], or
>
> (b) conditions A to C and E are met, if this section applies for the purposes of section 816 [companies].

I refer to these as **"broker conditions A to E"**.

44.8.1 *Broker conditions A and B: Broker's business*

Section 817 ITA provides:

> (2) Condition A is that at the time of the transaction the broker is carrying on the business of a broker.
>
> (3) Condition B is that the transaction is carried out in the ordinary course of that business.

The former International Tax Handbook provided:

> **940. NRs: accepting TMA 70 s82 broker exemption: in course of business**
>
> The exemption in Section 82(1) applies only to transactions which the broker carries out (on behalf of the non-resident) "in the ordinary course of his business as such". In modern times it has become common for brokers to extend their business beyond mere "broking" but it does not follow that, just because what they do is now customarily done by brokers, they do it in the ordinary course of their business as brokers. Thus stockbrokers and commodity brokers often provide investment management schemes for clients. But investment management does not thereby become an ordinary function of a broker. However, there are special provisions for investment managers which are considered in ITH951.

44.8.2 *Broker condition C: Customary remuneration*

Section 817(4) ITA provides:

> Condition C is that the remuneration which the broker receives in respect of the transaction for the provision of the services of a broker to the non-UK resident is not less than is customary for that class of business.

44.8.3 *Broker condition D: UK representative*

Section 817(5) ITA provides:

> Condition D is that the broker does not fall for the purposes of Chapter 2B of this Part, or of Chapter 1 of Part 7A of TCGA, to be treated as a UK representative of the non-UK resident in relation to
> [1] any other income which is chargeable to income tax, or
> [2] amounts which are chargeable to capital gains tax,
> for the same tax year as the transaction income.

This condition applies to individuals/trustees and not to companies.

44.8.4 *Broker condition E: Permanent establishment*

Section 817(6) ITA provides:

> Condition E is that the broker does not fall to be treated as a permanent establishment of the non-UK resident company in relation to any other transaction of any kind carried out in the same accounting period of the non-UK resident company as the transaction in question.

The wording is the equivalent of broker condition D for companies (using the company tax concept of PE rather than the individual/trustee concept of branch/agency).

44.9 Transactions through brokers

Section 828 ITA provides:

> (1) For the purposes of this Chapter a person is regarded as carrying out a transaction on behalf of another if the person—
> (a) undertakes the transaction, whether on behalf of or to the account of the other, or
> (b) gives instructions for it to be so carried out by another.
> (2) In the case of a person who acts as a broker or investment manager as part only of a business, this Chapter has effect as if that part were a separate business.

44.10 Relevance of financial trading to IME

The question whether the non-resident client is trading is crucial for the IME. Unless the non-resident client is trading, the three IME exemptions are not needed:

(1) In the absence of a trade, a non-resident company is not subject to CT even if it has a permanent establishment and so the company does not have to rely on IME PE relief.

(2) In the absence of a trade, there can be no UK representative and the non-resident does not need to rely on IME UK-representative relief.

(3) In the absence of a trade, non-residents may qualify for non-residents IT relief and do not have to rely on IME non-residents IT relief.

SP 1/01 acknowledges this:

> 14. The Investment Manager Exemption legislation has no relevance unless the non-resident is trading in the UK.
> 15. If the transactions carried out through the investment manager are part of the trade carried on by the non-resident then, unless the [IME] tests ... are satisfied the income from that trade, including any profit from the realisation of securities, etc, is taxable. ...

44.11 When is there a trade in financial assets?

"Trade" has no short definition and the general question of what a trade is needs a book to itself. The question discussed in this section is when there is a trade of dealing in securities, options and futures (which I shall abbreviate to securities or "financial assets" or "financial transactions"). The trading/non-trading distinction here is important, for individuals, trusts and non-resident companies, but it is elusive.

44.11.1 *"Investment": Terminology*

"Investment" or "investing" is a word with several meanings.[31]

In one sense all securities are "investments". We have investment managers, investment brokers, investment companies or trusts. This is a convenient and common usage. However various distinctions are

---

31 For discussion of this terminology in a commercial context see Graham & Dodd, *Security Analysis* (6th ed., 2009), chap 4 (distinctions between investment and speculation). For discussion in a UK tax context, see Kessler and Marre, *Taxation of Charities and Nonprofit Organisations* (9th ed., 2013), para 5.9 ("Investment") (online version *http://www.taxationofcharities.co.uk*).

sometimes drawn which narrow the meaning of "investment".

In a tax context, one ought to distinguish between:

(1) investing in securities and

(2) *trading* in securities. (In tax terminology "dealing" is an informal synonym of trading, but I think it is clearer to use the statutory term.)

In correct tax terminology a trader is not "investing" and holds securities as trading stock and not as "investments". I stress this because one sometimes finds the word "investment" used in a trading context.[32] This is not surprising because in the finance industry, the terms "investing", "trading" and "dealing" are all used as synonyms, because for brokers and investment managers this distinction is irrelevant.

A distinction is sometimes drawn between:

(1) investing in securities and

(2) gambling or speculating.

I discuss the meaning of "gambling" and "speculating" below. The important point here is that gambling or speculating (whatever that means) is not (in this sense) investing.

In the absence of trade, the matter is usually investment, and the trading/non-trading tax distinction can be described as a trading/investment distinction. This is doubted in *Wannell v Rothwell* 68 TC 719 at p.730:

> [Counsel for HMRC] mildly criticised para 11 for having posed the question 'trade or no trade?' but then, having treated that as equivalent to 'trade or investment?' I think there is some force in that criticism, since the word 'investment' has many shades of meaning, both in taxing statutes and elsewhere, and it is not used in the statutory provisions now under consideration.

This is strictly correct. It is possible to acquire financial assets in a manner which is not trading but which is not necessarily described as investment. (In particular, financial transactions have sometimes been described as "gambling" and classified as neither trading nor investment.) However, for most practical purposes that can be disregarded, and in the present context,'trade or no trade?' can be regarded as equivalent to 'trade or investment?'.

This discussion of terminology does not identify the dividing line between trading and investment, but it is an essential start if we are to

---

32 See 44.5.4 ("Investment transaction").

know what we are talking about.

44.11.2 *Principles*

The principles are summarised in *Cooper v C & J Clark*:

> [1] First, marketable securities, being income-yielding assets usually capable of appreciating in value, are prima facie purchased and sold by way of investment and not by way of trade.
> [2] Secondly, a series of purchases and sales may sometimes, if carried out pursuant to a deliberate and organised scheme of profit-making, amount to a trade.
> [3] Thirdly, it is easier to characterise a series of purchases and sales as a trade in a case where they are made by a trading entity[33] as opposed to an individual.
> [4] Fourthly, in the case of a trading entity that characterisation is more easily made where the purchases and sales are substantial in relation to its other activities, all the more so where they are of frequent occurrence and extend over a long period of time.[34]

This is uncontentious and helpful as far as it goes.

44.11.3 *"Speculative" transactions*

Cooper v C & J Clark continues:

> Fifthly, it is sometimes helpful, although not decisive, to ask whether a series of sales and purchases is speculative or not. The reason why the question is sometimes helpful is that the answer may throw light *in one direction or the other,* but it is not decisive because according to the circumstances either a trade or a course of investment may be speculative.[35]

---

33 By "trading entity" it is not entirely clear whether the judge had in mind:
(1) an entity actually carrying on a trade (such as the taxpayer company in *C&J Clark*, which was manufactured shoes); or
(2) any company with articles authorising it to carry on a trade, whether or not it carries on any activity apart the transactions in financial assets.
The general rule is that it is easier to characterise a series of purchases and sales as a trade in any case where they are made by any company with articles authorising it to carry on a trade. See 44.11.4 ("Gambling" and distinction between individuals and companies).

34 54 TC 670 at p.676.

35 54 TC 670 at p.676; emphasis added.

What does speculative mean? Graham and Dodd canvas various possible definitions, and suggest the following "as in harmony with the popular understanding of the term and the requirements of reasonable precision":

> An investment operation is one which, upon thorough analysis, promises safety of principal and a satisfactory return. Operations not meeting these requirements are speculative.[36]

In particular, a financial transaction is described as "speculative" if it is risky and especially if the purchaser stands to make or lose money depending on how the market moves in the short term.

In that sense, financial transactions are often if not mostly speculative (though it is a question of degree and some transactions are more speculative than others).

The passage from *C&J Clark*, while describing the issue of whether a transaction is speculative as "sometimes helpful" does not inform us whether a positive answer supports a conclusion of trading or non-trading, which somewhat undermines the helpfulness of the question. It is considered that to ask whether a transaction is speculative in the sense of high-risk is rarely if ever going to be helpful. See *Lewis Emanuel v White*:

---

36 Graham & Dodd, *Security Analysis* (6th ed., 2009), p.106.
Fred Schwed Jr gives a similar explanation of this vague word in *Where are the Customers' Yachts?* (1940) Chapter 8:
"Investment and speculation are said to be two different things, and the prudent man is advised to engage in the one and avoid the other. This is something like explaining to the troubled adolescent that Love and Passion are two different things. He perceives that they are different, but they don't seem quite different enough to clear up his problems.
Investment and speculation have been so often defined that a couple more faulty definitions should do no harm, the science of economics having reached a point where further confusion is impossible. Thus,
- Speculation is an effort, probably unsuccessful, to turn a little money into a lot.
- Investment is an effort, which should be successful, to prevent a lot of money from becoming a little.

If you take a thousand dollars down to Wall Street and attempt to run it up to $25,000 in the course of a year, you are speculating. If you take $25,000 down there and attempt to earn a thousand dollars a year with it (by buying twenty-five four per cent bonds) you are investing. ..."
Sometimes the word "speculative" is used to describe a transaction made with a view to profit (as opposed to a transaction intended to hedge a financial risk). In that sense it is relevant to ask whether a transaction is speculative, since different principles apply to hedging transactions, but hedging is a rather special case.

> The word 'speculation' is not, I think, as a matter of language, an accurate antithesis either to the word 'trade' or to the word 'investment': either a trade or investment may be speculative.[37]

44.11.4 *"Gambling" and distinction between individuals and companies*

In order to avoid confusion, it is essential to bear in mind that the word "gambling" may be used in two senses.

In the strict sense:

(1) gambling[38] contracts were unenforceable; and

(2) gambling activity is not a trade.

I refer to this as "**the gaming/wagering sense"**. The Gambling Act 2005 abolished the former contract law rule that gaming/wagering contracts were unenforceable.[39] However the rule remains that the activity of gaming/wagering is not a trade and the profits (if any) are not subject to income tax;[40] or CGT.[41]

In a loose sense, "gambling" means (more or less) the same as speculative, in the sense discussed above: that is, high-risk. I refer to this as **"the loose (high-risk) sense"**. Thus the purchase of a future or option, say, may constitute gambling in the loose (high-risk) sense, but it is not gambling in the strict (gaming/wagering) sense.

In *Lewis Emanuel v White* the Judge said:

> ... it is certainly true, at any rate in the case of an individual, that he may carry out a whole range of financial activities which do not amount to a trade but which could equally not be described as an investment, even upon a short-term basis. These activities include betting and gambling

---

37 42 TC 369 at p.377; this passage was cited with approval in *Wannell v Rothwell* 68 TC 719 at p.730.

38 Also called gaming, wagering and betting.

39 Section 63 Financial Services Act 1986 had already substantially restricted the rule that bets on stock market movements were void.

40 *Hakki v Secretary of State for Work and Pensions* [2014] EWCA Civ 530.

41 Section 51(1) TCGA. The reason for IT/CGT exemption is (1) that losses are generally more likely than profits, and one could not tax profits without allowing some relief for losses; (2) betting duty may apply instead.
In relation to financial bets (as opposed to betting such as sports betting) the commercial effect of a bet is (more or less) the same as a cash settled option or future, so the existence of two separate tax regimes is somewhat odd; but there it is. For spread betting, see 11.15.14 (Betting).

> in the narrow sense. They also include, it seems to me, all sorts of Stock Exchange transactions. For want of a better phrase, I will describe this class of activities as gambling transactions.

It seems a little strange to describe "all sorts of stock exchange transactions" as gambling, but the passage makes sense if one bears in mind that it was written in 1965, when the cult of the equity had only just begun, and before it had received judicial notice.[42] Before then, the only assets recognised as investments were gilts and mortgages, and stock exchange transactions would not be regarded as investments: they were felt to be too risky. They would not naturally be regarded as trading, so they were put into the category of non-trading non-investments.
