It is considered that to ask whether or not the transactions are gambling (in the loose (high-risk) sense) is the same as to ask whether or not the transactions are speculative: it can never be helpful in determining whether or not transactions are to be classified as trading.[43]

This line of thinking is however the historic basis for the rule that the test for whether a company is trading is different from the test of whether an individual is trading, and that companies are more likely to be trading than individuals. The reason for the rule is said to be that companies (unlike individuals) are usually entitled only to trade or to invest. They cannot carry on non-trading non-investment activities of the kind that the judge categorised as "gambling" (in the loose (high-risk) sense). The judge continued:

> It seems to me, however, that in general it is much more difficult to bring the activities of a company within this class of gambling transactions. An individual may do as he pleases: a corporation must act within the limitations of its memorandum of association. All companies have power to invest; many companies have power to deal [ie trade] in securities; few companies can have power to enter into gambling transactions - i.e., by [the judge's] definition, transactions otherwise than by way of investment or trade. Where a transaction can be brought within the scope

---

42 *Sinclair v Lee* [1993] Ch 497 at p.512: "The cult of the equity ... did not really begin until the mid or late 1950s."

43 Of course (in the absence of trade) it does not matter for individuals whether one describes financial transactions as investment or as gambling (in the loose high-risk sense), since the tax consequence is the same: the profits are subject to CGT and not IT.

> of an authorised object - e.g., investment or dealing - one would not readily treat the transaction as having been carried out ultra vires in pursuit of an unauthorised object - e.g., gambling. In other words, one expects a trading company's activities, apart from capital investment, to be by way of trade.

The reasoning is now invalid:

(1) Nowadays one would not readily describe conventional stock exchange transactions as "gambling" even in the loose (high-risk) sense.

(2) Companies powers have increased.

The BI Manual notes point (2). It cites *Lewis Emanuel v White* and comments:

> **BIM56870 - Measuring the profits (particular trades): Financial traders - instruments and shares: case law and companies** [December 2013]
>
> **...Recent developments**
>
> Since the Lewis Emanuel case was heard, company law has been amended. S39 Companies Act 2006 now says:
>
> > 'The validity of an act done by a company shall not be called into question on the ground of lack of capacity by reason of anything in the company's constitution.'
>
> Furthermore, there is judicial approval for the right of a company to engage in speculative transactions. In *Hazell v Hammersmith & Fulham London Borough Council* [1991] 2 WLR 372 at p.372, Lord Templeman said:
>
> > 'There are many trading and currency and commercial swap transactions which eliminate or reduce speculation. Individual trading corporations and others may speculate as much as they please or consider prudent.'
>
> Although it is unlikely that a company would ever enter into a gambling transaction, there is no reason why its activities could not include speculative transactions which, while not being investments, might also not amount to trading.

It is considered that the rule continues to be valid that companies (assuming their articles authorise trading) are more easily held to be trading than individuals.[44] However the basis of that rule cannot now be the reason given in *Lewis Emanuel* (that the transactions carried out by

---

44 See 44.11.2 (Principles) item [3].

individuals should generally be classified as non-trading non-investment transactions but companies, unlike individuals, must either trade or invest, so they are more likely to be trading). One could simply say that the rule is now established and continues to hold even if its reasons have ceased to be sound. However, if needed the rule has another, sounder basis. This is that one badge or indication of trade is "trading structure" and companies (if their articles authorise trading) have that element of "trading structure" which individuals do not.

Since different tests apply to determine whether companies and individuals are trading, I consider the cases for individuals and for companies separately.

44.11.5 *Trading by individuals*

There have been four UK cases discussing whether individuals are trading in financial assets. The first is *Salt v Chamberlain* 53 TC 143 where Oliver J said:

> Where the question is whether an individual engaged in speculative dealings in securities is carrying on a trade, the prima facie presumption would be, as Pennycuick J. suggested in the Lewis Emanuel case 42 TC 369, that he is not. It is for the fact-finding tribunal to say whether the circumstances proved in evidence or admitted take the case out of the norm.

In *Salt v Chamberlain* the individual relied on the following matters to justify a conclusion of trading. There was a relatively large number of transactions, about 50 sale/purchase transactions per annum, over a four-year period. A substantial proportion of the transactions concerned options (rather than securities yielding income). One-third of purchases and sales were within the settlement period, and many others were within a short period thereafter. The purchases were financed in part by borrowing. On these facts the General Commissioners found that the taxpayer was not trading, and on appeal the judge held that the Commissioners were entitled to reach that conclusion.

A similar approach was applied in Hong Kong Inland Revenue Board of Review Decision *Case No. D 42/90.* The following aspects of the matter might have justified a conclusion of trading. The individual's transactions were in Hang Seng Index futures contracts which had a short lifespan and produced no income. The individual ran an "active" account (the number of transactions is not recorded). The Board held that the taxpayer was not

trading.[45]

The next UK case is *Wannell v Rothwell* 68 TC 719. In this case there were about 60 sale/purchase transactions per annum. The assets traded were shares and commodities. Some of the money used was borrowed. The taxpayer was aiming at quick profits and had no intention of taking possession of the commodities or (with rare exceptions) of holding shares. The Special Commissioner did not decide whether the taxpayer was trading, but the Judge found that the Special Commissioner would have been "almost bound" to reach the conclusion that the taxpayer was trading. I think it was significant that the underlying assets included commodities as well as securities.

In assessing the significance of the turnover of assets, one should in my view take into account that it is, I think, more common now to actively manage a portfolio than it was in the past. The most recent UK case is *Manzur v HMRC* [2010] UKFTT 580 (TC) where transactions numbered between 240 and 300 for the year, and shares were sometimes held for as long as six months. This was held to be investment, not trade.

Business Income Manual provides:

> **BIM56850 - Measuring the profits (particular trades): Financial traders - instruments and shares: case law and individuals** [Dec 2013]
>
> In the past, the approach taken in deciding whether a company is carrying on a trade of buying and selling shares and other financial instruments has been different from that adopted for individuals.
>
> [The Manual cites the passage from *Lewis Emanuel v White* 42 TC 369 discussed above[46] and continues:]
>
> For companies, however, the position was different. Pennycuick J said:
>
> > 'it is much more difficult to bring the activities of a company within the class of gambling transactions. An individual may do as he pleases: a corporation must act within the limitations of its

45 Accessible *http://www.info.gov.hk/bor/eng/pdf/dv5_second/d4290.pdf*.
For completeness, I should also mention *Manzur v HMRC* [2010] UKFTT 580 where the individual carried out between 240 and 300 transactions each year; this was described as "not numerous" and held not to be trading. However no weight should be given to this brief first tier tribunal decision, in which the taxpayer was not represented by Counsel and the taxpayer's best case *Wannell v Rothwell* was not cited.

46 See 44.11.3 ("Speculative" transactions) and 44.11.4 ("Gambling" and distinction between individuals and companies).

> memorandum of association…where a transaction can be brought within the scope of an authorised object - e.g. investment or dealing - one would not readily treat the transaction as having been carried out ... in pursuit of an unauthorised object e.g. gambling. In other words, one expects a trading company's activities, apart from capital investment, to be by way of trade.'

Pennycuick's view that, for individuals, share transactions could amount to investment, trading, or speculation falling short of trading, was followed in *Salt v Chamberlain* [1979] 53TC143. Oliver J said:

> 'Where the question is whether an individual engaged in speculative dealings in securities is carrying on a trade, the prima facie presumption would be, as Pennycuick J suggested in the Lewis Emanuel case, that he is not. It is for the fact finding tribunal to say whether the circumstances proved in evidence or admitted take the case out of the norm.'

So for individuals we take the view that transactions in shares which do not amount to investment are speculative transactions falling short of trading, unless there are particular factors which take the case 'out of the norm'. There is more on this at BIM56860.

Shares which are dealt with speculatively or as investments are dealt with under the Capital Gains Tax rules. For futures, options, and contracts for difference (including swaps), see BIM56880 and BIM56900.

There is more on the treatment of companies at BIM56870.

The rule that an individuals' transactions are not generally trading is sound; see 44.11.4 ("Gambling" and distinction between individuals and companies).

The BI Manual continues:

> **BIM56860 - Measuring the profits (particular trades): Financial traders - instruments and shares: three cases involving individuals** [Dec 2013]
>
> An activity of buying and selling shares and other financial instruments undertaken by an individual will normally amount to investment or speculation falling short of trading unless there are factors which take the case 'out of the norm' (see BIM56850). Three cases where such activities have been considered are:
>
> *Salt v Chamberlain* [1979] 53TC143,
>
> *Wannell v Rothwell* [1996] 68TC719, and
>
> *Manzur v HMRC* [2010] UKFTT 580(TC).
>
> **Salt v Chamberlain**
>
> The Commissioners in this case found that Mr Salt was not trading, and

Oliver J held in the High Court that the facts entitled the Commissioners to come to this conclusion.

Mr Salt was a mathematics graduate who used his knowledge of computers to forecast the movements in share prices. In the period 11 December 1968 - 31 March 1973 he entered into approximately 200 transactions for the purchase and sale of securities, which included put and call options and settlements at the end of an account for balances only. He used his own funds as well as borrowings from the bank and against life assurance policies.

Wannell v Rothwell

Mr Wannell had previously worked for a commodity futures dealer as a trader prior to the commencement of his activity. His duties had included advising clients on long-term investments and short-term trading opportunities in commodity futures and options. He had obtained qualifications relevant to his duties and, in the course of his own activity, had access to market reports and analysis but not a full screen service. All the transactions were placed with a broker. There were 11 purchases and sales of commodities between May and October 1986 and 46 purchases and 49 sales of shares between October 1985 and August 1987. He dealt on his own account and there were no customers.

The Deputy Special Commissioner said:

> 'The essential point in the present case is that of organisation. Was the Appellant, doing two or three deals a month from home through brokers, but doing them with the benefit of experience, training and contacts which he had, organised in a way that a trader could be said to be organised? The case is very close to the borderline, and if the only question I had to decide were whether the Appellant was trading, I might be inclined to give him the benefit of the doubt and find that he fell, by a hair's breadth, on the trading side of the dividing line.'

This case considered not only the question of whether Mr Wannell was trading but whether he was trading commercially for the purposes of relief for losses (see BIM85705), and the Deputy Special Commissioner concluded that:

> 'a case which is so close to the trading borderline because of its lack of commercial organisation is bound to be on the wrong side of the [loss relief] borderline.'

When this case came before the High Court, Robert Walker J found that the Deputy Special Commissioner must be taken to have found that Mr Wannell was trading, but also that he had had sufficient evidence before him to come to the conclusion that the activity was not carried on

commercially, so the losses could not be set off against general income. There is more information on losses in this context at BIM85705.

Manzur

Mr Manzur was a retired surgeon. He used his own savings to begin acquiring stocks and shares. He made between 240 and 300 trades in a year using an online stockbroker. Some of the shares were turned over very quickly but others were retained for six months or more.

The tribunal held that Mr Manzur's buying and selling amounted to the management of a portfolio of investments rather than trading. They upheld the view in Salt v Chamberlain that the badges of trade were of limited value and said there was no definitive checklist which could be used to say whether someone was trading or not. The number and frequency of transactions, and the short-term nature of the holdings alone did not establish trading. Other factors taken into account were:

- the time spent on the activity (about two hours a day);
- the fact that Mr Manzur did not entirely rely on his own expertise but used the advice of brokers;
- that the activities were not characteristic of established share dealers, for example Mr Manzur had no customers and was dependent on market movements alone to make a profit.

Conclusion

The cases discussed above show that no one factor can determine whether an activity has been taken 'out of the norm'. Some factors may be more relevant in some cases than in others. You have to take a view after considering the relevant circumstances as a whole.

44.11.6 *Trading by trustees*

There are no tax cases on whether trustees of a private trust are trading, but it is considered that their position is in principle similar to individuals. In *Smith v Anderson* (a non-tax case discussing an early unit trust) James LJ said:

> In my opinion, nothing that is to be done under this deed by the trustees comes within the ordinary meaning of "business", any more than what is done by the trustees of a marriage settlement who have large properties vested in them, and who have very extensive powers of disposing of the investments, changing the investments, and selling them and reinvesting in other investments, according to their discretion and judgment ... That is not a business. No doubt there is power ... to dispose of the investments and reinvest in some similar securities ... This appears to me to be no more than the power of varying investments which you

would find in an ordinary trust deed ...[47]

44.11.7 *Trading by companies*

There have been two cases discussing whether companies are trading in financial assets. Each concerned a trading company using spare cash to carry out stock exchange transactions.

In *Lewis Emanuel v White* 42 TC 369 the company carried out over 100 transactions per annum (described as "a very large number"). The majority were sold in the same year, often within a matter of weeks. It was held that the only possible conclusion was one of trading.

In *Cooper v C & J Clark* 54 TC 670 the company made only 13 transactions over nine months. The commissioners findings of trade were upheld, though only just (the judge would not have found there was a trade). So I think we can say that is an example of a non-trade.

It is considered the company's own classification of its activity as trading/non trading (in the company's constitution, board resolutions and accounts) is a matter of considerable weight which in an otherwise marginal case ought to be decisive. However an activity may constitute a trade even it the activity is ultra vires the company. *Lewis Emanuel* was such a case: 42 TC at p.377.

UK resident companies also need to consider the derivative contract rules in part 7 CTA 2009, which are not discussed here.

44.11.8 *SP 1/01*

SP 1/01 provides some heavily guarded generalities, and anyone who tries to use this guidance will find that it does not take them very far.[48] For what it is worth, the material is set out here:

> 16. Whether or not a taxpayer is trading is a question to be determined by reference to all the facts and circumstances of the particular case. This applies as much to financial transactions as to other activities.
> 17. In determining the question of trading, any transactions carried out through an investment manager are to be considered in the context of the status and world-wide activities of the non-resident. It is not possible in this statement to consider every possible set of circumstances but, for example, an individual is unlikely to be regarded as trading as a result

47 15 Ch D 247 at p.276.

48 There is similar (qualified) guidance in SP 3/02.

> of purely speculative transactions.[49]
> 18. For a company, a transaction will generally be either trading or capital in nature. (This may also be the case for non-corporate collective investment vehicles whether open-ended or closed.)

The point of para 18 is that the transaction will not give rise to non-trading income; see 44.11.9 (Transaction income (former schedule D case VI)).

> If the main business of a non-resident company is a trade outside the financial area, or an investment holding business, the activities in the UK would normally amount to trading only if they constituted or were part of a separate financial trade. But if, exceptionally, activities which are an integral part of the profit earning activities of a non-financial trade are carried out through a UK investment manager (eg hedging on the London terminal markets by a non-resident dealer in physical commodities) then that might amount to trading here. The view to be taken on a particular case will depend on all the facts of that case.
> 19. The active management of an investment portfolio of shares, bonds and money market instruments such as bills, certificates of deposit, floating rate notes and commercial paper does not constitute a trade.

The use of the term "investment" (if it carries its normal tax meaning) makes para 19 tautologous. Presumably the word is used in the wider sense, in which case the sentence makes an important point. But the author adds a qualification to neutralise that:

> But every case must be considered in the light of its own facts.
> 20. HMRC view short positions as conceptually the same as long positions and synthetic positions are conceptually the same as the equivalent 'real' positions. Neither going short nor taking synthetic positions using derivatives are in themselves indicative of trading. Furthermore, synthetic positions that give exposure to part of an asset are conceptually the same as synthetic positions that give exposure to the whole of an asset. Thus a synthetic position that gives exposure only to a bond's credit risk is no more or less likely to be a trading transaction than a synthetic or real position that gives exposure to the bond's coupon, liquidity, credit and currency risks. These techniques may constitute investment in themselves or may form part of an investment activity.
> 21. Where futures and options are used by non-residents who are collective investment vehicles (whether open-ended or closed), pension

49 Likewise SP 3/02 para 8.

funds and other bodies which either do not trade or whose client trade is outside the financial area, SP 03/02 "Tax Treatment of Derivative Transactions" will be applied.

22. ... [50] The criteria for deciding whether a non-resident financial company is an investment company or a trading company are the same as those which apply to a resident company.

BI Manual expands on this:

20250 - Trade: badges of trade: income producing assets [December 2013]

... Financial assets

Normally transactions by individuals and companies in financial assets, such as shares, options and futures, do not amount to trading for tax purposes. Shares are generally held for investment, either to gain from income or capital growth. Short-term transactions, which cannot be classed as investments, usually fall short of trading, being in a class of transaction analogous to gambling or speculation.

Whether an activity of buying and selling shares, securities and other financial instruments amounts to a trade is considered further at BIM56800 onwards.

56910. Financial traders - instruments and shares: synthetic positions [December 2013]

Financial transactions include the acquisition, holding, dealing with, and disposal of financial assets such as shares and bonds. They also include taking synthetic positions in relation to such assets or corresponding indices, or discrete components of them. In our view, using synthetics is not itself indicative of trading. There is no conceptual difference between a 'real' and a synthetic financial transaction (for example, buying a share or entering into a derivative contract that replicates the risks and rewards of ownership). All of these approaches may form part of an investment strategy and some of them may constitute investment in themselves.

Short positions are conceptually the same as long positions

Buying a share because you take the view that its price will rise and shorting a share because you think its price will fall are conceptually the same. In simple terms, a view is merely being taken on the direction of movement. It follows that synthetic long and short positions are conceptually the same as one another and the equivalent real transactions.

Derivatives that give exposure to part of an asset are conceptually the same as derivatives that give exposure to the whole asset

A view may be expressed on a bundle of components embedded in an instrument, for example the coupon, liquidity, credit risk and currency of a bond, or alternatively a view may be expressed on one or a combination of these components. There is no conceptual difference between taking a view on all

50 The omitted text discusses whether the financial trade is carried on in the UK; see 15.14.2 (Buying and selling through an agent). This is distinct from the question of whether there is a trade.

components by buying the instrument or entering a derivative contract that replicates ownership, or taking a view on one or a combination of the components via derivatives. There is no conceptual difference between taking a view on the direction of movement (as with simply long and short positions) or taking a view on the magnitude or timing of movements, or other components. Multi-derivative or hybrid strategies should not be unbundled.

Given the wide range of situations this principle can apply to, three examples are set out below. These are intended to be illustrative and not a definitive list.

In all cases involving any such 'bundling' we would expect there to be evidence that the transactions were executed in pursuit of a clear prior strategy.

Two or more derivatives

Where, for example, the view is that the price will increase but only within a certain band, and the most efficient way to express that single view is via a series of derivative transactions, those transactions should be considered as a whole and not each in isolation.

A derivative and another financial asset (for example shares)

Where the view is that an asset would not be acquired at current value but would be at a set lower value, a put option is written at that lower value, i.e. as a cost efficient method of acquisition. The writing of the option and the potential acquisition of the asset should be considered as a whole and not each in isolation.

A sequential series of similar derivative strategies

A derivative that is close to maturity generally has greater liquidity than a derivative identical in every way, other than having a longer period to maturity. 'Rolling' short dated derivative strategies such that there is a sequential series of similar derivatives should be viewed as a whole and not each in isolation.

44.11.9 *Transaction income (former schedule D case VI)*

One welcome rule is that stock exchange transactions must either be trading or non-trading, and cannot fall within any other category of income. Section 779(1) ITTOIA provides:

> No liability to income tax arises as a result of Chapter 8 of Part 5 (income not otherwise charged) in respect of a gain arising to a person in the course of dealing in—
>
> (a) commodity or financial futures,
>
> (b) traded options, or
>
> (c) financial options.[51]

---

51 For completeness, this continues:

(2) The reference in subsection (1) to a gain arising in the course of dealing in commodity or financial futures includes a gain regarded as so arising under section 143(3) of TCGA 1992 (gains arising from transactions otherwise than in the course of dealing on a recognised futures exchange, involving authorised persons).

(3) In this section—

This makes obsolete some difficult case law under which transactions in futures were held to be non-trading but to fall within the former Schedule D case VI. There is no scope for straightforward purchase and sale transactions to fall within this category: *Jones v Leeming* 15 TC 333.

44.11.10 *Commentary*

The trading/non-trading distinction in financial assets raises three difficulties:

(1) *Uncertainty:* The case law is old and investment practice has since changed. It does not address the many varieties of transaction carried out by hedge funds and other sophisticated investors/traders, and even in the case of straightforward transactions, it is often unclear whether or not there is a trade.

(2) *Complexity:* There are some complex and narrow exemptions which recognise and address this problem and (more or less) treat stock exchange transactions as non-trading:

(a) the IME discussed in this chapter
(b) an exemption for authorised investment funds (introduced in an attempt to stop funds relocating to Ireland or Luxembourg)[52]
(c) chapter 6 part 3 OFTR[53]

(3) *Irrationality:* The line drawn between trading/non trading in transactions in financial assets (insofar as it is discernible) is arbitrary.

These three problems follow from one underlying problem: there is no clear *economic* line to be drawn between trading and non-trading, in the context of stock exchange transactions. The distinction is not drawn for accountancy purposes. Financial Reporting Standard for Medium-sized Entities requires the use of fair value for investments in shares which are publicly traded or where the fair value can be measured reliably. Movements in this fair value are recognised in profit or loss. It is of course possible that tax and accountancy standards may define profit in different ways. But in this case the accountancy standards are right. There is an

---

"commodity or financial futures" means commodity futures or financial futures that are for the time being dealt in on a recognised futures exchange,
"financial option" has the meaning given by section 144(8)(c) of TCGA 1992, and
"traded option" has the meaning given by section 144(8)(b) of that Act.

52 Authorised Investment Funds (Tax) (Amendment) Regulations, SI 2009/2036 (31 pages of regulations accompanied by 107 pages of draft guidance).

53 See 36.6 (Fund transactions treated as non-trading).

economic distinction between buying for short term and buying for long term holding[54] and to the extent that this intuition underlies the trading/non-trading distinction it is not wholly irrational. However this economic line is nowhere close to the tax trading/non-trading distinction; and there is no reason why the two activities should be taxed differently.

As far as I am aware, competing jurisdictions sensibly do not attempt to draw any comparable distinction.

It is suggested that all transactions in financial assets, defined along the lines of the IME, should in principle be deemed non-trading for tax purposes.[55] The IME, AIF and OFTR exemptions can be repealed. That would be a simplification with little if any tax loss.

54 "We believe that according the name investors to institutions that trade actively is like calling someone who repeatedly engages in one-night stands a romantic." (Attributed to Warren Buffet - I would be grateful to any reader who could supply the reference).

55 There could be some limited exceptions, eg if a company elects for trading treatment, and the hedging of trading risks.

CHAPTER FORTY FIVE

LOANS FROM NON-RESIDENT COMPANIES

45.1 Advantages of loans from non-resident companies

A dividend (or other income distribution) from a non-resident company will often cause income tax problems. If the dividend is received by a UK resident, directly or through an IIP trust, it will be taxable on the arising basis or on the remittance basis. If it is received by a non-resident discretionary trust or company, it will be income within the scope of s.624 and the ToA provisions. By contrast a loan, even if interest-free, does not constitute an income receipt and will avoid these problems. Loans therefore seem an attractive method of extracting funds from companies. However, they raise tax issues of their own.

45.1.1 *Cross references*

The following issues are discussed elsewhere.

A loan may be a benefit for the purposes of s.731 and s.87.[1]

Receipt of the loan in the UK may be a taxable remittance if the sum loaned is derived from:

(a) s.624, s.720 or s.731 income of the settlor/transferor;[2] or

(b) foreign income/gains of the individual.[3]

A loan to a transferor or settlor may bring s.727 ITA[4] and s.641 ITTOIA[5] into effect which is important if the transferor has no power to enjoy or if the company is held by a trust which is not settlor-interested.

---

1 See 30.4.4 (Interest-free loan and enjoyment of asset in kind).

2 See 27.4 (Section 624 remittance basis); 29.14 (Section 720 remittance basis); 30.35 (Section 731 remittance basis).

3 See 11.15.6 (T lends income/gains to R). Remittance condition D might also apply.

4 See 29.11 (Transferor receives capital sum).

5 See 27.11 (Settlor receives capital sum).

A loan to trustees may give rise to a charge under Schedule 4B TCGA.[6]

The liability to repay the loan may not be deductible for IHT purposes.[7]

Loans *to* non-resident companies raise different issues, not discussed here.

45.2 Non-tax aspects

The loan should be documented by a written agreement made at the time of the loan. It should be recorded in the company's accounts.

Take care the loan does not accidentally become statute-barred.

Company law restrictions on loans to directors and connected persons may need to be considered. This will depend on the applicable company law.

If the company is held by a trust, the trustees need to consider whether they can properly permit the company to make the loan.

45.3 Loans to participators

Section 455 CTA 2010 imposes a charge where a close company lends money to a participator. There is no charge under this section provided the company was not UK resident (and so not "close") at the time the loan was made. It does not matter if the company later becomes UK resident.

In this chapter I assume that the company is not UK resident when the loan is made.

45.4 Benefits to participators

Section 1064 CTA 2010 imposes a charge where a "close company incurs an expense in, or in connection with, the provision for any participator of ... benefits or facilities of any kind". However a close company does not "incur expense" in making a loan or in leaving the loan outstanding, and so there will be no charge under this section. Also a non-resident company is not "close".

45.5 Employment-related loan

Section 175(1) ITEPA provides:

> The cash equivalent of the benefit of an employment-related loan is to be treated as earnings from the employee's employment for a tax year

---

6 See 52.6 (Trustee borrowing).

7 See 65.1 (IHT deduction for debts).

if the loan is a taxable cheap loan in relation to that year.

This will in principle apply on a loan from a company to an employee, director, or shadow director.[8] A discussion of the meaning of "taxable cheap loan" and the quantum of the charge is outside the scope of this book. For DT relief see 22.42 (DTA defence to BiK charge).

45.5.1 *Remittance basis employee*

The BiK earnings of an employment-related loan may be chargeable overseas earnings if (in short) the duties of the employment are performed wholly outside the UK. If so, it is suggested that the earnings cannot be remitted so no tax charge can arise.[9]

45.5.2 *Loan to shadow director: HMRC practice*

Where living accommodation is provided by a company, HMRC say that they take the point that the occupier of the property may be a shadow director of the company, so that a benefit in kind charge arises.[10] In relation to interest-free loans from offshore companies, the same technical point arises. However in this case HMRC do not seem to argue the point. There are various possible explanations for this discrepancy.

One reason may be that borrowers (unlike occupiers) are less likely to be shadow directors. Of course a person who borrows interest-free from a company is not necessarily a shadow director. Perhaps the person occupying a property purchased by the company is more at risk of becoming a shadow director, because the company's acts to acquire the property and licence the individual to occupy are more likely to be at the direction of the individual. By contrast, the decision to extract funds from the company by way of loan (as opposed, say, to distribution) may be less likely to be at the direction of the individual. But it is of course a question of fact in each case.

The motivation for (purporting to) take the living accommodation point may be to discourage IHT planning on the family home, not the collection of income tax.

---

8 See 74.8 (Who is a shadow director?).

9 See 74.21 (Benefit in kind: remittance basis taxpayer). If that is wrong, imponderable questions arise as to what happens if the money lent is remitted here and spent. Contrast 30.37.1 (Interest-free (or low-interest) loan).

10 See 74.7 (Shadow directors).

45.6 Meaning of "employment-related loan"

45.6.1 *"Loan"*

Section 173(2)(a) ITEPA provides:

> "loan" includes any form of credit

EIM para 26108 provides:

> **26108. Meaning of loan** [December 2006]
> Loan means more than just lending money. It includes any form of credit. It follows that any kind of advance by reason of the employment is covered. For example, any amount shown in the employer's books or records as owed by an employee will count as a loan.
> *Grant v Watton*
> The case of *Grant v Watton* (71 TC 333) concerned credit extended by a company of which Grant was a director, to his sole trade and later to a partnership in which Grant was the general partner. In the High Court Pumfrey J. considered the meaning of credit –
>
> > "... credit is granted where payment is not demanded until a time later than the supply of goods to which the payment relates. Credit is the deferral of payment of a sum which, absent agreement, would be immediately payable."
>
> Regarding the application of Section 175 ITEPA 2003 to an overdrawn director's loan account see EIM26505.

45.6.2 *"Making" a loan*

Section 173(2)(b) ITEPA provides:

> references to making a loan (and related expressions) include arranging, guaranteeing or in any way facilitating a loan.

EIM 26110 summarises this and continues:

> **Loan made by a third party – employee benefit trust** [December 2011]
> It is not uncommon for a third party, such as an employee benefit trust (EBT), to make a loan to a beneficiary who is also an employee of the employer which is associated with the EBT. It is sometimes suggested that the loan is not an "employment-related loan" (EIM26113) because the definition of that term does not include a loan provided by a third party.
> Whilst it is true that the definition includes no reference to a third party loan provider, HMRC does not accept that the loan is not an

> employment-related loan. The definition of "employment-related loan" includes a loan made by an employee's employer. As "making" a loan includes "in any way facilitating" a loan, if the employer provides the money to fund the EBT, the employer is regarded as making the loan. Consequently for the purposes of the loan benefit rules, the EBT is ignored and the loan is treated as made directly by the employer to the employee. It follows that the loan is an employment-related loan.

Suppose:

(1) A company is held by a trust, and lends funds to the trustees ("loan 1").

(2) The trustees lend funds to a beneficiary who is a shadow director ("loan 2").

At first sight this would not be an employment-related loan because it is not made by the "employer". But if loan 1 is made in order to allow the trustees to lend to the beneficiary, it might be said that the company has facilitated loan 2. The same applies to a back-to-back loan, ie if the company deposits funds with a bank, the trustees borrow from the same bank on the security of that deposit, and the trustees then lend to the beneficiary.

Section 174(4) ITEPA provides:

> References in this section to a loan being made by a person extend to a person who—
>
> (a) assumes the rights and liabilities of the person who originally made the loan, or
>
> (b) arranges, guarantees or in any way facilitates the continuation of a loan already in existence.

EIM para 26111 provides:

> **Loans taken over from another person** [February 2006]
>
> If the rights over an existing loan are taken over by another person the loan will remain within the charge if it was within the charge when it was first made.
>
> A loan within the scope of the charge cannot be removed from it by the original lender handing his or her rights over to another person.
>
> But a loan that was not within the charge when it was first made can be brought within it if it is taken over by a person mentioned in EIM26113.

45.6.3 *"Employment-related"*

"Employment-related" loan is defined in s.174 ITEPA:

(1) For the purposes of this Chapter an employment-related loan is a loan—
(a) made to an employee[11] or a relative of an employee, and
(b) of a class described in subsection (2).
(2) For the purposes of this Chapter the classes of employment-related loan are—
A A loan made by the employee's employer.
B A loan made by a company or partnership over which the employee's employer had control.
C A loan made by a company or partnership by which the employer (being a company or partnership) was controlled.
D A loan made by a company or partnership which was controlled by a person by whom the employer (being a company or partnership) was controlled.
E A loan made by a person having a material interest[12] in—
(a) a close company which was the employer, had control over the employer or was controlled by the employer, or
(b) a company or partnership controlling that close company.
(3) In this section—
"employee" includes a prospective employee, and
"employer" includes a prospective employer...

"Control" means control in the strict sense.[13]

45.6.4 *Loan to relative of employee*

Section 174 ITEPA provides:

(1) For the purposes of this Chapter an employment-related loan is a loan—
(a) made to an employee or a relative of an employee...

Section 174(6) ITEPA defines "relative" quite widely:

For the purposes of this section a person ('X') is a relative of another ('Y') if X is—
(a) Y's spouse or civil partner,
(b) a parent, child or remoter relation in the direct line either of Y or of Y's spouse or civil partner,
(c) a brother or sister of Y or of Y's spouse or civil partner, or
(d) the spouse or civil partner of a person falling within para (b) or (c).

---

11 For the definition of "employee" see 22.2 ("Employer", "employee" and "employment").

12 "Material interest" is defined in s.68 ITEPA.

13 See 85.2.2 (Meaning(s) of "control").

However s.174(5) ITEPA brings in a wide exception:

> A loan is not an employment-related loan if—
> (a) it is made by an individual in the normal course of the individual's domestic, family or personal relationships, or
> (b) it is made to a relative of the employee and the employee derives no benefit from it.

In general therefore straightforward loans to relatives of employees or shadow directors are not caught.

45.6.5 *Change in employee status*

What if a loan is made to someone who is not an employee (as defined) but later becomes a shadow director? At first sight, leaving an existing loan outstanding would not give rise to a tax charge even after the borrower becomes a shadow director. However, if the loan is repayable on demand, not calling in the loan amounts to a "form of credit". Thus there will be an income tax charge on the benefit in kind of the interest-free loan if a borrower becomes a shadow director (and so becomes an "employee").

What is the position if a loan is made to a shadow director who ceases to be a shadow director? There is no charge on a loan to a former employee. This was deliberate. EN ITEPA provides:

> 76. Where the Schedule E legislation provides that an amount shall be treated as an emolument of an employment only if provided in a year when the employment is held, this Act reproduces that limitation. The sections in the benefits code make it clear that such amounts or benefits will only be treated as earnings if they are paid/provided in a year in which the employment is held. If they are paid/provided at any other time they will not be treated as earnings and will be outside the "general earnings" to which section 17 [ITEPA] applies.

45.6.6 *Employee coming to work in the UK*

The EI Manual provides:

> **26105. Loans in foreign currencies: Taxation of overseas loans** [December 2006]
> ...
> *Taxation of overseas loans in foreign currencies*
> An employment-related loan (see EIM26102) made to an employee who comes to work in the UK is within the scope of the beneficial loans rules

if:

- the loan is made at a time when the employee's earnings are already chargeable to UK income tax as employment income (for example, if a loan is made after the employee has taken up employment in the UK and is resident and ordinarily resident in the UK for the year in which the loan is made); or
- the loan is made in contemplation of the employee working or living in the UK (for example, if the loan is made as part of a package with a view to the employee working in the UK); or
- the employee, at a time when the employee's earnings are chargeable to UK income tax as employment income, in any way facilitates the continuation of a loan which was already in existence before the employee came to work in the UK.

As far as the final bullet is concerned, this is relevant where, for example, the loan is made not by the employer but by a third party such as a bank which is not connected with the employer and where the capital repayments and interest are deducted from the employee's salary. In these circumstances, the question is whether the loan continues when the employee is in the UK without any further involvement by the employer, or whether the employer does something which makes it easier for the employee to continue to have the loan.

An employer would not be facilitating the continuation of a loan merely because

- the loan is conditional on the employee continuing in the employment, or
- the employer deducts the interest and repayments of capital from the employee's salary.

If the employer pays a subsidy to the lender – for example, by paying annual interest on behalf of the employee – that would not necessarily mean that the employer was facilitating the continuation of the loan. The subsidy itself might however be taxable as an employment-related benefit under Section 201 ITEPA.

On the other hand the employer would be facilitating the continuation of the loan if

- the loan was conditional on the employer continuing to make regular payments to subsidise the interest which the employer might cease to make at any time, or
- the employer chose month by month or year by year whether to subsidise the loan.

45.7 Foreign currency loan

There is (somewhat miserly) provision for foreign currency loans. Section

181 ITEPA provides:

> (1) "The official rate of interest" for the purposes of this Chapter means the rate applicable under section 178 of FA 1989 (general power of Treasury to specify rates of interest).
> (2) Regulations under that section may make different provision in relation to a loan if—
> (a) it was made in the currency of a country or territory outside the United Kingdom, and
> (b) the employee normally lives in that country or territory, and has actually lived there at some time in the period of 6 years ending with the tax year in question.

The EIM provides:

> **26106. Official rates for certain foreign currencies** [December 2006]

Currency	Period from	Period to	Official Rate
Japanese Yen	6 June 1994		3.9%
Swiss franc	6 June 1994	5 July 1994	5.7%
	6 July 1994		5.5%

> There has been no change in either rate since 1994.
> [The Manual summarises s.181 and continues:] The intention of these rules is to give relief for employees working temporarily in the UK, where interest rates in the overseas country are lower than interest rates in the UK. The relief does not apply to employees who come to the UK and live here permanently.
> The expressions "normally lives" and "lived" have their natural commonsense meaning. An employee who came to work in the UK for four years and who returned home after the four years can be said to "normally live" in the home country. It is not necessary to maintain a residence in the overseas country during the period of employment in the UK. The terms "lives" and "has lived" connote a degree of continuance if not permanence. A holiday in the home country for an employee working in the UK would not in itself be sufficient to establish that the employee had "lived" in the overseas country within the meaning of these rules. "Living" implies more than returning for a short holiday.

45.8 Transactions in securities

The "lengthy and complicated"[14] provisions relating to transactions in securities (**"the TiS rules"**) require a book to themselves. This section

14 *IRC v Laird Group* [2003] STC 1349 at [13].

considers only whether the rules might apply to an interest-free loan. Section 684 ITA provides:

> (1) This section applies to a person where—
>
> (a) the person is a party to a transaction in securities or two or more transactions in securities (see subsection (2)),
>
> (b) the circumstances are covered by section 685 and not excluded by section 686,
>
> (c) the main purpose, or one of the main purposes, of the person in being a party to the transaction in securities, or any of the transactions in securities, is to obtain an income tax advantage, and
>
> (d) the person obtains an income tax advantage in consequence of the transaction or the combined effect of the transactions.

The loan is a transaction in securities[15] if it is a "security".[16] It has been suggested that every loan is a security (as defined).[17] In that case the lender is party to a transaction in securities.

45.9 The TiS motive defence

Section 684(1)(c) ITA requires:

> the main purpose, or one of the main purposes, of the person in being a party to the transaction in securities, or any of the transactions in securities, is to obtain an income tax advantage.

---

15 Defined s.684(2) ITA: "In this Chapter "transaction in securities" means a transaction, of whatever description, relating to securities, and includes in particular—
(a) the purchase, sale or exchange of securities,
(b) issuing or securing the issue of new securities,
(c) applying or subscribing for new securities, and
(d) altering or securing the alteration of the rights attached to securities."

16 Defined s.713 ITA: "'securities'–
(a) includes shares and stock, and
(b) in relation to a company not limited by shares (whether or not it has a share capital) also includes a reference to the interest of a member of the company as such, whatever the form of that interest."
Section 685(9) ITA provides: "In this section—
"security" includes securities not creating or evidencing a charge on assets;
"share" includes stock and any other interest of a member in a company."

17 Williams v IRC 54 TC 257/

45.9.1 *"Income tax advantage"*

"Income tax advantage" is defined in s.687 ITA:

> (1) For the purposes of this Chapter the person obtains an income tax advantage if—
>
> (a) the amount of any income tax which would be payable by the person in respect of the relevant consideration if it constituted a qualifying distribution exceeds the amount of any capital gains tax payable in respect of it, or
>
> (b) income tax would be payable by the person in respect of the relevant consideration if it constituted a qualifying distribution and no capital gains tax is payable in respect of it.
>
> (2) So much of the relevant consideration as exceeds the maximum amount that could in any circumstances have been paid to the person by way of a qualifying distribution at the time when the relevant consideration is received is to be left out of account for the purposes of subsection (1)....
>
> (4) In this section "relevant consideration" has the same meaning as in section 685.

In what follows the expression is referred to as Income Tax Advantage (initial capitals) to remind readers that it is used in a defined and artificial sense.

The amount of income tax advantage is defined in s.687(3) ITA:

> The amount of the income tax advantage is the amount of the excess or (if no capital gains tax is payable) the amount of the income tax which would be payable.

HMRC say:

> The proposed legislation, through the definition of tax advantage would make it clear that the TiS legislation does not apply to TiS where an advantage in relation to tax on chargeable gains is obtained. This would be more relevant for corporation tax where the position is not clear from the existing legislation.

This is differently worded from the CT motive defence. HMRC describe the IT expression as "narrower" than the CT expression. But a UK shareholder who borrows interest-free loan will obtain an income tax advantage.

45.10 The IT circumstances

Section 685(1) ITA provides:

> The circumstances covered by this section are circumstances where condition A or condition B is met.

We refer to **"TiS circumstances A and B"**.

45.10.1 *TiS circumstance A*

Section 685(2) ITA provides:

> Condition A is that, as a result of the transaction in securities or any one or more of the transactions in securities, the person receives relevant consideration in connection with—
>
> (a) the distribution, transfer or realisation of assets of a close company,
>
> (b) the application of assets of a close company in discharge of liabilities, or
>
> (c) the direct or indirect transfer of assets of one close company to another close company,
>
> and does not pay or bear income tax on the consideration (apart from this Chapter).

45.10.2 *IT circumstance B*

Section 685(3) ITA provides:

> Condition B is that—
>
> (a) the person receives relevant consideration in connection with the transaction in securities or any one or more of the transactions in securities,
>
> (b) two or more close companies are concerned in the transaction or transactions in securities concerned, and
>
> (c) the person does not pay or bear income tax on the consideration (apart from this Chapter).

45.10.3 *"Relevant consideration"*

Section 685 ITA provides two definitions:

> (4) In a case within subsection (2)(a) or (b) "relevant consideration" means consideration which—
>
> (a) is or represents the value of—
>
> (i) assets which are available for distribution by way of dividend by the company, or

(ii) assets which would have been so available apart from anything done by the company,

(b) is received in respect of future receipts of the company, or

(c) is or represents the value of trading stock of the company.

(5) In a case within subsection (2)(c) or (3) "relevant consideration" means consideration which consists of any share capital or any security issued by a close company and which is or represents the value of assets which—

(a) are available for distribution by way of dividend by the company,

(b) would have been so available apart from anything done by the company, or

(c) are trading stock of the company.

"Consideration" has an artificial definition. Section 685(8) ITA provides:

> References in this section to the receipt of consideration include references to the receipt of any money or money's worth.

Section 685(6) ITA restricts the concept of assets:

> The references in subsection (2)(a) and (b) to assets do not include assets which are shown to represent a return of sums paid by subscribers on the issue of securities, despite the fact that under the law of the country in which the company is incorporated assets of that description are available for distribution by way of dividend.

Section 685(7) ITA restricts the concept of share capital:

> So far as subsection (2)(c) or (3) relates to share capital other than redeemable share capital, it applies only so far as the share capital is repaid (on a winding up or otherwise); and for this purpose any distribution made in respect of any shares on a winding up or dissolution of the company is to be treated as a repayment of share capital.

The excluded circumstances (fundamental change of ownership) is not relevant here.

45.10.4 *"Close company"*

Section 713 ITA provides:

> In this Chapter—
> "close company" includes a company that would be a close company if it were resident in the United Kingdom,
> "company" includes any body corporate

45.11 Discussion

45.11.1 *Loan to individual 100% shareholder*

Suppose a company is wholly owned by a UK resident individual ("B"), and the company lends interest-free to B.

B obtains an income tax advantage.

Are the TIS circumstances satisfied? B receives relevant consideration. There is a transfer of assets (the loan). However, does B receive the sum "in connection" with a transfer of assets? If the company already had the cash, then the only "transfer of assets" is the loan itself. Is the loan connected with itself? The answer must be, no. If the company had to sell assets in order to raise cash to make the loan, that sale would be a "transfer of assets" and circumstance A would be satisfied.

45.11.2 *Loan to discretionary trust*

Suppose the company is held by a non-resident discretionary trust, and lends interest-free to the trustees. The trustees do not obtain an income tax advantage. The trustees would not have been taxable on a dividend.

Suppose the trust is settlor-interested. If the settlor ("S") is UK resident and domiciled S obtains an income tax advantage. (What if S was a remittance basis taxpayer? There is no IT advantage unless the proceeds are received in the UK.)

However, S does not receive distributable consideration so the TiS circumstances are not satisfied even if S does obtain an income tax advantage.[18]

18 *Hague v IRC* 44 TC 619.

CHAPTER FORTY SIX

RATES OF TAX

46.1 IT rates: Introduction

A full discussion of rates of income tax would need a long chapter. I concentrate on two common types of income: interest and dividends.

It may be helpful first of all to list the seven possible rates of income tax on individuals for which ITA provides terminology:

Name	Rate	Effective Rate[1]	Applicable to
Non-dividends			
Starting rate for savings	10%		Savings income up to starting rate limit
Basic rate	20%		Other income up to basic rate limit
Higher rate	40%		Income above basic rate limit
Additional Rate	45%		Income above higher rate limit
Dividend income			
Dividend ordinary rate	10%	0%	Dividends up to basic rate limit
Dividend upper rate	32.5%	25%	Dividends above basic rate limit
Dividend additional rate	37.5%	30.56%	Dividends above higher rate limit

The statutory terminology is somewhat inapt. The (so called) "higher rate" is actually an intermediate rate between the basic rate and the top rate (unhelpfully named the "additional rate"). Similarly the dividend upper rate is an intermediate rate between the dividend ordinary rate (which is not "ordinary") and the top dividend rate (unhelpfully named the dividend additional rate). I reluctantly adopt the statutory terminology since anything else is even more confusing.

See sections 6-8 ITA.

---

1 The effective rates on dividends are different from the formal rates because one must allow for the tax credit and grossing up. See 20.2 (Income from UK resident company); 20.3 (Income from non-resident company).

46.1.1 *Cross references*

For rates of tax on trustees, see 25.2 (Tier 1: charge on trustees on receipt of income).

Rates of tax on PRs are not considered here.

46.2 Basic/higher/additional rates

Section 10 ITA introduces the basic/higher/additional rates:

> (2) Income tax on an individual's income up to the basic rate limit is charged at the basic rate (except to the extent that, in accordance with section 12, it is charged at the starting rate for savings).
> (3) Income tax is charged at the higher rate on an individual's income above the basic rate limit and up to the higher rate limit.
> (3A) Income tax is charged at the additional rate on an individual's income above the higher rate limit.

These rates apply unless disapplied by any other provisions. Section 10(4) ITA provides:

> This section is subject to—
> [a] section 13 (income charged at the dividend ordinary and dividend upper rates: individuals), and
> [b] any other provisions of the Income Tax Acts which provide for income of an individual to be charged at different rates of income tax in some circumstances.

The important provisions for our purposes are ss.12 and 13 ITA.

46.3 Starting rate for savings income

Section 12(1) ITA provides:

> Income tax is charged at the starting rate for savings (rather than the basic rate) on so much of an individual's income up to the starting rate limit for savings as is savings income.

This replaces the basic rate with a different (more favourable) rate, the starting rate for savings.

46.3.1 *"Savings income"*

Savings income is defined in s.18 ITA:

> (1) This section applies for the purposes of the Income Tax Acts.
> (2) "Savings income" is income—

(a) which is within subsection (3) or (4), and
(b) which is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).

There are five categories of savings income within s.18(3) and (4):

(3) Income is within this subsection if it is—
(a) income chargeable under Chapter 2 of Part 4 of ITTOIA 2005 (interest),
(b) income chargeable under Chapter 7 of Part 4 of ITTOIA 2005 (purchased life annuity payments), other than income from annuities specified in section 718(2) of that Act (annuities purchased from certain life assurance premium payments or under wills etc),
(c) income chargeable under Chapter 8 of Part 4 of ITTOIA 2005 (profits from deeply discounted securities), or
(d) income chargeable under Chapter 2 of Part 12 of this Act (accrued income profits).
(4) Income is within this subsection if—
(a) it is chargeable under Chapter 9 of Part 4 of ITTOIA 2005 (gains from contracts for life insurance etc), and
(b) an individual is, or personal representatives are, liable for income tax on it (under section 465 or 466 of that Act).

"Savings income" does not properly describe these disparate categories of income, but it serves as a short label and there is no better term.

In short, the rates of tax on:
(1) UK interest; and
(2) foreign interest when the arising basis applies
are the starting/basic/higher/additional rates, 10%/20%/40%/45%.

46.3.2 *Rates of tax on interest under remittance basis*

If the remittance basis applies, foreign interest income[2] (if remitted) is taxed at the **basic**/higher/additional rates, **20%**/40%/45%. This is achieved by the clumsy but effective technique of providing that such income is not "savings income". How much is at stake? At most the difference between the starting rate and the basic rate, for income up to the starting rate limit.

2 Including the interest-like income of the other categories specified in s.18(4) ITA.

In 2014/15, this is 10% of £2,880 = £288.[3]

Before the 2008 reforms I said:

> There is a (perhaps good) reason for dealing with foreign interest income in this way. A UK resident foreign domiciled individual will often have different types of foreign income. If he remitted only some of his income, it would be necessary, in the absence of this rule, to investigate whether the remitted income represents interest (taxable at 10%) or some other source of income (taxable at 20%). Because of this rule it is not necessary to ask this question.

Now that the ITA mixed fund rule requires precisely that investigation, this has ceased to be a valid reason. But the amount of tax involved is trivial.

46.4 Rates of tax on dividend income

46.4.1 *"Dividend income"*

Dividend income is defined in s.19 ITA:

> (1) This section applies for the purposes of the Income Tax Acts.
> (2) "Dividend income" is income which is—
> (a) chargeable under Chapter 3 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies),
> (b) chargeable under Chapter 4 of that Part (dividends from non-UK resident companies),
> (c) chargeable under Chapter 5 of that Part (stock dividends from UK resident companies),
> (d) chargeable under Chapter 6 of that Part (release of loan to participator in close company), or
> (e) a relevant foreign distribution chargeable under Chapter 8 of Part 5 of ITTOIA 2005 (income not otherwise charged).
> (3) In subsection (2) "relevant foreign distribution" means a distribution of a non-UK resident company which—
> (a) is not chargeable under Chapter 4 of Part 4 of ITTOIA 2005, but
> (b) would be chargeable under Chapter 3 of that Part if the company were UK resident.

"Dividend income" does not properly describe these categories of income, but it serves as a short label. "Dividend-type income" would be slightly

---

3 HMRC and HM Treasury, *Overview of Tax Legislation and Rates* (19 March 2014), https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/294190/OOTLAR_19_March_2014__1_.pdf

more accurate but it seems best to adopt the statutory terminology.

46.4.2 *Rates of tax on dividend income of individuals*

Section 13 ITA provides:

> (1) Income tax is charged at the dividend ordinary rate on an individual's income which—
>
> (a) is dividend income,
>
> (b) would otherwise be charged at the basic rate, and
>
> (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).
>
> (2) Income tax is charged at the dividend upper rate on an individual's income which—
>
> (a) is dividend income,
>
> (b) would otherwise be charged at the higher rate, and
>
> (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005.
>
> (2A) Income tax is charged at the dividend additional rate on an individual's income which—
>
> (a) is dividend income,
>
> (b) would otherwise be charged at the additional rate, and
>
> (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005.

The scheme of s.13 is to replace the basic/higher/additional rates with different rates. Thus the rates of tax on UK dividend income are the dividend ordinary/upper/additional rates, 10%/32.5/37.5%. After allowing the tax credit and grossing up, the effective rates on net dividends are 0%/25%/36.11%. I refer to that as **"the dividend rates"**.

Foreign dividend income is taxed at the dividend rates when the arising basis applies, and with benefit of a tax credit and grossing up if the relevant conditions are met.[4]

46.4.3 *Rates of tax on foreign dividend income under remittance basis*

Foreign dividend income taxed on the remittance basis does not fall within s.13 as it does not meet the condition in s.13(1)(c) or s.13(2)(c) or s.13(2A)(c). The (higher) non-dividend tax rates apply. This is consistent with the treatment of foreign interest income. However unlike foreign

---

4 See 20.3.4 (Tax credit and grossing up).

interest income, the amounts involved may be substantial. The result is that for a remittance basis taxpayer who remits, foreign dividend income is taxed more heavily than UK dividend income.

The discrimination is contrary to EU law: it is a breach of free movement of capital, so there is a breach whether the dividends arise in a members state or a third country. The discrimination is unlawful even though a taxpayer could avoid it by (1) not electing for the remittance basis or (2) not remitting the dividend income.[5]

46.4.4 *Dividend income of non-individuals*

Section 14 ITA provides:

> (1) Income tax is charged at the dividend ordinary rate on the income of persons other than individuals which—
>
> (a) is dividend income,
>
> (b) would otherwise be charged at the basic rate, and
>
> (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).

This applies in particular to trustees of an IIP trust and non-resident companies.

46.5 Settlor-interested trust: Rates of tax on settlor

Section 619 ITTOIA provides (so far as relevant):

> (1) Income tax is charged on—
>
> (a) income which is treated as income of a settlor as a result of section 624 (income where settlor retains an interest), ...
>
> (2) For the purposes of Chapter 2 of Part 2 of ITA 2007 (rates at which income tax is charged), where income of another person is treated as income of the settlor and is charged to tax under subsection (1)(a) ... above, it shall be charged in accordance with whichever provisions of the Income Tax Acts would have been applied in charging it if it had arisen directly to the settlor.

What about foreign dividend income which qualifies for the s.624 remittance basis, but is later remitted and becomes taxable under the s.624 remittance basis?[6] This is taxable at the dividend rates.

---

5 See 60.8.14 (Option to be treated as resident).

6 See 27.4 (Section 624 remittance basis).

46.6 Rates of tax on transferor within s.720 ITA

The starting point is that s.720 income is taxed as ordinary income. Section 745(4) ITA applies the dividend rates where the income of the person abroad is dividend income. The wording is convoluted. One needs to first to read section 745(1) ITA:

> Income tax at the basic rate, the starting rate for savings or the dividend ordinary rate is not charged under section 720 or 727 in respect of any income if (and to the corresponding extent that) the income mentioned in section 721(2) or 728(1)(a) [the income of the person abroad] has borne tax at that rate by deduction or otherwise.

This is the transferor's credit.[7] With this in mind we can continue to s.745(3)(4):

> (3) Subsection (4) applies to income treated as arising to an individual under section 721 or 728 so far as subsection (1) does not apply to it.
> (4) The charge to income tax under section 720 or 727 operates by treating the income as if it were income within section 19(2) (meaning of "dividend income") if the income mentioned in section 721(2) or 728(1)(a) would be dividend income were it the income of the individual.

So there are two rules: one rule where the income of the person abroad is dividend income; and another rule where it is other income.

Dividend income is taxed at the rates applicable to dividends: the dividend ordinary/dividend upper rates, with the benefit of the tax credit. What about foreign dividends of the person abroad, taxed under the s.720 remittance basis? That is still dividend income, so is still taxed at the dividend rates.

Section 745 ITA provides a special rule for dividend income. It says nothing about interest. Accordingly, interest within s.720 is taxed at the basic/higher/additional rates of 20%/40%/45%.

46.7 Rates of CGT

Section 4 TCGA provides:

> (1) This section makes provision about the rates at which capital gains tax is charged, but is subject to section 169N (rate in case of claim for entrepreneurs' relief).
> (2) Subject to the following provisions of this section, the rate of capital

7 See 31.2.1 (Transferor's credit).

gains tax in respect of gains accruing to a person in a tax year is 18%.
(3) The rate of capital gains tax in respect of gains accruing to—
(a) the trustees of a settlement, or
(b) the personal representatives of a deceased person,
in a tax year is 28%.
(3A) [This deals with ATED-CTGT: see 75.30 (Rate of ATED-CGT).
(4) If income tax is chargeable at the higher rate or the dividend upper rate in respect of any part of the income of an individual for a tax year, the rate of capital gains tax in respect of gains accruing to the individual in the year is 28%.
(5) If no income tax is chargeable at the higher rate or the dividend upper rate in respect of the income of an individual for a tax year, but the amount on which the individual is chargeable to capital gains tax exceeds the unused part of the individual's basic rate band, the rate of capital gains tax on the excess is 28%.
(6) [This relates to entrepreneurs' relief not discussed here]
(7) The reference in subsection (5) to the unused part of an individual's basic rate band is a reference to the amount by which the basic rate limit exceeds the individual's Step 3 income.
(8) For the purposes of this section, "the Step 3 income" of an individual means the individual's net income less allowances deducted at Step 3 of the calculation in section 23 of ITA 2007 for the purpose of calculating the individual's income tax liability.
(9) Section 989 of ITA 2007 (the definitions) applies for the purposes of this section as it applies for income tax purposes.

For CGT rates on gains remitted by a remittance basis taxpayer, see 49.2 (CGT remittance basis).

46.8 Scottish rates of income tax (from 2016)

46.8.1 *Personal rates*

HMRC say:

1. The Scottish rate of income tax, as introduced by the Scotland Act 2012, will be charged on the non-savings income of those defined as Scottish taxpayers. The rate paid by Scottish taxpayers will be calculated by reducing the basic, higher and additional rates of income tax levied by the UK Government by 10 pence in the pound and adding a new Scottish rate set by the Scottish Parliament.
2. For instance, if the UK basic, higher and additional rates of income tax were 20 per cent, 40 per cent and 45 per cent respectively and the Scottish rate of income tax were 11 per cent, then the rates applied to

those defined as Scottish taxpayers for basic, higher and additional rates of income tax would be 21 per cent, 41 per cent and 46 per cent respectively. If the Scottish rate of income tax were 9 per cent, then the rates applied to those defined as Scottish taxpayers would be 19 per cent, 39 per cent and 44 per cent. A Scottish rate of 10 per cent would mean no change from the UK rates.

3. Although the Scottish Parliament sets only one rate (the Scottish rate), this effectively gives rise to three rates: the Scottish basic rate; the Scottish higher rate; and the Scottish additional rate. Together these three rates will be referred to as the Scottish main rates.

4. As the Scottish rate of income tax is not a discrete tax it remains covered by existing UK double taxation agreements.

5. The Scottish rate of income tax replaces the Scottish Variable Rate (SVR), which was introduced by the Scotland Act 1998.

6. The non-savings income of a Scottish taxpayer (as defined by Part 3 of the Scotland Act 2012) will generally be liable to the Scottish rate of income tax.

7. Savings income and dividend income (as defined in sections 18 and 19 respectively of the Income Tax Act 2007 (ITA) and to which sections 12 and 13 of ITA apply) arising to Scottish taxpayers will still be taxed at the appropriate UK rate.[8]

8 HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (May 2012).

CHAPTER FORTY SEVEN

PERSONAL ALLOWANCES

47.1 Personal allowances: Introduction

This chapter considers the IT personal allowances and the CGT annual exemption.[1]

The complex rules reflect a good deal of history and special lobbying. A full discussion, would need a short book. I focus on the aspects closest to the themes of this book.

47.2 CGT annual exemption

Section 3(1) TCGA provides the CGT annual exemption:

> An individual shall not be chargeable to capital gains tax in respect of so much of his taxable amount for any year of assessment as does not exceed the exempt amount for the year.

This strictly applies to resident and non-resident individuals, but non-residents do not usually pay CGT, so they are not affected.

47.3 IT personal allowances

Section 35(1) ITA provides:

> An individual who makes a claim is entitled to a personal allowance of 10,000 for a tax year if the individual—
>
> (a) was born after 5 April 1948, and
>
> (b) meets the requirements of section 56 (residence etc).

Before dealing with the requirements for IT personal allowances, it is convenient to discuss the two categories for whom the allowances are

---

1 A note on terminology: the ITA refers to personal allowances, and the TCGA refers to an annual exemption; but to avoid confusion, I refer to "IT personal allowances" "and the CGT annual exemption".

withdrawn: high earners and remittance basis claimants.

47.4 Withdrawal of IT personal allowances for high earners

Section 35(2) ITA provides:

> For an individual whose adjusted net income exceeds £100,000, the allowance under subsection (1) is reduced by one-half of the excess.

"Adjusted net income" is defined in s.58 ITA, not discussed here.

This rule was a parting shot from the Blair/Brown administration. It has incurred some high level criticism from the IFS[2] but no-one seems to have taken any notice.

47.5 Withdrawal of IT personal allowances & CGT annual exemption for remittance basis claimants

Section 809G ITA disapplies IT personal allowances for remittance basis claimants:

> (1) This section applies if s.809B (claim for remittance basis to apply) applies to an individual for a tax year.
> (2) For that year, the individual is not entitled to-
> (a) any allowance under Chapter 2 of Part 3 (personal allowance and blind person's allowance),
> (b) any tax reduction under Chapter 3 of that Part (tax reductions for married couples and civil partners), or
> (c) any relief under s.457 or 458 (payments for life insurance etc).

This does not apply to remittance basis taxpayers in the de minimis categories (sub-£2k taxpayers and non-taxpayers): they retain their allowances.

The editor of *Taxation* comments acerbically on s.809G(2)(c):

> So what are these valuable reliefs which it would be unfair to allow those claiming the remittance basis to enjoy? They are relief from tax on half of the premiums paid to trade unions and police organisations for superannuation, life insurance or funeral benefits, or to the employer so that benefits can be paid after the employee's death to their dependants, but limited to £100 a year of relief in each case.
> What on earth is the point of removing a relief like that for the non-domiciles? It is pointless complexity for the sake of a few tenners in tax

2 IFS *Tax By Design* (2011) para 4.3.1. (A Straightforward Income Tax Schedule).

> which will have no impact whatsoever on the non-domiciles concerned. Unless there is some issue related to European law, or human rights (which seem to be the normal culprits in these situations) I really cannot see why the parliamentary draftsman should have been troubled with the need to include them. And, frankly, if there is some such problem, then given the minuscule levels of relief they offer even to those not on the remittance basis, wouldn't it be simpler to just abolish the sections altogether? That would at least be simplification.[3]

Likewise s.3(1A)TCGA[4] disapplies the CGT annual exemption:

> Subsection (1) does not apply to an individual for a tax year if s.809B of ITA 2007 (claim for remittance basis to apply) applies to the individual for that year.

A DTA will occasionally restore the personal allowances and the CGT annual exemption, which are in general disapplied for remittance basis claimants.[5]

Individuals with income substantially above £100k are not concerned with the loss of IT personal allowances since these are withdrawn anyway; though they do suffer the loss of the CGT annual exemption.

The IT personal allowance and the CGT annual exemption are only lost in the year that a remittance basis claim is made. So an individual who has unremitted gains from earlier years, but who does not make a remittance basis claim in later years, may remit the exempt amount each year and set it against the CGT annual exemption.[6]

47.5.1 *Reporting small gains*

There is a relief for reporting small gains (which would in principle fall within the CGT annual exemption). Where the CGT annual exemption is disapplied, this relief is also disapplied. Section 3A TCGA provides:

> (1) Where in the case of an individual—
>
> (a) the amount of chargeable gains accruing to him in any year of assessment or, if that year is a split year as respects the individual, the UK part of that year does not exceed the

---

3 Mike Truman, *Taxation* 21 Feb 2008 p.161.

4 Flagged (somewhat unnecessarily) in s.809G(3) ITA.

5 See 47.7.2 (Personal allowances under DTAs: remittance basis claimants).

6 Note that a loss election may also disapply the CGT annual exemption: see 54.11(Position if loss election is made).

exempt amount for that year, and

(b) the aggregate amount or value of the consideration for all chargeable disposals of assets made by him in that year or, as the case may be, that part of the year does not exceed four times the exempt amount for that year,

a statement to that effect is sufficient compliance with so much of any notice under section 8 of the Management Act as requires information for the purposes of establishing the amount in which he is chargeable to capital gains tax for that year. ...

(5A) Subsection (1) does not apply to an individual for a tax year if—

(a) section 809B of ITA 2007 (claim for remittance basis to apply), or

(b) section 16ZB below (certain chargeable gains charged on remittance basis),

applies to the individual for that year.

47.6 Persons entitled to IT personal allowances

There are ten categories of individuals who qualify for personal allowances under chapters 2 and 3 part 3 ITA. In short:

(1) UK residents

(2) Non-residents:

(a) Seven categories listed in s.56(3) ITA

(b) Those entitled under DTAs

(c) Visiting forces[7]

47.6.1 *Entitlement to personal allowances: UK residents*

Section 56(2) ITA 2007 sets out the first category of individuals who qualify for personal allowances, which is UK residents:

The individual meets the requirements of this section if the individual—

(a) is UK resident for the tax year, or

(b) meets the condition in subsection (3).

47.6.2 *Entitlement under s.56(3)*

Section 56(3) ITA 2007 sets out the next seven categories which apply to non-residents. The practical significance of this is limited, since often a claim for a personal allowance is effectively cancelled by non-resident

7 See App.5.2.4 (Personal allowances).

individual's IT relief.[8]

The most significant category is EEA nationals. These are presumably included because a relief for UK residents but not for EEA nationals would be incompatible with EU freedom of establishment.[9]

The remaining categories are a strange ragbag:

> An individual meets the condition in this subsection if, at any time in the tax year, the individual—
>
> (za) is a national of an EEA state,
>
> (a) is resident in the Isle of Man or the Channel Islands,[10]
>
> (b) has previously resided in the UK and is resident abroad for the sake of the health of—
>
> (i) the individual, or
>
> (ii) a member of the individual's family who is resident with the individual,
>
> (c) is a person who is or has been employed in the service of the Crown,
>
> (d) is employed in the service of any territory under Her Majesty's protection,
>
> (e) is employed in the service of a missionary society, or
>
> (f) is a person whose late spouse or late civil partner was employed in the service of the Crown.

47.6.3 *Commentary*

There is scope here for simplification: there is a very strong case for repeal of s.56(3)(a)-(f), ie the entire list apart from EEA nationals.

47.6.4 *Commonwealth citizens*

Before 2010/11 there was an additional category, namely, Commonwealth citizens. The tax law rewrite considered that this was contrary to the Human Rights Act.[11] Accordingly this category was deleted by the FA 2009. EN FA 2009 provides:

> 14. Previously, there was an entitlement for some individuals to claim purely by virtue of being a Commonwealth citizen but by meeting no other condition. Commonwealth citizens will no longer qualify for

---

8 See 42.4 (Amount B (disregarded income and reliefs)).

9 See 60.4 (Freedom of establishment).

10 This category has been included since 1910: I would be grateful for any reader who could suggest the reason.

11 EN ITA para 135.

> personal allowances, married couple's allowance, blind person's allowance and relief for life assurance premiums by reference to their Commonwealth citizenship status alone. They may, of course, continue to qualify under the other conditions or through DTA provisions if appropriate.
> 15. This change will mainly affect citizens of the following countries: Bahamas; Cameroon; Cook Islands; Dominica; Maldives; Mozambique; Nauru; Niue; St Lucia; St Vincent & the Grenadines; Samoa; Tanzania; Tonga; and Vanuatu.

The objection was that granting personal allowances to an individual solely on the basis that they are a Commonwealth citizen would be discriminatory on the grounds of nationality.[12] The rewrite did not consider that there was the unlawful discrimination in providing allowances to EEA nationals, as the distinction between EEA nationals and the rest of the world is justified by the distinct legal relationship which the UK has with the EEA.[13]

This rule was just about the last remaining example of special treatment for Commonwealth citizens in UK tax legislation, so the issue does not have immediate tax implications in other areas but it does illustrate two interesting points: a significant restriction on the UK's ability to impose tax; and the (in)significance of the Commonwealth (at least in a Human Rights context); the tax law rewrite rejected the argument that the legal relationship which the UK has with the Commonwealth would justify the discrimination.

47.7 Personal allowances under DTAs

The last category of individuals entitled to personal allowances relates to DTAs.

47.7.1 *Non-residents*

The OECD model convention does not affect the rule that personal allowances are limited to UK residents (and other specific categories).[14]

---

12 Art.14 ECHR (Prohibition of discrimination) in conjunction with Art.1 of 1st Protocol (Right to property).

13 Private correspondence.

14 OECD model convention art. 24(3) provides:
"This provision [non-discrimination] shall not be construed as obliging a Contracting State to grant to residents of the other Contracting State any personal allowances, reliefs and reductions for taxation purposes on account of civil status or family

However most UK treaties are different. A Treasury consultation paper explains the position:

> Most tax treaties between the UK and other states extend entitlement to UK Personal Allowances to nationals of those states who are not entitled to claim a UK Personal Allowance under UK domestic statute. This is because of the interaction between the UK domestic statute and the UK's obligations under the non-discrimination articles in those tax treaties.
>
> Current UK statute provides that UK nationals are entitled to UK Personal Allowances wherever they are resident. The non-discrimination provisions found in most UK tax treaties extend the entitlement to UK Personal Allowances to nationals of the treaty partner state who are also resident there. Some of the UK's tax treaties also expressly provide that UK Personal Allowances will be granted to residents of the partner state regardless of nationality, or nationals of the partner state wherever they are resident....
>
> The UK's tax treaties do not all entitle overseas residents to a UK Personal Allowance. Some, such as that with the United States, do not contain a non-discrimination article of this sort or specifically exclude entitlement to Personal Allowances from the non-discrimination article. Also, whilst the UK's network of tax treaties is one of the most extensive in the world, it does not have a tax treaty with every country, for example there is currently no UK-Brazil tax treaty.[15]

For instance, art. 25(1) Austria/UK DTA provides:

> Subject to the provisions of paragraph (3) of this Article, individuals who are residents of Austria shall be entitled to the same personal allowances, reliefs and reductions for the purposes of UK tax as British subjects[16] not resident in the UK. ...

Non-resident British subjects qualify for personal allowances as they are nationals of an EEA state (the UK) so individuals who are treaty-resident in Austria will likewise do so.

---

responsibilities which it grants to its own residents."

15 HM Treasury Consultation Paper, "Restricting non-residents' entitlement to the UK personal allowance" (July 2014) *https://www.gov.uk/government/consultations/restricting-non-residents-entitlement-to-the-uk-personal-allowance/restricting-non-residents-entitlement-to-the-uk-personal-allowance*

16 Defined in s.51 British Nationality Act 1981.

Sometimes there is a restriction. Article 25(3) Austria/UK DTA provides:

> Nothing in this Convention shall entitle an individual who is a resident of a Contracting State [Austria] and whose income from the other Contracting State [UK] consists solely of dividends, interest or royalties (or solely of any combination thereof) to the personal allowances, reliefs and reductions of the kind referred to in this Article for the purposes of taxation in that other Contracting State.

One could avoid the restriction by procuring income other than dividends, interest and royalties (maybe annual payments) but the amounts involved are small.

The RDR Manual provides:

> **10340 Non-resident individuals who may claim Personal Allowances under the provisions of Double Taxation Agreements** [March 2013]
> Non-resident individuals who satisfy one of the conditions below are entitled to UK Personal Allowances
> [1] an individual who is a national of Israel or Jamaica or
> [2] [EEA Nationals] or
> [3] an individual who is a national and also a resident of Argentina, Australia, Azerbaijan, Bangladesh, Belarus, Bolivia, Bosnia and Herzegovina*,Botswana, Canada, China, Côte d'Ivoire (Ivory Coast), Croatia*, Egypt, Gambia, India, Indonesia, Japan, Jordan, Kazakhstan, Korea, Lesotho, Malaysia, Montenegro*, Morocco, New Zealand, Nigeria, Oman, Pakistan, Papua New Guinea, Philippines, Russian Federation, Serbia*, South Africa, Sri Lanka, Sudan, Switzerland, Taiwan, Tajikistan, Thailand, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Uganda, Ukraine, Uzbekistan, Venezuela, Vietnam, Federal Republic of Yugoslavia*, Zimbabwe
> (*Note: Entitlement continues under the Double Taxation Treaty the UK had with the former Yugoslavia until such time as a new agreement takes effect.) or
> [4] an individual who is a resident of Austria, Barbados, Belgium, Fiji France, Germany, Greece, Ireland, Kenya, Luxembourg, Mauritius, Myanmar (Burma), Namibia, Netherlands, Portugal, Swaziland, Sweden, Switzerland, Zambia
> (Please note: If individual is a resident, but not a citizen of Austria, Belgium, France,* Germany*, Kenya, Luxembourg, Mauritius, Netherlands*, Portugal, Sweden, Switzerland or Zambia, they are not entitled to personal allowances if their income consists solely of

dividends, interest and royalties or any combination of them).

* France - FROM 6 April 2010 personal allowances are given to a Resident and a National of the country irrespective of their income
* Germany - FROM 6 April 2011 residents of the country are not entitled to personal allowances unless they are an EEA National.
* Netherlands - FROM 6 April 2011 personal allowances are given to a Resident of the country irrespective of their UK income.

The form to claim the relief is R43.

The practical significance of DTAs conferring personal allowances on non-residents is limited, since often a claim for the relief is effectively cancelled by non-resident individual's IT relief.[17] Also of course the personal allowance is only needed for UK source income which remains taxable in the UK under the treaty. The Treasury consultation paper mentioned above explains:

> Tax treaties allocate taxing rights between the state of source and the state of residence to avoid individuals and other persons facing double taxation. Depending on the nature of the income, double taxation is avoided either by conferring upon a state an exclusive right to tax or providing that both states can tax, but that the state of residence must relieve the tax levied in the state of source. Where an exclusive right to tax income is conferred upon one of the states, this is generally on the state of residence. Where the UK retains a taxing right over the income of non-residents under a tax treaty, such as income from UK property or certain employments exercised in the UK, non-residents entitled to a UK personal allowance may currently set it against these forms of income. It is therefore these non-residents who would be impacted by any restriction on non-residents' entitlement to the UK personal allowance.[18]

47.7.2 *Personal allowances under DTAs: Remittance basis claimants*

Remittance basis claimants (who would in principle qualify for personal allowances as they are by definition UK resident) lose their personal allowances (and CGT annual exemption) by making a remittance basis

---

17 See 42.4 (Amount B (disregarded income and reliefs)).

18 HM Treasury Consultation Paper, "Restricting non-residents' entitlement to the UK personal allowance" (July 2014) *https://www.gov.uk/government/consultations/restricting-non-residents-entitlement-to-the-uk-personal-allowance/restricting-non-residents-entitlement-to-the-uk-personal-allowance*

claim.[19] This disallowance is overridden (so the right to personal allowances and CGT annual exemption is restored) by a DTA if applicable.[20] The treaties which confer personal allowances are those set out in the list above, with the exception of Myanmar and Greece.[21]

This treaty relief only affects remittance basis taxpayers who make a remittance basis claim, ie where:

(1) the individual is UK resident (so a remittance basis claim is made); and
(2) the individual is treaty-resident in the jurisdiction concerned (so that DT relief applies).

So this point will not be a common one, though it will arise from time to time.

47.8 The Future

Budget 2014 announced:

> **Personal allowances for non-residents** – To ensure the UK personal allowance remains well targeted, the Government intends to consult on whether and how the allowance could be restricted to UK residents and those living overseas who have strong economic connections in the UK, as is the case in many other countries, including most of the EU.

The issue has become more important because of the increase in personal allowance in recent years.

The consultation paper has now been published. It contains interesting comments on the impact of the personal allowance for non-residents.

> **6.1 Impact on individuals**
> HMRC estimate there to be at least 400,000 individuals claiming Personal Allowances in the UK who are non-resident for tax purposes. Based on the data available, if non-residents were not entitled to the UK Personal Allowance most of them would face increased UK tax

19 See 47.5 (Withdrawal of IT personal allowances & CGT annual exemption for remittance basis claimants).

20 Jane Kennedy (Financial Secretary to the Treasury) accepted this in the public Bill committee debate on the Finance Bill, Hansard 19 June 2008 col 818, accessible *http://www.publications.parliament.uk/pa/cm200708/cmpublic/finance/080619/am/80619s05.htm*.

21 The antique treaties of Myanmar and Greece only grant personal allowances to residents of Myanmar/Greece who are not UK-law UK resident; they do not help UK-law UK residents even if also residents of Myanmar/Greece.

liabilities. However most of these individuals would be able to claim relief overseas either in the form of a credit for tax paid in the UK or exemption from tax in their home state. Therefore most individuals would not generally pay more tax overall than they do now. However this will depend on the relative level of tax rates and allowances between the UK and their country of residence. Those living in low tax jurisdictions are likely to pay more tax overall than they do now if they were not able to claim the UK Personal Allowance than they do now...

6.2 High income individuals

Around 5,000 high earning non-residents already have their Personal Allowance tapered away because their UK income is greater than £100,000...

6.3 Middle income individuals

There are more than 110,000 migrant taxpayers with incomes over the level of the Personal Allowance and a significant proportion of this group are middle income non-residents. This includes, for example, professionals or managers seconded to the UK for a few months to work on specific projects. Individuals in this cohort who are not tax resident in the UK but pay UK tax on their earnings are likely to earn in excess of the Personal Allowance, so they have UK tax to pay on their earnings. Even without any policy change they are likely to claim double taxation relief in their country of residence to offset the UK taxation on their UK earnings. These individuals will not generally face a significant cash loss from the withdrawal of the UK Personal Allowance; however this will depend on the relative level of tax rates and allowances between the UK and their country of residence. Those living in low tax jurisdictions may face a cash loss...

6.4 Low income individuals

Around 250,000 migrants, many of whom are non-residents, receive UK income below the Personal Allowance. Although some will have higher incomes overseas, some of this group will have a very low overall income. This group includes a significant group who may not pay sufficient tax overseas to claim relief for any UK tax payable and might face a cash loss if their entitlement to a UK Personal Allowance is withdrawn.

6.5 Non-resident landlords and others with UK property income

There are around 175,000 non-UK resident taxpayers with rental income. Non-resident landlords will generally be taxed on their UK rental income in their country of residence as well as the UK. Although some may currently not need to claim double taxation relief as their UK income is below the Personal Allowance, many non resident landlords would be able to claim double taxation relief and so should not face an

overall cash loss without a UK Personal Allowance...

6.6 Pensioners

Pensioners who live overseas are a significant group of British national expatriates, estimated by DWP at around 1,200,000 individuals. Most UK national pensioners living overseas would not be affected by any restriction on non-residents entitlement to the Personal Allowance. This is because:

- some are still resident in the UK for tax purposes and so would not be affected by any change
- provisions of tax treaties generally mean that UK state pensions, personal pensions or private sector occupational pensions are only taxable in recipients' states of residence and not in the UK
- many non-resident UK national pensioners do not have any other income (i.e. employment or property) which is taxable in the UK and would not be affected by losing their Personal Allowance

However, under double tax treaties, UK sourced government service pensions (a wide category which includes, amongst others, some NHS staff and those employed by local authorities) are generally only taxed in the UK, regardless of recipients' residence status. This can also be the case with some other forms of income under specific treaties. The withdrawal of the UK personal allowance from non-residents in receipt of a UK government service pension would result in them paying more tax overall as there is no overseas tax liability against which the additional UK tax could be relieved.

The government is concerned that individuals, like those in receipt of government service pensions, who are not eligible for double taxation relief, would be disproportionately affected by the removal of the UK Personal Allowance.

The government does not intend to raise taxes on vulnerable groups or in situations where the UK is the principal taxing authority and an individual has no recourse to relief as a result of the UK having sole taxing rights under a tax treaty. If the government were to restrict non-residents' entitlement to the Personal Allowance, it would intend this to apply to types of income which are taxable both in the UK and overseas (such as that from immovable property) but to retain the Personal Allowance on income that is taxable exclusively in the UK.[22]

CHAPTER FORTY EIGHT

NATIONAL INSURANCE CONTRIBUTIONS

48.1 NICs: Introduction

NICs should be regarded as a collection of seven more or less distinct taxes. Section 1(2) SSCBA classifies them semi-numerically:

> Contributions under this Part of this Act shall be of the following six classes—
>
> (a) Class 1, earnings-related, payable under section 6 below, being—
>
> (i) primary Class 1 contributions from employed earners; and
>
> (ii) secondary Class 1 contributions from employers and other persons paying earnings;
>
> (b) Class 1A, payable under section 10 below by persons liable to pay secondary Class 1 contributions and certain other persons;
>
> (bb) Class 1B, payable under section 10A below by persons who are accountable to the Inland Revenue in respect of income tax on general earnings in accordance with a PAYE settlement agreement;
>
> (c) Class 2, flat-rate, payable weekly under section 11 below by self-employed earners;
>
> (d) Class 3, payable under section 13 or 13A below by earners and others voluntarily with a view to providing entitlement to benefit, or making up entitlement; and
>
> (e) Class 4, payable under section 15 below in respect of the profits or gains of a trade, profession or vocation, or under section 18 below in respect of equivalent earnings.

Each class of NIC requires a book to itself, except for class 1 which requires many volumes. I focus on matters closest to the themes of this book. I do not consider the special rules for mariners, aircrew, diplomats and service personnel.

SSCBA does not apply in Northern Ireland[1] so it refers to "Great Britain". (Northern Ireland has its own equivalent legislation not discussed here.) SSCR applies throughout the UK, so it usually refers to the UK, or to "GB and Northern Ireland".

48.2 Meaning of "employed" and "self-employed"

Section 2(1) SSCBA provides:

> (1) In this Part of this Act and Parts II to V below—
> (a) "employed earner" means a person who is gainfully employed in Great Britain either under a contract of service, or in an office (including elective office)[2] with general earnings; and
> (b) "self-employed earner" means a person who is gainfully employed in Great Britain otherwise than in employed earner's employment (whether or not he is also employed in such employment).

The SSCBA, confusingly, (mis)defines the word "employment" to include trades and professions.[3] But in the definition the terms "employed" and "self-employed" are used in more or less their ordinary meanings. (To add to the confusion, the SSCER deems some persons actually self-employed to be employees for NIC purposes and vice versa.)

In this chapter I use the word "**employee**" to mean an "employed earner" and "**self-employed**" means a "self-employed earner".

48.3 Meaning of "secondary contributor"

Section 6(4) SSCBA provides:

> The primary and secondary Class 1 contributions referred to in subsection (1) above are payable as follows—
> (a) the primary contribution shall be the liability of the earner; and
> (b) the secondary contribution shall be the liability of the secondary contributor; …

---

1 Section 177 SSCBA provides:
"(5) The following provisions extend to Northern Ireland—
section 16 and Schedule 2; section 116(2); and this section.
(6) Except as provided by this section, this Act does not extend to Northern Ireland."

2 The odd expression "elective office" is not defined and the words in brackets are otiose.

3 Section 122(1) SSCBA.

The identity of the secondary contributor is clearly crucial.

Section 7(1) SSCBA provides:

> For the purposes of this Act, the "secondary contributor" in relation to any payment of earnings to or for the benefit of an employed earner, is—
>
> (a) in the case of an earner employed under a contract of service, his employer;
>
> (b) in the case of an earner employed in an office with general earnings, either—
>
> (i) such person as may be prescribed in relation to that office; or
>
> (ii) if no person is prescribed, the government department, public authority or body of persons responsible for paying the general earnings of the office.

SSCER reg. 5(1) prevents avoidance by foreign employers seconding to the UK:

> For the purposes of section 4 of the Act[4] (Class 1 contributions), in relation to any payment of earnings to or for the benefit of an employed earner in any employment described in any paragraph in column (A) of Schedule 3 to these regulations, the person specified in the corresponding paragraph in column (B) of that Schedule shall be treated as the secondary Class 1 contributor in relation to that employed earner.
>
> ...

Column (A)	**Column (B)**
9. Employment by a foreign employer where— (a) in pursuance of that employment the personal service of the person employed is made available to a host employer; and (b) the personal service is rendered for the purposes of the business of that host employer; and (c) that personal service for the host employer begins on or after 6th April 1994.	9. The host employer to whom the personal service of the person employed is made available.

4 Section 4 Social Security Act 1975 is now s.7 SSCBA.

The identity of the employer is a question of contract/employment law.[5]

48.4 Territorial Limitation

Tax Bulletin 79 explains:

> For NIC purposes the world can be usefully divided into:
> **European Economic Area (EEA)**
> EC Treaty and EC Regulation [formerly 1408/71 and now 883/2004] applies to employees moving between EEA Member States to work. It modifies SSCBA 1992 and regulations.
> **RA/DCC Countries**[6]
> Bi-lateral Social Security agreements modify SSCBA 1992 and regulations.
> **Rest of The World** ("ROW")
> SSCBA 1992 and contributions regulations are unmodified.

Bilateral social security agreements are not considered in this book. I first consider what the NI Manual calls "ROW" [rest of the world] rules, and then the EU rules.

48.5 ROW: Employed in GB

Unless the individual is employed *in* GB, they are not an employed or self-employed earner, and so in principle no NIC liability arises.[7] I refer to this as the "**employed in GB rule**".

Tax Bulletin 79 explains:

> This requires that employment duties take place here. However, this is wide enough to allow for some temporary or incidental duties of the

---

5 Tax Bulletin 49 provides:
"We would not seek to claim in isolation that there is a place of business [in the UK] where the overseas provider legally, and in exchange for a payment commensurate with the service, sub-contracts services to a UK business. And similarly we would also not normally attempt to claim in isolation that the unconnected UK business is the employer if it is genuinely not paying the mariners directly." (This has been flagged as no longer current, however the author is not currently aware of this passage being moved elsewhere.)
This is only relevant to mariners as others are caught by the SSCER.

6 These countries are: Barbados, Bermuda, Bosnia-Herzegovina, Canada, Croatia, Guernsey, Israel, Jamaica, Japan, Jersey, Macedonia, Mauritius, Montenegro, New Zealand (Social Security Benefits only), Philippines, Republic of Korea, Serbia, Turkey, USA.

7 See 48.2 (Meaning of "employed" and "self-employed").

employment to be performed outside the UK, if the UK is the place where the employment duties are usually performed.

48.5.1 *First year abroad*

Reg. 146 SSCR provides an extension to the employed in GB rule:

> (1) Where an earner is gainfully employed outside the UK, and that employment, if it had been in Great Britain or Northern Ireland, would have been employed earner's employment, that employment outside the UK shall be treated as employed earner's employment for the period for which under para (2)(a) contributions are payable in respect of the earnings paid to the earner in respect of that employment provided that—
>
> (a) the employer has a place of business in Great Britain or Northern Ireland (as the case may be);
>
> (b) the earner is ordinarily resident in Great Britain or Northern Ireland (as the case may be); and
>
> (c) immediately before the commencement of the employment the earner was resident in Great Britain or Northern Ireland (as the case may be).
>
> (2) Where, under para (1), the employment outside the UK is treated as an employed earner's employment, the following provisions shall apply in respect of the payment of contributions—
>
> (a) primary and secondary Class 1 contributions shall be payable in respect of any payment of earnings for the employment outside the UK during the period of 52 contribution weeks from the beginning of the contribution week in which that employment begins to the same extent as that to which such contributions would have been payable if the employment had been in Great Britain or Northern Ireland (as the case may be);
>
> (b) subject to regulations 148 and 148A, any earner by or in respect of whom contributions are or have been payable under sub-para (a) shall be entitled to pay Class 3 contributions in respect of any year during which the earner is outside the UK from and including that in which the employment outside the UK begins until that in which he next returns to Great Britain or Northern Ireland (as the case may be);
>
> (c) Class 1A contributions and Class 1B contributions shall be payable in respect of the period specified in sub-para (a).

Thus employment outside the UK is treated as employment in the UK (and so subject to NIC) for 52 weeks, provided the following conditions are

satisfied:

(1) The employer has a place of business in the UK.
(2) The employee is ordinarily resident in UK.
(3) The employee was UK resident immediately before the employment commenced.

NI Manual provides:

> **NIM33535 - special cases: international - people going to or coming from abroad: row: change of employment** [Oct 2013]
> **Change of employment overseas with the same employer**
> The 52 week period of continuing liability may cease when an employee changes employment. Whether or not an employee has entered into a new employment will be a question of fact. The contracts of employment will indicate if this were so.
> **Example**
> - Ralph was posted by the UK company to work in Australia for a period of 2 years as a General Manager of the Sydney office
> - After 6 months he applied for promotion as a Overseas Sales Executive with a separate department of the UK company
> - He was successful and immediately took up his new position in Malaysia
>
> The subsequent posting from Australia to Malaysia would be considered to arise in connection with the new employment with the UK Company. The 52 week period would cease.
> Had the UK employer simply posted him to Malaysia in connection with the original occupation/employment as a General Manager then the 52 week period would have continued in full.
> Whether or not this is actually right depends on the documentation relating to the contract of employment.

48.6 ROW: Residence requirements

Section 1(6) SSCBA provides:

> No person shall—
> (a) be liable to pay Class 1, Class 1A, Class 1B or Class 2 contributions unless he fulfils prescribed conditions as to residence or presence in Great Britain;
> (b) be entitled to pay Class 3 contributions unless he fulfils such conditions; or
> (c) be entitled to pay Class 1, Class 1A, Class 1B or Class 2 contributions other than those which he is liable to pay, except so far as he is permitted by regulations to pay them.

Reg. 145 SSCR provides five different sets of residence requirements. These apply in addition to the employed in GB rule.

48.6.1 *Primary Class 1 NIC*

Reg. 145(1)(a) SSCR provides that the requirement is:

> as respects liability of an employed earner to pay primary Class 1 contributions in respect of earnings for an employed earner's employment, that the employed earner is resident or present in Great Britain or Northern Ireland (or but for any temporary absence would be present in Great Britain or Northern Ireland) at the time of that employment or is then ordinarily resident in Great Britain or Northern Ireland (as the case may be).

There are four possible territorial connections, and if any one of them is satisfied Primary Class 1 NIC is in principle payable:

(1) Residence in UK.
(2) Presence in UK.
(3) Temporary absence from UK.
(4) Ordinary residence in UK.

Tax Bulletin 79 explains:

> The effect of Regulation 145 (1) SSCR 2001 is to provide for a kind of constructive presence for periods outside the UK which are merely a "temporary absence". This concept of temporary absence requires that:
>
> i. the person's absence be temporary,
> ii. that if he were not absent he would be present in the UK.
>
> This means that an employee who has employment based in the UK who goes abroad for a time on a short business trip or holiday abroad, and who departs from or returns to the UK, can continue to be within the UK scheme.
>
> An example of this would be the person who flies to a board meeting outside the UK and then returns to their UK based employment.

That seems obvious. The Bulletin continues:

> Taken together, Section 2(1)(a) SSCBA 1992 and Regulation 145 (1)(a) SSCR 2001 is enough to keep a person within Class 1 NIC if their employment is based here and their absence abroad is of a temporary or incidental nature. However, crucially, an employee who is not ordinarily resident in the UK and who normally works overseas cannot be said to be merely "temporarily absent" from employed earners employment in the UK if they are departing overseas for a time, to work for their

foreign employer. In such a situation, the person is not performing duties which is merely incidental to the employed earner's employment in the UK but is returning to an employment based outside the UK. In the absence of an express contractual provision as to the attribution of the earnings, the earnings must be apportioned between the employed earner employment in the UK and the overseas duties for the foreign employer.

48.6.2 *First year in UK exemption*

Reg. 145(2) SSCR provides an exception:

> Where a person is ordinarily neither resident nor employed in the UK and, in pursuance of employment which is mainly employment outside the UK by an employer whose place of business is outside the UK (whether or not he also has a place of business in the UK) that person is employed for a time in Great Britain or Northern Ireland (as the case may be) as an employed earner and, but for the provisions of this paragraph, the provisions of sub-para (a) of para (1) would apply, the conditions prescribed in that sub-paragraph and in sub-para (b) of that paragraph shall apply subject to the proviso that—
>
> (a) no primary or secondary Class 1 contribution shall be payable in respect of the earnings of the employed earner for such employment;
>
> (b) no Class 1A contribution shall be payable in respect of something which is made available to the employed earner or to a member of his family or household by reason of such employment; and
>
> (c) no Class 1B contribution shall be payable in respect of any PAYE settlement agreement in connection with such employment,[8]
>
> after the date of the earner's last entry into Great Britain or Northern Ireland (as the case may be) and before he has been resident in Great Britain or Northern Ireland (as the case may be) for a continuous period of 52 contribution weeks from the beginning of the contribution week following that in which that date falls.

Thus employment in the UK is not subject to NIC for 52 weeks provided

8 I have corrected a disastrous typographical error in the SSCR by inserting a paragraph break here. The last paragraph (beginning "after the date") governs paras (a), (b) and (c). This can be seen to be correct from context and by comparing the predecessor, reg.119(2) SSCR 1979.

the following conditions are satisfied:
(1) employee not ordinarily resident in UK;
(2) employee not ordinarily employed in UK;
(3) employment mainly outside the UK;
(4) employer has a place of business outside the UK.[9]
NI Manual provides:

> **NIM33515 - special cases: international - people going to or coming from abroad: row: exemption** [Oct 2013]
> **Regulation 145(2) SSCR 2001**
> This regulation provides exemption from the payment of primary and secondary Class 1 NICs for posted workers arriving in GB a continuous period of 52 contribution weeks provided the worker is
> - not ordinarily resident in GB ; and
> - not ordinarily employed in GB ; and
> - in pursuance of an employment that is mainly outside the UK ;
> - by an employer with a place of business outside the UK ; and
> - is employed for a time in GB as an employed earner
>
> The exemption lasts until the employee has been resident in GB for a continuous period of 52 weeks starting from the beginning of the contribution week following the week in which the worker arrives in GB to take up employment.
> A further 52 week period may commence where an employee returns to the overseas employment and then commences a new secondment in GB
> The exemption does not apply to:
> - EEA nationals as this would contravene the principle behind Regulation 883/04 see NIM33020
> - RA countries where a person is treated as being ordinarily resident in the UK if they fall within UK domestic legislation see NIM33400
> - To decide whether a person coming to the UK is ordinarily resident in the UK for NIC purposes, apply the tests suggested in NIM33505 and NIM33510.
>
> **NIM33520 - special cases: international - people going to or coming from abroad: row: exemption example** [Oct 2013]
> A doctor works for a hospital in Egypt as a surgeon and sees an advert in a medical journal for surgeon's position in Newcastle for a 2 year period. The position will enable him to obtain further advanced surgical

9 It might be inferred that the relief only applies if the employer's principal place of business is outside the UK, but the better view is that any place of business outside the UK is sufficient, and this is consistent with reg.146(2).

qualifications.

He applies and is successful. The Egyptian employer agrees to keep his employment position open until he returns. The doctor signs a contract of employment with the hospital in Newcastle for two years.

In this case the 52 week exemption tests are satisfied. He is not ordinarily resident or employed in GB. He is employed for a time in GB as an employed earner. A major indicator in this example is the continuing employment in Egypt and the employee being able to return after the period of employment in GB.

In order to satisfy the "in pursuance of employment" test the employment in GB must be related to the particular employment that the employee has outside of GB. The fact that the employee may be pursuing their own goals is not relevant. It is characteristic of much skilled work that the employer's interests in a person's improved skills will coincide with the employee's interest in advancing their career and marketability. Provided that the facts support that the employment in GB and obtaining of advanced qualifications (in this case advanced surgical qualifications) are required for the employment abroad then the test may apply

A different conclusion may have been reached if the employment and qualifications obtained in GB were diverse from the employment in Egypt.

48.6.3 *Student exemption*

Reg. 145(3) SSCR provides an exception for students and apprentices:

> Where a person to whom para (1)(a) would otherwise apply is not ordinarily resident in the UK and is not a person to whom the provisions of para (2) apply, the proviso in para (2) shall nevertheless apply if either—
>
> (a) during a vacation occurring in a course of full-time studies which that person is pursing [*sic*] outside the UK, that person is gainfully employed under a contract of service in Great Britain or Northern Ireland (as the case may be) in temporary employment of a nature similar or related to that course of studies; or
>
> (b) there exists between him and some other person outside the UK a relationship comparable with the relationship between an apprentice and his master in Great Britain or Northern Ireland (as the case may be) and that person is gainfully employed under a contract of service in Great Britain or Northern Ireland (as the case may be) in employment which began before he

attained the age of 25 and which is of a nature similar or related to the employment under the said relationship outside the UK.

48.6.4 *Secondary Class 1, Class 1A and 1B NICs*

Reg. 145(1)(b) SSCR provides that the requirement is:

> as respect[10] liability to pay secondary Class 1 contributions, Class 1A contributions or Class 1B contributions that the person who, but for any conditions as to residence or presence in Great Britain or Northern Ireland (as the case may be and including the having of a place of business in Great Britain or Northern Ireland),[11] would be the secondary contributor or the person liable for the payment of Class 1B contributions (in this Case referred to as "the employer") is resident or present in Great Britain or Northern Ireland when such contributions become payable or then has a place of business in Great Britain or Northern Ireland (as the case may be), so however that nothing in this paragraph shall prevent the employer paying the said contributions if he so wishes.

Thus there are three possible connecting factors and if any of them is satisfied, secondary Class 1 NIC is due:
(1) employer is resident in UK;
(2) employer is present in UK;
(3) employer has a place of business in UK.
The first year in UK and student exemptions may apply.

48.7 Primary and Secondary Class 1 NIC: HMRC examples

Tax Bulletin 79 provides:

> **Example 1 (Angus)**
> **Resident/Not Ordinarily Resident UK - Sent from ROW country to work in the UK - contractual employer in ROW country but seconded to the UK "host" employer.**

10 This is a slip for "*as respects*" … but nothing turns on that.

11 The long phrase beginning "but for" (and continuing to the close of brackets which follows) appears to be otiose. The paragraph means:
"as respects liability to pay secondary Class 1 contributions, Class 1A contributions or Class 1B contributions that the person who is the secondary contributor or the person liable for the payment of Class 1B contributions (in this Case referred to as 'the employer') is resident or present in Great Britain or Northern Ireland when such contributions become payable or then has a place of business in Great Britain or Northern Ireland …"

An Australian employer assigns A, who normally works in Australia to the UK for 2 years. Residence status is resident in the UK but not ordinarily resident in years 1 and 2.

A meets the criteria for a 52 weeks exemption from NIC because he is not ordinarily resident in the UK and he is not ordinarily employed in the UK and is working for his overseas employer and is in the UK in continuance of that employment. His Australian employer has no place of business in the UK.

Once the first 52 weeks period in Regulation 145(2) SSCR 2001 has expired, A will become liable for contributions in the UK. As his contractual employer has no place of business in the UK, the UK "host" employer to whom personal service is made available is the secondary contributor - liable for the employer part of the National Insurance. [Para 9 to Regulation 3, Social Security Categorisation of Earners Regulations 1978].

When he is in the UK, A is in employed earner's employment and meets the residence criteria in Regulation 145 (1) SSCR 2001 because he is present in the UK at the time of his employment.

A makes a short trip back to Australia in year 2 to brief the Australian company.

After 14 months in the UK, A returns to Australia for the month of June - 20 days holiday and 5 days working for the Australian company. He then returns to the UK to complete the rest of his assignment. A remains under contract to the Australian company and the costs of his employment in the UK is met by the Australian employer. There is no apportionment of salary specified in the contract. There can be apportionment of his salary for the days working outside the UK.

When A is in earners employment in the UK he is liable for NICs on his salary because he meets the criteria of residence and presence in Regulation 145 (1) SSCR 2001.

When in Australia, A is not in employed earners employment in the UK - his employment is one which is normally based outside the UK - so that the days working in Australia are not an incidental part of employed earners employment in the UK.

What if the employment had been funded by the UK company?

We would consider this a strong indicator that A was performing his duties in Australia for the purposes of the business of the UK "host" employer and his time in Australia was merely a "temporary absence" from employed earner's employment for the purposes of Regulation 145(1) SSCR 2001.

What if there is a letter of secondment - attaching A to his UK employer?

We consider that this would be a strong indicator that A's normal base is the UK and he can be considered to be merely "temporarily absent" for the purposes of Regulation 145(1) SSCR 2001 - the duties in Australia are incidental to the employment in the UK for which he is paid his salary.

What if A had travelled to China for 3 days to act on behalf of the UK company?

A's normal base is the UK and he can be considered to be merely "temporarily absent" for the purposes of Regulation 145(1) SSCR 2001 - the duties in China are incidental to the employment in the UK. No apportionment is required.

What if A had travelled to China for 3 days to act on behalf of the Australian company?

The duties are not further to the employment in the UK and cannot be regarded as merely a temporary absence. An apportionment is required.

What if A has been sent to the UK and become ordinarily resident here?

If A's normal base is the UK he will be in employed earner's employment in Great Britain. As he is ordinarily resident he meets the residence criteria in Regulation 145(1) SSCR 2001 - the duties in Australia are merely incidental to the employment in the employed earner's employment in the UK for which he is paid his salary. No apportionment is required.

Exactly how many days amounts to a "temporary absence"?

Whether an absence is a temporary absence is a question of fact and degree, which depends upon the nature of the circumstances. Examples of what we would consider to be temporary absence would include short business trips or holidays.

Method of Time Apportionment

In the absence of contractual provision, there is to be an apportionment between UK and non-UK workdays under Section 2 of the Apportionment Act 1870. Under the Apportionment Act, salary accrues on a daily basis. The earnings are to be multiplied by a fraction where the numerator is the number of days working overseas in the overseas employer's business and the denominator is the total number of days in employment – in a full year this will be 365 days.

Where the employee is monthly or weekly paid, the computation has to take account of the "pay period" basis for computing NIC.

Example 2 (Patel)

Mrs P is ordinarily resident in India and is sent to the UK by her employer to work in the UK at the offices of a UK company which is part of the group. She remains under contract to the Indian employer and the Indian employer bears the cost of the employment. Her salary is £100,000. Her employer recalls her to India to advise on a hostile take-over for a period of 5 days - From 1 June until 5 June. The substantial part of 2 of those days is spent flying to India and back.

The earnings are multiplied by a fraction where the numerator is the number of days working overseas in the overseas employer's business and the denominator is the total number of days in employment.

If Mrs P has an annual pay period, then the appropriate fraction can simply be applied to her annual salary.

Gross Pay £100,000×5/365

Amount attributable to overseas workdays less £1369.87

NIC is operated on the gross pay attributable to the UK £98,630.13

However, if Mrs P is monthly paid, the employer has to account for NIC each month as a payment is made, and is unable to "look back" over a year and know what percentage needs to be applied. So the apportionment has to be done in the monthly pay period.

In June, no NICs are due on the salary paid in respect of the work in India.

The earnings on which NICs are to be calculated are those for the month of June – after an apportionment to take account of the 5 days which were not in respect of the employed earners employment.
Monthly salary £8333.33×5/365×100,000 less £1369.87
Amount attributable to non-UK workdays £1369.87
NIC is operated on the monthly gross pay attributable to the UK **£6963.46**

Holidays

If Mrs P were to take a holiday in India, the holiday may need to be brought into the calculation of non-UK workdays in the apportionment – depending on the contractual provisions and whether the holiday is attributable to the UK or overseas employment.
In Example 2, if in June Mrs P took 10 days holiday in India – in the absence of contractual provisions setting out how holiday accrues, these would be added to the 5 days working in India:
Salary £8333.33×15/365×£100,000
amount attributable to non-UK workdays = £4109.59
Earnings in the Month on which NIC must be operated = £4223.74

What about part of a day worked in the UK and part overseas?

We operate the practice in SP 5/84 with regard to days spent working partly in the UK and partly outside the UK. That is to say, if a day is substantially worked overseas for the overseas business then it will count as a non-UK work day in the apportionment computation. Where an employee spends a whole day working in the UK but then leaves the country that evening on an overseas business trip, it would be difficult to say as a matter of contract that the employee's emoluments for that day were not attributable on a time apportionment basis to duties performed in the UK. It follows that the emoluments for a day spent working overseas before returning to the UK in the evening will be attributable to duties performed overseas.

Records

Employees are required to retain evidence such as travel documents and business diaries to demonstrate how they have calculated non-UK workdays for tax. Where records of "non-UK workdays" for tax have been kept, these may be used as the basis for identifying non-UK days for National Insurance.

48.8 ROW: Class 2 NIC

Reg. 145(1)(c) (d) SSCR provide that the requirements are:

(c) as respects entitlement of a self-employed earner to pay Class 2 contributions, that that earner is present in Great Britain or Northern Ireland (as the case may be) in the contribution week for which the contribution is to be paid;

(d) as respects liability of a self-employed earner to pay Class 2 contributions, that the self-employed earner is ordinarily resident in Great Britain or Northern Ireland (as the case may be), or, if he is not so ordinarily resident, that before the period in respect of which any such contributions are to be paid he has been resident in Great

> Britain [or Northern Ireland][12] (as the case may be) for a period of at least 26 out of the immediately preceding 52 contribution weeks under the Act, the Social Security Act 1975 or the National Insurance Act 1965 or under some or all of those Acts.

Thus there are two possible connecting factors and if either is present, Class 2 NIC is due:

(1) ordinary residence in UK;
(2) residence for 26 out of 52 contribution weeks.

48.9 ROW: Class 3 NIC

Reg. 145(1)(e) SSCR provides that the requirement is:

> as respects entitlement of a person to pay Class 3 contributions in respect of any year, either that—
>
> (i) that person is resident in Great Britain or Northern Ireland (as the case may be) throughout the year,
>
> (ii) that person has arrived in Great Britain or Northern Ireland (as the case may be) during that year and has been or is liable to pay Class 1 or Class 2 contributions in respect of an earlier period during that year,
>
> (iii) that person has arrived in Great Britain or Northern Ireland (as the case may be) during that year and was either ordinarily resident in Great Britain or Northern Ireland (as the case may be) throughout the whole of that year or became ordinarily resident during the course of it, or
>
> (iv) that person not being ordinarily resident in Great Britain or Northern Ireland (as the case may be), has arrived in that year or the previous year and has been continuously present in Great Britain or Northern Ireland (as the case may be) for 26 complete contribution weeks, entitlement where the arrival has been in the previous year arising in respect only of the next year.

48.10 Place of business in UK

Tax Bulletin 49 provides:

> **Place of business in UK**
> We would normally accept as a strong indication that there is a place of business in the UK if a company is registered under the Companies Act

12 These words are omitted (presumably accidentally) from the SSCR but the context requires them.

1985.[13] But whether there is a place of business in the UK is a question of fact based on the individual case. Case law has shown that a company establishes a place of business in the UK if it carries on part of its business here. Such business activity need not be either a substantial part of, or more than incidental to, its main objects (*South India Shipping Corporation v Export-Import Bank of Korea* [1985] 2 AER 219). However there must be a more or less permanent location, not necessarily owned or leased by the company but associated with the company, from which its business is conducted habitually or with some degree of regularity (*Re Oriel* [1985] 3 AER 216). In Canadian law the premises of a group company are not sufficient in themselves to be a place of business for another group member (*Imperial Oil v Oil Workers International* 69 WWR 702).

We would not seek to claim in isolation that there is a place of business where the overseas provider legally, and in exchange for a payment commensurate with the service, sub-contracts services to a UK business.[14]

48.11 Residence and ordinary residence

The NIC legislation does not define residence or ordinary residence. For residence, the NI Manual states:

> **29009 DL Conditions of domicile or residence** [December 2012]
> You should operate Residence, Domicile and Remittance Basis Manual guidance in deciding whether a person is domiciled or resident. Any difficulties on residence should be submitted to Marine NICs in Cardiff, see NIM29034.

For residence, the pre-SRT IT rules should strictly speaking be applied, but in practice I expect close regard will be had to the SRT (which is supposed to represent the former common law rules).

For ordinary residence, the NI Manual states:

> **33560 Special Cases: ROW – Meaning of "ordinarily resident" – Factors to consider** [October 2013]
> ... In considering whether a person is "ordinarily resident", you should:
> • take into account the following factors

13 [Author's Note] Regulations made under s.1043 Companies Act 2006 impose a registration duty on a foreign incorporated company which establishes a place of business in GB; Northern Ireland has equivalent legislation.

14 This has been flagged as no longer current, however the author is not currently aware of this passage being moved elsewhere.

- in order to build up an overall picture of the person's position.

Factor	Indication
1. Will the person be returning to Great Britain or Northern Ireland during the period of employment abroad?	**Yes** – indicates ordinary residence continues during the period(s) abroad, especially the more frequent or longer the return visits. **No** – indicates the person ceasing to be ordinarily resident.
2. What will be the purpose(s) of the return visit(s)?	Visit(s): to see family who have remained at the person's home in Great Britain or Northern Ireland; and/or as holidays spent at the home, indicate ordinary residence. If the visit(s) is in connection with the employment abroad, for instance, training, this is not such a strong indication of ordinary residence.
3. Will the person's family – spouse/partner and/or children – be going abroad as well?	**Yes** – indicates that the person is no longer ordinarily resident, especially if they do not maintain a home in Great Britain or Northern Ireland (see factor 4). **No** – indicates ordinary residence continuing during period(s) abroad.
4. Will the person retain a home in Great Britain or Northern Ireland during their period abroad?	**Yes** – indicates ordinary residence continuing during period(s) abroad. **No** – indicates that the person is less likely to remain ordinarily resident.
5. If the person retains a home, will it be available for their use when they return?	**Yes** – indicates ordinary residence continuing during period(s) abroad. **No** – because, for instance, it is let on a long lease, then it is less likely that the person will remain ordinarily resident.
6. Will the person be returning to Great Britain or Northern Ireland at the end of the period abroad?	**Yes** – indicates ordinary residence continuing during period(s) abroad. **No** – indicates that the person is no longer ordinarily resident, especially if they do not retain a home in Great Britain or Northern Ireland during their absence abroad (see factor 4 above).

7. How long has the person lived in Great Britain or Northern Ireland?	The longer the period, the stronger the indication that the person is ordinarily resident.

For guidance on the definition of "ordinarily resident" for tax purposes, see the Residence Manual.

The seven factors are unhelpful, first as no guidance is given how to deal with the practical problems when different factors point in different directions, and secondly because the reader who turns to HMRC 6 will find different guidance.

There are no statutory provisions on ordinary residence so case law is all we have. The leading case is *R v Barnet LBC ex p Shah.*[15] This is not a tax case but the expression "ordinary residence" is said to have a natural and ordinary meaning which is the same in tax and non-tax contexts.[16]

In *Shah* the House of Lords noted that ordinary residence was distinct from domicile and rejected a "real home" test (which was similar to a domicile test).

What is the test? A number of dicta were approved, saying (more or less) the same thing in different words:

> I think that [ordinary residence] connotes residence in a place with some degree of continuity and apart from accidental or temporary absences.[17]

> "Ordinarily resident" refers to a man's abode in a particular place or country which he has adopted voluntarily and for settled purposes as part of the regular order of his life for the time being, whether of short or long duration.[18]

The important requirement is the residence must have the degree of continuity, or in other words, it must be "for settled purposes." What does that mean?

> There must be a degree of settled purpose. The purpose may be one; or there may be several. It may be specific or general. All that the law requires is that there is a settled purpose. This is not to say that the

15 [1983] 2 AC 309. The case is noteworthy for the fact that oral argument over the two words "ordinarily resident" lasted 9 days.

16 *Shah* at p.340.

17 *Shah* at p.341 citing Viscount Sumner in *Lysaght v IRC* 13 TC 511 at p.528

18 *R v Barnet LBC ex p. Shah* [1983] 2 AC 309 at p.343. This passage has often been cited with approval.

> "propositus" intends to stay where he is indefinitely; indeed his purpose, while settled, may be for a limited period. Education, business or profession, employment, health, family, or merely love of the place spring to mind as common reasons for a choice of regular abode. And there may well be many others. All that is necessary is that the purpose of living where one does has a sufficient degree of continuity to be properly described as settled.[19]

48.11.1 *Accommodation*

Turberville at [9] notes that accommodation held long term is consistent with being non-ordinarily resident:

> We consider the retention of the house and flat in the UK as fairly neutral; he had retained these (or predecessor properties) throughout the time he was working abroad.

Accommodation is however a relevant factor in deciding whether a person is "settled".

48.11.2 *Minimum period before acquiring ordinary residence*

One would have thought that if a person settled in a country, they became ordinarily resident immediately. This was the view expressed in HMRC6.

In *Tuczka v HMRC*[20] however the Upper Tribunal suggested that there was a minimum time (though the minimum is not very long):

> 12. ...After referring also to the dicta in the tax cases, Lord Slynn concluded that it was "plain that as a matter of ordinary language a person is not habitually resident in any country unless he has taken up residence and lived there for a period." Lord Slynn continued (at 1942G-1943B):
>
> > "It seems to me impossible to accept the argument at one time advanced that a person who has never been here before who says on landing, "I intend to settle in the UK" and who is fully believed is automatically a person who is habitually resident here. Nor is it enough to say I am going to live at X or with Y. He must show residence in fact for a period which shows that the residence has become "habitual" and, as I see it, will or is likely to continue to be habitual...

---

19 *Shah* at p.344.

20 [2011] UKUT 113 (TCC).

> The requisite period is not a fixed period. It may be longer where there are doubts. It may be short (as the House accepted in In *re S (A Minor) (Custody: Habitual Residence)* [1998] A.C. 750, my speech at p. 763A, and *In re F (A Minor) (Child Abduction)* [1992] 1 FLR 548, 555, where Butler-Sloss L.J. said: "A month can be ... an appreciable period of time")."
>
> 13. Even assuming for the purpose of argument that "habitually" and "ordinarily" mean the same thing, we do not regard *Nessa* as in any way departing from Lord Scarman's clear rejection of any requirement to establish an intention to reside permanently or for an indefinite period. All that *Nessa* established in that regard is that a person would not qualify as "habitually resident" immediately on arrival, save in a case where he resumed his previous habitual residence. Some period of time is therefore needed to establish "habitual residence". But the fact that this period need not be long can be seen not only from Lord Slynn's reference to the observation of Butler Sloss LJ quoted above but from the resolution of the *Nessa* case itself. The House of Lords upheld the decision of the Court of Appeal that the case be remitted for rehearing before a social security appeal tribunal to determine whether the claimant had established habitual residence by the date of the initial tribunal hearing (ie, 6 December 1994, and thus less than four months after her arrival in the UK) or "even earlier": see at 1943D.

This overlooks the fact that the question of ordinary residence is determined with an element of hindsight: see 3.10 (The relevant period of investigation). It is considered that there is no minimum period.

48.11.3 *Intention*

In *Shah*, Lord Scarman said:

> There are two, and no more than two, respects in which the mind of the "propositus" is important in determining ordinary residence. The residence must be voluntarily adopted. Enforced presence by reason of kidnapping or imprisonment, or a Robinson Crusoe existence on a desert island with no opportunity of escape, may be so overwhelming a factor as to negative the will to be where one is.

The "voluntary" requirement does not have much practical role to play, as it only concerns imprisoned, kidnapped or shipwrecked taxpayers.[21]

---

21 "The residence must be voluntarily adopted. Enforced presence by reason of kidnapping or imprisonment, or a Robinson Crusoe existence on a desert island with no opportunity of escape, may be so overwhelming a factor as to negative the will to

The speech continues:

> And there must be a degree of settled purpose. The purpose may be one; or there may be several. It may be specific or general. All that the law requires is that there is a settled purpose. This is not to say that the "propositus" intends to stay where he is indefinitely; indeed his purpose, while settled, may be for a limited period. Education, business or profession, employment, health, family, or merely love of the place spring to mind as common reasons for a choice of regular abode. And there may well be many others. All that is necessary is that the purpose of living where one does has a sufficient degree of continuity to be properly described as settled. The legal advantage of adopting the natural and ordinary meaning, as accepted by the House of Lords in 1928 and recognised by Lord Denning M.R. in this case, is that it results in the proof of ordinary residence, which is ultimately a question of fact, depending more upon the evidence of matters susceptible of objective proof than upon evidence as to state of mind. Templeman L.J. emphasised in the Court of Appeal the need for a simple test for local education authorities to apply: and I agree with him. The ordinary and natural meaning of the words supplies one. For if there be proved a regular, habitual mode of life in a particular place, the continuity of which has persisted despite temporary absences, ordinary residence is established provided only it is adopted voluntarily and for a settled purpose.

In *Tuczka v HMRC* [2010] UKFTT 53 the tribunal said:

> The test requires objective examination of immediately past events, and not intention or expectation for the future ([1983] 2 AC 309 at 345).

It is considered that the concept of being "settled" necessarily requires an examination of intention or expectation for the future.

48.11.4 *Acquiring UK ordinary residence*

In *Tuczka v HMRC* [2011] UKUT 113 (TCC) the taxpayer came to the UK to work and intended to stay 33 months (2.5 years). There were other facts which suggested he was settled, in particular that his girlfriend came to join him.

It was argued that an intention to reside here for that period was too short

---

be where one is." *Shah* at p.344.

to constitute a "settled purpose". The argument was rejected. Even a period of just over one year could be sufficient.[22]

48.11.5 *Losing UK ordinary residence*

In *Turberville v HMRC* [2010] UKFTT 69 the taxpayer left the UK in July 2001 to work abroad. The taxpayer remained ordinarily resident until July 2001 even though he had formed the intention to leave earlier, in February 2001:

> 8. In relation to 2001-02, while it was clear in February 2001 that he would go to Dallas in July 2001 we do not consider that this changes the quality of his residence between 6 April 2001 and 30 June 2001, which was a continuation of his residence during the previous four tax years. Although it was then known that such residence would cease about 1 July 2001 it was nevertheless part of his residence for settled purposes and the fact that the Appellant's state of mind was such that he would be leaving the UK at around that time does not, until his actual departure, alter the position.

In July 2001 the taxpayer ceased to be ordinarily resident.

In October 2001 the taxpayer unexpectedly lost his job, but remained non-ordinarily resident. The judgment at [8] continues:

> From the date of actual departure, we consider that in deciding whether there was then a distinct break one should look at the position as it was in July 2001 without the benefit of hindsight. The three-year employment contract coupled with his expenditure on furnishing the apartment rented by his employer point to a distinct break.

In the absence of purchase of accommodation, three years has traditionally been regarded as the period of residence which is sufficient to amount to settled.

48.11.6 *Habitual residence and ordinary residence compared*

Schuz explains the concept of "Habitual residence"

> Habitual residence has been chosen as the main connecting factor in many of the multinational conventions concluded under the auspices of the Hague Conference on Private International Law for nearly one

---

22 At [17] citing relying on *Reed v Clark* quoted at [15]; but *Clark* was not considering ordinary residence of the taxpayer (which was not an issue).

> hundred years.[23] It is now also used in other international conventions and in the domestic legislation of a number of countries, including England and Canada. However, there was very little discussion as to the meaning of the concept until the explosion of litigation under the Hague Convention on the Civil Aspects of Child Abduction began in the 1980s. Under this Convention, the determination of habitual residence is often critical to the outcome of an application for the return of the child in international abduction cases.[24]

The term is not found in tax legislation.

If the concept was the same as "ordinary residence" then cases on habitual residence might be valuable for tax. In principle the terms habitual residence and ordinary residence could be regarded as synonymous. The natural meaning of the two expressions is the same (or at least, equally vague). However the case law has not been consistent. In some cases the expressions are regarded as the same. [25] Some cases suggest that habitual residence is "something more than" ordinary residence,[26] though that "something more" is elusive. It has been said that the concepts merely share a "common core of meaning".[27] In the context of the Hague Abduction Convention, at least, "habitual residence" has now been held to have an autonomous meaning (ie a meaning distinct from that in the domestic law of the parties to the Convention) and the Supreme Court refused to follow *Shah*.[28]

While it would be desirable that a person's habitual residence and ordinary residence should be in the same place for all purposes, the desire for conceptual simplicity cannot override the need to give effect to the purpose of the legislation in question.

In any case, the authorities on "habitual residence" do not provide a clear definition or explanation of the term, and the authorities on the Abduction

---

23 It was first used in the Hague Convention on Guardianship in 1902, and is the main connecting factor in the Hague Convention on Jurisdiction and Foreign Judgments in Civil and Commercial Matters.

24 Schuz, "Policy Considerations in Determining the Habitual Residence of a Child and the Relevance of Context" (2001) 11 Journal of Transnational Law and Policy 101, *http://international-family-law.eu/wp-content/uploads/2012/12/Habitual-residence-of-a-child-by-Rhona-Schuz1.pdf*

25 *Mark v Mark* [2006] 1 AC 98 at [33].

26 *Cruse v Chittum* [1974] 2 All ER 940 at p.943.

27 *Nessa v Chief Adjudication Officer* [1999] 1WLR 1937 at p.1941.

28 *A v A* [2014] AC 1 at [54].

convention are best understood in the light of the policy considerations relevant to abduction.[29] In borderline cases, at least, the meaning of the term will vary according to the context.

48.11.7 *Residence and ordinary residence compared*

Tuczka significantly reduced the difference between residence (the common law, pre-SRT concept) and ordinary residence or (if one prefers) it shows that the difference is not as great as had generally been thought:

> [18] Nor is it correct to suggest that a finding that Dr Tuczka was ordinarily resident in the UK in the tax year 1998-99 erodes a fundamental distinction between the concepts of residence and ordinary residence. The distinction is not as wide or as basic as the present appellant seeks to suggest. Hence, in *Levene*, Viscount Cave LC stated at p507:
>
> > "The expression "ordinary residence" is found in the Income Tax Act of 1806 and occurs again and again in the later Income Tax Acts, where it is contrasted with the usual or occasional or temporary residence; and I think that it connotes residence in a place with some degree of continuity and apart from accidental or temporary absences. So understood, the expression differs little in meaning from the word "residence" as used in the Acts..."

Unless the courts step back from this, HMRC6 was more generous than the law on the subject.

48.12 The EU Regulation

The position within the EU is governed by Regulation 883/2004 of 29 April 2004 on the coordination of social security systems. EU regulations do not have short titles (which were introduced in the UK in 1845) so this is here called "Regulation 883/04".

This chapter considers the position from 1 May 2010. Before then the position was governed by regulation 1408/71. I do not discuss the transitional rules.

---

29 Habitual residence is "a question of fact to be determined by the circumstances of each case": [2014] AC 1 at [36]; and see Schuz, "Policy Considerations in Determining the Habitual Residence of a Child and the Relevance of Context" (2001) 11 Journal of Transnational Law and Policy 101 *http://international-family-law.eu/wp-content/uploads/2012/12/Habitual-residence-of-a-child-by-Rhona-Schuz1.pdf*

HMRC have published guidance ("**NIC guidance**").[30]

The regulation covers social security benefits but this chapter only considers the NIC aspects. The NIC guidance provides:

> Where under the EU Regulations the UK's social security legislation applies, the employee and employer (or person treated as the employer) must pay UK Class 1 National Insurance contributions (and the employer pays Class 1A National Insurance on certain UK taxable benefits and Class 1B National Insurance where there is a PAYE Settlement Agreement.) All the earnings are treated as arising from activity in the UK.
>
> Where, under the EU rules, the social security legislation of another Member State applies then no UK National Insurance is due.

48.13 Persons covered by Regulation 883/04

Article 2 Regulation 883/04 provides:

> 1. This Regulation shall apply to
> [1] nationals of a Member State,
> [2] stateless persons and refugees residing in a Member State who are or have been subject to the legislation of one or more Member States,
> [3] as well as to the members of their families and to their survivors.[31]

NIC guidance provides:

> The new EU Regulations apply to nationals of the EU Member States. They also apply to stateless persons and refugees residing in a Member State, members of their families and survivors if those people have previously been subject to the legislation of a Member State.
>
> From 1 June 2012 883/2004 will apply to Norway, Iceland and Liechtenstein.
>
> The UK has also opted out of applying the new EU rules to third country nationals legally resident in a Member State and will continue to apply the old rules.

---

30 *http://www.hmrc.gov.uk/nic/work/new-rules.htm*

31 In the UK, NICs (other than the voluntary Class 3 NIC) are only paid by employed or self-employed, so the reference to "members of their families and their survivors" is irrelevant for NIC, though it may be relevant for other purposes governed by the regulation.

48.13.1 *Persons within Regulation 1408/71*

The NIC guidance provides:

> In the UK, the old EU rules in 1408/71 are being kept for third country nationals legally resident in a Member State. This is because the UK has chosen to opt out of laws extending the new regulations to third country nationals.
> Example (Hank)
> H is a US national who has lived and worked in the UK for ten years and pays Class 1 National Insurance. The UK Border Agency has agreed he can live and work legally in the UK. His UK employer Big Bank posts H to the Frankfurt office for six months. Because he is a US national legally resident in the UK, the new rules do not apply to H. H continues to be subject to the old rules. Big Bank should apply to HMRC Residency for a Form E101 for H and he remains subject to UK National Insurance in Frankfurt. He is exempt from German contributions.

This has made the position much more complicated. The old rules are not discussed here but I hope to cover them in a future edition.

48.13.2 *Forms*

The NIC guidance provides:

> The EU Regulations provide for a system of forms so that employers and employees can demonstrate that they are entitled to operate the legislation of one Member State and be exempt contributions under the legislation of another. Under the old EU Regulations this was the E101 Form. Under the new EU Regulations the E101 will be replaced by Form A1.
> For employees coming to the UK from the other Member States, you should operate National Insurance contributions from the start of the employment unless you hold a valid E101 (or from 1 May 2010 Form A1 or an E101) showing that they are exempt National Insurance in the UK and subject to the legislation of another Member State.
> For employees going to work in another Member State, you should apply to HM Revenue & Customs (HMRC) NIC&EO to find out whether the employee should remain in UK National Insurance and you can be issued Form E101 (or Form A1 after 1 May 2010). As long as the UK's legislation continues to apply, you should continue to operate employer and employee National Insurance rather than the contributions of the other Member State.

48.14 EEA: Tie-breaker rules

Article 11.1 sets out the principle of a tie-breaker rule:

> 1. Persons to whom this Regulation applies shall be subject to the legislation of a single Member State only. Such legislation shall be determined in accordance with this Title.

48.14.1 *Place of employment rule*

Article 11.3 Regulation 883/04 provides a place of employment rule for employees and self-employed:

> 3. Subject to Articles 12 to 16:
>
> (a) a person pursuing an activity as an employed or self-employed person in a Member State shall be subject to the legislation of that Member State;

The key phrase "pursuing an activity" is defined in article 11.2:

> 2. For the purposes of this Title, persons receiving cash benefits because or as a consequence of their activity as an employed or self-employed person shall be considered to be pursuing the said activity. This shall not apply to invalidity, old-age or survivors' pensions or to pensions in respect of accidents at work or occupational diseases or to sickness benefits in cash covering treatment for an unlimited period.

Article 11.3 continues with some more specialist rules:

> (b) a civil servant shall be subject to the legislation of the Member State to which the administration employing him/her is subject;...
>
> (d) a person called up or recalled for service in the armed forces or for civilian service in a Member State shall be subject to the legislation of that Member State;
>
> (e) any other person to whom subparagraphs (a) to (d) do not apply shall be subject to the legislation of the Member State of residence,[32] without prejudice to other provisions of this Regulation guaranteeing him/her benefits under the legislation of one or more other Member States.

48.14.2 *Year abroad rule for employees*

Article 12 Regulation 883/04 provides a rough equivalent of the year

---

32 Art.1(j) provides: "'residence' means the place where a person habitually resides."

abroad rule for employees:

> 1. A person who pursues an activity as an employed person in a Member State on behalf of an employer which normally carries out its activities there and who is posted by that employer to another Member State to perform work on that employer's behalf shall continue to be subject to the legislation of the first Member State, provided that the anticipated duration of such work does not exceed 24 months and that he/she is not sent to replace another person.
> 2. A person who normally pursues an activity as a self-employed person in a Member State who goes to pursue a similar activity in another Member State shall continue to be subject to the legislation of the first Member State, provided that the anticipated duration of such activity does not exceed 24 months.

48.14.3 *Two places of employment*

The place of employment rule cannot act as a tie-breaker if there are two places of employment. In this case Art.13 Regulation 883/04 provides:

> 1. A person who normally pursues an activity as an employed person in two or more Member States shall be subject to:
> (a) the legislation of the Member State of residence if he/she pursues a substantial part of his/her activity in that Member State or if he/she is employed by various undertakings or various employers whose registered office or place of business is in different Member States, or
> (b) the legislation of the Member State in which the registered office or place of business of the undertaking or employer employing him/her is situated, if he/she does not pursue a substantial part of his/her activities in the Member State of residence....

What is "substantial"? NIC guidance provides:

> When determining whether a substantial part of the activity of an employed person is pursued in a Member State HMRC will take into account:
> · the working time and/or
> · the remuneration
> If less than 25 per cent of the person's working time is carried out in the UK and/or less than 25 per cent of the person's remuneration is earned in the UK this will be an indicator that a substantial part of all the activities of the worker is not pursued in the UK. Other criteria may also

be taken into account. HMRC may look at the past but must also look at the position in the next 12 months. This will allow HMRC to take account of changing circumstances.

Regulation 883/04 continues with further tie-breakers:

> 3. A person who normally pursues an activity as an employed person and an activity as a self-employed person in different Member States shall be subject to the legislation of the Member State in which he/she pursues an activity as an employed person or, if he/she pursues such an activity in two or more Member States, to the legislation determined in accordance with paragraph 1.
> 4. A person who is employed as a civil servant by one Member State and who pursues an activity as an employed person and/or as a self-employed person in one or more other Member States shall be subject to the legislation of the Member State to which the administration employing him/her is subject.
> 5. Persons referred to in paragraphs 1 to 4 shall be treated, for the purposes of the legislation determined in accordance with these provisions, as though they were pursuing all their activities as employed or self-employed persons and were receiving all their income in the Member State concerned.

48.15 EEA: Self-employed rules

48.15.1 *Year abroad rule for self-employed*

Article 13.2 Regulation 883/04 provides a year abroad rule for the self-employed:

> 2. A person who normally pursues an activity as a self-employed person in two or more Member States shall be subject to:
> (a) the legislation of the Member State of residence if he/she pursues a substantial part of his/her activity in that Member State; or
> (b) the legislation of the Member State in which the centre of interest of his/her activities is situated, if he/she does not reside in one of the Member States in which he/she pursues a substantial part of his/her activity.

48.16 Special cases by agreement

Article 16.1 provides:

> 1. Two or more Member States, the competent authorities of these Member States or the bodies designated by these authorities may by

common agreement provide for exceptions to Articles 11 to 15 in the interest of certain persons or categories of persons.

48.17 Class 4 contributions

Section 15 SSCBA provides:

> (1) Class 4 contributions shall be payable for any tax year in respect of all profits which—
>
> (a) are immediately derived from the carrying on or exercise of one or more trades, professions or vocations,
>
> (b) are profits chargeable to income tax under Chapter 2 of Part 2 of the Income Tax (Trading and Other Income) Act 2005 for the year of assessment corresponding to that tax year and
>
> (c) are not profits of a trade, profession or vocation carried on wholly outside the UK.
>
> (2) Class 4 contributions in respect of profits shall be payable—
>
> (a) in the same manner as any income tax which is, or would be, chargeable in respect of those profits (whether or not income tax in fact falls to be paid), and
>
> (b) by the person on whom the income tax is (or would be) charged,
>
> in accordance with assessments made from time to time under the Income Tax Acts.
>
> (3A) Where income tax is (or would be) charged on a member of a limited liability partnership in respect of profits arising from the carrying on of a trade or profession by the limited liability partnership, Class 4 contributions shall be payable by him if they would be payable were the trade or profession carried on in partnership by the members. ...
>
> (5) For the purposes of this section the year of assessment which corresponds to a tax year is the year of assessment (within the meaning of the Tax Acts) which consists of the same period as that tax year.

A trade carried on wholly outside the UK is exempt from class 4 NIC. This is almost impossible for a sole trader, though it may be possible for a partnership.[33] But in such a case the self-employed earner would not be employed in the UK, and so would be exempt anyway.

What about unremitted trading profits of a remittance basis taxpayer? The word "chargeable" is ambiguous in that although all trading profits are strictly chargeable under part 2 ITTOIA, the context may show that unremitted profits of a remittance basis taxpayer, (un)taxed on the

33 See 15.3 (Trading income of UK resident).

remittance basis, do not count as "chargeable".[34] It is considered that that is the case here, so a remittance basis taxpayer pays class 4 NIC on taxable (remitted) profits only. That is consistent with the general scheme of the remittance basis.

48.18 Partnerships

Para 4 Sch 2 SSCBA provides:

> (1) Where a trade or profession is carried on by two or more persons jointly, the liability of any one of them in respect of Class 4 contributions shall arise in respect of his share of the profits of that trade or profession (so far as immediately derived by him from carrying it on); and for this purpose his share shall be aggregated with his share of the profits of any other trade, profession or vocation (so far as immediately derived by him from carrying it on or exercising it).
> (2) Where sub-paragraph (1) above applies, the Class 4 contributions for which a person is liable in respect of the profits of the trade or profession carried on jointly (aggregated, where appropriate, as mentioned in that sub-paragraph) shall be charged on him separately.

34 See 10.12 (Nature of charge on remitted RFI).

CHAPTER FORTY NINE

CAPITAL GAINS OF UK RESIDENTS

49.1 Territorial scope of CGT

49.1.1 *"Chargeable" gains*

Section 15(2) TCGA provides:

> Every gain shall, except as otherwise expressly provided, be a chargeable gain.

The expression "chargeable" gain is a label which brings in an uncountable number of rules, for the usual drafting technique to provide an exemption is to provide that gains of the specified nature are not chargeable. However, the term "chargeable" gain does not bring in a territorial limitation. Gains are in principle "chargeable" gains regardless of residence or domicile of the person to whom the gains accrue.

49.1.2 *CGT residence condition*

Section 2(1) TCGA provides:

> Subject to any exceptions provided by this Act, and without prejudice to sections 10 and 276, a person shall be chargeable to capital gains tax in respect of chargeable gains accruing to him in a year of assessment if the residence condition is met.

"The residence condition" is defined in s.2(1A) TCGA:

> The residence condition is—
>
> (a) in the case of an individual, that the individual is resident in the UK for the year in question,
>
> (b) in the case of personal representatives of a deceased person, that the single and continuing body mentioned in section 62(3) is resident in the UK,
>
> (c) in the case of the trustees of a settlement, that the single person mentioned in section 69(1) is resident in the UK during any part

of the year in question, and

(d) in any other case, that the person is resident in the UK when the gain accrues.

Para (d) is rare, as companies are taken out of the scope of CGT by s.4 CTA 2009, but one example is a unit trust scheme.

In principle, therefore, a person who is not resident in the UK is not chargeable to CGT.

A non-resident person is in principle outside the scope of CGT regardless of domicile and regardless of the situs of the asset disposed of. (By contrast income tax is charged on UK source income, and IHT is charged on UK situate property, regardless of the residence or domicile of the individual.)

There are five exceptions to the general rule:

(1) Section 2(1) TCGA refers to two:
   (a) Non-resident trader with a UK branch or agency[1]
   (b) Exploration and exploitation assets on the continental shelf (not discussed in this book)

(2) Temporary non-residents[2]

(3) ATED-CGT[3]

(4) The forthcoming non-residents dwellinghouse charge[4]

It follows that an individual (wherever domiciled) can in principle avoid CGT if they dispose of an asset before they become UK resident or if they postpone the disposal until the tax year after they have lost that status. A simple form of CGT planning for an individual whose stay in the UK is a short-term one is not to dispose of assets giving rise to chargeable gains while UK resident.

49.2 CGT remittance basis

Section 12 TCGA provides:

> (1) This section applies to foreign chargeable gains accruing to an individual in a tax year ("the foreign chargeable gains") if section 809B,

---

1 See 49.8 (Non-resident trade with UK branch).

2 See 9.1 (Temporary non-residence). This is not technically an exception to the general rule, as the legislation does not impose CGT on gains accruing to a non-resident. It deems the gains to accrue later when the individual is resident. But it comes to the same thing.

3 See 75.29 (ATED-CGT).

4 See 74.1 (Forthcoming CGT charge on non-residents dwellinghouse).

> 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year...
> (2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the UK...
> (3) The amount of chargeable gains treated as accruing is equal to the full amount of the foreign chargeable gains so remitted in that year or, where applicable, that part of the year.
> (4) In this section "foreign chargeable gains" means chargeable gains accruing from the disposal of an asset which is situated outside the UK.

The use of the word "individual" means that trustees and personal representatives do not qualify for the remittance basis.

The CGT remittance basis applies to foreign situate assets.[5] By contrast, the RFI remittance basis applies to foreign source income, which is a different concept.[6]

See too 11.30 (CGT disposal not for market value).

49.2.1 *Date gain accrues and date of disposal under remittance basis*

The gain is treated as accruing in the tax year of remittance. By implication the gain is to be treated as not accruing on the date of the actual disposal, when it actually accrues. This is relevant for:

(1) rate of CGT: the rate is the rate in the year of remittance, not the year of disposal.
(2) EIS reinvestment relief. The time limits for EIS relief depend on the time that the gain accrued (not the time that the disposal takes place).[7]

The time limits for rollover relief depend on the time of disposal.[8] The drafter of the former para 16(4) Schedule A1 TCGA clearly considered that the pre-2008 s.12(1) TCGA altered the time of disposal so that the asset is regarded as disposed of at the time of remittance (not at the time of the actual disposal).[9] But for the present entrepreneurs' relief, HMRC regard the date of disposal as the date of the actual disposal, not the date

---

5 See 83.1 (Situs of assets for CGT).

6 In international tax law, gains are often said to have a source, which may be taken to be the state where the assets are situate. UK tax legislation does not use the word source in connection with gains.

7 Para 1 Sch 5B TCGA.

8 Section 152(3) TCGA

9 See the 6th edition of this work, para 29.4.

of remittance.[10]

49.3 Split years

49.3.1 *Gains accruing to individual in split year*

Section 2(1B) TCGA provides the usual split year rule:

> If the year is a split year as respects an individual, the individual is not chargeable to capital gains tax in respect of any chargeable gains accruing to the individual in the overseas part of that year.

Thus gains of the overseas part of a split year of an individual are in principle not subject to CGT.

Section 2(1C) TCGA provides two self-evident exceptions to the general rule:

> But subsection (1B)—
>
> (a) does not apply to chargeable gains in respect of which the individual would have been chargeable to capital gains tax under section 10, had the individual been not resident in the UK for the year, and
>
> (b) is without prejudice to section 10A [temporary non-residence].

49.3.2 *Remittance in split year*

Section 12(2A) TCGA provides:

> If that tax year is a split year as respects the individual, the chargeable gains are treated as accruing to the individual in the part of the year (the overseas part or the UK part) in which the foreign chargeable gains are so remitted.

Thus gains remitted in the overseas part of a split year are not taxed unless the temporary non-resident rules apply.

Section 12(1A) TCGA provides:

> But it [Section 12 TCGA] does not apply to foreign chargeable gains accruing to an individual in the overseas part of a split year as respects that individual, regardless of the part of the year (the overseas part or the UK part) in which the foreign chargeable gains are remitted.

Thus gains accruing during the overseas part of a split year are not charged even if remitted during the UK part of a subsequent split year. EN FB

---

10 See 49.5.2 (Deadline for ER claim).

2014 provides:

> 1. This clause provides that foreign gains arising to a remittance basis user in the overseas part of a split year of residence and remitted in the UK part of the year are not charged to tax.
> 2. The clause inserts a new subsection (1A) into section 12 TCGA 1992 ensuring that foreign gains accruing in the overseas part of a split year of residence are not charged to tax regardless of when in the year they are remitted.
> 4. Schedule 45 of FA 2013 introduced a new Statutory Residence Test and contained rules (previously in extra-statutory concessions) to cater for a split year of residence for an individual coming to or leaving the UK. It provided that gains arising in the overseas part of the year were not charged. However, the consequential change in paragraph 95 of Schedule 45 to the rules for remittance basis users contained an inadvertent error, the effect of which is to wrongly charge their gains arising in the overseas part of the year and remitted in the UK part of the year. This measure corrects that error.

This provision is backdated to 2013/14.

49.3.3 *Gains accruing to trustees in split year*

Trustees are subject to CGT on gains in the whole of a year in which they become non-resident or in which they become UK resident (unless DT relief applies). There is no good reason for that rule[11] and it gives rise to an anomaly:

(1) If a UK trust becomes non-resident, gains of the entire year are in principle subject to CGT (DT relief might be available).
(2) If a UK trust transfers its assets to a non-resident trust, gains arising after the transfer are in principle not subject to CGT.

So a transfer could be better than a trust migration.

49.4 Interaction of remittance basis and taper and indexation reliefs

49.4.1 *Taper relief*

Para 56 sch 2 FA 2008 provides:

> (1) The amendments made by para 31(2) and (3) have effect where the intervening year is the tax year 2008-09 or any subsequent tax year.
> (2) The amendments made by paras 41 and 43 have effect where the

11 The position is different for IT: see 7.2 (Split year of trustees and PRs).

> eligible year is the tax year 2008-09 or any subsequent tax year.
> (3) The other amendments made by paras 23 to 55 have effect in relation to chargeable gains accruing or treated as accruing in the tax year 2008-09 or any subsequent tax year.

The important provision here is para 56(3).[12] This removes taper relief on gains on disposals before 2008/09 which are remitted after 2008/09. All computations of unremitted gains made before 2008 will need to be recomputed.

49.4.2 *Indexation relief*

Para 83 sch 2 FA 2008 provides:

> The amendments made by paragraphs 77 to 82 [which abolish the indexation allowance] have effect in computing gains on disposals made on or after 6 April 2008.

Assuming that this refers to the actual disposal, the effect is that indexation relief continues to apply to gains on pre-2008 disposals which are remitted after 6 April 2008. This is the HMRC view. The CG Manual provides:

> **CG25320 - Remittance basis: computing the foreign chargeable gain: indexation allowance and taper relief** [Apr 2010]
> When dealing with remittance basis cases the foreign chargeable gain should be computed as at the date of the disposal using all the normal computational rules.
> For disposals occurring after 5 April 1982 and before 6 April 1998 these rules will include an allowance for indexation up to the date of the disposal. No further allowance is due for indexation when the gain is remitted to the UK however long the interval is between the gain arising and the date of the remittance....

49.5 Interaction of remittance basis and entrepreneurs' relief

A full discussion of entrepreneurs' relief needs a book to itself.

The CGT liaison group (an HMRC led group involving the tax professional bodies) has issued a guidance note **("the entrepreneurs' relief note")**[13] which is discussed here. For other issues on this relief, see:

---

12 Para 56 (1)(2) relate to specialist topics, s.56A, 279A and 279B TCGA.

13 *http://www.tax.org.uk/NR/rdonlyres/BC021C6A-EB7F-4E2E-BEFC-380ECB096FCF/0/120213ERTechnicalQuestionsandHMRCresponse.pdf*

53.32 (Entrepreneurs' relief: trading co held by non-resident company); 50.16 (Interaction of s.86, s.87 and entrepreneurs' relief).

49.5.1 *Application of remittance basis*

The entrepreneurs' relief note provides:

> **EXAMPLE D1 – Foreign chargeable gains qualifying for ER fall within s 12, TCGA 1992**
> 67 Section 169N(9) TCGA 1992 states that 'any gain or loss taken into account under subsection (1) is not to be taken account under this Act as a chargeable gain or an allowable loss.'
> 68 The Explanatory Notes published with the Finance Bill 2008 indicate that the purpose of s 169N(9) is merely to ensure that where there is one ER disposal, and gains and losses are aggregated to determine the qualifying net ER gain, this cannot be segregated as gains and losses separately for CGT purposes. There have, however, been concerns about the interpretation of s 169N(9) and how it interacts with other provisions within TCGA 1992.
> 69 As can be seen from the responses to the following queries, HMRC considers that foreign chargeable gains qualifying for ER fall within s 12 TCGA 1992 where such gains are realised by remittance basis users. The delay between the time the gains arises and when the remittance is made is no bar on the claiming of ER provided a valid ER claim is made within the specified time period (see Example D2).

49.5.2 *Deadline for ER claim*

The entrepreneurs' relief note provides:

> **EXAMPLE D2 – The deadline for making an ER claim**
> 70 The deadline for making an ER claim is linked to the tax year in which the qualifying business disposal is made, not to the tax year that the gain accrues to a taxpayer. Thus if a UK-resident foreign domiciliary wishes to make the claim for a qualifying business disposal of foreign property, it would seem that the following deadlines apply for disposals in the specified tax years, regardless of whether the chargeable gain has been remitted.
>
> | **Tax year** | **Claim deadline** |
> |---|---|
> | 2008/09 | 31 January 2011 |
> | 2009/10 | 31 January 2012 |
> | 2010/11 | 31 January 2013 |
> | 2011/12 | 31 January 2014 |
>
> 71 Does HMRC agree? How would it recommend that such a claim be

made if it does not impact on the tax liability as there has been no remittance of the disposal proceeds?

HMRC response to Example D2

72 ER is only available on the making of a claim and such claim must be made within the statutory time limit which is set by reference to the date of the qualifying disposal (see s 169M(3) TCGA 1992). It is for the taxpayer to consider whether to submit a protective claim for ER within this time period.

Further note

73 This means that where a remittance basis user makes a qualifying gain in a tax year he or she has until the first anniversary of 31 January following the end of the tax year to decide whether or not to make the ER claim. The date that the proceeds are remitted is irrelevant.

74 For example: AB is a remittance basis user. He makes a £10m gain on a qualifying disposal in 2011/12 of shares in a foreign company (total proceeds £15m). He has not made any previous ER claims and so has the entire £10m ER allowance available. He does not expect to remit the proceeds from the gain for at least three years (having sufficient clean capital to supplement his UK income). If he wants to be able to benefit from ER on any eventual remittance of the proceeds he has until 31 January 2014 to make the ER claim. The fact that he will not have remitted the proceeds at that date is irrelevant to the claim deadline.

75 Where an ER claim is required prior to the gains being remitted there will be no gain shown on the tax return. The claim should be made by way of a note to the tax return, with the ER computation included.

49.5.3 *Increase in entrepreneurs' relief limit*

There is a lifetime limit on the relief which has gradually been increased:

Date of disposal from	**Limit**
6 April 2008	£1 million.
6 April 2010	£2 million
23 June 2010	£5 million
6 April 2011	£10 million

The entrepreneurs' relief note provides:

EXAMPLE D3 – The raised ER limit

76 It is understood that HMRC's settled view is that the ER limit to apply in respect of remittance basis gains is that which is in force when the gains arise.

77 For example, assuming there have been no other qualifying ER gains, where the disposal date for a qualifying ER gain of £5m (paid into a

separate offshore bank account with interest being paid into a separate account) is 19 August 2008 and the proceeds are remitted on 25 October 2010, it is understood that HMRC believes that the £1m lifetime limit in force in 2008/09 applies, such that ER can only be claimed on £1m of the disposal. It would seem to follow from this that HMRC's view must be that the 4/9ths deduction applies to the gain rather than the special 10% tax rate. For a higher rate taxpayer this would mean that even the gain benefiting from ER will be subject to tax at 28% (meaning an effective 15.6% tax rate on the £1m gain benefiting from ER relief) with the £4m excess being taxed at 28%.

78 Can HMRC confirm that the above summarises its thoughts on the issue?

HMRC response to Example D3

79 HMRC agree with the analysis. The ER limit to apply with respect to remittance basis gains is that which is in force when the qualifying disposal is made, not when any proceeds are remitted.

49.5.4 *Entrepreneurs' relief: mixed fund rules*

The entrepreneurs' relief note provides:

EXAMPLE D4 – The ER provisions prior to 23 June 2010 and the mixed fund rules

80 The ER legislation at s 169N(4) TCGA 1992 states:

> The amount arrived at under subsections (1) to (3) is to be treated for the purposes of this Act as a chargeable gain accruing at the time of the disposal to the individual or trustees by whom the claim is made.

81 Does HMRC agree that this means that for the purposes of the mixed fund rules (s 809Q ITA 2007) the amount that will go into the foreign chargeable gains category is the amount of the gain after ER (ie after the 4/9ths reduction)?

HMRC response to Example D4

82 The amount to be included in a mixed fund under s 809Q(4) ITA 2007 is the gain as restricted by s 169N.

EXAMPLE D5 – How does ER relief work for remittance basis users given it is now a tax rate?

83 It is clear that without the 4/9ths discount provisions, which reduced the gain itself, the mixed fund rules work somewhat differently. It is unclear whether, in situations where the gain is in excess of the unused ER lifetime allowance, this means that:

- ER can be applied such that 10% tax is paid on the amount on which ER can be claimed (either the £10m lifetime limit or that

limit less the aggregate of prior ER claims made) with future remittances being taxed at the full rates.

- Or, that a blended rate has to be used.

84 As an example: the capital gain on a disposal of shares by a UK-resident foreign domiciliary is, say, £13m. The individual has not made a prior ER claim and the first £10m is remitted over a number of years. Can you apply ER to this first £10m or do you have to use a blended rate because the actual gain exceeds £10m?

HMRC response to Example D5

85 Wherever there is a qualifying disposal and a chargeable gain that attracts the tax rate of 10% and there is a balance of that gain that is taxable at either 18% or 28% (and indeed where the individual may have other gains that do not qualify for ER), then the question arises of how these elements are identified for the purposes of s 12 TCGA 1992.

86 HMRC considers that the mixed fund rules in ITA 2007 may be used to identify and quantify the remittance of the foreign chargeable gain. In the absence of a statutory rule for determining whether or not the gains brought into charge under s 12 are liable at the 10% rate, the onus is on the individual to nominate the 10% rate to apply to the maximum extent (by reference to the computational rules in ss (4)–(4B) of s 169N) in priority to other rates and the individual can do so as part of the normal self assessment process.

Further note

87 We have confirmed with HMRC that the above response means that in the example given the taxpayer would be able to claim on his or her self assessment return that the first £10m remitted is taxed at the special 10% rate.

88 For example: the disposal occurred in 2011/12 and pattern of remittance was as follows:

5m in 2011/12;
5m in 2012/13; and
3m in 2013/14.

Provided an ER claim is made the taxpayer can claim that the remittances in 2011/12 and 2012/13 are taxed at the 10% ER rate.

49.6 Liquidation of offshore company

Suppose:

(1) F (a remittance basis taxpayer) owns non-UK situate shares in a company, and

(2) the company is put into liquidation and F receives a distribution from the liquidator of the company.

F is treated as if F had disposed of the shares in consideration of the distribution: s.122 TCGA. The gain is taxable if the liquidator transfers to the shareholder money in the UK. The same applies if the liquidator transfers assets (land or chattels) enjoyed *in specie* here. It should normally be possible to avoid this.

49.7 UK resident trust

A UK resident trust is in principle subject to CGT even if:
(1) the settlor is a remittance basis taxpayer; and
(2) the trust assets are not situated in the UK.
The remittance basis does not apply as that only applies to "individuals"; trustees are not individuals.

One might avoid this problem for the future by exporting the trust (appointing non-resident trustees) but there may in principle be a migration charge.[14]

One solution may be to transfer assets from the trust to UK resident foreign domiciled beneficiaries absolutely. Although this involves a disposal by the trustees, it may be possible to claim CGT hold-over relief. The relief applies on a disposal to a foreign domiciled beneficiary, even though that beneficiary may later be able to dispose of the asset without a CGT charge.

49.8 Non-resident trade with UK branch

Section 10 TCGA provides:

> (1)[A] Subject to any exceptions provided by this Act, a person shall be chargeable to capital gains tax in respect of chargeable gains accruing to him in a year of assessment if
> [i] the residence condition is not met (see section 2(1A)) but
> [ii] the person is carrying on a trade in the UK through a branch or agency,
> [B] and shall be so chargeable on chargeable gains accruing on the disposal—
> (a) of assets situated in the UK and used in or for the purposes of the trade at or before the time when the capital gain accrued, or
> (b) of assets situated in the UK and used or held for the purposes of the branch or agency at or before that time, or assets acquired for use by or for the purposes of the branch or agency.

14 See 8.5 (Liability of trustees for exit charge).

(2) Subsection (1) above does not apply unless the disposal is made at a time when the person is carrying on the trade in the UK through a branch or agency.

...

Section 10(5) TCGA extends the rule to professions:

This section shall apply as if references in subsections (1) and (2) above to a trade included references to a profession or vocation, but subsection (1) shall not apply in respect of chargeable gains accruing on the disposal of assets only used in or for the purposes of the profession or vocation before 14th March 1989 or only used or held for the purposes of the branch or agency before that date.

Section 10B TCGA provides a similar rule for companies:

(1) Subject to any exceptions provided by this Act, the chargeable profits for the purposes of corporation tax of a company not resident in the UK but carrying on a trade[15] in the UK through a permanent establishment there include chargeable gains accruing to the company on the disposal of—

(a) assets situated in the UK and used in or for the purposes of the trade at or before the time the gain accrued, or

(b) assets situated in the UK and used or held for the purposes of the permanent establishment at or before the time the gain accrued or acquired for use by or for the purposes of the permanent establishment.

(2) Subsection (1) does not apply unless the disposal is made at a time when the company is carrying on a trade in the UK through a permanent establishment there. ...

49.9 DT relief for chargeable gains

Article 13(5) OECD Model provides:

Gains from the alienation of any property, other than that referred to in paragraphs 1, 2, 3 and 4, shall be taxable only in the Contracting State of which the alienator is a resident.

Subject to the four exceptions (discussed below) taxing rights are given to the residence state and not the source state.

---

15 For completeness, s.10B(4) TCGA defines "trade" to include an office, but in practice this will not often be significant.

49.9.1 *Gain subject to income tax*

The OECD Commentary provides:

> 3. ... The Article does not specify to what kind of tax it applies. It is understood that the Article must apply to all kinds of taxes levied by a Contracting State on capital gains. The wording of Article 2 is large enough to achieve this aim and to include also special taxes on capital gains.

See 35.24 (DT relief on offshore income gain).

49.9.2 *Gains*

The OECD Commentary provides:

> 11. The Article does not distinguish as to the origin of the capital gain. Therefore all capital gains, those accruing over a long term, parallel to a steady improvement in economic conditions, as well as those accruing in a very short period (speculative gains) are covered. Also capital gains which are due to depreciation of the national currency are covered. It is, of course, left to each State to decide whether or not such gains should be taxed.
>
> 12. The Article does not specify how to compute a capital gain, this being left to the domestic law applicable. As a rule, capital gains are calculated by deducting the cost from the selling price. To arrive at cost all expenses incidental to the purchase and all expenditure for improvements are added to the purchase price. In some cases the cost after deduction of the depreciation allowances already given is taken into account. Some tax laws prescribe another base instead of cost, e.g. the value previously reported by the alienator of the asset for capital tax purposes.
>
> 13. Special problems may arise when the basis for the taxation of capital gains is not uniform in the two Contracting States. The capital gain from the alienation of an asset computed in one State according to the rules mentioned in paragraph 12 above, may not necessarily coincide with the capital gain computed in the other State under the accounting rules used there. This may occur when one State has the right to tax capital gains because it is the State of situs while the other State has the right to tax because the enterprise is a resident of that other State.
>
> 14. The following example may illustrate this problem: an enterprise of State A bought immovable property situated in State B. The enterprise may have entered depreciation allowances in the books kept in State A. If such immovable property is sold at a price which is above cost, a

capital gain may be realised and, in addition, the depreciation allowances granted earlier may be recovered. State B, in which the immovable property is situated and where no books are kept, does not have to take into account, when taxing the income from the immovable property, the depreciation allowances booked in State A. Neither can State B substitute the value of the immovable property shown in the books kept in State A for the cost at the time of the alienation. State B cannot, therefore, tax the depreciation allowances realised in addition to the capital gain as mentioned in paragraph 12 above.

15. On the other hand, State A of which the alienator is a resident, cannot be obliged in all cases to exempt such book profits fully from its taxes under paragraph 1 of the Article and Article 23 A (there will be hardly any problems for States applying the tax credit method). To the extent that such book profits are due to the realisation of the depreciation allowances previously claimed in State A and which had reduced the income or profits taxable in such State A, that State cannot be prevented from taxing such book profits. The situation corresponds to that dealt with in paragraph 44 of the Commentary on Article 23 A.

16. Further problems may arise in connection with profits due to changes of the rate of exchange between the currencies of State A and State B. After the devaluation of the currency of State A, enterprises of such State A may, or may have to, increase the book value of the assets situated outside the territory of State A. Apart from any devaluation of the currency of a State, the usual fluctuations of the rate of exchange may give rise to so-called currency gains or losses. Take for example an enterprise of State A having bought and sold immovable property situated in State B. If the cost and the selling price, both expressed in the currency of State B, are equal, there will be no capital gain in State B. When the value of the currency of State B has risen between the purchase and the sale of the asset in relation to the currency of State A, in the currency of that State a profit will accrue to such enterprise. If the value of the currency of State B has fallen in the meantime, the alienator will sustain a loss which will not be recognised in State B. Such currency gains or losses may also arise in connection with claims and debts contracted in a foreign currency. If the balance sheet of a permanent establishment situated in State B of an enterprise of State A shows claims and debts expressed in the currency of State B, the books of the permanent establishment do not show any gain or loss when repayments are made. Changes of the rate of exchange may be reflected, however, in the accounts of the head office. If the value of the currency of State B has risen (fallen) between the time the claim has originated and its repayment, the enterprise, as a whole, will realise a gain (sustain

a loss). This is true also with respect to debts if between the time they have originated and their repayment, the currency of State B has fallen (risen) in value.

17. The provisions of the Article do not settle all questions regarding the taxation of such currency gains. Such gains are in most cases not connected with an alienation of the asset; they may often not even be determined in the State on which the right to tax capital gains is conferred by the Article. Accordingly, the question, as a rule, is not whether the State in which a permanent establishment is situated has a right to tax, but whether the State of which the taxpayer is a resident must, if applying the exemption method, refrain from taxing such currency gains which, in many cases, cannot be shown but in the books kept in the head office. The answer to that latter question depends not only on the Article but also on Article 7 and on Article 23 A. If in a given case differing opinions of two States should result in an actual double taxation, the case should be settled under the mutual agreement procedure provided for by Article 25.

18. Moreover the question arises which Article should apply when there is paid for property sold an annuity during the lifetime of the alienator and not a fixed price. Are such annuity payments, as far as they exceed costs, to be dealt with as a gain from the alienation of the property or as "income not dealt with" according to Article 21? Both opinions may be supported by arguments of equivalent weight, and it seems difficult to give one rule on the matter. In addition such problems are rare in practice, so it therefore seems unnecessary to establish a rule for insertion in the Convention. It may be left to Contracting States who may be involved in such a question to adopt a solution in the mutual agreement procedure provided for by Article 25.

19. The Article is not intended to apply to prizes in a lottery or to premiums and prizes attaching to bonds or debentures.

31. If shares are sold by a shareholder to the issuing company in connection with the liquidation of such company or the reduction of its paid-up capital, the difference between the selling price and the par value of the shares may be treated in the State of which the company is a resident as a distribution of accumulated profits and not as a capital gain. The Article does not prevent the State of residence of the company from taxing such distributions at the rates provided for in Article 10: such taxation is permitted because such difference is covered by the definition of the term "dividends" contained in paragraph 3 of Article 10 and interpreted in paragraph 28 of the Commentary relating thereto. The same interpretation may apply if bonds or debentures are redeemed by the debtor at a price which is higher than the par value or the value

at which the bonds or debentures have been issued; in such a case, the difference may represent interest and, therefore, be subjected to a limited tax in the State of source of the interest in accordance with Article 11 (cf. also paragraphs 20 and 21 of the Commentary on Article 11).

32. There is a need to distinguish the capital gain that may be derived from the alienation of shares acquired upon the exercise of a stock-option granted to an employee or member of a board of directors from the benefit derived from the stock-option that is covered by Articles 15 or 16. The principles on which that distinction is based are discussed in paragraphs 12.2 to 12.5 of the Commentary on Article 15 and paragraph 3.1 of the Commentary on Article 16.

49.9.3 *"Alienation"*

The Supreme Court of Appeal of South Africa has held that "alienation" includes a deemed disposal:

> [24] Article 13 is widely cast. It includes within its ambit capital gains derived from the alienation of all property. It is reasonable to suppose that the parties to the DTA were aware of the provisions of the Eighth Schedule and must have intended Art 13 to apply to capital gains of the kind provided in the Schedule. It is of significance that no distinction is drawn in Art 13(4) between capital gains that arise from actual or deemed alienations of property. There is moreover no reason in principle why the parties to the DTA would have intended that Art 13 should apply only to taxes on actual capital gains resulting from actual alienations of property.
>
> [25] Having regard to the factors mentioned, I am of the view that the term 'alienation' as it is used in the DTA is not restricted to actual alienation. It is a neutral term having a broader meaning, comprehending both actual and deemed disposals of assets giving rise to taxable capital gains.[16]

The same point should apply in the UK.

The OECD Commentary provides:

> 5. The Article does not give a detailed definition of capital gains. This is not necessary for the reasons mentioned above. The words "alienation of property" are used to cover in particular capital gains resulting from

16 *Commissioner for the South African Revenue Service v Tradehold* [2012] ZASCA 61, 14 ITELR 967.

the sale or exchange of property and also from a partial alienation, the expropriation, the transfer to a company in exchange for stock, the sale of a right, the gift and even the passing of property on death.

6. Most States taxing capital gains do so when an alienation of capital assets takes place. Some of them, however, tax only so-called realised capital gains. Under certain circumstances, though there is an alienation no realised capital gain is recognised for tax purposes (e.g. when the alienation proceeds are used for acquiring new assets). Whether or not there is a realisation has to be determined according to the applicable domestic tax law. No particular problems arise when the State which has the right to tax does not exercise it at the time the alienation takes place.

7. As a rule, appreciation in value not associated with the alienation of a capital asset is not taxed, since, as long as the owner still holds the asset in question, the capital gain exists only on paper. There are, however, tax laws under which capital appreciation and revaluation of business assets are taxed even if there is no alienation.

8. Special circumstances may lead to the taxation of the capital appreciation of an asset that has not been alienated. This may be the case if the value of a capital asset has increased in such a manner that the owner proceeds to the revaluation of this asset in his books. Such revaluation of assets in the books may also occur in the case of a depreciation of the national currency. A number of States levy special taxes on such book profits, amounts put into reserve, an increase in the paid-up capital and other revaluations resulting from the adjustment of the book-value to the intrinsic value of a capital asset. These taxes on capital appreciation (increment taxes) are covered by the Convention according to Article 2.

9. Where capital appreciation and revaluation of business assets are taxed, the same principle should, as a rule, apply as in the case of the alienation of such assets. It has not been found necessary to mention such cases expressly in the Article or to lay down special rules. The provisions of the Article as well as those of Articles 6, 7 and 21, seem to be sufficient. As a rule, the right to tax is conferred by the above-mentioned provisions on the State of which the alienator is a resident, except that in the cases of immovable property or of movable property forming part of the business property of a permanent establishment, the prior right to tax belongs to the State where such property is situated. Special attention must be drawn, however, to the cases dealt with in paragraphs 13 to 17 below.

10. In some States the transfer of an asset from a permanent establishment situated in the territory of such State to a permanent establishment or the head office of the same enterprise situated in

another State is assimilated to an alienation of property. The Article does not prevent these States from taxing profits or gains deemed to arise in connection with such a transfer, provided, however, that such taxation is in accordance with Article 7.

49.9.4 *Losses accruing to person who qualifies for DT relief on gains*

The International Manual provides:

> **INTM153150 - Description of double taxation agreements: Capital gains** [March 2011]
> ...Business International, Tax Treaty Team would like to see any case where an individual claims relief for capital losses in circumstances where a corresponding gain would be exempt from United Kingdom tax under the terms of a double taxation agreement. In the case of companies such losses are not allowable by virtue of TCGA92/S8(2).

It is easy to think of cases where losses would be allowable but gains exempt; however in practice it will not often matter.

49.10 DT relief: Exceptions

The OECD Commentary provides:

> 4. It is normal to give the right to tax capital gains on a property of a given kind to the State which under the Convention is entitled to tax both the property and the income derived therefrom.

The exceptions are fairly narrow.

49.10.1 *Immovable property*

Article 13(1) OECD model provides:

> Gains derived by a resident of a Contracting State from the alienation of immovable property referred to in Article 6[17] and situated in the other Contracting State may be taxed in that other State.

49.10.2 *Business property of a PE*

Article 13(2) OECD model provides:

> Gains from the alienation of movable property forming part of the business property of a permanent establishment which an enterprise of a Contracting State has in the other Contracting State, including such

17 See 16.6.1 ("Immovable property").

gains from the alienation of such a permanent establishment (alone or with the whole enterprise), may be taxed in that other State.

The OECD Commentary provides:

4. The right to tax a gain from the alienation of a business asset must be given to the same State without regard to the question whether such gain is a capital gain or a business profit. Accordingly, no distinction between capital gains and commercial profits is made nor is it necessary to have special provisions as to whether the Article on capital gains or Article 7 on the taxation of business profits should apply. It is however left to the domestic law of the taxing State to decide whether a tax on capital gains or on ordinary income must be levied. The Convention does not prejudge this question.

49.10.3 *Ships and aircraft*

For completeness: Article 13(3) OECD model provides:

Gains from the alienation of ships or aircraft operated in international traffic, boats engaged in inland waterways transport or movable property pertaining to the operation of such ships, aircraft or boats, shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated.

49.10.4 *Land-rich company*

For completeness: Article 13(4) OECD model provides:

Gains derived by a resident of a Contracting State from the alienation of shares deriving more than 50 per cent of their value directly or indirectly from immovable property situated in the other Contracting State may be taxed in that other State.

This clause is not usually found in UK treaties.

CHAPTER FIFTY

GAINS OF NON-RESIDENT SETTLOR-INTERESTED TRUSTS: S.86

50.1 CGT on non-resident trusts: Introduction

A trust is in principle treated as a taxable unit.[1] If the trustees are UK resident, they are subject to CGT, even if the beneficiaries have no connection with the UK. Non-resident trustees are in principle not subject to CGT, even if beneficiaries are resident in the UK.[2] This rule presents an obvious means of CGT avoidance. HMRC's first answer to this is the anti-avoidance rules in ss.86, 87 TCGA.

In outline:

(1) A settlor is subject to CGT on gains accruing to a non-resident trust if:
   (a) The settlor is UK resident and UK domiciled.
   (b) The settlor has an "interest" in the settlement. (This is widely and artificially defined.)

   I refer to this as the **"s.86 charge"** and I refer to the gains treated as accruing to the settlor under this section as **"s.86 gains"**.

(2) A beneficiary is subject to CGT if:
   (a) The beneficiary is UK resident.
   (b) The beneficiary receives a capital payment from the trust.
   (c) The trust realises gains.

   I refer to this as the **"s.87 charge"** or the **"s.87 capital payments basis"** and I refer to the gains treated as accruing to a beneficiary under this section as **"s.87 gains"** . This topic is discussed in the next chapter.

---

1 See 5.3 (Trustees treated as single and distinct person).

2 See 49.1 (Territorial scope of CGT).

The s.86 charge is the subject of this chapter. The charge was extended in 1991 and 1998 with transitional relief for:
(1) trusts made before 19 March 1991 **("pre-1991 trusts")**
(2) trusts made before 17th March 1998 **("pre-1998 trusts")**
I refer to trusts which qualify for these reliefs as **"pre-1991 protected trusts"** and **"pre-1998 protected trusts"**.

Sloppy and repetitive drafting adds to the difficulties.

50.1.1 *Cross references*

The following matters are considered elsewhere:
51.5.2 (Section 86 gains deducted from s.2(2) amount)
54.6 (Loss accruing to non-resident trustees)
54.8 (Personal losses of settlor and s.86 gains)
51.33 (CGT planning aspects of non-resident trusts)
59.10 (DT reliefs: s.86 TCGA)
81.3 (Two or more settlors of settlor-interested trust: CGT).

50.2 Fundamental s.86 conditions

Section 86(1) TCGA sets out eight sets of conditions for s.86 to apply. I refer to these as "**the fundamental s.86 conditions**". In their statutory order they are:
(1) Qualifying settlement
(2) Trustee residence condition
(3) Settlor residence and domicile condition
(4) Settlor-interested condition
(5)-(8) Death/divorce of settlor or certain beneficiares
It is convenient to consider the settlor-interested condition before the others.

50.3 Minor definitions

It is helpful first of all to clear out of the way some (relatively) minor and unsurprising definitions. They are repeated up to five times, in identical words: the repetition is because on each occasion the definitions are expressed to be for the purposes of the paragraph and not for the purposes of the schedule or the Act. I set out the para 9 version and give the references for the others.

50.3.1 *"Settlement" and "settlor"*

"Settlement" is not expressly defined so the standard IT/CGT definition

applies. Contrast the IT settlor-interested trust rules, and the s.87 rules, where the settlement-arrangement definition applies. It would be bold to plan on the assumption that this will not change.

For "settlor" see 80.3.5 (CGT s.86 definition of settlor).

50.3.2 *"Control" and "participator"*

Para 9(9) Sch 5 TCGA provides a slightly cut down form of the ultra-wide sense of control:[3]

> [a] For the purposes of sub-paragraph (7) above the question whether a company is controlled by a person or persons shall be construed in accordance with sections 450 and 451 of CTA 2010;
> [b] but in deciding that question for those purposes no rights or powers of (or attributed to) an associate or associates of a person shall be attributed to him under section 451(4) to (6) of CTA 2010 if he is not a participator in the company.

Paras 2(8), 2A(8) and 8(8) Sch 5 TCGA and s 96(10) TCGA each repeat this definition.

Participator is relevant to this definition of control. Para 9(11) sch 5 TCGA provides the standard definition:

> In this paragraph ... "participator" has the meaning given by section 454 of CTA 2010.

Paras 2(10), 2A(10), 8(9) sch 5 TCGA and s.96(10) TCGA each repeat this definition verbatim.

ESC D40 provides:

> [The concession outlines the context in which the definition is used, and continues:]
> In applying the provisions of Sch 5 paras 2A(10), 8, 9(11) and s 96 a beneficiary of the trust, by concession, is not regarded as a participator in the company solely because of his status as beneficiary.[4]

It may be in the interest of a taxpayer to rely on the law rather than this concession. A concession cannot be used to increase the tax burden.

---

3 For discussion of the ultra-wide sense of control, see 85.2.2 (Meaning(s) of "control").

4 In March 2013 HMRC consulted informally on a proposals either to withdraw ESC D40 or to introduce legislation with like effect.

50.3.3 *"Associated company"*

Para 9(10) Sch 5 TCGA provides a slightly cut down form of the usual wide definition:

> For the purposes of sub-paragraph (7) above the question whether one company is associated with another shall be construed in accordance with section 449 of CTA 2010; but where in deciding that question for those purposes it falls to be decided whether a company is controlled by a person or persons, no rights or powers of (or attributed to) an associate or associates of a person shall be attributed to him under section 451(4) to (6) of CTA 2010 if he is not a participator in the company.

Paras 2(9) and 2A(9) Sch 5 TCGA repeat the definition.

50.3.4 *"Child" and "grandchild"*

Para 9(11) sch 5 TCGA provides:

> In this paragraph—
> "child" includes a step-child;
> "grandchild" means a child of a child;

This is repeated verbatim in para 2A(10) Sch 5 TCGA.

50.3.5 *"Relevant property" and "relevant income"*

Para 2(2) Sch 5 TCGA provides:

> (a) relevant property is property originating from the settlor,
> (b) relevant income is income originating from the settlor.

This is repeated (more or less) verbatim in para 9(10D) Sch 5 TCGA.

50.4 Settlor-interested condition

This s.86 condition is in s.86(1)(d):

> at any time during the year the settlor has an interest in the settlement;

If a settlement becomes (or ceases to be) settlor-interested during a tax year, s.86 TCGA applies for the whole tax year, This is unlike the IT rules (where if a settlor is excluded s.624 ITTOIA ceases to apply from the date of the exclusion).[5] There is reason for the distinction, because the s.86 charge is on gains less losses for the entire year, and splitting the year

5 See 27.3.6 (Settlement ceasing to be settlor-interested).

would involve some trouble. The rule does however mean that CGT planning by excluding the settlor must be carried out some time in advance.

50.4.1 "*Settlor-interested*"

The term "settlor-interested" in a s.86 context[6] is a label for a complex set of rules.

Para 2 Sch 5 TCGA provides:

> (1) For the purposes of section 86(1)(d) a settlor has an interest in a settlement if—
>
> (a) any relevant property[7] which is or may at any time be comprised in the settlement is, or will or may become, applicable for the benefit of or payable to a defined person in any circumstances whatever,
>
> (b) any relevant income which arises or may arise under the settlement is, or will or may become, applicable for the benefit of or payable to a defined person in any circumstances whatever, or
>
> (c) any defined person enjoys a benefit directly or indirectly from any relevant property which is comprised in the settlement or any relevant income arising under the settlement;
>
> but this sub-paragraph is subject to sub-paragraphs (4) to (6) and paragraph 2A below.

The key term is "defined person". Para 2(3) Sch 5 TCGA provides:

> For the purposes of sub-paragraph (1) above each of the following is a defined person—
>
> (a) the settlor,
>
> (b) the settlor's spouse or civil partner;
>
> (c) any child of the settlor or of the settlor's spouse or civil partner;
>
> (d) the spouse or civil partner of any such child;
>
> (da) any grandchild of the settlor or of the settlor's spouse or civil partner;
>
> (db) the spouse or civil partner of any such grandchild;
>
> (e) a company controlled by a person or persons falling within paragraphs (a) to (db) above;

---

6 The same term is used in an IT context with a different meaning: see 27.3.1 (The concepts of "settlor-interested").

7 See 50.3.5 ("Relevant property" and "relevant income").

(f) a company associated with a company falling within paragraph (e) above.

The history has been one of gradual expansion, with the reference to children added in 1991 and paras (da) and (db) - dealing with grandchildren - added in 1998. Thus the definition of settlor-interested is wider than the IT equivalent in s.624, eg the settlor is chargeable on gains accruing to a trust from which their children or grandchildren could benefit even though there is no actual benefit to the settlor.

Para 2(4) Sch 5 TCGA provide exceptions copied from the precedent of the IT settlor-interested trust rules; they have no significant application in practice.

The IT settlor-interested rules have a provision that references to spouses do not include separated or potential future spouses. Unfortunately, the CGT settlor-interested rules do not have that rule. The omission raises a number of difficulties.

50.4.2 *Civil partner and same-sex spouses as beneficiaries*

The Civil Partnership Act took effect on 5 December 2005. Before then, civil partners of the settlor were not expressly excluded in trust drafting, so a trust which merely excluded spouses might become settlor-interested from 2005! HMRC will tactfully overlook that:

> For settlements made before 5 December 2005, the settlor may not have been considered to have retained an interest in the settlement for Income Tax purposes, as both the settlor and his spouse were specifically excluded from benefit under the particular terms of the settlement deed. Although such an 'exclusion clause' would not have included a 'civil partner', HMRC will not regard the settlor as retaining an interest unless and until a beneficiary becomes the civil partner of the settlor.[8]
>
> With regards to the provisions of Section 86 TCGA 1992, whereby the gains of a non-resident trust or dual resident trust are chargeable on the settlor. If such provisions did not apply in relation to a settlement made prior to 5 December 2005, and the deed was drafted in such an obvious way as to exclude spouses or future spouses without particular definition of those terms, that exclusion might reasonably be regarded in the context as covering civil partners and those treated as such under CPA who stand in the same position as spouses under the law from 5 December 2005. In such circumstances it will not be HMRC's intention

8 For IT, this rule is statutory; see ? (Meaning of "spouse/civil partner").

> to apply those provisions to a settlement only as a result of the coming into effect of the CPA. For settlements made on or after 5 December 2005, it is expected that the drafting of the settlement deed excludes the full list of 'defined persons' (Schedule 5, Para 2(3) TCGA 1992), including 'civil partners', from benefiting in any circumstances under the settlement, if it is intended for the settlement not to be caught by the provisions.[9]

This is just a concession and it may be in the interest of beneficiaries to argue that a pre-2005 settlement under which a future civil partner may benefit should be treated as settlor-interested for CGT purposes.

A similar problem arises with same-sex spouses, for trusts made before the Marriage (Same Sex Couples) Act 2013 came into force. A pre-Act exclusion clause which excludes "spouses" will not exclude a same-sex spouse: see para 1 sch 4 Marriage (Same Sex Couples) Act 2013. But I expect HMRC will operate a similar concession.

50.4.3 *Potential defined persons*

ICAEW Guidance note on non-resident settlements (TAX 20/92) 14 December 1992 provides:

> 24 ... TCGA 1992 Sch 5 specifies the test as to whether the settlor has an interest. Each of sub-paragraphs 2(1)(a) and(b) uses the words "may…in any circumstances whatever". Interpreted literally, it appears virtually impossible to define a trust where the settlor does not have an interest, because any beneficiary may become a relative of the settlor as a result of subsequent marriages (or indeed subsequent births if necessary to imagine all conceivable possibilities). ...
>
> *Revenue response:* If the terms of a settlement are so framed that a clearly defined person can benefit, eg the class of beneficiaries includes "any spouse of the settlor" or "spouses of the settlor's children", or such persons could be added to the class of beneficiaries, then the settlor will be treated as having an "interest" in the trust. However, where there is no prima facie possibility of a defined person benefiting, the Revenue will not treat the settlor as having an "interest", unless the terms of the settlement and the circumstances of the case indicate an intention to benefit a person who is likely to become a defined person in the future, eg a settlement in favour of the fiancé of the settlor or of the settlor's child.

---

9 "HMRC Residency: Non-resident trusts" *http://www.hmrc.gov.uk/cnr/nr_trusts.htm*.

50.4.4 *Separated spouse*

ICAEW Guidance note on non-resident settlements (TAX 20/92) 14 December 1992 provides:

> 25 Also on the question of whether a settlor has an interest in a trust, it would be helpful if the statement of practice could confirm that a separated spouse would not be regarded as the settlor's spouse for this purpose.
> *Revenue response:* A separated spouse would be regarded as a spouse for the purposes of these provisions unless, in accordance with existing practice (see para 13(a) Appendix B of the Resident trusts consultative document 19 March 1991)[10] on other provisions having a bearing on "settlor interest" trusts, the separation is permanent.

50.5 Pre-1998 protected trusts

Para 2A(1) TCGA provides:

> In determining for the purposes of section 86(1)(d) whether the settlor has an interest at any time during any year of assessment in a settlement created before 17th March 1998, paragraphs (da) and (db) of paragraph 2(3) above, and the reference to those paragraphs in paragraph 2(3)(e), shall be disregarded ...

In short, the relief is that a protected pre-1998 trust (one where the trigger conditions do not apply) is allowed to benefit the settlor's grandchildren without becoming "settlor-interested".

Para 2A continues:

---

10 The reference is to the former SP A30 which provided:
"The settlement legislation [now s.624 ITTOIA] includes provisions which may be applied to any settlement where the spouse or any possible future spouse of a settlor may be able to benefit from the income or capital of the settlement in any circumstances whatsoever. In relation to the concept of "possible future spouse" the Board of Inland Revenue have considered the scope of the decision reached in the case of *IRC v Tennant* (24 TC 215) and they take the view that that decision applies -
(a) where, although a settlor is not at the material time a party to a subsisting marriage, the terms of the settlement are such that a benefit may be conferred on substantially any person who may become the wife or husband of the settlor in future, or
(b) where, whether or not the settlor is married, the terms of the settlement are such as to indicate a specific intention that a future wife or husband of the settlor may be enabled to benefit."

> ... unless—
>
> (a) that year is a year in which one of the four conditions set out in the following provisions of this paragraph becomes fulfilled as regards the settlement; or
>
> (b) one of those conditions became fulfilled as regards that settlement in any previous year of assessment ending on or after 5th April 1998.

I refer to these conditions as **"s.86 trigger conditions"**. Technically their effect is that the trust becomes settlor-interested, but the real consequence is that s.86 begins to apply.

50.5.1 *First s.86 trigger condition: Provision of property*

Para 2A(2) Sch 5 TCGA provides:

> The first condition is (subject to sub-paragraph (3) below) that on or after 17th March 1998 property or income is provided directly or indirectly for the purposes of the settlement—
>
> (a) otherwise than under a transaction entered into at arm's length, and
>
> (b) otherwise than in pursuance of a liability incurred by any person before that date.

This is discussed in the chapter "who is the settlor": see 80.3.5 (CGT s.86 definition of settlor).

Para 2A(3) Sch 5 TCGA provides:

> For the purposes of the first condition, where the settlement's expenses relating to administration and taxation for a year of assessment exceed its income for the year, property or income provided towards meeting those expenses shall be ignored if the value of the property or income so provided does not exceed the difference between the amount of those expenses and the amount of the settlement's income for the year.

SP 5/92 provides:

> 26 The following items are not regarded as "expenses relating to administration" within the terms of the proviso to TCGA 1992 Sch 5 para 9(3)—
>
> – loan interest (other than interest on a loan taken out to meet expenses of administration within the terms of the proviso);
>
> – the costs of acquiring, enhancing or disposing of an asset;
>
> – expenses incurred in connection with a particular trust asset to the extent that such expenditure can be set against income arising from

that asset. For the purpose of the proviso to para 9(3), the measure of the gross income from such a source is net of expenses.

27 The term "expenses relating to… taxation" in TCGA 1992 Sch 5 para 9(3) is regarded as encompassing UK or foreign taxes to which the trustees are liable, along with any interest and penalties due on that tax. It could also include certain costs incurred by the trustees under the terms of the trust in obtaining information regarding the beneficiaries' tax liabilities. One example might be where the trustees, in order to ensure they were acting in a beneficiary's best interests, had to ascertain the tax implications for the beneficiary in adopting a particular course of action.

28 It is only the settlement's expenses relating to administration or taxation which are within the terms of the proviso to TCGA 1992 Sch 5 para 9(3). Expenses of, for example, a company wholly owned by the trustees fall outside its scope....

30 Normally the specific date on which the liability to an expense relating to administration or taxation was incurred determines the year into which it falls for the purpose of applying the proviso to TCGA 1992 Sch 5 para 9(3). Where, however, the expense is incurred for a period rather than on a specific date, the basis of allocating expenses adopted by the trustees in preparing trust accounts or returns is, generally, regarded as acceptable provided that this basis is consistently adopted and is in accordance with conventional trust accounting practice.

31 Additions to meet the difference between expenses relating to administration and taxation and any income arising to the trust do not have to be made by 5 April in the relevant year of assessment. There must, however, be a clear connection between the amount added and the computed shortfall. Additions should, therefore, be made as soon as the relevant figures are available.

32 Income, for the purposes of the proviso to TCGA 1992 Sch 5 para 9(3), is the total income which arises to the trustees in the relevant year, rather than the income which is (or would be if the trust were resident in the UK) subject to UK tax. Usually, items of income will need to be allocated to the year in which they arise for the purposes of the proviso, but, in practice, income arising from a trade carried on by the trustees may be apportioned on a time basis, provided that this basis is consistently followed.

50.5.2 *Second s.86 trigger condition: Emigrating trust*

Para 2A(4) Sch 5 TCGA provides:

The second condition is that—

(a) the trustees cease on or after 17 March 1998 to be resident in the UK, or
(b) the trustees, while continuing to be resident in the UK, become on or after 17th March 1998 trustees who fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.

If the emigration is to an EU member state, this rule would breach EU law: see 8.9 (EU restriction on exit taxes).

50.5.3 *Third s.86 trigger condition: Variation of trust*

Para 2A(5) Sch 5 TCGA provides:

> The third condition is that on or after 17th March 1998 the terms of the settlement are varied so that any person falling within sub-paragraph (7) below becomes for the first time a person who will or might benefit from the settlement.

SP 5/92 provides:

> 36 This provision is concerned with situations where the terms of the settlement are varied by the beneficiaries or a court to admit new beneficiaries within the class of persons defined at TCGA 1992 Sch 5 para 9(7) without thereby bringing the settlement to an end and creating a new one. For example, where the terms of the trust include a power to appoint anyone within a specified range to be a beneficiary, exercise of that power after 19 March 1991 will not be regarded as a variation of the settlement...

50.5.4 *Fourth s.86 trigger condition: Unexpected beneficiary*

Para 2A(6) Sch 5 TCGA provides:

(6) The fourth condition is that—
  (a) on or after 17th March 1998 a person falling within sub-paragraph (7) below enjoys a benefit from the settlement for the first time, and
  (b) the person concerned is not one who (looking only at the terms of the settlement immediately before 17th March 1998) would be capable of enjoying a benefit from the settlement on or after that date.
(7) Each of the following persons falls within this sub-paragraph—
  (a) any grandchild of the settlor or of the settlor's spouse or civil partner;
  (b) the spouse of or civil partner any such grandchild;

(c) a company controlled by a person or persons falling within paragraph (a) or (b) above;
(d) a company controlled by any such person or persons together with any person or persons (not so falling) each of whom is for the purposes of paragraph 2(1) above a defined person in relation to the settlement;
(e) a company associated with a company falling within paragraph (c) or (d) above.

SP 5/92 provides:

> 37 For the purposes of clarification, this condition deals with "ultra vires" payments, ie cases where one of the persons defined at TCGA 1992 Sch 5 para 9(7) receives a benefit from the trust for the first time and that person is not a beneficiary under the terms of the trust deed. It may also apply where such a person benefits from a transaction with the settlement carried out, for example, under the trustees' investment powers.

This trigger condition may apply in the case of an ultra vires payment (ie a payment in breach of trust), but only if the payment is in fact a benefit.[11] A transaction under the trustees investment powers is not in principle a benefit, unless perhaps the transaction is a breach of trust, in which case it is not really "under the trustees investment powers".

50.6 Qualifying settlement

Section 86(1) provides:

> This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment—
> (a) the settlement is a qualifying settlement in the year;

"Qualifying" settlement is a label for a set of transitional rules.

50.6.1 *Post-1991 trust*

This is straightforward. Para 9(1) Sch 5 TCGA provides:

> A settlement created on or after 19th March 1991 is a qualifying settlement for the purposes of section 86 and this Schedule in—
> (a) the year of assessment in which it is created, and
> (b) subsequent years of assessment.

---

11 See 30.4.15 ("Benefit" provided in breach of trust).

50.7 Pre-1991 protected trusts

Para 9 continues with a complex grandfathering relief for what statute calls "protected settlements"; although it is generally better to adopt statutory terminology, I refer to these as **"pre-1991 protected trusts"**. That terminology avoids confusion with pre-1998 protected trusts.

Para 9 (1A) Sch 5 TCGA provides:

> Subject to sub-paragraph (1B) below, a settlement created before 19th March 1991 is a qualifying settlement for the purposes of section 86 and this Schedule in—
>
> (a) the year 1999–00, and
>
> (b) subsequent years of assessment.

The relief is in para 1B. Para 9(1B) sch 5 TCGA provides:

> Where a settlement created before 19th March 1991 is a protected settlement immediately after the beginning of 6th April 1999, that settlement shall be treated as a qualifying settlement for the purposes of section 86 and this Schedule in a year of assessment mentioned in sub-paragraph (1A)(a) or (b) above only if—
>
> (a) any of the five conditions set out in subsections (3) to (6A) below becomes fulfilled as regards the settlement in that year; or
>
> (b) any of those five conditions became so fulfilled in any previous year of assessment ending after 19th March 1991.

I refer to these conditions as **"s.86 trigger conditions"**. Technically their effect is that the trust becomes a qualifying settlement, but the real consequence is that s.86 begins to apply. The drafting technique is different from that used for pre-1998 settlements but the end result is essentially the same.

The relief for pre-1991 trusts was important in its day, and HMRC issued extensive guidance. The guidance has ceased to be directly important (because there are now few if any pre-1991 protected trusts left) but it is still relevant where similar wording is used elsewhere.

50.7.1 "*Protected settlements*"

Para 9 sch 5 TCGA provides:

> (10A) Subject to sub-paragraph (10B) below, a settlement is a protected settlement at any time in a year of assessment if at that time the

beneficiaries[12] of that settlement are confined to persons falling within some or all of the following descriptions, that is to say—

(a) children of a settlor or of a spouse or civil partner of a settlor who are under the age of eighteen at that time or who were under that age at the end of the immediately preceding year of assessment;

(b) unborn children of a settlor, of a spouse or civil partner of a settlor, or of a future spouse or civil partner of a settlor;

(c) future spouses or civil partners of any children or future children of a settlor, a spouse or civil partner of a settlor or any future spouse or civil partner of a settlor;

(d) a future spouse or civil partner of a settlor;

(e) persons outside the defined categories.

(10B) For the purposes of sub-paragraph (10A) above a person is outside the defined categories at any time if, and only if, there is no settlor by reference to whom he is at that time a defined person in relation to the settlement for the purposes of paragraph 2(1) above.

The point is that a pre-1991 protected trust may have minor children of the settlor as beneficiaries, but if it is to remain protected, it must exclude them before they become 18.

The trigger conditions are set out at length in para 9, but the first two are the same as the s.86 trigger conditions which apply to pre-1998 protected trusts; they need not be separately set out here.[13]

50.7.2 *Third and fourth conditions*

The third and fourth conditions are based on the s.86 trigger conditions which apply to pre-1998 protected trusts with corresponding amendments

---

12 Para 9(10C) defines beneficiary: "For the purposes of sub-paragraph (10A) above a person is a beneficiary of a settlement if—

(a) there are any circumstances whatever in which relevant property which is or may become comprised in the settlement is or will or may become applicable for his benefit or payable to him;

(b) there are any circumstances whatever in which relevant income which arises or may arise under the settlement is or will or may become applicable for his benefit or payable to him;

(c) he enjoys a benefit directly or indirectly from any relevant property comprised in the settlement or any relevant income arising under the settlement."

13 Para 9(3) = para 2A(2); see 50.5.1 (First s.86 trigger condition: provision of property). Para 9(4) = para 2A(4); see 50.5.2 (Second s.86 trigger condition: emigrating trust).

in the wording. Para 9 Sch 5 TCGA provides:

> (5) The third condition is that on or after 19th March 1991 the terms of the settlement are varied so that any person falling within sub-paragraph (7) below becomes for the first time a person who will or might benefit from the settlement.
> (6) The fourth condition is that—
> (a) on or after 19th March 1991 a person falling within sub-paragraph (7) below enjoys a benefit from the settlement for the first time, and
> (b) the person concerned is not one who (looking only at the terms of the settlement immediately before 19th March 1991) would be capable of enjoying a benefit from the settlement on or after that date.

Para 9(7) Sch 5 TCGA provides:

> Each of the following persons falls within this sub-paragraph—
> (a) a settlor;
> (b) the spouse or civil partner of a settlor;
> (c) any child of a settlor or of a settlor's spouse or civil partner;
> (d) the spouse or civil partner of any such child;
> (da) any grandchild of a settlor or of a settlor's spouse or civil partner;
> (db) the spouse or civil partner of any such grandchild;
> (e) a company controlled by a person or persons falling within paragraphs (a) to (db) above;
> (f) a company associated with a company falling within paragraph (e) above.

See 50.5.3 (Third s.86 trigger condition: variation of trust); 50.5.4 (Fourth s.86 trigger condition: unexpected beneficiary).

50.7.3 *Fifth s.86 trigger condition: Ceasing to be protected*

Para 9(6A) Sch 5 TCGA provides:

> The fifth condition is that the settlement ceases to be a protected settlement at any time on or after 6th April 1999.

50.7.4 *Commentary: let's abolish relief for pre-1991 protected trusts*

These rules have been in place since 1991. Children then living (or indeed born in the following few years) have now reached 18. It is possible to envisage circumstances in which pre-1991 protected trusts could still exist

but I suspect that there are no pre-1991 protected trusts now in existence. It is suggested in the interests of simplification that the transitional relief for pre-1991 protected trusts should now be withdrawn.

50.8 Trustee residence condition

This s.86 condition is in s.86(1)(b) TCGA:

> the trustees of the settlement fulfil the condition as to residence specified in subsection (2) below;

This takes us to s.86(2) TCGA which provides:

> (2) The condition as to residence is that—
> (a) there is no time in the year when the trustees are resident in the UK, or
> (b) there is such a time but, whenever the trustees are resident in the UK during the year, they fall to be regarded for the purposes of any double taxation relief arrangements[14] as resident in a territory outside the UK.

Condition (a) is that the trustees are non-resident; condition (b) is that the trustees are UK-law UK resident but treaty-resident in a foreign state with a capital gains article (under the tie-breaker).[15]

50.9 Settlor residence and domicile condition

This s.86 condition is in s.86(1)(c):

> a person who is a settlor in relation to the settlement ("the settlor"):
> [i] is domiciled in the UK at some time in the year and
> [ii] is resident in the UK for the year;

Section 86 does not apply to a foreign domiciled settlor, whether or not they claim the remittance basis. At first sight this seems a surprising inconsistency with the general scheme of taxation of foreign domiciliaries, introduced in 2008. It was however a deliberate decision.[16] No reason was given for it so it is tempting to speculate. Probably it reflects an understanding, which most readers would accept, that it is not appropriate to apply the rules to settlors and trustees from outside the UK because: (1) the definition of "settlor-interested" for s.86 purposes is too wide, and

---

14 For the meaning of this term, see 9A.3.3 ("DTR arrangements" – CGT).

15 For treaty aspects, see 59.10 (DT reliefs: s.86 TCGA).

16 The draft clauses which would have amended s.86 were withdrawn.

(2) the trigger conditions are too harsh and too complicated,

One must bear in mind that foreign settlors and trustees may not have had the same opportunities to consider UK legislation when making or administering their settlements.

That is actually quite a good reason, though one should not assume that rules of tax law, even important rules, are necessarily enacted with good reasons in mind. Perhaps it was just a concession thrown without much rationalisation, to placate the lobby opposing the 2008 reforms, that is, the true explanation may be located in tax politics rather than tax policy.

Although no claim is needed, the matter should be disclosed on a tax return, if one is completed: see 50.17.1 (Non-domiciled settlor).

50.10 Section 86 trust gains condition

This condition is in s.86(1)(e):

> by virtue of disposals of any of the settled property originating from the settlor, there is an amount on which the trustees would be chargeable to tax for the year under section 2(2) if the assumption as to residence specified in subsection (3) below were made.

I refer to this as the "**s.86 trust gains condition**".

50.10.1 *Assumption as to residence*

The assumption as to residence is set out in s.86(3) TCGA but in order to follow it one must read it with s.86(2):

> (2) The condition as to residence is that—
>
> (a) there is no time in the year when the trustees are resident in the UK, or
>
> (b) there is such a time but, whenever the trustees are resident in the UK during the year, they fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK
>
> (3) [a] Where subsection (2)(a) above applies, the assumption as to residence is that the trustees are resident in the UK throughout the year; and
>
> [b] where subsection (2)(b) above applies, the assumption as to residence is that the double taxation relief arrangements do not apply.

In para [b] the assumption is not in fact an assumption "as to residence": the assumption is a disapplication of treaty relief, but the meaning is clear.

50.10.2 *Ascertaining the s.86 trust gains*

The condition in s.86(1)(e) is that there is an amount, which I call "**the s.86 trust gains**". The quantum of the s.86 trust gains matters because the amount of the charge depends on that.

All the usual CGT reliefs are in principle applicable in computing the s.86 trust gains. For instance, hold-over relief is available on a transfer to a UK resident beneficiary, if the usual conditions are satisfied.[17]

Para 1(1) Sch 5 TCGA provides:

> In construing section 86(1)(e) as regards a particular year of assessment, the effect of section 3 shall be ignored.

This disapplies the trustee annual exemption (which is fair because the settlor has their own annual exemption).

50.11 Year of death of settlor

This s.86 condition is in s.86(1)(f):

> paragraph 3, 4 or 5 of schedule 5 does not prevent this section applying.

This sets out three conditions which are best considered separately.

Para 3 Sch 5 TCGA provides:

> Section 86 does not apply if the settlor dies in the year.

What is the reason for this rule? Presumably it was thought unfair to tax the settlor's estate on post-death gains, and too much trouble to split the year into disposals before/after the death.

50.12 Death or divorce of certain beneficiaries

The last two s.86 conditions are set out in paras 4 and 5 Sch 5 TCGA:

> 4(1)This paragraph applies where for the purposes of section 86(1)(d) the settlor has no interest in the settlement at any time in the year except for one of the following reasons, namely, that—
>
> (a) property is, or will or may become, applicable for the benefit of or payable to one of the persons falling within para 2(3)(b) to (db) above,
>
> (b) income is, or will or may become, applicable for the benefit of or payable to one of those persons, or
>
> (c) one of those persons enjoys a benefit from property or income.
>
> (2) This paragraph also applies where sub-para (1) above is fulfilled by virtue of

17 See the HMRC helpsheet quoted at 51.5.1 (Ascertaining the s.2(2) amount).

2 or all of paras (a) to (c) being satisfied by reference to the same person.
(3) Where this paragraph applies, section 86 does not apply if the person concerned dies in the year.
(4) In a case where—
(a) this paragraph applies, and
(b) the person concerned falls within para 2(3)(b), (d) or (db) above,
section 86 does not apply if during the year the person concerned ceases to be married to, or a civil partner of, the settlor, child or grandchild concerned (as the case may be).
5 (1) This paragraph applies where for the purposes of section 86(1)(d) the settlor has no interest in the settlement at any time in the year except for the reason that there are 2 or more persons, each of whom—
(a) falls within para 2(3)(b) to (db) above, and
(b) stands to gain for the reason stated in sub-para (2) below.
(2) The reason is that—
(a) property is, or will or may become, applicable for his benefit or payable to him,
(b) income is, or will or may become, applicable for his benefit or payable to him,
(c) he enjoys a benefit from property or income, or
(d) 2 or all of paras (a) to (c) above apply in his case.
(3) Where this paragraph applies, section 86 does not apply if each of the persons concerned dies in the year.

I cannot see the point of this, though it does offer a kind of symmetry with para 3. I doubt if it ever has or ever will apply.

50.13 Attribution of s.86 gains to settlor

Assuming all eight fundamental s.86 conditions are satisfied, we proceed to s.86(4) TCGA which provides:

Where this section applies—
(a) chargeable gains of an amount equal to that referred to in subsection (1)(e) above shall be treated as accruing to the settlor in the year or if, as respects the settlor, the year is a split year, in the UK part of that year, ...

50.14 Interaction of s.86 and s.13 TCGA

Suppose a settlor-interested trust within s.86 TCGA owns a non-resident company within s.13 TCGA, and a gain accrues to the company. The gain is treated as accruing to the trustees. In the absence of express provision, this gain would not fall within s.86 because the s.86 trust gains condition would not be satisfied: the gain does not accrue "by virtue of disposals of

any of the settled property".[18] The company property is not settled property. Para 1(3) Sch 5 TCGA deals with this:

> In a case where—
>
> (a) the trustees are participators in a company in respect of property which originates from the settlor, and
>
> (b) under section 13 gains or losses would be treated as accruing to the trustees in a particular year of assessment by virtue of so much of their interest as participators as arises from that property if the assumption as to residence specified in section 86(3) were made,
>
> the gains or losses shall be taken into account in construing section 86(1)(e) as regards that year as if they had accrued by virtue of disposals of settled property originating from the settlor.

50.15 Corporate settlor

It is considered that s.86 TCGA does not apply to a company even if it does create a settlor-interested settlement and is the settlor. The context suggests that only individuals are intended to be caught. It appears that HMRC may not accept this view.[19] The issue rarely arises in practice. Where a company with one or few shareholders is a settlor, HMRC may instead look to see if the shareholders are settlors.[20]

50.16 Interaction of s.86, s.87 and entrepreneurs' relief

This section considers whether entrepreneurs' relief[21] is available on a disposal by a non-resident trust, within s.86, assuming all the relevant

---

18 See 50.10 (Section 86 trust gains condition).

19 The CG Manual provides:

> "**35020. Trusts for employees** [February 2006]
>
> There is nothing in Section 77 [TCGA] itself to prevent it being applied to a company. In particular, where a company has set up a settlement for its employees, the deed may provide that if all the trusts fail, the property may revert to the company. The most common cases are share option schemes and unapproved pension schemes."

Section 77 TCGA was repealed in 2008, the issue for s.86 is similar. For a further discussion, see Kessler & Marre, *Taxation of Charities and Nonprofit Organisations*, (9th ed, 2013-14) para 20.2.2 (Loan by company) (online version *http://www.taxationofcharities.co.uk*).

20 See 80.35 (Trust made by company: are shareholders settlors?).

21 See 49.5 (Entrepreneurs' relief).

conditions are satisfied (so that a disposal by a UK resident trust would qualify for the relief).

Section 169N TCGA provides (so far as relevant):

> (1) Where a claim is made in respect of a qualifying business disposal—
> (a) the relevant gains (see subsection (5))[22] are to be aggregated, and
> (b) any relevant losses (see subsection (6)) are to be aggregated and deducted from the aggregate arrived at under paragraph (a).
> (2) The resulting amount is to be treated for the purposes of this Act as a chargeable gain accruing at the time of the disposal to the individual or trustees by whom the claim is made.
> (3) The rate of capital gains tax in respect of that gain is 10%, but this is subject to subsections (4) to (4B)...[23]
> (9) Any gain or loss taken into account under subsection (1) is not to be taken into account under this Act as a chargeable gain or an allowable loss.

The technical question is whether the gains which are treated as accruing to the settlor are the same gains as the gains accruing to the trustees. It is considered that one should apply a purposive construction so that the relief is available.[24] If that were wrong, UK law would not be EU law compliant, which would give a further defence if the trustees were resident in a MS.

However if it is possible to make the trust UK resident in the year of the disposal, that would be better, as the issue would not arise.

On the other hand, entrepreneurs' relief is probably not available if the trust is within s.87, as the s.87 gain accruing to a beneficiary is not the same gain.[25]

---

22 Section 169N(5) TCGA provides: "In subsection (1)(a) "relevant gains" means—
(a) if the qualifying business disposal is of (or of interests in) shares in or securities of a company (or both), the gains accruing on the disposal (computed in accordance with the provisions of this Act fixing the amount of chargeable gains), and
(b) otherwise, the gains accruing on the disposal of any relevant business assets comprised in the qualifying business disposal (so computed)."

23 Subsections (4) to (4B) impose a £10m cap which need not be considered here.

24 A similar issue arises for DTAs; see 59.10.1 (Trustees within s.86 treaty-resident outside UK).

25 See 59.12.1 (Trustees within s.87 treaty-resident outside UK).

50.17 Tax return: Disclosure of s.86 gains or non-domiciled status

50.17.1 *Non-domiciled settlor*

This section considers the position where gains accrue to a settlor-interested trust, but s.86 does not apply because the settlor is not UK domiciled.

If the settlor claims the remittance basis, and submits a tax return, they will have completed the relevant boxes in SA109 and no further return or disclosure is necessary.[26]

If the settlor does not claim the remittance basis, but does submit a tax return, then:

(1) It is necessary to tick box 23 in form SA109 (2013/14). The caption by this box states: *If you are domiciled outside the UK and it is relevant to your Income Tax or Capital Gains Tax liability, put 'X' in the box.* (There are further relevant boxes if this is the first domicile claim.)

(2) It is not necessary to tick box 8 in the form SA100 (2013/14). The caption by this box reads: *Residence, remittance basis etc. Were you, for all or part of the year to 5 April 2014, one or more of the following – not resident, not ordinarily resident or not domiciled in the UK and claiming the remittance basis; or dual resident in the UK and another country?*

If the settlor does not submit a tax return (because HMRC have not sent a notice to submit the return, and there are no income/gains requiring a return) then no claim or notification is needed.

50.17.2 *UK domiciled settlor*

Helpsheet 299 (Non-resident trusts and Capital Gains Tax) 2014 provides:

> If you are liable to tax when gains arise to the non-resident trustees of your trust and/or to relevant overseas private companies in which they invest, the trustees' net chargeable gains are attributed to you. You should include them in the overall figure in box 33 on your Capital gains summary pages. You should include details of these gains in your computations accompanying these pages.

---

26 See 10.7.1 (How to make a remittance basis claim).

CHAPTER FIFTY ONE

CAPITAL PAYMENTS FROM NON-RESIDENT TRUSTS: S.87

51.1 The s.87 regime: Introduction and terminology

This chapter considers the CGT charge on beneficiaries who receive capital payments from non-resident trusts, under s.87 TCGA. I call this **"the s.87 regime**". The charge is supplemented by a further charge in s.89 TCGA but I use the expression "s.87 regime" loosely to refer to both charges.

There are *four* versions of the s.87 regime:

(1) **"The standard s.87 regime"**, discussed in this chapter.

(2) **"The Sch4C s.87 regime"**, which applies where there has been a Sch4B-transfer.[1]

(3,4) Modified versions of (1) and (2) which apply for offshore income gains.[2]

The result is so intricate that no written description could ever do justice to the complexities.

The rules were introduced in 1981, extended in 1998, and extended again and rewritten in 2008.

In the following discussion:

"The pre-2008 s.87" means s.87 as it was before the 2008 amendments.

"The HMRC s.87 guidance note" means the 54 page guidance note, first published May 2009, 2nd version October 2009, entitled "FA 2008 changes to the CGT charge on beneficiaries of non-resident settlements".[3]

51.1.1 *Cross references*

The following matters are considered elsewhere:

---

1 See 52.14 (Schedule 4C).

2 See 35.13 (OIG s.87 charge) and 52.27 (OIG sch 4C).

3 *http://www.hmrc.gov.uk/cnr/beneficiaries-non-resident.pdf*

50.16 (Interaction of s.86, s.87 and entrepreneurs' relief)
54.6 (Loss accruing to non-resident trustees)
54.7 (Disallowance of personal losses against s.87 gains)
59.12 (DT reliefs: s.87 TCGA)

For s.87 gains accruing to charity, see Kessler & Marre, *Taxation of Charities and Nonprofit Organisations*.[4]

51.2 "Settlement" and "trustee"

51.2.1 *"Settlement"*

Section 97(7) TCGA provides:

> In sections 86A to 96 and Schedule 4C and in this section—
> "settlement" has the meaning given by section 620 of ITTOIA 2005, and
> "settled property" and references (however expressed) to property comprised in a settlement shall be construed accordingly.

"Settlement" here means settlement-arrangement.[5]

The estate of a deceased person is not a settlement-arrangement.[6]

In practice one is normally concerned with trusts in the classic sense. That is just as well, as the problems raised by other types of settlement (which I call **"non-trust settlement-arrangements"**) such as a foundation, have not been fully thought through.

51.2.2 *"Trustee" of non-trust settlement-arrangement*

A problem arises for an entity which is a settlement-arrangement (and so a settlement for s.87 purposes) but which (not being a classic settlement) has no trustees in the normal (trust law) sense of the word. For s.87 purposes one needs to identify trustees because:

(1) one needs to ascertain trustee residence;[7]
(2) one needs to identify s.2(2) amounts (trust gains), which are the amounts on which "the trustees of the settlement" would be chargeable to tax under s.2(2) if they were resident in the UK.

Accordingly s.97(7A) TCGA provides:

---

4 (9th ed., 2013), Chap. 32 (Payments to charity from non-resident trusts) online version *http://www.taxationofcharities.co.uk*.

5 See 80.2.3 (Settlement-arrangement definition of settlement).

6 See 78.6.1 (Is an estate a "settlement" within s.87 TCGA?).

7 See 51.3 (Non-resident settlement condition).

> [a] In this section, sections 86A to 96 and Schedule 4C "trustee", in relation to a settlement in relation to which there would be no trustees apart from this subsection, means any person in whom the settled property or its management is for the time being vested ... [8]

When this extended sense applies, I use the word "trustees" (using scare quotation marks).

An example is a Liechtenstein stiftung (foundation). The "trustees" are (a) the foundation itself (a body corporate in which the "settled property" is vested) or (b) the members of the board of management (in whom its management is vested).

What about a civil law usufruct? There is no need for the s.87 rules: under ordinary principles the gain can come into charge on a disposal by the usufructuary or by the encumbered owner but since a usufruct is in principle a settlement-arrangement, what reason can one find that s.87 does not apply? The answer is that there is nothing which one can identify as "settled property". There are two items of property, one belonging to the usufructuary and the other belonging to the bare owner. So it is considered that there are no "trustees" and a usufruct is not within the scope of s.87.

51.2.3 *2006 transitional rules?*

Section 97(7A) was introduced by para 15 Sch 12 FA 2006. Para 15(3) provides:

> This paragraph shall come into force on 6th April 2006 (in relation to settlements whenever created).

This raises the interesting possibility that s.87 did not apply to a foundation[9] before 2006 as a foundation has no "trustees" in the normal (trust law) sense. But it is suggested that the context shows that the word "trustee" should be construed widely enough to include a foundation (bear in mind that the word "settlement" is given the wide and artificial meaning

---

8 There is a similar definition for IHT. Section 45 IHTA provides:
"In this Act "trustee", in relation to a settlement in relation to which there would be no trustees apart from this section, means any person in whom the settled property or its management is for the time being vested."

9 Or any other settlement-arrangement which was not a classic settlement and so had no trustees in the strict sense.

of settlement-arrangement). Section 97(7A) is only for the avoidance of doubt and the law before 2006 was the same as now.

51.3 Non-resident settlement condition

Section 87(1) TCGA sets out the fundamental condition for the application of s.87:

> This section applies to a settlement for a tax year ("the relevant tax year") if there is no time in that year when the trustees are resident in the United Kingdom.

Statute often refers to a settlement "to which s.87 applies"; from 1998/99 this means (in short) a non-resident settlement. In full, it means:

(1) a non-resident settlement; or
(2) a dual resident settlement (more accurately, UK-law UK resident, but treaty non-resident under the tie-breaker).[10]

51.3.1 *Residence of "trustee" of non-trust settlement-arrangement*

Section 97(7A) TCGA provides:

> [a] ... "trustee", in relation to a settlement in relation to which there would be no trustees apart from this subsection, means any person in whom the settled property or its management is for the time being vested
> [b] (and a person who is treated as a trustee of the settlement by virtue of this subsection shall be treated as a trustee of the settlement for the purposes of section 69).

The effect of s.97(7A)[b] is that the s.69 trustee test of residence applies.

In the case of a foundation, the "trustees" are (a) the foundation itself or (b) the members of the board of management. The residence of (a) and (b) will normally be the same so there is no need to consider the analysis if they were resident in different places but one would presumably look to the foundation itself, as that is the person (a body corporate) to which gains accrue on a disposal of foundation property.

51.4 The s.87 charge

Section 87(2) TCGA provides:

---

10 See 51.17 (Dual resident trust: s.88 TCGA).

[a] Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement
[b] who has received a capital payment from the trustees in the relevant tax year or any earlier tax year
[c] if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the s.2(2) amount for the relevant tax year or any earlier tax year.

The key terms here are "capital payment" "s.2(2) amount" and "matching". I refer to gains treated as accruing as "**s.87 gains**". The term "deemed gains" is sometimes used, but I think my term is clearer.

A s.87 gain accrues in the year that a capital payment is matched with a s.2(2) amount. That may be later than the year that the capital payment is made.

Section 87 is not strictly a charging section, it feeds into s.2 TCGA which imposes the charge. It is nevertheless convenient to use the expression "s.87 charge" as a shorthand.

51.4.1 *Split year*

Section 87(7) TCGA provides:

> If the relevant tax year is a split year as respects a beneficiary of the settlement—
>
> (a) the amount on which the beneficiary is chargeable to capital gains tax by virtue of this section for that year (in respect of the settlement) is a portion of the amount on which the beneficiary would have been so chargeable if the relevant tax year had not been a split year, and
>
> (b) the portion is the portion attributable to the UK part of the relevant tax year calculated on a time apportionment basis.

This is a curious rule. One would have expected benefits received in the UK part of the year to be taxable and benefits received in the overseas part to be tax free.

51.5 Section 2(2) amount

Section 87(4) TCGA provides:

> The s.2(2) amount for a settlement for a tax year for which this section applies to the settlement is—
>
> (a) the amount upon which the trustees of the settlement would be chargeable to tax under s.2(2) for that year if they were resident

> in the UK in that year ...[11]

The term "s.2(2) amount" has more or less the same meaning as the term "trust gains" in the pre-2008 s.87. The old terminology was clearer, and EN FB 2008 itself uses the term "trust gains". It is usually better to adopt statutory terminology, rather than using a different term with the same meaning as a statutory defined term, and I do so here but somewhat reluctantly. The term "s.2(2) amount" is so opaque that I sometimes clarify it by using the phrase *"s.2(2) amounts (trust gains)."*

Some practitioners use the term "stockpiled gains" or describe a trust as having a pool of s.2(2) amounts.

There is a s.2(2) amount *for a tax year* ie each s.2(2) amount must be linked to a specific tax year. The expression "s.2(2) amounts" (in the plural) is used to refer to the case where there are s.2(2) amounts for more than one tax year.

Section 87(5) TCGA provides:

> The s.2(2) amount for a settlement for a tax year for which this section does not apply to the settlement is nil.

This makes sense, of course, since if s.87 does not apply the trustees must be UK resident and within the scope of CGT.

The HMRC s.87 guidance note provides:

> 10. Section 87(5) provides that the section 2(2) amount for a year in which section 87 does not apply is nil. In particular this is needed to deal with transfer between settlements. The transferee settlement may have a section 2(2) amount for a year in which the trustees were resident in the UK. Section 87(5) ensures no account is taken of that amount. But it can still be treated as having a section 2(2) amount for that year from the transferor settlement. See paragraph 68 below.

51.5.1 *Ascertaining the s.2(2) amount*

All the usual CGT reliefs are in principle available for computing the s.2(2) amount. For instance, hold-over relief is available on a transfer to a UK resident beneficiary, if the usual conditions are satisfied. HMRC accept this. Helpsheet 295 (Relief for gifts and similar transactions 2013/2014) provides:

> There is no need for the transferor to be resident in the UK. Therefore

---

11 For s.87(4)(b) see 51.5.2 (Section 86 gains deducted from s.2(2) amount)

> the relief is available for trustees of nonresident settlements where the chargeable gain would, or might otherwise be, charged on UK residents.[12]

HMRC say:

> The trustees compute gains as if they were resident in the UK. Any exemptions and reliefs due to resident trustees are included in this computation. But no annual exempt amount is available...[13]

And again:

> 9. ... section 2(2) amount. This is defined in section 87(4). It is the amount on which the trustees would be liable to Capital Gains Tax if they had been resident and ordinarily resident in the UK during the year. As in the original section 87 this is the amount of the gains after deducting losses and without giving any annual exempt amount.[14]

The last sentence is wrong, as s.3 TCGA (extended to trustees by sch 1 TCGA) provides that trustees "shall not be chargeable to CGT" on the exempt amount. So "the amount upon which the trustees would be chargeable to tax under s.2(2) for that year if they were resident" is reduced by the exempt amount. The Courts might disapply the plain words if the result were absurd, but it is not absurd. There may be an element of double relief as beneficiaries may have their own annual exemption. This rule is nevertheless sensible because it saves trustees from having to keep track of small gains (or it avoids non-compliance so far as one could not reasonably expect trustees to actually do so.). Of course, there is not much tax at stake here. Perhaps the author has confused the position for s.86, where the trustee annual exemption is disapplied: see 50.10 (Section 86 trust gains condition).

51.5.2 *Section 86 gains deducted from s.2(2) amount*

In the absence of relief, a gain accruing to a trust may be:
(1) a s.86 gain taxed on the settlor and
(2) a s.2(2) amount (trust gain)
Section 87(4)(b) TCGA provides relief for s.87 and so prevents double

---

12 ie the gain might be charged if the UK resident transferee disposed of the asset.

13 "HMRC Residency: Non-resident trusts" published online at *http://www.hmrc.gov.uk/cnr/nr_trusts.htm* on 1 April 2008.

14 HMRC s.87 guidance note, para 9.

taxation. It is necessary to read the whole of s.87(4) in order to follow the sense:

> (4) The section 2(2) amount for a settlement for a tax year for which this section applies to the settlement is—
>
> (a) the amount upon which the trustees of the settlement would be chargeable to tax under section 2(2) for that year if they were resident in the UK in that year, or
>
> (b) if section 86 applies to the settlement for that year, the amount mentioned in paragraph (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

In short, s.86 in principle has priority over s.87.

51.5.3 *Foundation or other non-trust settlement-arrangement: s.2(2) amount*

A foundation is in principle a settlement-arrangement and so a settlement for s.87 purposes. What is the s.2(2) amount, ie the amount on which the "trustees" of the settlement would be chargeable under s.2(2) if they were UK resident? If the "trustees" are the members of the board of the foundation, the amount is nil as no gains accrue to them. Assuming (which is a better analysis) the "trustees" are the foundation itself, the position would be that the foundation would be subject to CT and so at first sight, the amount chargeable under s.2(2) would be nil! The answer is that s.97(7A)[b][15] applies s.69 TCGA, which deems the "trustees" to be a separate person which is not a company; though one could reach the same result by construction even without reference to that provision.[16]

51.6 Capital payment

51.6.1 *Definition of capital payment*

"Capital payment" is defined in s.97(1) TCGA:

> In sections 86A to 96 and Schedule 4C and this section "capital payment" —
>
> (a) means
>
> [i] any payment which is not chargeable to income tax on the recipient
>
> [ii] or, in the case of a recipient who is not resident in the UK,

---

15 See 51.3.1 (Residence of "trustee" of non-trust settlement-arrangement).

16 *de Rothschild v Lawrenson* 67 TC 300.

any payment received otherwise than as income...[17]

For the interaction with s.731, see 30.12 (Is a benefit within s.731 a capital payment?).

51.6.2 *"Payment"*

Section 97(2) TCGA provides:

> In subsection (1) above references to a payment include references to
> [a] the transfer of an asset and
> [b] the conferring of any other benefit, and to
> [c] any occasion on which settled property becomes property to which s.60 applies.

The issues overlap with s.731 ITA so the following matters are discussed elsewhere:
30.4 (Benefit).
30.7 (Valuation of benefits).

51.6.3 *Termination of settlement*

The termination of a settlement constitutes a capital payment, so any s.2(2) amounts at that time will be attributed to the beneficiaries who become entitled to the trust property: s.97(2)[c] TCGA.

This rule should not, in practice, affect well drafted settlements, whose life may extend for a century or more. If action is taken in time it will generally be possible to extend the life of poorly drafted settlements by appropriate exercise of trustees' powers. Trustees should if appropriate diarise the date when the settlement may come to an end so as to take action beforehand.

51.6.4 *Arm's length transaction*

Section 97(1) TCGA provides:

> In sections 86A to 96 and Schedule 4C and this section "capital payment"—
> (b) does not include a payment under a transaction entered into at arm's length if it is received on or after 19th March 1991.

It is considered that a transaction at arm's length could not be a capital

---

17 As to when a payment is received as income, see 25.8 (Payment from discretionary trust: income or capital receipt?).

payment at all, and this provision was inserted only for the avoidance of doubt; even if (contrary to that view) the transaction were a capital payment, the amount of the capital payment would normally be nil.

The issue is not theoretical, as a transaction between connected persons is (in short) treated as not at arm's length.[18]

It would be simpler if s.97(1)(b) were repealed, as unnecessary, but it does no harm.

51.6.5 *Payment in form of income (un)taxed on remittence basis*

What is the position if a trust makes an income distribution[19] to a remittance basis taxpayer, which is not remitted? It is considered that this is not a capital payment. The payment is "chargeable to income tax" even if no tax is paid because of the remittance basis.[20] If that were wrong:

(1) There would be double taxation, a s.87 gain and an IT charge, if the payment were remitted.
(2) The payment would be matched to s.2(2) amounts which would reduce tax on subsequent capital payments with odd results and some scope for tax planning.

Similarly a benefit which is within s.731, or within s.731 subject to the s.731 remittance basis, is not a capital payment.[21]

The same applies if a settlor-interested discretionary trust within s.624 makes a distribution out of its income to the settlor: that is not a capital

---

18 Section 18 TCGA.

19 For what is an income distribution, see 25.8 (Payment from discretionary trust: income or capital receipt?).

20 Before 2005, the former s.65 ICTA drew a distinction between a "charge" and a "computation;" unremitted income was described as "chargeable" even though ignored in the computation of the charge. This is still the case: ITTOIA imposes a charge on all RFI and the remittance basis only affects the amount on which the charge is made. See 10.12 (Nature of charge on remitted RFI).

It was assumed by the drafter of s.37 TCGA (consideration chargeable to tax on income) that unremitted foreign income is "charged" to income tax. Otherwise there would be a charge to CGT on unremitted income of an asset to which the RFI remittance basis applies but the CGT remittance basis does not apply. An example would be income accruing to a foreign domiciliary from an asset which was UK situate for CGT purposes, but a foreign income source for income tax purposes.

It is true that the word "chargeable" takes its meaning from the context, and in some contexts unremitted income is not regarded as chargeable to IT. But the context shows that is not the case here.

21 See 30.12 (Is a benefit within s.731 a capital payment?).

payment. In this case there does seem at first sight to be a problem, as there is no income tax charge on receipt of the payment.[22] However the sum is treated for all purposes of income tax to be the income of the settlor and that deeming should be applied in order to determine whether the payment is chargeable to income tax for the purposes of the definition of capital payment.

The same applies if the settlor is within the s.624 remittance basis.

The same applies if a person abroad makes a distribution out of its income to a transferor within s.720, or a transferor within the s.720 remittance basis: that is not a capital payment. (This issue arises in the exceptional case of a trust within s.720 and not within s.624, and in the more common case of a payment from a company held by a trust.)

51.6.6 *Payment derived from old unremitted income taxable on remittance*

Suppose:

(1) A remittance basis taxpayer ("S") receives foreign income ("the old income") which is not remitted to the UK and so not taxed.
(2) S transfers the old income to a non-resident trust.
(3) The trustees invest and realise gains ("trust gains") in a subsequent tax year. For simplicity, assume that no income accrues to the trustees, or any income which arises to them is segregated and paid out to the settlor.
(4) The trustees make a distribution to the settlor which is received in the UK and which is derived from the old income.[23]

It is considered that the distribution is not a capital payment as it is chargeable to income tax. Otherwise there would be double taxation on the distribution, an income tax charge and a s.87 charge.

51.6.7 *Payment derived from old unremitted gains taxable on remittance*

Suppose:

(1) A remittance basis taxpayer ("S") receives foreign gains ("the old gains") which are not remitted to the UK and so not taxed.
(2) S transfers the old gains to a non-resident trust.
(3) The trustees invest and realise gains ("trust gains") in a subsequent tax year.

---

22 See 27.7.3 (Relief for settlor-beneficiary).

23 On the mixed fund rules which apply in this case, see 13.8 (Unremitted income transferred to trust).

(4) The trustees make a distribution to the settlor which is received in the UK and which is derived from the old gains.[24]

At first sight there is a double charge, CGT on the old gains on the remittance basis, and a s.87 charge. That can hardly be right.

The RDR Manual gives this example:

> **31180. Foreign chargeable gains accruing on disposal made otherwise than for full consideration [**June 2010**]**
> Example 2 (Ahmeda)
> A transfers his property in Dubai to a trust receiving no consideration in return. The deemed gain computed using the market value of the property at date of transfer is £400,000.
> The trustees subsequently sell the property for £550,000.
> The trustees then make a capital payment of £300,000 to a UK close company in which A's spouse is a participator.

The HMRC analysis is as follows:

> [1] £300,000 of A's foreign chargeable gain [the £400k deemed gain] has been remitted to the UK. This is because the property is treated as deriving from his gain (Section 809T ITA 2007) and the proceeds from the sale of the property therefore also derive from the gain.

This overlooks the mixed fund rules. Putting aside the interaction with s.87, for a moment, I would say that £150,000 of A's foreign chargeable gain has been remitted to the UK. The £550,000 proceeds of sale received by the trustees is a mixed fund, consisting of

A's deemed gain £400,000
The trustees' gain £150,000

The payment out of the mixed fund is treated as coming from the trustees gain (assume it accrues in a later year).

The HMRC analysis continues:

> [2] The company is a relevant person (Section 809M(2)(f) ITA 2007)

This is correct.

> [3] and property (that is, money) which derives from A's gain has therefore been received in the UK by or for the benefit of a relevant person (Section 809L ITA 2007).

---

24 On the mixed fund rules which apply in this case, see 13.8 (Unremitted income transferred to trust).

The example did not in fact specify that the money was received in the UK, only that it was received by a UK company (which is not the same); but let us assume that is factually correct.

> [4] The gain which accrues to the trust on the actual sale of the property will be subject to normal rules.

But what are the normal rules? Possibly HMRC assume that there is a s.87 charge on the £300,000 leading to double taxation but tactfully refrain from saying so. The effective rate of CGT on a capital payment could be:

CGT on the old gain	28%
CGT on capital payment[25]	44.8%
	72.8%

It is suggested that one should construe the legislation to avoid a double charge; the question is how best to reach that conclusion. Possibilities include:

(1) The old gains exclude the deeming under s.87; or
(2) The reference to income tax in the definition of capital payment could be read purposively as extending to CGT so the payment is not a capital payment.[26]
(3) Section 809P(10) ITA
(4) Section 32 TMA

These solutions would be consistent with the position where old income is settled.[27]

An alternative would be to say that to the extent that the s.87 charge applies, the capital payment is not to be regarded as derived from the old chargeable gains.

Another possibility is to say that the value of the benefit is reduced to reflect the fact that remittance gives rise to a charge on the old gains.

The position is simpler where the payment is made to the settlor, and not to a third party (as in the HMRC example). But even then, none of these solutions are straightforward. Legislation enacted in the slapdash manner of the FA 2008 is bound to leave rough edges, and the courts should seek

---

25 Including the interest surcharge.

26 Contrast the ToA rules where a reference to income tax was construed to include corporation tax in order to avoid double taxation: see the 2011/12 edition of this work para 31.2.1 (Transferor's credit); that point does not now arise.

27 See 51.6.6 (Payment derived from old unremitted income taxable on remittance).

to find a construction which avoids double taxation and produces a workable result.

51.7 Receipt from the trustees

The s.87 charge applies where a beneficiary has received a capital payment from the trustees. There are two requirements here: a *receipt by a beneficiary,* and a receipt *from the trustees.*

On the general meaning of "receipt by a beneficiary" see 30.5 (Who is the recipient of a benefit?).

Section 97(5) TCGA expands on these concepts:

> For the purposes of sections 86A to 90 and Schedule 4C a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—
>
> (a) he receives it from them directly or indirectly, or
>
> (b) it is directly or indirectly applied by them in payment of any debt of his or is otherwise paid or applied for his benefit, or
>
> (c) it is received by a third person at the beneficiary's direction.

This does not extend the meaning of capital payment. It assumes that there is a capital payment (as defined) and addresses the question(s) of who is the recipient and whether the receipt is from the trustees.[28]

The explanation for s.97(5) is to be found in *Potts' Executors v IRC* 32 TC 211. This concerned (what is now) s.641 ITTOIA which (then) applied to:

> Any capital sum paid directly or indirectly ... to the settlor.

In *Potts*, at the request of the settlor, a company connected with a settlement paid tax liabilities of the settlor.[29] The settlor did not actually receive the funds. The House of Lords (in the era of literal interpretation) held that this was not a payment to the settlor directly or indirectly, so (what is now) s.641 ITTOIA did not apply.

Lord Simonds said:

---

28 This is clear from the wording, but if authority is needed, see *Burton v HMRC* [2009] SFTD 682 at [43]: "Section 97(5)(b) does not ... require that the benefit be received by the beneficiary but rather extends the circumstances in which a capital payment is treated 'as received' from the trustees."

29 The trust also made other payments, such as payments to charities at the request of the settlor.

> It is sufficient to say that [the word 'indirectly'] cannot so enlarge the meaning of the words 'paid to the settlor' as to include payment to some other person than the settlor for his own use and benefit. I do not feel called upon to determine positively what transactions it might be apt to cover. It may be that it is not apt to cover any that are not already covered by the normal meaning of the words 'paid to the settlor'.

Lords Normand and Oaksey said:

> ...it was obviously necessary to provide for the case when persons accountable to the settlor are interposed between the payer and the settlor for the purpose of disguising the transaction. That is a satisfactory explanation of the use of the words "directly or indirectly".
> I think the words "paid directly or indirectly to the settlor" should be held to mean paid into the settlor's hands or into the hands of someone accountable to him.

Lord MacDermott said:

> [The payments] made to Mr. Potts' agents or in some circuitous way designed to put the money under his control eventually. Had they been, the word "indirectly" might have had a part to play, for in that case the issue would be whether, as a matter of fact, payment had been made one way or another to the settlor. In short, as it appears to me, the words "directly or indirectly" bear only on the mechanics of payment in fact.

It seems to me that there are three distinct views here:

(1)The word "indirectly" adds nothing or nothing much (Lord Simonds).
(2) The word "indirectly" applies to payments to X via someone accountable to X (Lords Normand and Oaksey).
(3) The word "indirectly" applies to payments "in some circuitous way designed to put the money under his control eventually" (Lord MacDermott).

The second of these views was adopted in *Piratin v IRC* 54 TC 730. Here a payment was made from A to B on terms which obliged B to pay an equivalent sum to C. This was held not to amount to an indirect payment to C, because B was not "accountable" for the sum received. The Judge considered the comments of Lords Simonds, Normand and Oaksey set out above and continued:

> One thus finds both Lord Normand and Lord Oaksey expressing the opinion in the *Potts* case that a sum cannot be said to be "paid indirectly" to the settlor within the section, unless it is paid into the

hands of someone accountable to him.

"Accountable" was understood strictly (I would have thought, excessively so):

> It is common ground that the word "accountable" in an English law sense is not apt to describe the position of a person who is under a mere contractual obligation, such as that owed by [B] to the two settlors. [Counsel for the Revenue] suggested that Lord Normand may have intended to use the word according to a broader meaning attributed to it by Scottish lawyers, but I can see no sufficient justification for that inference. I think that Lord Normand referred to strict accountability in English law, and Goff J. took the same view in *IRC v Wachtel* 46 TC 543 at page 555F....

He rejected the view that the word "indirectly" adds nothing but also rejected Lord MacDermott's wide approach:

> The phrase "or indirectly" in the context of s 451(1) undeniably gives rise to problems of interpretation. If, however, a broader meaning is attributed to it than that attributed to it by Lord Normand and Lord Oaksey, so that it is capable of including payments to persons who are not accountable to the settlor, it is difficult to see where the line should be drawn.

In 1981 Parliament reversed these decisions by adding a new subsection to (what was then) s.451 ICTA 1970:

> (9) For the purposes of this section there shall be treated as a capital sum paid to the settlor by the trustees of the settlement any sum which—
>
> (a) is paid by them to a third party at the settlor's direction or by virtue of the assignment by him of his right to receive it; or
>
> (b) is otherwise paid or applied by them for the benefit of the settlor...

The 1981 Act also introduced s.87 regime including the provision which is now s.97(5) TCGA:[30]

> ... a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—
>
> (a) he receives it from them directly or indirectly, or
>
> (b) [i] it is directly or indirectly applied by them in payment of any debt of his or

30 Then s.83(5) FA 1981.

[ii] is otherwise paid or applied for his benefit, or

(c) it is received by a third person at the beneficiary's direction.

The wording of (b) and (c) has its equivalents in s.451(9). In practice these paragraphs are not so important. However, the *Potts* and *Piratin* cases set out above are relevant to discussion of the meaning of "directly or indirectly" in paragraph (a), which is important, and to which I can now turn.

51.7.1 *Indirect receipt from trustees*

Section 97(5) TCGA provides:

> ... a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—
>
> (a) he receives it from them directly or indirectly...

This raises two problems. Firstly, the meaning of "indirectly". There are two possible views:

(1) The word "indirectly" applies to payments to X via someone accountable to X (following the approach of Lords Normand and Oaksey in *Potts*). I refer to this as **"the narrow view"**.

(2) The word "indirectly" applies to payments "in some circuitous way designed to put the money under his control eventually" (following the approach of Lord MacDermott in *Potts*). I refer to this as **"the wide view".**

There are two difficulties with the wide view. The first is raised in *Piratin*:

> If, however, a broader meaning is attributed to [indirectly] than that attributed to it by Lord Normand and Lord Oaksey, so that it is capable of including payments to persons who are not accountable to the settlor, it is difficult to see where the line should be drawn.

Secondly, if it is possible for one person to receive a payment directly, and another to receive the same payment indirectly, there is the problem of double taxation, as each may be taxed on the payment. The double taxation problem arises if there is held to be an indirect payment to B in two cases:

Case (1):

(a) Trust 1 makes a payment to A; and

(b) A makes a payment to B.

Case (2):

(a) Trust 1 makes a payment to trust 2; and
(b) Trust 2 makes a payment to B.

In case (1) there is in principle double taxation in the form of tax on both A and B.[31] In case (2) there is in principle double taxation on B.[32] There is no double taxation in some cases[33] but one cannot say that the question of whether there is an indirect payment depends on whether there is double taxation.[34]

These considerations support the narrow view. The wider view was however adopted in *Herman v HMRC*.[35] This was an arrangement of case (2) above. The Special Commissioner held that B had received funds directly from trust 2[36] *and* indirectly from trust 1.

An unsatisfactory aspect of this decision is that no attempt was made to explain where to draw the line, ie where a capital payment is or is not received indirectly from trustees; thus leaving taxpayers (and indeed HMRC) none the wiser in other cases. Certainly, there is a line to be drawn somewhere:

> 21 The right approach, I think, is to make an enquiry, using whatever signposts appropriate to the circumstances are available, and to determine whether the receipts of [B] can properly be linked to the disposition from [trust 1] as their indirect source.

"Properly linked" to trust 1 as their "indirect source" is, I think, intended as a paraphrase of the statutory words "received indirectly from" trust 1; but it does not take matters any further as it is even less clear than the statutory words.

> An obvious *signpost* will be the existence of a plan, if there is one. In the present circumstances the appointment by the trustees of [trust 1] was in pursuance of a scheme ...; it will be relevant to the enquiry to

---

31 Assuming the payments to A and to B can be matched to a s.2(2) amounts (trust gains). It is assumed in these examples that A and B are both beneficiaries. For the position if A or B are not, see 51.12.1 (Receipt by beneficiary and non-beneficiary).

32 Assuming the payment can be matched to a s.2(2) amounts in trust 1 and trust 2.

33 Eg in case (1) if A is non-resident; or in case (2) if trust 1 has no trust gains.

34 If the temporary non-resident rules are in point, ie if in case (1) A is temporarily non resident, it may not be determined for some years whether there is double taxation.

35 [2007] STC (SCD) 571. The issue in *Herman* will be relitigated in *Bowring v HMRC* [2013] UKFTT 366 (TC). HMRC have won the first round, but consideration should wait until the case has become final.

36 [2007] STC (SCD) 571 at [17].

> determine whether the plan as a whole envisaged that [B] should receive the amounts that they did. If the relevant receipt resulted by accident or on account of circumstances not envisaged by the scheme, then the linkage *may* not be there.

This is too tentative. Unless one takes the narrow view, which *Herman* rejected, a plan of the kind found in *Herman* is not the signpost but the end of the matter; conversely if the receipt resulted by accident (assuming trusts have accidents) then the linkage cannot be there.

> The second signpost is to analyse the trust law and determine whether [trust 2] "served as a vehicle to receive and continue the act of bounty effected by" the trustees[37] of [trust 1] (see the words of Lord Walker in para 41 of *West v Trennery*)...

This is misconceived, for *all* transferee trusts "serve as a vehicle to receive and continue the act of bounty" effected by the settlor of the transferor trust.[38]

While the taxpayer in *Herman* had the better argument on a strict construction, a purposive construction to knock down the tax avoidance scheme, or one might say, legal realism, won the day. There is no point in looking to the decision to find the test of when a payment from trust 2 should also be regarded as an indirect payment from trust 1. The guidance is not there. We are therefore thrown back to first principles. On that basis it is considered that the concept of indirect receipt should be limited to cases where there is an arrangement (as in *Herman*) under which payments are (more or less) inevitably to be made from trust 1 to trust 2, and from trust 2 to the beneficiary. The scheme of s.90 TCGA (and the double taxation consequences from any other view) show that this is the case. This view has support in *Burton v HMRC*:

> This is not a 'conduit' case like *Herman v HMRC* where the assets went in and the money came out in a very short time.[39]

In "conduit" cases the double tax problem can be resolved by saying that if there is an indirect payment to B, one ignore the direct payment to A. There cannot be both.

---

37 "Trustees" is presumably a slip for settlor, for the trustees do not confer any bounty.

38 Lord Walker said this in the passage to which the judge refers: *West v Trennary* 76 TC 713, HL, at [41].

39 *Burton v HMRC* [2009] SFTD 682 at [14].

51.8 Capital payment from close company

Section 96 TCGA contains two rules:
(1) Capital payment received from a close company **("the s.96(1) rule").**
(2) Capital payment made to a close company **("the s.96(2) rule")**.
These labels are not ideal, but it is difficult to think of better. I consider the s.96(1) rule in this section and the s.96(2) rule in the next.

Section 96(1) TCGA provides:

> Where a capital payment is received from a qualifying company which is controlled by the trustees of a settlement at the time it is received, for the purposes of sections 87 to 90 and Schedule 4C it shall be treated as received from the trustees.

See too 78.8 (Capital payment from company held by Estate).

51.8.1 *When is a distribution from a company a capital payment?*

SP 5/92 para 18 provides:

> In general, transactions between trustees and companies which they, directly or indirectly, wholly own, or between such companies, are … not treated as capital payments within TCGA 1992 s 97.

The paragraph sets out a commonsense definition of "wholly owned" and concludes with a qualification:

> This approach may not, however, be taken where, on the facts of a particular case, it appears that the transaction has been entered into solely or mainly for the purposes of obtaining a UK tax advantage.

SP 5/92 provides:

> 40 The payment must, however, be a capital payment within TCGA 1992 s 97(1)—ie it must not be chargeable to income tax on the recipient nor be made under a transaction entered into at arm's length. Intragroup payments which are not capital payments, for example
> [1] a capital distribution on winding up which represents merely a repayment of capital on shares, or
> [2] a distribution chargeable to corporation tax,
> do not fall within the ambit of TCGA 1992 s 96.

See 20.6 (Distribution to non-shareholder) for a discussion as to whether a payment from a company held by a trust to a beneficiary is a capital or income payment.

51.8.2 *"Qualifying company"*

Section 96(6) TCGA provides:

> For the purposes of subsection (1) above a qualifying company is
> [a] a close company[40] or
> [b] a company which would be a close company if it were resident in the UK.

For a note on this terminology, see 85.22.1 (Non-resident close company).

51.8.3 *"Controlled by the trustees"*

Section 96 TCGA provides:

> (7) For the purposes of subsection (1) above a company is controlled by the trustees of a settlement if it is controlled
> [a] by the trustees alone or
> [b] by the trustees together with a person who (or persons each of whom) falls within subsection (8) below.
> (8) A person falls within this subsection if—
> (a) he is a settlor in relation to the settlement, or
> (b) he is connected with a person falling within paragraph (a) above.

"Control" is defined in s.96(10) TCGA. This provides a slightly cut down form of the ultra-wide sense of control. The same definition is found in the context of s.86, for a discussion see 50.3.2 ("Control" and "participator").

In the following discussion it is important to distinguish between:

(1) Control in the s.96(10) sense (which I call **"control in the defined sense"**).
(2) Control in the natural sense of the word.

51.8.4 *Consequence of capital payment from company*

The s.96(1) rule is needed because s.87 only applies if a beneficiary receives a capital payment *from the trustees*. A capital payment from a *company* which was not (directly or indirectly) from the trustees would not be caught.

It might perhaps have been argued that receipt from a company is not

---

40 In practice it would be rare for s.96(1) to apply to a (UK resident) close company, as a payment from a (UK resident) close company is not likely to be a capital payment.

receipt (directly or indirectly) from the trustees even in a case where the trustees control the company in the natural sense of control, though the argument seems implausible.

The s.96(1) rule is needed in a case where the trustees "control" a company (in the defined sense) but they do not control the company in the natural sense of control. For instance, if a company is held in equal shares by three separate trusts with the same settlor. No one trust has control in the natural sense of control, and it could be argued (in the absence of s.96(1)) that a capital payment from the company is not received from the trustees of any of the trusts.

Where a capital payment is received from a company "controlled" (in the defined sense) by several persons, there is no apportionment provision (unlike the s.96(2) rule for a capital payment *to* a company). It is suggested that s.96(1) is a deeming provision which deems the payment to be received from the trustees, but the amount of the capital payment is not affected by the deeming. The amount of the capital payment is not the amount received from the company but the amount actually attributable to the trust. If each trust holds a third of the company, and they act together to procure the payment, each makes a third of the capital payment. But if one trust has control (in the natural sense), and is in a position to procure the capital payment, the capital payment is from that trust alone, and not from any other trust with some other interest in the company.

51.9 Capital payment to non-resident close company

Section 96(2) TCGA provides:

> Where
> [1][a] a capital payment is received from the trustees of a settlement
> [b] (or treated as so received by virtue of subsection (1) above)[41] and
> [2] it is received by a non-resident qualifying company,
> the rules in subsections (3) to (6) below shall apply for the purposes of sections 87 to 90 and Schedule 4C.

I refer to this as **"the s.96(2) rule"**.

51.9.1 *"Non-resident qualifying company"*

Section 96(9) TCGA provides:

---

41 See 51.8 (Capital payment from close company).

> For the purposes of subsection (2) above a non-resident qualifying company is a company which is not resident in the UK and would be a close company if it were so resident.

For a note on this terminology, see 85.22.1 (Non-resident close company).

51.9.2 *Consequence of capital payment to company*

The rules depend on whether:

(1) the company is controlled by one person alone.
(2) the company is controlled by 2 or more persons (taking each one separately).
(3) the company is controlled by 2 or more persons (taking them together).

Section 96 TCGA provides:

> (3) If the company is controlled by one person alone at the time the payment is received, and that person is then resident in the UK, it shall be treated as a capital payment received by that person.
> (4) If the company is controlled by 2 or more persons (taking each one separately) at the time the payment is received, then—
> (a) if one of them is then resident in the UK, it shall be treated as a capital payment received by that person;
> (b) if 2 or more of them are then resident in the UK ("the residents") it shall be treated as being as many equal capital payments as there are residents and each of them shall be treated as receiving one of the payments.
> (5) If the company is controlled by 2 or more persons (taking them together) at the time the payment is received-
> (a) it shall be treated as being as many capital payments as there are participators in the company at the time it is received, and
> (b) each such participator (whatever his residence) shall be treated as receiving one of the payments, quantified on the basis of a just and reasonable apportionment,
> but where (by virtue of the preceding provisions of this subsection and apart from this provision) a participator would be treated as receiving less than one-twentieth of the payment actually received by the company, he shall not be treated as receiving anything by virtue of this subsection.

51.9.3 *Interaction with temporary non-residence rules*

Section 96 TCGA provides:

(9A) For the purposes of this section an individual shall be deemed to have been resident in the United Kingdom at any time in any year of assessment for which he or she was not so resident if—
(a) section 10A applies to him or her, and
(b) the year falls within the temporary period of non-residence..
(9B) If—
(a) it appears after the end of any year of assessment that any individual is to be treated by virtue of subsection (9A) above as having been resident in the United Kingdom at any time in that year, and
(b) as a consequence, any adjustments fall to be made to the amounts of tax taken to have been chargeable by virtue of this section on any person,
nothing in any enactment limiting the time for the making of any claim or assessment shall prevent the making of those adjustments (whether by means of an assessment, an amendment of an assessment, a repayment of tax or otherwise).

51.9.4 *Disregard of capital payments to companies*

These are odd rules, to say the least. As often happens, the anomalies may favour the taxpayer. Section 87C TCGA was brought in to counteract this. It provides:

(1) For the purposes of sections 87 and 87A as they apply in relation to a settlement, no account is to be taken of a capital payment (or a part of a capital payment) within subsection (2).
(2) A capital payment is within this subsection if (and to the extent that) it is received (or treated as received) in a tax year from the trustees of the settlement by a company that—
(a) is not resident in the UK in that year, and
(b) would be a close company if it were resident in the UK,
(and is not treated under any of subsections (3) to (5) of section 96 as received by another person).

51.10 Matching

51.10.1 *Why does matching matter?*

The matching of capital payments with s.2(2) amounts is important for many reasons:
(1) *Time of charge:* The s.87 gains accrue in the year that a capital payment is matched with a s.2(2) amount.
(2) *Amount of charge:* The amount of the s.87 gain is the amount of the

capital payment or the amount matched, if less.

(3) *Which beneficiaries come into charge:* if
   (a) more than one beneficiary receives capital payments, and
   (b) there are not enough s.2(2) amounts to match all the capital payments

   the question which capital payment is matched with a s.2(2) amount makes all the difference as to which beneficiary receives s.87 gains.

(4) *Which capital payments come into charge:* if
   (a) one beneficiary receives more than one capital payment, some in and some outside the UK; and
   (b) there are not enough s.2(2) amounts to match all the capital payments

   the question which capital payment is matched with a s.2(2) amount matters for the remittance basis. If a UK benefit is matched, there is a charge; if a non-UK benefit is matched, the s.87 remittance basis offers a defence to the charge.

(5) *The interest surcharge,* which depends on the time gap between a capital payment and the s.2(2) amount with which it is matched.

(6) *2008 transitional relief*, which applies where post-2008 capital payments are matched to pre-2008 s.2(2) amounts.

Matching is carried out on a LIFO (last in first out) basis. EN FB 2008 provides a summary:

> 452. Where the s.2(2) amount is equal to or greater than the capital payments then all the capital payments are matched:
> [1] any surplus s.2(2) amount is carried back to the year preceding the current tax year and any unmatched capital payments of that earlier year are matched to the surplus s.2(2) amount;
> [2] any surplus s.2(2) amount is carried back to the preceding year and matched with unmatched capital payments of that year, and so on, until the s.2(2) amount has been reduced to nil or there are no unmatched capital payments left in any earlier year; and
> [3] any surplus s.2(2) amount left after matching to previous years is available to match against future capital payments.
>
> 453. Where the amount of capital payments for the latest relevant tax year is greater than the s.2(2) amount for that year, then the surplus capital payments are carried back in the same way as surplus s.2(2) amounts, matching the surplus capital payments against the unmatched trust gains of each earlier year, starting with the latest year first and only moving back to an earlier year where there are no unmatched trust gains left in the later year. Any capital payments that remain unmatched are

> carried forward from the current tax year to be matched against the s.2(2) amounts of future years. ...
> 455. Note that:
> [1] the matching rules are modified by new subs.(4) of s.762 ICTA in relation to offshore income gains; and
> [2] capital payments are matched to trust gains within a given tax year on a pro rata basis, not on a daily basis.

The HMRC s.87 guidance note provides:

> 14. A key element of the FA 2008 changes is the introduction of rules for matching capital payments to section 2(2) amounts from 6 April 2008. The basic rules are set out in section 87A TCGA in a series of steps. Capital payments are matched against section 2(2) amounts in the following order:
> 15. First against section 2(2) amounts of the same year.
> 16. Second against unmatched section 2(2) amounts of earlier years taking the most recent year first.
> 17. Third against section 2(2) amounts of later years. In this case priority is given first to any capital payments received in that year and then to any capital payments brought forward. If capital payments are brought forward from more than one year the capital payment received in the latest year is matched first.

The rules changed from a FIFO to a LIFO basis in 2008. HMRC did not state why they made this change. I surmise that it was done to minimise the benefit of 2008 transitional relief, which applies if post-2008 capital payments are matched with pre-2008 s.2(2) amounts. The old rule would have maximised the benefit of the relief, so that trusts with substantial s.2(2) amounts may have been free of CGT for a substantial period of time. Had the reason been given, there might have been some debate about whether the benefit justified the change, but as it was, there was none. But there it is.

51.10.2 *The statute*

Section 87A TCGA provides:

> (1) This section supplements s.87.
> (2) The following steps are to be taken for the purposes of matching capital payments with s.2(2) amounts.
> *Step 1*
> Find the s.2(2) amount for the relevant tax year.

Step 2
Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

Armed with these figures we proceed to the matching rule:

Step 3
The s.2(2) amount for the relevant tax year is matched with—

(a) if the total amount of capital payments received in the relevant tax year does not exceed the s.2(2) amount for the relevant tax year, each capital payment so received, and

(b) otherwise, the relevant proportion of each of those capital payments.

"The relevant proportion" is the s.2(2) amount for the relevant tax year divided by the total amount of capital payments received in the relevant tax year.

I refer to a case within (a) as a "**surplus s.2(2) amount**" and a case within (b) as a "**surplus capital payment**".

The next step is a recomputation of the s.2(2) amount and of the amount of capital payments

Step 4
[1] If para (a) of Step 3 applies—

That is, if there is a surplus s.2(2) amount—

(a) reduce the s.2(2) amount for the relevant tax year by the total amount of capital payments referred to there, and

(b) reduce the amount of those capital payments to nil.

I refer to the s.2(2) amount after this reduction as "**the unmatched s.2(2) amount**".

[2] If para (b) of that Step applies—

That is the case of a surplus capital payment—

(a) reduce the s.2(2) amount for the relevant tax year to nil, and

(b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

I refer to the amount of the capital payments after this deduction as "**the unmatched capital payments**".

Then one starts again at the beginning, but with modifications:

Step 5

[1] Start again at Step 1 (unless subs.(3) applies).

[2] If the s.2(2) amount for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—

(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

I again refer to a case within step 5[2] (where there is an unmatched s.2(2) amount) as a "**surplus s.2(2) amount**".

Amended as step 5[2] directs, Steps 1-4 become:

Step 1

Find the s.2(2) amount for the relevant tax year [ie the unmatched s.2(2) amount].

Step 2

Find the total amount of capital payments received by the beneficiaries from the trustees ~~in the relevant tax year~~ *in the latest tax year which—*

(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

Step 3

The s.2(2) amount for the relevant tax year is matched with—

(a) if the total amount of capital payments received ~~in the relevant tax year~~ *in the latest tax year which—*

(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

does not exceed the [unmatched] s.2(2) amount for the relevant tax year, each capital payment so received, and

(b) otherwise, the relevant proportion of each of those capital payments.

"The relevant proportion" is the [remaining] s.2(2) amount for the relevant tax year divided by the total amount of capital payments received ~~in the relevant tax year~~ *in the latest tax year which—*

(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

Step 4

If para (a) of Step 3 applies—

(a) reduce the [unmatched] s.2(2) amount for the relevant tax year by the

total amount of capital payments referred to there, and

(b) reduce the amount of those capital payments to nil.

If para (b) of that Step applies—

(a) reduce the [unmatched] s.2(2) amount for the relevant tax year to nil, and

(b) reduce the [unmatched] amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

Eventually the unmatched s.2(2) amount is reduced to nil (ie all the s.2(2) amount is matched). Then step 5[2] ceases to apply. The journey then takes us to step 5[3]:

Step 5

[3] If the s.2(2) amount for the relevant tax year (as so reduced) is nil, read references to the s.2(2) amount for the relevant tax year as the s.2(2) amount for the latest tax year—

(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) for which the s.2(2) amount is not nil.

I refer to a case within step 5[3] as a "**surplus capital payment**". This is a case where:

(1) there is no unmatched s.2(2) amount for the relevant year;

(2) there is a s.2(2) amount for an earlier year.

Amended as step 5[3] directs, steps 1-4 become:

Step 1

Find the s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year —*

(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) for which the s.2(2) amount is not nil.

Step 2

Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

Step 3

The s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year—*

(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) for which the s.2(2) amount is not nil

is matched with—

(a) if the total amount of capital payments received in the relevant tax year does not exceed the s.2(2) amount ~~for the relevant tax year~~, *for the latest tax year—*

(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) for which the s.2(2) amount is not nil.

each capital payment so received, and

(b) otherwise, the relevant proportion of each of those capital payments.

"The relevant proportion" is the s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year—*

(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) for which the s.2(2) amount is not nil.

divided by the total amount of capital payments received in the relevant tax year.

Step 4

If para (a) of Step 3 applies—

(a) reduce the s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year—*

(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) for which the s.2(2) amount is not nil.

by the total amount of capital payments referred to there, and

(b) reduce the amount of those capital payments to nil.

If para (b) of that Step applies—

(a) reduce the s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year—*

(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) for which the s.2(2) amount is not nil.

to nil, and

(b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

51.10.3 *When to stop*

Section 87A(3) TCGA (incorporated at step 5[1]) states when one can stop repeating these steps:

> This subsection applies if—
>
> (a) all of the capital payments received by beneficiaries from the trustees in the relevant tax year or any earlier tax year have been reduced to nil, or
>
> (b) the s.2(2) amounts for the relevant tax year and all earlier tax years have been reduced to nil.

That is, one stops when there are no unmatched capital payments or s.2(2) amounts.

Section 87A(4) TCGA provides:

> The effect of any reduction under Step 4 of subsection (2) is to be taken into account in any subsequent application of this section.

That seems self-evident.

51.10.4 *HMRC example: Surplus s.2(2) amount*

EN FB 2008 provide two examples. *Text in italics represents HMRC comments:*

> ***56. Section 87A: Example 1: section 2(2) amount is greater than the total amount of capital payments for latest tax year:***
> The facts assumed in the example are as follows:
> *2008-09: no surplus trust gains or surplus capital payments*

Year	***Capital payment***	***s.2(2) amount***
2009-10:	*£100k*	*nil*
2010-11:	*£200k*	*nil*
2011-12:	*£500k*	*nil*
2012-13:	*£500k*	*£2m*

I set out the text of the relevant steps in the analysis.

> *Step 1*
> Find the s.2(2) amount for the relevant tax year.
> *Step 2*
> Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

The relevant tax year is 2012/13 and we can take the figures from the table.

We move on to step 3. There is (in my terminology) a surplus s.2(2) amount, because "the total amount of capital payments received in the relevant tax year" (£500k) does not exceed "the s.2(2) amount for the relevant year" (£2m). Accordingly:

> *Step 3*
> The s.2(2) amount for the relevant tax year is matched with—
> (a) ... each capital payment so received,

Thus step 3 states that £2m (the s.2(2) amount for 2012/13) is matched with the £500k capital payment. There are two difficulties with this. First, the charge in s.87(2) requires us to ask whether the *capital payment* is matched with the s.2(2) amount, and step 3 tells us that the *s.2(2) amount* is matched with the capital payment. The answer is that matching is by implication a reflexive operation, ie if A is matched with B, then B is matched with A.

Secondly, applying step 3 literally, the capital payment (£500k) is matched with the *entire* s.2(2) amount (£2m). This does not matter because s.87(3) TCGA restricts the charge to the amount of the capital

payment. In order to follow s.87(3) one needs to read it together with s.87(2):

> (2) Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement who has received a capital payment from the trustees in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the s.2(2) amount for the relevant tax year or any earlier tax year.
> (3) The amount of chargeable gains treated as accruing is equal to—
> (a) the amount of the capital payment, or
> (b) if only part of the capital payment is matched, the amount of that part.

But the HMRC analysis is as follows:

> *Match as follows:*
> *a. 2012-13 capital payments £500,000 match to £500,000 gains.*

The HMRC analysis (wisely) does not try to refer to the statutory steps which authorise this conclusion. (Indeed, there is no reason to think that the author of the HMRC example read the legislation.) But the end result is the same.

We move on to step 4. Ours is a surplus capital payment case, so step 4 provides:

> *Step 4*
> If para (a) of Step 3 applies—
> (a) reduce the s.2(2) amount for the relevant tax year by the total amount of capital payments referred to there, and
> (b) reduce the amount of those capital payments to nil.

So our revised table becomes:

Year	***Capital payment***	***s.2(2) amount***
2009-10:	*£100k*	*nil*
2010-11:	*£200k*	*nil*
2011-12:	*£500k*	*nil*
2012-13:	*£0 ~~£500k~~*	*£1.5 ~~£2m~~*

The HMRC analysis is as follows:

> *[1] 2012-13 capital payments reduced to nil.*
> *[2] Unmatched 2012-13 trust gains reduced to £1.5 million.*
> *[3] Refer unmatched trust gains to preceding year.*

Point [1] is correct. Points [2] and [3] are a fair paraphrase.

Our journey takes us to step 5:

> *Step 5*
> [1] Start again at Step 1 (unless subsection (3) applies).
> [2] If the s.2(2) amount for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—
> (a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
> (b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

There is still a surplus s.2(2) amount (the s.2(2) amount for the relevant tax year is not nil, it is now £1.5m).

We revert to step 2 which now reads:

> *Step 2*
> Find the total amount of capital payments received by the beneficiaries from the trustees ~~in the relevant tax year~~ *in the latest tax year which—*
> *(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and*
> *(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries*

The "latest tax year" is now 2011-12 and we can take the figures from the revised table.

We move on to step 3. This is a surplus s.2(2) amount case, because "the total amount of capital payments received in the latest tax year" (£500k) does not exceed "the s.2(2) amount for the relevant year" (£1.5m). Accordingly:

> *Step 3*
> The s.2(2) amount for the relevant tax year is matched with—
> (a) ... each capital payment so received,

Thus step 3 states that £1.5m (the unmatched s.2(2) amount) is matched with the £500k capital payment. But the HMRC analysis is as follows:

> *b. 2011-12 unmatched capital payments £500,000 match to £500,000 gains.*

As noted, this is a loose paraphrase of step 3, but it does not matter.

We move on to step 4. Ours is a step 3(a) case, so step 4 provides:

> *Step 4*
> If para (a) of Step 3 applies—
> (a) reduce the s.2(2) amount for the relevant tax year by the total amount of capital payments referred to there, and
> (b) reduce the amount of those capital payments to nil.

So:
(a): reduce the s.2(2) amount for the relevant year thus: £1.5m – £500k = £1m.
(b): reduce the capital payment for the latest year [2011-12] to nil.
The HMRC analysis is as follows:

> *2011-12 capital payments reduced to nil.*
> *Unmatched 2012-13 trust gains reduced to £1 million.*
> *Refer unmatched trust gains to preceding year.*

The process repeats once again, but "the latest tax year" now becomes 2009-10. It is not necessary to set out the steps. The reader will by now have the idea. The HMRC analysis (or paraphrase) is as follows:

> *2010-11 unmatched capital payments £200,000 match to £200,000 gains.*
> *2010-11 capital payments reduced to nil.*
> *Unmatched 2012-13 trust gains reduced to £800,000.*
> *Refer unmatched trust gains to preceding year.*

The process repeats once again, but "the latest tax year" now becomes 2009-10. It is not necessary to set out the steps. The HMRC analysis (or paraphrase) is as follows:

> *d. 2009-10 unmatched capital payments £100,000 match to £100,000 gains.*
> *2010-11 capital payments reduced to nil.*
> *Unmatched 2012-13 trust gains reduced to £700,000.*
> *Refer unmatched trust gains to preceding year.*

At this point s.87A(3) TCGA applies because "all of the capital payments received by beneficiaries from the trustees in the relevant tax year or any earlier tax year have been reduced to nil". Accordingly the steps come to an end. The HMRC analysis is:

> *e. No unmatched capital payments in 2008-09 or earlier years.*

Lastly, the HMRC analysis provides:

> *Carry forward unmatched trust gains of 2012-13 of £700,000 to be matched against capital payments of 2013-14 and subsequent years.*

This is a reference to step 1 as amended by step 5[3] but the point does not actually arise under the facts of the HMRC example.

It is noteworthy that in order to deal with the facts of the HMRC example (which is a simplication of the facts of a typical case in real life because there is only one s.2(2) amount) one has to carry out 15 steps.

The HMRC s.87 guidance note provides:

> **Example 3: New section 87A - Section 2(2) amounts greater than capital payments in latest year**
>
> At the start of 2008-09 there are no unmatched capital payments or section 2(2) amounts.

Year	Capital payments	S.2(2) amount
2008-09	£10,000	Nil
2009-10	£15,000	Nil
2010-11	£2,000	£24,000

> When the years 2008-09 and 2009-10 are considered immediately after the end of those years no chargeable gains accrue.
>
> In 2010-11 the capital payment of £2,000 is matched against the section 2(2) amount. A chargeable gain of £2,000 accrues in the year 2010-11.
>
> The capital payments for 2010-11 are reduced to nil. The section 2(2) amount is reduced to £22,000 (£24,000 - £2,000).
>
> The £22,000 section 2(2) amount for 2010-11 is matched against the capital payments of £15,000 in 2009-10. A chargeable gain of £15,000 accrues in the year 2010-11.
>
> The section 2(2) amount for 2010-11 is reduced to £7,000 (£24,000 - £2,000 - £15,000)
>
> The capital payments for 2009-10 are reduced to nil.
>
> The £7,000 section 2(2) amount for 2010-11 is matched against the capital payments of £10,000 for 2008-09. A chargeable gain of £7,000 accrues in the year 2010-11.
>
> The section 2(2) amount for 2010-11 is reduced to nil (£24,000 - £2,000 - £15,000 - £7,000). The capital payments for 2008-09 are reduced to £3,000 (£10,000 - £7,000). These capital payments will be set against future section 2(2) amounts.
>
> The chargeable gains for 2010-11 total £24,000 (£2,000 + £15,000 + £7,000).

51.10.5 *HMRC example: Surplus capital payment*

HMRC's second example is as follows

> ***57. Section 87A: Example 2: capital payments are greater than section 2(2) amount for latest tax year: The facts assumed in the example are as follows:***
>
> *2008-09: no surplus trust gains or surplus capital payments*
>
> | ***Year*** | ***Capital payment*** | ***s.2(2) amount*** |
> |---|---|---|
> | *2009-10:* | *nil* | *£100k* |
> | *2010-11:* | *nil* | *£200k* |
> | *2011-12:* | *nil* | *£500k* |
> | *2012-13:* | *£2m* | *£500k* |

I set out the text of the relevant steps in the analysis.

> *Step 1*
> Find the s.2(2) amount for the relevant tax year.
> *Step 2*
> Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

The relevant tax year is 2012/13 and we can take the figures from the table.

We move on to step 3. There is (in my terminology) a surplus capital payment because "the total amount of capital payments received in the relevant tax year" (£2m) does exceed "the s.2(2) amount for the relevant year" (£500k). Accordingly:

> *Step 3*
> The s.2(2) amount for the relevant tax year is matched with—
> (b) ... the relevant proportion of each of those capital payments.

The relevant proportion" is the s.2(2) amount for the relevant tax year (£500k) divided by the total amount of capital payments received in the relevant tax year (£2m) = 0.25.

Thus step 3 states that £500k (the s.2(2) amount) is matched with one quarter of the capital payment = £500k. As noted, the charge in s.87(2) requires us to ask whether the *capital payment* is matched with the s.2(2) amount, and step 3 tells us that the *s.2(2) amount* is matched with the capital payment. The solution is that matching is a reflexive operation, ie if A is matched with B, then B is matched with A.

The HMRC analysis is as follows:

Match as follows:
a. 2012-13 capital payments £500,000 match to £500,000 gains.

We move on to step 4. Ours is a surplus capital payment case, so step 4 provides:

Step 4
[2] If para (b) of that Step [step 3] applies—
(a) reduce the s.2(2) amount for the relevant tax year to nil, and
(b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

So our revised table becomes:

Year	**Capital payment**	**s.2(2) amount**
2009-10:	nil	£100k
2010-11:	nil	£200k
2011-12:	nil	£500k
2012-13:	£1.5 ~~£2m~~	£0 ~~£500k~~

The HMRC analysis is as follows:

Unmatched 2012-13 capital payments reduced to £1.5 million.
Refer unmatched capital payments to preceding year.

Our journey takes us to step 5.

Step 5
[1] Start again at Step 1 (unless subs.(3) applies)....
[3] If the s.2(2) amount for the relevant tax year (as so reduced) is nil, read references to the s.2(2) amount for the relevant tax year as the s.2(2) amount for the latest tax year—
(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and
(b) for which the s.2(2) amount is not nil.

This is a surplus capital payment case, (the s.2(2) amount for 2012–13 is now nil).

We revert to step 3 which now reads:

Step 3
The s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year—*
(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and
(b) for which the s.2(2) amount is not nil
is matched with—

(a) if the total amount of capital payments received in the relevant tax year does not exceed the s.2(2) amount ~~for the relevant tax year~~, *for the latest tax year—*

(a) which is before the last tax year for which Steps 1 to 4 have been undertaken,

(b) for which the s.2(2) amount is not nil.

each capital payment so received, and

(b) otherwise, the relevant proportion of each of those capital payments.

"The relevant proportion" is the s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year*

(a) which is before the last tax year for which Steps 1 to 4 have been undertaken,

(b) for which the s.2(2) amount is not nil

divided by the total amount of capital payments received in the relevant tax year.

The "latest tax year" is now 2011-12. This is a surplus capital payment case because "the total amount of capital payments received in the relevant tax year" (now £1.5m) does exceed "the s.2(2) amount for the latest year" (£500k). Accordingly:

Step 3

The s.2(2) amount for the latest tax year is matched with—

(b) ... the relevant proportion of each of those capital payments.

The relevant proportion is one third.

The process repeats again and again. It is not necessary to set out the steps. The reader will by now have the idea. The HMRC analysis (or paraphrase) is as follows:

2012-13 trust gains reduced to nil.
b. 2011-12: match 2012-13 capital payments £1.5 million to £500,000 gains.
2011-12 trust gains reduced to nil.
Unmatched 2012-13 capital payments reduced to £1 million.
Refer unmatched capital payments to preceding year.
c. 2010-11: match 2012-13 capital payments £200,000 to £200,000 gains.
2010-11 trust gains reduced to nil.
Unmatched 2012-13 capital payments reduced to £800,000.
Refer unmatched capital payments to preceding year.
d. 2009-10: match 2012-13 capital payments £100,000 to £100,000 gains. 2010-11 trust gains reduced to nil.
Unmatched 2012-13 capital payments reduced to £700.000.
Refer unmatched capital payments to preceding year.
e. No unmatched trust gains in 2008-09 or earlier years.
Carry forward unmatched capital payments of 2012- 13 of £700,000 to

be matched against trust gains of 2013-14 and subsequent years.

It is noteworthy that in order to deal with the facts of the HMRC example (which is a simplication of the facts of a typical case in real life for there is only one capital payment in five years) one has to carry out 15 steps.

51.10.6 *Year of death of beneficiary*

If a beneficiary dies in a tax year, all gains accruing to the trustees in that year are s.2(2) amounts, which can be matched to capital payments made to the beneficiary, even post-death gains. However gains of a subsequent tax year cannot be matched. Section 87 does not say so expressly but the beneficiary could not be subject to CGT on s.87 gains, as the charge is limited to UK residents (s.2 TCGA) and a deceased person is not resident in the UK. That has to be the rule: otherwise it could happen that an estate of a beneficiary who received capital payments could not be completely administered, as there might be a possibility of gains accruing at any time in the future.

Contrast the rule for s.86 which does not apply to gains accruing to the trustees in the year that the settlor dies, even pre-death gains.[42] Perhaps the reason for the s.87 rule is that it works (slightly) more fairly when two beneficiaries receive capital payments in a tax year and one of them dies during that year.

51.10.7 *Commentary: Step-based drafting*

The pre-2008 s.87 provided:

> *(4) Subject to the following provisions of this section, the trust gains for a year of assessment shall be treated as chargeable gains accruing in that year to beneficiaries of the settlement who receive capital payments from the trustees in that year or have received such payments in any earlier year.*
> *(5) The attribution of chargeable gains to beneficiaries under subsection (4) above shall be made in proportion to, but shall not exceed, the amounts of the capital payments received by them.*
> *(6) A capital payment shall be left out of account for the purposes of subsections (4) and (5) above to the extent that chargeable gains have by reason of the payment been treated as accruing to the recipient in an earlier year.*

---

42 See 50.11 (Year of death of settlor).

No reader who labouriously works through the almost endless iterative steps of s.87A will consider the new style of wording is an improvement on the old. I first speculated whether the legislation was drafted by someone who trained to write computer programs rather than legislation. The correct explanation seems to be that "step-based drafting" was an innovation of the tax law rewrite project in the search for new and clearer methods of drafting; the drafter of the FA 2008 sought to adopt the same technique, but in more clumsy hands the technique delivered obscurity rather than clarity.

This does not necessarily mean that step-based drafting is a bad technique, but it certainly demonstrates how it can be used to bad effect. Finance Bills are generally drafted in a hurry (the FA 2008 was a mad panic) and clarity was a victim of the process.

The fundamental problem however is not the drafting, but the need to match capital payments with trust gains for a year.

51.11 Planning by matching

Matching is a rough and ready rule and trustees need to plan carefully to avoid unfairness.

51.11.1 *Planning to obtain remittance basis*

Suppose:

(1) Years 1–10: A beneficiary ("B") occupies a UK house held by a trust. This is a capital payment.

(2) Year 11: The house is sold for £1m gain and a s.2(2) amount arises.

In principle the s.2(2) amount in year 11 is matched with the capital payments in years 1–10. The s.87 gain is taxed on an arising basis of the benefit received in the UK. If B is UK resident in year 11, this is an expensive matter. Suppose:

(3) Year 11: The trustees make a capital payment of £1m to B outside the UK.

The s.2(2) amount is matched with the £1m capital payment and the s.87 gain is taxed on the remittance basis.

51.11.2 *Planning to avoid interest surcharge*

Since the surcharge matches on a LIFO basis, the charge can be avoided by realising gains in the year that any capital payment is made, so as to frank any capital payment with current year gains. If gains are not actually

realised, the rules in schedule 4B TCGA make it fairly easy to realise deemed gains which may do just as well.[43]

51.12 Capital payment received by non-beneficiary

Chargeable gains are treated as accruing in the relevant tax year to *a beneficiary of the settlement* who has received a capital payment from the trustees.

At first sight, the charge only applies to beneficiaries so if a capital payment is received by a non-beneficiary there is no charge. However, s.97(8) TCGA provides:

> In a case where—
>
> (a) at any time on or after 19th March 1991 a capital payment is received from the trustees of a settlement or is treated as so received by virtue of section 96(1),
>
> (b) it is received by a person, or treated as received by a person by virtue of section 96(2) to (5),
>
> (c) at the time it is received or treated as received, the person is not (apart from this subsection) a beneficiary of the settlement, and
>
> (d) subsection (9) or (10) below does not prevent this subsection applying,
>
> for the purposes of sections 86A to 90 and Schedule 4C the person shall be treated as a beneficiary of the settlement as regards events occurring at or after that time.

The drafting is clumsy: the s.87 charge applies to a "beneficiary" who receives a capital payment, but any person who receives a capital payment is treated as a beneficiary: it would have been easier to say that the charge applies to a "person" who receives a capital payment and drop the (now only nominal) requirement that recipient has to be a beneficiary! But it comes down to the same thing.

The reader may wonder how a capital payment could be received by a non-beneficiary. In general, trustees may only confer benefits on beneficiaries. However, there are cases where it could happen:

(1) A capital payment to a non-resident close company, which is treated as received by the persons who control it;[44] those persons might not be beneficiaries.

---

43 See 52.1 (Borrowing by non-resident trust: Sch 4B TCGA).

44 See 51.9 (Capital payment to non-resident close company).

(2) An exercise of the power of advancement for the benefit of B (a beneficiary) may take the form of a payment to a third person, X (not a beneficiary). This is not a capital payment received by B[45] but it is a capital payment received by X.
(3) Beneficiaries may authorise trustees to make a payment to a non-beneficiary.

On the other hand if B (a beneficiary) *directs* trustees to make a payment to a third person, X, the benefit is treated as received by B (not X).[46] If the payment is made in breach of trust, there is no capital payment (or the value of the benefit is nil).[47]

It is possible that a person may be a beneficiary at the time of a capital payment but not when the s.87 gain accrues (if the trust gain is matched in a later year and the person has then ceased to be a beneficiary). Section 97(8) TCGA does not apply in such a case, because the condition in s.97(8)(a) does not apply. It is considered that s.87(2) can and should be construed so as to apply in this case; otherwise there would be a strange anomaly in the legislation. That is, when it states that s.87 gains accrue to "a beneficiary of the settlement who has received a capital payment" it is sufficient that the recipient is a beneficiary at the time they receive the capital payment, it is not required that the recipient is also a beneficiary at the time that the s.87 gains accrue.

51.12.1 *Receipt by beneficiary and non-beneficiary*

There are two exceptions to the rule in s.97(8). One concerns transfers between trusts and is discussed elsewhere.[48]

The other is s.97(9) TCGA which provides:

> Subsection (8) above shall not apply where a payment mentioned in para
> (a) is made in circumstances where it is treated (otherwise than by subsection (8) above) as received by a beneficiary.

I do not understand the purpose of this. It concerns a case where:
(1) s.97(8) would otherwise apply, that is, in short:
(a) a capital payment is received from the trustees of a settlement (or is treated as so received)

---

45 See 30.4.12 (Moral, sentimental and other benefits difficult to quantify).
46 See 51.7 (Receipt from the trustees).
47 See 30.4.15 ("Benefit" provided in breach of trust).
48 See 51.18.1 (No s.87 charge on transfer between trusts).

(b) it is received by a person, (or treated as received by a person),
(c) at the time it is received (or treated as received) the person is not a beneficiary of the settlement

but

(2) the capital payment is treated as received by a beneficiary.

The exception seems to be considering a case where a capital payment is received by two persons, one a beneficiary and the other a non-beneficiary. Suppose an arrangement where X receives property directly and Y later receives it indirectly.

(1) Assume one of X or Y is a beneficiary but not both. Perhaps in this case the non-beneficiary is not charged, because the capital payment is "treated as received by a beneficiary". However, this is a case where the payment is *actually* received by the beneficiary (directly or indirectly), not a case where it is *treated* as received; but perhaps the words "treated as" here include an actual receipt.
(2) Assume neither X nor Y are a beneficiary. In that case, X is treated as a beneficiary, but not Y. But this scenario is very far fetched.

Perhaps the subsection has no application.

51.13 Interest surcharge

Section 91(1) TCGA provides:

> This section applies if—
> (a) chargeable gains are treated under s.87 or 89(2) as accruing to a beneficiary by virtue of the matching (under s.87A) of all or part of a capital payment with the s.2(2) amount for a tax year ("the relevant tax year"),
> (b) the beneficiary is charged to tax by virtue of that matching, and
> (c) the capital payment was made more than one year after the end of the relevant tax year.

It is not enough that chargeable gains to accrue to a beneficiary, and that the beneficiary is charged to tax; this must be "by virtue of the matching". But since gains never accrue unless there is matching, and the beneficiary is never charged unless there is matching, the words appear to be otiose. Section 91 goes on to deal with part matching:

> (1A) Where part of a capital payment is matched, references in subsections (2) and (3) to the capital payment are to the part matched.

We then turn to the tax increase:

(2) [a] The tax payable by the beneficiary in respect of the payment shall be increased by the amount found under subsection (3) below,
[b] except that it shall not be increased beyond the amount of the payment;
[c] and an assessment may charge tax accordingly.

Para 2[b] stops the Treasury increasing the rate of tax beyond 100%. One would hope it is not necessary.

Para 2[c] is otiose.

Section 91 goes on to specify the amount of the increase:

(3) The amount is one equal to the interest that would be yielded if an amount equal to the tax which would be payable by the beneficiary in respect of the payment (apart from this section) carried interest for the chargeable period at the rate of 10 per cent per annum.

Thus we have a notional 10% interest – the rate bears no relation to actual interest rates – for a period called a chargeable period.

(4) The chargeable period is the period which—
(a) begins with the later of the 2 days specified in subsection (5) below, and
(b) ends with 30th November in the year of assessment following that in which the capital payment is made.
(5) The 2 days are—
(a) 1st December in the tax year immediately after the relevant tax year, and
(b) 1st December falling 6 years before 1st December in the year of assessment following that in which the capital payment is made.

I call this the "**interest surcharge.**" It is not in fact interest but the wording is designed to give the some of the appearance of interest.

As the chargeable period cannot exceed 6 years and the maximum surcharge is 60% of the tax. As the top CGT rate is 28% the maximum rate of tax on a capital payment is therefore 44.8%. Where the full surcharge applies, there is not a very great difference between IT and CGT rates.

For completeness, the Treasury may alter the rules;[49] but they have never

49 Section 91 TCGA provides:
"(6) The Treasury may by order substitute for the percentage specified in subsection (3) above (whether as originally enacted or as amended at any time under this

done so.

What is the position if the s.87 remittance basis applies? Section 12(2) TCGA (applied by s.87B TCGA, discussed below) provides:

> Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign [s.87] chargeable gains are remitted to the UK.

One might argue that there is no interest surcharge, because the gains are not charged to tax by virtue of matching; they are charged by virtue of the remittance. But the better view is the surcharge applies (by reference to the year of capital payment, not by reference to the year of remittance). HMRC agree: see 51.15.1 (HMRC examples).

There is a small planning point here for remittance basis taxpayers. One could avoid the interest surcharge if the trustees make capital payments in the year that s.2(2) amounts (trust gains) accrue, with a view to remittance in later years; whereas if the capital payment is made in the later year, followed by prompt remittance, there is an interest surcharge.

The HMRC s.87 guidance note provides:

Example 13: New section 91 - tax increase under section 91 TCGA
As at [the start of] 2008-09 there are no unmatched capital payments or section 2(2) amounts.

Year	**Capital payments**	**S.2(2) amount**
2008-09	£ 3,000	£17,000
2009-10	£ 5,000	£ 6,000
2010-11	£37,000	£16,000
Total	£45,000	£39,000

In summary the capital payments for each year are matched against the section 2(2) amounts for each year as shown below:

	Capital payment	**s.2(2) amount**	**s.87 gain**	**Unmatched s2(2) amount**	**Unmatched capital payment**
2008-09	3,000	17,000	3,000	14,000	
2009-10	5,000	6,000	5,000	1,000	
2010-11	37,000	16,000	16,000	nil	21,000

---

subsection) such other percentage as they think fit.

(7) An order under subsection (6) above may provide that an alteration of the percentage is to have effect for periods beginning on or after a day specified in the order in relation to interest running for chargeable periods beginning before that day (as well as interest running for chargeable periods beginning on or after that day)."

In 2010-11 it is necessary to match the unmatched capital payments for that year against the unmatched section 2(2) amounts of earlier years. On a last in-first out basis £1000 is matched against the unmatched amount section 2(2) for 2009-10 and £14,000 against the unmatched section 2(2) amount for 2008-09.
Total gains of £31,000 arise as a result of the capital payment in 2010-11 matched as follows:
2010-11 £16,000
2009-10 £1,000
2008-09 £14,000
At the time of writing the annual exempt amount and rate of Capital Gains Tax are not known for 2010-11. This example assumes they are £10,200 and 18% respectively.
The tax due for 2010-11 is £3744 ([£31,000 - £10,200] @ 18%).
Section 91 TCGA will apply to increase the tax due on the gain £14,000. The taxpayer's annual exempt amount can be set against that part of the gain. The tax due on £14,000 – £10,200 is £3800 @ 18% = £684. This amount of tax is increased by 20% ie £136 making the total tax payable £3880 (£3,744 + £136).

In the terminology of s.91, so far as the s.87 gain is matched to the £14k s.2(2) amount for 2008/09:
The relevant tax year is 2008/09
The chargeable period begins 1 December 2009.
The chargeable period ends 30 November 2011.
Hence the rate of the interest surcharge is 20%.
There is no interest surcharge so far as the s.87 gain is matched to the s.2(2) amount for 2009/10 as the condition in s.91(1)(c) is not met. In short, the interest surcharge rule does not apply if only one year has passed since the s.2(2) amount (trust gain).

51.13.1 *Interest surcharge: Commentary*

What is the reason for the interest surcharge? It is to counter the perceived advantage that UK trusts pay CGT on an arising basis, but non-resident trusts (outside s.86) pay CGT on a capital payments basis, which is more favourable. But it works very oddly and unfairly, particularly after the extension of s.87 to foreign domiciled settlors and beneficiaries in 2008. For instance, consider a trust set up some years ago by an Australian for Australian beneficiaries; one beneficiary comes to the UK and receives a capital payment here. Why should there be a surcharge?

The surcharge is not likely to bring in sufficient tax to justify the complications and unfairness that arises. The case for repeal of the rule is very strong.

51.14 Non-resident beneficiary

It does not matter that s.87 gains accrue to a beneficiary who is non-resident (unless the temporary non-residence rules apply) since the gains are not subject to CGT. The HMRC s.87 guidance note provides:

> 7. Whether there is a charge to Capital Gains Tax depends on the general rule in section 2 TCGA. This imposes a charge to Capital Gains Tax on UK resident and ordinarily resident persons. So if the gain accrues to a person who is not UK resident or not ordinarily resident there is no charge to Capital Gains Tax but section 87 still applies to match the gain.

But the time which matters is when the gains accrue, so the matching rules need to be considered and pose something of a trap.

Suppose:

(1) Year 1: A capital payment is made to a beneficiary ("B") when B is non-resident. There are no s.2(2) amounts so that the capital payment is not matched.

(2) Year 2: A s.2(2) amount accrues when B is UK resident.

The capital payment is matched in year 2, so the s.87 gain is chargeable (subject to the s.87 remittance basis).

51.14.1 *Planning for beneficiary coming to UK*

This problem arises if a beneficiary has an unmatched capital payment before coming to the UK. In this situation the trustees should trigger gains in year 1. The capital payment will then be matched in year 1, and will not come into charge in year 2.

51.14.2 *Capital payment to non-resident: Commentary*

It is suggested that (subject to the temporary non-residence rules) a capital payment accruing to a non-resident should not come into charge. The present charge only affects those who fail to take the necessary planning, and in many of those cases it is likely that it will be overlooked or ignored by non-compliant taxpayers.

51.15 Section 87 remittance basis

Section 87B TCGA provides a relief which I call the "**s.87 remittance basis**". Section 87B(1) provides:

> This section applies if—
> (a) chargeable gains are treated under s.87 as accruing to an individual in a tax year, and
> (b) s.809B, 809D or 809E (remittance basis) applies to the individual for that year.

In short, the relief applies to remittance basis taxpayers. Section 87B(2) provides the relief:

> The chargeable gains are foreign chargeable gains within the meaning of s.12 (non-UK domiciled beneficiaries to whom remittance basis applies).

The effect of s.87B(2) is to incorporate the ITA remittance basis. Section 87B continues:

> (3) For the purposes of Chapter A1 of part 14 of ITA 2007 (remittance basis) treat relevant property or benefits[50] as deriving from the chargeable gains.

A rule of this kind is needed because s.87 gains (being fictional) could not be remitted.

As to where benefits are received, see 30.37 (Where is a benefit received?).

Since one treats a capital payment as derived from the s.87 gain, one should treat anything derived from the capital payment as derived (indirectly) from the s.87 gain. That is just a matter of following through

---

50 Section 87B(4) defines "relevant property or benefits":

> "For the purposes of subsection (3) property or a benefit is "relevant" if the capital payment by reason of which the chargeable gains are treated as accruing consists of—
> (a) the payment or transfer of the property or its becoming property to which s.60 applies, or
> (b) the conferring of the benefit."

The drafting of s.87B(4) is somewhat clumsy because a capital payment will always fall within (a) or (b) so every capital payment gives rise to relevant property or benefits. But it does not matter.

the logic of the deeming.[51]

A capital payment still reduces the s.2(2) amount even though the payment is (un)taxed under the s.87 remittance basis. This is sensible because other beneficiaries (and the trustees) could not know what the position was.

It does not matter whether the s.2(2) amounts (trust gains) accrue on disposals of UK or foreign assets. All that matters is whether the capital payment is remitted to the UK. HMRC agree. FAQ Residence & Domicile – NR trusts provides:

> **Does it make any difference if the assets in the non-resident trust or underlying non-resident company owned by the trust are UK situated?**
> There is no difference in the Capital Gains Tax treatment of UK situated vs foreign situated assets when these are owned by a non-resident trust or underlying non-resident company.

The HMRC s.87 guidance note provides:

> 43. The remittance basis applies to the section 87 gain not the gain that created the section 2(2) amount. For example, trustees dispose of an asset held outside the UK creating a section 2(2) amount. In the same year they make a capital payment outside the UK to a non-domiciled beneficiary. The capital payment is matched against the section 2(2) amount. A section 87 gain accrues to the beneficiary who has claimed the remittance basis for that year. The trustees apply the proceeds of the disposal in buying investments in the UK. This remittance of the gain which created the section 2(2) amount is not treated as a remittance of the section 87 gain by the beneficiary.

A capital payment may be remitted to the UK in a year before the s.87 gains accrue, due to the quirky matching rules. Suppose:

(1) Year 1: a beneficiary receives a benefit; there are no s.2(2) amounts so the benefit is not matched and no s.87 gain accrues.
(2) Year 2: the beneficiary remits the benefit to the UK. There is still no s.87 gain.
(3) Year 3: s.2(2) amounts accrue to the trustees and a s.87 gain accrues to the beneficiary.

The s.87 gain is deemed to be remitted in the year it arises (year 3) and not

51 See App 2.1 (Construction of deeming provisions).

before.[52]

51.15.1 *HMRC examples*

The HMRC s.87 guidance note provides:

> **Example 8 – New section 87B - remittance of capital payment: payment**
> A is a UK resident and domiciled beneficiary of a non-UK resident settlement. B is a UK resident but non-UK domiciled beneficiary of the same settlement. The settlement owns shares in X Inc. X Inc is an American company registered on the New York Stock Exchange.[53]
> In 2008-09 the trustees sell shares in X Inc for $120,000 when the spot rate is £1 = $1.50. The acquisition cost of the shares was $20,000 when spot was also £1 = $1.50. This creates a section 2(2) amount of £66,666 for 2008-09, ie $100,000 @ 1.50.
> In 2010-11 the trustees make capital payments of $40,000 into the US bank accounts of each beneficiary. The spot rate of the US dollar at the date of the payment is £1 = $1.75. Chargeable gains of £22,857 accrue to each beneficiary under section 87 in 2010-11 in respect of these capital payments. $40,000 @ $1.75 = £22,857.
> At the time of writing the annual exempt amount and rate of Capital Gains Tax are not known for 2010-11 and 2012-13. This example assumes the rate of Capital Gains Tax is 18% for both years and the annual exempt amount was £10,000 in 2010-11 and £11,000 in 2012-13.
> Beneficiary A has other gains in 2010-11. The overall position is as follows.
> - Section 87 gains £22,857
> - Other personal gains £40,000
> - Other personal losses £20,000
> - Annual exempt amount £10,000
>
> The amount on which Capital Gains Tax is chargeable is £32,857. The personal losses can be set only against the other personal gains but the annual exempt amount is allocated first to the section 87 gain leaving £12,857 of that part of the gain chargeable at 18%. The tax due on £12,857 is £2,314 (£12,857 @ 18%). This is increased by £462 (£2,314 @ 20%) because there is a delay of over one year in making the capital payment.
> Beneficiary B claims the remittance basis for 2010-11 and leaves the $40,000 in the US bank account. B also has other gains in 2010-11. These gains and losses arise on the disposal of assets situated in the UK. The overall position is as follows.
> - Section 87 gains £22,857
> - Other personal gains on UK assets £40,000
> - Other personal losses on UK assets £20,000

---

52 See 11.33 (Remittance before income or gains arise).

53 This sentence is irrelevant, as the situs of the trust asset does not matter for s.87 purposes.

B does not have an annual exempt amount in 2010-11 because they have claimed the remittance basis. B is not liable to Capital Gains Tax on the section 87 gain of £22,857 because of section 87B. B is liable to CGT at 18% on the full amount of the other net personal gains £20,000.

Because B has claimed the remittance basis they also have to decide whether or not to make an election under section 16ZA TCGA. The effect of that election is allow losses on the disposal of assets situated outside the UK to be set-off against gains, either foreign chargeable gains or gains on the disposal of assets situated in the UK. Unless the election is made the foreign losses will be lost. An effect of the election is that the annual exempt amount cannot be set foreign chargeable gains remitted to the UK, section 16ZB(4). B makes a valid election within the time limit, 31 January 2017.

In 2012-13 B remits $30,000 of the $40,000 from the US bank to their UK bank where it is converted to sterling at a rate of £1 = $2.00 ie £15,000. B is not a remittance basis user in 2012-13. The rate of Capital Gains Tax is 18%. The annual exempt amount is £11,000. The remittance is a disposal of foreign currency in the US bank account giving a loss of £2,142 [$30,000 @ $2.00 = £15,000 – $30,000 @ 1.75 = £17,142].

B is liable to Capital Gains Tax in 2012-13 on the following elements.

The section 87 gain is a foreign chargeable gain. Section 12(2) and (3) TCGA provides this chargeable gain is treated as accruing in 2012-13 equal to the full amount of the gains remitted in 2012-13. B has remitted 75% of the £22,857 chargeable gain (30,000/40,000×£22,857) = £17,142. Section 2(4) TCGA prevents the personal losses, £2,142, being set against this gain. Because of the election under s16ZA neither can the annual exempt amount be set against this part of the gain. Tax is due at 18% on £17,142 = £3,085. This tax is subject to the increase in section 91 TCGA. This is calculated by reference to the year the gain was matched ie 2010-11 not the year the gain was remitted. The rate charged, 20%, will be the same that applied to beneficiary A. The total tax charged on this part of the gain is £3,085 + £617 = £3,702.

If B had not made the election under s16ZA the annual exempt amount could be set against the remitted gains reducing the amount liable to the increase under s91. But they would lose the benefit of losses on any assets situated the UK.

Additionally for 2012-13 B has other personal gains on UK assets of £18,000. Because of the election under s16ZA the personal losses £2,142 can be set against these gains as can the annual exempt amount £11,000. With a tax rate of 18% the total tax charged on the net gains of £4,858 is £971. The total Capital Gains Tax payable for 2012-13 is £4,673 (£3,702 + £971).

The next example concerns capital payments which take the form of benefits (use of accommodation) rather than transfer of cash. Omitting irrelevant detail, the example is as follows:[54]

54 The example in full, including its irrelevant detail, is as follows:

"C is a UK resident but non-UK domiciled beneficiary of a non-UK resident settlement. C claims the remittance basis. The settlement owns 100% of the issued

Example 9 - New section 87B - Remittance of capital payment: benefit
C is a UK resident but non-UK domiciled beneficiary of a non-UK resident settlement. C claims the remittance basis. The settlement has s.2(2) amounts.
The trustees (or underlying companies) allow C to use rent-free:
(1) a property outside the UK and
(2) a property in the UK.

The HMRC analysis is as follows:

The use of both properties by C gives rise to a capital payment equal to the value of the benefit. These capital payments are matched against the section 2(2) amount and a section 87 chargeable gain accrues to C. Section 87B(2) TCGA provides this is a foreign chargeable gain.
The use of the UK property meets condition A in section 809L. Because section 87B(3) TCGA provides the benefits derive from the chargeable gains the use of that property also meets condition B in section 809L(3)(b) ITA 2007. C is treated as remitting the capital payment created [by] the use of the Devon property to the UK and C is liable to CGT on that payment.
The use of the property outside the UK is not treated as a remittance to the UK and C is not liable to CGT on that payment.

51.16 Migrant settlements

51.16.1 *UK resident trust becomes non-resident*

Section 89(1) TCGA provides:

Where a period of one or more years of assessment for which s.87 applies to a settlement ("a non-resident period") succeeds a period of one or more years of assessment for each of which s.87 does not apply to the settlement ("a resident period"), a capital payment received by a beneficiary in the resident period shall be disregarded for the purposes of sections 87 and 87A if it was not made in anticipation of a disposal made by the trustees in the non-resident period.

---

share capital of a Gibraltarian holding company which in turn owns 100% of the issued share capital of a Gibraltarian company. That company owns a property in Spain. Both companies are non-UK resident.
The company sells the property in Spain creating a section 2(2) amount of £120,000 through section 13 TCGA. The company invests some of the proceeds in the purchase of a smaller property in Spain. C is allowed to use the property rent-free. C is also allowed rent-free use of a cottage in Devon owned by the settlement."

51.16.2 *Non-resident trust becomes UK resident*

Section 89 TCGA provides:

> (1A) Subsection (2) applies to a settlement if—
>
> (a) a non-resident period is succeeded by a resident period, and
>
> (b) in relation to the last tax year in the non-resident period ("the last non-resident tax year"), s.87A(3) applied by virtue of para (a) of that provision (exhaustion of capital payments).[55]
>
> (2) Chargeable gains are treated as accruing in a tax year (in the resident period) to a beneficiary of the settlement who receives a capital payment from the trustees in that year if all or part of the capital payment is matched (under s.87A as it applies for that year) with the s.2(2) amount for the last non-resident tax year or any earlier tax year.
>
> (3) Section 87(3) and (4) and ss.87A to 87C apply for the purposes of subsection (2) as if the relevant tax year were the tax year mentioned in subsection (2).
>
> (4) Section 87B (remittance basis) applies in relation to chargeable gains treated under subsection (2) as accruing as it applies in relation to chargeable gains treated under s.87 as accruing.

51.17 Dual resident trust: s.88 TCGA

In the context of s.88 TCGA, **"dual resident"** is used as a shorthand to describe a trust which is:

(1) UK-law UK resident; and

(2) treaty-resident in a foreign state with a DTA which has an article conferring CGT relief (under the tie-breaker).

This is a slightly artificial use for the term "dual resident", which would naturally be used with a slightly wider meaning[56] but it is difficult to think of a better term and no difficulty arises as long as one bears that meaning in mind.

A dual resident trust would not be within s.87.[57] This gap is filled by s.88 TCGA:

---

55 See 51.10.3 (When to stop).

56 On the terminology see 57.4 (Types of residence).

57 See 51.3 (Non-resident settlement condition). For trusts which are UK-law UK resident but which are treaty-resident outside the UK, see 59.12 (DT reliefs: s.87 TCGA).

88 Gains of dual resident settlements

(1) Section 87 also applies to a settlement for any year of assessment beginning on or after 6th April 1991 if—

(a) the trustees are resident in the UK during any part of the year, and

(b) at any time of such residence they fall to be regarded for the purposes of any double taxation relief arrangements[58] as resident in a territory outside the UK.

51.17.1 *Revised definition of s.2(2) amount*

The usual definition of s.2(2) amount (trust gains) would not work for a dual resident trust, so s.88(2) TCGA amends it:

> The section 2(2) amount for a tax year for which section 87 applies by virtue of this section is what it would be if the amount mentioned in section 87(4)(a) were the assumed chargeable amount.

Amended as s.88(2) directs, s.87(4) provides:

> The section 2(2) amount for a settlement for a tax year for which this section applies to the settlement is—
>
> (a) ~~the amount upon which the trustees of the settlement would be chargeable to tax under section 2(2) for that year if they were resident and ordinarily resident in the United Kingdom in that year~~ the assumed chargeable amount, or
>
> (b) if section 86 applies to the settlement for that year, the amount mentioned in paragraph (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

The term "assumed chargeable amount" is defined in s.88(3):

> For the purposes of subsection (2) above the assumed chargeable amount in respect of a year of assessment is the lesser of the following 2 amounts—
>
> (a) the amount on which the trustees would be chargeable to tax for the year under section 2(2) on the assumption that the double taxation relief arrangements did not apply;
>
> (b) the amount on which, by virtue of disposals of protected assets, the trustees would be chargeable to tax for the year under section 2(2) on the assumption that those arrangements did not apply.

---

58 For the meaning of this term, see 9A.3.3 ("DTR arrangements": CGT).

51.17.2 *Protected assets*

Section 88 TCGA provides:

> (4) For the purposes of subsection (3)(b) above assets are protected assets if—
>
> (a) they are of a description specified in the double taxation relief arrangements, and
>
> (b) were the trustees to dispose of them at any relevant time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.
>
> (5) For the purposes of subsection (4) above—
>
> (a) the assumption specified in subsection (3)(b) above shall be ignored;
>
> (b) a relevant time is any time, in the year of assessment concerned, when the trustees fall to be regarded for the purposes of the arrangements as resident in a territory outside the UK;
>
> (c) if different assets are identified by reference to different relevant times, all of them are protected assets.

Most trust assets are "protected assets;" the most common exception would be UK land.[59]

51.17.3 *Planning: avoid dual resident trusts*

It is best to avoid dual resident (ie, UK law resident, treaty non-resident) trusts because they involve tax in the UK (so far as the treaty does not provide relief), tax in the treaty jurisdiction, and tax liabilities under s.87. In practice such trusts only arise by accident.

51.18 Transfer between trusts

51.18.1 *No s.87 charge on transfer between trusts*

Suppose a trust (trust 1) transfers funds to another trust (trust 2). Section 87(2) TCGA does not apply, because:
(1) the transfer is not a capital payment, or
(2) the trustees of trust 2 are not regarded as a beneficiary of trust 1.
It does not much matter which is correct (or both) as no-one has ever suggested the contrary. But for completeness, the drafter of s.97(8)(10)

---

59 See 49.9 (DT relief for chargeable gains).

TCGA may have considered the second point to be the correct one, as they took special care to preserve it. Section 97(8) TCGA provides that a non-beneficiary is treated as a beneficiary. It provides (in short):

> (8) In a case where—
>
> (a) ... a capital payment is received from the trustees of a settlement...
>
> (b) it is received by a person ...
>
> (c) at the time it is received ... the person is not ... a beneficiary of the settlement...
>
> for the purposes of sections 86A to 90 ... the person shall be treated as a beneficiary of the settlement as regards events occurring at or after that time.

This might apply s.87 to an inter-trust transfer, but it is excluded by s.97(10):

> Subsection (8) above shall not apply so as to treat—
>
> (a) the trustees of the settlement referred to in that subsection, or
>
> (b) the trustees of any other settlement,
>
> as beneficiaries of the settlement referred to in that subsection.

51.18.2 *Section 90 TCGA*

Section 90(1) TCGA provides:

> This section applies if the trustees of a settlement ("the transferor settlement") transfer all or part of the settled property to the trustees of another settlement ("the transferee settlement").

In short, s.90 applies on a transfer between trusts.

The section only applies on a transfer of trust capital: if trustees of a discretionary trust distribute trust income to another trust, it is suggested that s.90 does not apply, because the income is not "settled property".

Section 90 TCGA provides:

> (3) Treat the s.2(2) amount for the transferee settlement for any tax year (not later than the year of transfer)[60] as increased by—
>
> (a) the s.2(2) amount for the transferor settlement for that year (as reduced under s.87A as it applies in relation to that settlement for the year of transfer and all earlier tax years), or

60 Section 90(2) TCGA gives this term a commonsense definition: "In this section 'the year of transfer' means the tax year in which the transfer occurs."

(b) if part only of the settled property is transferred, the relevant proportion of the amount mentioned in para (a).

(4) "The relevant proportion" is—

(a) the market value of the property transferred, divided by

(b) the market value of the property comprised in the transferor settlement immediately before the transfer.

Section 90(5) TCGA provides corresponding relief for the transferor settlement:

> Treat the s.2(2) amount for the transferor settlement for any tax year as reduced by the amount by which the s.2(2) amount for the transferee settlement for that year is increased under subs.(3).
>
> ...
>
> (7) The increase under subs.(3) has effect for the year of transfer and subsequent tax years.
>
> (8) The reduction under subs.(5) has effect for tax years after the year of transfer.

It is interesting to compare the technique of s.81 IHTA (deeming transferred property to remain in the original trust).[61] While that is not without its problems, it is a more effective anti-avoidance rule. The reason may be that s.90 is not (or not just) an anti-avoidance provision. It is intended to facilitate inter-trust transfers. Such transfers may be desirable for family reasons or to avoid unfairness which otherwise follows from the operation of s.87. Suppose trustees hold a trust fund worth £2m with s.2(2) amounts of £1m and they wish to make a capital payment of £1m to beneficiary B1. If they do so then a subsequent distribution to beneficiary B2 would be tax free. That would not be fair as between B1 and B2. A transfer of one half of the trust fund to a separate trust, followed by a capital payment to B1, in principle solves this unfairness: B1 pays tax on one half of the s.2(2) amounts and B2 in due course will in principle pay tax on the other half, when that fund is transferred to B2.

Section 90(6) TCGA deals with a transfer to a UK resident settlement:

> If neither s.87 nor s.89(2) would otherwise apply to the transferee settlement for the year of transfer—
>
> (a) s.89(2) to (4) apply to the settlement for that year (and subsequent tax years), and

---

61 See 64.8 (The same settlement fiction: section 81).

(b) for this purpose, references there to the last non-resident tax year are to be read as the year of transfer.

Amended as s.90(6) directs, s.89(2) to (4) provides:

(2) Chargeable gains are treated as accruing in a tax year (in the resident period) to a beneficiary of the settlement who receives a capital payment from the trustees in that year if all or part of the capital payment is matched (under section 87A as it applies for that year) with the section 2(2) amount for the ~~last non-resident tax year~~ *year of transfer* or any earlier tax year.
(3) Section 87(3) and (4) and sections 87A to 87C apply for the purposes of subsection (2) as if the relevant tax year were the tax year mentioned in subsection (2).
(4) Section 87B (remittance basis) applies in relation to chargeable gains treated under subsection (2) as accruing as it applies in relation to chargeable gains treated under section 87 as accruing.

Section 90(9) TCGA deals with trust debts:

When calculating the market value of property for the purposes of this section or s.90A in a case where the property is subject to a debt, reduce the market value by the amount of the debt.

A transfer between trusts triggers the deadline for a rebasing election.[62]

51.18.3 *Transfer for consideration*

Section 90A TCGA provides:

(1) Section 90 does not apply to a transfer of settled property made for consideration in money or money's worth if the amount (or value) of that consideration is equal to or exceeds the market value of the property transferred.
(2) The following provisions apply if—
(a) s.90 applies to a transfer of settled property made for consideration in money or money's worth, and
(b) the amount (or value) of that consideration is less than the market value of the property transferred.
(3) If the transfer is of all of the settled property, for the purposes of s.90 treat the transfer as being of part only of the settled property.
(4) Deduct the amount (or value) of the consideration from the amount of the market value referred to in s.90(4)(a).

---

62 See 51.27 (Rebasing: the election).

Section 90 does not apply to a loan from trust 1 to trust 2 on commercial terms. It does not apply to an interest free loan repayable on demand, because the promise to repay is full consideration. For the same reason it does not apply to repayment of a loan.

51.18.4 *Interaction with schedule 4B*

Section 90(10) TCGA provides:

> This section does not apply to—
> (a) a transfer to which Schedule 4B applies, or
> (b) any s.2(2) amount that is in a Schedule 4C pool (see para 1 of Schedule 4C).

See 52.14 (Schedule 4C: the key condition).

51.18.5 *HMRC examples*

The HMRC s.87 guidance note provides:

Example 14 – New section 90 – All settled property transferred between settlements for nil consideration

All the settled property of the transferor settlement is transferred to the transferee settlement for nil consideration in 2008-09. No capital payments have been made out of the transferor settlement. The transferor settlement had the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of all settled property	£75,000

The transferee settlement acquires these unmatched section 2(2) amounts. They are added to any unmatched section 2(2) amounts it already has for the years 2005-06 and 2008-09. This applies whatever the residence status of the transferee settlement.

The unmatched section 2(2) amounts in the transferor settlement are now reduced to Nil.

Example 15 – New section 90 – Part of settled property transferred between settlements for nil consideration

The transferor settlement's assets consist of shares with a market value of £400,000 and cash of £100,000. The shares are transferred to the transferee settlement for nil consideration in 2008-09. The cash remains in the transferor settlement.

No capital payments have been made out of the transferor settlement. The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of shares	£75,000

It is only the 'relevant proportion' of these unmatched section 2(2) amounts that is transferred to the transferee settlement. The relevant proportion is 4/5 (£400,000 / [£400,000 + £100,000]).

Transferee settlement

The transferee settlement acquires the following unmatched section 2(2) amounts:

2005-06 £16,000 (£20,000 × 4/5)
2008-09 £60,000 (£75,000 × 4/5)
They are added to any unmatched section 2(2) amounts it already has and can be matched with capital payments made from the transferee settlement in 2008-09 or a later year. This applies whatever the residence status of the transferee settlement.
Transferor settlement
The unmatched section 2(2) amounts of the transferor settlement are reduced by the section 2(2) amounts that have been treated as transferred to the transferee settlement. The unmatched section 2(2) amounts become:
2005-06 £4,000 (£20,000 - £16,000)
2008-09 £15,000 (£75,000 - £60,000)
This reduction has effect for matching in the year after the year of transfer (2009-10) and subsequent years.

Example 16 – New section 90A – All settled property transferred between settlements for consideration of market value
All the settled property of the transferor settlement is transferred to the transferee settlement in 2008-09. The transferee settlement pays market value to the transferor settlement for these assets.
No capital payments have been made out of the transferor settlement. The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of all settled property	£75,000

These unmatched section 2(2) amounts remain in the transferor settlement and can be matched with future capital payments from that settlement. None of the unmatched section 2(2) amounts are transferred to the transferee settlement.

Example 17 – New section 90A – All settled property transferred between settlements for consideration less than market value
The transferor settlement's assets consist of shares with a market value of £400,000 and cash of £100,000. All these assets are transferred to the transferee settlement in 2008-09. The transferee settlement pays £300,000 to the transferor settlement for these assets.
No capital payments have been made out of the transferor settlement. The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of all settled property	£75,000

The transfer is treated as if it was a transfer of part only of the settled property. This is to bring in the 'relevant proportion' rules in section 90(3) and (4) TCGA in deciding how much of the unmatched section 2(2) amounts are transferred to the transferee settlement. In calculating the 'relevant proportion' you deduct the amount paid by the transferee settlement from the 'market value of the property transferred'. The relevant proportion is 2/5 ([£400,000 + £100,000 - £300,000] / [£400,000 + £100,000]).
Transferee settlement
The transferee settlement acquires the following unmatched section 2(2) amounts:
2005-06 £8,000 (£20,000 × 2/5)
2008-09 £30,000 (£75,000 × 2/5)
They are added to any unmatched section 2(2) amounts it already has and can be matched with capital payments made from the transferee settlement in 2008-09 or a later year.

This applies whatever the residence status of the transferee settlement.

Transferor settlement

The unmatched section 2(2) amounts of the transferor settlement are reduced by the section 2(2) amounts that have been treated as transferred to the transferee settlement. The unmatched section 2(2) amounts become:

2005-06 £12,000 (£20,000 - £8,000)
2008-09 £45,000 (£75,000 - £30,000)

This reduction has effect for matching in the year after the year of transfer (2009-10) and subsequent years.

Example 18 – New section 90A – Part of settled property transferred between settlements for consideration less than market value

The transferor settlement's assets consist of shares with a market value of £400,000 and cash of £100,000. The shares are transferred to the transferee settlement in 2008-09. The cash remains in the transferor settlement. The transferee settlement pays £300,000 to the transferor settlement for the shares. No capital payments have been made out of the transferor settlement. The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of shares	£75,000

This transfer of part of the settled property brings in the 'relevant proportion' rules in section 90(3) and (4) TCGA in deciding how much of the unmatched section 2(2) amounts are transferred to the transferee settlement. In calculating the 'relevant proportion' you deduct the amount paid by the transferee settlement from the 'market value of the property transferred'. The relevant proportion is 1/5 ([£400,000 - £300,000] / [£400,000 + £100,000]).

Transferee settlement

The transferee settlement acquires the following unmatched section 2(2) amounts:

2005-06 £4,000 (£20,000 × 1/5)
2008-09 £15,000 (£75,000 × 1/5)

They are added to any unmatched section 2(2) amounts it already has and can be matched with capital payments made from the transferee settlement in 2008-09 or a later year.

This applies whatever the residence status of the transferee settlement.

Transferor settlement

The unmatched section 2(2) amounts of the transferor settlement are reduced by the section 2(2) amounts that have been treated as transferred to the transferee settlement. The unmatched section 2(2) amounts become:

2005-06 £16,000 (£20,000 - £4,000)
2008-09 £60,000 (£75,000 - £15,000)

This reduction has effect for matching in the year after the year of transfer (2009-10) and subsequent years.

Example 19 – New section 90(7) – Unmatched section 2(2) amounts transferred on a transfer between settlements do not affect matching in earlier years in transferee settlement

All the settled property of the transferor settlement is transferred to the transferee settlement for nil consideration in 2008-09. No capital payments have been made out of the transferor settlement. The transferor settlement has the following gains made by the

trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of all settled property	£75,000

The transferee settlement acquires these unmatched section 2(2) amounts. They are added to any unmatched section 2(2) amounts it already has. This applies whatever the residence status of the transferee settlement.

The unmatched section 2(2) amounts in the transferor settlement are now reduced to Nil.

In its own right the transferee settlement had:

2001-02	Trustees' gains (section 2(2) amount)	£10,000
2004-05	Capital payments	£30,000
2006-07	Trustees' gains (section 2(2) amount)	£50,000

This has resulted in chargeable gains treated as accruing to the beneficiary of:

2004-05 £10,000

(Also possible increase in tax charged under section 91)

2006-07 £20,000

There is no reworking of this matching when section 2(2) amounts are transferred from the transferor settlement. So the 2005-06 section 2(2) amount transferred in is not matched with any of the 2004-05 capital payments. The transferee settlement has unmatched section 2(2) amounts to carry forward of:

2005-06 £20,000

From transferor settlement

2006-07 £30,000

In its own right

2008-09 £75,000

From transferor settlement

Example 20 – New section 90(3) – Capital payments out of transferor settlement in year of transfer matched with section 2(2) amounts of transferor settlement for that and earlier years before calculating section 2(2) amounts transferred

The transferor settlement's assets consist of shares with a market value of £400,000 and cash of £100,000. The shares are transferred to the transferee settlement for nil consideration in 2008-09. The cash remains in the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of shares	£75,000

The first capital payment made out of the transferor settlement is made in 2008-09. It does not matter whether the capital payment is made before or after the transfer of the shares between settlements. The capital payment is £50,000 to a beneficiary. That £50,000 capital payment is matched with £50,000 of the 2008-09 section 2(2) amount and a chargeable gain of £50,000 is treated as accruing to the beneficiary under section 87 for 2008-09. The remaining unmatched section 2(2) amount for 2008-09 is reduced to £25,000 (£75,000 - £50,000).

It is only the 'relevant proportion' of the remaining unmatched section 2(2) amounts that is transferred to the transferee settlement. The relevant proportion is 4/5 (£400,000 / [£400,000 + £100,000]).

Transferee settlement

The transferee settlement acquires the following unmatched section 2(2) amounts:

2005-06 £16,000 (£20,000 × 4/5)
2008-09 £20,000 (£25,000 × 4/5)
They are added to any unmatched section 2(2) amounts it already has and can be matched with capital payments made from the transferee settlement in 2008-09 or a later year. This applies whatever the residence status of the transferee settlement.
Transferor settlement
The unmatched section 2(2) amounts of the transferor settlement are reduced by the section 2(2) amounts that have been treated as transferred to the transferee settlement. The unmatched section 2(2) amounts become:
2005-06 £4,000 (£20,000 - £16,000)
2008-09 £5,000 (£25,000 - £20,000)
This reduction has effect for matching in the year after the year of transfer (2009-10) and subsequent years.

51.19 1981 transitional relief

Para 116 Sch 7 FA 2008 provides:

> For the purposes of sections 87 and 87A of TCGA 1992, no account is to be taken of—
> (a) any capital payment received before 10 March 1981, or
> (b) any capital payment received on or after that date but before 6 April 1984, so far as it represents a chargeable gain which accrued to the trustees before 6 April 1981.

All capital payments before 10 March 1981 are disregarded.

Capital payments before 6 April 1984 are disregarded if they represent a chargeable gain which accrued to the trustees before 6 April 1981. How does one decide whether a capital payment represents a pre-1981 gain? Fortunately this problem will not often arise now.

51.20 1998 transitional relief

Para 118 Sch 7 FA 2008 provides:

> (1) This paragraph applies if—
> (a) s.87 of TCGA 1992 applies to a settlement for the tax year 2008-09 or any subsequent tax year ("the tax year"),
> (b) the settlement was made before 17 March 1998,
> (c) none of the settlors fulfilled the residence requirements when the settlement was made, and
> (d) none of the settlors fulfils the residence requirements in the tax year.
> (2) For the purposes of that section as it applies to the settlement for the tax year, no account is to be taken of—
> (a) any gains or losses accruing to the trustees of the settlement

before 17 March 1998, or

(b) any capital payments received before that date.

(3) A settlor "fulfils the residence requirements" when the settlor is—

(a) resident or ordinarily resident in the UK, and

(b) domiciled in any part of the UK.

I refer to this as "**1998 transitional relief**". In principle, (inter alia) for foreign domiciled settlor settlements, one disregards gains and capital payments before 17 March 1998. But if in any year there is a UK resident and domiciled settlor, even only one of several, the relief is lost in that year. Thus, a "tainting" principle applies. A small, even nominal contribution from a UK resident and domiciled settlor will forfeit the transitional relief for all years that that settlor is UK resident and domiciled.

One can envisage a case where it is better that this relief does not apply, in which case it would be possible to arrange to forfeit the relief, but this will not be common.

51.21 Ascertaining s.2(2) amounts as at end 2007/8

The concept of s.2(2) amount was introduced in the FA 2008 with effect from 2008/9, but it is necessary to compute the s.2(2) amount for earlier years in order to know what s.2(2) amount is carried forward to 2008/09 and subsequently.

Para 120 Sch 7 FA 2008 provides:

> (1) This paragraph applies to a settlement if s.87 or s.89(2) of TCGA 1992 applied to it for the tax year 2007–08 or any earlier tax year.
>
> (2) The following steps are to be taken for the purposes of calculating the s.2(2) amount for the settlement for the tax year 2007-08 and earlier tax years.
>
> *Step 1*
>
> Calculate (in accordance with s.87 and, where appropriate, s.88) the s.2(2) amount for the settlement for the tax year 2007-08 and earlier tax years.
>
> For this purpose, references in s.87(4) and (5) of TCGA 1992 (as substituted) to s.87 of that Act applying to a settlement for a tax year are to be read as references to s.87 of that Act (as it had effect before that substitution) applying to a settlement for a tax year.
>
> *Step 2*
>
> Find the total amount of chargeable gains treated under s.87 or 89(2) as accruing to beneficiaries of the settlement in the tax year 2007-08 or any

earlier tax year ("the total deemed gains").

I prefer the label "pre-2008 gains".

Step 3
Find the earliest tax year for which the s.2(2) amount is not nil.
If the s.2(2) amount for that year is less than or equal to the total deemed gains, reduce that s.2(2) amount to nil.
Otherwise, reduce that s.2(2) amount by the amount of the total deemed gains.
Step 4
Reduce the total deemed gains by the amount by which the s.2(2) amount was reduced under Step 3.
Step 5
If the total deemed gains is not nil, start again at Step 3.
For this purpose, read references to the earliest tax year for which the s.2(2) amount is not nil as references to the earliest tax year—

(a) which is after the last tax year for which Steps 3 and 4 have been undertaken, and
(b) for which the s.2(2) amount is not nil.

EN FB 2008 provides an example:

60. Example: determining the s.2(2) amount for years preceding 2008-09:
The s.2(2) amounts of a settlement were:
2004-05: £100,000
2005-06: £50,000
2006-07: £200,000
2007-08: £200,000
Total deemed gains were £450,000.

a. Subtract the s.2(2) (£100,000) amount for the earliest year from the total deemed gains. Section 2(2) amount for 2004-05 reduces to nil. Total deemed gains reduced to £350,000.
b. Subtract the s.2(2) (£50,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2005-06 reduces to nil. Total deemed gains reduced to £300,000.
c. Subtract the s.2(2) (£200,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2006-07 reduces to nil. Total deemed gains reduced to £100,000.
d. Subtract the s.2(2) (£200,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2007-08 reduces to £100,000. Total deemed gains reduced to nil.

The s.2(2) amount for the settlement for 2007-08 is therefore £100,000.

In short, pre-2008 s.87 gains are deducted from pre-2008 s.2(2) amounts on a FIFO basis (first in first out). It is expressed in just about the most obscure way possible.[63]

The HMRC s.87 guidance note provides:

> **Identifying unmatched section 2(2) amount for years before 2008-09: paragraph 120 of Schedule 7**
>
> 30. Although the new matching rules in section 87A take effect from 2008-09 they will apply to match capital payments received in 2008-09 and later against unmatched section 2(2) amounts of 2007-08 and earlier. This means it is necessary to calculate what those section 2(2) amounts are. Paragraph 120 of Schedule 7 explains how to do this in a series of steps. Capital payments matched with these section 2(2) amounts may be subject to the increased tax charge under section 91 TCGA.
>
> 31. First you calculate what the section 2(2) amount would be for each earlier year using the definition in the new section 87(4) but applying the Capital Gains Tax rules for the earlier year. So you give taper relief and indexation allowance as appropriate. These section 2(2) amounts include gains made by the trustees which have been matched with capital payments.
>
> 32. Second you identify the total chargeable gains that have accrued to beneficiaries under section 87 in the years up to and including 2007-08. This includes chargeable gains that have not been charged to tax – for example because of the non-UK residence or domicile status of the beneficiary. This figure is called the "total deemed capital gains".
>
> 33. Third you allocate the total deemed capital gains to years in which there is a section 2(2) amount taking the earliest year first. You reduce the section 2(2) amount by the amount of the total deemed gains. If the total deemed gains are greater than the section 2(2) amount the section 2(2) for the year is reduced to nil. A corresponding reduction is made in the total deemed gains. When all the total deemed gains have been allocated you are left with the unmatched section 2(2) amounts for 2007-08 and earlier years. See example 5.
>
> **Example 5: Identifying unmatched section 2(2) amounts for years before 2008-09: paragraph 120 of Schedule 7**
>
> The section 2(2) amounts for a settlement are:-
>
> | | |
> |---|---|
> | 2005-06 | £50,000 |
> | 2006-07 | £75,000 |
> | 2007-08 | £60,000 |

63 For discussion of the drafting technique, see 51.10.7 (Commentary: Step-based drafting).

Up to and including 2007-08 capital payments of £90,000 have been received by beneficiaries and the total deemed gains are £90,000. None of the capital payments were received in the period 12 March to 5 April 2008. See example 12 for an example of payments received in this period by a non-UK domiciled beneficiary.

The total deemed gains are allocated against the section 2(2) amounts using the FIFO rules in paragraph 120 of Schedule 7 that apply to matching for 2007-08 and earlier years. They are allocated as follows:

	Original s2(2) amount	Total deemed gains	Deemed s2(2) amount
2005-06	£50,000	£50,000	Nil
2006-07	£75,000	£40,000	£35,000
2007-08	£60,000	Nil	£60,000

Suppose capital payments of £70,000 were received by beneficiaries in 2009-10 and there is no section 2(2) amount for that year or 2008-09. The £70,000 capital payments are matched under the LIFO rules in the new section 87A TCGA that apply for matching in 2008-09 and later years. £60,000 of those payments are matched against the section 2(2) amount for 2007-08 and £10,000 of those payments are matched against the section 2(2) amount for 2006-07. The total deemed gains are £70,000 (£60,000 + £10,000) treated as accruing in 2009-10. This leaves unmatched a deemed section 2(2) amount for 2006-07 of £25,000 (£35,000 - £10,000) available to match against capital payments made in 2010-11 or later years.

Assuming all the beneficiaries were resident in the UK in 2009-10 their liability to Capital Gains Tax on the section 87 gains accruing to them will depend on their domicile in 2009-10. If any of the beneficiaries are non-UK domiciled individuals paragraph 124(2)(b) of Schedule 7 will prevent them being charged to Capital Gains Tax. This applies whether or not they have claimed to use the remittance basis for 2009-10. If any of the beneficiaries are UK domiciled they will be charged to Capital Gains Tax on the section 87 gains. Any tax due on these gains will be increased by section 91 TCGA.

Assume the entire capital payment is received by a UK resident and domiciled beneficiary who has no other capital gains and losses in 2009-10. At the time of writing the annual exempt amount and rate of Capital Gains Tax are not known for 2009-10. This example assumes they are the same as for 2008-09 at £9,600 and 18% respectively. The annual exempt amount is set first against the gain accruing from the 2006-07 capital payment. Ie £10,000 – £9,800 = £200. The tax due on the gain accruing from the 2006-07 capital payment is £36 (£200 @ 18%). This tax is increased by £10 (£36 @ 30% = £10). The tax due on the gain accruing from the 2007-08 amount is £10,800 (£60,000 @ 18%). This tax is increased by £2,160 (£10,800 @ 20%). The total Capital Gains

Tax payable for 2009-10 is £13006 (£36 + £10 + £10,800 + £2,160).

Para 120(3) provides for Schedule 4B cases, though the drafter does not try very hard:

> If, before 6 April 2008, the trustees of the settlement made a transfer of value to which Schedule 4B to TCGA 1992 applied, sub-para (2) has effect subject to such modifications as are just and reasonable on account of Schedule 4C to that Act having applied in relation to the settlement.

51.21.1 *Pre-2008 OIG amounts*

Para 99 Sch 7 FA 2008 applies the same rule to OIG amounts:

> Paragraphs 120 and 121 apply in relation to offshore income gains as if—
>
> (a) references to section 2(2) amounts were to OIG amounts,
>
> (b) references to chargeable gains were to offshore income gains, and
>
> (c) Step 1 of paragraph 120(2) provided that OIG amounts are to be calculated in accordance with—
>
> (i) section 762(2) of ICTA (the reference in the second sentence of that Step to section 87(4) of TCGA 1992 being read as a reference to section 762(2) of ICTA), or
>
> (ii) section 87(5) of TCGA 1992 as applied by section 762(3) of ICTA.

Section 762 ICTA is now repealed. The OFTR should have updated the references but (somewhat negligently) failed to do so. It is considered that the slip can be corrected by construction, ie references to the new provisions should be implied.

51.22 Pre-2008 capital payments

In order to follow the present legislation, one needs to have in mind the original terms of s.87(6) TCGA and in order to follow that, one needs to read all of the pre-2008 s.87(4)-(6) TCGA:

> *(4) Subject to the following provisions of this section, the trust gains for a year of assessment shall be treated as chargeable gains accruing in that year to beneficiaries of the settlement who receive capital payments from the trustees in that year or have received such payments in any earlier year.*
>
> *(5) The attribution of chargeable gains to beneficiaries under subsection*

(4) above shall be made in proportion to, but shall not exceed, the amounts of the capital payments received by them.
(6) A capital payment shall be left out of account for the purposes of subsections (4) and (5) above to the extent that chargeable gains have by reason of the payment been treated as accruing to the recipient in an earlier year.

Para 122 Sch 7 FA 2008 provides:

(1) If all of a capital payment would (in the tax year 2008-09) have been left out of account by virtue of s.87(6) of TCGA 1992 as originally enacted, the amount of that capital payment is reduced to nil.
(2) If part of a capital payment would (in the tax year 2008-09) have been left out of account by virtue of s.87(6) of TCGA 1992 as originally enacted, the amount of that capital payment is reduced by the amount of that part.
(3) If—

(a) chargeable gains were treated under s.87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 as accruing in the tax year 2007-08 or any earlier tax year to a beneficiary,
(b) more than one capital payment that the beneficiary had received was taken into account for the purposes of determining the amount of chargeable gains treated as accruing to the beneficiary, and
(c) the amount of those chargeable gains was less than the total amount of capital payments taken into account,

for the purposes of this paragraph treat s.87(6) of TCGA 1992 as originally enacted as having effect in relation to earlier capital payments before later ones.

The point of this (I think) is to prevent double counting of a capital payment: it is set against s.2(2) amounts under para 120 and not a second time.
The HMRC s.87 guidance note provides:

34. In the same way that it is necessary to deal with unmatched section 2(2) amounts for a year before 2008-09 it is also necessary to deal with unmatched capital payments received before 2008-09. You have to identify the year in which an unmatched capital payment was received. This is dealt with in paragraph 122 of Schedule 7.
35. First you apply the rule in the original section 87(6) to determine if all or any of a capital payment would be left out of account. A payment would be left out of account to the extent that chargeable gains accrued to a beneficiary as a result of making the payment. In other words if the payment is matched against gains made by the trustees. See example 6.

36. If more than one capital payment is matched against the trustees' gains for a year and the total of the payments is greater than the chargeable gain that accrues the rule in paragraph 122(3) applies. You identify the year the unmatched payment was received by matching the payments received in the earliest years first. See example 7.

Example 6: Identifying unmatched capital payments received before 2008-09: paragraph 122(1) & (2) of Schedule 7

2005-06	Capital payments received	Beneficiary A	£15,000
		Beneficiary B	£12,000
	Trustees' gains (section 2(2) amount)		£37,000
2007-08	Capital payments received	Beneficiary A	£8,000
		Beneficiary B	£9,000

In 2005-06 the capital payments £15,000 and £12,000 are matched against £37,000 trustees' gains and chargeable gains of £15,000 and £12,000 accrue to A and B. In 2008-09 and later years paragraph 122(1) of schedule 7 applies and the capital payments are reduced to nil. The unmatched trustees' gains of £10,000 are carried forward under the old section 87(2) to later years.

In 2007-08 £10,000 trustees' gains are matched against the £17,000 capital payments received. Gains of £4,705 (£10,000 × 8,000/17,000) accrue to A and gains of £5,295 (£10,000 × 9,000/17,000) accrue to B. Their respective unmatched capital payments are reduced to £3,295 (£8,000 - £4,705) and £3,705 (£9,000 - £5,295). Paragraph 122(2) of Schedule 7 ensures only those unmatched parts of the capital payments are carried forward for use in 2008-09 or later years.

The HMRC s.87 guidance note provides:

36. If more than one capital payment is matched against the trustees' gains for a year and the total of the payments is greater than the chargeable gain that accrues the rule in paragraph 122(3) applies. You identify the year the unmatched payment was received by matching the payments received in the earliest years first. See example 7.

The HMRC s.87 guidance note provides:

Example 7: Identifying unmatched capital payments received before 2008-09: Paragraph 122(3) of Schedule 7

2005-06	Capital payments received	Beneficiary A	£16,000
		Beneficiary B	£14,000
	Trustees' gains (section 2(2) amount)		£5,000
2007-08	Capital payments received	Beneficiary A	£10,000
		Beneficiary B	£8,000
	Trustees' gains (section 2(2) amount)		£13,000
2008-09	Section 2(2) amount		£20,000

In 2005-06 gains of £2,667 (£5,000 × 16,000/30,000) would accrue to beneficiary A and the unmatched capital payment would be reduced to £13,333 (£16,000 - £2,667). Gains of £2,333 (£5,000 × 14,000/30,000) would accrue to beneficiary B and the unmatched capital payment would be reduced to £11,667

(£14,000 - £2,333).

In 2007-08 A receives a further capital payment of £10,000 giving them total unmatched capital payments of £23,333. B receives a further capital payment of £8,000 giving them total unmatched capital payments of £19,667. Gains of £7,054 (£13,000 × 23,333/43,000) accrue to A. Gains of £5946 (£13,000 × 19,657/43,000) accrue to B. A's unmatched capital payments to carry forward to 2008-09 are £16,279 (£23,333 - £7,054). B's unmatched capital payments are £13,721 (£19,667 - £5,946).

In 2008-09 the conditions for paragraph 122(3) of Schedule 7 are satisfied:

(a) Chargeable gains have accrued to both beneficiaries in 2007-08.

(b) Capital payments from 2005-06 and 2007-08 have been used for the purposes of determining those gains.

(c) The amount of the chargeable gains £13,000 is less than the total of the capital payments £43,000.

Paragraph 122(3) matches the £13,000 gains first against the capital payments received in 2005-06. In 2005-06 A's unmatched capital payments were £13,333. The 2007-08 gains of £7,054 are matched first against those payments reducing the unmatched capital payments to £6,279. B's unmatched capital payments were £11,667. The 2007-08 gains of £5,496 are matched first against those payments reducing the unmatched capital payments to £5,721. The total unmatched capital payments to carry forward to 2008-09 are then:

- To A £16,279 consisting of £6,279 from 2005-06 and £10,000 from 2007-08
- To B £13,721 consisting of £5,721 from 2005-06 and £8,000 from 2007-08

The ordinary rules of section 87A then apply for the purpose of matching the £20,000 2008-09 section 2(2) amount with the earlier years' capital payments. Gains of £10,000 accrue to A and gains of £8,000 accrue to B as a result of matching the section 2(2) amount against the capital payments received in 2007-08. That leaves £2,000 of the section 2(2) amount to match with capital payments from 2005-06. A gain of £1,046 (£2,000 × 6279/12,000) accrues to A and a gain of £954 (£2,000 × 5721/12,000) accrues to B as a result of matching that £2,000 of the section 2(2) amount. The total gains attributed under section 87 for 2008-09 are:

- To A £11,046 (£10,000 + £1,046)
- To B £8,954 (£8,000 + £954)

The total unmatched capital payments to carry forward to 2009-10 are then:

- To A £5,233 (£6,279 - £1,046) all from 2005-06
- To B £4,767 (£5,721 - £954) all from 2005-06.

Para 122 then imposes the same rules for OIGs:

(4) References in this paragraph to s.87(6) of TCGA 1992 include that provision as it would (but for the amendments made by this Schedule) have applied by virtue of s.762(3) of ICTA (offshore income gains).

(5) References in this paragraph to chargeable gains include offshore income gains.

Section 762 ICTA is now repealed. The OFTR should have updated the reference but (somewhat negligently) failed to do so. It is considered that the slip can be corrected by construction, ie references to the new provisions should be implied.

51.23 Pre-2008 capital payment matched after 2008; Pre-2008 s.2(2) amounts matched after 2008

Para 124 Sch 7 FA 2008 provides:

> (1) This paragraph applies if—
>
> (a) chargeable gains are treated under s.87 or 89(2) of TCGA 1992 as accruing to an individual in the tax year 2008-09 or any subsequent tax year, and
>
> (b) the individual is not domiciled in the UK in that year.
>
> (2) The individual is not charged to capital gains tax on the chargeable gains if and to the extent that they are treated as accruing by reason of—
>
> (a) a capital payment received (or treated as received) by the individual before 6 April 2008, or
>
> (b) the matching of any capital payment with the s.2(2) amount for the tax year 2007-08 or any earlier tax year.

Para (2)(a) provides relief for pre-2008 capital payments to foreign domiciliaries which are matched to post-2008 s.2(2) amounts. Para (2)(b) provides relief for post 2008 capital payments which are matched with pre-2008 s.2(2) amounts.

EN FB 2008 summarises the matter this way:

> 440. The overall effect of these new rules is that: ...
>
> [1] there will be no charge to tax in respect of capital payments made to non-UK domiciled beneficiaries who:
>
> [a] receive capital payments before 6 April 2008 that are matched to trust gains accruing on or after 6 April 2008; or
>
> [b] receive capital payments on or after 6 April 2008 that are matched to trust gains accruing before 6 April 2008.
>
> This will be so irrespective of whether the non-UK domiciled beneficiary is a remittance basis user;

The HMRC s.87 guidance note provides:

> **Example 10: Capital payments received by non-UK domiciled beneficiary before 6 April 2008 matched with section 2(2) amount for 2008-09 or later: paragraph 124 of Schedule 7**

2005-06	Capital payments received	£10,000
2008-09	Capital payments received	£16,000
	Section 2(2) amount	£24,000

The capital payments are received by a beneficiary who is UK resident but non-UK domiciled in 2008-09. A chargeable gain of £24,000 accrues to the beneficiary in 2008-09. On the LIFO basis the capital payments received are matched £16,000 2008-09 and £8,000 2005-06. The beneficiary is liable to Capital Gains Tax on the £16,000 only. The beneficiary is not liable on the £8,000 because the section 2(2) amount realised in 2008-09 is matched to a capital payment received in 2005-06 by a person who is not domiciled in the UK. This applies whether or not the beneficiary is a remittance basis user.

The Capital Gains Tax due on the £16,000 will depend on whether the beneficiary is a remittance basis user and on whether the trustees had made an election under paragraph 126 of Schedule 7. If the trustees have made the election the gain will be restricted to the amount that relates to the growth in the value of the asset since 5 April 2008. If the beneficiary is a remittance basis user the gain will not be charged until it is remitted.

In any circumstances the settlement's section 2(2) amount for 2008-09 is reduced to nil. There are unmatched capital payments from 2005-06 of £2,000 (£10,000 - £8,000) to carry forward.

If the beneficiary was non-UK domiciled in 2005-06 but became UK domiciled sometime before the capital payment was received the condition in paragraph 124(1)(b) is not satisfied. The beneficiary is liable to Capital Gains Tax on the entire gain of £24,000. It is irrelevant whether the domicile status changed before or after 6 April 2008.

Example 11: Gain accruing in respect of section 2(2) amount for a year before 2008-09 when beneficiary non-UK domiciled: paragraph 124 of Schedule 7

2005-06	Capital payments received	Nil
	Section 2(2) amount	£ 7,000
2006-07	Capital payments received	Nil
	Section 2(2) amount	£ 5,000
2008-09	Capital payment received	£30,000
	Section 2(2) amount	£16,000

The capital payment in 2008-09 was received by a UK resident but non-UK domiciled beneficiary. A chargeable gain of £28,000 accrues in 2008-09. Using the last-in first-out basis of matching the capital payment £30,000 is matched against the section 2(2) amounts as follows.

2008-09	£16,000
2006-07	£ 5,000
2005-06	£ 7,000
	£28,000

The beneficiary is liable to Capital Gains Tax only on the £16,000 matched with the section 2(2) amount for the year 2008-09. The beneficiary is not liable to Capital Gains Tax on the section 87 gains that accrue as a result of matching the capital payment against section 2(2) amounts for 2006-07 and 2005-06. This is because the beneficiary was not domiciled in the UK in 2008-09 when the capital

payment was received and the section 2(2) amounts are for years before 2008-09.

The Capital Gains Tax due on the £16,000 will depend on whether the beneficiary is a remittance basis user and on whether the trustees had made an election under paragraph 126 of Schedule 7. If the trustees have made the election the gain will be restricted to the amount that relates to the growth in the value of the asset since 5 April 2008. If the beneficiary is a remittance basis user the gain will not be charged until it is remitted.

In any circumstances the settlement's section 2(2) amounts for 2008-09, 2006-07 and 2005-06 are reduced to nil. The unmatched capital payments for 2008-09 are reduced to £2,000 (£30,000 - £28,000).

Suppose the beneficiary was non-UK domiciled in 2005-06 and 2006-07 but became UK domiciled in 2007-08 or 2008-09. They would be liable to Capital Gains Tax on the whole chargeable gain £28,000. The fact that they were non-UK domiciled in the years before 2008-09 when the section 2(2) amounts were realised is not relevant. The test in paragraph 124(1)(b) of Schedule 7 is the domicile status for the year in which the gain accrues as a result of matching those amounts with a capital payment.

51.23.1 *Pre-2008 capital payments and pre-2008 OIG amounts*

Para 100 Sch 7 FA 2008 provides the same rules for OIG amounts:

(1) This paragraph applies if—
- (a) by virtue of section 87 or 89(2) of, or Schedule 4C to, TCGA 1992 as applied by regulation 20 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001), income is treated under such regulations (regulation 17 of those Regulations[)] as arising to an individual in the tax year 2008–09 or any subsequent tax year, and
- (b) the individual is not domiciled in the UK in that year.

(2) The individual is not charged to income tax on the income if and to the extent that it is treated as arising by reason of—
- (a) a capital payment received (or treated as received) by the individual before 6 April 2008, or
- (b) the matching of any capital payment with the OIG amount for the tax year 2007–08 or any earlier tax year.

51.23.2 *Capital payments between 12 March and 5 April 2008*

Para 125 Sch 7 FA 2008 provides a special rule for these capital payments:

(1) This paragraph applies in relation to a settlement for the tax year 2008-09 or any subsequent tax year ("the relevant tax year") if—
- (a) an individual who was resident or ordinarily resident, but not

domiciled, in the UK in the tax year 2007-08 received a capital payment from the trustees of the settlement on or after 12 March 2008 but before 6 April 2008, and

(b) the individual is resident or ordinarily resident, but not domiciled, in the UK in the relevant tax year.

(2) For the purposes of sections 87 to 89 of TCGA 1992 as they apply in relation to the settlement for the relevant tax year, no account is to be taken of the capital payment.

One might refer to capital payments made between 12 March and 5 April 2008 as post-budget 2008 capital payments. There is no matching for post-budget 2008 capital payments, so such payments do not reduce s.2(2) amounts.

January 2009 Qs & As provides some background explanation:

Q4: Paragraph 125(2) appears to disregard payments between 12 March and 5 April altogether, which is different to the treatment proposed in the Budget documentation published on 12 March.

A: The original intention set out in the Budget documentation of 12 March and legislation was to allow the matching of capital payments between 12 March 2008 and 5 April 2008 with any gains relating to the period up to 5 April 2008 arising to the trustees after 5 April 2008. However, this proposal was dropped because it would have introduced additional and unnecessary complexity to the legislation.

This rule is not extended to offshore income gains. It is not clear if that was deliberate or an oversight.

The HMRC s.87 guidance note provides:

Non-UK domiciled beneficiaries: capital payments received 12 March to 5 April 2008: paragraph 125 of Schedule 7

50. Paragraph 125 of Schedule 7 is an anti-avoidance measure. Its purpose was to discourage trustees making large capital payments to non-UK domiciled beneficiaries immediately before the beginning of 2008-09. These would then be matched against section 2(2) amounts for 2008-09 or later and, unless they had become UK domiciled, the beneficiaries would not be liable to Capital Gains Tax on any gains accruing to them.

51. The paragraph provides that any capital payment received by a UK resident or ordinary resident beneficiary is ignored if it was received on or after 12 March and before 6 April 2008 by a non-UK domiciled beneficiary. The payment is ignored only if the chargeable gain accrues in 2008-09 or later and the beneficiary is still non-domiciled when the gain accrues. See example 12.

Example 12: Non-UK domiciled beneficiary: capital payment received 12 March to 5 April 2008: paragraph 125 of Schedule 7

Year	**Capital payments**	**S.2(2) amount**
2007-08	£200,000	£ 50,000
2010-11	Nil	£ 80,000

The 2007-08 capital payment was made on 4 April 2008 to a UK resident but non-UK domiciled beneficiary.

A chargeable gain of £50,000 accrues to the beneficiary in 2007-08 but they are not liable to Capital Gains Tax on this gain. The settlement's section 2(2) amount for 2007-08 is reduced to nil. The unmatched capital payment for 2007-08 is reduced to £150,000.

If the beneficiary is non-UK domiciled in 2010-11 the unmatched capital payment £150,000 for 2007-08 is not matched against the section 2(2) amount £80,000 for 2010-11 and no section 87 gain accrues for that year. This is because the capital payment was received in the period 12 March 2008 to 5 April 2008 inclusive by a beneficiary who was not domiciled in the UK when they received the payment. The settlement's unmatched section 2(2) amount for 2010-11 remains at £80,000.

The capital payment will remain unmatched against section 2(2) amounts for future years provided the beneficiary remains non-domiciled. If the taxpayer has become UK domiciled by the time a section 2(2) amount is realised in a future year the payment can be matched against that amount and a section 87 gain will accrue to the beneficiary in that year.

In the example suppose a section 2(2) amount of £20,000 is realised in 2011-12. There are no capital payments in that year. The beneficiary is still non-UK domiciled. The unmatched capital payment £150,000 from 2007-08 is not matched against this section 2(2) amount.

The beneficiary becomes UK domiciled in 2012-13 and stays UK domiciled in later years.

In 2014-15 a section 2(2) amount of £80,000 is realised. No capital payments are made in that year. Paragraph 125 of Schedule 7 does not apply to year 2014-15 because the taxpayer is UK domiciled in that year. The rules in section 87A match the section 2(2) amount for 2014-15 with the unmatched capital payment £150,000 2007-08. A chargeable gain of £80000 accrues to the beneficiary in 2014-15. At the time of writing the annual exempt amount and rate of Capital Gains Tax are not known for 2014-15. This example assumes they are £15,000 and 18% respectively. Assuming that the annual exempt amount is £15,000 and the rate of Capital Gains Tax 18% the beneficiary will be liable to £11,700 Capital Gains Tax on this gain.

The section 2(2) amount for 2014-15 is reduced to nil and the unmatched capital payment for 2007-08 is reduced to £70,000 (£150,000 - £80,000). This capital payment will be matched against section 2(2) amounts realised in later years. Applying the matching rules in section 87A TCGA to a section 2(2) amount for 2014-15 does not result in a capital payment received in 2007-08 being matched against section 2(2) amounts for years 2010-11 and 2011-12. The section 2(2) amounts for those years will be matched against capital payments received in years after 2014-15. The remaining unmatched capital payments for 2007-08 £70,000 will be matched against section 2(2) amounts for years after 2014-15.

51.24 Pre-2008 inter-trust transfer

Para 120(4) Sch 7 FA 2008 disapplies the rules in para 120 where there was an inter-trust transfer before 2008/09[64] and para 121 Sch 7 FA 2008 sets out its own set of rules:

> (1) If s.90 of TCGA 1992 (as originally enacted) applied to a transfer of settled property made before 6 April 2008, this paragraph applies in relation to the transferor settlement and the transferee settlement.
> (2) In this paragraph "the year of transfer" means the tax year in which the transfer occurred.
> (3) The following steps are to be taken for the purpose of calculating the s.2(2) amount for the transferor and transferee settlements for the tax year 2007-08 and earlier tax years.
> *Step 1*
> Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount (at the end of the year of transfer) for the transferor settlement for the year of transfer and earlier tax years.
> For this purpose, read references there to the tax year 2007-08 as references to the year of transfer.
> *Step 2*
> Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount (before the year of transfer) for the transferee settlement for the tax year before the year of transfer and earlier tax years.
> For this purpose, read references there to the tax year 2007-08 as references to the tax year before the year of transfer.
> *Step 3*
> Calculate the s.2(2) amount for the transferee settlement for the year of transfer.
> *Step 4*
> Treat the s.2(2) amount for the transferee settlement for the year of transfer or any earlier tax year (as calculated under Step 2 or 3) as increased by—
> (a) the s.2(2) amount for the transferor settlement for that year (as calculated under Step 1), or
> (b) if part only of the settled property was transferred, the relevant proportion of the amount mentioned in para (a).
> "The relevant proportion" here has the same meaning as in s.90(4) of TCGA 1992 (as substituted by this Schedule).
> *Step 5*
> Treat the s.2(2) amount for the transferor settlement for any tax year as reduced by the amount by which the s.2(2) amount for the transferee settlement for that year is increased under Step 4.

---

64 Para 120(4) provides:

> This paragraph does not apply if s.90 of TCGA 1992 applied to a transfer of settled property by or to the trustees of the settlement that was made before 6 April 2008 (see para 121).

Step 6

Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount for the transferor settlement for the tax year 2007-08 and earlier tax years.

For this purpose—

(a) treat the s.2(2) amount for the year of transfer or any earlier tax year as the amount calculated by taking Steps 1 and 5 above, and

(b) reduce the total deemed gains by the amount of the total deemed gains calculated by taking Step 1 above.

Step 7

Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount for the transferee settlement for the tax year 2007-08 and earlier tax years.

For this purpose—

(a) treat the s.2(2) amount for the year of transfer or any earlier tax year as the amount calculated by taking Steps 2 to 4 above, and

(b) reduce the total deemed gains by the amount of the total deemed gains calculated by taking Step 2 above.

The drafter felt something should be done about multiple transfers, and Sch 4B, but did not know what:

(4) This paragraph applies with any necessary modifications in relation to a settlement as respects which more than one relevant transfer was made.

(5) In sub-para (4) "relevant transfer" means a transfer—

(a) made before 6 April 2008, and

(b) to which s.90 of TCGA 1992 applied.

(6) If, before 6 April 2008, the trustees of the transferor or transferee settlement made a transfer of value to which Schedule 4B to TCGA 1992 applied, this paragraph has effect subject to such modifications as are just and reasonable on account of Schedule 4C to that Act having applied in relation to the settlement.

Para 99 Sch 7 FA 2008[65] applies the same rules for OIG amounts.

51.25 Pre-2008 trust immigration

In order to follow the present legislation, one needs to have in mind the original terms of s.89(2) TCGA, and in order to follow that it needs to be read with s.89(1):

(1) Where a period of one or more years of assessment for which section 87 applies to a settlement ("a non-resident period") succeeds a period of one or more years of assessment for each of which section 87 does not apply to the settlement ("a resident period"), a capital payment received by a beneficiary in the resident period shall be disregarded for the purposes of section 87 if it was not made in anticipation of a disposal

65 Set out at 51.21.1 (Pre-2008 OIG amounts).

made by the trustees in the non-resident period.
(2) Where
(a) a non-resident period is succeeded by a resident period, and
(b) the trust gains for the last year of the non-resident period are not (or not wholly) treated as chargeable gains accruing in that year to beneficiaries,
then, subject to subsection (3) below, those trust gains (or the outstanding part of them) shall be treated as chargeable gains accruing in the first year of the resident period to beneficiaries of the settlement who receive capital payments from the trustees in that year; and so on for the second and subsequent years until the amount treated as accruing to beneficiaries is equal to the amount of the trust gains for the last year of the non-resident period.

Para 123 Sch 7 FA 2008 provides:

> Section 89(2) of TCGA 1992 as substituted applies to a settlement for the tax year 2008-09 (and subsequent tax years) if s.89(2) of that Act as originally enacted would (but for the amendments made by this Schedule) have applied to the settlement for the tax year 2008-09.

51.26 Rebasing: Introduction

Paragraph 126 Sch 7 FA 2008 provides a relief which I call "**rebasing**". The HMRC s.87 guidance note provides:

> 80. The election is commonly known as a "rebasing" election ... But it is not rebasing as that term applies to section 35 TCGA and assets held at 31 March 1982. There is no across the board revaluation of the assets in the trust fund as at 6 April 2008.

51.27 Rebasing: The election

51.27.1 *Need for rebasing election*

Para 126 Sch 7 FA 2008 provides:

> (1) The following provisions apply to a settlement if—
> (a) s.87 applies to the settlement for the tax year 2008-09, and
> (b) the trustees of the settlement have made an election under this subparagraph. ...
> (5) An election under sub-para (1) is irrevocable.

EN FB 2008 provides:

> 63. The provisions of para [126] are subject to an election rather than

being mandatory because:

[1] depending on the assets comprised in the settlement as at 6 April 2008 it may not be advantageous for the paragraph to apply; and

[2] the trustees will be required to provide additional information to HMRC about trust assets. Trustees of non-resident settlements have been assured in a letter from the Acting Chairman of HMRC, Dave Hartnett, dated 12 February 2008 that in applying the provisions set out in this Schedule, HMRC will not require any additional disclosure.

As far as [1] is concerned, it can never be disadvantageous for para 126 to apply (the election cannot in any circumstances increase the tax liability). The HMRC s.87 guidance note provides:

> 79. The election ... cannot increase the tax payable by a beneficiary. Whether it improves the position of the beneficiary depends on the history of the assets disposed of.

Subject to point [2] (confidentiality) an election should be made in every case where it might be useful, which is generally the case where there are or might be UK resident foreign domiciled beneficiaries. I understand however that an election in relation to a trust unknown to HMRC will generally lead to enquiries.

51.27.2 *Requirements for valid rebasing election*

The HMRC s.87 guidance note provides:

> 82. The election can be made only if the settlement was non-UK resident throughout 2008-09.

This follows from para 126(1)(a). The guidance note continues:

> Paragraph 126(1) requires that the election be made by the trustees of the settlement. It must be made by all the trustees or by a majority of them if they are permitted to act through a majority. It cannot be made by a beneficiary. If the beneficiary's Self Assessment tax return is taken up for enquiry an election may require additional disclosure to HMRC about assets held by the trustees in order to agree the valuation.

Para 126(6) sch 7 FA 2008 provides:

> An election under that sub-paragraph must be made in the way and form specified by the Commissioners for HMRC.

The HMRC s.87 guidance note provides:

> 89. ... HMRC have provided a form RBE1 to satisfy this requirement and all elections must be made on that form. The form asks for the name of the settlement and the date it was created. The date is used to distinguish between settlements with similar names in particular those created by settlors with a prevalent surname. The form also asks the trustees to identify if and when a trigger event has occurred. The RBE1 can be downloaded from the HMRC website[66]....
> 90. Some trustees may have made the election by writing to CAR Residency before the form was available. That election remains valid and there is no need to make a further election on the form.

51.27.3 *Time limit for election*

Para 126(2) sch 7 FA 2008 provides:

> An election under sub-para (1) may only be made on or before the first 31 January to occur after the end of the first tax year (beginning with the tax year 2008-09) in which an event within either of the following paragraphs occurs—
>
> (a) a capital payment is received (or treated as received) by a beneficiary of the settlement,[67] and the beneficiary is resident in the UK in the tax year in which it is received, and
>
> (b) the trustees transfer all or part of the settled property to the trustees of another settlement, and s.90 of TCGA 1992 applies in relation to the transfer.

The time limit is crucial. The HMRC s.87 guidance note provides:

> 83. The relief is given only to individuals, paragraph 126(7), but the time limit is triggered if a capital payment is received by any UK resident beneficiary.

"Capital payment" is not defined in sch 7. The term is of course defined in s.97 TCGA but only "for the purposes of s.86A to 97 (and sch 4C)".

---

66 Accessible *http://www.hmrc.gov.uk/cnr/rbe1.pdf*.

67 Para 126 expands on this in Sch 4C cases:

> "(3) For a tax year as respects which the settlement has a Schedule 4C pool, the reference in sub-para (2)(a) above to a capital payment received (or treated as received) by a beneficiary of the settlement is to be read as a capital payment received (or treated as received) by a beneficiary of a relevant settlement from the trustees of a relevant settlement.
>
> (4) Para 8A of that Schedule (relevant settlements) applies for the purposes of sub-para (3) above."

Strictly that definition does not apply for the purposes of sch 7. It is considered however that the context shows that the usual definition is intended to be incorporated, notwithstanding the absent-minded omission of a provision to that effect. If that is right, a benefit within s.731 is not a capital payment so does not trigger the deadline for an election. It is well arguable that a benefit within the scope of OIG s.87 (which is chargeable to income tax) is not a "capital payment" for the purposes of para 126,[68] but it would be best not to rely on that point and to make the election in good time.

The HMRC s.87 guidance note provides:

> 87. An election may be made before a triggering event happens.

This is important as it is convenient and (in offshore fund cases, may be necessary) to make the election before there is any capital payment. The HMRC s.87 guidance note continues:

> There is no requirement that the beneficiary receiving the payment was a beneficiary of the settlement as at 6 April 2008. The recipient may become a beneficiary at some later time. The time limit in paragraph 126(2) of Schedule 7 runs from the time the trustees first make a capital payment to a UK resident beneficiary. If the trustees make such a payment and do not make the election they may be out of time for making the election if they make a payment to a UK-resident but non-domiciled beneficiary at a later time. The election can be made even if there are no non-UK domiciled beneficiaries when the payment is made.
>
> 88. Any election made late will be considered in accordance with the guidance in paragraph 13801 onwards in HMRC's Capital Gains Tax Manual [*recte* Capital Gains Manual].

51.28 Rebasing: The relief

Assuming an election has been made, we can move on to consider the relief. Para 126 Sch 7 FA 2008 provides:

> (7) Sub-para (8) applies if—
>
> (a) by virtue of the matching of a capital payment with the s.2(2) amount for the settlement for the tax year 2008-09 or any subsequent tax year ("the relevant tax year"), chargeable gains are treated under s.87 or 89(2) of, or para 8 Schedule 4C to,

68 See 35.13.3 ("Capital payment").

TCGA 1992 as accruing to an individual in a tax year, and

(b) the individual is resident, but not domiciled, in the UK in that year.

(8) The individual is not charged to capital gains tax on so much of the chargeable gains as exceeds the relevant proportion of those gains.

EN FB 2008 provides:

64. It should be noted that para [126] does not affect the computation of the s.2(2) amount under s.87 for a year. It simply provides a mechanism for identifying an amount of the chargeable gain treated as accruing to a non-UK domiciled beneficiary that is not chargeable to tax because an element of the underlying s.2(2) amounts are attributable to the period before 6 April 2008, when non-UK domiciled beneficiaries were not chargeable to tax in respect of chargeable gains attributed to them under s.87.

65. Para [126] applies to all non-UK domiciled beneficiaries of a settlement, the trustees of which have made a valid election. The non-UK domiciled beneficiary does not need to be a remittance basis user. Only once the provisions of para [126] have been applied is it necessary to see whether the amount of tax that is left in charge is chargeable on the arising basis, in the year in which the gains are treated as having accrued to the beneficiary, or on the remittance basis where one of s.809B, [809D or 809E] applies.

66. ... Although there is only one s.87 pool for each tax year, where an election has been made under para [126](1) trustees will need to keep track of the separate elements of gains attributed to the period before and after 6 April 2008 within the pool.

67. There are no special rules to deal with assets where the market value as at 6 April 2008 was either higher or lower than both the cost of acquisition of the asset and the disposal proceeds....

81. The election has no effect on the matching of capital payments to section 2(2) amounts or the reduction of capital payments and section 2(2) amounts. It has no effect on gains accruing to UK domiciled beneficiaries.

51.28.1 *"Relevant proportion"*

Para 126(9) Sch 7 FA 2008 provides:

The relevant proportion is A ÷ B where—

A is what would be the s.2(2) amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately

re-acquired by them (or it) at the market value at that time, and
B is the s.2(2) amount for the settlement for the relevant tax year.

In short, rebasing relief applies to relevant assets; A = gains after rebasing and B = the historical gain.

51.28.2 *"Relevant asset"*

Para 126(10) Sch 7 FA 2008 provides:

For the purposes of sub-para (9) an asset is a "relevant asset" if—
(a) by reason of the asset, a chargeable gain or allowable loss accrues to the trustees in the relevant tax year, and
(b) the asset has been comprised in the settlement from the beginning of 6 April 2008 until the time of the event giving rise to the chargeable gain or allowable loss.

The HMRC s.87 guidance note provides:

79. ... It is not possible to make the election only in respect of assets which have increased in value since 6 April 2008...
97. You consider only the assets whose disposal gave rise to the section 2(2) amount. Any assets held at 6 April 2008 which are not disposed of are not included in the comparison. This means that assets held at 6 April 2008 need be valued only when they are disposed of.

Para 126(11) extends rebasing relief to assets held by companies held by trusts:

For those purposes, an asset is also a "relevant asset" if—
(a) by reason of the asset, chargeable gains are treated under s.13 of TCGA 1992 as accruing to the trustees in the relevant tax year,
(b) the company to whom the chargeable gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those chargeable gains, and
(c) had the company disposed of the asset at any time in the relevant period,[69] part[70] of the chargeable gains (if any) accruing on the disposal would have been treated under s.13 of TCGA 1992 as accruing to the trustees.

---

69 Para 126(12) provides: "In sub-para (11)(c) "the relevant period" means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the chargeable gains."

70 The context shows that this must mean: *all or* part...

A company's asset is not a relevant asset if a loss accrues on the disposal. But a trust asset can be a relevant asset even if a loss accrues on the disposal. It follows that one can envisage cases where the fraction A/B is greater than 1 (because an asset which gives rise to a loss on an actual disposal may be such that a gain would arise if the asset had been disposed of on 6/4/2008). However it does not matter if this is so. The relief is that:

> The individual is not charged to capital gains tax on so much of the chargeable gains as exceeds the relevant proportion of those gains.

So if the relevant proportion is greater than 1, no relief applies but the tax charge is not increased.

51.29 Rebasing - HMRC examples

EN FB 2008 provides some examples. Example 1 is relatively straightforward.

> 68. *Example 1: basic mechanism of para [126(8)(9)]*:
> The trustees of a settlement make an election under para [126](1).
> In 2009-10 the trustees dispose of a property for £10 million. The chargeable gain accruing to the trustees is £8 million.
> The chargeable gain that would have accrued to the trustees if the gain had been computed using the market value of the property as at 6 April 2008 as the cost of acquisition is £1 million.
> The trustees make a capital payment to beneficiaries X and Y of £4 million each. X and Y are both resident in the UK but X is also domiciled in the UK whereas Y is not.
> There are no unmatched capital payments or trust gains relating to earlier years.

The HMRC analysis is as follows:

> a. Match the capital payments to the s.2(2) amount for the year. Capital payments total £8 million and match to the s.2(2) amount of £8 million. Chargeable gains of £4 million are treated as accruing to X and Y for 2009-10.
> X is chargeable to CGT in 2009-10 under s.87 on the gains of £4 million.
> Y is non-UK domiciled so para [126](1) applies to determine how much of the chargeable gains of £4 million is chargeable to tax.
> b. The s.2(2) amount for 2009-10 is £8 million ("B" in para [126(9)].
> c. The s.2(2) amount that would have applied if the trustees had sold the property and reacquired it immediately before 6 April 2008 is £1 million

("A" in para [126(9)].
d. A/B is 1/8.
e. Apply A/B to the chargeable gains of £4 million accruing to Y: the amount of the gains that is chargeable to tax under para [126(8)] is £4 million/8, i.e. Y is chargeable to capital gains tax on £500,000.
If Y is a remittance basis user there will be no charge to tax until Y remits gain to the UK.
There are no surplus capital payments or trust gains for 2009-10.

Example 2 is more challenging.

69. *Example 2: matching capital payments across years and s.13 gains*
The trustees of a settlement make an election under para [126](1)]. The beneficiaries of the settlement are X, who is UK domiciled, and Y, who is not. Both X and Y are resident in the UK.
There are no unmatched trust gains or capital payments relating to earlier years.
In 2010-11 the trustees dispose of two assets:
a. the chargeable gains are £8 million: the pre 6 April 2008 gains are £7 million and the post 5 April 2008 gains are £1 million;
b. the overall loss is £5 million: the pre 6 April 2008 gain is £1 million and the post 5 April 2008 loss is £6 million.
A capital payment of £5 million is made to beneficiary Y.
In 2011-12 the trustees dispose of an asset. The chargeable gain is £5 million: the pre 6 April 2008 gain is £4 million and the post 5 April 2008 gain is £1 million.
Capital payments are made to beneficiaries X and Y of £2 million each.
In 2012-13 an underlying company within s.13 wholly owned by the trustees disposes of an asset.[71] The loss on the asset is £2 million.[72] But substituting the market value as at 6 April 2008 creates a post 5 April gain of £1 million. The trustees also dispose of an asset. The chargeable gain is £3 million: the pre 6 April 2008 gain is £2 million and the post 5 April 2008 gain is £1 million.
Capital payments are made to beneficiaries X and Y of £2 million each.

The EN sets out a table to summarise these facts which for ease of reference I set out here slightly expanded. It is easier to follow the

71 The example confusingly adds that the disposal is for £5m. But that is irrelevant, as what matters for tax is the gain or loss on the disposal, not the amount of the sale proceeds.

72 [Author's Footnote] This loss is not allowable; careful planning might have avoided that result.

example with the fuller spreadsheet which is accessible *http://www.kessler.co.uk/tfd-archive* (not set out here because it requires an A4 sheet).

	Pre 6/4/08 gain/loss	**Post 5/4/08 gain/loss**	**"A"**	**s.2(2) amount "B"**	**A/B**	**Cap p't to X**	**Cap p't to Y**
2010-11	£8m	(£5m)	£0	£3m	0	-	£5m
2011-12	£4m	£1m	£1m	£5m	1/5	£2m	£2m
2012-13	£2m	£2m	£2m(?)	£3m	2/3(?)	£2m	£2m

The HMRC analysis is as follows:

2010-11

The s.2(2) amount is £3 million. Match capital payment of £5 million against trust gains of £3 million: chargeable gains of £3 million treated as accruing to Y. But Y is not UK domiciled so para [126] applies.

Only £3 million×(A÷B) of the matched capital payment is chargeable to tax. However, the s.2(2) amount based on the market value of the assets as at 6 April 2008 is £0. Therefore A÷B is zero and none of the chargeable gains treated as accruing to Y is chargeable to tax.

2010-11: £2 million unmatched capital payments to Y.

2011-12

The s.2(2) amount is £5 million. Match capital payments of £4 million in the year against trust gains of £5 million; chargeable gains of £2 million treated as accruing to each of X and Y.

There are £1 million trust gains of 2011-12 unmatched. Step 5 of s.87A(2) applies.

Match 2011-12 £1 million trust gains to unmatched capital payments of £2 million to Y of 2010-11.

Chargeable gains of £1 million treated as accruing to Y. Unmatched capital payment to Y of 2010-11 reduced to £1 million.

X is chargeable to tax on £2 million in respect of 2012-13.

Y has chargeable gains of £3 million in respect of 2012-13. But Y is not UK domiciled so para [126] applies.

Under para [126(8)(9)]£3 million×(A÷B) of the matched capital payment is chargeable to tax.

A÷B is 1/5 so £600,000 of the chargeable gains treated as accruing to Y in 2011-12 are taxable.

£1 million unmatched capital payments to Y originating from 2010-11 to carry forward.

2012-13

The s.2(2) amount is £3 million. The disposal of the asset by the underlying company does not form part of the s.2(2) amount because only s.13 gains are brought into s.87. However, by applying the market values to the assets as at 6 April 2008 there is a gain attributable to the disposal of the asset by the company.

Match the capital payments of £4 million to the s.2(2) amount. Chargeable gains are treated as accruing to X and Y of £1.5 million each under part (b) of Step 3

of s.87A(2).
X is chargeable to tax on £1.5 million in respect of 2012-13.
Y has chargeable gains of £1.5 million in respect of 2012-13. But Y is not UK domiciled so para [126] applies.
Under para [126(8)(9)], £1.5 million×(A÷B) of the matched capital payment is chargeable to tax. A÷B is 2/3 so £1 million of the chargeable gains treated as accruing to Y in 2012-13 are taxable. While the kink in the value of the company's asset has increased the proportion of gains on which Y is chargeable to tax, Y is still better off than if no election had been made.

This assumes that the company's asset is a "relevant asset". However it is not a relevant asset, as it is not the case that "by reason of the asset, chargeable gains are treated under s.13 TCGA as accruing to the trustees in the relevant tax year." The correct figure for A/B is 1/3 and not 2/3 and the taxable gain after rebasing relief is £0.5m and not £1m.

There are £1.5m unmatched capital payments to Y to carry forward - £1m from 2010-11 and £0.5m from 2012-13.
There are £0.5m unmatched capital payments to X to carry forward all originating from 2012-13.

70. *Example 3: keeping track of pre 6 April and post 5 April gains and losses.*
The trustees of a settlement make an election under para [126](1). The beneficiaries of the settlement are X, who is UK domiciled, and Y, who is not. Both X and Y are resident in the UK. There are no unmatched trust gains or capital payments relating to earlier years.
In 2010-11 the trustees dispose of an asset. The chargeable gain is £8 million: the pre 6 April gain is £7 million and the post 5 April 2008 gain is £1 million. A capital payment of £2 million is made to each of beneficiaries X and Y.
In 2011-12 the trustees make a further capital payment to X and Y of £2 million each.

The example may be easier to follow if the facts are set out in a table:

	Pre 6/4/08 gain/loss	**Post 5/4/08 gain/loss**	**"A"**	**s.2(2) amount "B"**	**A/B**	**Cap p't to X**	**Cap p't to Y**
2010-11	£7m	£1m	£1m	£8m	1/8	£2m	£2m
2011-12	0	0	n/r	£5m	n/r	£2m	£2m

The HMRC analysis is as follows:

2010-11
The s.2(2) amount is £8 million.
Match capital payments of £4 million in the year against trust gains of £8 million: chargeable gains of £2 million treated as accruing to each of X and Y.
X is chargeable to tax on £2 million in respect of 2010-11.
Y has chargeable gains of £2 million in respect of 2010-11. But Y is not UK domiciled so para [126] applies.
Under para [126(8)(9)] £2 million×(A÷B) of the matched capital payment is

chargeable to tax.
A÷B is 1/8 so £250,000 of the chargeable gains treated as accruing to Y in 2010-11 are taxable.
The reduced s.2(2) amount for 2010-11 for the purposes of matching with future capital payments is £4m.
2011-12
There is no s.2(2) amount for the year. Apply s.87A matching rules to earlier year.
Match capital payments of £4 million in 2011-12 to s.2(2) amount (as reduced) for 2010-11 of £4m:
chargeable gains of £2 million treated as accruing to each of X and Y.
X is chargeable to tax on £2m in respect of 2011-12.
Y has chargeable gains of £2 million in respect of 2011-12. But Y is not UK domiciled so para [126] applies.
Under para [126(7)(8)] £2 million×(A÷B) of the matched capital payment is chargeable to tax.
A÷B is 0.5/4 so £250,000 of the chargeable gains treated as accruing to Y in 2011-12 are taxable.
The table below shows how the s.2(2) amount for the year and the underlying gains (or losses) relating to the period before and after 6 April 2008 are matched.

2010-11 matching of capital payments	**Pre 6 April gain/loss**	**Post 5 April gain/loss**	**Total trust gains (section 2(2) amount)**
2010-2011	£7m	£1m	£8m
Less matched to capital payment in 2010-11	£3.5m	£500,000	£4m
Unmatched in 2010-11	£3.5m	£500,000	£4m
Less matched to capital payments in 2011-12	£3.5m	£500,000	£4m
Unmatched in 2011-12	£0	£0	£0

The HMRC s.87 guidance note provides:

Example 22: Rebasing: basic operation: paragraph 126 of Schedule 7
Settlement X is a non-UK resident settlement created in September 2000. The trust fund consists of a number of quoted investments. Some of these have been held since September 2000. Others have been acquired since 6 April 2008. The settlement has two UK resident beneficiaries. A is domiciled in the UK. B is not domiciled in the UK.
As at 6 April 2008 there are no unmatched capital payments and section 2(2) amounts.
2008-09
In 2008-09 a section 2(2) amount of £180,000 accrues to the trustees and capital payments of £50,000 are made to A and B. The capital payments are matched to the section 2(2) amount as shown below.

	2008-09	**Matched**	c/f
Section 2(2) amount	£180,000	£100,000	£80,000
Capital payments A	£50,000	£50,000	nil

Capital payments B	£50,000	£50,000	nil

A chargeable gain of £50,000 accrues to each beneficiary. Beneficiary A is liable to Capital Gains Tax on the full amount of £50,000. The trustees make a valid election under paragraph 126(1) of Schedule 7 before 31 January 2010. The effect of the election is to reduce the gains chargeable on beneficiary B in accordance with paragraph 126(8) of Schedule 7.

You calculate the section 2(2) amount that the trustees would have made if the gain were calculated by reference to the 6 April 2008 value of assets held at that date and included in the disposal.

	Held 6/4/08	**Acquired after 6/4/08**	**Total**
Disposal Proceeds	£180,000	£170,000	£350,000
Acquisition cost	– £10,000	– £160,000	– £170,000
Gain	£170,000	£10,000	£180,000

Disposal Proceeds	£180,000
6/4/08 value	– £165,000
Gain	£15,000

Relevant proportion of s87 gain £50,000 =

$$£50{,}000 \times \frac{15{,}000 + 10{,}000}{180{,}000} = £6944$$

Beneficiary B is liable to Capital Gains Tax on £6944 of the £50,000 capital payment. If beneficiary B is a remittance basis user the gain will be taxed only when the gain is remitted to the UK.

2009-10

The trustees dispose of assets creating a £20,000 section 2(2) amount. They make capital payments of £15,000 to each beneficiary. £10,000 of each capital payment is matched to the 2009-10 section 2(2) amount. Section 87 gains of £10,000 accrue to each beneficiary in respect of the 2009-10 section 2(2) amount. The £5,000 balance of each capital payment is matched to the £80,000 2008-09 section 2(2) amount. Section 87 gains of £5,000 accrue to each beneficiary in respect of the 2008-09 section 2(2) amount giving total chargeable gains of £15,000 for 2009-10 for each beneficiary. The capital payments for that year are reduced to nil. The section 2(2) amount for 2008-09 is reduced to £70,000.

	Amount/payment	**Matched**	**Year**	**c/f**
2009-10 s.2(2) amount	£20,000	£20,000	2009-10	Nil
Capital payments A	£15,000	£10,000	2009-10	Nil
		£5,000	2008-09	
Capital payments B	£15,000	£10,000	2009-10	Nil
		£5,000	2008-09	
2008-09 s.2(2) amount	£80,000	£10,000	2009-10	£70,000

Beneficiary A will be liable to Capital Gains Tax on the full £15,000 section 87 gain. Beneficiary B's liability will be reduced in accordance with paragraph 126(8) of Schedule 7. This has to be calculated separately for the £10,000 payment matched to the 2009-10 amount and the £5,000 payment matched to the

2008-09 amount.
For 2009-10 the figures are:

	Held 6/4/08	**Acquired after 6/4/08**	**Total**
Disposal proceeds	£70,000	£100,000	£170,000
Acquisition cost	– £65,000	– £85,000	– £150,000
Gain	£5,000	£15,000	£20,000

Disposal proceeds	£70,000
6/4/08 value	£80,000
Loss	(£5,000)

The section 2(2) amount calculated using 6 April 2008 values is £10,000 ie £15,000 – £5,000. The relevant proportion of the £10,000 section 87 gain is:
£10,000 × 10,000 / 20,000 = £5,000
The Capital Gains Tax liability on the £5,000 section 87 gain relating to the 2008-09 section 2(2) amount is limited to:
£5,000 × 25,000 / 180,000 = £694
B's total liability to Capital Gains Tax in 2009-10 is on gains of £5,694 (£5,000 + £694). If beneficiary B is a remittance basis user the gain will be taxed only when the gain is remitted to the UK.

Example 23: Rebasing: relevant proportion is 0: para 126 of Schedule 7
The facts are the same as that in example 22 year 2009-10 except for the 6 April 2008 value of the assets sold. This is £120,000.
The calculation is now:

	Held 6/4/08	**Acquired after 6/4/08**	**Total**
Gain	**£5,000**	**£15,000**	**£20,000**

Disposal proceeds	£70,000
6/4/08 value	– £120,000
Loss	£50,000

The section 2(2) amount calculated using 6 April 2008 values is £15,000 - £50,000. This is restricted to 0 as a section 2(2) amount cannot be negative. Beneficiary B is not liable to Capital Gains Tax on any of the £10,000 2009-10 gain ie £10,000 × 0 = 0. B remains liable to Capital Gains Tax on the section 87 gain matched to the 2008-09 section 2(2) amount. As in example 22 this is £694. B's capital payments for 2009-10 are still reduced to nil.

51.30 Rebasing: Minor rules

51.30.1 *Asset derived from another asset*

Para 126(13) Sch 7 FA 2008 extends the relief where one asset is derived from another asset; this will not be very common. It must be read with s.43 TCGA in order to follow the sense:

> If and so far as, in a case where assets have been merged or divided or

have changed their nature or rights or interests in or over assets have been created or extinguished, the value of an asset is derived from any other asset in the same ownership, an appropriate proportion of the sums allowable as a deduction in the computation of a gain in respect of the other asset under paragraphs (a) and (b) of section 38(1) shall, both for the purpose of the computation of a gain accruing on the disposal of the first-mentioned asset and, if the other asset remains in existence, on a disposal of that other asset, be attributed to the first-mentioned asset.

If a case where s.43 applies, one turns to para 126(13):

If—

(a) by reason of an asset which would not otherwise be a relevant asset ("the new asset"), chargeable gains or allowable losses accrue, or are treated under s.13 as accruing, to the trustees in the relevant tax year,

(b) the value of the new asset derives wholly or in part from another asset ("the original asset"), and

(c) s.43 of TCGA 1992 applies in relation to the calculation of the chargeable gains or allowable losses,

the new asset (or part of that asset) is a "relevant asset" if the condition in sub-para (10)(b) or the conditions in sub-para (11)(b) and (c) would be met were the references there to the asset to be read as references to the new asset or the original asset.

51.30.2 *Inter-group transfer*

Para 126(14)(15) Sch 7 FA 2008 extends rebasing relief where there is an inter-group transfer:

(14) If—

(a) on or after 6 April 2008, a company ("company A") disposes of an asset to another company ("company B"), and

(b) s.171 of TCGA (transfers within groups) (as applied by s.14(2) of that Act) applies in relation to the disposal,

for the purposes of sub-para (11) (and this sub-paragraph) treat company B as having owned the asset throughout the period when company A owned it.

(15) If an asset is a relevant asset by virtue of sub-para (14), for the purposes of sub-para (9)—

(a) treat the chargeable gains as having accrued to the company which owned the asset at the beginning of 6 April 2008, and

(b) treat the proportion of those chargeable gains attributable under s.13 of TCGA 1992 to the trustees as being the

proportion of the chargeable gains actually accruing that are so attributable.

Para 126(16) to (18) deals with the situation where an asset is held by a company, and the trustees have held different interests in the company at different times:

(16) If—
(a) an asset would otherwise be a "relevant asset" within sub-para (11), and
(b) the proportion of chargeable gains treated under s.13 of TCGA 1992 as accruing to the trustees by reason of the asset ("the relevant proportion") is greater than the minimum proportion,
for the purposes of sub-para (9) treat the appropriate proportion of the asset as a relevant asset and the rest of the asset as if it were not a relevant asset.
(17) "The minimum proportion" is the smallest proportion of chargeable gains (if any) that would have been attributable to the trustees on a disposal of the asset at any time in the relevant period (as defined by sub-para (12)).
(18) "The appropriate proportion" is the minimum proportion divided by the relevant proportion.

This does not work. Suppose for example a trust held 50% of the shares in a non resident company, T Ltd before 2008, and later acquired all the shares. T Ltd realises a gain of £100 on an asset (the company's asset) held before 2008. The gain is deemed to accrue to the trust under s.13. The terms of subpara 16 are met:

(a) the company's asset would otherwise be a "relevant asset" within sub-para (11), and
(b) the proportion of chargeable gains treated under s.13 of TCGA 1992 as accruing to the trustees by reason of the asset ("the relevant proportion" - 100%) is greater than the minimum proportion (which under the definition in 126(17) is 50%.

So subpara 16 directs:

for the purposes of sub-para (9) treat the appropriate proportion of the asset as a relevant asset and the rest of the asset as if it were not a relevant asset.

We need to ascertain the appropriate proportion. That is one half divided

by the relevant proportion. So we need to know the relevant proportion. That is:

> A÷B where—
> A is what would be the s.2(2) amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately re-acquired by them (or it) at the market value at that time, and
> B is the s.2(2) amount for the settlement for the relevant tax year.

B is £100. In order to work out A we need to know what is the relevant asset, but we do not know what is a relevant asset until we have applied subpara 16. Presumably we are to ignore the subpara 16 reduction, in which case the company asset is the relevant asset. Assume that the company asset was worth £50 on 6 April 2008, so the relevant proportion is one half. Then the appropriate proportion is one half divided by one half, = one. I suspect that the drafter has confused "divided" with "multiplied". What a shambles! Fortunately the problem may not often arise.

51.31 Rebasing: OIG amounts

Paragraph 101 Sch 7 FA 2008 provides equivalent rebasing relief for OIGs:

> (1) This paragraph applies if—
> (a) the trustees of a settlement have made an election under paragraph 126(1) (re-basing election),
> (b) income is treated under regulation 17 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001) as arising to an individual in the tax year 2008–09 or any subsequent tax year ("the relevant tax year") by reason of the matching, under section 87A of TCGA 1992 as applied by regulation 20 of those Regulations, of an OIG amount with a capital payment received by the individual from the trustees, and
> (c) the individual is resident or ordinarily resident, but not domiciled, in the UK in the relevant tax year.
> (2) The individual is not charged to income tax on so much of the income as exceeds the relevant proportion of that income.
> (3) Sub-paragraphs (9) to (18) of paragraph 126 (meaning of "the relevant proportion") apply for the purposes of sub-paragraph (2) above as if—
> (a) references to section 2(2) amounts were to OIG amounts,

(b) references to chargeable gains were to offshore income gains,
(c) references to allowable losses were omitted, and
(d) references to anything accruing were to it arising (and similar references were read accordingly).

Amended as para 101(3) requires, para 126(9) to (13) provide:

(9) The relevant proportion is A÷B where—

A is what would be the ~~section 2(2) amount~~ OIG amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately re-acquired by them (or it) at the market value at that time, and

B is the ~~section 2(2) amount~~ OIG amount for the settlement for the relevant tax year.

(10) For the purposes of sub-paragraph (9) an asset is a "relevant asset" if—

(a) by reason of the asset, ~~a chargeable gain or allowable loss accrues~~ an offshore income gain arises to the trustees in the relevant tax year, and
(b) the asset has been comprised in the settlement from the beginning of 6 April 2008 until the time of the event giving rise to the chargeable gain or allowable loss.

(11) For those purposes, an asset is also a "relevant asset" if—

(a) by reason of the asset, ~~chargeable gains~~ offshore income gains are treated under section 13 of TCGA 1992 as ~~accruing~~ arising to the trustees in the relevant tax year,
(b) the company to whom the ~~chargeable gains~~ offshore income gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those ~~chargeable gains~~ offshore income gains, and
(c) had the company disposed of the asset at any time in the relevant period, part of the ~~chargeable gains~~ offshore income gains (if any) accruing on the disposal would have been treated under section 13 of TCGA 1992 as ~~accruing~~ arising to the trustees.

(12) In sub-paragraph (11)(c) "the relevant period" means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the ~~chargeable gains~~ offshore income gains.

(It is not necessary to set out the rest of para 126, as amended).

51.32 Rebasing: transfers between trusts

Para 127(1) Schedule 7 FA 2008 provides:

> This paragraph applies if—
>
> (a) in the tax year 2008-09 or any subsequent tax year, the trustees of a settlement ("the transferor settlement") transfer all or part of the settled property to the trustees of another settlement ("the transferee settlement"),
>
> (b) s.90 of TCGA 1992 applies in relation to the transfer,
>
> (c) the trustees of the transferor settlement have made an election under para 126(1),
>
> (d) by virtue of the matching of a capital payment with the s.2(2) amount for the transferee settlement for the tax year 2008-09 or any subsequent tax year ("the relevant tax year"), chargeable gains are treated under s.87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 as accruing to an individual in a tax year, and
>
> (e) the individual is resident, but not domiciled, in the UK in that year.

51.32.1 *Transferee trust makes rebasing election*

Para 127(2) Sch 7 FA 2008 provides:

> If the trustees of the transferee settlement have made an election under para 126(1), para 126(7) to (9) have effect in relation to the transferee settlement for that year as if the reference in para 126(9) to relevant assets included relevant assets within the meaning of this paragraph.

51.32.2 *Transferee trust does not make rebasing election*

Para 127 Sch 7 FA 2008 provides:

> (3) If the trustees of the transferee settlement have not made an election under para 126(1), the individual is not charged to capital gains tax on so much of the chargeable gains mentioned in sub-para (1)(d) above as exceeds the relevant proportion of those gains.
>
> (4) The relevant proportion is A ÷ B where—
>
> A is what would be the s.2(2) amount for the transferee settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the company concerned and immediately re-acquired by it at the market value at that time, and
>
> B is the s.2(2) amount for the transferee settlement for the relevant tax year.

(5) For the purposes of this paragraph an asset is a "relevant asset" if—

(a) by reason of the asset, chargeable gains are treated under s.13 of TCGA 1992 as accruing to the trustees of the transferee settlement in the relevant tax year,

(b) the company to whom the chargeable gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those chargeable gains,

(c) had the company disposed of the asset at any time in the relevant period, part of the chargeable gains (if any) accruing on the disposal would have been treated under s.13 of TCGA 1992 as accruing to—

(i) the trustees of the transferor settlement (if the disposal had been made before the transfer), or

(ii) the trustees of the transferee settlement (if it had not).

(6) In sub-para (5)(c) "the relevant period" means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the chargeable gains.

(7) Sub-paras (13) to (18) of para 126 apply for the purposes of this paragraph (with such modifications as are necessary) as they apply for the purposes of that paragraph.

January 2009 Qs & As provides:

Q7 In applying the allocation rules to transfers between settlements, the transferor trust gains carried across will be treated as having accrued to the transferee trust in the year in which they in fact accrued to the transferor trust. Those gains that have been matched with capital payments out of transferor trust in the year of transfer or previous years will be left out of account. Gains carried across will be allocated to a capital payment from the transferee trust on a 'last in first out' (LIFO) basis. Gains on such assets will be governed by whether or not the transferor trust has made a rebasing election under paragraph 126 sch 7 FA 2008.

If the transferor settlement has made a rebasing election by the time of the transfer of the transferee settlement, then pre and post April 2008 gains which are deemed to have accrued on the actual disposal of an asset go across *pro rata*.

If the transferor settlement has not made a rebasing election by the 31 January following the year of the transfer, then even if no capital payment has yet been made, the right to rebase is lost in relation to the transferred assets and any assets retained in the transferor trust.

However, it should be noted that any transfers between settlements made prior to 6 April 2008 will not trigger a time limit on rebasing and

any assets moving over to the transferee settlement as a result of a transfer made prior to 6 April 2008 will not be affected by any subsequent election for rebasing made by the transferor trust. If the asset appointed over to the transferee settlement before 6 April 2008 includes shares in a company within s.13 TCGA 1992, then the transferee settlement may wish to elect for rebasing in its own right. An election made by the transferee settlement may cover gains made by such a company – see para 127 Sch 7 FA 2008. Transferee settlements which receive property on or after 6 April 2008 cannot elect for rebasing in relation to the transferred assets – the decision is solely that of the transferor settlement.

The HMRC s.87 guidance note provides:

Rebasing and transfers between settlements

110. A rebasing election made by the transferor settlement can cover gains made by that settlement after 5 April 2008 even if they are not brought into charge until they are matched with capital payments made by the transferee settlement. Transferee settlements receiving property on or after 6 April 2008 cannot elect for rebasing in relation to the transferred assets – the decision is solely that of the transferor settlement. See example 26.

111. An election made by the transferee settlement can cover gains made by that settlement after 5 April 2008 including those on assets received, prior to 6 April 2008, from another settlement.

Example 26 – Paragraph 126 of Schedule 7 – Effect of 'rebasing election' made by transferor settlement on gains made by transferor settlement treated as accruing when matched with capital payments made by transferee settlement

All the settled property of the transferor settlement is transferred to the transferee settlement for nil consideration in 2009-10. No capital payments have been made out of the transferor settlement. The transferor settlement had no gains made by the trustees prior to the transfer.

Gains arise on the transfer of £100,000. These are on the disposal of an asset which had been held by the trustees since 2001. The post 5 April 2008 element of the gain is £15,000 based on the difference between the value at 6 April 2008 and the value at the time it is transferred.

The transferee settlement has no unmatched section 2(2) amounts of its own. Its only unmatched section 2(2) amount is the £100,000 for 2009-10 it is treated as receiving on the transfer.

In 2010-11 the transferee settlement makes a capital payment of £300,000 to a UK resident but non-UK domiciled beneficiary. Under section 87 £100,000 of the capital payment is matched with the section 2(2) amount and a £100,000 chargeable gain is treated as accruing to the beneficiary.

If a valid election under paragraph 126 Schedule 7 has been made by the trustees of the transferor settlement then only the post 5 April 2008 element of the gain (£15,000) is chargeable to tax on the beneficiary. And that is subject to the

remittance basis if the beneficiary is a remittance basis user.

If no valid election has been made by the trustees of the transferor settlement then the full £100,000 is chargeable to tax on the beneficiary. Again this is subject to the remittance basis if the beneficiary is a remittance basis user.

An election made by the trustees of the transferee settlement has no effect on this gain.

Rebasing and transfers between settlements owning non-UK resident companies: paragraph 127 of Schedule 7

The transfer of settled property between settlements does not result in a disposal of the assets held in the underlying non-UK resident company. Where the transfer takes place after 5 April 2008 a disposal may subsequently be made by the underlying company of assets it acquired prior to 6 April 2008. In such a case the rules in paragraph 126 do not apply to any gains made by the underlying company as it has not been part of the transferee settlement structure since 5 April 2008 – paragraph 126(11)(c)

There are special rules in paragraph 127 to give 'rebasing election' relief in such cases.

113. For any relief to be available the trustees of the transferor settlement must have made a 'rebasing election'. How any relief is calculated depends on whether, or not, the trustees of the transferee settlement have also made a 'rebasing election'.

114. If the trustees of the transferee settlement have made a rebasing election then the assets disposed of by the underlying company are treated in the same way as any assets the transferee settlement has owned from before 6 April 2008 – paragraph 127(2).

115. If the trustees of the transferee settlement have not made a rebasing election then you have to calculate a fraction 'A/B' called the 'relevant proportion' where (A) is defined as the section 2(2) amount for the transferee settlement for the year a gain is treated as accruing to the non-UK domiciled beneficiary on the assumption the underlying company had sold and immediately re-acquired all its relevant assets at market value immediately before 6 April 2008, divided by (B) is defined as the actual section 2(2) amount for the transferee settlement for the relevant tax year

116. The non-UK domiciled beneficiary is not charged to tax on so much of the gains treated as accruing to him that exceeds the 'relevant proportion' of those gains – paragraph 127(3) & (4). See example 27.

Example 27 – Paragraph 127 of Schedule 7 – Effect of 'rebasing election' made by transferor settlement on gains made by underlying non-UK resident close company after company has been transferred to another settlement

All the settled property of the transferor settlement is transferred to the transferee settlement for nil consideration in 2009-10. No capital payments have been made out of the transferor settlement. The transferor settlement had no gains made by the trustees prior to the transfer.

The transferor settlement's only assets at the time of transfer are shares in a wholly owned non-UK resident company which it has owned since 2001. A gain arises on the transfer of £100,000. The post 5 April 2008 element of the gain is

£15,000 based on the difference between the value at 6 April 2008 and the value at the time it is transferred.

The underlying non-UK resident company continues to own an asset which it acquired in 2002. That asset is sold in 2011-12 and produces an overall gain of £150,000. The post 5 April 2008 element of the gain is £20,000 based on the difference between the value at 6 April 2008 and the value at the time of its disposal.

The transferee settlement has no unmatched section 2(2) amounts of its own. Its only unmatched section 2(2) amount is the £100,000 for 2009-10 it is treated as receiving on the transfer.

In 2011-12 the transferee settlement makes a capital payment of £250,000 to a UK resident but non-UK domiciled beneficiary. Under section 87 £150,000 of the capital payment is matched with the £150,000 gain made by the underlying non-UK resident company in 2011-12. A £150,000 chargeable gain is treated as accruing to the beneficiary in 2011-12.

Under section 87 a further £100,000 of the capital payment is matched with the section 2(2) amount for 2009-10 and a £100,000 chargeable gain is treated as accruing to the beneficiary in 2011-12.

If no valid election has been made by the trustees of the transferor settlement then the full amount of the gains (£150,000 and £100,000 respectively) are chargeable to tax on the beneficiary in 2011-12. This is subject to the remittance basis if the beneficiary is a remittance basis user. The tax due on the gain relating to the 2009-10 section 2(2) amount will be increased by section 91.

If a valid election under paragraph 126 of Schedule 7 has been made by the trustees of both settlements only the post 5 April 2008 element of both of the gains (£20,000 for the 2011-12 section 2(2) amount and £15,000 for the 2009-10 section 2(2) amount) are chargeable to tax on the beneficiary in 2011-12. This is subject to the remittance basis if the beneficiary is a remittance basis user. The time limit for making the election is 31 January 2011 for the transferor settlement and 31 January 2013 for the trustees of the transferee settlement. The tax due on the gain relating to the 2009-10 section 2(2) amount will be increased by section 91.

If a valid election has been made by the trustees of the transferor settlement but not the trustees of the transferee settlement the formula in paragraph 127(4) applies to determine the relevant proportion of the gain on which the beneficiary is taxed. Suppose the facts are the same as the example but there is further section 2(2) amount for 2011-12 when the trustees dispose of an asset they have held since before 6 April 2008. The gain on this asset is £80,000. £80,000 of the capital payment made in 2011-12 is matched against this section 2(2) amount. The total amount matched against the 2011-12 section 2(2) amount is £230,000 leaving only £20,000 to be matched against the 2009-10 section 2(2) amount.

A in the formula in paragraph 127(4) is the transferee settlement's section 2(2) amount for 2011-12 if all the relevant assets had been sold and reacquired at their value immediately before 6 April 2008. These are the assets in the underlying company. This part of the section 2(2) amount is £20,000 to which you have to add the £80,000.

B in paragraph 127(4) is the full section 2(2) amount of the transferee settlement

for 2011-12 of £230,000 (£150,000 + £80,000).
The UK resident but non-UK domiciled beneficiary is charged on £230,000 × £100,000/£230,000 = £100,000 of the gains matched to the 2011-12 section 2(2) amount. The gain on the payments matched against the section 2(2) amount on the transfer in 2009-10 is covered by the paragraph 126 election made the trustees of the transferor settlement. The amount of that gain charged to Capital Gains Tax on the UK resident but non-UK domiciled beneficiary is limited to £3000 (£20,000 × 15,000/100,000). The total gains chargeable in 2011-12 are £103,000. This is subject to the remittance basis if the beneficiary is a remittance basis user. The tax due on the gain relating to the 2009-10 section 2(2) amount will be increased by section 91.

51.32.3 *Transfer between trusts: OIG amounts*

Para 102 Sch 7 FA 2008 provides equivalent rules for OIG amounts:

(1) This paragraph applies if—
- (a) in the tax year 2008–09 or any subsequent tax year, the trustees of a settlement ("the transferor settlement") transfer all or part of the settled property to the trustees of another settlement ("the transferee settlement"),
- (b) section 90 of TCGA 1992 applies in relation to the transfer,
- (c) the trustees of the transferor settlement have made an election under paragraph 126(1),
- (d) by virtue of the matching (under section 87A of TCGA 1992 as applied by regulation 20 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001)) of a capital payment with an OIG amount of the transferee settlement, income is treated under such regulations (regulation 17 of those Regulations [)] as arising to an individual in a tax year ("the relevant tax year"), and
- (e) the individual is resident or ordinarily resident, but not domiciled, in the UK in the relevant tax year.

(2) If paragraph 101 applies in relation to the transferee settlement, paragraph 126(9) as applied by paragraph 101(3) has effect as if the reference there to relevant assets included relevant assets within the meaning of paragraph 127(4) (as modified by sub-paragraph (4)(b) below).
(3) If paragraph 101 does not apply in relation to the transferee settlement, the individual is not charged to income tax on so much of the income mentioned in sub-paragraph (1)(d) above as exceeds the relevant proportion of that income.
(4) Sub-paragraphs (4) to (7) of paragraph 127 (meaning of "the relevant proportion") apply for the purposes of sub-paragraph (3) above

as if—

(a) references section 2(2) amounts were to OIG amounts,

(b) references to chargeable gains were to offshore income gains, and

(c) references to anything accruing were to it arising.

51.33 CGT planning aspects of non-resident trusts

When are non-resident trusts advantageous for CGT?

One situation is to maximise use of losses: losses of remittance basis taxpayers are generally unallowable, but losses of non-resident trusts can be set against s.2(2) amounts (trust gains). However no-one *plans* to realise losses so that is not generally a planning point.

51.33.1 *Where capital payment basis better than arising basis*

Non-resident trusts are in principle better than ownership of UK situate property by UK resident foreign domiciled individuals directly (or through a non-resident company), whether or not the individuals claim the remittance basis.

That is, suppose a trust holds:

(1) UK situate property; or

(2) a company within s.13 TCGA which holds UK situate property.

If the trust property is held by the settlor directly, gains on the UK situate property are chargeable on an arising basis; if the same property is held on a trust, the gains are taxable on a capital payments basis.

For foreign domiciled individuals who do not claim the remittance basis, similar points apply regardless of the situs of the trust property. That is, where an individual does not wish to pay the remittance basis charge, it may be worthwhile setting up a non-resident trust to ensure that gains are taxed on a s.87 capital payment basis and not on the arising basis.

51.33.2 *Where capital payment basis better than remittance basis*

Non-resident trusts may be better than absolute ownership of foreign situate property by remittance basis taxpayers as they may avoid the application of the mixed fund rule.

Example 1 (trust better than absolute ownership)

Suppose a foreign situate asset is acquired for £1m, sold for £2m, giving a gain of £1m. If the asset is held by a remittance basis taxpayer (T) who remits £1m, there is a CGT charge on £1m as the remitted sum is all gain. By contrast, suppose:

(1) the asset is held in a non-resident trust.
(2) the trust makes a capital payment of £1m to T offshore.
(3) in the following year, the trust makes a capital payment of £1m to T onshore.

The offshore payment has reduced the s.2(2) amount to nil, so the second payment is free of CGT.

However to take advantage of this requires careful timing of gains and payments that is often not practical. Often, the remittance basis will be better than the capital payments basis.

Example 2 (trust worse than absolute ownership)
Suppose 3 foreign situate assets are each acquired for £1m, sold for £2m, giving a gain of £1m each. If the assets are held by a remittance basis taxpayer (T) who remits the £2m proceeds of one of the assets, there is a CGT charge on £1m only. (Assume the proceeds are not paid into a singe account, ie are not mixed.)

By contrast, suppose:
(1) the assets are held in a non-resident trust.
(2) the trust makes a capital payment of £2m in the UK.

There is then a CGT charge on £2m.
The solution may be to have three separate trusts, one for each asset.

51.33.3 *Where non-resident trusts not desirable*

Non-resident trusts are not desirable where the settlor is non-UK resident, since trust gains are s.2(2) amounts and gains accruing to the settlor are in principle CGT free.

51.33.4 *Should trustees hold assets through an underlying company?*

Trustees may hold trust assets directly or through a wholly owned non-resident company (here called **"an underlying company"**). Which is better?

For CGT an underlying company has no CGT advantage and some disadvantages as there may be a double CGT charge:
(1) Gains accruing to the company may be attributed to the trustees under s.13[73] and so constitute s.2(2) amounts.
(2) In addition, there may be a further charge on extraction of the assets from the company:

---

73 See 53.1 (Gains of non-resident companies). But the motive defence may apply.

(a) a chargeable gain the offshore trustees dispose of the company's shares and so further s.2(2) amounts; or
(b) income tax on a distribution by way of dividend.

There is normally no relief for that double charge.[74]

Losses of the underlying company are restricted and easily lost altogether. If the property is a residence, CGT private residence relief is lost by use of a company.[75]

So an underlying company should not be used unless there is some good reason (which might be IT or IHT or some other reason.)[76] If the trustees need limited liability, a limited partnership (which is transparent for CGT) is an alternative which avoids the CGT problems.

51.34 Four basic strategies for the s.87 regime

In outline the position is as follows:

51.34.1 *Indefinite deferral*

Beneficiaries are only liable to the s.87 charge if they receive a capital payment. But there may be no need for a capital payment to be made. Instead, the capital of the trust fund may be retained. The beneficiaries of the settlement would enjoy a trust fund unreduced by the burden of CGT. In this way the charge may be postponed until further tax planning becomes possible – or indefinitely.

51.34.2 *Non-resident beneficiary*

Section 2(2) amounts are treated as chargeable gains accruing to a beneficiary who receives capital payments. But a beneficiary who is not resident in the UK is not subject to CGT on those gains. Such a beneficiary may therefore receive capital payments from the trust tax free, just as they can realise capital gains of their own without incurring any tax charge. The temporary non-residence rules need to be considered, see 9.1 (Temporary non-residence).

---

74 There are some reliefs: see 53.23 (Company distribution relief). However these only help the person who pays tax under s.13, so would only be relevant to a settlor-interested trust within s.86.

75 See 53.31 (Private residence relief).

76 See too 32.31 (Transfer from non-resident trust to underlying company).

51.34.3 *Mixed UK and foreign beneficiaries: Simple capital payments*

Section 2(2) amounts which have been matched with a capital payment to a beneficiary in an earlier tax year cease to be available for the purpose of the s.87 charge in the following year. This principle applies whether or not the beneficiary was subject to the s.87 charge. Suppose that s.2(2) amounts are matched with capital payments to a non-resident beneficiary and the capital payments equal the total s.2(2) amounts. Those s.2(2) amounts are sometimes said to have been "washed". In subsequent tax years these are not taken into account and a capital payment may be made to a UK beneficiary without incurring any tax charge under s.87. Careful timing is essential. The payment to the exempt beneficiary must be made in one tax year and the payment to a UK beneficiary must be postponed until the following tax year. Section 2(2) amounts accruing in a subsequent tax year may be taxed on the UK beneficiary.

51.34.4 *Mixed UK and foreign beneficiaries: Capital payment/resettlement*

If one or more of the beneficiaries of the settlement are not UK resident, the trustees might consider advancing trust capital to those beneficiaries absolutely. The beneficiaries might then independently resettle the property and may gain additional inheritance tax advantages. The CGT position would be substantially improved for the other beneficiaries by washing s.2(2) amounts equal to the advancement. But successfully implementing arrangements of this kind is easier said than done. See 80.36 (Planning to create trust with foreign domiciled settlor).

51.35 GAAR guidance

The GAAR guidance provides two s.87 examples.

51.35.1 ***Carefully timed capital payments***

The first example is straightforward timing planning, which no practitioner would have thought was within the GAAR:

D20 Offshore trust and washing out gains - example 1
This example illustrates that where the legislation sets precise boundaries the GAAR will not be in point where taxpayers satisfy the statutory conditions.
D20.2 The arrangements
D20.2.1 A trust resident outside the UK was set up by a now deceased foreign

domiciled settlor.[77] The trust is worth £4m, has a pool of trust gains of £2.5m and no accumulated income or offshore income gains. There are no Sch 4C gains.

D20.2.2 There are four beneficiaries, two of whom are resident and domiciled in the UK and two of whom live permanently outside the UK. The trustees have made no capital distributions in recent years and it has been decided to end the trust. The trustees have three options and the taxpayer's analysis on each is as follows:

- **Option 1** - End the trust in Year 1 paying £1m to each beneficiary. The UK resident beneficiaries will each pay UK tax on one quarter of the trust gains i.e. £625,000, at the appropriate rate, since the gains are allocated pro rata to the beneficiaries. The non-resident beneficiaries will pay no UK tax although half the trust gains are allocated to them.
- **Option 2** - Pay the UK resident beneficiaries £2m in Year 1 and the non-resident beneficiaries £2m in Year 2. The UK resident beneficiaries will each pay UK tax on £1m of gains since all the gains are allocated to them on a LIFO basis. The non-UK resident beneficiaries pay no UK tax and no gains are allocated to them.
- **Option 3** - Pay the non-UK resident beneficiaries £2m in Year 1 and the UK resident beneficiaries £2m in Year 2. The non-UK resident beneficiaries pay no UK tax but the pool of trust gains that can be allocated to payments in the following year is reduced to £500,000. £2m of gains have been "washed out". The UK resident beneficiaries each pay capital gains tax on £250,000.

D20.2.3 The trustees therefore choose option 3 resulting in the least amount of tax for the beneficiaries. The UK resident beneficiaries receive their payment later but with less tax payable.

D20.4 The taxpayer's tax analysis

D20.4.1 The taxpayer's analysis is as set out above. The taxpayer contends that LIFO should be applied.

D20.5 What is the GAAR analysis under [s.207(2) FA 2013]?

D20.6 *Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether expressed or implied) and the policy objectives of those provisions?*

The trustees are entitled to organise distributions in a way that minimises tax for the beneficiaries within the range of normal tax planning.

In relation to option 3 the substantive results of the transactions are consistent with the principles on which the relevant provisions are based. The trustees have three different ways of achieving the same result viz to end the trust and

77 The example kills off the settlor in order to avoid complications of s.86, and, perhaps, to establish the genuineness or long term nature of the trust.

distribute property equally to the beneficiaries. They are not compelled to choose the one that raises the most tax or the "middle" option. Provided the payments to the non-resident beneficiaries in Year 1 are genuinely intended to benefit them (and the cash will not simply be passed back to the UK residents later) HMRC would not seek to invoke the GAAR.[78] It is clear that the policy of the capital gains tax legislation in relation to capital payments to beneficiaries is to operate a LIFO policy and in some cases this will result in greater tax on UK residents and in some cases less.

D20.6.1 *Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*

Delaying payment to UK resident beneficiaries by a year might be regarded as an abnormal step but as this is the specific effect of the legislation it is not regarded as abnormal in the context of achieving the substantive tax results.

D20.6.2 *Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?*

The anomalies that may arise under the LIFO rules are not seen as shortcomings in themselves but just a necessary result of having a system that allocates gains to capital payments in a certain order.

D20.6.3 *Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*

The arrangements accord with established practice and HMRC has indicated acceptance of the practice.[79]

D20.7 Conclusion

D20.7.1 This is not regarded as an abusive tax arrangement and HMRC would not seek to invoke the GAAR.[80]

51.35.2 *Self-cancelling capital payment*

The second GAAR example is an artificial scheme which would also fail on traditional *Furniss v Dawson* grounds of circular arrangement/inserted step:

D21 Offshore trusts and washing out gains - Example 2

This example illustrates that the inclusion of abnormal steps may cause the arrangement to become abusive in its own context.

---

78 An arrangement under which the benefits will be passed from the non-resident beneficiaries to the UK resident beneficiaries is caught without invoking the GAAR: see 51.7.1 (Indirect receipt from trustees).

79 The author is not aware of any publication where HMRC have formally accepted the practice. But it does not matter.

80 HMRC GAAR Guidance Part D (Examples) (April 2013) accessible *http://www.hmrc.gov.uk/avoidance/gaar-partd-examples.pdf*

D21.2 The arrangements

Mrs X is non-UK resident and domiciled. Her son Y is UK resident but foreign domiciled and occupies a house owned by a non-UK resident company that is held within a trust. The trustees own no other assets. The property is worth £10m. Gains that have accrued[81] post April 2008 are £4m (£2m on property and £2m on company).[82] The property has not increased in value since April 2013.[83] The trustees do not want to pay the annual tax on enveloped dwellings and decide to end the trust by liquidating the company. The intention of the trustees and family is that the son should own the property. There is no accumulated income or offshore income gains.

The trustees are advised on two options and the taxpayer's analysis on each is as follows:

- Option 1 - Trustees pay [more correctly, transfer] the property to the son. He receives a capital payment of £10m in the UK to which gains of £4m are attributed. He will pay tax on all the trust gains at 28%. The remittance basis does not apply. There is also a small inheritance tax exit charge.
- Option 2 - The settlor adds £4m cash to the trust in year 1. In the same year the trust liquidates the company and holds the property direct thus realising the £4m gain. It then pays the £4m cash back to the settlor in the same year.

Year 2 - the property is distributed to the son with a small amount of inheritance tax. The £4m cash payment made in Year 1 washes out the trust gains and so on the distribution of the property to the son there is no capital gains tax.

The trustees therefore choose option 2.

There are other options. For instance, if the trustees transferred the shares in the company to the son, there would be no IHT exit charge. The son might then liquidate the company. But that complication does not spoil the point of the example.

D21.4 The taxpayer's tax analysis

D21.4.1 The taxpayer's analysis is as set out above. The taxpayer contends that LIFO should be applied.

D21.5 What is the GAAR analysis under [s207(2) FA 2013]?

D21.5.1 *Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether expressed or implied) and the policy objectives of those provisions?*

The trustees are entitled to organise distributions in a way that minimizes tax for

---

81 I think the reference is to unrealised gains.

82 In fact the £2m gain accruing to the company is likely to qualify for the s.13 motive defence. But this does not spoil the point of the example.

83 The example states this fact in order to avoid the complication of ATED-CGT.

the beneficiaries within the range of normal tax planning.[84]

However, option 2 is not consistent with the principles on which the relevant tax provisions are based. LIFO was intended to operate on distributions of capital to beneficiaries by matching gains in a certain order. In this case the settlor has added the cash to the trust as part of a pre-arranged scheme to wash out the gains that she knows will be realised and on the basis that she will receive the cash back again. HMRC would seek to invoke the GAAR. The legislation was not intended to allow settlors to add cash to trusts on a short term basis only to receive it back again shortly thereafter and simply as an exercise to wash out gains.

D21.5.2 *Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*

The addition of cash followed by the payment out is an abnormal step that is contrived.

D21.5.3 *Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?*

This does intend to exploit a shortcoming in the legislation in a manner where the transactions are intended to have no economic consequences. The settlor has made the gift in the full expectation of receiving the monies back shortly and therefore not losing out.

The position would be different if the settlor had made the gift of cash and the trustees later independently decided in the exercise of their discretion to pay that cash out to other beneficiaries rather than as part of a pre-arranged circular scheme to pass the cash back to the settlor. Then the same issues would not arise.

D21.5.4 *Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*

HMRC has never accepted such practice.

D21.6 Conclusion

D21.6.1 HMRC would seek to apply the GAAR to such arrangements.

D21.7 Proposed counteraction

D21.7.1 The likely counteraction would be that the addition to the trust and payment of cash to the settlor would be ignored and the son will pay tax as under option 1.[85]

This seems right. The unfairness should be noted of imposing ATED on a company set up in accordance with standard professional practice,

84 This is a slightly loose paraphrase of the statutory rules, but I think unobjectionable in the context of the example.

85 HMRC GAAR Guidance Part D (Examples) (April 2013) accessible *http://www.hmrc.gov.uk/avoidance/gaar-partd-examples.pdf*

without any CGT relief for beneficiaries on winding up that company; but that unfairness is one of the *principles on which the relevant tax provisions are based (whether expressed or implied)*.

51.36 Record keeping

The HMRC s.87 guidance note provides:

> 133. Before 6 April 2008 trustees of non-UK resident settlements that have no UK domiciled beneficiaries, or beneficiaries who may become UK domiciled, will not have had to consider the possible UK Capital Gains Tax liabilities of the beneficiaries. From 6 April 2008 they will have to consider the possibility that a charge under section 87 or Schedule 4C TCGA may accrue to UK resident but non-UK domiciled beneficiaries.
> 134. In relation to pre 6 April 2008 transactions HMRC recognise that in such cases trustees
> - May not have kept sufficient records to calculate precisely the post 5 April 2008 Capital Gains Tax liabilities that may accrue on UK resident but non-UK domiciled beneficiaries, or
> - May not want to incur the expense of searching through old records to obtain all the necessary information to calculate precise Capital Gains Tax liabilities.
>
> 135. In such cases HMRC will consider any reasonable solution suggested to them. Usually proposed solutions will have to be considered on a case by case basis.

The guidance note concludes:

> One solution that HMRC will accept generally is that all assets held by trustees or underlying companies at midnight on 5 April 2008 are treated as having a zero acquisition cost. Provided the trustees make a valid election under paragraph 126 of Schedule 7 there will be no disadvantage to the beneficiaries. This is because the chargeable gain is restricted to the growth in the value of asset since 6 April 2008.

If a rebasing election is made, historic gain does not often matter, but there are situations in which it does.

51.37 Tax return: Disclosure of s.87 gains

S.87 gains are returned in Box 34 in the Capital Gains Summary pages (form SA108) 2013/14. The note beside this box reads:

> Attributed gains where personal losses cannot be set off.

CHAPTER FIFTY TWO

BORROWING BY NON-RESIDENT TRUST: SCH 4B

52.1 Borrowing by non-resident trust: introduction

This chapter considers schedules 4B and 4C TCGA, which are designed to counter a set of tax avoidance schemes informally known as flip-flop schemes.

52.1.1 *Cross references*

Trustees borrowing can raise so many other issues it is impossible to set out a full list, but see in particular:

Loan to trust and s.624: see 27.3.3 (Beneficial loan or guarantee).

Repayment of loan & s.633: see 27.11 (Settlor receives capital sum).

Transfer of assets: see 29.11 (Transferor receives a capital sum).

Loan to trust and definition of relevant person for remittances: see 11.6 (Relevant persons: trusts).

Loans to trust and pre-owned assets: see 76.8 (POA intangible property charge).

For IHT issues which arise when trustees borrow, see 65.11 (Deduction for trust debt).

For 2008 transitional rules relating to sch 4B and 4C, see 51.21 (Ascertaining s.2(2) amounts as at end 2007/8); 51.24 (Pre-2008 inter-trust transfer).

52.2 Outline of flip-flop schemes

In order to understand the law it is helpful to review these schemes. They were designed avoid ss.86, 77 and 87 TCGA and I refer to them as **"s.86, 77, and 87 schemes"**.

The s.86 scheme was as follows. Suppose a non-resident settlor-interested trust wished to dispose of an asset. The gain on the disposal

would in principle be taxed on the settlor under s.86 TCGA. The following steps could be taken:

(1) The trustees borrow money up to the value of the asset.
(2) They transfer the borrowed money to a second trust ("trust 2").
(3) The trustees exclude the settlor and designated persons from the first trust ("trust 1") so that s.86 ceases to apply to it.[1]
(4) In the following tax year, the trustees of trust 1 may sell the asset and realise a gain to which s.86 does not apply. They may then repay the loan.

This scheme was in principle successful[2] (though in practice it was often combined with a payment to the settlor from trust 2, which turned out to be taxable under s.87).

The s.77 scheme was designed to avoid s.77 TCGA. It involved (more or less) the same steps as the s.86 scheme. In this case however the legislation was (slightly) differently worded, and the scheme was eventually held to be unsuccessful in *West v Trennary* 76 TC 713, where the result (appropriately) flip-flopped through taxpayer success before the Commissioners, failure in the High Court, success in the Court of Appeal, to eventual failure in the House of Lords. Section 77 is now repealed, so this is now of historic interest only, but the background explains one or two features which survive in the present legislation.

The s.87 TCGA schemes came in two versions. The first version was as follows. Suppose a non-resident trust ("trust 1") without any s.2(2) amount (trust gains) wished:

(1) to dispose of an asset on which trust gains would accrue, and
(2) to make a capital payment to UK beneficiaries.

The beneficiaries would in principle be chargeable under s.87. The following steps could be taken:

(1) The trustees of trust 1 borrow money up to the value of the asset.
(2) They transfer the borrowed money to a second settlement ("trust 2").
(3) The trustees of trust 2 made a capital payment to the beneficiary.
(4) In the following tax year, the trustees of trust 1 sell the asset and realise a gain. The capital payment from trust 2 is not matched with the gain in trust 1.
(5) The trustees may then repay the loan.

---

1 See 50.4 (Settlor-interested condition).

2 *Burton v HMRC* [2009] SFTD 682. It is striking that the transactions took place in 2000 but the appeal was not heard until a decade later.

A second (and more common) version of the s.87 scheme could be used for a trust which did have trust gains. Suppose the trust wished to make a capital payment to UK beneficiaries. The beneficiaries would in principle be chargeable under s.87. The following steps could be taken:

(1) The trustees of trust 1 borrow money.
(2) They transfer the borrowed money to trust 2.
(3) The trustees of trust 2 make a capital payment to the beneficiary. The capital payment from trust 2 is not matched with the trust gains of trust 2. Section 90 TCGA would have stopped this scheme (it carried the trust gain across to trust 2 where the gain would be matched to the capital payment from trust 2). However this section was absentmindedly disapplied by Sch 4B TCGA in 2000, which lead to a flurry of tax planning until the mistake was finally corrected in 2003.[3]
(4) In due course, the trustees of trust 1 may repay the loan.

The s.87 schemes were held to be unsuccessful in *Herman v HMRC*.[4]

It is striking that most of these expensive and widely marketed schemes failed, contrary (I think) to the general expectation of the profession. The reader may think that the taxpayer had the better argument, in *Trennary* and in *Herman*. What lessons should be learned from that debacle? I leave readers to ponder over that.

The key features of the schemes were trustee borrowing and a transfer of trust property in year 1, followed by a disposal in a subsequent year. Schedule 4B produces a deemed disposal in year 1, which counteracts the s.86 (and s.77) schemes and the first version of the s.87 scheme. Schedule 4C contains a modified version of the s.87 regime, which allows gains of trust 1 to be matched with capital payments from trust 2; this counteracts the second version of the s.87 scheme.

The provisions were introduced in 2000 and revised in 2003 and 2008.

52.2.1 *What about income tax flip-flop schemes?*

Since schedule 4B only applies for CGT purposes, the reader may wonder if similar schemes could work for IT. Suppose a non-resident settlor-interested discretionary trust ("trust 1") wished to receive income (for instance by surrendering a life policy or receiving dividends) which would

---

3 See 51.18.4 (Interaction with schedule 4B).

4 See 51.7.1 (Indirect receipt from trustees).

fall within s.624 or s.720. Could the following steps be taken:
(1) The trustees borrow money up to the anticipated income.
(2) They transfer the borrowed money to a second trust ("trust 2").
(3) The trustees use their powers to exclude the settlor (etc) from trust 1 so that trust ceases to be settlor-interested.
(4) In the following tax year, the trustees of trust 1 receive the income and repay the borrowing.

The answer is that income tax capital payment provisions, s.633 ITTOIA and s.727 ITA, fill that gap but there may be occasions where planning of that kind is practical.

Similarly, since sch 4C only applies for CGT and OIG purposes, the reader may wonder if planning of this kind would work for s.731; the answer is no, as transfers between trusts do not isolate relevant income; see 30.33 (Transfer between trusts). In this respect s.731 operates rather like schedule 4C.

52.3 The key conditions

Para 1 Sch 4B TCGA provides:

> (1) This Schedule applies where trustees of a settlement—
> (a) make a transfer of value (see paragraph 2) in a year of assessment in which the settlement is within section 86 or 87 (see paragraph 3), and
> (b) in accordance with this Schedule the transfer of value is treated as linked with trustee borrowing (see paragraphs 4 to 9).

Thus the three key conditions, or sets of conditions, are:
(1) A transfer of value (in my terminology, **"a Sch4B-transfer"**)
(2) Trustee borrowing
(3) The Sch4B-transfer is "linked" with trustee borrowing

When these conditions are all satisfied, there is what I call **"a Sch4B-disposal"**.[5]

52.4 Sch4B-transfer

The statutory term "transfer of value" is unfortunate. Firstly the term is usually used with its IHT meaning. Secondly, the term is artificially defined to include loans and other transactions which do not constitute a transfer of value in any normal sense of the term. Although it is normally

5 See 52.12 (Sch4B-disposal).

better to adopt statutory terminology, in this case I think it is clearer to use the term **"Sch4B-transfer"**.

The fact that there is a Sch4B-transfer does not necessarily mean that there is a Sch4B-disposal: the transfer is only the first of the three conditions that must be met for a Sch4B-disposal.

There are three types of Sch4B-transfer. Para 2(1) Sch 4B TCGA provides:

> For the purposes of this Schedule trustees of a settlement make a transfer of value if they—
>
> (a) lend money or any other asset to any person,
>
> (b) transfer[6] an asset[7] to any person and receive either no consideration or a consideration whose amount or value is less than the market value of the asset transferred, or
>
> (c) issue a security of any description to any person and receive either no consideration or a consideration whose amount or value is less than the value of the security.

Trustees do not make a Sch4B-transfer if an underlying company held by them lends, transfers, or issues a security. Trustees do not make a Sch4B-transfer if they repay a loan.

I comment on the 3 types of Sch4B-transfer in their order of importance, rather than in the order set out in the statute.

52.4.1 *Sch4B-transfer type (b): Actual transfer of asset*

This is the most important type of sch 4B-transfer.

RI 259 provides:

> **B1 Paragraph 2(1)(b)—cash distributions which are income**
> Where trustees of a discretionary trust make a distribution which is income of the recipient for UK tax purposes, this is not a "transfer of value" within para 2, which is concerned with capital transactions.

The CG Manual provides:

> **35125. Transfer of value** [February 2006]
> References to transfers of value include everything that is or is treated as a disposal under TCGA 1992, and also include transfers or loans of money, and loans of other assets. Note that this includes disposals of

---

6 See 52.25.2 ("Transfer").

7 See 52.25.1 (Assets").

assets such as government stock or a dwelling house occupied as a beneficiary's principal private residence, even though there would be no chargeable gain on the disposal. It also includes the occasion of a beneficiary becoming absolutely entitled as against the trustee but in this context see CG35128.

Some part disposals involve the creation of a new asset. In this situation any reference in the legislation to the transfer of an asset refers to the (part) disposal of the old asset.

CG35124(b) above makes it clear that a sale of an asset, whether to an unconnected person or a beneficiary, is not a transfer of value provided it is for full consideration.

52.4.2 *Sch4B-transfer type (a): Loan of money or other asset*

35124. Transfer of value [February 2006]

Under TCGA 1992, SCH 4B, para 2(1) trustees make a transfer of value if they

(a) lend money or any other asset, regardless of whether a commercial rate of interest or hire is charged...

The flip-flop schemes[8] used in practice involved a transfer of an asset, not a loan. But there could be a s.87 scheme under which:

(1) trust 1 lent to trust 2, and
(2) trust 2 lent to a beneficiary (or acquired property used rent free by the beneficiary).

So the legislation needed to deal with loans as well as transfers of assets.

RI 259 provides:

B2 Paragraph 2(1)(a)—beneficiary exercising rights under [TOLATA][9] 1996 s 12

In certain circumstances a beneficiary's occupation of property, instead of being the consequence of the volition of the trustees, may result from personal rights under Trusts of Land and Appointment of Trustees Act 1996 s 12. Our view is that if the rights of the beneficiary arise as a consequence of the wording of the deed or will, then the occupation does not give rise to a transfer of value. It may be otherwise where the rights have arisen as a consequence of the exercise by the trustees of a power of appointment or advancement.

---

8 See 52.2 (Outline of flip-flop schemes).

9 The original refers erroneously to the "Trustee etc Act".

But it is considered that a beneficiary's occupation of property is not a loan of an asset, so the application of TOLATA is not relevant.

RI 259 provides:

> **B7 What happens when trustees put money into a conventional current or deposit account at a bank or building society?**
> Although in general law this is regarded as a loan from the customer to the bank, in the context of this legislation we do not consider that this comes within the meaning of "lend" for the purposes of para 2(1)(a). The currency in which the deposit is made is immaterial.

This is purposive, bordering on wishful, thinking; but since it usually suits the taxpayer, it will not usually be challenged.

52.4.3 *Sch4B-transfer type (c): Issuing a security*

It is normally companies rather than trustees who issue securities so this is of somewhat theoretical interest. RI 259 provides:

> **B3 Paragraph 2(1)(c)— "issue a security"**
> We have been asked what the expression "issue a security" covers. It caters for those exceptional circumstances where trustees issue to a beneficiary or to the trustees of another trust a document acknowledging liability. Schedule 4B para 13(2) provides that references to the transfer of an asset include everything that is or is treated as a disposal of an asset. The issue of a security is not in itself the disposal or part disposal of an asset. Therefore para 2(1)(b) does not apply to it, and it was necessary to have a specific provision to cover this possibility.

I find the idea that any flip-flop scheme could be carried out by issuing a security somewhat implausible. Assuming it was necessary, a neater solution would have been to define transfer to include the creation of an asset (as for the ToA provisions); but it does not do much harm.

52.4.4 *Amount of value transferred*

Para 2 Sch 4B TCGA provides:

> (3) In the case of a loan, the amount of value transferred is taken to be the market value of the asset.
> (4) In the case of a transfer, the amount of value transferred is taken to be—
>
> (a) if any part of the value of the asset is attributable to trustee borrowing, the market value of the asset;

(b) if no part of the value of the asset is attributable to trustee borrowing, the market value of the asset reduced by the amount or value of any consideration received for it...

(5) In the case of the issue of a security, the amount of value transferred shall be taken to be the value of the security reduced by the amount or value of any consideration received by the trustees for it.

(6) References in this paragraph to the value of an asset are to its value immediately before the material time, unless the asset does not exist before that time in which case its value immediately after that time shall be taken.

52.5 Settlement "within section 86 or 87"

Para 3 Sch 4B TCGA provides (more or less) commonsense definitions.

52.5.1 *Within s.86*

Para 3 Sch 4B TCGA provides:

(1) This paragraph explains what is meant in this Schedule by a settlement being "within section 86 or 87" in a year of assessment.

(3) A settlement is "within section 86" in a year of assessment if, assuming—

(a) that there were chargeable gains accruing to the trustees by virtue of disposals of any of the settled property originating from the settlor, and

(b) that the other elements of[10] the condition in subsection (1)(e) of that section were met,

chargeable gains would, under that section, be treated as accruing to the settlor in that year.

Expressions used in this sub-paragraph have the same meaning as in section 86.

52.5.2 *Within s.87*

Para 3 Sch 4B TCGA, as inserted by s.92(2) FA 2000, used to provide:

(4) A settlement is "within section 87" in a year of assessment if, assuming—

---

10 The words "the other elements of" are otiose: para 3(3)b) requires one to assume that the condition in s.86(1)(e) is met, in other words, the condition need not be met. That makes sense. For this condition, see 50.10 (Section 86 trust gains condition).

(a) there were trust gains for the year within the meaning of subsection (2) of that section, and

(b) that beneficiaries of the settlement received capital payments from the trustees in that year or had received such payments in an earlier year,

chargeable gains would, under that section or section 89(2), be treated as accruing to the beneficiaries in that year.

Expressions used in this sub-paragraph have the same meaning as in section 87.

This para was rewritten by para 130 Sch 7 FA 2008:

> In paragraph 3 of Schedule 4B (transfers of value by trustees linked with trustee borrowing: settlements), for sub-paragraph (4) substitute—
>
> "(4) A settlement is "within section 87" for a tax year if—
>
> (a) section 87 applies to the settlement for that year,[11] or
>
> (b) chargeable gains would be treated under section 89(2) as accruing in that year to a beneficiary who received a capital payment from the trustees of the settlement in that year.
>
> (5) The reference in subsection (4)(b) to chargeable gains treated as accruing includes offshore income gains treated as arising."

The drafter absentmindedly repealed the final sentence of para 4, "Expressions used in this sub-paragraph have the same meaning as in section 87".[12] However, that the context shows that the expressions in para 3(4) are nevertheless to be construed with their s.87 meanings.

52.6 Trustee borrowing

Para 4(1) Sch 4B TCGA provides a wide definition of borrowing:

> For the purposes of this Schedule trustees of a settlement are treated as borrowing if—
>
> (a) money or any other asset is lent to them, or
>
> (b) an asset is transferred to them and in connection with the transfer the trustees assume a contractual obligation (whether absolute or conditional) to restore or transfer to any person that or any other asset.

---

11 See 51.3 (Non-resident settlement condition).

12 Some databases failed to notice this (accidental) repeal and still include this sentence in para 3 Sch 4B TCGA.

> In the following provisions of this Schedule "loan obligation" includes any such obligation as is mentioned in paragraph (b).

RI 259 provides:

> The fact that money was borrowed before 21 March 2000 does not prevent it from being outstanding trust borrowing.
> Where trustees are presented with a bill, for example for repairs to trust property, bona fide delay in payment would not convert this into a borrowing for the purposes of paragraph 4.

The second paragraph is wrong, since a debt on a bill for *repairs* cannot constitute borrowing within para 4; para 4(1)(b) only applies on a loan or transfer of *assets*.

52.6.1 *Trustees borrow from underlying company*

In the following discussion, a company wholly owned by a trust is called **"an underlying company"**.

A loan to a trust from an underlying company constitutes "trustee borrowing" for the purposes of sch 4B TCGA. RI 259 states that HMRC take this point:

> **B4 Paragraph 4(1): meaning of "borrowing"**
> It is not unusual for the trustees of a non-resident trust to borrow money from a non-resident company which they control. In this situation, if the company were resident in the UK, [s.455 CTA 2010] might well be applicable. It has been suggested that in this situation the trustees are effectively "borrowing" from themselves and therefore outside para 4(1). We consider this incorrect, particularly in the light of *Chamberlain v IRC*, 25 TC 357. It does not matter whether the borrowing is from a company controlled by the trustees or their associates, or from an entirely unconnected company. What matters is the use to which the borrowing is put.

At first sight this rule seems unnecessary. If a trust borrows from an underlying company, rather than a third party, and makes a Sch4B-transfer, it seems odd that there should be a Sch4B-disposal and that sch 4C should apply. But in fact a flip-flop scheme could be carried out if trustees borrow from an underlying company, just when they borrow from a third party.

Sympathetic courts have allowed trustees to avoid the unfairness by setting aside loans made in (understandable) ignorance of these

counterintuitive rules.[13] In practice I have not come across a case where HMRC have taken the point but one could in principle avoid it by arranging a capital payment from the company to a beneficiary, rather than a loan to trustees who make the capital payment.

52.6.2 *Amount borrowed*

Para 4(2) Sch 4B TCGA provides:

> The amount borrowed (the "proceeds" of the borrowing) is taken to be—
> (a) in the case of a loan, the market value[14] of the asset;
> (b) in the case of a transfer [ie a transaction within para 4(1)(b)], the market value of the asset reduced by the amount or value of any consideration received for it.

52.7 Sch4B-transfer "linked" with trustee borrowing

52.7.1 *Terminology*

The expression "linked with trustee borrowing" is defined in paras 5-8 Sch 4B. These paragraphs employ the following terms:

(1) **"Linked" with trustee borrowing**
(2) **"Outstanding" trustee borrowing**
(3) **"Normal trust purposes"**
(4) **"Ordinary trust assets"**

These expressions are best regarded as labels for complex sets of rules. In each case the label is not particularly apt and the definition can be

---

13 *Re Leumi Overseas Trust* [2007] JRC 248; *Barclays Private Bank v Chamberlain* 9 ITELR 304. The Supreme Court in *Pitt v Holt* [2013] STC 1148 (more or less) abolishes the rule in *Hastings-Bass*, on which these decisions were based; but it seems that offshore jurisdictions are likely to continue regardless: art 47B ff Trusts (Jersey) Law 1984; Smellie, "Dealing with Mistakes of Trustees Or Settlors: the Outlook From the Offshore Bench" (2013) *http://judicial.ky/wp-content/uploads/publications/speeches/2013-11-19-Speech-CJ-DEALINGWITHMISTAKESOFTRUSTEESORSETTLORS.pdf*

14 Defined para 4(3):
"References in this paragraph to the market value of an asset are to its market value immediately before the loan is made, or the transfer is effectively completed, unless the asset does not exist before that time in which case its market value immediately after that time shall be taken.
The effective completion of a transfer means the point at which the person acquiring the asset becomes for practical purposes unconditionally entitled to the whole of the intended subject matter of the transfer."

described as artificial; the labels taken literally would be misleading. The cosy expressions conceal the complex and arbitrary nature of the concepts to which they refer. However it is difficult to think of better terms, and for the purposes of discussion it is best to adopt the statutory terminology *faute de mieux*.

52.7.2 *"Linked" with trustee borrowing*

Para 5(1) Sch 4B TCGA provides:

> For the purposes of this Schedule a transfer of value by trustees is treated as linked with trustee borrowing if at the material time there is outstanding trustee borrowing.

52.7.3 *"Outstanding" trustee borrowing*

Para 5(2) Sch 4B TCGA provides:

> For the purposes of this Schedule there is outstanding trustee borrowing at any time to the extent that—
>
> (a) any loan obligation[15] is outstanding, and
>
> (b) there are proceeds of trustee borrowing that have not been either—
>
> (i) applied for normal trust purposes, or
>
> (ii) taken into account[16] under this Schedule in relation to an earlier transfer of value.

52.7.4 *The material time*

Para 2(2) Sch 4B TCGA provides:

> References in this Schedule to "the material time", in relation to a transfer of value, are to the time when the loan is made, the transfer is effectively completed or the security is issued.
>
> The effective completion of a transfer means the point at which the person acquiring the asset becomes for practical purposes

---

15 Defined in para 4(1): see 52.6 (Trustee borrowing).

16 Para 5(3) Sch 4B TCGA provides a commonsense definition:

"An amount of trustee borrowing is "taken into account" under this Schedule in relation to a transfer of value if the transfer of value is in accordance with this Schedule treated as linked with trustee borrowing.

The amount so taken into account is—

(a) the amount of the value transferred by that transfer of value, or

(b) if less, the amount of outstanding trustee borrowing at the material time in relation to that transfer of value."

unconditionally entitled to the whole of the intended subject matter of the transfer.

The CG Manual provides:

> **35128. The material time** [February 2006]
> The expression 'the material time' is important for two reasons.
> The first is that the test whether the transfer of value is linked with trust borrowing is applied at the material time.
> The second is that the deemed disposal by the trustees occurs at the material time.
> [The Manual sets out para 2(2) and continues] So if say trustees appoint a cash sum to a beneficiary, he would become unconditionally entitled when the money had been transferred to his bank account, not when the cheque was handed to him, for at that stage the trustees might have no funds to meet the cheque.[17]

52.8 Normal trust purposes

Para 6(1) Sch 4B TCGA provides:

> For the purposes of this Schedule the proceeds of trustee borrowing are applied for normal trust purposes in the following circumstances, and not otherwise.

There are three types of "normal trust purposes":
(1) Payment for ordinary trust assets
(2) Repayment of loan
(3) Payment of expenses
Para 9 Sch 4B TCGA provides power to amend paras 6-8 by regulation. Presumably HMRC were worried that they might have left some loophole for future tax avoiders. In practice no regulations have been made.

52.9 Normal trust purposes: Payment for ordinary trust assets

Para 6(2) Sch 4B TCGA provides:

> They are applied for normal trust purposes if they are applied by the trustees in making a payment in respect of an ordinary trust asset and the following conditions are met—
>
> (a) the payment is made under a transaction at arm's length or is not more than the payment that would be made if the transaction

17 It would be unusual for trustees to write a cheque if they are not in funds: the point is that a cheque is revocable until payment is made.

were at arm's length;

(b) the asset forms part of the settled property immediately after the material time or, if it does not do so, the alternative condition in paragraph 8 below is met; and

(c) the sum paid is (or but for section 17 or 39 would be) allowable under section 38 as a deduction in computing a gain accruing to the trustees on a disposal of the asset.

52.9.1 *Ordinary trust assets*

The label "ordinary trust assets" is not apt and many common trust assets do not count as "ordinary". Para 7 Sch 4B TCGA provides:

> (1) The following are "ordinary trust assets" for the purposes of this Schedule—
>
> (a) shares or securities;[18]
>
> (b) tangible property, whether movable or immovable, or a lease of such property;
>
> (c) property not within paragraph (a) or (b) which is used for the purposes of a trade, profession or vocation carried on—
>
> (i) by the trustees, or
>
> (ii) by a beneficiary who has an interest in possession in the settled property;
>
> (d) any right in or over, or any interest in, property of a description within paragraph (b) or (c).

Thus securities are ordinary trust assets but interests in securities are not. The distinction between securities and interests in securities raises some deep questions, though there is no reason to think that the drafter gave any thought to them.

If trustees lend to an underlying company they have not incurred normal trust expenditure; if they subscribe for redeemable shares they have done so (though redeemable shares are commercially equivalent to a loan).

RI 259 provides:

> We have been asked to say whether a futures contract relating to commodities is an "ordinary trust asset". Such a contract is not a tangible asset nor does it give the holder an interest in such an asset. Therefore, it is not an "ordinary trust asset".

---

18 Defined (after a fashion) in para 7(2): "In sub-paragraph (1)(a) "securities" has the same meaning as in section 132." In this section I use the word "securities" to include shares.

52.9.2 *Grant of lease*

RI 259 provides:

> **B8 What happens when money is borrowed to purchase the freehold interest of a property which is then rented on a commercial basis?**
> ... Under para 13(2) references to the transfer of an asset include references to anything that is a disposal, and under TCGA 1992 s 21(2) references to a disposal include references to a part disposal. Paragraph 13(3) provides that references to a transfer of an asset do not include the transfer of an asset which is created by the part disposal of another asset. The grant of a lease is a part disposal of the freehold interest and therefore the grant of a lease is a transfer of the freehold interest for the purposes of para 2(1)(b) and is not regarded as the transfer simply of the lease. If the freehold interest was bought with borrowed money it meets the test in para 2(4)(a), and the amount of value transferred equals the market value of the freehold.
> Assuming that there is outstanding trustee borrowing at "the material time", which is defined in para 2(2) as the time the transfer is effectively completed, it is then necessary to consider whether the transfer of value is linked with trustee borrowing. Under para 7 tangible property, and any interest in such property falls within the expression "ordinary trust assets". However the property concerned must under para 6(2)(b) either form part of the settled property immediately after the material time, or meet the alternative condition in para 8(1)(b) that it is represented by ordinary trust assets which form part of the settled property immediately after the material time. Paragraph 6(2)(b) and para 8(1)(b) may be looked at together. In this situation we say that the reversion to the lease is still part of the settled property, and the lease itself is represented by the right to the rental stream.
> Therefore where trustees borrow money to acquire the freehold interest in a property which is then let commercially and, at the material time, there are no outstanding trustee borrowings other than those which have been applied for normal trust purposes, Sch 4B does not apply. But the position will be different if at that moment there are outstanding trustee borrowings applied for other purposes.
> The same considerations apply where trustees acquire a long lease which is sublet, and where the asset in question is a chattel rather than land or buildings.

52.9.3 *Asset becoming valueless*

Para 8 Sch 4B TCGA provides:

(1) The alternative condition referred to in paragraph 6(2)(b) in relation to an asset which no longer forms part of the settled property is that—

(a) the asset is treated as having been disposed of by virtue of section 24(1), or

(b) one or more ordinary trust assets which taken together directly or indirectly represent the asset—

(i) form part of the settled property immediately after the material time, or

(ii) are treated as having been disposed of by virtue of section 24(1).

(2) Where there has been a part disposal of the asset, the condition in paragraph 6(2)(b) and the provisions of sub-paragraph (1) above may be applied in any combination in relation to the subject matter of the part disposal and what remains.

(3) References in this paragraph to an asset include part of an asset.

52.10 Normal trust purposes: Repayment of loan

Para 6(3) Sch 4B TCGA provides:

They are applied for normal trust purposes if—

(a) they are applied by the trustees in wholly or partly discharging a loan obligation of the trustees, and

(b) the whole of the proceeds of the borrowing connected with that obligation (or all but an insignificant amount) have been applied by the trustees for normal trust purposes.

52.11 Normal trust purposes: Payment of expenses

Para 6(4) Sch 4B TCGA provides:

They are applied for normal trust purposes if they are applied by the trustees in making payments to meet bona fide current expenses incurred by them in administering the settlement or any of the settled property.

RI 259 provides:

B5 Paragraph 6(4)—application of proceeds to meet current expenses

We have been asked whether trustee borrowings to meet payments on account or provision for future or past expenses are covered by the expression "current expenses". One circumstance in which borrowings are applied for "normal trust purposes" (para 6) is where they are applied by the trustees in making payments to meet bona fide current expenses incurred by them.

One may note that there are three tests to be met—

– The borrowings have been applied by the moment of the transfer of value (para 5(2)(b)(i)).
– They have been applied to meet bona fide "current expenses".
– The expenses are expenses of "administering" the settlement or any of the settled property.

In the case of borrowing to meet future expenses it is hard to see how the borrowings can be said to have been applied. But the time for making the test is not when the money is borrowed, but the time of the transfer of value (this is "the material time", as defined in para 2(2)). In the case of payments on account there would be the requisite application and the liability to pay would have been incurred.

We do not regard "current" as restricting qualification to expenditure which for accounting purposes must fall in the year of borrowing, but we should regard it as excluding borrowing to make a provision for future expenditure or to meet expenditure that was incurred long before but left unpaid. In general where contracts for repairs of an ordinary kind have been entered into, we should regard the expenditure anticipated under those contracts to be current expenses at the moment of borrowing. Where trustees as the owner or tenant of a flat are obliged by contract or under the terms of the lease to make payments into a common fund to meet future maintenance or repair expenditure this would be regarded as a current expense.

The expression "administering the settlement or any of the settled property" should be construed widely to cover not only those expenses properly chargeable to income, or which would be so chargeable but for express provisions of the trust deed, but also capital expenditure such as capital taxes in the UK or elsewhere, or legal costs of a reorganisation, in particular the costs of an application under the Variation of Trusts Act. Other capital expenditure would often be expenditure on the asset itself, and therefore qualify under para 6(2). Contributions to the day-to-day running costs of a nominee company controlled by the trustees would also qualify.

52.11.1 *Unproductive expenditure*

RI 259 provides:

B9 What happens when money is spent unproductively, for example on a planning application that fails?

Under para 6(2) there are three conditions that must be met by a payment in respect of "an ordinary trust asset" if it is to be regarded as applied for normal trust purposes. The third, in para 6(2)(c), is that the sum is allowable under TCGA 1992 s 38 (or would be but for s 17 or 39) as a

deduction in computing a gain accruing to the trustees on a disposal of the asset. If an application for planning permission fails, then when the land is actually sold the costs relating to the application are generally not allowable; this is because they are not "reflected in the state or nature of the asset at the time of the disposal". Paragraph 6(2)(c) however must be referring to a notional disposal not to a real one. In the context of para 6 we consider that the reference can only be to a notional disposal taking place at the time when the expenditure is incurred.
Although one could not lay down as a universal rule that the expenditure would always qualify, the test is whether the existence of the current application for planning permission is reflected in the state or nature of the asset at the time of the notional disposal.

52.12 Sch4B-disposal

Para 1(2) Sch 4B TCGA provides an outline:

> Where this Schedule applies the trustees are treated as disposing of and immediately reacquiring the whole or a proportion of each of the chargeable assets that continue to form part of the settled property (see paragraphs 10 to 13).

I refer to this as a **"Sch4B-disposal"**. Para 10 Sch 4B TCGA provides the details:

> (1) Where in accordance with this Schedule a transfer of value by trustees is treated as linked with trustee borrowing, the trustees are treated for all purposes of this Act—
>
> (a) as having at the material time[19] disposed of, and
>
> (b) as having immediately reacquired,
>
> the whole or a proportion (see paragraph 11) of each of the chargeable assets that form part of the settled property immediately after the material time ("the remaining chargeable assets").
>
> (2) The deemed disposal and reacquisition shall be taken—
>
> (a) to be for a consideration equal to the whole or, as the case may be, a proportion of the market value of each of those assets, and
>
> (b) to be under a bargain at arm's length.[20]

52.12.1 *Chargeable asset*

The key term here is "chargeable asset". Para 10(3) Sch 4B provides:

---

19 See 52.7.4 (The material time).

20 This deeming prevents hold-over relief (which might otherwise apply to a UK resident trust).

For the purposes of sub-paragraph (1) an asset is a chargeable asset if a gain on a disposal of the asset by the trustees at the material time would be a chargeable gain.

An offshore fund (within the OIG regime) is not a chargeable asset as no chargeable gain can arise on a disposal.

52.12.2 *The extent of the disposal*

Para 11 Sch 4B TCGA provides:

(1) This paragraph provides for determining whether the deemed disposal and reacquisition is of the whole or a proportion of each of the remaining chargeable assets.
(2) If the amount of value transferred—
(a) is less than the amount of outstanding trustee borrowing, and
(b) is also less than the effective value of the remaining chargeable assets,
the deemed disposal and reacquisition is of the proportion of each of the remaining chargeable assets given by:
VT÷EV
where—
VT is the amount of value transferred, and
EV is the effective value of the remaining chargeable assets.
(3) If the amount of value transferred—
(a) is not less than the amount of outstanding trustee borrowing, but
(b) is less than the effective value of the remaining chargeable assets,
the deemed disposal and reacquisition is of the proportion of each of the remaining chargeable assets given by:
TB÷EV
where—
TB is the amount of outstanding trustee borrowing, and
EV is the effective value of the remaining chargeable assets.
(4) In any other case the deemed disposal and reacquisition is of the whole of each of the remaining chargeable assets.
(5) For the purposes of this paragraph the effective value of the remaining chargeable assets means the aggregate market value of those assets reduced by so much of that value as is attributable to trustee borrowing.
(6) References in this paragraph to amounts or values, except in relation to the amount of value transferred, are to amounts or values immediately after the material time.

52.12.3 *HMRC example: part disposal*

RI 259 provides an example (I have slightly amended the layout for enhanced clarity):

> **B10 How should we compute the base cost of assets for future disposals?**
> ... Suppose that an asset cost £600, the trustees are treated as disposing of two thirds of the asset at the material time (paragraph 10(1)), and the respective values of two thirds and one third immediately after that time are £900 and £450.

HMRC compute the gain on the Sch4B-disposal:

Deemed Proceeds		900
Cost	[two thirds of 600]	-400
Gain		500

HMRC compute the base cost for a future disposal as:

Remaining original cost	600 – 400	200
Deemed Acquisition		900
Revised base cost		1100

52.13 Treatment of gain or loss arising on Sch4B-disposal

If a gain arises on Sch4B-disposal to a trust within s.86, the position is straightforward: the settlor is taxable on the gain.

If a loss arises on a sch4B disposal, it can in some cases be set against other gains of the trustees.

In the HMRC view, if a Sch4B-disposal is deliberately made to realise a loss, the loss is disallowed under s.16A TCGA.[21] CG Manual Appendix 9 provides:

> **Example 18 - trustees make a deliberate transfer of value** [February 2010]
> 1. A body of trustees who fall within the terms of Schedule 4B have outstanding borrowing which has not been used for trust purposes (Schedule 4B is a measure introduced to discourage trustees avoiding capital gains tax by incurring debt and advancing funds from the settlement). The trustees intentionally make a transfer of value which triggers off a charge under Schedule 4B, and as they expect this

21 See 54.13 (Inter-spouse transfer) for a more detailed discussion.

> transaction results in a capital loss. The trustees have realised chargeable gains in the same year, and claim to set the loss against those gains.
> 2. It is necessary to look at the arrangements which have been entered into by the trustees to determine whether these have been entered into with a main purpose of securing a tax advantage. There are arrangements in this case, so the question is whether or not those arrangements were entered into with a main purpose of securing a tax advantage, and to decide this it is necessary to take account of all the circumstances surrounding the transactions. It will be relevant to consider what the trustees' overall economic objective was, and whether that objective is being fulfilled in a straightforward way, or whether additional, complex or costly steps have been inserted. It is significant that Schedule 4B is itself anti-avoidance legislation, intended to counter avoidance of tax on gains by contrived arrangements between settlements. The fact that the trustees have deliberately triggered the operation of the schedule is an indicator that one of their main purposes was to secure the advantage of the capital loss. In such a case, the TAAR [s.16A TCGA] will apply and the loss will not be an allowable loss.

52.14 Schedule 4C: Introduction

A Sch4B-disposal takes a trust from the ordinary s.87 regime to the more complicated rules which I call **"the sch 4C s.87 regime"**.

Section 85A(1) TCGA provides:

> (1) Schedule 4C to this Act has effect with respect to the attribution of gains to beneficiaries where there has been a transfer of value to which Schedule 4B applies.
> (2) Sections 86A to 95 have effect subject to the provisions of Schedule 4C.

Para 1(1) Sch 4C TCGA makes the same point:

> This Schedule applies where the trustees of a settlement ("the transferor settlement") make a transfer of value to which Schedule 4B applies ("the original transfer")....

Thus, The sch 4C s.87 regime applies if the trustees make a Sch4B-transfer which is linked to trustee borrowing.[22]

The Sch4B-transfer is called "the original transfer". For clarity I refer to it as **"the original Sch4B-transfer"**.

---

22 See 52.3 (The key conditions).

For completeness, para 1(1) Sch 4C TCGA provides:

> References in this Schedule to a transfer to which Schedule 4B applies include any such transfer, whether or not any chargeable gain or allowable loss accrues under that Schedule by virtue of the transfer.

52.15 Sch4C pool

Para 1 Sch 4C TCGA provides:

> (2) The transferor settlement is regarded for the purposes of this Schedule as having a "Schedule 4C pool".

I abbreviate this to **"Sch4C pool"**.

> (3) The Schedule 4C pool contains the section 2(2) amounts for the settlement that are outstanding at the end of the tax year in which the original [Sch 4B-]transfer is made (see paragraph 1A).

Trust gains accruing in the years after the original Sch4B-transfer do not go into the Sch4C pool (unless there is another Sch4B-transfer). They go into the s.87 trust gain pool.

52.15.1 *"Outstanding section 2(2) amounts"*

We need to ascertain "the section 2(2) amounts for the settlement that are outstanding" at the end of the tax year when the Sch4B-transfer is made.

Para 1A(1) Sch 4C TCGA provides:

> The following steps are to be taken for the purpose of calculating the section 2(2) amounts for a settlement that are outstanding at the end of a tax year ("the relevant tax year").

Step 1 provides a commonsense starting point:

> *Step 1* Find the section 2(2) amount for the settlement for the relevant tax year and earlier tax years, as reduced under section 87A [matching] as it applies for the relevant tax year and earlier tax years....

See 51.5 (Section 2(2) amount).

So far the rules are the same as for the s.87 trust gain pool.

52.15.2 *Transfer between trusts in or before year of Sch4B-transfer*

Para 1A(2) Sch4C TCGA deals with the special case of transfers between settlements:

> For the purposes of Step 1 of sub-paragraph (1) take into account the

> effect of section 90 in relation to any transfer of settled property from or to the trustees of the settlement made in or before the relevant tax year.

Section 90 TCGA does not apply to a Sch4B-transfer, but it would apply if there had been an earlier transfer between trusts which was not a Sch4B-transfer.[23]

So far the rules are still the same as for the s.87 trust gain pool.

52.15.3 *Capital payment to non-resident beneficiary: Effect on Sch4C pool*

Para 1A(1) Sch 4C TCGA provides:

> *Step 2* This Step applies if, by virtue of the matching of the section 2(2) amount for the settlement for a tax year ("the applicable year") with a capital payment, chargeable gains are treated under section 87 or 89(2) as accruing in the relevant tax year to a beneficiary who is not chargeable to tax for that year.
> Increase the section 2(2) amount for the applicable year (found under Step 1) by the amount of the chargeable gains.
> ...
> (3) For the purposes of this Schedule a beneficiary is "chargeable to tax" for a tax year if, as respects that year, the beneficiary meets the residence condition set out in section 2(1A).[24]

Thus capital payments to non-residents which reduce the s.87 trust gain pool[25] are added back to the Sch4C pool. Effectively such payments do not take trust gains out of the Sch4C pool.

The capital payments which are disallowed are those which are matched to s.87 gains accruing in the "relevant tax year". That is, I think, the year of the Sch4B-disposal.

This is consistent with the disallowance of payments to non-residents made out of the sch4C pool.

52.16 "Schedule 4B trust gains"

52.16.1 *Adding Sch4B trust gains to the Sch4C pool*

Section 85A(3) TCGA provides:

> [a] When calculating the section 2(2) amount for a settlement for a tax

---

23 See 51.18.4 (Interaction with schedule 4B).

24 See 49.1.2 (CGT residence condition).

25 See 51.34.3 (Mixed UK and foreign beneficiaries: simple capital payments).

> year (within the meaning of section 87), no account is to be taken of any chargeable gains or allowable losses accruing by virtue of Schedule 4B.
> [b] Nothing in this subsection affects any increase in a section 2(2) amount by virtue of paragraph 1(3A) or 7B(2)(b)[26] of Schedule 4C.

When computing the s.2(2) amount (trust gains), s.85A(3)[a] says that one disregards gains on the Sch4B-disposal. Then para 1A(3A) Sch 4C TCGA (flagged by s.85A(3)[b]) puts them back in, though in a remarkably complex manner:

> The section 2(2) amount for that tax year is increased by—
> (a) the amount of Schedule 4B trust gains accruing by virtue of the original [Sch 4B-]transfer (see paragraphs 3 to 7), and
> (b) the total amount of any further Schedule 4B trust gains accruing by virtue of any further transfers of value to which that Schedule applies that are made by the trustees in that tax year.

The key term here is "Sch 4B trust gains". This term is artificially defined: it does not mean the gains accruing on the Sch4B-disposal. For clarity, I write the expression with scare quotation marks.

52.16.2 *Meaning of "sch 4B trust gains"*

Para 3 Sch 4C TCGA provides:

> (1) This paragraph explains what is meant for the purposes of this Schedule by "Schedule 4B trust gains".
> (2) The Schedule 4B trust gains are computed in relation to each transfer of value to which that Schedule applies.
> (3) In relation to a transfer of value the amount of the Schedule 4B trust gains for the purposes of this Schedule is given by—
> CA – SG – AL ...

In short:
CA is **C**hargeable **A**mount
SG is the **S**ettlor's **G**ains
AL is **A**llowable **L**osses

Each of these terms is elaborately defined. Para 3(3) continues with an outline:

---

26 See 52.18 (Subsequent Sch4B-disposal).

CA is the chargeable amount computed under paragraph 4 or 5 below,
SG is the amount of any gains attributed to the settlor that fall to be deducted under paragraph 6 below, and
AL is the amount of any allowable losses that may be deducted under paragraph 7 below.

52.16.3 *Chargeable amount: Non-resident trust*

Para 4 Sch 4C TCGA provides:

(1) If the transfer of value is made in a year of assessment during which the trustees of the transferor settlement are at no time resident in the UK the chargeable amount is computed under this paragraph.
(2) Where this paragraph applies the chargeable amount is the amount on which the trustees would have been chargeable to tax under section 2(2) by virtue of Schedule 4B if they had been resident in the UK in the year (and had made the disposals which Schedule 4B treats them as having made).

The wording is based on the s.87 definition of s.2(2) amount.[27]

52.16.4 *Chargeable amount: Dual resident trust*

Para 5 Sch 4C TCGA provides:

(1) If the transfer of value is made in a year of assessment where—
(a) the trustees of the transferor settlement are resident in the UK during any part of the year, and
(b) at any time of such residence they fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK,
the chargeable amount is computed under this paragraph.
(2) Where this paragraph applies the chargeable amount is the lesser of—
(a) the amount on which the trustees would be chargeable to tax under section 2(2) by virtue of Schedule 4B on the assumption that the double taxation relief arrangements did not apply (and the disposals which Schedule 4B treats them as having made were made), and
(b) the amount on which the trustees would be so chargeable to tax by virtue of disposals of protected assets.

27 See 51.5 (Section 2(2) amount).

> (3) For this purpose "protected assets" has the meaning given by section 88(4).

The wording is based on the s.87 rules for dual resident trusts.[28]

52.16.5 *Settlor's gains*

Para 6(1) Sch 4C TCGA provides:

> For the purposes of this Schedule the chargeable amount in relation to a transfer of value shall be reduced by the amount of any chargeable gains arising by virtue of that transfer of value that—
> (a) are by virtue of section 86(4) treated as accruing to the settlor,

The wording is based on the s.87 rules.[29] Para 6(1)(b) deals with the temporary non-resident rules:

> or
> (b) where section 10A applies, are treated by virtue of that section (as it has effect subject to paragraph 12 below) as accruing to the settlor in the period of return.

For the s.87 equivalent rules, see 52.22.1 (Trust within s.86 TCGA).

52.16.6 *Losses of trust within s.86*

Para 6(2) Sch 4C TCGA provides:

> In determining for the purposes of sub-paragraph (1)(a) the amount of chargeable gains arising by virtue of a transfer of value that are treated as accruing to the settlor, there shall be disregarded any losses which arise otherwise than by virtue of Schedule 4B.

This applies where a trust within s.86 has losses and then realises gains on a Sch4B-disposal. The losses are set against the gains, so those gains are treated as accruing to the settlor. This provision is needed to ensure that those gains are not added to the Sch4C pool.

52.16.7 *Losses accruing on Sch4B-disposal*

Para 7 Sch 4C TCGA provides:

---

28 See 51.17 (Dual resident trust - s.88 TCGA).
29 See 51.5 (Section 2(2) amount).

> (1) An allowable loss arising under Schedule 4B in relation to a transfer of value by the trustees of a settlement may be taken into account in accordance with this paragraph to reduce for the purposes of this Schedule the chargeable amount in relation to another transfer of value by those trustees.
> (2) Any such allowable loss goes first to reduce chargeable amounts arising from other transfers of value made in the same year of assessment.
> If there is more than one chargeable amount and the aggregate amount of the allowable losses is less than the aggregate of the chargeable amounts, each of the chargeable amounts is reduced proportionately.
> (3) If in any year of assessment the aggregate amount of the allowable losses exceeds the aggregate of the chargeable amounts, the excess shall be carried forward to the next year of assessment and treated for the purposes of this paragraph as if it were an allowable loss arising in relation to a transfer of value made in that year.
> (4) Any reduction of a chargeable amount under this paragraph is made after any deduction under paragraph 6.

52.17 Restrictions on use of losses

It is necessary to distinguish between losses accruing on a Sch4B-disposal and other losses accruing to trustees.

Section 85A(3) TCGA provides:

> When calculating the section 2(2) amount for a settlement for a tax year (within the meaning of section 87), no account is to be taken of any chargeable gains or allowable losses accruing by virtue of Schedule 4B....

Thus losses on a Sch4B-disposal cannot be set against gains in computing the s.2(2) amount for s.87 purposes.

Section 85A(4) TCGA provides:

> No account shall be taken of any chargeable gains or allowable losses to which sections 87 to 89 apply in computing the gains or losses accruing by virtue of Schedule 4B.

Thus losses on a non-Sch4B-disposal cannot be set against gains accruing on a Sch4B-disposal, in computing the sch4C pool.

I cannot see the reason for these rules, but complication was not of concern to the drafter of sch4C, who clearly regarded loss relief with suspicion.

52.18 Subsequent Sch4B-disposal

Para 7B Sch 4C TCGA provides:

> (1) This paragraph applies if the trustees of the transferor settlement make a further transfer of value to which Schedule 4B applies in a tax year ("the year of the transfer") after the tax year mentioned in paragraph 1(3).[30]
> (2) If the settlement has a Schedule 4C pool at the beginning of the year of the transfer—
>
> (a) the section 2(2) amounts in the Schedule 4C pool are increased by the section 2(2) amounts for the settlement that are outstanding at the end of the year of the transfer, and
> (b) the section 2(2) amount in the pool for the year of transfer is increased (or further increased) by the amount of Schedule 4B trust gains accruing by virtue of the further transfer.
>
> (3) If the settlement does not have a Schedule 4C pool at the beginning of the year of the transfer, this Schedule applies in relation to the further transfer as it applied in relation to the original [Sch 4B-]transfer.
> (4) For the purposes of this paragraph a settlement has a Schedule 4C pool until the end of the tax year in which all section 2(2) amounts in the pool have been reduced to nil.

52.19 Attribution of Sch4C pool gains to beneficiaries

52.19.1 *Exclusion of standard s.87 regime*

Section 85A(2A) TCGA provides:

> For the purposes of sections 87 to 89, no account is to be taken of any section 2(2) amount in a Schedule 4C pool (see paragraph 1 of Schedule 4C).

I refer to the s.2(2) amounts in a Sch 4C pool as **"Sch4C pool gains"**. This provision takes Sch4C pool gains out of the standard s.87 regime. Instead they fall within what I call **"the Sch4C s.87 regime"**.

Trustees therefore need to keep two sets of computations:

(1) a computation of the s.2(2) amounts (trust gains) for the standard s.87 regime; and
(2) a computation of Sch4C pool gains.

---

30 "The tax year mentioned in para 1(3)" (sch 4C TCGA) is the tax year in which the original Sch 4B-transfer is made; see 52.15 (Schedule 4C pool).

52.19.2 *Schedule 4C s.87 regime*

Para 8 Sch 4C TCGA[31] provides:

> (1) Chargeable gains are treated as accruing in a tax year ("the relevant tax year") to a beneficiary who has received a capital payment from the trustees of a relevant settlement in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under section 87A as it applies for the relevant tax year) with the section 2(2) amount in the Schedule 4C pool for the relevant tax year or any earlier tax year.

This is best understood by comparing it with the usual s.87 rule. Section 87(2) provides (highlighting the changes):

> (2) Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement who has received a capital payment from the trustees ~~of a relevant settlement~~ in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under section 87A as it applies for the relevant tax year) with the section 2(2) amount ~~in the Schedule 4C pool~~ for the relevant tax year or any earlier tax year.

Para 8 continues:

> (2) The amount of chargeable gains treated as accruing is equal to—
>
> (a) the amount of the capital payment, or
>
> (b) if only part of the capital payment is matched, the amount of that part.

This is the schedule 4C equivalent of s.87(3) TCGA.

> (3) Section 87A applies for a tax year for the purposes of matching capital payments received from the trustees of a relevant settlement with section 2(2) amounts in the Schedule 4C pool as if—
>
> (a) references to section 2(2) amounts were to section 2(2) amounts in the Schedule 4C pool,
>
> (b) references to a capital payment received from the trustees by a beneficiary were to a capital payment received from the trustees of a relevant settlement by a beneficiary who is chargeable to tax for that year, and
>
> (c) for section 87A(3)(b) there were substituted—
>
> "(b) all section 2(2) amounts in the Schedule 4C pool have

---

31 Flagged (somewhat unnecessarily) in para 1(4): "Paragraphs 8 to 9 provide for the attribution of gains in a settlement's Schedule 4C pool."

been reduced to nil."

Amended as para 8 directs, s.87A provides:

(1) This section supplements s.87.

(2) The following steps are to be taken for the purposes of matching capital payments with s.2(2) amounts in the Schedule 4C pool.

Step 1

Find the s.2(2) amount in the Schedule 4C pool for the relevant tax year.

Step 2

Find the total amount of capital payments received by the beneficiaries who are chargeable to tax for that year from the trustees of a relevant settlement in the relevant tax year.

Step 3

The s.2(2) amount in the Schedule 4C pool for the relevant tax year is matched with—

(a) if the total amount of capital payments received in the relevant tax year does not exceed the s.2(2) amount in the Schedule 4C pool for the relevant tax year, each capital payment so received by the beneficiaries who are chargeable to tax for that year from the trustees of a relevant settlement, and

(b) otherwise, the relevant proportion of each of those capital payments.

"The relevant proportion" is the s.2(2) amount in the Schedule 4C pool for the relevant tax year divided by the total amount of capital payments received in the relevant tax year.

Step 4

[1] If para (a) of Step 3 applies—

(a) reduce the s.2(2) amount in the Schedule 4C pool for the relevant tax year by the total amount of capital payments referred to there, and

(b) reduce the amount of those capital payments to nil.

[2] If para (b) of that Step applies—

(a) reduce the s.2(2) amount in the Schedule 4C pool for the relevant tax year to nil, and

(b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

Step 5

[1] Start again at Step 1 (unless subs.(3) applies).

[2] If the s.2(2) amount in the Schedule 4C pool for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—

(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

(3) This subsection applies if—

(a) all of the capital payments received by beneficiaries who are chargeable to tax for that year from the trustees of a relevant settlement in the relevant tax year or any earlier tax year have been reduced to nil, or

(b) all section 2(2) amounts in the Schedule 4C pool have been reduced to nil. ~~the section 2(2) amounts for the relevant tax year and all earlier tax years have been reduced to nil~~.

(4) The effect of any reduction under Step 4 of subsection (2) is to be taken into account in any subsequent application of this section.

Para 1A(3) Sch 4C TCGA defines "chargeable to tax":

> For the purposes of this Schedule a beneficiary is "chargeable to tax" for a tax year if, as respects that year, the beneficiary meets the residence condition set out in section 2(1A).

An important difference between the Sch4C s.87 regime and the standard s.87 regime is that capital payments to non-resident beneficiaries do not reduce the sch4C pool. I can see no reason for that. The rule is not needed for the flip-flop schemes at which Schedule 4C was addressed. Perhaps it just reflects a desire to impose harsher rules following a Sch4B-disposal, based on the mistaken view that a Sch4B-disposal only arises in cases of tax avoidance.

52.19.3 *Priority between Sch 4C s.87 regime and standard s.87 regime*

Para 8(4) Sch 4C provides:

> Section 87A applies for a tax year by virtue of this paragraph before it applies for that year otherwise than by virtue of this paragraph; but this is subject to sub-paragraph (5).

Thus the Sch4C s.87 regime has priority.

52.19.4 *Priority between OIG Sch 4C and CGT Sch 4C*

Para 8(5) Sch 4C provides:

> If section 87A applies for a tax year by virtue of section 762(3) of the Taxes Act[32] (offshore income gains), it applies for that year by virtue of that provision before it applies for that year by virtue of this paragraph.

---

32 The reference to ICTA is obsolete. However the legislation still works, because the continuity of law provisions in (for example) para 5 Sch 2 CTA 2010 require old references to take effect as references to the rewritten provisions.

52.20 "Relevant settlement"

"Relevant settlement" matters because a capital payment from any relevant settlement falls within sch 4C.

Para 8A Sch 4C TCGA provides:

> (1) This paragraph specifies what settlements are relevant settlements in relation to a Schedule 4C pool.
> (2) The transferor and transferee settlements in relation to the original [Sch 4B-]transfer of value are relevant settlements.
> (3) If the trustees of any settlement that is a relevant settlement in relation to a Schedule 4C pool—
> (a) make a transfer of value to which Schedule 4B applies, or
> (b) make a transfer of settled property to which section 90 applies,
> any settlement that is a transferee settlement in relation to that transfer is also a relevant settlement in relation to that pool.
> (4) If the trustees of a settlement that is a relevant settlement in relation to a Schedule 4C pool make a transfer of value to which Schedule 4B applies, any other settlement that is a relevant settlement in relation to that pool is also a relevant settlement in relation to the Schedule 4C pool arising from the further transfer.

Para 14(2) Sch 4C TCGA defines "Transferor" and "transferee settlement":

> In this Schedule, in relation to a transfer of value—
> (a) references to the transferor settlement are to the settlement the trustees of which made the transfer of value; and
> (b) references to a transferee settlement are to any settlement of which the settled property includes property representing, directly or indirectly, the proceeds of the transfer of value.

52.20.1 *Disregard of certain capital payments*

Para 9 Sch 4C TCGA provides:

> (1) For the purposes of paragraph 8 (and section 87A as it applies for the purposes of that paragraph), no account is to be taken of a capital payment to which any of sub-paragraphs (2) to (4) applies (or a part of a capital payment to which sub-paragraph (4) applies).

There are three disregards:

> (2) This sub-paragraph applies to a capital payment received before the tax year preceding the tax year in which the original [Sch 4B-]transfer is made.

That is relatively straightforward.

> (3) This sub-paragraph applies to a capital payment that—
>
> (a) is received by a beneficiary of a settlement from the trustees in a tax year during the whole of which the trustees—
>
> (i) are resident in the UK, and
>
> (ii) are not Treaty non-resident,
>
> (b) was made before any transfer of value to which Schedule 4B applies was made, and
>
> (c) was not made in anticipation of the making of any such transfer of value or of chargeable gains accruing under that Schedule.

This must be the rare case of a UK trust within the s.87 regime.

> (4) This sub-paragraph applies to a capital payment if (and to the extent that) it is received (or treated as received) in a tax year from the trustees by a company that—
>
> (a) is not resident in the UK in that year, and
>
> (b) would be a close company if it were resident in the UK,
>
> (and is not treated under any of subsections (3) to (5) of section 96 as received by another person).

This is the sch4C equivalent of s.87C TCGA: see 51.9.4 (Disregard of capital payments to companies).

52.20.2 *Residence of trustees from whom capital payment received*

Para 10(1) Sch 4C TCGA provides:

> Subject to paragraph 9(3), it is immaterial for the purposes of paragraph 8 that the trustees of any relevant settlement are or have at any time been resident in the UK.

Why is this needed?

52.21 Remittance basis

Para 8AA Sch 4C TCGA provides:

> Section 87B (remittance basis) applies in relation to chargeable gains treated under paragraph 8 as accruing as it applies in relation to chargeable gains treated under section 87 as accruing.

This incorporates the s.87 remittance basis.[33]

---

33 See 51.15 (Section 87 remittance basis).

52.22 Temporary non-resident beneficiaries

52.22.1 *Trust within s.86 TCGA*

Para 12 Sch 4C TCGA provides:

(1) This paragraph applies if—

(a) by virtue of section 10A, an amount of chargeable gains within section 86(1)(e) that accrued in a tax year ("year A") to the trustees of a settlement would be treated as accruing to a person ("the settlor") in the period of return, and

(b) after paragraph 8 has applied for the year of return, the section 2(2) amount for year A that is in the Schedule 4C pool for the settlement is less than the amount mentioned in paragraph (a).

(2) The amount of chargeable gains treated as mentioned in sub-paragraph (1)(a) as accruing to the settlor in the period of return is limited to the section 2(2) amount referred to in sub-paragraph (1)(b).

(4) Where the property comprised in the transferor settlement has at any time included property not originating from the settlor, only so much (if any) of any capital payment taken into account for the purposes of paragraph 8 above as, on a just and reasonable apportionment, is properly referable to property originating from the settlor shall be taken into account in computing the amount charged to beneficiaries.

(5) Expressions used in this paragraph and section 10A have the same meanings in this paragraph as in that section; and paragraph 8 of Schedule 5 shall apply for the construction of the references in sub-paragraph (4) above to property originating from the settlor as it applies for the purposes of that Schedule.

52.22.2 *Trust within s.87*

Para 12A Sch 4C TCGA provides:

(1) This paragraph applies where by virtue of section 10A an amount of gains would (apart from this Schedule) be treated under section 87 as accruing to a person ("the beneficiary") in the period of return by virtue of a capital payment made to him in the temporary period of non-residence.

(2) Where this paragraph applies, a capital payment equal to so much of that capital payment as exceeds the amount otherwise charged shall be deemed for the purposes of this Schedule to be made to the beneficiary in the year of return.

(3) The "amount otherwise charged" means the total of any chargeable gains attributed to the beneficiary under section 87(2) or 89(2) by virtue

of the capital payment.
(4) For the purposes of paragraph 13(5)(b) a deemed capital payment under this paragraph shall be treated as made when the actual capital payment mentioned in sub-paragraph (1) above was made.
(5) Expressions used in this paragraph and section 10A have the same meanings in this paragraph as in that section.

52.23 Interest supplement

Para 13 Sch 4C TCGA provides:

(1) This paragraph applies if—
(a) chargeable gains are treated under paragraph 8 as accruing to a beneficiary by virtue of the matching (under section 87A) of all or part of a capital payment with the section 2(2) amount for a tax year ("the relevant tax year"), and
(b) the beneficiary is charged to tax by virtue of the matching.

(1A) Where part of a capital payment is matched, references in sub-paragraphs (2) and (3) to the capital payment are to the part matched.
(2) The tax payable by the beneficiary in respect of the payment shall be increased by the amount found under sub-paragraph (3) below, except that it shall not be increased beyond the amount of the payment; and an assessment may charge tax accordingly.
(3) The amount is one equal to the interest that would be yielded if an amount equal to the tax which would be payable by the beneficiary in respect of the payment (apart from this paragraph) carried interest for the chargeable period at the specified rate.
The "specified rate" means the rate for the time being specified in section 91(3).
(4) The chargeable period is the period which—
(a) begins with the later of the 2 days specified in sub-paragraph (5) below, and
(b) ends with 30th November in the year of assessment following that in which the capital payment is made.
(5) The 2 days are—
(a) 1st December in the tax year immediately after the relevant tax year, and
(b) 1st December falling 6 years before 1st December in the year of assessment following that in which the capital payment is made.

This is the Sch4C equivalent of the s.87 interest surcharge rules: see 51.13 (Interest surcharge).

52.24 Settlement ceasing to exist after Sch4B-disposal

Para 13A Sch 4C TCGA provides:

> Where a settlement ceases to exist after the trustees have made a transfer of value to which Schedule 4B applies, this Schedule has effect as if a year of assessment had ended immediately before the settlement ceased to exist.

Why is this needed?

52.25 Definitions

There are different sets of definitions for sch 4B and sch 4C.

52.25.1 *"Assets"*

Para 13(1) Sch 4B TCGA provides:

> In this Schedule any reference to an asset includes money expressed in sterling.
> References to the value or market value of such an asset are to its amount.

52.25.2 *"Transfer"*

Para 13 Sch 4B TCGA provides:

> (2) Subject to sub-paragraph (3), references in this Schedule to the transfer of an asset include anything that is or is treated as a disposal of the asset for the purposes of this Act, or would be if sub-paragraph (1) above applied generally for the purposes of this Act.
> (3) References in this Schedule to a transfer of an asset do not include a transfer of an asset that is created by the part disposal of another asset.

52.25.3 *"Settlement" and "trustee"*

"Settlement" in sch 4C means settlement-arrangement (and "trustee" has a similarly extended meaning).[34] Whereas "settlement" in sch 4B has the CGT/IT definition. This reflects the difference between s.87 and s.86.[35] But sch 4C only applies if the trustees make a Sch4B-disposal,[36] so sch 4C can only apply where there is a settlement within the CGT/IT meaning.

---

34 See 51.2 ("Settlement" and "trustee").
35 See 50.3.1 ("Settlement" and "settlor").
36 See 52.14 (Schedule 4C: the key condition).

52.25.4 *Misc schedule 4C definitions*

Para 14(1) Sch 4C TCGA provides:

> In this Schedule—
> (a) "transfer of value" has the same meaning as in Schedule 4B; and
> (b) references to the time at which a transfer of value was made are to the time which is the material time for the purposes of that Schedule.

52.25.5 *"Beneficiaries"*

Para 14 Sch 4C TCGA provides:

> (3) References in this Schedule to beneficiaries of a settlement include—
> (a) persons who have ceased to be beneficiaries by the time the chargeable gains accrue, and
> (b) persons who were beneficiaries of the settlement before it ceased to exist,
> but who were beneficiaries of the settlement at a time in a previous year of assessment when a capital payment was made to them.

52.26 Schedule 4B & 4C: Scenarios and HMRC worked example

Suppose:
(1) The settlor lends to a trust.[37]
(2) The trust repays the loan.
The trust does not make a sch4B-transfer, so it does not make a sch4B-disposal, and sch 4C does not apply.

Suppose:
(1) The settlor lends to a trust ("trust 1").
(2) The settlor assigns the debt to another trust ("trust 2").
(3) Trust 1 repays the loan to trust 2.
(4) Trust 2 makes a payment to the settlor.
Trust 1 does not make a sch4B-transfer, so it does not make a sch4B-disposal.
Trust 2 does not borrow, so it also does not make a sch4B-disposal.

Suppose:
(1) The settlor lends to a trust

---

37 I refer for simplicity to the trust, though it would be more correct to refer to the trustees of the trust.

(2) The trustees lend to an underlying company

Schedule 4B and 4C apply.

Suppose:

(1) The settlor gives to a trust ("trust 1").

(2) Trust 1 lends to trust 2.

(3) Trust 2 transfers an asset to the settlor.

Trust 1 does not borrow, so it does not make a sch4B-disposal.

Trust 2 does make a sch4B-disposal. But trust 1 is not a relevant settlement.

52.26.1 *HMRC example*

HMRC s.87 guidance provides:

Example 30 – Paragraphs 138 & 139 Schedule 7 – New last in first out (LIFO) rules for allocating capital payments against gains in post 5 April 2008 Schedule 4C pools. Application of remittance basis to gains treated as accruing to beneficiaries who are non-UK domiciled remittance basis users.

A Schedule 4C TCGA pool of gains was created in 2008-09 as a result of a transfer of value linked with trustee borrowing. The transfer was between two non-UK resident settlements. The Schedule 4C TCGA pool consists of the following gains:

2004-05	Trustees' gains (section 2(2) amount)	£20,000
2005-06	Trustees' gains (section 2(2) amount)	£30,000
2008-09	Trustees' gains (section 2(2) amount) on transfer	£35,000

No capital payments have been made out of either settlement prior to 2009-10. The following capital payments are made subsequently out of the transferee settlement:

2009-10	Payment to non-UK resident and non-UK domiciled beneficiary	£90,000
2010-11	Payment to UK resident but non-UK domiciled beneficiary	£21,000
2010-11	Payment to UK resident and domiciled beneficiary	£42,000

The 2009-10 £90,000 capital payment to a non-UK resident and non-UK domiciled beneficiary is not matched with any of the gains (section 2(2) amounts) in the post 6 April 2008 Schedule 4C TCGA pool. This comes from the wording of the new paragraph 8(3)(b) Schedule 4C TCGA. The capital payment is still available to carry forward to be matched with future gains under section 87 or 89(2) TCGA.

The 2010-11 capital payments total £63,000 (£21,000 + £42,000). As this is less than the £85,000 gains in the post 6 April 2008 Schedule 4C TCGA pool then all the capital payments can be matched. The restriction that does not allow capital payments to a UK resident but non-UK domiciled beneficiary to be matched with gains in a pre 6 April 2008 Schedule 4C TCGA pool does not apply to a post 5 April 2008 Schedule 4C TCGA pool.

The new last in first out (LIFO) rules for matching capital payments with gains in the post 5 April 2008 Schedule 4C TCGA pool apply. These are applied by paragraph 138 Schedule 7 which introduces a new paragraph 8 Schedule 4C TCGA which applies the LIFO rules in section 87A TCGA.

So we look first at the latest gain (section 2(2) amount) in the post 5 April 2008 Schedule 4C TCGA pool. That is the 2008-09 gain of £35,000. This is all matched with capital

payments. Gains of £11,667 (£35,000 × £21,000 / [£21,000 + £42,000]) are attributed to the UK resident but non-UK domiciled beneficiary in 2010-11. Gains of £23,333 (£35,000 × £42,000 / [£21,000 + £42,000]) are attributed to the UK resident and domiciled beneficiary in 2010-11.

Next we look at the 2005-06 gain (section 2(2) amount) of £30,000. There are only capital payments left of £28,000 (£63,000 - £35,000) to match with this. Gains of £9,333 (£28,000 × £21,000 / [£21,000 + £42,000]) are attributed to the UK resident but non-UK domiciled beneficiary in 2010-11. Gains of £18,667 (£28,000 × £42,000 / [£21,000 + £42,000]) are attributed to the UK resident and domiciled beneficiary in 2010-11.

What remains in the post 5 April 2008 Schedule 4C TCGA pool are

2004-05	Trustees' gains (section 2(2) amount)	£20,000
2005-06	Trustees' gains (section 2(2) amount)	£2,000

The UK resident and domiciled beneficiary has attributed to them gains of £42,000 (£23,333 + £18,667). These are all chargeable to tax on the beneficiary for 2010-11.

The UK resident but non-UK domiciled beneficiary has attributed to them gains of £21,000 (£11,667 + £9,333). £9,333 of these are not chargeable to tax because they result from a matching with trustees' gains (section 2(2) amount) of a year before 2008-09 – paragraph 150 Schedule 7. The remaining £11,667 are chargeable to tax on the beneficiary in 2010-11 subject to the remittance basis. Paragraph 139 Schedule 7 introduces a new paragraph 8AA Schedule 4C TCGA which applies the section 87B remittance basis rules.

52.27 OIG sch 4C

Regulation 20(3) OFTR incorporates Sch 4C TCGA rules. So far as relevant, this provides:

> ... Schedule 4C to, TCGA 1992 apply in relation to OIG amounts as if—
>
> (a) references to section 2(2) amounts (except those in paragraph 7B(2)(b) and (4) of Schedule 4C) were to OIG amounts,
>
> (b) references to chargeable gains (except the one in paragraph 1(5) of Schedule 4C) were to offshore income gains,
>
> (c) references to anything accruing were to it arising[38] (and similar references, except the one in paragraph 1(5) of Schedule 4C, were read accordingly),
>
> (d) ... paragraphs 1(3A), 3 to 7 and 12 of Schedule 4C were omitted ...

For the application of s.87-98 TCGA to OIGs, see 35.13 (OIG s.87 charge).

It is necessary to distinguish the CGT sch 4C rules and the OIG sch 4C

38 The terminology of the Taxes Acts is that CGT chargeable gains *accrue;* but OIGs *arise*. There is no difference in meaning so it seems somewhat pedantic to make the change of terminology when incorporating Sch 4C for OIGs; but it does no harm.

rules because the rules are not identical. It might be helpful to use the following terminology:

(1) "**CGT sch 4C**", the provisions of sch 4C TCGA.

(2) "**OIG sch 4C**", the provisions of sch4C as amended, which apply when the trust has "**OIG amounts**".

The omission of para 1(3A) and paras 3-7 Sch 4C makes sense as sch 4B does not apply to OIGs. It would have been logical to omit para 7B; instead the drafter neutralises it by not amending references to it.

The omission of para 12 Sch 4C makes sense, as s.86 TCGA does not apply to OIGs.

52.28 2008 transitional rules for Sch 4C

HMRC s.87 guidance provides:

123. Schedule 4C pools created before 6 April 2008 are dealt with differently from those created after 5 April 2008. In broad terms Schedule 4C pools created before 6 April 2008 continue to be dealt with under Schedule 4C as it applied before Schedule 7 changes – paragraph 152 of Schedule 7. See example 28. It is not possible for post 5 April 2008 trust gains to be added to a pre 6 April 2008 Schedule 4C pool.

124. There are ordering rules for matching capital payments made after 5 April 2008. They are matched in the following order under paragraph 155 of Schedule 7: See example 29.

• First against gains in a Schedule 4C pool created after 5 April 2008

• Second against gains in a Schedule 4C pool created before 6 April 2008

• Third against gains not in a Schedule 4C pool

125. Where capital payments are matched against gains in a Schedule 4C pool created before 6 April 2008 earlier gains continue to be matched with earlier capital payments. In other words FIFO (first in, first out) rules continue to apply rather than the general new LIFO (last in, first out) rules. This is relevant for calculating the "increase in tax" charge under paragraph 13 of Schedule 4C.

Example 28 – Paragraph 152 of Schedule 7 – Pre 6 April 2008 Schedule 4C TCGA pool – Capital payments made post 5 April 2008 to UK domiciled and non-UK domiciled beneficiaries

A Schedule 4C TCGA pool of gains was created in 2006-07 as a result of a transfer of value linked with trustee borrowing. The transfer was between two non-UK resident settlements. The Schedule 4C TCGA pool consists of the following gains:

2004-05	Trustees' gains (section 2(2) amount)	£20,000
2005-06	Trustees' gains (section 2(2) amount)	£30,000
2006-07	Trustees' gains (section 2(2) amount) on transfer	£70,000

No capital payments have been made out of either settlement prior to 2008-09. The following capital payments are made subsequently out of the transferee settlement:

2008-09	Payment to non-UK domiciled beneficiary	£90,000
2009-10	Payment to UK resident and domiciled beneficiary	£60,000

Paragraph 152 Schedule 7 confirms that you apply the pre FA 2008 version of Schedule

4C TCGA when matching post 5 April 2008 capital payments to gains in the pre 6 April 2008 Schedule 4C TCGA pool.

The 2008-09 £90,000 capital payment to a non-UK domiciled beneficiary is not matched with any of the gains (section 2(2) amounts) in the pre 6 April 2008 Schedule 4C TCGA pool. This comes from the pre FA 2008 wording of paragraph 8(3) Schedule 4C TCGA. The capital payment is still available to carry forward to be matched with future gains under section 87 or 89(2) TCGA or gains in a post 5 April 2008 Schedule 4C TCGA pool.

The 2009-10 £60,000 capital payment to a UK resident and domiciled beneficiary is matched with £60,000 of the gains (section 2(2) amounts) in the pre 6 April 2008 Schedule 4C TCGA pool. This results in £60,000 gains being treated as accruing to the beneficiary in 2009-10. The capital payment is matched against gains (section 2(2) amounts) on a first in first out (FIFO) basis. This comes from the pre FA 2008 wording of paragraph 8B(2) Schedule 4C TCGA. So for the purpose of the "increase in tax" charge under paragraph 13 Schedule 4C TCGA the £60,000 capital payment is matched against gains (section 2(2) amounts) in the following order:

- First against the 2004-05 £20,000 gains (section 2(2) amounts)
- Second against the 2005-06 £30,000 gains (section 2(2) amounts)
- Third the remaining £10,000 (£60,000 – [£20,000 + £30,000]) of the capital payment against £10,000 of the 2006-07 gains (section 2(2) amounts)

This leaves £60,000 gains in the Schedule 4C TCGA pool which are all gains (section 2(2) amounts) from 2006-07.

Example 29 – Paragraph 155 of Schedule 7 – Ordering rules for allocating capital payments between different Schedule 4C pools and gains dealt with under section 87 or 89(2)

A pre 6 April 2008 Schedule 4C TCGA pool of gains was created in 2006-07 as a result of a transfer of value linked with trustee borrowing. A post 5 April 2008 Schedule 4C TCGA pool of gains was created in 2008-09 as a result of a further transfer of value linked with trustee borrowing. Paragraph 152 of Schedule 7 applies to keep the Schedule 4C TCGA pools separate. Both transfers were between the same two non-UK resident settlements. Additionally there are unmatched gains (section 2(2) amounts) in the transferee settlement. In summary the gains are:

2004-05	Trustees' gains (section 2(2) amount) in transferee settlement	£10,000
2006-07	Pre 6 April 2008 Schedule 4C pool - gains	£50,000
2008-09	Post 6 April 2008 Schedule 4C pool - gains	£30,000
2009-10	Trustees' gains (section 2(2) amount) in transferee settlement	£20,000

In 2010-11 a capital payment of £95,000 is made from the transferee settlement to a UK resident and domiciled beneficiary. The rules in paragraph 155 Schedule 7 say that the capital payment is allocated against gains in the following order:

- First against the £30,000 gains in the post 5 April 2008 Schedule 4C TCGA pool
- Second against the £50,000 gains in the pre 6 April 2008 Schedule 4C TCGA pool
- Third the remaining £15,000 (£95,000 – [£30,000 + £50,000]) of the capital payment against £15,000 trustees' gains (section 2(2) amount) in the transferee settlement.

Next you go to the new section 87A TCGA matching rules to decide which trustees' gains these £15,000 capital payments are matched with. The last in first out (LIFO) rule there matches it all with £15,000 of the 2009-10 £20,000 trustees' gains (section 2(2) amount). This leaves unmatched trustees' gains (section 2(2) amount) of:

2004-05	Trustees' gains (section 2(2) amount) in transferee settlement	£10,000
2009-10	Trustees' gains (section 2(2) amount) in transferee settlement	£5,000

52.29 Commentary

In accordance with government policy, there was no consultation or discussion on the enactment, or multiple amendments, of Sch 4B and 4C, but it is worth looking back now to assess them.

HMRC would regard Sch 4B and 4C (in their current form) as successful, as they successfully stopped the schemes at which they are addressed.

Measured by any other criteria they are a failure. They are far too wide (applying to arrangements where there is no avoidance). They are so wonderfully complicated and counterintuitive that one could not expect even conscientious trustees to comply, except some of the largest trusts with large budgets for UK professional advice. A full analysis - which would be several times the length of this long chapter - will never be written.

I expect that the drafter only expected HMRC, and taxpayers, to look at the rules in cases of "abuse"; an attitude HMRC have expressed in relation to other over-wide anti-avoidance legislation.[39] They are in practice generally ignored, by HMRC and by taxpayers. They remain like unexploded ammunition from a distant war: exceptionally careful taxpayers avoid it; others disregard it, generally with impunity as HMRC will rarely know and may not care. While never satisfactory, the problems have been made much worse by the extension of the scope of the s.87 charge in 2008. In all these respects, of course, schedules 4B and 4C are not very different from other anti-avoidance legislation of their time.

If a serious attempt is ever made to rationalise the UK taxation of offshore trusts, something much better can be devised. The easiest course would be to restrict the rules with a focussed motive test, ie they only apply where there is a purpose specifically to avoid s.87 or s.86. The schemes at which they are aimed are complex and artificial ones where the avoidance intention is hardly to be denied. The 2013 s.13 amendments offer a precedent.[40]

---

39 For an example, see Kessler & Marre, *Taxation of Charities and Nonprofit Organisations* (9th ed., 2013), para 3.15 (Can bona fide charities safely ignore the substantial donor rules?) (online version *http://www.taxationofcharities.co.uk*).

40 See 53.19 (S.13 motive defence).

CHAPTER FIFTY THREE

GAINS OF NON-RESIDENT COMPANIES

53.1 Section 13 TCGA: Introduction

Non-resident companies generally pay no UK tax on chargeable gains. This presents an obvious means of CGT avoidance. HMRC's first answer to this is s.13 TCGA. The same problems arise for income of non-resident companies and for income and gains of non-resident trusts, but the statutory solutions are entirely different.

I refer to the gains treated as accruing to a participator under section 13 TCGA as **"s.13 gains"**.

53.1.1 *Cross references*

The following topics are dealt with elsewhere:

39.4 (Gains accruing to unit trust).

59.7 (Double Taxation relief).

51.33.4 (Should trustees hold assets through an underlying company?)

For s.13 gains accruing to charities, see Kessler & Marre, *Taxation of Charities and Nonprofit Organisations*, (9th ed., 2013), para 4.6 (Section 13 TCGA) (online version *http://www.taxationofcharities.co.uk*).

53.2 Non-resident close company

Section 13(1) TCGA provides:

> This section applies as respects chargeable gains accruing to a company—
>
> (a) which is not resident in the UK, and
>
> (b) which would be a close company if it were resident in the UK.

For the definition of close company see 85.19 (Close company: Introduction).

In this chapter when I refer to a company I assume it is a non-resident close company.

53.3 Attribution of s.13 gains to participator

Section 13(2) TCGA provides:

> Subject to this section, every person
> [a] who at the time when the chargeable gain accrues to the company is resident in the UK, and
> [b] is a participator in the company,
> shall be treated for the purposes of this Act as if a part of the chargeable gain had accrued to him.

The sidenote to s.13 calls this "attribution" of gains.[1] Section 13(4)(9)(10) refers to gains "apportioned" to participators. The terms "attribute" and "apportion" are interchangeable.

53.3.1 *Gains accruing in split year of participator*

Section 13(3A) TCGA provides the usual split year rule:

> Subsection (2) does not apply in the case of a participator who is an individual if—
> (a) the tax year in which the chargeable gain accrues to the company is a split year as respects the participator, and
> (b) the chargeable gain accrues to the company in the overseas part of that year.

53.4 Non-resident trustees

Non-resident trustees would not be within s.13(2) TCGA because that only applies to UK residents. However, s.13(10) TCGA provides:

> The persons treated by this section as if a part of a chargeable gain accruing to a company had accrued to them shall include the trustees of a settlement who are participators
> [a] in the company, or
> [b] in any company amongst the participators in which the gain is apportioned under subsection (9) above,
> if when the gain accrues to the company the trustees are not resident in the UK.

Section 13(10) was added to the legislation in 1981, and its clumsy

---

1 The sidenote reads: "Attribution of gains to members of non-resident companies". The reference to *members* has been wrong since 1995 and should read *participators* but nothing turns on that.

drafting raises some difficulties, discussed below.

53.5 Computation of non-resident company gains on CT principles

It is necessary to ascertain the amount of the chargeable gains accruing to the non-resident company.

Section 13 applies to chargeable gains, so reliefs (including substantial shareholding relief) which prevent a gain from being a chargeable gain apply for the purposes of s.13.

Section 13(11A) TCGA provides:

> For the purposes of this section the amount of the gain or loss accruing at any time to a company that is not resident in the UK shall be computed (where it is not the case)[2] as if that company were within the charge to corporation tax on capital gains.

Indexation relief is applicable because a company within the charge to CT qualifies for that relief.

Section 295(1) CTA 2009 provides:

> The general rule for corporation tax purposes is that all profits arising to a company from its loan relationships are chargeable to tax as income in accordance with this Part.

Gains on debts and other loan relationships (including life policies and foreign exchange gains) are not within s.13. Applying the deeming provision of s.13(11A) they are chargeable to tax as income, so no chargeable gain accrues on the disposal.[3] The same applies to gains on:

(1) Derivative contracts, chargeable to CT as income under part 7 CTA 2009.
(2) Intangible fixed assets, chargeable to CT as income under part 8 CTA 2009.

For a participator who is an individual or a trust, this seems too good to be true, which raises the question whether a court should construe the deeming provision purposively so as to avoid that result.[4] However, s.13 also applies to a participator which is a company. It would be anomalous if a corporate participator did *not* obtain indexation relief, and somewhat surprising if loan relationship (etc) gains were treated as chargeable gains.

---

2 The words in brackets appear to be otiose.

3 Section 37 TCGA 1992.

4 As was done in *De Rothschild v Lawrenson* 67 TC 300.

The battle of the anomalies does not give a clear result, and the deeming provision should be given full effect.

HMRC accept this reasoning. They say:

> As a consequence of the application of the loan relationship rules, a gain which accrues to a non-UK resident company on disposal of a debt represented by a balance in a non-sterling bank account will not be a chargeable gain. If the company has no chargeable gain, section 13 is not engaged, and therefore UK resident participators cannot be liable to tax in respect of such disposals. This difference in treatment between non-sterling bank accounts held directly and those held indirectly via a non-UK resident company is long standing and there are no plans for its amendment.[5]

The 2012 foreign currency reforms were enacted on this basis.[6]

Gains on debts and policies often qualify for other CGT reliefs, so the question whether such gains could fall within s.13 may not arise.

53.6 Identifying the participators

It is necessary to identify the participators in the non-resident company. Section 13(12) TCGA provides:

> In this section "participator", in relation to a company, has the meaning given by section 454 of CTA 2010.

This takes us to the elaborate standard definition; see 85.17 (Definition of participator). It was not drafted with s.13 in mind. One company can have too many participators for s.13 to cope with easily. I refer to this as the problem of "**overlapping participators**".

The problem may arise in the case of trusts,[7] loan creditors[8] and chains of companies.[9] The problem is solved in different ways in each case.

---

5 Statement published online 9 Dec 2009 *http://www.hmrc.gov.uk/cnr/remittance-basis.htm*.

6 The 2012 relief on disposals of foreign currency bank accounts applies to individuals, trustees and PRs but not to companies, because companies do not need the relief: see 55.10 (Foreign currency bank accounts: CGT).

7 See 53.7 (Overlapping participators: trustees and beneficiaries).

8 See 53.10 (Overlapping participators: loan creditors).

9 See 53.12 (Chains of companies).

53.7 Overlapping participators: trustees and beneficiaries

Suppose a company is owned by a trust. The trustees are participators. The beneficiaries, except perhaps discretionary beneficiaries, are participators under s.454(1) CTA 2010 since they have an interest in the trust property. See 85.17.4 (Trustees and beneficiaries).

The difficulties this would cause for s.13 TCGA were recognised, and beneficiaries are taken out of s.13 by s.13(14) TCGA:

> For the purposes of this section, where—
>
> (a) the interest of any person in a company is wholly or partly represented by an interest which he has under any settlement ("his beneficial interest"), and
>
> (b) his beneficial interest is the factor, or one of the factors, by reference to which that person would be treated (apart from this subsection) as having an interest as a participator in that company,
>
> the interest as a participator in that company which would be that person's shall be deemed, to the extent that it is represented by his beneficial interest, to be an interest of the trustees of the settlement (and not of that person), and references in this section, in relation to a company, to a participator shall be construed accordingly.

The CG Manual correctly provides:

> **57222 Basic conditions for Section 13 TCGA 1992: Beneficiaries: Section 13(4) TCGA 1992** [April 2011]
>
> Where the trustees of a settlement, whether resident in the UK or not, are participators in a non-resident company then in certain circumstances a beneficiary of the settlement will also be within the definition of participator. The effect of Section 13(14) is that once you reach shares or other interests held by trustees, except in the case of a bare trust, see CG34300, you stop there. In deciding how the chargeable gain of the company should be apportioned, you treat the trustees as if they were the beneficial owners of their shares or other interests and apportion the gain to them as appropriate, ignoring the interests of the beneficiaries. If the trustees are resident then their share of the gain is assessed on them, [or on the settlor under TCGA 1992, S 77 in relevant cases].[10] If the trustees are non-resident then the gain is subject to TCGA 1992, S 86 and TCGA 1992, S 87, see CG57395. Any interest

10 Words in square brackets are out of date since 2008.

> as a participator in the non-resident company which the beneficiary holds in their own right, for example by a personal holding of shares in the non-resident company, will remain within Section 13.

53.8 Foundations

At first sight, a foundation may be a close company[11] and so within s.13. At first sight, s.13(14) does not apply to a foundation as "settlement" in s.13(14) has the IT/CGT meaning: a foundation is not a settlement in that sense..

If that is right, two questions arise:

(1) Are beneficiaries of a foundation participators?[12]
(2) If they are participators, what is the extent of their interest under s.13(3)?

These questions raise imponderable and unexplored sub-issues: what are the rights of the beneficiaries (a matter of the foundation constitution, construed under the law of the foundation); and do those rights amount to "interests" for these purposes (a matter of UK law)?

It is suggested that the presumption against double taxation applies: since a foundation is a settlement for the purposes of s.87, it should not fall within the scope of s.13. The better view is that a foundation is a settlement within the protection of s.13(14); but an alternative route to the same destination is that a foundation is not a company within the meaning of s.13.

In practice the HMRC view is that that foundations should be taxed as trusts, so these questions do not arise.[13]

53.9 Amount of gain attributed to each participator

Once one has identified the participators, one asks how much of the company's gain is attributed to each of them. Section 13(3) TCGA provides:

> That part shall be equal to the proportion of the gain that corresponds to the extent of the participator's interest as a participator in the company.

This takes us to s.13(13) TCGA:

> In this section—

---

11 See 84.8 (Foundation/*Stiftung*)
12 See 85.17.4 (Trustees and beneficiaries).
13 See 84.8.7 (HMRC view).

(a) references to a person's interest as a participator in a company are references to the interest in the company which is represented by all the factors by reference to which he falls to be treated as such a participator;...

That is, "interest" in s.13(3) is not construed in a narrow or technical manner. Section 13(13) continues:

(b) references to the extent of such an interest are references to the proportion of the interests as participators of all the participators in the company (including any who are not resident in the UK) which on a just and reasonable apportionment is represented by that interest.

What is just and reasonable? The CG Manual starts with general comments:

57260 Section 13 TCGA 1992: Participators' fractional interests [August 2013]

...

The just and reasonable requirement

It is quite possible for the different criteria by which persons are participators to produce different percentages for one person's interest in a company. So under one test, for example entitlement to income, A may have 60% and B have 40% and under another test, for example entitlement to capital, A have 36%, B have 54% and C have 10%. This can happen even with relatively simple company structures, for example where there are preference shares, or loans. The total amount of gains apportioned cannot exceed the chargeable gain of the non-resident company. In this situation the gain has to be apportioned as is just and reasonable. This includes taking into account the interests of non-residents.

In considering a just and reasonable apportionment you should take into account all relevant factors, and not simply make an arithmetical adjustment. It would not usually be correct merely to average out the interests using the different factors. The aim of the provisions is to ensure that the gain is attributed to the participators who have the real economic interest in the non-resident company and who will derive the benefit of the gain however indirectly. The just and reasonable apportionment prevents an inappropriate part of the gain being attributed to persons without real economic interests, for example commercial loan creditors, see below.

53.10 Overlapping participators: Loan creditors

The problem of overlapping participators including loan creditors is solved, or fudged, by a just and reasonable apportionment. The CG Manual provides:

> **57260. Section 13 TCGA 1992: Participators' fractional interests** [April 2011]
> *Loan creditors*
> Any loan creditor of the non-resident company is within the definition of participator as applied for the purposes of Section 13. The aim of the provisions is to ensure that the gain is attributed to the participators who have the real economic interest in the non-resident company. There will be cases where a loan creditor will be a person or institution (such as a bank or similar financial institution) which has loaned money to the non-resident company as a matter of business on commercial terms. The interest of such a loan creditor acting at arms length will be limited to an expectation of repayment of the amount loaned together with payments of interest at a commercial rate. There will be no expectation that the loan creditor can or will benefit from the profits or gains of the non-resident company. In such a case it would not be just and reasonable to apportion any of the gain to a loan creditor of this type. The attribution should be made to those participators who have a real economic interest in the capital gains.
> Where there are participators who are loan creditors it will be necessary to review all of the circumstances to satisfy yourself that the interests of the loan creditors can be excluded for the reasons in the preceding paragraph. In some cases the persons with the real economic interest in the non-resident company will be loan creditors whether or not they are participators under one or more of the other tests set out in CG57221. In such cases, where there is participation in more than one way, it may be appropriate, depending on the facts of the case, to aggregate the interests of those persons in reaching an apportionment that is just and reasonable.
> In other cases the persons with the real economic interest in the non-resident company may be providing the funds which the loan creditor has loaned to the company, and may be persons who are entitled to secure that income or assets (whether present or future) of the company will be applied directly or indirectly for their benefit, see the test in CG57221, and may be participators in their own right by virtue of that test.

53.11 CG Manual examples: Shareholders v. loan creditors

53.11.1 *Non-resident shareholder*

The CG Manual starts with a very simple example:

> **57280. Computation of TCGA 1992, S 13 charge** [April 2011]
> Facts
> - a non-resident company has issued share capital of 150 Ordinary shares
> - A, B, C and D own 50 shares
> - A, B, C are all resident in the UK. C has never been resident in the UK
> - the non-resident company realises a gain of3200,000
>
> CGT computations
> You compute the TCGA 1992, S 13 charge as follows.
> ***STEP 1***
> Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 300,000.[14]
> ***STEP 2***
> Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances. In this case each of the three participators has a 33 1/3 per cent interest.
> ***STEP 3***
> Calculate the proportion of the gain apportionable to the interests of each participator. Calculate the interests of all participators, including any who are not resident in the UK. In this case the proportion for each participator is 33 1/3% interest
> ***STEP 4***
> Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. In this case the apportionment is just and reasonable. Gains of 100,000 are attributed to each of A and B and treated as gains accruing to them on the date on which the gain actually accrued to the company.
> C is not liable to UK taxation. But it would not be just and reasonable to reapportion C's gain of 100,000 to A and B as C has a real economic interest in the non-resident company.

14 Chargeable gains can accrue whether or not a company is UK resident. See 49.1 (Territorial scope of CGT), but the method of computation of the gain is different for a UK resident company. However this does not make any difference to the examples.

53.11.2 *Examples with loan creditors*

The CG Manual then gives two examples involving loan creditors. The first involves a loan on commercial terms:

> **57281. Computation of TCGA 1992, S 13 charge** [October 2013]
> Facts
> • A and B each own 50 shares
> • A and B are both resident in the UK
> • C is a loan creditor for 400,000. The loan is an arm's length commercial transaction and interest is payable at a fully commercial rate on the loan
> • the non-resident company realises a gain of 500,000
> • the total capital of the non-resident company after the gain is 1,000,000

The solution is to disregard the loan creditor, though the Manual takes many lines to reach this conclusion:

> **CGT computations**
> You compute the TCGA 1992, S 13 charge as follows.
> STEP 1
> Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 500,000.[15]
> STEP 2
> Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances.
> A is a 50% participator by reference to the shareholding of 50 shares
> B is a 50% participator by reference to the shareholding of 50 shares
> C is a participator as a loan creditor, being entitled to an amount of 400,000 out of the total capital of 1,000,000
> STEP 3
> Calculate the proportion of the gain apportionable to the interests of each participator. In this case the proportion for each participator is
> A (as shareholder) 500,000×50% = 250,000
> B (as shareholder) 500,000×50% = 250,000
> C (as loan creditor) 500,000×40% = 200,000
> STEP 4
> Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. In this case the apportionment is not just and

15 See above footnote.

reasonable as the total of the gains under the initial apportionment exceeds the actual gain. C is a participator only by virtue of being a commercial loan creditor, see CG57265. C's entitlement as loan creditor should be ignored, subject to a review of the circumstances to establish that C is merely a commercial loan creditor and has no entitlement to a share of profits or gains, and that there are no other arrangements. In this example it is assumed that there are no other arrangements and therefore the whole of the gain should be apportioned by reference to the interests in shares. The final apportionment becomes
A (as shareholder) 500,000×50% = 250,000
B (as shareholder) 500,000×50% = 250,000

The second example is the same but the loan is interest-free and from a shareholder:

57282. Computation of TCGA 1992, S 13 charge [October 2013]
Facts
- a non-resident company has issued share capital of 100 Ordinary shares
- A and B each own 50 shares
- A and B are both resident in the UK
- A is a loan creditor for 200,000. No interest is payable on the loan
- the non-resident company realises a gain of 500,000.
- the total capital of the non-resident company after the gain is 1,000,000

The solution is *still* to disregard the loan creditor, though the Manual is not quite so confident in its answer:

CGT computations
You compute the TCGA 1992, S 13 charge as follows.
STEP 1
Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 500,000.[16]
STEP 2
Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances.
A is a 50% participator by reference to the shareholding of 50 shares
B is a 50% participator by reference to the shareholding of 50 shares
A is also a participator as a loan creditor, being entitled to an amount of

16 See above footnote.

200,000 out of the total capital of 1,000,000. If all of the assets of the company were to be distributed immediately after the accrual of the gain the entitlements of A and B would be
A: 200,000 (as loan creditor) plus 50% of the balance of 800,000 (as shareholder), a total of 600,000 or 60% of the assets.
B: 400,000, 50% of the balance of 800,000 (as shareholder), or 40 % of the assets.
STEP 3
Calculate the proportion of the gain apportionable to the interests of each participator. In this case there are two possible apportionments.
A: 500,000×50% = 250,000
B: 500,000×50% = 250,000
or
A: 500,000×60% = 300,000
B: 500,000×40% = 200,000
STEP 4
Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. As there are at least two possible apportionments we must consider all of the facts relating to the arrangements under which A's loan was made and the arrangements regarding profits and gains of the company. For instance:
- Does the loan agreement give A any preferential rights to profits or gains, or simply to a repayment of the capital?
- Is B entitled to an equal share of profits or gains?

In such cases there is no easy answer and a full consideration of all of the relevant circumstances is necessary. On the bare facts of this example A has no preferential rights and consequently an apportionment by reference to the shareholdings, effectively excluding A's participation as loan creditor, may be just and reasonable. If so, the gain would be attributed
A: 500,000×50% = 250,000
B: 500,000×50% = 250,000

53.11.3 *Two classes of shares*

The CG Manual's next example concerns a company with two classes of shares:

57283. Computation of TCGA 1992, S 13 charge [October 2013]
Facts
- a non-resident company has issued share capital of 100 A shares and 100 B shares.
- both classes of shares carry equal voting rights but the B shares carry

no entitlement to dividends or distributions in a winding-up.

- the A shares are owned by X who is resident in the UK
- the B shares are owned by Y who has never been resident in the UK
- the non-resident company realises a gain of 200,000.

CGT computations

You compute the TCGA 1992, S 13 charge as follows.

STEP 1

Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 200,000.[17]

STEP 2

Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances.

Participator	Voting rights	Distributions
X	50%	100%
Y	50%	0%

X is a 50% participator by reference to voting rights attached to the shareholding in A shares.

Y is a 50% participator by reference to voting rights attached to the shareholding in B shares.

X is a 100% participator by reference to rights to dividends and distributions attached to the shareholding in A shares.

STEP 3

Calculate the proportion of the gain apportionable to the interests of each participator.

X (rights to income and capital)	200,000×100% = 200,000
Y (voting rights)	200,000×50% = 100,000

STEP 4

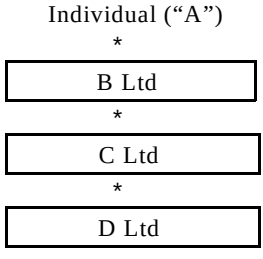
Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. In this case the apportionment is not just and reasonable as the total of the gains under the initial apportionment exceeds the actual gain. A full review of all of the circumstances would be necessary. It appears that the true economic interest in the non-resident company is held solely by X. Y's entitlement should be ignored, and the whole of the gain apportioned to X.

53.12 Chains of companies

53.12.1 *Overlapping participators: Chains of wholly owned companies*

Suppose a chain of wholly owned companies:

17 See above footnote.

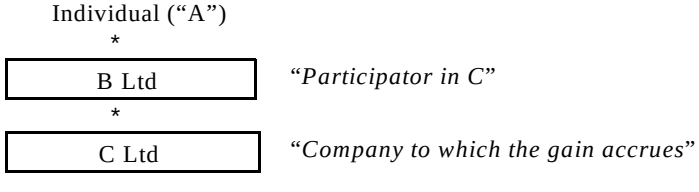


C Ltd is a participator in D Ltd under s.454(1) CTA 2010. But A and B Ltd are also participators, under s.454(2)(c) CTA 2010.[18] This is so wherever the companies are resident. Chains of wholly owned companies raise the problem of overlapping participators.

Section 13(9) TCGA provides:

> [a] If a person who is a participator in the company at the time when the chargeable gain accrues to the company is itself a company which
> [i] is not resident in the UK but which
> [ii] would be a close company if it were resident in the UK,
> [b] [i] an amount equal to the amount apportioned under subsection (3) above out of the chargeable gain to the participating company's interest as a participator in the company to which the gain accrues
> [ii] shall be further apportioned among the participators in the participating company according to the extent of their respective interests as participators, and
> [c] subsection (2) above shall apply to them accordingly in relation to the amounts further apportioned,
> [d] and so on through any number of companies.

Suppose a simple chain of two wholly owned non-resident companies:



If a gain accrues to C, what is apportioned to A? Under s.13(9)[b][i] it is "an amount equal to the amount apportioned under s.13(3)" to B as a

18 See 85.17.2 (Chain of wholly owned companies).

participator in C. This is not well drafted, as nothing is apportioned under s.13(3) to B. No apportionment can be made since B is not UK resident![19] But the courts must correct that infelicity and construe the words to mean, the amount that would have been apportioned to B, had it been UK resident.

The CG Manual provides:

> **57290. Indirect interests: Introduction** [April 2011]
> Without special rules UK resident shareholders or participators could avoid the TCGA 1992, S 13 charge by placing another non-resident company between themselves and the company making the gain. TCGA 1992, S 13(9) prevents this by allowing the Revenue to look through a chain of non-resident companies. The gain is apportioned to the first tier of UK residents or non-resident trusts in the chain of interests. For TCGA 1992, S 13(9) to apply each company in the chain must itself satisfy the basic conditions outlined in CG57220.
> Therefore each company must be
> • a company that is not resident in the UK and
> • a company that would be a close company if it was resident in the UK.

The CG Manual begins with a straightforward example:

> EXAMPLE 1[20]
>
> Mr A — *UK resident and domiciled shareholder*
> *
> B Ltd — *non-resident close company*
> *
> C Ltd — *non-resident close company*
> *
> D Ltd — *non-resident close company*

Gains accruing to D Ltd are not attributed to C under s.13(2) because C is not UK resident. See s.13(2)[a]. But the CG Manual correctly notes:

> Any gains of D Ltd can be apportioned to Mr A because TCGA 1992, S 13(9) allows you to look through the chain of non-resident closely controlled companies.

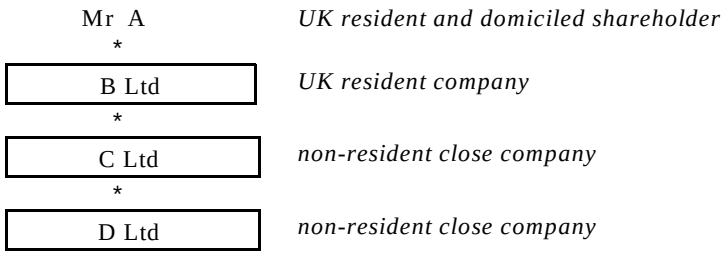
The next example concerns a chain including a resident company:

---

19 One might also argue that apportionment is under s.13(2) and not s.13(3).

20 I have added the diagrams to increase clarity.

EXAMPLE 2

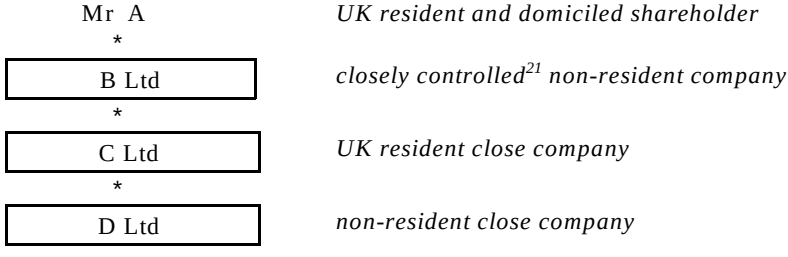


The Manual analyses this as follows:

> Any gains of D Ltd can be apportioned to B Ltd but not Mr A. This is because B Ltd is the first UK resident shareholder in the chain.

This was correct before 1995, when s.13(2) and (9) TCGA only apportioned gains to a *shareholder* in a non-resident company. A is not a shareholder of D Ltd. But why can't A be assessed now under s.13(2) or (9)? A *is* a participator in D Ltd. Perhaps this restricted rule is implied by s.13(9) TCGA. Or if not, perhaps it would be just and reasonable to apportion under 13(2) to company B and to no-one else. One way or the other, the problem of overlapping participators in chains of companies is solved by stopping at the first UK resident company.

EXAMPLE 3



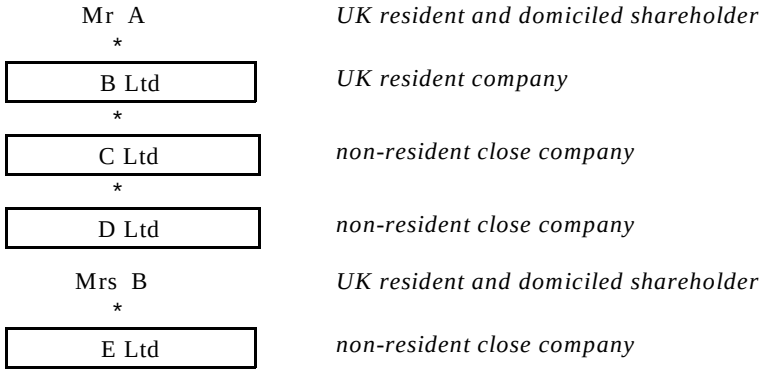
> Any gains of D Ltd can be apportioned to C Ltd but not Mr A even though Mr A owns shares in B Ltd a closely controlled non-resident company. (Gains which accrue to B Ltd in its own right on disposal of its own assets can be apportioned to Mr A.)

The next Manual example is a straightforward variation on the above:

---

21 The express "closely controlled" is used here (somewhat unhelpfully) as a synonym of "close".

57291. Indirect interests: UK resident shareholder in the chain of participators [April 2011]
When considering the operation of TCGA 1992, S 13(9) each chain of shareholdings must be considered separately.
Example



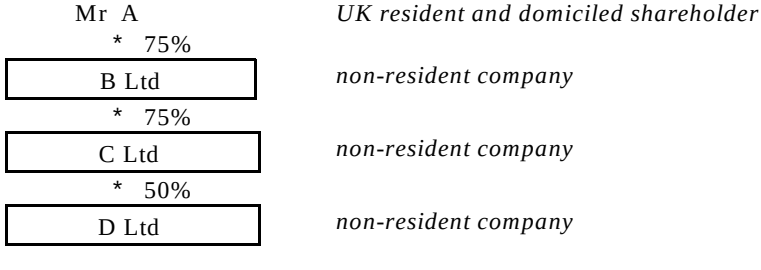
The gains of [E Ltd][22] can be apportioned to Mrs B because she is the first UK resident shareholder in that chain of shareholdings. The gains of D Ltd cannot be apportioned to Mr A because B Ltd is the first UK resident shareholder in that chain of shareholdings.

53.13 Chains of companies not wholly owned

We have so far considered simple chains of wholly owned companies. The CG Manual continues with an example of a less than 100% chain:

57291. Indirect interests: UK resident shareholder in the chain of participators [April 2011]
... You calculate the extent of a person's indirect interest on a particular test of participation by multiplying the proportional interest in the assets of each company in the chain.

EXAMPLE



22 The original reads "D Ltd" which must be a slip for "E Ltd", if the diagram is correct.

> If D Ltd makes gains of 100,000 the TCGA 1992, S 13 charge on Mr A is £100,000×50%×75%×75% = £28,125.

Mr A is a participator in B Ltd. Mr A is not a participator in D Ltd but that does not matter because C Ltd is a participator in D Ltd, B Ltd is a participator in C Ltd, and gains of D Ltd are attributed to Mr A under s.13(9) TCGA. It is assumed for the purposes of the example that D Ltd is close, which is not necessarily the case; it depends on the other shareholdings, which are not specified in the example.

53.14 Section 13 remittance basis

Section 14A TCGA provides a relief which I call "**the s.13 remittance basis**". Section 14A(1) provides:

> This section applies if—
>
> (a) by virtue of section 13, part of a chargeable gain that accrues to a company on the disposal of an asset is treated as accruing to an individual in a tax year, and
>
> (b) the individual is not domiciled in the UK in that year.

In short, the relief applies to a remittance basis taxpayer.

Section 14A(2) provides the relief:

> The part of the chargeable gain treated as accruing to the individual ("the deemed chargeable gain") is a foreign chargeable gain within the meaning of section 12 if (and only if) the asset is situated outside the UK.

Although the statutory term is "deemed chargeable gains" I prefer to use the term"**s.13 gains**" to distinguish them from other deemed chargeable gains. Section 14A(2) brings s.12 TCGA into application and so provides for the remittance basis.

Section 14A(3) TCGA provides:

> For the purposes of Chapter A1 of Part 14 of ITA 2007 (Remittance Basis)—
>
> (a) treat any consideration obtained by the company on the disposal of the asset as deriving from the deemed chargeable gain, and
>
> (b) unless the consideration so obtained is of an amount equal to the market value of the asset, treat the asset as deriving from the deemed chargeable gain.

In the absence of express provision, it might be argued that the s.13 gain

could not be remitted as it does not exist. Section 14A(3)(a) deals with that problem.

Section 14A(3)(b) is necessary since the equivalent rule in s.809T ITA only applies to gains accruing on a disposal by an individual.

Suppose:

(1) A non resident company ("OC") disposes of a foreign situate asset and realises a gain.
(2) The gain (or part) is deemed to accrue to T (an individual taxable under the remittance basis).

T is subject to tax on the gain if OC brings/receives/uses the sum in the UK, if a company is a relevant person in relation to T. A company within s.13 will in principle be a relevant person in relation to T.

If OC distributes the sum by way of dividend and T brings/receives/uses the sum in the UK then T is arguably subject to two charges:

(1) CGT on the s.13 gain (for what F receives is derived from the gain) and
(2) IT on the distribution.

The same applies if OC is held by an IIP trust.

Likewise if OC is wound up and the liquidator distributes the sum by way of capital distribution, and F brings/receives/uses the sum in the UK then F is arguably subject to two charges:

(1) CGT on the s.13 gain (for what F receives is derived from the gain) and
(2) CGT on the disposal of the shares in OC.

If there are two charges, company distribution relief may apply. But the better view is that there is only a single charge to tax in these cases. One receipt cannot give rise to two charges under the remittance basis.[23]

53.15 EU law compliance

In 2011 the European Commission formally requested the UK to amend s.13 TCGA (and the ToA provisions[24]). The request took the form of reasoned opinions, the second step of the infringement procedure.[25] The text of the reasoned opinions was not published, but an EC press release provided the main details:

---

23 See 11.15.11 (Income from income/gains).

24 See 28.15.1 (EC infringement proceedings).

25 Art.258 TFEU.

> The second infringement relates to the attribution gains to member of non-UK resident companies regime [s.13 TCGA]. Under this legislation, if a UK-resident company acquires more than a 10%[26] share of a company in another Member State, and the latter company realises capital gains from the sale of an asset, the gains are immediately attributed to the UK company, which becomes liable for corporation tax on these capital gains. If, on the other hand, the UK company had invested in another UK resident company, only the latter would be taxable on its capital gains.

The EC analysis was as follows:

> In both cases, the Commission considers there to be discrimination, seeing as investments outside the UK are taxed more heavily than domestic investments. The difference in tax treatment between domestic and cross-border transactions restricts two fundamental principles of the EU's Single Market, namely of the freedom of establishment and the free movement of capital ....
>
> The Commission is of the opinion that both restrictions are disproportionate, in the sense that they go beyond what is reasonably necessary in order to prevent abuse or tax avoidance and any other requirements of public interest.[27]

The background can be traced through HMRC consultation and response documents[28] but these are now mainly of historic interest.

In response, the FA 2013 made three changes:

(1) Increasing the minimum holding requirement from 10% to 25%.

---

26 The figure is now 25%.

27 IP/11/158, 16 February 2011. The CIOT had lobbied the EC to take this step.

28 HMRC, "Reform of two anti-avoidance provisions (i) the attribution of gains to members of closely controlled non-resident companies, and (ii) the transfer of assets abroad" (July 2012).

HMRC, "Reform of two anti-avoidance provisions: (i) the attribution of gains to members of closely controlled non-resident companies, and (ii) transfer of assets abroad Summary of Responses" (December 2012) *https://www.gov.uk/government/consultations/reform-of-an-anti-avoidance-provision-transfer-of-assets-abroad*

HMRC, "Reform of an anti-avoidance provision: Transfer of Assets Abroad Outcome of Consultation" (December 2013) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/267976/Transfer_of_assets_outcome_of_consultation.pdf*

(2) Extending the defence for trading companies
(3) A new defence for economically significant activities

EN FB 2013 provides:

> An infraction notice (Reasoned Opinion) was issued to the United Kingdom by the European Commission on 16 February 2011. ...
> 13. These changes aim to ensure that the legislation is compatible with the Treaty while maintaining effective protection against tax avoidance.

In January 2014 the CIOT wrote to the EC contending that the amended rules are still not EU law compliant. The CIOT's main complaints are:
(1) The 25% minimum holding requirement is inadequate as it may be diluted by the connected person rule.
(2) The economically significant activities defence is inadequate as it only applies to activities carried on by the company wholly or mainly outside the UK, and does not extend to UK activities.
(3) The s.13 charge (if applicable) may be disproportionate in that:
    (a) A minimal breach of the requirements results in a charge by reference to the whole gain.
    (b) A person who has just owned the shares for a very short period could have gains attributed to him which relate to periods before they had any interest in the company.
    (c) The rate of tax on s.13 gains is the CGT rate which exceeds the CT rate applicable to UK companies.

The EC complaint has not been withdrawn. It will be interesting to see how the dispute develops.

53.16 25% minimum holding requirement

Section 13(4) TCGA provides:

> Subsection (2) above shall not apply in the case of any participator in the company to which the gain accrues where the aggregate amount falling under that subsection to be apportioned
> [a] to him and
> [b] to persons connected with him
> does not exceed one quarter of the gain.

I refer to this as **"the 25% minimum holding requirement".**

Suppose a non-resident trust holds less than 25% of a non-resident company. Does the trust meet the minimum holding requirement? The difficulty is that s.13(4) does not in terms disapply the whole of s.13: it

disapplies s.13(2). The provision governing a non-resident trust is s.13(10) which provides:

> The persons treated *by this section* as if a part of a chargeable gain accruing to a company had accrued to them shall include the trustees of a settlement who are participators
>
> [a] in the company, or
>
> [b] in any company amongst the participators in which the gain is apportioned under subsection (9) above,
>
> if when the gain accrues to the company the trustees are not resident in the UK.

The words "by this section" must refer in particular to section 13(2), for that is the provision which treats persons as a part of the chargeable gain accruing to the non-resident company had accrued to them. Accordingly, the disapplication of s.13(2) must also disapply the attribution in subsection (10).

53.16.1 *Aggregation of connected person's interest*

In order know whether a participator ("A") in a non-resident company ("OC") meets the 25% minimum holding requirement, it is necessary to identify all persons connected with A (ie co-participators in OC) to whom gains fall to be apportioned under s.13(2).

In deciding whether A meets the 25% minimum holding requirement, one does not add up the interests in OC of A and *all* persons connected with A and ask if that amounts to more than 25% of OC. One only counts connected persons *to whom gains fall to be apportioned under s.13(2).* One ignores connected co-participators if gains do not fall to be apportioned to them under that subsection.

For example, assume OC is a straightforward non-resident company and:

(1) A owns 8% of the shares in OC. (Unless the connected person rule applies, A would not meet the 25% minimum holding requirement.)

(2) C (the only participator in OC who is connected with A) owns 3% of the shares in OC. (So if the interest of C is aggregated with the interest of A, A does meet the minimum holding requirement.)[29]

It is necessary to consider separately the cases where C is an individual, a company and a trust, and the cases where C is resident and non-resident,

---

29 Similarly, C would meet the 25% minimum holding requirement, but we focus on the position of A.

so there are at least six possibilities.

A does meet the 25% minimum holding requirement if C is:

(1) a UK resident individual taxed on the arising basis[30]

(2) a UK resident company, or

(3) a UK resident trust.

In all these cases the gains of OC do fall to be apportioned to C under s.13(2).

A does not meet the 25% minimum holding requirement if C is a *non-resident individual*. In this case, gains cannot be apportioned to C under s.13(2). This is the case even if C is within the temporary non-residence rules.

A does not meet the 25% minimum holding requirement if C is a non-resident *company*. In this case, gains of OC might be apportioned to participators in C, but that does not cause A to meet the 25% minimum holding requirement unless those participators are themselves connected with A. Lastly, does A meet the 25% minimum holding requirement if C is a non-resident *trust*? The question is whether gains of OC fall to be apportioned to the trust, under s.13(2). Section 13(10) says (or assumes) that the trustees are treated *by this section* as if gains of OC had accrued to them. The gains are attributed to the trustees under the combined effect of subsection (2) and subsection (10). Whether or not that could be described as an attribution *under s.13(2)* is a matter that could be answered either way, depending on context. In this context, it is suggested that A does not meet the 25% minimum holding requirement. This result is consistent with the position for non-resident companies and non-resident individuals. If this result was contrary to common sense (particularly in a tax avoidance context) a court might construe section 13(4) more loosely. But there may be many connected co-participators and A may not be able to know whether they are trustees or not, particularly in the case of non-residents. So it is sensible to disregard the interests of non-resident trustees for the purposes of the aggregation test.

Even adopting this approach, it will often not be possible for a participator to know whether the 25% minimum holding requirement is satisfied, but one must do the best one can.

Interests held by pension funds cannot be aggregated for the 25%

30 Further consideration would be needed if C were a remittance basis taxpayer who did not remit the s.13 gain.

minimum holding requirement. See 53.21 (Pension schemes).

53.16.2 *EU law aspects*

The FA 2013 increased the figure from 10% to 25%. The object is to enable HMRC to argue that s.13 is primarily directed at freedom of establishment, so that challenges are not possible under free movement of capital.[31] But the effect of the economically significant activities and ;motive defences seems to be that s.13 is sufficiently well targeted to satisfy EU law, whether the challenge comes under FoE or FMC, so the question of which is the applicable freedom should not arise.

53.17 Non-resident trading company

Section 13(5) TCGA provides some relief for a non-resident trading company:

> This section shall not apply in relation to ...
>
> (b) a chargeable gain accruing on the disposal of an asset used, and used only—
>
> (i) for the purposes of a trade carried on by the company wholly outside the UK, or
>
> (ii) for the purposes of the part carried on outside the UK of a trade carried on by the company partly within and partly outside the UK.

53.17.1 *Furnished holiday letting*

This relief is extended to include furnished holiday letting (which is not strictly classified as a trade). Section 13A TCGA provides:

> (1) For the purposes of section 13(5)(b) a disposal of an asset is to be regarded as a disposal of an asset used for the purposes of a trade carried on wholly outside the UK by a company if—
>
> (a) the asset is accommodation, or an interest or right in accommodation, which is situated outside the UK, and
>
> (b) the accommodation has for each relevant period been furnished holiday accommodation of which a person has made a commercial letting.
>
> (2) For the purposes of subsection (1)(b) each of the following is "a relevant period"—
>
> (a) the period of 12 months ending with the date of the disposal

31 See 60.3.1 (FoE or FMC?)

and each of the two preceding periods of 12 months, or

(b) if the company has been the beneficial owner of the accommodation (or interest or right) for a period longer than 36 months, the period of 12 months ending with the date of the disposal and each of the preceding periods of 12 months throughout which the company has been the beneficial owner of the accommodation (or interest or right).

(3) The reference in subsection (1)(b) to the commercial letting of furnished holiday accommodation is to be read in accordance with Chapter 6 of Part 4 of CTA 2009, but—

(a) as if sections 266, 268 and 268A were omitted, and

(b) as if, in section 267(1), the reference to an accounting period were a reference to a relevant period as defined by subsection (2) above.

The definition of furnished holiday accommodation needs a chapter to itself, and is not discussed here.

This relief is one of the changes introduced in 2013 to make s.13 EU-law compliant.[32] The change operates retrospectively to 2012/13.

53.18 Economically significant activities

Section 13(5) TCGA provides a relief for companies carrying on economically significant activities. This provides:

> This section shall not apply in relation to ...
>
> (ca) a chargeable gain accruing on the disposal of an asset used, and used only, for the purposes of economically significant activities carried on by the company wholly or mainly outside the UK

I refer to this as **"the economically significant activities defence"**. This relief is one of the changes introduced in 2013 to make s.13 EU-law compliant.[33] The change operates retrospectively to 2012/13.

53.18.1 *"Economically significant activities"*

Section 13A(4) TCGA provides:

> For the purposes of section 13(5)(ca) activities carried on by a company are "economically significant activities" if they are activities which

32 See 53.15 (EU law compliance).

33 See 53.15 (EU law compliance).

consist of the provision by the company of goods or services to others on a commercial basis and involve—

(a) the use of staff[34] in numbers, and with competence and authority,

(b) the use of premises and equipment, and

(c) the addition of economic value, by the company, to those to whom the goods or services are provided, commensurate with the size and nature of those activities.

The wording is the same as in the ToA EU law defence: see 28.15.8 ("Genuine": commercial substance requirement).

53.18.2 *Activities carried on by the company "outside the UK"*

The defence requires one to identify where the company's activities are carried on, or at least, whether they are wholly or mainly carried on outside the UK. If the activities are in the UK, or partly in the UK, this defence does not apply. The CIOT have complained to the EC that this restriction is in breach of EU law.

53.19 S.13 motive defence

Section 13(5) TCGA provides a motive defence which I call **"the s.13 motive defence"**. This provides:

> This section shall not apply in relation to ...
>
> (cb) a chargeable gain accruing to the company on a disposal of an asset where it is shown that neither—
>
> (i) the disposal of the asset by the company, nor
>
> (ii) the acquisition or holding of the asset by the company,
>
> formed part of a scheme or arrangements of which the main purpose, or one of the main purposes, was avoidance of liability to capital gains tax or corporation tax

The wording is based on the wording of the ToA motive defence condition A. There are two important differences:

(1) Only CGT/CT avoidance matters; eg an intention to avoid IHT would not disqualify the s.13 motive defence. By contrast, the ToA motive defence refers to the avoidance of "taxation".

(2) The s.13 motive defence depends on the purpose of the *arrangements*

---

34 Section 13A(5) TCGA provides a definition: "In subsection (4) "staff" means employees, agents or contractors of the company."

(of which the disposal and acquisition of the asset forms part); the ToA motive defence depends on the purpose of the *transfer and associated operations* (relevant transactions); that could be different.

CGT/CT means UK CGT/CT, and does not include corresponding foreign taxes.[35]

If an offshore company is used to hold a property which would (if held directly) qualify for private residence relief, the s.13 motive defence will apply, for there can be no CGT avoidance: no CGT would be payable if the property had been held directly in the trust or directly by the occupier.

The s.13 motive defence does not require a formal claim. If the arrangements did not have a CGT/CT avoidance purpose, a taxpayer is entitled and indeed required to complete tax returns on the basis that the motive defence applies; one is not required to show the motive defence applies before completing the tax return on that basis.

If an individual completes a self assessment return, it is necessary to indicate on that return that they have taken advantage of the ToA motive defence by an entry in the relevant box.[36] There does not seem to be a comparable box for the s.13 motive defence.

This relief is one of the changes introduced in 2013 to make s.13 EU-law compliant.[37] It operates retrospectively to 2012/13.

53.20 Non-resident company within CT

Section 13(5) TCGA provides:

> This section shall not apply in relation to ...
>
> (d) to a chargeable gain in respect of which the company is chargeable to tax by virtue of section 10B.[38]

Thus the CT charge has priority over a s.13 charge.

53.21 Pension schemes

Pension schemes qualify for CGT relief under s.271(1)(c) and (1A) TCGA:

> (1) The following gains shall not be chargeable gains—
>
> ...

35 See 32.9 (Meaning of "taxation" in the motive defence).

36 See 32.45 (Tax return: disclosure of motive defence claim).

37 See 53.15 (EU law compliance).

38 See 86.1 (Why does permanent establishment matter?).

(c) any gain accruing to a person from his acquisition and disposal of assets held by him as part of a fund—
  (i) mentioned in section 614(2) of the Taxes Act,
  (ii) to which section 615(3) of the Taxes Act applies, or
  (iii) mentioned in section 648, 649, 650, 651 or 653 of ITEPA 2003;

...

(1A) A gain accruing to a person on a disposal of investments held for the purposes of a registered pension scheme is not a chargeable gain.

This does not confer relief from s.13 gains but s.13(10B) TCGA provides relief:

A chargeable gain that would be treated as accruing to a person under subsection (2) above shall not be so treated if—
(a) it would be so treated only if assets that are assets of a pension scheme[39] were taken into account in ascertaining that person's interest as a participator in the company, and
(b) at the time the gain accrues a gain arising on a disposal of those assets would be exempt from tax by virtue of section 271(1)(c) or (1A).

A beneficiary of a pension scheme might be a participator in a non-resident company held by the scheme, but they are protected by the exclusion for beneficiaries.[40]

Section 13(10B) also prevents aggregation of a pension scheme's interest with the interest of a person connected with the trustees of the pension scheme, for the purposes of the 25% minimum holding requirement. That will not normally arise, as trustees of a pension scheme are not usually connected to other persons, but it could happen, eg if the trustees were partners in an investment partnership.

53.22 Partnership holding non-resident company

Suppose a partnership holds a non-resident company to which a gain accrues. Section 59(1) TCGA provides:

---

39 This expression is defined in s.13(10B):
"In para (a) above 'assets of a pension scheme' means assets held for the purposes of a fund or scheme to which any of the provisions mentioned in para (b) above applies."

40 See 53.7 (Overlapping participators: trustees and beneficiaries).

> Where 2 or more persons carry on a trade or business in partnership—
>
> (a) tax in respect of chargeable gains accruing to them on the disposal of any partnership assets shall, in Scotland as well as elsewhere in the UK, be assessed and charged on them separately, and
>
> (b) any partnership dealings shall be treated as dealings by the partners and not by the firm as such.

This does not apply to a s.13 gain, which is not a gain on the disposal of a partnership asset. But the partners are participators in the company, and it is just and reasonable (because it fits the scheme of the TCGA) to attribute the s.13 gain to the partners under s.13(2) TCGA. That is, HMRC do not need s.59 TCGA to tax the partners.

53.23 Company distribution relief

53.23.1 *Terminology*

Section 13 could often give rise to double taxation and there are three reliefs to prevent this. Statute does not provide names for the reliefs, so I coin the following terminology:

Name of relief	**Section**	**Description**
Company distribution relief	s.13(5A)	Distribution by non-resident co
Company disposal relief	s.13(7)	Disposal of non-resident co
Reimbursement relief	s.13(11)	Reimbursement by non-resident co

53.23.2 *Company distribution relief*

Section 13(5A) TCGA provides:

> Where—
>
> (a) an amount of tax is paid by a person in pursuance of subsection (2) above, and
>
> (b) an amount in respect of the chargeable gain is distributed (either by way of dividend or distribution of capital or on the dissolution of the company) before the end of the period specified in subsection (5B) below,
>
> the amount of tax (so far as neither reimbursed by the company nor applied as a deduction under subsection (7) below) shall be applied for reducing or extinguishing any liability of that person to income tax, CGT or corporation tax in respect of the distribution.

In short, the s.13 tax is set against tax on the distribution.

The CG Manual provides:

> **57351. Gains accruing on/after 28/11/95: Outline of tax credit relief** [April 2011]
> [The manual summarises s.13(5A) and continues] It is important to note that relief under Section 13(5A) TCGA 1992 is only due where a charge arises under Section 13 in respect of a gain and a further charge arises in respect of a distribution of an amount in respect of the same gain, and that both charges arise on the same person. Where a gain is attributed to participator A and the distribution is made to participator B no relief can be given to B as B has not paid tax under Section 13...
> **57360. Quantifying tax set-off available following capital dividends or distributions** [April 2011]
> ... Once capital gains tax has been paid under section 13(2), then the whole of that tax is available for set-off against any tax liability on a subsequent distribution where the conditions for relief are met. Should only half of the gain be distributed this does not mean that only half of the section 13 capital gains tax can be set off. The section 13 tax represents a pool of tax credit to be used up against tax liability arising from appropriate distributions in respect of the same gain. Thus if only half of the gain is distributed but the tax liability on the distribution is at a higher rate than the tax on the section 13 gain, the tax credit relief will be more than half of the Section 13 tax.
> **57362. Need to have paid tax under Section 13(2)** [April 2011]
> It is a condition of section 13(5A) relief that the tax arising on the gain attributed under section 13 must have been paid. In some cases the liability on the section 13 gain and on the distribution will arise in the same year of assessment or accounting period, and in other cases the tax on the section 13 gain will not have been paid.
> In practice relief may be given by set off providing that the only reason preventing relief being given is that tax on the section 13 gain is unpaid.

For the purpose of s.13(5A) it is necessary to ascertain the liability of the participator to income tax in respect of the distribution from the company.

Section 13(7A) TCGA provides:

> In ascertaining for the purposes of subsection (5A) or (7) above the amount of CGT[41] or income tax chargeable on any person for any year

41 The reference to CGT is not appropriate after the FA 2008 repealed s.13(7A)(b) (c) (d) because s.13(7A) now deals with income tax only. Similarly, the reference to s.13(7) is not appropriate as from 2008, s.13(7A) is only relevant for the purposes of company distribution relief in s.13(5A) and does not apply to company disposal relief in s.13(7). The references made sense before the former paragraphs (b) to (d) were part of s.13(7A). Before 2008, s.13(7A) continued:

on or in respect of any chargeable gain or distribution—

(a) any such distribution as is mentioned in subsection (5A)(b) above and falls to be treated as income of that person for that year shall be regarded as forming the highest part of the income on which he is chargeable to tax for the year;

Most forms of distribution by a non-resident company are exempt in the hands of a corporate investor so they do not benefit from company distribution relief.

53.23.3 *HMRC examples*

The CG Manual tries to provide two straightforward worked examples.

"(b) any gain accruing in that year on the disposal by that person of any asset representing his interest as a participator in the company shall be regarded as forming the highest part of the gains on which he is chargeable to tax for that year;
(c) where any such distribution as is mentioned in subsection (5A)(b) above falls to be treated as a disposal on which a gain accrues on which that person is so chargeable, that gain shall be regarded as forming the next highest part of the gains on which he is so chargeable, after any gains falling within para (b) above; and
(d) any gain treated as accruing to that person in that year by virtue of subsection (2) above shall be regarded as the next highest part of the gains on which he is so chargeable, after any gains falling within para (c) above."

The CG Manual provides:

57375. Tax adjustment and reliefs: Tax relief ordering rules: Section 13(7A) TCGA 1992 [April 2011]

Before tax year 2008-09, where the events which could give rise to relief under section 13(5A) and (7) occurred within a single tax year, there could, in certain circumstances, be computational problems. To prevent this subsection (7A) set out the order of priority to be given to each tax charge. In ascertaining for the purposes of subsections (5A) and (7) the amount of CGT or IT which is chargeable on a person for a year, the order was

a. any distribution which is chargeable as income is treated as the top slice of income for that year

b. any gain accruing on the disposal of any asset representing the participator's interest in the non- resident company is treated as the top slice of gains for that year

c. any gain accruing on a capital distribution is treated as the second slice of gains for that year

d. the gain attributed to the participator under Section 13 is treated as the third slice of gains for that year.

In 2008-09 and later years Capital Gains Tax is charged at a fixed rate regardless of an individual's income and so these priority rules are not necessary. [Author's note: the provision might have been retained to deal with the CGT annual exemption, but that is trivial.]

The first sets s.13 tax against a dividend. The second sets it against a capital distribution:

> **57365. Examples of relief under Section 13(5A) TCGA 1992 on a distribution to participators** [April 2011]
> This example illustrates the operation of Section 13(5A) TCGA 1992 if the company realises a gain and distributes an amount in respect of the gain to participators.
> ***Facts***
> - A UK resident shareholder owns half the shares in a non-resident close company. The company structure is straightforward and the UK resident is a 50% participator. The shareholder does not claim the remittance basis.
> - In January 2009 the non-resident company sells an asset realising a gain of £100,000.
> - The UK resident has no other gains in 2008-09 but is chargeable to Capital Gains Tax at 18%.
> - In June 2009 the company makes a distribution of £100,000 to its shareholders. The UK resident is chargeable at 40% on the amount received.[42]
>
> ***Capital Gains Tax treatment***
> January 2009 - The ordinary rules of Section 13 TCGA 1992 apply. Half the gain of £100,000 is attributable to the shareholder and is chargeable to Capital Gains Tax in 2008-09. The tax due is
>
> | | |
> |---|---|
> | Section 13 gain | £50,000 |
> | less annual exempt amount | -£ 9,600 |
> | Gain | £40,400 |
> | **CGT @ 18%** | **£ 7,272** |
>
> June 2009 – The tax paid under section 13(2) is available for set off. The Income Tax due on the distribution for 2009-10 is
>
> | | |
> |---|---|
> | Distribution | £50,000 |
> | IT @ 40% | £20,000 |
> | less Section 13 tax | -£ 7,272 |
> | Tax due | £12,728 |

42 The rate of tax would not normally be 40%. The error arose because the author amended the dates of the text of the example in order to appear up to date (the earlier text is preserved in the 7th edition of this work) but (somewhat negligently) did not make the consequential amendment to the rate which should follow from the change of date.

57366. Examples of relief: Section 13(5A) TCGA 1992: Company dissolved: Payment to participators [September 2012]

This example illustrates the operation of Section 13(5A) TCGA 1992 if the company realises a gain, is then dissolved and there is a payment to the participators.

Facts

A UK resident shareholder owns half the shares in a non-resident close company. The company structure is straightforward and the UK resident is a 50% participator.

- The shares cost £10,000 in July 2009.
- In March 2010 the non-resident company sells an asset realising a gain of £100,000.
- The UK resident has no other gains in 2009-2010 but is chargeable to Capital Gains Tax at 18%.
- In July 2011 the non-resident company is dissolved. There is an excess of assets over liabilities. The liquidator makes a capital distribution to shareholders. The total sum distributed to shareholders is £200,000.
- The UK resident has no other gains in 2011-12 but is chargeable to Capital Gains Tax at 28%.

Capital Gains Tax treatment

March 2010 - The ordinary rules of Section 13 TCGA 1992 apply. Half the gain of £100,000 is attributable to the shareholder and is chargeable to Capital Gains Tax in 2009-10. The tax due is:

Section 13 gain	£50,000
Less annual exempt amount (say)[43]	-£10,000
	£40,000
CGT @ 18%	£ 7,200

June 2011 - As an amount in respect of the whole of the gain has been distributed, the whole of the tax paid is available for set off. But a capital gain has now accrued to the shareholder because a capital distribution has been received from the liquidator. Section 122 TCGA 1992 applies. The Capital Gains Tax liability for 2011-12 is

Proceeds	£100,000
Less cost	- £ 10,000
Gain	£ 90,000

43 The correct figure is £10,100 but the author presumably composed the example before the amount of the annual exemption was known.

Less annual exempt amount (say)[44]	-£ 10,500
	£ 89,500[45]
CGT @ 28%	£ 25,060
Less Section 13 tax	-£ 7,200
Tax due	£ 17,860

53.23.4 *Time limit for distribution*

Section 13(5B) TCGA sets out the time limit for company distribution relief:

> The period referred to in subsection (5A)(b) above is the period of three years from—
>
> (a) the end of the period of account of the company in which the chargeable gain accrued, or
>
> (b) the end of the period of twelve months beginning with the date on which the chargeable gain accrued,
>
> whichever is earlier.

The drafting is convoluted, but in plain English the time limit is the earlier of:

(1) three years from the end of the accounting period; or

(2) four years from the date of the gain.

The CIOT have argued that this time restriction has no logical rationale and should be removed.[46] But no-one has taken any notice.

53.23.5 *Remittance basis taxpayer participator*

Company distribution relief applies to foreign s.13 gains which are taxed on a remittance basis, but the relief only sets tax on the s.13 gain against tax on the distribution, so the relief does not apply unless the s.13 gain is remitted (so tax is paid on it), and the distribution is remitted (so tax actually paid on the distribution qualifies for relief). Thus suppose:

(1) Year 1: A company realises a gain deemed to accrue to a remittance

---

44 The correct figure is £10,600 but the author presumably composed the example before the amount of the annual exemption was known.

45 The author of the Manual appears to have made a careless arithmetical mistake here. The reader is invited to speculate what penalty HMRC would think appropriate if a tax return contained as many errors as the two worked examples in the HMRC Manual.

46 CIOT, "Reform of two anti-avoidance provisions" (October 2012) accessible *http://www.tax.org.uk/Resources/CIOT/Documents/2012/10/121002_s13_trans_assets_CIOT.pdf*

basis taxpayer under s.13 but not taxed as it is not remitted.

(2) Year 3: The company declares a dividend in respect of the gain. The dividend is RFI but not taxable as it is not remitted.

(3) Year 10: the gain and the dividend are remitted.

The relief applies. The time limit is met as the distribution was within 3 years of the relevant time, the time that the gain accrued to the company. The date of the remittance is not relevant.

53.24 Company disposal relief

"Company disposal relief" is my term for the relief under s.13(7) TCGA which provides:

> The amount of CGT paid by a person in pursuance of subsection (2) above (so far as neither reimbursed by the company nor applied under subsection (5A) above for reducing any liability to tax) shall be allowable as a deduction in the computation under this Act of a gain accruing on the disposal by him of any asset representing his interest as a participator in the company.

This sets tax against the gain, so it is not generous. The CG Manual provides:

> **57370. Tax adjustment and reliefs: disposal of interest by UK resident participator: Section 13(7) TCGA 1992** [April 2011]
> [The manual summarises s.13(7) and continues] No deduction is due if the tax was paid by the non-resident company, see CG57390. Indexation allowance is not given on the tax paid. Although the tax is allowed as a deduction in computing the gain it is not expenditure within Section 38(1)(a) TCGA 1992 or Section 38(1)(b) TCGA 1992. Therefore it is not relevant allowable expenditure for indexation allowance purposes, see CG17240.
> NOTE. If a taxpayer is within the charge to Capital Gains Tax, neither indexation allowance nor taper relief apply to disposals of assets on or after 6 April 2008. Previously indexation allowance had been frozen at April 1998. For indexation allowance see CG17207+ and for taper relief see CG17895+.

The point about indexation would only be relevant to a corporate taxpayer.

> **57371 Disposal of interest/shares by UK resident** [April 2011]
> This example illustrates the deduction under Section 13(7) TCGA 1992 if the taxpayer sells shares in a non-resident company whose gains have been apportioned under Section 13 TCGA 1992.
> **Facts**

- June 2008 a taxpayer buys 500 out of the 750 issued shares in X Ltd, a non-resident close company, at a cost of £100,000.
- March 2009 X Ltd realises a gain of £6,000. 500/750×£6,000 = £4,000 is apportioned to the taxpayer. The amount is included in the 2008-09 Capital Gains Tax assessment. The taxpayer is liable at 18% and tax of £720 is due.
- August 2010 the taxpayer sells the shares for £130,000.

Chargeable Gain

		£
Disposal proceeds		130,000
less Cost	100,000	
less Section 13(7) deduction	720	-100,720
Chargeable gain		**29,280**
less Annual exempt amount (say)		-10,200
Amount chargeable		19,080

NOTE. If a taxpayer is within the charge to Capital Gains Tax, neither indexation allowance nor taper relief apply to disposals of assets on or after 6 April 2008. Previously indexation allowance had been frozen at April 1998. For indexation allowance see CG17207+ and for taper relief see CG17895+.

This is wholly theoretical as in this situation the taxpayer would and should claim company distribution relief under s.13(5A). The only possible use of company disposal relief would be
(1) to increase an allowable loss, or
(2) in cases where the disposal gave rise to a loss or relief for other losses would obviate the gain.

53.25 Reimbursement by non-resident company

Tax on the s.13 gain is due from the UK resident participator and not from the company. The participator has no statutory right of indemnity against the company. But it is possible that the company might pay the tax on the s.13 gain voluntarily, or perhaps a participator might protect himself by entering into a contract requiring the company to pay the tax.

Section 13(11) TCGA provides what I call "reimbursement relief":

> If any tax payable by any person by virtue of subsection (2) above is paid
> [a] by the company to which the chargeable gain accrues,
> [b] or in a case under subsection (9) above is paid by any such other company,
> the amount so paid shall not for the purposes of income tax, CGT or corporation tax be regarded as a payment to the person by whom the tax was originally payable.

The CG Manual provides a précis:

57390. Payment of UK tax by NR company [April 2011]
The non-resident company may pay the UK tax due from a UK resident when gains have been apportioned to him under TCGA 1992, S 13. If so, TCGA 1992, S 13 (11) provides that the payment of the tax on behalf of the UK resident does not give rise to any further liability in the hands of the UK resident. You do not treat the payment as income of the resident or as a capital distribution in respect of the shares in the non-resident company. TCGA 1992, S 13 (11) will also apply if the liability arises because a UK resident has an indirect shareholding in the non-resident company. The liability can be paid by any of the non-resident close companies in the chain.

Reimbursement is better than an income distribution in respect of the gain as the reimbursement is tax free, whereas an income distribution is subject to income tax (at income tax rates) with the benefit of CGT relief (at CGT rates). Of course, the non-resident company will need to consider whether it would be proper to make the reimbursement as a matter of company law (eg are there other shareholders who may be prejudiced?).

53.26 Loss accruing to non-resident company

A participator may deduct losses which accrue to them personally against s.13 gains in accordance with the usual rules.

Different rules apply to losses accruing to the non-resident company which I call **"company losses"**.

53.26.1 *Arising basis participator*

Section 13(1)(2) TCGA only attributes the company's gains (not losses) to a participator, so in the absence of further provision a participator would have no relief for company losses. Section 13(8) TCGA provides some relief for company losses:

> [a] So far as it would go to reduce or extinguish chargeable gains accruing by virtue of this section to a person in a year of assessment this section shall apply in relation to a loss accruing to the company on the disposal of an asset in that year of assessment as it would apply if a gain instead of a loss had accrued to the company on the disposal,
> [b] but shall only so apply in relation to that person;
> [c] and subject to the preceding provisions of this subsection this section shall not apply in relation to a loss accruing to the company.

The CG Manual correctly provides:

> **CG57295 - NR companies: losses: - general** [April 2011]
> S13 TCGA 1992 is concerned with the apportionment of gains not losses. If the disposal by the non-resident company gives rise to a loss then that loss cannot be apportioned to UK residents for them to set it off against their other gains. However, the loss can be set-off
> - against gains made by the same company in the same year of assessment
> - against gains made by other non-resident companies which have been apportioned to the taxpayer in the same year of assessment.
>
> *Losses of the same company (S13(8) TCGA 1992)*
> If the non-resident company makes gains and losses in the same year of assessment the losses can be set off against the gains. Any surplus losses cannot be carried forward or back to set-off against gains arising in a different year of assessment.
> *Losses of different companies*
> If the UK resident is a participator in more than one non-resident company the proportion of the gains and losses of those companies apportioned to the UK resident can be set off against each other in the same year of assessment. Any surplus loss cannot be carried forward or back to set against the gains arising in different years of assessment.

Careful timing of disposals is needed to ensure that the loss relief is used: company losses should not exceed s.13 gains in any year.

What is the meaning of s.13(8)[b] that loss relief shall only so apply in relation to that person? Perhaps it is intended to cover the situation where:

(1) A owns a company.
(2) The company disposes of asset 1 and realises a loss.
(3) A transfers the company to B.
(4) The company disposes of asset 2 and realises a gain (in the same year).

Perhaps the intention is that the loss is not available to B. Though that is far from clear.

53.26.2 *Remittance basis participator*

Section 14A(4) TCGA 1992 provides:

> If—
>
> (a) the deemed chargeable gain is a foreign chargeable gain (within the meaning of section 12),
> (b) section 809B, 809D or 809E of ITA 2007 (remittance basis)

applies to the individual for the year mentioned in subsection (1), and

(c) any of the deemed chargeable gain is remitted to the UK in a tax year after that year,

the chargeable gain treated under section 12(2) as accruing may not be reduced or extinguished under section 13(8).

Careful planning is needed to ensure that relief is available for company losses.

53.26.3 *Non resident trust participator*

The position is similar as for a UK participator. The aim should be that company losses should not exceed s.13 gains in any year, so that the losses can be set against the gains under s.13(8) TCGA.

53.26.4 *Loss relief: Policy issues and reform*

At first sight the rules for company losses are unfair and anomalous compared to other losses:

(1) Company losses can only be set against s.13 gains.

(2) Company losses can only be set against current year s.13 gains and cannot be carried forward.

However there is a good reason not to apportion company losses in the same way as gains, as there may be scope for acquisition of companies in order to acquire their losses; in the corporate area there are rules for pre-acquisition losses, but no-one would want to introduce that complexity into CGT.

There is a better case for carry forward of company losses, to set against other s.13 gains, but even here the possibility of buying in losses prevents reform. Section 16A TCGA prevents more obvious planning but is not a substitute for properly targeted rules.

A reasonable reform would be to allow company losses to be set only against s.13 gains but to be carried forward for a limited period, say 4 or 6 years Indeed it would be reasonable to restrict all losses from being carried forward for more than that period.

53.27 Negligible value claims

Section 24 TCGA provides:

(1A) A negligible value claim may be made by the owner of an asset ("P") if condition A or B is met.

The usual case is condition A:

> (1B) Condition A is that the asset has become of negligible value while owned by P.[47]

The claim should be made by the non-resident company, though in practice HMRC have accepted claims by UK resident participators.[48] It is possible that the non-resident company might authorise a person to make claims on its behalf, especially if that person is the direct or indirect owner and subject to tax under s.13 on 100% of the company's gains.

Section 24(2)(a) TCGA provides the relief:

> Where a negligible value claim is made:
>
> (a) this Act shall apply as if the claimant had sold, and immediately reacquired, the asset at the time of the claim or (subject to paragraphs (b) and (c) below) at any earlier time specified in the claim, for a consideration of an amount equal to the value specified in the claim.

Section 24(2)(b) TCGA specifies the limit of the carry back:

> (b) An earlier time may be specified in the claim if:
>
> (i) the claimant owned the asset at the earlier time; and
>
> (ii) the asset had become of negligible value at the earlier time; and either
>
> (iii) for capital gains tax purposes the earlier time is not more than two years before the beginning of the year of assessment in which the claim is made; or
>
> (iv) for corporation tax purposes the earlier time is on or after the first day of the earliest accounting period ending not more than two years before the time of the claim.

The time limit here is that in (iv), on or after the first day of the earliest accounting period of the non-resident company ending not more than two years before the time of the claim, since s.13(11A) TCGA provides:

> For the purposes of this section the amount of the gain or loss accruing at any time to a company that is not resident in the UK shall be computed (where it is not the case) as if that company were within the charge to corporation tax on capital gains.

---

47 Condition B (not discussed) arises when the disposal by which P acquired the asset was a no gain/no loss disposal.

48 Private correspondence.

53.28 Group relief

A full discussion of CG group relief requires a book to itself. This section focusses on the problems of non-resident groups within s.13.

53.28.1 *Definition of group*

In outline, the definition of group is in s.170(3) TCGA:

> Subject to subsections (4) to (6) below—
>
> (a) a company (referred to below and in sections 171 to 181 as the "principal company of the group") and all its 75 per cent subsidiaries form a group and, if any of those subsidiaries have 75 per cent subsidiaries, the group includes them and their 75 per cent subsidiaries, and so on, but
>
> (b) a group does not include any company (other than the principal company of the group) that is not an effective 51 per cent subsidiary of the principal company of the group.

Under this definition both resident and non-resident companies may form a group.

53.28.2 *UK group relief*

However s.171 TCGA, which provides CG group relief, (more or less) restricts the relief to UK group companies:

> (1) Where—
>
> (a) a company ("company A") disposes of an asset to another company ("company B") at a time when both companies are members of the same group, and
>
> *(b) the conditions in subsection (1A) below are met,*
>
> company A and company B are treated for the purposes of corporation tax on chargeable gains as if the asset were acquired by company B for a consideration of such amount as would secure that neither a gain nor a loss would accrue to company A on the disposal.
>
> *(1A) The conditions referred to in subsection (1)(b) above are—*
>
> *(a) [i] that company A is resident in the UK at the time of the disposal, or*
>
> *[ii] the asset is a chargeable asset*[49] *in relation to that company*

49 "Chargeable asset" has a commonsense definition in s.171(1A)(b) TCGA: " For this purpose an asset is a "chargeable asset" in relation to a company at any time if, were the asset to be disposed of by the company at that time, any gain accruing to the

immediately before that time, and

(b) [i] that company B is resident in the UK at the time of the disposal, or

[ii] the asset is a chargeable asset in relation to that company immediately after that time.

I refer to this as **"UK group relief"**.

The relief only applies where a member of a group of companies disposes of an asset to another member of the same group. The general requirement is therefore that there should be both a disposal by a group company and an acquisition by a group company. Suppose A Ltd owns B Ltd, B Ltd is put into liquidation and its asset is transferred to A Ltd. There are two disposals:

(1) B Ltd disposes of the asset which is transferred to A Ltd: this disposal qualifies for group relief.

(2) A Ltd disposes of its shares in B Ltd (s.122 TCGA). That disposal does not qualify for group relief.

Section 171 goes on to set out 11 exceptions where group relief does not apply; these are not discussed here.

Group relief is compulsory but it should be possible to arrange that companies are not part of a group, by issuing shares or arranging some other breach of the definition of a group, and so exclude the relief.

53.28.3 *Non-resident group relief*

Section 14 TCGA provides:

> (1) This section has effect for the purposes of section 13.
> (2) The following provisions ...
> (b) section 171 (except subsections (1)(b) and (1A)) ...
> shall apply in relation to non-resident companies which are members of a non-resident group of companies as they apply in relation to companies which are members of a group of companies.

This extends UK group relief to a transfer from a non-resident group company to another non-resident group company. I refer to this as **"non-resident group relief"**.

---

company would be a chargeable gain and would by virtue of section 10B form part of its chargeable profits for corporation tax purposes."

53.28.4 *Meaning of "non-resident group"*

Section 14(4) TCGA provides a commonsense definition:

> For the purposes of this section—
>
> (a) a "non-resident group" of companies—
>
> (i) in the case of a group, none of the members of which are resident in the UK, means that group, and
>
> (ii) in the case of a group, 2 or more members of which are not resident in the UK, means the members which are not resident in the UK;
>
> (b) "group" shall be construed in accordance with section 170.[50]

The CG Manual provides 3 examples:

> **57401. NR group** [September 2012]
> ...[51]
>
> EXAMPLE 1
>
> >
>
> B Ltd and C Ltd form a non-resident group.
> A Ltd is not a member of the non-resident group but it does have the effect of overseas "grouping" B Ltd and C Ltd.
>
> EXAMPLE 2
>
> >
>
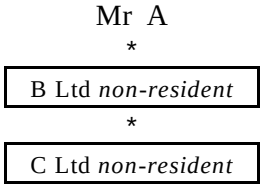
> B Ltd and C Ltd do not form a non-resident group because they are not members of any group.

---

50 See 53.28.1 (Definition of group).

51 I omit some text, which has not been properly updated since the FA 2000; however the points made in the HMRC examples are correct. I have created the diagrams to increase clarity.

EXAMPLE 3



B Ltd and C Ltd form a non-resident group because all of the companies in the group are not resident.

53.28.5 *Scope of non-resident group relief*

The CG Manual raises the question whether non-resident group relief applies for all participators or just for company participators subject to corporation tax:

> **57404. Section 14 – UK resident** [April 2011]
> As shown in Example 3 in CG57401 [set out above] Section 14 TCGA 1992 applies even if the UK resident shareholder[52] is not a company. Some taxpayers and tax advisers are uncertain about this because Section 171 TCGA 1992 includes the words 'so far as relates to Corporation Tax on chargeable gains'.[53] They suggest this means Section 14 can only apply if the Section 13 TCGA 1992 charge would be to Corporation Tax on chargeable gains. We do not take this restrictive view. This practice was published in Tax Bulletin, Issue 7, page 74.[54]

---

52 This should read: "participator".

53 The Manual is more than a decade out of date; since 2000 the wording is "for the purposes of corporation tax on chargeable gains". But it comes to the same thing.

54 May 1993, now classified as RI 43 which provides:

> "**Non-resident companies: attribution of gains to UK shareholders: 'non-resident groups'**
> In some circumstances gains realised by non-resident companies may be attributed to shareholders who are resident or ordinarily resident in the UK. The main provisions are in TCGA 1992 s 13. The scope of the legislation is not quite as wide ranging as it may seem because some of the group provisions which apply to UK groups for the taxation of gains—for example those relating to intra-group transfers—are imported for s 13 purposes from elsewhere in TCGA 1992 (see s 14). An intra-group transfer by members of a 'non-resident group' would thus be treated as taking place at no gain and no loss so there would be no gain on the disposal to attribute to UK shareholders.
> In relation to the application of the no gain/no loss rule in these circumstances [HMRC] have been asked whether the words 'so far as relates to corporation tax on

At the time it was published, this seemed a somewhat cavalier view; HMRC did not explain why one should apply to non-companies (not within CT) a relief restricted by the (then) words 'so far as relates to CT on chargeable gains'. But the legislation has since changed, and from 1998 the HMRC view is supported by s.13(11A) TCGA which provides that the non-resident company's gain is computed as if the non-resident company were within the charge to CT.[55]

Normally the HMRC view favoured the taxpayer and so it was never challenged. Now the pre-1998 position is (more or less) of historic interest only; though one could imagine cases where it would be in a taxpayer's interest to argue that group relief did not apply on a pre-1998 inter-group disposal.

What about a disposal from a non-resident group company to a UK resident group company? Non-resident group relief does not apply because the companies are not both members of a non-resident group; it is suggested that relief is available under UK group relief, since the disposing company's gain is (for s.13 purposes) deemed to be within the charge to CT. In practice this question may not arise, as a transfer from a non-resident company (within the scope of s.13) to a UK company in the same group would be unusual.

53.29 Group relief clawback charge

Section 14(3) TCGA provides:

> Section 179 (except subsections (1)(b) and (1A)) shall apply for the purposes of section 13 as if for any reference therein to a group of companies there were substituted a reference to a non-resident group of companies, and as if references to companies were references to companies not resident in the UK.

So the clawback rules for which apply to UK group relief are incorporated

---

chargeable gains' in TCGA 1992 s 171 limit its application to situations where the gain on the intra-group transaction would otherwise be within the charge to corporation tax.

In [HMRC's] view the no gain/no loss rule is not limited in this way. The benefit of the rule is given whether the shareholder is assessable to CGT or to corporation tax. A similar view is also taken when considering the operation of any of the other sections referred to in TCGA 1992 s 14."

55 See 53.5 (Computation of non-resident company gains on CT principles).

into non-resident group relief. Amended as s.14(3) directs, s.179 TCGA (in outline) provides:

> (1) This section applies where—
>
> (a) a company not resident in the UK ("company A") acquires an asset from another company not resident in the UK ("company B") at a time when company B is a member of a non-resident group,
>
> ...
>
> (c) company A ceases to be a member of that non-resident group within the period of six years after the time of the acquisition.
>
> References in this section to a company not resident in the UK ceasing to be a member of a non-resident group of companies not resident in the UK do not apply to cases where a company not resident in the UK ceases to be a member of a non-resident group in consequence of another member of the non-resident group ceasing to exist...

53.29.1 *Two or more associated companies leave group at same time*

Amended as s.14(3) directs, s.179 TCGA (in outline) provides:

> (2) Where 2 or more associated[56] companies not resident in the UK cease to be members of the non-resident group at the same time, subsection (1) above shall not have effect as respects an acquisition by one from another of those associated companies not resident in the UK.
>
> (2A) Where—
>
> (a) a company not resident in the UK ("company A") that has ceased to be a member of a non-resident group of companies not resident in the UK ("the first non-resident group") acquired an asset from another company not resident in the UK ("company B") which was a member of that non-resident group at the time of the acquisition,
>
> (b) subsection (2) above applies in the case of company A's ceasing to be a member of the first non-resident group so that subsection (1) above does not have effect as respects the acquisition of that asset,
>
> (c) company A subsequently ceases to be a member of another non-resident group of companies not resident in the UK ("the second non-resident group"), and
>

>
> subsection (1) above shall have effect in relation to company A's ceasing to be a member of the second non-resident group as if it had been the second non-resident group of which both companies not resident in the UK had been members at the time of the acquisition.
>
> (2B) For the purposes of subsection (2A) above there is a connection between

---

56 "Associated" is defined in s.179(10) TCGA: "For the purposes of this section (a) 2 or more companies not resident in the UK are associated companies not resident in the UK if, by themselves, they would form a non-resident group of companies not resident in the UK".

the first non-resident group and the second non-resident group if, at the time when company A ceases to be a member of the second non-resident group, the company not resident in the UK which is the principal company of that non-resident group is under the control[57] of—

(a) the company not resident in the UK which is the principal company of the first non-resident group or, if that non-resident group no longer exists, which was the principal company of that non-resident group when company A ceased to be a member of it;

(b) any person or persons who control the company not resident in the UK mentioned in para (a) above or who have had it under their control at any time in the period since company A ceased to be a member of the first non-resident group; or

(c) any person or persons who have, at any time in that period, had under their control either—

(i) a company not resident in the UK which would have been a person falling within para (b) above if it had continued to exist, or

(ii) a company not resident in the UK which would have been a person falling within this paragraph (whether by reference to a company not resident in the UK which would have been a person falling within that paragraph or to a company not resident in the UK or series of companies not resident in the UK falling within this subparagraph)...

53.29.2 *The clawback charge*

Amended as s.14(3) directs, s.179 TCGA (in outline) provides:

(3) If, when company A ceases to be a member of the non-resident group, company A, or an associated company not resident in the UK also leaving the non-resident group, owns, otherwise than as trading stock—

(a) the asset, or

(b) property to which a chargeable gain has been carried forward from the asset on a replacement of business assets,

then, subject to subsection (4) below, company not resident in the UK A shall be treated for all the purposes of this Act as if immediately after its acquisition of the asset it had sold, and immediately reacquired, the asset at market value at that time.

(4) Any chargeable gain or allowable loss accruing to company A on the sale referred to in subsection (3) above shall be treated as accruing to company A at whichever is the later of the following, that is to say—

(a) the time immediately after the beginning of the accounting period of that company not resident in the UK in which or, as the case may be, at the end of which the company not resident in the UK ceases to be a member of the non-resident group; and

(b) the time when under subsection (3) above it is treated as having

57 "Control" is defined in s.179(9A) TCGA.

reacquired the asset;

and sections 138 to 142 of CTA 2010 have effect accordingly as if the actual circumstances were as they are treated as having been.

53.29.3 *Principal company becomes member of another group*

Amended as s.14(3) directs, s.179 TCGA (in outline) provides:

(5) Where, apart from subsection (6) below, a company not resident in the UK ceasing to be a member of a non-resident group by reason only of the fact that the principal company of the non-resident group becomes a member of another non-resident group would be treated by virtue of subsection (3) above as selling an asset at any time, subsections (6) to (8) below shall apply.

(6) The company in question shall not be treated as selling the asset at that time; but if—

(a) within 6 years of that time the company in question ceases at any time ("the relevant time") to satisfy the following conditions, and

(b) at the relevant time, the company in question, or a company not resident in the UK in the same non-resident group as that company, owns otherwise than as trading stock the asset or property to which a chargeable gain has been carried forward from the asset on a replacement of business assets,

the company in question shall be treated for all the purposes of this Act as if, immediately after its acquisition of the asset, it had sold and immediately reacquired the asset at the value that, at the time of acquisition, was its market value.

(7) Those conditions are—

(a) that the company not resident in the UK is a 75 per cent subsidiary of one or more members of the other non-resident group referred to in subsection (5) above, and

(b) that the company not resident in the UK is an effective 51 per cent subsidiary of one or more of those members.

(8) Any chargeable gain or allowable loss accruing to the company not resident in the UK on that sale shall be treated as accruing at the relevant time.

(9) Where—

(a) by virtue of this section a company not resident in the UK is treated as having sold an asset at any time, and

(b) if at that time the company not resident in the UK had in fact sold the asset at market value at that time, then, by virtue of section 30, any allowable loss or chargeable gain accruing on the disposal would have been calculated as if the consideration for the disposal were increased by an amount,

subsections (3) and (6) above shall have effect as if the market value at that time had been that amount greater.

53.30 Reorganisation relief

A full discussion of CGT reorganisation relief requires a book to itself. This section focusses on the problems where a reorganisation is carried out by a non-resident company within s.13.

For individuals and trustees, the TCGA distinguishes between:

(1) a qualifying corporate bond ("QCB")

(2) a non-qualifying corporate bond ("NQCB")

A bond which would otherwise be a QCB be drafted so as not to meet the requirements of a QCB, eg by a provision allowing the holder to redeem in a currency other than sterling. So on a reorganisation, individual or trustee shareholders can opt out of the QCB regime into the NQCB regime.

However, s.117(A1) TCGA provides:

> For the purposes of corporation tax "qualifying corporate bond" means any asset representing a loan relationship of a company;

This rule applies for s.13 purposes. A corporate bond is in principle a loan relationship of a company. Suppose:

(1) A non-resident company within s.13 ("H") holds a subsidiary ("S").

(2) H sells S to a purchaser ("P") in consideration of loan notes of P.

The loan notes may be drafted so as to constitute a NQCB in the hands of individual or trustee shareholders, but for s.13 purposes gains are computed as if the loan note were a QCB.

53.31 Private residence relief

Suppose T owns a non-resident company, which holds residential property that is T's main residence ("the residence"). If the company disposes of the W, and a gain accrues to T, does private residence relief apply? Section 222(1) TCGA provides:

> This section applies to a gain accruing to an individual so far as attributable to the disposal of, or of an interest in—
>
> (a) a dwelling-house or part of a dwelling-house which is, or has at any time in *his* period of ownership been, his only or main residence, or
>
> (b) land *which he has* for his own occupation and enjoyment with that residence as its garden or grounds up to the permitted area.
>
> (emphasis added)

The gain does accrue to an individual, and it is attributable to the disposal of the residence. However, no relief applies because:

(1) the condition in (b) is not met: there is no land which T *has*;

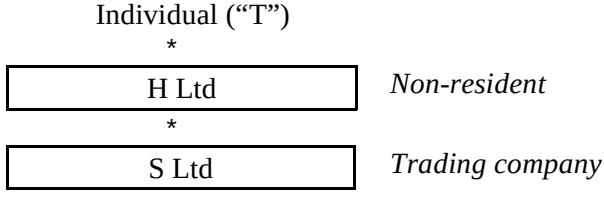
(2) the condition in (a) is not met: the company's period of ownership is not *his* period of ownership.

T might argue that the section should be read non-literally, but it is not absurd to deny private residence relief when a residence is held through a company. The policy is consistent with s.13(11A) TCGA which computes gains as if the company were within the charge to CT, and no-one suggests a UK resident company qualifies for private residence relief.

Likewise if the company is held by a trust, no relief applies to the trustees and the gain on a disposal of the property by the company is a s.2(2) amount (s.87 trust gain) or a s.86 trust gain.

53.32 Entrepreneurs' relief: Trading co held by non-resident company

Suppose an individual holds a non-resident company which holds a trading company, thus:



If T owned the shares in S personally, T can in principle qualify for entrepreneurs' relief on a disposal of S, assuming the necessary conditions are satisfied.[58]

Suppose H disposes of S. The s.13 gain which will accrue to T on that disposal does not qualify for entrepreneurs' relief, because it is not a

58 See 49.5 (Interaction of remittance basis and entrepreneurs' relief).

material disposal of business assets (as defined in s169I TCGA).

Suppose H is wound up after the disposal of S. The gain accruing to T on the disposal of H can qualify for entrepreneurs' relief and so in principle qualifies for the 10% rate.

T will also be able to claim company distribution relief[59] so that tax charged under s13 on the disposal of S will be set against tax on the gain from disposal of H. However the s.13 gain will be charged at 28% and the gain on the disposal of H will be charged at 10%. The former is likely to eliminate the latter but the benefit of entrepreneurs' relief will be lost.

53.33 Administration and appeals

The CG Manual provides:

> **57270. Liaison: other offices** [December 2011]
> As you are required to make an apportionment that is just and reasonable by reference to the interests of all of the participators, you will need to liaise with other officers dealing with participators in the non-resident company. In appropriate cases you should agree that a single nominated officer co-ordinate the progress of the enquiries, or conduct the enquiry in respect of some or all of the participators, for example, where all of the participators are represented by the same agent. In any case where a non-resident trust is involved Specialist PT (Residence), see CG57395, should be notified and will normally act as the office co-ordinating HMRC's enquiries.
> ... It will usually be appropriate to ensure that all appeals relating to the extent of the interests of participators with regard to a particular gain are heard at the same hearing, see AH1795.

53.34 Tax return: Disclosure of s.13 gains

S.13 gains are entered in box 33 of SA108 (Capital Gains summary) 2013/14. SA108 Notes 2014 provides:

> In certain circumstances, you may have to pay CGT on gains made by a company ... in which you have an interest. These include gains made by certain types of company not resident in the UK and in which you are a participator... Include all such gains in box 33...
> **Box 33 Gains in the year, before losses**
> Enter here the total figure of all gains on disposals of property and other assets. This figure should be the gains after any relief, claims or

59 See 53.23 (Company distribution relief).

elections have been taken into account but before any losses are deducted

Also include gains attributed to you where personal losses can be set off ... Please note that gains in the list above [including s.13 gains] do not result from a disposal of an asset in the year and should not include disposal proceeds for such gains in box 31.

CHAPTER FIFTY FOUR

CAPITAL LOSSES

54.1 Capital losses: Introduction

This chapter considers CGT relief for losses.

In this chapter:

"**Personal losses**" means losses accruing to individuals.

"**Trust losses**" means losses accruing to trustees.

I concentrate on the themes of this book, but it is necessary to look at the general rules first. I do not consider the rules for losses arising on disposals to connected persons.

54.1.1 *Cross references*

The following topics are considered elsewhere:

35.21 (Losses)

53.26 (Loss accruing to non-resident company)

49.9.4 (Losses accruing to person who qualifies for DT relief on gains)

54.2 Deduction of losses

Section 2(2) TCGA provides for the deduction of losses against gains:

> Capital gains tax shall be charged on the total amount of chargeable gains accruing to the person chargeable in the year of assessment or, where subsection (1B) applies, the UK part of that year, after deducting—
>
> (a) any allowable losses accruing to that person in that year of assessment or that part (as the case may be), and
>
> (b) so far as they have not been allowed as a deduction from chargeable gains accruing in any previous year of assessment, any allowable losses accruing to that person in any previous year of assessment (not earlier than the year 1965–66).

Section 2(2) refers to a "person", so it applies to individuals, trustees,

companies and PRs.

Section 2(2)(a) deducts current year losses and s.2(2)(b) deducts brought forward losses. Section 2(3) TCGA disallows carry-back of losses (unnecessarily) and provides two commonsense restrictions on loss relief:

> [a] Except as provided by section 62,[1] an allowable loss accruing in a year of assessment shall not be allowable as a deduction from chargeable gains accruing in any earlier year of assessment, and
> [b] relief shall not be given under this Act more than once in respect of any loss or part of a loss, and
> [c] shall not be given under this Act if and so far as relief has been or may be given in respect of it under the Income Tax Acts.

The restriction on carry-back of losses means that careful timing of disposals may make the difference between losing and using the losses.

54.3 Allowable loss

Section 2(2) TCGA refers to "allowable" losses. This is a label which brings in a large number of rules; for whenever the drafter wishes to disallow a loss they direct that it is not allowable.

Section 16(1) TCGA first provides a fairly commonsense rule to compute the amount of a loss:

> Subject to sections 261B, 261D and 263ZA and except as otherwise expressly provided the amount of a loss accruing on a disposal of an asset shall be computed in the same way as the amount of a gain accruing on a disposal is computed.

Section 16(2) TCGA then defines "allowable loss":

> Except as otherwise expressly provided, all the provisions of this Act which distinguish gains which are chargeable gains from those which are not, or which make part of a gain a chargeable gain, and part not, shall apply also to distinguish losses which are allowable losses from those which are not, and to make part of a loss an allowable loss, and part not; and references in this Act to an allowable loss shall be construed accordingly.

Section 16(2A) TCGA requires a claim to be made when the loss accrues (which may be some years before the loss is used):

---

1 See 54.5 (Carry-back of losses on death).

> A loss accruing to a person in a year of assessment shall not be an allowable loss for the purposes of this Act unless, in relation to that year, he gives a notice to an officer of the Board quantifying the amount of that loss; and sections 42 and 43 of the Management Act shall apply in relation to such a notice as if it were a claim for relief.

In this chapter I assume losses are allowable.

54.4 Loss accruing to non-resident

Section 16(3) TCGA provides:

> [a] A loss accruing to a person in a year of assessment where the residence condition is not met (see section 2(1A))[2] shall not be an allowable loss for the purposes of this Act
> [b] unless, under section 10 or 10B, he would be chargeable to tax in respect of a chargeable gain if there had been a gain instead of a loss on that occasion.[3]

In short, a loss accruing to a non-resident is not an allowable loss. This gives a symmetry with the rule that a gain accruing to such a person is not in principle subject to CGT.

Section 16(3) refers to a "person", so it applies to individuals, trustees, companies and PRs. However, there is some relief for losses of non-resident trusts within s.86, 87 TCGA,[4] and non-resident companies within s.13 TCGA.[5]

54.4.1 *Loss accruing in split year*

Section 16 (3A) TCGA provides:

> If the person is an individual and the year is a split year as respects that individual, subsection (3) also applies to a loss accruing to the individual in the overseas part of that year.

This disallows a loss accruing in the overseas part of a split year.

54.4.2 *Planning*

The realisation of losses outside the scope of CGT is wasteful. Unless the

---

2 See 49.1.2 (CGT residence condition).
3 The situation in s.16(3)[b] is very rare: see 49.8 (Non-resident trade with UK branch).
4 See 54.6 (Loss accruing to non-resident trustees).
5 See 53.26 (Loss accruing to non-resident company).

temporary non-residence rules apply:

(1) An individual leaving the UK may consider realising losses before they become non-resident.

(2) An individual planning to come to the UK may postpone the disposal of assets with inherent losses until they become UK resident.

54.5 Carry-back of losses on death

Section 62(2) TCGA provides for carry-back of losses on death:

> Allowable losses sustained by an individual in the year of assessment in which he dies may, so far as they cannot be deducted from chargeable gains accruing in that year, be deducted from chargeable gains accruing to the deceased in the 3 years of assessment preceding the year of assessment in which the death occurs, taking chargeable gains accruing in a later year before those accruing in an earlier year.

This rule perhaps made more sense when introduced in 1965, as a quid pro quo for the CGT charge on death. However following the introduction of the tax free uplift on death in 1971, it seems unnecessary; its repeal would be a small but useful simplification.

Section 62(2A) TCGA provides:

> Amounts deductible from chargeable gains for any year in accordance with subsection (2) above shall not be so deductible from any such gains so far as they are gains that are treated as accruing by virtue of section 87 or 89(2) (read, where appropriate, with section 10A).

Thus the disallowance of personal losses against s.87 gains continues on death. That is consistent with the general rule.[6]

54.6 Loss accruing to non-resident trustees

54.6.1 *Section 87 and trust losses*

Section 87(4) TCGA provides:

> The section 2(2) amount for a tax year for which this section applies to the settlement is—
>
> (a) the amount upon which the trustees would be chargeable to tax under section 2(2) for that year if they were resident in the UK in that year ...

6 See 54.7 (Disallowance of personal losses of beneficiary against s.87 gains).

Under this provision, trust losses in a tax year could be set against trust gains in the same year, in computing the s.2(2) amount. But trust losses of an earlier year in which the trustees were not resident could not be carried forward and set against trust gains of a later year, because s.16(3) TCGA disallows such losses.[7] However s.97(6) TCGA allows losses to be carried forward:

> Section 16(3) shall not prevent losses accruing to trustees in a year of assessment for which section 87 of this Act or section 17 of the 1979 Act applied to the settlement from being allowed as a deduction from chargeable gains accruing in any later year (so far as they have not previously been set against gains for the purposes of a computation under either of those sections or otherwise).

Carried forward trust losses will usually be used to reduce s.2(2) amounts of a subsequent year. If the trust became UK resident they could be set against gains to reduce the trustees' own liability. A trust is therefore sometimes better than absolute ownership by a remittance basis taxpayer, whose personal losses may be disallowed.

For the interaction of trust losses and sch 4C TCGA, see 52.16.6 (Losses of trust within s.86).

54.6.2 *Section 86 and trust losses*

Under s.86 TCGA the settlor is taxed on what I call "**s.86 trust gains**", which is the amount on which trustees would be charged to tax if UK resident.[8] Under this provision trust losses in a tax year could be set against trust gains in the same year, in computing the s.86 gains. But trust losses of an earlier year in which the trustees were not resident could not be carried forward and set against trust gains of a latter year because s.16(3) TCGA disallows such losses. However para 1(2) sch 5 TCGA provides:

> In construing section 86(1)(e) as regards a particular year of assessment [that is, in order to ascertain the s.86 trust gains] —
>
> (a) any deductions provided for by section 2(2) shall be made in respect of disposals of any of the settled property originating from the settlor, and

7 See 54.4 (Loss accruing to non-resident).

8 See 50.10 (Section 86 trust gains condition).

(b) section 16(3) shall be assumed not to prevent losses accruing to trustees in one year of assessment from being allowed as a deduction from chargeable gains accruing in a later year of assessment (so far as not previously set against gains).

For losses and sch 4B TCGA, see 52.16.6 (Losses of trust within s.86).

54.6.3 *Loss accruing before s.86 conditions satisfied*

Para 1(6) sch 5 TCGA provides:

> The following rules shall apply in construing section 86(1)(e) as regards a particular year of assessment ("the year concerned") in a case where the trustees fall within section 86(2)(a)—
>
> (a) if the conditions mentioned in section 86(1) are not fulfilled as regards the settlement in any year of assessment falling before the year concerned, no deductions shall be made in respect of losses accruing before the year concerned;
>
> (b) if the conditions mentioned in section 86(1) are fulfilled as regards the settlement in any year or years of assessment falling before the year concerned, no deductions shall be made in respect of losses accruing before that year (or the first of those years) so falling,
>
> but nothing in the preceding provisions of this sub-paragraph shall prevent deductions being made in respect of losses accruing in a year of assessment in which the conditions mentioned in section 86(1)(a) to (d) and (f) are fulfilled as regards the settlement.

54.6.4 *Loss on disposal before 19 March 1991*

For completeness, para 1(7) Sch 5 TCGA provides:

> In construing section 86(1)(e) as regards a particular year of assessment and in relation to a settlement created before 19th March 1991, no account shall be taken of disposals made before 19th March 1991 (whether for the purpose of arriving at gains or for the purpose of arriving at losses).

54.7 Disallowance of personal losses of beneficiary against s.87 gains

Section 2(4) TCGA provides:

> If chargeable gains are treated by virtue of section 87 or 89(2)[9] as

9 Section 2(5) TCGA provides: "In subsection (4) the reference to section 87 or 89(2) is to that section read, where appropriate, with section 10A."

accruing to a person in a tax year ("the relevant deemed gains")—
(a) subsection (2) has effect as if the relevant deemed gains had not accrued, and
(b) the amount on which the person is charged to capital gains tax for that year is the sum of—
(i) the amount given by subsection (2) as it has effect by virtue of para (a), and
(ii) the amount of the relevant deemed gains.

This is clumsily expressed.[10] The drafting technique is to isolate the "relevant deemed gains" (ie the s.87 gains) from the loss relief in s.2(2) TCGA. The effect is that personal losses may not be set against s.87 gains accruing to the individual.

54.7.1 *Personal losses & s.87 gains: Commentary*

The disallowance of personal losses against s.87 gains was introduced in 1998 because of the difficulties of interaction with taper relief.[11] The repeal of taper in 2008 should have allowed personal losses to be set once again against s.87 gains. Presumably this point was overlooked or perhaps a deliberate decision was made to discourage the use of trusts. It is suggested that the rule disallowing personal losses against s.87 gains should be repealed.

54.8 Personal losses of settlor and s.86 gains

The settlor can set their personal losses against s.86 gains, under s.2(2) TCGA.

For completeness, s.2(7) TCGA deals with the situation where a settlor has made two or more settlements:

---

10 Section 62(2A) TCGA illustrates how the point could be clearly expressed; see 54.5 (Carry-back of losses on death).
Obscurity in statutory drafting *does* matter. In *Futter v Futter* [2011] STC 890 trustees made an appointment in the mistaken belief that personal losses could be set against s.87 gains. If s.2 had been clearly drafted, it is unlikely that the mistake would have been made.

11 The CG Manual formerly provided: "**34272 Personal losses** [June 2005]
... For 1998–99 onwards the beneficiary's personal allowable losses are not available to reduce these attributed gains. It is not possible to identify any particular gain with a capital payment and so the changes introduced for Section 77 and Section 86 gains, see CG34865+, for 2003–04 onwards could not be extended to Section 87 gains."

Where in any year of assessment—

(a) there are amounts treated as accruing to a person by virtue of section 86,

(b) two or more of those amounts, or elements of them—

(i) relate to different settlements,

(c) losses are deductible from the amounts or elements mentioned in para (b) above but are not enough to exhaust them all,

the deduction applicable to each of the amounts shall be the appropriate proportion of the aggregate of those losses.

The "appropriate proportion" is that given by dividing the amount in question by the total of the amounts.

This is only necessary to ascertain what amount can be recovered under the settlor's indemnity against each settlement.

54.9 Loss accruing to remittance basis taxpayer

54.9.1 *"Foreign/UK loss" "Foreign/UK gain"*

The legislation distinguishes between foreign losses and other losses. Section 16ZA(6) TCGA gives "**foreign loss**" a commonsense meaning:

> In this section "foreign loss" means a loss accruing from the disposal of an asset situated outside the UK.

The legislation also distinguishes between foreign chargeable gains and other gains. This expression has its usual commonsense meaning. Section 12(4) TCGA provides:

> In this section "foreign chargeable gains" means chargeable gains accruing from the disposal of an asset which is situated outside the UK.

This only applies for the purposes of s.12, so the definition has to be incorporated by reference where it is used elsewhere.[12]

In this chapter, "**UK loss**" means a loss which is not a foreign loss, ie a loss on a disposal of a UK situate asset; and **"UK gain"** means a gain which is not a foreign gain, ie a gain on a disposal of a UK situate asset

54.9.2 *Background*

The complex rules can be better understood if one understands the constraints faced by the drafter. It is difficult to think of a satisfactory rule

---

12 Section 16ZB(5) and again in s.16ZC(7) TCGA. If the drafter had made this a TCGA-wide definition, this would not have been necessary.

for losses of a remittance basis taxpayer. Relief for all losses is too generous when only some gains are taxable. Relief for foreign losses remitted to the UK is not satisfactory, as it would usually be easy to remit the losses to the UK, so that amounts to a relief for (almost) all losses, at least for a well advised taxpayer. Moreover in the case of the extinction of an asset there may be nothing to remit.

The pre-2008 solution was to disallow relief on foreign losses on foreign domiciliaries (to whom the remittance basis applied compulsorily – there was no claim needed). The CGT remittance basis was a package with advantages and this disadvantage. This was a rough and ready solution, but simple and workable. However the introduction of the claim for the CGT remittance basis in 2008 changed the situation. If foreign losses of foreign domiciliaries were disallowed only in years that the individual claimed the remittance basis, then individuals may claim the remittance basis in the year that they realise gains and not in the year that they realise losses. On the other hand, the failure to claim would often be expensive in other ways, and as a simple and pragmatic solution it has much to commend it.

The FD draft clauses 2007 proposed to disallow all foreign losses of foreign domiciliaries, but that was EU non-compliant (not to mention unfair). HMRC presumably agreed, and a new solution had to be devised in the rushed weeks between publication of the FD draft clauses and the Finance Bill, allowing insufficient time for HMRC to consider the issues, and none at all for consultation.

54.9.3 *Summary*

EN FB 2008 provides this summary:

> 355. The overall effect of these new rules is that:
> [1] on the first occasion when a non-UK domiciled individual claims remittance basis for a tax year, the individual may make an election in relation to their foreign losses;
> [2] if the individual does not make an election, foreign losses of that tax year and all future tax years will not be allowable losses; and
> [3] if the individual makes an election, special rules apply to the deduction of allowable losses where there are foreign chargeable gains.
> 356. The effect of the special rules is that:
> [1] where foreign chargeable gains are remitted to the UK in a tax year later than that in which the asset was disposed of:
> [a] no losses of that later year, or of any year later than that in which

they arose, are deductible from those gains, and

[b] [those gains] may not be covered by the [CGT annual exemption] of the year in which they are remitted; and

[2] if remittance basis is claimed for the tax year in which foreign chargeable gains arise, the allowable losses available for deduction from gains of that year are deducted

[a] first from foreign chargeable gains that both arise and are remitted in that year,

[b] then against foreign chargeable gains arising but not remitted in that year, and

[c] only then from any other (non-foreign) chargeable gains arising in that year.

The CG Manual provides:

CG25330 - Remittance basis: losses: introduction [November 2012]

Losses on non-UK assets arising before 6 April 2008 to remittance basis users were not allowable losses. For tax year 2008-09 onwards an individual may elect that such "foreign losses" which arise in the year of election or subsequent years are allowable, subject to certain special rules, against chargeable gains (TCGA92/S16ZA). The election is irrevocable and has effect in the year it is made and all subsequent years.

The special rules for giving relief in respect of foreign losses have two main effects:

- They prevent any loss (not just a foreign loss) of a later year being allowed against a foreign chargeable gain which arose in an earlier year but which is not remitted (and so not taxed) until the year of the loss or later (TCGA92/S16ZB). This is analogous to the "no carry back" rule where the remittance basis is not in point.
- They limit the amount of losses available for relief against chargeable gains in a year by imposing a strict order in which they are matched with gains of various classes, including unremitted foreign chargeable gains (TCGA1992/S16ZC).

Correct operation of these rules is likely to demand careful record-keeping by the taxpayer.

The CG Manual provides:

CG25330C - Remittance basis: matching rules for relieving losses: TCGA92/S16ZC [April 2010]

If an election has been made for foreign losses to remain allowable losses (see CG2530A) then, in a tax year in which the remittance basis applies and the individual is not domiciled in the United Kingdom, special rules apply to determine how gains are to be relieved by losses. In summary, the allowable losses deductable under TCGA92/S2 are matched:

- Firstly, against foreign chargeable gains accruing in the tax year to the extent that they are remitted to the United Kingdom in that year

- Secondly, against foreign chargeable gains accruing in that year to the extent that they are not so remitted and
- Thirdly, against chargeable gains accruing in that year other than foreign chargeable gains (this does not include chargeable gains treated as accruing under TCGA92/S12 ie on the remittance basis).

And then the amount on which Capital Gains Tax is charged in the year is the total amount of chargeable gains accruing in the year less the losses matched against gains in the first and third categories only.

This means in effect that allowable losses which are matched with unremitted foreign chargeable gains are not available for relief against gains on UK assets, which therefore remain chargeable. The unremitted foreign chargeable gains are reduced by the losses matched with them, and so will not give rise to any tax charge if or when they are remitted (TCGA92/S16ZD(3)).

Chargeable gains which are treated as accruing under TCGA92(S87) (attribution of gains to beneficiaries) or TCGA92/S89(2) (migrant settlements etc) are not within any of these three categories of gain. This means that relief for losses is not available against these sorts of gain.

A taxpayer will need to keep records to allow the correct operation of these provisions to be verified.

54.9.4 *"Relevant tax year"*

Section 16ZA(1) TCGA provides the definition:

> In this section "the relevant tax year", in relation to an individual, means the first tax year for which—
>
> (a) section 809B of ITA 2007 (claim for remittance basis) applies to the individual, and
>
> (b) the individual is not domiciled in the UK.[13]

In short, the relevant tax year is the first year that the individual claims the remittance basis (it does not matter whether or not the individual is a long-term resident, ie whether or not the remittance basis claim charge is due).

The expression "relevant year" is opaque; I refer to it as **"a relevant (s.809B remittance basis claim) year"**.

One can put off the relevant (s.809B RB claim) year by not making a s.809B remittance basis claim, but that is not generally going to be worthwhile. In straightforward cases the relevant tax year will be 2008/09 or the earliest year of UK residence if later.

An individual within s.809D or 809E (sub-£2k taxpayer or non-taxpayer) is not within s.809B so all losses are allowable in the usual way.

---

13 Para (b) is otiose as (from 2013) an individual must be non-UK domiciled in order to fall within (a). But it does no harm.

54.9.5 *Loss election*

Section 16ZA TCGA provides:

> (2) An individual may make an election under this section for the relevant tax year (in which case sections 16ZB and 16ZC have effect in relation to the individual for the relevant tax year and all subsequent tax years). ...
> (4) Sections 42 and 43 of the Management Act (procedure and time limit for making claims), except section 42(1A) of that Act, apply in relation to an election under this section as they apply in relation to a claim for relief.
> (5) An election under this section is irrevocable.

Thus a taxpayer on claiming the remittance basis has a once in a lifetime opportunity to make an election under s.16ZA (which I call a "**loss election**") and this election (if made) applies for the rest of their life. It is impossible to know what will be the best choice and the taxpayer will have to guess. This is almost unprecedented in tax legislation.

RDR Manual provides:

> **32060 - Foreign chargeable gains loss election** [July 2010]
> The election should be made for the first year for which the remittance basis is claimed, irrespective of whether the individual has any foreign chargeable gains or overseas losses in that year. The election will usually be made within the white space in the Capital Gains supplementary pages of the same SA Return as the first remittance basis claim is made.

54.9.6 *Time limits*

Section 16ZA(4) TCGA provides:

> Sections 42 and 43 of the Management Act (procedure and time limit for making claims), except section 42(1A) of that Act, apply in relation to an election under this section as they apply in relation to a claim for relief.

Thus the usual time limits apply. The best approach may be to wait until the time limit approaches and make the decision then to elect or not, with the benefit of four year's hindsight.

54.10 Disallowance of foreign losses if no election is made

Section 16ZA(3) TCGA provides:

> If an individual does not make such an election, foreign losses accruing to the individual in–
>
> (a) the relevant [s.809B remittance basis claim] tax year, or
>
> (b) any subsequent tax year except one in which the individual is domiciled in the UK
>
> are not allowable losses.

In short, if no election is made, foreign losses accruing to a foreign domiciliary are not allowable:

(1) in the year that a s.809B remittance basis claim is made; or

(2) in any subsequent year (even if no claim is made in that year).

There are therefore four distinct periods for a UK resident foreign domiciled individual, assuming no loss election is made:

(1) Before 2008/09: foreign losses are disallowed.[14]

(2) From 2008/09:

(a) Period when UK resident but before making a s.809B remittance basis claim: foreign losses are allowable.

(b) Section 809B remittance basis claim year, and subsequently while non-domiciled: foreign losses are disallowed.

(c) After becoming UK domiciled: foreign losses are allowable.

A long term resident who stops claiming the remittance basis (because the remittance basis claim charge is too high) and who is not concerned about IHT (eg because IHT deemed domiciled) may wish to acquire a UK domicile, if the circumstances permit.

If no election is made, UK losses are allowable in the normal way, and so:

(1) Set against (a) UK gains and (a) foreign gains (whenever realised) in the year that they are remitted to the UK; or

(2) Carried forward.

---

14 Section 16(4) TCGA as it had effect before 2008/09 provided:

> "In accordance with section 12(1), losses accruing on the disposal of assets situated outside the UK to an individual resident or ordinarily resident but not domiciled in the UK shall not be allowable losses."

This wording is confusing. It means that losses accruing to a foreign domiciliary on a disposal by the foreign domiciliary of foreign situated property are not allowable. It does not mean that losses are not allowable on a disposal (by any person) to a foreign domiciliary.

54.10.1 *Planning*

Consider the position before disposing of an asset on which an (otherwise) non-allowable loss will accrue. Possibilities are:
(1) making assets UK situate prior to disposal;[15]
(2) an inter-spouse transfer.[16]
A foreign domiciliary who claims the remittance basis may be worse off than if they had not made the claim, if (1) they fail to make the loss election (2) they realise disallowed foreign losses; and (3) they remit sufficient gains to the UK.

An individual who comes to the UK may consider:
(1) realising historic foreign losses in the first year of residence (or in the UK part of a split year); and
(2) not making a s.809B remittance basis claim until after the first year of residence (or after the UK part of a split year).

54.11 Position if loss election is made

For the purposes of the following discussion a remittance basis taxpayer has three types of foreign gains:
"Promptly remitted gains" means gains which are remitted in the year that the gains actually accrue.
"Postponed remitted gains" means gains which are remitted in a year after the gains actually accrue. Statute calls these "relevant gains" which is an opaque label; I expand it to **"relevant (postponed remitted) gains"**.
"Unremitted gains" means gains which are not remitted and so (un)taxed on the remittance basis.

Section 16ZB TCGA provides:

> **16ZB Individual who has made election under section 16ZA: foreign chargeable gains remitted in tax year after tax year in which accrue**[17]
> (1) This section applies to an individual for a tax year ("the applicable tax year") if—
> (a) the individual has made an election under section 16ZA,
> (b) foreign chargeable gains accrued to the individual
> [i] in or after the relevant [s.809B remittance basis claim] tax

15 Contrast 83.24 (CGT planning: making UK situate property non-UK situate).
16 See 54.13 (Inter-spouse transfer).
17 *Sic*: the heading is incoherent.

year (within the meaning of section 16ZA)
[ii] but before the applicable tax year, and

(c) by reason of the remission[18] of any of the foreign chargeable gains to the UK, chargeable gains are treated under section 12 as accruing to the individual in the applicable tax year or a part of the applicable tax year ("the relevant gains").

In short, s.16ZB applies to postponed remitted gains accruing in or after the s.809B remittance basis claim year. The rules do not apply to gains which accrued before that year. In particular, the rules do not apply to pre-2008 gains, since no s.809B claim was made in those years.

At this point the drafting becomes exceptionally clumsy.[19]

Section 16ZB(2) TCGA continues:

> Section 2(2) or (4) has effect for the applicable tax year as if the relevant [postponed remitted] gains had not accrued.

Section 16ZB(2) isolates the postponed remitted gains from the loss relief in s.2(2) TCGA. Then s.16ZB(3) TCGA provides:

> The amount on which the individual is charged to capital gains tax for the applicable tax year is (instead of the amount given by section 2(2) or (4)(b), as reduced under section 3) the sum of—
>
> (a) the adjusted taxable amount, and
>
> (b) the amount of the relevant [postponed remitted] gains.

54.11.1 *The adjusted taxable amount*

Section 16ZB(4) TCGA provides:

> "The adjusted taxable amount" is—
>
> (a) if section 3(1) (annual exempt amount) does not apply to the individual for the applicable tax year, the amount given by section 2(2) or (4)(b) as it has effect by virtue of subsection (2), and
>
> (b) otherwise, so much of that amount as exceeds the exempt amount for the applicable tax year (within the meaning of section 3).

---

18 Section 16ZB(6) TCGA provides (somewhat unnecessarily): "For the purposes of subsection (1)(c) foreign chargeable gains are remitted to the UK if they are regarded as so remitted for the purposes of section 12."

19 The drafter had adopted the clumsy drafting technique of s.2(4) TCGA which it is helpful to read first, in order to understand s.16ZB; see 54.7 (Disallowance of personal losses of beneficiary against s.87 gains).

In short, the adjusted taxable amount is the amount of gains less losses (and less the CGT annual exemption if available) apart from the postponed remitted gains.

So in short, if one makes the loss election:

(1) all losses (UK and foreign losses) are allowable against:
  (a) UK gains
  (b) foreign gains if
    (i) taxed on an arising basis (because no s.809B remittance basis claim is made in the year that the gains accrue); or
    (ii) promptly remitted gains (remitted in the year that the gains accrue).

(2) under s.16ZB postponed remitted gains do not qualify for:
  (a) *any* loss relief (either UK losses or foreign losses) or
  (b) the CGT annual exemption.[20]

The CG Manual provides an example:

> **CG25330B - Remittance basis: no effective carry back of foreign allowable losses: TCGA92/S16ZB** [April 2010]
> If an election has been made for foreign losses to remain allowable losses (see CG25330A) then a loss may not be set against chargeable gains taxable on the remittance basis in a tax year - known as the applicable tax year- after the foreign chargeable gains which are being remitted arose, if the foreign chargeable gain arose in a year before the loss. This means that a loss cannot be "carried back" and set against a foreign chargeable gain of an earlier year, even if that gain is not taxed until the year of loss because of the remittance basis.
> *Example: (Henri)*
> H elects to use the remittance basis in 2008-09 and has an unremitted foreign chargeable gain of £1m in that year. He also elects for his foreign losses to remain allowable losses.
> In 2010-11 he remits the gain to the UK and has a foreign loss of £500,000. He does not elect to use the remittance basis in 2010-11.

The HMRC analysis is as follows:

> The relevant [s.809B remittance basis claim] tax year is 2008-09 and the applicable tax year is 2010-11. Foreign chargeable gains accrued in or after the relevant tax year but before the applicable tax year and a

20 Where the CGT annual exemption is disapplied, the usual relief for reporting small losses is likewise disapplied; see 47.5.1 (Reporting small gains).

chargeable gain is treated as accruing in the applicable tax year when those gains are remitted. The conditions of TCGA92/S16ZB(1) are therefore satisfied. The remitted gains are known as relevant [postponed remitted] gains and are excluded from the total amount of chargeable gains from which losses are deducted under TCGA92/S2. The relevant gains are nonetheless included in the amount on which Capital Gains Tax is charged for the applicable tax year (TCGA92/S16ZB(2)-(3)). So the £500,000 loss may not be set against the chargeable gain of £1m treated as accruing to H in 2010-2011.

Note that this prohibition of carry-back applies to all losses, not just to foreign losses.

Note also that this prohibition applies whether or not the remittance basis applies in the applicable year, ie the year in which the foreign chargeable gain is remitted.

54.11.2 *Setting losses against gains*

Section 16ZC TCGA directs that losses are to be used in a manner which is not the most favourable to the taxpayer:

16ZC Individual who has made election under section 16ZA and to whom remittance basis applies

(1) This section applies to an individual for a tax year if—

(a) the individual has made an election under section 16ZA for the tax year or any earlier tax year,

(b) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for the tax year, and

(c) the individual is not domiciled in the UK in the tax year.[21]

In short, the section applies to a remittance basis taxpayer who makes a loss election.

Section 16ZC continues:

(2) The following steps apply for the purpose of calculating the amount on which the individual is to be charged to capital gains tax for the tax year.

Step 1 Deduct any relevant allowable losses from the chargeable gains referred to in subsection (3) in the order in which they appear there (starting with para (a) of that subsection).

"Relevant allowable losses" simply means allowable losses. (The drafter

21 Para (b) is otiose as (from 2013) an individual must be non-UK domiciled in order to fall within (a). But it does no harm.

is fond of the word "relevant"). Section 16ZC(7) TCGA provides:

> In this section "relevant allowable losses" means the allowable losses that section 2(2) provides may be deducted from chargeable gains accruing to the individual in the tax year or a part of the tax year.

54.11.3 *The loss deduction order*

This takes us to s.16ZC(3) TCGA which sets out the deduction order:

> The chargeable gains are—
> (a) foreign chargeable gains accruing to the individual in the tax year, to the extent that they are remitted[22] to the UK in that year or, if that year is a split year as respects the individual, in the UK part of that year,
> (b) foreign chargeable gains accruing to the individual in that year, to the extent that they are not so remitted in that year or they are so remitted in that year but it is a split year as respects the individual and they are so remitted in the overseas part of the year, and
> (c) chargeable gains accruing to the individual in that year (other than foreign chargeable gains).

Section 16ZC(5) TCGA provides:

> Chargeable gains treated as accruing under s.12 are not within subsection (3)(c).

This is referring to foreign gains which actually accrue at the time of the disposal but are treated as accruing at the time of remittance.

So in my terminology, losses are set against gains in this order:

(a) promptly remitted gains;
(b) unremitted foreign gains;
(c) UK gains.

Losses set against (b) may not be wasted but they are not used until the unremitted gains are remitted.

54.11.4 *Use of deductions*

Our journey takes us to Step 2:

---

22 Section 16ZC(6) TCGA provides (somewhat unnecessarily): "For the purposes of subsection (3) foreign chargeable gains are remitted to the UK if they are regarded as so remitted for the purposes of section 12."

> *Step 2* Treat the amount referred to in section 2(2) or (4)(a) or 16ZB(3)(a) as being equal to—
>
> (a) the amount it would be if there were no relevant allowable losses, minus
>
> (b) the total amount deducted under Step 1 from chargeable gains within subsection (3)(a) or (c).

This effectively confirms the deduction made in Step 1.

Section 16ZC(4) TCGA provides:

> Chargeable gains treated as accruing under section 87 or 89(2) (read, where appropriate, with section 10A) are not within any paragraph of subsection (3).

This maintains the disallowance of personal losses against s.87 gains.[23]

Section 16ZD TCGA provides:

> (1) This section applies if section 16ZC applies to an individual for a tax year.
>
> (2) Any allowable loss deducted under step 1 of section 16ZC(2) is to be regarded (for the purposes of section 2(2)(b)) as allowed as a deduction from chargeable gains accruing to the individual in the tax year.
>
> (3) If a deduction is made under step 1 of section 16ZC(2) from a foreign chargeable gain within section 16ZC(3)(b), the amount of the foreign chargeable gain is reduced by the amount deducted.

I am not sure why it was necessary to say this, but it does no harm.

54.11.5 *Losses insufficient to set against all the gains*

It may be that the losses are set against unremitted gains but the losses are not sufficient to set against all the unremitted gains. In that case one needs to know which gains they are set against, in case some gains are later remitted and some are not.

Step 1 in s.16ZC(2) provides:

> If allowable losses are deductible from the chargeable gains referred to in subsection (3)(b) but are not enough to exhaust them all—
>
> (a) those chargeable gains are to be ordered according to the day on which they accrued,
>
> (b) the losses are to be deducted from those gains in reverse

23 See 54.7 (Disallowance of personal losses of beneficiary against s.87 gains).

chronological order (starting with the last chargeable gain to accrue), and

(c) if allowable losses are deductible from chargeable gains that accrued on a particular day but are not enough to exhaust all of the chargeable gains that accrued on that day, the amount deducted from each of those chargeable gains is the appropriate proportion of the losses.

In para (c) "the appropriate proportion", in relation to a chargeable gain, is the amount of that gain divided by the total amount of the chargeable gains that accrued on the day in question.

54.11.6 *HMRC example*

The CG Manuel provides:

> **CG25330D - Remittance basis: matching rules for relieving losses: example: Section S16ZC TCGA 1992**
>
> *Example (Johann)*
>
> J is a remittance basis user in all years. He has made an election under Section 16ZA TCGA 1992 so his foreign losses are allowable, subject to the rules in Section 16ZB TCGA 1992 and Section 16ZC TCGA 1992. His history of gains and losses is as follows:

	UK gains	UK losses	Foreign gains	Cash brought to UK	Foreign losses
2008-09	100,000	25,000	30,000	0	0
2009-10	17,000	5,000	50,000	60,000[24]	30,000
2010-11	0	0	12,000	20,000[25]	25,000

The HMRC analysis is as follows:

> **2008-09**
>
> Relevant allowable losses are £25,000 (Section 16ZC(7) TCGA 1992)
>
> Chargeable gains classified and ordered according to Section 16ZC(3) TCGA 1992:

a) 2008-09 foreign chargeable gains remitted	Nil
b) 2008-09 foreign chargeable gains not remitted	30,000
c) 2008-09 other chargeable gains [UK gains]	100,000

> **Step 1**: deduct relevant allowable losses from the gains so ordered. The net gains are therefore:

a) 2008-09 foreign chargeable gains remitted	Nil
b) 2008-09 foreign chargeable gains not remitted	5,000
c) 2008-09 other chargeable gains	100,000

---

24 [HMRC's note] accepted after enquiry to establish facts and application of mixed fund rules ... as being £30,000 from 2008-09 plus £30,000 from 2009-10

25 [HMRC's note] accepted after enquiry to establish facts and application of mixed fund rules ... as being all from 2009-10

Step 2: the total amount of chargeable gains on which tax is charged by Section 2(2) TCGA 1992 is equal to the amount it would be if there were no relevant allowable losses (i.e. £100,000 UK gains) LESS the total amount deducted at step 1 from gains in classes (a) and (c) (i.e. £Nil).

So in 2008-09 Capital Gains Tax is charged on £100,000. The effect of the rules is to use allowable losses to frank unremitted foreign chargeable gains even though that leaves UK gains in charge.

The foreign chargeable gain not remitted is reduced by the allowable UK loss deducted from it at step 1 so going forward it becomes £5,000 (Section 16ZD (3) TCGA 1992). This is important to remember if it is remitted in a later year (see below).

2009-10

Relevant allowable losses are £35,000 (Section 16ZC(7) TCGA 1992)

Chargeable gains classified and ordered according to Section 16ZC(3) TCGA 1992:

a) 2009-10 foreign chargeable gains remitted	30,000
b) 2009-10 foreign chargeable gains not remitted	20,000
c) 2009-10 other chargeable gains	17,000

Step 1: deduct relevant allowable losses from the gains so ordered. The net gains are therefore:

a) 2009-10 foreign chargeable gains remitted	Nil
b) 2009-10 foreign chargeable gains not remitted	15,000
c) 2009-10 other chargeable gains	17,000

Step 2: the total amount of chargeable gains on which tax is charged by Section 2(2) TCGA 1992 is equal to the amount it would be if there were no relevant allowable losses(i.e.

£35,000 remitted gains[26]

£17,000 UK gains

£52,000

LESS the total amount deducted at step 1 from gains in classes (a) and (c) (i.e. £30,000).

So in 2009-10 Capital Gains Tax is charged on £22,000 (52,000 - 30,000). The effect of the rules is to use allowable losses to frank unremitted foreign chargeable gains even though that leaves UK gains in charge.

The foreign chargeable gain not remitted (category (b)) is reduced by the loss deducted from it at step 1, so it becomes £15,000 (Section 16ZD(3) TCGA 1992). This will be significant if it is remitted in a later year (see below).

2010-11

Relevant allowable losses are £25,000 (Section 16ZC(7) TCGA 1992)

Chargeable gains classified and ordered according to Section 16ZC(3) TCGA 1992:

a) 2010-11 foreign chargeable gains remitted	Nil
b) 2010-11 foreign chargeable gains not remitted	12,000
c) 2010-11 other chargeable gains	Nil

26 £5,000 from 2008-09 (after set-off of 2008-09 losses) plus £30,000 from 2009-10

Step 1: deduct relevant allowable losses from the gains so ordered. The net gains are therefore:

a) 2010-11 foreign chargeable gains remitted	Nil
b) 2010-11 foreign chargeable gains not remitted	Nil
c) 2010-11 other chargeable gains	Nil

Step 2: the total amount of chargeable gains on which tax is charged by Section 2(2) TCGA 1992 is equal to the amount it would be if there were no relevant allowable losses (i.e.
£15,000, the adjusted residue of the 2009-10 gain; see above)
LESS the total amount deducted at step 1 from gains in classes (a) and (c) (i.e. £Nil).
So in 2010-2011 Capital Gains Tax is charged on £15,000. Note that none of the foreign loss arising in 2010-2011 can be relieved against the chargeable gain which accrued in the earlier year, even though that gain was not remitted until the year of loss. This is consistent with the fact that UK losses cannot be carried back to set against gains of earlier years.
The foreign chargeable gain not remitted (category (b)) is reduced by the loss deducted from it at step 1, so it becomes £Nil (Section 16ZD (3) TCGA 1992). It has been franked by the loss of the period and will not give rise to a taxable remittance if cash etc representing it is brought to the UK in a later year.
The unused balance of allowable losses (£25,000 – 12,000 = £13,000) is carried forward and may be used to relieve chargeable gains of later years. (Section 16ZD(2) TCGA 1992).

54.11.7 *Record-keeping*

Record-keeping from 2008 is extremely onerous. Before 2008 a taxpayer had only to keep a total of brought forward losses and remitted gains. But now (if a taxpayer makes a loss election) they need to keep track of which year losses accrue, and which day and year postponed remitted gains accrue, in order to apply these loss rules.

54.12 When is a loss election worthwhile?

Careful timing of realisation of losses and of remittances is necessary in order to maximise loss relief if a loss election is made. A few general points can be made.

A person who will realise UK losses and not foreign losses should not make a loss election.

A person who will realise UK losses and foreign losses, but can use inter-spouse transfers to avoid disallowable foreign losses should not make an election.

A person who will realise foreign losses and not UK losses should make an election.

In other cases it is a matter of guesswork.

54.13 Inter-spouse transfer

Inter-spouse transfers are on a no gain no loss basis for CGT.[27]

Suppose a foreign domiciled individual ("H") owns an asset which will give rise to a loss. It will often happen that the loss on the disposal by H will not be allowable or (if a loss election has been made) it may be set against foreign gains and so wasted. Suppose:

(1) H gives the asset to H's spouse ("W").

(2) W disposes of the asset, and so realises the loss.

W's loss may be allowable loss (for instance if W has not made a s.809B remittance basis claim, or a loss election).

However s.16A TCGA provides:

> (1) For the purposes of this Act, "allowable loss" does not include a loss accruing to a person if—
>
> (a) it accrues to the person directly or indirectly in consequence of, or otherwise in connection with, any arrangements, and
>
> (b) the main purpose, or one of the main purposes, of the arrangements is to secure a tax advantage...
>
> (3) For the purposes of subsection (1) it does not matter—
>
> (a) whether the loss accrues at a time when there are no chargeable gains from which it could otherwise have been deducted, or
>
> (b) whether the tax advantage is secured for the person to whom the loss accrues or for any other person.[28]

54.13.1 *"Tax advantage"*

"Tax advantage" has the standard definition. Section 16A(2) TCGA provides:

> "tax advantage" means—
>
> (a) relief or increased relief from tax,
>
> (b) repayment or increased repayment of tax,
>
> (c) the avoidance or reduction of a charge to tax or an assessment to tax, or
>
> (d) the avoidance of a possible assessment to tax,

---

27 See 73.10 (CGT spouse exemption).

28 What is the point of s.16A(3)(b) TCGA? How can a tax advantage be secured for any person *other* than the person to whom the loss accrues? The answer is if the loss accrues to a non-resident company or trustee, for the tax advantage might be enjoyed by a settlor (under s.86) or a beneficiary (under s.87) or a participator (under s.13). But this is not relevant to inter-spouse transfers.

> and for the purposes of this definition "tax" means capital gains tax, corporation tax or income tax.

Looking at the words of the section, one would think that the position was as follows. An allowable loss is a "tax advantage" within (a) or (c). So if one of the main purposes of an inter-spouse transfer is to obtain the loss, the loss is disallowed.

It depends on the facts whether that is actually a main purpose, but in many (I think, most) cases it would be so.

HMRC have issued guidance on s.16A[29] which I call **"HMRC loss guidance"**. This comments on identifying the main purpose:

> 16. Hence it will be relevant to draw a comparison in order to consider whether, in the absence of the tax considerations:
> • the transaction giving rise to the advantage would have taken place at all;
> • if so, whether the tax advantage would have been of the same amount; and
> • whether the transaction would have been made under the same terms and conditions.

It will very often be the case that the inter-spouse transfer is made only for tax reasons and would not be made in the absence of tax. However, HMRC loss guidance provides:

> 17. ... Nor will the new legislation *ordinarily* prevent a genuine loss on a real disposal of an asset from being set off against a person's own gains, including the case where, before the real disposal that gives rise to the genuine loss, the person acquires the relevant asset from a spouse or civil partner at no gain/no loss under section 58 [TCGA].[30]

---

29 HMRC, "CGT - Avoidance of tax through the creation and use of capital losses" . The guidance passed through various drafts and versions to the current guidance of July 2007, accessible *http://www.hmrc.gov.uk/cgt/cgt-recent-developments.pdf* and reprinted (with variations) in the CG Manual Appendix 9 [February 2010].

30 See too example 5:

> "40. Mr H has shares in S plc which are standing at a loss. Mrs H has shares in a separate company, T plc, standing at a gain. Mr H transfers his shares to Mrs H under the no-gain, no-loss rule in section 58 TCGA, and she then sells both holdings of shares. The loss on the shares in S plc covers the gain arising from the shares in T plc, and so no CGT is payable by Mrs H.
>
> 41. Taking the spouses together, Mr and Mrs H each have shares which they want to sell. What happens in fact is that they do sell their shares, and the economic consequence is that they realise a gain on one set of shares and a loss on the other

(Emphasis added)

According to this, s.16A does not (in short) apply to genuine losses, and the loss following an inter-spouse transfer is regarded as genuine.

The question this raises is: what is meant by genuine loss and why is the spouse's loss genuine? At first the unlawyerlike term "genuine" seems almost impossible to pin down, but I suggest that the concept intended here is the tax avoidance/mitigation distinction.[31] A loss is genuine (in the intended sense) if it is in accordance with the intention of Parliament, a special tax regime, and has economic consequences. The inter-spouse transfer in principle meets those criteria. This view is confirmed by para 13 of the HMRC loss guidance:

> The straightforward use of a statutory relief does not of itself bring arrangements within the TAAR.

The straightforward use of a statutory relief could obviously be and frequently is done with the purpose of obtaining a tax advantage, but it is not tax avoidance.[32]

---

set. To decide whether or not the TAAR applies, it is necessary to consider whether there have been arrangements, and whether a main purpose of those arrangements was the securing of a tax advantage. In this case, it seems clear that there have been arrangements, namely the transfer of the shares from Mr H to Mrs H. It is then necessary to look at what the main purpose of Mr and Mrs H in entering into these arrangements was. This can be determined only by looking at all the circumstances surrounding the arrangements. In the present example, Mr and Mrs H wanted to dispose of their shareholdings, and they did this in a straightforward way. They made use of the provisions of section 58 TCGA, which provides the opportunity for spouses (or civil partners) to bring together gains and losses, but again the straightforward use of a statutory relief in this way does not (of itself) bring arrangements within the TAAR. Moreover, the tax outcome of the transactions reflects the economic reality of Mr and Mrs H's situation. In all the circumstances, this suggests that there was no main purpose of achieving a tax advantage, and where there is no such main purpose the rule does not apply."

But the factual inference in the last sentence is implausible, for the reasons explained above.

31 See 32.17.3 ("Genuine").

32 Para 5 of HMRC loss guidance issued on 27 March 2007 stated this expressly: "5. The effect of the legislation will be to restrict the use of capital losses resulting from the arrangements where *tax avoidance* is the main purpose or one of the main purposes of the arrangements." But presumably HMRC noticed the inconsistency and the guidance note of 19 July 2007 was amended to read: "The legislation is intended to have effect where a person enters deliberately and knowingly into

The guidance at para 17 uses the word "ordinarily". When will it not apply? An example is if there is an arrangement under which the donee spouse immediately returns the proceeds of the disposal to the donor spouse. In that case the inter-spouse gift has no "economic consequences".

The difficulty is to reconcile that guidance with the words of the statute. One might simply give up at this point:

> We think that the words "**tax avoidance**" should be substituted for "**tax advantage**"... the guidance contradicts the legislation. Some transactions (such as transfers between spouses) are stated in the guidance not to be caught by the TAAR,[33] when it is strongly arguable that they are caught.[34]

If that is right, then the decision whether or not to apply the legislation in relation to inter-spouse transfers (and indeed many other cases) is made by HMRC with no redress by the taxpayer (outside judicial review discussed below). However, it is suggested, having regard to *Pepper v Hart*, that the reference to "tax advantage" should be read to mean tax avoidance in the strict sense. The fact that the definition here is based on words which in other contexts have been understood differently[35] does not determine the issue.

The reader may wonder whether this discussion matters, given that HMRC have stated that they will not normally challenge the transfer of losses by inter-spouse transfers. On a constitutional level it matters to those who believe that tax should be based on law and not concession and discretion. On a practical level it matters if HMRC decide to change their practice (which as the IR20 debacle shows is not a theoretical possibility) or if they apply it inconsistently.

---

arrangements to gain a tax advantage."

33 A note on terminology. The label which HMRC give to anti-avoidance provisions of the s.16A type is *targeted* anti-avoidance rule ("**TAAR**"). This terminology was coined by HMRC and first used in a press release of 5 December 2005. "TAAR" is a technical term somewhat detached from its literal meaning, so that the IFS can say without obvious irony that "TAARs need to be well targeted ... costs can outweigh the expected amount of lost revenues when a poorly targeted TAAR is compared with a well-targeted TAAR". The same report refers later to a "wide-ranging TAAR". IFS, "Countering Tax Avoidance in the UK" TLRC discussion paper no.7, (March 2009) para 8.18 accessible *http://www.ifs.org.uk/comms/dp7.pdf*.

34 Response of CIOT to consultation (8 February 2007).

35 See 32.14 (Consequence and Purpose).

54.13.2 *Section 16A: Commentary*

The IFS commentary deserves to be set out in full:

> 7.4 However, the width of this relatively simple provision [s.16A TCGA] meant that HMRC needed to publish 17 pages of detailed Explanatory Notes to explain how the legislation would be applied. So, considering the example of the person who sells shares standing at a loss in order to set the loss against a gain on another disposal, the Explanatory Notes explain that this transaction will not be prevented, albeit that the legislation could be used to prevent this.
> 7.5 There are several problems with this approach. First, the Explanatory Notes are not themselves subject to the scrutiny and care in drafting given to legislation. By their nature, Explanatory Notes are not drafted in the precise way required for legislation.
> 7.6 Second, HMRC does not have the power to legislate: taxation can only be imposed by the legislature[36] and while HMRC may decide upon its own interpretation of the legislation, that interpretation is not binding on taxpayers save to the extent confirmed by the courts. 'HMRC's role is to administer the UK's tax and customs systems.'
> 7.7 Third, the ability of taxpayers to rely on the guidance depends upon the type of transaction involved: if it is a single transaction entered into in reliance on specific guidance, the taxpayer can rely on the guidance (although enforcement may be cumbersome, for the reasons explained below). In contrast, if the taxpayer is seeking to rely on guidance in relation to a continuing state of affairs, the taxpayer is exposed to changes in that guidance. ... [37]

The IFS then discuss the important issue of whether the guidance is enforceable. I omit the passage here, with regret, but the law on the point continues to develop, and a proper discussion needs a long chapter to itself.[38] But HMRC loss guidance para 26 is intended to give HMRC maximum freedom to disregard their guidance (or at least to give freedom to decide when it should or should not apply, which comes to the same thing):

---

36 [footnote original] Article 4 Bill of Rights 1689: ["That levying money for or to the use of the Crown by pretence of prerogative, without grant of Parliament, for longer time, or in other manner than the same is or shall be granted, is illegal."]

37 Countering Tax Avoidance in the UK, TLRC discussion paper no.7, March 2009, accessible *http://www.ifs.org.uk/comms/dp7.pdf.*

38 It is set out in the 2012/13 edition of this work para 51.13.

> Examples of how the legislation will apply in particular circumstances are set out below. These examples are intended to show how different factors will be taken into consideration in deciding whether or not the TAAR applies in a given set of circumstances. They are not designed as templates for deciding whether a loss is or is not caught by the TAAR in any particular case.

Thus unless my view on the construction of s.16A TCGA is adopted, the guidance is for all practical purposes unjusticiable. The position is that there is no law, only discretion. The uncertainty caused by provisions such as s.16A (which apply for corporation tax as well as CGT) is a factor which encouraged companies such as WPP, Shire, Regus, Henderson, Charter, Beazley, Brit Insurance and UBM to leave the UK for Ireland or Switzerland.[39] Nevertheless, HMRC regard the provision as "successful"[40] (which if the sole measure of success is preventing avoidance it no doubt is). So the current position will continue until HMRC change their view that preventing tax avoidance is a priority that trumps other policy considerations such as certainty and the rule of law.

---

39 A majority of Main Survey respondents expressed exasperation with the complexity and unpredictability of current anti-avoidance rules, all but one asserting that this was a phenomenon hindering the competitiveness of the UK economy. Freedman et al, Alternative Approaches to Tax Risk and Tax Avoidance: analysis of a face-to-face corporate survey (September 2008) accessible *ideas.repec.org/p/btx/wpaper/0814.html*.

CHAPTER FIFTY FIVE

FOREIGN CURRENCY ISSUES

55.1 Foreign currency issues: introduction

It is generally accepted that UK tax is assessed in sterling. For instance, the RDR Manual provides:

> **31190 Exchange Rates** [June 2010]
> All entries on the SA Return should be in pounds sterling.

Foreign currency must be translated into sterling. For this purpose it is obviously necessary to decide the date(s) on which the exchange rate is determined ("**the currency conversion date**").

HMRC have put their views in a technical note dated 12 October 2009 ("**the HMRC currency technical note**").

Once one has identified the currency conversion date, one needs to ascertain the exchange rate on that date. Exchange rates at 31 March and 31 December can be found on the HMRC website.[1] Daily rates can be found on commercial websites. These may use slightly different criteria, and disagree slightly among themselves, but I expect in practice any published rate would be acceptable.[2]

---

1 *http://www.hmrc.gov.uk/exrate*. This will not assist in the matters discussed in this chapter except for transactions which happen to occur on 31 March or 31 December.

2 The BI Manual provides:
"**39507. Exchange rate for tax purposes** [January 2010]
... Traders may use London closing rates (BIM39505) when translating foreign currency amounts into sterling in their accounts. Equally they may use other exchange rates, such as an exchange rate quoted by their bank, or the monthly average rates published by HMRC for VAT purposes. You only need to query the rate of exchange used if, exceptionally, it diverges markedly from rates obtained from reputable sources of this nature."
Similarly, the SAI Manual provides:
"**4310. Special calculations: Foreign currency securities** [July 2007]

55.1.1 *Cross references*

The following topics are considered elsewhere see:
33.3.5 (Computation of gains)
38.3 (Securities Denominated in foreign currency)
62.20 (Non-residents foreign currency bank accounts)
56.5 (Position if no claim is made for unremittable income relief)
The position of UK resident companies is not considered.

55.2 CGT: Currency conversion date

There are two possible ways to compute the gain where an asset is purchased and sold in a foreign currency.
Method 1:
(a) Compute the gain using the foreign currency prices. For instance, suppose an asset is purchased for $100 and sold for $200; the gain is the $ sale price less the $ acquisition price = $100;
(b) then convert that foreign currency gain to sterling at the date of disposal.
Method 2: Compute:
(a) The sale price converted to sterling at the rate on the date of disposal; less
(b) The acquisition cost converted to sterling at the rate on the date of acquisition.

...Although the London closing rate should in strictness be used in all the above cases, figures of rates of exchange supplied by taxpayers or their agents should normally be accepted, provided that they come from a reputable source (for example, an exchange rate quoted by the taxpayer's bank for the day in question) and the basis is used consistently."
Similarly, International Manual provides:
"**162620. Rate of exchange to use** [January 2014]
... Any reasonable established basis of conversion which has previously been applied in any particular case may continue to be used in that case if the customer agrees to its consistent application. If there is a dispute which cannot be resolved within the terms of the established practice, the general basis described above should be adopted."
Where the official rate of exchange is different, it is considered that one should use commercial (black market) rates; this view is adopted in the USA: *Cinelli v Commissioner of Internal Revenue* (1974) 502 F2d 695 United States Court of Appeals, Sixth Circuit.

For CGT it is well settled that the second solution is correct. In *Bentley v Pike* 53 TC 590 the taxpayer inherited German property when it was worth DM132k, and later sold it for DM152k. She argued that the gain was the difference between the two Deutschmark values, ie DM30k, and the currency conversion date was the date of disposal. The Court held that the gain was the sterling equivalent of the DM proceeds (currency conversion date at the date of disposal) less the value of the property at the time of acquisition. This decision was approved in *Capcount Trading v Evans* 65 TC 545 where the issue was argued more fully before the Court of Appeal. In short, the taxpayer acquired shares for $85m and sold them for $50m. The taxpayer argued that they made a loss of $35m. That was rejected. The gain was calculated as the value of the proceeds (converted into sterling at the date of disposal) less the acquisition cost (converted into sterling at the date(s) of acquisition).

The CG Manual provides:

> **25391 - Remittance basis: gains to be computed in Sterling** [April 2010]
> Sterling is the currency in which capital gains computations are carried out (see *Bentley v Pike*, (53 TC 590) and *Capcount Trading v Evans* (65 TC 545)). You should therefore carry out a computation of the gain arising on the disposal of the foreign assets in sterling. Where transactions take place in foreign currency you should convert each separate entry for the computation into sterling using the spot rate applying at the date that part of the transaction occurred.

This approach is used whether the gain is taxed on an arising or the remittance basis. The RDR Manual provides:

> **31190 Exchange Rates** [June 2010]
> *Foreign Chargeable Gains*
> Foreign chargeable gains are calculated using sterling translations at the date of acquisition and the date of disposal. So the consideration received will be translated into sterling using the exchange rate at the time of disposal and allowable deductions will be translated using the exchange rate(s) at the time the expenditure was incurred (for example, when the asset was acquired). Thus the gain will be denoted in pounds sterling and will be the same whether taxed on the arising or the remittance basis.
> If the gain is held as foreign currency, the taxable sterling amount of the gain will not change, but separate gains or losses may accrue if the foreign currency gains or loses value with respect to sterling before the

gain is remitted.

55.3 Trading income and property income

The position for trading income is governed by SP 2/02 (not discussed here).

Property income is computed on the accountancy principles, just like trading income, so the same practice ought to apply.

55.4 Income taxed on arising basis: Currency conversion date

The RDR Manual 31190 provides:

> **31190 Exchange Rates** [June 2010]
> *Foreign Income*
> Foreign income taxed on the arising basis is converted to pounds sterling at the exchange rate applicable on the day that it arose overseas.

This is not controversial. HMRC accept the use of the average rate for a tax year where income arises regularly through the year.[3]

55.5 Sterling income converted to foreign currency

The HMRC currency technical note provides:

> 6. Income that is regarded as 'foreign income' may be received offshore in sterling. It may later be converted into a foreign currency, for example if paid into a non-sterling account. In such cases the amount of a remittance basis user's foreign taxable income will be the amount actually due and originally received in sterling. It is of no relevance whether the eventual 'taxable remittance' that is, or that is derived from, that income is made in a foreign currency or is converted back into sterling before being remitted.

This is not controversial.

55.6 Income taxed on remittance basis: Currency conversion date

Where income is taxed on the remittance basis, there are two possible views:

(1) The currency conversion date is the date of remittance. I refer to this as "**the HMRC view**".

(2) The currency conversion date is the date that the income arises. I refer

3 Private correspondence.

to this as "**the practitioners view**" since it is adopted by the ICAEW and the great majority of practitioners.

55.6.1 *HMRC view*

The RDR Manual 31190 provides:

> **31190 Exchange Rates** [June 2010]
> *Foreign Income*
> ... Foreign income taxed on the remittance basis ... is subject to UK tax only when it is remitted to the UK. This remitted income should be translated into sterling at the exchange rate prevailing on the date of remittance.

The Manual gives a straightforward example.[4]

Similarly, the EI Manual provides:

> **40033: General earnings taxable when remitted to the UK** [January 2009]
> For earnings that are taxable when remitted to the UK the conversion should be made at the date they were remitted.

55.6.2 *Basis for HMRC view*

The HMRC currency technical note sets out HMRC's arguments in support of the view that the currency conversion date is the date of remittance and not the date of receipt.

> 5. [1] Remittance basis users may receive income offshore in a foreign currency.
> [2] Such foreign income and earnings which are chargeable to tax on the remittance basis only become chargeable to UK tax when they are remitted to the UK. The remittance to the UK is the event that triggers the UK tax charge.
> [3] It is only at this point that it is necessary to ascertain the taxable amount (in sterling) remitted to the UK that is taxable as

4 "*Example (remittance) - Christophe*
C is a remittance basis user and has €8,000 income paid into his French bank account in June 2011 when the exchange rate is €0.705 to the pound, the equivalent of £5,642. He remits all €8,000 of this foreign income on 1 May 2013 when the exchange rate was €0.681.
He uses this 1 May exchange rate to convert this amount, giving a remitted amount of foreign income of £5,453; this is the amount he is taxed on."

> foreign income.
> [4] It follows that it is the date on which that amount is treated as remitted to the UK that the translation to sterling should occur.

Para 5[2] is not correct in relation to RFI. RFI is chargeable whether or not remitted, though the amount of the charge is limited to what is remitted.[5] The same applies for RFE. It is arguable that chargeable gains are only chargeable on remittance but HMRC do not say that gains are converted at the date of remittance

Para 5[3] is correct but [4] does not follow from it. For CGT it is likewise only necessary to ascertain the taxable amount when there is a remittance but no-one suggests that gains are converted at the date of remittance.

The HMRC technical note contains a lengthy discussion of case law, but there are no cases which address the issue, and analogies from CGT and IT cases in other contexts are not decisive. HMRC say:

> 15. There is little case law that addresses this point directly. Some early case law from the 1920s and 1930s deals with the taxation of companies and whether foreign exchange gains or losses should be regarded as capital or investment items, or form part of the company's trade. It is possible to draw only tentative principles from this, especially as in many cases the issue of arising or remittance basis was not in point.
> 16. The 1933 case of *Magraw v Lewis* (18 TC 222) concerned a pension of 229 South African pounds, paid to a UK resident, which had been awarded by the Government of the Union of South Africa and was paid by them through the High Commissioner of the Union Government in London. At the time such foreign income was chargeable when received in the UK. The case concerned certain deductions made by the SA Government from the pension, but during the case the issue of how much should be taxed in British pound sterling was raised. In Magraw, the *pension was actually paid to the appellant in the UK in sterling*, so the exchange issue was a little different.[6] In the course of his judgement at the High Court Finlay J said, at page 225,
>
> > What happened was this. The Appellant was paid a particular sum in UK pounds and by reason of the state of the exchange, the amount which he was paid in UK pounds was larger-a greater number of pounds-than the pension awarded to him in South Africa reckoned in South African pounds.
> > He says that he ought not to pay Income Tax upon the amount which he has received in this country. I am bound to say that in regard to that the law appears to be as plain as in the other case...It is clear that the Income Tax

5 See 10.12 (Nature of charge on remitted RFI).

6 [Author's note] Since the pension was paid in sterling, the exchange issue did not arise at all.

> authorities can have regard only to what is paid. What is paid is a pension of a particular amount in UK pounds, £268 I think it is -but the exact amount does not matter- that is paid to the Appellant.
>
> That is what he has to pay tax upon, and he has to pay on that in the appropriate number of pounds in British currency. As I say, about that point there does not appear to be any legal difficulty-indeed, I do not think there is any legal difficulty about either point...I cannot myself see that any one, even a layman, could conceive that there was any grievance when he gets a particular income in UK pounds, in paying tax in UK pounds at the appropriate rate upon that income.

17. In *Thomson v Moyse* 39 TC, whilst addressing a point about whether a remittance required a transmission from abroad, at the House of Lords Lord Reid said at p329 (bold emphasis added)

> Before considering these authorities, I think it well to see what the effect would be if this view were right. I take a case which no one has ever even suggested would not be within the scope of these provisions - the case of a bank acting as a collecting agent. If a customer hands to an English bank for collection a cheque drawn on a foreign bank, the English bank will send the cheque abroad for collection and, when notified that the money has been collected, it will give to the customer in this country the equivalent in sterling **at the current rate of exchange.**

18. References to other case law have been made to HMRC with regard to this issue.

Bentley v Pike [1981] STC 360 and *Capcount Trading v Evans* [1993] STC 11 - these concern Capital Gains Tax on chargeable gains accruing on the disposal of an asset, and therefore have no bearing on the issue of overseas income. They state that where there is an acquisition and disposal in a foreign currency the taxable capital gain is calculated by deducting the sterling value of the acquisition at the time of acquisition from the sterling value of the sale proceeds at the time of sale.

Pattison v Marine Midland 57 TC 219 related to tax on trading profits and the House of Lords upheld the decision of the Court of Appeal rejecting HMRC's contention that, with respect to a loan made by a company, the difference in sterling terms between the value of the dollars at the time of the loan and the time of the repayment represented a taxable trading profit of the company.

In *Capcount* the Court of Appeal specifically distinguished *Marine Midland* on the basis that it was concerned with trading profits whereas *Capcount* was concerned with capital gains. Nolan LJ states:

> "Against that background I do not find it surprising that, in the case of trading companies operating abroad the commercial accounting procedures which, it seems, commonly result in the profit being first computed in the particular overseas currency and then translated into sterling for tax purposes should be adopted and accepted by the Revenue...the income tax legislation, unlike the capital gains tax legislation, is not generally concerned with the measurement of a gain or loss on a single disposal but with a balance at the year end and computed on accounting principles."

> 19. The calculation of gains arising on non-sterling acquisitions and/or disposals in sterling is different from the calculation of the amount of taxable income in sterling; it is clear from *Bentley v Pike* that the sterling translation must be made using the exchange rate in force at the dates of the transaction (i.e. date of acquisition for acquisition cost, and disposal for disposal proceeds) and the calculation completed in sterling. This is understandable for CG calculation purposes, as CG is fundamentally a transaction-based tax.
> 20. Apart from the £2,000 threshold (see below), this note only concerns remittances of foreign income. *Bentley* and *Capcount* concern capital gains, not income, and are therefore not relevant. *Marine Midland* supports the approach taken by HMRC in the guidance. *Marine Midland* concerned trading profits rather than income but an individual's income is more on a par with the profits of a business than with capital gains because neither an individual's income nor the profits of a business require individual disposals. Consequently, there is no conflict between the principles established in *Marine Midland* and HMRC's position on the treatment of an individual's income.

For completeness, the HMRC currency technical note also states:

> 7. In all cases HMRC will tax the individual's foreign income as income; the question is simply what sterling value to give that income, and more importantly, when is it necessary to calculate that value. HMRC will never tax an amount greater than the income received; for example, if $50,000 US dollars are received then only $50,000 US dollars will ever be subject to tax - that is, the sterling equivalent of that $50,000 for income tax purposes at the time at which the UK tax liability occurs.
> 8. For a remittance basis user whose foreign income is received offshore in, say, dollars, there is no requirement to value the dollars twice (that is on date of receipt offshore and on the date an amount becomes taxable by virtue of being remitted to the UK). In other words, for income tax purposes, in order to tax the income received in dollars the conversion into sterling should only be made once, namely on the occasion that the income comes into charge...
> 12. This approach is in the remittance basis user's favour. This is because, whether the exchange rate on the date the income arises or the date it is remitted is used to translate the foreign income into sterling, there has to be consistency between the two - it has to be one or the other. An individual has an element of control over the date of remittance and can choose to remit income when the exchange rate is in his favour or not to remit income when the exchange rate is not in his favour. An individual does not generally have similar control over the date on which foreign income arises.

These are not arguments, or at least not arguments to be taken seriously.

55.6.3 *Currency conversion date: The correct view*

Since there is no statutory guidance and no clear guidance from the case law, the right answer is that which best suits the scheme of the provisions.

It is considered that the correct view (which I have called "the practitioners view") is that the currency conversion date is the time the income arises not the date of remittance.

The HMRC view gives rise to many anomalies. Firstly, contrast the arising basis where the currency conversion date is the date income arises. Secondly, contrast the CGT remittance basis where the currency conversion date is (in short) when the gain arises. The anomaly is more striking when one bears in mind that some offshore income gains are computed on CGT principles but subject to income tax on remittance. Thirdly, contrast the IT remittance basis where income is received in sterling and immediately converted into a foreign currency.[7] Fourthly, contrast tax credits in a foreign currency where the currency conversion date is the date the income arises, or near that date.[8]

The next set of problems arises on the HMRC view if a remittance basis taxpayer receives foreign currency income and converts it into another asset, rather than paying it directly into a bank account. Suppose T receives income in euros and converts the euros into sterling and remits the sterling.

(1) Does T adopt the euro rate at the time of conversion into sterling? Then tax depends on administrative acts such as how the receipt is dealt with.

(2) Does T then adopt the euro rate at the time of remittance? That would be absurd and also gives rise to this further problem: Suppose T receives equal amounts of (a) foreign interest in euros and (b) foreign interest in sterling; T converts the euros to sterling and pays all the interest into one foreign sterling account, and later remits one half of the account to the UK. If one converts at the time of remittance T needs to decide whether T has remitted the sterling or the (formerly) euro interest. The answer is far from clear. On the practitioners view of course no problem arises.

Section 731 raises further problems on the HMRC view. If relevant income arises in a foreign currency, when does one convert that to sterling? If one converts at the time the income arises there is a further

---

7 The HMRC view assumes that one always knows what currency income is received, but in the case of deemed income that is not the case, and in the case of trading income it may depends on the arbitrary choice or accounting practice.

8 See 55.9 (Tax credit relief: currency conversion date).

anomaly between s.731 and ordinary income. If one converts at the time there is a benefit, then a currency conversion may have to be done every time a benefit is conferred, which is unworkable.

55.6.4 *Problems arising when foreign currency depreciates against sterling*

HMRC say that their view (currency conversion date is the date of remittance) produces the right result where foreign currency depreciates against sterling, whereas the practitioners view causes an additional tax charge for taxpayers which they are concerned to avoid. The technical note provides:

> 13. ... Compare two taxpayers: Mr A is taxed on the arising basic. Mrs R on the remittance basis. Both receive RFE:
> *Exchange rates:*
> 1 May Year 1 $1 = £1.20.
> 1 May Year 2 $1 = £1.10.
> 1 May Year 3 $1 = £1.50
> Mr A and Mrs R receive $100,000 on 1 May in Year 1.
> Mr A will have to pay tax on £120,000 in Year 1. Whether he brings the $100,000 in to the UK on 1 May in Year 1 when it is worth £120,000, or on 1 May in Year 2 when it is worth £110,000, or on 1 May in Year 3, when it is worth £150,000, has no impact on Mr A's income tax liabilities.
> If Mrs R, on the other hand, translates her foreign income into sterling on 1 May Year 1 she will, on [the practitioners view], be said to have taxable RFE of £120,000.
> - In Year 2, she could remit every one of the $100,000 dollars received, which would translate only to £110,000 and yet still pay tax on £120,000 - which would appear that we are taxing an additional $9090,[9] or we are applying a tax rate of c.43.5%.
>
> 14. ...Theoretically, given large fluctuations in currency exchange rates, or with changes in higher tax rates, a situation could arise in which the tax due is actually more than the monies the individual actually receives in the UK ...

It is indeed unfair for a remittance basis taxpayer to be taxed on a sum larger than the sum which they remits to the UK. But this observation does not much support the HMRC view. First, this is in the HMRC view the position in relation to CGT. For CGT, HMRC appear to have no compunction in taxing a larger amount than remitted. In the HMRC view "a situation could arise in which the tax due is actually more than the monies the individual actually receives in the UK."

---

9 The correct figure appears to be $10,000.

The RDR Manual provides an example where the essential facts[10] are as follows:

> **35030 Conditions A and B - remittances derived from foreign income or gains** [January 2014]
> *Example 4 (Marianne)*
> M used £25,000 of her foreign chargeable gains to purchase a car.
> M kept the car outside the UK.
> M later brings the car to the UK. The market resale value of the car is then £14,000.

The HMRC analysis is as follows:

> The amount remitted is still £25,000, that being the amount equal to the chargeable gains from which the property – the car – derived.

If - which is open to doubt - the HMRC CGT analysis is right, there is (on the practitioners view) a consistent unfairness and on the HMRC view an anomalous distinction between CGT and IT.

More fundamentally, HMRC have overlooked the mixed fund rules. The remittance is a transfer from a mixed fund, and s.809Q(3) ITA defines the extent to which such a remittance is to be regarded as income or capital. The rule is that such a remittance is to be regarded as income first, not income *and* capital gain. Further, under the mixed fund rule, the amount of the remittance does not exceed the value of the sum remitted.

55.7 Sub-£2k taxpayer: Currency conversion date

The RDR Manual provides:

> **31190 Exchange Rates** [June 2010]
> *Remittance basis users below the "£2,000 threshold"*
> ... For the purposes of determining whether the amount of an individual's foreign income which is "not remitted" in a tax year is below £2,000 they obviously cannot apply [what HMRC regard as] the usual principle

10 The example in full (including its irrelevant detail) is as follows:
In example 1 above, Marianne, a remittance basis user, used £25,000 of her foreign chargeable gains to purchase a car. The car is regarded as derived from foreign income and gains.
Instead of bringing it straight to the UK, Marianne kept the car at her Italian villa for use on her visits to Italy. A few years later she then decides to bring the car to the UK for her and her daughter to use. At this time the approximate market resale value of the car is £14,000.

> for remittance basis users of using the exchange rate at time of remittance. Instead the balance of the unremitted foreign income is converted to pounds sterling *at the rate of exchange prevailing on the date last day of the tax year*.
> ITA07/s809D(2) provides that the amount of an individual's "unremitted" foreign income and gains for a tax year is-
> (a) the total amount of what would (if this section applied) be the individual's foreign income and gains for that year, minus
> (b) the total amount of those income and gains that are remitted to the UK in that year.
> So the above formula may be carried out in the foreign currency, looking at total income received and total income remitted, per currency, during the tax year. The balance which is left is the "unremitted foreign income". This is translated into sterling using the exchange on the last day of the tax year (5 April) to ascertain whether the 'unremitted foreign income' is below the £2,000 limit.

Thus the currency conversion date is that on 5th April of each year. I refer to this as "**the 5 April conversion view**". This practice only applied for the purposes of the £2k test and only for income, not for gains:

> This practice applies for the purposes of deciding whether ITA07/s809D applies ONLY. All of the individual's foreign income amounts for a tax year must be taken into account.
> *Example: Michaela*
> M received foreign income on 10 April of $5,000 when the exchange rate was (£1=$2).
> She remitted $1,500 to the UK on 15 May when the exchange rate was £1=$1.50 She will pay tax on the sterling amount of £1,000.
> At the end of the tax year, M's 'unremitted foreign income' will be calculated using the exchange rate at the end of the tax year, which is £1=$1.80.
> This is calculated as follows:
>
> | | |
> |---|---|
> | Total foreign income and gains for that year | $5,000 |
> | less | |
> | Amount of that foreign income remitted during year | ($1,500) |
> | Unremitted foreign income | $3,500 |
>
> If the exchange rate at the end of the year was £1=$1.50 then the $3,500 unremitted foreign income would be £2,333, which is above the threshold. ...

The HMRC currency technical note provides the reason for the 5 April

conversion view:

> 29. On further consideration of the wording of s809D, HMRC took the view that for foreign income, this calculation can only be made on the last day of the tax year, as that is the only date an individual's total and unremitted foreign income for a tax year can be ascertained. Consequently the foreign currency should be translated into sterling on that date also, for both the total foreign income and the remitted foreign income for the purposes of s.809D only.
> 30. Although UK income tax is charged on sterling amounts, it does not follow that the calculations to get to an income threshold such as this in s809D necessarily have to be made in sterling. Consequently the formula of deducting the remitted income from the total income can be carried out in the foreign currency on the last day of the tax year and then the balance which is left namely the "unremitted foreign income" can be translated into sterling on that date to ascertain whether it is below the £2,000 limit.

Thus the basis for the 5 April conversion view is the (erroneous) HMRC view that the currency conversion date for remitted income is the date of remittance. If the practitioners view is accepted, that the currency conversion date is the date that the income arises, s.809D does not raise any problem, as obviously the same approach should apply there also.

55.8 Nominated income and gains: Currency conversion date

The RDR Manual provides:

> **31190 Exchange Rates** [June 2010]
> *Nominated income and gains*
> Nominated income and gains are charged to UK tax on the arising basis... This means that any foreign income that is nominated for the purpose of the Remittance Basis Charge is converted to pounds sterling at the exchange rate that applied on the date the income arose.
> Foreign chargeable gains are always calculated in pounds sterling at the rate of exchange that applied on the date the gain is realised.

The Manual gives a straightforward example.[11]

55.9 Tax credit relief: Currency conversion date

International Manual provides:

---

11 "*Example (Francoise)*
F is a non-domiciled individual who is subject to the Remittance Basis Charge. She decides to nominate €20,000 of foreign income. The exchange rate on the date the income arose was €0.744 to the pound. She uses this rate to calculate the equivalent nominated amount of foreign income in sterling, which is £14,880."

> **162620. Rate of exchange to use** [January 2014]
> For the purpose of computing tax credit relief, foreign tax, payable directly or by deduction, should be converted into sterling at the rate of exchange obtaining on the date when the foreign tax for which credit is to be allowed becomes payable.
> *In practice*
> 1. Officers need not make enquiries in all cases in order to establish the precise date on which the foreign tax became payable under the foreign country's laws. Where the date is not known, the date of payment of the tax can normally be taken as the payable date. Where the foreign tax has been deducted at source from income, for example, from dividends, interest or royalties, the payable date will normally be the same date as the date on which the income is paid. If, however, the customer objects, or a substantial amount of tax is involved, the actual payable date should be determined. In many cases the date can be obtained from the demand note, provided that there has been no appeal against the foreign charge. If any difficulty arises in determining the payable date, in a case where such date is material, or if the customer objects to this basis, the case should be submitted to the Offshore Personal Tax Team (part of Charity, Assets & Residence) in the case of individuals and to CTIS Business International, Foreign Profits Team in all other cases....

The Manual does not distinguish between an arising basis taxpayer and a remittance basis taxpayer. So on the HMRC view, the currency conversion date for remitted income is the date of remittance, but the currency conversion date for the tax credit on the same income is the date that the tax was paid, which may not even be close. That is yet another anomaly arising from the HMRC view that the currency conversion date is the date of remittance.

55.10 Foreign currency bank accounts: CGT

The legislation deals separately with foreign currency bank accounts and foreign currency not in a bank account (coins and banknotes).[12] But bank accounts are the usual way to hold money, so that is the more important area.

A bank account is a debt, and a chargeable gain does not usually arise from a debt. Section 251 TCGA provides:

> Where a person incurs a debt to another, whether in sterling or in some

12 See 55.11 (Foreign currency held in coins or banknotes).

> other currency, no chargeable gain shall accrue to that (that is the original) creditor or his personal representative or legatee on a disposal of the debt...

Until 2012 this relief was disapplied for foreign currency bank accounts.[13] Section 252 TCGA now provides:

> (1)[A] Section 251(1) does not apply in relation to a gain accruing to a person on a disposal of a foreign currency debt (or an interest in such a debt)
> [B] unless that person is--
> (a) an individual,
> (b) the trustees of a settlement, or
> (c) the personal representatives of a deceased person.
> (2) A "foreign currency debt" is a debt–
> (a) owed by a bank[14] in a currency other than sterling, and
> (b) represented by a sum standing to the credit of an account holder in an account in that bank.[15]

Section 252(1)[A] TCGA still notionally disapplies the relief, but para [B] then adds an exception so large that the relief is in effect wholly restored: The relief in para [B] does not apply to companies, but that does not matter, as:

(1) UK companies are governed by the loan relationship rules (not discussed here)
(2) Foreign currency debts of non-resident companies are essentially outside the scope of CGT.[16]

It would have been simpler to apply the relief to all persons, but there it is.

---

13 Another exception concerns a debt on a security but that is not relevant to bank accounts.

14 "Bank" is not defined, but it does not matter.

15 The CG Manual 78330 formerly provided: "Foreign currency certificates of deposit in bearer form are not within TCGA 1992, s.252." The passage was deleted in April 2010. One is left to speculate as to whether HMRC have changed their view. The issue would require an examination of the nature of certificates of deposit.

16 See 53.5 (Computation of non-resident company gains on CT principles).
HMRC say: "There is no need to include companies in the exemption because companies' returns from FCBAs are not liable to tax on capital gains." Reform of the taxation of non-domiciled individuals: summary of responses to consultation (December 2011) para 2.102 accessible *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

The label "foreign currency debt" is not apt; "foreign currency bank account debt" would be better; but there it is. There could be a CGT charge on a foreign currency debt which is not a bank account debt, if s.251 relief did not apply, such as a secondhand debt or a debt on a security.

The problems which arose under the pre-2012 law have become (more or less) academic. It is just possible to envisage circumstances in which they might still arise, eg on secondhand debts, but it is not necessary to consider the topic here.[17]

55.11 Foreign currency held in coins or banknotes

Foreign currency is an asset on which a gain may accrue. Section 21(1) TCGA provides:

> All forms of property shall be assets for the purposes of this Act, ... including ...
>
> (b) currency, with the exception (subject to express provision to the contrary) of sterling ...

CG Manual provides:

> **78316 Identification of disposals with acquisitions** [April 2010]
> Foreign currency is subject to the same rules of identification and pooling as unquoted shares and securities. See CG50500+.

Here the share matching rules[18] do apply.

55.11.1 *Foreign currency for personal expenditure*

There is an exemption for foreign currency needed for personal expenditure abroad. This is not likely to affect remittance basis taxpayers, as gains on disposals of this kind are not likely to be remitted, but it is important for others. Section 269 TCGA provides:

> A gain shall not be a chargeable gain if accruing on the disposal by an individual of currency of any description acquired by him for the personal expenditure outside the UK of himself or his family or dependants (including expenditure on the provision or maintenance of any residence outside the UK).

---

17 See the 2011/12 edition of this work.

18 The rules are discussed in the 2011/12 edition of this work.

55.11.2 *Commentary*

The taxation of foreign currency should be the same as foreign currency bank accounts, and the relief in s.251 should be extended. However in practice this is not so important as it would be unusual for a person to hold substantial foreign currency outside a bank account (except perhaps as trading receipts outside CGT).

55.12 Interaction with mixed fund rules and HMRC examples

The CG Manual provides examples of the following:
(1) Remittance of part of FC account holding capital gain (Fatima)
(2) Ditto with previous offshore transfer (example 2)
(3) Remittance of part of FC account holding income & gain (example 3)
The RDR Manual provides examples of the following:
(4) Remittance of part of FC account holding income (Julius).
(5) Remittance of part of FC account holding RFI and RFE (Tom)
(6) Ditto with previous offshore transfer (Gelda)
The examples are discussed in the 2011/12 of this work, but this is not set out here as it is overtaken by the 2012 reforms.

55.13 Commentary: Solution to remaining foreign currency problems

The 2012 reform, which was advocated in the 2011/12 edition of this book, genuinely deserves the title of simplification. The problems which remain could be solved as follows.

Yearly exchange rate averaging The problem (for arising basis and remittance basis taxpayers) is the general impracticability when there are a significant number of transactions of converting foreign currency to sterling at a variety of moments during the year: the moment that income arises, the moment that gains arise, and the moment that capital expenditure is incurred. The solution is in the HMRC practice to allow use of an annual average rate in any currency during the year and to average out acquisitions and disposals. HMRC should publish rates each year for every currency. Provided taxpayers are not allowed to switch adventitiously between accurate and average exchange rates, this would have no significant cost implications.

Currency conversion date The second set of problems (for remittance basis taxpayers only) arise from HMRC's mistaken view that the currency conversion date for income of a remittance basis taxpayer is the date of remittance. The solution is to recognise the existing law, or (if that is not

accepted) to amend the law to the practitioners view. This would have no cost implications.

CHAPTER FIFTY SIX

UNREMITTABLE INCOME: EXCHANGE CONTROL

56.1 Unremittable income and exchange control: Introduction

The SAIM provides:

> **SAIM1150 - Savings and investment income: foreign income: unremittable income** [May 2012]
> Some countries impose exchange controls to regulate the flow of money. Where a person has income arising in one of these countries, it may be impossible to bring the income into the UK either because it is not permitted by the authorities in that country or because it is difficult to obtain foreign currency there. In these circumstances, tax could become due on income that was not available to pay the tax bill and hardship could result. Special rules in Chapter 4 Part 8 of ITTOIA 05 allow an individual or trustee to claim that unremittable income should not be brought into charge when it arises.
> The most common example is that of a UK resident who has a bank account in a country that imposes restrictions on the movement of currency...

There are five reliefs for receipts which cannot be received in the UK due to exchange control:

(1) Section 842 ITTOIA (unremittable income)
(2) Chapter 13 part 2 ITTOIA (unremittable trading receipts)
(3) Section 668, 669 ITA (accrued income scheme)
(4) Section 279 TCGA (capital gains)
(5) Sections 1275 CTA 2009 (CT)

In this chapter I focus on the first of these reliefs, which I call **"unremittable income relief"** and the capital gains relief (**"unremittable gains relief"**).

56.2 Unremittable income relief

Section 841(1) ITTOIA provides:

> This Chapter applies if—
>
> (a) a person is liable for income tax on income arising in a territory outside the UK, and
>
> (b) the income is unremittable.

ITTOIA EN provides:

> The relief [in chapter 4] applies only to income charged on the arising basis so does not apply to income charged on the remittance basis.[1]

This was the case in the pre-ITTOIA legislation. The former s.584 ICTA1988 applied:

> *Where a person is chargeable to tax by reference to the amount of any income arising in a territory outside the UK ...*

That relief only applied to arising basis taxpayers.[2] Now it is arguable that an individual who is a remittance basis taxpayer at the time the unremittable income arises may also qualify for unremittable income relief; but that issue only arises in circumstances where the income is:

(1) is unremittable (for the purposes of unremittable income relief) but

(2) is treated as remitted under the ITA remittance basis (so a claim is needed for unremittable income relief).

That will not often happen. If it does, there is no good reason for not applying the relief, and that would be consistent with the position for unremittable gains relief. But in practice a person who is a remittance basis taxpayer at the time the income arises may prefer not to claim the relief.

---

1 The same point was made in the former HMRC6 para 12.27 (Unremittable income): "Unremittable income should not be confused with unremitted foreign income and gains which is relevant only if you use the remittance basis.
Having unremittable income is relevant to your tax affairs only if you use the arising basis."

2 Contrast the former s.585 ICTA 1988 which applied if: "A person charged or chargeable for any year of assessment in respect of income from any source with tax which (apart from this section) falls to be computed ... on the amount of income received in the UK..."

56.2.1 *"Unremittable" income*

Section 841(2) ITTOIA provides:

> For the purposes of this Chapter, income is unremittable if conditions A and B are met.

I refer to **"unremittable income conditions A and B"**.

56.2.2 *Unremittable income condition A*

Section 841(3) ITTOIA provides:

> Condition A is that the income cannot be transferred to the UK by the person who is liable for income tax in respect of the income because of—
>
> (a) the laws of the territory where the income arises,
>
> (b) executive action of its government, or
>
> (c) the impossibility of obtaining there currency that could be transferred to the UK.

56.2.3 *Unremittable income condition B*

Section 841(4) ITTOIA provides:

> Condition B is that the person who is liable for income tax in respect of the income has not realised it outside that territory for an amount in sterling or in another currency which the person is not prevented from transferring to the UK.

56.3 The relief

Section 842(1) ITTOIA provides:

> If a person liable for income tax on unremittable income makes a claim for relief under this section in respect of that income, it is not taken into account for income tax purposes.

56.3.1 *Procedure and time limit for claim*

The claim (for individuals) is made by ticking box 1 of form SA106 (Tax return: Foreign Pages) 2013/14. The caption by the box reads: "**If you were unable to transfer any of your overseas income to the UK**– *read the notes and give details in the 'Any other information' box on your tax return or on a separate sheet*".

Section 842(5) ITTOIA provides:

> A claim under this section must be made on or before the first anniversary of the normal self-assessment filing date for the tax year for which the income would be charged to tax if no claim were made.

ITTOIA EN provides:

> The time limit is tied to the tax year for which the income would otherwise be chargeable, rather than to the tax year in which the income arises (as in the source legislation). This brings the time limit into line with the normal time limit for claims. See Change 140 in Annex 1.

But following the abolition of the preceding year basis, I cannot think of a case where the income arises in one year and is chargeable in another.

The SAIM provides:

> **SAIM1160 - Savings and investment income: foreign income: unremittable income: claims**
> ... Unremittable income: claims and withdrawal of relief
> A claim under ITTOIA/S842 does not mean that the income can be omitted from the tax return. The income must still be declared on the tax return but it will not be brought into charge if the claim is valid. This ensures that the amount of the income for each year is known so it can be assessed when the income becomes remittable.

That follows from s.42(1A) TMA: see 10.7 (Procedure and time limits for remittance basis claim).

56.3.2 *ECGD payments*

Section 842 ITTOIA provides:

> (3) No claim under this section may be made in respect of any income so far as an ECGD payment has been made in relation to it.
> (4) In subsection (3) "ECGD payment" means a payment made by the Export Credit Guarantee Department under an agreement entered into as a result of arrangements made under—
> (a) section 2 of the Export and Investment Guarantees Act 1991 (insurance in connection with overseas investment), or
> (b) section 11 of the Export Guarantees and Overseas Investment Act 1978.

56.4 Withdrawal of unremittable income relief

Section 843(1) ITTOIA provides:

> This section applies if—

(a) a claim under section 842[3] has been made in relation to any income, and
(b) either—
(i) the income ceases to be unremittable, or
(ii) an ECGD payment is made in relation to it.

If these conditions are satisfied, the relief is withdrawn. Section 843(3) ITTOIA[4] provides:

> If income ceases to be unremittable, the income is treated as arising on the date on which it ceases to be unremittable.

56.4.1 *Remittance basis taxpayer at time of withdrawal of relief*

The rules here are odd. The position depends on whether or not the source of income exists at the time that the income becomes remittable. If it does, then the income is relevant foreign income and if the individual is a remittance basis taxpayer at the time the income arises, the remittance basis will apply.

If the source has ceased, however, the income is within s.844 ITTOIA, and s.830(3) ITTOIA provides:

> But "relevant foreign income" does not include income chargeable as a result of section 844 (unremittable income: income charged on withdrawal of relief after source ceases).

The surprising consequence is that the remittance basis does not apply on a withdrawal of relief after the source of the income has ceased.[5]

The reason for this anomaly is historical. ITTOIA EN provides:

> Income charged by virtue of [section 844] is not "relevant foreign income", as defined in section 830 (see subsection (3) of that section). In the source legislation, the charge is under Schedule D Case VI (rather than Schedule D Cases IV or V). The potential relevance of such income to relief under section 392 of ICTA (Case VI losses) has been preserved by the appropriate entry in section 836B of ICTA (introduced by paragraph 340 of Schedule 1 to this Act).

It is obvious that s.830(3) serves no useful purpose, and should be

---

3 This will include a claim made under the pre-2005 legislation, if the income ceases to be unremittable after 2005.

4 Flagged by s.842(2) ITTOIA.

5 The law ought to be simplified by repealing s.830(3): see 10.3.2 (Let's simplify the definition of RFI).

repealed, if only for the sake of simplification; in practice I expect the point will rarely if ever arise; if it does, it would often be overlooked. There is certainly no tax at stake here.

56.4.2 *Non-resident taxpayer at time of withdrawal of relief*

As the income is foreign source income, there is no tax charge if the taxpayer is then non-resident.

56.4.3 *Taxpayer has died at time of withdrawal of relief*

Section 843(7) ITTOIA provides:

> If a person who would have become liable for income tax as a result of this section has died—
>
> (a) the personal representatives are liable for the tax instead, and
>
> (b) the tax is a debt due from and payable out of the estate.

That seems reasonable as the PRs should receive the income. In the case of a remittance basis taxpayer, it could work unfairly as the PRs will not qualify for the remittance basis. But a remittance basis taxpayer will not normally claim unremittable income relief.

56.4.4 *Valuation of income on withdrawal of relief*

Section 843(5) ITTOIA provides:

> The income treated as arising under subsection (3) or (4), and any tax payable in respect of it under the law of the territory where it arises, are taken into account for income tax purposes at their value at the date on which the income is treated as arising.

The SAIM provides:

> **SAIM1160 - Savings and investment income: foreign income: unremittable income: claims**
>
> ...Relief continues until the income becomes remittable. Exchange controls do change so anyone who makes a claim must check that the conditions for relief continue to be satisfied each year.
>
> **Withdrawal of relief**
>
> The income is assessable at the time it becomes possible to remit the income to the UK (ITTOIA05/S843). There is no requirement that the income must actually be remitted in order for the charge to arise. If the source has ceased, the income is taxed as if the source had not ceased (ITTOIA05/S844).
>
> The income is treated as arising on the date on which the qualifying

conditions cease to be satisfied. The foreign currency amount is translated into sterling at the market rate on that date, or if there is no market in the currency, the official exchange rate for the country concerned (ITTOIA05/S845).

Example (Martin)

M has income from an interest-bearing account in Ruritania. Ruritania has exchange controls, and he cannot remit the income to the UK. The income first arises in 2002/03, when the account earns interest of 1,000 Ruritanian doubloons (RUD). RUD 1,250 arises in 2003/04, and RUD 1,600 in 2004/05. In March 2005, M travels to Ruritania, closes the account and spends the money.

On 1 January 2008, Ruritania lifts the exchange controls and the income becomes remittable. M has validly claimed relief under ITTOIA/S842 (1). But in 2007/08, the income is brought back into charge under ITTOIA/S843. It does not matter that he no longer possesses the source of income (ITTOIA05/S844 (4)). M must include total income of RUD 3,850 (1,000 + 1,250 + 1,600), translated into sterling at the exchange rate prevailing on 1 January 2008, in his 2007/08 self-assessment.

56.4.5 *Prevention of double charge*

Section 843(6) ITTOIA provides:

> Subsections (3) to (5) do not apply so far as the income has already been treated as arising as a result of this section.

ITTOIA EN provides:

> For example, if relief has been withdrawn because an ECGD payment is received, there is no further charge under this section – to the extent of that payment – if the income itself subsequently becomes remittable.

56.4.6 *ECGD payments*

Section 843 ITTOIA provides:

> (2) In this section "ECGD payment" has the meaning given by section 842(4).
>
> (4) If an ECGD payment is made in relation to income, the income is treated, to the extent of the payment, as arising on the date on which the ECGD payment is made.

56.4.7 *Source ceased*

Section 844 ITTOIA provides:

> (1) This section applies if—

(a) income is treated as arising as a result of section 843, and
(b) at the time it is so treated the person who would have become liable for income tax as a result of that section—
(i) has permanently ceased to carry on the trade, profession, vocation or property business from which the income arises, or
(ii) in the case of income from another source, has ceased to possess that source.

(2) In the case of income from a trade, profession or vocation—
(a) the income is treated as a post-cessation receipt for the purposes of Chapter 18 of Part 2 (trading income: post-cessation receipts), but
(b) in the application of that Chapter to that income, section 243 (extent of charge to tax) is omitted.

(3) In the case of income from a property business—
(a) the income is treated as a post-cessation receipt from a UK property business for the purposes of Chapter 10 of Part 3 (property income: post-cessation receipts), but
(b) in the application of that Chapter to that income, section 350 (extent of charge to tax) is omitted.

(4) In the case of income from another source, the income is taxed as if the person continued to possess that source.

56.5 Position if no claim is made for unremittable income relief

A claim should normally be made, but it may occasionally be better not to claim, to avoid clawback issues when unremittable income will subsequently become remittable:

(1) Bunching income and bringing it into a higher rate.
(2) If it is anticipated that the foreign currency may appreciate against sterling.
(3) A person who is a remittance basis taxpayer at the time the income arises does not usually need the relief.

If no claim is made for the relief, an arising basis taxpayer will be chargeable, but on what amount? Section 845 ITTOIA provides:

> (1) If no claim is made under section 842 in relation to unremittable income arising in a territory outside the UK, the amount of the income to be taken into account for income tax purposes is determined as follows.
> (2) If the currency in which the income is denominated has a generally recognised market value in the UK, the amount is determined by reference to that value.

(3) In any other case, the amount is determined according to the official rate of exchange of the territory where the income arises.

56.6 Unremittable trading and property income receipts

The former ESC B38 explains the limits of s.841 unremittable income relief:

> 1. A person resident in the UK who carries on a trade partly overseas and partly in the UK is normally liable to UK income or corporation tax on all the profits from that trade. For this purpose the calculation of profits will include, in respect of overseas transactions–
> (i) amounts paid to the trader which are not remittable to the UK
> (ii) amounts owed to the trader which temporarily cannot be paid, and
> (iii) amounts owed to the trader which even when paid will not be remittable to the UK.
> solely as a consequence of local foreign exchange control restrictions.
> 2. Relief from tax is not available for such amounts under [s.841 unremittable income relief] ... because the profits of the trader of which they are a component part do not arise outsider the UK. Nor does the fact that the amounts are unremittable to the UK entitle the trader to relief under [s.35 ITTOIA] (bad and doubtful debts).

Instead, Chapter 13 Part 2 ITA 2007 provides relief. Section 272 ITTOIA applies that Chapter for the purposes of Part 3 of ITTOIA (property income). This is too specialist a topic to consider further here.

56.7 Accrued income profits

Section 841 would not apply to accrued income profits as the proceeds of the sale of accrued income securities are not the income. But in any event, s.841(5) ITTOIA provides:

> This Chapter does not apply to accrued income profits which a person is treated as making under Chapter 2 of Part 12 of ITA 2007, but see sections 668 and 669 of that Act (which make similar provision).

Instead, ss 668, 669 ITA provide relief. This is too specialist a topic to consider in detail here.

56.8 Unremittable gains relief

56.8.1 *The relief*

Section 279(1) TCGA sets out the requirements for unremittable gains relief:

Subsection (2) below applies where—

(a) chargeable gains accrue from the disposal of assets situated outside the UK, and

(b) the person charged or chargeable makes a claim, and

(c) the conditions set out in subsection (3) below are, so far as applicable, satisfied as respects those gains ("the qualifying gains");...[6]

(3) The conditions are—

(a) that the claimant was unable to transfer the qualifying gains to the UK, and

(b) that the inability was due to the laws of the territory where the assets were situated at the time of the disposal, or to the executive action of its government, or to the impossibility of obtaining foreign currency in that territory, and

(c) that the inability was not due to any want of reasonable endeavours on the part of the claimant.

The SAIM provides a comment on s.279(3)(c):

> SAIM1150 - Savings and investment income: foreign income: unremittable income
> For years before 2005-06 claims are made under ICTA88/S584 (2). The earlier rules also required that the income should no be unremittable due to 'want of reasonable efforts' on the taxpayer's part, but this requirement was omitted from ITTOIA05 and should not be interpreted harshly for 2004-05 and earlier years.
> Example *(Laura)*
> L has a bank account in another country where money is deposited from her mother's estate. She cannot bring the money back to the UK because of strict exchange controls. She has the option of putting the money into low yield government bonds in that country, and income from these bonds can be remitted to the UK. HMRC will accept that it is not reasonable for L to have to put the money in low yield bonds, and that the interest on the account is unremittable.

Unremittable gains relief (unlike unremittable income relief) may apply to a remittance basis taxpayer.

Section 279(2)(a) TCGA sets out the relief:

---

6 For completeness: s.279(1) concludes with provision for pre-TCGA 1992 claims (which will now be very rare): "... and subsection (2)(b) also applies where a claim has been made under section 13 of the 1979 Act."

For the purposes of capital gains tax—

(a) the amount of the qualifying gains shall be deducted from the amounts on which the claimant is assessed to capital gains tax for the year in which the qualifying gains accrued to the claimant, but..

56.8.2 *Withdrawal of relief*

Section 279(2)(b) TCGA provides for withdrawal of the relief:

(b) the amount so deducted shall be assessed to capital gains tax on the claimant (or his personal representatives) as if it were an amount of chargeable gains accruing in the year of assessment in which the conditions set out in subsection (3) below cease to be satisfied.

Unlike unremittable income relief, the remittance basis may apply on a clawback of the relief.

The CG gives this example:

CG78408 - Foreign currency: example

In 1983, Ms A who is both resident and domiciled in the UK buys a property overseas for foreign currency, which she acquired for £50,000 on the date of purchase of the property (that is, there was no gain or loss on the acquisition and disposal of the currency).

In 1986-87 she sells the property for 3,000,000 units of the foreign currency at a time when the exchange rate is 40 to £1. The sterling equivalent of the currency so obtained is therefore £75,000.

The chargeable gain (subject to expenses) is £75,000 less £50,000 equals £25,000, before indexation, and this is assessable for 1986-87.

Ms A makes a claim under TCGA92/S279 and establishes that she is unable to transfer any of the sale proceeds to the UK because of the foreign country's currency regulations. The gain of £25,000 less indexation is no longer assessable for 1986-87, and any assessment which may have been made should be adjusted accordingly.

In 1991-92, the foreign country relaxes its currency regulations and Ms A is then able to transfer the sale proceeds to the UK. She becomes assessable for that year (whether or not she remits the sale proceeds to the UK) on £25,000 less indexation (that is, the amount by which the assessment for 1986-87 was reduced).

If she disposes of the currency at a time when the exchange rate is 32 to £1, the gain on the currency (that is, the separate chargeable asset) is [text omitted as there is now a relief for foreign currency]

This gain is assessable for the year in which the currency is disposed of.

If the currency regulations for the foreign country had allowed remittance to the UK of only 1,000,000 units in 1986-87, the part of the gain assessable for that year would be computed as follows
Amount assessable (1,000,000 ÷ 3,000,000) × £25,000 = £8,330
...

56.8.3 *Supplemental provisions*

Section 279 continues:

(4) Where under an agreement entered into under arrangements made by the Secretary of State in pursuance of section 1 of the Overseas Investment and Export Guarantees Act 1972 or section 11 of the Export Guarantees and Overseas Investment Act 1978 any payment is made by the Exports Credits Guarantee Department in respect of any gains which cannot be transferred to the UK, then, to the extent of the payment, the gains shall be treated as gains with respect to which the conditions mentioned in subsection (3) above are not satisfied (and accordingly cannot cease to be satisfied).
(5) No claim under this section in respect of a chargeable gain shall be made—

(a) in the case of a claim for the purposes of capital gains tax, at any time not more than 4 years after the end of the year of assessment in which the gain accrues; or
(b) in the case of a claim for the purposes of corporation tax, more than 4 years after the end of the accounting period in which the gain accrues.

(6) The personal representatives of a deceased person may make any claim which he might have made under this section if he had not died.
[Subsections (7)(8) have transitional provisions for pre-1991 income which are not now likely to have effect.]

56.9 Interaction with anti-avoidance provisions

The interaction of unremittable income relief and the various anti-avoidance provisions raises a fine set of puzzles which fortunately do not often have to be considered.

The only reported case is *Van-Arkadie v Plunket* 56 TC 310. The taxpayer was a minority shareholder in a company resident in Rhodesia. The company realised a gain, part of which was treated as accruing to her under s.13 TCGA. The gain could not be transferred to the UK. The taxpayer claimed relief under (what is now) s.279 TCGA but failed:

Section [279] is concerned only with the case where a chargeable gain

> accruing on an actual or deemed disposal is represented by something, money or money's worth, which comes into the hands of the taxpayer. It is only in respect of that money or money's worth that it can be sensibly asked whether the taxpayer was unable to transfer it to the UK, and if he was whether the inability was due to the laws of the territory where the gain accrued and whether, if it was, that inability was due to any want of reasonable endeavours on his part. That last requirement seems to me in itself conclusive against the Respondent's case. In this case the Respondent's inability to remit the gain on which he is chargeable was not due to any want of reasonable endeavours to remit moneys to the UK; it was due to the fact that the company did not distribute and that he could not as a minority shareholder compel it to distribute the gain.[7]

If the shareholder had held a majority of the company, she could have compelled the company to distribute, and in those circumstances it is suggested that unremittable gain relief should be available.

If the income is unremittable income of a settlor-interested trust, it is suggested that unremittable income relief is available if the income is received by the settlor who is unable to remit it.

If a beneficiary receives a benefit within s.731 or s.87, and is unable to remit the benefit, it is suggested that unremittable income or gain relief applies, but in any event, the benefit must be valued taking into account the restriction on remittance, so it may have much value.

7 56 TC 310 at p.316.

CHAPTER FIFTY SEVEN

DOUBLE TAXATION ARRANGEMENTS: INTRODUCTION

57.1 DT reliefs: Introduction

The UK has more than 100 double tax treaties. A full discussion would need almost as many volumes.

The discussion in this book is mainly by reference to the OECD Model Double Taxation Convention on Income and on Capital ("**the OECD model**") though I refer at points to specific treaties.

The OECD model is a good starting point, because it has been the basis for tax treaties between developed countries since published (in draft in 1963, and finally in 1977). In any particular case the DTA concerned would need to be reviewed.

A full discussion of the OECD model would itself need a volume for every article (except article 7 which would require several volumes). Many books have been written on the topic; as the issues are worldwide, we benefit in the UK from the work of scholars, practitioners and Revenue authorities across the world.

Before the OECD model there was a **"Colonial Model"** and a few treaties of this form still survive, of which the most important are those with the Channel Islands and the Isle of Man. The Colonial Model was not published as such; the expression is used to refer to early UK treaty practice within the Commonwealth.

I only consider the UK side of the matter, ie whether a DTA provides exemption from UK tax and whether foreign tax can be used as a credit against UK tax. In any particular case it will also be necessary to consider the foreign tax position.

57.1.1 *Cross references*

In this chapter I consider general aspects of DTAs. The next two chapters

consider foreign tax credit relief, and the interaction of DT relief with UK tax legislation (especially anti-avoidance legislation).

Specific DT exemptions are considered in the chapter on that type of income; see:

22.36 (DT Relief: employment exercised outside UK)
15.24 (DT relief for trading income)
16.6 (DT relief for property income)
14.8 (Alimony and maintenance income)
18.17 (DT relief for interest income)
18.22.1 (Credit for EUSD withholding tax) - EU savings directive
20.7 (DT relief for dividend income)
21.7 (DT relief for royalty income)
24.7 (Double Taxation relief for pension income)
37.15 (Double Taxation relief) - accrued income scheme

The following topics are dealt with elsewhere:

6.1 (Three concepts of residence)
41.10 (DT relief for partnership)

For discretionary trusts, see 25.9 (Discretionary trusts treated as transparent to allow beneficiary reliefs); 25.11 (UK trust - non resident beneficiary: DT relief); 25.12 (Are discretionary trusts "beneficial owners" for DTA purposes?).

For IIP trusts, see 26.7 (DT reliefs).

For charities, see Kessler & Marre, *Taxation of Charities & Non-profit Organisations*, Chapter 14 (Double Taxation Treaties and Charities).[1]

I do not consider corporation tax.

57.2 Treaty terminology

The terms DT treaty/convention/arrangement/agreement are synonymous. The OECD Model use the word "convention" and UK tax legislation uses the term "double taxation arrangements". I prefer the word "treaty" as it seems clearest, but adopt the abbreviation DTA which has become standard usage.

Treaties commonly refer to income (or gains) **"derived by"** a person where the usual UK tax terminology would be that the income (or gains) arise or accrue to the person, or are received by the person; the meaning

1 (9th ed., 2013), online version *http://www.taxationofcharities.co.uk*.

is the same.[2] In American English the verb can be used transitively, eg: "*a resident is treated as deriving the income.*"

Treaties similarly refer to income **"derived from"** a state where the usual UK tax terminology would be income arising in a state or having a source in the state.

DTAs refer to "contracting state" but I abbreviate this to **"treaty state"** or just **"state"** and where that state is not the UK, I refer to it as **"the foreign state"**. The state where the source of income arises is **"the source state"** and the state where the individual is treaty-resident is **"the residence state"**.

57.3 Types of DT relief

There are two main types of DT relief:

(1) In some cases income/gains are taxable in one state (almost always the residence state) only:

(a) art 7 business profits (in absence of a PE)
(b) art 8 shipping and air transport
(c) art 11 interest (in some treaties)
(d) art 12 royalties
(e) art 13 gains (most types)
(f) art 18 pensions
(g) art 19 Government service
(j) art 21 other income

(2) In other cases income can be taxed in both states, in the case of dividends and interest with a limit on the source state's tax, but (under article 23) the residence state gives credit for the foreign tax:

(a) art 6 income from immovable property
(b) art 7 business profits where there is a PE in the other state
(c) art 10 dividends
(d) art 15 employment income
(e) art 17 artistes and athletes

We need terms for the various types of DT relief, and in this chapter I use the following terminology.

"DT exemption" applies where a DTA provides an exemption from tax.

"Foreign tax credit relief" applies where foreign tax is set against UK

---

2 Wheeler, *The Missing Keystone of Income Tax Treaties* (2012) para 2.4.2 (The OECD Model).

tax. This may be

(a) **"DTA tax credit"** where a DTA confers a credit or

(b) **"Unilateral tax credit"** where UK tax law (not a DTA) confers a credit.

The terms sometimes used are the "exemption" and the "set-off" methods of relief.

"IT/CGT computation deduction" applies where foreign tax is deducted in computing income or gains.

I refer to all these reliefs together as **"DT reliefs"**.

57.4 Types of residence and dual residence

The starting point is to note that there are (at least) three distinct concepts of residence. We need terms to describe them, and I coin the following terminology.

(1) **"UK-law residence"** means residence as defined in UK tax law.
   (a) A person who is resident in the UK within the UK tax law definition is **"UK-law UK resident"**
   (b) A person who is not resident in the UK within the UK tax law definition is**"UK-law non-UK resident"**.

(2) **"Treaty-residence"** means residence as defined in a DTA.
   (a) A person who is a resident of the UK within a DTA definition is **"treaty-resident in the UK"**.
   (b) A person who is resident in the foreign state within a DTA definition is **"treaty-resident in the foreign state"**. One could use the term "treaty-resident outside the UK." Statute sometimes calls this *"treaty non-resident"* but I think my term is clearer.

"Foreign-law residence" means residence as defined in some foreign tax law.

"Domestic law" means the law of the UK, or of a foreign state, as opposed to treaty law or international law.

Since UK-law residence and treaty-residence are distinct concepts,[3] a person who is UK-law UK resident may be:

(1) treaty non-UK resident (under the tie-breaker test);[4] or

---

3 See 6.2 (Relationship between treaty-residence and UK-law residence).

4 It would be useful to have a short term to describe someone who is UK-law UK resident but treaty-resident outside the UK (= treaty non-UK resident). But *dual resident* and *semi-resident* do not encapsulate the concept; *treaty tie-breaker non-UK resident*" does encapsulate the concept but it is so long-winded it seems better just to

(2) not treaty non-UK resident: described as having **"sole UK residence"**.[5]

These are somewhat clumsy terms but it is difficult to think of better. For a discussion of these terms, see 6.1 (Three concepts of residence).

"Dual residence" means residence in two countries, but is an ambiguous term until one specifies what type(s) of residence are involved. In its widest sense it means a person who is UK-law UK resident and also foreign-law resident in a foreign state. A dual resident person in that sense may be:

(a) treaty-resident in a foreign state
(b) treaty-resident in the UK or
(c) not treaty-resident anywhere (if there is no applicable DTA).

The term "dual resident" is sometimes used specifically to mean a person within (a)[6] and that may be a convenient shorthand when the meaning is clear; but that usage is not adopted in this chapter.

These are clumsy terms but it is difficult to think of better.

57.5 Significance of DT reliefs to different classes of residents

DT reliefs matter to all individuals, but different classes of individual are interested in different aspects of the reliefs. The permutations can be summarised thus:

Case (1): Individuals who are UK-law UK resident and not treaty-resident in a foreign state. Where there is an applicable DTA they will also be treaty-resident in the UK.

Case (2): Individuals who are UK-law UK resident and also resident in a foreign state under the tax laws of that state. These may be:

(a) treaty-resident in a foreign state
(b) treaty-resident in the UK or
(c) not treaty-resident anywhere (if there is no applicable DTT).

Case (3): Individuals who are not UK-law UK resident. These may be:

(a) treaty-resident in a foreign state
(b) not treaty-resident anywhere (if there is no applicable DTA).

Case 1: UK-law UK resident and not treaty-resident in a foreign state.

---

use the full expression when it is needed.

5 See 9.3.3 ("Sole UK residence").

6 See 51.17 (Dual resident trust: s.88 TCGA).

These do not directly qualify for any DT exemption but they may qualify for foreign tax credit relief (or IT/CGT computation deduction). They may also qualify for indirect DT relief if income or gains accruing to a trust or company which is treaty-resident in a foreign state are deemed to accrue to them under an anti-avoidance provisions such as s.624, TOA, s.13, etc.

Case (2)(a): UK-law UK resident and treaty-resident in a foreign state. As UK residents they are in principle subject to IT or CGT on all UK and foreign income and gains (subject where applicable to the remittance basis). However as treaty-resident in a foreign state they may qualify for DT exemptions from UK and foreign source income and gains. This category has become much more important from 2008/09, for two reasons. First, many individuals who before 2008 would have claimed the remittance basis now prefer to claim treaty relief, as a remittance basis claim will incur the remittance basis claim charge. Secondly following the withdrawal of IR20 and its replacement by the hopelessly vague HMRC 6, many more individuals find that they may possibly be UK-law UK resident and since they may be UK resident they claim treaty relief just in case. (This should cease to be such a problem when the statutory residence test takes effect in 2013/14).

Case (2)(b)(c): UK law UK resident and treaty-resident in the UK or not treaty-resident anywhere. These are in the same position as case 1.

Case (3)(a): Not UK-law UK resident and treaty-resident in a foreign state. As non-residents they are in principle subject to IT on UK source income only. As treaty-resident in a foreign state they may qualify for some DT exemptions (eg the OECD other income article and relief for UK source interest under the some treaties).

Case (3)(b) Not UK-law UK resident and not treaty-resident anywhere. As non-residents they are in principle subject to IT on UK source income (though the non-residents exemption will mitigate this). They will not qualify for any DT exemptions.

57.6 Interpretation of DTAs: Ordinary meaning & purposive construction

Short formulations of the principles of interpretation can only be expressed at a high level of generality which makes their application doubtful and their usefulness to the practitioner questionable. In short, as Voltaire observed, language is difficult to put into words. Nevertheless most cases start with these generalities so it is worth a brief summary here.

The starting point is article 31(1) of the Vienna Convention on the law

of treaties:

> A treaty shall be interpreted in good faith in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of its object and purpose.

The following statement of principles has often been approved:

> (1) It is necessary to look first for a clear meaning of the words used in the relevant article of the convention, bearing in mind that "consideration of the purpose of an enactment is always a legitimate part of the process of interpretation"... . A strictly literal approach to interpretation is not appropriate in construing legislation which gives effect to or incorporates an international treaty .... A literal interpretation may be obviously inconsistent with the purposes of the particular article or of the treaty as a whole. If the provisions of a particular article are ambiguous, it may be possible to resolve that ambiguity by giving a purposive construction to the convention, looking at it as a whole by reference to its language as set out in the relevant UK legislative instrument....
>
> (2) The process of interpretation should take account of the fact that--
>
> "The language of an international convention has not been chosen by an English parliamentary draftsman. It is neither couched in the conventional English legislative idiom nor designed to be construed exclusively by English judges. It is addressed to a much wider and more varied judicial audience than is an Act of Parliament which deals with purely domestic law. It should be interpreted,... 'unconstrained by technical rules of English law, or by English legal precedent, but on broad principles of general acceptation"...
>
> (3) Among those principles is the general principle of international law, now embodied in Article 31(1) of the Vienna Convention on the Law of Treaties. [The Judge sets out article 31 and continues] A similar principle is expressed in slightly different terms in McNair on the Law of Treaties (1961) at page 365, where it is stated that the task of applying or construing or interpreting a treaty is "the duty of giving effect to the expressed intention of the parties, that is, their intention as expressed in the words used by them in the light of the surrounding circumstances". It is also stated at page 366 of that work that references to the primary necessity of giving effect to "the plain terms" of a treaty or construing words according to their "general and ordinary meaning", or their "natural signification" are to be a starting point or prima facie guide and "cannot be allowed to obstruct the essential quest in the application of treaties, namely the search for the real intention of the contracting parties in using the language employed by them".

(4) If the adoption of this approach to the article leaves the meaning of the relevant provision unclear or ambiguous or leads to a result which is manifestly absurd or unreasonable recourse may be had to "supplementary means of interpretation" including travaux préparatoires: ...

(5) Subsequent commentaries on a convention or treaty have persuasive value only, depending on the cogency of their reasoning. Similarly, decisions of foreign courts on the interpretation of a convention or treaty text depend for their authority on the reputation and status of the Court in question...

(6) Aids to the interpretation of a treaty such as travaux préparatoires, international case law and the writings of jurists are not a substitute for study of the terms of the convention. Their use is discretionary, not mandatory, depending, for example, on the relevance of such material and the weight to be attached to it...[7]

57.7 Context of treaties

Article 31(2) of the Vienna convention provides:

2. The context for the purpose of the interpretation of a treaty shall comprise, in addition to the text, including its preamble and annexes:

(a) any agreement relating to the treaty which was made between all the parties in connection with the conclusion of the treaty;

(b) any instrument which was made by one or more parties in connection with the conclusion of the treaty and accepted by the other parties as an instrument related to the treaty.

3. There shall be taken into account, together with the context:

(a) any subsequent agreement between the parties regarding the interpretation of the treaty or the application of its provisions;

(b) any subsequent practice in the application of the treaty which establishes the agreement of the parties regarding its interpretation;

(c) any relevant rules of international law applicable in the relations between the parties.

4. A special meaning shall be given to a term if it is established that the parties so intended.

Article 32 Supplementary means of interpretation

Recourse may be had to supplementary means of interpretation, including the preparatory work of the treaty and the circumstances of its

7 *IRC v Commerzbank* 63 TC 218 at p.235; I omit some references given in the original.

conclusion, in order to confirm the meaning resulting from the application of article 31, or to determine the meaning when the interpretation according to article 31:

(a) leaves the meaning ambiguous or obscure; or

(b) leads to a result which is manifestly absurd or unreasonable.

57.8 Treaties in two languages

Article 33 of the Vienna convention provides:

> 1. When a treaty has been authenticated in two or more languages, the text is equally authoritative in each language, unless the treaty provides or the parties agree that, in case of divergence, a particular text shall prevail.
> 2. A version of the treaty in a language other than one of those in which the text was authenticated shall be considered an authentic text only if the treaty so provides or the parties so agree.
> 3. The terms of the treaty are presumed to have the same meaning in each authentic text.
> 4. Except where a particular text prevails in accordance with paragraph 1, when a comparison of the authentic texts discloses a difference of meaning which the application of articles 31 and 32 does not remove, the meaning which best reconciles the texts, having regard to the object and purpose of the treaty, shall be adopted.

57.9 Variations between DTAs

The Australian revenue discuss this issue:

> 46. It is important for interpretation purposes to remember that each DTA is the product of a separate bilateral negotiation process. While, therefore, there is a general template structure to Australia's DTAs, each contains variations in terms from other DTAs because they are negotiated against the background of the particular languages, legal systems, tax rules, tax treaty and wider economic policies and expectations of the respective countries at the time, as well as some historical influences.
> 47. Those factors, and the fact that treaty negotiations are conducted against the general background of the OECD and United Nations Model Tax Conventions (which, being products of international compromise and consensus, are couched in comparatively broad terms) mean that the Australian negotiators, administrators and courts cannot expect the terms of the DTAs to be expressed with the same precision as our ordinary domestic tax legislation. Nor is it possible to always maintain consistency in how the terms of a particular Article are expressed in the

various DTAs, because of the different 'mix' of the above factors in different negotiations and the 'give and take' that is a necessary incident of international negotiations.

48. This is an important point to bear in mind, because it means that the network of DTAs is not drafted in an absolutely uniform manner in relation to residents of all treaty partners, or in relation to similar activities or situations.

49. Differing wording in two DTAs may represent the same intended meaning (such as, in the ATO's view, the terms 'beneficial entitlement' in the Dividends, Interest and Royalties Articles of some DTAs and 'beneficial ownership' in the corresponding Articles in other DTAs). Often such differences exist because a country wants to avoid unintentionally 'picking up' a domestic law usage for an undefined term that may be different to the international tax meaning of the phrase more usually relied on. Alternatively, it may be because a country does not recognise a particular concept and regards the use of a term as potentially creating uncertainty before its courts and in the administration of the DTA.[8]

50. In other cases, differences in wording may represent specific negotiating intentions (e.g., the reference simply to 'income' rather than 'income, profits or gains' in many of our pre-capital gains DTAs is, in the ATO's view, significant as is noted in Taxation Ruling TR 2001/12).[9]

51. It is sometimes possible that the same wording in different DTAs could present a different intended meaning. DTA negotiators will generally seek to identify the differences between a DTA under negotiation and their existing treaty network wording and as far as possible avoid the same wording having different usages, but that will not always be possible.

52. One practical example of the potential significance of different wording between DTAs is that, although the business profits/ permanent establishment ('PE') principle is common to all the DTAs, the definition of a PE in one DTA may be substantively different to the definition in another DTA.

53. For example, the definition of a PE in the United States Convention

---

8 [Footnote original] Such as the concepts of 'citizenship' and 'nationality' - frequently only one or the other of these has a clear domestic law meaning for a DTA party, or the meaning may differ as between the Parties. Because of this, an Article such as the Government Service Article in the Austrian Agreement and some of Australia's other DTAs refers to 'a citizen or national' of a country.

9 [Footnote original] At paragraphs 56 and 59.

> is wider than the definition in the Japanese Agreement. Accordingly, Australia may have a taxing right under the Business Profits Article of the United States Convention in respect of certain profits of a United States enterprise but not under the Business Profits Article of the Japanese Agreement in respect of like profits of a comparable Japanese enterprise.[10]

A UK tribunal adopted the same view:

> [109] Comparison of the language of the DTA which we are called upon to construe with the language of another double taxation convention ... would be a very unsure basis to reach a conclusion contrary to the one we have reached by reference to directly related materials (particularly the exchange of notes) and we reject it.[11]

57.9.1 *Foreign court decisions*

The Australian revenue discuss this issue:

> 119. Since Australian courts have recognised that interpretation in a way conducive to producing a uniform international interpretation is an important goal in interpreting treaties,[12] it follows that foreign court decisions on similar provisions may give valuable guidance about the meaning of a term. They need to be treated with some caution, since they may be founded on different interpretative principles or approaches. Some courts may, for example, less strictly follow the Vienna Convention rules, or may apply a domestic law meaning of a term when they should apply an accepted international tax meaning. A court may also, quite properly, apply a domestic law meaning to a term left undefined by the DTA, whereas the same approach before Australian courts may lead to a different domestic law meaning being 'picked up'.
>
> 120. Nevertheless, a foreign court's decisions, including on the foreign language text, may provide important insights. Some foreign courts have considerable experience and expertise in interpreting DTAs. In *Lamesa*, the Full Federal Court did not need to (or wish to) express a concluded view on the issue. The Court noted, however, that:[13]
>
> We would, however, express our agreement with the distinction drawn

---

10 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.

11 *Macklin v HMRC* [2014] SFTD 290 at [109]. The decision is not yet final.

12 See paragraph 87.

13 97 ATC 4229 at 4757.

by Lindgren J in *Allstate Life Insurance Co v. Australia & New Zealand Banking Group (No 6)* (1996) 64 FCR 79 between the content of foreign law which is receivable in evidence and the application of that law to facts once its content has been ascertained which is not. However, where the construction of an international treaty arises, evidence as to the interpretation of that or subsequent treaties in one of the participating countries forms part of a matrix of material to which reference could properly be made in an appropriate case. As presently advised we would not wish it to be thought that a limited view of the material to which reference could be made in interpreting a double tax treaty should be taken. Had there been some decision of an appropriate Dutch court interpreting a treaty with identical or similar language, then, in our view, evidence of such a decision might well have been admissible.

121. There are also strong reasons to consider, as a matter of practice, the decisions of courts from countries other than the treaty partner (an issue not addressed by the Lamesa Court). Any such consideration would need to be consistent with the comments of the High Court in *Cook v Cook*[14] that:

> Subject, perhaps, to the special position of decisions of the House of Lords given in the period in which appeals lay from this country to the Privy Council, the precedents of other legal systems are not binding and are useful only to the degree of the persuasiveness of their reasoning.[15]

57.9.2 *Foreign revenue guidance*

The Australian revenue discuss this issue:

> 125. Extrinsic materials of various types are extensively relied on by some countries. Some, such as the 'Technical Explanations' which are a feature of United States domestic procedures for consideration of a DTA, may help explain the views being put by the relevant DTA partner or a taxpayer. As the 'Technical Explanations' are, however, developed as part of the internal processes of the United States when implementing a DTA, they are of little or no usefulness in objectively proving the intent of both parties to a DTA. They are primarily designed to reflect the views of the United States negotiators, upon which there may not necessarily be a consensus ad idem ('meeting of minds'), but they may

14 (1986) 162 CLR 376 at 390.

15 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.

in some cases provide useful signposts to that consensus.[16] Even if they might not be admissible in court, or might be of little probative value, they may better inform an understanding of the DTA as a whole.[17]

57.10 Status of OECD commentary

The OECD have adopted the following formal recommendation:

> THE COUNCIL ... RECOMMENDS the Governments of Member countries:
> 1. To pursue their efforts to conclude bilateral tax conventions on income and on capital with those Member countries, and where appropriate with non-member countries, with which they have not yet entered into such conventions, and to revise those of the existing conventions that may no longer reflect present-day needs;
> 2. When concluding new bilateral conventions or revising existing bilateral conventions, to conform to the Model Tax Convention, as interpreted by the Commentaries thereon;
> 3. That their tax administrations follow the Commentaries on the Articles of the Model Tax Convention, as modified from time to time, when applying and interpreting the provisions of their bilateral tax conventions that are based on these Articles.[18]

The OECD commentary provides:

> 29. As the Commentaries have been drafted and agreed upon by the experts appointed to the Committee on Fiscal Affairs by the Governments of Member countries, they are of special importance in the development of international fiscal law. Although the Commentaries are not designed to be annexed in any manner to the conventions signed by Member countries, which unlike the Model are legally binding international instruments, they can nevertheless be of great assistance in the application and interpretation of the conventions and, in particular, in the settlement of any disputes.
> 29.1 The tax administrations of Member countries routinely consult the

---

16 [footnote original] See on the use of United States materials and the different approaches taken to such materials by the courts of other countries, Edwardes-Ker *Tax Treaty Interpretation* (1994) at paragraph 25.04. Edwardes-Ker notes, importantly, that this does not supplant the rule that a treaty must be interpreted in accordance with the common intention of both States.

17 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.

18 C(97)195/FINAL 23 October 1997; I omit the recitals.

Commentaries in their interpretation of bilateral tax treaties. The Commentaries are useful both in deciding day-to-day questions of detail and in resolving larger issues involving the policies and purposes behind various provisions. Tax officials give great weight to the guidance contained in the Commentaries.

29.2 Similarly, taxpayers make extensive use of the Commentaries in conducting their businesses and planning their business transactions and investments. The Commentaries are of particular importance in countries that do not have a procedure for obtaining an advance ruling on tax matters from the tax administration as the Commentaries may be the only available source of interpretation in that case.

29.3 Bilateral tax treaties are receiving more and more judicial attention as well. The courts are increasingly using the Commentaries in reaching their decisions. Information collected by the Committee on Fiscal Affairs shows that the Commentaries have been cited in the published decisions of the courts of the great majority of Member countries. In many decisions, the Commentaries have been extensively quoted and analysed, and have frequently played a key role in the judge's deliberations. The Committee expects this trend to continue as the world-wide network of tax treaties continues to grow and as the Commentaries gain even more widespread acceptance as an important interpretative reference.

30. Observations on the Commentaries have sometimes been inserted at the request of Member countries that are unable to concur in the interpretation given in the Commentary on the Article concerned. These observations thus do not express any disagreement with the text of the Convention, but usefully indicate the way in which those countries will apply the provisions of the Article in question. Since the observations are related to the interpretations of the Articles given in the Commentaries, no observation is needed to indicate a country's wish to modify the wording of an alternative or additional provision that the Commentaries allow countries to include in their bilateral conventions.

Reservations of certain Member countries on some provisions of the Convention

31. Although all Member countries are in agreement with the aims and the main provisions of the Model Convention, nearly all have entered reservations on some provisions, which are recorded in the Commentaries on the Articles concerned. ... It is understood that insofar as a Member country has entered reservations, the other Member countries, in negotiating bilateral conventions with the former, will retain their freedom of action in accordance with the principle of reciprocity.

> 32. The Committee on Fiscal Affairs considers that these reservations should be viewed against the background of the very wide areas of agreement that has been achieved in drafting this Convention.

The Australian revenue refer to the OECD resolution and say:

> 101. ... While not binding (since they are not formal OECD 'Decisions', binding on OECD Members under the OECD Constitution), the OECD Model and Commentaries create a general or 'quasi-political', rather than 'legal', expectation that OECD Members will basically comply, subject to specific 'Observations' and 'Reservations' lodged with the OECD. Those Observations and Reservations place on record that the relevant DTA policies and practices of the countries concerned are based on a different approach than that indicated in the OECD Model or its Commentaries. Australia has lodged various Observations and Reservations to the OECD Model and Commentaries over time which (like Observations and Reservations lodged by other OECD Member countries) are reproduced in the OECD Commentaries. The status and interpretative relevance of Observations and Reservations is considered further below.[19]
>
> 102. In *Thiel*, the High Court judges all accepted that the OECD Model Taxation Convention's official Commentaries may be relevant to the interpretation of DTAs based on the OECD Model. In *Thiel*, McHugh J (with whom the majority agreed in their joint judgment) approved recourse to the OECD Model and Commentaries under Article 32 of the Vienna Convention (that is, as supplementary means only available for consideration when there is ambiguity or the like, or to confirm a meaning reached by examining Article 31 materials).[20]
>
> 103. Dawson J also approved reference to the Model and Commentaries 'as a supplementary means of interpretation to which recourse may be had under Article 32 of the Vienna Convention'.[21]His Honour went further than the other judges, however, by expressing the view that the OECD Model and Commentaries were also relevant under Article 31 of the Vienna Convention, as primary materials to be considered even when there was no ambiguity or the like.[22] In so doing, Dawson J

---

19 At paragraph 109ff.

20 *Thiel v FC of T* (1990) 90 ATC 4717, at 4727 and 4720.

21 *Ibid*, at 4723.

22 [Footnote original] Dawson J, in his discussion of Article 31 of the Vienna Convention at 4723, had stated: "For my part, I do not see why the OECD model convention and commentaries should not be regarded as having been made in connection with and accepted by the parties to a bilateral treaty *subsequently*

nevertheless acknowledged that 'some doubts have been expressed about the applicability, as a matter of language, of Article 31 to the Commentaries in the case of a bilateral treaty such as a double taxation agreement'.[23]

104. The Commentaries, with the various Observations and Reservations of OECD Member countries which they reproduce (and which are further considered below),[24] therefore provide important guidance on interpretation and application of the OECD Model and as a matter of practice will often need to be considered in interpretation of DTAs, at least where the wording is ambiguous, which (as noted above)[25] is inherently more likely in treaties than in general domestic legislation.

105. In addition, the Commentaries, with the Observations and Reservations, do provide part of the historical context of the DTA negotiations. They also have a role in testing the interpretation reached by other means, although if they conflict with, rather than confirm, that interpretation there may be an issue of whether this would be admissible in a court, since the matter was left unresolved by the *Thiel* judgments.

...

Observations & Reservations

109. A further point which needs to be considered is the relevance for interpretation purposes of the previously mentioned Observations and Reservations of individual OECD Member countries to the OECD Model Tax Convention and its Commentaries, as Australia, like some of its DTA partners, sometimes depart significantly from the OECD Model. OECD Member Countries lodge ' Reservations' when they do not agree with either the relevant text of an OECD Model Article or any variations in text permitted by the Commentaries (and where they therefore wish to put other countries on notice of their views and intentions in negotiating the terms of the DTA). Countries enter 'Observations' if they do not object to the Model Article's text, but do not concur with the interpretation of that text set out in the Commentaries.

110. The theory behind the Observations and Reservations is most

---

concluded in accordance with the framework of the model". (emphasis added).

23 [Footnote original] *Thiel v FC of T* (1990) 90 ATC 4717, at 4723. He cited, as to the doubts, Avery Jones et al Part II at 92. Edwardes-Ker *Tax Treaty Interpretation* (1994) similarly considers that the OECD Commentaries do not fall within the meaning of Article 31(2) of the Vienna Convention: paragraph 15.03.

24 Paragraph 109ff.

25 Paragraph 109ff.

clearly stated in the Introduction to 'Non-Member Positions'[26] section in the OECD Model Convention Commentaries. The Introduction reads:

> 2. ... Recognising that non-Member countries could only be expected to associate themselves to the development of the Model Tax Convention if they could retain their freedom to disagree with its contents, the Committee also decided that these countries should, like Member countries, have the possibility to identify the areas where they are unable to agree with the text of an Article or with an interpretation given in the Commentary. ...
>
> 5. ... For each Article of the Model Tax Convention, the positions that are presented in this document indicate where a country disagrees with the text of the Article and where it disagrees with an interpretation given in the Commentary in relation to the Article.

111. Observations and Reservations may be of considerable relevance in explaining variations from the OECD Model, both when interpreting implementing legislation under section 15AA of the Acts Interpretation Act 1901 and when applying Article 31 of the Vienna Convention. They may not ultimately be admissible in court except to confirm the interpretations otherwise reached under those provisions or when considering ambiguous provisions under Article 32 of the Vienna Convention or, possibly, under section 15AB of the Acts Interpretation Act 1901.[27]

57.10.1 *Changes to OECD commentary*

The OECD model commentary provides:

> 33. When drafting the 1977 Model Convention, the Committee on Fiscal Affairs examined the problems of conflicts of interpretation that might arise as a result of changes in the Articles and Commentaries of the 1963 Draft Convention. At that time, the Committee considered that existing conventions should, as far as possible, be interpreted in the spirit of the revised Commentaries, even though the provisions of these conventions did not yet include the more precise wording of the 1977

---

27 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.
See Lang and Brugger "The role of the OECD Commentary in tax treaty interpretation"(2008) 23 Australian Tax Forum, accessible *http://www.wu.ac.at/taxlaw/institute/staff/publications/langbrugger_australiantaxforum_95ff.pdf*

Model Convention. It was also indicated that Member countries wishing to clarify their positions in this respect could do so by means of an exchange of letters between competent authorities in accordance with the mutual agreement procedure and that, even in the absence of such an exchange of letters, these authorities could use mutual agreement procedures to confirm this interpretation in particular cases.

34. The Committee believes that the changes to the Articles of the Model Convention and the Commentaries that have been made since 1977 should be similarly interpreted.

35. Needless to say, amendments to the Articles of the Model Convention and changes to the Commentaries that are a direct result of these amendments are not relevant to the interpretation or application of previously concluded conventions where the provisions of those conventions are different in substance from the amended Articles. However, other changes or additions to the Commentaries are normally applicable to the interpretation and application of conventions concluded before their adoption, because they reflect the consensus of the OECD Member countries as to the proper interpretation of existing provisions and their application to specific situations.

36. Whilst the Committee considers that changes to the Commentaries should be relevant in interpreting and applying conventions concluded before the adoption of these changes, it disagrees with any form of a contrario interpretation that would necessarily infer from a change to an Article of the Model Convention or to the Commentaries that the previous wording resulted in consequences different from those of the modified wording. Many amendments are intended to simply clarify, not change, the meaning of the Articles or the Commentaries, and such a contrario interpretations would clearly be wrong in those cases.

36.1 Tax authorities in Member countries follow the general principles enunciated in the preceding four paragraphs. Accordingly, the Committee on Fiscal Affairs considers that taxpayers may also find it useful to consult later versions of the Commentaries in interpreting earlier treaties.

Avery Jones says:

If the OECD suddenly came up with a better model, it would be a long time before it generally was adopted in practice and meanwhile, there would be a long transition while the existing 1,400 treaties were renegotiated. There is therefore a tendency to change the Commentary instead. The hope is that the new Commentary then will apply to all the existing treaties. As someone said, it is like the Bible; the words stay the same, only the commentary changes. Does anyone know what courts

will do when they are faced with interpreting a treaty when the Commentary makes fundamental changes subsequent to the treaty? There are few cases so far, probably because many of the fundamental changes are recent. Unless there is a reasonable expectation that courts will give effect to some of the fundamental changes that are being made to the Commentary, and I doubt if this is the case, there is no point in making fundamental changes to the Commentary. In fact, from the point of view of the tax authority, changing the Commentary in this way could make matters worse. In light of statements in the Introduction to the Model Treaty that existing treaties should be interpreted in light of new Commentaries, the tax authority may feel that it cannot properly argue against the interpretation contained in Commentaries made later than the treaty in question, but the taxpayer can, and probably will succeed if he does. It follows that the only fundamental changes that can have effect are those in favour of the taxpayer, which may not be quite what tax authorities sitting round the OECD table in Paris intend.

[Avery Jones sets out the comments of the Commentary on the issue and continues]: It seems to me that too little attention is paid to the legal effect of later Commentaries in internal law, and I am doubtful about whether any legal weight should be given to the Committee's retrospective views about proper interpretation. Tax treaties are different from normal international treaties under which the contracting states can agree to any interpretation;[28] they are also part of internal tax law affecting taxpayers and subject to interpretation by courts in that country. In relation to the latter, these statements in the Introduction may be wishful thinking on the part of the members of the Committee rather than a statement of what the legal position actually is. ...I think we would say in the United Kingdom, that later Commentaries should not even be considered.

...On the other hand, it does seem odd that if a country makes a new treaty today, which in a particular respect is in exactly the same form as an older one made with another country at the time of an earlier Commentary, the two treaties will have different meanings, which does seem contrary to the whole principle of having Commentaries. It is not as if parliaments (certainly in my country) take any notice of changes in the Commentary in approving treaties, particularly so when there is no mention of the Commentary in the treaty. If - and this may be a big if - parliaments were prepared to approve a statement in the treaty that it

28 Under art. 31(3) of the Vienna Convention on the Law of Treaties, subsequent agreements between the parties have the same status as context.

was to be interpreted in the light of the Commentaries from time to time in force, would this be desirable? It effectively would be a statement that the parties intended that a special meaning, determined in the future by the OECD, should apply, which as far as the two tax authorities are concerned, is of course exactly what they do intend, as the Introduction makes clear.[29]

There must be a boundary between interpretation and change. If the later Commentary says that black now means white, there seems little doubt that article 32 will not help to give a treaty that interpretation. If, on the other hand, the parties have stated in advance that, as a special meaning to be determined later, black does mean white, a court might give effect to it. You may say that this is so extreme an example that it would never happen. Unfortunately, there are examples of the Commentary changing its meaning from black to white....[30]

If changes in the Commentary in the past had been restricted to what might be argued to be interpretation, there would be a strong case for an approach giving effect to future Commentaries as a special meaning, always assuming that parliaments would accept it. But, as the OECD has made such major changes to later Commentaries, it is very doubtful that this solution will now be acceptable. ... The extent to which the later Commentary has effect is in the hands of the court, which will not accept that a change from black to white is confirming the ordinary meaning or resolving ambiguities or obscurity, or avoiding manifestly absurd or unreasonable results. On the other hand, it is likely that more minor changes will be effective, which will assist the harmonization of interpretation of treaties. It is already the case that courts in many countries do refer to later Commentaries in the case of minor changes and including something to that effect in the treaty will encourage courts in all countries to do so.[31]

The Australian revenue say:

Subsequent revisions to OECD Commentaries

106. There is some debate over whether subsequent changes to the OECD Commentaries should be used as an aid to interpretation of earlier DTAs. On one hand, there is the view that the OECD Commentaries are only relevant to those DTAs subsequently concluded.

---

29 OECD Commentary, note 31, Introduction, PP33-36.

30 Avery Jones gives an example from Article 15 (employment income); see 22.41 (Who is the employer?).

31 Avery Jones, "Are Tax Treaties Necessary?" 53 Tax Law Review 1.

Einfeld J expressed this view in the Federal Court decision of the first instance in *Lamesa Holdings BV v FC of T*. His Honour referred to the Full High Court decision in *Thiel* and to the comments made by Dawson J in that case:[32]

> Further extrinsic material, referred to in Thiel as permissible by Mason CJ, Brennan and Gaudron JJ, who agreed with McHugh J, is consideration of the 1977 OECD Model and Commentaries in construing a double tax agreement. Dawson J added an important caveat to this view, namely that the OECD model and commentaries are only applicable to those bilateral treaties subsequently concluded.

107. On the other hand, the Introduction to the OECD Commentaries now indicates more clearly that the later Commentaries are intended by OECD Member states to be used for interpretation and application of DTAs concluded before their adoption, except where the OECD Model has been changed in substance. The Year 2000 update to the OECD Model and Commentaries states: [text set out above]...

108. These changes to the Commentaries reflect the fact that the Commentaries are usually expressed not as forming an agreement between countries as to a new meaning but as reflecting a common view as to what the meaning is and always has been. Accordingly, unless it is apparent that the substance of the OECD Model has itself changed since a DTA was negotiated or the treaty in question does not conform to the OECD Model, or unless the Commentaries make clear that a former interpretation has actually been substantively altered, rather than merely elaborated, the ATO considers it appropriate, as a matter of practice, to consider, at least, the most recently adopted/published OECD Commentaries (currently the Year 2000 Commentaries) as well as others which may have been available at the time of negotiation.[33] Often, if a DTA provision is to be fully understood, the changes that have occurred to the relevant OECD Commentaries over time will need

---

32 97 ATC 4229 at 4237.

33 [Footnote original] This approach may also be justified in terms of Article 31(3) of the Vienna Convention, with the Commentaries representing either 'a subsequent agreement between the parties regarding the interpretation of the treaty' (Article 31(3)(a)) or 'any subsequent practice in the application of the treaty which establishes the agreement of the parties relating to its interpretation' (Article 31(3)(b)). In *Lamesa*, Einfeld J in fact referred to the 1977 OECD Commentaries when interpreting the 1976 Netherlands Agreement (Schedule 10 to the Agreements Act) on the basis that the relevant part was based on an OECD Report released in 1974 and widely available.

to be examined and considered.[34]

57.10.2 *Summary*

A great deal of ink has been spilt on this topic, but all it comes down to is that a Judge may ignore any OECD commentary if sufficiently minded to do so, and may ignore post-treaty amendments to the commentary with a relatively easy conscience.

57.11 Undefined terms have domestic law meanings

Article 3(2) OECD model convention provides:

> As regards the application of the Convention at any time by a Contracting State, any term not defined therein shall, unless the context otherwise requires, have the meaning that it has at that time under the law of that State for the purposes of the taxes to which the Convention applies, any meaning under the applicable tax laws of that State prevailing over a meaning given to the term under other laws of that State.

Avery Jones states:

> At first sight, it seems obvious that a treaty term should mean the same in both states, rather than have different internal law meanings in each of them; indeed, there are those who advocate this. But this approach overlooks that the tax systems in internal law do not have the same scope. Article 3(2) has the effect that the relieving provisions of the treaty correspond exactly to the taxing provisions of internal law. If expressions meant the same in both countries, this would not be the result. It would not lead to a sensible result if one country had a wider meaning of a type of income that it had to exempt than the other, and the treaty meaning was the same in both countries. The likely result would be that something covered by the internal law charge would not be exempt as a result of the treaty, or, less importantly, part of the treaty

---

34 [Footnote original] An example is the amendment to paragraph 8 of the 1977 Model Commentaries on Article 5 (permanent establishments) by the 1992 Commentaries (in response to a 1983 Report). The amendments treated the leasing of industrial, scientific and commercial equipment as a matter for the Business Profits Article, rather than the Royalties Article. Australia and some other countries disagreed, and lodged a 'Reservation' (a concept discussed at paragraph 109ff) to the OECD Model Royalties Article, to this effect: see paragraph 39 of the OECD Model Commentary on Article 12. The history of the OECD Model and Commentaries is found in Volume 1 of the loose-leaf (and most authoritative) version of the OECD Model.

> meaning would have no effect.
>
> A problem that article 3(2) appears to encourage is for each state to use its own meaning of terms not only when relieving tax in the source state, which is mainly what the treaty is about, but also when it is giving relief as the residence state. This can lead to double taxation when the residence state says that if it had been the source state, it would not have taxed, so it will not give any relief for the tax that the source state, in fact, has charged because on its interpretation, the treaty does not prevent it. Or the reverse, when the residence state says that it would have taxed if it had been the source state, and so it will exempt the income even though the source state did not tax (although at least this problem does not arise in our countries as we, as the residence state, would tax and give credit for nothing). I do not believe that either result is intended by the Model Treaty; it would be a strange model treaty if it did. It would be nice if the Commentary said so plainly, rather than implying the reverse in an obscure section dealing with thin capitalization.[35] I shall not set out the arguments here as my co-authors and I have written extensively about it.[36] It would be a considerable improvement to the Model Treaty and Commentaries if this point were clarified.[37]

The wording of article 3(2) has changed slightly over time but the changes were intended to clarify rather than to alter the meaning, so older treaties using the older wording should not have a different effect.

The first change clarifies that the meanings of words are contemporary meanings rather than those historically used at the date of the treaty (known as an ambulatory approach to construction). The OECD commentary provides:

> 11. This paragraph provides a general rule of interpretation for terms used in the Convention but not defined therein. However, the question arises which legislation must be referred to in order to determine the meaning of terms not defined in the Convention, the choice being between the legislation in force when the Convention was signed or that in force when the Convention is being applied, i.e. when the tax is imposed. The Committee on Fiscal Affairs concluded that the latter interpretation should prevail, and in 1995 amended the Model to make

35 [Footnote original] OECD Commentary, note 31, art. 23, P68.

37 Avery Jones, "Are Tax Treaties Necessary?" 53 Tax Law Review 1.

> this point explicitly.
>
> 12. However, paragraph 2 specifies that this applies only if the context does not require an alternative interpretation. The context is determined in particular by the intention of the Contracting States when signing the Convention as well as the meaning given to the term in question in the legislation of the other Contracting State (an implicit reference to the principle of reciprocity on which the Convention is based). The wording of the Article therefore allows the competent authorities some leeway.
>
> 13. Consequently, the wording of paragraph 2 provides a satisfactory balance between, on the one hand, the need to ensure the permanency of commitments entered into by States when signing a convention (since a State should not be allowed to make a convention partially inoperative by amending afterwards in its domestic law the scope of terms not defined in the Convention) and, on the other hand, the need to be able to apply the Convention in a convenient and practical way over time (the need to refer to outdated concepts should be avoided).

The second change clarifies that the meanings of words are the tax meanings and not other meanings. The OECD commentary provides:

> 13.1 Paragraph 2 was amended in 1995 to conform its text more closely to the general and consistent understanding of member states. For purposes of paragraph 2, the meaning of any term not defined in the Convention may be ascertained by reference to the meaning it has for the purpose of any relevant provision of the domestic law of a Contracting State, whether or not a tax law. However, where a term is defined differently for the purposes of different laws of a Contracting State, the meaning given to that term for purposes of the laws imposing the taxes to which the Convention applies shall prevail over all others, including those given for the purposes of other tax laws.

The wording of the clause may be changed in line with a mutual agreement clause, if there is one. The OECD commentary recognises that:

> States that are able to enter into mutual agreements (under the provisions of Article 25 and, in particular, paragraph 3 thereof)[38] that establish the meanings of terms not defined in the Convention should take those agreements into account in interpreting those terms.

---

38 This provides: "The competent authorities of the Contracting States shall endeavour to resolve by mutual agreement any difficulties or doubts arising as to the interpretation or application of the Convention..."

The Australian revenue follow the OECD model commentary approach.[39]

57.12 Tax avoidance using DTAs

57.12.1 *OECD commentary*

The Commentary to OECD treaty article 1 provides:

> **Improper use of the Convention**
> 7. The principal purpose of double taxation conventions is to promote, by eliminating international double taxation, exchanges of goods and services, and the movement of capital and persons. It is also a purpose of tax conventions to prevent tax avoidance and evasion.
> 7.1 Taxpayers may be tempted to abuse the tax laws of a State by exploiting the differences between various countries' laws. ...

The OECD Commentary gives two examples of abuse. The first example may be described as treaty-shopping:

> 9.[1] This would be the case, for example, if a person (whether or not a resident of a Contracting State), acts through a legal entity created in a State essentially to obtain treaty benefits that would not be available directly.

The second example is emigration by an individual to a treaty-state:

> [2] Another case would be an individual who has in a Contracting State both his permanent home and all his economic interests, including a substantial shareholding in a company of that State, and who, essentially in order to sell the shares and escape taxation in that State on the capital gains from the alienation (by virtue of paragraph 5 of Article 13), transfers his permanent home to the other Contracting State, where such gains are subject to little or no tax.[40]

I find it surprising that emigration by an individual should be categorised as abusive. Perhaps an individual approaches the abusive end of the spectrum if the period of treaty non-residence is kept as short as the

---

39 TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements para 63-76 *http://law.ato.gov.au/atolaw/view.htm?Docid=TXR/TR200113/NAT/ATO/00001*

40 This particular scenario envisages a state which (subject to treaty relief) imposed CGT on non-residents who disposed of shares situate in that state. As the UK does not do this, this scenario does not arise in the UK.

"permanent home" requirement may permit.[41] The concept of abuse is not just vague and subjective but may also be very fact sensitive. The OECD Commentary continues:

> 9.1 This raises two fundamental questions that are discussed in the following paragraphs:
> - whether the benefits of tax conventions must be granted when transactions that constitute an abuse of the provisions of these conventions are entered into (cf. paragraphs 9.2 and following below); and
> - whether specific provisions and jurisprudential rules of the domestic law of a Contracting State that are intended to prevent tax abuse conflict with tax conventions (cf. paragraphs 22 and following below).

In short, do domestic law anti-avoidance rules conflict with a treaty? In the UK, it does not help taxpayers if there is a conflict, as domestic law overrides treaty obligations. In others states it matters more, as treaty obligations override general law. But even in the UK, the issue matters, as:

(1) It affects construction: the courts should seek to construe domestic law consistently with treaty obligations.
(2) It affects policy debate and law reform, at least to the extent that those framing UK taxation are concerned to comply with treaty obligations.

The OECD analysis is as follows:

> 9.2 For many States, the answer to the first question is based on their answer to the second question. These States take account of the fact that taxes are ultimately imposed through the provisions of domestic law, as restricted (and in some rare cases, broadened) by the provisions of tax conventions. Thus, any abuse of the provisions of a tax convention could also be characterised as an abuse of the provisions of domestic law under which tax will be levied. For these States, the issue then becomes whether the provisions of tax conventions may prevent the application of the anti-abuse provisions of domestic law, which is the second question above. As indicated in paragraph 22.1 below, the answer to that second question is that to the extent these anti-avoidance rules are part of the basic domestic rules set by domestic tax laws for determining which facts give rise to a tax liability, they are not

41 That may be quite short: see 6.9.2 ("Permanent"). In the UK that planning would now be caught by the TNR rules.

addressed in tax treaties and are therefore not affected by them. Thus, as a general rule, there will be no conflict between such rules and the provisions of tax conventions.

The UK is a state of this type, since a DTA must be given effect under general law. Another possible solution rests on construction of the treaty. The OECD commentary concludes:

9.4 Under both approaches, therefore, it is agreed that States do not have to grant the benefits of a double taxation convention where arrangements that constitute an abuse of the provisions of the convention have been entered into.

The commentary formerly did not say this. It said (more or less) the opposite. Before 1995, paragraph 7 read as follows:

7. ... taxpayers have the possibility, double taxation conventions being left aside, to exploit differences in tax levels between States and the tax advantages provided by various countries' taxation laws, but it is for the States concerned to adopt provisions in their domestic laws to counter such manoeuvres. Such States will then wish, in their bilateral double taxation conventions, to preserve the application of provisions of this kind contained in their domestic laws.

9.5 It is important to note, however, that it should not be lightly assumed that a taxpayer is entering into the type of abusive transactions referred to above. A guiding principle is that the benefits of a double taxation convention should not be available where

[a] a main purpose for entering into certain transactions or arrangements was to secure a more favourable tax position and

[b] obtaining that more favourable treatment in these circumstances would be contrary to the object and purpose of the relevant provisions.

22. Other forms of abuse of tax treaties (e.g. the use of a base company) and possible ways to deal with them, including "substance-over-form", "economic substance" and general anti-abuse rules have also been analysed, particularly as concerns the question of whether these rules conflict with tax treaties, which is the second question mentioned in paragraph 9.1 above.

22.1 Such rules are part of the basic domestic rules set by domestic tax laws for determining which facts give rise to a tax liability; these rules are not addressed in tax treaties and are therefore not affected by them. Thus, as a general rule and having regard to paragraph 9.5, there will be no conflict.

Treaty-shopping was in the OECD view an improper use of tax treaties at least as far back as 1986. The Conduit Report said:

> **D. Main characteristics of "conduit configurations"**
> 6. Through the configurations described above, the conduit company takes advantage of the treaty provisions under its own name in the State of source; economically, however, the benefit goes to persons not entitled to use that treaty. A net tax advantage results because little or no taxation occurs in the State(s) of conduit.
> The advantage arises in the source country. As its tax laws deal adequately with the situation (it generally taxes all non-residents including the conduit company), the problem is created exclusively by the treaty itself and therefore can only be dealt with under the treaty.
> 7. This situation is unsatisfactory in several ways:
> a) treaty benefits negotiated between two states are economically extended to persons resident in a third State in a way unintended by the contracting States; thus the principle of reciprocity is breached and the balance of sacrifices altered;
> b) Income flowing internationally may be exempted from tax altogether or be subject to inadequate taxation in a way unintended by the contracting states. This situation is unacceptable because the granting by a country of treaty benefits is based, except in specific circumstances, on the fact that the respective income is taxed in the other State or at least falls under the normal taxing regime of that State;
> c) The State of residence of the ultimate beneficiary has little incentive to enter into a tax treaty with the State of source, because the residents of the State of residence can indirectly receive treaty benefits from the state of Source without the need for the State of Residence to provide reciprocal benefits.

57.12.2 *UN Model Commentary Concerning Anti-abuse Rules in Domestic Law*

In 2011, significant revisions were made to the UN Model Commentary concerning the relationship between domestic law and treaties in the context of specific and general anti-abuse rules found in domestic law. This commentary is substantially the same as the OECD Commentary, although it contains a more complete and clearer discussion of the relationship between domestic tax rules and treaty rules. The UN model commentary approves the OECD conclusion that"States do not have to grant the benefits of a double taxation convention where arrangements that

constitute an abuse of the provisions of the convention have been entered into." It then says:

> 23. That conclusion leads logically to the question of what is an abuse of a tax treaty. The OECD did not attempt to provide a comprehensive reply to that question, which would have been difficult given the different approaches of its member countries. Nevertheless, the OECD presented the following general guidance, which was referred to as a "guiding principle" (2) [Paragraph 9.5 of the Commentary on Article 1 of the OECD Model Convention]:
>
> > A guiding principle is that the benefits of a double taxation convention should not be available where a main purpose for entering into certain transactions or arrangements was to secure a more favourable tax position and obtaining that more favourable treatment in these circumstances would be contrary to the object and purpose of the relevant provisions.
>
> 24. The members of the Committee endorse that principle. They considered that such guidance as to what constitutes an abuse of treaty provisions serves an important purpose as it attempts to balance the need to prevent treaty abuses with the need to ensure that countries respect their treaty obligations and provide legal certainty to taxpayers. Clearly, countries should not be able to escape their treaty obligations simply by arguing that legitimate transactions are abusive and domestic tax rules that affect these transactions in ways that are contrary to treaty provisions constitute anti-abuse rules.
>
> 25. Under the guiding principle presented above, two elements must therefore be present for certain transactions or arrangements to be found to constitute an abuse of the provisions of a tax treaty:
>
> - a main purpose for entering into these transactions or arrangements was to secure a more favourable tax position, and
> - obtaining that more favourable treatment would be contrary to the object and purpose of the relevant provisions.
>
> 26. These two elements will also often be found, explicitly or implicitly, in general anti-avoidance rules and doctrines developed in various countries.
>
> 27. In order to minimize the uncertainty that may result from the application of that approach, it is important that this guiding principle be applied on the basis of objective findings of facts, not solely the alleged intention of the parties. Thus, the determination of whether a main purpose for entering into transactions or arrangements is to obtain tax advantages should be based on an objective determination, based on all the relevant facts and circumstances, of whether, without these tax advantages, a reasonable taxpayer would have entered into the same

transactions or arrangements.

This is similar to EU law concepts of abuse: see 60.5.2 (abuse). That is not surprising.

57.12.3 *Construing DTAs to defeat avoidance schemes*

The OECD commentary discusses states whose domestic anti-avoidance provisions overrides DTAs, and concludes that they may do so. It then raises a different technique for combatting avoidance: construction of the treaty itself:

> 9.3 Other[42] States prefer to view some abuses as being abuses of the convention itself, as opposed to abuses of domestic law. These States, however, then consider that a proper construction of tax conventions allows them to disregard abusive transactions, such as those entered into with the view to obtaining unintended benefits under the provisions of these conventions. This interpretation results from the object and purpose of tax conventions as well as the obligation to interpret them in good faith.[43]

The OECD approves of this approach to construction:

> 9.4 Under both approaches, therefore, it is agreed that States do not have to grant the benefits of a double taxation convention where arrangements that constitute an abuse of the provisions of the convention have been entered into.

In a tax avoidance context, HMRC will argue for a non-literal approach, and in some cases this submission has fallen on fertile soil:

> [16] In this case, the preamble to the Treaty is very brief and states simply that the parties are "Desiring to conclude a new Convention for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on income and capital gains."
> [17] These words, however, make it clear that the primary purposes of the Treaty are, on the one hand, to eliminate double taxation and, on the other hand, to prevent the avoidance of taxation. In seeking a purposive

---

42 Strictly the reference to "other" states cannot be right: *all* states should seek to construe DTAs the same way. But the commentary is pragmatically correct. A state with domestic anti-avoidance rule need not bother about construction of the treaty: it does not matter what the treaty says.

43 The OECD refer to Article 31 of the Vienna Convention on the Law of Treaties; see 57.6 (Interpretation of DTAs: Ordinary meaning & purposive construction).

> interpretation, both these principles have to be borne in mind. Moreover, the latter principle, in my judgment, means that the Treaty should be interpreted to avoid the grant of double relief as well as to confer relief against double taxation.[44]

Similarly the GAAR guidance provides:

> The express purpose of DTAs is to avoid double taxation and prevent fiscal evasion, not to facilitate double non-taxation. This is clear from the judgment of the High Court and the Court of Appeal in *R oao Huitson v HMRC*,[45] and the Court of Appeal in the case of *Bayfine UK v HMRC*.[46]

That is too broad: abuse is not quite so easily identified. Sometimes DTAs allow taxing rights to both states and seek only to avoid double taxation. Sometimes they assign taxing rights to one state alone. If that state does not take advantage of the taxing rights, that alone does not allow the first state to tax. An example is foreign alimony payments. These are from foreign tax under OECD model, but the UK does not seek to tax them: see 19.9 (Alimony). That is not contrary to the treaty.

57.12.4 *Express unallowable purpose tests in DTAs*

Recent treaties frequently include an unallowable purpose test, applicable to dividend, interest and royalty articles.[47] For instance, the France/UK DTA has express provisions in the dividends, interest, royalties, and other income articles: eg art.11(6):

> The provisions of this Article shall not apply if it was the main purpose or one of the main purposes of any person concerned with the creation or assignment of the shares or other rights in respect of which the dividend is paid to take advantage of this Article by means of that creation or assignment.[48]

---

44 *Bayfine UK v HMRC* [2011] STC 717.

45 [2011] STC 1860.

46 [2011] STC 242.

47 A search (in 2013) shows the expression "main purpose or one of the main purposes" is found 245 times in the LexisNexis DTA database and that figure can be expected to increase.

48 For French guidance, see Bulletin Officiel Des Impôts, 14 B-1-11 "Commentaires de la Convention Fiscale Signee Avec le Royaume-uni le 19 Juin 2008" accessible *http://www11.minefi.gouv.fr/boi/boi2011/14aipub/textes/14b111/14b111.pdf*

Some treaties have a wide anti-avoidance provision applicable to the treaty generally, not just to specific provisions. For instance, article 28C(1) of the UK/India DTA provides:

> Benefits of this Convention shall not be available to a resident of a Contracting State, or with respect to any transaction undertaken by such a resident, if the main purpose or one of the main purposes of the creation or existence of such a resident or of the transaction undertaken by him, was to obtain benefits under this Convention.

Sometimes the point is dealt with by an extra-treaty agreement. For instance, a Joint Declaration by UK and Germany provides that the two countries have reached the following understanding:

> **1. Improper use of the Convention**
> Having regard to paragraphs 7 to 12 of the Commentary to Article 1 of the OECD model tax convention, it is understood that this Convention shall not be interpreted to mean that a Contracting State is prevented from applying its domestic legal provisions on the prevention of tax evasion or tax avoidance where those provisions are used to challenge arrangements which constitute an abuse of the Convention.
> It is further understood that an abuse of the Convention takes place where a main purpose for entering into certain transactions or arrangements is to secure a more favourable tax position and obtaining that more favourable treatment in these circumstances would be contrary to the object and purpose of the relevant provisions of the Convention.

This was based on the OECD commentary.

57.12.5 *DTAs and the GAAR*

DTAs may be within the scope of the GAAR. The GAAR guidance provides:

> B5.2 Many of the established rules of international taxation are set out in double taxation treaties. These cover, for example, the attribution of profits to branches or between group companies of multi-national enterprises, and the allocation of taxing rights to the different States where such enterprises operate. The mere fact that arrangements benefit from these rules does not mean that the arrangements amount to abuse, and so the GAAR cannot be applied to them. Accordingly, many cases of the sort which have generated a great deal of media and Parliamentary debate in the months leading up to the enactment of the

> GAAR cannot be dealt with by the GAAR.[49]
> B5.3 However, where there are abusive arrangements which try to exploit particular provisions in a double tax treaty, or the way in which such provisions interact with other provisions of UK tax law, then the GAAR can be applied to counteract the abusive arrangements.[50]

The guidance gives the scheme in *Huitson* as an example of an arrangement which would be caught by the GAAR. As is quite common in the GAAR guidance examples, that is an easy case, and somewhat academic as the scheme has been stopped by legislation.[51]

It seems that the Courts in other common law jurisdictions have not been as obliging in categorisation of abuse as tax administrators would desire.. The Canadian Revenue say:

> ... the leading Canadian treaty shopping case involving the GAAR was decided in favour of the taxpayer. In *MIL (Investments) SA*,[52] the corporate taxpayer was continued from Cayman Islands (a jurisdiction with which Canada does not have a tax treaty) to Luxembourg (a treaty country) shortly before it realized capital gains on the disposition of taxable Canadian property.[53]

In UK legal terminology, the company migrated to Luxembourg and became treaty-resident there.

> Upon its continuance to Luxembourg, the corporate taxpayer became a resident of Luxembourg for purposes of the Canada-Luxembourg Convention, positioning it to make a claim under the Convention to exempt the capital gain from tax in Canada. The Crown argued that this case involved treaty shopping and, as such, represented an abuse of the provisions of the Convention that exempted the capital gain from tax in Canada. The Tax Court of Canada concluded that the GAAR was not applicable and that there was no inherent anti-abuse rule in the Convention. The Tax Court stated:

---

49 [Footnote original] However, there is work underway in the OECD on the erosion of the tax base and on profit shifting.

50 HMRC GAAR Guidance (April 2013).

51 HMRC GAAR Guidance (April 2013) para D12; see 41.10 (DT relief for partnership).

52 [2007] DTC 5437 (Federal Court of Appeal))

53 [Footnote original] A non resident of Canada is taxable in Canada on, among other things, capital gains arising on the disposition of taxable Canadian property, subject to the provisions of an applicable tax treaty.

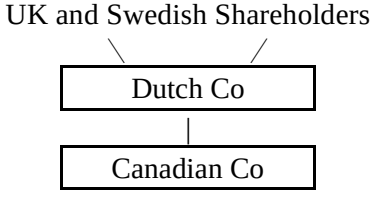
> "…I do not agree that Justice Iaccobucci's obiter dicta can be used to establish a prima facie finding of abuse arising from the choice of the most beneficial treaty. There is nothing inherently proper or improper with selecting one foreign regime over another. Respondent's counsel was correct in arguing that the selection of a low tax jurisdiction may speak persuasively as evidence of a tax purpose for an alleged avoidance transaction, but the shopping or selection of a treaty to minimize tax on its own cannot be viewed as being abusive. It is the use of the selected treaty that must be examined."[54]

In a short decision, the Federal Court of Appeal dismissed the Crown's appeal in MIL (Investments) on the basis that it was unable to find an object or purpose of the exempting provision of the Convention whose abuse would justify a departure from the plain meaning of the words of the provision. This decision is a particularly strong statement by the Federal Court of Appeal, indicating that the courts in Canada require further legislative direction before finding that treaty shopping is an improper (and abusive) use of tax treaties.

Next a conduit case:

In *Prevost Car Inc.*,[55] the CRA challenged a treaty shopping case on the basis that a conduit entity was not the "beneficial owner" of the Canadian-source income on which treaty benefits were sought. The case involved dividends paid on the shares of a Canadian resident corporation that were held by a Dutch corporation which in turn was owned by corporate shareholders in Sweden and the United Kingdom.

Diagrammatically:



The withholding tax rate on dividends paid to the Dutch holding company were lower than would have been the case had dividends been

54 See at [72].
55 2009 D.T.C. 5053.

paid directly to the corporate shareholders in Sweden and the United Kingdom. Even though the terms of the shareholders agreement essentially required the Dutch holding company to pass through as dividends to its shareholders any dividends received from its Canadian subsidiary, the Tax Court found that the intermediary Dutch holding corporation was the beneficial owner of the dividends and the Federal Court of Appeal affirmed the Tax Court's interpretation of beneficial ownership.

The narrow meaning ascribed to beneficial owner in *Prevost Car Inc.* means that the beneficial ownership requirement in this context is not sufficient to deny treaty benefits to an intermediary entity. In particular, even though the intermediary foreign holding company in this case was effectively a direct conduit (i.e., it did not pay tax on dividends received, distributed substantially all of its income to third country residents who owned it, and had no employees or activities other than with respect to the ownership of shares of a subsidiary), it was not denied treaty benefits on the basis of beneficial ownership.

Similarly, the notion of beneficial owner was also argued by the Government in *Velcro Canada*[56] as the basis on which to deny treaty benefits in a treaty shopping case. In Velcro Canada, a corporation resident in the Netherlands Antilles, which would have been subject to a withholding tax rate in Canada of 25% on royalties paid by a Canadian company, incorporated an intermediary company in the Netherlands and essentially assigned to it the right to receive royalty payments from the Canadian company. The intermediary company in the Netherlands remitted 90% of the royalties received to its parent in the Netherland Antilles within 30 days, pursuant to a sub-licencing agreement between the Dutch intermediary and the Netherlands Antilles company. This was a classic "stepping stone" conduit structure.[57] The Government argued the case on the basis that the Dutch intermediary was not the beneficial owner of the royalties received. The Court followed the decision in *Prevost Car Inc.*

Collectively, these three cases indicate in relatively strong terms that the courts in Canada are not currently inclined to find against taxpayers in treaty shopping cases. In other words, the courts in Canada require clearer legislative direction to the effect that treaty shopping is an

56 2012 D.T.C. 1100.

57 [Footnote original] See footnote 4 above and paragraph 4 of the OECD Report Double Taxation Convention and The Use of Conduit Companies (adopted by the OECD Council on 27 November 1986).

improper use of Canada's tax treaties.[58]

57.12.6 *The 2011 reform proposals*

In 2011 HMRC proposed draft legislation of a kind which has become familiar:

> *(1) This section applies if, but for provision made by double taxation arrangements. income of a UK resident would be chargeable to relevant UK tax ...*
> *(2) Where the avoidance conditions are met, the provision does not prevent the income being ... chargeable to relevant UK tax ...*
> *(3) The avoidance conditions are.*
> *(a) that a scheme is put in place by one or more persons,*
> *(b) that the provision would not apply to the income in the absence of that scheme, and*
> *(c) that the main purpose, or one of the main purposes, of a person in putting the scheme in place is to ensure that the provision does apply to the income. scheme in place is to ensure that the provision does apply to the income, profits or gains.*[59]

This is wider than the OECD commentary guiding principle, which required an objective test as well as a motive test.[60] If this were the law, then in general no-one would have any idea whether tax treaty relief applied, and relief would depend to a large extent on HMRC practice. In this respect the anti-avoidance provision is no different from most others introduced since HMRC under the Blair/Brown administrations started its campaign against tax avoidance.[61] If the legislation were adopted by our treaty partners, then the availability of foreign tax relief (eg whether UK tax could be set against foreign tax) under a DTA would be similarly unknowable.

The proposed reform was precipitately abandoned. The consultation period expired 22 September 2011, but on 9 September we read:

---

58 Department of Finance Canada "Consultation Paper on Treaty Shopping – The Problem and Possible Solutions" (2013) *http://www.fin.gc.ca/activty/consult/ts-cf-eng.asp*

59 Tax Treaties Anti-avoidance Technical Note (1 August 2011) accessible *http://www.kessler.co.uk/tfd-archive*. The reader is invited to speculate whether the 1st August publication date was co-incidental. (The 6 week consultation period ought to be extended to exclude the holiday break but that is not the practice.)

60 See 57.12.1 (OECD commentary).

61 Eg CGT losses anti-avoidance: see 54.13 (Inter-spouse transfer).

> **The Exchequer Secretary to the Treasury (Mr David Gauke)**:
> On 1 August HMRC published for consultation a technical note and draft legislation outlining a proposed approach to combatting tax avoidance arrangements which exploit the provisions of double taxation agreements. The responses so far received have made it clear that the proposed legislation, as drafted, could cause significant uncertainty for compliant[62] UK businesses and overseas investors about its intended scope and its practical effect.
> The Government is committed to providing certainty to taxpayers and acknowledges the concerns raised in the responses to the consultation. It has therefore decided not to proceed further with the consultation on the proposed legislation and will not include it in Finance Bill 2012.

What happened? The matter did not take the usual course of consultation, responses and decision. In the absence of an explanation it is tempting to speculate. The most likely explanation is quiet but effective high level lobbying, not by the tax practitioner organisations (which are (more or less) ignored, especially in the area of avoidance) but by multi-national companies who bypassed HMRC and dealt with ministers. Or possibly the OECD pointed out the breach of its guiding principle.

57.12.7 *The future: EU and OECD reform proposals*

The EC have made a different recommendation:

> **3. Limitation to the application of rules intended to avoid double taxation**
> 3.1. Where Member States, in double taxation conventions which they have concluded among themselves or with third countries, have committed not to tax a given item of income, Member States should ensure that such commitment only applies where the item is subject to tax in the other party to that convention.
> 3.2. To give effect to point 3.1, Member States are encouraged to include an appropriate clause in their double taxation conventions. Such clause could read as follows:
>
> > "Where this Convention provides that an item of income shall be taxable only in one of the contracting States or that it may be taxed in one of the contracting States, the other contracting State shall be

62 On this usage of the contested word "compliant", see 44.6.4 (Investment manager condition E: customary remuneration)

> precluded from taxing such item only if this item is subject to tax[63] in the first contracting State."
>
> In case of multilateral conventions, the reference to the "other contracting State" should be replaced by a reference to the "other contracting States".
>
> 3.3. Where, with a view to avoid double taxation through unilateral national rules, Member States provide for a tax exemption in regard to a given item of income sourced in another jurisdiction, in which this item is not subject to tax, Member States are encouraged to ensure that the item is taxed.[64]

The OECD say:

> **ACTION 6 Prevent treaty abuse** Develop model treaty provisions and recommendations regarding the design of domestic rules to prevent the granting of treaty benefits in inappropriate circumstances. Work will also be done to clarify that tax treaties are not intended to be used to generate double non-taxation and to identify the tax policy considerations that, in general, countries should consider before deciding to enter into a tax treaty with another country. The work will be co-ordinated with the work on hybrids.[65]

Action is promised for September 2014.[66]

57.13 Incorporation of DTAs into UK law

International treaties (including DTAs) do not automatically become part of UK law, but must be incorporated into UK law by authority of statute. Accordingly, s.2 TIOPA provides:

> (1) If Her Majesty by Order in Council declares—
>
> (a) that arrangements specified in the Order have been made in relation to any territory outside the UK with a view to affording

---

63 The expression "subject to tax" is problematic; see 59.17 ("Subject to tax"). The EC recommendation provides: "3.4. For the purposes of points 3.1, 3.2 and 3.3 an item of income should be considered to be subject to tax where it is treated as taxable by the jurisdiction concerned and is not exempt from tax, nor benefits from a full tax credit or zero-rate taxation."

64 EC "Recommendation of 6.12.2012 on aggressive tax planning" C(2012) 8806 *http://ec.europa.eu/taxation_customs/resources/documents/taxation/tax_fraud_evasion/c_2012_8806_en.pdf*

65 OECD, "Action Plan on Base Erosion and Profit shifting" (2013) p.19 *http://www.oecd.org/ctp/BEPSActionPlan.pdf*

66 OECD Action Plan, p.32.

relief from double taxation in relation to taxes within subsection (3), and

(b) that it is expedient that those arrangements should have effect,

those arrangements have effect...

(3) The taxes are—

(a) income tax,

(b) corporation tax,

(c) capital gains tax,

(d) petroleum revenue tax, and

(e) any taxes imposed by the law of the territory that are of a similar character to taxes within paragraphs (a) to (d)...

Section 3(1) TIOPA authorises retrospective relief:

> Section 2(1) gives effect to arrangements even if the arrangements include—
>
> (a) provision for relief from tax for periods before the passing of this Act, or
>
> (b) provision for relief from tax for periods before the making of the arrangements.

Section 3(2) TIOPA extends this:

> Section 2(1) gives effect to arrangements even if the arrangements include—
>
> (a) provision as to income that is not subject to double taxation,
>
> (b) provision as to chargeable gains that are not subject to double taxation ...

Under s.2(2) TIOPA provides:

> If arrangements have effect under subsection (1), they have effect in accordance with section 6.

So we turn to s.6 TIOPA. Section 6(1) provides that DTAs override UK tax legislation:

> Subject to this Part and Part 18 of ICTA, double taxation arrangements have effect in accordance with subsections (2) to (4) despite anything in any enactment.

Section 6(2) TIOPA sets out seven matters which a DTA can achieve:

> Double taxation arrangements have effect in relation to income tax and corporation tax so far as the arrangements provide—
>
> (a) for relief from income tax or corporation tax,

This is what one would expect. Section 6(2) continues:

> (b) for taxing income of non-UK resident persons that arises from sources in the UK,
> (c) for taxing chargeable gains accruing to non-UK resident persons on the disposal of assets in the UK,

In practice, as far as I am aware, DTAs are not used to impose taxes.

> (d) for determining the income or chargeable gains to be attributed to non-UK resident persons,
> (e) for determining the income or chargeable gains to be attributed to agencies, branches or establishments in the UK of non-UK resident persons,
> (f) for determining the income or chargeable gains to be attributed to UK resident persons who have special relationships with non-UK resident persons, or
> (g) for conferring on non-UK resident persons the right to a tax credit under section 397(1) of ITTOIA 2005 in respect of qualifying distributions made to them by UK resident companies.

Section 6(3) TIOPA provides equivalent rules for CGT:

> Double taxation arrangements have effect in relation to capital gains tax so far as the arrangements provide—
> (a) for relief from capital gains tax,
> (b) for taxing capital gains accruing to non-UK resident persons[67] on the disposal of assets in the UK,
> (c) for determining the capital gains to be attributed to non-UK resident persons,
> (d) for determining the capital gains to be attributed to agencies, branches or establishments in the UK of non-UK resident persons, or
> (e) for determining the capital gains to be attributed to UK resident persons who have special relationships with non-UK resident persons.

Because treaties are made law by statutory instrument, the Parliamentary process is brief, and it is not usual to produce a lengthy explanation of the treaty. But treaty partners may produce such material, which is relevant in the UK, if only as a status like a textbook.

---

67 Defined by reference in ss(7): "In subsection (3) 'UK resident person' and 'non-UK resident person' have the meaning given by section 989 of ITA 2007."

57.14 Claim for DT relief

Section 6(6) TIOPA provides:

> Relief under subsection (2)(a), (3)(a) or (4) requires a claim.

Form HS302 (Dual residents) provides a claim form for individuals who are UK resident and treaty-resident in a foreign state.

57.15 Interaction of DT reliefs and the remittance basis

The commentary to Art.1 OECD model treaty provides:

> 26.1 ...[Remittance basis taxpayers are not] subject to potential double taxation to the extent that foreign income is not remitted to their State of residence and it may be considered inappropriate to give them the benefit of the provisions of the Convention on such income. Contracting States which agree to restrict the application of the provisions of the Convention to income that is effectively taxed in the hands of these persons may do so by adding the following provision to the Convention:
>
> "Where under any provision of this Convention income[68] arising in a Contracting State is relieved in whole or in part from tax in that State and under the law in force in the other Contracting State a person, in respect of the said income, is subject to tax by reference to the amount thereof which is remitted to or received in that other State and not by reference to the full amount thereof, then any relief provided by the provisions of this Convention shall apply only to so much of the income as is taxed in the other Contracting State."

Although this text was only added to the OECD Commentary in 2003, some provision of this kind is standard in UK DTAs. A provision of this kind is included in the US/UK DTA, on which the IRS comment:

> For example, if a UK resident who is not domiciled in the UK maintains a brokerage account in Ireland into which is paid $100 in U.S.-source dividend income, the United States may impose withholding tax at the statutory rate of 30% because the dividend income will not be taxed in the UK as it has not been remitted to the UK. If the dividend income

68 Author's note: The draft clause refers only to income, but in the UK foreign gains also qualify for the remittance basis so DTAs with a capital gains article generally extend the rule to gains. If the applicable DTA fails to do this then there may be double non-taxation in that gains which are (un)taxed in the UK on the remittance basis are not taxed in the foreign state because of DT relief.

> instead is paid into a brokerage account in London, the UK resident will be subject to tax in the UK and the United States will reduce the rate of withholding tax to 15%.[69]

Note that it is US tax, not UK tax, which is in issue here. UK tax issues only arise where the UK has a treaty with another state where the *foreign* state has a remittance basis. The only examples of which I am aware are Ireland[70] and Japan.

69 Department of the Treasury Technical Explanation of the Convention, accessible *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

70 Ireland/UK DTA art.6 (Limitation of relief) and art.14(5) (gains).

CHAPTER FIFTY EIGHT

FOREIGN TAX CREDIT RELIEF

58.1 Foreign tax credit relief

This chapter considers foreign tax credit relief. For an introduction to DTAs and terminology, see 57.1 (DT reliefs: Introduction).

58.1.1 *"Unilateral relief arrangements"*

Section 8(1) TIOPA provides:

> In this Part [Part 2 TIOPA] "unilateral relief arrangements", in relation to a territory outside the UK, means the rules set out in sections 9 to 17.

I prefer the term "**unilateral tax credit**", which seems clearer.

58.1.2 *"Tax"*

Section 8(2) TIOPA provides:

> In sections 11 to 17, and in Chapter 2 (except section 29) in its application to relief under unilateral relief arrangements, references to tax payable or paid under the law of a territory outside the UK include only—
>
> (a) taxes which are charged on income and which correspond to income tax,
>
> (b) taxes which are charged on income or chargeable gains and which correspond to corporation tax, and
>
> (c) taxes which are charged on capital gains and which correspond to capital gains tax.

Since this is expressed to apply only for the specified sections, the rules have to be set out again in s.9.

58.1.3 *"Corresponding to IT, CT or CGT"*

Section 8(3) TIOPA provides:

For the purposes of subsection (2), tax may correspond to income tax, corporation tax or capital gains tax even though it—

(a) is payable under the law of a province, state or other part of a country, or

(b) is levied by or on behalf of a municipality or other local body.

58.1.4 *Rule 1: Unilateral entitlement to credit for non-UK tax*

Section 9(1) TIOPA provides the rule for IT:

Credit for tax—

(a) paid under the law of the territory,

(b) calculated by reference to income arising, or any chargeable gain accruing, in the territory,[1] and

(c) corresponding to UK tax,

is to be allowed against any income tax or corporation tax calculated by reference to that income or gain.

Section 9(2) TIOPA is the equivalent for CGT:

Credit for tax—

(a) paid under the law of the territory,

(b) calculated by reference to any capital gain accruing in the territory, and

(c) corresponding to UK tax,

is to be allowed against any capital gains tax calculated by reference to that gain.

For rule 2 (accrued income profits) see 37.15 (Double taxation relief).

58.1.5 *"Corresponding to UK tax"*

Section 9 TIOPA provides:

(4) For the purposes of subsection (1)(c), tax corresponds to UK tax if—

(a) it is charged on income and corresponds to income tax, or

(b) it is charged on income or chargeable gains and corresponds to corporation tax.

(5) For the purposes of subsection (2)(c), tax corresponds to UK tax if it is charged on capital gains and corresponds to capital gains tax.

(6) For the purposes of subsections (4) and (5), tax may correspond to income tax, corporation tax or capital gains tax even though it—

---

1 For the issue of where income arises, see 15.5 (Trading income of non-resident) or the chapters on the type of income concerned.

(a) is payable under the law of a province, state or other part of a country, or
(b) is levied by or on behalf of a municipality or other local body.

This repeats s.8(2)(3) and is necessary because those sections do not apply for the purposes of s.9.

58.1.6 *Channel Islands and Isle of Man*

Section 9(7) TIOPA provides:

> If the territory is the Isle of Man or any of the Channel Islands, subsections (1)(b) and (2)(b) have effect with the omission of "in the territory".

Amended as these subsections direct, s.9(1)(2) TIOPA provide:

> (1) Credit for tax—
> (a) paid under the law of the territory,
> (b) calculated by reference to income arising, or any chargeable gain accruing, ~~in the territory~~, and
> (c) corresponding to UK tax,
> is to be allowed against any income tax or corporation tax calculated by reference to that income or gain.
> (2) Credit for tax—
> (a) paid under the law of the territory,
> (b) calculated by reference to any capital gain accruing ~~in the territory~~, and
> (c) corresponding to UK tax,
> is to be allowed against any capital gains tax calculated by reference to that gain.

Since the Channel Islands and the IoM do not have a CGT, it is not immediately obvious what is the role of s.9(2). Maybe it applies where a gain is subject to IT in the Islands but subject to CGT in the UK.

58.1.7 *Rule 3: Interaction between DTAs and unilateral tax credit*

Section 11 TIOPA provides:

> (1) Credit for tax paid under the law of the territory is not allowed under section 9 or 10 in the case of any income or gains if any credit for that tax is allowable in respect of that income or those gains under double taxation arrangements made in relation to the territory.
> (2) If credit in respect of an amount of tax may be allowed under double taxation arrangements made in relation to the territory, credit is not

allowed under section 9 or 10 in respect of that tax.

(3) If double taxation arrangements made in relation to the territory contain express provision to the effect that relief by way of credit is not to be given under the arrangements in cases or circumstances specified or described in the arrangements, credit is not allowed under section 9 or 10 in those cases or circumstances.

58.1.8 *Rule 4: Credit for dividends*

Section 12 TIOPA provides:

(1) Credit under section 9 for overseas tax on a dividend paid by a company ("P") resident in the territory is allowed only if section 13, 14, 15 or 16 so provides.

(2) If credit is allowed in principle as a result of at least one of sections 14, 15 and 16, any tax in respect of P's profits that is paid by P under the law of the territory is to be taken into account in considering whether any, and (if so) what, credit is in fact to be allowed under section 9 in respect of the dividend.

(3) If credit is allowed in principle as a result of at least one of sections 15 and 16, there is to be taken into account, as if it were tax payable under the law of the territory, any tax that would be so taken into account under section 63(5) if the recipient of the dividend—

(a) directly or indirectly controlled, or

(b) were a subsidiary of a company that directly or indirectly controlled,

at least 10% of the voting power in P.

(4) For the purposes of subsection (3), the recipient is a subsidiary of another company if the other company controls, directly or indirectly, at least 50% of the voting power in the recipient.

58.1.9 *Rule 5: Credit for tax charged directly on dividend*

Section 13 TIOPA provides:

(1) This section applies for the purposes of section 12(1).

(2) Credit under section 9 for overseas tax on a dividend paid by a company ("P") resident in the territory is allowed if—

(a) the overseas tax is charged directly on the dividend (whether by charge to tax, deduction of tax at source or otherwise), and

(b) neither P nor the recipient of the dividend would have borne any of that tax if the dividend had not been paid.

That is straightforward.

58.1.10 *Rule 6: Credit for underlying tax on dividend paid to 10% associate of payer*

Section 14 TIOPA provides:

(1) This section applies for the purposes of section 12(1).
(2) Credit under section 9 for overseas tax on a dividend paid by a company ("P") resident in the territory is allowed if conditions A and B are met.
(3) Condition A is that—
(a) the recipient of the dividend is a company resident in the UK, or
(b) the recipient is a company resident outside the UK but the dividend forms part of the profits of a permanent establishment of the recipient in the UK.
(4) Condition B is that the recipient—
(a) directly or indirectly controls, or
(b) is a subsidiary of a company which directly or indirectly controls,
at least 10% of the voting power in P.
(5) For the purposes of subsection (4), the recipient is a subsidiary of another company if the other company controls, directly or indirectly, at least 50% of the voting power in the recipient.

58.1.11 *Rule 7: Credit for underlying tax on dividend paid to sub-10% associate*

Section 15 TIOPA provides:

(1) This section applies for the purposes of section 12(1).
(2) Credit under section 9 for overseas tax on a dividend paid by a company ("P") resident in the territory is allowed if each of conditions A to C is met.
(3) Condition A is that—
(a) the recipient of the dividend is a company resident in the UK, or
(b) the recipient is a company resident outside the UK but the dividend forms part of the profits of a permanent establishment of the recipient in the UK.
(4) Condition B is that the recipient—
(a) directly or indirectly controls, or
(b) is a subsidiary of a company which directly or indirectly controls,
less than 10% of the voting power in P.
(5) If condition B is met, in subsection (6) "the held percentage" means the voting power in P which is directly or indirectly controlled by—

(a) the recipient, or
(b) a company of which the recipient is a subsidiary.

(6) Condition C is that—
(a) the held percentage has been reduced below 10%,
(b) the recipient shows that the reduction below the 10% limit (and any further reduction)—
(i) could not have been prevented by any reasonable endeavours on the part of the recipient, a parent or an associate, and
(ii) was due to a cause or causes not reasonably foreseeable by the recipient, a parent or an associate when control of the relevant voting power was acquired, and
(c) the recipient shows that no reasonable endeavours on the part of the recipient, a parent or an associate could have restored, or (as the case may be) increased, the held percentage to at least 10%.

(7) For the purposes of subsection (6) a company is an "associate" if—
(a) the company is neither the recipient nor a parent,
(b) before the reduction, the voting power in P that is in question was controlled otherwise than directly by the recipient, and
(c) the company is relevant for determining whether, before the reduction, the recipient—
(i) indirectly controlled, or
(ii) was a subsidiary of a company which directly or indirectly controlled,
at least 10% of the voting power in P.

(8) In subsections (6) and (7) "parent" means a company of which the recipient is a subsidiary.

(9) In subsection (6) "the relevant voting power" means—
(a) the voting power in P as a result of which relief was due under section 14 before the reduction, or
(b) if control of the whole of that voting power was not acquired at the same time, that part of the voting power of which control was last acquired.

(10) For the purposes of this section, the recipient is a subsidiary of another company if the other company controls, directly or indirectly, at least 50% of the voting power in the recipient.

58.1.12 *Rule 8: Credit for underlying tax on dividend paid by exchanged associate*

Section 16 TIOPA provides:

(1) This section applies for the purposes of section 12(1).

(2) Credit under section 9 for overseas tax on a dividend paid by a company ("P") resident in the territory is allowed if each of conditions A to C is met.

(3) Condition A is that—

(a) the recipient of the dividend is a company resident in the UK, or

(b) the recipient is a company resident outside the UK but the dividend forms part of the profits of a permanent establishment of the recipient in the UK.

(4) Condition B is that the recipient—

(a) directly or indirectly controls, or

(b) is a subsidiary of a company which directly or indirectly controls,

less than 10% of the voting power in P.

(5) If condition B is met, in subsection (6) "the held percentage" means the voting power in P which is directly or indirectly controlled by—

(a) the recipient, or

(b) a company of which the recipient is a subsidiary.

(6) Condition C is that—

(a) the held percentage has been acquired in exchange for voting power in another company ("X"),

(b) before the exchange, the recipient—

(i) directly or indirectly controlled, or

(ii) was a subsidiary of a company which directly or indirectly controlled,

at least 10% of the voting power in X,

(c) the recipient shows that the exchange (and any reduction after the exchange)—

(i) could not have been prevented by any reasonable endeavours on the part of the recipient, a parent or an associate, and

(ii) was due to a cause or causes not reasonably foreseeable by the recipient, a parent or an associate when control of the relevant voting power was acquired, and

(d) the recipient shows that no reasonable endeavours on the part of the recipient, a parent or an associate could have restored, or (as the case may be) increased, the held percentage to at least 10%.

(7) For the purposes of subsection (6) a company is an "associate" if—

(a) the company is neither the recipient nor a parent,

(b) before the exchange, the voting power in X that is in question was controlled otherwise than directly by the recipient, and

(c) the company is relevant for determining whether, before the exchange, the recipient—

(i) indirectly controlled, or
(ii) was a subsidiary of a company which directly or indirectly controlled,

at least 10% of the voting power in X.

(8) In subsections (6) and (7) "parent" means a company of which the recipient is a subsidiary.

(9) In subsection (6) "the relevant voting power" means—

(a) the voting power in X as a result of which relief was due under section 14 before the exchange, or

(b) if control of the whole of that voting power was not acquired at the same time, that part of the voting power of which control was last acquired.

(10) For the purposes of this section, the recipient is a subsidiary of another company if the other company controls, directly or indirectly, at least 50% of the voting power in the recipient.

58.1.13 *Rule 9: Credit in relation to dividends for spared tax*

Section 17 TIOPA provides:

(1) Subsection (2) applies if—

(a) under the law of the territory, an amount of tax ("the spared tax") would, but for a relief, have been payable by a company resident in the territory ("company A") in respect of any of its profits,

(b) company A pays a dividend out of those profits to another company resident in the territory ("company B"),

(c) company B, out of profits which consist of or include the whole or part of that dividend, pays a dividend to a company resident in the UK ("company C"), and

(d) the circumstances are such that, had company B been resident in the UK, it would have been entitled, as a result of the operation of section 20(2) in relation to double taxation arrangements made in relation to the territory, to treat the spared tax for the purposes of Chapter 2 as having been payable.

(2) The spared tax is to be taken into account—

(a) for the purposes of sections 9 to 16, and

(b) subject to section 31(4), for the purposes of Chapter 2 in its application to relief under these rules in relation to the dividend paid to company C,

as if it had been payable and paid.

(3) References in these rules and that Chapter—

(a) to tax payable or chargeable, or

(b) to tax not chargeable directly or by deduction,

are to be read in accordance with subsection (2).

(4) Except as provided by subsection (2), in relation to any dividend paid—

(a) by a company resident in the territory,

(b) to a company resident in the UK,

credit as a result of these rules is not to be given under section 63(5) in respect of tax which would have been payable under the law of the territory, or under the law of any other territory outside the UK, but for a relief.

(5) Subsection (4) has effect despite any double taxation arrangements—

(a) made in relation to the territory, or

(b) made in relation to any other territory outside the UK,

which make provision about a relief given, under the law of the territory in relation to which the arrangements are made, with a view to promoting industrial, commercial, scientific, educational or other development in a territory outside the UK.

(6) In this section "these rules" means sections 9 to 16 and this section.

58.1.14 *Quantum of income/gains*

The INT Manual provides:

165030 Computation – assessable amount [January 2011]

Where credit is claimed against UK Income Tax for foreign tax paid on income from a foreign source, the amount of that income for all UK tax purposes is:

a) Foreign income assessable on the arising basis

No direct foreign tax is to be deducted. Where, exceptionally, the double taxation agreement provides for relief for underlying tax on a dividend (see INTM164410) the underlying tax should be added to the amount of the income. Treat the whole of a foreign pension as chargeable to UK tax notwithstanding the deduction of one tenth under Section 65(2) ICTA 1988.

Example:

An individual receives a dividend of 100 from which 15 foreign withholding tax was deducted. The amount of income assessable is 100.

b) Foreign income assessable on the remittance basis

Add the amount of direct foreign tax attributable to the amount of income remitted. Where, exceptionally, the agreement provides for relief for underlying tax on a dividend (see INTM164410), the underlying tax should also be added to the amount of the dividend remitted. If you have difficulty in determining the amount of foreign tax attributed to income remitted, refer to the Personal Tax Team International - Advisory (part of Charity, Assets & Residence).

Example	
[Gross foreign income]	£1,000
Foreign tax	£400
Net foreign income	£600
Remitted to UK	£300
UK measure of the income	
Income remitted	£300
Plus foreign tax (300/600×400)	£200
Therefore UK measure is	£500

This summarises the rules in s.31, 32 TIOPA.

Similarly for CGT; the INT Manual provides:

> **169080. Remittance basis** [September 2011]
> An individual who is resident or ordinarily resident but not domiciled in the UK and who makes a chargeable gain on the disposal of an asset situated outside the UK is only liable on the amount of the gain received in the UK (Section 12 TCGA 1992 see CG25300 onwards). When such an individual is chargeable on the gain received in the UK and claims credit for foreign tax charged on the same gain, the liability in the UK will be on the sum of the amount remitted to the UK plus the foreign tax attributable to the amount remitted.
> Any difficulty in determining the correct addition for the foreign tax, should be referred to Personal Tax International (part of Charity, Assets & Residence).

58.1.15 HMRC practice: Quantum of relief

The INT Manual provides:

> **169100. Amount of foreign tax credit relief – general** [January 2011]
> Similar principles to those set out in INTM161210 onwards for Income Tax apply to Capital Gains Tax. The amount of credit for foreign tax is not to exceed the lesser of the foreign tax charged on the foreign gain and the UK tax charged on the doubly taxed gain at the taxpayer's marginal rate.
> If the foreign tax exceeds the UK tax, the excess can neither be deducted from the amount of the gain chargeable to Capital Gains Tax, nor can it be repaid.
> The foreign tax should not be increased by any indexation allowance.
> A taxpayer's marginal rate for Capital Gains Tax is the rate at which the tax is charged for the year of assessment.
> **169110. Amount of foreign tax credit relief – more than one gain** [January 2011]

The amount of foreign tax credit relief must be calculated separately for each gain. An excess of foreign tax over UK tax on one gain cannot be credited against UK tax on another foreign gain or on the gain on the disposal of a UK asset.

169120. Amount of foreign tax credit relief – losses [September 2011]
Allowable losses should be set firstly against chargeable gains on which no foreign tax credit relief is due. It would normally be to the taxpayer's advantage to set any balance of losses, in order, against the gains on which the lowest level of foreign tax has been paid. This should secure the maximum amount of foreign tax credit relief.

169130. Amount of foreign tax credit relief – exemption from tax [September 2011]
Where the total of the chargeable gains in any year of assessment exceeds the exempt amount provided by TCGA 1992 Section 3, the exempt amount should, as far as possible, consist of gains on which no foreign tax has been charged. This will enable credit for foreign tax charged on the gains to be allowed against the UK Capital Gains Tax charged on those gains.
The following example demonstrates the application of this paragraph and of INTM169120
In 2009–10, an individual has the following chargeable gains:

UK	£10,000	
Country X	£20,000	Foreign tax £2,000
Country Y	£6,000	Foreign tax £2,700

He has losses of £6,000 available for deduction. The exemption limit for 2009–10 is £9,600. The computation of his liability is as follows:

	UK Gain	**Country X Gain**	**Country Y Gain**
	£10,000	£20,000	£6,000
Less Loss	£6,000		
	£4,000	£20,000	£6,000
Less Exempt Amount	£4,000	£5,600	
	0	£14,400	£6,000
Tax at 18%	0	£2,592	£1,080
Less FTCR	0	£2,000	£1,080
Tax Payable	Nil	£592	Nil

The balance of Country Y's tax of £1,620 (2,700 less 1,800) cannot be set off against the Capital Gains Tax payable on the Country X gain and cannot be repaid.

169140. Amount of foreign tax credit relief – extent to which a gain is doubly taxed [January 2011]
As mentioned in INTM169100, credit for foreign tax cannot exceed the

UK tax due on the doubly taxed gain. There may be situations where the amount of the UK gain is different from the amount of the gain that is taxed in the other country; or where the period of ownership of the asset that is taken into account in computing the UK gain is different from the period of ownership of the asset that is taken into account in computing the gain in the other country. In either case, the amount of the foreign tax allowable for foreign tax credit relief may need to be restricted. For further details on this, see CG14395 –CG14425.

169150. Amount of foreign tax credit relief – basis of allowance [September 2011]

Credit may be claimed for the foreign tax paid on foreign capital gains against the UK tax due on the same gain, irrespective of the tax year in which the foreign tax is charged.

Where credit is claimed on any other basis or where there are difficulties in determining the amount of foreign tax credit relief due, advice may be sought from Personal Tax International (part of Charity, Assets & Residence).

However HMRC changed their minds in Brief 17/10:

Introduction

The purpose of this brief is to publicise a change to the established practice of restricting the amount of Foreign Tax Credit Relief (FTCR) that can be deducted when calculating the amount of UK tax due on a chargeable gain.

Background

Where a gain is chargeable to UK Capital Gains Tax or UK Corporation Tax and the same gain has also been taxed in another country then FTCR can be claimed in respect of the foreign tax paid.

Our practice has been to restrict the amount of FTCR if different periods of ownership of the asset are considered when arriving at the gain assessable in the UK and the foreign gain, or if the amount of the UK gain is less than the foreign gain.

We have reconsidered our view and are revising our practice so that the whole of the foreign tax is allowable as FTCR up to the amount of the UK tax on the gain.

The current practice

The established practice has been to restrict the amount of FTCR in the following two situations:

Situation one

The amount of gain charged to foreign tax may be calculated by reference to a longer period of ownership than the period on which the gain charged to UK tax is based. The most common instance is where

assets were acquired before the 31 March 1982 and the gain chargeable in the UK is based only on the period from 31 March 1982 onwards. In such cases the established practice has been to restrict the FTCR due by the following calculation:

((period of time assessed by UK) ÷ (period of time assessed by foreign authority)) × foreign tax = allowable FTCR

For example, where the asset was acquired on 31 March 1971 and disposed of on 31 March 1993, with foreign tax of £10,000 charged then the maximum amount of FTCR would be restricted as follows:

31 March 1993 minus 31 March 1982 equals 11 years

Divided by 31 March 1993 minus 31 March 1971 equals 22 years

multiplied by £10,000 equals £5,000

Situation two

Where the gain charged in the UK is less than the gain charged to foreign tax, the established practice has been to restrict the maximum amount of FTCR due by the following calculation:

(amount of UK assessment) ÷ (amount of foreign assessment)

multiplied by foreign tax = allowable FTCR

For example, where

the UK assessed a gain of £55,000,

the gain charged to foreign tax was £75,000 and

the foreign tax was £15,000 then the FTCR would be restricted as follows:

(£55,000 ÷ £75,000) × £15,000 = £11,000

How we intend to implement the revised practice

From 19 March 2010 the practices described above that restrict the allowable FTCR will end. In all cases where FTCR is claimed against UK tax on chargeable gains, the whole of the foreign tax will be allowable up to the amount of the UK tax on the gain, provided that the gain charged in both countries relates to the same disposal.

In the examples above, the maximum allowable FTCR would now be the full £10,000 of foreign tax in the first case and the full £15,000 of foreign tax in the second, provided, in each case, that this amount was less than or equal to the UK tax.

This change will bring the chargeable gains practice in line with the Income Tax practice, which does not restrict the amount of FTCR allowed where the amount assessed in the UK is less than the amount of income assessed to foreign tax.

Implications

If tax returns were submitted with a claim to FTCR on the basis that the FTCR should be restricted, and those returns are still open or within the self-assessment window for amendment, they may be amended to reflect

the change in practice. In other cases where FTCR has been restricted a claim can be made for additional relief within the normal time limits...

See too 55.9 (Tax credit relief: currency conversion date).

58.2 Foreign tax credit relief: Property income

The Property Income Manual provides:

> **PIM4705 - Rent from property outside the UK: CT** [February 2006]
> ***Credit for foreign tax***
> If the overseas income has suffered foreign tax and a claim to tax credit relief is made, it will be necessary, for the purposes of the source by source rule (see INTM161210) to identify the amount of UK tax attributable to income from each particular property. Where, therefore, tax credit relief is claimed separate computations of profits and losses for each property will be required. For the purposes of calculating tax credit relief, losses should be deducted in the order most favourable to the company's claim. Normally this will mean that losses should be allocated first against the source which has suffered at the lowest rate of foreign tax.
> A company's flexibility in deciding how to allocate the deduction set out in Section 797(3) ICTA 1988, subject to the limitations in respect of deficits on non-trading loan relationships set out at Section 797(3)(A) and (B) ICTA 1988, is unaffected by any of the changes.

58.3 CGT/IT computation deduction

Section 112 TIOPA provides:

> **112 Deduction from income for foreign tax (instead of credit against UK tax)**
> (1) The amount of any income arising in any place outside the UK is reduced for the purposes of the Tax Acts—
> (a) by any amount which has been paid in respect of non-UK tax[2] on that income in the place where the income arose, or
> (b) if subsection (2) applies, by the lesser amount mentioned in that subsection.
> (2) This subsection applies if credit would, were it allowable in respect of the income, be reduced under section 39 (reduction by reference to accrued income losses) to the lesser amount given by section 39(5).
> (2A) But if X is less than Y, an amount equal to the difference between

2 Section 112(6) TIOPA provides a commonsense definition: "In subsection (1) "non-UK tax" means tax under the law of a territory outside the UK."

X and Y must be subtracted from the amount by which any income of a person ("the relevant income") is reduced under subsection (1)(a).
(2B) In subsection (2A)—
X is the amount of the relevant income that the person would (disregarding this section) be required to bring into account for income tax or corporation tax purposes, less any deduction that the person would be allowed to make for the amount paid in respect of non-UK tax, and
Y is the amount of the relevant income (that is to say, the amount on which the amount in respect of non-UK tax is paid).

Credit must be given for a foreign tax repayment:

(3) If—
(a) income of any person ("P") is reduced under subsection (1) by an amount paid in respect of tax on that income in the place where the income arose, and
(b) a payment is made by a tax authority to P, or any person connected[3] with P, by reference to that tax, the amount of P's income is increased by the amount of the payment.
(4) Subsection (1)—
(a) has effect subject to section 31(2)(a) (no deduction for foreign tax if credit allowed and UK tax calculated otherwise than by reference to the amount received in the UK),
(b) has effect subject to section 143(5) and (6) (no deduction for special withholding tax if UK tax calculated otherwise than by reference to the amount received in the UK),
(c) does not apply to income the tax on which is to be calculated by reference to the amount of income received in the UK, and
(d) does not require any income to be reduced by an amount of underlying tax which, under section 60(3), is to be left out of account for the purposes of section 57.

Section 113 TIOPA has the equivalent rule for CGT:

113 Deduction from capital gain for foreign tax (instead of credit against UK tax)
(1) Subsection (2) applies to tax if it is—
(a) chargeable under the law of any territory outside the UK on the disposal of an asset, and
(b) borne by the person making the disposal.

3 Defined s.112(7) TIOPA: "For the purposes of subsection (3), whether a person is connected with P is determined in accordance with section 1122 of CTA 2010."

(2) The tax is allowable as a deduction in the calculation of the gain.
(3) Subsection (2) is subject to—
(a) Chapters 1 and 2 so far as they apply for corporation tax purposes (see, in particular, section 31),
(b) Chapters 1 and 2 so far as they apply for capital gains tax purposes (see, in particular, section 31), and
(c) section 143 (which includes provision about taking account of special withholding tax when calculating a gain for capital gains tax purposes).
(4) In subsection (1) "asset" and "disposal" have the same meaning as in TCGA 1992 (see, in particular, section 21 and the following provisions of TCGA 1992).

Thus foreign tax credit relief (if claimed) has priority over an IT/CGT computation deduction.

At first sight it is not obvious when an IT/CGT computation deduction would be better than foreign tax credit relief. One case is where foreign CGT is payable but UK CGT is not (because of a difference in valuation rules or because some UK relief applies). In such a case the computation deduction may increase the loss allowable for UK CGT purposes (similarly for IT). But that must be a rare case.

The INT Manual provides:

169090. Deduction not credit [January 2011]
A deduction for the foreign tax should be made in the computation of the gain or loss when there is no claim to foreign tax credit relief or when no UK tax is chargeable on a gain; for example, when the UK computation shows a loss on the disposal and consequently there is no UK tax against which credit for any foreign tax can be given. No deduction is due, however, when credit relief is claimed, for any part of the foreign tax paid on a gain which does not qualify for credit because it exceeds the UK tax chargeable on the same gain.

INT Manual provides:

161050. Deduction instead of credit [June 2013]
It may sometimes be to the taxpayer's advantage not to make a claim to tax credit relief, for example where a business's trading profits are wholly covered by capital allowances so that there is no Income Tax or Corporation Tax payable on those profits, or where the trading results show a loss. If, for any reason, tax credit relief is not claimed, the foreign tax paid must be deducted from the income from the foreign source in computing the amount of the income for UK tax purposes (Section 112-

115 TIOPA 2010). This may serve to create or increase a loss which can be dealt with under the normal provisions for losses.

Section 112 refers to 'any sum which has been paid in respect of non-UK tax' on income. This means tax alone and not, for example, interest paid in the foreign country for late payment of the foreign tax. Nor may a deduction be allowed for 'tax spared' (INTM161270) as it is not tax which has been paid; nor for underlying tax (INTM164060 and INTM164360) as it is not paid on the dividend in question; nor for taxes similar to UK VAT (see, however, INTM161080). Refer to CTISA Business International (Outward Investment Team), any case where it is not clear that the tax for which a deduction is sought under Section 112 is a tax on income.

Section 112 allows a deduction for foreign tax paid on income 'in the place where the income arose'. Refer to CTISA Business International (Outward Investment Team), any case where a deduction is sought for foreign tax paid on income which arises wholly or partly from work carried out in the UK.

Some foreign taxes, if not deductible under sections 112 to 115, may still be allowable expenses in computing the profits of a trade or profession (see INTM161080, BIM45900 onwards)...

CHAPTER FIFTY NINE

DTAs: INTERACTION WITH UK TAX LEGISLATION

59.1 Indirect DT reliefs

This chapter considers the interaction of DTAs and UK tax provisions, especially anti-avoidance legislation.

For an introduction to DTAs and terminology, see 57.1 (DT reliefs: Introduction).

59.1.1 *Third party claiming DT exemption*[1]

Article 1 OECD Model provides:

> This Convention shall apply to persons who are residents of one or both of the Contracting States.

DT exemptions are not in principle restricted to the person to whom the income/gains accrue. Where a DT provides that income of a person treaty-resident in the foreign state shall be taxable only in the foreign state, a settlor or transferor who is treaty-resident in the UK cannot be taxable on that income. Sections 2 and 6 TIOPA authorise DT exemptions to apply in this way, for they simply provide "relief", ie relief for anyone.[2] I refer to this as "**indirect DT exemption**".

This is self-evident, but authority can be cited if necessary. In *Lord Strathalmond v IRC*,[3] US source income arose to Lady Strathalmond. The rule at that time (only repealed in 1988) was that income of a married

---

1 Wheeler discusses this issue in *The Missing Keystone of Income Tax Treaties* (2012) para 3.2 (Subjective/objective nature of treaties) but her proposed terminology (Objective/subjective) is not the most helpful.

2 One might also refer to s.6(2)(f) TIOPA; but DTAs usually take the form of providing relief, rather than the form of disattributing income otherwise attributable to a settlor or transferor.

3 48 TC 537.

woman was deemed to accrue to her husband, so in the absence of treaty relief, Lord Strathalmond would have been taxable. The wife was treaty-resident in the USA but the husband was treaty-resident in the UK. Nevertheless he was entitled to DT exemption. The treaty exempted the income, not the treaty-resident individual, so a third party otherwise taxed on the income could claim the benefit of treaty relief even though not treaty-resident in the USA. Lord Millett summarised the point:

> [*Strathalmond*] shows that the relief from UK tax accorded by a double taxation agreement can enure for the benefit of a third party.[4]

Again, in *Padmore v IRC*[5] a partner was entitled to DT exemption on income of a Jersey partnership where the partnership was a person treaty-resident in Jersey but the partner was not.

Other countries adopt the same view.[6]

I stress this because there is a comment to the contrary by the Special Commissioner in *IRC v Willoughby*[7] but that must be dismissed as erroneous.

Indirect DT exemption is restricted in the case of trading income: see 15.24.4 (Treaty override for trading income).

59.1.2 *Third party claiming foreign tax credit relief*

The position is the same for DTA tax credit. The position is the same for unilateral tax credit, because s.9(1) TIOPA allows "relief" or "credit" ie relief and credit for anyone.

SP 6/88 provides:

> **Double taxation relief: chargeable gains**
> [The SP cites the relevant statutory provisions and continues:]
> 3 The principal requirement for the granting of credit for overseas tax against liability to capital gains tax (or corporation tax on chargeable gains) is therefore that the overseas tax should be computed by reference

---

4 *Bricom v IRC* 70 TC 272 at p.290.

5 62 TC 352.

6 *Canada v. Sommerer* 2012 FCA 207 accessible *http://www.canlii.org*. This case concerned a Canadian provision similar to s.86 TCGA. A gain accrued to trustees who were treaty-resident in the foreign state. Under the Canadian tax legislation, the gain was deemed to accrue to the Canadian resident settlor. The Canadian Federal Court of Appeal held that the settlor could claim treaty relief under a treaty with a CG provision in OECD model form.

7 [1995] STC 143 at p.169.

to the same gain as the UK tax. There is no requirement that the respective tax liabilities should arise at the same time nor that they should be charged on the same person.

The SP gives four examples:[8]

> 4 The Revenue's view is that the following sets of circumstances fall within the terms of the standard credit article and TA 1988 s 790 and may therefore give rise to a credit for overseas tax against UK capital gains tax or corporation tax on chargeable gains.
>
> (i) The overseas tax charges capital gains as income.
>
> (ii) Overseas tax is payable on a disposal falling within TCGA 1992 s 171 (transfers within a group of companies treated as taking place on a no gain/no loss basis) and a liability to UK tax arises on a subsequent disposal.[9]
>
> (iii) An overseas trade carried on through a branch or agency is domesticated (ie transferred to a local subsidiary) and relief is given under TCGA 1992 s 140. There is a subsequent disposal of the securities (or the subsidiary disposes of the assets within six years) giving rise to a liability to UK tax and overseas tax is charged in whole or in part by reference to the gain accruing at the date of domestication.[10]

---

8 INTM 169040 gives a fifth example, where "overseas tax is payable in its country of residence by a non-resident company on the disposal of an asset and in the UK the gain is charged on a UK resident individual under s.13 TCGA". See 59.9 (Foreign tax credit: s.13 TCGA).

9 The former International Tax Handbook para 619 explains the point more clearly: "A similar situation could occur with transfers under Section 171 TCGA 1992 between UK group companies. If the assets involved are situated abroad and the foreign tax authority taxes the UK company making the transfer, the benefit of that tax can be taken by the transferee group company when there is a disposal outside the group generating a UK tax charge on the relevant asset."

10 The former International Tax Handbook para 619 explains the point more clearly: "An example of this situation is found in Section 140 TCGA 1992 which deals with the charge on capital gains where a branch or agency overseas is domesticated, that is to say transferred to a non-resident company in exchange for shares. In those circumstances a charge on the gains on branch assets transferred is deferred until either the transferor sells the shares or the transferee sells the assets (in the latter case the sale has to be within six years of the acquisition). In that latter instance where the transferee sells the asset, any foreign tax on the gains is paid by the transferee. But the UK company is charged in respect of the capital gains on those same assets and qualifies for credit relief because the gain has been taxed abroad, although the tax has actually been charged on the transferee."

(iv) Overseas tax is payable by reference to increases in the value of assets although there has been no disposal. There is a subsequent disposal of the assets on which a liability to UK tax arises.

5 It will be seen that relief is conditional upon the subject of the overseas tax being identified with the gains on which the UK tax liability arises. In contrast, where roll-over relief is claimed, for example under TCGA 1992 s 152, the gain on disposal of the old asset is not subjected to UK tax. The gain on realisation of the new asset remains a gain separate from that realised on sale of the old asset and overseas tax payable as a result of the sale of the old asset is not creditable against UK tax payable on the gain realised on sale of the new asset. However, in such circumstances [s.113 TIOPA] allows the overseas tax to be claimed as a deduction in computing the gain for roll-over relief purposes.

This raises the issue of characterisation.

59.2 Characterisation

DT reliefs provide relief for particular types of income, and so relief only applies if the taxpayer receives that type of income. The characterisation of income in the hands of the UK taxpayer is a central question. I refer to this as "**the characterisation issue**".

Hughes v Bank of New Zealand[11] concerned exemption for interest on FOTRA securities, not a DTA, but the characterisation issue is not restricted to DT reliefs: it can arise wherever an exemption applies to a particular type of income. This case concerned a non-resident bank with a UK branch. The branch's profits were taxable. The branch's trading receipts included interest from FOTRA securities (exempt from UK tax in the hands of a non-resident). The interest retained its exemption.[12] Lord Millett summarised:

> [*Hughes*] is authority for the proposition that exempt interest retains its character as interest even when it is taxable as a component element of the recipient's trading profits. ... Interest from exempt securities does not cease to be such by being included as a component element of the recipient's taxable profit.[13]

---

11 21 TC 472.

12 The law has changed and nowadays the FOTRA exemption is restricted so as not to apply in this type of case. But that does not alter the general principle.

13 *Bricom v IRC* 70 TC 272 at p.290.

On the other side of the line, according to Lord Millett, is *IRC v Australian Mutual Provident Society*.[14] This concerned a non-resident life assurance company with a UK branch. The branch's profits were taxable. The taxable profits were calculated in an unusual way: the relevant rule provided that an unidentifiable portion of the world-wide income of the company derived from the investment of its life assurance fund, calculated in accordance with a mathematical formula, should be charged to tax as income derived from business in the UK. It was held that the rule did not tax the company's investment income as such but something different, described as "a conventional sum calculated in accordance with the rule"; the sum to be taxed was not interest, even though interest from FOTRA securities constituted one of the elements in the calculation.

Millett LJ summarised:

> ... the question turns on the nature of the statutory process... where tax is charged on a conventional or notional sum which exists only as the product of a calculation, the fact that one of the elements in the calculation is measured by reference to the amount of exempted income does not make the exempted income the subject of the tax: *Australian Mutual Provident Society*.[15]

The characterisation issue often arises in cases where indirect DTA exemption is sought (though it is not restricted to such cases). Assuming the income in the hands of the treaty-resident recipient third party qualifies for DT relief, is the income which the UK taxpayer receives (or better, is deemed to receive) the *same* income? Or has the income "changed its character" (in which case DT reliefs do not apply)?

IRC v Willoughby offers an example. Here the transferor ("T") paid a premium to a life assurance company which was treaty-resident in the Isle of Man. Under s.720 T was (in principle) subject to tax on the income arising to the life assurance company from the premium. The IOM DTA provided relief for the commercial profits of the life assurance company; but the income on which T was subject to tax could not be characterised as the commercial profits of the life assurance company; T's income was merely one (in the context of the whole, trivial) element by reference to which those profits were computed. So for this reason (there could be

---

14 28 TC 388 "as explained by Lord Radcliffe" in *Ostime v Australian Mutual Society* [1960] AC 459 at p.479, 38 TC 492.

15 *Bricom v IRC* 70 TC 272 at p.290..

others) T could not claim indirect DTA exemption.[16]

59.2.1 *The correct approach to characterisation*

Suppose:

(1) Income accrues to A ("A's actual income").

(2) A statutory provision ("the deeming provision") provides that income is deemed to accrue to B ("B's deemed income").

The deeming provision may or may not change the character of the income, that is, B's deemed income may or may not be a different type from A's actual income. It is a question of construction of the deeming provision.

The question is similar to the question of whether an entity is classified as transparent or opaque[17] but here the focus is on the deeming provision rather than on the nature of the entity.

In straightforward cases, where B's deemed income is exactly equivalent to A's actual income, it is suggested that the courts should normally conclude that the legislation does not change the character of the income. That is, if there is a change in the character of the income, the legislation needs to say so expressly or by implication. One reason that this is the case is that otherwise there would be a breach of the treaty. If a DTA provides income is exempt, Parliament may breach the treaty in a straightforward manner and provide that the income is still taxable. Parliament may also breach the treaty in a more subtle manner, by recharacterising the income and taxing it under its new name. However that is still a breach of the treaty. DTAs are not construed so technically. While the UK can breach a treaty, tax legislation should be construed in a treaty-consistent manner where possible.

A second reason is that in a simple case where B's deemed income is exactly equivalent to A's actual income, there is no rational distinction to be drawn between A's income and B's deemed income.

This is consistent with a purposive approach. Lord Steyn said:

> The tendency should therefore generally speaking be against literalism. What is literalism? It will depend on the context. But an example is given in The Works of William Paley... the tyrant Temures promised the

16 Though this is not quite the way that the Special Commissioner dealt with the point: 70 TC 57 at p.90. The taxpayer wisely did not appeal on the DTA issue.

17 See 84.2 ("Transparent" and "opaque").

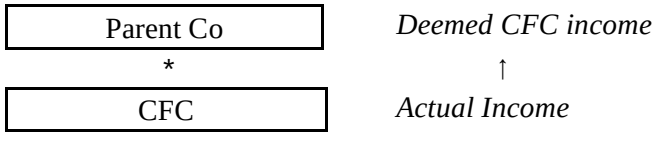
> garrison of Sebastia that no blood would be shed if they surrendered to him. They surrendered. He shed no blood. He buried them all alive. This is literalism. If possible it should be resisted in the interpretative process.[18]

It is worth stepping back to remember that the purpose of double tax treaties is to allocate taxing rights between countries.

59.2.2 *Bricom*

Bricom v IRC concerned a claim for indirect DT exemption where:

(1) Income accrued to a subsidiary company treaty-resident in a foreign state ("the CFC").
(2) The parent company ("the parent") was domestic-law UK resident and not treaty-resident in a foreign state.
(3) The parent was subject to tax under the Controlled Foreign Company ("CFC") provisions.



The CFC provisions operate in three stages:

> Stage 1. *Ascertainment:* the CFC's chargeable profits are ascertained.
> Stage 2. *Apportionment:* the CFC's chargeable profits (less any creditable tax) are apportioned among its shareholders. In *Bricom* the CFC was a wholly-owned by the parent, so all its chargeable profits were attributed to the parent.
> Stage 3. *Assessment:* The parent is assessed on "a sum equal to corporation tax at the appropriate rate on that apportioned amount of profits" (less the apportioned amount of creditable tax) and the sum assessed is recoverable from the parent "… as if it were an amount of corporation tax chargeable on the parent".

The Special Commissioners held that interest received by the CFC lost its character as interest at stage 1. Millett LJ disagreed:

> It is ... a reflection of the Revenue's unsuccessful argument in *Hughes,*

---

18 *Sirius International Insurance v FAI General Insurance* [2004] 1 WLR 3251 at [19]. But for a defence of Temures see Goldberg, "The Problem is the Perception" GITC Review Vol. 4 No. 2 accessible *http://www.taxbar.com* ("Of course, the garrison should have been advised by a lawyer before accepting the surrender terms.")

> viz: that interest from exempt securities loses its character as income by being included in the computation of the recipient's trading profits.

So far so good. But the interest lost its character at stage 2:

> The correct analysis is that the interest received by [the CFC] is not included in the sum apportioned to the taxpayer on which tax is chargeable. It merely provides a measure by which an element in a conventional or notional sum is calculated, and it is that conventional or notional sum which is apportioned to the taxpayer and on which tax is charged. ...

Bricom was on the wrong side of the distinction because "the chargeable profits" as defined by s.747(6)(a) are *a notional sum.* Why are they more notional than the profits of any company?

> They do not represent any profits of [the CFC] on which UK corporation tax is chargeable, for there are no such profits.

Obviously correct, but not relevant. The question is not whether the CFC income of the parent represents profits of the CFC *on which UK corporation tax is chargeable*. The question is whether it represents the profits of the CFC (or more accurately, whether its type is the same as those profits). The judgment then turns to this:

> Nor do they represent any actual payments or receipts of [the CFC], whether of interest or anything else.

Why not?

> They are merely the product of a mathematical calculation made on a hypothetical basis and making counterfactual assumptions.[19] The "chargeable profits" which are defined by s.747(6)(a) exist only as a measure of imputation. What is apportioned to the taxpayer and subjected to tax is not [the CFC's] actual profits but a notional sum which is the product of an artificial calculation.

The mere fact that taxable profits are ascertained by a mathematical calculation does not by itself change the character of the profits. The amount of profits on which tax is charged is in every case the product of a mathematical calculation.[20]

---

19 Millett wisely does not state what the hypothetical and counterfactual assumptions are: one must assume that the CFC is UK resident.

20 For CGT the tax charge is on gains less losses; for IT the charge is on total income.

Bricom is authority for the following propositions:

(1) The application of DT reliefs requires that the income of the taxpayer is the same income as that which qualifies for relief. (This is right and could not be doubted.)

(2) The characterisation issue is a matter of construction of the relevant provisions.

(3) The CFC provisions specifically did alter the character of the income received by the parent.[21] This decision does not, it is submitted, shed a great deal of light on the question of construction of the other provisions considered in this chapter.

One would like to think that the unfairness of *Bricom* was a factor in the ECJ decision that the CFC legislation was contrary to EU law.[22] That would have been just.

59.2.3 *Four types of deeming*

Tax provisions often use the word "deem" or its plain English equivalent, "treated as". When considering the characterisation issue in relation to deeming provisions, it is important to bear in mind that there are several different fictions that deeming provisions may be used to achieve:

(1) *Deeming which changes the recipient:* Statute may deem that whereas income actually arose to A, it is deemed to arise to B.

(2) *Deeming which changes the timing:* Statute may deem that whereas income actually arose at one time, it is deemed to arise at another time.

(3) *Deeming which changes quantum:* Statute may deem that whereas the amount of income which actually arose to A was £x, it is deemed to be of a different amount, £y.

(4) *Deeming which changes character:*
   (a) Statute may deem that whereas income which actually arose was of type A, the taxpayer is deemed to receive income of another type (type B).
   (b) Statute may deem that whereas what arises is gains, it is deemed to be income.

---

21 I do not consider how convincing is the reasoning, but note that in France the opposite view was reached: *Re Société Schneider Electric* (2002) 4 ITLR 1077 (Conseil d'Etat).

22 See 60.5 (Public policy exemption to restriction on FoE).

(c) Statute may deem that whereas no income or gains arise to anyone, the taxpayer is deemed to receive income or gains.

Case (1) does not by itself change the character of the income. This is (I think) self-evident, but there is authority:

> Exempt income does not change its character or lose its exemption merely because it is deemed to be the income of another person or is imputed to him: *Strathalmond.*[23]

The same applies if the UK provision apportions income to the taxpayer: "apportion" has the same meaning as "deems to accrue to" or "impute".[24] The term "attribute" is also the same.[25]

Likewise in cases (2) and (3) DT reliefs will still apply.

In case (4)(a) DT relief applicable to type A income only (not type B income) will not exempt the taxpayer. Cases (4)(b)(c) need further consideration.

So the mere fact that the legislation uses the terminology or technique of deeming does *not* mean that DT reliefs cease to apply. One must ask what is the deeming, and in particular, is it deeming which changes the character of the income?

In *Huitson* the point is correctly stated but in somewhat pejorative language:

> [The DTA] issue has spawned a somewhat metaphysical debate as to whether the "notional" income under section 739 is different from the "real" income in the hands of the foreign resident, so that taxation of the "notional" does not conflict with relief of the "real".[26]

The debate should be no more metaphysical than any question raised by deeming provisions, which are very common in taxation, but it has perhaps been confused by an argument based on the words "an amount equal to".

59.2.4 *"An amount equal to" the income*

In Bricom:

---

23 *Bricom v IRC* 70 TC 272 at p.290.

24 *Bricom v IRC* 70 TC 272 at p.290.

25 The terms "apportion" and "attribute" are used synonymously in s.13 TCGA; see 53.3 (Attribution of s.13 gains to participator).

26 *R oao Huitson v HMRC* [2010] STC 715 at [64]. The point was not discussed in the Court of Appeal.

> The taxpayer lays stress on the fact that what is apportioned under s.747(3) is not "a sum equal to the chargeable profits" but the chargeable profits themselves; and that the subject of the charge to tax in s.747(4)(a) is not "a sum equal to the apportioned part of the chargeable profits" but the apportioned part of the chargeable profits itself.

The distinction proposed is between statutory provisions referring to "the profits" provisions referring to "an amount equal to the profits." The taxpayer (it seems) raised this distinction but it did not help. The characterisation of income may be altered even though the statute does not use the expression "an amount equal to". That is, the absence of that expression does not determine the characterisation issue. Conversely, the use of the expression "an amount equal to" does not conclude the characterisation issue. While it is apt to describe a change of character, it does not necessarily do so. The issue is one of construction, and must be decided in the context of the provisions as a whole. I identify below some cases where this phrase is used without changing the character of the income. Indeed, a distinction between income and "an amount equal to" the income strikes me as a distinction without a difference, a foolish distinction to introduce into tax jurisprudence, which is bound to lead to confusion, muddle and uncertainty.

59.3 DT reliefs and gains of remittance basis taxpayer

After this lengthy theoretical discussion, we can turn to some practical questions. Section 12 TCGA provides:

> (1) This section applies to foreign chargeable gains accruing to an individual in a tax year ("the foreign chargeable gains") if—
>
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
>
> (b) the individual is not domiciled in the UK in that year.
>
> (2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the UK.
>
> (3) The amount of chargeable gains treated as accruing is equal to the full amount of the foreign chargeable gains so remitted in that year.

Art.13(5) OECD Model provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

Suppose:

(1) a remittance basis taxpayer is domestic-law UK resident and treaty-resident in a state with a standard capital gains article.

(2) the taxpayer receives gains which are in principle subject to CGT.

Can the individual claim DT relief? This raises a characterisation issue. (The individual is not claiming indirect treaty relief but as noted, the characterisation point is not restricted to that.) However, everyone agrees that DT exemption applies to gains taxable on the remittance basis. Section 12(2) TCGA imposes a deeming which changes timing, that is, the gains which actually accrue on disposal are deemed to accrue when remitted. Section 12(3) imposes a deeming which changes the amount. The character of the gains is not altered. That is, the chargeable gains which are "treated as accruing" are the actual gains which accrued to the individual, and not different (notional) gains.

59.3.1 *Timing: Interaction with remittance basis*

DT relief requires in principle that the alienator is treaty-resident in the foreign state at the time the gain accrues.[27] What if the gain is a foreign gain of a remittance basis taxpayer? The gain is deemed to accrue at the time that the gain is remitted. If that deeming applies for DT purposes, then odd consequences would follow. In the following examples, assume that foreign gains accrue to a remittance basis taxpayer who is domestic-law UK resident throughout. Suppose two cases:

(1) The individual is not treaty-law resident in a foreign state when the gains accrue but is treaty-law resident when the gains are remitted.

(2) The individual is treaty-law resident in a foreign state when the gains accrue but is not treaty-law resident when the gains are remitted.

If the timing rule applies for DT purposes, DT relief applies in case (1) and not in case (2). That is absurd. It would often lead to double taxation or double non-taxation. So it is considered that the timing rule does not apply for DT purposes, so DT relief can apply in case (2) but not in case (1).

59.4 DT reliefs: s.624 ITTOIA

This section considers the position of a settlor-interested trust whose settlor is domestic-law UK resident. There are four states potentially

27 *Smallwood v HMRC* [2009] STC 1222.

involved:
(1) the state where the settlor is resident (here assumed to be the UK)
(2) the state where the trustees are resident
(3) the state where a beneficiary is resident
(4) the state where the source of the income arises

Thus there are many ways s.624 could lead to double taxation. In addition to the settlor's UK tax liability under s.624:
(1) The trustees may be subject to foreign tax in another state
    (a) on income with a source in that state
    (b) on any income if they are resident in that state.
(2) In the case of an IIP trust, the life tenant may be subject to foreign tax in another state
    (a) on income with a source in that state
    (b) on any income if they are resident in that state.

59.4.1 *Foreign tax credit relief*

Where trust income is subject to a foreign tax, foreign tax credit relief in principle applies for the benefit of a settlor within s.624. That follows from first principles but if authority were needed, see s.623 ITTOIA.[28] HMRC agree. The TSE Manual provides:

> **TSEM4017 - Calculation of Income - S623 ITTOIA** [April 2010]
> Section 623 ITTOIA allows the settlor 'the same deductions and reliefs' the settlor would have been entitled to had the settlor actually received the income. Thus reliefs which can only be set against a particular type of income, such as a credit under a DTA for foreign tax suffered by the trustees on foreign source income, is available to the settlor even though the charge on the settlor is under Part 5 of ITTOIA ('Miscellaneous Income').

The INT Manual considers the position where a beneficiary is taxed in the UK and a settlor is taxed in some other country under a foreign equivalent of s.624:

> **161040. Same income** [January 2011]
> The credit Article in an agreement and the corresponding provision for unilateral relief in s.9 TIOPA 2010 are concerned with relief from double taxation on income or gains. For credit to be allowed, it is not a requirement that the foreign tax on income or gains has to be borne by

28 See 27.2.7 (Settlor's deductions and reliefs).

> the same person who is liable to UK tax on the same income or gains. For example, if the foreign country taxes a settlor on the income of a UK resident beneficiary, who is chargeable to UK tax on that income, credit may be given to the beneficiary for the foreign tax paid by the settlor. However, it must be the same income which is being taxed in both countries. ...

59.4.2 *Trustees treaty-resident outside UK*

This section considers whether DT exemptions are available where:

(1) income accrues to a settlor-interested trust whose trustees are treaty-resident in a foreign state.

(2) the settlor is not treaty-resident in a foreign state.

The settlor is subject to tax under s.624. It is considered that the settlor can claim indirect DT exemption.

Section 619 and 624 ITTOIA must be read together:

> **619(1)** Income tax is charged on ... (a) income which is treated as income of a settlor as a result of section 624 (income where settlor retains an interest) ...
>
> **624(1)** Income which arises under a settlement is treated for income tax purposes as the income of the settlor and of the settlor alone...

Section 624 imposes a deeming which changes the recipient, that is, the income which actually arises to the trustees is deemed to accrue to the settlor. The character of the income is not altered. That is, the income which is "treated as the income of the settlor" is the actual income of the trustees, and not different (notional) income.[29]

It follows that the settlor can in principle claim indirect DT exemption provided that the income is of a type which qualifies for DT relief.

Why in fact is there a charge to tax under s.619? If the settlor is treated as receiving (say) interest income, the income would be chargeable to tax under the charging provisions relating to interest. No separate charge to tax is needed. The drafter is in my view slightly muddled as to whether the income of the settlor is the settlement income or notional income. The confusion is understandable, for it is not rational to try to draw a distinction between the two, they amount to exactly the same thing.

It might be argued that since the income is deemed to be the income of the settlor and of the settlor alone, it is deemed not to be the income of the

---

29 See 59.1.1 (Third party claiming DT exemption).

trustees, so the deeming disapplies the DT exemption. But that construction would put the UK in breach of the treaty, so it should not be regarded as correct. In any case, in the HMRC view, s.624 is not a defence to trustees from an assessment.

59.4.3 *Settlor treaty-resident outside UK*

This section considers whether DT exemptions are available where:

(1) income accrues to a settlor-interested trust whose trustees are not treaty-resident in a foreign state (so the settlor cannot claim indirect treaty relief).

(2) The settlor is treaty-resident in a foreign state.

The settlor is in principle subject to tax under s.624. It is considered that the settlor can claim DT exemption directly.

In some cases, DT exemption only applies if the income is "beneficially owned" by the settlor. In the case of a common form settlor-interested discretionary trust, the income is not "beneficially owned" by the settlor as a matter of English property/trust law. But since for tax purposes it is deemed to be the income of the settlor, this requirement is deemed to be satisfied. The OECD Commentary is helpful here:

> 12 ... The term "beneficial owner" is not used in a narrow technical sense, rather, it should be understood in its context and in light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance.[30]

In the US/UK DTA, this is expressly dealt with: see 59.16.1 (Section 624, 720 income; s.13, 86 gains).

59.4.4 *HMRC view*

The TSE Manual provides:

> **3665. Relief for overseas tax: trust income deemed not to be the beneficiary's** [February 2006]
> For tax purposes, income may be deemed to be that of someone other than a beneficiary. For example, the anti-avoidance provisions may treat trust income as that of the settlor. The trustees can claim tax credit relief on the income.
> If the trustees do not claim relief, the overseas income chargeable is the net amount after deduction of overseas tax.

---

30 See 25.12.2 (Discretionary trusts: beneficial owners for DTA purposes).

The International Manual raises some of these questions but does not tell us what HMRC regard as the answers:

> **339550 - DT applications and claims: Applicants/claimants - Trusts** [December 2011]
>
> ***Claims by non-resident trustees of discretionary trusts***
>
> You may receive a claim or application from non-resident trustees of a discretionary trust. For specific information about claims by non-resident trustees see the country specific pages. If the trust's entitlement to claim is not clear from previous papers, you will need to ask for details of the trust to establish whether relief is due. The necessary information is requested on the form 4467(trustee)/FD.
>
> ***What to do if the settlor of a discretionary trust is not excluded from benefit under the trust***
>
> Where the settlor of a non-resident discretionary trust is not excluded from benefit under the trust, the trust may be subject to the provisions of ICTA88/S660. In this situation the trust may be described as a 'caught settlement'. The settlor will be chargeable on the income of the trust as their own personal income, regardless of whether the income is accumulated or distributed.
>
> Where we have a claim or application from trustees of a discretionary trust from which the settlor is not excluded from benefiting, Specialist Personal Tax, PT International Advisory will need to refer the papers to Specialist PT, Trusts & Estates for advice. They will also consider whether the settlor or the trustees need to make a UK tax return.
>
> If the settlement is caught, a claim by the trustees will not be valid.
>
> (This text has been withheld because of exemptions in the Freedom of Information Act 2000)

59.5 DT reliefs: s.720 ITA

59.5.1 *Foreign tax credit relief*

Where income of the person abroad is subject to foreign tax, foreign tax credit relief in principle applies for the benefit of the transferor. That follows from first principles but if authority were needed, see s.746 ITA.[31]

Helpsheet 262 (income and benefits from transfers of assets abroad) 2013/2014 provides:

> **What if tax has been paid on the income?**

31 See 27.2.7 (Settlor's deductions and reliefs); 29.10.4 (Transferor's deductions and reliefs).

If the amounts included in boxes 11 and 13[32] of the Foreign pages include tax credits or other tax paid on the income of the person abroad, then you may be able to claim a deduction against your liability for that tax. You will only be entitled to relief for the tax paid by the person abroad if it is in effect tax on 'the same' income, and only to the extent that the tax has actually been paid by, and not refunded to, the person abroad. You should include the amount of tax for which you can claim relief in Column C and you should also include it in box 2 of the Foreign pages. You should note Column E of your claim. In addition, you should send a schedule with the Foreign pages, showing the amount of each item of income, and tax credit/tax paid on that income, which has been included in boxes 11 and/or 13, and Column C.

If the tax for which you are claiming relief is foreign tax, for which you wish to claim Foreign Tax Credit Relief (see page FN 3 of the Foreign notes) the details you enter on the schedule should include:

Column A – Country or territory code

Column B – Amount of income arising or received before any tax taken off

Column C – Foreign Tax taken off or paid

Column E – That you wish to claim Foreign Tax Credit Relief and the rate of tax allowed (see page FN 3 of the Foreign notes)

Column F – Amount included in box 11 and/or box 13 which should be the amount arising before any tax taken off.

In the event that you do not wish to claim Foreign Tax Credit Relief for foreign tax, you should not make an entry should be made in Column E and the amount you include in box 11 and/or box 13 should be the income after foreign tax. ... If you do not yet know the final amount of tax paid by the person abroad, you should estimate the amount of credit available and amend your tax return when the final details are known. You must draw attention to the estimate and explain the circumstances in the 'Any other information' box, box 19, of your tax return. If any additional tax becomes payable as a result of using an estimate the usual provisions for charging interest on tax paid late will apply.

If the income on which you are liable to tax under these provisions is a 'foreign dividend', then you may be entitled to a non-payable UK tax credit (see page FN 7 of the Foreign notes).

59.5.2 *Person abroad treaty-resident outside UK*

This section considers whether DT exemptions are available where:

---

32 The boxes in which s.720 income is entered.

(1) Income accrues to a person abroad who is treaty-resident in a foreign state.
(2) The transferor is domestic-law UK resident and not treaty-resident in a foreign state.
(3) The transferor is in principle subject to tax under s.720.[33]

Under the pre-ITA wording, the s.739 ICTA deemed income of the transferor was the same as the income of the person abroad.[34] It follows that the transferor could in principle claim DT exemptions provided that the income qualified for the relief.[35]

The same applied to under ITA in its pre-2013 form, though that was not the official HMRC view.[36]

The changes in the FA 2013 were intended to disassociate the s.720 income of the transferor from the income of the person abroad. Now that the income of the person abroad is distinct from the (deemed) s.720 income of the individual, treaty relief has ceased to be available.

EN FB 2013 provides:

> 57. Finally there is a change that clarifies how the transfer of assets rules operate in relation to reliefs under double taxation agreements. This will make it clear that neither a treaty provision nor the transfer of assets legislation can allow a relief that would not otherwise be due.

The word "clarify" (like "modernise") is a convenient cloak to disguise changes. If a reform is said to be a clarification, there is unlikely to be much debate. Who could object to clarification? In fact there was a change of law, and the substantial rewriting of the TAA rules required to achieve it has left the statutory wording more complicated, and difficult to follow. Since the object was simply to deny DT relief where the person

---

33 Similar points apply to s.727; see 29.11.1 (Nature of s.727 charge).

34 This was view for which *HMRC* argued, and which was accepted by the Special Commissioners, in *Carvill v IRC* [2000] STC (SCD) 143, 75 TC 477 at [100] - [102].

35 See the quote from 29.10.1 (Power to enjoy part of income of person abroad). Goy agrees: "Double Tax Treaties and ss.739 and 740 ICTA 1988", GITC Vol. V no.2, accessible *http://www.taxbar.com*. See too Venables, "Double Taxation Treaties: the Antidote to Anti-avoidance Provisions" (1996) OTPR Vol. 6 p.151, accessible *http://www.khpplc.co.uk/reviews*
It appears in *R oao Huitson v HMRC* [2010] STC 715 at [61] that HMRC tacitly accepted this and I think *Huitson* was broadly supportive. The issue was not considered in the Court of Appeal.

36 See the 2012/13 edition of this work.

abroad was treaty non-resident, why did the drafter not just say so? The reasons were, perhaps, first, to disguise a treaty breach; and second, to support the facade that that was the position before 2013.

59.5.3 *Transferor treaty-resident outside UK*

This section considers whether DT reliefs are available where:

(1) income accrues to a person abroad who is not treaty-resident in a foreign state
(2) the transferor is domestic-law resident in the UK but treaty-resident in a foreign state
(3) the individual is in principle subject to tax under s.720.

As the person abroad is not treaty-resident in a foreign state the transferor cannot claim indirect treaty relief. Can the transferor claim DT exemptions directly? Assuming it is correct that s.720 income is distinct from the income of the person abroad, the transferor may do so under the "other income" article, regardless of the type of income which accrued to the person abroad; even if, say, the income of the person abroad is of a type which would not normally qualify for DT exemption.[37] If that were not correct, the DT exemption is available if the type of income of the person abroad qualifies for the exemption.

In some cases DT exemption only applies if the income is "beneficially owned" by the transferor. The point is the same as for s.624.[38] In a s.720 case the income is not "beneficially owned" by the transferor as a matter of property law. But since for tax purposes it is deemed to be the income of the transferor, this requirement is deemed to be satisfied.

In the US/UK DTA, this is expressly dealt with: see 59.16.1 (Section 624, 720 income; s.13, 86 gains).

59.6 DT reliefs: s.731 ITA

59.6.1 *Person abroad treaty-resident outside UK*

This section considers whether DT reliefs are available where:

(1) income accrues to a person abroad who is treaty-resident in a foreign state
(2) an individual (not the transferor) is domestic-law resident in the UK and not treaty-resident in a foreign state

---

37 See 59.6.2 (Individual treaty-resident outside UK).

38 See 59.4.3 (Settlor treaty-resident outside UK).

(3) the individual is in principle subject to tax under s.731.

DT exemption is not applicable for s.731 ITA. ITA EN provides:

> 2170. The method statement [s.733 ITA 2007] makes it clear that "relevant income" in relation to an individual is not actually taxable income of the individual, but is an element in the calculation of taxable income. "Relevant income" is actual income arising to a person abroad; the income charged under section 731 is income treated as arising to the individual in question. This deemed income may be more or less than "the relevant income of the tax year" in relation to the individual and the tax year identified at Step 3.

The ToA draft guidance makes the same point:

> **INTM601700 The measure of the benefits charge**
> The benefits charge is a charge on 'income treated as arising' to the individual and it is a charge by reference to the amount treated as arising. Whether income is treated as arising and if so the amount of it is determined by application of a formulaic approach which, in effect, compares benefits received by the individual with the income of a person abroad that can be used for providing a benefit (the relevant income of the tax year). This is not a charge on the actual income of the person abroad nor on the benefits received rather an amount determined by comparison of both elements over time.

Section 731 may be regarded as a charge on a benefit, or a charge on fictional income, but it is not a charge on the income arising to the person abroad.

There is no foreign tax credit relief. However, income used to pay foreign tax is not relevant income as it cannot be used to benefit a beneficiary.

59.6.2 *Individual treaty-resident outside UK*

This section considers whether DT reliefs are available where:

(1) an individual (not the transferor) is domestic-law UK resident and treaty-resident in a foreign state

(2) the individual is in principle subject to tax under s.731.

Can the individual claim treaty relief directly? It is considered that exemption is available under OECD Model Art.21(1) (other income):

> Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be

taxable only in that State.[39]

Most UK treaties restrict this relief by adding: *other than income paid out of trusts or the estates of deceased persons in the course of administration*. That exclusion does not prevent relief for s.731 income. It has an entirely different purpose.[40] S.731 income is fictional income and not "paid out of trusts" even if relevant income accrues to a trust.

Some DTAs restrict this relief to income *beneficially owned* by a resident of a Contracting State.[41] That restriction does not prevent relief for s.731 income for one of two reasons:

(1) As a matter of property law, s.731 deemed income is not "beneficially owned" by the individual or anyone else: it is fictional income which does not exist. But since for tax purposes it is deemed to be the income of the individual, this requirement is deemed to be satisfied.[42]
(2) Section 731 deemed income is "beneficially owned" by the individual because s.731 is a tax by reference to a benefit which is beneficially owned by the individual.[43]

Suppose s.731 income arises where a beneficiary enjoys the benefit of occupying land in the UK. Article 6 OECD Model provides (so far as relevant):

> 1. Income derived by a resident of a Contracting State from immovable property ... situated in the other Contracting State may be taxed in that other State...
> 3. The provisions of paragraph 1 shall apply to income derived from the direct use, letting, or use in any other form of immovable property

It is considered that s.731 income is not "income derived from immovable property" even if the charge is by reference to the occupation of UK land.

59.7 DT relief: s.13 TCGA

In the following discussion I use the following terms to distinguish

---

39 See Wattel & Marres, "Characterization of Fictitious Income under OECD-Patterned Tax Treaties", 43 European Taxation 3 (2003), p.66.

40 See 25.11.2 (DTAs with restrictions on "other income" article).

41 Eg art.22 US/UK DTA.

42 See 30.12.1 (Benefit giving rise to s.731 charge in year of receipt).

43 This point is the same as for s.624. See 59.4.3 (Settlor treaty-resident outside UK).

between types of company residence:[44]

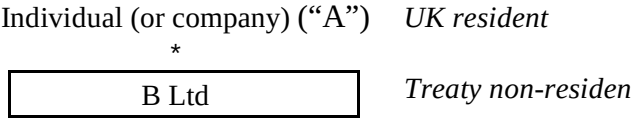
Type of residence	**Domestic-law UK resident**	**Treaty-resident in State with DTA with CG article**
Treaty non-resident	No	Yes
Simple non-resident	No	No
UK resident	Yes	No

In this terminology, for instance, a Jersey resident company is *simple* non-resident (the Jersey/UK DTA has no CG article) but a Luxembourg resident company is *treaty* non-resident.

I assume the company is close and so in principle within s.13 TCGA.

59.7.1 *Company treaty non-resident*

Suppose an individual (or a company) owns a treaty non-resident company which realises a gain:



Section 13(2) TCGA provides that A:

> shall be treated for the purposes of this Act as if a part of the chargeable gain had accrued to him.

The sidenote to s.13 calls this "attribution" of gains. The text of s.13 refers to gains "apportioned" to participators. Section 13(10A) TCGA (repealed) used the words "treated as".[45] It all comes to the same thing. This is a deeming which changes the recipient, and the s.13 gain treated as received by A is the same gain as the gain actually received by B Ltd. A can claim DT relief for gains accruing to B Ltd (deemed to accrue to A) under s.13 TCGA.

HMRC agree. The CG Manual provides:

> **57380 Double taxation agreements** [April 2011]
> You should always check whether there is a double taxation agreement

44 A treaty non-resident company must be domestic law non-UK resident so it is not necessary to consider the position of a company which is UK resident but treaty-resident outside the UK.

45 Section 13(10A) provided: *A gain which is treated as accruing to any person by virtue of this section shall not be eligible for taper relief.*

> between the UK and the country in which the company making the gain is resident. If there is no double taxation agreement any TCGA 1992, s.13 charge is unaffected. Similarly if the agreement does not refer to capital gains or CGT the charge under TCGA 1992, s.13 is unaffected. But, if the agreement provides that gains of the type realised by the non-resident company are only taxable in that company's country of residence TCGA 1992, s.13 cannot apply. For example, Article 15(4) of the Kenya/UK Double Taxation Agreement[46] would prevent TCGA 1992, s.13 applying to the disposal of stocks and shares by a company resident in Kenya. Agreements will often treat gains on the disposal of particular types of asset differently.[47]

The FA 2008 introduced new terminology. Section 14A(2) TCGA provides:

> The part of the chargeable gain treated as accruing to the individual *("the deemed chargeable gain")* is a foreign chargeable gain within the meaning of section 12 if (and only if) the asset is situated outside the UK.

This does not alter the DTA position: the expression "deemed chargeable gain" does not show that the gain changes its character. The wording reflects the deeming which changes the recipient and in that sense the s.13 gain accruing to the participator can be called a deemed gain. The

---

46 The Kenya/UK DTA follows the OECD Model, so what is stated here of Kenya is generally true for DTAs which have a capital gains article.

47 Likewise INT Manual provides:

> **169060 Resident shareholders in non-resident companies - Section 13 TCGA 1992** [September 2011]
>
> This Section enables the UK, in certain circumstances, to tax a UK resident in respect of gains made by a non-resident company in which he is a shareholder (participator where the gains accrue on or after 28 November 1995 - Section 174 FA 1996)(see CG57200 onwards). However the Capital Gains Articles in double taxation agreements may override it.
>
> If the non-resident company disposes of immovable property; for example, land, buildings etc, in the UK, double taxation agreements normally provide that any gain can be taxed in UK. Although UK domestic law may prevent a capital gains tax charge on the non-resident company (see Section 10 TCGA 1992), Section 13 TCGA 1992 can be applied to tax the UK resident shareholder.
>
> If the asset disposed of is not immovable property in the UK; for example, immovable property situated outside the UK, shares etc, then the Capital Gains Article will normally prevent a charge to tax under Section 13 TCGA 1992 being made on the shareholder...

character of the gain is not altered. That is, the gain deemed to accrue to the participator is the actual gain accruing to the company, and not a different (notional) gain.

The wording does perhaps suggest that the drafter was not conscious of the distinction between the actual gain and an equivalent notional gain, but that is understandable since it is a distinction without a difference.

59.7.2 *Non-standard form DTAs excluding s.13 relief*

The INT Manual correctly states:

> **169060 Resident shareholders in non-resident companies - Section 13 TCGA 1992** [September 2011]
> ... The text of the Capital Gains Article in the agreement with the country concerned will need to be examined to see whether there are any variations from the general principles outlined above...

For instance, article 14(6) France/UK DTA qualifies the CG article:

> The provisions of paragraph 5 shall not affect the right of a Contracting State to levy according to its law a tax chargeable in respect of gains from the alienation of any property
> [a] on a person who is, and has been at any time during the previous six fiscal years, a resident of that Contracting State or
> [b] on a person who is a resident of that Contracting State at any time during the fiscal year in which the property is alienated.

This would preclude DT relief for a participator in a company resident in France (though the EU law defence would usually fill that gap).
This is found in many modern DTAs.[48]

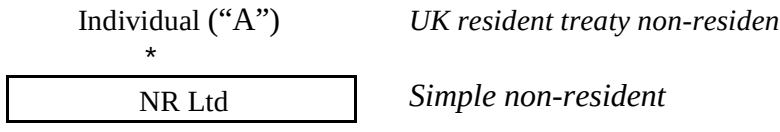
If the current policy is to exclude s.13 gains from new treaties, it is misguided. It is illogical for a treaty to provide CGT exemption but not s.13 exemption. If the foreign state does not tax chargeable gains, there should be no CG exemption at all. If it does, exemption should extend to s.13. But there it is.

59.7.3 *Participator treaty non-resident*

Suppose an individual who is domestic-law UK resident but treaty non-resident owns a simple non-resident company which realises a gain:

---

48 Australia, Botswana, Canada, Chile, Faroes, Georgia, Japan, Libya, Macedonia, Mauritius, Moldova, Netherlands, New Zealand, Poland, Saudi Arabia, Slovenia, Switzerland.



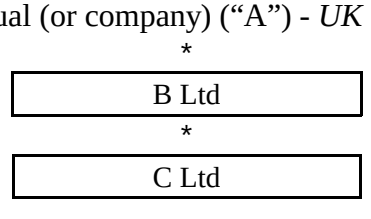
The gain treated as received by A is the same gain as the gain received by NR Ltd. But art.13(5) OECD Model provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the *alienator* is [treaty-resident].

On a literal reading, A does not qualify for treaty relief on a gain accruing to NR Ltd. A (though treaty non-resident) is not the alienator. NR Ltd is the alienator but (on the facts of this example) NR Ltd is not treaty resident in the foreign state which confers DT reliefs. So the terms of art.13(5) are not satisfied. The US treaty is wider and DT exemption applies to individuals who are treaty-resident in the US.[49] Even under the OECD Model, the same result is arguable on the grounds that the gain is treated as accruing to A, so A should be deemed to be the alienator; or the word "alienator" does not require that one must alienate property, only that the gain on the alienation accrues to the person.

59.7.4 *Chain of companies*

Suppose there is a chain of companies:



Suppose a gain accrues to C ("C's gain"). We have the following possibilities:

	Case 1	**Case 2**	**Case 3**
B Ltd	UK resident	simple non-resident	treaty non-resident
C Ltd	treaty non-resident	treaty non-resident	simple non-resident

Case 1: If B Ltd is UK resident, and C Ltd is treaty non-resident:

---

49 See 59.16.1 (Section 624, 720 income; s.13, 86 gains).

(1) C's gain is deemed to accrue to B Ltd; B Ltd may claim DT relief, as noted above.
(2) A does not need to claim relief, as
  (a) C's gain is not deemed to accrue to A under s.13(9) and
  (b) apparently C's gain is not deemed to accrue to A under s.13(2) (but if it did, DT relief would be available.)

Case 2: If B Ltd is simple non-resident and C Ltd is treaty non-resident, C's gain in principle accrues to A. Section 13(9) TCGA provides:

> [a] If a person who is a participator in the company at the time when the chargeable gain accrues to the company is itself a company which
> [i] is not resident in the UK but which
> [ii] would be a close company if it were resident in the UK,
> [b] [i] *an amount equal* to the amount apportioned under subsection (3) above out of the chargeable gain to the participating company's interest as a participator in the company to which the gain accrues
> [ii] shall be further apportioned among the participators in the participating company according to the extent of their respective interests as participators, and
> [c] subsection (2) above shall apply to them accordingly in relation to the amounts further apportioned,
> [d] and so on through any number of companies.

HMRC accept that A can claim DT relief. This is so even though s.13(9) refers to "an amount equal to" the gain. The words do not show there is a change in the character of the gain (though they do perhaps show some confusion on the point).

Case 3: If C Ltd is simple non-resident, but B Ltd is treaty non-resident, C's gain is deemed to accrue to A, but A cannot claim DT relief.

59.7.5 *The future*

HMRC say:

> 2.21. Some double taxation agreements already provide that section 13 may apply to gains of an overseas company, but others make no specific provision. Where no such provision is present, current HMRC policy is to accept that section 13 is disapplied by any treaty that contains a provision similar to article 13(5) of the OECD Model convention. In those cases gains of the type realised by the non UK-resident company

are taxable only in that company's country of residence.

2.22. This practice will be reviewed alongside the amendments outlined in this Chapter and any further changes introduced as a result of this consultation.[50]

59.8 Disallowance of DT relief for trust participator

Section 79B TCGA provides:

> (1) This section applies where the trustees of a settlement are participators[51]—
>
> (a) in a close company, or
>
> (b) in a company that is not resident in the UK but would be a close company if it were resident in the UK...
>
> (2) Where this section applies, nothing in any double taxation relief arrangements shall be read as preventing a charge to tax arising by virtue of the attribution to the trustees under s.13, by reason of their participation in the company mentioned in subsection (1) above, of any part of a chargeable gain accruing to a company that is not resident in the UK.

Suppose a UK trust owns a treaty non-resident company which realises a gain:

Trust	*UK resident*
*	
TNR Ltd	*Treaty non-resident*

DT relief is disallowed under s.79B(1)(b) and the trustees are taxable.

Similarly if a non-resident trust within s.86 owns a treaty non-resident company which realises a gain: DT relief is disallowed under s.79B(1)(b) and the settlor is taxable.

I am unable to see the point of s.79B(1)(a). If the trustees are participators in a *close* company, gains accrue to that company and are not attributed to the trustees. I would be grateful if any reader could offer an explanation.

---

50 HMRC Consultation Document *Reform of two anti-avoidance provisions* (July 2012) accessible *http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&_pageLabel=pageLibrary_ConsultationDocuments&propertyType=document&columns=1&id=HMCE_PROD1_032219*

51 Section 79B(1) provides: "For this purpose 'participator' has the same meaning as in section 13".

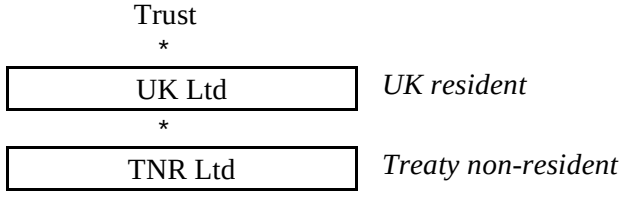
Section 79B(3) TCGA provides:

> Where this section applies and—
>
> (a) a chargeable gain accrues to a company that is not resident in the UK but would be a close company if it were resident in the UK, and
>
> (b) all or part of the chargeable gain is treated under section 13(2) as accruing to a close company which is not chargeable to corporation tax in respect of the gain by reason of double taxation arrangements, and
>
> (c) had the company mentioned in para (b) (and any other relevant[52] company) not been resident in the UK, all or part of the chargeable gain would have been attributed to the trustees by reason of their participation in the company mentioned in subsection (1) above,
>
> section 13(9) shall apply as if the company mentioned in para (b) above (and any other relevant company) were not resident in the UK.

Section 79B(3) addresses the more challenging case where:

(1) a trust owns a holding company ("UK Ltd") which is UK resident;

(2) UK Ltd holds a treaty non-resident subsidiary ("TNR Ltd"):



UK Ltd is not taxed under s.13 on TNR's gain as UK Ltd can claim DT relief. In the absence of s.79B(3), TNR's gain apparently cannot be apportioned to the trust under s.13(9) or s.13(2). The trust does not need DT relief. Section 79B(3) treats UK Ltd as non-resident, so that the gain accruing to TNR can be attributed to the trust under s.13(9).

59.8.1 *Critique of s.79B*

There are two objections to s.79B.

---

52 Section 79B(4) TCGA provides:

> "The references in subsection (3) above to 'any other relevant company' are to any other company which if it were not resident in the UK would be a company in relation to which section 13(9) applied with the result that all or part of the chargeable gain was attributed to the trustees as mentioned in that subsection."

One is the constitutional point that the UK is in breach of its DTAs. It might pragmatically be said that if the foreign state does not care enough to complain, that does not matter.

It is certainly anomalous that s.79B adversely singles out trustee participators, ignoring individual and company participators.[53] Section 79B could have no part to play in a coherent and logical system of taxing offshore company gains.

59.9 Foreign tax credit: s.13 TCGA

SP D23 provides:

> **Non-resident company: TCGA 1992 s 13**
> [1] Where a UK participator in a non-resident company which would be a close company if resident in the UK is chargeable to CGT on a proportion of a capital gain accruing to that company, tax credit relief may be given against UK CGT for the appropriate proportion of any overseas tax payable by the company in the country where it is resident in respect of its gain [s.9(2) TIOPA];
> [2] alternatively, under [s.113 TIOPA], the appropriate proportion of the overseas tax may be deductible in computing the shareholder's gains to the extent that the overseas tax has not qualified for relief under [s.9(2) TIOPA].

This relates to two reliefs:
(1) Foreign tax credits
(2) CGT computation deduction
The CG Manual summarises these two reliefs and gives a worked example:

> **57381. Overseas tax payable by NR SP D23** [April 2011]
> The non-resident company may have to pay tax on the gain in its country of residence. UK residents to whom the gain is apportioned will get relief for this tax. The two methods of giving relief are set out in SP D23.
> - Either the UK resident can claim tax credit relief, see CG57382 or
> - a proportionate part of the tax can be claimed in computing the apportioned gain, see CG57383.

---

53 CIOT make this point: "Reform of two anti-avoidance provisions" (October 2012) accessible *http://www.tax.org.uk/Resources/CIOT/Documents/2012/10/121002_s13_trans_assets_CIOT.pdf*

57382. Tax credit relief [April 2011]
The UK resident can claim tax credit relief under [s.9(2) TIOPA]. Relief is given on a proportion of the foreign tax equal to the proportion of the total gain attributable to the UK resident. This amount is set-off against the charge to CGT or Corporation Tax on the relevant chargeable gains. See the example at CG57384. If tax credit relief is allowed no deduction under [s.113 TIOPA] can be allowed in computing the chargeable gain. See CG57383.

57383. Tax deducted in computing gain [April 2011]
If the UK resident does not want to claim tax credit relief, the tax can be deducted in computing the gain, [s.113 TIOPA]. The foreign tax paid does not qualify for indexation allowance. Although it is an allowable deduction in computing the gain it is not a deduction within TCGA 1992, s.38(1)(a) or TCGA 1992, s.38(1)(b). This means it is not relevant allowable expenditure for indexation allowance purposes, see CG17240. In all other respects you compute and apportion the gain in the usual way allowing the foreign tax paid as a deduction. See the example in CG57384. For further guidance on [s.113 TIOPA] see CG14410+.

The Manual gives a worked example:

57384. Foreign tax paid by a NR company [April 2011]
This example illustrates the differences between allowing any foreign tax paid by the non-resident company as tax credit relief or as a deduction in computing the gain.
Facts
- The non-resident company realises a gain of £20,000 computed under the normal CGT rules.
- It has to pay £5,000 tax on this gain in its country of residence.
- 75% of the gain is attributable to a UK resident.

CGT treatment
A TCGA 1992, s.13 [gain][54] of £20,000 @ 75% = £15,000 is apportioned to the UK resident. Relief for the tax paid can be claimed in two ways.
- TAX CREDIT RELIEF, SEE CG57382.

Suppose the UK resident is liable to CGT at 40%. The tax payable would be £6,000. The UK resident can claim tax credit relief on the foreign tax of £5,000 paid by the company in the same proportion as the gain is apportioned. £5,000 @ 75% = £3,750. The total tax payable by the UK resident becomes £2,250.

54 The original erroneously says: charge.

- DEDUCTION IN COMPUTING THE GAIN, SEE CG57383.
The foreign tax paid of £5,000 can be deducted in computing the gain. No indexation allowance is due on this deduction. The gain to be apportioned becomes £20,000 – £5,000 = £15,000. The taxpayer's share is £15,000 @ 75% = £11,250. At a rate of 40% the tax payable would be £11,250 @ 40% = £4,500.
In this example you would expect the taxpayer to claim tax credit relief.

59.10 DT reliefs: s.86 TCGA

59.10.1 *Trustees within s.86 treaty-resident outside UK*

Assume the fundamental conditions in s.86(1) TCGA are satisfied. Section 86(4) TCGA provides:

> Where this section applies—
> (a) chargeable gains of an amount equal to that referred to in subsection (1)(e) above shall be treated as accruing to the settlor in the year ...

In the HMRC view, the fact that the trustees are treaty-resident in a foreign state with standard form DTA CGT relief does not allow the settlor to claim relief from s.86. HMRC raise two arguments in the Manuals. The first is a categorisation, *Bricom*-type argument. The CG Manual provides:

> **38208 Double taxation relief** [November 2012]
> The gain which is chargeable on the settlor is not the same gain as that which accrues to the trustees, but only an amount equivalent to that gain.
> Therefore articles in particular Double Taxation agreements, under which chargeable gains from the alienation of particular property are exempt from UK tax, will not operate to exempt the settlor from liability under TCGA Section 86.

I think this argument is doubtful. However HMRC have a better argument, at which the CG Manual provides a hint. The Manual first explains why DT relief did apply to the former s.77 TCGA when trustees were treaty-resident in a foreign state with a capital gains article

> **34912. Double taxation relief** [April 2010]
> A settlor may be able to claim exemption [from s.77 TCGA] on some or all of the attributed trust gains, but this depends on the terms of the particular double taxation agreement. The gain which is chargeable on the settlor is not the same as the gain which accrues to the trustees.

> Therefore Articles which exempt trustees from UK tax on gains accruing on the disposal of particular property do not necessarily operate to exempt the settlor from liability under Section 77. However section 77(1)(b) requires there to be an amount on which the trustees would have been chargeable for the year in respect of the gains in question. So if the correct interpretation of the Double Taxation Agreement by reference to the relevant acts is that the trustees would be exempt if they were chargeable then there is no liability.[55]

HMRC say this argument does not run for s.86 because the legislation is differently worded:

> This is by way of contrast with section 86 where there is a hypothesis in subsections (1)(e)(i) and (3) that the trustees are in fact resident in determining whether the section applies[56] and therefore one cannot take into account the actual non-residence. Compare *Bricom Holdings v CIR* 70 TC 272.

But this is not necessarily right; see 59.12.1 (Trustees within s. 87 treaty-resident outside UK) for the discussion on s.87.

Another argument is that s.86(3) envisages a charge in a case where trustees are dual resident in the sense of being domestic-law UK resident but treaty-resident in a foreign state. In that case the treaty is intended to be overridden. By implication the same should apply where the trustees are treaty-resident in a foreign state and not UK resident at all.

HMRC accept that foreign tax credit relief is available. The CG Manual provides:

> **38208 Double taxation relief** [November 2012]
> ... Where, however, the particular article provides for the allowance, as a credit, of overseas tax payable on gains, that tax can be allowed as a

---

55 Section 77(1) TCGA (now repealed) provided, so far as relevant:
(1) Where in a year of assessment—
(a) chargeable gains accrue to the trustees of a settlement from the disposal of any or all of the settled property,
(b) after making any deduction provided for by section 2(2) in respect of disposals of the settled property there remains an amount on which the trustees would be chargeable to tax for the year in respect of those gains ... , and
(c) at any time during the year the settlor has an interest in the settlement,
[i] the trustees shall not be chargeable to tax in respect of those gains but
[ii] instead chargeable gains of an amount equal to that referred to in para (b) shall be treated as accruing to the settlor in that year.

56 See 50.10 (Section 86 trust gains condition).

> credit. This is because UK tax is computed by reference to the same chargeable gains in respect of which the overseas tax is computed. If there is no Double Taxation agreement, then unilateral relief is available on the same basis.

59.10.2 *Settlor treaty-resident outside UK*

Suppose the settlor is domestic-law UK resident but treaty-resident in a foreign state. Can the settlor claim direct relief? The point is the same as for s.13 gains. Art.13(5) OECD Model provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the *alienator* is [treaty-resident].

On a literal reading, the settlor does not qualify for treaty relief because (though treaty non-resident) the settlor is not the alienator. The trustees are the alienator but (on the facts of this example) the trustees are not treaty non-resident. So the terms of art.13(5) are not satisfied. The US treaty is wider and DT exemption applies to a settlor who is treaty-resident in the US.[57] Even under the OECD model, the same result is arguable on the grounds that the gain is treated as accruing to the settlor, they should be deemed to be the alienator; or the word "alienator" does not require that one must alienate property, only that the gain on the alienation accrues to the person.

59.10.3 *Trust owns company which is treaty-resident outside UK*

If a non-resident trust within s.86 owns a treaty non-resident company which realises a gain DT relief is disallowed and the settlor is taxable; see 59.8 (Disallowance of DT relief for trust participator).

59.11 Restriction on DTR for gains of trustees and settlors

It is easiest to understand the legislation if one bears in mind the tax avoidance schemes it was intended to block. Suppose a non-resident settlor-interested trust within s.86 TCGA. The trustees would take two steps:

(1) arrange to dispose of an asset at a time when they are treaty-resident in a foreign state with a DTA with a CGT article and
(2) become UK resident later in the same tax year.

---

57 See 59.16.1 (Section 624, 720 income; s.13, 86 gains).

In the absence of an anti-avoidance rule, this works as s.86 does not apply and the trustees (although within the charge to CGT) claimed DTR.[58]

This arrangement is counteracted by s.83A TCGA.

> (1) This section applies if a chargeable gain accrues to the trustees of a settlement on the disposal by them of an asset in a year of assessment and the trustees—
>
> (a) are within the charge to capital gains tax[59] in that year of assessment, but
>
> (b) are non-UK resident at the time of the disposal.

The expression "non-UK resident" in (b) is defined in s.83A(4) TCGA:

> For the purposes of this section the trustees of a settlement are non-UK resident at a particular time if, at that time,—
>
> (a) they are not resident in the UK, or
>
> (b) they are resident in the UK but are Treaty non-resident.

This is a slightly artificial definition, but it is difficult to think of a better label.

If these conditions are satisfied, s.83A(2) TCGA overrides DT relief:

> Where this section applies, nothing in any double taxation relief arrangements shall be read as preventing the trustees from being chargeable to capital gains tax (or as preventing a charge to tax arising, whether or not on the trustees) by virtue of the accrual of that gain.

EN FA 2005 explains the words in brackets:

> 4. Subsection (2) of section 83A has effect to provide that where section 83A applies, nothing in the terms of any Double Taxation Agreement (DTA) can be read as preventing the trustees being chargeable to capital gains tax, or of preventing a charge to tax arising (whether on the trustees or another person), by virtue of the accrual of the gain.

---

58 The reader may have considered a similar arrangement where the non-resident trust was not within s.86 but is within s.87. In the absence of an anti-avoidance provision, the same steps would be taken in order to avoid a s.2(2) amount. But this is caught by s.88 TCGA; see 51.17 (Dual resident trust: s.88 TCGA).

59 Section 83A(3) gives this expression a commonsense definition:

> "For the purposes of this section the trustees of a settlement are within the charge to capital gains tax in a year of assessment—
>
> (a) if, during any part of that year of assessment, they are resident in the UK and not Treaty non-resident".

> 5. The reason for the reference to "another person" in paragraph 4 above is that, in certain circumstances where the trustees of a settlement are within the charge to capital gains tax in a tax year, the rules in section 77 TCGA provide that the trustees do not actually suffer a tax charge in respect of chargeable gains which arise to them on the disposal of settled property which originates from a UK resident or ordinarily resident settlor who has an interest in the settlement at any time in the year. Chargeable gains are instead treated as arising to the settlor, who is then chargeable to tax in respect of them.

Now that s.77 has been repealed, the words in brackets in s.83A(2) should be repealed, as they can never apply, but they do no harm. Section 83A is still needed in order to deal with the s.86 scheme.

Section 83A is somewhat wider than it needed to be in order to deal with these two schemes, and considerable care is needed where trustees become or cease to be treaty non-resident, but in practice difficulties are fairly rare.

59.12 DT reliefs: s.87 TCGA

59.12.1 *Trustees within s. 87 treaty-resident outside UK*

This section considers whether DT reliefs are available where:

(1) Gains ("trust gains") accrue to a trust which is treaty-resident in a foreign state.
(2) A UK resident beneficiary receives a capital payment so a s.87 gain accrues to them.

At first sight, the DTA offers no defence to the charge on the beneficiary. The trust gains accruing to trustees meet the requirements for DTR but the s.87 gain accruing to the beneficiary under s.87 TCGA is not the same gain as the trust gains accruing to the trustees. Section 87 may be regarded as a charge on the capital payment, or a charge on fictional gains, but it is not a charge on the trust gains accruing to the trustees. That seems reasonably clear for several reasons:

(1) The wording of s.87(2) suggests that the s.87 gains and the trust gains are distinct.
(2) If the trust gains exceed the capital payment, it would not be clear which trusts gains were charged. Although there are matching rules, these rules only match capital payments to trust gains of a year; they do not match capital payments to specific gains within the year.
(3) In the case of a foreign domiciled beneficiary, the s.87 gain is a foreign chargeable gain, even though the trust gain accruing to the

trustees is a gain on the disposal of a UK situate asset.[60]

The absence of DT relief in this situation has always been a potential cause of injustice, but since the extension of s.87 to foreign domiciliaries in 2008 it has become a major cause of injustice.

There is however an argument that the gains accruing to the trustees are not s.2(2) amounts. The definition is:

> the amount upon which the trustees of the settlement would be chargeable to tax under s.2(2) for that year if they were resident in the UK in that year

The argument is that assuming the trustees were UK resident, they would still be treaty non-resident, so "the amount on which they would be chargeable to tax" would be nil![61] I refer to this as **"the DT argument"**. It is the old question of how far one carries through the deeming.[62]

Unfortunately an argument of this kind was put in a similar context in *Bricom v IRC* where it was rejected. This was a CFC case. One issue was to ascertain the chargeable profits of the CFC. "Chargeable profits" is defined in s.747(6) ICTA which provides (so far as relevant):

> In relation to a company resident outside the UK—
> (a) any reference in this Chapter to its chargeable profits for an accounting period is a reference to the amount which, on the assumptions in Schedule 24, would be the amount of the total profits of the company for that period on which ... corporation tax would be chargeable.

Para 1(1) sch.24 provides:

> The company shall be assumed to be resident in the UK.

The CFC was resident in the foreign state, and treaty-resident there, and it argued that although it was deemed to be UK resident, the deeming did not undo those facts. Accordingly, the CFC's chargeable profits should be ascertained on the assumption that the CFC was dual resident and entitled to the benefit of the DTA. The Court of Appeal rejected the argument:

---

60 See 51.15 (Section 87 remittance basis).

61 This assumes that the trustees would claim treaty relief, but that is merely an administrative matter and should not be an obstacle.

62 See App 2.1 (Construction of Deeming Provisions).

> ... para 1(1) of Sch 24 is a statutory assumption, and is ambiguous. The question is: what is the nature of the assumption?...
> In the present case the purpose for which the assumptions are required is self-evident (!). A controlled foreign company is ex hypothesis resident outside the UK. As a non-resident, it will not normally be subject to UK corporation tax and will have made no claim to relief from such tax. The computation of the profits on which corporation tax is chargeable, therefore, involves ascertaining a hypothetical amount, that is to say the amount which would have represented the amount of such profits if the controlled foreign company had been resident in the UK and had made all necessary claims for relief. The assumptions which Sch 24 requires are not additional assumptions to be made in combination with the actual facts. In relation to the matters which they cover they are substituted for the actual facts. [The CFC] was resident outside the UK; this means that it had no profits actually chargeable to corporation tax; accordingly its chargeable profits are to be ascertained on the footing that it was resident in the UK instead. It is as simple as that. There is no question of dual residence.
> ... The chargeable profits referred to in s 747(4)(a) must be ascertained without reference to the double taxation agreement ....[63]

The reader may think this a particularly blatant case of assuming the answer and then "construing" the statute to yield that answer. However that may be, *Bricom* is not a general rule for the construction of provisions deeming UK residence, but a case on the construction of the CFC legislation. The point in the s.87 code must be considered independently.

If the DT argument were correct, there would be an anomaly between:

(1) trusts which were domestic-law non-resident and treaty non-resident, ie within the scope of a DTA; and
(2) trusts which were domestic-law UK resident and treaty non-resident, for these are caught by s.88 TCGA.[64]

If the DT argument is not correct, a CGT computation deduction is available so foreign tax paid by the trustee is deducted in computing the s.2(2) amount. This is because:

(1) The s.2(2) amount is the amount on which trustees would have been chargeable to tax if UK resident; and
(2) UK resident trustees would qualify for a CGT computation deduction, which reduces the amount on which trustees would be chargeable to

63 *Bricom v IRC* 70 TC 272 at p.289.

64 See 51.17 (Dual resident trust: s.88 TCGA).

tax.

59.12.2 *Beneficiary treaty-resident outside UK*

Suppose now the beneficiary is UK resident but treaty-resident in a foreign state, in a foreign state with a DTA with a common form CGT article. Can the beneficiary claim treaty relief directly? Art.13(5) OECD Model provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

It is suggested that the beneficiary cannot claim DT relief because:
(1) The beneficiary is not the alienator.[65]
(2) The gain is not "from the alienation of any property".
The contrary is arguable, but does require a very loose reading of the provision.

59.13 DT reliefs: Offshore income gains

59.13.1 *s.13 OIGs: Company treaty-resident outside UK*

Suppose OIGs accrue to a company which is treaty-resident in a foreign state and so are deemed to accrue to a UK resident participator under s.13 TCGA. In principle, DT reliefs apply to OIGs deemed to accrue under OIG s.13 just as they do for chargeable gains deemed to accrue under CGT s.13.[66]

I have considered reg. 24(6) OFTR which provides:

> If this regulation applies, the person to whom the offshore income gain arises is treated as the person making the disposal.

This does not disapply treaty relief, either because it has no application for the purposes of the treaty or because (while deeming the participator to be the disponor) it does not say that the non-resident company is not the alienator.[67]

59.13.2 *s.13 OIGs: Participator treaty-resident outside UK*

In the case of CGT s.13 gains, the participator has a difficulty in obtaining

---

65 See 59.7.3 (Participator treaty non-resident).
66 For this terminology, see 35.14 (OIG s.13 charge).
67 For the reason for this provision, see 35.13.4 (Deemed disposal).

relief under a CG article, in that they are not at first sight the "alienator".[68] However it is considered that the other income article provides relief, in the case of OIGs. If the capital gains article is in point, it is arguable that reg. 24(6) OFTR deems the participator to be the alienator.

59.13.3 *s.87 OIGs: Beneficiary treaty-resident outside UK*

In the case of CGT s.87 gains, the beneficiary has a difficulty in obtaining relief, in that they are not at first sight the "alienator" and the gain is not "from the alienation of any property". See 59.12.2 (Beneficiary treaty-resident outside UK). However in the case of OIGs it is considered that the other income article provides relief. If the capital gains article were in point, it is arguable that reg.20(5) OFTR deems the beneficiary to be the alienator but the problem remains that the gain is not "from the alienation of any property".

59.14 DT reliefs: Policy held by trust or by company

If the policy is held by a trust, the position is similar to s.624; see 59.4 (DT reliefs: s.624 ITTOIA). If the policy is held by a company within s.720, s.720 issues arise: see 59.5 (DT reliefs: s.720 ITA).

59.15 US/UK DTA

The US/UK DTA follows the US model which differs significantly from the OECD model. A full discussion would require a book to itself.

For the US/UK DTA definition of treaty residence, see 6.19 (USA/UK DTA).

59.15.1 *US/UK DTA: Savings clause*

Article 1(4) US/UK DTA provides:

> Notwithstanding any provision of this Convention except paragraph 5 of this Article, a Contracting State may tax its residents (as determined under Article 4 (Residence), and by reason of citizenship may tax its citizens, as if this Convention had not come into effect.

This is called **"the savings clause"**.

So subject to the art 1(5) exceptions:

(1) US may tax US citizens and US treaty-residents ignoring treaty relief.

(2) UK may tax UK treaty-residents ignoring treaty-relief.

---

68 See 59.7.3 (Participator treaty non-resident).

On the other hand, UK must allow treaty relief to US treaty-residents, and US must allow relief to UK treaty-residents who are not US citizens.

The US Department of the Treasury Technical Explanation of the Convention[69] provides:

> Paragraph 4 contains the traditional saving clause found in U.S. tax treaties. The Contracting States reserve their rights, except as provided in paragraph 5, to tax their residents and citizens as provided in their internal laws, notwithstanding any provisions of the Convention to the contrary. For example, if a resident of the UK performs professional services in the United States and the income from the services is not attributable to a permanent establishment in the United States, Article 7 (Business Profits) would by its terms prevent the United States from taxing the income. If, however, the resident of the UK is also a citizen of the United States, the saving clause permits the United States to include the remuneration in the worldwide income of the citizen and subject it to tax under the normal Code rules (i.e., without regard to Code section 894(a)). However, subparagraph 5(a) of this Article preserves the benefits of special foreign tax credit rules applicable to the U.S. taxation of certain U.S. income of its citizens resident in the UK. See paragraph 6 of Article 24 (Relief from Double Taxation).
>
> For purposes of the saving clause, "residence" is determined under Article 4 (Residence). Thus, an individual who is a U.S. resident under the Internal Revenue Code but who is deemed to be a resident of the UK under the tie-breaker rules of Article 4 would be subject to U.S. tax only to the extent permitted by the Convention. For example, if an individual who is not a U.S. citizen is a resident of the United States under the Code, and is also a resident of the UK under its law, and that individual has a permanent home available to him in the UK and not in the United States, he would be treated as a resident of the UK under Article 4 and for purposes of the saving clause. The United States would not be permitted to apply its statutory rules to that person if they are inconsistent with the treaty.[70]

---

69 Accessible *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

70 The treaty continues with a comment that UK treaty-residence does not preclude US domestic-law residence, a point only relevant to the US (though a comparable rule applies in the UK): "However, the person would be treated as a U.S. resident for U.S. tax purposes other than determining the individual's U.S. tax liability. For example, in determining under Code section 957 whether a foreign corporation is a controlled foreign corporation, shares in that corporation held by the individual would be

59.15.2 *Article 1(5) exceptions*

The list of exceptions in art 1(5) is quite limited:

> The provisions of paragraph 4 of this Article shall not affect—
> (a) the benefits conferred by a Contracting State under
> [i] paragraph 2 of Article 9 (Associated Enterprises),
> [ii] sub-paragraph (b) of paragraph 1 and paragraphs 3 and 5 of Article 17 (Pensions, Social Security, Annuities, Alimony, and Child Support),
> [iii] paragraphs 1 and 5 of Article 18 (Pension Schemes) and
> [iv] Articles 24 (Relief From Double Taxation),
> [v] [Art] 25 (Non-discrimination), and
> [vi] [Art] 26 (Mutual Agreement Procedure) of this Convention; ...

The US Department of the Treasury Technical Explanation of the Convention[71] summarises the exceptions:

> Some provisions are intended to provide benefits to citizens and residents even if such benefits do not exist under internal law. Paragraph 5 sets forth certain exceptions to the saving clause that preserve these benefits for citizens and residents of the Contracting States.
> Subparagraph (a) lists certain provisions of the Convention that are applicable to all citizens and residents of a Contracting State, despite the general saving clause rule of paragraph 4:
> (1) Paragraph 2 of Article 9 (Associated Enterprises) grants the right to a correlative adjustment with respect to income tax due on profits reallocated under Article 9.
> (2) Subparagraph 1(b) and paragraphs 3 and 5 of Article 17 (Pensions, Social Security, Annuities, Alimony, and Child Support) provide exemptions from source or residence State taxation for certain pension distributions, social security payments and child support.
> (3) Paragraph 1 of Article 18 (Pension Scheme) provides an exemption for certain investment income of pension schemes located in the other State, while paragraph 5 provides benefits for certain contributions by

---

considered to be held by a U.S. resident. As a result, other U.S. citizens or residents might be deemed to be United States shareholders of a controlled foreign corporation subject to current inclusion of Subpart F income recognized by the corporation. See Treas. Reg. section 301.7701(b)-7(a)(3). The application of the saving clause to former citizens and long-term residents is addressed not in paragraph 4 but in paragraph 6."

71 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

> or on behalf of a U.S. citizen to certain pension schemes established in the UK.
> (4) Article 24 (Relief from Double Taxation) confirms the benefit of a credit to citizens and residents of one Contracting State for income taxes paid to the other, even if such a credit may not be available under the Code.
> (5) Article 25 (Non-Discrimination) requires one Contracting State to grant national treatment to nationals of the other Contracting State in certain circumstances. Excepting this Article from the saving clause requires, for example, that the United States give such benefits to a national of the UK even if that person is a citizen of the United States.
> (6) Article 26 (Mutual Agreement Procedure) may confer benefits on residents or nationals of the Contracting States. For example, the statute of limitations may be waived for refunds and the competent authorities are permitted to use a definition of a term that differs from the internal law definition. As with the foreign tax credit, these benefits are intended to be granted by a Contracting State to its citizens and residents.

The list of exceptions in art 1(5) continues:

> The provisions of paragraph 4 of this Article shall not affect ...
> (b) the benefits conferred by a Contracting State under
> [i] paragraph 2 of Article 18 (Pension Schemes) and
> [ii] Articles 19 (Government Service),
> [iii] Art 20 (Students),
> [iv] Art 20A (Teachers), and
> [v] Art 28 (Diplomatic Agents and Consular Officers)
> of this Convention, upon individuals who are neither citizens of, nor have been admitted for permanent residence in, that State.

The US Department of the Treasury Technical Explanation of the Convention[72] provides:

> Subparagraph (b) of paragraph 5 provides a different set of exceptions to the saving clause. The benefits referred to are all intended to be granted to temporary residents of a Contracting State (for example, in the case of the United States, holders of non-immigrant visas), but not to citizens or to persons who have acquired permanent residence in that State. If beneficiaries of these provisions travel from one of the Contracting States to the other, and remain in the other long enough to become residents under its internal law, but do not acquire permanent

72 *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

> residence status (i.e., in the U.S. context, they do not become "green card" holders) and are not citizens of that State, the host State will continue to grant these benefits even if they conflict with statutory rules. The benefits preserved by this paragraph are: the host country exemptions for the following items: government service salaries and pensions under Article 19 (Government Service); certain income of visiting students, trainees, teachers, professors, and researchers under Articles 20 (Students) and 20A (Teachers); the income of diplomatic agents and consular officers under Article 28 (Diplomatic Agents and Consular Officers); and the beneficial tax treatment of pension fund contributions under paragraph 2 of Article 18 (Pension Schemes).

Green card holders are at a disadvantage compared to US citizens since they pay US taxes but do not have the same benefits under the treaty. HMRC say:

> HMRC explained that the UK was not obliged to give credit where the US taxed a green card holder on a world wide basis and the taxpayer was not tax resident in the US, but where we see a recharge to the US for US workdays we will accept the US has the primary taxing rights in the same way as for US citizens and we will give credit for the US tax paid on those US workdays by green cardholders. In the US a green card holder is debarred from claiming relief under a treaty. HMRC suggested that an individual who is taxed in the US on their world wide income because he retains his green card and so is treated as a resident of the US for the purposes of Article 1(4) even though they would be treaty resident in the UK may not have taken all reasonable steps to minimise their US liability, as required by s.795A ICTA if he were to qualify for credit relief. As such, although strictly Article 24(6) may not apply to green card holders in these circumstances, the effect of the minimisation requirement is that the UK will limit relief given in the UK under the treaty to that which would be given if Article 24(6) did apply. Representatives pointed out that giving up the green card might trigger expatriation taxes in the US.
>
> The HMRC position is that we will not give relief in the UK for tax paid in the US as a result of Article 1(4). We believe that the US will give unilateral relief for the UK tax paid on their income at least to the extent it arises in the UK so as far as we know this should not lead to double taxation although it could lead to higher tax payable in the US as a result of the alternative minimum tax provisions.[73]

73 *http://www.hmrc.gov.uk/consultations/expat-mins-160409.htm*

59.16 US/UK DTA: Fiscally transparent bodies[74]

Article 1(8) of the US/UK DTA provides:

> An item of income, profit or gain derived through a person that is fiscally transparent under the laws of either Contracting State shall be considered to be derived by a resident of a Contracting State to the extent that the item is treated for the purposes of the taxation law of such Contracting State as the income, profit or gain of a resident.

It is essential to have in mind which state is which; the paragraph is easier to follow if it is expanded to read:

> An item of income/gain derived through a person that is fiscally transparent under the laws of either Contracting State shall be considered
> [i] to be derived by a resident of the UK to the extent that the item is treated for the purposes of the taxation law of the UK as the income/gain of a resident of the UK and
> [ii] to be derived by a resident of the US to the extent that the item is treated for the purposes of the taxation law of the US as the income/gain of a resident of the US.

This is not in the OECD Model Treaty but it is in the US Model Income Tax Convention from 1996 and is now standard in US treaties.

If both the UK and the USA regard an entity as transparent (eg a partnership) then this provision is not needed, for (say) partnership income would in any event be regarded as income of the partners. The provision is needed for a hybrid entity, ie an entity which is regarded as transparent in one state but not in the other. The IRS explain:[75]

> Paragraph 8 addresses special issues presented by fiscally transparent entities such as partnerships and certain estates and trusts. In general, paragraph 8 relates to entities that are not subject to tax at the entity level, as distinct from entities that are subject to tax, but with respect to which tax may be relieved under an integrated system. This paragraph applies to any resident of a Contracting State who is entitled to income derived through an entity that is treated as fiscally transparent under the laws of either Contracting State. Entities falling under this description in the United States include partnerships, common investment trusts

74 See Wheeler, *The Missing Keystone of Income Tax Treaties* (2012) para 2.4.5 (Concluded treaties).

75 US Department of the Treasury Technical Explanation of the Convention, accessible *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

under section 584 and grantor trusts. This paragraph also applies to US limited liability companies ("LLCs") that are treated as partnerships for US tax purposes.
Under paragraph 8, an item of income, profit or gain derived by such a fiscally transparent entity will be considered to be derived by a resident of a Contracting State if a resident is treated under the taxation laws of that State as deriving the item of income.

The IRS give some examples:

[1] For example, if a UK company pays interest to an entity that is treated as fiscally transparent for US tax purposes, the interest will be considered derived by a resident of the US only to the extent that the taxation laws of the United States treats one or more US residents (whose status as US residents is determined, for this purpose, under US tax law) as deriving the interest for US tax purposes. In the case of a partnership, the persons who are, under US tax laws, treated as partners of the entity would normally be the persons whom the US tax laws would treat as deriving the interest income through the partnership.
[2] Also, it follows that persons whom the United States treats as partners but who are not US residents for US tax purposes may not claim a benefit for the interest paid to the entity under the Convention, because they are not residents of the United States for purposes of claiming this treaty benefit. (If, however, the country in which they are treated as resident for tax purposes, as determined under the laws of that country, has an income tax convention with the UK, they may be entitled to claim a benefit under that convention.)
[3] In contrast, if, for example, an entity is organized under US laws and is classified as a corporation for US tax purposes, interest paid by a UK company to the US entity will be considered derived by a resident of the United States since the US corporation is treated under US taxation laws as a resident of the United States and as deriving the income.
[4] The same result obtains even if the entity were viewed differently under the tax laws of the UK (e.g., as not fiscally transparent in the first example above where the entity is treated as a partnership for US tax purposes). Similarly, the characterization of the entity in a third country is also irrelevant, even if the entity is organized in that third country. The results follow regardless of whether the entity is disregarded as a separate entity under the laws of one jurisdiction but not the other, such as a single owner entity that is viewed as a branch for US tax purposes and as a corporation for UK tax purposes. These results also obtain regardless of where the entity is organized (i.e., in the United States, in the UK, or, as noted above, in a third country).

> [5] For example, income from US sources received by an entity organized under the laws of the United States, which is treated for UK tax purposes as a corporation and is owned by a UK shareholder who is a UK resident for UK tax purposes, is not considered derived by the shareholder of that corporation even if, under the tax laws of the United States, the entity is treated as fiscally transparent. Rather, for purposes of the treaty, the income is treated as derived by the US entity.
> [6] These principles also apply to trusts to the extent that they are fiscally transparent in either Contracting State. For example, if X, a resident of the UK, creates a revocable trust in the United States and names persons resident in a third country as the beneficiaries of the trust, X would be treated under US law as the beneficial owner of income derived from the United States. In that case, the trust's income would be regarded as being derived by a resident of the UK only to the extent that the laws of the UK treat X as deriving the income for UK tax purposes by application of the UK "settlor trust" rules.

An Exchange of Notes between the Governments of the UK and USA discusses the relation of para 1(8) (transparency) and para 1(4) (savings clause):

> *With reference to paragraph 8 of Article 1 (General scope)—*
> [1] it is understood that where an item of income, profit or gain is derived through a person which is a resident of a Contracting State the provisions of the paragraph shall not prevent that Contracting State from taxing the item as the income, profit or gain of that person.

The IRS continue:[76]

> [7] Paragraph 8 is not an exception to the saving clause of paragraph 4.[77] Accordingly, the notes confirm that paragraph 8 does not prevent a Contracting State from taxing an entity that is treated as a resident of that State under its tax law. For example, if a US LLC with UK members elects to be taxed as a corporation for US tax purposes, the United States will tax that LLC on its worldwide income on a net basis, without regard to whether the UK views the LLC as fiscally transparent. The portion of the notes relating to Article 24 (Relief from Double Taxation) provides rules for determining which Contracting State has the primary right to tax and which State must provide a credit in such circumstances.

---

76 US Department of the Treasury Technical Explanation of the Convention, accessible *http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

77 See 59.15.1 (US/UK DTA: Savings clause).

I do not find this easy to follow, but think one can draw out 6 examples from the 7 paragraphs of the IRS explanation (my numbering):

	Entity						**Resid. of person with interest in entity**			**For DT, item derived by:**		**IRS para**
eg no.	*Transparent*			*Resid, (if opaque)*		*example*	*UK*	*US*	*3rd state*	*person*	*entity*	
	in UK	in US	3rd state	in US								
1	n/r	y	n/r			p'ship		y		y		[1],[4]
2	n/r	y	n/r						y	n		[2],]4]
3	n/r	n	n/r	y		corp'n						[3],[4][78]
4	n					corp'n	y			n	y	[5]
5	y[79]					revoc. trust	y			y[80]		[6]
6	n[81]		n/r			revoc. trust	y			n[82]	n/r	[6]

The Exchange of Notes continues:

> [2] It is further understood that, where, by virtue of [para 1(8)],
> [a] an item of income, profit or gain is considered by a Contracting State to be derived by a person who is a resident of that Contracting State, and
> [b] the same item is considered by the other Contracting State to be derived [by that person or][83] by a person who is a resident of that other Contracting State,
>
> the paragraph shall not prevent either Contracting State from taxing the item as the income, profit or gain of the person considered by that State to have derived the item of income, profit or gain.

It is essential to have in mind which state is which; the paragraph is easier to follow if it is expanded to read:

> It is further understood that, where, by virtue of para 1(8),
> [a] an income/gain is considered by the UK to be derived by a person who is a resident of the UK, and

78 US will tax corporation under savings clause.
79 So far as s.624 applies.
80 So far as s.624 applies.
81 So far as s.624 applies.
82 So far as s.624 applies.
83 I do not understand the words in brackets and would be grateful to any reader who could explain.

[b] the same item is considered by the US to be derived by that person or by a person who is a resident of the US,

the paragraph shall not prevent

[i] the UK from taxing the item as the income/gain of the person considered by the UK to have derived the item;

[ii] the US from taxing the item as the income/gain of the person considered by the US to have derived the item.

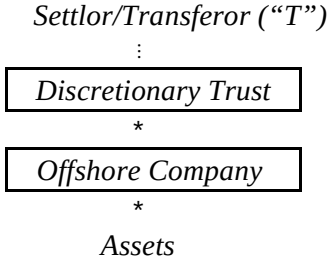
59.16.1 *Section 624, 720 income; s.13, 86 gains*

The Exchange of Notes continues:

> [3] It is further understood that, in applying [para 1(8)], the UK shall, exceptionally, regard an item of income, profit or gain arising to a person as falling within the paragraph where another person is charged to UK tax in respect of that item of income, profit or gain—
>
> (a) under [what is now s.624 ITTOIA & s.720 ITA]; or
>
> (b) under section [77][84] or 86, TCGA 1992.
>
> [4] It is further understood that, in applying the paragraph, a person shall be regarded as fiscally transparent under the laws of the UK in relation to an item of income, profit or gain where a charge is made on another person on that item either—
>
> (a) by virtue of section 13, TCGA 1992; or
>
> (b) because that other person has (or, under [what is now s.464 ITA[85]], is treated as having) an equitable right in possession in a trust.

Thus trusts within s.624 and companies within s.720 are regarded as fiscally transparent for IT; trusts within s.86 and companies within s.13 are regarded as fiscally transparent for CGT.

Take a standard structure:



84 [Author's note. Section 77 is now repealed.]

85 See 26.3.4 (Scots trusts).

Suppose:
(1) T is domestic-law UK resident but treaty-resident in the US.
(2) The entities are transparent for US tax so T regarded for US purposes as receiving OC's income.
(3) S.720 applies so T is taxed for UK tax purposes on OC's income
This is a straightforward case within example 1 of my table. For US/UK treaty purposes, T is treated as receiving OC's income.

59.16.2 *Relationship to art.24 (foreign tax credit)*

The Exchange of Notes continues:

> *With reference to Article 24 (Relief from double taxation)—*
> it is understood that, under paragraph 4 or 8 of Article 1 (General scope), the provisions of the Convention may permit the Contracting State of which a person is a resident (or, in the case of the United States, a citizen), to tax an item of income, profit or gain derived through another person (the entity) which is fiscally transparent under the laws of either Contracting State, and may permit the other Contracting State to tax
> (a) the same person;
> (b) the entity; or
> (c) a third person
> with respect to that item. Under such circumstances, the tax paid or accrued by the entity shall be treated as if it were paid or accrued by the first-mentioned person for the purposes of determining the relief from double taxation to be allowed by the State of which that first-mentioned person is a resident (or, in the case of the United States, a citizen), except that, in the case of an item of income from real property to which paragraph 1 of Article 6 (Income from real property) of the Convention applies, or a gain from the alienation of real property to which paragraph 1 of Article 13 (Gains) applies, the tax paid or accrued by the person who is a resident of the Contracting State in which the real property is situated shall be treated as if it were paid or accrued by the person who is a resident of the other Contracting State.

> (a) the person taxed by one State is the settlor or grantor of a trust; and
> (b) the person taxed by the other State is a beneficiary of that trust,
> the tax paid or accrued by the beneficiary shall be treated as if it were paid or accrued by the settlor or grantor for the purposes of determining the relief from double taxation to be allowed by the State of which that

> settlor or grantor is a resident (or, in the case of the United States, a citizen), except that, in the case of an item of income from real property to which paragraph 1 of Article 6 (Income from real property) of the Convention applies, or a gain from the alienation of real property to which paragraph 1 of Article 13 (Gains) applies, the tax paid or accrued by the person who is a resident of the Contracting State in which the real property is situated shall be treated as if it were paid or accrued by the person who is a resident of the other Contracting State.
> It is further understood that paragraphs 2 and 5 of Article 24 shall apply to such an item of income, profit or gain to the extent necessary to provide relief from double taxation.

In *Anson* income arose to a LLC which was transparent for US purposes but not for UK purposes. The income was distributed to a UK resident shareholder. I would have thought that this was clearly a case where the exchange of notes should have applied. HMRC do not agree, arguing that the taxpayer should suffer US tax and UK tax without the benefit of any DT relief. Unfortunately the Court of Appeal refused to consider the point (on the grounds that the taxpayer failed to raise it soon enough[86]) so the law is at present unresolved.

59.16.3 *US partnerships and LLCs*

In the Double tax guidance note 3: Partnerships and LLCs claiming relief under the 2002 UK/USA DTC, HMRC say:

> **How the DTC treats US partnerships and LLCs**
> [HMRC set out Art.1(8) of the DTC and continue:] A transparent concern itself is therefore not given the right to found a claim for relief.

The reason that a transparent entity does not claim DT relief is that it is

---

86 [2013] STC 557 at [92]:

> "There is clearly some dispute as to the mischief to which the exchange of notes is directed. There would have to be further evidence to resolve that dispute."

The view that a Court hears evidence to resolve a dispute about the scope of a DTA is unconventional. But perhaps it is better that the CA did not address the point, as they did not seem very sympathetic to the taxpayer, continuing:

> "Moreover, the words "with respect to that item", ... are, on the face of it, consistent with Mr Ewart's principal submission that no change is made in the requirement for the profits taxed in each jurisdiction to be the same profits in order to qualify for DTR. If an alteration to article 23 was intended, it is surprising that it was dealt with in this oblique way."

This will need to be reviewed when the case is final.

not "liable to tax" in a state which regards it as transparent, and so is not treaty-resident in that Contracting State.[87]

> Instead, that right is given individually to those 'qualifying persons' defined by the General Definitions Article [4][88]; and as further qualified by the Limitation on Benefits Article [23][89], who have derived their beneficial entitlement to income, profit or gain through their participation in the transparent concern.[90]

The text throughout erroneously refers to "qualifying persons"; the correct term is *qualified* persons. HMRC continue with a concession:

> **What this would mean for partners and LLC members**
> Strictly speaking, HMRC should accept claims only from those partners and members who themselves fall to be regarded as 'qualifying persons' in their own right.
> In practice, this would mean as many separate claims for one item of UK-source income paid to a transparent concern such as a partnership or LLC[91] as there are beneficial owners to whom it is then being paid on or distributed.
> HMRC recognises that applying the DTC provisions in such a literal way would be unwelcome to its customers and could possibly hamper the business interests of both countries. It would be a retrograde step in customer service terms, and would not be justified on either an assessment of risk to the UK Exchequer or on compliance grounds. HMRC wants to keep a proper balance between the ease with which US residents should be able to claim relief with the administrative procedures and paperwork that must be employed by the UK Revenue to verify and give effect to such a claim.
> **HMRC's approach to partnerships and LLCs**
> Accordingly, HMRC intends to continue its previous practice of taking claims in the names of both partnerships and LLCs.
> These concerns should use the form US/Company 2002, and should provide (as before) a list of the names and addresses of the partners or members, with details of their respective shares of income. This is covered by the second bullet of the form's own Guidance Note 2.
> This form is tailored for use by the majority of those non-individual businesses and concerns which are covered by detailed provisions of the DTC - most notably by the Limitations on Benefit Article 23, which lays down very specific

---

87 See 6.15 (Treaty-residence: Partnerships); 84.25.3 (Treaty-residence of LLC and S-Corp).

88 The original erroneously refers to article 3.

89 The original erroneously refers to article 27.

90 HMRC add: "It will be noted that this is not so very different from the situation that obtained under Article 4(1)(b)(i) of the 'old' 1980 DTC." I am not sure about that, but the point does not now arise.

91 The Manual is considering a LLC which is transparent under US law.

tests for defining the 'qualified persons' who can benefit under the treaty. There is therefore no separate section for transparent concerns such as partnerships or LLCs.

What partnerships and LLCs are asked to do

HMRC Residency ask partnerships and LLCs to complete the US/Company 2002 as follows

* Parts A and B in full
* Part C in full, as appropriate
* Part D if repayment of UK tax is claimed
* Part E if appropriate
* Part F in full, with the general or managing partner/member signing the declaration
* With the additional details as requested in the US-Company 2002 Notes, which is part of the claim form.

Claimants are also free to attach any statement or schedule in support of the claim, as they believe would help explain their circumstances or the basis of the claim.

What HMRC will do

HMRC will consider the replies to all the above, and the information supplied. Consistent with previous practice, where the facts allow the reasonable conclusion that all beneficial owners of the income for whose shares relief is being claimed are 'qualifying persons' within the meaning of the DTC, then HMRC will process things in the normal way. This will more often than not involve a reference to the tax office for the UK payer, under normal internal liaison arrangements.

If the information given in with the claim form does not allow this conclusion, considering in particular the tests set out in Article 23, HMRC will probably have to contact claimants with further specific questions and requests for information before it can consider finalising processing of things.

HMRC do not want to add to the time taken to resolve matters. Where possible, it will start processing the claim, on a 'without prejudice' basis and pending satisfactory conclusion of any correspondence.

HMRC will be as quick as possible, with due consideration for customers' business needs, and with sympathy and understanding for any compliance difficulties that the process might cause them.

As with any claim, letting HMRC have an advance copy of the form US/Company 2002 (at the time it is submitted to the IRS for certification) may allow it to flag up any points of difficulty at an early stage, and opens up the possibility of anticipating what is needed or might be done before the certified form arrives.

No doubt some high level lobbying has taken place. In relation to claims for relief from deduction at source, HMRC say (inconsistently) that they adopt a strict approach.[92]

92 See 18.17.8 (Relief when borrower is a partnership).

59.17 "Subject to tax"

Some treaties provide exemption for income which is "subject to tax". This is not in the OECD Model, and only survives in a diminishing number of treaties, but for instance Art. VI (Interest) of the Greece/UK treaty provides:

> Any interest or royalty derived from sources within one of the territories by a resident of the other territory, *who is subject to tax in that other territory in respect thereof* and does not carry on a trade or business in the first territory through a permanent establishment situated therein, shall be exempt from tax in that first territory.

The issue may arise whether income is subject to UK tax in order to qualify for a foreign DT exemption; and the issue may arise whether income is subject to foreign tax in order to qualify for UK DT exemption.. The former issue would ultimately be decided by foreign tax authorities and courts, but the HMRC view of what counts as subject to UK tax may well represent an international consensus.

The INTM Manual provides:

> **INTM332210 - Double Taxation applications and claims - Subject to tax: Background** [January 2012]
> The expression "subject to tax" usually means that the person must actually pay tax on the income in their country of residence.
> However, a person is still regarded as "subject to tax" if, for example, he or she does not pay tax because their income is sufficiently small that it is covered by personal allowances that are available to set against liability to tax in the other country.
> A person is not regarded as "subject to tax" if the income in question is exempted from tax because the law of the other country provides for statutory exemption from tax. For example
> - the income is that of a charity
> - the income is that of an exempt approved superannuation scheme (pension fund).
>
> In such cases the "subject to tax" condition is not met and relief is not allowable.

In *Weiser v HMRC*[93] the tribunal agreed with this passage.

---

93 [2012] UKFTT 501 (TC) at [38]. Similar points are made in INTM 162020. 'Subject to tax' [January 2014].

Similarly, in the context of the lower-paid employee exemption, the RDR Manual provides:

> **32070 - Remittance Basis: Accessing the remittance basis: Claiming the remittance basis: Calculation of income tax liability - exemption for non-domiciles with small amounts of foreign employment income** [June 2010]
> *...Subject to Foreign Tax*
> Although 'subject to a foreign tax' might in some circumstances mean that the individual has actually paid some tax on the foreign income to a foreign tax authority, actual payment is not a necessary requirement to take advantage of this exemption.
> For example, given the levels of foreign income involved there might be nothing due to be paid on part or all of the income, as a result perhaps of a foreign countries' own personal allowances systems, or similar tax provisions which are akin to such allowances, such as a tax rate band of 0 per cent. Such income would still be considered to be 'subject to a foreign tax' in the context of this exemption.

In *Weiser v HMRC* [2012] UKFTT 501 (TC) the appellant (not represented by counsel) claimed relief under Article XI(2) of the UK/Israel Treaty which provides:

> Any pension ... derived from sources within the United Kingdom by an individual who is a resident of Israel and subject to Israel tax in respect thereof, shall be exempt from United Kingdom tax.

The taxpayer was treaty-resident in Israel but unfortunately qualified for an Israel tax exemption which applied to foreign source income of new residents for a 10 year period. The pension income was held not "subject to tax" in Israel, so the DT exemption did not apply. The decision contains a helpful analysis of the relevant law:

> 22. ... There is, [Counsel for HMRC] submitted, an internationally recognised distinction ... which gives the expression "liable to tax" a broader meaning that the expression "subject to tax". She argued that "liable to tax" is understood to require only an abstract liability to taxation on income in the sense that a contracting state may exercise its right to tax the income in question (whether or not the exercise of that right actually results in an amount of tax becoming payable). "Subject to tax", on the other hand, requires income actually to be within the charge to tax in the sense that a contracting state must include the income in question in the computation of the individual's taxable income with the result that tax will ordinarily be payable subject to

deductions for allowances or reliefs, etc....

24. An Australian case, *Emanuel v Federal Commissioner of Taxation* [1968] HCA 57, concerned the Australia/UK double tax treaty. ... Under the treaty, [the rate of tax on dividends] was reduced to 15% in the case of such dividends to a UK resident "who is subject to United Kingdom tax in respect thereof". The UK resident recipient was not domiciled in the UK, and so, although generally within the scope of UK tax as a resident, was chargeable on income from non-UK sources only to the extent that the income was remitted to the UK. The dividends had not been so remitted.

25. In the High Court of Australia, Windeyer J held that the taxpayer was not entitled to the reduced rate of withholding tax. He said (at [15]):

> "The present case has, as I have said, proceeded on the basis that the taxpayer is not domiciled in the United Kingdom – and that he is treated as having satisfied the Commissioners of Inland Revenue of that fact. Therefore in respect of the dividends in question the 'remittance' basis would apply. Therefore, in my opinion, unless and until they be remitted and received by him in the United Kingdom he is not "subject to United Kingdom tax in respect thereof". These words I think describe a present liability of a person to tax, not the character of income in respect of which he will if it comes to him in the United Kingdom in the future incur then a liability to tax"

26. In *General Electric Pension Trust v Director of Income-tax (International Taxation)* Mumbai (2005) 8 ITLR 1053, the Indian Authority for Advance Rulings held that a pension fund which was exempt from tax in the US under US tax law was not "subject to tax" in the US and so could not fall within the meaning of "resident of a Contracting State" as that was defined for a trust under the US/India double tax treaty. After describing the relevant provision, under which in the case of income derived or paid by a trust the term 'resident of a Contracting State' applied only to the extent that the income derived by the trust (which would have to be liable to tax by reason of residence or another relevant criterion in the State in question) was in addition subject to tax in that State as the income of a resident either in its own hands or in the hands of the beneficiaries, Syed Shah Mohammed Quadri J said (at p 1061):

> "It is worth pointing out that the phrase 'liable to tax' in para (1) and the phrase 'subject to tax' in proviso (b) are not synonymous. If both were read to be synonymous, proviso (b) would become otiose. Whereas para (1) speaks of being in the tax net, proviso (b) speaks of actual taxation."

> [The judge considered various academic articles, and continued]
> 34. In my view, consist with what I regard as the purpose of the treaty in this regard, the ordinary meaning of Art XI(2) is that pension income derived from UK sources is only exempt from UK tax if that income is chargeable to Israel tax such that Israel tax will ordinarily be payable in respect of that income, subject to deductions for allowances and reliefs, etc. This follows from the distinction that must in my view be drawn between the use, in double tax treaties, of the expressions "liable to tax" and "subject to tax", and also by the requirement, under Art XI(2), that the individual concerned should not only be a resident of Israel (that is, resident in Israel for the purposes of Israel tax), but should be subject to tax in respect of the relevant income. The reference to that income in this context clearly distinguishes this provision from one which requires that the individual fall within the scope of a State's taxation generally. This provision is not concerned with the status of the individual, but with the chargeability to tax of the specific income. Income which is exempted from taxation cannot during the currency of that exemption be income in respect of which an individual can be said to be subject to tax.

Under the OECD model wording (lacking the words "subject to tax") treaty relief would apply.[94]

94 See 24.7 (Double Taxation relief for pension income).

CHAPTER SIXTY

EU LAW AND UK TAXATION

60.1 EU law and UK taxation: Introduction

This chapter considers the effect of EU law on UK tax law. A full discussion would volumes. Many such books have been written; as the issues are EU wide, we benefit in the UK from the work of scholars across the EU. This chapter focuses on matters closest to the themes of this work, but I begin with some more general comments which the more impatient reader may wish to skip.

Under the Lisbon Treaty (in force 2009), the Treaty Establishing the European Community is now named: the Treaty on the Functioning of the European Union (TFEU). The numbering of the treaty has changed twice, once following the Treaty of Amsterdam (1999) and again after the Treaty of Lisbon. It may be helpful to set out the former and present numbers of the articles discussed here:[1]

Subject	**Original version**	**Amsterdam version** (1999)	**TFEU** (2009)	**EEA agreement**
Freedom of establishment	52	43	49	31
– public policy exception	55	45	51	32
– for companies	58	48	54	34
Free movement of capital	73b	56	63	40
– standstill	73c	57	64	41
– justification	73d	58	65	42

1 For a table comparing all 3 numberings see *http://global.oup.com/uk/orc/law/eu/hartley7e/resources/table.*
For a comparison of the pre and post Lisbon numbering, see the FCO "A Comparative Table of the Current EC and EU Treaties as Amended by the Treaty of Lisbon" Cm7311.
http://www.official-documents.gov.uk/document/cm73/7311/7311.pdf.

Most of the EU rules discussed here also apply under the EEA agreement; in the interests of brevity, and comprehensibility, references in this chapter to TFEU include the EEA agreement; and references to a member state (MS) include EEA states.

60.1.1 *Cross references*

The following issues are discussed elsewhere:
8.9 (EU restriction on exit taxes)
28.15 (ToA EU law defence)
For further reading, see Terra & Wattel, *European Tax Law* (6th ed., 2012) and Mullan & Brown, *The Interaction of EU Treaty Freedoms and the UK Tax Code* (1st ed., 2011).

60.2 Relationship of EU law and UK law

The primacy of EU law over UK domestic law hardly needs to be stated, but to begin at the beginning: in *Thoburn v Sunderland City Council*, Laws LJ stated the fundamental proposition:

> All the specific rights and obligations which EU law creates are by the 1972 Act[2] incorporated into our domestic law and rank supreme: that is, anything in our substantive law inconsistent with any of these rights and obligations is abrogated or must be modified to avoid the inconsistency. This is true even where the inconsistent municipal provision is contained in primary legislation.[3]

Similarly:

> [24] ...it is a fundamental principle of the law of the EU, recognised in s 2(1) of the European Communities Act 1972, that if national legislation infringes directly enforceable Community rights, the national court is obliged to disapply the offending provision. The provision is not made void but it must be treated as being ... without prejudice to the directly enforceable Community rights of nationals of any member state of the EEC.

---

2 The reference is to s.2 European Communities Act 1972 which provides:
"All such rights, powers, liabilities, obligations and restrictions from time to time created or arising by or under the Treaties, and all such remedies and procedures from time to time provided for by or under the Treaties, as in accordance with the Treaties are without further enactment to be given legal effect or used in the UK shall be recognised and available in law, and be enforced, allowed and followed accordingly."

3 [2003] QB 151 at [69].

> [25] Disapplication is called for only if there is an inconsistency between national law and EU law. In an attempt to avoid an inconsistency the national court will, if at all possible, interpret the national legislation so as to make it conform to the superior order of EU law ... Sometimes, however, a conforming construction is not possible, and disapplication cannot be avoided.[4]

60.2.1 *Relationship between UK tax law and EU law*

It follows that there is a "tension, if not an inconsistency between national jurisdiction over direct taxation and EC Treaty freedoms, once those freedoms are interpreted as prohibiting unjustified differential tax treatment of national and foreign EU companies."[5] This area of law raises important questions about the boundaries of market integration and state autonomy.

Settled case law puts it this way:

> although direct taxation falls within the competence of the Member States, the latter must none the less exercise that competence consistently with Community law.[6]

60.2.2 *CJEU case law*

CJEU case law is unlike case law in common law jurisdictions such as the UK.[7]

The CJEU gives one short, single judgment. Those who find these judgments sometimes difficult to follow may take comfort from the words of Lord Neuberger:

> One only has to look at some of the Judgments of the CJEU in Luxembourg to see how compulsory unanimity can result in decisions which (i) are incomprehensible, (ii) have internally inconsistent reasoning, (iii) do not answer the issue that has been referred, or (iv) manage to enjoy all these three regrettable characteristics. (And in these Euro-sensitive times, let me add that there are also some very good judgments emanating from Luxembourg, which are all the more impressive because of the straightjacket imposed by the requirement of

---

4 *Fleming (trading as Bodycraft) v HMRC* [2008] STC 324.

5 *Thin Cap Claimants v HMRC* [2011] STC 738 at [7].

6 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439 at [15].

7 In this respect Scotland is like a common law jurisdiction.

compulsory unanimity).[8]

CJEU judgments contain a series of short, broad propositions, mostly repeated verbatim from earlier cases. Once repeated often enough, the propositions are described as "settled case-law." It is best to quote this verbatim. The selection of case(s) to cite as authority for these propositions is therefore somewhat arbitrary; one cannot cite them all.

Earlier cases are cited by name but never considered in detail.

The language of the TFEU is different from UK statutory drafting, and states broad principles with vague evaluative terms which give the CJEU freedom to develop its own principles. There is little consideration of the precise words of the TFEU. Decisions are based on policy considerations to a greater extent than is the case, or at least than is expressed to be the case, in common law:

> ... the Court adopted teleological methods of interpretation. These methods are much closer to those of constitutional courts than to those of international tribunals. Far from keeping to the real or supposed intention of the contracting parties - a compulsory point of reference in the interpretation of international agreements - the judges frequently drew inspiration from the ultimate objective of integration, outlined in broad terms in the preamble of the Treaty. ... The idea is to link each provision of EU law to the normative goals of integration, giving to these provisions the coherence of a complete system of law. Basically, all the interpretative work of the Court was to create a "European teleology" which protects EU law against the dangers of dissolution within the various national legal orders. In constitutionalising EU law, the Court was seeking to protect EU standards from the national legal constrains, the risks of political negotiations, and all the bureaucratic complexities that EU texts are likely to encounter when they enter the national arena. This case law greatly strengthened the authority of EU law, while at the same time giving the EU judge an absolute control of this new legal order.[9]

---

8 Lord Neuberger, First Annual BAILII Lecture "No Judgment – No Justice" (2012) *http://www.supremecourt.uk/docs/speech-121120.pdf*. HMRC make the same point in the ToA draft guidance:

"**INTM603140 Genuine transactions exemption: EU law implications**

... Its judgments are in any case often hard for those familiar with UK law to follow, as they are collegiate and sparingly argued."

9 Jones, Menon and Weatherill (eds), *The Oxford Handbook of the European Union* (1st ed, 2012), para 25.2 (the Constitutionalization of the Treaties).

This is tempered with an element of political realism:

> Turning to national governments, it has been suggested that their overall acceptance of the European Court's jurisprudence could be viewed as a clue that judicial behavior was perhaps more concerned with political interests than it might seem at first sight. On this realist reading, because courts are concerned about the prospect of non-compliance or possible hostile reactions, they tend to calculate how far they can go without eliciting too costly a reaction from politicians. ... But there is no shortage of evidence that it is at times willing to challenge the dominant view amount governments. Its landmark rulings in *Van Gend and Loos*[10] and *Costa v ENEL*[11] were taken despite the declared opposition of a majority of states...

The EC maintain a useful updated list of CJEU cases relating to direct taxation.[12] New case law is constantly arriving, and almost all this chapter needs review from year to year.

60.2.3 *EU law terminology*

Judgments are translated into English, so the prose is unidiomatic. Since the usage is consistent, EU law has acquired its own vocabulary, which may be regarded as technical language, virtually a sub-dialect of legal English.[13] I refer to this usage as **"technical EU law terminology"**. It is

and by policy area:
http://ec.europa.eu/taxation_customs/common/infringements/infringement_cases/bypolicy/index_en.htm

13 Monoglot English readers should not carp. French was used by English lawyers until an Act of 1731, but by 1592 the pronunciation was such that it was impossible for a Frenchman to understand, and "even Englishmen were sometimes shocked by the barbarity of inns of court French"; see Baker, "The Three Languages of the Common Law" (1998) 43 McGill LJ 5
http://www.lawjournal.mcgill.ca/userfiles/other/5850855-43.Baker.pdf

not possible to analyse EU law without adopting this terminology.

There are occasional errors of translation, though the border between technical usage and erroneous usage can be difficult to draw. EU law terminology becomes second nature to those immersed in it, and it is then difficult to step back and notice how the usage has become detached from ordinary English.

The terminology used to describe European treaties and institutions can also be confusing. I follow the guidance in "The European Union: a guide to terminology, procedures and sources".[14]

60.3 The treaty freedoms

Article 26 TFEU provides:

> 1. The Union shall adopt measures with the aim of establishing or ensuring the functioning of the internal market, in accordance with the relevant provisions of the Treaties.
> 2. The internal market shall comprise an area without internal frontiers in which the free movement of goods, persons, services and capital is ensured in accordance with the provisions of the Treaties.

The basic treaty provisions which facilitate the single market, the free movement of goods, services, persons and capital, are sometimes known as the four freedoms. The freedoms which most concern this chapter are freedom of establishment (FoE) and free movement of capital (FMC).

A case could generally be brought under more than one freedom, but it is settled law that CJEU picks the primary freedom and ignores the others. For instance, in *Geurts* (a FoE case) the Court dismissed arguments based on free movement of capital:

> The legislation at issue in the main proceedings primarily affects freedom of establishment and falls, in accordance with the case-law of the Court, within the scope only of the Treaty provisions concerning that freedom. If, as submitted by the applicants in the main proceedings, it were to be accepted that such a national measure has restrictive effects on the free movement of capital, such effects would have to be seen as

---

Reading in translation, said Bialek, "is like kissing a woman through a veil".

14 House of Commons Library Standard Note SN/IA/3689. See *http://www.parliament.uk/briefing-papers/sn03689.pdf* *http://www.parliament.uk/business/publications/research/briefing-papers/SN03689/the-european-union-a-guide-to-terminology-procedures-and-sources-house-of-commons-background-paper*.

> an unavoidable consequence of any restriction on freedom of establishment and do not justify an independent examination of that measure in the light of Articles 56 EC to 58 EC [FMC].[15]

Similarly in *Cadbury Schweppes* (a FoE case) the Advocate General dismissed arguments based on freedom to provide services:

> 34 The applicants submit that the provisions of the Treaty on freedom to provide services also apply in this case. They claim that the legislation at issue makes the supply of financial services by [the CFCs] to their UK resident parent company more difficult. ...
> 35. I am not convinced by the applicants' argument....
> 36. Admittedly, if the legislation at issue has the result that a resident company is dissuaded from establishing a subsidiary in another Member State, it also has the result that the supply of services by such a subsidiary out of that Member State is prevented. However, that latter restriction is a consequence of the hindrance to establishment. In the present case, it is exactly the freedom to establish a subsidiary in that Member State which is at the core of the proceedings. I do not therefore see the relevance of reliance on the rules on freedom to provide services as well.[16]

This approach has the attraction of shortening the arguments.

60.3.1 *FoE or FMC: does it matter?*

It will generally make no difference which freedom is said to apply. The defences to different freedoms are differently worded, but being so policy based, they generally come to the same. In *Asscher*[17] after discussing whether a case should be categorised as FoE or FMC, the ECJ said:

> 29. ... a comparison of arts 48 and 52 of the Treaty shows that they are based on the same principles both as regards entry into and residence in the territory of the member states by persons covered by Community law and as regards the prohibition of all discrimination against them on grounds of nationality. The same applies to the pursuit of an economic activity in the territory of the member states by persons covered by Community law.[18]

15 *Geurts v Administratie van de BTW* Case C-464/05 at [16].

16 *Cadbury Schweppes v IRC* [2006] STC 1908.

17 *Asscher v Staatssecretaris van Financiën* [1996] STC 1025.

18 The Court cited *Ramrath v Ministre de la Justice* (Case C-106/91) [1992] ECR I-3351 at 3381–3382, para 17.

Similarly the Advocate General in *Cadbury Schweppes*:

> In any event, I do not believe that examination of the legislation at issue in the light of that freedom, in addition to freedom of establishment, can change the result of my analysis.[19]

One important difference is that FoE applies only to Member States, but FMC extends to non-EU countries.

Scheunemann[20] concerned a German IHT business property relief. This relief applied to companies with a registered office or principal place of business in the EU. The testator died holding a shareholding of a Canadian company. It did not qualify for the relief as it did not have a registered office or principal place of business in the EU. This was held to be a FoE case, not a FMC case, so the taxpayer was not successful:

> 23 ... according to settled case-law,
> [1] national legislation which is intended to apply only to shareholdings enabling the holder to exert a definite influence over a company's decisions and determine its activities is covered by the Treaty provisions on freedom of establishment.
> [2] On the other hand, national provisions which apply to shareholdings acquired solely with the intention of making a financial investment, with no intention of influencing the management and control of the undertaking, must be examined[21] exclusively in the light of the free movement of capital.[22]

The question then is how large a shareholding is needed to confer a "definite influence". 25% is sufficient:

> 24 It follows that, in order to determine which freedom the national legislation at issue in the main proceedings falls under, it is necessary to examine whether the shareholding referred to in that legislation is sufficient to enable the shareholder to exert a definite influence over the company's decisions and to determine its activities.

---

19 *Cadbury Schweppes v IRC* [2006] STC 1908 at[36].

20 *Scheunemann v Finanzamt Bremerhaven* Case C-31/11 (2012).

21 The Court refers to Case C-464/05 *Geurts v Administratie van de BTW* Case C-464/05 at [16].[2007] ECR I-9325, para 16.

22 The Court refers to *Haribo Lakritzen Hans Riegel and Österreichische Salinen,* para 35.

> 25 In the case under consideration, ... the possibility of receiving the tax advantages at issue is conditional upon having a direct holding of more than one quarter of the capital of the company....
> 29 It should accordingly be noted that, for the purposes of granting the tax advantages at issue in the main proceedings, the German legislature specified a shareholding threshold so high that the shareholder in the capital company is able to influence its management and control, and imposed conditions designed to ensure that the shareholder does not intervene solely with the intention of making a financial investment.
> 30 It should therefore be held that the legislation at issue in the main proceedings primarily affects freedom of establishment and that, in accordance with the case-law of the Court, it falls solely within the scope of the Treaty provisions concerning that freedom. If it were to be found that such a national measure has restrictive effects on the free movement of capital, those effects would have to be seen as an unavoidable consequence of a restriction on freedom of establishment and would not justify an independent examination of that measure in the light of the Treaty provisions on the free movement of capital.

In *Proceedings brought by Aberdeen Property Fininvest Alpha Oy*[23] a 20% threshold was regarded as sufficient.[24]

On the other hand, 10% is too low. The Advocate General said in *Columbus Container Services*:[25]

> 52. ... one of the facts giving rise to application [the relevant legislation] is the shareholding by a German taxpayer of at least 10% in the permanent establishment. In principle, it would seem that a holding of this size would preclude the possibility of exercising definite influence over the company's decisions and determining its activities.

Connected person rules are recognised which may aggregate small shareholdings into one conferring definite influence:

> 55. ...not only is Columbus controlled by at least six natural persons belonging to the same family, each of them having a 10% shareholding in the establishment concerned, but, in particular, those persons ... act together and are represented by a single person at the general meeting

23 [2009] STC 1945.

24 Also see *Thin Cap Group Litigation v IRC* [2007] STC 906 at [28] to [33] where UK thin capitalisation rules passed this test.

25 *Columbus Container Services v Finanzamt Bielefeld-Innenstadt* [2008] STC 2554.

> of the partners. Those eight partners therefore appear to be in a position to exercise, collectively, definite influence over Columbus's decisions. In that context, the possible infringement of the right of free movement of capital is merely a consequence of the alleged restriction on freedom of establishment.

This would only apply to well-targeted connected person rules, where the connected persons may be regarded as "acting together". Some aspects of the UK connected person rules are wildly extravagant[26] and would not meet this requirement.

60.4 Freedom of establishment

Article 49 TFEU provides:

> [1] Within the framework of the provisions set out below, restrictions on the freedom of establishment of nationals of a Member State in the territory of another Member State shall be prohibited.

Article 49 contains two prohibitions:

(1) A MS cannot restrict a national of another MS (foreign nationals) from setting an establishment in the MS.
(2) A MS cannot restrict its *own* nationals from establishing themselves in another MS (a foreign MS).

The second is the more important in a tax context.

60.4.1 *What is "establishment"?*

Article 49 TFEU continues:

> [2] Such prohibition shall also apply to restrictions on the setting-up of agencies, branches or subsidiaries by nationals of any Member State established in the territory of any Member State.
> [3] Freedom of establishment shall include
> [a] the right to take up and pursue activities as self-employed persons and
> [b] to set up and manage undertakings, in particular companies or firms within the meaning of the second paragraph of Article 54,
> under the conditions laid down for its own nationals by the law of the country where such establishment is effected, subject to the provisions of the chapter relating to capital.

---

26 See 85.7.3 (Commentary: An excessively wide definition).

The CJEU said in *Columbus Container Services*:[27]

> 30. ... according to [settled] case law, the acquisition by one or more natural persons residing in a member state of all the shares in a company registered in another member state, conferring on those persons definite influence over the company's decisions and allowing them to determine its activities, is thus covered by the Treaty provisions on the freedom of establishment.[28]

As to whether a trust is an "undertaking" see Weber, *Tax Avoidance and the EC Treaty Freedoms, Kluwer Law International*, (2005), p.27. The enactment of the EU law defences to the ToA rules effectively concede that a trust is an undertaking.

In *Stauffer*[29] an Italian charity (tax exempt in Italy) received rent from an investment property in Germany. German law allowed charity tax exemption only for charities established in Germany. Accordingly the German Revenue sought to impose German tax on the rental income.

The ECJ held that there was no breach of freedom of establishment:

> 19 ... in order for the provisions relating to freedom of establishment to apply, it is generally necessary to have secured a permanent presence in the host Member State and, where immovable property is purchased and held, that property should be actively managed. It is clear from the account provided by the national court that the foundation does not have any premises in Germany for the purposes of pursuing its activities and that the services ancillary to the letting of the property are provided by a German property management agent.
> 20. It must therefore be concluded that the provisions governing freedom of establishment are not applicable in circumstances such as those in the dispute in the main proceedings.

The charity did not carry out any charitable work in Germany and did not actively manage its German investment property. The German property was not an agency, branch, subsidiary or undertaking. The charity did not

---

27 *Columbus Container Services v Finanzamt Bielefeld-Innenstadt* [2008] STC 2554.

28 The AG cites *Baars v Inspecteur der Belastingen Particulieren/Ondernemingen Gorinchem* (Case C-251/98) [2000] ECR I-2787, paras 21 and 22, *Uberseering BV v Nordic Construction Co Baumanagement GmbH* (NCC) (Case C-208/00) [2005] 1 WLR 315, [2002] para 77.

29 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439.

have or seek to have an "establishment" in Germany so there was no restriction on the freedom to establish itself in Germany.[30]

Suppose the foundation had had an establishment in Germany – for instance if it ran a college there or provided services to its tenant rather than using a German property management agent. In that case it would have had an establishment in Germany. Assuming Germany would have denied the charity exemption, would it then have succeeded under this head? Since it succeeded under free movement of capital, the point seems somewhat academic.

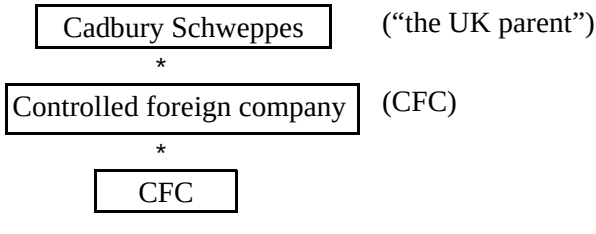
60.4.2 *The objective of FoE*

In *Cadbury Schweppes v IRC*[31] the ECJ say:

> 53. That objective [of FoE] is to allow a national of a member state to set up a secondary establishment in another member state to carry on his activities there and thus assist economic and social interpenetration within the Community in the sphere of activities as self-employed persons.[32] To that end, freedom of establishment is intended to allow a Community national to participate, on a stable and continuing basis, in the economic life of a member state other than his state of origin and to profit therefrom.[33]

60.4.3 *What is a restriction on freedom of establishment?*

Cadbury Schweppes v IRC [2006] STC 1908 concerned a simple corporate structure:



30 It seems to me that there was a restriction of the taxpayer's freedom to establish itself *outside* Germany. Because the taxpayer was established in Italy, it incurred a German tax burden which would not have been paid if it had been established in Germany. However the argument was not put on this basis and the ECJ did not consider it. Perhaps it could have responded that the main issue was FMC and not FoE.

31 *Cadbury Schweppes v IRC* [2006] STC 1908.

32 The ECJ cite *Reyners v Belgium* (Case 2/74) [1974] ECR 631, para 21.

33 The ECJ cite *Gebhard v Consiglio dell'Ordine degli Avvocati e Procuratori di Milano* (Case C-55/94) [1995] ECR I-4165, para 25.

The ECJ summarised the UK CFC legislation thus:

> 44 Where the resident company has incorporated a CFC in a Member State in which it is subject to a lower level of taxation within the meaning of the legislation on CFCs, the profits made by such a controlled company are, pursuant to that legislation, attributed to the resident company, which is taxed on those profits. Where, on the other hand, the controlled company has been incorporated and taxed
> [1] in the UK or
> [2] in a State in which it is not subject to a lower level of taxation within the meaning of that legislation,
> the latter is not applicable and, under the UK legislation on corporation tax, the resident [parent] company is not, in such circumstances, taxed on the profits of the controlled company.

The CFC legislation distinguished between UK and other EU companies, but it is not self-evident that it *restricted* the UK parent's FoE. However the ECJ held that it did:

> 45 That difference in treatment creates a tax disadvantage for the resident [parent] company to which the legislation on CFCs is applicable. Even taking into account ... the fact ... that such a resident company does not pay, on the profits of a CFC within the scope of application of that legislation, more tax than that which would have been payable on those profits if they had been made by a subsidiary established in the UK, the fact remains that under such legislation the resident [parent] company is taxed on profits of another legal person. That is not the case for a resident company with
> [1] a subsidiary taxed in the UK or
> [2] a subsidiary established outside that Member State which is not subject to a lower level of taxation.
> 46 ... the separate tax treatment under the legislation on CFCs and the resulting disadvantage for resident companies which have a subsidiary subject, in another Member State, to a lower level of taxation are such as to hinder the exercise of freedom of establishment by such companies, dissuading them from establishing, acquiring or maintaining a subsidiary in a Member State in which the latter is subject to such a level of taxation. They therefore constitute a restriction on freedom of establishment within the meaning of Articles [49 & 54 TFEU].

The CFC rules only applied to companies in some member states, namely, those subject to a lower level of taxation (as defined). Because of this selective operation the CFC rules clearly restricted FoE, since given the

choice in siting a subsidiary in:
(1) a MS with a lower level of taxation or
(2) a MS with a higher level of taxation (but less than the UK)
one would in principle prefer the latter. But the point made at 44[1] and 45[1] shows that the CFC rules would restrict freedom of establishment even if they applied to every MS, regardless of the level of taxation just because they did not apply to a UK subsidiary. At first sight that seems surprising. The OECD express the same view:

> While CFC rules in principle lead to inclusions in the residence country of the ultimate parent, they also have positive spillover effects in *source countries* because taxpayers have no (or much less of an) incentive to shift profits into a third, low-tax jurisdiction.[34]

The income of the CFC is subject to foreign tax as well as UK tax. Although UK tax allows a credit for the foreign tax, the burden of dealing with two tax systems is a significant one.[35] That might be a deterrent against a UK parent establishing a CFC in any other MS. But that is not the basis of the court's decision.

60.4.4 *Generalising from CFCs to other anti-avoidance rules*

The CFC legislation attributes income of a non-resident to a UK resident. The attribution of income or gains of a non-resident to a UK resident is a feature of many UK anti-avoidance rules.

60.4.5 *Who is entitled to freedom of establishment?*

Article 49 confers FoE on"nationals of a Member State" ie non-nationals do not have FoE. If authority is needed, see *Scheunemann*:

> 33 As regards the Treaty chapter on freedom of establishment, it does not contain any provision which extends the scope of that chapter to cover situations concerning a shareholding in a company which has its registered office in a third country[36] and, as it is, the case before the referring court concerns a shareholding in a capital company which has its registered office in Canada.

---

34 OECD, "Action Plan on Base Erosion and Profit shifting" (2013) p.16 *http://www.oecd.org/ctp/BEPSActionPlan.pdf*

35 DT relief was (unfairly) denied: see 59.2.2 (*Bricom*).

36 The Court cites: Case C-102/05 *A and B* [2007] ECR I-3871, para 29, and Case C-157/05 *Holböck* [2007] ECR I-4051, para 28.

> 34 Accordingly, Article 49 TFEU et seq. [FoE] does not apply in a situation such as that at issue in the case before the referring court.[37]

Article 54 TFEU extends the freedom to companies and firms:

> [1] Companies or firms formed in accordance with the law of a Member State and having their registered office, central administration or principal place of business within the Community shall, for the purposes of this Chapter, be treated in the same way as natural persons who are nationals of Member States.

Article 54 goes on to define "companies or firms":

> "Companies or firms" means companies or firms constituted under civil or commercial law, including cooperative societies, and other legal persons governed by public or private law, save for those which are non-profit-making.

What about trustees? The right to FoE is a right of nationals of a MS (extended to companies and firms). What is the nationality of a trust? One might look to the nationality of the trustees in their private capacities, or treat the trust as an entity with a nationality.

60.5 Public policy exemption to restriction on FoE

Article 52 TFEU provides an exception for public policy:

> The provisions of this Chapter and measures taken in pursuance thereof shall not prejudice the applicability of provisions laid down by law, regulation or administrative action providing for special treatment for foreign nationals on grounds of public policy, public security or public health.

We are concerned with public policy.

60.5.1 *Abuse and justification compared*

In *Cadbury Schweppes* the ECJ considered separately (1) whether there was abuse of EU law and (2) whether the CFC legislation was justified. I would have thought that the two questions were linked, for provisions to prevent abuse would necessarily be justified.

Perhaps the distinction is:

---

37 *Scheunemann v Finanzamt Bremerhaven* Case C-31/11 (2012).

(1) in cases of abuse, the EU law defence fails (even if UK provisions are unlawful in EU law);
(2) in the absence of abuse, the EU law defence succeeds (assuming the UK's provisions are contrary to EU law).

60.5.2 *Abuse*

Cadbury Schweppes dealt with abuse quite shortly:

> 35 It is true that nationals of a Member State cannot attempt, under cover of the rights created by the Treaty, improperly to circumvent their national legislation. They must not improperly or fraudulently take advantage of provisions of Community law.

Here of course everything depends on the meaning of the elastic term "improperly". ("Fraudulently" adds nothing since anything which is fraudulent must be improper.)

> 37 As to freedom of establishment, the Court has already held that the fact that the company was established in a Member State for the purpose of benefiting from more favourable legislation does not in itself suffice to constitute abuse of that freedom ...
> 38 ... it follows that the fact that in this case Cadbury Schweppes decided to establish [its CFCs] in [Ireland] for the avowed purpose of benefiting from the favourable tax regime which that establishment enjoys does not in itself constitute abuse.

We do not know what abuse is, but we know what it is not, and if this is not abuse then use of a MS company (ie a company established in any MS) for tax avoidance is never an abuse.

The Advocate General explained the reasoning in *Columbus Container Services*:[38]

> ...in the absence of Community harmonisation, it must be accepted that there is competition between the tax regimes of the various member states.[39] It may be a matter for regret that such competition operates without restriction. That question ... calls, however, for an answer of a political nature and therefore has no effect on the rights and obligations of member states under the Treaty.

---

38 *Columbus Container Services v Finanzamt Bielefeld-Innenstadt* [2008] STC 2554.
39 The AG refers to the opinion of the AG in *Cadbury Schweppes* at [55].

60.5.3 *Justification*

The ECJ next considered whether there was a justification for the CFC legislation:

> 55 ... in order for a restriction on the freedom of establishment to be justified on the ground of prevention of abusive practices, the specific objective of such a restriction must be to prevent
> [1] conduct involving the creation of wholly artificial arrangements which do not reflect economic reality,
> [2] with a view to escaping the tax normally due on the profits generated by activities carried out on national territory.

There are two requirements for justification: [1] is a conduct requirement and [2] is an intention requirement. Both must be present but the conduct requirement is the more important because if there are "wholly artificial arrangements which do not reflect reality" then the intention requirement is likely to be satisfied.

"Artificial" is of course vague[40] and the adjective "wholly" does not add anything except some emphasis. The ToA draft guidance muses on this without taking matters much further:

> *Wholly artificial arrangements*
> 'Wholly artificial arrangements' is a phrase first employed in the ICI case mentioned above. The authoritative text was English, but in the French working language the phrase was *montages purement artificiels*, which no doubt explains why it is sometimes in ECJ cases expressed as 'purely artificial arrangements', as for example in Case C-231/05 *Oy AA*.
> The *ICI* case concerned the UK group relief legislation then at ICTA70/S258 (5)(b) and the definition of holding company as a company whose business consists wholly or mainly in holding interests in UK resident subsidiaries; the court held that this type of rule was clearly not effective in focusing on artificiality. The phrase could be translated (and arguably makes more sense in context) as 'artificial arrangements only' rather than arrangements that in some sense are 'wholly artificial'. In English law ‹wholly artificial' arrangements might well be taken to mean sham arrangements (those fraudulently misleading, which very plainly was not in the mind of the court).
> The EU Commission (in its communication mentioned above) takes the view that ‹the detection of a wholly artificial arrangement … amounts in effect to a substance over form analysis'. That is a more effective approach than attempting to understand in what sense an arrangement can be 'wholly artificial'.
> A scheme may thus be regarded as artificial if it lacks genuine economic

40 See 32.17.2 ("Artificial" transactions and devices).

substance born of commercial purpose ('devoid of economic reality', as expressed at paragraph 63 of *Oy AA*) but is inserted to gain an advantage not within the aims of the Treaty. These aims are, for freedom of establishment 'economic interpenetration', a phrase taken from Cadbury Schweppes; and for freedom of movement of capital the efficient allocation of capital.

Paragraph 63 of *Oy AA* reads as follows:

> 'Even if the legislation at issue in the main proceedings is not specifically designed to exclude from the tax advantage it confers purely artificial arrangements, devoid of economic reality, created with the aim of escaping the tax normally due on the profits generated by activities carried out on national territory, such legislation may nevertheless be regarded as proportionate to the objectives pursued, taken as a whole.'

The ECJ's decision in that case was based on the application of both the 'prevention of tax avoidance' and 'balanced allocation of taxing rights' justifications. It demonstrates that counteraction may be applied by an authority where there are gratuitous transfers of income from one tax jurisdiction to another within a group of companies. This 'profit shifting' is a common theme. It is easier to justify counteraction where there are transfers of assets or income without commercial exchange, threatening the balanced allocation of taxing rights.

What is the conduct requirement?

> ... objective circumstances showing that, despite formal observance of the conditions laid down by Community law, the objective pursued by freedom of establishment, as set out in paras 54 and 55 of this judgment,[41] has not been achieved.

When is the objective of FoE not achieved?

> 54. Having regard to that objective of integration in the host member state, the concept of establishment within the meaning of the Treaty provisions on freedom of establishment involves the actual pursuit of an economic activity through a fixed establishment in that state for an indefinite period ... Consequently, it presupposes actual establishment of the company concerned in the host member state and the pursuit of genuine economic activity there.
>
> 65 In those circumstances, in order for the legislation on CFCs to comply with Community law, the taxation provided for by that legislation must be excluded where, despite the existence of tax motives, the incorporation of a CFC reflects economic reality.

What is economic reality?

---

41 For para 54, see 60.4.2 (The objective of FoE).

> 66 That incorporation must correspond with an actual establishment intended to carry on genuine economic activities in the host Member State, as is apparent from the case-law recalled in paras 52 to 54 of this judgment.

The expression "genuine economic activities" does not take us much further.

> 67 ... that finding must be based on objective factors which are ascertainable by third parties with regard, in particular, to the extent to which the CFC physically exists in terms of premises, staff and equipment.

"Premises, staff and equipment" are easily understood. The question is: how large a premises, how many staff and how much equipment is needed?

> 68 If checking those factors leads to the finding that the CFC is a fictitious establishment not carrying out any genuine economic activity in the territory of the host Member State, the creation of that CFC must be regarded as having the characteristics of a wholly artificial arrangement. That could be so in particular in the case of a "letterbox" or "front" subsidiary.

The metaphors of "letterbox" and "front" and the epithet "fictitious" and "artificial" are conclusions rather than useful tests or even indications of what is "economic reality". The use of the words "genuine", "real" and "artificial" is normally a sign of conceptual desperation.[42] The ECJ offers a comment on "artificial":

> 69 On the other hand, as pointed out by the Advocate General in point 103 of his Opinion, the fact that the activities which correspond to the profits of the CFC could just as well have been carried out by a company established in the territory of the Member State in which the resident company is established does not warrant the conclusion that there is a wholly artificial arrangement.

My conclusion is that what constitutes "genuine economic activities" is still at present a fairly open question.[43] The answer should become clearer

---

42 See Appendix 3 (What Do We Mean by "Real"?).

43 For HMRC views see "Taxation of the foreign profits of companies: a discussion document" (June 2007) *http://customs.hmrc.gov.uk/channelsPortalWebApp/downloadFile?contentID=H*

in time.

60.5.4 *EC guidance*

In 2007 the EC issued a Communication "The application of anti-abuse measures in the area of direct taxation" (**"the 2007 EC anti-abuse statement"**).[44] This focusses on CFC and thin capitalisation rules, but the analysis is also relevant to other issues, such as the ToA EU law exemption.

2. DEFINITIONS AND KEY PRINCIPLES FROM ECJ CASE LAW

Avoidance and abuse

The ECJ has held that a person who would otherwise be in a situation covered by Community law may forfeit his Community law rights where he seeks to abuse them. Such cases are exceptional: an abuse occurs only where, despite formal observance of the conditions laid down in the relevant Community rules, their purpose is not achieved and there is an intention to obtain an advantage by artificially creating the conditions for obtaining it[45]. The ECJ has in particular applied the doctrine to the Community legislation on export refunds and VAT.

In its case law on direct taxation the ECJ has, in addition, held that the need to prevent tax avoidance or abuse can constitute an overriding reason in the public interest capable of

---

MCE_PROD1_027592:

"In *Cadbury Schweppes*, the ECJ confirmed that there is a legitimate role for CFC rules under the Treaty, so long as the rules do not tax the profits of genuine economic activities in overseas subsidiaries.

The Government considers that, in making this judgment, the Court intended to draw a meaningful distinction between profits from a genuine commercial activity and profits that have been artificially divorced from the activity that creates them. So CFC rules should not be protectionist: but at the same time they may permit the fair allocation of taxing rights between Member States, so respecting the Treaty.

Commentators who have criticised the changes the Government has made in [s.751A ICTA] claim that in the light of Cadbury Schweppes only highly artificial transfers may be targeted by CFC rules. Subsequent rulings from the Court (e.g. on the thin capitalisation case) support the Government's wider reading – but full certainty on this point is unlikely to be achieved in the short term."

But the EC did not agree with HMRC: Reference: IP/11/606, 19 May 2011:

"Despite the corrective measures taken by the UK, the Commission considers that the UK is still not fulfilling its obligations under Articles 49 and 63 (freedom of establishment and free movement of capital) of the Treaty on the Functioning of the EU .... Indeed, UK provisions may lead, in certain cases, to an additional taxation of profits made by subsidiaries engaged in genuine economic activities in other EU Member States or EEA countries."

44 COM(2007) 785 final
http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:52007DC0785

45 *Emsland-Stärke* C-110/99, #52-53; Halifax C-255/02, #74-75.

justifying a restriction on fundamental freedoms[46] . The notion of tax avoidance is however limited to "wholly artificial arrangements aimed at circumventing the application of the legislation of the MS concerned". In order to be lawful national tax rules must be proportionate and serve the specific purpose of preventing *wholly artificial arrangements*.

Wholly artificial arrangements

Prompted by arguments raised by MSs the ECJ has identified several factors which do not of themselves suffice to constitute abusive, i.e. wholly artificial arrangements. It has held, for instance, that the mere fact that a subsidiary is established in another MS cannot, of itself, be treated as giving rise to tax avoidance[47] and that the fact that the activities carried out by a secondary establishment in another MS could just as well be pursued by the taxpayer from within the territory of its home MS does not warrant the conclusion that there is a wholly artificial arrangement[48]. The ECJ has also expressly confirmed that it is quite legitimate for tax considerations to play a role in the decision on where to establish a subsidiary[49] . The objective of minimising one's tax burden is in itself a valid commercial consideration as long as the arrangements entered into with a view to achieving it do not amount to artificial transfers of profits. In so far as taxpayers have not entered into abusive practices, MSs cannot hinder the exercise of the rights of freedom of movement simply because of lower levels of taxation in other MSs[50] . This is the case even in respect of special favourable regimes in the other MSs' tax systems[51]. Distortions to the location of business activities due to state aid that is incompatible with the EC Treaty and to harmful tax competition do not entitle MSs to take unilateral measures intended to counter their effects by limiting freedom of movement[52]; rather they need to be resolved at source through the appropriate judicial or political procedures. Obviously, anti-abuse measures must themselves, too, comply with the EC treaty provisions on state aid[53]. ...

In order for anti-abuse rules to be justified, they must be confined to situations in which there is a further element of abuse. In its recent case law the ECJ has given more explicit guidance on the criteria for detecting abusive practices, i.e. wholly artificial arrangements. In Cadbury, the ECJ held that an establishment is to be regarded as genuine where, based on an evaluation of objective factors which are ascertainable by third parties, in particular evidence of physical existence in terms of premises, staff and equipment, it reflects economic reality, i.e. an actual establishment carrying on genuine economic activities and not a mere "letterbox" or "front" subsidiary[54]. In *Thin Cap*[55] the issue was not whether the establishment of the taxpayers concerned was genuine but whether the MS concerned could impose tax restrictions on financing arrangements between related companies. The ECJ confirmed that the fact that the terms and conditions of financial transactions between

55 C-524/04.

related companies resident in different MSs deviate from those that would have been agreed upon between unrelated parties constitutes an objective and independently verifiable element for the purpose of determining whether the transaction in question represents, in whole or in part, a purely artificial arrangement. Legislation framed on that basis was proportionate on condition that the taxpayer was given the opportunity to provide evidence of any commercial justification for the arrangement.

The detection of a wholly artificial arrangement thus amounts in effect to a substance-over-form analysis. Application of the relevant tests in the context of EC Treaty freedoms and corporate tax directives necessitates an evaluation of their objectives and purposes against those underlying the arrangements entered into by their prospective beneficiaries (taxpayers). In the context of corporate establishment there are inevitably difficulties in determining the level of economic presence and commerciality of arrangements. Objective factors for determining whether there is adequate substance include such verifiable criteria as the effective place of management and tangible presence of the establishment as well as the real commercial risk assumed by it. However, it is not altogether certain how those criteria may apply in respect of, for example, intra-group financial services and holding companies, whose activities generally do not require significant physical presence...

Proportionality

It follows from *Cadbury* and *Thin Cap* that, for the purposes of determining whether a transaction represents a purely artificial arrangement, national anti-abuse rules may comprise 'safe harbour' criteria to target situations in which the probability of abuse is highest. Indeed, the Commission shares the view of Advocate General (AG) Geelhoed who, in *Thin Cap*, opined that the setting out of reasonable presumptive criteria contributes to a balanced application of national anti-abuse measures as it is in the interest of both legal certainty for the taxpayers, and workability for tax authorities[56].

... Moreover, the adjustments to the taxable income as a result of the application of the anti-abuse rules should be limited to the extent that is attributable to the purely artificial arrangement. With regard to intra-group transactions that means adherence to the arm's length principle, i.e. the commercial terms as would have been agreed upon between unrelated parties. However, this, in the Commission's view should not prevent MSs from imposing penalties on taxpayers who have made use of abusive schemes to avoid tax.

3. APPLICATION OF ANTI-ABUSE RULES WITHIN THE EU/EEA

General

MSs need to be able to operate effective tax systems and prevent their tax bases from being unduly eroded because of inadvertent non-taxation and abuse. At the same time, it is important to ensure that there are no undue obstacles to the exercise of the rights conferred upon individuals and economic operators by Community law provisions. Anti-abuse measures must therefore be accurately targeted at wholly artificial arrangements designed to circumvent national legislation (or Community rules as transposed into national legislation). This is also the case with regard to the application of anti-abuse rules in relation to EEA States (except for situations where there is no adequate information exchange relationship with the EEA State concerned). In order to ensure that such rules are not disproportionate to the objective of curbing abuse and to guarantee legal certainty,

56 #66.

adequate safeguards must be provided so that taxpayers have the opportunity to provide evidence of any commercial justifications that there may be for their arrangements...

60.5.5 *ToA Guidance*

The ToA draft guidance provides:

> **INTM603140 Genuine transactions exemption: EU law implications**
> In practice, the EU Commission (in its communication COM (2007)0785)[57] has indicated that national anti-abuse rules may incorporate 'safe harbour' criteria aimed at situations where the probability of abuse is highest. These may set out reasonable presumptive criteria which contribute to a balanced application of domestic anti-abuse measures in the interests of legal certainty for taxpayers and workability for tax authorities (AG Geelhoed in Case C-524/04 *Thin Cap*).
> • Abuse of the freedoms
> The ECJ has held that a person who would otherwise be in a situation covered by EU law may forfeit the rights under it where there is an attempt to abuse them. The criteria were set out in a case involving the Common Agricultural Policy, Case C-110/99 *Emsland-Stärke*, paragraphs 52 and 53:
>
> > 'A finding of abuse requires, first, a combination of objective circumstances in which, despite formal observance of the conditions laid down by Community [EU] rules, the purpose of those rules has not been achieved. It requires, second, a subjective element consisting in the intention to obtain an advantage from the Community rules by creating artificially the conditions for obtaining it.'
>
> The principle has been applied to VAT (Case C-255/02 *Halifax Bank*, and more recently to direct tax in Case C-196/04 *Cadbury Schweppes*. Paragraph 51 of the court's decision in *Cadbury Schweppes* is as follows:
>
> > 'On the other hand, a national measure restricting freedom of establishment may be justified where it specifically relates to wholly artificial arrangements aimed at circumventing the application of the legislation of the Member State concerned ...
>
> It is an established principle that loss of tax is not in itself an abuse (see, for instance, Case C-294/97 *EUROWINGS*). And the importance of market freedoms is illustrated by company law cases such as Case C-212/97 *Centros* and Case C167/01 *Inspire Art*. These suggest that the circumvention of national rules by exercising the freedoms does not itself amount to abuse. But those cases involved companies and creditor protection. There is a clear application of market principles in a company choosing lighter regulation in a particular territory. Similarly, there is an exercise of market freedoms where a commercial entity chooses to take advantage of a reduced rate of taxation in another member state. This is illustrated by *Cadbury Schweppes*. A fiscal authority, however, may continue to tax without breaching those freedoms where there is no real application and serving of the Treaty freedoms (see below) but rather tax driven artificial arrangements designed to exploit the freedoms rather than to serve them.

---

57 "The application of anti-abuse measures in the area of direct taxation"; see above.

60.6 Free movement of capital

Article 63 TFEU provides:

> 1. Within the framework of the provisions set out in this Chapter, all restrictions on the movement of capital between Member States and between Member States and third countries shall be prohibited.
> 2. Within the framework of the provisions set out in this Chapter, all restrictions on payments between Member States and between Member States and third countries shall be prohibited.

In this book I refer to third countries as **"non-EU countries**" as that seems clearer.

60.6.1 *Meaning of "movement of capital"*

The TFEU does not define "movement of capital" or "payments between member states". In practice the CJEU has regard to the list in annex 1 directive 88/361/EEC.[58] The technical EU law terminology is **"the nomenclature"**.

In *Test Claimants in the FII Group Litigation v IRC*[59] the ECJ said:

> 179. It is settled case law that, ... art 1 of Directive 88/361... retains the same indicative value, for the purposes of defining the term ‹movement of capital', ... subject to the qualification, contained in the introduction to the nomenclature, that the list set out therein is not exhaustive.[60]

The list – too long to set out here – includes gifts and inheritance. In *Scheunemann* the CJEU states:

> 22... Inheritances consisting in the transfer to one or more persons of assets left by a deceased person, ... are movements of capital for the purposes of Article 63 TFEU.[61]

---

58 Directive for the implementation of Article 67 of the Treaty, 24 June 1988 (now repealed).

59 [2007] STC 326.

60 The Court cites: *Trummer* (Case C-222/97) [1999] ECR I-1661, para 21; *van Hilten-van der Heijden v Inspecteur van de Belastingdienst/Particulieren. Ondernemingen buitenland te Heerlen* (Case C-513/03) [2006] ECR I-1957, para 39.

61 The Court cites: Case C-11/07 *Eckelkamp* [2008] ECR I-6845, para 39; Case C-43/07 *Arens-Sikken* [2008] ECR I-6887, para 30; Case C-35/08 *Busley and Cibrian Fernandez* [2009] ECR I-9807, para 18; and Case C-25/10 *Missionswerk Werner Heukelbach* [2011] ECR I-0000, page 497, para 16).

It is not necessary that the donor or donee engage in cross-border economic activity for the applicability to inheritances of the free movement of capital provisions, so free movement of capital is important for IHT.

60.6.2 *What is a "restriction" on movement of capital?*

In *Test Claimants in the FII Group Litigation v IRC*[62] the ECJ say:

> 184. It is clear from case law that any less favourable treatment of foreign-sourced dividends in comparison with nationally-sourced dividends must be regarded as a restriction on the free movement of capital in so far as it is liable to make the acquisition of holdings in companies established in other member states less attractive.[63]

In *Stauffer*[64] the ECJ held that a charity tax relief applying only to income of charities established in Germany constituted a restriction on free movement of capital.

Similarly in *Persche*[65], an income tax relief for donors to German charities only constituted a restriction on free movement of capital. This was just a rerun of the arguments in *Stauffer* and the conclusion was inevitable.

The point was followed again in *Missionswerk*[66] at [24]–[26] where a Belgian succession duty relief restricted to Belgian non-profit organisations was held to be a restriction on free movement of capital.

A similar approach applies to determine what is a restriction on FoE.

There are interesting cases forthcoming: *EC v Spain*[67] and *EC v Germany*[68] concerning domestic IHT rules discriminating against non-residents.

60.7 Movement of capital to non-EU countries

Free movement of capital applies not just between member states but also between member states and non-EU countries (the technical EU law terminology is **"third countries"**). It is the only one of the four freedoms

---

62 [2007] STC 326.

63 The ECJ cite: *Verkooijen*, para 35, *Lenz*, para 21, and *Manninen*, para 23.

67 Case C-127/12.

68 Case C-211/13.

which applies to non-EU countries.

60.7.1 *The standstill derogation*

There is a transitional relief in the case of non-EU countries. Article 64 TFEU provides:

> 1. The provisions of Article 63 shall be without prejudice to the application to third countries of any restrictions which exist on 31 December 1993 under national or Union law adopted in respect of the movement of capital to or from third countries involving
> [a] direct investment — including in real estate —
> [b] establishment,
> [c] the provision of financial services or
> [d] the admission of securities to capital markets. ...

This is known as the **"standstill"** derogation.

The TFEU does not define "direct investment". In practice the CJEU has regard to the list in annex 1 directive 88/361/EEC[69] which provides:

> I - DIRECT INVESTMENTS
> 1. Establishment and extension of branches or new undertakings belonging solely to the person providing the capital, and the acquisition in full of existing undertakings.
> 2. Participation in new or existing undertaking with a view to establishing or maintaining lasting economic links.
> 3. Long-term loans with a view to establishing or maintaining lasting economic links.
> 4. Reinvestment of profits with a view to maintaining lasting economic links.
> A - Direct investments on national territory by non-residents
> B - Direct investments abroad by residents...
> EXPLANATORY NOTES
> For the purposes of this Nomenclature and the Directive only, the following expressions have the meanings assigned to them respectively:
> **Direct investments**
> Investments of all kinds by natural persons or commercial, industrial or financial undertakings, and which serve to establish or to maintain lasting and direct links between the person providing the capital and the entrepreneur to whom or the undertaking to which the capital is made

69 Directive for the implementation of Article 67 of the Treaty, 24 June 1988 (now repealed).

> available in order to carry on an economic activity. This concept must therefore be understood in its widest sense.
> The undertakings mentioned under I-1 of the Nomenclature include legally independent undertakings (wholly-owned subsidiaries) and branches.
> As regards those undertakings mentioned under I-2 of the Nomenclature which have the status of companies limited by shares, there is participation in the nature of direct investment where the block of shares held by a natural person of another undertaking or any other holder enables the shareholder, either pursuant to the provisions of national laws relating to companies limited by shares or otherwise, to participate effectively in the management of the company or in its control.
> Long-term loans of a participating nature, mentioned under I-3 of the Nomenclature, means loans for a period of more than five years which are made for the purpose of establishing or maintaining lasting economic links. The main examples which may be cited are loans granted by a company to its subsidiaries or to companies in which it has a share and loans linked with a profit-sharing arrangement. Loans granted by financial institutions with a view to establishing or maintaining lasting economic links are also included under this heading.

Thus "direct investment" is a somewhat technical term.

In *Test Claimants in the FII Group Litigation v IRC*[70] the ECJ comment on "direct investment":

> 180. The same indicative value must be given to that nomenclature [ie art 1 of Directive 88/361] in interpreting the concept of direct investment. The first section of that nomenclature, entitled "Direct investments" includes the establishment and extension of branches or new undertakings belonging solely to the person providing the capital and the acquisition in full of existing undertakings, participation in new or existing undertakings with a view to establishing or maintaining lasting economic links, long-term loans with a view to establishing or maintaining lasting economic links, and reinvestment of profits with a view to maintaining lasting economic links.
> 181. As that list and the relative explanatory notes show, the concept of direct investments concerns investments of any kind undertaken by natural or legal persons and which serve to establish or maintain lasting and direct links between the persons providing the capital and the undertakings to which that capital is made available in order to carry out

70 [2007] STC 326.

> an economic activity.
> 182. As regards shareholdings in new or existing undertakings, as the explanatory notes confirm, the objective of establishing or maintaining lasting economic links presupposes that the shares held by the shareholder enable him, either pursuant to the provisions of the national laws relating to companies limited by shares or otherwise, to participate effectively in the management of that company or in its control...
> 196. ... Holdings in a company which are not acquired with a view to the establishment or maintenance of lasting and direct economic links between the shareholder and that company and do not allow the shareholder to participate effectively in the management of that company or in its control cannot, in this connection, be regarded as direct investments..

The ECJ also comment on "existing legislation":

> 195. ... the FID regime cannot be categorised as an existing restriction merely on the basis that, because it is optional, the companies concerned can always elect to be taxed under the system previously in place, with the restrictive effects to which it gave rise. As mentioned in para 162 of this judgment, a system which restricts the freedoms of movement still remains incompatible with Community law, even though its application may be optional.
> 196. ... art 57(1) EC is to be interpreted as meaning that where, before 31 December 1993, a member state has adopted legislation which contains restrictions on capital movements to or from non-member countries which are prohibited by art 56 EC and, after that date, adopts measures which, while also constituting a restriction on such movements, are essentially identical to the previous legislation or do no more than restrict or abolish an obstacle to the exercise of the Community rights and freedoms arising under that previous legislation, art 56 EC does not preclude the application of those measures to non-member countries when they apply to capital movements involving direct investment, including investment in real estate, establishment, the provision of financial services or the admission of securities to capital markets.[71]

Most important UK anti-avoidance legislation already existed in 1993, which could preclude EU law remedies based on FMC for a non-EU country; but post -1993 amendments have been so numerous, and so far reaching, that it is very doubtful whether the standstill derogation still

71 See *Skatteverket v A*, C-101/05 para 49.

applies. The ToA rules, for instance, have been extended to include transfers by non-residents, to apply to UK residents (as opposed to ordinarily residents), to restrict the motive defence, and to exclude DT relief. S.13 TCGA has been extended to foreign domiciliaries, and extended by restrictions on treaty relief in the case of trusts.

60.7.2 *EU Overseas Countries and Territories*

The extent to which the free movement of capital applies to EU Overseas Countries and Territories awaits clarification pending the decision of the ECJ in *Prunus* case (C-384/09). The Advocate General considered in his opinion that this freedom applies to OCTs and that the standstill derogation is not applicable to them.

60.8 Justification for restriction on free movement of capital

Article 65 TFEU provides an exception to the general principle of free movement of capital:

> 1. The provisions of Article 63 shall be without prejudice to the right of Member States
>
> (a) to apply the relevant provisions of their tax law which distinguish between taxpayers who are not in the same situation
>
> [i] with regard to their place of residence or
>
> [ii] with regard to the place where their capital is invested.
>
> (b) [i] to take all requisite measures to prevent infringements of national law and regulations, in particular in the field of taxation and the prudential supervision of financial institutions, or
>
> [ii] to lay down procedures for the declaration of capital movements for purposes of administrative or statistical information, or
>
> [iii] to take measures which are justified on grounds of public policy or public security.
>
> 2. The provisions of this Chapter shall be without prejudice to the applicability of restrictions on the right of establishment which are compatible with this Treaty.

One might have thought that article 65(1) overrides FMC in all tax cases, as UK and non-UK entities are not "in the same situation with regard to their place of residence." However the provision is limited by what follows:

> 3. The measures and procedures referred to in paragraphs 1 and 2 shall not constitute a means of arbitrary discrimination or a disguised

> restriction on the free movement of capital and payments as defined in Article 63.

It is not the case that *any* discrimination on the ground of residence or location of property is permitted as restrictions must not be "arbitrary" or "disguised restrictions on free movement of capital".

It is settled law:

> 32 In so far as that provision of Article [65 TFEU] is a derogation from the fundamental principle of the free movement of capital, it must be interpreted strictly. It cannot therefore be interpreted as meaning that all tax legislation which draws a distinction between taxpayers on the basis of their place of residence or the Member State in which they invest their capital is automatically compatible with the Treaty...
> 33 The derogation in Article 58(1)(a) EC is itself limited by Article 58(3) EC, which provides that the national provisions referred to in paragraph 1 of that article 'shall not constitute a means of arbitrary discrimination or a disguised restriction on the free movement of capital and payments as defined in Article 56'.[72]

These principles leave the CJEU free to devise its own principles and that is what it has done.

60.8.1 *"Objectively comparable"*

The wording of the test is settled law, for instance, *Stauffer*:

> 32. According to the case law, for national tax legislation such as that at issue in the main proceedings, ... to be regarded as compatible with the Treaty provisions on the free movement of capital, the difference in treatment must concern situations which are not objectively comparable...[73]

The CJEU are fond of the word "objectively" but it seems to me that it adds rather little; perhaps the point is that the answer is decided by the CJEU and not by anyone else.

"Comparable" is the word always used in this context, but "substantially the same" would, I think, be more idiomatic English. That would highlight the fact that the formula poses, rather than answers, the question of what is required. In other words, "objectively comparable" is a vague and

---

72 *Mattner v Finanzamt Velbert* C-510/08.

73 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439.

evaluative expression, which should be regarded as technical EU law terminology.[74]

60.8.2 *Proportionality*

Stauffer continues:

> ... or be justified by overriding reasons in the general interest, such as the need to safeguard the coherence of the tax system or effective fiscal supervision ... In order to be justified, moreover, the difference in treatment between charitable foundations with unlimited tax liability [ie subject to tax on worldwide income, though subject to charity tax exemption] in Germany and foundations of the same kind established in other member states must not go beyond what is necessary in order to attain the objective of the legislation in question.[75]

60.8.3 *Excessive tax cost of abolishing restriction on free movement of capital*

The CJEU does not think much of this argument. In *Thin Cap Claimants v HMRC:*

> It is settled law that reduction in tax revenue does not constitute an overriding reason in the public interest which may justify a measure which is in principle contrary to a fundamental freedom.[76]

60.8.4 *Need to prevent tax avoidance*

The need to prevent avoidance is accepted as a reason for a restriction on EU freedoms only if the legislation is targeted so that it is limited to cases of tax avoidance. The idea that tax avoidance legislation should be limited in this way is something to which the UK government have paid lip-service but it has not been reflected in practice:

> ... at the moment [anti-avoidance] works like a drive-by shooting. You might hit your objective but you also hit a lot of other people.[77]

It will not surprise tax practitioners that when UK legislation is put to this

---

74 Contrast the discussion of the view that people who are "relevantly equal" should pay the same amount of tax; see 1.3.1 (What is fairness?).

75 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439 at [32].

76 [2007] STC 326 at [36].

77 Ussher and Walford, *National Treasure* (Demos, 2011) *http://www.demos.co.uk/files/National_treasure_-_web.pdf?1299511925*.

test, it regularly fails. This is not an exclusively UK problem:

> 37. As regards more specifically the justification based on the risk of tax evasion,[78] it is important to note that the legislation at issue here does not have the specific purpose of preventing wholly artificial arrangements, designed to circumvent German tax legislation, from attracting a tax benefit, but applies generally to any situation in which the parent company has its seat, for whatever reason, outside the Federal Republic of Germany. Such a situation does not, of itself, entail a risk of tax evasion, since such a company will in any event be subject to the tax legislation of the State in which it is established ....[79]

60.8.5 *Need for effective supervision of taxpayers/to prevent fraudulent evasion*

This has not helped national governments. The CJEU takes the view that the mutual assistance directive, now 2010/24/EU, allows national governments "to obtain all the information that may be necessary to effect a correct assessment of a taxpayer's liability to tax".[80]

60.8.6 *Counteracting tax advantages of non-residents*

Mattner concerned German gift tax which made an allowance where donor or donee was resident in Germany. If donor and donee were not resident in Germany, the allowance was not available but the taxpayers had the advantage that German gift tax applied only to property in Germany.

The CFEU did not regard this as justification:

> 40 In the first place, the Finanzamt submits that if the [German statute] provided in such a case for the application of the same allowance to gifts between non-residents and gifts involving a resident, Ms Mattner would be able, by making use of the same tax advantages in her Member State of residence, in which she has unlimited tax liability,[81] to benefit from multiple allowances.
>
> 41 On this point, the Court has already held, in its case-law on the free movement of capital and inheritance tax, that a national of a Member

78 The meaning is "avoidance": see 32.7.1 (Avoidance/evasion distinction).

79 *Lankhorst-Hohorst GmbH v Finanzamt Steinfurt* [2003] STC 607.

80 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439 at [50].

81 "Unlimited tax liability" is technical EU law terminology meaning subject to tax on worldwide income, as opposed to a non-Germany resident, who is subject to tax only on German source income ("limited tax liability").

State cannot be deprived of the possibility of relying on the provisions of the Treaty on the ground that he is profiting from tax advantages which are legally provided for by the rules in force in a Member State other than his State of residence ....

42 In any event, the Member State in which the immovable property which is the subject of the gift is located cannot, in order to justify a restriction on the free movement of capital arising from its own legislation, rely on the possibility, beyond its control, of the donee benefiting from a similar allowance by another Member State, such as that in which the donor and the donee resided on the date of the gift, which might wholly or partly offset the loss incurred by the donee as a result of the smaller allowance when calculating the gift tax payable in the former Member State ...

43 A Member State cannot rely on the existence of an advantage granted unilaterally by another Member State – in this case the Member State in which the donor and the donee reside – to escape its obligations under the Treaty, in particular under the Treaty provisions on the free movement of capital ...

44 That is all the more the case if, as the German Government submitted at the hearing, the Member State in which the donor and the donee reside applies a smaller allowance than that granted by the Member State in which the immovable property which is the subject of the gift is situated, or sets the value of that property at a higher figure than that determined by the latter State.

45 Moreover, it appears from the case-file submitted to the Court that, in calculating the tax on gifts, the national legislation at issue in the main proceedings purely and simply excludes the full-rate allowance where the donor and donee are not resident in the Member State in which the property gifted is situated, without taking into consideration the possible grant of a similar allowance in another Member State, such as that in which the donor and the donee reside, or the method of determining the value of the property in the latter Member State.

60.8.7 *Ensuring a balanced allocation between members states of the power to tax*

This was recognised as a possible justification in the *Thin Cap* case [2011] STC 738 at [55].

60.8.8 *Cohesion*

In *Stauffer* the ECJ said:

> 52 In that regard, the Court has acknowledged that the need to safeguard the cohesion of a tax system may justify a restriction on the exercise of the fundamental freedoms guaranteed by the Treaty.[82]

I am not sure what is meant by the terms "coherence" or "cohesion" of the tax system, if it is anything other than a general term for the more specific needs set out above: the need to collect enough tax, and to prevent avoidance and evasion. In OECD papers the word is used specifically to refer to the avoidance of double taxation and double non-taxation.[83] Whatever it means, the concept does not justify much. It did not help the German government in *Stauffer*. In *Thin Cap Claimants v HMRC* the Court of Appeal concluded:

> The permissible scope of the justification of the need to maintain the coherence of the tax system was held to be very narrow indeed, so narrow as to approach vanishing point.[84]

60.8.9 Discrimination on grounds of nationality

Article 18 TFEU provides:

> Within the scope of application of the Treaties, and without prejudice to any special provisions contained therein, any discrimination on grounds of nationality shall be prohibited...

60.8.10 Overt and covert discrimination

It is settled case law that:

> the rules regarding equal treatment forbid not only overt discrimination by reason of nationality but also all covert forms of discrimination which, by the application of other criteria of differentiation, lead in fact to the same result.[85]

Direct and indirect discrimination would be the more natural English expression.

In particular, discrimination by reason of non-residence may be indirect

---

82 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439.

83 Eg OECD, "Action Plan on Base Erosion and Profit shifting" (2013) *http://www.oecd.org/ctp/BEPSActionPlan.pdf*

84 [2011] STC 738 at 26. The point will need to be reviewed when the case is final.

85 *Gielen v Staatssecretaris van Financiën* [2010] STC 1053 at [37] citing *Finanzamt Köln-Altstadt v Schumacker* (Case C-279/93) [1995] STC 306, para 26.

(covert) discrimination by reason of nationality, as residence may serve as a proxy for nationality. But in these cases FoE or FMC is also likely to be in point; I am not sure what it adds to put the complaint under the banner of discrimination.

60.8.11 Comparable situations v different situations

In *Royal Bank of Scotland v Greek State*[86] the ECJ said:

> 26. ... It is settled case law that discrimination consists in the application of different rules to comparable situations or in the application of the same rule to different situations.[87]

Similarly, in *Gielen*[88] the ECJ said:

> 38. ... discrimination can arise only through the application of different rules to comparable situations or the application of the same rule to different situations.[89]

"Comparable" situations is best regarded as technical EU law terminology, meaning "effectively the same situations", ie not relevantly different.[90] Where situations are not "comparable" the EU law terminology is "objectively different" though I do not think that "objectively" adds much except emphasis.

The question is when situations are "comparable" and when are they different. In *Royal Bank of Scotland plc v Greek State*[91] the ECJ said:

> 27. As far as direct taxation is concerned, the court has held, in cases relating to the taxation of income of natural persons, that the situations of residents and non-residents in a given state are not generally comparable, since there are objective differences between them from the point of view of the source of the income and the possibility of taking

---

86 [2000] STC 733.

87 The Court cites: *Finanzamt Köln-Altstadt v Schumacker* (Case C-279/93) [1995] STC 306 at 325 para 30, *Wielockx v Inspecteur der Directe Belastingen* (Case C-80/94) [1995] STC 876 at 887, para 17; *Asscher v Staatssecretaris van Financiën* (Case C-107/94) [1996] STC 1025 at 1045, para 40.

88 *Gielen v Staatssecretaris van Financiën* [2010] STC 1053.

89 The Court cites: *Schumacker* (para 30), and *Gschwind v Finanzamt Aachen-Außenstadt* (Case C-391/97) [2001] STC 331, para 21).

90 This nuance of the word "comparable" appears in the expression "closely comparable" (meaning "more or less the same").

91 [2000] STC 733.

> account of their ability to pay tax or their personal and family circumstances.[92] However, it has explained that, in the case of a tax advantage denied to non-residents, a difference in treatment between the two categories of taxpayer might constitute discrimination within the meaning of the EC Treaty where there is no objective difference such as to justify different treatment on this point as between the two categories of taxpayers.[93]

Similarly:

> 29. It is true that companies having their seat in Greece are taxed there on the basis of their worldwide income (unlimited tax liability) whereas foreign companies carrying on business in that state through a permanent establishment are subject to tax there only on the basis of profits which the permanent establishment earns there (limited tax liability). However, that circumstance, which arises from the limited fiscal sovereignty of the state in which the income arises in relation to that of the state in which the company has its seat is not such as to prevent the two categories of companies from being considered, all other things being equal, as being in a comparable situation as regards the method of determining the taxable base.
>
> 30. Consequently, national legislation, such as the Greek tax legislation, which, for the purposes of taxing income, does not establish, as between companies having their seat in Greece and companies which, having their seat in another member state, have a permanent establishment in Greece, any distinction such as to justify, in relation to the same taxation, a difference in treatment between the two categories of companies and which establishes a difference in treatment as regards the rate of income tax, introduces discrimination against companies having their seat in another member state in so far as it imposes on them, irrespective of their legal form and the nature of the shares which they issue, a rate of taxation of 40% whereas the rate of 35% applies only to companies whose seat is in Greece.

A MS may allow tax advantage for non-residents over residents. Of course

---

92 The Court cites: *Finanzamt Köln-Altstadt v Schumacker* (Case C-279/93) [1995] STC 306 at 325, paras 31 to 32, *Wielockx v Inspecteur der Directe Belastingen* (Case C-80/94) [1995] STC 876 at 887, para 18; *Asscher v Staatssecretaris van Financiën* (Case C-107/94) [1996] STC 1025 at 1045, para 41.

93 The Court cites: *Finanzamt Köln-Altstadt v Schumacker* (Case C-279/93) [1995] STC 306 at 325, paras 36 to 38; *Asscher v Staatssecretaris van Financiën* (Case C-107/94) [1996] STC 1025 at 1045, para 42.

the rule could hardly be otherwise, given the basic structure of international tax, under which:

(1) residents are subject to tax on foreign income and non-residents are not;

(2) residents are often subject to tax at a higher rate than non-residents.

But a MS may not allow tax advantage for residents over non-residents. In the former case there are relevant "differences" and in the latter case there are no relevant "differences". The policy based nature of the distinction is evident.

60.8.12 *Discrimination against non-residents*

In RBS, the ECJ said:

> 28. As far as the method of determining the taxable base is concerned, the Greek tax legislation does not establish, as between companies having their seat in Greece and companies which, whilst having their seat in another member state, have a permanent establishment in Greece, any distinction such as to justify a difference of treatment between the two categories of companies. As the Commission points out ... tax is calculated, in the case of both Greek and foreign companies, on net income or profits after deduction of the part thereof corresponding to non-taxable receipts, this being determined according to that method both for Greek companies and for foreign companies.[94]

In *Gielen*[95] the ECJ said:

> 40. ... under the national legislation at issue in the main proceedings, a resident taxable business operator may include, for the purposes of calculation under the hours test which gives rise to the right to the self-employed person's deduction, both hours worked in another member state and those worked in the Netherlands, whereas a non-resident taxable business operator can include only hours worked in the Netherlands in that calculation.
>
> 41. ... the Netherlands government recognises in its written observations that this amounts to discrimination based on place of residence.
>
> 42. It must therefore be held that, with regard to satisfaction of the 'hours test' for the purposes of the self-employed person's deduction, the national legislation at issue in the main proceedings treats taxable persons differently depending on whether or not they are resident in the

94 *Royal Bank of Scotland plc v Greek State* [2000] STC 733.

95 *Gielen v Staatssecretaris van Financiën* [2010] STC 1053.

Netherlands....

43. More specifically, the court has indeed accepted, in cases relating to taxation of the income of natural persons, that the situation of residents and the situation of non-residents in a given member state are not generally comparable, since there are objective differences between them, both from the point of view of the source of the income and from the point of view of their ability to pay tax or the possibility of taking account of their personal and family circumstances.[96]

44. However, the court has made it clear that, in the case of a tax advantage which is not available to a non-resident, a difference in treatment as between the two categories of taxpayer may constitute discrimination for the purposes of the Treaty on the Functioning of the European Union where there is no objective difference between those categories such as to justify different treatment in that regard (Talotta (para 19) and the case law cited, and Renneberg (para 60)).

45. The Hoge Raad points out that the self-employed person's deduction is not related to the personal capacity of taxable persons but rather to the nature of their activity. That deduction is granted to business operators whose main activity is running their business, which is demonstrated, inter alia, by satisfying the ‹hours test'.

46. In so far as that deduction is granted to all taxable business operators who have satisfied that test, inter alia, it must be held that it is not relevant in that regard to make a distinction according to whether those business operators performed their work in the Netherlands or in another member state.

47. Consequently, as was stated by the Advocate General in point 39 of his opinion, for the purposes of the self-employed person's deduction, the situation of non-resident taxable persons is comparable to that of resident taxable persons.[97]

48. In those circumstances, it must be concluded that national legislation which, for the purposes of a tax advantage, such as the self-employed person's deduction at issue in the main proceedings, uses an ‹hours test' in such a way as to prevent non-resident taxable persons from including hours worked in another member state risks operating primarily to the detriment of those taxable persons. Consequently, such legislation

96 The CJEU cites: *Talotta v Belgium* (Case C-383/05) [2008] STC 3261, para 19; *Renneberg v Staatssecretaris van Financien* (Case C-527/06) [2008] ECR I-7735, para 59.

97 The CFEU cites: *Gerritse v Finanzamt Neukölln-Nord* (Case C-234/01) [2004] STC 1307, para 27; *Conijn v Finanzamt Hamburg-Mitte-Altstadt* (Case 346/04) [2006] ECR I-6137, para 20.

constitutes indirect discrimination on grounds of nationality for the purposes of art 49 TFEU.

60.8.13 *Option to be treated as resident*

In *Gielen*[98] the ECJ continued:

> 49. That conclusion is not called into question by the argument that the option to be treated as a resident taxable person is capable of remedying the discrimination at issue.
> 50. It should be noted, at the outset, that the option to be treated as a resident taxable person provides non-resident taxable persons, such as Mr Gielen, with a choice between a discriminatory tax regime and one which is ostensibly not discriminatory.
> 51. It has, however, to be pointed out in that regard that such a choice is not, in the present case, capable of remedying the discriminatory effects of the first of those two tax regimes.
> 52. As the Advocate General stated, in essence, in point 52 of his opinion, if such a choice were to be recognised as having the effect described, the consequence would be to validate a tax regime which, in itself, remains contrary to art 49 TFEU by reason of its discriminatory nature.
> 53. In addition, as the court has already had the opportunity to clarify, the fact that a national scheme which restricts the freedom of establishment is optional does not mean that it is not incompatible with European Union law.[99]
> 54. Consequently, the choice offered, in the dispute in the main proceedings, to non-resident taxable persons by means of the option to be treated as resident taxable persons does not serve to neutralise the discrimination established in para 48 above.
> 55. It follows from all of the foregoing that art 49 TFEU [FoE] precludes national legislation which, in relation to the granting of a tax advantage, such as the self-employed person's deduction at issue in the main proceedings, is discriminatory towards non-resident taxable persons, even though those taxable persons may opt for the regime applicable to resident taxable persons in order to benefit from that tax advantage.

Although the option did not remedy the defect in that case, it is possible that taxpayer options may do so in other cases.

98 *Gielen v Staatssecretaris van Financiën* [2010] STC 1053.

99 The Court cites: *Test Claimants in the FII Group Litigation v IRC* [2007] STC 326, para 162).

60.9 State aid

State Aid rules constitute a significant restriction on the UK's freedom to impose tax rules.

There is an interesting interaction with Scottish devolution. The UK government cannot set a corporation tax rate that varies across the UK: this would be regarded as providing preferential treatment for different areas. Different rates can only therefore be achieved by devolving tax powers. To be EU law compliant the proposal would have to meet the criteria set out in *Portugal v Commission*, (the Azores case): institutional autonomy, procedural autonomy and fiscal autonomy.[100]

Gibraltar's proposed corporation tax regime was held to breach the rules in *Commission v Government of Gibraltar and United Kingdom*.[101]

State Aid may sometimes be convenient for the government in that it provides an excuse for actions which would otherwise be controversial.[102]

This only rarely concerns practitioners in the context of the issues discussed in this book.

60.10 Section 86 TCGA

Section 86 TCGA constitutes a restriction on FoE where the settlor is a MS national, provided the trust is an undertaking for the purposes of FoE.[103]

60.11 IHT and EU law

In December 2011 the EC stated:

> ... Some Member States apply a higher tax rate if the assets, the deceased and/or the heir are located outside their territory. In such cases, EU law is clear: Member States are obliged to respect the basic principles of non-discrimination and free movement set out in the Treaties...
>
> **Next steps**
>
> ... In 3 years time, the Commission will present an evaluation report showing how the situation has evolved, and decide on this basis whether further measures are necessary at national or EU level. Meanwhile, the Commission, as guardian of the Treaties, is continuing to take the necessary steps to act against discriminatory features of Member States

100 Case C-88/03

101 Cases C-106/09, C-107/09.

102 See 5.1 (Trustee residence: Introduction).

103 See 60.4.1 (What is "establishment"?).

taxation rules.[104]

IHT is gradually becoming EU law compliant, with recent changes including the extension of agricultural property relief to land in the EU (2009) and the extension of IHT relief to EU charities (2010 – 2011).[105]

The EC Working Paper provides a helpful summary of case law relevant to IHT as at December 2011.[106] The CJEU found a breach of EU law in 8 of the 10 reported cases. The EC's success rate is comparable to that of HMRC in the UK Courts.

60.11.1 *Discrimination against non-residents*

A number of cases involved more favourable rules given to residents of the domestic MS as against residents of other MS: these have regularly been held to breach FMC or FoE:

Barbier:[107] Domestic IHT law allowed a deduction from the value of an estate if the deceased lived in that Member State at the time of death but not if the deceased resided in another Member State. The rule breached FMC. The value of an obligation attached to the property should be taken into account for tax purposes irrespective of the Member State of residence of the deceased.

Eckelkamp:[108] Domestic IHT law disallowed a deduction for charges on immovable Belgium property owned by non-resident. The rule breached FMC.

Arens-Sikken:[109] Domestic IHT law allows an heir is to deduct debts relating to the property inherited only where the person whose estate is

107 Case C-364/01.

108 Case C-11/07.

109 Case C-43/07.

being administered was residing, at the time of death, in the Member State in which the property is situated. The rule breached FMC. For the purposes of assessing the compatibility with EC law of domestic inheritance tax legislation, the existence of a tax advantage (ie tax credit) granted unilaterally by another Member State is not relevant.

Mattner:[110] A domestic gift tax relief applicable only where donor and donee are resident in Germany. The rule breached FMC.

Van Hilten-Van Der Heijden:[111] Domestic IHT law taxed the estate of a national who dies within 10 years of ceasing to be resident in that MS: rule compatible with FMC, particularly if the legislation in question allowed relief for inheritance taxes levied by other States. The important point was that the rule did not distinguish between residents and non-residents.

Thus UK s.267 IHT deemed domicile rules are EU law compliant.

60.11.2 *Discrimination against foreign property*

Jäger:[112] Domestic IHT law allowed relief comparable to IHT agricultural property relief for agricultural land in Germany. The rule breached FMC.

For practical implications, see 62.4.3 (Exemption for other MS government securities).

60.11.3 *Miscellaneous*

Geurts:[113] Domestic IHT law allowed an exemption for family undertakings which employed at least five workers in the same Member State. The rule breached FoE.

Halley:[114] Domestic IHT law provided a limitation period for the tax authority to challenge valuations in IHT returns. The period was usually 2 years. However, in the case of shares in a company resident outside Belgium, the period was 10 years. The rule breached FMC.

60.12 Pursuing EU law claims

As an alternative to pursuing points directly, a taxpayer may complain to

CHAPTER SIXTY ONE

DEEMED DOMICILE FOR IHT

61.1 IHT deemed domicile: Introduction

There are three types of domicile for IHT. We need terminology to describe them and I use the following terms:

(1) General law domicile ("**actual domicile**").[1]

(2) IHT deemed domicile:

(a) under s.267 IHTA ("**s.267 deemed domicile**")

(b) under s.267ZA IHTA ("**spouse election domicile**")

This chapter considers the two types of deemed domicile (**"IHT deemed domicile").** A person who is deemed domiciled in the UK for IHT purposes under these rules is described as **"IHT deemed domiciled"**.

61.1.1 *Scope of IHT deemed domicile*

IHT deemed domicile applies for (almost) all IHT purposes but not for other taxes. For example, it does not affect eligibility for the IT/CGT remittance basis.

The two exceptional situations where IHT deemed domicile does not apply for IHT are discussed elsewhere:

(1) FOTRA securities and qualifying certificates of Islanders[2]

(2) Estate Duty double tax treaties[3]

61.2 S.267 deemed UK domicile

A foreign domiciliary can often live almost indefinitely in the UK without acquiring a UK domicile of choice and so (more or less) exempt from inheritance tax. The s.267 deemed domicile rule seeks to identify foreign

---

1 See 3.1 (Domicile: Introduction).

2 See 62.5.1 (Disapplication of IHT deemed domicile rule). For these exemptions generally, see 62.4 (Non-settled property: FOTRA securities); 62.12 (Trusts: FOTRA Securities); 62.8 (Individual domiciled in Channel Islands or Isle of Man).

3 See 69.5 (Domicile requirements of treaty IHT exemption).

domiciliaries who have close UK connections and provides that for IHT purposes, such individuals are generally treated as if they were UK domiciliaries, and so (more or less) within the full scope of IHT.

Section 267(1) IHTA provides:

> A person not domiciled in the UK at any time (in this section referred to as "the relevant time") shall be treated for the purposes of this Act as domiciled in the UK (and not elsewhere) at the relevant time if—
>
> (a) he was domiciled in the UK within the three years immediately preceding the relevant time, or
>
> (b) he was resident in the UK in not less than seventeen of the twenty years of assessment ending with the year of assessment in which the relevant time falls.

"S.267 deemed domicile" is not an altogether helpful label, but no short label could do justice to the rather complicated rules.

In this book:

"The 3-year domicile rule" is the rule in para (a)

"The 17-year residence rule" is the rule in (b)

61.2.1 *3-year domicile rule*

The 3-year domicile rule concerns the person who is actually UK domiciled and who loses their UK domicile. Such a person is IHT deemed domiciled for three years from the date of their change of domicile.

The IHT Manual gives a straightforward example:

> **Example 1** (Paula)
>
> P has an English domicile and lives in England. She retires from work and decides that she wants to live for the rest of her life in Spain. She goes to Spain and takes a Spanish domicile of choice on 31 January 2007. She dies on 1 January 2010 still in Spain.
>
> Because of the deemed domicile 'three year rule' she is deemed domiciled in the UK at her death and her world wide estate is chargeable to IHT. Her estate can, of course, claim tax relief for any Inheritance Tax paid in another country.

Unlike the 17-year residence rule, the three year period is not related to years of assessment.

Section 267(5) IHTA provides:

> In determining for the purposes of this section whether a person is, or at any time was, domiciled in the UK, sections 267ZA and 267ZB are to be

ignored.

Thus spouse election domicile and s.267 deemed domicile operate independently: the loss of spouse election domicile does not give rise to s.267 deemed domicile under the 3-year domicile rule.

61.2.2 *17-year residence rule: Time of acquisition of IHT deemed domicile*

The 17-year residence rule concerns the person who is not actually UK domiciled but who becomes resident here. Once they have been resident in the UK for 17 out of the last 20 years of assessment they become IHT deemed domiciled. In the discussion below I abbreviate "years of assessment" to "tax years".

A person may meet this condition before they have been present in the UK for 17 complete years. In theory, fifteen years and a few days may suffice:

(1) An individual who arrives in the UK on 5 April 2003 may arguably be resident in the UK in the tax year 2002/03. (Although this seems surprising, this was the HMRC view of the pre-SRT residence rules, if the individual came to the UK to live here permanently or intending to stay for three years or more.)

(2) If they are still resident in 2018/19 they may be resident in the tax year 2018/19. The 17-year residence condition would then be satisfied.

Under the SRT, one may not know whether one is resident in a tax year until well into the year, or even until some time after the year. So during the 17th year of residence one may not know whether or not one is IHT deemed domiciled. The taxpayer must guess as best they can, and if that proves to be wrong, then puts in a return or tax reclaim later if needed.

The 17-year residence rule does not apply to visiting forces.[4]

It may be useful to set out an aide memoire of when the 17-year residence rule begins to apply. Assuming a continual period of UK residence:

UK res: s.267 deemed dom	**UK res: s.267 deemed dom**
1997/98: 6 April 2013	2002/03: 6 April 2018
1998/99: 6 April 2014	2003/04: 6 April 2019
1999/20: 6 April 2015	2004/05: 6 April 2020
2000/01: 6 April 2016	2005/06: 6 April 2021
2001/02: 6 April 2017	2006/07: 6 April 2022

4 See App 5.4.2 (IHT deemed domicile).

2007/08: 6 April 2023
2008/09: 6 April 2024
2009/10: 6 April 2025
2010/11: 6 April 2026
2011/12: 6 April 2027
2012/13: 6 April 2028
2013/14: 6 April 2029
2014/15: 6 April 2030

61.2.3 *17-year residence rule: Time of loss of IHT deemed domicile*

If an individual has been UK resident continuously for a block of 17 tax years, IHT deemed domicile under the 17-year residence rule ceases to have effect at the start of the 4th year of non-residence. The matter is best illustrated by a table:

Year	**Resident Years**	**20 years ending year:**				
		2009/10	2010/11	2011/12	2012/13	2013/14
1990/91	*Not relevant*	1				
1991/92	*Not relevant*	2	1			
1992/93	*Not relevant*	3	2	1		
1993/94	Resident 1	4	3	2	1	
1994/95	Resident 2	5	4	3	2	1
1995/96	Resident 3	6	5	4	3	2
1996/97	Resident 4	7	6	5	4	3
1997/98	Resident 5	8	7	6	5	4
1998/99	Resident 6	9	8	7	6	5
1999/00	Resident 7	10	9	8	7	6
2000/01	Resident 8	11	10	9	8	7
2001/02	Resident 9	12	11	10	9	8
2002/03	Resident 10	13	12	11	10	9
2003/04	Resident 11	14	13	12	11	10
2004/05	Resident 12	15	14	13	12	11
2005/06	Resident 13	16	15	14	13	12
2006/07	Resident 14	17	16	15	14	13
2007/08	Resident 15	18	17	16	15	14
2008/99	Resident 16	19	18	17	16	15
2009/10	Resident 17	**20**	19	18	17	16
2010/11	Non-resident 1		**20**	19	18	17
2011/12	Non-resident 2			**20**	19	18
2012/13	Non-resident 3				**20**	19
2013/14	Non-resident 4					**20**
Deemed domicile in 2013/14		**Yes**	**Yes**	**Yes**	**Yes**	**No**

Suppose an individual is resident in the UK throughout the block of 17 tax years from 1993/94 to 2009/10. We have to identify a relevant time. We then have to identify the tax year in which the relevant time falls. The table considers transfers of value in each of the 5 years 2009/10 to 2013/14.

We then have to identify "the twenty years of assessment ending with the year of assessment in which the relevant time falls". For each of the years 2009/10 to 2013/14 those 20 years include the 17-year block (shaded in the table), so the individual is IHT deemed domiciled.

The IHT Manual gives an example:

> **Example 3** (Humberto)
> H is 70 - he has a Portuguese domicile but has been tax resident in England since he was 20. He decides that he wants to move back to Portugal and he leaves the UK for good on 1 January 2007. On 2 January 2007 he makes a gift of £400,000 to a Gibraltar discretionary settlement from his Jersey Bank account. Without the deemed domicile provisions this would be a gift of excluded property.
> However the '17 out of 20' year rule will apply to this transfer as H was tax resident in the UK for part of the tax before he left the UK. There is no provision in the Income Tax Acts for splitting a Tax year in relation to residence, H is assessed and charged Income Tax as if he was UK Tax resident for the whole year. As a result he was non-resident in 2007/08. 2008/09 and 2010/11 only and the transfer is caught by the 17/20 rule.

H should have made a gift of FOTRA securities, which would not have been taxable.

61.2.4 *Comparison of 3- year domicile and 17-year residence rules*

It is easy to envisage cases where a person is caught by one rule and not by the other.

For instance, a person who has always been UK resident and domiciled and who ceases to be UK domiciled on 1 August 2008 and leave the UK a that time. They cease to be caught by the 3-year domicile rule on 1 August 2011. However, as they were UK resident in 2008/09, they will still be IHT deemed domiciled under the 17-year residence rule until 6 April 2012 (the start of the year 2012/13).

Again, a UK domiciled person may reside outside the UK for twenty years, and subsequently acquire an actual foreign domicile. Such a person is not affected by the 17-year residence rule. But three more years must pass before they cease to be UK domiciled under the 3-year domicile rule.

61.2.5 *Meaning of "residence" for 17-year residence rule*

Section 267(4) IHTA provides:

> For the purposes of this section the question whether a person was resident in the UK in any year of assessment shall be determined as for

the purposes of income tax.

Thus in this context "residence" has its normal income tax meaning. From 2013/14, the statutory residence test applies.

For years prior to 1993/94 s.267(4) IHTA provided:

> For the purposes of this section the question whether a person was resident in the UK in any year of assessment shall be determined as for the purposes of income tax *without regard to any dwelling house available in the UK for his use*.

This excluded the (supposed) available accommodation rule but it went further and disregarded available accommodation for all residence purposes.[5] This remained significant when determining residence for the years up to 1992/93 which ceased to feature as part of the 17-year calculation in 2010. The issue might still arise in determining whether trust property is excluded property, as that depends on the domicile of the settlor at the time the trust was made.

IHT Manual provides:

> **10685. D31- Domicile outside the UK** [July 2011]
> Trusts & Estates, Inheritance Tax follow any advice given by PTI Advisory with one qualification. For the tax years before 6 April 1993, someone was considered to be resident in the UK if they visited the UK during the year and had a dwelling house in the UK, which was available for their use. However, availability of a dwelling house was ignored for the purposes of our 17/20 rule (IHTA84/S267 (4)). In the absence of any information, you should assume that advice given by PTI Advisory for the purpose of Income Tax made before 93/94 was **not** made on the basis of this rule alone.

Split years count as full years of residence for s.267 deemed domicile purposes. The pre-2013 split year concession did not apply and from 2013 the position is statutory.[6]

61.3 IHT deemed domiciled individual leaving the UK

Suppose:

(1) A person who is not actually UK domiciled becomes IHT deemed domiciled, having spent 17 tax years resident here.

---

5 See the 2012/13 edition of this work para 3.6 (Accommodation in the UK).

6 See 7.1 (Year of arrival and departure).

(2) They then cease to be resident in the UK. In the fourth tax year after departure, they cease to satisfy the 17-year residence rule.

Is the person still treated as domiciled here for three years under the 3-year domicile rule? In other words, does the 3-year domicile rule apply to a person who was only a deemed domiciled under the 17-year residence rule? The answer is, no. If that were wrong, then the following absurdity arises. Suppose T, non-resident for many years, ceases to be actually UK domiciled. In years 1-3 T is still IHT deemed domiciled. In year 4 T ceases to be deemed domiciled. HMRC could argue that since T was (deemed) domiciled in year 3, T must wait three more years before T can cease to be deemed domiciled. Then, of course, three years later T is still deemed domiciled. T can never throw off the deemed domicile. This shows that "domicile" in s.267(1)(a) means actual domicile and not IHT deemed domicile. The word should have the same meaning throughout the section.[7]

61.4 Domicile of child of a IHT deemed domiciled parent

A child in principle acquires the domicile of their father at the time of their birth as a domicile of origin; and if the father's domicile changes while the child is under 16, the child in principle acquires the father's new domicile as a domicile of dependency. Does IHT deemed domicile count for this purpose? Suppose:

(1) A father ("F") is actually foreign domiciled but IHT deemed domiciled when his child ("C") is born; or

(2) F is not IHT deemed domiciled when C is born but becomes IHT deemed domiciled while C is under 16.

It is the old question of how far one carries the deeming. It is suggested that the deemed domicile of F does not affect the domicile of C. The question may not arise directly in that form, as the domicile of children and young persons only rarely needs to be ascertained. When C is adult, it is suggested that his domicile for IHT purposes is determined on the basis of his actual foreign domicile of origin; one does not deem C to have a fictional UK domicile of origin. For s.267 only requires F to be treated as UK domiciled. The section is not needed for C, as C will himself become IHT deemed domiciled once he has been UK resident for 17 tax years.

---

7 This is consistent with *Russell v IRC* [1988] STC 195.

61.5 1974 transitional rules

Section 267(3) IHTA contains five transitional rules:

> Para (a) of subsection (1) above shall not apply in relation to a person who (apart from this section) has not been domiciled in the UK at any time since 9th December 1974 ...

This disapplies the 3-year domicile rule only. It would only apply in a relatively rare case of someone who was actually UK domiciled and ceased to be so before 9 December 1974.

> and para (b) of that subsection shall not apply in relation to a person who has not been resident there at any time since that date ...

This disapplies the 17-year residence rule only. It would only apply to someone who had been UK resident for 17-years and ceased to be so before 9 December 1974.

> and that subsection shall be disregarded—
> (a) in determining whether settled property which became comprised in the settlement on or before that date is excluded property,

This applies to pre-9 December 1974 settlements.

> that subsection shall be disregarded— ...
> (b) in determining the settlor's domicile for the purposes of section 65(8) above in relation to settled property which became comprised in the settlement on or before that date, and
> (c) in determining for the purpose of section 65(8) above whether the condition in section 82(3) above is satisfied in relation to such settled property.

This applies to the exemption for FOTRA securities.

61.6 Spouse election domicile

Section 267ZA IHTA provides:

> (1) A person may, if condition A or B is met, elect to be treated for the purposes of this Act as domiciled in the UK (and not elsewhere).
> (2) A person's personal representatives may, if condition B is met, elect for the person to be treated for the purposes of this Act as domiciled in the UK (and not elsewhere).

In the discussion below:

An election under s.267A is a **"spouse**[8] **election**"

IHT deemed domicile under s.267ZA(1) is **"spouse election domicile"**

The conditions in s.267ZA are **"spouse election conditions A and B"**.

The point of making a spouse election is to qualify for the unrestricted IHT spouse exemption: see 73.2 (Restricted IHT spouse exemption for foreign domiciled spouse).

The development of the provisions can be traced through an HMRC Technical Note[9] but that is now of historic interest only.

61.6.1 *Spouse election condition A*

Section 267ZA(3) IHTA provides:

> Condition A is that, at any time
> [a] on or after 6 April 2013 and
> [b] during the period of 7 years ending with the date on which the election is made,
> the person had a spouse or civil partner who was domiciled in the UK.

It is necessary to consider two individuals, which statute calls
- "the person" and
- "the spouse".

To avoid confusion, I refer to them as:

"**W (the electing person)**" and

"**H (the donor spouse)**"

My terminology embodies certain assumptions. The first assumption is that H makes a gift to W. The terminology embodies a gender assumption, which the drafter of the statute rightly avoids, namely that *H* makes a gift to *W*. But it does make discussion of the provisions slightly easier to follow than if the spouses were called X and Y, and in this rather confusing area of law, the reader may grasp at any aid to navigation.

In the usual course of events, W will survive H, but of course H may die first.

Spouse election condition A is just that H (the donor spouse) was UK domiciled or deemed domiciled. But in practice W (the electing person)

---

8 I use the word "spouse" to include a civil partner.

9 HMRC, "IHT: spouses and civil partners domiciled outside the UK" (December 2012) accessible *http://www.hmrc.gov.uk/budget-updates/11dec12/784.pdf*.

will only[10] consider a spouse election if:

(1) H makes (or intends to make) a gift to W.
(2) H is UK domiciled or IHT deemed domiciled at the date of the gift.
(3) W is not UK domiciled or IHT deemed domiciled at the date of the gift.
(4) The gift would or might otherwise be chargeable being:
    (a) made on the death of H or
    (b) a failed PET (H has died within 7 years of the gift) or
    (c) a PET anticipated to become a failed PET (H still living but may not survive 7 years from the gift).

In the following discussion, it is assumed that
- H is UK domiciled (at the time of the gift)
- W is not UK domiciled (at the time of the gift), and
- the gift from H to W is a PET.[11]

That is the scenario where the IHT spouse election is important.

61.6.2 *Spouse election condition B*

Section 267ZA(4) IHTA provides:

> Condition B is that
> [A] a person ("the deceased") dies and,
> [B] at any time
> [i] on or after 6 April 2013 and
> [ii] within the period of 7 years ending with the date of death,
> the deceased was—
> (a) domiciled in the UK, and
> (b) the spouse or civil partner of the person who would, by virtue of the election, be treated as domiciled in the UK.

It is necessary to consider two individuals, which statute calls:
- "the deceased" and
- "the spouse who will by virtue of the spouse election be treated as UK domiciled".

To avoid confusion, I refer to them as:
"**H (the deceased donor spouse)**" and
"**W (the electing person)**"

---

10 There may, exceptionally, be a case where an election may be made to qualify for relief under a DTA even in the absence of a gift, but I doubt if that would ever happen.

11 See 73.2 (Restricted IHT spouse exemption for foreign domiciled spouse).

Spouse election condition B is just that H (the deceased donor spouse) was UK domiciled or deemed domiciled. But in practice W (the electing person) will only consider a spouse election if:

(1) H makes a gift to W.
(2) H is UK domiciled or IHT deemed domiciled at the date of the gift.
(3) W is not UK domiciled or IHT deemed domiciled at the date of the gift.
(4) The gift would otherwise be chargeable being:
    (a) made on the death of H or
    (b) a failed PET (H has died within 7 years of the gift).

"Lifetime election" and "death election"

Section 267ZB(1) IHTA defines these terms:

> For the purposes of this section–
>
> (a) references to a lifetime election are to an election made by virtue of section 267ZA(3) [condition A], and
>
> (b) references to a death election are to an election made by virtue of section 267ZA(4) [condition B].

The terminology is slightly confusing:

A *lifetime* election (condition A) is made by W (the electing spouse) so W must be alive at the time of the election. But H (the donor spouse) may be alive or dead at the time of the election.

A *death* election (condition B) can only be made after H has died. But W (the electing person) may be alive, or else she may have died (in which case the election is made by W's PRs).

It might have been clearer to refer to a "condition A election" and a "condition B election". I will use the terms

"lifetime election (condition A)" and

"death election (condition B)"

Summarising in a table:

W	**H**	**Election by W**
Alive	Alive	Lifetime election (condition A)
Alive	Dead	Lifetime election or death election (conditions A or B)
Dead	Alive	No election possible until H dies
Dead	Dead	Death election (condition B)

61.6.3 "The 7 year period" and conditions A and B compared

Spouse election conditions A and B refer to distinct periods, thus:

Condition	**Period**
Condition A	7 years ending with the date on which the election is made
Condition B	7 years ending with the date of death H (the deceased donor spouse)

I refer to these as **"the 7 year periods"**.

Condition B is not so different from condition A, except that:

(1) H (the deceased donor spouse) must have died.
(2) The 7 year periods are different:
    (a) Condition A: the 7 year period runs up to the date of the election.
    (b) Condition B: the 7 year period runs up to the date of the death of H (the deceased donor spouse).
(3) If W has died, her PRs may make an election (a death election) under condition B. The PRs cannot make a lifetime election under condition S: if W has not made a lifetime election during her life, the opportunity is lost.

61.6.4 *Date from which spouse election domicile takes effect*

It is necessary to distinguish:

(1) The date that the spouse election is *made*
(2) The date that the spouse election *takes effect*; this is earlier, and will be the date from which spouse election domicile starts.

The starting point is that W (the electing person) can choose the date from which the spouse election takes effect. Section 267ZB(3) IHTA provides:

> A lifetime or death election is treated as having taken effect on a date specified, in accordance with subsection (4), in the notice.

Then s.267ZB(4) IHTA goes on to impose a number restrictions on that freedom of choice. Firstly:

> (4) The date specified in a notice under subsection (3) must—
> (a) be 6 April 2013 or a later date

The earliest date that a spouse election can take effect is 6 April 2013. That is the effective commencement date of the spouse election regime. EU law may provide a remedy for transfers of value before 6 April 2013.[12] The EU law remedy will continue to be important until 6 April 2020 (at which point PETs made before 6 April 2013 must become exempt). The

12 See 73.2.3 (EU law aspects).

EU law remedy will continue to be important even after 2020 where:
(1) H makes a gift to W before 2013.
(2) The gift is a gift with reservation of benefit.
(3) H dies and there is a charge under the GWR rules.
In practice that may not happen often (and if it does, the GWR may often be overlooked).

Section 267B(4) IHTA continues:

> (4) The date specified in a notice under subsection (3) must ...
> (b) be within the period of 7 years ending with—
> (i) in the case of a lifetime election [condition A], the date on which the election is made, or
> (ii) in the case of a death election [condition B], the date of the deceased's death ...

In the case of a lifetime election (condition A), the election must take effect (and spouse election domicile begins) within 7 years of the election. If H (UK domiciled) makes a gift to W (foreign domiciled), and the gift is a PET, there is a choice:
(1) W could elect immediately.
(2) W could wait and see. If H died (or was expected to die) then an election could be made later:
(a) If H survived 7 years then an election should not be needed.[13]
(b) If H died within the 7 year period, W could make an election after the death. This allows W to consider the trade-off between the advantages and disadvantages of the election in the light of the circumstances at the time. For instance, if H survived more than 3 years from H's gift, then W's election decision could take into account IHT taper relief.
(c) There would be a risk that H might die just at the end of the 7 year period, in which case W may be unable to elect in time. But if an election is signed, and ready to dispatch if needed:
(i) The risk is small.
(ii) If W does not elect, there would at least be 80% taper relief on H's gift.[14]

If W has died, without electing, we move to the death election (condition

13 Unless there is a GWR.
14 There is also perhaps a chance that HMRC may allow a late election but one could not expect that.

B). Here the PRs of W (the electing spouse) can only make the election
(1) if H has died, or
(2) if H survives W, but dies within 2 years of W's death.

Section 267ZB IHTA provides:

> (4) The date specified in a notice under subsection (3) must—
> (c) meet the condition in subsection (5).

So we turn to s.267ZB(5) IHTA:

> The condition in this subsection is met by a date if, on the date—
> (a) in the case of a lifetime election—
> (i) the person making the election was married to, or in a civil partnership with, the spouse or civil partner, and
> (ii) the spouse or civil partner was domiciled in the UK, or
> (b) in the case of a death election—
> (i) the person who is, by virtue of the election, to be treated as domiciled in the UK was married to, or in a civil partnership with, the deceased, and
> (ii) the deceased was domiciled in the UK.

In short, the donor spouse must be UK domiciled when the spouse election takes effect, but that does not matter as in practice the election is only wanted in those circumstances.

If H (the donor spouse) has become UK domiciled, W may still make an election to cover an earlier period when H was non-UK domiciled.

The IHT Manual correctly provides:

> **IHTM13046 - Domicile: election by non-UK domiciled spouse or civil partner: the date the election takes effect** [Nov 2013]
> The person making the election does not need to be married or in a civil partnership when the election is made

Individuals who divorce may make an election to cover the period they were married.

61.6.5 *Cessation of spouse election domicile*

IHT deemed domicile is good from the point of view of allowing the unrestricted IHT spouse exemption; but of course it has the drawback that IHT may be due on the death of W (the electing spouse) and on gifts made by her. How much that matters depends of course on all the facts of the case. It may be a serious drawback; it may not. The point of the election is to allow the electing spouse to weigh the advantages and disadvantages.

Section 267ZB(9) IHTA provides:

> A lifetime or death election cannot be revoked.

There is one get-out from spouse election domicile: non-residence. Section 267ZB(10) IHTA provides:

> If a person who made an election under section 267ZA(1) [spouse election] is not resident in the UK for the purposes of income tax for a period of four successive tax years beginning at any time after the election is made, the election ceases to have effect at the end of that period.

So an electing person will cease to be IHT deemed domiciled, and so cease to be liable to IHT on foreign situate assets, after 3 non-resident tax years;[15] that effectively breaks their connection with the UK.

The IHT Manual provides:

> **IHTM13049 - Domicile: election by non-UK domiciled spouse or civil partner: election ceasing to have effect** [Nov 2013]
> ...This approach is in line with the position where a taxpayer is deemed domiciled in the UK under IHTA84/S267(1)(b). To shake off that deemed domicile, they need to be resident outside the UK for four years.

In fact the rules are not aligned. The requirement to lose spouse exemption domicile is to be non-UK resident for four *successive* tax years and deemed domicile is lost at the end of the 4th year of non-residence. The requirement to lose s.267 deemed IHT domicile under the 17-year residence rule is to be non-resident for four tax years, but the non-resident years need not be successive and deemed domicile is lost at the start of the fourth year of non-residence.[16]

61.6.6 *Time limit for death election*

There is no express time limit as such for a lifetime election. However since the election can only take effect within the 7 year period up to the election, there is effectively a time limit of 7 years from the death of H (the deceased donor spouse).[17]

Section 267ZB(6) IHTA provides:

---

15 Assuming they are not then deemed IHT domiciled under s.267 IHTA, or actually UK domiciled.

16 See 61.2.3 (17-year residence rule: Time of loss of IHT deemed domicile).

17 See 61.6.2 (Spouse Election Condition B).

> A death election may only be made within 2 years of the death of the deceased or such longer period as an officer of Revenue and Customs may in the particular case allow.

Suppose the sequence of events is:
(1) H makes a gift to W (a PET).
(2) W dies (leaving H surviving).
(3) H dies more than 2 years later (but within 7 years of the gift).
W's PRs may want to elect to make H's gift exempt. They would depend on HMRC allowing a time extension. A refusal to allow extra time may breach EU law, as it penalises the foreign domiciled spouse. But W could have avoided the problem if she had make a lifetime election before she died.

61.6.7 *EU law compliance*

The CIOT say:

> **3 Non-compliance with EU law**
> 3.1 The proposed changes to do not appear to us to be compliant with EU law. It is disappointing that the Technical Note fails to address this aspect at all.
> 3.2 Although, from an EU perspective, the availability of an election, which allows a non-domiciled spouse to elect to be UK-domiciled for IHT purposes, appears to level the playing field, this is a disproportionate response to the perceived problem of assets escaping the inheritance tax net because an election will have the effect of bringing all of the non-domiciled spouse's assets within the UK IHT net.
> 3.3 The European Court has held (Case C-440/08 *F. Gielen v Staatssecretaris van Financiën*) that discrimination cannot be countered by the availability of an election to be treated in particular way if the making of the election, while alleviating the specific issue causing the discrimination, puts the taxpayer in a worse position in some other respect.[18]
> 3.4 In our view a more proportionate response to the discrimination faced by non-domiciled spouses would be to provide for an election which, if made, would apply only to the assets being transferred, that is there would be no inheritance tax on the transfer of value to the spouse, but that the assets would then be caught by UK inheritance tax on a subsequent transfer of value by the non-domiciled spouse regardless of

18 See 60.8.14 (Option to be treated as resident).

where they are situated.[19]

HMRC have not responded, at least publically, and the CIOT have followed this up with a complaint to the EC. It will be interesting to watch how the battle proceeds.

61.6.8 *Planning*

The IHT Manual provides some IHT planning advice:

> **IHTM13047 - Domicile: election by non-UK domiciled spouse or civil partner: consequences of making an election** [Nov 2013]
> When an election is made, the person making the election will be treated as domiciled in the UK for all IHT purposes from the date stated in the election. Consequently, any transfers between spouses or civil partners made after that date qualify for full spouse or civil partner exemption.
> Whether to make an election and the date it is take effect from will require careful consideration as it could mean that a transfer that did not give rise to a charge at the time is was made, proves to be chargeable.
> **Example** (David and Birgit) ("H" and "W")
> H, who is domiciled in the UK transfers property worth £1m in 2014 to his spouse, W who is not domiciled in the UK.
> Subsequently, in 2016, W transfers some German shares to the trustees of an offshore[20] trust.
> H dies in 2019.

The HMRC analysis is as follows:

> At the time of H's transfer, the value transferred is exempt to the extent of £325,000 and a PET to the extent of £675,000.[21] Following his death, the failed PET is chargeable and after deducting the nil-rate band, £350,000 is subject to tax.
> B's transfer was a transfer of excluded property, IHTA84/S6(1). Following D's death, W has the choice of electing to be treated as domiciled in the UK. If she does so, the gift from H in 2014 will become fully exempt as a transfer where both spouses are domiciled in the UK.

---

19 CIOT, "IHT Spouses and Civil Partners domiciled outside the UK" (February 2013) accessible *http://www.tax.org.uk/Resources/CIOT/Documents/2013/02/130204%20IHT%20and%20NDS%20-%20CIOT%20comments.pdf*.

20 [Author's footnote] The residence of the trust is not relevant to the example.

21 [Author's footnote] It is assumed that H has not made earlier gifts which would reduce the IHT spouse exemption.

> However, W will then be treated as domiciled in the UK from 2014 for all IHT purposes. This means that her transfer to the trustees is no longer one of excluded property and will be subject to IHT. As a transfer to a trust, it will be immediately chargeable to tax.
> W will need to consider all the consequences of making an election...

W (or her advisors) will indeed have much to consider. Firstly, if she elects and falls within the scope of IHT, what will be the IHT on her death? Is she, or will she become non-resident for four years, so as to lose IHT spouse election domicile? Will the current law be held to be invalid under EU law and does she have to take the point now, or can she make the election and take it later?

The example assumes that W did not have to consider the position until the death of H in 2019. But if she is non-resident, she should consider the issue in 2016 when the gift was made. If she had made an election then, and was non-resident, her spouse election domicile would expire in 2020; by waiting until 2019, she extends the period during which she is at risk of IHT.

In fact, if W is non-resident, she should consider the position before H makes the gift. If W had made the spouse election in 2013, then the gift made in 2016 would be exempt, and spouse election domicile would expire in 2017. Even if W is in good health, insurance against the risk of death would be cheaper if the election is made sooner rather than later.

61.6.9 *Procedure for making election*

Section 267ZB(2) IHTA provides:

> A lifetime or death election is to be made by notice in writing to HMRC.

There is no prescribed form. The IHT Manual provides:

> **IHTM13043 - Domicile: election by non-UK domiciled spouse or civil partner: how to make an election** [Nov 2013]
> An election must be made by notice in writing and sent to HMRC. It must be made by the person who is not domiciled in the UK. There is no prescribed form of election, but for HMRC to keep meaningful records it must contain:
> - the full name and address of the person making the election, or for whom the personal representatives are making an election,
> - their date of birth and, if appropriate, their date of death,
> - the full name of their spouse or civil partner who is domiciled in the UK, and

- the date the election is to take effect from.

If you receive an election that does not contain all of the information we need you should write to the sender, using standard letter SL16, to ask for the missing information. The election should be sent to:
Trusts & Estates Risk Team (Elections), Inheritance Tax, Ferrers House, Castle Meadow Rd, Nottingham NG2 1BB.

61.6.10 *Due dates for payment of IHT and returns: Alteration of time limits*

A retrospective election could mean that gifts made by the electing spouse become retrospectively chargeable. This requires some tinkering with the rules relating to time limits and interest. Section 267ZB IHTA provides:

(7) Subsection (8) applies if—
(a) a lifetime or death election is made,
(b) a disposition is made, or another event occurs, during the period beginning with the time when the election is treated by virtue of subsection (3) as having taken effect and ending at the time when the election is made, and
(c) the effect of the election being treated as having taken effect at that time is that the disposition or event gives rise to a transfer of value.

(8) This Act applies with the following modifications in relation to the transfer of value—
(a) subsections (1) and (6)(c) of section 216 [date for payment of IHT] have effect as if the period specified in subsection (6)(c) of that section were the period of 12 months from the end of the month in which the election is made, and
(b) sections 226 and 233 [interest on unpaid tax] have effect as if the transfer were made at the time when the election is made.

61.6.11 *Informing PRs whether spouse election has been made*

The IHT Manual provides:

IHTM13045 - Domicile: election by non-UK domiciled spouse or civil partner: disclosure about elections [Nov 2013]
If a person who has made an election has died, it is possible that their personal representatives may want to know whether or not a lifetime election had been made. This is because it could have a significant impact on the tax liability that arises following their death. If they cannot trace any information amongst the deceased's papers, they may phone the Helpline to find out if we have any record of an election.

> You may not disclose any information about the existence of an election over the phone. Instead, you should ask the executors to make their request in writing and provide evidence that they are the people entitled to apply for a grant of representation.
> If the executors can demonstrate that they are appointed by sending us a copy of the Will, you can disclose whether or not the person has made an election and the date that the election took effect. You can also disclose this information to administrators, provided they can demonstrate that they are applying for letters of administration, or that they are entitled to apply. You should refer any case of doubt to Technical.

61.6.12 *Commentary*

I wonder if this was fully worked out at the time when the legislation was enacted. Probably not. One's confidence is slightly dented by s.267ZB(8) IHTA which provides:

> In determining for the purposes of this section whether a person making an election under this section is or was domiciled in the UK, section 267 is to be ignored.

This is otiose as the domicile of the person making the election (in my terminology, W, the electing person) is not relevant. The provision made sense under the original Finance Bill clauses, but lost its purpose when the provisions were amended at committee stage.

61.7 Tax planning for IHT deemed domiciled individual

An individual who is IHT deemed domiciled because of:
(1) a spouse election; or
(2) 17 years UK residence
will lose IHT deemed domicile status after three or four years non-residence. An individual who is IHT deemed domiciled because of a former actual UK domicile ceases to be UK domiciled 3 years after acquiring a foreign domicile.

For such individuals, a simple form of tax planning is to refrain from making any gifts until they have ceased to be IHT deemed domiciled.

A non-resident individual who is deemed IHT domicile may obtain exemption without waiting four years by purchasing FOTRA securities or some other property which qualifies as excluded property. This may be important for deathbed planning.

In the case of an individual who is IHT deemed domiciled but actually domiciled in the Isle of Man or in the Channel Islands there is scope for

acquiring excluded property in the form of exempt saving certificates.[22]

61.8 Domicile in Channel Islands or IoM

The law discussed in this section is of historic interest only, but there are some interesting territorial policy issues here which continue to resound.

Section 45(1)(c) FA 1975 formerly provided a person was deemed domiciled for IHT purposes if:

> he has, since 10th December 1974, become and has remained domiciled in the Islands[23] and, immediately before becoming domiciled there, he was domiciled in the UK.

This was unlike other types of deemed domicile in that it could continue without limit of time.

The rule was repealed by s.12 F(no.2)A 1983:

> (1) Section 45(1)(c) of the Finance Act 1975 (which treats certain persons who have become domiciled in the Channel Islands or in the Isle of Man as domiciled in the UK) shall cease to have effect.
> (2) This section has effect in relation to transfers of value made, and other events occurring, on or after 15th March 1983.

The repeal extends to the taxation (from 1983) of a settlement made by an Islander who was deemed domiciled under the former s.45(1)(c): the former deemed domicile of the settlor is now disregarded so the trust property may now be excluded property.

John Moore (then Economic Secretary to the Treasury) stated the reason for the repeal:

> The original justification for the [deemed domicile] rule applying to emigrants to the offshore islands was that they were thought to provide particularly convenient bases for those who wished to maintain some contact with the mainland. Morever, at the time when the rule was introduced the islands were within the exchange control area. It was thus easier to shift property there than elsewhere abroad. The rule has been strongly resented in the islands as being discriminatory. The removal of exchange control restrictions has deprived one of the main arguments in support of

---

22 See 62.8 (Individual domiciled in Channel Islands or Isle of Man).

23 Section 45(3) FA 1975 provided: "In this section "the Islands" means the Channel Islands and the Isle of Man."

the special rule of its force.[24]

Although John Moore did not mention it, I wonder if enforcability issues also affected the decision.

CHAPTER SIXTY TWO

EXCLUDED PROPERTY FOR IHT

62.1 Excluded property: Introduction

"Excluded property" is (more or less)[1] outside the scope of inheritance tax. There are ten classes of excluded property:

(1) Non-settled property:[2]
   (a) foreign situate property;
   (b) AUTs and OEICs;
   (c) FOTRA securities.
(2) Settled property:
   (a) foreign situate property;
   (b) AUTs and OEICs;
   (c) FOTRA securities.
(3) Qualifying certificates of Islanders (Channel Islands/Isle of Man domiciliaries).
(4) Property of visiting forces.[3]
(5) Reversionary interests in settled property.
(6) Decorations awarded for valour.[4]

Thus with an economy of language the exemptions for excluded property are used to serve several purposes:

(1) A territorial exemption
(2) Limiting the scope of IHT:
   (a) in order to encourage UK investment by foreigners (FOTRA securities, UK funds)

---

1 See 62.18 (Excluded property exemptions: Lifetime gift and death charges).

2 A note on terminology. I use the term "non-settled property" to describe property which is not held in a settlement for IHT purposes. The term used in the IHT Manual is "unsettled property".

3 See App 4.4.1 (Excluded property).

4 Section 6(1B) IHTA; this is too specialist a topic to discuss further here.

(b) to fit the scheme of the Act, avoid double taxation (relief for reversionary property)
(c) other meritorious cases (visiting forces, etc)

This chapter considers:
(1) The definition(s) of excluded property
(2) The reliefs for excluded property
(3) The reliefs for works of art, foreign currency bank accounts and foreign pensions, which (though not excluded property) qualify for some similar exemptions

62.1.1 *Cross references*

The following topics are considered elsewhere, see:
64.1 (Transfers between trusts and adding to trusts: Introduction).

62.2 Non-settled property: Foreign situate property

Section 6(1) IHTA provides:

> Property situated outside the UK is excluded property if the person beneficially entitled to it is an individual domiciled outside the UK.

Excluded property status depends on the domicile of the individual at the time the disposition is made. Likewise, excluded property status depends on the location of assets at that time only. It is irrelevant that the assets may previously have been situate in the UK. If a foreign domiciled individual transfers their property out of the UK the moment before they die, or the moment before they make a gift of the property, they obtain the full benefit of excluded property status: see *Kwok Chi Leung Karl v Commissioner of Estate Duty* [1988] STC 728. On the situs of assets, see 82.1 (Concept(s) of situs).

62.3 Non-settled property: Authorised unit trusts and OEICs

Section 6(1A) IHTA provides:

> [a] A holding in an authorised unit trust[5] and

5 Defined in s.272 IHTA:
"'authorised unit trust' means a scheme which is a unit trust scheme for the purposes of the Income Tax Acts (see section 1007 of the ITA 2007) and in the case of which an order under section 243 of the Financial Services and Markets Act 2000 is in force."

> [b] a share in an open-ended investment company[6]
> is excluded property if the person beneficially entitled to it is an individual domiciled outside the UK.

AUTs and OEICs will generally be UK situate assets. I refer to them together as **"UK funds"**. These are excluded property for all IHT purposes.

The relief only applies to a *holding* in an AUT or a *share* in an OEIC so other interests in AUTs and OEICs (for instance, options) are not excluded property. Perhaps that does not arise in practice.

The exemption for UK funds uses the expression "beneficially entitled" and the exemption for FOTRA securities uses the expression "beneficial ownership" but it is considered that the meaning is the same; for a discussion see 62.6 ("Beneficial ownership" of FOTRA securities).

62.4 Non-settled property: FOTRA securities

The next category of excluded property consists of FOTRA securities[7] (certain UK government securities, sometimes called exempt gilts). FOTRA securities are UK situate assets. Section 6(2) IHTA provides:

> Where securities have been issued by the Treasury subject to a condition authorised by section 22 of the F(No.2)A 1931 (or section 47 of the F(No. 2)A 1915) for exemption from taxation so long as the securities are in the beneficial ownership of persons of a description specified in the condition, the securities are excluded property if they are in the beneficial ownership of such a person.

FOTRA securities issued from 1 April 2005 are titled "Treasury Gilts". Earlier securities have one of the following names:

- Treasury Loan/Stock
- Conversion Loan/Stock
- Exchequer Loan/Stock
- Consolidated Loan/Stock
- War Loan

These names have only historic significance.

---

6 Defined in s.272 IHTA:
"'open-ended investment company' means an open-ended investment company within the meaning given by section 236 of the Financial Services and Markets Act 2000 which is incorporated in the UK."

7 "Free of Tax to Residents Abroad".

Products issued by National Savings and Investments are not FOTRA securities.

62.4.1 *Interest on FOTRA securities*

The IHT Manual provides:

> **27260 Exclusion of interest on exempt securities** [January 2014]
> The exclusion for exempt securities can also apply to certain payments of interest on the securities. Payments that qualify for the exclusion are:
> [1] warrants or coupons for interest already received but not encashed at the date of the relevant chargeable event
> [2] apportionment of interest due up to, but receivable after, the date of the chargeable event
> [3] in the case of a trust, any interest payments already encashed but held, at the date of the chargeable event, by the trustees before distribution in the administration of the trust. These payments will be excluded even if no separate moneys can be identified as relating directly to interest on exempt securities.
>
> The **exclusion for interest does not apply** to any warrants or coupons already encashed, or payments of interest already received by the beneficiary in their lifetime, in connection with a chargeable event that happened after they were encashed or received. This is the case whether the beneficiary is the absolute owner of the exempt securities or a beneficiary under a trust.

[1] and [2] are correct, but point [3] seems generous.[8]

---

8 For completeness, the Manual continues:
"27261 Exclusion of repayment of IT on exempt securities [February 2006]
Repayment of income tax relating to interest on exempt securities also falls within the exclusion for such securities:
- if an existing warrant for repayment remains uncashed at the date of the relevant chargeable event
- in the case of a trust, if the proceeds of an encashed warrant are held – at the date of the chargeable event – by the trustees pending distribution in the administration of the trust or
- if the repayment due up to the date of the chargeable event is receivable after the date.

A repayment encashed – before a chargeable event – by the person beneficially entitled to the repayment is not eligible for the exclusion on that event."
Before 1998 interest was generally paid subject to deduction of tax. But now interest is paid without deduction of tax (unless the owner asks for tax to be deducted) so this

62.4.2 *Use of FOTRA securities for tax planning*

The exemption is useful for individuals who are:

(1) UK domiciled or IHT deemed domiciled, (so foreign property is not excluded property)

(2) not resident in the UK (so they can satisfy the conditions for exemption).

62.4.3 *Exemption for other MS government securities*

The EC say:

> The underlying [EU law] principles could equally prohibit, inter alia, inheritance tax treatment that ...
> c. is less favourable in the case of public debt securities issued by other Member States than in the case of similar securities issued by the taxing Member State.[9]

The EC is taking action over similar rules in Spain:

> The European Commission has officially requested Spain to amend the provisions of the Inheritance and Gift Tax legislation of the *Territorios Históricos de Alava y Bizkaia* as these do not respect the free movement of capital.
> Under these tax provisions public debt issued by the local administrations (*la Comunidad Autónoma del País Vasco, the Diputaciones Forales or the Entidades Locales Territoriales de los tres Territorios Históricos*) benefits from a preferential tax treatment. This means that titles of public debt from these administrations are less taxed than other similar titles after inheritance. This tax treatment discriminates against investments in public debt issued by other EU Member States or EEA States.
> The Commission's request takes the form of a reasoned opinion. If the legislation is not brought into compliance within two months, the Commission may refer the matter to the EU Court of Justice.[10]

---

point will not arise.

9 Commission Staff Working Paper "Non-discriminatory inheritance tax systems: principles drawn from EU case-law" (December 2011) para 3 accessible *http://ec.europa.eu/taxation_customs/resources/documents/taxation/personal_tax/inheritance/working_paper_en.pdf*

10 MEMO/13/122 Event Date: 21/02/2013 accessible *http://europa.eu/rapid/press-release_MEMO-13-122_en.htm*

It is considered that the exemption conferred on UK gilts is in breach of EU law: it is an unjustified restriction on free movement of capital.[11] Similar exemption ought to be allowed for national securities of other MS. This matters for two classes of individuals who are not UK resident:

(1) Those who are deemed UK domiciled but not actually domiciled. They would qualify for IHT exemption on all FOTRA securities, and under EU law qualify for exemption on equivalent foreign state securities.
(2) Those who are actually UK domiciled. They qualify for IHT exemption on FOTRA securities.

Of course, foreign securities are non-UK situate property so in the hands of individuals who are foreign domiciled and not deemed UK domiciled, the IHT treatment is the same and no EU law issues arise. Perhaps that is why the EC has taken on Spain on this point and not (or not yet) the UK.

62.5 Conditions for FOTRA exemption

FOTRA securities were first issued under s.47 F(No 2)A 1915. This was a temporary measure:

> The Treasury may, if they think fit, during the continuance of the present war and a period of twelve months thereafter, issue any securities which they have power to issue for the purpose of raising any money or any loan with a condition that neither the capital nor the interest thereof shall be liable to any taxation, present or future, so long as ... the securities are in the beneficial ownership of persons who are neither domiciled nor ordinarily resident in the UK...

This section was repealed in 1927, but the repeal did not affect tax exemptions for securities previously issued and one such security (War Loan 1952 Or After) is still in existence.

Section 22(1) F(No.2)A 1931 provides:

> Any securities issued by the Treasury under any Act may be issued with the condition that -
>
> (a) so long as the securities are in the beneficial ownership of persons who are not [ordinarily][12] resident in the UK, the interest thereon shall be exempt from income tax; and
> (b) so long as the securities are in the beneficial ownership of

11 See 60.11.1 (Discrimination against foreign property).

12 See 62.5.2 (Abolition of ordinary residence).

> persons who are neither domiciled nor [ordinarily] resident in the UK, neither the capital thereof nor the interest thereon shall be liable to any taxation present or future.

Subsequent statutory provisions do not specify the condition for exemption: they give the Treasury a discretion to specify the condition in the terms of the issue. Section 60 FA 1940 provides:

> The power of the Treasury under s.22 F(No.2)A 1931 to issue securities with the condition as to exemption from taxation specified in that section shall extend to the issuing of securities with that condition so modified, whether as to the extent of the exemption or the cases in which the exemption is to operate, as the Treasury may specify in the terms of the issue.

So the details must be found in the prospectus for each gilt concerned.[13] Section 154(1) FA 1996 provides:

> The modifications which, under s.60 of the FA 1940, may be made for the purposes of any issue of securities to the conditions about tax exemption specified in s.22 of the F(No.2)A 1931 shall include a modification by virtue of which the tax exemption contained in any condition of the issue applies, as respects capital, irrespective of where the person with the beneficial ownership of the securities is domiciled.

It is hard to see the need for this, but it does no harm.

Before 6 April 1998 some gilts were issued without FOTRA conditions. These have now been given the benefit of FOTRA conditions by s.161 FA 1998:

> (1) Subject to the following provisions of this section, any gilt-edged security[14] issued before 6 April 1998 without FOTRA conditions shall be treated in relation to times on or after that date as if—
>
> (a) it were a security issued with the post-1996 Act conditions; and
>
> (b) those conditions had been authorised in relation to the issue of that security by virtue of s.22 of the F(No. 2)A 1931...
>
> (4) In this section "FOTRA conditions" means any such conditions about exemption from taxation as are authorised in relation to the issue of a gilt-edged security by virtue of section 22 of the Finance (No 2) Act

13 Prospectuses can be found on *http://www.dmo.gov.uk/rpt_parameters.aspx?rptCode=D8E&page=Prospectuses*

14 "Gilt-edged securities" has the CGT definition: see s.161(6) FA 1998.

> 1931...
> (5) In this section "the post-1996 Act conditions" means the FOTRA conditions with which 7.25% Treasury Stock 2007 was first issued by virtue of s.22 of the F(No. 2)A 1931.[15]
> (7) This section does not apply to any 3½% War Loan 1952 Or After which was issued with a condition authorised by virtue of s.47 of the F(No. 2)A 1915.

So all UK government securities have FOTRA status, irrespective of the original terms of issue but there are two classes of FOTRA securities with different conditions attached. The IHT manual provides:

> **IHTM04291 - Government securities in foreign ownership: introduction** [October 2010]
> ...Prior to 6 April 1998, FOTRA securities or gilts were issued with the additional requirement that the beneficial owner (IHTM04031) had to be domiciled (IHTM27000) as well as ordinarily resident outside the UK. The domicile requirement continues to apply to FOTRA securities that were issued before 29 April 1996.
> Under FA1940/S60(1), The Treasury has powers to modify the operation of the general exemption from taxation specified in the terms of issue of the security concerned. This power was exercised so that with effect from 6 April 1998 all gilts were deemed to be FOTRA gilts. So, for deaths and other chargeable events on or after 6 April 1998, all government securities are excluded property (IHTM04251) for IHT purposes by reference only to the ordinary residence of the beneficial owner.
> The only exception is 3½% War Loan, where the additional domicile condition continues to apply to deaths or other chargeable events on or after 6 April 1998.
> So, in summary,
> - FOTRA securities issued before 29 April 1996 will be exempt provided the beneficial owner is both domiciled and ordinarily resident outside the UK.[16]
> - 3½% War Loan 1952 or after will be only be exempt if the

15 This was one of the first gilts issued in 1996/97. The condition provided: "the Stock will be exempt from all UK taxation, present or future, so long as it is shown that the Stock is in the beneficial ownership of persons who are not [ordinarily] resident in the UK".

16 [Author's note] There are not many gilts left which were issued before 29 April 1996. IHTM 04306 has a list.

beneficial owner is both domiciled and ordinarily resident outside the UK, even if the chargeable event is after 6 April 1998.

- All other government securities issued before 6 April 1998 without FOTRA conditions will be exempt from that date provided the beneficial owner is ordinarily resident outside the UK. Domicile is no longer relevant.
- All other government securities issued after 29 April 1996 will be exempt provided the beneficial owner is ordinarily resident outside the UK. Domicile is no longer relevant.

It would be simpler if all gilts could be governed by the same rules.

62.5.1 *Disapplication of IHT deemed domicile rules*

Section 267(2) IHTA provides:

> Subsection (1) above [s.267 deemed domicile for IHT] shall not apply for the purposes of section 6(2) or (3) or 48(4) above ...

Similarly, s.267ZA(5) IHTA provides:

> An election under this section does not affect a person's domicile for the purposes of section 6(2) or (3) or 48(4).

That is, the IHT deemed domicile rules do not apply for the purposes of the exemptions conferring excluded property status on FOTRA securities and qualifying certificates of Islanders.[17]

The reason is historical. The concept of deemed domicile was introduced with CTT in 1974. At that time gilts had been issued with a promise that they would be free from taxation (including Estate Duty, now IHT) if the owner was not (actually) UK domiciled. The deemed domicile rule could not have been applied to those gilts. All that the drafter needed to do was to disapply the deemed domicile rule to FOTRA securities in issue at the time of the introduction of CTT (now IHT). It was not necessary to disapply the deemed domicile rule to gilts issued later. But that is the rule. Presumably the intention was to avoid having two classes of FOTRA securities governed by different rules; or to encourage foreigners to continue to invest in FOTRA securities issued after 1974.

No doubt the same reasoning applied to qualifying certificates of Islanders.

The practical importance of this rule is diminished by the fact that it is

17 See 62.8 (Individual domiciled in Channel Islands or Isle of Man).

only relevant to those FOTRA securities where IHT FOTRA exemption requires the owner to be domiciled outside the UK; in (I think) almost all cases, except 3½% War Loan 1952 Or After, the exemption only requires the owner to be non resident, and domicile (deemed or actual) is irrelevant.

62.5.2 *Abolition of ordinary residence*

Para 114 Sch 46 FA 2013 provides:

> (4) Sub-paragraph (5) applies to a person who becomes the beneficial owner of a pre-commencement security (or an interest in such a security) on or after 6 April 2013.
> (5) If obtaining the relevant exemption is conditional on being not ordinarily resident in the United Kingdom, any enactment conferring the exemption is to have effect (in relation to a person to whom this sub-paragraph applies) as if obtaining the exemption were conditional instead on being not resident in the United Kingdom.
> (6) In this paragraph—
> "pre-commencement security" means a FOTRA security (as defined in section 713 of ITTOIA 2005) issued before the day on which this Act is passed;
> "the relevant exemption", in relation to a pre-commencement security, means the exemption for which provision is made in the exemption condition (as defined in that section).

Para 114(1) Sch 46 FA 2013 deletes the word "ordinarily" in s.22 F(No.2)A 1931 and para 114(3) provides a similar rule:

> (3) Subject to sub-paragraph (5), the amendment made by sub-paragraph (1) does not affect a pre-commencement security (nor the availability of the relevant exemption).

62.6 "Beneficial ownership" of FOTRA securities

The gilts must be in the "beneficial ownership" of the individual. The expression here has its English law/trust law meaning:

> Although I might not, with Lord Diplock, have gone so far as to think that the expression "beneficial ownership" is a term of art, it is certainly one which has for several centuries had a very well-recognised meaning amongst property lawyers. And there can be no doubt that, in enacting a provision such as [what is now s.1154 CTA 2010], Parliament must have intended to adopt that meaning. It means ownership for your own benefit as opposed to ownership as trustee for another. It exists either

> where there is no division of legal and beneficial ownership or where legal ownership is vested in one person and beneficial ownership or, which is the same thing, the equitable interest in the property in another.[18]

In the following discussion I abbreviate the term to "ownership".

There have been many cases discussing "ownership" in the context of company groups, and the reader who wishes to research this area further should refer to the discussion on group relief in corporation tax and SD textbooks. Unfortunately the case law is in disarray and a number of contradictory dicta can be found. But two propositions seem reasonably clear. Gilts remain in the ownership of a person even if they are subject to a mortgage or charge.[19] Gilts are not in the ownership of a person if they are subject to a contract of sale, even a conditional contract.[20]

Gilts remain in the ownership of an individual even if they have granted put and call options, according to *Sainsbury v O'Connor* 64 TC 208.

Ownership is not a precise term in English law and is used with a variety of meanings. Its common meaning is to denote the sum of all the rights which a person has over an asset; that is, ownership is a bundle of rights, or if you prefer, ownership has a number of incidents.[21] In the case of gilts the bundle (or incidents) consists of the right to dividends, capital on redemption and rights of disposal.

One can make some dent in the usual array of rights or incidents and still be regarded as the owner. This explains why one remains beneficial owner after granting a charge or licence. Where does one draw the line? The courts answer to this question has been confused because they insist that ownership must (with limited exceptions) be regarded as vested in one person or another.

This causes artificial results when property is subject to a contract of sale and it is said that ownership must be vested in either the vendor or purchaser. There is no reason why that should be so, if one remembers that ownership is no more than a convenient term for a bundle of rights. The better analysis is that ownership rights are split between vendor and

---

18 *Sainsbury v O'Connor* 64 TC 208 at p.250. For other meanings, see 25.12.1 (Meaning(s) of "beneficial ownership").

19 *English Sewing Cotton v IRC* [1947] 1 All ER 679.

20 *Wood Preservation v Prior* 45 TC 112.

21 See Turner, "Some Reflections on Ownership in English Law" (1941) 19 Can. Bar Review 342; Harris *Property and Justice* (1996) p.125.

purchaser. Neither need be regarded as "the" beneficial owner.[22] Likewise for property subject to an option. On this analysis, *Wood Preservation* was rightly decided but for the wrong reasons, and *Sainsbury* was wrongly decided. But however unconvincing the reasoning, the law on this point is settled below the Supreme Court.

The IHT Manual provides:

> **IHTM27264 Exempt securities as partnership assets** [Jan 2014]
> Very occasionally the assets of a partnership may include exempt securities which will normally constitute 'excepted assets' (see IHTA84/S112) so they will not qualify for Business Relief. In this situation a partner's transfer of their interest in the partnership will be excluded property:
> - to the extent that it is attributable to the exempt securities (IHTM27241)
> - and only if it satisfies the conditions specified for the security
>
> You should calculate the amount to be excluded as follows:
> (Value of exempt securities ÷ Total value of partnership) × Value of transferor's partnership interest

HMRC (rightly) accept that partners are beneficial owners of partnership assets.

62.6.1 *Beneficial ownership in Scotland*

The IHT Manual discusses the expression "beneficially entitled", in a passage which sheds a little light on beneficial ownership:

> **IHTM04031 what is meant by beneficially entitled?** [January 2008]
> The use of the words 'beneficially entitled' means broadly that the estate includes only property
> - to which a person is entitled, or
> - in which they have an interest for their own benefit.
>
> In England, Wales and Northern Ireland this includes property which a person owns either legally or beneficially (IHTM04441).

---

22 Likewise the courts have come to reject the dogma that "where ownership is vested in a trustee, equitable ownership must necessarily be vested in someone else because it is an essential requirement of a trust that it confers upon individuals a complex of beneficial legal relations which may be called 'ownership'". See *CPT Custodian Pty v Commissioner of State Revenue* (2005) 221 ALR 196 at [25] accessible *http://www.austlii.org*. Of course, the context in which the expression "beneficial owner" is used should always be considered.

So far, the text is unexceptionable. The discussion then turns to Scotland:

> In Scotland, the term 'ownership' does not necessarily equate to beneficial entitlement, for example where the land that is being transferred is subject to missives of sale [or][23] there is an unrecorded disposition. This is because of the Scottish system of unitary ownership. Any case where the question is in point should be referred to TG for advice.

The text raises the interesting suggestion that the position in Scots law is not the same as in English law.[24] The passage concludes:

> A person is not beneficially entitled to property held
> - purely in a fiduciary capacity (for example as a trustee)
> - in a representative capacity (for example as an executor or a trustee in bankruptcy), or
> - by way of security (for example as a mortgagee prior to foreclosure).
>
> ...

This is clearly right.

62.6.2 *Registration*

The IHT Manual provides:

> **IHTM04294 - Government securities in foreign ownership: type of security and ownership** [October 2008]
> If a government security is a FOTRA gilt you will have to consider who is beneficially entitled to that security to work out whether it is excluded property for IHT purposes.
> If a worthwhile amount is at stake you should investigate the possibility of a last-minute purchase. Except where the available information (e.g. inclusion of sufficient income/interest) reasonably rules out that possibility, you should seek specific confirmation that the securities concerned were in fact registered in the transferor's, or the trustee's, name(s) at the date of the relevant transfer.
> (This text has been withheld because of exemptions in the Freedom of Information Act 2000)

---

23 The original reads "of". The emendation to "or" makes sense, though it might be that some text is missing here.

24 I would be grateful to any Scots reader who could direct me to relevant authority. McDonald and Pagan, *Inheritance Tax in Scotland: Tax Annual* (Bloomsbury) may help here.

I do not think that the IHT Manual means to say that relief only applies if the securities are registered in the name of the individual or the trustees. The point is that no relief applies if the securities are purchased but not paid for. The purchaser is not the beneficial owner until payment, or even if they were, securities not paid for have no value because of the vendor's lien. So if the gilts are not registered in the name of the individual, further evidence may be needed to show that the individual actually is the beneficial owner.

In practice, register the gilts in the name of the individual or the trustees to avoid possible dispute. Perhaps the withheld text instructs Inspectors how to identify false claims for relief, or perhaps it identifies what is a "worthwhile amount" to investigate.

62.7 UK funds *v* foreign funds

As far as tax is concerned, which is better for the foreign domiciliary: UK funds or foreign funds?

(1) A remittance basis taxpayer will prefer a foreign fund to a UK one, so that income and gains from the fund will be taxed on the remittance basis.[25] Likewise a settlor-interested trust whose settlor is a remittance basis taxpayer will prefer a foreign fund to a UK one; similarly if the transfer of asset rules may apply, as UK source income from the fund will be taxed on an arising basis and foreign source income will qualify for the remittance basis.

(2) A non-resident non-domiciled individual will not mind (for IHT, CGT or IT) whether they purchase a UK or a foreign fund. However, taxation at fund level is another matter, and the additional burden on UK funds, particularly SDRT, has encouraged fund managers to set up new funds offshore.[26]

Thus the IHT exemption for UK funds represents a pragmatic decision by the Government, but, like so much in the tax system, falls short of

25 If the individual intends to remit income from the fund, it would be better to have a UK fund because higher rates of tax apply to remitted dividends. But that is a special case.

26 See "Taxation and the Competitiveness of UK Funds" (October 2006) *http://www.investmentuk.org/research/research/* (scroll down to 2006 and click on first link). The report also notes that the uncertainty and instability of the UK tax regime is regarded as making the UK an unsuitable location.

consistency or joined-up thinking.[27]

62.8 Individual domiciled in Channel Islands or Isle of Man

Section 6(3) IHTA provides:

> Where the person beneficially entitled to the rights conferred by any of the following, namely—
>
> (a) war savings certificates;
> (b) national savings certificates (including Ulster savings certificates);
> (c) premium savings bonds;
> (d) deposits with the National Savings Bank or with a trustee savings bank;
> (e) a certified SAYE savings arrangement within the meaning of section 703(1) ITTOIA;
>
> is domiciled in the Channel Islands or the Isle of Man, the rights are excluded property.

In the following discussion:

(1) "**Qualifying certificates**" are investments within (a) to (e).
(2) "**Islanders**" are persons domiciled in the Channel Islands or the Isle of Man.

The IHT deemed domicile rule does not apply for the purposes of this section: see s.267(2) IHTA.

The IHT Manual para 27270 [January 2014] correctly states:

> Other points to note are:
>
> [1] the exclusion applies not only to securities that are owned absolutely but also to any settled securities in which the owner has a beneficial interest in possession[28]
> [2] the exclusion does not extend to settled securities in which there is no interest in possession, (held on discretionary trusts
> [3] the relevant domicile is that of the transferor (and not the transferee) of the securities, at the time of the transfer
> [4] the deemed domicile provisions of IHTA84/S267 (2) do not apply. So the transferor's domicile has to be determined under general law.

Points [2] to [4] are straightforward, but point [1] is important.

---

27 See 1.2.2 (Attitudes to tax competition arguments).

28 [Author's note] From 2006 this will only apply to an estate IIP.

The exemption could be particularly useful for an individual who is:
(1) domiciled in the Channel Islands or the Isle of Man, and
(2) deemed UK domiciled (so in principle within the scope of IHT), and
(3) resident in the UK (so the FOTRA securities exemption is not available).

The exemption is also useful for a trust with such a person as life tenant.

The exemption dates back to 1931[29] and was presumably an attempt to market the securities to Islanders, who would otherwise not find them an attractive choice. It seems surprising that the exemption is limited to Islanders; no doubt there were reasons.

62.9 Trusts: Foreign situate property

Section 48(3) IHTA provides:

> Where property comprised in a settlement is situated outside the UK—
>
> (a) the property (but not a reversionary interest in the property) is excluded property unless the settlor was domiciled in the UK at the time the settlement was made ...

This is the main category of settled excluded property, roughly corresponding to the rule that non-settled foreign situate property is excluded property.

A trust made by a foreign domiciled settlor is sometimes referred to as an **"excluded property trust"**. This label could mislead (property in a so-called excluded property trust may or may not be excluded property, depending on its situs and nature) but it may be a convenient shorthand.

Three important consequences arise from the definition.

First, the resident and domicile status of the beneficiaries is irrelevant for this purpose. The residence of the trustees is similarly irrelevant.

Secondly, excluded property status depends on the domicile of the settlor at the time the settlement was made. The domicile at the time of the transfer or chargeable event is ignored.[30] Contrast the IT and CGT

---

29 Section 41 FA 1931. The exemption for FOTRA securities was revived in the same year.

30 See 62.14 (Initial interest of settlor or spouse) for an exception where the settlor or their spouse has an initial interest in possession in the settled property.

position. The identity of the settlor is therefore crucial.[31]

Thirdly, the situs of the trust assets matters only at the moment a charge arises; provided the assets are then situated abroad, it is irrelevant that they may previously have been situated in the UK. So trustees could transfer the settled property out of the UK the moment before the death of a life tenant, or the occasion of a ten-year charge, and obtain the full benefit of excluded property status: see *Kwok Chi Leung Karl v Commissioner of Estate Duty* [1988] STC 728.

HMRC accept this. IHT Manual provides:

> **04274. Identifying settled property** [February 2006]
> The expression 'property comprised in a settlement' in Section 48(3) IHTA 1984 means the items of property (IHTM04030) held in the settlement (IHTM16000) at the time of the chargeable event that you are considering. In determining the locality (IHTM27071) of any particular property, therefore, you should consider the property in its current form and not its previous history.
> *Example*
> S, when domiciled in Germany, settles some German realty[32] and some securities then situated in the UK on X for life with remainder to Y. On X's death the life interest comes to an end and the settled fund consists of
> a. a villa in Spain, or
> b. land in the UK, or
> c. a house in Spain and some English securities.
> With a., the villa is excluded property even though it partly represents the proceeds of what was previously UK property (the securities). The land in b. is not excluded property although it is partly derived from the German realty. In c., the house is excluded property but the securities are not.

62.10 Income accrued but not paid at time of death of life tenant

Suppose:

(1) A trust for A for life remainder to B.
(2) On the death of A, income has accrued but not yet been paid ("the accrued income").
(3) After the death of A, the trustees receive that income.

---

31 See 80.3.4 (IHT definition of settlor).

32 [Author's footnote] The question whether this is possible as a matter of German law is ignored for the purpose of the example.

62.10.1 *The trust law background*

The default trust law rule is that the trustees apportion the income they receive, and a part equal to the accrued income is paid to the executors of A.[33] I refer to this as **"the apportionment rule"**.

For instance, suppose A dies on 30 April 2012. In 2013 the trustees receive interest which accrued in the calendar year 2012:

(1) One-third of the income will be apportioned to the period before A's death (and so paid to A's estate).

(2) The remaining two-thirds is apportioned to the period after A's death and so paid to B.

There are however two exceptions so wide that the apportionment rule does not often apply:

(1) The rule may be reversed by the terms of the trust, and it usually is.[34]

(2) The Trusts (Capital and Income) Act 2013 abolished this rule for trusts created after 1 October 2013, when the Act took effect, including a trust created under a power conferred by an old trust. Any entitlement to income under a new trust is an entitlement to income as it arises.

The amounts involved are usually small, in which case no-one takes any notice of the apportionment rule even if it does apply; but that is not always the case.

62.10.2 *IHT position*

Dymond's Capital Taxes para 23.673 provides:

> [1] When a life-tenant dies, any apportionment of dividends or interest payable to his personal representatives may be excluded from the account of the property passing under the settlement and should be included in the Inland Revenue account of his free estate.
>
> [2] If any dividend or apportionment does not come within the charge to Inheritance Tax because, for instance, the life-tenant had a foreign domicile and the apportionment is payable by foreign trustees, it seems that in strictness deduction of the dividend could be refused on the ground that the value for tax is the market price of the security at the date of death, but in practice the deduction is permitted.

---

33 Apportionment Act 1870.

34 See Kessler & Sartin *Drafting Trusts & Will Trusts* (11th ed 2012) para 21.61 (statutory and equitable apportionment rules).

Point [1] is looking at the position where:
(1) Trust property is held on trust for A for life, remainder to B.
(2) A dies and there is income (dividends or interest) which accrued during the lifetime of A ("the accrued income").
(3) The apportionment rule applies, so the accrued income is payable to the executors of A.

Dymond states that the accrued income is subject to IHT as part of A's free estate. The accrued income is not subject to IHT as part of the trust fund. In such a case, clearly, one would not expect the accrued income to be subject to IHT twice, once as part of A's free estate and also as part of the trust fund. It should be one or the other. Of the two, it can be said to make sense to treat it as part of A's free estate and not as part of the trust fund because that is where it belongs, and then IHT is paid by the executors, and borne by the residuary beneficiaries of A's free estate who receive it; the burden of IHT should not be paid by the trustees of the trust who do not receive it.

Point [2] is looking at the same position but the accrued income is not subject to IHT in A's free estate. The example is where the accrued income is excluded property (on the basis that A is not UK domiciled and the accrued interest is not UK situate property). Dymond says that in practice in such cases the trustees are still not subject to IHT on the accrued income. Here it is suggested that the trustees have a deduction for the accrued income.

The practice is long standing, as the same point is made in Dymond's Death Duties[35] in a passage from which the current text of Dymond is derived.

There are two possible bases for this practice. It might be said that the trust holds two assets, the loan and the accrued income; but that seems difficult to sustain (even more so if the trust asset is shares and the accrued income is an unpaid dividend). The correct basis is that the trustees have a liability in respect of the accrued income, which is deductible in computing the value of the trust fund for IHT purposes, just like any other trustee liability.

Sometimes the practice will favour HMRC. For instance, if A is UK domiciled but the settlor of the trust was not UK domiciled when the trust was made then the trust property (including the accrued income) would be

35 (15th ed., 1973), p.819.

excluded property but the right to the A's free estate is chargeable property.

Does the same practice apply where the apportionment rule is excluded? If the practice is that the liability to pay accrued income is a deductible trustee liability, it should be deductible in this case also. The liability remains; the exclusion of the apportionment rule only alters the person to whom the liability is due.

For the special case of accrued income on FOTRA securities, see 62.4.1 (Interest on FOTRA securities).

62.11 Trusts: Authorised unit trusts and OEICs

Section 48(3A) IHTA provides:

> Where property comprised in a settlement is a holding in an authorised unit trust or a share in an open-ended investment company—
>
> (a) the property (but not a reversionary interest in the property) is excluded property unless the settlor was domiciled in the UK at the time the settlement was made, and
>
> (b) section 6(1A) above applies to a reversionary interest in the property but does not otherwise apply in relation to the property;[36]
>
> but this subsection is subject to subsection (3B) below.[37]

62.12 Trusts: FOTRA securities

FOTRA securities held by trustees may be excluded property. Under this exemption the domicile of the settlor is irrelevant; one must look at the residence of the relevant beneficiary or beneficiaries and, if appropriate, their domicile.

For the interaction with s.44(2) IHTA, see 64.3.1 (When separate settlements fiction does not apply).

62.12.1 *Estate IIP trust*

Section 48(4) IHTA provides:

> Where securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above are comprised in a settlement, that subsection shall not apply to them; but the securities are

---

36 For a discussion of s.48(3A)(b), see 62.13.2 (Foreign situate property and UK funds in estate IIP trust).

37 For the subsection 3B exception, see 62.17.3 (Purchased equitable interests).

excluded property if—

(a) a person of a description specified in the condition in question is entitled to a qualifying interest in possession in them.

Qualifying IIP is defined in s.59(1) IHTA:

(1) In this Chapter "qualifying interest in possession" means—

(a) an interest in possession—

(i) to which an individual is beneficially entitled, and

(ii) which, if the individual became beneficially entitled to the interest in possession on or after 22nd March 2006, is an immediate post-death interest, a disabled person's interest or a transitional serial interest, or

(b) an interest in possession to which, where subsection (2) below applies, a company is beneficially entitled.[38]

That is, a qualifying IIP is what this book describes as an estate IIP. The 2006 reforms have (inadvertently?) restricted the scope of the exemption for FOTRA securities in settlements.

62.12.2 *Other trusts*

Section 48(4) IHTA provides:

Where securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above are comprised in a settlement, that subsection shall not apply to them; but the securities are excluded property if—

...

(b) no qualifying interest in possession subsists in them but it is shown that all known persons

[i] for whose benefit the settled property or income from it has been or might be applied, or

[ii] who are or might become beneficially entitled to an interest in possession in it,

are persons of a description specified in the condition in question.

The IHT Manual correctly states:

27248 - Unknown persons [January 2014]

The legislation refers to ‹known persons'. So, when considering the

38 The position for companies entitled to IIPs is not considered here.

> question of domicile and ordinary residence you should not consider the possibility that some (currently) unknown person (for example an unborn child or future spouse or civil partner of an existing beneficiary) might become a beneficiary in the future.
>
> **27249 - UK charities** [January 2014]
>
> In the case of *Von Ernst and Cie S.A. v IRC* [1980] 1 WLR 468 the Court ruled **that any payment or potential payment** from the settled property to an incorporated UK charity – to be used by the charity for its charitable purposes – would not be an application for the 'benefit' of the charity. So, you should not deny the exclusion for exempt securities just because a qualifying charity (whether incorporated or not) has received or might receive any of the settled property or income from it.

For relief for the exit charge on acquisition of FOTRA securities, see 62.19.3 (Exit charge).

62.13 Estate IIP trust

62.13.1 *The question*

As we have seen, there are two sets of definitions of excluded property:

(1) Section 6 IHTA defines categories of excluded property for non-settled property to which a person is beneficially entitled.

(2) Section 48 IHTA defines corresponding categories of excluded property for trust property.

Property is either settled or not, so at first sight the definitions appear to be mutually exclusive. However, a settlement under which a beneficiary has an estate interest in possession raises a doubt. Property held in a settlement with an estate IIP is certainly settled property (so *prima facie* the s.48 rules apply). However, s.49(1) IHTA provides (for an estate IIP):

> A person beneficially entitled to an interest in possession in settled property shall be treated for the purposes of this Act as beneficially entitled to the property in which the interest subsists.

Since the person is treated as beneficially entitled, should the s.6 IHTA rules apply to settled property?

62.13.2 *Foreign situate property and UK funds in estate IIP trust*

The answer is provided by s.48(3)(b) IHTA:

> Where property comprised in a settlement is situated outside the UK...
>
> (b) section 6(1) above applies to a reversionary interest in the property *but does not otherwise apply in relation to the*

property;

Thus for settled foreign-situate property the s.48 definition applies and the s.6(1) definition is disapplied. The operation of these rules can be illustrated by two examples:

(1) Suppose a foreign domiciled beneficiary has an estate IIP in a settlement made by a UK domiciled settlor. The trust property is situated outside the UK.

The trust property is not excluded property as it does not meet the requirements of s.45(3)(a). It would meet the requirements of s.6(1) but s.48(3)(b) disapplies s.6(1).

(2) Suppose the reverse situation – a UK domiciled beneficiary has an estate IIP in a settlement created by a foreign domiciled settlor. The trust property is again situated outside the UK.

The tax position is now reversed. The trust property would not qualify as excluded property under s.6(1) but it does qualify under s.48(3)(a). Section 48(3)(b) disapplies s.6(1) but that is irrelevant: the trust property is excluded property.

For UK funds, the same answer is provided by s.48(3A)(b) IHTA:

> Where property comprised in a settlement is a holding in an authorised unit trust or a share in an open-ended investment company ...
>
> (b) section 6(1A) above applies to a reversionary interest in the property *but does not otherwise apply in relation to the property;*

Thus for settled AUTs and OEICs, the s.48 definition applies and the s.6(3A) definition is disapplied.

62.13.3 *FOTRA securities in estate IIP trust*

Section 48(4) IHTA provides:

> Where securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above are comprised in a settlement, that subsection shall not apply to them; ...

Again, the s.48(4) definition of excluded property applies and the s.6(2) definition is disapplied. This is not actually necessary because s.6(2) and s.48(4)(a) lead to the same result, but it does no harm.

62.13.4 *Qualifying certificates in estate IIP trust*

Qualifying certificates of an individual domiciled in the Channel Islands

or the Isle of Man ("**an Islander**") are excluded property.[39] If an Islander is entitled to an estate IIP in qualifying certificates, the certificates are not excluded property under s.48(3) or s.48(4). But it is considered that the property does qualify as excluded property under s.6(3) since the individual is to be treated as if they were beneficially entitled. In this case there is no express provision that s.48 overrides s.6. Section 48 and s.6 do not contradict each other: they offer two alternative routes to attain excluded property status. Such settled property is therefore excluded property. HMRC agree with this view.

62.14 Initial interest of settlor or spouse

62.14.1 *The s.80 fictions*

Special rules apply where the settlor or spouse have an estate interest in possession in a trust when it is made ("**an initial IIP**"). The basic rule is set out in s.80(1) IHTA:

> Where a settlor or his spouse or civil partner is beneficially entitled to an interest in possession in property immediately after it becomes comprised in the settlement,
> [a] the property shall for the purposes of this Chapter[40] be treated as not having become comprised in the settlement on that occasion;
> [b] but when the property or any part of it becomes held on trusts under which neither of those persons is beneficially entitled to an interest in possession, the property or part shall for those purposes be treated as
> [i] becoming comprised in a separate settlement
> [ii] made by that one of them who ceased (or last ceased) to be beneficially entitled to an interest in possession in it.

Thus where the settlor or spouse has an initial IIP, s.80 imposes three fictions ("**the s.80 fictions**"):

(1) Property which is actually held in one settlement (**"the actual settlement"**):

(a) is treated as non-settled property (so long as the settlor/spouse have an interest in possession); and subsequently:

(v) is treated as being held in a separate settlement (**"the notional settlement"**).

---

39 See 62.8 (Individual domiciled in Channel Islands or Isle of Man).

40 "This Chapter" is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

(2) The notional settlement is treated as having the following qualities:
   (a) The person who is treated as the settlor of the notional settlement may be the spouse, ie different from the real settlor of the actual settlement.
   (b) The time at which trust property is treated as becoming held in the notional settlement is when the settlor/spouse IIP ceases, which is different from the time that property actually became held in the actual settlement.

62.14.2 *Transitional rules: Trusts before 1974 and after 2006*

Section 80(3) IHTA provides:

> This section shall not apply if the occasion first referred to in subsection (1) above occurred before 27 March 1974.

"The occasion first mentioned in subsection (1)" is the date that the property becomes held in the actual settlement, ie the date that the settlement is made. So:

(1) Section 80 does not apply to property settled before 27 March 1974.
(2) Section 80 can apply to property settled between 27 March 1974 and 22 March 2006.

The position for property settled after 22 March 2006 is governed by s.80(4) IHTA:

> Where the occasion first referred to in subsection (1) above occurs on or after 22 March 2006, this section applies—
>
> (a) as though for "an interest in possession" in each place where that appears in subsection (1) above there were substituted "a postponing interest", and
>
> (b) as though, for the purposes of that subsection, each of the following were a "postponing interest"—
>
> (i) an immediate post-death interest;
>
> (ii) a disabled person's interest.

Amended as s.80(4) IHTA directs, s.80(1) provides for settlements made from 22 March 2006:

> Where a settlor or his spouse or civil partner is beneficially entitled to ~~an interest in possession~~
>
> (i) an immediate post-death interest; [or]
>
> (ii) a disabled person's interest.
>
> in property immediately after it becomes comprised in the settlement,

[a] the property shall for the purposes of this Chapter[41] be treated as not having become comprised in the settlement on that occasion;
[b] but when the property or any part of it becomes held on trusts under which neither of those persons is beneficially entitled to ~~an interest in possession~~
(i) an immediate post-death interest; [or]
(ii) a disabled person's interest.
the property or part shall for those purposes be treated as
[i] becoming comprised in a separate settlement
[ii] made by that one of them who ceased (or last ceased) to be beneficially entitled to an interest in possession in it.

Section 80 can apply to trusts from 22 March 2006 if:
(1) the trust confers an IPDI (which applies to will trusts) or
(2) a disabled person's interest (which will be rare).
What is the position if:
(1) A trust is made before 22 March 2006 and confers an initial IIP on the settlor ("H").
(2) That IIP comes to an end during the lifetime of H and the spouse ("W") acquires an IIP which is not an estate IIP.

The drafter of the 2006 reforms failed to address this case. A purposive construction is called for, or the provisions are nonsensical. It is suggested that the reference to an "interest in possession" in s.80 means an interest in possession to which s.49 IHTA applies. The non-estate IIP of W does not count as an interest in possession. So the trust property is treated as becoming comprised in a notional settlement on the death of H.

62.14.3 *Time of 10-year anniversary when s.80 applies*

The date of the 10-year anniversaries is normally ascertained in a straightforward manner. First there is a commonsense definition of the commencement date of a settlement. Section 60 IHTA provides:

> In this Chapter references to the commencement of a settlement are references to the time when property first becomes comprised in it.

Then s.61(1) IHTA provides:

> In this Chapter "ten-year anniversary" in relation to a settlement means the tenth anniversary of the date on which the settlement commenced and subsequent anniversaries at ten-yearly intervals, but subject to

41 "This Chapter" is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

subsections (2) to (4) below.

However, s.61(2) provides a special rule for the s.80 notional settlement:

> The ten-year anniversaries of a settlement treated as made under section 80 below shall be the dates that are (or would but for that section be) the ten-year anniversaries of the settlement first mentioned in that section.

The section 80 fictions do not apply for the purposes of ascertaining the ten-year anniversary date of the notional trust: that is fixed by reference to the date of the actual settlement. I cannot see the reason for that rule.

62.14.4 *Trusts with only some property within s.80 fictions*

It is possible that one trust may hold some property which is within the scope of s.80 and some property which is not. This could happen in various ways, but the common example will be a trust conferring an interest in possession on the settlor where:

(1) Property ("pre-2006 property") was settled before 22 March 2006
(2) Other property ("post-2006 property") was added after 22 March 2006.

In that case:

(1) The pre-2006 property is treated as held in a separate notional settlement governed by the s.80 fictions.
(2) The post-2006 property is treated as held in the actual settlement.

The actual commencement date of the actual settlement is the date that property was first comprised in it. However pre-2006 property is "treated as not having become comprised in the settlement" at that date. The first time that property that is held by the actual settlement is when post-2006 property is added. That date is treated as its commencement date, and anniversaries of that date are treated as its 10-year anniversaries.

62.14.5 *Spouse with initial IIP: Excluded property rule*

Suppose:

(1) In Year 1, H creates a trust under which W has an initial IIP.
(2) In Year 2, W dies (so her IIP comes to an end). H does not become entitled to an estate IIP at the time that W dies.

In this example H is the settlor of the actual trust and Year 1 is the date of commencement of the actual trust. However, applying the s.80 fictions, the property is treated as held in a notional trust, which is treated as made in Year 2 and W is treated as the settlor.

If that were all, it would follow that the trust property could be treated as

excluded property if W was foreign domiciled at the time of her death in Year 2. The domicile of H would be irrelevant. This would benefit the taxpayer if (for instance) H was UK domiciled and W was not, and could sometimes be used for tax avoidance.

Therefore where s.80 applies, s.82 IHTA imposes a further condition relating to excluded property.[42] This provides:

> (1) For the purposes of this Chapter[43] ... property to which section 80 ... applies shall not be taken to be excluded property by virtue of section 48(3)(a) above unless the condition in subsection (3) below is satisfied (in addition to the conditions in section 48(3) that the property is situated outside the UK and that the settlor was not domiciled there when the settlement was made).
>
> ...
>
> (3) The condition referred to in subsection (1) ... is—
>
> (a) in the case of property to which section 80 above applies, that the person who is the settlor in relation to the settlement first mentioned in that section ...
>
> was not domiciled in the UK when that settlement was made.

The "settlement first mentioned" in s.80 is the actual settlement made by H. (The notional settlement treated as made by W is the second settlement mentioned in s.80.)

In relation to foreign situate trust property, s.82 prevents the s.80 fictions from benefiting the taxpayer. The fictions may however benefit HMRC. Suppose:

(1) H is the settlor.
(2) W has an initial IIP.
(3) Subsequently the settled property is held on trusts where neither H nor W has an interest in possession.[44]

It is necessary to look at the domicile of H at the time when the actual settlement was actually made *and* at the domicile of W at the time her interest in possession came to an end in order to determine whether foreign situate trust property (in the notional settlement) is excluded

---

42 With an economy of drafting, s.82 is also used for the purposes of the same settlement fiction but although there is some overlap, it is easiest to discuss that aspect separately. See 64.8.1 (Section 81 excluded property rule).

43 "This Chapter" is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

44 Whether an estate IIP or not. This is anomalous, but the drafter of the 2006 rules did not think through the consequences for s.80.

property. Both must be domiciled outside the UK (at the right time) in order for foreign situate property to qualify securely for excluded property status.

62.14.6 *Settlor with initial IIP: Excluded property rule*

In practice, in lifetime trusts it is rare for the settlor's spouse to have an initial IIP but it is common for the settlor to have an initial IIP. Suppose first that:

(1) Year 1: H has an initial IIP; and
(2) Year 2: that IIP comes to an end (without W becoming entitled to an estate IIP).

In this example H is the settlor of the actual trust and Year 1 is the date of commencement of the actual trust. However, applying the s.80 fictions, the property is treated as held in a notional trust, which is treated as made in Year 2 though H is still treated as the settlor.

If that were all, it would follow that the trust property could be treated as excluded property if H was foreign domiciled in Year 2. The domicile of H at the time the trust was made would be irrelevant. This could not be used for tax avoidance, but s.82 IHTA nonetheless imposes its further condition relating to excluded property. It is necessary to look at the domicile of H at the time when the actual settlement was actually made *and* at the time their interest in possession came to an end in order to determine whether foreign situate trust property (in the notional settlement) is excluded property. H must be domiciled out of the UK at both times in order for foreign situate property to qualify securely for excluded property status.

Suppose:

(1) In Year 1, H creates a trust under which H has an estate IIP.
(2) In Year 2, H dies and W becomes entitled to an estate IIP.
(3) In year 3, W's interest comes to an end (H not at that time becoming entitled to an estate IIP).

In this example H is the settlor of the actual trust and Year 1 is the date of commencement of the actual trust. However, applying the s.80 fictions, the property is treated as held in a notional trust, which is treated as made in Year 3 and W is treated as the settlor.

If that were all, it would follow that the trust property could be treated as excluded property if W was foreign domiciled at the time of her death in Year 3. The domicile of H would be irrelevant. Once again, s.82 IHTA imposes a further condition relating to excluded property. In relation to

foreign situate trust property, s.82 prevents the s.80 fictions from benefiting the taxpayer. It may however benefit HMRC. It is necessary to look at the domicile of H at the time when the actual settlement was actually made *and* at the domicile of W at the time her interest in possession came to an end in order to determine whether foreign situate trust property (in the notional settlement) is excluded property. Both must be domiciled out of the UK (at the right time) in order for foreign situate property to qualify for excluded property status.

62.14.7 *Planning for partly excluded property trust*

I use the term **"partly excluded property trust"** to refer to a trust where:

(1) the trust property in the actual settlement is excluded property on ordinary principles; but

(2) it is not excluded property in the notional settlement under s.80/82 rules.

The s.80/82 rules apply only for the purposes of "this chapter": the relevant property trust regime. They have no wider application. So foreign property of a partly excluded property trust:

(1) is not excluded property for the purposes of the relevant property trust taxation; but

(2) is excluded property for all other IHT purposes (eg GWR and the estate IIP trust regime).

Before 2006, s.80 did not much matter as a partly excluded property trust could remain IIP in form throughout its life. So in practice it qualified as excluded property. Now it cannot do so. So the tax position of these trusts has been seriously affected as an accidental result of the 2006 reforms.

62.14.8 *Avoiding s.80/82 problems: Trusts made on or after 22 March 2006*

No difficulty arises for lifetime trusts from 22 March 2006, unless the trust confers a disabled person's interest (which will be rare).

Section 80 still poses a trap for will trusts, where the testator is not UK domiciled and the spouse is (or later becomes) UK domiciled. One needs to avoid an IPDI.

A simple solution is to arrange that the will trust is discretionary at the outset, ie the widow does not have an initial interest in possession. A two-year discretionary period will in principle be needed to avoid s.144 IHTA. This is easy to arrange if the property given to the trust is not UK situate.

62.14.9 *Avoiding s.80/82 problems: Trusts made before 22 March 2006*

In cases where an existing trust conferred an initial IIP on the settlor/spouse, it would be desirable to revoke the IIP before the settlor becomes deemed UK domiciled. It does not matter that the settlor/spouse may have an initial IIP provided that when it comes to an end[45] the life tenant is not UK domiciled or IHT deemed domiciled.

62.14.10 *Avoiding s.80/82 problems by FOTRA securities or UK funds*

Section 80 provides that property shall not be taken to be excluded property *by virtue of s.48(3)* IHTA. So it prevents foreign situate property from being excluded property. It does not apply to FOTRA securities and AUTs.

62.14.11 *Section 80 fictions: Commentary*

What is the purpose of the three s.80 fictions? The standard IHT trust regime would not work well where the settlor or their spouse has an initial estate interest in possession under a settlement commencing after 26 March 1974. Dymond explains:

> In such a case there will be no chargeable transfer when the settlement was made and so no occasion to value the settled property for CTT or IHT at that time. If an exit charge arose nearly 10 years later, it might be difficult to ascertain the value at the commencement of the settlement, as required by s.68(5)(a) IHTA, because important evidence might have been lost or destroyed. It might also not be easy to ascertain the settlor's cumulative total at that time as required by s.68(4)(b) IHTA. The same difficulty with the settlor's cumulative total might occur at the time of the 10 yearly charge, because of s.66(5)(a).[46]

Section 80 solves this administrative problem but the reader may agree with the author that even before 2006 the cure was worse than the disease. This does explain why the s.80 fictions only apply for the purposes of the standard IHT trust regime.

Since 2006 the operation of the rules is bizarre, but (as is generally the case with bizarre law) careful planning can mitigate much of the unfairness.

It is suggested that the rules should be repealed.

---

45 Not being followed by another IIP for the settlor/spouse.

46 *Dymond's Capital Taxes* (looseleaf 1986 onwards), para 19.700.

62.15 Settlor adds property to trust after change of domicile

Suppose:
(1) a settlor creates a trust when not UK domiciled; and
(2) the settlor[47] adds funds to the trust later when UK domiciled.
Can the added property be excluded property? The IHT Manual para 4272 provides:

> **04272. When the settlement was made** [January 2008]
> The legislation refers to the settlor's (IHTM16000) domicile (IHTM13000) 'at the time the settlement was made'. You should proceed on the basis that, for any given item of property (IHTM04030) held in a settlement, the settlement was made when that property was put in the settlement. Refer any case where this view is challenged to TG.
> *Example*
> S, when domiciled abroad, creates a settlement of Spanish realty. Later he acquires an UK domicile and then adds some Australian property to the settlement.
> The Spanish property is excluded property because of S's overseas domicile when he settled that property. However, the Australian property is not excluded property as S had a UK domicile when he added that property to the settlement.[48]

The relevant time in s.48(3) is not "the time when the property was settled"; it is "the time the settlement was made". HMRC seek to treat the transfer of an asset to an existing settlement as the making of a new settlement. It would follow that a person adding property to an existing settlement would be creating a second settlement or as many settlements as there are additions.

There is nothing conceptually impossible in HMRC's view that a separate settlement is deemed to be made where a person adds property to an existing settlement made by them.[49] But since adding property does not in fact create a new and separate settlement, two separate settlements do

---

47 This section considers the position where the original settlor adds to a trust. For the position where others add to a trust, see 64.4 (B adds property to A's trust).

48 This view is repeated in RI 166 and IHTM27220 - Foreign Settled Property With Non-UK Domiciled Settlor.

49 This fiction is applied when there are two settlors, see 64.3 (The separate settlements fiction). The same fiction could in principle apply when the settlor adds property to an existing settlement.

not exist;[50] one needs something express or implied in the legislation to deem what is in fact one settlement to be treated as two. When new property is added to an existing settlement, the new property *becomes comprised* in the settlement at that time, but that is not the same as saying the settlement (or a new settlement) was made at that time. The HMRC view leads to a more sensible result. But the legislation is so clearly inconsistent with the HMRC view that even a purposive construction cannot assist.[51]

Section 43 IHTA provides:

> (1) The following provisions of this section apply for determining what is to be taken for the purposes of this Act to be a settlement, and what property is, accordingly, referred to as property comprised in a settlement or as settled property.
> (2) "Settlement" means any *disposition or dispositions* of property, whether effected by instrument, by parol or by operation of law, or partly in one way and partly in another, whereby the property is for the time being—
>
> (a) held in trust for persons in succession or for any person subject

50 This is self-evident but if authority is needed see *Truesdale v FCT* (1970) 120 CLR 353 at p.362 accessible *http://law.ato.gov.au*.

> "The words created a trust in s.102 are not, I think, apt to describe the payment of money to a trustee to hold under a trust already constituted. There is an obvious difference between creating a trust in respect of property, on the one hand, and, on the other, transferring property to a trustee to hold upon the terms of an established trust. To read the section as if it applied to such a transfer would be, in the absence of a context, to expand it. Such a reading would be tantamount to saying that the transfer to the trustee of property to be held as part of the assets of an already constituted trust would be to create a second trust, whereas, from the point of view of both the trustee and of the beneficiary, there would be but one trust and the property transferred would be nothing more than an addition to the property subject to the trust."

Contrast rule 64.4(2) Civil Procedure Rules 1998 which distinguishes (1) the person who created a trust and (2) a person who provided property for the purposes of the trust.

51 "It may be perfectly proper to adopt even a strained construction to enable the object and purpose of legislation to be fulfilled. But it cannot be taken to the length of applying unnatural meanings to familiar words or of so stretching the language that its former shape is transformed into something which is not only significantly different but has a name of its own. This must particularly be so where the language has no evident ambiguity or uncertainty about it." *Clarke v Kato* [1998] 1 WLR 1647 at p.1655.

to a contingency, or

(b) held by trustees on trust to accumulate the whole or part of any income of the property ... or

(c) charged ... with the payment of any annuity ...

(Emphasis added)

Perhaps the HMRC argument is that because a "settlement" means any disposition of property, each disposition constitutes a new and separate settlement. However, the words "any disposition or dispositions of property" indicate that more than one disposition can create a single settlement. One example would be where an original trust has been modified by a disposition by beneficiaries;[52] another would be where the settlor has made separate dispositions to the same trust. So these words do not help the HMRC argument.[53] See *Rysaffe v IRC* [2003] STC 536 at [13]:

> Section 43 does not specifically address a numerical question: what is the number of relevant settlements existing in a particular inheritance tax situation? In the absence of specific statutory provisions the answer to the numerical question is to be found in the general law of trusts.

Further, the HMRC view is incompatible with many provisions of the IHTA. If each addition to an existing trust is a new settlement it makes nonsense of the added property provisions in s.67 IHTA and the many references to added property in the surrounding sections. It also makes nonsense of the separate settlements fiction[54] which assumes (in the absence of s.44(2) IHTA) that one settlement may have two settlors.

The HMRC view is not consistent with s.49(5) FA 1977. This section clearly distinguished between:

(1) "the time when a settlement was made", and

(2) "the time when [added] property was settled".

It did so in the context of excluded property. That section is now repealed but the fact that the drafter took this view in 1977 remains relevant.

It is interesting to compare the transitional provisions for disabled beneficiary trusts in FA 2013. This makes amendments which have effect

---

52 See 80.14.1 (General powers: The trust law background).

53 The drafter of the words "disposition or dispositions" almost certainly had in mind the reference to "instrument or instruments" and "compound settlement" in the earlier legislation and the comments in *Dymond's Death Duties* (15th ed., 1973), p.129.

54 See 64.3 (The separate settlements fiction).

in relation to property transferred into settlement on or after a specified date.[55] The legislation does not refer to the date that the settlement was made. One may infer that the drafter has taken the point, though that is a matter of speculation.[56] It does at least show that if the drafter had intended to define excluded property by reference to the date it was transferred into settlement (rather than by reference to the date the settlement was made) it would have been easy to say so.

On the other hand, the transitional relief for IHT deemed domicile appears to assume the HMRC view, that excluded property status depends on domicile of the settlor at the time the property was added.[57] But overall this factor is outweighed by all the others.

It might take litigation before HMRC amend their published stance on this issue but I think they would be advised not to fight. Until the point is clear, trustees should follow the advice in RI 166:

> **Trust records**
> ... the trustees of a settlement should keep adequate records to enable any necessary attribution of the settled property to be made if ...the settlor has added further assets to the settlement after it was made...

Suppose a settlor creates a trust when UK domiciled and adds property to it when foreign domiciled. On my view, none of the property is excluded property. However, HMRC must abide by their statement (at least until it is officially and publically withdrawn with appropriate transitional relief) and accept the added property may be excluded property! Thus, the consequence of their statement (if my view is right) is that HMRC have the worst of both worlds. Of course, a well advised settlor should not be in this situation, but it does arise from time to time by accident.

62.15.1 *Contract to transfer to trust*

It may be possible to avoid this problem if a foreign domiciled person contracts to assign property to a trust; provided that the contract is made while non-UK domiciled, domicile at the time of the transfer may not matter.

---

55 Para 9(1), 10(3) sch 44 FA 2013.

56 It is conceivable that the drafter followed the precedent of s.103 FA 1977 without appreciating the issues involved.

57 See 61.5 (1974 transitional rules).

62.15.2 *Settlor adds property to company held by trust, after acquiring UK domicile*

Suppose:
(1) A settlor creates a trust while domiciled outside the UK;
(2) The settlor becomes UK domiciled; and
(3) The settlor gives property to a company owned by the trust.
Then HMRC's argument does not run at all. The shares in the company (if not UK situate) must be and remain excluded property. But watch out that the gift may be a gift with reservation and/or a chargeable transfer for IHT.

62.16 Transfer of value by close company

In this section I consider the position where a close company (UK resident or not) makes a transfer of value. In practice these issues only rarely need to be considered. A full discussion would need a chapter to itself, and I focus on the issues closest to the themes of this book. I do not consider the (even more) specialist topics of alterations of share capital or interests in possession held by companies.

62.16.1 *Individual participators*

Section 94(1) IHTA provides:

> [i] Subject to the following provisions of this Part of this Act, where a close company[58] makes a transfer of value, tax shall be charged as if each individual to whom an amount is apportioned under this section had made a transfer of value ...

Section 94 goes on to specify the amount of the transfer:

> [ii] of such amount as after deduction of tax (if any) would be equal to
> [a] the amount so apportioned, less
> [b] the amount (if any) by which the value of his estate is more than it would be but for[59] the company's transfer;

---

58 Section 102(1) IHTA provides a referential definition of "close company":
"In this Part of this Act— 'close company' means a company within the meaning of the Corporation Tax Acts which is (or would be if resident in the UK) a close company for the purposes of those Acts."
For a note on this terminology, see 85.22.1 (Non-resident close company).

59 "But for" is a slip for "as a result of"! HMRC agree: see the example in IHTM16247 below.

> [iii] but for this purpose his estate shall be treated as not including any rights or interests in the company.

Section 94(2) IHTA explains how the transfer of value is apportioned:

> For the purposes of subsection (1) above the value transferred by the company's transfer of value shall be apportioned among the participators according to their respective rights and interests in the company immediately before the transfer, and any amount so apportioned to a close company shall be further apportioned among its participators, and so on;

The transfer of value if it arises is immediately chargeable, not a PET; the reason for this rule is unclear.

Section 94(2) sets out two exceptions where there is no apportionment. The first concerns company payments of an income nature.[60] The second exception concerns foreign domiciliaries:

> (b) if any amount which would otherwise be apportioned to an individual who is domiciled outside the UK is attributable to the value of any property outside the UK, that amount shall not be apportioned.

This exemption does not apply to FOTRA securities because they are UK situate. This was presumably an oversight and the IHT Manual extends the exemption to cover this:

> **14854. Foreign aspects** [January 2010]
> **[**The Manual summarises the statutory exemption and continues:]
> [1] A transfer of value by
> - a company incorporated abroad (hence domiciled abroad - *Gasque v IRC* [1940] 2 KB 80)... of
> - property situate abroad
>
> is **not** excluded property since s.6(1) IHTA only applies to individuals.
> [2] Nevertheless, if such a company
> - is resident abroad and
> - makes a transfer of exempt Government securities within s.6(2) IHTA,

60 "(a) so much of that value as is attributable to any payment or transfer of assets to any person which falls to be taken into account in computing that person's profits or gains or losses for the purposes of income tax or corporation tax (or would fall to be so taken into account but for section 1285 of the Corporation Tax Act 2009 (exemption for UK company distributions) shall not be apportioned..."

they **do** qualify as excluded property.[61]

There is no exemption for UK situate AUTs or OEICs. An HMRC concession would be sensibly consistent with the practice on FOTRA securities and it might be worth asking HMRC in an appropriate case.

62.16.2 *Trustee participators*

Section 94(1) IHTA only applies to individuals. Section 99 IHTA provides:

> (1) Subsection (1) of section 94 above shall not apply in relation to a person who is a participator in his capacity as trustee of a settlement, but—
>
> (a) the reference in subsection (2) of that section to subsection (1) shall have effect as including a reference to subsection (2) of this section, and
>
> (b) in relation to tax chargeable by virtue of subsection (2) of this section, sections 94(4) and 95 above shall apply with the necessary modifications.

Amended as s.99 directs, s.94(2) provides:

> For the purposes of ~~subsection (1) above~~ s.99(2) IHTA the value transferred by the company's transfer of value shall be apportioned among the participators according to their respective rights and interests in the company immediately before the transfer, and any amount so apportioned to a close company shall be further apportioned among its participators, and so on; but ...

Of the two exemptions which follow in s.94(2), para (a) still applies (exemption for payments of an income nature). However para (b) does not apply to a trustee, as it provides:

> (b) if any amount which would otherwise be apportioned to an *individual* who is domiciled outside the UK is attributable to the value of any property outside the UK, that amount shall not be apportioned.

---

61 Sentence [1] is not technically accurate. It would be strictly correct to say that foreign situate *property* of a company incorporated abroad is not excluded property, because the definition of excluded property in s.6(1) only applies to property of individuals; however that is beside the point because (as the Manual has just noted) s.94(2) confers an equivalent exemption. But the important point here is that (however clumsily worded) sentence [2] extends the exemption to FOTRA securities.

This takes us to s.99(2) IHTA which incorporates the charge into the code of rules for IIP and non IIP trusts:

> Where any part of the value transferred by a close company's transfer of value is apportioned to a trustee of a settlement under section 94 above, then—
>
> (a) if a qualifying interest in possession subsists in the settled property, a part of that interest corresponding to such part of the property as is of a value equal to the part so apportioned less the amount specified in subsection (3) below shall be treated for the purposes of Chapter II of Part III of this Act as having come to an end on the making of the transfer,

This incorporates the rules in s.52 IHTA.

> (b) if no qualifying interest in possession subsists in the settled property, Chapter III of Part III of this Act shall have effect as if on the making of the transfer the trustee had made a disposition as a result of which the value of the settled property had been reduced by an amount equal to the part so apportioned less the amount specified in subsection (3) below;
>
> and where a qualifying interest in possession subsists in part only of the settled property paragraphs (a) and (b) above shall apply with the necessary adjustments of the values and amounts referred to there.
>
> (3) The amount referred to in paragraphs (a) and (b) of subsection (2) above is the amount (if any) by which the value of the settled property is more than it would be apart from the company's transfer, leaving out of account the value of any rights or interests in the company.

This incorporates the rules in s.65 IHTA, which can have some quirky results.

If the trust property is excluded property, there is no charge to IHT so the exemption in s.94(2)(b) is not needed.

Thus there is an interesting distinction between the rules for settled and non-settled companies. Where a company makes a transfer of value:

(1) Where a foreign domiciled individual is the participator, there is no IHT charge if the property which the company transfers is not UK situate; the situs of the shares in the company is not relevant.
(2) Where an excluded property trust is the participator, there is no IHT charge if the company's shares are not UK situate (the situs of the company's property is not relevant).

The IHT Manual provides:

> **IHTM16243 Close companies and settled property: the taxable amount** [Feb 2006]
> ... The provisions of IHTA84/Part IV do not provide any special charging section where settled property is concerned. Instead, the system for settled property provides a 'special' framework and then directs the notional transfers to their own existing taxing and rate sections, with the result that the claims produced by this legislation are the familiar IHTA84/S52 (1) for interests in possession ceasing. This basis of claim is artificial because in reality the interest does not cease.
> As a result such an event, occurring after 16 March 1987, can be a PET (IHTM04057) if it would have been so under a plain IHTA84/S52 (1) claim [i.e. if it was not then becoming held on non - interest in possession trusts]. This contrasts with the treatment of absolute gifts by close companies which, under IHTA84/S98 (3), are never PETs.
> In similar vein, annual and other exemptions (IHTM16082) available on a claim under IHTA84/S52 (1) are allowable.
> **IHTM16244 Close companies and settled property: foreign element** [Feb 2006]
> Bearing in mind that claims on settled property in the 'close company' (IHTM14851) regime under IHTA84/PartIV cases arise in their normal context and under normal charging sections it would seem that if the trusts identified above (IHTM16243) would in their own right, satisfy IHTA84/S48 (3), and the close company in question, being 'the property', is incorporated (and therefore domiciled) outside the UK, then an apportionment will not be made.
> So the trust property takes the benefit of excluded property treatment. IHTA84/S94 (2)(b) achieves this result for lifetime transfers.
> Where a company has the interest in possession as above, the position is more explicit -S48(4). If the trust property is invested in FOTRA securities (IHTM04306), and on looking through the company to the real beneficiaries, it can be seen that those individuals qualify under S48 (4), then exemption will be given...
> **IHTM16247 Close companies and settled property: example** [Feb 2006]
> Calculating the chargeable value of the property (or part):
> A close company has assets in excess of £3million. It transfers cash of £1million to A and B absolutely.
> The company has 1000 shares in issue.
> The 'participators' are identified under IHTA84/S94 (2). They are:
> A - who holds 500 shares

B - who holds 250 shares, and
C - who holds 250 shares in his capacity as a trustee of a settlement.
IHTA84/S99 (1)(a) causes S94 (2) to apply to him.
The transferred amount of £1,000,000 is apportioned so that A is deemed to have made a transfer of value of (500 ÷ 1,000) × £1,000,000 = £500,000.
From this figure we must deduct the amount of the transfer remaining in A's estate ('the amount by which his estate is more than it would be apart for the company's transfer' - S94(1)(a)). In this case he has accepted the money. His estate is 'more' by £500,000. So the taxable amount is £500,000 less £500,000 = nil.
As B is also an individual and has taken the money personally, his calculation follows the same lines.
But C is also a participator, and (250 / 1,000) × £1m is apportioned to him under S99 (1)(a) i.e. £250,000.
The amount to be taxed in relation to C under S99 (2) is £250,000 less the amount by which the settlement in question is 'more' as a result of the company's transfer - S99 (3).
Thus, as C and his settlement received nothing, the calculation is £250,000 less nil = £250,000 chargeable under S99 (2) above.
The last part of S99 (3) 'leaving out of account the value of any rights or interests in the company' means that the calculation stops here. S99 (3) prohibits the taking into account of the effects of these transactions by the company on the value of the shares (rights or interests).
E.g. the value of rights and interests still held by the shareholders as such could nullify the effect of all these provisions if that value were allowed into the above equation
also, if a company worth £3million gives away £1million as above, the thought might reasonably occur that the value of shares held by the shareholders personally has possibly dropped by about 1/3rd. You might then wonder about 'loss to the transferor'. You must put such thoughts out of your mind because such a claim does not exist.

62.17 Interests in trust property

An interest in trust property (an equitable interest) is itself an item of property which may be subject to IHT. That would lead to double taxation, eg in a trust for A for life, remainder to B, there might be

(1) tax on the death of A (if A has an estate IIP) or 10-year charges; and
(2) tax on the death of B (if the reversionary interest is an asset of B's estate).

62.17.1 *Reversionary interest*

Section 48(1) IHTA deals with this problem by providing that a reversionary interest is generally excluded property:

> (1) A reversionary interest is excluded property unless—
> (a) it has at any time been acquired (whether by the person entitled to it or by a person previously entitled to it) for a consideration in money or money's worth, or
> (b) it is one to which either the settlor or his spouse [or civil partner] is or has been beneficially entitled, or
> (c) it is the interest expectant on the determination of a lease treated as a settlement by virtue of section 43(3) above.

What about a reversionary interest within (a) to (c)? Section 48(3) IHTA provides:

> Where property comprised in a settlement is situated outside the UK—
> (a) the property (but not a reversionary interest in the property) is excluded property unless the settlor was domiciled in the UK at the time the settlement was made, and
> (b) section 6(1) above applies to a reversionary interest in the property *but does not otherwise apply in relation to the property* ...
> but this subsection is subject to subsection (3B) below

The words in italics make it clear that the non-settled property rules apply. An equitable interest which is a reversionary interest may be excluded property if it meets the conditions of s.48(1) or if it is not UK situate and owned by a foreign domiciliary.

62.17.2 *Interest in possession*

An equitable interest which is an estate IIP is excluded properly only if it is owned by a foreign domiciliary and is not UK situate. However, the disposal of the interest is not a transfer of value; s.51 IHTA. Tax is charged under s.52 only if the settled property is not excluded property.

62.17.3 *Purchased equitable interests*

Section 48(3) and (3A) IHTA both provide:

> but this subsection is subject to subsection (3B) below. ...

Section 48(3B) IHTA is an anti-avoidance provision which applies to two categories of settled excluded property: foreign situate property and UK

funds. It provides:

> Property is not excluded property by virtue of subsection (3) or (3A) above if—
>
> (a) a person is, or has been, beneficially entitled to an interest in possession in the property at any time,
>
> (b) the person is, or was, at that time an individual domiciled in the UK, and
>
> (c) the entitlement arose directly or indirectly as a result of a disposition made on or after 5th December 2005 for a consideration in money or money's worth.

EN FB 2006 explains:

> 8. ... By purchasing interests in existing trusts originally settled by a person domiciled outside the UK, UK-domiciled individuals have increasingly exploited this exemption to convert their wealth into IHT-free form.
>
> 9. This clause is aimed at blocking such avoidance by providing that property is not excluded property by virtue of section 48(3) or section 48(3A) IHTA if, at any time, a person domiciled in the UK has had an interest in possession in it, and their interest arose from a disposition for a consideration in money or money's worth. This applies whoever paid the money, and if the interest was acquired indirectly (for example, under a will or by intestacy) or has been passed on to someone else.

Section 48(3C) IHTA expands on this:

> For the purposes of subsection (3B) above—
>
> (a) it is immaterial whether the consideration was given by the person or by anyone else, and
>
> (b) the cases in which an entitlement arose indirectly as a result of a disposition include any case where the entitlement arose under a will or the law relating to intestacy.

Section 48(3C)(a) confirms (what would have been clear) that the provision can apply if an interest is purchased by A and then given by A to B. I am unable to see the point of s.48(3C)(b).

62.17.4 *F(No.1) A 2010 and FA 2012 rules*

Consideration is also needed for the anti-avoidance rules introduced in 2010 and 2012: ss.52, 53 F(No.1)A 2010 s.48(3D)-(3F) IHTA and s.74A, 74B IHTA. This topic will require many pages to discuss. It is some way from the themes of this book but I hope to address it in a future edition.

62.18 Excluded property exemptions: Lifetime gift and death charges

In this section I set out the various exemptions for excluded property. Each IHT charging provision has a separate exemption.

62.18.1 *Lifetime gifts*

The IHT charge on lifetime gifts is a charge on a transfer of value. The excluded property exemption for lifetime gifts is in the definition of transfer of value. One needs to read s.3(1)(2) together to follow the sense:

> (1) ... a transfer of value is a disposition made by a person ... as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition; ...
> (2) For the purposes of subsection (1) above no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

"Ceases to form part of a person's estate" is not to be construed too literally. Suppose an individual makes a disposition which reduces the value of excluded property but the property itself is retained. That must come within the exemption.

62.18.2 *Gift from foreign bank account to donee's UK account*

What is the position if a foreign domiciled donor makes a gift from their foreign bank account (ie, not a UK situate asset) to a *UK situate* bank account of the donee? The gift is not a transfer of value for IHT purposes. When funds are held in the donor's account, the donor has an asset (a debt). When funds are transferred to the donee's account, the donor's asset comes to an end and the donee acquires a new asset (a debt). The donor is at no time entitled to the funds in the UK account.[62]

As a matter of banking law, the donor's cheque or other instruction to the bank to transfer funds from the donor's account to another account is in principle revocable until it is carried out[63] but that does not alter the analysis, because when the donee receives the credit to his account, the

---

62 For the banking law analysis, see 11.12.8 (Gift to non-relevant person).

63 For completeness: in any particular case it would be relevant to consider the documentation and proper law concerned; but that is not going to affect the IHT analysis because it makes no difference if the instruction to the bank is revocable or not.

instructions have been carried out and the instruction has become irrevocable.

I stress this because the contrary has been suggested, but the position is perfectly clear.

62.18.3 *Charge on death*

The IHT charge on death is in s.4 IHTA. The charge is on the value of the deceased's estate. The IHT excluded property exemption for the charge on death comes in the definition of "estate" in s.5 IHTA; one needs to read sections 4 and 5 together to follow the sense:

> **4 Transfers on death**
> (1) On the death of any person tax shall be charged as if, immediately before his death, he had made a transfer of value and the value transferred by it had been equal to the value of his estate immediately before his death.
> **5 Meaning of estate**
> (1) For the purposes of this Act a person's estate is the aggregate of all the property to which he is beneficially entitled, except that ...
> (b) the estate of a person immediately before his death does not include excluded property...

For interaction of the spouse exemption and excluded property on death, see 67.1 (IHT spouse exemption).

62.19 Excluded property exemptions: 10-year and exit charges

IHT operates a system of 10-year and exit charges on trusts. A full discussion would need a long chapter. I focus on the reliefs for excluded property.

62.19.1 *"Relevant property"*

The key term is "relevant property". Section 58 IHTA provides (so far as relevant):

> (1) In this Chapter "relevant property" means settled property in which no qualifying interest in possession subsists, other than ...
> (f) excluded property

"Relevant property" is not a particularly helpful term, but it is not easy to find one which encapsulates the complex definition; and in any event it is easier to adopt the statutory term here.

62.19.2 *10-year charge*

The 10-year charge on trusts is in 64(1) IHTA:

> Where immediately before a ten-year anniversary all or any part of the property comprised in a settlement is relevant property, tax shall be charged at the rate applicable under sections 66 and 67 below on the value of the property or part at that time.

The IHT excluded property exemption for the 10-year charge comes in the definition of relevant property. If trust property is excluded property on the 10-year anniversary, there is no charge.

If trust property was excluded property formerly but is not excluded at the time of the 10-year anniversary, s.66(2) IHTA provides a partial relief:

> Where the whole or part of the value mentioned in section 64 above is attributable to property which was not relevant property, or was not comprised in the settlement, throughout the period of ten years ending immediately before the ten-year anniversary concerned, the rate at which tax is charged on that value or part shall be reduced by one-fortieth for each of the successive quarters in that period which expired before the property became, or last became, relevant property comprised in the settlement.

62.19.3 *Exit charge*

The exit charge on trusts is in s.65 IHTA which provides:

> (1) There shall be a charge to tax under this section—
> (a) where the property comprised in a settlement or any part of that property ceases to be relevant property (whether because it ceases to be comprised in the settlement or otherwise); and
> (b) in a case in which paragraph (a) above does not apply, where the trustees of the settlement make a disposition as a result of which the value of relevant property comprised in the settlement is less than it would be but for the disposition.

If excluded property ceases to be comprised in a settlement, there is no charge because excluded property is not relevant property, so it does not "cease to be relevant property".

Under s.65(1) there would be a charge if trust property which is relevant property becomes excluded property (as it then ceases to be relevant property.) There are three exemptions which usually prevent this charge.

Section 65(7) IHTA provides relief if trust property becomes non-UK

situate excluded property:

> Tax shall not be charged under this section by reason only that property comprised in a settlement ceases to be situated in the United Kingdom and thereby becomes excluded property by virtue of section 48(3)(a) above.

Section 65(7A) IHTA provides relief if trust property becomes UK fund excluded property:

> Tax shall not be charged under this section by reason only that property comprised in a settlement becomes excluded property by virtue of section 48(3A)(a) (holding in an authorised unit trust or a share in an open-ended investment company is excluded property unless settlor domiciled in UK when settlement made).[64]

Section 65(8) IHTA provides some relief if trust property becomes FOTRA security excluded property:

> If the settlor of a settlement was not domiciled in the United Kingdom when the settlement was made, tax shall not be charged under this section by reason only that property comprised in the settlement is invested in securities issued by the Treasury subject to a condition of the kind mentioned in section 6(2) above and thereby becomes excluded property by virtue of section 48(4)(b) above.

This is not a complete FOTRA exemption: there is an exit charge if trust property becomes FOTRA security excluded property under s.48(4)(a) or if the settlor was UK domiciled.[65]

There could also be an exit charge if trust property becomes excluded property under other categories, but in practice that would be rare.

There is an exit charge if trust property ceases to be relevant property even if the property was excluded property at some earlier time. However there is some relief for this situation. If the charge arises before the first 10-year anniversary, section 68(3) IHTA allows a relief where trust property was excluded property at an earlier time:

> Where the whole or part of the amount on which tax is charged is attributable to property which was not relevant property, or was not comprised in the settlement, throughout the period referred to in subsection (2) above, then in determining the appropriate fraction in

64 This subsection was inserted in 2013, but with effect from 2002

65 See 62.12 (Trusts: FOTRA securities).

relation to that amount or part—

(a) no quarter which expired before the day on which the property became, or last became, relevant property comprised in the settlement shall be counted, but

(b) if that day fell in the same quarter as that in which the period ends, that quarter shall be counted whether complete or not.

There is no equivalent relief for exit charges after the first 10-year anniversary. That is perhaps not needed, as the exit charge depends on the 10-year anniversary charge, which may itself qualify for relief for excluded property.

62.19.4 *Occasions where excluded property is relevant for IHT*

RI 166 states:

> However, an "excluded" asset is not always completely irrelevant for the purposes of IHT. So—
>
> [1] an "excluded" asset in a person's estate may still affect the valuation of another asset in the estate, for example, an "excluded" holding of shares in an unquoted company may affect the value of a similar holding in the estate which is not "excluded";

This is correct, but point [1] does not arise in practice. RI166 continues:

> [2] the value of an "excluded" asset at the time the asset becomes comprised in a settlement may be relevant in determining the rate of any tax charge arising in respect of the settlement under the IHT rules concerning trusts without [estate] interests in possession—ss 68(5), 66(4) and 69(3).

This will sometimes be significant. For instance, suppose:

(1) Excluded property (say, foreign situate money) is transferred to a trust.

(2) The trust invests that money in UK situate (chargeable) property.

(3) The property is transferred out of the trust before the 10 year anniversary.

It may be better for the settlor to lend the funds to the trust.

62.20 Non-residents foreign currency bank accounts

62.20.1 *Individual's account*

Section 157(1)(a) IHTA provides a limited relief for non-residents foreign currency bank accounts:

(1) In determining for the purposes of this Act the value of the estate immediately before his death of a person to whom this section applies there shall be left out of account the balance on—

(a) any qualifying foreign currency account of his ...

(5) In this section "qualifying foreign currency account" means a foreign currency account with a bank[66]; and for this purpose—

(a) "foreign currency account" means any account other than one denominated in sterling.

Section 157(2) IHTA explains who qualifies for the relief:

This section applies to a person who is not domiciled and not resident[67] in the UK immediately before his death.

62.20.2 *Trustees bank account*

Section 157(1)(b) IHTA provides a similar restricted relief for trustees foreign currency bank accounts:

(1) In determining for the purposes of this Act the value of the estate immediately before his death of a person to whom this section applies there shall be left out of account the balance on ...

(b) subject to subsection (3) below, any qualifying foreign currency account of the trustees of settled property in which he is beneficially entitled to an interest in possession.

...

(3) Subsection (1)(b) above does not apply in relation to settled property

[a] if the settlor was domiciled in the UK when he made the settlement, or

[b] if the trustees are domiciled or resident in the UK immediately before the beneficiary's death.

For the definition of trust residence see 5.18 (Trustee residence for IHT). Domicile presumably depends on the domicile of the trustees in their personal capacity (the rule that trustee's domicile should be relevant is odd, and inconsistent with the general scheme of UK trust IHT or the

---

66 Section 157(6) IHTA provides: "In this section 'bank' has the meaning given by section 991 of the Income Tax Act 2007."

67 Section 157(4) IHTA incorporates the income tax definition of residence:

"For the purposes of this section—

(a) the question whether a person is resident in the UK shall, subject to para (b) below, be determined as for the purposes of income tax;"

(Para (b) deals with trustee residence, discussed below).

taxation of trusts generally; but the relief is not important, so it does not much matter).

62.20.3 *Overdrawn account*

The IHT Manual provides at para 4380:

> **IHTM04380 - foreign currency bank accounts** [January 2008]
> Where the conditions are met, the balance on the account, whether in credit or in debit should be left out of account. You should refer any case of difficulty, especially if you are seeking to disallow a debit balance, to TG.

The second sentence suggests, perhaps, that HMRC are not entirely confident in this interpretation. It seems literally correct on a first reading, and provides an apparent symmetry of treatment with accounts with a positive balance; on the other hand it is a daft rule, a petty trap easily avoided by the well advised, and inconsistent with the general approach of deduction for debts.[68] I do not think it could have been the intention of Parliament.

See too 65.22 (Liability attributable to foreign currency bank account).

62.20.4 *Non-residents foreign currency bank accounts: Commentary*

This is a limited relief. The bank account is *not* excluded property for IHT purposes. It is only disregarded on the death of the owner or life tenant, so it is taken into account for lifetime gifts of individuals, and ten-year anniversary charges on trusts. The conditions for the relief are also stricter than for excluded property. It would in almost all cases be better to use a foreign bank account (which will be excluded property) rather than to rely on this exemption.

If the purpose of the relief is to encourage foreign domiciliaries to deposit funds with UK banks, these restrictions make no sense. It is suggested that foreign currency accounts (indeed all accounts) ought simply to qualify as excluded property in the same way as non-UK accounts. That change would also ensure the deductibility of overdrawn accounts. Otherwise the relief is just clutter in the system and if (as I expect) it is not much used it would be better to repeal it.

62.21 Works of art

The IHTA provides a pragmatic relief for works of art. Section 5(1) IHTA provides relief on death:

---

68 See 65.8 (Against which property is the debt deductible?).

> For the purposes of this Act a person's estate is the aggregate of all the property to which he is beneficially entitled, except that ...
> (b) the estate of a person immediately before his death does not include ... a foreign-owned work of art which is situated in the UK for one or more of the purposes of public display, cleaning and restoration (and for no other purpose).

Section 64(2) IHTA provides relief from 10-year charges:

> For the purposes of subsection (1) above, a foreign-owned work of art which is situated in the UK for one or more of the purposes of public display, cleaning and restoration (and for no other purpose) is not to be regarded as relevant property.

Section 272 IHTA defines these terms:

> "foreign-owned", in relation to property, means property in the case of which the person beneficially entitled to it is domiciled outside the UK or, if the property is comprised in a settlement, in the case of which the settlor was domiciled outside the UK when the property became comprised in the settlement;
> "public display" means display to which the public are admitted, on payment or not, but does not include display with a view to sale;

The reason is self-evident. Dawn Primarolo (then Financial Secretary to the Treasury) explained:

> the public interest would not be served if foreign owners of works of art were unwilling to send them to the UK for [purposes of public display, cleaning or restoration] for fear of a potential inheritance tax charge.[69]

This relief falls short of a complete exemption but in practice it is sufficient, and the gaps are not sufficiently important to discuss further here. See too 12.28 (Public access rule).

62.22 Overseas Pensions

A full discussion of the IHT treatment of pensions needs a book to itself. This section focusses on the issues closest to the themes of this book. See too 82.35 (Situs of pension and death benefits).

Section 153 IHTA provides a narrow relief:

> (1) In determining for the purposes of this Act the value of a person's estate immediately before his death there shall be left out of account any

69 Ministerial Statement 25 February 2003 [2003] STI 303.

pension payable under the regulations or rules relating to

[a] any fund vested in Commissioners under section 273 of the Government of India Act 1935 or

[b] to any fund administered under a scheme made under section 2 of the Overseas Pensions Act 1973 which is certified by the Secretary of State for the purpose of this section to correspond to an Order in Council under subsection (1) of the said section 273....

(3) Subsection (1) above shall be construed as if contained in section 273 of the Government of India Act 1935 ...

(4) If, by reason of Her Majesty's Government in the UK having assumed responsibility for a pension, allowance or gratuity within the meaning of section 1 of the Overseas Pensions Act 1973 payments in respect of it are made under that section, this section shall apply in relation to the pension, allowance or gratuity, exclusive of so much (if any) of it as is paid by virtue of the application to it of any provisions of the Pensions (Increase) Act 1971 or any enactment repealed by that Act, as if it continued to be paid by the Government or other body or fund which had responsibility for it before that responsibility was assumed by Her Majesty's Government in the UK.

62.23 IHT planning for individual

A foreign domiciliary should endeavour to secure, as far as possible, that their assets are situated outside the UK so that they qualify as excluded property and fall outside the inheritance tax net. The foreign domiciliary's property becomes excluded property the moment that it becomes non-UK situate; there is no qualifying period such as is required for agricultural or business property reliefs. The same applies to trustees of a settlement made by a foreign domiciliary. The question is: how is the individual's property to be transferred abroad?

The transfer abroad of £ Sterling from a UK bank account poses no problem. The transfer of bearer instruments abroad raises no problem. The transfer abroad of foreign currency in a UK bank account abroad needs consideration as to CGT. Chattels could be physically moved abroad but that may not be practical.

It is possible to turn UK situate shares and securities into non-UK situate assets for IHT: see 82.8 (Bearer documents and negotiable instruments).

Any UK asset could be sold and the proceeds remitted abroad. This is simple and satisfactory for inheritance tax; however, a sale may be ruled out by CGT or commercial reasons.

If the foreign domiciliary does not wish assets to be sold, they might give them to a company owned wholly by them. The shares in the company

should not be UK situate.[70] The company should normally be non-resident. The gift would not be a transfer of value for IHT because the donor's estate would not be reduced in value. It is considered that it is not a disposal by way of gift, as there is no gratuitous intent. In *Shiu Wing v Commissioner of Estate Duty*[71] the Hong Kong Court of Final Appeal refused to apply the *Ramsay* doctrine to arrangements made by the taxpayer to create property situated abroad (in this case situated outside Hong Kong). The gift would, of course, be a disposal for CGT purposes and hold-over relief would not normally be available. Accordingly, this option will only be a satisfactory solution either if no capital gain arises or if hold-over relief is available.[72]

If the individual is in good health, there is a lot to be said for doing nothing and ignoring IHT planning. The only inheritance tax risk in this strategy is that the individual might die so suddenly that no steps to save tax can be taken. This risk is reduced (but not eliminated) if the spouse exemption is available. It might be possible to take out insurance. In principle it is clearly undesirable to allow a beneficiary in poor health to retain an interest in possession in non-excluded property.

62.24 IHT planning for non-estate IIP trusts

A discretionary trust (and a non-estate IIP trust) is subject to IHT on its ten- year anniversaries. If the settlor is not UK domiciled when they made the trust, all that matters for IHT is the situs of the trust fund on that date.[73] The trustees may safely invest in the UK for a number of years, provided that, by the deadline, they hold foreign situate assets.

In principle this short-term planning may be extended indefinitely:

(1) As each ten-year anniversary approaches the trustees could sell the UK trust property (or even mortgage it) and invest in excluded property.

---

70 See 82.6 (Situs of registered shares) and 82.8 (Bearer documents and negotiable instruments).

71 2 ITELR 794.

72 A gift to the company by way of *donatio mortis causa* solves the CGT problem: s.62(5) TCGA. But such a gift is not effective for inheritance tax purposes. The donor retains the right of revocation which would not be excluded property on their death.

73 Note also the possible tax charge on the death of the settlor, under the gift with reservation rules, if the property is UK situate: see 63.14 (GWR death charge: excluded property rules for settled property) and following.

(2) Immediately after the anniversary they might sell and revert to UK investments.

In practice such a course might be subject to the GAAR but it depends on how it is done. Ideally the trustees should look for a different strategy such as holding the UK assets in a foreign registered company.

62.25 IHT planning for trustees of settlement with UK domiciled settlor

If the settlor is UK domiciled when the settlement was made, trust property is not normally excluded property even if the beneficiary is foreign domiciled.

62.25.1 *Beneficiaries not resident*

If the life tenant of an estate IIP trust is not resident in the UK, the trustees might invest in FOTRA securities. The trust property would then be excluded property. See 62.12 (Trusts: FOTRA securities).

Likewise if all the known beneficiaries of a discretionary trust are resident abroad. This option is not available if any of the beneficiaries are domiciled or resident in the UK. A deed of appointment might be needed to satisfy these conditions. This would give rise to an exit charge unless the settlor is foreign domiciled when the settlement was made: see s.65(8) IHTA. However, the amount of the charge may be moderate or small.

62.25.2 *UK settlor: Foreign domiciled beneficiary*

The best option – if circumstances allow – may be to bring the present settlement to an end by appointment to the foreign domiciled beneficiary absolutely. CGT needs consideration if the trust is UK resident and s.87 TCGA needs consideration if it is not. The beneficiary may after an appropriate period re-settle.[74] This may also be appropriate where the settlor has become foreign domiciled after making the settlement.

An alternative course may be to confer a general testamentary power on the foreign domiciled beneficiary. The beneficiary may on their death create a new trust with excluded property.

62.25.3 *Life tenant domiciled in Channel Islands or Isle of Man but deemed UK domiciled*

For this case, see 62.8 (Individual domiciled in Channel Islands or Isle of Man).

---

74 See 80.36 (Planning to create trust with foreign domiciled settlor).

CHAPTER SIXTY THREE

RESERVATION OF BENEFIT

63.1 GWR: Introduction

Here is a rendezvous of questions and question marks! A full discussion needs a book to itself. I focus on matters closest to the themes of this book, but it is necessary to consider the provisions generally in order to see the issues in their context.

I do not consider the special rules for insurance policies and for agricultural and business property relief. The IHT Manual contains much fascinating material which cannot be set out here.

63.2 Policy of GWR rules

In the past it has been rare for the Courts to consider the policy behind tax provisions in any detail. (This will now change as a result of the GAAR).

In *Ingram v IRC* Lord Hoffmann did address this issue:

> I should say something about the more general considerations involved in the application of s.102. Its policy has puzzled people for a long time. For one thing, it is in one sense a penal section. Not only may you not have your cake and eat it, but if you eat more than a few de minimis crumbs of what was given, you are deemed for tax purposes to have eaten the lot. Secondly, a superficial reading of phrases like 'beneficial enjoyment of the property' and enjoyment of property 'to the entire exclusion . . . of the donor' has led to numerous occasions in the past century in which the Revenue has put forward the proposition that, as a matter of practical common sense, it simply must be contrary to the policy of the statute for a donor to be able to give away property such as a house and go on enjoying the benefit of the property by continuing to live there. This is the premise upon which the Revenue claim the high ground of substance and reality. [Counsel for the Revenue] said that for Lady Ingram to have made a potentially exempt transfer and retained the right to stay in the house was simply too good to be true and in the Court

> of Appeal, Evans LJ accepted this proposition. But this approach ignores the fact that 'property' in s.102 is not something which has physical existence like a house but a specific interest in that property, a legal construct, which can co-exist with other interests in the same physical object. Section 102 does not therefore prevent people from deriving benefit from the object in which they have given away an interest. It applies only when they derive the benefit from that interest.
>
> If Lady Ingram had been dealing with a fund of investments instead of a house, she would have had no difficulty in achieving the same result, in economic terms, as the transaction in this case. She could have used part of the fund to purchase an annuity which would have guaranteed her exactly the same income as she had been receiving from the fund and given away the rest. Unless she needed to resort to capital, her outward circumstances would have continued unchanged. Why should it make a difference that her asset happened to consist of land? The gift was a real gift of the capital value in the land after deduction of her leasehold interest in the same way as a gift of the capital value of a fund after deduction of an annuity.
>
> What, then, is the policy of s.102? It requires people to define precisely the interests which they are giving away and the interests, if any, which they are retaining. Once they have given away an interest they may not receive back any benefits from that interest. In *Lang v Webb* (1912) 13 CLR 503 Isaacs J suggested that the policy was to avoid the 'delay, expense and uncertainty' of requiring the Revenue to investigate whether a gift was genuine or pretended. It laid down a rule that if the donor continued to derive any benefit from the property in which an interest had been given, it would be treated as a pretended gift unless the benefit could be shown to be referable to a specific proprietary interest which he had retained. This is probably the most plausible explanation and accepting this as the policy, I think there can be no doubt that the interest retained by Lady Ingram was a proprietary interest defined with the necessary precision.[1]

I set this out at length because it illustrates several important points about tax policy.

The first point is that the Courts ascertained the policy by using the ordinary methods of statutory construction, ie just by reading the statute. On this approach (there are others), the concept of tax policy is like the concept of the intention of parliament; it is a construct:

---

1 [1999] STC 37 at p.41; for other aspects of this case see 76.2.2 (*Ingram* schemes).

> The phrase is a shorthand reference to the intention which the court reasonably imputes to Parliament in respect of the language used. It is not the subjective intention of the minister or other persons who promoted the legislation. Nor is it the subjective intention of the draftsman, or of individual members or even of a majority of individual members of either House.[2]

The second point is that it was difficult to ascertain what is the policy of s.102: two wildly different policies were both plausibly arguable:

(1) that the policy was prevent *Ingram* style planning (known as shearing, or more tendentiously, "having one's cake and eating it").
(2) that the policy was to require donors to identify precisely the interests they give away and those (if any) they keep.

In this respect, s.102 is not unusual. It is often difficult (perhaps more often than not) to ascertain the policy of tax provisions and sometimes it is impossible:

> In reaching these conclusions I have not attempted any purposive construction of the detailed provisions of the Act, since I am not sure what their purpose is.[3]

This should not be a surprise. There are several powerful factors which lead to this result. The first is the difficulty of formulating a coherent tax policy: in many cases irreconcilable policy considerations yield no satisfactory solution. The second is the inadequate way in which tax policy and drafting has been, and often continues to be, formulated in the UK.[4] In some cases the "policy" is to prevent supposed avoidance arrangements which the HMRC (and the drafter) are unable (or unwilling) to cogently or clearly identify, or which may exist wholly or mainly in the imagination of the Revenue.[5]

Only judicial desire for comity with Parliament prevents statements of this kind being made more often.

Since there are strongly differing views on what the tax policy should be, there are inevitable differing views as to what the policy actually is. The wish may be father to the thought.

---

2 *R v Secretary of State ex p. Spath Holme* [2001] 2 AC 349.

3 *BP Oil Development. v IRC* 64 TC 498, at p.532B.

4 See 1.9 (The tax consultation framework).

5 For examples, see 65.36 (Purpose of disallowance for liabilities not paid after death); or the the Tainted Donation Rules in the taxation of charities.

For all these reasons, debates about what is the policy behind tax provisions will rarely be settled. Authoritative decisions of the Courts ought to resolve the question for practical purposes, on the relatively rare occasions when they exist; but even then, the losing side may continue to chip away at the issue. The history of the GAAR guidance on the policy of the GWR provisions offers an example.

63.2.1 *GWR and the GAAR*

HMRC draft GAAR guidance provided:[6]

> **4.1.2 The scheme**
> J grants a long lease over his home to S for no consideration, to take effect in 20 years time. ... J is able to continue to occupy the property for the next 20 years as he continues to own the freehold.
> The result of the scheme is that J has divided his home into two different interests: the lease and the freehold.
> J has gifted the lease of his home to S. J has also retained the freehold, which diminishes in value over the following 20 years.

This is a slight variant of the *Ingram* arrangement[7] but for present purposes the conveyancing details make no difference.

> **4.1.4 The taxpayer's tax analysis**
> The interest given away (the lease to take effect in 20 years time) is a potentially exempt transfer under section 3A, IHTA 1984 and will be exempt from IHT provided J survives for 7 years after the gift.
> The interest retained (the freehold subject to the lease) is reducing in value as the time for the lease to take effect approaches, so reducing the value of J's estate that will be subject to IHT on death.
> As the time for the lease to take effect approaches, the value of the asset transferred to S increases, but without giving rise to a charge to IHT.
> **4.1.5 What is the GAAR analysis under clause 2(2)?**
> 4.1.5.1 Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based and the policy objectives of those provisions?
> In 1975 Capital Transfer Tax ("CTT") replaced Estate Duty with the aim of reducing avoidance[8] through giving property away before death.

---

6 HMRC, "GAAR Guidance- Consultation Draft Part B Examples of How the GAAR Applies to Tax Arrangements" (December 2012).

7 See 76.2.2 (*Ingram* schemes).

8 This is tendentious: see 32.18 (Intention of Parliament *v* intention of Government).

Under CTT, all disposals of property, whether to individuals or into trust were immediately subject to tax. By 1986, CTT was seen as an inhibitor to the transfer of wealth, so transfers between individuals and to certain favoured[9] trusts were exempted from charge (provided the donor survived 7 years). Provisions were introduced to prevent the avoidance of the charge on death by gifts where the donor continues to benefit from the gift. And the tax was renamed. The purpose of these provisions was published in the Budget Press Release in March 1986.

The scheme allows the taxpayer to 'have their cake and eat it' since an interest in J's home is given away and will be free from IHT provided J survives 7 years; yet J is still able to live in and enjoy his home; the value of which is reducing as the commencement of the lease draws ever closer. This is not consistent with the principles or policy objectives of the reservation of benefit provisions.

4.1.5.2 Does the means of achieving the substantive tax results involve one or more contrived or abnormal steps?

Absent the arrangements, had J given his home to S and continued to live there rent-free, there would have been a clear reservation of benefit in the property. The property would have formed part of J's estate on death and the full value of the property at that time would have been subject to IHT. Simply making a gift of his home to S whilst continuing to live there might be considered a 'normal' step for J to take, as opposed to the "abnormal steps" which J did take.

The intermediate step taken by J in granting a long lease for no consideration, the commencement of which is deferred for a period of time, is contrived and is inserted purely to gain a tax advantage.

4.1.5.3 Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?

The gifts with reservation rules in section 102, FA 1986 cover a situation where an individual disposes of property by way of gift, but does not fully give away the ability to enjoy that property. The rules do not cover a situation where an individual creates two different interests in that property, and gives one interest away and retains the other.

In both situations the non-tax result for the individual may be the same. However, in the first situation the reservation with benefit rules apply. In the second situation, the rules do not apply.

The failure of the rules to cover a situation where an individual creates two different interests in a property is a shortcoming that the scheme is

9 This adjective is tendentious; but that does not affect the policy issues discussed here, and any one paragraph summary of CTT must oversimplify.

intended to exploit.

4.1.5.4 Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?

HMRC has not indicated that these arrangements give rise to the claimed tax result.[10]

4.1.6 Conclusion

On the facts given, the arrangements are abusive arrangements to which HMRC would seek to apply the GAAR.

In an early test of the views of the GAAR advisory panel, this passage was deleted from the GAAR guidance. The guidance now provides:

> D27.4.1 ... In [*Ingram*], the House of Lords held that the policy of the legislation was to identify precisely what property had been given away by the donor and what (if anything) was retained. They noted that there is nothing in principle behind the "gifts with reservation" provisions that stops the donor carefully dividing up his cake, giving away a slice and retaining the remaining cake. Continued enjoyment of the latter does not amount to a reservation in the former. Arrangements of the type adopted are known as "shearing" operations.
>
> Ss102A–102C FA 1986 were introduced to stop shearing arrangements in relation to certain carve out schemes over land. Hence the policy on such arrangements has clearly been altered by legislation and the effect of the GAAR in relation to such tax schemes must be considered in this light. However, this does not mean that all "carve out" arrangements have been stopped. The House of Lords has indicated that such arrangements are not necessarily[11] against the principles behind the legislation and no legislative action has been taken in relation to other types of assets to stop such arrangements. The discounted gift scheme can be seen as a classic shearing operation on property other than land.[12]

63.3 The basic conditions

Section 102(1) FA 1986 provides:

> ... this section applies where, on or after 18 March 1986, an individual disposes of any property by way of gift and either—

---

10 I wonder about that. *Ingram* arrangements (*avant la lettre*) were used in the 1960's and never challenged. But that does not affect the policy issue discussed here.

11 This is a somewhat tendentious summary of the view expressed in *Ingram*; but perhaps it does not matter.

12 HMRC GAAR Guidance Part D (Examples) (April 2013) accessible *http://www.hmrc.gov.uk/avoidance/gaar-partd-examples.pdf*

> (a) possession and enjoyment of the property is not bona fide assumed by the donee at or before the beginning of the relevant period;[13] or
> (b) at any time in the relevant period the property is not enjoyed to the entire exclusion, or virtually to the entire exclusion, of the donor and of any benefit to him by contract or otherwise ...

There are two sets of conditions:

(1) An individual (in this chapter "**the donor**") makes a disposal of property by way of gift. There are three separate elements here: a *disposal*, of *property*, which must be *by way of gift.*
(2) Condition (a) or (b) above must be satisfied (a reservation of benefit).

63.4 Terminology

Section 102(2) FA 1986 defines **"property subject to a reservation"**:

> If and so long as—
> (a) possession and enjoyment of any property is not bona fide assumed as mentioned in subsection (1)(a) above, or
> (b) any property is not enjoyed as mentioned in subsection (1)(b) above,
>
> the property is referred to (in relation to the gift and the donor) as property subject to a reservation.

In the following discussion:

(1) "**GWR property**" is property subject to a reservation.
(2) "**Settled GWR property**" is GWR property which becomes settled property by the gift (ie the gift is to a settlement).
(3) "**Non-settled GWR property**" is GWR property which does not become settled property by the gift (ie the gift is not to a settlement).
(4) "**The GWR death charge**" is the charge imposed by s.102(3) FA 1986.
(5) "**The GWR PET charge**" is the charge imposed by s.102(4) FA 1986.

---

13 Section 102(1) provides:

> ..."in this section 'the relevant period' means a period ending on the date of the donor's death and beginning seven years before that date or, if it is later, on the date of the gift."

63.5 "Disposal by way of gift"

There is no definition of "disposal by way of gift".

The surrender of a lease or life interest is arguably not a "disposal".

It is considered that the giving of consent to an exercise of a power of advancement or appointment is not a disposal.

It is considered that a sale at an undervalue is not "by way of gift".[14]

It is considered that a transfer to a settlement in which the settlor has an estate interest in possession is a disposal by way of gift, but from 2006 this issue will not usually arise.

A sale at market value, where the purchase price is left outstanding as an interest-free loan, repayable on demand, is not a disposal "by way of gift".

An interest free loan is not a disposal by way of gift.[15]

63.6 Reservation of benefit

The words used in s.102(1)(a)(b) are notoriously vague. While in most cases the matter will be clear enough there are significant areas of uncertainty. Some doubtful areas have been resolved for practical purposes by HMRC guidance.

63.6.1 *Gift to discretionary trust, settlor a beneficiary*

IHT Manual provides:

> **14393 Settlement on discretionary trusts** [January 2010]
> If a donor makes a settlement and is one of the members of the discretionary class of beneficiaries, this is a GWR.
> - The donor's position as a member of the discretionary class of beneficiaries is not an equitable interest retained by them (and so not included in the gift) and
> - as the donor is a member of the class, they have not been excluded (IHTM14333), or virtually excluded, from enjoyment. The fact that they do not receive any tangible benefit during the relevant period is immaterial.

This is correct.[16] It is considered that the same applies where an individual

---

14 This view is supported by the drafting of para 2(4) Sch 20 FA 1986: see 63.20.3 (Gift by donee).

15 This view is supported by the drafting of para 5(4) Sch 20 FA 1986: see 63.21.3 (Loan to trust).

16 *IRC v Eversden (Greenstock's Executors)* 75 TC 340 in the High Court; the Court of Appeal did not consider this point; *Lyon v HMRC* [2007] STC (SCD) 675.

makes a gift to a discretionary trust under which:
(1) the settlor is not included in the class of beneficiaries; but
(2) the trustees have an unrestricted power to add the settlor to the class of beneficiaries.[17]

63.6.2 *Gift from A to B followed by gift to trust by B*

The position is different where:
(1) A makes a gift to B.
(2) Later, by an independent transaction, B creates a discretionary trust under which A is a beneficiary (or where A can be added as a beneficiary).

In these circumstances A is *not* the settlor. It is considered that there is no reservation of benefit merely because A is a discretionary beneficiary. There will be a reservation of benefit if A actually receives a benefit.

63.6.3 *"Virtually" to the entire exclusion*

This concept matters for GWR and also for remittance conditions C and D.[18] With an economy of concepts, HMRC apply their guidance to the conceptually distinct issue of whether a person "occupies" land, ie a person who is "virtually" excluded from land is not an occupier.[19] "Occupy" is a concept which matters for many tax purposes. So I consider the topic in some detail.

RI 55 provides:

> The word "virtually" in the de minimis rule in FA 1986 s 102(1)(b) is not defined and the statute does not give any express guidance about its meaning. However, the shorter Oxford English Dictionary defines it as, amongst other things, "to all intents" and "as good as". Our interpretation of "virtually to the entire exclusion" is that it covers cases in which the benefit to the donor is insignificant in relation to the gifted property.

---

17 In the HMRC view, however, the position is not so clear. The IHT Manual provides:
"**14393 Settlement on discretionary trusts** [January 2010]
Example 2
... The question of whether the possibility that A's name might be added to the class is a reservation is one which you can only determine on the particular facts. Refer any case where the point is material to the Litigation Section."

18 See 11.23.2 (Enjoyment disregards).

19 See 76.3.1 ("Occupation").

> It is not possible to reduce this test to a single crisp proposition. Each case turns on its own unique circumstances and the questions are likely to be ones of fact and degree. We do not operate s 102(1)(b) in such a way that donors are unreasonably prevented from having limited access to property they have given away and a measure of flexibility is adopted in applying the test.

These generalities do not take us far. RI 55 goes on to give some more concrete examples:

> Some examples of situations in which we consider that FA 1986 s 102(1)(b) permits limited benefit to the donor without bringing the GWR provisions into play are given below to illustrate how we apply the de minimis test—
>
> [1] a house which becomes the donee's residence but where the donor subsequently—
>
> – stays, in the absence of the donee, for not more than two weeks each year, or
> – stays with the donee for less than one month each year;
>
> [2] social visits, excluding overnight stays made by a donor as a guest of the donee, to a house which he had given away. The extent of the social visits should be no greater than the visits which the donor might be expected to make to the donee's house in the absence of any gift by the donor;
>
> [3] a temporary stay for some short term purpose in a house the donor had previously given away, for example—
>
> – while the donor convalesces after medical treatment;
> – while the donor looks after a donee convalescing after medical treatment;
> – while the donor's own home is being redecorated;
> – visits to a house for domestic reasons, for example baby-sitting by the donor for the donee's children;
>
> [4] a house together with a library of books which the donor visits less than five times in any year to consult or borrow a book;
>
> [5] a motor car which the donee uses to give occasional (ie less than three times a month) lifts to the donor;
>
> [6] land which the donor uses to walk his dogs or for horse riding provided this does not restrict the donee's use of the land.

There follow some examples of where there is a benefit:

> It follows, of course, that if the benefit to the donor is, or becomes, more significant, the GWR provisions are likely to apply. Examples of this include gifts of—

> [1] a house in which the donor then stays most weekends, or for a month or more each year;
> [2] a second home or holiday home which the donor and the donee both then use on an occasional basis;
> [3] a house with a library in which the donor continues to keep his own books, or which the donor uses on a regular basis, for example because it is necessary for his work;
> [4] a motor car which the donee uses every day to take the donor to work.[20]

63.7 Full consideration exemption

The concept of full consideration matters for so many tax purposes that it is not possible to write a full list; these include:

(1) GWR
(2) Remittance conditions C and D[21]
(3) POA rules[22]

So I consider it in some detail.

Para 6(1) Sch 20 FA 1986 provides:

> In determining whether any property which is disposed of by way of gift is enjoyed to the entire exclusion, or virtually to the entire exclusion, of the donor and of any benefit to him by contract or otherwise—
> (a) in the case of property which is an interest in land or a chattel, retention or assumption by the donor of actual occupation of the land or actual enjoyment of an incorporeal right over the land, or actual possession of the chattel shall be disregarded if it is for full consideration in money or money's worth;

RI 55 provides:

> The GWR provisions do not apply where an interest in land is given away and the donor pays full consideration for future use of the property (FA 1986 Sch 20 para 6(1)(a)). While we take the view that such full consideration is required throughout the relevant period—and therefore consider that the rent paid should be reviewed at appropriate intervals to reflect market changes—we do recognise that there is no single value at which consideration can be fixed as "full". Rather, we accept that

---

20 The same passage is found in IHTM14333 (modernised in 2010 to gender inclusive language).

21 See 11.23.2 (Enjoyment disregards).

22 See 76.21 (Full consideration exemption).

what constitutes full consideration in any case lies within a range of values reflecting normal valuation tolerances, and that any amount within that range can be accepted as satisfying the para 6(1)(a) test.

For chattels, see the published IR letter of 18 May 1987. At present HMRC argue that the industry standard guideline for chattels (market rent = 1% of capital value) is too low.

63.8 IHT on the disposal by way of gift

A gift which is a chargeable transfer will give rise to a charge to IHT (assuming it exceeds the nil rate threshold) whether or not it is a gift with a reservation.[23] The reservation of benefit does not affect this charge; just on the death of the donor there may be a further charge to tax. The Inheritance Tax (Double Charges Relief) Regulations 1987 mitigate a double charge. This chapter does not consider the IHT which might arise on a disposal by way of gift; it considers only the GWR aspects.

63.9 Gift of excluded property

Section 102 FA 1986 applies when an individual disposes of any property by way of gift. A foreign domiciliary is certainly "an individual". A gift of UK situate property by a foreign domiciliary is clearly within the GWR rule.

What is the position where a foreign domiciliary disposes of excluded

---

23 The IHT Manual seems to make this somewhat elementary error:

"**14316 Sales for less than full consideration** [January 2010]

Example 1

In 1989 the donor sold a house, then worth £100,000, to his son for £25,000. This is a disposition partly by way of sale and partly by way of gift. The donor dies in 1993.

- If the donor has been excluded from enjoyment of the property throughout the period, the gift is a PET chargeable on his death. The loss to his estate is the value of the entirety of the property less the consideration received (£100,000 less £25,000 = £75,000).

[The correct view is that the sale is a PET whether or not the donor is excluded]

- If the donor was not excluded from enjoyment of the property, for instance because he resided at the property following the disposition, the disposal by way of gift is a GWR. The value of the property disposed of by way of gift is 75% of the value of the whole property. Thus, if the property is still subject to a reservation immediately before the donor's death, 75% of its death value is treated as property to which the donor was beneficially entitled."

[This is very doubtful; no property is disposed of by way of gift]

property by way of gift? There is nothing which expressly takes the gift out of the scope of the GWR rules. However, it is suggested that s.3(2) IHTA does so obliquely. Section 3 IHTA provides:

> (1) Subject to the following provisions of this Part of this Act, a transfer of value is a disposition made by a person (the transferor) as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition; and the amount by which it is less is the value transferred by the transfer.
> (2) For the purposes of subsection (1) above no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

On a literal approach to construction this makes no difference. The fact that no account is taken of the value of excluded property for the purposes of s.3(1) does not entail that the disposition is not a "disposal by way of gift". However, a purposive construction suggests otherwise. It is absurd that there should be a charge to tax in circumstances where:

(1) a foreign domiciliary with no UK connection makes a gift of excluded property to another person with no UK connection, and enjoys some benefit; and
(2) the foreign domiciliary dies many years later at a time when property representing the property given is situate in the UK.

Nobody would expect the foreign domiciled donor or their executors to comply or to be able to comply with an obligation to pay IHT in such circumstances. The purpose of s.3(2) IHTA is to take excluded property out of the scope of inheritance tax and a disposal of excluded property is by implication ignored. Since it is ignored it is not a disposal "by way of gift". This view is also supported by the use of the term "excluded property" – the property is regarded as excluded from IHT. This explains why an inter-spouse gift of excluded property is not within the GWR rule.[24]

HMRC do not appear to accept this view. They might object with a counter-anomaly: that if it were right, the trust was within the POA charge as the POA GWR exemption would not apply.[25] One answer is that even though the terms of s.102(1) are not met (there is no disposal by way of gift) the trust property is still "property subject to a reservation" as defined

---

24 See 63.10.1 (Inter-spouse gift of excluded property).

25 See 76.19 (GWR exemptions).

in s.102(2), purposively construed, so long as the donor enjoys a benefit, so the POA GWR exemption does not apply. (Also the foreign domicile exemption will often apply in this case.)

63.10 GWR spouse exemption

This section considers the GWR position on inter-spouse gifts. For the IHT spouse exemption generally see 67.1 (IHT spouse exemption); see too 63.19 (IHT spouse exemption defence to GWR death charge).

Section 102(5) FA 1986 provides a relief which I call the "**GWR spouse exemption**":

> This section does not apply if or, as the case may be, to the extent that the disposal of property by way of gift is an exempt transfer by virtue of any of the following provisions of Part II of the [IHTA],—
>
> (a) section 18 (transfers between spouses or civil partners) ... ;

In short, the GWR rules do not apply on gifts between spouses if the IHT spouse exemption applies.[26]

Where a UK domiciled individual makes a gift to a foreign domiciled spouse, the IHT spouse exemption is restricted[27] and a gift over the limit will be within the scope of GWR, unless some other exemption[28] is in point. One solution to this problem is to sell assets at market value, so there is no disposal by way of gift. Watch the SDRT/SDLT implications.

One common situation is where one spouse gives an interest in the family home to the other spouse, but as long as the property is jointly occupied, there is in principle no GWR: see s.102B FA 1986.

63.10.1 *Inter-spouse gift of excluded property*

What is the position when a foreign domiciled individual makes a gift of excluded property to their spouse? On a literal construction, the gift will fall within the GWR rules. A gift of excluded property is not a transfer of value, so outside the scope of the IHT spouse exemption, so it is outside the scope of the GWR spouse exemption! But that is absurd and cannot be the correct construction, even if words must be strained to reach this

---

26 I use the term "**IHT spouse exemption**" to refer to the exemption on inter-spouse transfers in s.18 IHTA.

27 See 73.2 (Restriction on IHT spouse exemption for foreign domiciled spouse).

28 Such as the family maintenance exemption: see 73.4 (Disposition for maintenance of spouse and other exemptions).

result. This consideration supports the view taken here that gifts of excluded property, and gifts within s.11 IHTA, are deemed not to be by way of gift.[29]

63.10.2 *Restriction on GWR spouse exemption*

Section 102 FA 1986 provides:

> (5A) Subsection (5)(a) above does not prevent this section from applying if or, as the case may be, to the extent that—
>
> (a) the property becomes settled property by virtue of the gift,
>
> (b) by reason of the donor's spouse or civil partner ("the relevant beneficiary") becoming beneficially entitled to an interest in possession in the settled property, the disposal is or, as the case may be, is to any extent an exempt transfer by virtue of section 18 of the 1984 Act in consequence of the operation of section 49 of that Act (treatment of interests in possession),
>
> (c) at some time after the disposal, but before the death of the donor, the relevant beneficiary's interest in possession comes to an end, and
>
> (d) on the occasion on which that interest comes to an end, the relevant beneficiary does not become beneficially entitled to the settled property or to another interest in possession in the settled property.
>
> (5B) If or, as the case may be, to the extent that this section applies by virtue of subsection (5A) above, it has effect as if the disposal by way of gift had been made immediately after the relevant beneficiary's interest in possession came to an end.
>
> (5C) For the purposes of subsections (5A) and (5B) above—
>
> (a) section 51(1)(b) of the 1984 Act (disposal of interest in possession treated as coming to end of interest) applies as it applies for the purposes of Chapter 2 of Part 3 of that Act; and
>
> (b) references to any property or to an interest in any property include references to part of any property or interest.

This stops *Eversden* schemes;[30] it is now unnecessary (because of s.102ZA and the POA rules) and should be repealed (ideally along with a

29 If my view were wrong the further anomaly would arise that gifts of qualifying investments to charity would fall within the scope of GWR because such gifts fall within s.12 IHTA and not s.102(5)(d) FA 1986; but it is not necessary to pursue that here.

30 See 76.2.1 (Eversden schemes).

replacement of the POA rules with something more targeted).

63.11 GWR death charge

Section 102(3) FA 1986 provides:

> If, immediately before the death of the donor, there is any property which, in relation to him, is property subject to a reservation then ... that property shall be treated for the purposes of the [IHTA] as property to which he was beneficially entitled immediately before his death.

I refer to this as "**the GWR death charge**". Section 102(3) is a deeming provision; the donor is not in fact beneficially entitled to the property subject to the reservation but the property is treated as if they were so entitled. To understand the significance of this, it is necessary to set out the short series of sections that impose an inheritance tax charge on property to which a person is beneficially entitled at death.

Section 4(1) IHTA imposes the IHT charge on death:

> On the death of any person tax shall be charged as if, immediately before his death, he had made a transfer of value and the value transferred by it had been equal to the value of his estate immediately before his death.

The key word here is "estate". Section 5(1) IHTA defines estate by reference to beneficial entitlement:

> .... a person's estate is the aggregate of all the property to which he is beneficially entitled, except that ...
>
> (b) the estate of a person immediately before his death does not include excluded property ...

So if there is a GWR until death and the property is *not* excluded property:

(1) the property is treated as property to which the donor was beneficially entitled (in all cases);
(2) the property is part of their estate.

If there is a GWR until death and the property *is* excluded property:

(1) the property is treated as property to which the donor was beneficially entitled (in all cases);
(2) the property is not part of their estate.

63.12 GWR over debt owed by the deceased

Suppose:

(1) S creates a discretionary settlement under which S is a beneficiary.

(2) The trustees lend to S.
(3) S dies.

The debt ("the GWR debt") is treated as being in the estate of S. However a person cannot owe a debt to himself. If the GWR debt is treated as property beneficially owned by the debtor, it must be treated as if it ceased to exist. For this reason there is no IHT charge on the debt under the GWR rules, on the death of S, even if the GWR debt is UK situate.[31]

63.13 GWR death charge: Non-settled property excluded property rules

Suppose:

(1) A gives property to B, an individual, outright.
(2) There is a reservation of benefit: A enjoys benefits at the time of A's death.
(3) The property is not UK situate at the time of A's death.

A is treated as if A were beneficially entitled to the property at the time of A's death. It forms part of their estate unless it is excluded property at that time. How do the excluded property rules work in these circumstances?

Here we are concerned with non-settled property. The relevant rule is that:

> Property situated outside the UK is excluded property if the person beneficially entitled to it is an individual domiciled outside the UK.[32]

In the example above, B is *in fact* beneficially entitled to the property. A is *treated* as beneficially entitled. Who is "beneficially entitled" for the purpose of applying the excluded property rule; is it A or is it B? This does not matter if A and B are both foreign domiciled, but it does if one is and the other is not. One common case is in a gift from a UK domiciled donor to their foreign domiciled spouse.[33] The answer is to be found by applying the general rule of construction which applies to deeming provisions.[34] Applying this principle it follows that the domicile of the donor A is what matters for excluded property status. Thus if A has a foreign domicile, the property (if not UK situated) is excluded property.

---

31 If the debt is non-UK situate it may also be outside the scope of IHT because of the excluded property rules. On the question of a deduction for the GWR debt, see 65.9.3 (Debt owed by settlor to settlor-interested discretionary trust).

32 Section 6(1) IHTA.

33 See 63.10 (GWR spouse exemption).

34 See App 2.1 (Construction of Deeming Provisions).

The domicile of the donee B is irrelevant. This conclusion is confirmed by the context. It would be absurd if the taxation of A depended on the domicile of B. The taxation of A should depend on A's own domicile position.

For the purposes of the excluded property rule, therefore:

(1) The domicile of the donor at the time of gift is irrelevant (contrast the position where the gift is made in trust).[35]
(2) The situs of the property at the time of the gift is irrelevant to the operation of the excluded property rules on the death of the donor.

HMRC agree. The IHT Manual provides:

> **14318 The gift: exempt transfers which cannot be GWRs** [November 2013]
> ...
> *Excluded property*
> Under the charging provisions (IHTM04072), excluded property (IHTM04251) cannot be the subject of a GWR...
> *Example*[36]
> Example 3 (George)
> G is originally domiciled in the UK, but moves to New Zealand and acquires a domicile of choice there. He gives some New Zealand shares to his son, R, but continues to enjoy the dividends until his death ten years later. He dies domiciled in New Zealand.
> The property is subject to a reservation and is therefore deemed to be part of G's estate on death. However, the property is situated outside the UK and the donor, who is treated as beneficially entitled to it, was domiciled outside the UK at his death. The property is therefore excluded property within IHTA84/S6 (1) and escapes the GWR charge.

This is correct; the Manual continues:

> However, if G had returned to the UK and his domicile of origin had revived, there will be a GWR claim on his death, or if the reservation had ceased in his lifetime and within 7 years of his death, the ending of the reservation will be treated as a deemed PET. This is because at the time the GWR charge arises, G is domiciled in the UK so IHTA84/S6(1) does not apply...

---

35 See 63.14 (GWR death charge: excluded property rules for settled property) below.

36 This example was reworded and improved in 2010, probably in response to criticisms of the former wording in the 2010/11 edition of this book.

While it is correct that s.6(1) does not apply on the facts of this version of the example, it is arguable that there is no GWR.[37]

The same applies to gifts to companies, including companies held by trusts.

63.14 GWR death charge: Excluded property rules for settled property

Suppose:
(1) S (not UK domiciled) gives property to a discretionary settlement.
(2) There is a reservation of benefit, eg S is a beneficiary.
(3) The property is not UK situate[38] at the time of the death of S.
S is treated as if S were beneficially entitled to the property at the time of S's death. It forms part of S's estate unless it is excluded property at that time. How do the excluded property rules work in these circumstances?

63.14.1 *The rival solutions*

There are two sets of excluded property rules, relating to settled and non-settled property. Which does one apply?

The Settled Property Solution The property subject to a reservation is in fact settled property, so on this view one applies the settled property rules set out in s.48(3) IHTA:

> Where property comprised in a settlement is situated outside the UK—
> (a) The property ... is excluded property unless the settlor was domiciled in the UK at the time the settlement was made. ...

So on this view, where an individual makes a gift to a settlement with reservation of benefit, and dies, the property is excluded property for the GWR rules if:
(1) the donor is domiciled outside the UK at the time the settlement was made. (The domicile of the donor at the time of death is irrelevant); and
(2) the property is not situated in the UK at the time of death.
I call this "**the Settled Property Solution**".

The Non-settled Property Solution The settled property GWR is to be treated as property to which the donor is "beneficially entitled". On this

---

37 See 63.9 (Gift of excluded property).

38 The position is the same if the property consists of UK AUTs or OEICs, but for convenience I refer to non-UK situate property only.

view one applies the deeming provision to its logical conclusion: if a person is beneficially entitled to property, it is not settled property. So on this view, where an individual makes a gift to a settlement with reservation of benefit, and dies, the property is excluded property for the GWR rules if:

(1) the donor was domiciled outside the UK at the time of their death. (The domicile of the donor at the time the settlement was made is irrelevant for GWR, though it is relevant for other purposes); and
(2) the property is not situated in the UK at the time of death.

I call this "**the Non-settled Property Solution**".

63.14.2 *The correct solution*

The Non-settled Property Solution has supporters.[39] Nevertheless it is generally regarded as wrong. What about the deeming provision that the property is to be treated as if the donor were beneficially entitled to it? The answer is that the property must still be regarded as "settled property" for the application of the excluded property rules. One does not carry the implications of the deeming provisions as far as the Non-settled Property Solution suggests. One way to reach this conclusion is to note that the deeming provision does not deem the donor to be beneficially and *absolutely* entitled to the settled property. One can be beneficially entitled to property which is settled property. (Bear in mind that "settlement" has a wide definition for IHT. It includes property held subject to a contingency, property charged with the payment of an annuity, and a lease for life. A person entitled to such property may nevertheless be said to be "beneficially" entitled.)

This view is supported by s.49(1) IHTA which provides:

> A person beneficially entitled to an interest in possession in settled property shall be treated for the purposes of this Act as *beneficially entitled* to the property in which the interest subsists.
> [Emphasis added]

No-one suggests that property to which s.49(1) applies is to be treated as non-settled property for the purposes of the GWR rules. The wording of the deeming provision in s.102(3) is materially the same.

---

39 Venables, "Excluded Property Trusts and GROBs" [2003] OITR Vol 11 p.75, accessible *http://www.khpplc.co.uk/reviews*; Akin, *GITC Review*, Vol 1 Issue 2, p.1, accessible *http://www.taxbar.com*.

Under the Non-settled Property Solution, the property is simultaneously excluded property (for general IHT purposes) and non-excluded property (for GWR purposes). While that is not impossible, it would be remarkable, even in as convoluted an area as this, and for this reason too the Settled Property Solution is to be preferred.

It has been said that a purposive construction favours the Non-settled Property Solution: the purpose of the GWR rules is to put the donor in the same position as if they had not made the gift. This is the general purpose in the case of gifts by UK domiciliaries. However, arguments on purposive construction only run when one knows the general purpose and is confident that the general purpose applies in the particular circumstances of the case. This argument *assumes* that that purpose necessarily extends to the foreign domiciliary – which begs the question. Perhaps Parliament intended there to be a difference between the two cases. One cannot apply a purposive construction unless the purpose is clear.[40]

Even adopting the Settled Property Solution, there will arguably[41] be a charge to IHT on the death of a settlor who enjoys a benefit over trust property if at the time of their death the trust property is UK situated (and not UK AUTs or OEICs). Though I doubt if much notice is taken of that in practice.

In short, if the settlor is a beneficiary it is safer not to invest directly in UK situate property during their life.

Note that the Non-settled Property Solution favours the taxpayer if a UK domiciliary makes a GWR settlement, and becomes non-UK domiciled before their death. However that won't often happen.

63.14.3 *HMRC view*

After a decade of dithering[42] HMRC now agree with the Settled Property Solution. The IHT Manual provides:

---

40 In the battle of the anomalies HMRC might instance the case where a foreign domiciliary made a settlement shortly before becoming UK domiciled, and say that it is absurd that a settlement made in such circumstances should avoid IHT on the death of the settlor. But (1) this is certainly the case where the foreign domiciliary enjoys no benefit from the settlement; and (2) this was the case under estate duty; and (3) this was the case under HMRC practice in the first 15 years or so of IHT; in the circumstances it is wrong (if not absurd) to describe that result as absurd.

41 See 63.9 (Gift of excluded property).

42 See the 2010/11 edition of this work para 51.12.3.

14396 Settled property: Settlement created when the settlor is domiciled outside the UK [January 2011]

Where the settlor was domiciled outside the UK at the time a settlement was made, any foreign property in the settlement is excluded property and is not brought into charge for Inheritance Tax (IHT) purposes (IHTM27220). This rule applies where property is subject to a reservation of benefit even though the settlor may have acquired a domicile of choice in the UK, or be deemed to be domiciled in the UK, at the time the GWR charge arises (IHTM04071).

Reservation ceasing on death

At the material date FA86/S102(3) deems the donor to be beneficially entitled to property that is, at that time, settled property. As the property in which the reservation subsisted is 'property comprised in a settlement', it is the provisions of IHTA84/S48(3) that are in point. It is the domicile of the settlor at the time the settlement was made that is relevant in deciding whether foreign property in which the reservation subsisted is excluded property.

Example (Henry)

H, who is domiciled in New Zealand, puts foreign property into a discretionary trust under which he is a potential beneficiary (IHTM14393). He dies five years later having acquired a domicile of choice in the UK and without having released the reservation. The property is subject to a reservation on death but it remains excluded property and is outside the IHT charge.

The Manual continues by noting three exceptions:

Exceptions to the rule

There are, however, circumstances where this rule does not apply:

[1] If the trustees had sold the foreign assets so that at the date of death the settled property was invested in UK assets, the exclusion would not apply as the property comprised in the settlement was not situated outside the UK, so IHTA84/S48(3) cannot apply.

[2] If the donor has acquired a domicile of choice (or is deemed domiciled) in the UK and adds other property to the settlement (irrespective of the situs (IHTM27071) of the property), we regard the donor as creating a separate settlement (IHTM04272). All the trust assets will be property subject to a reservation, but the foreign assets settled when the donor was domiciled outside the UK will be excluded property, whereas the assets settled when the donor was domiciled in the UK will be subject to IHT

[3] And in the reverse situation, if a donor who is domiciled (or deemed domiciled) in the UK creates a settlement with foreign assets and the

> settled property remains subject to a reservation at death, the trust assets will be subject to IHT under FA86/S102(3) even if the settlor dies domiciled outside the UK as IHTA84/S48(3) does not apply - as well as being subject to relevant property trust charges (IHTM42000).

Point [1] is correct that s.48(3) does not apply but it is arguable that there is no GWR for other reasons.[43] Point [2] is very doubtful: see 62.15 (Settlor adds property to trust after change of domicile). Point [3] is correct, assuming the settled property solution is correct. The unfairness of the double charge (which does not seem to trouble HMRC) may be avoidable by winding up the trust.

63.15 Gift to foreign domiciled donee who creates a settlement

Suppose:
(1) A gives property outright to B.
(2) B gives that property to a settlement.
(3) A is a beneficiary of that settlement and enjoys benefits so that there is a reservation of a benefit in relation to A's gift.
(4) B (and not A) is the settlor of the settlement.[44]

Now which set of excluded property rules is applied? It is suggested that one must apply the rules applicable to settled property for the reasons given in 63.14 (GWR death charge: excluded property rules for settled property). FA 1986 Sch. 20 para 5 needs to be considered but, properly understood, nothing there deems A to be the settlor of the settlement. If that is right, there is no reservation of benefit problem if:
(a) B (the settlor) was not domiciled in the UK when the settlement is made; and
(b) the property is not situated in the UK at the time of the death of A.

Conversely, on this view, there is a GWR problem if B (the settlor) is UK domiciled (regardless of the domicile of A).

63.16 GWR PET charge

So far we have considered the position where the benefit continues until the death of the donor. Section 102(4) FA 1986 provides:

> If, at a time before the end of the relevant period, any property ceases to

---

43 See 63.9 (Gift of excluded property).
44 See 80.4 (Gift from A to B followed by gift to trust by B).

> be property subject to a reservation, the donor shall be treated for the purposes of the 1984 Act as having at that time made a disposition of the property by a disposition which is a potentially exempt transfer.

I refer to this as "**the GWR PET charge"**. Section 102(4) is a deeming provision; it is a different deeming from s.102(3), the GWR death charge. In s.102(3) the donor is deemed to be beneficially entitled. Here, the donor is deemed to have made a PET. To understand the significance of this, it is necessary to set out the definition of a PET. A PET is a particular kind of transfer of value (s.3A IHTA) and s.3 IHTA provides:

> (1) [a] ... a transfer of value is a disposition made by a person (the transferor) as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition;
>
> [b] and the amount by which it is less is the value transferred by the transfer.
>
> (2) For the purposes of subsection (1) above no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

Note that s.3(1) contains two definitions: s.3(1)[a] defines "transfer of value" and s.3(1)[b] defines "value transferred". For both purposes s.3(2) states that excluded property is (in short) disregarded.

63.16.1 *Non-settled GWR PET charge*

Suppose:

(1) a non-UK domiciliary makes a non-settled GWR of non-UK situate property; and

(2) the property ceases to be subject to a reservation (while the donor is still non-UK domiciled).

No-one could sensibly suggest that there is a possible IHT charge. The reason is in s.3(2): the donor is deemed to have made a disposition of excluded property. While one can (just) call that a PET, the value transferred is ignored and no charge to IHT can arise. Nothing in the deeming provision requires one to ignore the application of s.3(2) to s.3(1)[b]. What matters is the domicile of the donor (and the situs of the GWR property) at the time the reservation ceases. There would be a deemed PET if:

(1) F (a foreign domiciliary) makes a GWR.

(2) F becomes UK domiciled.

(3) The GWR is released.[45]

63.16.2 *Settled GWR PET charge*

Suppose settled property ceases to be subject to a reservation; eg a donor ceases to be a beneficiary of a trust they have created, and becomes excluded from all benefit. The issues are similar to the case of the GWR death charge: how far do you carry the implications of the deemed PET? Do you deem the GWR property which is actually settled property to be non-settled property? Although the deeming is marginally different, the context is the same as for GWR on death.

The answer must be decided consistently with the answer to the related issue for a GWR on death. If (as concluded above) the Settled Property Solution is correct on death then there is also no charge on a lifetime cessation of GWR. HMRC agree, and (having eventually come down in favour of the Settled Property Solution) accept the view that there is no charge. The IHT Manual provides:

> **14396 - Settled property: Settlement created when the settlor is domiciled outside the UK** [January 2011]
> *... Reservation ceasing during lifetime*
> Where the reservation is released during the donor's lifetime, FA86/S102(4) treats the donor as making a disposition of the property by a disposition which is a potentially exempt transfer (PET) (IHTM04072). This is different to the basis of the charge arising on death, but as property in which the reservation ceases is 'property comprised in a settlement' the provisions of IHTA84/S48(3) are again in point to decide whether any foreign property is excluded property.
> As FA86/S102(4) treats the donor as making a disposition, it is the treatment of excluded property when disposition is made that is relevant. IHTA84/S3(2) states that no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of disposition.
> So as the donor is treated as making a disposition, property is treated as ceasing to form part of their estate. Provided that property is excluded property, IHTA84/S3(2) applies to exclude the assets in which the reservation ceased from charge.

This vindicates the view taken in the pre-2011 editions of this work. ("The taxpayer should conduct their affairs on the basis of the Settled Property

45 There is a hint of this in IHTM 14318, but the point is not addressed clearly.

Solution. ... One should not be deterred by the ghost of an argument rattling its chains in the IHT Manual.")

The Manual continues with three exceptions:

> The same exceptions to the above will apply as regards
> [1] foreign property which is replaced by UK situs property (IHTM27071),
> [2] property added to the settlement when the donor is domiciled in the UK, and
> [3] in the reverse situation outlined above, a charge will arise under FA86/S102(4) if the reservation ceases before the donor's death.

For these exceptions, see 63.14.3 (HMRC view).

63.17 GWR on termination of interest in possession

Before 22 March 2006, GWR did not in principle apply on the termination of an interest in possession, because the termination did not usually involve a disposal by way of gift. Now s.102ZA FA 1986 provides:

> (1) Subsection (2) below applies where—
> (a) an individual is beneficially entitled to an interest in possession in settled property,
> (b) either—
> (i) the individual became beneficially entitled to the interest in possession before 22nd March 2006, or
> (ii) the individual became beneficially entitled to the interest in possession on or after 22nd March 2006 and the interest is an immediate post-death interest, a disabled person's interest or a transitional serial interest, or falls within section 5(1B) of the 1984 Act and
> (c) the interest in possession comes to an end during the individual's life.
> (2) For the purposes of—
> (a) section 102 above, and
> (b) Schedule 20 to this Act,
> the individual shall be taken (if, or so far as, he would not otherwise be) to dispose, on the coming to an end of the interest in possession, of the no-longer-possessed property[46] by way of gift.

---

46 "The no-longer-possessed property" is defined in s.102ZA(3):
"In subsection (2) above 'the no-longer-possessed property' means the property in which the interest in possession subsisted immediately before it came to an end,

On the termination of an interest in possession, the former life tenant is in the same position as the settlor of the trust. See 63.14 (GWR death charge: excluded property rules for settled property).

If the life tenant does not enjoy any GWR, no problem arises.

If the former life tenant does enjoy a benefit the position is thought to be as follows:

(1) The GWR rules do not apply if the GWR property is excluded property.

(2) The GWR property is excluded if:

  (a) the settlor was not UK domiciled when the settlement was made; and

  (b) the trust property is not UK situate (or UK funds excluded property) at the time of the GWR charge (the death of the former life tenant or the time of cessation of benefit).

63.18 GWR property subject to debt

A debt secured on an asset is in principle deductible in computing a GWR charge on the asset.[47]

If the GROB property is held in trust, trust debts are similarly deductible. HMRC accept this. IHT Manual provides:

> **14401. The property comprised in the gift** [January 2010]
> ... *Example*
> In 1990 the donor settles £1 on discretionary trusts of which he is, and remains until his death in 2000, an object. Shortly after the creation of the settlement he advances £50,000 to the trustees by way of loan, interest free and repayable on demand.
> At the time of his death, the settled property comprises £1 cash (representing the original £1 gift into settlement) and the proceeds of an insurance policy (purchased with the borrowed monies) on the donor's life amounting to £250,000.
> The loan of £50,000 has been repaid at the rate of £2,500 per annum by the trustees and £25,000 is outstanding at the date of death.

The HMRC analysis is as follows:

> The proceeds of £250,000, *less the loan of £25,000*, are derived from

---

other than any of it to which the individual becomes absolutely and beneficially entitled in possession on the coming to an end of the interest in possession."

47 See 65.2.1 (Incumbrance-debts).

the original loan, and you can treat them as part of the death estate. (The balance outstanding under the loan – £25,000 – forms part of the free estate).

63.19 IHT spouse exemption defence to GWR death charge

This section considers whether the IHT spouse exemption can apply on the death of the donor so as to override the GWR death charge.[48]

Suppose:

(1) H makes a gift to S which is a GWR so the gifted property is GWR property.

(2) H dies and leaves H's entire estate to his spouse W (and the IHT spouse exemption applies to H's estate).

On the death of H the position for the GWR property is governed by s.102(3) FA 1986:

> ...that property shall be treated for the purposes of the [IHTA] as property to which [H] was beneficially entitled immediately before his death.

The GWR property is not excluded property (even if S is foreign domiciled).[49] So H will in principle be subject to inheritance tax on the GWR property on H's death.

The spouse exemption is not available on the death of H to avoid this GWR charge. The IHT spouse exemption provides that the transfer of value deemed to be made on the death of H:

> ... is an exempt transfer to the extent that the value transferred is
> [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner or,
> [b] so far as the value transferred is not so attributable, to the extent that the estate is increased.

This exemption does not apply to the GWR property since it does not become comprised in the estate of W. HMRC agree. The IHT Manual provides:

> **14303 Devolution of GWR property** [July 2006]
> It is important to keep in mind that that the GWR rules are fictitious

48 For the IHT spouse exemption generally see 67.1 (IHT spouse exemption); see too 63.10 (GWR spouse exemption).

49 See 63.13 (GWR death charge: non-settled property excluded property rules).

> treatments created only for the purposes of preventing IHT avoidance. They do not affect the **actual** devolution of the property in real life, so the gifted property does not actually pass on death under the will or intestacy, neither was any gift actually made at the time the reservation ceased.
>
> The gifted property passed to the actual donee at the time it was actually made. Thus, any reliefs or exemptions (IHTM11001) that may be available on death, or that apply to PET's, such as spouse or civil partner relief (IHTM11032), charity relief or annual exemptions, will **not** apply to the transfer deemed to be made on death, or deemed to be made when the reservation ceases.

Suppose:

(1) H (UK domiciled) makes a gift to W (foreign domiciled at the time of the gift).[50]
(2) The gift does not qualify for the IHT spouse (or any other) exemption and H continues to enjoy benefits from the property until H's death so the gifted property is GWR property.
(3) W still owns the GWR property at the time of the death of H.
(4) W has become UK domiciled (or IHT deemed domiciled) at the time of the death of H.

At first glance it might seem that the IHT spouse exemption does not apply. On the facts of this example the conditions of the relief are not in reality satisfied. The GWR property does not "become" comprised in the estate of the spouse; and on the occasion of the death of H, the estate of the spouse has not "increased". However, one must remember that s.102(3) FA 1986 is a deeming provision. It is the old question of how far one carries the deeming.[51] If one deems, as s.102(3) requires, the GWR property to be property to which H was beneficially entitled, it would follow that one must deem the estate of W to be increased by reason of the death of H. The conclusion is supported by considering the object of the GWR rules. The object is to put the donor in the same position as if they had not made the gift. If H had not made H's gift then (on the facts of the above example) H would qualify for the spouse exemption.

The IHT spouse exemption would also apply to defeat a GWR death charge if H made a gift to a trust under which H's spouse acquired an

---

50 The gift is a PET (but assume H survives seven years so no tax charge arises on the PET).

51 See App 2.1 (Construction of deeming provisions).

estate interest in possession on H's death.

The same would apply if A made a GWR gift to B and A was not married to B at the time of the gift but was married at the time of A's death.

63.19.1 *Remedial tax planning where there has been a GWR*

Where H has made a gift, and a reservation of benefit problem arises, the following solutions may be considered:

(1) H ceases to enjoy any benefit.
(2) The donee gives the property back to H.
(3) Arrange that the IHT spouse exemption applies on the death of H.
(4) The donee settles the property: see 73.9.2 (Gift to foreign domiciled spouse, followed by settlement by spouse).

63.20 Identifying the property disposed of by way of gift: Tracing

The identity of the property disposed of by way of gift matters for several reasons:

(1) To determine whether the donor has reserved a benefit over it.
(2) To apply the excluded property rules.
(3) To identify the property subject to the GWR charge.

Sch 20 FA 1986 contains some tracing rules.

63.20.1 *"The material date"*

The legislation uses the term "material date" which is (in short) the date on which the GWR charge occurs. Para 1 Sch 20 FA 1986 provides:

> "the material date", in relation to any property means,
> [a] in the case of property falling within subsection (3) of the principal section [s.102], the date of the donor's death and,
> [b] in the case of property falling within subsection (4) of that section, the date on which the property ceases to be property subject to a reservation;

63.20.2 *Property received in substitution for gifted property*

Para 2(1) Sch 20 FA 1986 provides the general rule:

> Where
> [a] there is a disposal by way of gift and,
> [b] at any time before the material date, the donee ceases to have the possession and enjoyment of any of the property comprised in the gift,

> then on and after that time the principal section [s.102] and the following provisions of this Schedule shall apply as if the property, if any, received by the donee in substitution for that property had been comprised in the gift instead of that property (but in addition to any other property comprised in the gift).

Para 2(3) Sch 20 FA 1986 provides a commonsense definition of "in substitution":

> In sub-paragraph (1) above the reference to property received by the donee in substitution for property comprised in the gift includes in particular—
>
> (a) in relation to property sold, exchanged or otherwise disposed of by the donee, any benefit received by him by way of consideration for the sale, exchange or other disposition; and
>
> (b) in relation to a debt or security, any benefit received by the donee in or towards the satisfaction or redemption thereof; and
>
> (c) in relation to any right to acquire property, any property acquired in pursuance of that right.

This is a straightforward tracing or derivation rule. Para 2(2) Sch 20 FA 1986 provides two exceptions. The first relates to settled property, which has a separate code.[52] The second is a puzzle:

> (2) This paragraph does not apply if the property disposed of by the gift ...
>
> (b) is a sum of money in sterling or any other currency.

Suppose:
(1) A gives money to B.
(2) B uses the money to buy an asset.
(3) A enjoys a benefit over the asset.
There is no GWR over the asset. The money no longer exists: does it follow that there is no GWR at all? Taken at face value, this suggests that if there is a non-settled gift of money which is then invested, GWR ceases to apply. Could that really be correct?

63.20.3 *Gift by donee*

Para 2(4) Sch 20 FA 1986 provides:

> Where, at a time before the material date, the donee

52 See 63.21 (Tracing rule for settled property).

[a] makes a gift of property comprised in the gift to him,
[b] or otherwise voluntarily divests himself of any such property otherwise than for a consideration in money or money's worth not less than the value of the property at that time,

then, unless he does so in favour of the donor, he shall be treated for the purposes of the principal section [s.102] and sub-paragraph (1) above as continuing to have the possession and enjoyment of that property.

Para 2(5) Sch 20 FA 1986 defines "voluntarily":

For the purposes of sub-paragraph (4) above—
(a) a disposition made by the donee by agreement shall not be deemed to be made voluntarily if it is made to any authority who, when the agreement is made, is authorised by, or is or can be authorised under, any enactment to acquire the property compulsorily; and
(b) a donee shall be treated as divesting himself, voluntarily and without consideration, of any interest in property which merges or is extinguished in another interest held or acquired by him in the same property.

63.20.4 *Tracing in cases of gift of shares*

Para 1 Sch 20 FA 1986 provides:

(6) Where
[a] any shares in or debentures of a body corporate are comprised in a gift and
[b] the donee is, as the holder of those shares or debentures, issued with shares in or debentures of the same or any other body corporate, or granted any right to acquire any such shares or debentures,

then, unless the issue or grant is made by way of exchange for the first-mentioned shares or debentures, the shares or debentures so issued, or the right granted, shall be treated for the purposes of the principal section [s.102] and this Schedule as having been comprised in the gift in addition to any other property so comprised.

(7) In sub-paragraph (6) above the reference to an issue being made or right being granted to the donee as the holder of shares or debentures shall be taken to include any case in which an issue or grant is made to him as having been the holder of those shares or debentures, or is made to him in pursuance of an offer or invitation made to him as being or having been the holder of those shares or debentures, or of an offer or invitation in connection with which any preference is given to him as

being or having been the holder thereof.

This is needed because a bonus issue is not "in substitution" and so not within para 2(1). If the drafter had used the modern term "derived from" it would not have been necessary, but the drafter has taken the language from the old estate duty provision in the FA 1957.

63.20.5 *Deduction for new consideration in tracing cases*

Para 3 Sch 20 FA 1986 provides:

> (1) Where either sub-paragraph (3)(c) or sub-paragraph (6) of paragraph 2 above applies to determine, for the purposes of the principal section [s.102], the property comprised in a gift made by a donor—
>
> (a) the value of any consideration in money or money's worth given by the donee for the acquisition in pursuance of the right referred to in the said sub-paragraph (3)(c) or for the issue or grant referred to in and said sub-paragraph (6), as the case may be, shall be allowed as a deduction in valuing the property comprised in the gift at any time after the consideration is given, but
>
> (b) if any part (not being a sum of money) of that consideration consists of property comprised in the same or another gift from the donor and treated for the purposes of the 1984 Act as forming part of the donor's estate immediately before his death or as being attributable to the value transferred by a potentially exempt transfer made by him, no deduction shall be made in respect of it under this sub-paragraph.
>
> (2) For the purposes of sub-paragraph (1) above, there shall be left out of account so much (if any) of the consideration for any shares in or debentures of a body corporate, or for the grant of any right to be issued with any such shares or debentures, as consists in the capitalisation of reserves of that body corporate, or in the retention by that body corporate, by way of set-off or otherwise, of any property distributable by it, or is otherwise provided directly or indirectly out of the assets or at the expense of that or any associated body corporate.
>
> (3) For the purposes of sub-paragraph (2) above, two bodies corporate shall be deemed to be associated if one has control of the other or if another person has control of both

63.20.6 *Donee dies before the material date*

Para 4 Sch 20 FA 1986 provides:

Where there is a disposal by way of gift and the donee dies before the date which is the material date in relation to any property comprised in the gift, paragraphs 2 and 3 above shall apply as if—

(a) he had not died and the acts of his personal representatives were his acts; and

(b) property taken by any person under his testamentary dispositions or his intestacy (or partial intestacy) were taken under a gift made by him at the time of his death.

63.20.7 *Tracing rule on termination of estate interest in possession*

Para 4A Sch 20 FA 1986 provides:

(1) This paragraph applies where—

(a) under section 102ZA of this Act, an individual ("D") is taken to dispose of property by way of gift, and

(b) the property continues to be settled property immediately after the disposal.

(2) Paragraphs 2 to 4 above shall not apply but, subject to the following provisions of this paragraph, the principal section [s.102] and the following provisions of this Schedule shall apply as if the property comprised in the gift consisted of the property comprised in the settlement on the material date, except in so far as that property neither is, nor represents, nor is derived from, property originally comprised in the gift.

(3) Any property which—

(a) on the material date is comprised in the settlement, and

(b) is derived, directly or indirectly, from a loan made by D to the trustees of the settlement,

shall be treated for the purposes of sub-paragraph (2) above as derived from property originally comprised in the gift.

(4) If the settlement comes to an end at some time before the material date as respects all or any of the property which, if D had died immediately before that time, would be treated as comprised in the gift,—

(a) the property in question, other than property to which D then becomes absolutely and beneficially entitled in possession, and

(b) any consideration (not consisting of rights under the settlement) given by D for any of the property to which D so becomes entitled,

shall be treated as comprised in the gift (in addition to any other property so comprised).

(5) Where, under any trust or power relating to settled property, income

arising from that property after the material date is accumulated, the accumulations shall not be treated for the purposes of sub-paragraph (2) above as derived from that property.

63.21 Tracing rules for settled property

Para 2(2) disapplies the usual GWR rule for non-settled property:[53]

> This paragraph does not apply if the property disposed of by the gift—
> (a) becomes settled property by virtue of the gift...

Instead, para 5(1) Sch 20 FA 1986 provides:

> Where there is a disposal by way of gift and the property comprised in the gift becomes settled property by virtue of the gift,
> [a] paragraphs 2 to 4 above shall not apply
> [b] but, subject to the following provisions of this paragraph, the principal section [s.102] and the following provisions of this Schedule shall apply as if the property comprised in the gift consisted of the property comprised in the settlement on the material date, except in so far as that property neither is, nor represents, nor is derived from, property originally comprised in the gift.

This is the same in effect as the rule for non-settled property, except that it also applies to money.

63.21.1 *Settlement comes to an end*

Para 5(2) Sch 20 FA 1986 provides:

> If the settlement comes to an end at some time before the material date as respects all or any of the property which, if the donor had died immediately before that time would be treated as comprised in the gift,—
> (a) the property in question, other than property to which the donor then becomes absolutely and beneficially entitled in possession, and
> (b) any consideration (not consisting of rights under the settlement) given by the donor for any of the property to which he so becomes entitled,
> shall be treated as comprised in the gift (in addition to any other property so comprised).

---

53 See 63.20.2 (Property received in substitution for gifted property).

This would apply on a transfer between trusts.

63.21.2 *Donee creates settlement*

Para 5(3) Sch 20 FA 1986 provides:

> Where
>
> [a] property comprised in a gift does not become settled property by virtue of the gift,
>
> [b] but is before the material date settled by the donee,
>
> sub-paragraphs (1) and (2) above shall apply in relation to property comprised in the settlement as if the settlement had been made by the gift; and for this purpose property which becomes settled property under any testamentary disposition of the donee or on his intestacy (or partial intestacy) shall be treated as settled by him.

63.21.3 *Loan to trust*

Para 5(4) Sch 20 FA 1986 provides:

> Where property comprised in a gift becomes settled property either by virtue of the gift or as mentioned in sub-paragraph (3) above, any property which—
>
> (a) on the material date is comprised in the settlement, and
>
> (b) is derived, directly or indirectly, from a loan made by the donor to the trustees of the settlement,
>
> shall be treated for the purposes of sub-paragraph (1) above as derived from property originally comprised in the gift.

The drafter presumably considered that a loan is not a disposal by way of gift.

63.21.4 *Accumulated income*

Para 5(5) Sch 20 FA 1986 provides:

> Where, under any trust or power relating to settled property, income arising from that property after the material date is accumulated, the accumulations shall not be treated for the purposes of sub-paragraph (1) above as derived from that property.

63.22 1986 transitional relief

The GWR rules only apply to disposals on or after 18 March 1986. The IHT Manual states correctly:

14311 Initial requirements [January 2010]
A pre-18 March 1986 settlement which would have been caught by the GWR provisions had it been made after 17 March 1986 will therefore escape the GWR charge unless further gifts into settlement are made after that date. The GWR provisions will apply to the property settled by those further gifts. ...
Example
On 1 January 1985 the donor settled £100,000 on discretionary trusts under which he was a potential beneficiary. On 1 January 1989 he added a further £50,000 to the settlement. The donor dies 1 April 1992 having remained a potential beneficiary throughout.
The GWR provisions apply to the 1989 addition but not to the property originally settled. The GWR claim extends to the assets in the settled fund at 1 April 1992 representing that £50,000. The Double Charges Regulations (IHTM 14711) will be in point.

But GWR does apply to pre-1986 settlements on the termination of an estate IIP.[54]

54 See 63.17 (GWR on termination of interest in possession).

CHAPTER SIXTY FOUR

IHT CONSEQUENCES OF TRANSFERS BETWEEN TRUSTS

64.1 Transfers between trusts and adding to trusts: Introduction

This chapter considers the IHT consequences of transfers between trusts and adding property to trusts. There are three main tiers of rules:

(1) General principles of trust law and tax law which apply in the absence of specific IHT provisions.

(2) A specific IHT provision for trusts with two settlors.[1] This applies generally for IHT trust taxation, which I refer to as **"general IHT law"**.

(3) Specific IHT provisions for transfers between trusts, which apply only for the taxation of relevant property[2] which I call **"relevant property taxation"**.

The main significance of these rules relates to excluded property status, especially if there has been a change of domicile of the settlor. The rules can affect other matters such as the date and computation of a ten-year charge.

For completeness: a fourth tier of rules applies to employee trusts[3] and pension trusts.

64.1.1 *Cross references*

For the trust law background, see 80.7 (Transfers between trusts: the trust law background).

---

1 See 64.3 (The separate settlements fiction).

2 That is, trust property which is relevant property as defined by s.58 IHTA. Before 2006 this meant discretionary trusts, but (from March 2006) it includes non-estate IIP trusts.

3 See s.86(4)(5) IHTA (not discussed here).

Transfers between trusts raise other issues not discussed in this chapter: For s.87 issues, see 80.9 (Transfers between trusts). For sch 4B issues, see 52.2 (Outline of flip-flop schemes). For s.731 issues, see 30.33 (Transfer between trusts).

Another issue (not discussed in this book) is that the transfer may be a transfer of value or may give rise to an exit charge under s.65 IHTA.

For IT and CGT aspects of trusts with two settlors, see 81.1 (Trusts with two settlors: Introduction).

For the rather special case of property added after March 2006 to a pre-2006 trust under which the settlor or spouse has an initial interest in possession, see 62.14.4 (Trusts with only some property within s.80 fictions).

64.2 General tax principles

The position is in short as follows:[4]

(1) If trustees exercise a power to transfer property from trust A to trust B, then, at least to the extent of the transferred property, the settlor of trust A is a settlor of trust B.[5]

(2) If a beneficiary with an equitable interest under trust A transfers this interest to trust B, then, at least to the extent of the interest transferred, the beneficiary is a settlor of trust B.

64.3 The separate settlements fiction

Section 44(2) IHTA provides:

> Where more than one person is a settlor in relation to a settlement and the circumstances so require, this Part of this Act (except s.48(4) to (6)) shall have effect in relation to it as if the settled property were comprised in separate settlements.

I refer to this as "**the separate settlements fiction**".

The fiction is needed because inheritance taxation of trusts depends on:

(1) the domicile of the settlor

---

4 See 80.9 (Transfers between trusts by appointment: IHT rules).

5 That is:

(1) If all the property of trust B is derived from A, directly or indirectly, then A is the only settlor of trust B.

(2) If some of the property of trust B is derived from A and some from B, then A and B become joint settlors.

(2) the transfers made by the settlor in the 7 years before commencement of the trust (which affect the trust's nil-rate band for RP taxation).

The rules are drafted on the basis that every trust has one settlor and only properly work on that basis; instead of making provision for a trust with multiple settlors, the scheme is to regard such trusts as multiple trusts.

IHT Manual provides:

> **42253. More than one settlor** [February 2006]
> ... This separation has 3 main effects
> [1] Where more than one trust exists each will have its own nil-rate band for rate purposes.
> [2] The value of property may be affected. For example, holdings of unquoted shares in a single trust might amount to a control holding whereas the same parcels of shares would be minority holdings if taken separately.
> [3] The separate trust made by the second person will have its own starting date. (IHTM42221)

This is correct as far as it goes, but it ignores the settlor domicile aspects of the rule.

When the separate settlements fiction applies, the settled property is treated as being in separate settlements (which I call "**notional trusts**"). It is important to note that these are fictional or notional trusts. They do not exist in the sense that the trust with several settlors exists. Each notional trust must (for IHT purposes) be regarded as possessing three features: (1) notional trust property (2) a notional settlor and (3) a notional date on which it was made. These features are as notional or fictional as the notional trust itself. The statute does not expressly tell us what they are: context and common sense must fill that gap.

64.3.1 *When separate settlements fiction does not apply*

The separate settlements fiction is expressed to apply for the purposes of Part 3 IHTA (not generally), but all the important provisions which govern trust tax are in Part 3.[6]

There are two cases where the separate settlements fiction does not apply.

Firstly, the fiction does not apply unless "the circumstances so require".

---

6 The separate settlements fiction has to be repeated in s.201(4) IHTA in order to apply it to s.201 (because that is not in Part 3).

Normally the circumstances do so require, but the drafter was aware that the separate settlements fiction might not always be appropriate. Most likely the drafter could identify any cases where the fiction should not be applied but thought there might be some such cases; another possibility is that the drafter identified some cases but thought they were too difficult or insufficiently important to set out in the statute. So that has been left to the courts to sort out.

Secondly, the fiction does not apply for the purposes of s.48(4) to (6), ie for the purposes of the exemption for FOTRA securities. The reason was that FOTRA exemption does not depend on the identity of the settlor, it depends on the identity of the beneficiaries.[7] It was therefore unnecessary to apply the separate settlements fiction. As far as I can see the fiction would not have done any harm, but it would not have had any effect: presumably the drafter thought it safer or simpler not to have to bother with the separate settlements fiction.

64.4 B adds property to A's trust

Suppose:
(1) an individual ("A") creates a trust ("the real trust"), and
(2) another[8] individual ("B") adds property to it.[9]

The real trust has two settlors, A and B. The separate settlements fiction applies, and one must imagine that the trust fund of the real trust is comprised in two notional trusts, "notional trust A" and "notional trust B". Common sense suggests:

(1) Notional trust A is regarded as if:
    (a) It holds the property given by A.
    (b) A is its sole settlor.
    (c) It was made at the time A made the real trust.
(2) Notional trust B is regarded as if:
    (a) It holds the property given by B.
    (b) B is its sole settlor.
    (c) It was made at the time B added property to the real trust.

---

7 See 62.12 (Trusts: FOTRA securities).

8 For the position where the settlor adds to their *own* trust, see 62.15 (Settlor adds property to trust after change of domicile).

9 The same analysis applies if A and B together transfer funds to a new jointly made trust.

64.4.1 *More than one addition to a trust*

Suppose:
(1) An individual ("A") creates a trust ("the real trust").
(2) Another individual ("B") adds property to it ("the first addition").
(3) B later adds more property to the trust ("the second addition").
It is considered that there are still two notional trusts. Notional Trust A is as before. Notional trust B is regarded as if:
(a) It holds the property given by B.
(b) B is its sole settlor.
(c) It was made at the time of the first addition
(d) B added property to the notional trust at the time of the second addition.
It follows that trust property added by the second addition may be excluded property if B was not UK domiciled at the time of the first addition.[10]

64.4.2 *Adding value indirectly*

It is suggested that the same applies if B adds value indirectly to the real trust (eg by a gift to a company held by the real trust). The real trust has two settlors, A and B.[11] The circumstances require the real trust to be regarded as two separate notional trusts. A division of the trust property of the real trust into two parts representing the value given by A and the value given by B is still possible. It may not be easy but it is no harder than many apportionments required for tax.[12]

64.5 Direct settlor and indirect settlor

Suppose there is an arrangement under which:
(1) A gives property to B, and
(2) B gives the property to a trust ("the real trust").
It appears at first sight that there are then two settlors: an indirect settlor (A) and a direct settlor (B).[13] Both have provided the *same* property.
What is the IHT analysis? On one view the separate settlements fiction

---

10 See 62.15 (Settlor adds property to trust after change of domicile).
11 See 80.17 (Provision of property for company held by trust).
12 For instance, apportionment of gains of non-resident companies to participators.
13 See 80.4 (Gift from A to B followed by gift to trust by B). This issue usually arises in the context of failed tax planning of the kind discussed at 80.36 (Planning to create trust with foreign domiciled settlor).

applies so that the settled property in the real trust is treated as being comprised in separate trusts (which I call "notional trust A" and "notional trust B"). On this view the consequence is said to be that:

(1) Notional trust A:
    (a) holds *all* the trust property of the real trust;
    (b) A is its sole settlor;
    (c) I do not know when proponents of this view would say that notional trust A was made. It would either be at the time A gave the property to B or the time that B settled it, and this poses perhaps another difficulty with this view.
(2) Notional trust B:
    (a) also holds *all* the trust property of the real trust;
    (b) B is its sole settlor;
    (c) was made at the time B created the real trust.

The difficulty with this view is that it leads to double taxation[14] and the separate settlements fiction which only applies "if the circumstances so require" should not be used to give that result. So the better view is that the circumstances do not "so require" and the separate settlements fiction does not apply.

We have therefore one real settlement with two settlors. What is the position for excluded property if A is foreign domiciled and B is not? It will be recalled that settled property is (in short) excluded property "unless *the settlor* was domiciled in the UK at the time the settlement was made". There are two possible solutions:

(1) One cannot say that "the settlor" was domiciled in the UK unless both settlors were domiciled here. In that case the trust property may be excluded property if either A or B are foreign domiciled.
(2) To read the word "the settlor" in this context as meaning "the settlor or one of the settlors".[15] In that case the trust property is only excluded property if A and B are both foreign domiciled.

Both solutions have anomalous results, though in one case the anomaly

---

14 This view is supported by comments in *Hatton v IRC* [1992] STC 140 at pp.160–161. But (1) the comments are obiter (2) the judge did not have the benefit of counsel's arguments on the issue (3) the judge did not appreciate the double taxation difficulties which arise on their view; in the circumstances it is considered that these comments do not represent the law.

15 Applying (perhaps extending) the rule of construction that the singular includes the plural.

favours the taxpayer and in the other it favours HMRC.

The best solution to this conundrum is that one should identify A as the "real" settlor and infer that B should not be regarded as a settlor.[16] Then the anomalies do not arise.

64.5.1 *The HMRC view*

RI 166 provides:

> **Several persons contribute to a single settlement** [February 1997]
> ...
> [Section 44(2)] is similar in terms to FA 1975 Sch 5 para 1(8), which was considered by Chadwick J in *Hatton v IRC* [1992] STC 140. In the light of the decision in that case [HMRC] take the view
> [1] that the determination of the extent to which overseas assets in a settlement are excluded property by reason of the settlor's domicile is a relevant "required circumstance"; and that
> [2] where a clear, or reasonably sensible, attribution of settled property between the contributions made by several settlors is possible, there will be a separate settlement, with its own attributed assets, for each contributor for IHT purposes;
> [3] if such an attribution is not feasible, each separate settlement will comprise all the assets of the single, actual settlement.[17]
>
> **Trust records**
> It follows from the comments above that the trustees of a settlement should keep adequate records to enable any necessary attribution of the settled property to be made if ... two or more persons have contributed funds for the purposes of the settlement.

Point [2] is correct. Point [3] is difficult to apply and doubtful. It is difficult to apply because how does one know whether attribution is

---

16 See 80.4.2 (If A is indirect settlor, is B also the settlor?).

17 In similar vein, IHT Manual provides:

> "**42253. More than one settlor** [February 2006]
> ... In practice, you can take the phrase 'and the circumstances so require' to mean, 'in a simple and straightforward case'.
> [1] You can accept the separateness of direct additions made by the settlor's favourite aunt,
> [2] but if for instance the added property is situate in Liechtenstein and transferred by a nominee in Liberia to a trust company in Jersey you would need to satisfy yourself as to what the circumstances were and whether they require treatment as separate trusts."

Para [2] unhelpfully ducks the issue.

"feasible"? I suggest it should always be feasible where two or more persons have contributed funds.[18] Point [3] is doubtful because it rests on a shaky obiter comment, discussed above, which was actually considering the different situation of *reciprocal* settlors. I do not wish to consider reciprocal settlors here because they are hardly ever found in practice, but if the Judge's comments are right at all, they should be restricted to the case of reciprocal settlors, where it might more plausibly be said that attribution between settlors is not feasible. RI 166[3] suggests that penal taxation may arise as a result of inadequate record keeping, but that cannot be right.

In practice it is perhaps better to avoid joint settlors (or for one person to add property to a settlement made by another). This avoids the complication of the separate settlements fiction. But in a straightforward case there should not be any difficulty as long as:

(1) all settlors are foreign domiciled or all are UK domiciled; or
(2) the settlors include both UK and foreign domiciliaries, but trust record keeping is adequate. (Ordinary trust accounts should suffice.)

It is likewise best to avoid indirect additions to a trust fund (eg a beneficiary using their own funds to improve trust property), where the original settlor is foreign domiciled and another person adding property is UK domiciled. If the settlor adds property to a trust of which they are the settlor, this problem does not arise.[19]

64.6 Transfer from trust made by A to trust made by B

This paragraph considers the general IHT position though if (as is usually the case) the trust property is relevant property, s.81 also needs consideration.[20]

Suppose:

(1) A gives property ("A's fund") to trust A ("real trust A").
(2) B gives property ("B's fund") to trust B ("real trust B").
(3) The trustees of real trust A transfer A's fund to real trust B.[21]

Real trust B has two settlors, A and B. The separate settlements fiction applies and one imagines that the settled property is comprised in two

---

18 This is assumed in s.471 ITA; see 80.8.1 (IT and CGT rule).

19 See 62.15 (Settlor adds property to trust after change of domicile).

20 See 64.8 (The same settlement fiction: s.81).

21 The same analysis applies if the trustees of real trusts A and B each transfer their trust funds to a third real trust C.

notional trusts ("notional trust A" and "notional trust B").

Notional trust A is regarded as if:

(1) it holds the property provided by A;
(2) A is its sole settlor;
(3) The important question is: at what time is notional trust A regarded as being made? The choice is:
    (a) at the time that real trust A was made;
    (b) at the time of the transfer to real trust B.

The latter view cannot be right, for various anomalies would then arise.

(1) Suppose A died before the transfer to real trust B. One cannot then apply the rule that the excluded property status of the trust depends on the domicile of the settlor "at the time the settlement was made".[22]
(2) Suppose a transfer from trust A to trust B and A changes domicile after the date of trust A but before the transfer:
    (a) If A is UK domiciled when A made real trust A and foreign domiciled at the time of the transfer to real trust B, A's fund would become excluded property after the transfer. One would not expect HMRC to agree with that.
    (b) Conversely, if A is foreign domiciled when A made real trust A and UK domiciled at the time of the transfer to real trust B, the trust fund would cease to be excluded property.

    These are not equivalent or self cancelling anomalies, for in case (a) no transfers would usually take place, whereas in case (b) transfers would take place every time.

---

22 It has been argued that if A is UK domiciled when A made real trust A and dead at the time of the transfer to real trust B, A's fund can be excluded property after the transfer. The argument is:

(1) Notional trust A is regarded as made at the time of the transfer to real trust B.

(2) A is regarded as not "domiciled in the UK" at that time (because a dead person has no domicile).

The view that notional trust A is regarded as made at the time real trust A was made avoids obvious anomalies and is to be preferred.

If (contrary to my view) notional trust A is regarded as made at the time of the transfer to real trust B, after the death of A, one might regard A as having at that time the domicile A had:

(1) at the time of A's death; or

(2) at the time A made real trust A.

Another view is that s.44(2) only applies if the circumstances so require, and they do not so require. However adopting my approach, s.44(2) gives a sensible result.

Under my analysis, there is in principle no IHT advantage or disadvantage from a transfer to another trust, regardless of changes in the settlor's domicile, or the settlor's death, which is logical and sensible. I see no difficulty in a rule that the notional trust is regarded as made before the transfer, for once one accepts that the notional trust is fictional, it can logically be regarded as being made on any date.

This view is also consistent with the principle in *Muir v Muir* [1943] AC 468.

64.7 Transfer from trust made by A to another trust made by A

This section considers the general IHT position though if (as is usually the case) the trust property is relevant property, s.81 also needs consideration.[23]

Suppose:

(1) A creates two separate trusts, trust A1 and A2.
(2) The trustees of trust A1 transfer property ("the transferred property") to trust A2.

Trust A2 has only one settlor, A, and the separate settlements fiction does not apply to it. The possibilities are as follows:

A is UK domiciled when A made trust A1 but not when A made trust A2. It is suggested that the transferred property in trust A2 may in principle qualify as excluded property. Trust A2 *does* satisfy the condition that the settlor was foreign domiciled at the time that *this* settlement was made.

A is foreign domiciled when A made trust A1 and UK domiciled when A made trust A2. The result is reversed. The transferred property in trust A2 is not excluded property. Trust A2 does not satisfy the condition that the settlor was foreign domiciled when this settlement was made.

Thus there is a distinction between:

(1) transfer from trust made by A to a trust made by B (change of A's domicile irrelevant); and
(2) transfer from trust made by A to another trust made by A (change of A's domicile significant).

This is anomalous but the anomaly naturally follows from the fact that the separate settlements fiction applies in case (1) and not in case (2).

---

23 See 64.8 (The same settlement fiction: s.81).

64.7.1 *Transfer from trust made by A to empty trust*

It is tentatively suggested that the same applies where trustees of trust A1 transfer the trust fund to new trustees who hold on the terms of a new declaration of trust which is an "empty trust", there being no trust property before the transfer ("trust A2"). In this case too the separate settlements fiction does not apply.

The view that trust A2 is regarded as made at the time trust A1 was made, applying the principle of *Muir v Muir* [1943] AC 468, gives a sensible result but is hard to reconcile with s.60 IHTA which provides:

> In this Chapter references to the commencement of a settlement are references to the time when property first becomes comprised in it.

It is considered that the transferred property may in principle be excluded property if A is living and foreign domiciled at the time of the transfer, even though A was UK domiciled when A made trust A1.

What if A is dead at the time of the transfer? On a literal reading, one might argue that (regardless of the domicile of A during A's life) the settlor A was not UK domiciled when trust A2 was made, since a deceased person has no domicile. The scope for tax avoidance would make that result unacceptable to a court in a case where A was UK domiciled at the time A made trust A1 and at the time of A's death. A court is likely to regard A as retaining after A's death the domicile A had during A's life. This is not as much of a stretch as first appears. If a company can be regarded as having a domicile (by analogy to the domicile rules of a living individual) why not a deceased person? However, it is suggested that the trust property in trust A2 may be excluded property if A was not UK domiciled at the time of A death.

64.8 The same settlement fiction: section 81

Section 81(1) IHTA provides:

> Where property which ceases to be comprised in one settlement becomes comprised in another then, unless in the meantime any person becomes beneficially entitled to the property (and not merely to an interest in possession in the property), it shall for the purposes of this Chapter[24] be treated as remaining comprised in the first settlement.

---

24 "This Chapter" is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

I call this "**the same settlement fiction**".

What is the purpose of the same settlement fiction? It must be intended to counter IHT avoidance based on moving property between settlements. Suppose a trust ("the old trust") is approaching its 10-year anniversary (on which a 10-year charge would arise). Simple examples of tax avoidance by transfer to a new trust (in the absence of s.81) are as follows:

(1) The trustees might transfer the trust property to a new trust (made by the same settlor), whose 10-year anniversary is 10 or nearly 10 years ahead.

(2) (a) The trustees might appoint a reversionary interest to a beneficiary.
(b) The beneficiary transfers that interest to a new trust.
(c) The new trust becomes entitled to the trust property before the ten year anniversary of the old trust.

These schemes would avoid the 10-year charge on the old trust.[25] Section 81 effectively counteracts both these schemes by deeming the trust property to remain in the old trust. This explains why the same settlement fiction applies only for the purpose of relevant property taxation.

IHT regards trust property as a continuing fund,[26] so s.81 does not apply on a sale between trusts at full value, for no property moves between settlements.

Section 81 does not apply to a loan from trust 1 to trust 2 on commercial terms. It does not apply to an interest free loan repayable on demand, because the promise to repay is full consideration.

The section only applies on a transfer of trust capital: if trustees of a discretionary trust distribute trust income to another trust, it is considered that s.81 does not apply, because the income is not "settled property".

What if property is transferred from trust A to trust B and the terms of the trusts are different? Although the property transferred from is deemed to be held in trust B, it is considered that it is not deemed to be held on the terms of trust A: it is regarded as held on the terms set out in trust B as if they had been incorporated in trust A. For instance, a transfer from a discretionary trust to an estate IIP trust gives rise to an exit charge: the

---

25 For completeness: these schemes might also be advantageous if the settlor had made chargeable transfers in the 7 years before the creation of the old trust, as the second trust might have a better nil-rate band in the computation of its ten years charges.

26 Contrast SP E9 "Property is regarded, for the purposes of s.48(3) IHTA, as becoming comprised in a settlement when it, *or other property which it represents*, is introduced by the settlor."

property is deemed to remain held in the first trust but the trust property ceases to be relevant property.

64.8.1 *Section 81 excluded property rule*

Where s.81 applies, s.82 IHTA imposes an additional requirement for trust property to qualify as excluded property.[27] This provides:

> (1) For the purposes of this Chapter[28] ... property to which section ... 81 above applies shall not be taken to be excluded property by virtue of section 48(3)(a) above unless the condition in subsection (3) below is satisfied (in addition to the conditions in section 48(3) that the property is situated outside the UK and that the settlor was not domiciled there when the settlement was made).
> (2) [Transitional rules: see 64.8.7 (Section 81 transitional rules).]
> (3) The condition referred to in subsection (1) ... above is ...
> (b) in the case of property to which subsection (1) or (2) of section 81 above applies, that the person who is the settlor in relation to the second of the settlements mentioned in the subsection concerned,
> was not domiciled in the UK when that settlement was made.

I refer to the rule in s.82 (as it applies in a s.81 case) as **"the s.81 excluded property rule"**.

This rule only applies in determining whether foreign situate property is excluded property, so it does not apply for AUTs and OEICs.[29]

This rule only applies for the purposes of relevant property taxation, so one must distinguish:

(1) excluded property for the purposes of relevant property taxation (**"RP excluded property"**); and
(2) excluded property for other IHT purposes (but the scope of this has been greatly reduced by the 2006 reforms.)

The consequences of this rule depend on the circumstances of the inter-trust transfer.

---

27 With an economy of drafting, s.82 is also used for the purposes of the s.80 fictions, but although there is some overlap, it is easiest to discuss that aspect separately. See 62.14 (Initial interest of settlor or spouse).

28 "This Chapter" is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

29 See 62.11 (Trusts: authorised unit trusts and OEICs).

64.8.2 *Transfer from trust made by A to another trust made by A*

Suppose:
(1) A creates two separate trusts, trust A1 and trust A2.
(2) The trustees of trust A1 transfer property ("the transferred property") to trust A2.

The possibilities are as follows:

A is not UK domiciled when A made trust A1 but UK domiciled when A made trust A2. The transferred property in trust A2 is not excluded property under general IHT principles.[30]

A is UK domiciled when A made trust A1 but not UK domiciled when A made trust A2. The transferred property may be excluded property under general IHT principles. However, s.82 prevents foreign situate transferred property in trust A2 from qualifying as RP excluded property. (This is probably an accidental consequence of the wording, because if the drafter had had the point in mind they would have made s.82 IHTA apply for all IHT purposes and not only for the purposes of relevant property taxation.)

In short, for foreign situate transferred property to qualify as RP excluded property, A must be domiciled outside the UK at the time A made trust A1 and trust A2.

64.8.3 *Transfer on to third trust or back to first trust*

Suppose:
(1) A creates three separate trusts, A1, A2 and A3.
(2) The trustees of trust A1 transfer property ("the transferred property") to trust A2.
(3) The trustees of trust A2 transfer the transferred property to trust A3.

The transferred property is treated as remaining in trust A1. It is only excluded property if A was not UK domiciled when A made "the second of the settlements mentioned" in s.81(1), but that refers (it is considered) to trust 3. The domicile of A at the time A made trust A2 is not relevant.

Thus if trustees of an excluded property trust transfer property to a non-excluded property trust made by the same settlor, they have fallen into a trap: foreign situate transferred property ceases to be excluded property. But they can extricate themselves from the trap if the trustees of trust A2 transfer the property back to trust A1; or if they transfer it on to trust A3

30 See 64.8.5 (B transfers equitable interest to another settlement).

(if A3 is a trust made when the settlor is not UK domiciled).

64.8.4 *Transfer from trust made by A to trust made by B*

Suppose:
(1) A gives property ("A's fund") to a settlement ("real trust A").
(2) B gives property ("B's fund") to a separate settlement ("trust B").
(3) The trustees of real trust A transfer A's fund to trust B.

For general IHT purposes, A's fund is regarded as in a notional trust and may be excluded property if A was not UK domiciled when real trust A was made. At first sight the position for the purposes of RP trust tax seems to be different:
(1) A's fund is treated as remaining comprised in real trust A (applying the same settlement fiction); and
(2) foreign situate property in A's fund can only be excluded property if:
    (a) A is foreign domiciled at the time real trust A was made; and
    (b) B is foreign domiciled at the time trust B was made
    (applying the s.81 excluded property rule).

There is a better view. On these facts the separate settlements fiction of s.44(2) applies. A's fund is treated for IHT as if it were transferred to a separate notional trust. The same settlement fiction applies as if there is a transfer from real trust A to the separate notional trust deemed to be made by A at the time (I think) of real trust A. So, for RP trust tax purposes, A's fund may be excluded property if A is not UK domiciled at the time A made trust A. That is, the s.82 rule does not add anything to the general excluded property rule. The domicile of B is irrelevant. That gives a fair result and is consistent with what I take to be the purpose of s.82; see below.

A similar result applies if the trustees of trust A transfer A's fund to a company held by trust B.

64.8.5 *B transfers equitable interest to another settlement*

The position is different if:
(1) A gives property ("A's fund") to a settlement ("trust A").
(2) B has an equitable interest under trust A (perhaps a reversionary or contingent right to trust capital).
(3) B assigns B's equitable interest to a separate settlement ("trust B").
(4) Trust B becomes entitled to A's fund (perhaps because the reversionary interest falls into possession or the contingency is satisfied).

B is in principle the settlor of trust B for general tax purposes. The position for the purposes of RP trust taxation is that:

(1) A's fund is treated as remaining in trust A (applying the same settlement fiction); and

(2) A's fund can only be RP excluded property if:
   (a) A is foreign domiciled at the time that trust A was made, and
   (b) B is foreign domiciled at the time trust B was made
   (applying the s.82 rule).

It would be possible to avoid these consequences if the trustees of trust B sell the equitable interest before it falls into possession, or if they transfer it to a company.

64.8.6 *Purpose of section s.81 excluded property rule*

What is the purpose of the s.81 excluded property rule? It often happens that an artificial deeming rule which closes up one avoidance scheme can be exploited for another. The same settlement fiction is an example. Dymond explains what might be done in the absence of the s.81 excluded property rule. Suppose:

(1) A, who is domiciled outside the UK, settles foreign property on discretionary trusts for a short period with remainder to A absolutely.

(2) B, who is UK domiciled, buys A's reversion and settles it on discretionary trusts.[31]

Under general IHT law, B would in principle be the settlor of trust B, which would be within the scope of IHT in the ususal way. However applying the same settlement fiction, A would be the settlor and (because of A's domicile) B's trust would be an excluded property trust!

Section 82 counteracts this scheme. If my analysis is right,[32] then s.82 works, though it does not produce the fair result in every case. Suppose the facts were reversed:

(1) A, who is domiciled in the UK, settles foreign property on discretionary trusts for a short period with remainder to A absolutely.

(2) B, who is foreign domiciled, buys A's reversion and settles it on discretionary trusts.

There is no obvious fairness here in the rule that B's trust should be within the scope of IHT but the example is somewhat contrived and perhaps it

---

31 *Dymond's Capital Taxes* (Looseleaf 1986 onwards), 19.810. These are the facts considered in 64.8.5 (B transfers equitable interest to another settlement).

32 See 64.8.4 (Transfer from trust made by A to trust made by B).

does not much matter.

An incidental result is to restrict or prevent tax advantages on a transfer from trust A1 to A2 where A was UK domiciled when A made trust A1 but foreign domiciled at the time A made trust A2.[33]

64.8.7 *Section 81 transitional rules*

Section 81(2)(3) IHTA sets out three transitional rules:

> (2) Subsection (1) above shall not apply where the property ceased to be comprised in the first settlement before 10 December 1981; but where property ceased to be comprised in one settlement before 10 December 1981 and after 26 March 1974 and, by the same disposition, became comprised in another settlement, it shall for the purposes of this Chapter be treated as remaining comprised in the first settlement.
> (3) Subsection (1) above shall not apply where a reversionary interest in the property expectant on the termination of a qualifying interest in possession subsisting under the first settlement was settled on the trusts of the other settlement before 10 December 1981.

64.9 Pension benefits

For completeness: there is a special rule for pension benefits. Section 151(5) IHTA provides:

> Where
> [a] a benefit has become payable under
> [i] a registered pension scheme
> [ii] a qualifying non-UK pension scheme or
> [iii] a section 615(3) scheme, and
> [b] the benefit becomes comprised in a settlement made by a person other than the person entitled to the benefit,
> the settlement shall for the purposes of this Act be treated as made by the person so entitled.

This is not discussed here.

---

33 See 64.8.2 (Transfer from trust made by A to another trust made by A).

CHAPTER SIXTY FIVE

IHT DEDUCTION FOR DEBTS

65.1 IHT deduction for debts – Introduction

This chapter is concerned with IHT deductions for debts, or liabilities; the two words are used (more or less) synonymously. A full discussion would need a book to itself. I focus on matters closest to the themes of this work, but it is necessary to consider the basic principles to see the points in their context. There is some interesting material in the IHT Manual which is not discussed here.

65.1.1 *Cross references*

The following topics are considered elsewhere:[1]

62.10 (IHT on income accrued but not paid at time of death of life tenant)

69.10 (Deductions for purpose of IHT DTAs)

76.17 (Pre-owned assets - Excluded liability rule).

65.2 Basis of deduction for debts

The legislation distinguishes between:

(1) A debt which is an incumbrance[2] on an asset. I refer to this as an

---

1 It may also be necessary to consider other issues:

(1) Whether the benefit of debt is a UK situate asset, relevant for CGT and IHT position of the owner of the debt; see 82.1 (Concept(s) of situs).

(2) Whether interest on the debt has a UK source, relevant for:

(a) the recipient of the interest who may suffer UK income tax; and

(b) the payor, who may be required to deduct tax.

See 18.1 (Interest: Introduction).

Consistent with the patchwork nature of UK tax law, different (though overlapping) considerations apply in these contexts.

2 I reluctantly use the spelling "incumbrance" as that is the spelling in the IHTA. Outside UK statutory drafting the word is generally spelt *encumbrance*.

"incumbrance-debt" and I refer to the property as **"the incumbered property"**.

(2) Other debts **("unsecured debts")**.

65.2.1 *Incumbrance-debts*

IHT is charged by reference to the market value of assets. In the case of incumbrance-debts, there are in theory two possible ways to approach the deduction for debts:

(1) *A net valuation approach*: One might say that the asset is the asset subject to the incumbrance; the market value of the asset is the value taking the incumbrance into account.

(2) *A deduction approach*: One might say that the market value is the value of the asset ignoring the debt and then a deduction is made as a separate step.

At the end of the day the two approaches will generally reach the same result. However occasionally the paths diverge. The question arose in a procedural context in *Alexander v IRC*, because a question as to the value of land in the UK is (in some cases) referred to a lands tribunal but other questions are not.[3] In *Alexander* the asset was a lease acquired at a discount under "right to buy" legislation. Under the lease the tenant covenanted to repay the discount if he sold the property within five years. The Court of Appeal adopted the net valuation approach:

> The liability to repay the discount, being charged on the leasehold premises, was in my judgment, an incumbrance on the property and should be taken into account in ascertaining the value of that property. I therefore agree that ... the question as to the value of the flat, taking into account the liability to repay discount, was a question as to the value of land for the Lands Tribunal ... . the issue as to the value of the property of the deceased in the flat was not correctly described by the Lands Tribunal, as a question of 'deciding liabilities between the vendor and a third party'. It was, in my judgment, a question of the value of the property in the hands of the deceased.[4]

---

3 Section 222(4A) IHTA.

4 [1991] STC 112 at p.122. If further authority is needed, see *Henty v The Queen* [1896] AC 567 at p.573: "In any question as to probate duty, [an incumbrance-debt] is a burden which adheres to and tends to diminish, or it may be to extinguish, the value of the asset upon which it is charged."

65.2.2 *Unsecured debts of individual*

If an individual has unsecured debts, the net valuation approach is not possible, and the only approach is the deduction approach - one must value the assets and make a deduction as a separate step. In this case Section 5(3) IHTA authorises, or at least confirms,[5] the deduction for the debt:

> In determining the value of a person's estate at any time his liabilities at that time shall be taken into account, except as otherwise provided by this Act.

65.2.3 *Disallowed debts*

There are 12 cases where the deduction for a debt is disallowed:[6]

(1) Liabilities incurred for less than full consideration
(2) Rights of reimbursement
(3) A liability in connection with a policy of life insurance[7]
(4) A debt which is trust property in which the debtor has an estate interest in possession[8]
(5) A debt which the debtor is treated as entitled to under the GWR rules

---

5 In *St Barbe Green v IRC* [2005] STC 288 the judge regarded s.5(3) IHTA as merely confirming a deduction, not authorising it:

> "... the property of the deceased ... is his personal estate net of his liabilities. In other words, it is at that stage that the liabilities are dealt with. It is not necessary for section 5(3) to provide for a second time that the debts are to be deducted in arriving at the value of the deceased's property (or estate) and in my view it is not really doing that. It is in part confirmatory, but in the main it is intended to provide a qualification or qualifications to the principle that debts are deductible– the meat of the subsection is in the closing words 'except as otherwise provided by this Act'. One finds provisions in the Act which qualify that right in sections 5(4), 5(5) and 162. Its confirmatory nature is supported by the use of the phrase 'taken into account', which is more general than 'shall be deducted'. I accept that the nature of section 5(3) would be clearer without the comma, but nevertheless it seems to me to be clear enough."

In relation to incumbrance-debts, that is right; in relation to unsecured debts, it seems an odd construction of the words; but it does not matter.

6 The GAAR is another exception; but the GAAR provides an exception to every rule of tax law.

7 See s.103(7) FA 1986.

8 See 65.12 (Debt owed by estate IIP trust to life tenant).

(6) Non-residents overdrawn foreign currency bank accounts[9]
(7) A personal debt of the life tenant cannot be set against property in which the life tenant has an estate interest in possession[10]
(8) Section 103 FA 1986
(9) Liabilities attributable to:
  (a) excluded property
  (b) business/agricultural/woodland property
  (c) non-residents foreign currency bank account
(10) Liabilities not discharged after death

The disallowances could lead to insolvency, as the liabilities are disallowed for IHT purposes nevertheless remain payable. Unsecured creditors may need to ask for security in order to have priority over HMRC IHT claims.

65.3 Unenforceable debts

In principle a deduction is only allowed for an enforceable debt. That is not an exception to the general rule of deductibility, as an unenforceable debt is not a debt in the proper sense or the value of the liability is nil.[11]

The IHT Manual provides:

> **IHTM28383 Debts must be legally enforceable** [November 2013]
> The general position is that no deductions can be allowed for debts that are not legally enforceable or capable of being legally enforced...
> Debts that may be disallowed because they are not legally enforceable include
> - debts paid under a moral obligation (these are likely to be debts that have either been incurred for no consideration or for past consideration)
> - liabilities that are unenforceable because there is no written evidence (for example, oral agreements for the sale of an interest in land)

65.3.1 *Statute-barred debts*

The IHT Manual provides:

> **IHTM28384 Statute-barred debts** [November 2013]
> If a lender allows time to pass without receiving any payment an action for recovery may become barred.

---

9 See 62.20.3 (Overdrawn account).
10 See 65.11.2 (Debt of life tenant not set against trust fund).
11 See 65.7 (The amount of deduction for a debt).

> [The Manual summarises the rules in the Limitation Act 1980 (wrongly called the Limitations Act 1980) and continues:]
> Even though the lender may be barred from pursuing recovery, a debtor may decide to pay the debt after the expiry of the time limits. Because of this you should allow a debt which is otherwise statute-barred if the personal representatives pay the debt and you receive evidence that the payment has been made.

I find this practice rather surprising but taxpayers will not complain. A different rule applies in Scotland:

> These instructions do not apply to debts in Scotland. Under Scottish law, if a lender allows time to pass without receiving any payment an action for recovery may become barred under the Prescription and Limitation (Scotland) Act 1973 (For details of this Act see Gloag and Henderson's *The Law of Scotland* (13th ed., 2012) at Chapter 4.). These debts are completely extinguished and cannot be enforced. Once the prescriptive period expires the debt cannot be allowed as a deduction.

65.4 Liabilities incurred for less than full consideration

Section 5(5) IHTA provides:

> Except in the case of a liability imposed by law, a liability incurred by a transferor shall be taken into account only to the extent that it was incurred for a consideration in money or money's worth.

This does not often apply, because debts are normally incurred for full consideration.[12] In particular, if an individual borrows money, the liability to repay the lender is in principle outside the scope of s.5(5), because it is a debt incurred for full consideration. By contrast, if an individual gratuitously covenants to pay money to a person, the liability to pay under that covenant is not taken into account for IHT. It follows that there is a transfer of value when a payment is made under the covenant.

65.5 Right to reimbursement

Section 162(1) IHTA provides:

> A liability in respect of which there is a right to reimbursement shall be taken into account only to the extent (if any) that reimbursement cannot reasonably be expected to be obtained.

---

12 For the meaning of "consideration" see 75.43.2 ("Chargeable consideration").

65.6 Section 103 FA 1986

A debt is in principle deductible even though it is owed to a connected person. But in this case s.103 FA 1986 needs consideration. This applies (in short) where an individual owes a debt to a person to whom they have previously made a gift.

The section was described in *McDougal v IRC* 31 ATC 153 as "intricate and involved in expression". The reader who studies this chapter will agree! But if one works patiently through it a few times the meaning becomes clearer; contrast the less convoluted but hopelessly vague wording of s.102.

The GAAR guidance describes s.103 as concerned with "self-generated liabilities" but it seems to me that that label is not very apt, and is best avoided as it may cause confusion.

Section 103 must be split up into separate parts in order to distil the sense:

> (1) Subject to subsection (2) below, if, in determining the value of a person's estate immediately before his death, account would be taken, apart from this subsection, of a liability consisting of
>
> [i] a debt incurred by him or
>
> [ii] an incumbrance created by a disposition made by him,
>
> that liability shall be subject to abatement to an extent ...

Thus, subject to certain defences, s.103(1) disallows the deduction for the debt to a certain extent. The section then goes on to specify the extent of the disallowance:

> ... to an extent proportionate to the value of any of the consideration given for the debt or incumbrance which consisted of—
>
> (a) property derived from the deceased; or
>
> (b) consideration (not being property derived from the deceased) given by any person who was at any time entitled to, or amongst whose resources there was at any time included, any property derived from the deceased.

Thus s.103(1) works like this:

(1) One needs to identify the consideration given for the debt.
(2) One asks to what extent the consideration consists of the type of consideration described in s.103(1)(a) and (b).
(3) To that extent the debt is in principle disallowed. (There are defences. I will come to those later.)

65.6.1 *Section 103(1)(a) disallowance*

One needs first of all to ascertain whether the consideration for the debt was "property derived from the deceased". If so, the debt is disallowed under s.103(1)(a). The debt is wholly disallowed if all the consideration is "property derived from the deceased" or partly disallowed if the consideration is partly "property derived from the deceased".

The expression "property derived from the deceased" is given a commonsense definition in s.103(3):

> In subsections (1) and (2) above "property derived from the deceased" means, subject to subsection (4) below,
> [a] any property which was the subject matter of a disposition made by the deceased, either by himself alone or in concert or by arrangement with any other person or
> [b] which represented any of the subject matter of such a disposition, whether directly or indirectly, and whether by virtue of one or more intermediate dispositions.

The IHT Manual gives this simple example:

> **28365 How Section 103 FA 1986 applies when the consideration is 'property derived from the deceased'?** [November 2013]
> *Example*
> On 19 March 1987 A gives his brother B £25,000.
> On 25 April 1987 A borrows back £25,000 from B .[13]
> On 7 April 1994 A dies.
> Without the legislation A's estate includes the original £25,000. But if the money was still owed when A died the debt might be claimed as a deduction against his estate. And the PET in 1987 is exempt as more than 7 years have elapsed.
> The legislation disallows the deduction for IHT purposes ...

The IHT Manual explains "property derived from the deceased":

> **28367 Definition of 'property derived from the deceased' for Section 103 FA 1986 purposes** [November 2013]
> ... In practice, income from property given absolutely by the deceased is treated as falling outside this definition. But where the deceased settled the property, the definition includes income payable under the

13 [Author's Note] It is assumed that this £25,000 is, or represents, the £25,000 given to B.

> disposition.
> You should treat money raised by the sale or mortgage of property derived from the deceased as though it was property derived from the deceased.

65.6.2 *Section 103(1)(b) disallowance*

Assuming one passes unscathed past the s.103(1)(a) disallowance, the journey takes us to s.103(1)(b). One must identify the person who gave the consideration for the debt. One then asks whether this is a person:

> who was at any time entitled to, or amongst whose resources there was at any time included, any property derived from the deceased.

If so, the debt is disallowed under s.103(1)(b). In principle the debt is wholly disallowed.[14] The IHT Manual gives this simple example:

> **28366 How Section 103 FA 1986 applies when there is 'consideration given by any person whose resources at any time included property derived from the deceased'?** [November 2013]
> ... *Example*
> On 19 March 1987 A gives his brother B a parcel of land worth £25,000.
> On 25 April 1987 A borrows £25,000 from B.
> On 7 April 1994 A dies, at which time B retains the land which is non-income producing.[15]

The HMRC analysis is as follows:

> The PET was made more than seven years before the death so that no claim arises on the death. As the consideration for the debt is not derived from the deceased s.103(1)(a) FA 1986 would not apply.[16] But this arrangement is caught by s.103(1)(b) FA 1986 and the liability is not an allowable deduction for Inheritance Tax purposes.

65.6.3 *Section 103(2) defences to section 103(1)(b)*

Section 103(2) offers defences to the s.103(1)(b) disallowance.[17] This

---

14 Unless the consideration for the debt is given by more than one person (very unusual); but see below on defences to the s.103(1)(b) disallowance.

15 But whether the land is income producing is not directly relevant.

16 [Author's Note] It is assumed that the £25,000 which B lends to A does not represent the land.

17 Section 103(2) does not override the s.103(1)(a) disallowance.

provides:

> If, in a case where the whole or a part of the consideration given for a debt or incumbrance consisted of such consideration as is mentioned in subsection (1)(b) above, it is shown that
> [a] the value of the consideration given, or of that part thereof, as the case may be, exceeded
> [b] that which could have been rendered available by application of all the property derived from the deceased,
> [c] other than such (if any) of that property—
> (a) as is included in the consideration given, or
> (b) as to which it is shown that the disposition of which it, or the property which it represented, was the subject matter was not made with reference to, or with a view to enabling or facilitating, the giving of the consideration or the recoupment in any manner of the cost thereof,
> no abatement shall be made under subsection (1) above in respect of the excess.

It is helpful to consider this as three distinct defences.

65.6.4 *Section 103(2)[b] defence*

"The s.103(2)[b] defence" is my term for the defence given by the words of s.103(2) down to the end of s.103(2)[b], ie ignoring s.103(2)[c].

The IHT Manual gives a simple example:

> **28369 - Allowing part of a debt under s.103(2) FA 1986** [November 2013]
> Even if an arrangement (IHTM28366) is caught by FA86/S103 (1) (b), a deduction may still be allowed for part of the debt. If the value of the consideration given by the [lender][18] exceeded the amount that would have been available if the lender had applied all the property derived from the deceased, then the debt is reduced only to the extent of that lower amount.
> Example
> A gives his son B shares worth £20,000.
> B lends A £25,000, out of his separate resources, at a time when the shares were worth £17,000.
> A dies and a deduction of £25,000 is claimed.
> The amount of the deduction is the realisable value at the time the debt

18 The IHT Manual erroneously reads: "deceased".

> was created. So the liability is reduced by £17,000 - leaving £8,000 as a valid deduction.

The s.103(2)[b] defence allows a deduction (overriding the s.103(1)(b) disallowance) to the extent that the debt exceeds the value of the property derived from the deceased. That is obviously fair.

65.6.5 *Section 103(2)[c](a) defence*

The next defence is the extension of s.103(2)[b] by s.103(2)[c](a). This prevents double counting with the s.103(1)(a) disallowance. The IHT Manual gives an example at 28369:

> **28369 Allowing part of a debt under Section 103(2) FA 1986** [November 2013]
> ... *Example*
> A gives shares worth £15,000 to B
> 18 months later B sells half the shares back to A for £7,500 – which is not paid but left as a debt repayable on demand.
> B lends A £12,000 entirely from his own resources.
> A dies owing B £19,500 [ie both debts remain outstanding].

The £7,500 debt is disallowed under s.103(1)(a). The reason is that the consideration for the £7,500 debt (the shares) is property derived from the deceased. The Manual correctly makes this point:

> The debt of £7,500 is clearly derived from the earlier gift of shares – and falls within s.103(1)(a) FA 1986. This liability is not deductible.

The Manual then turns to the £12,000 debt:

> If it was not for the provisions of FA86/S103 (2)(a) it would be possible to take that £7,500 into account in considering the debt of £12,000. The result would be that the entire debt of £12,000 would be non-deductible, so the whole of the claimed £19,500 would be disallowed. But because under FA86/S103 (1)(b) half the value of the shares is included in the consideration given for the debt there remains an excess of £4,500. This figure of £4,500 for the allowable debt is arrived at by calculating the resources available to B against the second loan of £12,000 as £7,500, being the original gift of shares less the £7,500 disallowed. So the balance of £4,500 is deductible without restriction because under IHTA84/S103 (2)(a) this amount is the excess consideration.

65.6.6 *Section 103(2)[c](b) defence*

The s.103(2)[c](b) defence is the extension of s.103(2)[b] by sub-para

[c](b). The Manual does not give an example of a defence within s.103(2)[c](b); though this is perhaps the most important of the three. The result in the s.103(1)(b) examples in the IHT Manual would be different if the gift from A to B was not made (in short) with a view to enabling B to lend to A.

65.6.7 *Section 103(4) defence*

Section 103(4) provides an important defence to the s.103(1)(a) and (b) disallowances:

> If
> [a] the disposition first-mentioned in subsection (3) above[19] was not a transfer of value and
> [b] it is shown that the disposition was not part of associated operations which included—
> (a) a disposition by the deceased, either alone or in concert or by arrangement with any other person, otherwise than for full consideration in money or money's worth paid to the deceased for his own use or benefit; or
> (b) a disposition by any other person operating to reduce the value of the property of the deceased,
> that first-mentioned disposition shall be left out of account for the purposes of subsections (1) to (3) above.

Suppose:
(1) S (not UK domiciled) transfers excluded property (ie non-UK situate property) to a trust.
(2) S borrows from the trustees and retains or spends the sum borrowed.
At first sight, the debt is disallowed as the consideration is property derived from the deceased, S. However, the s.103(4) defence applies. The disposition to the trust is disregarded, because it is the disposition first-mentioned in s.103(3)[a] and:
[a] the disposition is not a transfer of value;
[b] the disposition is a simple gift. It is not part of associated operations within s.103(4)[b](a) or (b).
Thus a debt to an excluded property trust is not usually disallowed under s.103. The same applies if the gift is to a trust where the settlor has a

19 That is, the disposition made by the deceased. See 65.6.1 (Section 103(1)(a) disallowance).

estate IIP (eg a gift to an IIP trust before 22 March 2006) because such a gift is not a transfer of value.

Suppose:

(1) The trustees lend to the settlor, S.

(2) S gives the borrowed money to a trust.

In this case the deduction for the debt is disallowed. The s.103(4) defence does not apply. Condition [a] is satisfied but condition [b] is not, because the gift to the trust is an associated operation.

65.6.8 *Payment of disallowed debt: s.103(5) deemed PET*

Section 103(5) FA 1986 provides:

> If, before a person's death but on or after 18 March 1986, money or money's worth, is paid or applied by him—
>
> (a) in or towards the satisfaction or discharge of a debt or incumbrance in the case of which subsection (1) above would have effect on his death if the debt or incumbrance had not been satisfied or discharged, or
>
> (b) in reduction of a debt or incumbrance in the case of which that subsection has effect on his death,
>
> the [IHTA] shall have effect as if, at the time of the payment or application, the person concerned had made a transfer of value equal to the money or money's worth and that transfer were a potentially exempt transfer.

There is no express exemption for a foreign domiciliary. However, the principle of territorial limitation requires that some exemption is implied. The best solution is that the deemed PET should be regarded as not only "equal to the money or money's worth" but made out of the money or money's worth. Thus, if the individual is not UK domiciled at the time they repay the debt, *and* the debt is repaid out of excluded property, then no tax charge arises. This would be broadly consistent with the similar provision in section 102(4) FA 1986.[20]

65.6.9 *Assignment of debts*

Suppose:

(1) A borrows from a bank.

(2) B purchases the debt from the commercial lender for its market value.

---

20 See 63.16 (GWR PET charge).

It is suggested that the purchase price paid by B to the bank is "consideration given for the debt". So A's debt is disallowed if the purchase price which B pays to the bank is property derived from A. Otherwise the section is easy to avoid.

Conversely if A's debt is disallowed because it is made in consideration of property derived from A, it continues to be disallowed even if the debt is sold to a third party. In other words, "consideration for the debt" means the consideration for the creation of the debt but also includes consideration for the assignment of the debt.

65.6.10 *Pre-1986 transitional rules*

Section 103(6) FA 1986 provides:

> Any reference in this section to a debt incurred is a reference to a debt incurred on or after 18 March 1986 and any reference to an incumbrance created by a disposition is a reference to an incumbrance created by a disposition made on or after that date …

This cannot often apply now.

65.7 The amount of deduction for a debt

Section 162(2) IHTA provides:

> Subject to subsection (3) below,[21] where a liability falls to be discharged after the time at which it is to be taken into account it shall be valued as at the time at which it is to be taken into account.

This only states expressly what one would have expected in any event.

65.8 Against which property is the debt deductible?

65.8.1 *Why does it matter?*

Suppose an individual dies and is subject to certain debts immediately before death. The debt is deducted in computing the value of the estate. If on the death all the estate is subject to IHT at the same rate (here called "chargeable property") it does not matter for IHT whether the debt is regarded as a deduction from any particular item of property. However it often happens that an estate includes chargeable and exempt property. In particular:

---

21 The exception relates to IHT liabilities.

(1) A foreign domiciled individual may have excluded property and non-excluded (chargeable) property.
(2) A non-resident individual may have FOTRA securities which are excluded property.
(3) An individual may have some property which qualifies for some IHT relief, eg:
    (a) APR or BPR
    (b) DT relief
    (c) Instalment relief
(4) The property may be given to a spouse or charity and so qualify for the IHT spouse or charity exemptions.

In these cases one must ask whether the debt is deducted from the value of the chargeable or the exempt property.

65.8.2 *Incumbrance-debt*

Section 162(4) IHTA provides:

> A liability which is an incumbrance on any property shall, so far as possible and to the extent that it is not taken to reduce value in accordance with section 162B, be taken to reduce the value of that property.

That adopts or confirms what I call the net valuation approach.[22]

If the amount of the debt exceeds the value of the property, the value of the property is taken as nil and the excess is deductible from the estate like an unsecured debt.

If a debt is an incumbrance on several assets there must be an apportionment. HMRC agree. The IHT Manual provides:

> **IHTM28210 - Investigating liabilities: mortgages** [November 2013]
> ... when a debt is charged on several properties it should be apportioned between them.

If the incumbrance on some asset has priority, then the deduction should be against that asset first.

If it is desired to secure a debt on non-UK property (but to keep the IHT deduction against UK property), a back-to-back guarantee may be a solution. That is:

---

22 See 65.2 (Basis of deduction for debts).

(1) T borrows from a third party ("the primary debt").
(2) T's primary debt is guaranteed by a bank.
(3) Under the terms of the guarantee, T is required to reimburse the bank if the guarantee is called upon ("the second debt"). This second debt is secured on foreign assets.

Section 162(4) will not apply to the primary debt, which can in principle be deducted from UK property. But the GAAR may need consideration.

Conversely, if on those facts the second debt is secured on UK property, but the primary debt is not secured on that property and the deduction is not set against that property.

Note the need to comply with the Bills of Sale Acts if securing loans on chattels.

65.8.3 *Unsecured debt*

Section 162(5) IHTA provides:

> Where a liability taken into account is a liability to a person resident outside the UK which neither—
>
> (a) falls to be discharged in the UK, nor
>
> (b) is an incumbrance on property in the UK,
>
> it shall, so far as possible and to the extent that it is not taken to reduce value in accordance with section 162B, be taken to reduce the value of property outside the UK.

This identifies three connecting factors. Where a debt is not an incumbrance on any property, there are two connecting factors and four possibilities:

Case No.	**1**	**2**	**3**	**4**
Liability to UK resident	No	No	Yes	Yes
Discharge out of the UK	No	Yes	No	Yes

Section 162(5) tells us the answer to Case 1: the debt is set against non-UK property. Which non-UK property if there is more than one item of property? IHT Manual provides:

> **IHTM28394 - Law relating to debts: deducting foreign debts** [November 2013]
>
> Debts that are owed to a person resident outside the UK and:
>
> • not charged on UK property, or
>
> • not contracted to be paid in the UK
>
> should be deducted primarily against foreign property, IHTA84/S162 (5).

> If there are debts in more than one country the debts in any one country should be set against the assets in that country, and any excess set proportionately against the assets in other foreign countries.

I do not see any good reason for that: an unsecured debt should be set against foreign property pro rata; but it will not often matter.

There is nothing about Cases 2 to 4. However, the implication is that in Cases 2 to 4 the debt reduces the value of the property in the UK.

What is the priority between s.162(4) and (5)? It is considered that (4) is applied first. An incumbrance-liability is so far as possible to be taken to reduce the value of the property. Only if it is not an incumbrance on any property, or if the amount of the debt exceeds the value of the property, does one apply the rules in s.162(5). The IHT Manual shows that HMRC accept this:

> **28395 Deducting liabilities where there is excluded property** [November 2013]
> You will see cases where there is excluded property in the estate and deductions may be properly payable out of both excluded and other property. In this situation, provided the debts are to UK creditors, you may allow a deduction in full against the non-excluded property.
> But, in view of s.162(4) IHTA 1984 this does not apply to debts that are charged on excluded property.

> **IHTM28396 - Law relating to debts: deducting UK debts when there is both UK and foreign property in the estate** [September 2011]
> If the deceased's estate includes both UK and foreign assets you should first deduct any UK debts against the UK assets and set the deficit, if any, against the foreign assets. Debts are UK debts if one of the following applies:
> • they are owed to creditors who are resident solely in the UK
> • they are charged on property in the UK, or
> • they are contracted to be paid in the UK.
> This practice should be applied, despite the decision in *Re Kloebe, Kannreuther v Geiselbrecht* [1884] 28 Ch D 175. This was that in the administration of the English estate of a deceased person domiciled abroad, foreign creditors are entitled to be paid, along with those who are resident in the UK, in shares proportionate to their respective claims.
> If our official practice is challenged you should refer the case to Technical.

The practice seems right; I do not see why the probate case should have any relevance to IHT.

65.8.4 *Where does a debt fall to be discharged?*

In outline, the place where a debt falls to be discharged is that specified in the contract, or (if not specified) the residence of the creditor.[23] The IHT Manual shows that HMRC broadly accept this:

> **28396 Deducting UK debts when there is both UK and foreign property in the estate** [November 2013]
> If the deceased's estate includes both UK and foreign assets you should first deduct any UK debts against the UK assets and set the deficit, if any, against the foreign assets. Debts are UK debts if one of the following applies
> • *they are owed to creditors resident solely in the UK*
> • they are charged on property in the UK, or
> • *they are contracted to be paid in the UK*. ...
> (Emphasis added)

A debt which is set against UK property (but which is not charged on specific property) will be set against UK property rateably. Some of the deduction will be wasted if the individual owns UK property outside the scope of IHT, in particular:

(1) property qualifying for APR or BPR
(2) For a foreign domiciliary: UK AUTs or OEICs
(3) For a non-resident: FOTRA securities

65.9 Debt owed by individual to trust

65.9.1 *Debt owed by non-settlor life tenant to estate IIP trust*

Suppose the life tenant (not the settlor) owes a debt to trustees of an estate IIP trust (as happens when a pre-2006 IIP trust lends money to the life tenant). At first sight, the position seems to be:

(1) The life tenant can claim a deduction for the burden of the debt on their death.
(2) The benefit of the debt is an asset of the trust fund, and therefore part of the estate of the life tenant.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral.

There is however one exceptional case. If the benefit of the debt is

---

23 See *Chitty on Contracts* (31st ed., 2012), para 21-055 (Place of payment). Further consideration is needed for a contract not governed by English law.

excluded property (ie foreign domiciled settlor at the time the settlement was made and the debt not UK situate) then at first sight the result is a mismatch which benefits the taxpayer:

(1) a deduction for the burden of the debt in the estate of the life tenant; and

(2) no IHT on the benefit of the debt, being excluded property.

Robert Venables QC takes the view that there is no deduction for the debt. He cites Lord Asquith's familiar comment on the construction of deeming provisions[24] and continues:

> If one applies Lord Asquith's dictum, what is deemed to happen when the settlor[25] in fact borrows money from the trustees? As he is deemed to own the money before it is borrowed [s.49 IHTA], he cannot borrow it from himself. The transfer of the money to himself is a non-event for inheritance tax purposes. His estate is subject to no debt, as a man cannot owe a debt to himself. The question of any such debt being treated as non-deductible in computing the value of his estate for inheritance tax purposes therefore does not arise. Conversely, however, the settled property does not include the right to sue the settlor for the money borrowed, as a man cannot have a right against himself.[26]

I agree. The effect of s.49(1) IHTA is therefore to disallow the deduction for the debt.

A practical solution may be to arrange that the debt is not due to the trustees, but to a company owned by the trustees. Alternatively, perhaps, arrange that the debtor beneficiary ceases to be life tenant.

65.9.2 *Debt owed by life tenant settlor to estate IIP trust*

Suppose the life tenant settlor owes a debt to trustees of an estate IIP trust (as happens when a pre-2006 IIP trust lends money to the life tenant settlor). At first sight, the general position seems to be:

(1) The settlor can claim a deduction for the burden of the debt on their death.

(2) The benefit of the debt is an asset of the trust fund, and therefore part of the estate of the life tenant.

---

24 See App 2.1 (Construction of deeming provisions).

25 Venables is considering the position of a settlor life tenant, but the same applies to a non-settlor life tenant.

26 Venables, "An IHT Trap for Settlors of Non-UK Resident Trusts", OTPR, vol 4, issue 3, p.165, accessible *http://www.khpplc.co.uk/reviews*

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral. There are however two special cases.

If the benefit of the debt is excluded property, at first glance the result is a mismatch which could benefit the settlor (deduction for the burden of the debt, no charge on the benefit of the debt).[27]

If the deduction for the debt is disallowed (eg under s.103[28]) the result is a mismatch which would favour HMRC (no deduction for the burden of the debt, but a charge on the benefit of the debt, unless it is excluded property).

However on the view set out in para 65.9.1 (Debt owed by non-settlor life tenant to trust), the burden of the debt and the asset of the trust cancel each other out and both are ignored for IHT purposes. This is a sensible result, which fits the purpose of the legislation. In practice HMRC appear to accept this.

65.9.3 *Debt owed by settlor to settlor-interested discretionary trust*

Suppose:

(1) The settlor ("S") owes a debt to trustees of a discretionary trust (as happens when a discretionary trust lends money to the settlor).
(2) The trust is within the scope of the GWR rules.

At first sight, the position seems to be:

(1) The settlor can claim a deduction for the burden of the debt on their death.
(2) The benefit of the debt is an asset of the trust fund, and therefore part of the estate of the settlor under the GWR rules.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral.

There is however one exceptional case. Where the benefit of the debt is excluded property (ie foreign domiciled settlor at the time the settlement was made and the debt not UK situate) then at first sight the result is a mismatch which benefits the taxpayer:

(1) a deduction for the burden of the debt in the estate of the settlor;[29] and

---

27 This might happen if the settlor was not UK domiciled, but needed the deduction for the debt as their property was UK situate.

28 But this would not often apply to excluded property trusts or to trusts where the settlor has an initial estate IIP: see 65.6.7 (Section 103(4) defence).

29 Since s.103 does not usually apply: see 65.6.7 (Section 103(4) defence).

(2) no IHT on the benefit of the debt, being excluded property.

It is considered that the debt is disallowed under s.102(3) FA 1986. Under this section the benefit of the debt is treated as property to which the settlor was beneficially entitled on their death. The analysis is therefore the same as where the settlor is a life tenant, see above. This is so whether the GWR debt is UK situate or foreign situate.[30]

65.10 Debts to and from trusts

Do not confuse two situations:

(1) The situation where an individual owes money to trustees (eg the trustees have lent money to the individual). Here:
   (a) the individual may be entitled to an IHT deduction for the burden of the debt in their estate;
   (b) the trustees have an asset, the benefit of the debt (which may or may not be excluded property).

(2) The reverse situation, where trustees owe money to another person (eg an individual has lent to the trustees). Here:
   (a) the individual owns an asset in their estate, the benefit of the debt, which may or may not be excluded property;
   (b) the trustees or beneficiaries may be entitled to an IHT deduction for the burden of the debt on the trust property.

The issue of deduction for debts of trustees raises entirely different questions to which we now turn.

65.11 Deduction for trust debt

The position for a trust debt[31] which is an incumbrance on a specific trust asset is straightforward: under the net valuation approach, the asset is valued for IHT purposes at the net value (less the incumbrance)[32]; that rule applies for the Inheritance Taxation of trusts as for individuals.

It is clear that unsecured trust debts are also in principle deductible for IHT purposes, although there is no provision which states this expressly. (Section 5(3) IHTA does not apply here as trustees do not have an estate.) This apparent gap has caused some confusion.

---

30 As to whether the GWR debt is subject to IHT under the GWR rules, see 63.12 (GWR over debt owed by the deceased).

31 Strictly one should refer to a trustee debt rather than a trust debt, but in practice the two terms may be used synonymously.

32 See 65.2.1 (Incumbrance-debts).

Let us consider first the position where the trustees have borrowed funds and an estate interest in possession terminates during the lifetime of the life tenant. There is of course a transfer of value and the value transferred is:

> equal to the value of the property *in which his interest subsisted*.[33]

What is "the property in which their interest subsists"? In my view it is not the settled property; it is the property subject to the trustees' lien.[34] For the trustees' lien takes priority over the interest of the life tenant. The trustees' lien is a lien over both income and capital of the trust fund. The value of property is its market value. Market value of property subject to a lien will be the net value, the value after deducting the value of the lien. In this valuation exercise we are not strictly claiming a "deduction" for the lien. We are simply ascertaining what property will fetch in the market.

For the same reason, trustees debts are deductible when an estate IIP terminates on the death of the life tenant and in computing ten-year and exit charges.[35]

This is the correct reason why unsecured trust debts are deductible.[36]

Section 103(1) FA 1986 provides:

> ... if, in determining the value of a person's estate immediately before his death, account would be taken, apart from this subsection, of a liability consisting of a debt *incurred by him* or an incumbrance created

---

33 Section 52(1) IHTA, emphasis added.

34 Where a trustee has incurred a liability as trustee, they may in principle reimburse himself out of the trust fund. For this purpose the trustee has a lien over the trust fund. One exception is where the trustee has committed a breach of trust. In the discussion here, it is assumed that is not the case.

35 Section 65(5) IHTA assumes debts are deductible, though it is not necessary to rely on this.

36 In *St Barbe Green v IRC* [2005] STC 288 at [12] the judge took a short cut to reach the same destination:

> "... s.49 IHTA [deems] the deceased to be beneficially entitled to 'the property' in which his life interest subsists. It does not say 'net property' (i.e. the value of the property net of trust liabilities) but that is what it must mean, and the parties to this appeal both agree that in practice that is the effect the Revenue gives to the section."

The point is discussed in detail in the 3rd ed of this book para 27.9, but it is not necessary to set this out now that *St Barbe Green* has confirmed the principle that trustee debts are deductible for IHT.

On HMRC practice see for instance IHT Manual 10541 [July 2011] (deduction for trustees' costs).

by a disposition *made by him*, that liability shall be subject to abatement.

This does not apply to debts of trustees as we are not concerned with a debt or disposition made by the individual.

65.11.1 *Against which trust property is deduction set?*

It matters in various cases whether a deduction for a trust debt is set against one item of trust property or another.[37] In particular, it matters where a trust with a foreign domiciled settlor has UK and excluded property.

The principles are as follows:

(1) If the debt is an incumbrance on specific trust property, the deduction is set against that property. This follows from the net valuation approach and is confirmed by s.162(4) IHTA.[38]

(2) If the debt is not an incumbrance on specific trust property, it is under general trust law principles an incumbrance on the trust fund as a whole and deducted from the trust assets *pro rata*. The place of payment and residence of creditor are not relevant, and s.162(5) IHTA does not apply.

65.11.2 *Debt of life tenant not set against trust fund*

The IHT manual provides:

> **IHTM28397 - Liabilities: law relating to debts: dealing with deficits** [Nov 2013]
> We take the view that a liability at any title may only be deducted against the assets at that title. This means that if there is an overall deficit on the free estate you cannot set this against the value of settled property. This is derived from the judgements of Lawrence J and the Court of Appeal in *Re Barnes (deceased)* [1938] 2 KB 684 in the first instance and [1939] 1 KB 316 CA. It is considered that these decisions, based on the relevant estate duty provisions in the 1894 Finance Act apply equally to the corresponding provisions in the Inheritance Tax legislation. But a contrary view is possible in view of IHTA84/S5(1) and IHTA84/S49(1). If the official view is contested and the tax involved is substantial you should refer the matter to Technical. **(This text has been withheld because of exemptions in the Freedom of**

37 See 65.8.1 (Why does it matter?).

38 If under the terms of the trust a debt is payable out of certain property it is for this purpose a incumbrance on that property.

Information Act 2000)

It is in fact clear that a personal debt of the life tenant cannot be set against property in which the life tenant has an estate interest in possession.[39] The Manual continues:

> You should treat a deficit on joint survivorship property in a similar way. The deficit cannot be set against the assets at another title. But a deficit on joint property that passes under the Will can be set against free estate assets.

I find this hard to follow; the passage was not written by someone familiar with legal terminology. But perhaps it does not matter. The Manual continues:

> You may generally allow a deficit in the deceased's estate that does not qualify for the instalment option to be set against the property that qualifies for the instalment option. If the value of the instalment option assets is insufficient to cover the liabilities, then the balance can be carried forward and set against any foreign property that the deceased owns. You may also allow any excess liabilities on the instalment option property against the non-instalment option property with any balance being carried forward against any foreign property, if any.

65.12 Debt owed by estate IIP trust to life tenant

Suppose trustees of an estate IIP trust owe a debt to the life tenant (as happens when a life tenant lends to a pre-2006 IIP trust). At first sight, the position seems to be:

(1) The trust can claim a deduction for the burden of the debt on the death.

(2) The benefit of the debt is part of the estate of the life tenant.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral.

There is however one exceptional case. Where the benefit of the debt is excluded property (ie foreign domiciled life tenant and the debt not UK situate) then at first sight the result is a mismatch which benefits the taxpayer:

(1) a deduction for the burden of the debt in the trust;[40] and

---

39 *St Barbe Green v IRC* [2005] STC 288.

40 Of course in most cases the trust property is excluded property so there is no need for the deduction, but that is not necessarily the case: the trust may hold UK property.

(2) no IHT on the benefit of the debt, being excluded property.

It is considered that s.49 IHTA does not disallow the debt.

65.13 Deduction for foreign taxes

65.13.1 *IHT payable on death*

Foreign inheritance taxes and similar taxes may be available as a credit to set against IHT: see 72.1 (Foreign IHT credit relief). Such taxes are not deductible for IHT purposes on general principles as they arise on the death and IHT is charged immediately before the death.

65.13.2 *Lifetime taxes*

Unpaid foreign taxes which accrue during a person's lifetime are in principle deductible. They are liabilities imposed by law.

The IHT Manual provides:

> **28100 Overseas taxes** [November 2013]
> Special rules (IHTM27181) apply to overseas taxes that are similar in nature to Inheritance Tax (IHT). These may in some cases be set against the IHT liability.
> For other types of overseas taxes the general rule is that they can normally only be deducted from the value of property in the country that imposes the tax. This is because the taxes are unenforceable in other countries, *Government of India v Taylor* [1955] AC 491.
> There are three exceptions to this rule:
> - tax debts in the Republic of Ireland (IHTM28101)
> - Canadian income tax on a deemed disposal on death (IHTM28102)
> - foreign tax on shares situated in the UK (IHTM27201).

The proposition that foreign taxes are unenforceable in other countries now needs to be qualified because under international treaties foreign taxes often are enforceable in other countries. So far as foreign taxes are unenforceable and unpaid it seems right in principle that there should be no deduction and a court would be expected to reach that conclusion even though there is no express provision to that effect. But it is difficult to see why the deduction should be against property in the country concerned: it should be against non UK property generally, under s.162(5) IHTA, unless the foreign tax legislation imposes an incumbrance (which does not seem likely).

65.13.3 *Irish tax debts*

The IHT Manual provides:

> **28101 Deduction for tax debts in the Republic of Ireland** [November 2013]
> If the deceased died owing tax in the Republic of Ireland, you should allow a deduction against the free estate for any tax that has actually been paid to the Irish authorities provided the deceased
> - was domiciled in the United Kingdom, and
> - had no assets in the Republic of Ireland.
>
> Where, in these circumstances, the deceased also has assets in a third country, you should apportion the tax debts.
> If a deduction is claimed for any 'Probate Tax' paid in the Republic of Ireland, you must refer the matter to Technical for advice. This tax, which is paid by the executors or administrators of an estate, is not covered by our Double Taxation Convention with the Republic of Ireland.

65.13.4 *Canadian income tax debts deducted for IHT*

The IHT Manual explains the Canadian tax background:

> **28102. Canadian income tax** [November 2013]
> Under Canadian law, the estate of an individual is deemed to have been disposed of immediately before their death. Income tax is charged on any resulting gains. If, under the (Income Tax) Double Taxation Agreement the deceased was resident in Canada, the charge applies to all property wherever it is situated. But if the deceased was resident in the UK the charge applies only to immovable property in Canadian and to certain business property. ...

(There was a similar charge to CGT in the UK between 1965 and 1971. The UK abolished the CGT charge on death; Canada abolished its Estate Duty instead, a wiser decision). ESC F18 provides:

> 1. Under IHTA 1984 s 5(3) a person's liabilities at the time of death are taken into account in arriving at the value of their estate for the purposes of IHT. The Board of Inland Revenue will by concession regard this provision as applying to income tax in Canada charged on a deemed disposal immediately before death, even though the liability may not in strictness have arisen until the person had died.
> 2. Where there is an IHT charge on a deceased person's world-wide estate, and income tax in Canada is charged on deemed gains which are attributable to assets forming part of that estate, the Canadian tax will

> rank as a deduction in arriving at the value of the estate for IHT purposes. The Canadian tax will normally be treated as reducing the value of assets outside the UK whether those assets are liable to IHT or not; but if the Canadian tax exceeds the value of those assets, the excess will be set off against the value of the UK assets.

HMRC say:

> This treatment relies on interpretation of the law and so does not amount to a concession. The concession will be withdrawn and HMRC's interpretation of the law will be set out in guidance.[41]

65.13.5 *Foreign tax on UK situate shares*

The IHT Manual provides:

> **27201. Procedure for relief by concession on shares** [January 2014] Occasionally shares in a company situated in some part of the UK by UK law, are also treated as liable to tax in a foreign country on the grounds, for example, that the company carries on business there. In this circumstance, by concession, the amount of foreign tax is allowed as a deduction against the value of the shares. This concession operates whether the company is incorporated in the UK or elsewhere.
> The concession applies in the same way where the obligation to pay foreign tax on death falls upon the company and the company has the right to be reimbursed by the personal representatives of the deceased shareholder before it registers a transfer of the shares.
> The concession does not apply to cases covered by the statutory reliefs provided for by s.158 IHTA 1984 and s.159 IHTA 1984. Nor does it apply to shares that become liable to the foreign tax by reason of the operation of a double taxation convention to which the UK is not a party.

I would have thought in this situation s.158 or 159 relief would normally apply, and in other cases relief would be available by law and not by concession. I would be interested if any reader can identify the foreign taxes to which this paragraph is applicable.

65.14 Liability attributable to excluded property

Section 162A IHTA provides:

---

41 HMRC, "Withdrawal of extra statutory concessions: Technical note and call for evidence" (January 2014).

> (1) To the extent that a liability is attributable to financing (directly or indirectly)—
>
> (a) the acquisition of any excluded property, or
>
> (b) the maintenance, or an enhancement, of the value of any such property,
>
> it may only be taken into account so far as permitted by subsections (2) to (4).

I refer to this as **"the excluded property disallowance"**.

The disallowance can apply to individuals and to trustees, on death and on other occasions of charge.

65.14.1 *Commencement of excluded property disallowance*

Para 5 Sch 36 FA 2013 provides:

> (1) Subject to sub-paragraph (2),[42] the amendments made by this Schedule have effect in relation to transfers of value made, or treated as made, on or after the day on which this Act is passed [17th July 2013].

So the new rules applies to pre-2013 debts, if the transfer of value is after enactment. This is an unfair commencement rule as in many cases, including those without any tax avoidance, existing liabilities will have been incurred in reliance of the pre-2013 rules. But there it is.

65.15 "Financing" the acquisition of excluded property

What is meant by the expression "financing" an acquisition? It is suggested that it should be widely construed.

Suppose T enters into a contract to purchase excluded property and the purchase price remains outstanding. The liability is attributable to financing the acquisition of the excluded property. It appears that HMRC agree. The IHT Manual provides:

> **IHTM28018 Restricted deductions: meaning of 'indirectly' where money has been borrowed to acquire excluded property** {November 2013]
>
> ...
>
> *Example 2* (Emilio)
>
> E, who is domiciled outside the UK, borrows £800,000 and invests it in diamonds, which he keeps in the UK. He moves the diamonds abroad

42 This relates to the business/agricultural property disallowance: see 65.24.4 (Commencement of BPR/APR disallowance).

> just before he dies. On his death, the diamonds are still worth the same amount but interest has accumulated on the loan so that Emilio now owes £850,000.
>
> As the assets acquired with the loan have not been disposed of but have become excluded property, only the excess value of the loan over the asset can be allowed as a deduction against any chargeable estate. However, as the liability has increased due to accrued interest, none of the liability may be allowed as a deduction.

What about borrowing to pay the incidental costs of acquiring excluded property, such as foreign stamp duty? It is suggested that this is not disallowed.

If a person borrows to pay for services, the debt is not disallowed (unless the services relate to maintenance/improvement of excluded property).

Suppose:

(1) T borrows to acquire excluded property ("debt 1").

(2) T borrows to pay interest on debt 1 ("debt 2").

It is tentatively suggested that debt 2 is not incurred in financing the acquisition.

More commonly, the interest will be added to the acquisition debt, ie there will be one single debt; it is arguable that the debt is disallowed to the extent it reflects the acquisition cost, but not to the extent it reflects interest. However the drafter seems to have assumed that an increase in the debt due to interest is in principle caught: see 65.21.5 (Disallowable reason 2: increase in liability).

65.16 Maintenance/enhancement of value of excluded property

The IHT Manual provides:

> **IHTM28012 Restricted deductions: meaning of 'maintain' and 'enhance'** [November 2013]
>
> The words 'maintain' and 'enhance' extend the scope of the provisions beyond simply buying either excluded property (IHTM28014) or assets that qualify for relief (IHTM28019).
>
> Both words have their normal meaning. 'Maintain' means to keep in good or proper order, and 'enhance' means to improve or augment. These words are most likely to apply in connection with borrowing money to maintain or enhance buildings.
>
> Where a person borrows money instead of using their own money to acquire assets, it could be said that they have 'maintained' the value of their other assets. So if they were not domiciled in the UK and held

most of their assets abroad, borrowing against UK assets could be said to be 'maintaining' the value of excluded property. Individuals are free to choose how to use and invest their assets and whether to borrow money. So you should not normally disallow the deduction of a liability in these circumstances.

But, any case where the borrowing against UK assets appears to be part of arrangements that are primarily designed to avoid these provisions and obtain a tax advantage should be referred to Technical.

65.17 "Indirectly" financing

The IHT Manual provides:

> **IHTM28013 - Liabilities: restricted deductions: meaning of "indirectly"**
>
> The word 'indirectly' at IHTA/S162A(1), IHTA/S162B(1)(b) & (5)(c) significantly broadens the scope of the provisions. It reduces the possibility of avoiding the restrictions by inserting a step or steps in the process of acquiring excluded or relievable property with the borrowed funds.
>
> As with the pre-owned assets charge (IHTM44005),[43] it is not necessary to show any intention that the funds should eventually be converted into excluded or relievable property when a loan was taken out. Inserting steps in an attempt to disguise the true nature of a transaction will be a strong indicator of indirect financing. And the acquisition of assets of any nature as part of a sequence of transactions that ends with the acquisition of excluded or relievable property will not necessarily be sufficient to prevent the deduction being disallowed.

"Not necessarily" is not exactly guidance. HMRC go on to cite a case:

> In *IRC v Stype Investments (Jersey) Ltd* (1983) Unreported, but see Capital Taxes News & Reports, March 1987 Vol 7, No.17; Vinelott J observed that the word 'indirectly' was used to make it clear that the (Inland Revenue) charge extended not only to the proceeds of sale of property subject to the charge and to property purchased with those proceeds (which may be said to represent that property 'directly') but also to any property into which the property subject to the charge or the proceeds of sale can be traced. Whilst this view may (?) have been

43 This relates to different wording: "the chargeable person has directly or indirectly provided ... any of the consideration given by another person for the acquisition of ... an interest in the relevant land "; See 76.6 ("Provide"). That does not shed much light on the issue discussed here.

> expressed in connection with an administrative process, it shows the potentially broad scope of the word. There is no number of steps or a timescale beyond which borrowing money can be regarded as safe from being attributed to the acquisition of excluded property. And there is no statutory let-out where the taxpayer can show that at the time the loan was taken out; there was no intention to convert the borrowed funds into excluded property. But although the word 'indirectly' has a broad meaning, in the context of this provision, it must be possible to reasonably attribute the acquisition of the excluded property to the borrowed funds before the deduction of the loan is disallowed. Each case will turn on its own facts.

This is an important question. Suppose:

(1) T borrows to acquire an asset ("asset 1").
(2) T sells asset 1 and uses the proceeds to acquire another asset ("asset 2").

Is it the case that the liability is "attributable to financing indirectly the acquisition of asset 2? I would have thought that was the case if the steps formed part of an arrangement, but not otherwise.

The case cited does not shed any light on our issue. The article in Capital Taxes News and Reports provides:

> The fourth case, which was decided on 15 November 1983 but was not immediately reported, is *CIR v Stype Investments (Jersey) Ltd*, CTTL 26. This was an application by the defendant company ('Stype Investments') to vary a Mareva injunction freezing its assets in the United Kingdom. The company wished to use its assets to discharge a judgment debt in favour of the Official Solicitor.... The Inland Revenue opposed the application, on the ground that the company's UK assets were insufficient to meet the claims for CTT, so that the company ought to pay the Official Solicitor out of its other assets. The case is primarily concerned with enforcement procedure, an arcane subject well outside the mainstream of CTT law; but it contains some interesting points, particularly with reference to the Inland Revenue charge under IHTA 1984, s 237. ...

Section 237 IHTA provides:

> (1) Except as otherwise provided, where any tax charged on the value transferred by a chargeable transfer, or any interest on it, is for the time being unpaid a charge for the amount unpaid (to be known as an Inland Revenue charge) is by virtue of this section imposed in favour of the Board on—

> (a) any property to the value of which the value transferred is wholly or partly attributable...
>
> (2) References in subsection (1) above to any property include references to *any property directly or indirectly representing it*.

The passage continues:

> The Inland Revenue had a charge under s 237(1) on the company's shares which Sir Charles had settled on himself for life, and under s 237(2) on 'any property directly or indirectly representing' those shares. [The Revenue] argued that s 237(2) must be read as extending the charge to the underlying assets of the company.

This was a hopeless argument and met with no success:

> Vinelott J was not persuaded that this was a tenable construction. In his judgment subs (2) was not intended and was not apt to create a double charge in such circumstances.

Then Vinelott J makes the comment on which HMRC rely:

> The word 'indirectly' was used in subs (2) to make it clear that the charge extends not only to the proceeds of sale of property purchased with those proceeds (which may be said to represent that property 'directly') but also to any property into which the property subject to the charge or the proceeds of sale can be traced.

This is quite right, but the passage sheds no light on the meaning of "indirectly financing"; "indirectly" is a word which is very context dependent.

65.17.1 *Tracing borrowed money mixed in bank account*

The first set of examples concern borrowed money mixed in an account with non-borrowed money:

> **IHTM28025 Liabilities: restricted deductions: examples where money has been borrowed to 'indirectly' acquire excluded or relievable property** [November 2013]
> *Example 1* (Marianne)
> M, who is domiciled outside the UK, owns a property in the UK.
> She borrows some money which she charges against her property and puts the money in her UK bank account.
> Some time later, she use some of the money in the account to buy some UK listed shares and some foreign shares.

> On her death, the liability is still charged against her property. The extent to which the liability may be disallowed will depend on the facts.

The scenario is far-fetched, as one normally draws down a loan facility when the funds are needed, not before. Impatient readers may skip to the next section.

HMRC consider three permutations of facts.

> [*Example 1(a)*]
> If M had borrowed £100,000 and added that to her UK account which already contained £50,000 (that had not been borrowed) and had then used that money to buy £75,000 worth of UK shares and £75,000 worth of foreign shares, it might be reasonable to say that one half of the liability was attributable to acquiring excluded property and disallow £50,000.

The author of the passage seems somewhat unsure. The moral is that M should not mix borrowed money and other money: she should:

(1) use her existing £50k to purchase foreign shares, and

(2) borrowed £100k to purchase £75k UK shares and £25k foreign shares.

Then only £25k would be disallowed. But of course before 2013, M was not in a position to have known that.

In the next example the bank account holds (more or less) only the borrowed money:

> [*Example 1(b)*]
> Had the account contained very little other money and £100,000 of foreign shares had been acquired, the whole liability should be disallowed.

That seems straightforward.

The next example is similar to example 1a, but the HMRC analysis is unknown:

> [*Example 1(c)*]
> On the other hand, had the account contained, say, £400,000 and £100,000 of foreign shares had been acquired the position will depend on circumstances. You should obtain details of the amount in the account before the borrowed funds were added and details of how the funds in the account were used afterwards.
> Where the funds were borrowed specifically to acquire the excluded property, then they should be treated as being used wholly for that purpose and the liability disallowed. But if the facts indicate that the funds in the account were mixed, it might be more appropriate to

> apportion the amounts used to purchase the excluded property. If the position is unclear, or if the taxpayer or agent disagrees with your apportionment of the liability, refer the case to Technical.

This is not exactly "guidance".

65.17.2 *Tracing borrowed money through a series of purchases and sales*

It is convenient to coin some terminology. In the following discussion:
"A debt-financed asset" is one purchased out of borrowed funds.
"A partly debt-financed asset" is one purchased partly out of borrowed funds and partly out of other funds.
"Chargeable property" is property which is not excluded property within the IHT definition.

The IHT Manual provides:

> **IHTM28025 Liabilities: restricted deductions: examples where money has been borrowed to 'indirectly' acquire excluded or relievable property** [November 2013]
> ... *Example 3*
> The trustees[44] of an excluded property trust borrow £1m which is charged against existing UK property worth £1.5m (property 1).
> They use the borrowed funds to purchase a second UK property for £1m (property 2).
> At this point, if the liability were to be taken into account in arriving at the value subject to tax, the £1m liability would be allowed as a deduction because the money has been used to acquire UK property. IHTA84/S162A does not apply, so the chargeable value would be £1.5m (£2.5m chargeable UK assets less £1m allowable liability).
> Property 2 is later sold for £1m and all the proceeds are transferred offshore to become excluded property.

This is therefore a case where:
(1) A debt-financed asset is chargeable property.
(2) The chargeable property is sold.
(3) Excluded property is purchased with the proceeds.
The HMRC analysis is as follows:

---

44 This set of examples concern trustees whereas the first set concerned an individual. Is there any difference between trustees and individuals? Trustees are more likely to keep good accounts and a trust has more of a unity of purpose. I wonder if HMRC intend to suggest that.

The liability would now be disallowed by IHTA84/S162A. This is because the liability has been incurred to indirectly acquire excluded property - the funds now held offshore. The chargeable value is still £1.5m (£1.5m of UK assets and no deduction for the liability).

In the next example:
(1) A debt-financed asset is chargeable property.
(2) The chargeable property is sold.
(3) Excluded property is purchased with part of the proceeds.

Example 4
The trustees of an excluded property trust borrow £1m which is charged against existing UK property worth £1.5m (property 1).
They use the borrowed funds to purchase a second UK property for £1m (property 2).
Property 2 is later sold for £1m,

So far the facts are the same as example 3, but the proceeds of sale are used in a different manner.

£400,000 of which is used to acquire UK listed shares and the £600,000 to acquire foreign shares.

The HMRC analysis is as follows:

£600,000 of the liability is disallowed by IHTA84/S162A(1) having been used to acquire indirectly the foreign shares which are excluded property, with the result that only £400,000 of the liability is allowed as a deduction.
The value of the UK assets is £1.9m (£1.5m, plus the additional £400,000 in shares) from which can be deducted the allowable part of the liability of £400,000, leaving £1.5m chargeable.

In the next example:
(1) A *partly* debt-financed asset is chargeable property.
(2) The chargeable property is sold
(3) All the proceeds are used to purchase excluded property.

Example 5
The trustees of an excluded property trust own £1.5m of UK listed shares.
They borrow £1m and use a further £600,000 from sale of some of the shares to purchase a UK property for £1.6m.
The property is subsequently sold for £2.5m and all the sale proceeds are invested in foreign shares.

The whole of the £1m liability has been used indirectly to acquire excluded property, so it is disallowed by IHTA84/S162A(1).
The chargeable value is £900,000 (the original £1.5m less the £600,000 worth of the shares used to purchase the property).

In the next example:
(1) A partly debt-financed asset is chargeable property.
(2) The chargeable property is sold.
(3) Part of the proceeds are used to purchase excluded property.

Example 6
The trustees of an excluded property trust own £1.5m of UK quoted shares.
They borrow £1m and use a further £600,000 from sale of some of the shares to purchase a UK property for £1.6m.
The property is subsequently sold for £2.5m.

So far the facts are as in example 5.

This time £750,000 of the sale proceeds are used to reinvest in UK quoted shares and £1.75m is used to acquire foreign shares.
IHTA84/S162A(1) disallows the liability to the extent that it has been used indirectly to acquire excluded property.
Part of the £1.75m of excluded property has been acquired indirectly from the £1m borrowed at the outset; this part is established as follows.
The £1m borrowed made up 62.5% of the purchase price of the £1.6m UK property purchased by the trustees.
When this property was sold, 70% of the sale proceeds (£1.75m out of £2.5m) were used to acquire the foreign shares. Of the original £1m borrowed therefore, £437,500 (£1m × 70% × 62.5%) is attributable indirectly to financing the acquisition of excluded property.
Only the remaining £562,500 of the liability can be taken into account.
The value of the UK assets is £1.65m (the original £1.5m less £600,000 used to buy the property plus the additional £750,000 reinvested in UK shares) from which can be deducted the allowable part of the liability of £562,500, leaving £1,087,500 chargeable.

65.17.3 *Borrowing to repay debt (refinancing)*

Suppose:
(1) T borrows to purchase excluded property ("debt 1").
(2) T borrows to repay debt 1 ("debt 2").
Is debt 2 indirectly attributable to financing the acquisition of excluded property? What if T borrows to purchase non-excluded property but later

sells that property and uses the proceeds to repay debt 1? It is suggested that debt 2 is attributable to financing excluded property if the steps form part of an arrangement, but not otherwise.

65.17.4 *Acquisition by third party*

The position becomes more complex if a second person is involved. Suppose:
(1) A (an individual) borrows.
(2) A gives the borrowed funds to B.
If A borrows and acquires *excluded* property, and gives it to B the debt is forever disallowed.

A may borrow and acquire *chargeable* property and give it to B; in the hands of B the property may (a) be excluded or (b) become excluded. A's gift may be a PET or qualify for the IHT spouse exemption or it may be a chargeable transfer.

In the expression "attributable to financing (directly or indirectly) the acquisition of any excluded property" does "acquisition" mean acquisition by the person who has the liability? or does it mean acquisition by anyone? It is tentatively suggested that A's liability is attributable to financing the acquisition by B, if the steps form part of an arrangement, but not if they are independent.

Similar issues arise if trustees borrow and appoint the borrowed funds to B.

65.18 Outline of excluded property disallowance reliefs

Statute provides the following reliefs (exceptions to disallowance of debts attributable to excluded property):
(1) Disposal of debt-financed excluded property (disposal relief)
(2) Property ceasing to be excluded property
(3) Liability exceeding value of excluded property

65.19 Disposal of debt-financed excluded property

Section 162A IHTA provides:

> (2) [1] Where the property mentioned in subsection (1) has been disposed of, in whole or in part, for full consideration in money or money's worth, the liability may be taken into account
> [2] up to an amount equal to so much of that consideration as—
> (a) is not excluded property, and
> (b) has not been used—

(i) to finance (directly or indirectly) the acquisition of excluded property or the maintenance, or an enhancement, of the value of such property, or
(ii) to discharge (directly or indirectly) any other liability that, by virtue of this section, would not be taken into account.

I refer to this as **"disposal relief"**.

"Dispose" is not defined so will bear its normal meaning, not the extended CGT meaning.

For the meaning of "consideration" see 75.43.2 ("Chargeable consideration"). Strictly speaking, the liquidation of a company does not give rise to a disposal for consideration but it appears that HMRC do not take this point. The IHT Manual provides:

> **IHTM28015 - Restricted deductions: disposal of acquired assets where money has been borrowed to acquire excluded property** [November 2013]
> ... Example 2 (Axel)
> A, who is not domiciled in the UK, owns shares in an overseas company, which owns a UK property.
> A acquired the company by borrowing £1m.
> The company is liquidated and the UK property is transferred to A.
> IHTA84/S162A(2) refers to the disposal of excluded property for consideration in money or money's worth. You may accept that liquidating the company and transferring the property to A meets that requirement so the liability may be allowed as a deduction against the UK property, although the allowable liability cannot exceed the value of the UK property that was transferred to the A.

Suppose:
(1) T borrows to acquire excluded property ("asset 1").
(2) Asset 1 is sold and other excluded property purchased instead ("asset 2").
(3) Asset 2 is sold and chargeable property is purchased.

Disposal relief can apply, as the debt is attributable to financing the acquisition of asset 2. HMRC agree. The IHT manual provides:

> **IHTM28015 Restricted deductions: disposal of acquired assets where money has been borrowed to acquire excluded property** [November 2013]
> Example 3 (Basha)
> B, who is not domiciled in the UK, borrows £1m which she uses to invest in an overseas company (Company A).

> Company A in turn owns another overseas company (Company B) which owns a UK property.
> Company A is liquidated so B receives the shares in Company B. Company B is then liquidated and B becomes the owner of the UK property.
> Here the liability is attributable to indirectly financing the acquisition the shares in Company B that owned the UK property. So excluded property was disposed of for full consideration in money's worth and as the consideration (the UK property) is not excluded, the liability may be allowed as a deduction against it.[45]

65.20 Debt-financed property ceases to be excluded property

An item of property may be excluded property at one time and subsequently become chargeable property, for instance:

(1) The owner of foreign property may become UK domiciled; or
(2) Foreign property (such as a chattel or a bearer security) may be brought to the UK.

Section 162A IHTA provides:

> (3) The liability may be taken into account up to an amount equal to the value of such of the property mentioned in subsection (1) as—
> (a) has not been disposed of, and
> (b) is no longer excluded property.

If T borrows to acquire excluded property but the property becomes chargeable, the debt becomes allowable under 162A(3) up to the value of the property.

The IHT Manual gives this example:

> **IHTM28016 - Restricted deductions: property is no longer excluded where money has been borrowed to acquire excluded property** [November 2013]
> ... Example (Chandra)
> C, who is not domiciled in the UK borrows £750,000 and buys a property abroad for £1m.
> The interest due on the loan is allowed to accumulate instead of being repaid.

---

45 The example goes wrong at the end: The deduction (if allowable) is not set against the UK property (unless it is charged on the property, which the author of the example has perhaps assumed to be the case). But that does not affect the main point of the example.

> C subsequently becomes deemed domiciled in the UK so the property is now subject to tax. On C's death, the property is worth £1.2m and the sum owed under the liability is £1.3m.
> As the property is now subject to tax, the liability may be allowed; but only up to the value of £1.2m. The remaining £100,000 may not be deducted.

Had C bought property in the UK the £100k would not be disallowed. The breach of EU law seems clear, so in the case of property in the EU/EEA, C should not accept the disallowance.

It is open to question whether the interest part of the debt is disallowed.

65.21 Liability exceeds value of excluded property

65.21.1 *"Remaining liability"*

Statute uses the term "remaining liability" which is defined in s.162A(8) IHTA:

> "remaining liability" means the liability mentioned in subsection (1) so far as subsections (2) and (3) do not permit it to be taken into account;

The label is not entirely apt: "disallowed liability" might have been clearer.

65.21.2 *Liability exceeds value of original excluded property*

Section 162A IHTA provides:

> (4) To the extent that any remaining liability is greater than the value of such of the property mentioned in subsection (1) as—
> (a) has not been disposed of, and
> (b) is still excluded property,
> it may be taken into account, but only so far as the remaining liability is not greater than that value for any of the reasons mentioned in subsection (7).

The IHT Manual gives a straightforward example:

> **IHTM28017 Restricted deductions: Excess liability over value of excluded property where money has been borrowed to acquire excluded property** [November 2013]
> **Example 1** (Dominique)
> D, who is not domiciled in the UK, borrows £800,000 which is charged on UK assets worth £1.5m.
> She uses the £800,000 to acquire a villa in Spain, which is excluded

property.
The open market value of the Spanish villa falls to £500,000 by the date of her death.
The £800,000 liability has been incurred to directly acquire excluded property, so would normally be disallowed by IHTA84/S162A(1). However, the reason for the liability being greater than the value of the excluded asset is not due to:

- it being part of an arrangement to secure a tax advantage, or
- an increase in the value of the liability, or
- a disposal of the whole or part of the excluded asset.

So £300,000 of the liability (£800,000 liability less the £500,000 value of the excluded asset) is allowed and reduces the chargeable value of the UK assets to £1.2m.

Example 2

If, in the example above:

- the money had been borrowed from abroad,
- it had not been charged on UK property, and
- the deceased had also owned assets in France,

the £300,000 should first be set against the French assets[46] before any balance is then set against UK assets.

65.21.3 *Liability exceeds value of property which becomes excluded*

Section 162A IHTA provides:

(5) Subsection (6) applies where—
  (a) a liability or any part of a liability is attributable to financing (directly or indirectly)—
    (i) the acquisition of property that was not excluded property, or
    (ii) the maintenance, or an enhancement, of the value of such property, and
  (b) the property or part of the property—
    (i) has not been disposed of, and
    (ii) has become excluded property.

(6) The liability or (as the case may be) the part may only be taken into account to the extent that it exceeds the value of the property, or the part of the property, that has become excluded property, but only so far as it does not exceed that value for any of the reasons mentioned in subsection (7).

---

46 More accurately, the deduction is against D's *foreign* assets; but the author has perhaps assumed that D's French assets are her only foreign assets.

The IHT Manual provides a straightforward example:

> **IHTM28018 Restricted deductions: excess liability over property that has become excluded where money has been borrowed to acquire excluded property** [November 2013]
> ... Example (Roberto)
> R who is not domiciled in the UK borrows £500,000 which he uses to buy two paintings which he keeps in his London house.
> He subsequently takes one of the paintings, worth £300,000, to keep in his house in Florida. This painting is now excluded property.
> The £300,000 painting has not been disposed of but has become excluded property. The liability of £500,000 is therefore allowed to the extent that it exceeds the value of that painting. In other words, £200,000 of the liability is an allowable deduction (£500,000 less £300,000).

It was not necessary to have a separate relief for this case. Relief should have been available under s.162A(4).[47] But it does no harm.

65.21.4 *Disallowable reason 1: Tax avoidance purpose*

Section 162A(7) IHTA sets out three disallowable reasons. They override the reliefs in:

(1) s.162A(4): see 65.21.2 (Liability exceeds value of original excluded property).
(2) s.162A(5)(6): see 65.21.3 (Liability exceeds value of property which becomes excluded).

The first disallowable reason is set out in s.162A(7)(a):

> The reasons are—
> (a) arrangements[48] the main purpose, or one of the main purposes, of which is to secure a tax advantage ...

Section 162A(8) defines tax advantage:

> (8) In this section ...
> "tax advantage" means—

---

47 See 65.21.2 (Liability exceeds value of original excluded property).

48 Section 162A(8) IHTA provides the standard (unnecessary) definition: "arrangements" includes any scheme, transaction or series of transactions, agreement or understanding, whether or not legally enforceable, and any associated operations.

(a) the avoidance or reduction of a charge to tax, or
(b) the avoidance of a possible determination in respect of tax.

"Tax" is not defined here, so it means IHT: see s.272 IHTA.

65.21.5 *Disallowable reason 2: Increase in liability*

The second disallowable reason is set out in s.162A(7)(b):

> The reasons are...
> (b) an increase in the amount of the liability (whether due to the accrual of interest or otherwise)...

An increase in the debt due to interest or index-linking is disallowed. So inflation will whittle away the value of the allowable debt over time.

In the case of a foreign currency debt the debt is valued at the time it is taken out and an increase in the value of the debt due to currency fluctuations is disallowed.

65.21.6 *Disallowable reason 3: Disposal*

The third disallowable reason is set out in s.162A(7)(c):

> The reasons are...
> (c) a disposal, in whole or in part, of the property.

I do not understand the purpose of (c): how can a liability be attributable to a disposal? Is this a reference to disallow borrowing to cover the incidental costs of disposal?

65.22 Liability attributable to foreign currency bank account

Foreign currency bank accounts of foreign domiciled non-residents qualify for IHT relief but they are not classified as excluded property.[49] It follows that a liability attributable to such an account is not disallowed under the excluded property disallowance. This was overlooked in the FA 2013 reforms, but a provision was introduced to deal with the matter in 2014. Section 126AA IHTA provides a set of rules based on the excluded property disallowance:

> (1) This section applies if—
> (a) in determining the value of a person's estate immediately before

49 See 62.20 (Non-residents foreign currency bank accounts).

death, a balance on any qualifying foreign currency account ("the relevant balance") is to be left out of account under section 157 (non-residents' bank accounts), and

(b) the person has a liability which is attributable, in whole or in part, to financing (directly or indirectly) the relevant balance.

(2) To the extent that the liability is attributable as mentioned in subsection (1)(b), it may only be taken into account in determining the value of the person's estate immediately before death so far as permitted by subsection (3).

(3) If the amount of the liability that is attributable as mentioned in subsection (1)(b) exceeds the value of the relevant balance, the excess may be taken into account, but only so far as the excess does not arise for either of the reasons mentioned in subsection (4).

(4) The reasons are—

(a) arrangements the main purpose, or one of the main purposes, of which is to secure a tax advantage, or

(b) an increase in the amount of the liability (whether due to the accrual of interest or otherwise).

(5) In subsection (4)(a)—

"arrangements" includes any scheme, transaction or series of transactions, agreement or understanding, whether or not legally enforceable, and any associated operations;

"tax advantage" means—

(a) the avoidance or reduction of a charge to tax, or

(b) the avoidance of a possible determination in respect of tax.

No consideration was given to alternative solutions to the problem. The better and simpler course would have been to classify foreign currency bank accounts as excluded property; or else to repeal the relief altogether.[50] Does it matter? It is just one more page of legislation, and one more straw on the camel's back.

65.23 Planning for excluded property disallowance

Planning is needed at the time of the acquisition of UK property. Suppose T owns £1m foreign property and wishes to purchase a UK home work £1m:

(1) If T borrows to purchase the UK home, the liability is deductible

(2) If T sells the foreign property to purchase the home, and subsequently

50 See 60.20.4 (Non-residents foreign currency bank accounts: Commentary).

borrows £1m to purchase foreign property, T is (more or less) in the same economic position. But in this case the liability is disallowed.

65.24 Debts and the GAAR

65.24.1 *Borrowing to reduce 10 year charge*

The GAAR guidance is confused; but it is worth studying as the confusion is itself revealing.

> **D28 Excluded property trust and debt**
> D28.2 ***The arrangements***
> D28.2.1 The trustees of an excluded property settlement buy a property in the UK and hold it directly. At the ten year anniversary, the UK property (in the absence of any other arrangements) will be subject to inheritance tax at a maximum of 6%.

The tax problem anticipated by the trustees is the 10-year charge. What do the trustees do?

> Shortly before the ten-year anniversary, the trustees borrow funds from a bank and secure the debt on the property.

At this stage - while the borrowed funds are still held by the trustees - there is no IHT saving, though the exact IHT analysis depends on whether the borrowed funds are excluded property or chargeable property.

If the borrowed funds are UK situate at the time of the 10-year charge, the debt is deductible but the borrowed funds are chargeable property: the IHT ten year charge is unchanged by the borrowing, as the net value of the trust fund is the same.

Before 2013, the trustees could have carried out the following arrangements:

(1) The trustees borrow charged on the property.
(2) The trustees hold the borrowed funds offshore on the ten year anniversary (so the funds would be excluded property),
(3) The trustees repaid the debt later.

This worked as the debt was then deductible but the borrowed funds were not chargeable. I refer to this as **"pre-2013 debt planning"**. But of course this planning no longer works from 2013.

My guess is that this is the scheme which the author of the example had in mind. But they realised that pre-2013 debt planning no longer worked, so they proposed a further step:

> The cash is paid out to the settlor[51] on the understanding[52] that the money will be returned.

The guidance does not specify the timing here, but it is envisaged that the payment to the settlor is made before the 10-year anniversary and the payment back from the settlor is made afterwards.[53] I refer to this as **"post-2013 debt planning"**.

The post-2013 debt planning does not save any IHT:

(1) If the trustees held the borrowed funds in the UK at the time the borrowed cash is paid to the settlor, there would be an IHT exit charge.

(2) If the borrowed cash was not UK situate at that time, the there would be no exit charge, but the trust debt would be disallowed under the excluded property disallowance; so there is a 10-year charge.

> Shortly after the ten-year anniversary, the settlor adds the funds back to the trust and the trustees use it to repay the loan, freeing the UK property from its charge...

The payment from the settlor to the trust has many tax implications, of which IHT in principle due on the payment is the most obvious.[54]

The guidance next considers the taxpayer's tax analysis. It does so in a paragraph of 3 sentences; it is convenient to consider the middle sentence first, as it makes a distinct point:

> D28.4 ***The taxpayer's tax analysis***
> D28.4.1 ...
> [2] The cash borrowed by the trustees is excluded property at the time of the ten-year charge and not subject to tax.

---

51 [Author's footnote] Although the example specifies that funds are paid to the settlor, it does not matter for present purposes whether it is paid to the settlor or any other beneficiary.

52 [Author's footnote] It is envisaged that this is a non-binding understanding. If the arrangement involved a legally binding promise by the settlor to return the funds, then the promise is trust property

53 This is clear on first principles, but for completeness, it is confirmed later in the guidance ("... it is always intended to use the cash borrowed to repay the debt as soon as the anniversary has passed ...").

54 One can avoid this IHT problem if one is allowed to hypothesise that the settlor is not UK domiciled at the time of the transfer and the funds are not UK situate at that time, so the property is excluded property. The example does not specify that, but it not inconsistent with the given facts.

Sentence [2] is inconsistent with the given facts, which are that the borrowed cash has been paid out to the settlor before the 10-year anniversary. The borrowed cash is outside the scope of the 10 year charge because once it has been paid out to the settlor it is no longer settled property (in the statutory terminology, it is not relevant property). It is wrong to describe it as excluded property. I guess that what has gone wrong is that the author of the guidance here has in mind the pre-2013 planning (which does not involve any payment to the settlor) and has forgotten that the given example was altogether different.

The rest of the section "taxpayer's tax analysis" concerns deduction for the trustees debt:

> [1] The value of the UK property that will be subject to tax on the ten-year anniversary is reduced to nil as a result of the debt secured against it, so no tax will be payable in respect of the UK property...
> [3] The taxpayer claims that he has effected the scheme in such a way that the new anti-avoidance legislation in [Sch 36 FA 2013 introducing the excluded property disallowance] does not apply.

We move on to the HMRC analysis:

> D28.5 ***What is the GAAR analysis under s[207(2)] FA 2013?***
> D28.5.1 Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether express or implied) and the policy objectives of those provisions?
> The relevant property regime applies to excluded property settlements only if UK property is owned by the trustees directly on the relevant date such as on the ten year anniversary.
> By charging the UK property with debt and paying the cash out to the settlor abroad, the trustees have tried to avoid the ten-year charge.
> Even if the taxpayer has found a way to circumvent the specific provisions of FB 2013 [the excluded property disallowance] it is clear that the policy intent expressed there is to prevent a deduction against UK property except where the loan was taken out to acquire the UK property. Using contrived borrowing that is not genuinely used to acquire UK property is clearly against the intent of the legislation.

Sentence [3] of the taxpayer's analysis, and the last paragraph of HMRC's analysis is lazy and inadequate. It is not satisfactory to say "*even if* the taxpayer has found a way to circumvent" the excluded property disallowance then the GAAR applies:

(1) If the taxpayer has *not* found a way to circumvent the excluded property disallowance, there is no tax saving and the GAAR does not apply.
(2) If the taxpayer *has* found a way to circumvent the excluded property disallowance, it is necessary to know how and why. One cannot carry out a satisfactory GAAR analysis unless one knows what is the technical tax analysis in the absence of the GAAR.[55]

The drafter of the guidance has not taken the trouble to identify and to answer these questions. It seems a safe inference that they reached the answer first, and the analysis (such as it is) came later. That is of course always a risk, particularly in policy-based adjudication such as the GAAR.

> D28.5.2 *Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*
> Borrowing with the intention of removing the cash from charge and then repaying the loan shortly thereafter is not a normal transaction. Borrowing taken out simply to avoid tax may in this context be regarded as a contrived step.
> D28.5.3 *Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?*
> The ten-year charge is based on a ‹snapshot' of the assets and liabilities of the settlement at the time of the charge. Until FB 2013 there was no specific provision dealing with the deduction of liabilities against settled property, nor could regard be had to the reasons behind borrowing the money. FB 2013 makes it clear that the general intention of the legislation is to grant inheritance tax deductions only in respect of borrowing taken out to acquire the particular property, with only limited exceptions, for example, where the value of the property acquired with the borrowings at the relevant time of charge is less than the amount borrowed (and not artificially devalued) in which case the excess may be set against other property.
> If the UK property was sold just before the ten year anniversary, HMRC accepts that the sale proceeds (if retained abroad) would not be subject to inheritance tax. Similarly, if the trustees had borrowed and lost the money on a poor investment the liability could be deducted against the house.

55 It is fair to point out that the excluded property disallowance was only published in the Finance Bill in March, so there was very little time to consider it, particularly as example D28 is minuscule in the context of the vast GAAR guidance, some 200 pages, which was published in April.

> However in this case the UK property continues to be owned before and after the ten year anniversary and one would therefore expect inheritance tax to be due on its value. The real economic value of the UK property has not been reduced; it is always intended to use the cash borrowed to repay the debt as soon as the anniversary has passed and the cash has been paid out of the trust in an attempt to circumvent the provisions but with the parties agreeing in advance that the monies will be resettled shortly thereafter. FB 2013 makes the regime for deduction of liabilities clear and attempts to circumvent this through insertion of more abnormal steps will be caught by the GAAR. In looking at the application of the GAAR it is appropriate to look at the wider context of the transaction before and after the ten year anniversary and in the light of FB 2013 to consider the context in which liabilities have been incurred.
>
> D28.5.4 *Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*
>
> HMRC has not indicated its acceptance of this practice and in the light of FB 2013 it is clear that liabilities may be deducted only if certain principles are satisfied.
>
> D28.6 ***Conclusion***
>
> D28.6.1 On the facts given, the arrangements are abusive arrangements to which HMRC would seek to apply the GAAR.
>
> D28.7 ***Proposed counteraction***
>
> D28.7.1 The liabilities would be ignored in calculating the tax due on the house and the transaction counteracted on this basis.[56]

Assuming for a moment that the post-2013 scheme could have worked, that is, ignoring the actual IHT legislation, a similar result could have been defended on *Furniss* grounds even without the GAAR. Though one point of the GAAR, I think, is that HMRC should no longer have to rely on *Furniss* which is (to say the least) a tool of uncertain application.

Perhaps a moral to draw is that HMRC dislike circular arrangements involving short term borrowing and repayment; the borrower should not return the borrowed money back to the trust to allow the trustees to repay the loan very shortly after the ten year anniversary.

It seems safe to predict that GAAR guidance example D28 will be withdrawn in due course.

---

56 HMRC GAAR Guidance Part D (Examples) (April 2013) accessible *http://www.hmrc.gov.uk/avoidance/gaar-partd-examples.pdf*

65.24.2 *Borrowing set against UK residence: The GAAR*

The GAAR guidance provides:

> **D31 Lending to fund UK real estate by foreign domiciliary**
> *This example illustrates how standard tax planning may have increasing levels of abnormality attached to it. A number of the alternatives are, nonetheless, clearly on the non-abusive side of the GAAR boundary. However, the example aims to illustrate at approximately what point that boundary is crossed, although – given the condensed nature of the illustration – this will always be highly fact dependent. The example also aims to demonstrate a situation (option 7) where the arrangements might fail a single reasonableness test, but be saved by the double reasonableness test.* **...**
> **D31.2 The arrangements**
> D31.2.1 R is domiciled abroad and wishes to buy a valuable house in the UK for his occupation. He has a number of options:
> 1. [*Individual purchase*] R buys the house in his own name, using his own cash resources to fund the purchase.
> 2. [*Trust purchase*] R settles cash from his own resources into a trust that purchases the house. R is a beneficiary of the trust.
> The reasons for using a trust may be partially non-tax related and may include a desire for confidentiality, to avoid complex probate procedures, or to provide an automatic succession plan on R's death.
> [This does not say, but it does suggest, that the reasons may alternatively be wholly tax-driven.]
> 3. [*Individual borrows 70% from bank*] R even if he could have funded the purchase from his existing resources, chooses to borrow from a bank to fund a large part, say 70%, of the purchase price.
> 4. [*Trust borrows 70% from bank*] R (as in 2. above) partially funds the trust. The trustees (as in 3. above) then borrow the remainder of the purchase price from a bank.
> 5. [*Individual borrows 95% from bank*] R deposits foreign investments with a bank thereby enabling the bank to lend a greater amount (say 95%) to fund the purchase of the property. The borrowing is again secured on the property.
> 6. [*Trust borrows 95% from bank*] R having funded a trust to the value of, say, 5%, of the purchase price of the house, agrees to guarantee the trustees' borrowing. This enables R's trust to borrow the remainder of the purchase price from a bank. The borrowing is again secured on the property.
> 7. [*Existing trust borrows 100% from family offshore company*] R has

an existing substantive[57] discretionary trust which he settled many years ago. R is a beneficiary of the trust, but his adult children are also beneficiaries and they have all benefited from the trust over the years.
The trustees previously owned a UK house, but sold it a couple of years ago.[58]
The trustees have been looking around for a new UK property suitable for R and his children to use as each of them visit the UK for a few weeks a year.[59]
The trustees could afford to buy the new house using existing resources but instead they accept an offer from R to lend them the purchase price via an offshore company that is wholly owned by R. The loan is interest free and repayable on demand. The company owned by R secures the loan on the house.
8. [*Gift to trust and loan back to settlor*] R settles cash from his overseas resources into a newly established trust which then lends it back to him via an underlying company for the purchase of the house in his own name.
9. [*Loan trust lends to property trust*] R adds cash from his overseas resources to a trust, known as the Loan Trust, where he is settlor and beneficiary.
His spouse or other relative sets up another trust, known as the Property Trust, which is funded with, say, £1000 cash. R adds no funds to the Property Trust.
The Loan Trust forms an overseas company into which the cash is transferred and the company lends the cash to the Property Trustees who acquire the UK property that R wishes to occupy. The loan is repayable on demand and may be interest-free, interest-bearing or index-linked. The Property Trustees incur no personal liability as the lender may have recourse to the house only...

D31.4 ***The taxpayer's tax analysis***

D31.4.1 In options 1 and 2 [individual purchase and trust purchase] above there is no tax advantage and indeed additional ten year charges arise in relation to option 2. These options are included to illustrate the range of alternatives which R has and by way of contrast with the following options.

---

57 Author's footnote: The term "substantive" is here used in a non-technical, layman's sense; see below.

58 Author's footnote: The ownership of a previous house should be irrelevant, but it does illustrate the existence of the trust over an earlier period.

59 Author's footnote: I think the facts in this sentence are irrelevant to the example.

> D31.4.2 In options 3 and 4 [70% bank borrowing] the borrowing provides a clear inheritance tax advantage compared to options 1 and 2. As R is not domiciled in the UK the cash he retains personally abroad is not subject to inheritance tax and the UK property is devalued by commercial borrowing.
> D31.4.3 The same tax advantage, albeit to a greater extent, is claimed to apply in options 5 to 9.
> D31.4.4 The reservation of benefit rules do not apply to options 1, 3, 5 and 8 because R owns the property.

More analytically, GWR does not apply in options 1, 3, and 5 because R does not make a disposal by way of gift. GWR does not apply in option 8 because the property in R's trust is excluded property.

> There is a reservation of benefit in options 2, 4, 6 and 7, but the taxpayer argues that [in cases 4, 6, & 7 where the trust borrows] this is only on the net value of the property.
> D31.4.5 In option 8, the liability is not, it is claimed, caught by s103 FA 1986 as a self-generated liability due to it being funded with excluded property (see s103(4) FA 1986).[60]
> D31.4.6 In option 9, there is no charge on the death of R because he has not gifted any property to the Property Trust (so the reservation of benefit provisions do not apply) and he is a beneficiary only of the Loan Trust that holds excluded property. As he has made no gift to the Property Trust, s102 and para 5(4) Sch 20 FA 1986 are not in point. If he has made such a gift then it is argued that the UK property is devalued by the loan taken out to acquire it.
> D31.4.7 Pre-owned assets charge does not apply to options 1, 3, 5 and 8 since R has made no disposal of the property and does not satisfy the contribution condition since the property has been acquired by him and not a third person. It does not apply to the other options on the basis that even if the contribution condition is satisfied, the loan in which R reserves a benefit (or in the case of option 2 the house itself) derives its value from the house and therefore protection under para 11(3) Sch 15 is available.[61]
> D31.4.8 The liabilities are incurred to buy the UK property and therefore on the face of it are not disallowed by [Sch 36 FA 2013].
> D31.4.9 HMRC does not accept R's analysis of the legislation and in particular the deductibility of loans against UK property in which he

60 The "claim" is correct: See 65.6.7 (Section 103(4) defence).

61 HMRC here accept the views set out in 76.16.2 (Derived property: benefit of loan).

> reserves a benefit under options 2, 4, 6 and 7. The GAAR analysis below should be read with this point in mind.

The reader may think it unsatisfactory that HMRC do not state what is their analysis or why the taxpayer's analysis is wrong. The GAAR analysis should only be carried out once one knows what is the general tax analysis. Of course the general tax analysis is a matter of considerable complexity, but HMRC are at least partly responsible for that.

> D31.5 ***What is the GAAR analysis under [s.207(2) FA 2013]?***
> D31.5.1 *Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether express or implied) and the policy objectives of those provisions?*
> D31.5.2 *Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*
> It is reasonable to conclude that the obtaining of a tax advantage was the main purpose or one of the main purposes of options 7 to 9.

This is correct for options 8 and 9 (Gift to trust and loan back to settlor; Loan trust lends to property trust). It is not correct for option 7 (Existing trust borrows 100% from family offshore company); this is in fact recognised in a passage which follows ("In the above example the loan may not be mainly tax motivated anyway...").

> This may not be so in relation to options 3 to 6. R might prefer to borrow from a bank to allow him more flexibility to make other investments with his cash or to preserve his liquidity.
> The intention behind the inheritance tax legislation is to tax UK assets and UK domiciliaries. The foreign assets of foreign domiciliaries are excluded property being outside the territorial scope of inheritance tax in the first place, whereas any UK assets they own are subject to tax.
> Options 3 and 4 [70% bank borrowing] are an application of the rules whereby IHT is chargeable on the net value of UK assets. The fact that R or his trustees could have funded the purchase using foreign investments is irrelevant: R is not compelled to turn assets which are outside the territorial scope of the tax into assets which are subject to tax, whatever his motivation for the borrowing. R's or the trustees' borrowing is a normal commercial transaction and is not contrived or abnormal. While reservation of benefit may be in point the GAAR is not thought to apply.
> Options 5 and 6, [95% bank borrowing] similarly, represent a commercial decision by R or his trustees. R or his trustees take the commercial risks associated with the additional borrowing and R takes

> the economic downsides of depositing funds in support of the borrowing/guarantee. Choosing to borrow a higher amount is similarly neither contrived nor abnormal. R takes the economic consequences of borrowing commercially. He may lose the cash he has chosen to place elsewhere. It can reasonably be regarded as a reasonable course of action.
>
> In option 7 [existing trust borrows 100% from family offshore company] loans to trusts do occur for all sorts of non-tax reasons and therefore cannot be considered in themselves to be necessarily abnormal or contrived. Even though the loan is tax-motivated and (in some senses) self-generated, it involves a single straightforward step.

The passage then goes on to consider variants of example 7:

> The position might well be different, however, if
>
> [1] the trust were not established for some time already or
>
> [2] [if the trust were not] substantive; for instance if R were the sole or principal beneficiary or able to direct the trustees or revoke the trust.
>
> A loan to such a newly created trust might be considered a contrivance.

There are two scenarios here; the last sentence only deals with the first. I do not see why it matters if R is the principal beneficiary or has a power of direction or revocation (though the latter would be unusual). It is not accurate to describe such a trust as "not substantive".[62] But in any case, a passage which provides "the position may well be different" is scarcely to be called guidance.

> In the above example the loan may not be mainly tax motivated anyway e.g. the trustees may wish to preserve cash for liquidity purposes, but even if it were the arrangement is still not necessarily abusive.

The guidance then turns to option 8 (Gift to trust and loan back to settlor):

> In option 8, the cash goes in a circle back to the settlor via a trust and loan arrangement. The position might be different under the GAAR if the trust had been in existence for some time so the gift was not made in contemplation of a loan back. The settlor sets up a trust as a vehicle to lend to himself. The setting up of the trust and company is done simply to enable a loan to be made back to the settlor and this is a contrived step. S103 FA 1986 was designed to stop assets being given

62 The author, who does not seem to have been a trust lawyer, may be thinking confusedly of the sham doctrine, or that the trust may be a nomineeship.

> away that are then lent back by the donee and it may be thought that option 8 is using a possible loophole in s103 to circumvent the intended policy.

It seems to me that s.103(4) is a sensible policy based exemption for foreign domiciliaries. The circularity of example 8 is certainly avoidance; whether it passes the test of *egregious* is more arguable.

The guidance then turns to option 9 (Loan trust lends to property trust):

> In option 9 the combination of a nominal-value settlement specifically set up to own the property coupled with the establishment of a separate loan trust and a corporate vehicle underlying it which is then used to make a loan which is on a non-recourse basis is on these facts set up only to achieve an artificial tax deduction. And, while taken individually, the steps may be considered normal, when taken in combination they may be considered abnormal. However, each case would be taken on its own facts and a situation where, for instance, both trusts were substantial and existing trusts or where the loan was on fully commercial terms or where the property trust was established for a different beneficiary apart from the settlor might be considered differently (see option 7 above).
>
> D31.5.3 *Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*
>
> Neither of the last two options accord with established practice and HMRC has not indicated acceptance of the interpretation that foreign domiciliaries are not caught by s103 as a matter of principle.

Section 207(5) FA 2013 provides:

> The fact that tax arrangements accord with established practice, and HMRC had, at the time the arrangements were entered into, indicated its acceptance of that practice, is an example of something which might indicate that the arrangements are not abusive.

This refers to "the fact" (in the singular) but it goes on to refer to *two* facts, namely (1) the fact that tax arrangements accord with established practice, and (2) the fact that HMRC indicated its acceptance of that practice.

If *both* facts are present, then that is obviously "something which might indicate that the arrangements are not abusive." (At first sight, that seems over-tentative. It is difficult to imagine anything that HMRC publically accept, but which is not reasonable tax planning: that could only arise if HMRC's acceptance of the planning is unreasonable. Perhaps HMRC

were concerned at the possibility of a maverick inspector, whose views HMRC later wanted to disavow.)

Contrary to the statement in the GAAR guidance, in option 9, my experience is that *one* of the facts is present, namely, the arrangement has been an established practice for a few years now. However it is not an arrangement about which HMRC has publically indicated any view. Is that solitary fact "something which might indicate that the arrangements are not abusive"? It is suggested that it should be taken as an indication to that effect (though not of course decisive).

> D31.6 ***Conclusion***
>
> D31.6.1 Options 1 and 2 do not result in a tax advantage and are included above merely to illustrate the tax advantage of the following options.
>
> D31.6.2 Options 3 and 4 are straightforward applications of the legislation and would not be caught by the GAAR. Similarly, options 5 and 6 involve commercial arrangements which are neither contrived nor abnormal and HMRC would not seek to invoke the GAAR against them.
>
> D31.6.3 With option 7, while economically the liability appears to be self-generated, the trust is of substance and the arrangements are not necessarily contrived or abnormal.
>
> D31.6.4 Options 8 and 9, on these particular facts, would be caught by GAAR. The liabilities would be ignored in calculating the tax due on the house and the transaction counteracted on this basis. However, as with option 7, each case would have to be considered on its full facts and it is not impossible that different scenarios might potentially be saved from the GAAR by the double-reasonableness test.

The passage is no doubt correct to say "it is not impossible that different scenarios might potentially be saved from the GAAR by the double-reasonableness test." But the reader may doubt whether a statement which is so qualified should be called "guidance".

One might of course set up the option 9 loan trust/property trust structure with a view to replacing the internal loan with bank borrowing at a later date.

If the loan is disregarded, the property trust will be insolvent after IHT falls due. If the trust loan is secured on the property, there will be no value left in the trust for IHT to be paid.

> D31.6.5 With all the options (but particularly options 7, 8 and 9) HMRC would consider whether other legislative means at their disposal

should be used to challenge the claimed tax treatment.[63]

65.25 Liability attributable to business/agricultural property

Section 162B effectively disallows three classes of liability, attributable to:

(1) business property
(2) agricultural property
(3) woodland

I do not consider the provisions relating to woodland. The IHT Manual uses the terms "relievable property" or "relievable assets"; but I think it is clearer to refer to business /agricultural property.

65.25.1 *Liability attributable to business property*

Section 162B(1) IHTA provides:

> (1) Subsection (2) applies if—
>
> (a) the whole or part of any value transferred by a transfer of value[64] is to be treated as reduced, under section 104, by virtue of it being attributable to the value of relevant business property, and
>
> (b) the transferor has a liability which is attributable, in whole or in part, to financing (directly or indirectly)—
>
> (i) the acquisition of that property, or
>
> (ii) the maintenance, or an enhancement, of its value.

The words in (b) are the same as the excluded property disallowance.[65]

Section 162B(2) IHTA provides:

> [a] The liability is, so far as possible, to be taken to reduce the value attributable to the value of the relevant business property, before it is treated as reduced under section 104 [BPR],
>
> [b] but only to the extent that the liability—
>
> (a) is attributable as mentioned in subsection (1)(b), and
>
> (b) does not reduce the value of the relevant business property by virtue of section 110(b).

---

63 HMRC GAAR Guidance Part D (Examples) (April 2013) accessible *http://www.hmrc.gov.uk/avoidance/gaar-partd-examples.pdf*

64 Section 162B(9) IHTA provides a standard definition of "transfer of value" (repeating s.103(1) IHTA).

65 See 65.15 ("Financing" the acquisition of excluded property).

This is not strictly a disallowance of the liability; but in the (usual) case of property qualifying for 100% relief, it comes to the same thing. The wording is different from the excluded property disallowance as of course business property may not qualify for 100% relief.

The disallowance can apply to individuals and to trustees, on death and on other occasions of charge.

The IHT Manual gives a straightforward examples of a debt used to purchase shares qualifying for BPR:

> **IHTM28020 Restricted deductions: borrowed money used to acquire assets that qualify for business relief** [November 2013]
> ...
> *Example 2* (Habibah)
> H borrows £450,000, which is charged on her house, and uses the funds to acquire AIM shares. At the date of H's death the AIM shares are worth £575,000 and qualify for business relief. The rest of her estate is worth £1.5m.
> At the date of death the liability is taken to reduce the value of the AIM shares that can qualify for business relief under IHTA84/S162B(2) from £575,000 to £125,000. Business relief applies to that value.
> The total estate, including the AIM shares is £2,075,000 (£1.5m plus £575,000). This is reduced by business relief of £125,000 and, subject to it meeting the provisions of IHTA84/S175A, the liability of £450,000.
> The value of the chargeable estate is £1.5m. As the liability has been taken into account to reduce the value of the AIM shares sunder IHTA84/S162B, the liability cannot be deducted against the value of the house under IHTA84/S162(4).

65.25.2 *Interaction with spouse exemption*

The Manual then considers a more complex case involving the interaction with the spouse exemption:

> *Example 3* (Ian)
> I borrows £600,000, which is charged on his house and uses the money to buy shares in his son's company.
> At I's date of death,
> - the shares are worth £800,000,
> - the house £1m and
> - his personal estate is worth £500,000.
>
> Under his Will, I leaves his house to his spouse with the residue to his son.
> Assuming the liability meets the conditions of IHTA84/S175A, it is

taken to reduce the value of the company shares before business relief is applied. As the liability has been taken into account under IHTA84/S162B, it cannot be taken against the value of the house under IHTA/S162(4).
The value of shares is reduced to nil through a combination of deducting the liability (£600,000) and business relief (£200,000).
The liability has been taken into account against the shares, so the house passes to the spouse, free of the liability and qualifies for spouse or civil partner exemption.
This leaves a chargeable estate of £500,000 that passes to the son.

The house does *not* pass to the spouse free of the liability as a matter of succession law.[66] The author means that the spouse exemption applies as if the house were free of the liability. The value transferred on the death for IHT purposes is £1.5m, of which £1m is exempt under the IHT spouse exemption.

The IHT Manual does not address the more interesting question of whether the liability is disallowed on the death of I's spouse.

65.25.3 *Liability attributable to agricultural property*

Section 162B IHTA provides:

(3) Subsection (4) applies if—
(a) the whole or part of any value transferred by a transfer of value is to be treated as reduced, under section 116, by virtue of it being attributable to the agricultural value of agricultural property, and
(b) the transferor has a liability which is attributable, in whole or in part, to financing (directly or indirectly)—
(i) the acquisition of that property, or
(ii) the maintenance, or an enhancement, of its agricultural value.

(4) To the extent that the liability is attributable as mentioned in subsection (3)(b), it is, so far as possible, to be taken to reduce the value attributable to the agricultural value of the agricultural property, before it is treated as reduced under section 116.

This is exactly the same as the rule for BPR. The IHT Manual gives some examples. The first example is a straightforward loan to improve agricultural property:

66 Unless I's will so provides; see s.35 AEA 1925.

IHTM28021 Restricted deductions: borrowed money used to acquire assets that qualify for agricultural relief [November 2013]

... *Example 1* (Ken)

K borrows £200,000 which he uses to repair buildings on his farm which qualify for agricultural relief. The value of K's estate on death is £2m, of which £1,200,000 is agricultural property qualifying for relief at the date of death.

The £200,000 liability reduces the agricultural value of the agricultural property to £1,000,000 under IHTA84/S162B(4).

This £1,000,000 of agricultural value qualifies for agricultural relief.

The value of the estate is reduced by agricultural relief of £1,000,000 and, subject to it meeting the provisions of IHTA84/S175A, the liability of £200,000, leaving a chargeable estate on death of £800,000.

The next example involves a loan to acquire agricultural and non-agricultural property:

Example 2 (Jan)

J borrows £1m and invests it in a house[67] and some adjoining farmland. The house is worth £700,000 and the land £300,000. The farmland is let out to a neighbouring farmer.

At J's date of death, the value of the combined property has increased in value to £2m of which £1.2m is attributable to the house and £800,000 to the land.

The liability is to be taken against the agricultural property to the extent to which it can be attributed to paying for that property, IHTA84/S162B(4). When J acquired the property, £300,000 was attributable to the farmland and this is the amount of the liability to be taken against the agricultural value on death. So, subject to the liability meeting the provisions of IHTA84/S175A, the chargeable value of the house will be £500,000 (£1.2m less the £700,000 portion of the liability used to buy the house). The value of the land (£800,000) will be reduced to nil by a combination of the liability (£300,000) and agricultural relief (£500,000).

An alternative approach would be to apportion the liability by reference to the values at the date of death. The effect, in this example, would be that only £600,000 of the liability would have been attributable to the house (£1,200,000 ÷ £2,000,000 × £1,000,000) giving a chargeable value for the house of £600,000 and increasing the liability to tax.

If the combined value had been split differently between the house and the farmland, or if their values had increased in different proportions, apportioning the liability by reference to, say, date of death values may give a different result. But a consistent approach is necessary, and the liability should be apportioned using the values at the date of acquisition, even if an alternative approach would give rise to more tax.

As well as being consistent, using the values at the date of acquisition avoids difficulties that might arise if either part of the property is sold but the liability

67 It is assumed the house does not qualify for APR (though in practice it might do so).

> retained (how should the remaining liability then be apportioned?), or if there were a sale and part of the liability was repaid, which would trigger the provisions of IHTA84/S162C, (IHTM28026). Fixing the liability attributable to the different parts of the assets at the time they were acquired provides a certain basis going forward.

It would be better to take out two separate loans, one for the agricultural property and one for other property.

65.25.4 *Commencement of BPR/APR disallowance*

Para 5 Sch 36 FA 2013 provides:

> (2) Section 162B of IHTA 1984 (inserted by paragraph 3) only has effect in relation to liabilities incurred on or after 6 April 2013.
> (3) For the purposes of sub-paragraph (2), where a liability is incurred under an agreement-
> (a) if the agreement was varied so that the liability could be incurred under it, the liability is to be treated as having been incurred on the date of the variation, and
> (b) in any other case, the liability is to be treated as having been incurred on the date the agreement was made.

This is different from the commencement of the other FA 2013 IHT liability changes.

Care must be taken over refinancing pre-2013 loans relating to agricultural/business property, as that will have the effect of disallowing the liability.

Suppose:

(1) A pre-2013 liability is attributable to the acquisition of BPR/APR property which is not UK situate.
(2) The property is excluded property as it is owned by a foreign domiciliary or an excluded property trust.

The liability is not disallowed under the BPR/APR disallowance. However it is disallowed under the excluded property disallowance!

One solution if possible is to make the property UK situate.

If the property is EU situate, the breach of EU law seems clear, and it is considered that the disallowance does not apply.

65.25.5 *Effect on wills*

The new rules may have an effect on existing wills using formulae relating to valuation, or relating to agricultural or business property relief.

65.26 Debt of unincorporated business

Section 110 IHTA provides:

> For the purposes of this Chapter—
>
> (a) the value of a business or of an interest in a business shall be taken to be its net value;
>
> (b) the net value of a business is the value of the assets used in the business (including goodwill) reduced by the aggregate amount of any liabilities incurred for the purposes of the business;
>
> (c) in ascertaining the net value of an interest in a business, no regard shall be had to assets or liabilities other than those by reference to which the net value of the entire business would fall to be ascertained.

In the following discussion, **"business debt"** means a debt incurred for the purposes of an unincorporated business.

The IHT Manual gives an example involving an unsecured business debt:

> **IHTM28020 Restricted deductions: borrowed money used to acquire assets that qualify for business relief** [November 2013]
>
> ...
>
> *Example 1* (Gareth)
>
> G, who runs his own sole trader business, borrows £250,000 to buy property that is to be used in his business. The loan is unsecured and is shown in the accounts as a liability of the business. IHTA84/S162B(1)(b) applies as the liability has been incurred to acquire relevant business assets. Under IHTA84/S162B(2) the liability should be taken to reduce the value of the relevant business assets before that value is reduced by business relief. However in this case the liability has already been reflected in the net value of the business under IHTA84/S110(b), so IHTA84/S162B(2)(b) prevents the liability being deducted twice.

Charging a business debt on non-business assets did not reduce the IHT liability even before 2013. Now the position is reinforced by s.162B.

The IHT Manual provides:

> **IHTM25250 Partnership interests** [Jan 2008]
>
> ... One example of the operation of [s.110(c) concerns a partner's Income Tax liability on his share of the partnership profits. As the partner's tax is not a liability incurred for the purposes of the business, it should not be taken into account in determining the net value of the partnership for the purposes of business relief.

65.27 Property qualifying for BPR and APR

The IHT Manual provides:

> **IHTM28022 Restricted deductions: borrowed money used to acquire assets that qualify for both agricultural and business relief** [November 2013]
> Where an asset qualifies for both agricultural and business relief, IHTA84/S114 (IHTM24151) directs that agricultural relief applies to the agricultural value first, with business relief applying to any excess value over the agricultural value of the asset. So, where the liability exceeds the agricultural value of the asset, there will be no agricultural relief to be deducted against the estate. The balance of the liability should then be set against the non-agricultural value of the asset to arrive at the value of the asset which may qualify for business relief.
> If the liability is more than the open market value of the asset, any excess can be set against any other chargeable assets. If the other chargeable assets qualify for business relief, the balance of the liability must be set against those assets that qualify for business relief before being set against any other assets that are chargeable to tax, subject to the liability meeting the provisions of IHTA84/S175A (IHTM28027).
> *Example* (Leon)
> L borrows £800,000 which he uses to buy a farm which he then farms himself. On L's death the estate is worth £2m, of which the farm is worth £1m with an agricultural value of £750,000.
> The liability of £800,000 was incurred to finance the acquisition of assets that are both relevant business assets and agricultural assets. IHTA84/S114 provides that where both agricultural relief and business relief can apply to the same asset agricultural relief is given in priority to business relief.
> Under IHTA84/S162B(4) the agricultural value of the agricultural property is reduced from £750,000 to nil, leaving no value qualifying for agricultural relief.
> The remaining £50,000 liability is deducted from the £250,000 value of the relevant business property, leaving £200,000 which can qualify for business relief.
> So the value of the estate of £2m is reduced by business relief of £200,000 and, subject to it meeting the provisions of IHTA84/S175A, the liability of £800,000, leaving a chargeable value on death of £1m.

Why does it matter which relief applies?

65.28 Gift of debt-financed business/agricultural property

The IHT Manual provides:

> **IHTM28024 deductions: restricted deductions: transfer of relievable assets where borrowed money is used to acquire assets that qualify for relief** [January 2014]
> Where assets that qualify for relief have been acquired using borrowed funds and the liability has been secured against other chargeable assets, it would still be possible to obtain full relief and the deduction of the liability by:
> - giving away the relievable assets before death, but
> - retaining the liability within the estate.
>
> IHTA/S162B requires that the liability is set against the transfer of relievable assets at the time of the lifetime transfer, and any excess value over the value of the liability would qualify for relief. But at death, the estate would no longer include any relievable assets, so the provisions of IHTA/S162B would not apply and the liability could still be deducted against estate on death under IHTA84/S162(4).

Section 162B IHTA deals with this problem:

> (7) Subject to subsection (8), to the extent that a liability is, in accordance with this section, taken to reduce value in determining the value transferred by a chargeable transfer, that liability is not then to be taken into account in determining the value transferred by any subsequent transfer of value by the same transferor.

The IHT Manual provides:

> To prevent this, IHTA/S162B(7) stipulates that where a liability has already been taken into account to reduce the value transferred by a chargeable transfer, the liability cannot then be taken into account to reduce a subsequent transfer of value made by the same transferor.
> The wording used is important. The liability must reduce the value transferred by a chargeable transfer (a transfer that is immediately chargeable or a failed PET). If the lifetime transfer was a PET and the transferor survives 7 years, the transfer is an exempt transfer; so the liability may still be deducted from the estate on death as it will not have taken into account by an earlier chargeable transfer.
> ...
> *Example* (John)
> J, who has an estate of £3m borrows £1m and uses this to purchase farmland which he then farms for 3 years.
> He then gives the farmland, now worth £1.2m to his daughter who farms

> the land herself, but he retains the liability.
> The individual has made a transfer of value when he gives the farmland to his daughter. The value transferred is the loss to J's estate of £1.2m. IHTA84/S162B(4) has the effect of reducing the £1.2m agricultural value by the amount of the liability to £200,000. This £200,000 value then qualifies for agricultural relief, reducing the value transferred to nil.
> When J dies 2 years later, the £1m liability cannot be taken into account again due to IHTA84/S162B(7). Instead of the chargeable transfer on death being £2m (£3m less the £1m liability), it is £3m with no deduction for the liability.

Care is needed if a parent wishes to give different property to different children.

65.28.1 *Relevant property trusts*

Section 162B IHTA deals with this problem:

> (8) Subsection (7) does not prevent a liability from being taken into account by reason only that the liability has previously been taken into account in determining the amount on which tax is chargeable under section 64.

The IHT Manual provides:

> **IHTM28024 deductions: restricted deductions: transfer of relievable assets where borrowed money is used to acquire assets that qualify for relief** [January 2014]
> ...
> But this limitation does not apply to ten-year charges in view of IHTA84/S162B(8). So, whilst the assets acquired with the liability remain in the trust, the liability can be taken into account at each ten year charge. But once the assets cease to be relevant property, so that the liability is taken in account at the time of the exit charge, then if the liability remains in the trust, IHTA84/S162B(7) will prevent it from being taken into account against any further charges.

65.29 Part payment of liability for exempt & chargeable property

A single debt may be used to finance the acquisition of:
(1) excluded property
(2) UK business or agricultural property
(3) chargeable property
What if the debt is repaid in part? Is the part repaid:
(1) the allowable part (attributable to the chargeable property) or

(2) the non-allowable part (attributable to APR/BPR/excluded property)? Section 162C IHTA provides the answer in the manner most favourable to HMRC:

> (1) This section applies for the purposes of determining the extent to which a liability is attributable as mentioned in
>
> [a] section 162A(1) or (5) [excluded property disallowance]
>
> [b] 162AA(1) [foreign currency bank account disallowance]
>
> [c] or
>
> [b] 162B(1)(b), (3)(b) or (5)(c) [BPR/APR disallowances]
>
> (1A) In a case in which the value of a person's estate immediately before death is to be determined, where a liability was discharged in part before that time—
>
> (a) any part of the liability that, at the time of discharge, was not attributable as mentioned in subsection (1) is, so far as possible, to be taken to have been discharged first,
>
> (b) any part of the liability that, at the time of discharge, was attributable as mentioned in section 162B(1)(b), (3)(b) or (5)(c) is, so far as possible, only to be taken to have been discharged after any part of the liability within paragraph (a) was discharged,
>
> (c) any part of the liability that, at the time of discharge, was attributable as mentioned in section 162AA(1) is, so far as possible, only to be taken to have been discharged after any parts of the liability within paragraph (a) or (b) were discharged, and
>
> (d) any part of the liability that, at the time of discharge, was attributable as mentioned in section 162A(1) or (5) is, so far as possible, only to be taken to have been discharged after any parts of the liability within paragraphs (a) to (c) were discharged.
>
> (2) In any other case, where a liability was discharged in part before the time in relation to which the question as to whether or how to take it into account arises—
>
> (a) any part of the liability that, at the time of discharge, was not attributable as mentioned in section 162A(1) or (5) or 162B(1)(b), (3)(b) or (5)(c) is, so far as possible, to be taken to have been discharged first,
>
> (b) any part of the liability that, at the time of discharge, was attributable as mentioned in section 162B(1)(b), (3)(b) or (6)(c) is, so far as possible, only to be taken to have been discharged after any part of the liability within paragraph (a) was

discharged, and

(c) any part of the liability that, at the time of discharge, was attributable as mentioned in section 162A(1) or (5) is, so far as possible, only to be taken to have been discharged after any parts of the liability within paragraph (a) or (b) were discharged.[68]

The IHT Manual provides:

> **IHTM28025 - Restricted deductions: partial repayment of loan before tax charge arises** [November 2013]
> Where borrowed money has been used to acquire:
> - excluded property (IHTM28014), or
> - assets that have become excluded property (IHTM28018) or
> - relievable assets (IHTM28019)
>
> and the loan has been partially repaid before a charge to tax arises only the balance of the loan will be affected by the provisions of IHTA84/S162A or B, subject to the liability meeting the conditions of IHTA84/S175A (IHTM28027).
> Where borrowed money has been used to acquire both:
> - excluded property (IHTM28014), or
> - assets that have become excluded property (IHTM28018) and
> - relievable assets (IHTM28019)
>
> and the liability has been partially repaid before a charge to tax arises, IHTA84/S162C sets out the order in which the liability is treated as having been discharged. The provisions cover the situation where a single loan has been used to acquire other assets that would be subject to tax as well.
> Any part of the liability that is attributable to assets that are neither excluded nor relievable is treated as having been repaid first, IHTA84/S162C(2)(a). If the partial repayment was greater than that part of the liability, the part of the liability that is attributable to relievable assets is treated as having been repaid next, IHTA84/S162C(2)(b).
> And, if the partial repayment was greater than the part of the liability attributable to both of those two categories of asset, the remainder of the liability must be attributable to excluded property, or assets that have become excluded property, and is treated as being repaid last, IHTA84/S162C(2)(c). So if the balance of the liability outstanding on death can only be attributable to excluded property then, subject to the provisions of IHTA84/S162A (IHTM28014), any deduction for the

68 I set out the section as amended by the FA 2014 with effect from royal assent.

balance of the loan is disallowed.

Example 1

The trustees of an excluded property trust which contains a UK house worth £2m borrow £1.5m which is charged against the property.

£800,000 is used to acquire unlisted UK shares which qualify for business relief and

£700,000 is used to acquire excluded property.

£300,000 of the liability is repaid before the ten year anniversary leaving a liability of £1.2m. At that time the unlisted UK shares are valued at £900,000 and the excluded property is valued at £1m.

Under IHTA84/S162C(2) the liability is treated as having been repaid first on the part of the liability incurred to acquire the unlisted UK shares. As £800,000 of the loan was used for this purpose, the £300,000 that was repaid is treated as having partially discharged this part of the liability - leaving £500,000 as a loan used to acquire the UK shares.

Under IHTA84/S162B(2) the value of the unlisted UK shares that can qualify for business relief is reduced by £500,000 from £900,000 to £400,000. The remaining £700,000 liability that was used to acquire excluded property is disallowed by IHTA84/S162A.

So the value of the UK assets in the trust of £2.9m (the UK house and the unlisted UK shares) is reduced by the part of the debt that was used to acquire the UK shares, £500,000, and business relief of £400,000 to £2m – or the same as the value of the UK assets before any transactions took place. Business relief is allowed against the increase in the value of the UK unlisted shares.

Example 2

The trustees of an excluded property trust which contains a UK house worth £2m borrow £1.5m which is charged against the property. This time the trustees use the £1.5m to acquire

- £900,000 of excluded property,
- £350,000 of assets qualifying for agricultural relief and
- £250,000 of UK listed shares.

£700,000 of the liability is repaid before the ten year anniversary leaving a liability of £800,000. At that time the excluded property is worth £1m, the agricultural assets are worth £400,000 and the UK shares, £300,000.

Under IHTA84/S162C(2) the liability is treated as having been repaid first on the part used to acquire the UK shares. As £250,000 of the liability was used for this purpose, the first £250,000 of the amount discharged reduces the liability which can be deducted from the UK shares to nil.

Of the remaining £450,000 that was repaid, £350,000 was used to acquire agricultural assets which are worth £400,000 at the date of the

ten year anniversary. So, the next £350,000 of the amount repaid reduces the liability which can be taken against the agricultural assets under IHTA84/S162C(2)(b) to nil. As none of the remaining liability can be attributed to acquiring the agricultural assets, the full value of the agricultural assets may qualify for agricultural relief with no restriction under IHTA84/S162B.

The last £100,000 of the liability which has been discharged (£700,000 - (£250,000 + £350,000) = £100,000) is treated as reducing the liability incurred to acquire the excluded property under IHTA84/S162C(2)(c). This reduces that part of liability from £900,000 to £800,000. So the balance of the liability that was not repaid, £800,000 is attributed to the acquisition of excluded property and is disallowed by virtue of IHTA84/S162A.

The value of the UK assets in trust of £2.7m (the UK house, agricultural assets and quoted shares) is reduced by the agricultural relief to £2.3m and none of the liability is allowable.

In effect, the original £2m in the trust, plus the UK shares are now liable to tax. Although this may seem a harsh result given that the shares were acquired through borrowing, without a priority rule, it would be possible to manipulate assets and values to obtain an advantage.

65.30 Payment of disallowed liability

The payment of a disallowed debt is in principle a transfer of value, but relief will in principle be available under s.10 IHTA: there is no equivalent of a s.103(5) deemed PET.[69] A simple course if possible is to repay the borrowing at any time before the death. Repayment reduces the value of the estate, but qualifies for relief under s.10 IHTA 1984. So "deathbed" planning is possible.

65.31 Disallowance of liabilities not paid after death

Section 175A IHTA provides:

(1) In determining the value of a person's estate immediately before death, a liability may be taken into account to the extent that—

(a) it is discharged on or after death,

[i] out of the estate or from excluded property owned by the person immediately before death,

[ii] in money or money's worth, and

(b) it is not otherwise prevented, under any provision of this Act,

69 See 65.6.8 (Section 103(5) deemed PET).

> from being taken into account.
>
> (2) Where the whole or any part of a liability is not discharged in accordance with paragraph (a) of subsection (1), the liability or (as the case may be) the part may only be taken into account for the purpose mentioned in that subsection to the extent that [the commercial reason defence applies].

Subsection (1) is worded as an *allowance* for discharged liabilities: in order to identify the disallowance of undischarged liabilities, one needs to read subsections (1) and (2) together. The wording is convoluted, but it works.

I refer to this rule as the **"disallowance for liabilities not paid after death"**. That is not a short and convenient label, but I cannot think of a better one.

This disallowance only applies on death. It does not apply to lifetime transfers (failed PETs or chargeable transfers) or to 10 year and exit charges on trusts.

A deduction is not allowed if the creditor waives (releases) the debt as that is not a discharge out of the estate. But a deduction is allowed if:

(1) The debt is paid, and

(2) The creditor makes a gift back to the debtor.

This is commercially equivalent to a waiver by the creditor. That arrangement is not avoidance: it makes the practical difference that interest accruing on the debt becomes taxable.

65.31.1 *To the extent that it is discharged ... in money or money's worth*

If a debt for (say) 100 is discharged as to 50% by a payment of 50, then 50% of the debt is allowable.

If the debt is wholly discharged by the transfer of money's worth valued 50, then it would be sensible if only 50% of the debt is allowable; though it requires a purposive reading to reach that result.

65.31.2 *Commencement of disallowance for liabilities not paid after death*

Para 5 Sch 36 FA 2013 provides:

> (1) Subject to sub-paragraph (2),[70] the amendments made by this Schedule have effect in relation to transfers of value made, or treated as

70 This relates to the business/agricultural property disallowance: see 65.24.4 (Commencement of BPR/APR disallowance).

made, on or after the day on which this Act is passed.

So the new rules applies to pre-2013 debts, if the transfer of value (ie the death) is after 17 July 2013. This is an unfair commencement rule as in many cases, including those without any element of tax avoidance, existing liabilities will have been incurred in reliance of the current rules. But there it is.

65.32 Debt discharged "out of the estate"

65.32.1 *The "estate"*

Section 175A IHTA provides:

> (1) In determining the value of a person's estate immediately before death, a liability may be taken into account to the extent that—
>
> (a) it is discharged on or after death,[71]
>
> [i] out of the estate or
>
> [ii] from excluded property owned by the person immediately before death ...

"The estate" in (1)(a)[i] refers back to the "person's estate immediately before death" in the opening words in (1): the deceased's estate.

A liability is paid out of the estate if it is paid out of:

(1) property which was in the estate immediately before death, or
(2) property representing that property: IHT adopts the concept of a continuing fund.

"Estate" has its IHT meaning.[72] It includes in particular:

(1) settled property in which the deceased had an estate interest in possession, and
(2) GWR property.

Such property is treated as part of the deceased's estate immediately before death, and following the individual's death the property is no longer be treated as part of his or her estate. It is considered that does not matter: following the death the deceased has no estate at all. So the discharge of a debt on GWR property out of that property (or property representing such property) will satisfy the requirement.

The IHT Manual provides:

---

71 The words "on or after the death" are otiose.

72 Section 272 IHTA provides: "In this Act, except where the context otherwise requires ... "estate" shall be construed in accordance with sections 5, 55 and 151(4) above".

> **IHTM28030 Liabilities: restricted deductions: meaning of 'out of estate'** [November 2013]
> In determining whether the loan has been discharged out of the estate, the word 'estate' has its normal meaning for Inheritance Tax (IHTM28027); but IHTA84/S175A(1)(a), extends this meaning for the purpose of this provision only to include any excluded property owned by the deceased.[73] It is important here that the excluded property was 'owned' by the deceased, taking the natural meaning of the word 'owned'. Excluded property that is also settled property in which the deceased had an interest is not property 'owned' by the deceased.
> Although the meaning of estate is extended in this way, the normal rule that a liability can only be deducted against assets at the same title applies (IHTM28397). Other than in exceptional circumstances, in reality, assets in the Free Estate are not available to trustees to settle trusts debts.

65.32.2 *Payment out of loan to PRs*

Suppose:

(1) An estate has a debt ("the pre-death liability").
(2) The creditor (or any other person) lends to the PRs, so the estate has a second debt ("the post-death liability").
(3) The PRs use the borrowed funds to pay the pre-death liability.

This is a matter of refinancing. The deduction is allowed even if the post-death liability is then discharged, but not out of the estate. That arrangement is not avoidance: it makes the practical difference that interest accruing on the pre-death liability becomes taxable.

This is important where:

(1) The estate had a pre-death liability.
(2) The deceased took out a life policy to fund repayment, and settled the policy.

If the trustees of the policy repay the pre-death liability (as would have been envisaged when the trust was made) the pre-death liability is not deductible.

The solution is that:

(1) The trustees lend to the PRs.

---

73 This is not strictly correct. Section 175A does not extend the meaning of "estate": it provides that debts may be allowed if paid out of the estate or out of excluded property. But it comes to the same thing.

(2) The PRs repay the debt out of the estate.
(3) The trustees may then waive the post-death liability.

HMRC agree. The IHT Manual provides:

> **IHTM28030 Liabilities: restricted deductions: meaning of 'out of estate'** [November 2013]
> ...
> There may be circumstances where the estate has very little in the way of liquid assets from which to repay a liability so the personal representatives may need to borrow money to actually repay the debts. Where this happens, with the result that the estate is charged with repaying that new debt, you can accept that the liability owed by the deceased has been repaid 'out of' the estate.
> *Example* (Kevin)
> K's estate is valued at £750,000, £700,000 of which is attributable to his home. A mortgage of £100,000 is secured against the house.
> The executors borrow £100,000 to repay the mortgage and secure the new loan on the house, so that the beneficiary receives the property charged with the new debt.
> You may accept that the liability has been discharged out of the estate.
> There is no need to raise any enquiries into the source of funds lent to the executors, including whether or not the beneficiary is the creditor for the new loan. Provided the mortgage has actually been repaid from funds charged against the estate, the deduction may be allowed as this has the same effect as the liability being discharged out of the estate had there been sufficient liquid assets.
> It is possible that the beneficiary[74] may be able to make a loan to the estate from the proceeds of an insurance policy held in trust outside the estate for the purposes of repaying the mortgage. Again, the source of the funds does not matter.

Although this passage refers to an illiquid estate, where the trustees "need" to borrow, the same would apply to a liquid estate (if it mattered).

65.33 Commercial reason defence

Section 175A IHTA provides:

> (2) Where the whole or any part of a liability is not discharged in accordance with paragraph (a) of subsection (1), [ie the liability is not paid out of the estate] the liability or (as the case may be) the part may

74 "The beneficiary" is presumably a slip for the Trustees of the insurance policy.

> only be taken into account for the purpose mentioned in that subsection to the extent that—
>
> (a) there is a real commercial reason for the liability or the part not being discharged,
>
> (b) securing a tax advantage is not the main purpose, or one of the main purposes, of leaving the liability or part undischarged, and
>
> (c) the liability or the part is not otherwise prevented, under any provision of this Act, from being taken into account.

Paras (a)-(c) contain an exception to the general rule that undischarged liabilities are disallowed. I refer to this as **"the commercial reason defence"**. The label is not entirely apt to cover all the requirements of (a) - (c) but no short label could do that.

There is no relief is the debt is discharged, but not out of the estate (even if that is done for commercial reasons).

65.33.1 *Commercial reason*

Section 175A IHTA provides:

> (3) For the purposes of subsection (2)(a) there is a real commercial reason for a liability, or part of a liability, not being discharged where it is shown that—
>
> (a) the liability is to a person dealing at arm's length, or
>
> (b) if the liability were to a person dealing at arm's length, that person would not require the liability to be discharged.

I abbreviate "real commercial reason" to "commercial reason" because "real" does not add anything to the meaning.[75] I refer to the requirements in (a) and (b) as **"commercial reason requirements (a) and (b)"**.

Section 175A(3) is not expressed to be a comprehensive definition of commercial reason. It is suggested that there could be a commercial reason even if commercial reason requirements (a) and (b) are not met; but that would be rare, as those conditions more or less encapsulate the meaning of "commercial" in this context.[76]

At what time does one ask whether commercial requirement (a) is met? A person may be dealing at arm's length at one time and not at another time. At what time does one ask whether commercial requirement (b) is met? It may be that a person (hypothetically) dealing at arm's length

---

75 See 32.17.3 ("Genuine").

76 For further discussion see 32.5 ("Commercial" in Old Condition B).

would require the liability to be discharged at one time but not at another time.

Clearly, one cannot look at the position at the date of the death. It is suggested that one looks at the position at the time that the IHT is due and payable. The due date is normally when probate is applied for. If the commercial reason defence applies at that time, the debt is deductible. Since there is no provision for the possibility that IHT may subsequently fall due, it is suggested that it does not matter what happens later. This view increases the scope of the commercial reason requirements (a) and (b) but that does not matter as the commercial reason defence is still effectively policed by the tax motive rule.

HMRC say:

> 8.8 The 'commercial reason' test will apply at the time the decision is made not to repay the loan.[77]

However it may not be possible to identify that time.

65.33.2 *Tax motive rule*

The second requirement of the commercial reason defence is that:

> (b) securing a tax advantage is not the main purpose, or one of the main purposes, of leaving the liability or part undischarged ...

I refer to this as **"the tax motive rule"**.

Section 175A IHTA defines "tax advantage":

> (5) In subsection (2)(b)—
> "tax advantage" means—
> (a) a relief from tax or increased relief from tax,
> (b) a repayment of tax or increased repayment of tax,
> (c) the avoidance, reduction or delay of a charge to tax or an assessment to tax, or
> (d) the avoidance of a possible assessment to tax or determination in respect of tax.
> (6) In subsection (5) "tax" includes income tax and capital gains tax.

The definition is different from that in the excluded property

---

77 HMRC, "Treatment of liabilities for inheritance tax: HMRC response to comments on Schedule 36 Finance Act 2013" (September 2013) accessible *http://www.tax.org.uk/Resources/CIOT/Documents/2013/09/130905%20IHT%20Liabilities%20-%20HMRC%20response%20note.pdf*

disallowance.[78]

What matters is the purpose for leaving the liability undischarged, not the purpose for creating it. Leaving a liability undischarged is not usually going to avoid IHT. It could avoid IT or CGT.

Again, the legislation is silent as to the time when the main purpose(s) are ascertained. Purpose may vary over time. It is suggested that one looks at the time the IHT is due. But since avoidance need only be one of the purposes, this problem may not often arise.

If one meets all the requirements of the commercial reason defence, then it does not matter if the debt is later waived.

The IHT Manual provides 3 examples.

65.33.3 *HMRC example 1: NRB debt scheme*

Example 1 is a (more or less) standard nil rate band debt scheme.[79]

> **IHTM28029 Restricted deductions: non-repayment of liabilities deducted against the estate on death** [November 2013]
>
> ...
>
> *Example 1* (Harvey and Wendy)
>
> H dies leaving a nil-rate band (NRB) discretionary trust under his Will with the residue of the estate passing to his wife, W.
>
> The trustees of the NRB trust exercise their powers and pass the whole of the H's estate to W in return for her agreeing to repay an amount equal to the NRB (£325,000). Interest is charged on the debt at 3% per annum, compounded annually.[80]
>
> On W's death four years later, interest has increased the liability from £325,000 to £365,790. The liability is not disallowed by any other part of the IHTA, so it can be taken into account to the extent that it is actually repaid out of the estate in money or money's worth under IHTA84/S175A(1)(a).

The HMRC analysis is as follows:

> Provided the whole £365,790 is repaid out of W's estate, the full sum can be deducted from her estate. The interest received by the NRB

---

78 See 65.21.4 (Disallowable reason 1: tax avoidance purpose).

79 On these schemes, see Kessler, *Drafting Trusts & Will Trusts* (12th ed., 2014), para 18.3 (Classic NRB trusts).

80 Under the NRB schemes in practice, the debt is usually index-linked, and index-linking is not interest: see Kessler, *Drafting Trusts & Will Trusts* (11th ed., 2014), appendix 4 (Tax on payment of index-linked nil rate sum).

> trustees will be income of the trust and should be declared for Income Tax purposes.
> If, instead, only £325,000 is discharged from W's estate, that sum can still be deducted from her estate under IHTA84/S175A(1)(a). But there is unlikely to be any commercial purpose to the interest not being repaid as, had the creditor been at arm's length, they would have wanted the interest repaid as well. As a result, the £40,790 of the liability that is not repaid from the estate is not allowed as a deduction against the estate – but equally, the trustees will have no Income Tax liability.

HMRC argue that the commercial reason defence does not apply. They accept if is possible (if unlikely) that commercial requirements (a) or (b) may be met, if that is the case, the tax motive rule disallows the relief:

> Even if it could be shown that the liability incurred by the wife to the NRB trustees was incurred in an arm's length transaction, the provisions of IHTA84/S175A(2)(b) must be considered.

Does the author mean to suggest that the time to assess commercial reason requirement (a) is when the liability is incurred?

> The part of the liability not discharged may not be taken into account if the main purpose, or one of the main purposes, for not repaying the liability was to secure a tax advantage. If the trustees have waived the interest, it would result in the trust receiving less income than it otherwise would. This in turn would lead to a reduced Income Tax liability. A reduction of a charge to Income Tax falls within the definition of a tax advantage in IHTA84/S175A(45), so £40,790 of the liability that is not repaid from the estate is not allowed as a deduction against the estate.

I wonder about that. For basic rate taxpayer beneficiaries, the maximum tax advantage may be saving IT on the interest at 20% or less (allowing for the repayment of the trustees tax credit on a distribution to beneficiaries): is the saving of £8k likely to be a main purpose? Not if the estate is illiquid. The purpose of waiving the loan is to avoid the cost of borrowing.

65.33.4 *HMRC example 2: Loan from family trust on commercial terms*

The next example concerns a loan from a family trust:

> *Example 2* (David)
> D's estate includes a house valued at £800,000. There is a commercial mortgage of £200,000 from a family trust charged against the property.

> D leaves his house to his son, Roger. The trustees[81] are content that the house can be transferred to Roger provided that Roger takes over the mortgage and continues to make the repayments.
> Although the liability has not been repaid, the arrangements are commercial and there is no tax advantage arising from Roger taking over the mortgage, so the liability may be allowed as a deduction against the estate.

How does D "take over" the mortgage? The passage is not drafted by a lawyer. The usual way would be a tripartide agreement between (1) the PRs (2) the lender (3) D, under which:

(1) The lender discharges/releases the debt due from the PRs in consideration for which
(2) D promises to pay a like sum to the lender.

That would not strictly qualify for the commercial reason defence as that only applies if the debt is not discharged. HMRC may not take the point. The safe way to deal with the matter is for D to borrow, lend to the PRs who then repay the lender.

65.33.5 *HMRC example 3: Loan from family member repayable on 2nd death*

> *Example 3* (Adrian)
> A makes of loan of £25,000 to his father to help with living expenses, which is secured on his parent's house. A normal rate of interest is charged, but they agree to allow the interest to be added to capital sum owing. The liability is not to be repaid until after the death of both parents, so when A's father dies, two years later the loan is not repaid.

Of course s.103 FA 1986 may disallow the debt on the death of the father, but we must assume it does not.

The HMRC analysis is as follows:

> Since the loan was not due to be repaid until the death of the survivor, an arm's length creditor would not have any cause to seek repayment, so the liability may be allowed as a deduction against the estate.

More analytically, the commercial reason defence applies.

> On the mother's subsequent death, the liability must be repaid from the estate before it can be allowed as a deduction against the estate. If the accrued interest was not repaid, no deduction should be allowed for that

81 More accurately, PRs or executors; but nothing turns on the terminology.

sum.

It may be different if there is a break clause in the agreement.

> The position may be different if the loan agreement contains a 'break' clause that allows for early repayment. If a favourable rate of interest, or no interest, was charged and the repayment could be demanded after the first death, an arm's length creditor might reasonably be expected to call in the loan to gain a better return from the money. In these circumstances, if the loan is not repaid on the first death, the terms of IHTA84/S175A(2)(a) are unlikely to be met and the liability should be disallowed unless it is repaid, although this may be of limited impact if most of the estate passes to the surviving spouse.

The disallowance for debts not paid after death is irrelevant if the spouse exemption applies. The example may be more important for cohabitees.

65.34 Part payment of liability for exempt & chargeable property

A single debt may be used to finance the acquisition of:
(1) excluded property
(2) business or agricultural property
(3) chargeable property
If the debt is not repaid after death, it will be wholly disallowed. If the debt is wholly repaid after death, it will be (effectively) disallowed to the extent was used to finance excluded or business/agricultural property and allowable to the balance. What if the debt is repaid in part after death? Is the part repaid the allowable or the non-allowable part? Section 175A(7) IHTA provides the answer in the way most favourable to HMRC:

> Where the liability is discharged as mentioned in subsection (1)(a) only in part—
>
> (a) any part of the liability that is attributable as mentioned in section 162A(1) or (5) is, so far possible, taken to be discharged first,
>
> (aa) any part of the liability that is attributable as mentioned in section 162AA(1) is, so far as possible, taken to be discharged only after any part of the liability within paragraph (a) is discharged,
>
> (b) any part of the liability that is attributable as mentioned in section 162B(1)(b), (3)(b) or (5)(c) is, so far as possible, taken to be discharged only after any parts of the liability within paragraph (a) or (aa) are is discharged, and
>
> (c) the liability so far as it is not attributable as mentioned in

> paragraph any of paragraphs (a) to (b) is, so far as possible, taken to be discharged only after any parts of the liability within any of those paragraphs are discharged.[82]

This follows the pattern of the rules for excluded property/APR/BPR.[83] The IHT Manual provides:

> **IHTM28032 Restricted deductions: partial repayment of liabilities after death** [November 2013]
> Where a liability is partially repaid after death only the part of the loan that has been repaid will be allowed as a deduction, unless the balance that has not been repaid meets the conditions of IHTA84/S175A(2), (IHTM28029).
> Where borrowed money has been used to acquire a mixture of excluded property (IHTM28014) and relievable assets (IHTM28019) and the loan has been partially repaid, IHTA84/S175A(7) sets out the priority in which the partial repayment should be allocated against the assets of the estate. The provisions cover the situation where the single loan has been used to acquire other chargeable assets as well.
> Any part of the liability that is attributable to excluded property is treated as being repaid first, IHTA84/S175A(7)(a), with the result that although this part of the liability has been repaid, the deduction is still disallowed under IHTA84/S162A (IHTM28014), unless one of the exceptions is satisfied. If the partial repayment was greater than that part of the liability, the part of the liability that is attributable to relievable property is treated as being repaid next IHTA84/S175C(7)(b), so that this part of the loan is a valid deduction against the estate, but it will reduce the value of the property that can qualify for relief; ultimately reducing the relief to nil.
> And if the partial repayment was greater than the part of the liability attributable to both excluded and relievable property, the remainder of the liability can then be allowed as a deduction against the chargeable estate, IHTA84/S175A(7)(c).

The HMRC example has 3 parts:[84]

> *Example* [1] (Neville)
> N, who is non-UK domiciled, borrows £1.5m from an excluded property trust. He charges the liability against his existing UK chargeable

82 I set out the section as amended by the FA 2014 with effect from royal assent.

83 See 65.28 (Part payment of liability for exempt & chargeable property).

84 I have slightly altered the layout for enhanced clarity.

property worth £2m. He uses the £1.5m to acquire:

excluded property	£600,000
property qualifying for agricultural relief	£500,000
chargeable UK property	£400,000
	£1,500,000

When he dies the whole £1.5m remains outstanding.
The values of the assets have not changed; none of the exceptions to the general rules apply.

The Manual first considers the position if the debt is wholly repaid after death:

Under IHTA84/S162A the £600,000 used to acquire excluded property is disallowed. Under IHTA84/S162B the agricultural value of the agricultural property which can qualify for relief is reduced from £500,000 to nil.
If the liability is discharged in full from the estate after the date of death, the UK assets of £2.9m (UK property, agricultural land and other chargeable property) is reduced by
• the £500,000 liability set against the agricultural property and
• the £400,000 liability used to acquire chargeable UK assets,
leaving £2m in charge.

Example [2]: partial repayment after death

Assume however, that only £750,000 of the liability is discharged from the estate after death.
Under IHTA84/S175A(7)(a) the first £600,000 discharged is taken to have discharged the liability incurred to acquire excluded property. This part of the liability remains disallowed by IHTA84/S162A(1)(a).
Under IHTA84/S175A(7)(b) the next £150,000 is taken to have discharged part of the £500,000 liability incurred to acquire agricultural property. As only £150,000 of this liability is treated as having been discharged, only £150,000 is an allowed as a deduction from the value of the estate on death. This reduces the value of the property that can qualify for agricultural relief to £350,000, and assuming that relief is available, the chargeable value of the property is reduced to nil.
Under IHTA84/S175A, the agricultural property that makes up part of the UK assets of £2.9m is reduced to nil by a mixture of the liability (£150,000) and agricultural relief (£350,000) leaving a chargeable estate of £2.4m

Example [3]: partial repayment after death

Assume now that £1.3m of the liability is discharged from the estate after death.
Under IHTA84/S175A(7)(a) the first £600,000 repaid is taken to have discharged the liability incurred to acquire excluded property. Under

IHTA84/S175A(7)(b) the next £500,000 is taken to have discharged the liability incurred to acquire agricultural property.

As the value of the agricultural property is reduced to nil by deducting the liability, there is no agricultural relief. Under IHTA84/S175A(7)(c) the remaining £200,000 of the liability which has been discharged can be taken into account to reduce the value of the chargeable estate.

The deduction allowable under IHTA84/S175A is therefore £700,000 (£500,000 + £200,000) so the chargeable estate is reduced from £2.9m to £2.2m.

The attribution rule is unfair but it will not bring in any additional revenue to HMRC. In practice, if the issue arose, the PRs would repay the whole debt. If it is anticipated that may not happen, it would be better to take out separate loans, one for each class of property, so the PRs could decide which debt to take out.

65.35 Interaction of disallowance on death and IHT spouse exemption

175A(4) IHTA provides:

> (4) Where, by virtue of this section, a liability is not taken into account in determining the value of a person's estate immediately before death, the liability is also not to be taken into account in determining the extent to which the estate of any spouse or civil partner of the person is increased for the purposes of section 18.

The IHT Manual provides:

> **IHTM28030 Restricted deductions: interaction with spouse or civil partner exemption where liabilities are deducted against the estate on death** [November 2013]
>
> Where a liability is secured on a property that passes to the spouse or civil partner, the value by which the spouse or civil partner's estate is increased (being the net value of the property) could result in a charge arising against property that passes to the spouse or civil partner. This is because if the liability is not repaid, no deduction is allowed against the estate, but the spouse or civil partner's estate is only increased by the net value of the property.
>
> To be clear that spouse or civil partner exemption should continue to apply to the full value of the property that the spouse or civil partner receives, IHTA84/S175A(4) provides that where a liability is not taken into account in determining the value of a person's estate, the liability is also not to be taken into account in determining the extent to which the spouse or civil partner's estate is increased.

That seems misconceived. Section 18(1) IHTA provides:

> A transfer of value is an exempt transfer to the extent that the value transferred

[a] is attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner
[b] or, so far as the value transferred is not so attributable, to the extent that that estate is increased.

It is correct that the spouse's estate is only increased by the net value of the property, which restricts the exemption under [b]. But the IHT spouse exemption would still apply under [a]. If that is right, s.175A(4) is unnecessary, though it does no harm.

Example (James)
J makes of loan of £25,000 to his father to help with living expenses, secured on his parent's £500,000 house. The loan is interest-free and repayable on demand. On the father's death, the loan is not repaid as the son is content for it to remain outstanding until his mother's death. The property passes to his mother under his father's Will. An arm's length creditor would not leave the loan outstanding so the liability cannot be taken into account by virtue of IHTA84/S175A(2)(a). The liability is disallowed as a deduction against the estate so the chargeable value of the house is £500,000 rather than £475,000. But the liability is also not taken into account when considering spouse exemption. So even though the spouse actually receives the £500,000 subject to the £25,000 liability, spouse exemption applies to the full £500,000 value of the property.

If on the same facts the father had left the estate to charity, the debt would be disallowed and the charity exemption restricted to the net value.
J should have purchased a share in the father's house. Then the debt would not be disallowed.

65.36 When must the debt be discharged?

65.36.1 *The strict position*

A liability may be discharged after the time that an IHT account is delivered or after IHT is paid. The strict position is that:
(1) If at the time of payment of the IHT the debt has not been discharged, it is disallowed in computing the amount of IHT due.
(2) If the debt is subsequently discharged, IHT is recomputed if a claim is made under s.241 IHTA; note the 4 year time limit.

PRs cannot obtain probate until tax is paid but often cannot pay liabilities until they have probate. I doubt if the commercial reason defence was specifically designed to cover this (it is more likely that HMRC overlooked the problem) but it seems to me entirely apt to cover it. So the

liability will be deductible as long as there is no tax avoidance purpose.

65.36.2 *HMRC practice*

The IHT Manual provides:

> **IHTM28032 Restricted deductions: investigation of liabilities deducted against the estate on death** [November 2013]
> As the majority of liabilities taken as deductions against an estate will be at arm's length, the starting assumption is that all liabilities will be repaid. So, unless the personal representatives are aware beforehand that a liability is not going to be repaid and it is not otherwise allowable as a deduction, the IHT400 Notes allow the personal representatives to include all the deceased's liabilities when filling in the IHT400. There is no need to make any enquiries to establish that liabilities which are clearly commercial and at arm's length have been repaid, as it is more than likely that the creditor will want to recover the money owed to them. Examples here would be:
> - utility bills,
> - credit card bills,
> - council tax,
> - payments due to HMRC,
> - outstanding care fees,
> - professional fees (to the date of death),
> - overpaid pension,
> - payments for goods and services.
>
> If an arm's length liability for which a deduction is included is not actually repaid, form IHT400 would then be incorrect and the taxpayer is obliged to tell us about the adjustment to be made under IHTA84/S217.

Presumably this should be done when it becomes clear that the liability will not be repaid.

> Where, however, liabilities have been deducted which are not due to arm's length creditors, such as family members, family trusts or companies or liabilities deducted in connection with avoidance schemes, you should ask the taxpayer or agent to provide evidence that the money has been repaid. This might be a copy of the letter enclosing a cheque to the creditor or confirmation of receipt of the payment by the creditor. You should also obtain evidence that the liability has been repaid out of the estate; remembering the extended meaning of estate for this purpose (IHTM28027). This might be a copy of the bank statement from the personal representatives' bank account, or a ledger entry from the

appropriate solicitor's client account.
Where the personal representatives do not repay a liability during the normal administration of the estate and the exception at IHTM28028 does not apply, you should disallow the deduction and ask for the tax to be paid. If the liability is subsequently repaid, the deduction may then be allowed and the tax repaid, provided the claim for repayment is made within the 4 year period set out in IHTA84/S241. But you do not need to keep the file open to wait to see if the liability is repaid...

65.37 The 2013 disallowances: Commentary

The FA 2013 made 3 reforms, the excluded property disallowance; the BRP/APR disallowance; and the disallowance for liabilities not paid after death. They raise distinct issues and need to be considered separately.

65.37.1 *Purpose of disallowance for liabilities not paid after death*

One purpose (perhaps the only purpose) of the disallowance for liabilities not paid after death is to counter arrangements under which:
(1) an inheritance tax deduction is increased, by making a debt subject to interest; but
(2) the interest is not in fact paid, so there is no liability to income tax on it.
The most common cases will be:
(1) NRB discretionary trusts[85] funded by debt or charge arrangements.
(2) Home loan schemes.[86]
NRB trusts have not (usually) been created since 2007, and home loan schemes have not been created since 2004, but many made before then are still in existence.

The disallowance could apply in relation to other loans from family or family trusts, but I think that would be rather less common.

Taxpayers now have the choice between:
(1) IHT (due if the liability is not repaid) or
(2) income tax on interest, (if the liability to pay interest is paid).
That this is the purpose (or at least one purpose) of the disallowance is supported by the definition of "tax" which includes:
(1) IT (the target here is IT avoidance) and

85 See the discussion in the online update of my *Drafting Trusts & Will Trusts* accessible *http://www.kessler.co.uk*.

86 See 76.2.3 (Home loan schemes).

(2) CGT (the target is CGT avoidance, on the basis that the debts may be a secondhand debt, or a debt on a security, within the charge to CGT).[87]

It is possible that HMRC realised that their recent change of view (taking the position that home loan schemes do not work) is not sustainable; and s.175A was partly motivated (or maybe primarily motivated) by the desire to find an effective means of attacking pre-2004 home loan schemes. . Such schemes were avoidance, but the POAT regime offered taxpayers the option of keeping the home loan arrangement in exchange for paying POAT: HMRC have withdrawn from their side of the bargain.

There is a case for disallowing a deduction for interest not paid after the death, but it is difficult to see the case for disallowing other debts ("non-interest debts"). HMRC assert that there is scope for avoidance but I cannot see it. It might perhaps be said that if estate debts are not paid the beneficiaries of the estate have a windfall which may fairly be taxed. The way that the HMRC press release expresses it is that if debts are not repaid there is no "real reduction" in the value of the estate. But if debts are not repaid, there is a gift from the *creditor* to the debtor. That is not a gift which passes on death, so should not be subject to IHT.

Even if there were a case for disallowing non-interest debts (and I cannot see what it could be) there is no case for disallowing debts unless paid *out of the estate*. If I am right that the purpose of the rules is to ensure that IT (or CGT) on pre-death debts is not avoided by non-payment, all that matters is that the interest is paid. It does not matter whether it is paid out of the estate or not.

65.37.2 *Purpose of disallowance of liabilities attributed to excluded property*

HMRC say:

> 5.1 The principle behind disallowing any deduction for a liability which has been incurred to acquire excluded property is that a deduction should only be allowed if the acquired asset is chargeable to IHT. If the acquired asset is excluded property, there is already in effect a deduction for that asset from the value of the estate subject to IHT so HMRC does not believe that any further deduction should be made for the liability.[88]

---

87 See 65.32.2 (Tax motive rule).

88 HMRC, "Treatment of liabilities for inheritance tax: HMRC response to comments on Schedule 36 Finance Act 2013" (September 2013) accessible *http://www.tax.org.uk/Resources/CIOT/Documents/2013/09/130905%20IHT%20*

65.37.3 *Purpose of disallowance of liabilities attributed to BPR/APR property*

HMRC say:

> 2.4 If a liability is incurred to acquire certain business assets or agricultural property and the loan is secured against those assets, the liability is deducted from the value of those assets and only the net value qualifies for relief. However, if the loan is secured on other assets in the estate, the liability is deducted from the value of the estate and relief is also given on the full value of the assets. The resulting tax advantage creates an incentive for loans to be secured against non-business assets, provides a basis for certain types of avoidance schemes, and discriminates against those businesses that borrow and secure the liability against their business assets.
>
> 2.5 The new provisions remove that tax advantage and ensure that all liabilities incurred to acquire property that qualifies for a relief are treated in the same way regardless of the nature of the property or how the loan has been secured. This consistent treatment eliminates the current discrimination, the basis for avoidance, the incentive to structure borrowing in a certain way, and the resulting distortion to borrowing arrangements.
>
> 7.2 The intention of the new proposals is not to prevent or deter individuals from starting a business or investing in one, but to remove the current difference in treatment for different types of qualifying assets and to close avoidance opportunities. HMRC does not believe that the changes will disrupt business activity or that they will prevent a business from securing a loan. The majority of business loans and overdrafts are unsecured or are secured against business assets, and are repaid before death, so most estates that have business liabilities and claim reliefs will be unaffected by the changes. Estates will continue to get a deduction for liabilities provided they are not used to acquire assets which are not chargeable to IHT and they are repaid after death (unless there are commercial reasons for the non-repayment and the non-repayment does not give rise to a tax advantage).
>
> 7.3 Reliefs such as APR and BPR are available so that farms and businesses do not have to be sold or broken up, thereby undermining their economic potential, to meet IHT bills. They are not intended to incentivise loans to be structured or secured in a certain way, so that those arrangements obtain a further tax advantage in addition to the

---

Liabilities%20-%20HMRC%20response%20note.pdf

relief. The Government understands that investment decisions are made on the basis of a variety of factors, and believes that the inheritance tax system should neither penalise nor favour particular borrowing arrangements. The changes introduced by FA2013 are in line with this key principle and remove the current difference in treatment.[89]

65.37.4 *Comparison with non-debt financing*

HMRC say:

> 7.4 Stakeholders also commented that the new provisions will give a different result for those who borrow funds to acquire relievable property compared to those that realise their existing assets, and therefore the new rules will discourage borrowing. If two people invest the same amount in business assets but one sells some of their existing assets to fund the investment and the other borrows the necessary funds, the borrower's taxable estate will be greater than the seller's by the amount of the loan even though both of them have the same investment in the business, net wealth and net equity.
>
> 7.5 Although their overall position appears to be very similar at first glance, it is unlikely to be case in practice. The seller will have had to sell some of their assets to fund the investment, which would constitute an equity investment. They will no longer have access to those assets as they will no longer be in their estate; they will have incurred costs and possibly paid other tax charges as well, such as capital gains tax and/or stamp duty. On the other hand, the borrower can keep and continue to benefit from and enjoy all their assets whilst also investing in the business through securing loan finance. The two have quite different circumstances. HMRC acknowledges that the IHT position will be different for the seller and the borrower as a result of the new provisions, with the equity investment by the seller now more advantageous than a debt financed investment by the borrower from an IHT perspective. However, there is also an inconsistency in the current rules in how liabilities are treated for IHT purposes, which the new provisions address, as explained in paragraphs 2.4 and 7.3. The Government considers that it is more important to ensure that the tax system neither penalises nor encourages particular borrowing arrangements than continuing the previous position of treating

89 HMRC, "Treatment of liabilities for inheritance tax: HMRC response to comments on Schedule 36 Finance Act 2013" (September 2013) accessible *http://www.tax.org.uk/Resources/CIOT/Documents/2013/09/130905%20IHT%20Liabilities%20-%20HMRC%20response%20note.pdf*

investments by borrowers and sellers the same. [90]

65.37.5 *2013 changes to IHT deduction: How it seemed to HMRC*

I quote the press release announcing the 2013 changes at some length as:
(1) It illustrates the current state of UK tax policy formation.
(2) It illustrates the difficulties which may arise if one looks to a press release to identify the policy of tax provisions.

The FA 2013 introduced 3 reforms, but the press release treats all three as if they were a single item of reform.

I insert question marks at the more startling half-truths: no further elaboration is needed.

> **Inheritance tax: limiting the deduction for liabilities**
> **Who is likely to be affected?**
> Users and promoters of avoidance schemes and participators in arrangements which take advantage of the current IHT treatment of liabilities to reduce the value of an estate. (?)
> **General description of the measure**
> For most estates, liabilities owed by the deceased in the normal course of events where the debt has been repaid after death will continue to be deducted as they are now. (?)
> **Policy objective**
> The measure will remove the tax advantage that these schemes and arrangements seek to achieve, and ensure that the value of an estate subject to IHT reflects the normal economic consequences of incurring a liability. (?)
> **Background to the measure**
> The measure is a response to avoidance schemes and arrangements which exploit the current rules that allow a deduction for liabilities owed by the deceased against the value of an estate regardless of whether or not the debt is paid after death. Some arrangements involve contrived debts which are subsequently not repaid so there is no real reduction in the value of the estate; others involve loans used to acquire assets which are not chargeable to IHT, or which qualify for a relief, so that the value of the estate is doubly reduced.
> The measure has not been previously announced. There has been no

90 HMRC, "Treatment of liabilities for inheritance tax: HMRC response to comments on Schedule 36 Finance Act 2013" (September 2013) accessible *http://www.tax.org.uk/Resources/CIOT/Documents/2013/09/130905%20IHT%20Liabilities%20-%20HMRC%20response%20note.pdf*

consultation on the measure.

Summary of impacts[91]

2013-14	2014-15	2015-16	2016-17	2017-18
+5	+20	+15	+15	+15

Impact on individuals and households

This measure will only (?) affect individuals entering into avoidance schemes involving debts to artificially reduce the value of an estate.

The administrative impact of this measure is not on the deceased individual but rather on those acting as executors or administrators of the estate. (?) Personal representatives will need to ensure that any outstanding loans are repaid in order to claim the deduction against the value of the estate.

This measure will affect only a small number of individuals and households (?) as the base of estates that fall within the charge to IHT is fairly small (it is estimated for 2010-11 that there will have been approximately 17,000 estates left on death paying IHT, representing less than 4 per cent of the total). Of the estates left on death a few hundred are likely to be using one of these schemes. (?)

Impact on business including civil society organisations

There is unlikely to be any impact on most businesses because normal commercial debts will be unaffected. (?)[92]

No doubt the press release does not fully represent HMRC's thinking and motivation; every proposal of law reform has to be "sold" to its target audience(s). Subject to that, the principle of Hanlon's razor suggests it should be taken at face value. If this press release is taken as typical, the Court's policy of not having regard to press releases in the construction of statutes, or in the ascertainment of the policy of tax provisions, is a wise one.

65.37.6 *Commentary*

HMRC are wrong to classify the arrangements caught by the provisions as avoidance, or principally avoidance, except in the debased sense that anything one dislikes in tax involves avoidance.

The idea of a disallowance of (effectively) a double deduction is an

91 Author's footnote: These figures seem to me to be a significant underestimate; but that is a matter of impression rather than knowledge or research.

92 HMRC & HM Treasury budget announcement, "Overview of Tax Legislation and Rates" (March 2013) *http://www.hmrc.gov.uk/budget2013/ootlar-main.pdf*.

understandable policy; though so far as the provisions go beyond preventing a double deduction they are difficult to justify; and it is open to question whether the problem justifies the complication of the provisions.

These issues should have been debated before enactment; but in the UK tax system provisions brought in under a tax avoidance banner are exempt from the Tax Consultation Framework; the tax avoidance siren drowns out the sound of reasoned argument, and we are faced with the more familiar process of legislate first and think later. Had the matter been dealt with in accordance with the Tax Consultation Framework, it seems safe to say that different rules would have resulted.

I expect another round of amendments will follow soon.

65.38 Funeral expenses

Funeral expenses are not, strictly, a debt of the deceased, but there is a relief as if they were. Section 172 IHTA provides:

> In determining the value of a person's estate immediately before his death, allowance shall be made for reasonable funeral expenses.

The IHT Manual provides:

> **10376 Overseas funerals of non-domiciled deceased** [April 2010]
> You should allow overseas funeral expenses as a deduction against the UK estate, even if the deceased was not domiciled in the UK for IHT purposes.
> Although s.162(5) IHTA 1984 might seem to justify the deduction of such expenses from the non-UK estate, that sub-section cannot apply as funeral expenses are not a liability for the purposes of s.5 IHTA 1984 or s.162 IHTA 1984.

CHAPTER SIXTY SIX

IHT PLANNING BEFORE AND AFTER A CHANGE OF DOMICILE

66.1 IHT planning in anticipation of acquiring UK domicile

The basic strategy for the foreign domiciliary is to transfer their assets to a trust. If the settlor has a foreign domicile when at the time the trust is made, settled property can be excluded property and will retain that status indefinitely, even if the settlor later become domiciled here. This has been common practice since 1975, and HMRC accept it.

66.1.1 *Time limit*

The opportunity, once missed, cannot be regained so it is desirable to ascertain the exact moment when a UK domicile is acquired. There are three possibilities:

(1) The individual who has decided to make a permanent home in the UK will acquire a UK domicile as soon as they arrive here. Such an individual must carry out the tax planning before setting foot in this country.

(2) The individual who arrives here to take up residence without such an intention will acquire a UK domicile if and when they later form the intention to live here permanently. They must carry out the tax planning before their mind is made up, ie while their long-term intentions remain unclear.

(3) The individual who arrives and remains residing in the UK without deciding to live here permanently will acquire a deemed UK domicile after 15 to 17 years' residence here: see 61.2 (S.267 deemed UK domicile). This is the long-stop deadline for the IHT planning, although limited planning opportunities remain available for the deemed domiciliary: see 61.7 (Tax planning for the deemed domiciliary).

66.1.2 *Form of trust*

A life interest trust will normally be suitable, ie:

(1) income is to be paid to the settlor for life;

(2) subject thereto the trust fund held on discretionary trusts for the benefit of the family of the settlor.

Trust income will belong to the life tenant but (if not UK domiciled) they may mandate the trustees to retain the income and add it to capital. This may be useful to avoid relevant income: see 30.17 (Is income of life tenant relevant income?).

A simple discretionary settlement is a possible alternative.

66.2 IHT planning: Trust with foreign domiciled settlor

There are two general points. The first is to avoid UK situate property, at least at the time when it matters: see 62.23 (IHT planning for individual).

Trust property in a settlement created by a true foreign domiciliary can remain effectively free of IHT so long as the trust continues to exist. The trustees should be reluctant to appoint trust capital to a beneficiary who is or may become UK domiciled; that property may cease to be excluded property. On the contrary, if necessary, steps should be taken to extend its life by exercising powers of appointment or advancement.

If a UK domiciled beneficiary has substantial assets in their own estate then it may be worth adopting a policy of gradually spending their own assets while allowing their trust fund to accumulate or invest for capital growth. It may be attractive for the beneficiary to purchase an income tax efficient annuity.

66.3 Trust with UK domiciled settlor who later acquires foreign domicile

What is the best form of tax planning where a settlor has made a settlement while UK domiciled and later acquires a foreign domicile? If nothing is done the trust property cannot be excluded property.

A good solution is to transfer the trust property back to the settlor. That may be impractical if the settlor is not a beneficiary and commercial or foreign tax or UK CGT considerations make this course unattractive.

In such a case, a second-best but workable solution may be:

(1) the settlor creates a new trust; and

(2) the trustees of the old trust transfer the trust property to the new trust.

See 64.7 (Transfer from trust made by A to another trust made by A).

CHAPTER SIXTY SEVEN

IHT ON DEATH: WILLS AND IOVs

67.1 IHT spouse exemption

Section 18(1) IHTA provides:

> A transfer of value is an exempt transfer to the extent that the value transferred is
> [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner or,
> [b] so far as the value transferred is not so attributable, to the extent that the estate is increased.

I refer to this as "**the IHT spouse exemption**".

67.1.1 *Cross references*

A full discussion of the IHT spouse[1] exemption needs a book to itself. Section 18(3) IHTA and s.56 IHTA contain anti-avoidance provisions which are not discussed because they are not close to the themes of this work, and I have discussed them elsewhere.[2] I deal with other IHT spouse exemption issues as they arise in the context of other topics, see:

73.2 (Restricted IHT spouse exemption for foreign domiciled spouse)
77.3.4 (IHT spouse exemption on death of account holder)
63.10 (GWR spouse exemption); 63.19 (IHT spouse exemption defence to GWR death charge).

---

1 References to spouse, include a civil partner; see App 1.3 ("Spouse" and related expressions) and App 1.4 (Meaning of "civil partner").

2 There is a full discussion on the (almost) identical charity provisions in Kessler & Marre, *Taxation of Charities and Nonprofit Organisations*, (9th ed., 2013), (online version *http://www.taxationofcharities.co.uk*).

67.2 Interaction of IHT spouse exemption and excluded property

Suppose:

(1) H (not UK domiciled) dies leaving an estate which consists of:
   (a) UK property (not excluded property), and
   (b) foreign situate property (which is excluded property).
(2) Part of H's estate passes[3] to H's widow W.

This raises the interesting question of the interaction of the excluded property rules and the IHT spouse exemption. Sections 4 and 5 IHTA provide:

> **4 Transfers on death**
> (1) On the death of any person tax shall be charged as if, immediately before his death, he had made a transfer of value and the value transferred by it had been equal to the value of his estate immediately before his death. ...
> **5 Meaning of estate**
> (1) For the purposes of this Act a person's estate is the aggregate of all the property to which he is beneficially entitled, except that ...
> (b) the estate of a person immediately before his death does not include excluded property...

The following propositions are clear:

(1) IHT is charged as if H made a transfer of value ("the deemed transfer of value").
(2) The estate of H immediately before H's death does not include H's excluded property.
(3) The value transferred by the deemed transfer of value is equal to the value of H's estate (which is the value of the UK situate property).

67.2.1 *Gift of excluded property to spouse*

Suppose that on the death of H only H's foreign situate (excluded) property passes to H's spouse. Does the spouse exemption apply? Section 18(1) IHTA provides:

> A transfer of value is an exempt transfer to the extent that the value transferred is
> [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner or,

3 By will, by survivorship or by the relevant succession law; this makes no difference.

> [b] so far as the value transferred is not so attributable, to the extent that the estate is increased.[4]

The deemed transfer of value is not exempt under s.18(1)[a]. There is "property which becomes comprised in the estate of the spouse". However, the value transferred is not attributable to that property. That leaves the exemption in s.18(1)[b]. A transfer of value is an exempt transfer to the extent that the estate of the spouse is increased. The estate of the spouse is increased on the death of H.[5] It is therefore considered that the spouse exemption does apply on a plain reading of the words.[6] Is this result so absurd that the courts should not adopt a plain reading? I do not see why it should be regarded as absurd. If W is UK domiciled the application of the spouse exemption on the death of H is reasonable, because W's estate is increased and the property W receives will be subject to tax on the death of W. It might be said to be anomalous because a simple lifetime gift of excluded property by H to H's spouse would not be a transfer of value, so it would not qualify as an exempt transfer under the IHT spouse exemption. But of course in such a case the spouse exemption is not needed.[7] If the contrary view were adopted, then the practical consequence should not be to raise more funds for HMRC, but only to pose a trap for taxpayers and their advisors.

67.2.2 *Pecuniary legacy to spouse*

Suppose H leaves W a pecuniary legacy. The IHT Manual provides:

> **11013 Quantifying the exemption** [July 2011]
> ... *Example* ...
> • Where the will of a person domiciled abroad disposes of their UK estate and some or all of their world estate, exemption for pecuniary legacies should be given against the UK estate in the proportion it bears to the worldwide estate, and not against the UK estate alone. Any case where you have difficulty obtaining details of the world estate, or where

---

4 In the case considered here the restriction in s.18(2) does not apply since H (the transferor) is not domiciled in the UK.

5 This is the case even if the property is excluded property in the estate of W (which will be the case if W was not UK domiciled). Excluded property is "property" for IHT and (except immediately before death) a person's estate includes their excluded property.

6 Exemption is given to the extent of the value of the property given to W.

7 The end result is consistent with the exemption for funeral expenses, which are set against UK property alone; see 65.37 (Funeral expenses).

> our official practice meets resistance, should be referred to Technical.

This is correct in relation to charities. The IHT charity exemption is more narrowly worded. But for spouses, it is not consistent with the words of s.18(1)[b]. It is suggested that the spouse exemption applies to the full extent of the pecuniary legacy. It makes no difference whether the pecuniary legacy is subsequently paid out of UK or foreign situate property.

Chapter 3 Part 2 IHTA (Allocation of Exemptions) does not shed much light on the issue. Section 36 IHTA provides that these rules apply where (*inter alia*) s.18 IHTA applies:

> in relation to a transfer of value but the transfer is not wholly exempt …

In the circumstances we are envisaging, the transfer will be "wholly exempt" if the value given to the spouse equals the value of the UK situate property. What happens if the value given to the spouse is less than the value of the UK situate property so the transfer is not wholly exempt? Let us assume that what the spouse receives is a "specific gift" as defined in s.42(1). Section 38(1) IHTA provides that:

> Such part of the value transferred shall be attributable to specific gifts as corresponds to the value of the gifts …

This confirms the view taken above.

67.3 Will drafting: General approach

There has always been considerable scope for tax saving through an appropriately drafted will. On disclosure rules on death, see 87.12 (Reporting on death of foreign domiciled individual).

67.3.1 *UK domiciled testator: Foreign domiciled beneficiaries*

Here the testator should in principle give their estate to beneficiaries absolutely so that the property may qualify as excluded property in their hands. A short-term discretionary will trust within s.144 IHTA is just as good from a tax viewpoint, and allows additional flexibility.

67.3.2 *Foreign domiciled testator: UK domiciled beneficiaries*

From an IHT viewpoint, the will should in principle provide that the estate is held on trust for the beneficiaries so that trust property situated outside the UK will remain excluded property.

67.3.3 *Gift to spouse by will: Foreign domiciled testator, foreign domiciled spouse*

Where a foreign domiciled testator has non-excluded property and excluded property, and the spouse is foreign domiciled so the IHT spouse exemption is fully available, the safe course will be:

(1) to give the non-excluded property to:
   (a) the spouse; or
   (b) a trust where the spouse has an interest in possession (better where the spouse is UK domiciled).
(2) to give excluded property to other persons.

A pecuniary legacy to the spouse should be charged on non-excluded property. Watch the drafting.

This course should avoid a dispute with HMRC. However, it is not necessary.

67.3.4 *Gift to spouse by will: UK domiciled testator and foreign domiciled spouse*

Where a UK domiciled testator has a foreign domiciled spouse, the usual IHT spouse exemption will only apply if the spouse makes the necessary election (ignoring the nil rate band allowance). That may or may not be desirable, depending on the position of the spouse.

The choice for the will lies between a discretionary will trust or an absolute gift to the foreign domiciled spouse. Which is better? If the property is given to the spouse, it is outside the scope of IHT thereafter, so long as it is not UK situate. If the property is given to a will trust, it remains within the scope of IHT, it is not excluded property, as the will trust has a UK domiciled settlor. So at first sight, the absolute gift seems better. Having said that, if property goes into the discretionary will trust and out to the spouse again within two years, the IHT position is just the same as a direct gift: s.144 IHTA 1984. And it may be desired to pass the property to others, perhaps giving it to the next generation (particularly if not UK domiciled). Also when the testator makes the will, one would not usually know the domicile position at the time of the death. If the spouse/civil partner lives long enough, she may become deemed UK domiciled for IHT purposes. All things considered, the discretionary will trust seems the more flexible and safer course for the will, in a routine case. In most cases, the will trust is likely to be wound up within two years. But the only cost is the cost of the deed of appointment.

67.3.5 *Charitable gift by will*

Where a foreign domiciled testator has non-excluded property and excluded property, the correct strategy will be:

(1) Give the non-excluded property to UK charities or EU charities which qualify for UK tax relief.[8]

(2) Give excluded property to other persons.

A pecuniary legacy to the charity should be charged on non-excluded property.

67.4 Instruments of variation ("IOVs")

The IHT Manual provides:

> **35094 Redirection of excluded property** [February 2006]
> Another scheme (see also IHTM35093) where the taxpayers seek to take advantage of the provisions of s.142 IHTA 1984 without there being a bona fide variation is where the estate contains excluded property such as government securities.
> The deceased, domiciled outside the UK, may leave property in this country to chargeable beneficiaries and excluded property to the spouse or civil partner. An IoV may then be used for the spouse's or civil partner's entitlement to be switched from excluded property to the ordinary UK estate without any change in the amount the spouse or civil partner receives.
> You should refer cases of this type immediately above to TG (IHTM01081) without making any preliminary enquiries provided the basic facts are clear.

I do not understand in what sense it could be said that this is not a "bona fide variation".[9] Section 142(5) IHTA expressly envisages an IOV relating to excluded property.

A variation of this kind cannot sensibly be challenged if properly carried out. If the author's view of the spouse exemption is right, however, an IOV would not be necessary. It may nevertheless be desirable as a useful precaution where a will has not been drafted in the manner recommended above.

---

8 See Kessler & Marre, *Taxation of Charities and Nonprofit Organisations* (9th ed., 2013), (online version *http://www.taxationofcharities.co.uk*).

9 It would be different if there was an arrangement under which the spouse later swapped the UK property for the excluded property.

67.5 Forced heirship, legitime & Sharia rights

It sometimes happens that:

(1) A will creates a trust ("the will trust").[10]

(2) A spouse or child ("the beneficiary") has a forced heirship right which may override the trust. Such rights are known as *legitime* in civil law jurisdictions (in Scotland, *legitim*); some jurisdictions apply principles of Sharia law which may also confer such rights.

There are express provisions for legitim in Scotland, which are not discussed here.[11]

The beneficiary's forced heirship right may be an asset for CGT purposes, so that disclaimer or other disposal of the right may give rise to a chargeable gain. A remittance basis taxpayer may not be concerned as the asset is not UK situate, and if a gain is deemed to accrue on a disclaimer of the forced heirship right, the gain cannot be remitted to the UK. Otherwise, the best course (if the beneficiary agrees, and if the foreign law allows) may be that the beneficiary disclaims the forced heirship right by an instrument in writing within two years of the death. The asset will then be ignored for CGT purposes: s.62 TCGA. The CGT analysis in the absence of a variation within s.62 is a difficult topic, not considered here.

Similarly, the beneficiary's forced heirship right might be property for IHT purposes.[12] A foreign domiciled beneficiary would not be concerned as the asset is not UK situate. Otherwise, the best course (if possible) may be that the beneficiary disclaims the forced heirship right by an instrument in writing within two years of the death. The right will then be ignored for IHT purposes: s.142 IHTA.

The testator (not the beneficiary) is the settlor of the will trust for tax purposes, notwithstanding the disclaimer.[13]

The position may be different if under the applicable law the effect of the forced heirship rights is that the will trust is void *ab initio*, so that

---

10 Similar issues arise if the will makes a gift to another beneficiary who transfers the assets to a trust.

11 See Kessler & Grant, *Drafting Trusts & Will Trusts in Scotland* (2013) para 17.5 (Legal rights of legitim).

12 The forced heirship right may constitute a "settlement power" which is not property for IHT purposes.

13 See 80.13 (Disclaimer).

disclaimer is not possible; that would require an investigation into the applicable foreign law, which is not possible here.

CHAPTER SIXTY EIGHT

DOUBLE INHERITANCE TAXATION - INTRODUCTION

68.1 International estate and inheritance taxes

Many states (though by no means all) impose tax on the transfer of wealth occurring on death. These taxes may be divided into two types:

(1) The taxable person may be the deceased or his/her estate.

(2) The taxable persons may be the beneficiaries of the estate (the heirs).

In international tax terminology, type (1) is called an estate tax and type (2) is called an inheritance tax. Under this terminology IHT is strictly an estate tax and its title "inheritance tax" is a misnomer. However no confusion arises as long as one remembers that and I use the term "inheritance taxes" to include both types.

Jurisdiction to charge inheritance tax (as for income tax) is normally based one of two criteria:

(1) personal nexus to the state: domicile, residence or nationality or the deceased or of the beneficiary;

(2) situs of assets (a source rule).

These differing criteria are the cause of double inheritance taxation:

(1) **Residence-source conflict** when

   (a) State A imposes tax on the deceased (estate tax) or the heir (inheritance tax) because of their personal nexus to the state (residence, domicile or nationality),

   (b) State B imposes tax because the assets are situate in that state.

A residence-source conflict will result in the double taxation of the assets situate in state B.

(2) **Residence-residence conflict** when more than one state imposes tax on the same person because of their residence, domicile or nationality. A residence- residence conflict will typically result in double taxation on worldwide assets.

(3) **Source-source conflict** where state A regards an asset as situate in state A and state B regards the asset as situate in state B, because they have different rules determining situs. Here the conflict results in double taxation on the dual situate assets.

For a general discussion of the problems, see Study on Inheritance Taxes in EU Member States and Possible Mechanisms to Resolve Problems of Double Inheritance Taxation in the EU.[1]

68.2 Incorporation of IHT DTAs into UK law

International treaties (including DTAs) do not automatically become part of UK law, but must be incorporated into UK law by statute. Accordingly, s.158(1) IHTA provides:

> If Her Majesty by Order in Council declares—
>
> (a) that arrangements specified in the Order have been made with the government of any territory outside the UK with a view to affording relief from double taxation in relation to capital transfer tax payable under the laws of the UK and any tax imposed under the laws of that territory which is of a similar character or is chargeable on or by reference to death or gifts inter vivos, and
>
> (b) that it is expedient that those arrangements should have effect, the arrangements shall, notwithstanding anything in this Act, have effect
>
> [i] so far as they provide for relief from capital transfer tax, or
>
> [ii] for determining the place where any property is to be treated as situated for the purposes of the tax.

Under s.158(1)[ii] a DTA could in theory *increase* the scope of IHT, by providing that property which is not UK situate on general principles is to be regarded as UK situate. However in practice DTAs do not do this.

68.3 IHT double taxation treaties

In the following four chapters I consider:

(1) the pre-CTT IHT DTAs (India, Pakistan, Italy and France.)

(2) the USA IHT treaty

---

1 Copenhagen Economics, commissioned by the European Commission, Directorate-General for Taxation and Customs Union, Aug 2010. *http://ec.europa.eu/taxation_customs/resources/documents/common/consultations/tax/2010/08/inheritance_taxes_report_2010_08_26_en.pdf*

(3) the Switzerland IHT treaty
(4) foreign IHT credit relief
The UK also has IHT DTAs with Ireland, Netherlands, South Africa and Sweden: I hope to discuss these in future editions.

68.3.1 *The OECD model*

The OECD approved their Estate and Inheritance Draft Model Convention in 1966. This model was revised in 1982 (Model Double Taxation Convention on Estates and Inheritances and on Gifts). It is therefore somewhat outdated.

68.4 EU law aspects and the future

The CJEU have ruled that EU law does not oblige Member States to eliminate double inheritance taxation.[2] However the European Commission are looking at this area. In 2011 the EC stated:

> EU citizens that inherit foreign property are frequently faced with a tax bill from more than one Member State. In fact, in extreme cases the total value of a cross-border inherited asset might even have to be paid in tax, because several Member States may claim taxing rights on the same inheritance or tax foreign inheritances more heavily than local inheritances. Citizens may be forced to sell inherited assets, just to cover the taxes, and small businesses may face transfer difficulties on the death of their owners. To tackle these problems, the Commission today adopted a comprehensive package on inheritance taxation. Through a Communication, Recommendation and Working Paper, the Commission analyses the problems and presents solutions related to cross-border inheritance tax in the EU. ...
> there are two main problems when it comes to cross-border inheritance tax in the EU:
> The first is double or multiple taxation, where more than one Member State claims the right to tax the same inheritance. Divergent national rules, a shortage of bilateral inheritance tax conventions, and inadequate national double tax relief measures can result in citizens being taxed twice or more on the same inheritance. Member States are free to apply national inheritance rules as they see fit once they are in line with EU rules on non-discrimination and free movement. The Commission is not proposing any harmonisation of Member States' inheritance tax rules. Instead it is recommending a broader and more flexible application of

2 Case C-67/08 *Block*.

> national double taxation relief measures so as to provide a pragmatic, speedy and cost-effective solution to the significant tax burdens facing many citizens. The Recommendation in today's Package suggests how Member States could improve existing national measures to ensure that there is adequate double tax relief. It sets out solutions for cases in which several Member States have taxing rights. The Commission invites Member States to introduce the appropriate solutions into national legislation or administrative practices.
>
> The second inheritance tax problem that citizens can encounter is discrimination...[3]
>
> Although cross-border inheritance tax problems may seriously affect individuals, revenues from domestic and cross-border inheritances taxes account for a very small share - less than 0.5% - of total tax revenues in Member States. Cross-border cases alone must account for far less than that figure.
>
> **Next steps**
>
> The Commission will launch discussions with Member States to ensure appropriate follow up to the Recommendation. ... In 3 years time, the Commission will present an evaluation report showing how the situation has evolved, and decide on this basis whether further measures are necessary at national or EU level. ...[4]

A consultation paper was published in April 2014.[5]

Accordingly, some major changes can be expected in this area in a few years time.

CHAPTER SIXTY NINE

IHT DTAs: INDIA, PAKISTAN, ITALY, FRANCE

69.1 IHT double tax treaties: Introduction

In recent times the UK has had three death/gift taxes:
Estate Duty: 1894 - 1974
Capital Transfer Tax: 1974 - 1986
Inheritance Tax: 1986 -

In this chapter I consider the four IHT double tax treaties which were made in the Estate Duty era. I refer to these as "**the India, Pakistan, Italy and France IHT DTAs**"[1] or together as "**the Estate Duty DTAs**". These treaties are important to those who are deemed domiciled in the UK, but treaty-domiciled in India, Pakistan, Italy or France.

I comment only on the UK aspects of the treaties. Foreign law advice will also be needed in any case where a treaty applies. The provisions

---

1 For some reason DTAs do not have short titles. The full titles are:
(1) Agreement between the Government of the United Kingdom and the Government of India for the avoidance of double taxation and the prevention of fiscal evasion with respect to duties on the estates of deceased persons [SI 1956 No. 998]
(2) Agreement between the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of Pakistan for the avoidance of double taxation and the prevention of fiscal evasion with respect to duties on the estates of deceased persons [SI 1957 No. 1522]
(3) Convention between the United Kingdom of Great Britain and Northern Ireland and France for the avoidance of double taxation with respect to duties on the estates of deceased persons [SI 1963 No. 1319]
(4) Convention between the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of the Italian Republic for the avoidance of double taxation and the prevention of fiscal evasion with respect to duties on the estates of deceased persons [SI 1968 No. 304]
Text accessible on *http://www.legislation.gov.uk*

relating to exchange of information are not discussed.

The four Estate Duty DTAs are similar but not identical, and the many small differences can be important. This does make a coherent exposition rather difficult. It is surprising that no standard model form was adopted, but there it is. It does make one appreciate the tremendous value of the OECD model IT/CGT convention.

69.2 Application of Estate Duty DTAs to IHT

India IHT DTA Art. I provides:

> The duties which are the subject of the present Agreement are
> (a) In India, the estate duty imposed under the Estate Duty Act, 1953, and
> (b) In the UK, the estate duty imposed in Great Britain.

The treaty refers to UK estate duty, but it is extended to IHT by s.158(6) IHTA:

> Where arrangements with the government of any territory outside the UK are specified under any Order in Council which—
> (a) was made, or has effect as made, under section 54 of the Finance (No 2) Act 1945 or section 2 of the Finance Act (Northern Ireland) 1946, and
> (b) had effect immediately before the passing of this Act,
> the Order shall, notwithstanding the repeal of that section by the Finance Act 1975 remain in force and have effect as if any provision made by those arrangements in relation to estate duty extended to capital transfer tax[2] chargeable by virtue of section 4 above; ...[3]

The treaty refers to estate duty imposed in Great Britain, it also applies to duty (and IHT) imposed in Northern Ireland.[4]

---

2 The reference to CTT has effect as a reference to IHT: s.100 FA 1986.

3 The Italy treaty adds:
"The present Convention shall also apply to any other duties of a substantially similar character to the duties referred to in para (1) above which may be imposed in Great Britain or Italy subsequently to the date of signature of the present Convention."
This is also in the France and Pakistan DTAs. It is missing from the India treaty but it makes no difference as s.158 does the same work.

4 India IHT DTA Art. X provides: "The present Agreement shall apply in relation to the estate duty imposed in Northern Ireland as it applies in relation to the estate duty in Great Britain, but shall be separately terminable in respect of Northern Ireland by

The Pakistan, Italy and France IHT DTAs are substantially the same: see Arts. I and II of each DTA.

69.3 Interpretation

69.3.1 *Treaty definitions*

Art II(1) India IHT DTA provides some commonsense definitions:

> In the present Agreement, unless the context otherwise requires:—
> (a) The term "India" means all the States and territories comprised in the Union of India;
> (b) The term "United Kingdom" means Great Britain and Northern Ireland;
> (c) The term "Great Britain" means England, Wales and Scotland and does not include the Channel Islands and the Isle of Man;
> (d) The term "territory" when used in relation to one or the other Contracting Government means India or Great Britain, as the context requires;
> (e) The term "duty" means the estate duty imposed in India or the estate duty imposed in Great Britain, as the context requires.

69.3.2 *Undefined terms have domestic law meanings*

Art II(3) India IHT DTA provides:

> In the application of the provisions of the present Agreement by either Contracting Government, any term not otherwise defined shall, unless the context otherwise requires, have the meaning which it has under the law of that Contracting Government relating to duty.

This is (more or less) standard OECD model wording: see 57.11 (Undefined terms have domestic law meanings).

69.4 Treaty IHT exemption

Each treaty provides an IHT exemption in slightly different terms.

India IHT DTA Art. III(3) provides:

> [a] Duty shall not be imposed in Great Britain on the death of a person who was not domiciled at the time of his death in any part of Great Britain but was domiciled in some part of India on any property situated outside Great Britain:

---

the same procedure as is laid down in Article XII." This was because Northern Ireland was from 1921 a separate unit for estate duty purposes.

> [b] Provided that nothing in this paragraph shall prevent the imposition of duty in Great Britain on any property which passes under a disposition or devolution regulated by the law of some part of Great Britain.

Italy IHT DTA Art. V(2) provides:

> Where duty is imposed in the territory of one Contracting Party on the death of a person who at the time of his death was not domiciled in any part of that territory but was domiciled in some part of the territory of the other Contracting Party, no account shall be taken, in determining the amount or rate of such duty, of property situated outside the former territory, provided that this paragraph shall not apply to duty imposed in the territory of a Contracting Party on property passing under a settlement governed by its law.

France IHT DTA Art. V(1) provides:

> Where a person was at the time of his death domiciled in some part of France duty shall not be imposed in Great Britain on any property which neither is situated in Great Britain, nor passes under a disposition or devolution regulated by the law of some part of Great Britain; and, in determining the amount or rate of duty payable in Great Britain, such property shall be disregarded.

I refer to this as "**treaty IHT exemption**".

The exemption applies to duty imposed on a death.[5] That includes the charge which applies on property in the individual's free estate, and property in an estate IIP trust.

It is considered that the exemption also applies to property within the GWR charge on death (assuming the property is not UK situate). Such property does not "pass under a disposition or devolution regulated by the law of some part of Great Britain" since it does not pass under a disposition at all.

Treaty exemption does not apply to property situated in Great Britain, but read literally, it does apply to property situated in Northern Ireland. It is suggested that India IHT DTA Art. X justifies a purposive construction under which references to property situated in Great Britain include property situated in Northern Ireland.

---

5 This is stated expressly in the India, Pakistan and Italy IHT DTAs. In the France IHT DTA it is not stated expressly but is clearly implied.

The Pakistan IHT DTA contains an amusing error. Pakistan DTA Art.V(2) provides:

> Where a person at the time of his death was domiciled in some part of Pakistan and was not domiciled in some part of Great Britain, duty shall not be imposed in Great Britain on any property which for the purposes of duty passes or is deemed to pass on his death unless that property—
>
> (a) is situated in Pakistan [*sic*], or
>
> (b) passes under a disposition or devolution regulated by the law of some part of Great Britain;
>
> and, in determining the amount or rate of duty payable in Great Britain, property not falling within sub-para (a) or (b) shall be disregarded.

There is clearly a typographical error here and the word "Pakistan" in (a) should read "Great Britain".[6] It is considered that the error can be corrected as a matter of construction under the slip rule. HMRC practice (rightly) adopts this view.[7]

69.4.1 *Failed PET*

What about the charge on a lifetime PET which becomes a chargeable transfer because the transferor dies within 7 years, known as a "**failed PET**"? The treaties must be considered separately, since the wording of each treaty IHT exemption varies.

India and Italy IHT DTAs provide exemption from duty *on the death*. In the case of a failed PET, the IHT charge is on the lifetime transfer of

---

6 I am grateful to Simon McKie for drawing this point to my attention. The corresponding mistake is made in Art V(1):

> "Where a person at the time of his death was domiciled in some part of Great Britain and was not domiciled in some part of Pakistan, duty shall not be imposed in Pakistan on any property which for the purposes of duty passes or is deemed to pass on his death unless that property—
>
> (a) is situated in Great Britain [*sic*], or
>
> (b) is settled property of which the deceased was life tenant where the settlor was domiciled in some part of Pakistan at the time that the settlement took effect, or
>
> (c) passes under a devolution regulated by the law of some part of Pakistan and in determining the amount or rate of duty payable in Pakistan, property falling within (a), (b), or (c) shall be disregarded.
>
> and, in determining the amount or rate of duty payable in Great Britain, property not falling within sub-para (a) or (b) shall be disregarded."

In some published versions the error has been corrected, but I am not aware of any authority for that. The original is accessible on *http://www.kessler.co.uk/tfd-archive*.

7 Private correspondence.

value. Strictly, the charge is not "on the death", even though it is only on the occasion of death that the transfer becomes chargeable. However a purposive construction is appropriate. The relief would have applied to the estate duty charge on lifetime gifts within 7 years of death. In substance the charge on failed PETs is a charge on death. This is a strong argument, for treaties are not interpreted strictly or literally. A relief for a charge "on" the death means a relief for a charge which becomes payable *at the time of* the death.[8]

In France, the IHT exemption does seem to apply to a failed PET since the words "on the death" are not present, and the point does not arise.

In Pakistan the case for IHT exemption seems somewhat weaker since it is a very loose construction to say that the charge on a failed PET is a charge on property which "passes or is deemed to pass" on a death (the terminology is from Estate Duty legislation where it had a somewhat technical meaning). Nevertheless the purposive argument is still arguable.

However there is a serious difficulty. Section 158(6) IHTA provides that the treaties have effect only in relation to IHT "chargeable by virtue of s.4 IHTA". The IHT charge on a failed PET is not under s.4, so the treaty does not have effect in relation to that charge. It is considered, therefore, that although the terms of the treaties of France (relatively clearly), India and Italy (reasonably clearly) and Pakistan (arguably) do provide relief for a failed PET, this does not help the taxpayer, because UK domestic law (in breach of the treaty obligations) does not do so.

HMRC take the view that treaty relief does not apply to a PET. This can be inferred from a passage in the IHT Manual:

> **IHTM13024 - Change of Domicile: Deemed Domicile** [November 2013]
> ...domicile does not include deemed domicile...when considering the double taxation agreements (IHTM27161) with France, Italy, India or Pakistan (though where there is a common law domicile in France, Italy, India or Pakistan, IHTA84/S267 can apply to chargeable lifetime transfers).

The conclusion is that there is no treaty relief for a failed PET. This is

---

8 Further support can be found from the area of transferable nil-rate bands. This relief increase the nil-rate band "for the purposes of the charge to tax *on the death* of the survivor"; see s.8A(3) IHTA. HMRC accept that this relief applies to the charge on a failed PET.

odd, perhaps absurd. But the treaties give rise to many other anomalies. There is no relief on ten-year charges on trusts. There is no relief on a lifetime chargeable transfer which is not a PET, such as a straightforward gift to a trust.[9]

69.4.2 *Planning*

This raises tricky planning choices for a person who qualifies for treaty IHT exemption. One strategy is for an elderly individual *not* to make any gifts, to retain property until death. The lifetime gift may be taxable and the death estate tax free. But the risk of that approach is that by the time of the death the treaty may have been repealed. The lifetime gift may be better—if the donor survives seven, or at least three years.

Sometimes one spouse is and the other is not within the scope of the treaty. In that case inter-spouse gifts (or will trusts conferring an IIP on the appropriate spouse) will bring the property within the scope of the treaty.

69.5 Domicile requirements of treaty IHT exemption

Art II(2) India IHT DTA provides:

> For the purposes of the present Agreement, the question whether a deceased person was at the time of his death domiciled in any part of the territory of one of the Contracting Governments shall be determined in accordance with the law in force in that territory.

So the question of whether a person is domiciled in the UK is determined according to UK legal principles, and the question whether a person is domiciled in India is determined on Indian legal principles. This is needed because (on general treaty interpretation principles[10]), in the application of the DTA in the UK, the term domicile would otherwise be given its UK law meaning.

69.5.1 *Individual not UK domiciled*

A requirement for IHT exemption in the India and Pakistan DTAs is that the individual must not be domiciled in the UK (applying UK laws). For this purpose the IHT deemed domicile rules do not apply. Section 267(2) IHTA provides:

---

9 It appears from an incoherent passage in the IHTM para 13024 that HMRC agree.

10 See 69.3.2 (Undefined terms have domestic law meanings).

> Subsection (1) above [deemed domicile rule] ... shall not affect the interpretation of any such provision as is mentioned in section 158(6) above [Estate Duty DTAs].

Similarly, s.267ZA(6) IHTA provides:

> An election under this section is to be ignored—
>
> (a) in interpreting any such provision as is mentioned in section 158(6), and
>
> (b) in determining the effect of any qualifying[11] double taxation relief arrangements in relation to a transfer of value by the person making the election.

The reason is that estate duty had no equivalent of the CTT/IHT deemed domicile rule. The subsequent application of a deemed domicile rule to the Estate Duty DTAs would have raised a number of difficulties.[12] The obvious solution was to keep the treaties free from the deemed domicile rules.

IHT exemption in the Italy IHT DTA also has the requirement that the individual is not domiciled in the UK. However, this treaty has a tie-breaker for an individual who is both domiciled in the UK and treaty-domiciled in Italy. If Italy wins under the tie-breaker, it is clear that the individual is regarded as not UK domiciled. So the requirement to be non-UK domiciled adds nothing.

IHT exemption in the France IHT DTA (which also has a domicile tie-breaker) does not include the requirement that the individual is not domiciled in the UK. Since the Italy IHT DTA (1968) came well after the France IHT DTA (1963) it is strange that the Italy wording did not copy the France one. But there it is.

---

11 Defined in s.267ZA(7) IHTA: "For the purposes of subsection (6)(b) a qualifying double taxation relief arrangement is an arrangement which is specified in an Order in Council made under section 158 before the coming into force of this section (other than by way of amendment by an Order made on or after the coming into force of this section)."

12 It is an interesting question whether it would have been a breach of the treaties. Even if not a technical breach, the treaty countries could reasonably have objected. IHT deemed domiciled individuals would have suffered double taxation.
An alternative would have been to renegotiate existing treaties (introducing new rules at least for treaties which lacked a tie-breaker) but presumably that was thought to be impractical or too much trouble.

69.5.2 *Individual treaty-domiciled in foreign state*

The requirement for IHT exemption in each treaty is that the individual must be domiciled in the foreign state. But "domicile" here has a non-standard meaning so I refer to it as "**treaty-domicile**".

69.5.3 *Treaty-domicile: India*

The question whether one is domiciled in India is governed by the law of India. The law of domicile in India is governed by the Indian Succession Act 1925.[13] See Agrawal, *Private International Law in India* (2010); *Saini v State of Uttarakhand.*[14] That Act sets out statutory rules mostly based on the common law rules, and in *Saini* the Court referred to Halsbury's Laws of England, so it seems that Indian domicile law has not moved from its common law origins. India still applies the common law rule a married woman has the domicile of her husband as a domicile of dependency. However s.11 Indian Succession Act 1925 contains one provision which is not in English law:

> Any person may acquire a domicile in India by making and depositing in some office in India, appointed in this behalf by the State Government, a declaration in writing under his hand of his desire to acquire such domicile; provided that he has been resident in India for one year immediately preceding the time of his making such declaration.[15]

India is a single state for domicile purposes, so a person is domiciled in India, not in any part of India.[16]

69.5.4 *Treaty-domicile: Pakistan*

The Pakistan DTA is differently worded but the same in substance. Pakistan DTA Art. II(2) provides:

---

13 *http://indianchristians.in/news/images/resources/pdf/indian_succession_act_1925.pdf*

14 AIR 2010 Utr 36 *http://www.indiankanoon.org/doc/1650776*

15 This is derived from a UK statute: s.2 Domicile Act 1861. this anticipated conventions with foreign states under which such rules could be mutually agreed. But no conventions were ever concluded, so the Act was a dead letter and finally repealed in 1971.

16 Article III India IHT DTA refers to a person being domiciled "in some part of India" but that may have reflected the position of the Princely States, and French and Portuguese territories, which subsequently became part of a unified India.

> For the purposes of the present Agreement, the question whether a deceased person was at the time of his death domiciled in any part of Great Britain or in any part of Pakistan shall be determined in accordance with the law in force in Great Britain and Pakistan respectively.

Thus the question whether one is domiciled in Pakistan is governed by the law of Pakistan.[17]

69.5.5 *Treaty-domicile: Italy and France*

Italy IHT DTA Art. II(2) repeats the India IHT DTA but goes on to add a tie-breaker clause:

> (a) For the purposes of the present Convention, the question whether a deceased person was domiciled at the time of his death in any part of the territory of one of the Contracting Parties shall be determined in accordance with the law in force in that territory.
> (b) Where by reason of the provisions of the preceding paragraph a deceased person is deemed to be domiciled in the territory of each of the Contracting Parties, then this case shall be solved in accordance with the following rules:
> (i) he shall be deemed to be domiciled in the territory of the Contracting Party in which he had a permanent home available to him at the time of his death; if he had a permanent home available to him in the territory of each of the Contracting Parties he shall be deemed to be domiciled in the territory of the Contracting Party with which his personal and economic relations were closest (centre of vital interests);

It is not often necessary to look beyond this point but, for completeness, the DTA continues.

> (ii) if the Contracting Party in whose territory he had his centre of vital interests cannot be determined, or if he had not a permanent home available to him in the territory of either Contracting Party, he shall be deemed to be domiciled in the territory of the Contracting Party

---

17 *Dymond's Death Duties* (15th ed., 1973) states:

> "The Indian (and Pakistan) law (contained in the [Indian] Succession Act 1925) is basically similar to British law but somewhat less stringent in its requirements, ie. the conception of 'domicile' is a little nearer to that of 'residence'."

I would be grateful to any reader who could supply further information about the position under Pakistani law.

in which he had an habitual abode;

(iii) if he had an habitual abode in the territory of each of the Contracting Parties, or in the territory of neither, he shall be deemed to be domiciled in that of which he was a national;

(iv) if he was a national of both territories or of neither of them, the taxation authorities of the Contracting Parties shall determine the question by mutual agreement.

The tie-breaker wording follows the tie-breaker in the OECD Model Convention definition of residence, Art. 4(2) and reference should be made to the OECD Commentary.[18] France is the same as Italy: France IHT DTA Art. II(3). A key question is what is required for a person to be domiciled in Italy under Italian law.

69.6 Treaty-situs

The next requirement of treaty IHT exemption is that the property must not be situate in the UK. For this purpose the DTAs contain situs rules. It is therefore necessary to distinguish between ordinary IHT situs and what I shall call "**treaty-situs**". The rules are those recommended in a report on Double Taxation prepared for the League of Nations in 1923 by Professors Bruins and Seligman and our own Sir Josiah (later, Lord) Stamp, and the report is worth reading as it give the background. Some of the rules repeat the usual IHT situs rules and others are different.

69.6.1 *Treaty-situs: India, Pakistan, Italy*

India IHT DTA Art. IV(1) provides:

> Subject to para (2) of this Article, where a person was at the time of his death domiciled in any part of the territory of one of the Contracting Governments, ...

This is the case we are considering.

> ... the situs of any property *which for the purposes of duty passes or is deemed to pass on his death* shall, for the purposes of the imposition of duty and of the credit to be allowed under Art. VI, be determined exclusively in accordance with the rules in Art. V of the present Agreement.

However there is a condition in Art. IV(2):

---

18 See 6.8 (Tie-breaker tests for individuals).

> Para (1) of this Article shall apply if, and only if, apart from the said Art. V—
>
> (a) duty would be imposed on the property under the law of each of the Contracting Governments; or
>
> (b) duty would be imposed on the property under the law of one of the Contracting Governments and would, but for some specific exemption, also be imposed thereon under the law of the other Contracting Government.

This condition will never be satisfied under the Indian treaty, since estate duty in India was repealed in 1985. (Significantly, about the same time, the Thatcher Government was drawing the teeth of CTT, though the UK did not follow India all the way to abolition.) So the treaty-situs rules in the India IHT DTA will never apply.

Pakistan is the same: Pakistan IHT DTA Art. III. Pakistan's estate duty was abolished in 1979. One wonders why these treaties have survived, more than three decades after losing their *raison d'être.*

Italy and France are substantially the same.[19] They omit the phrase italicised above, but those words add nothing.

The Italy treaty-situs rules ceased to apply in 2001 because Italy abolished its succession duty and estate duty (*imposta sull'asse ereditario globale*) – a Berlusconi reform. However, in November 2006 the Prodi Government reintroduced a succession tax.

69.6.2 *Treaty-situs: France and Italy*

France retains its duty on successions on death, so the treaty-situs rules are relevant. I here set out the rules in the French Treaty Art. 4 highlighting in italic those significantly different from IHT-situs:

> The rules referred to in paragraph 1 of Article III are:
>
> (a) land shall be deemed to be situated at the place where it is located; rights or interests (otherwise than by way of security) which constitute immovable property shall be deemed to be situated at the place where the land to which they relate is located; the question whether rights or interests constitute immovable property shall be determined in accordance with the law of the place where the land to which they relate is located;
>
> (b) tangible movable property (other than such property for which specific provision is hereinafter made) and rights or interests (otherwise than by way

19 Italy IHT DTA Art. III.

of security) therein shall be deemed to be situated at the place where it is located at the time of the deceased person's death or, *if in transitu, at the place of destination*; and bank or currency notes or other forms of currency recognised as legal tender in the place of issue shall be treated as tangible movable property for the purpose of this subparagraph;

(c) *debts, secured or unsecured, excluding those for which specific provision is made in this Article, but including debentures and debenture stock issued by a company, bills of exchange, promissory notes and cheques shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(d) *securities issued by any government, county council, département, municipality or other public authority shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(e) *shares or stock in a company (including any such property held by a nominee, whether the beneficial ownership is evidenced by scrip certificates or otherwise) shall be deemed to be situated at the place where the company was incorporated*;

(f) *moneys payable under a policy of assurance or insurance shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(g) an interest in a partnership, which term includes a société en nom collectif, a société en commandite simple *and a société civile* under French law, shall be deemed to be situated at the place where the business is principally carried on; *and in the case of a société civile immobilière this shall be where the land developed in accordance with the objects of the société is located*;

(h) goodwill as a trade, business or professional asset shall be deemed to be situated at the place where the trade, business or profession to which it pertains is carried on;

(i) ships and aircraft and shares thereof shall be deemed to be situated at the place of registration of the ship or aircraft;

(j) *patents, trade marks, designs, copyright, and rights or licences to use any patent, trade mark, design or copyrighted material shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(k) *rights or causes of action ex-delicto*[20] *surviving for the benefit of the estate of a deceased person shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(l) *judgment debts shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(m) *any other right or interest shall be deemed to be situated at the place determined by the law in force in the territory of the Contracting Party where the deceased person was not domiciled at the date of his death*.

---

20 ie torts, not contractual rights.

69.7 Proper law

Treaty IHT exemption in India, Pakistan and France does not apply to property which passes under a disposition or devolution regulated by the law of some part of Great Britain.

Italy is not quite the same. The restriction is that the exemption does not apply to property passing under a *settlement* with a UK law (so the exemption could apply in Italy to property passing under a UK law will, but not elsewhere).

This follows estate duty principles, where the territorial limits of the tax depended partly on domicile and situs (as IHT) but also on whether the proper law of the disposition or devolution under which the property passes was a law of the UK. The requirement is not appropriate for the IHT regime, but logic is not to be expected when Estate Duty treaties are left unamended to apply to IHT.

This is a complex topic, with many cases to consider. The starting point is *Philipson-Stow v IRC* [1961] AC 727 where a testator domiciled in England left a will governed by English law. The estate included land in South Africa. The land passed under a disposition regulated by the law of South Africa, both on the death of the testator and on the death of a life tenant many years later (the trust having retained the land).[21]

Where relief is lost because an English law will applies, the problem could in principle be resolved by an IoV, though the drafting would require some care.

69.8 Transferable nil-rate bands and IHT DT reliefs[22]

Section 8A(1) IHTA provides:

> This section applies where—
>
> (a) immediately before the death of a person (a "deceased person"), the deceased person had a spouse or civil partner ("the survivor"), and
>
> (b) the deceased person had unused nil-rate band on death.

---

21 For further discussion, see the scholarly Dymond's Death Duties, (15th ed., 1973) pp 1286–1312 and Parkinson, "A disposition or devolution regulated by the law of some part of Great Britain: the Proviso to the Limitation of Taxing Rights in the IHT Treaties with France, India and Pakistan" [2011] PCB 126.

22 For other issues relating to transferrable nil-rate bands, see 73.5 (Transferable nil-rate band).

Section 8A(2) IHTA defines "unused nil-rate band on death":

> A person has unused nil-rate band on death if M > VT where—
> M is the maximum amount that could be transferred by a chargeable transfer made (under section 4 above) on the person's death if it were to be wholly chargeable to tax at the rate of nil per cent. (assuming, if necessary, that the value of the person's estate were sufficient but otherwise having regard to the circumstances of the person); and
> VT is the value actually transferred by the chargeable transfer so made (or nil if no chargeable transfer is so made).

The amount of the unused nil-rate band depends on the amount of the chargeable transfer on the death of the first spouse. If there is no chargeable transfer, the full nil-rate band is unused and is transferrable.[23]

If there would be a chargeable transfer (but for IHT DT relief) does DTA (if applicable) make the transfer non-chargeable, so as to restore the unused nil-rate band? The IHTM para 43025 provides:

> **Transferable Nil Rate Band: interaction of ability to transfer unused nil rate band with double taxation agreements, double taxation relief and successive charges relief** [October 2009]
> The extent to which an estate is chargeable to tax may be governed by a double taxation agreement [IHTM27161], or a liability to tax may be reduced to nil by double taxation relief [IHTM27181] or successive charges relief [IHTM22041].
> [1] Where, under the terms of a double taxation agreement, an asset is not subject to tax, then if this means that the chargeable estate is below the nil rate band, the amount unused is available for transfer.
> [2] However, where there is a liability to tax that is reduced to nil by either double taxation relief or successive charges relief, the nil rate band remains fully used. We do not repay any "excess" relief and there is no provision to convert "excess" relief into unused nil rate band.

Unilateral IHT credit relief takes the form of a credit against IHT. It falls within [2]. Where that relief applies there is still a chargeable transfer so that transferrable NRB relief does not become available.

The India France and Pakistan IHT DTAs provide that "duty shall not be imposed" on certain property. The USA DTA provides that certain property "shall not be taxable" in the UK. These reliefs fall within [1]. It is not obvious that this prevents there being a chargeable transfer but it

23 S.8A(3)(4) IHTA.

might be said to follow from a commonsense reading. Treaties are not to be construed technically. HMRC read the legislation in this way, so that the transferable nil rate band is available to the surviving spouse.

The Italy IHT DTA provides that "No account shall be taken, in determining the amount or rate of duty" on death, in relation to certain property. It is considered that the effect is the same as the other Estate Duty DTAs.

69.9 Claims for treaty IHT exemption

A claim is required for foreign IHT credit relief or for a refund of tax.[24] There is no requirement to make a formal claim for treaty IHT exemption. However if an IHT account is in principle required on a death,[25] a treaty saying that tax "shall not be imposed" or property "shall not be taxable" (as most of the Estate Duty DTAs or the USA IHT DTA) does not override this requirement. The same applies to the differently worded exemption in the Italy IHT DTA ("no account shall be taken in determining the amount or rate of duty...").

Similarly, for an individual who is IHT deemed domiciled, the US treaty does not override the duty to disclose a lifetime chargeable transfer or the making of a non-resident settlement.[26]

So the usual returns should be made with a claim for DT relief.

69.10 Deductions for purposes of DTAs

Article V(1) Italy IHT DTA provides:

> In determining the amount on which duty is to be computed, permitted deductions shall be allowed in accordance with the law in force in the territory in which the duty is imposed.

This seems unnecessary. Perhaps there were Estate Duty or foreign law reasons for it? I would be grateful to any reader who could explain.

There is, or at least there was, a rule of Belgian tax law which disallowed a deduction for charges on Belgium property owned by a non-resident.[27] Maybe the provision was intended to undo discrimination of that kind?

---

24 See 72.9 (Claims for foreign IHT credit relief).

25 See 87.12 (Reporting on death of foreign domiciled individual).

26 See 87.11 (IHT reporting requirement on creation of settlement).

27 In *Eckelkamp* Case C-11/07 the rule was held to breach of EU free movement of capital.

But the wording is not quite apt for that.

Identical wording is found in the Pakistan Treaty art 5(3) and also in some post-CTT DTAs, eg USA IHT art.8(1). There is no equivalent in other treaties but the omission does not matter.

CHAPTER SEVENTY

IHT DTA: USA

70.1 USA IHT treaty: Introduction

This chapter considers the USA IHT Treaty.[1]

For some reason DTAs do not have short titles. I use the expression "**USA IHT DTA**" (or, for short, just DTA) to refer to the DTA dated 19 October 1978 officially called "the Convention between the Government of the USA and the Government of the UK for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on estates of deceased persons and on gifts".

I comment only on the UK aspects of the treaty. US law advice will be needed in any case where the treaty applies.

70.1.1 *Cross references*

Issues and wording which the USA IHT DTA has in common with other treaties are discussed elsewhere. See:

69.8 (Transferable nil rate bands and IHT DT reliefs)
69.9 (Claims for treaty IHT exemption)
69.10 (Deductions for purposes of DTAs)
72.8 (USA DTA: Credit for foreign IHT)
72.9 (Claims for foreign IHT credit relief).

70.2 Scope

Article 1 USA IHT DTA provides:

> This Convention shall apply to any person who is within the scope of a tax which is the subject of this Convention.

Thus the DTA applies to trustees as well as to individuals, even if the

---

1 The text is accessible on *http://uniset.ca/misc/us-uk_esttax.html*

trustees are not themselves USA treaty-domiciled.

70.3 Taxes covered

Article 2 USA IHT DTA provides:

> (1) The existing taxes to which this Convention shall apply are:
> (a) in the US: the Federal gift tax and the Federal estate tax, including the tax on generation-skipping transfers; and
> (b) in the UK: the capital transfer tax.
> (2) This Convention shall also apply to any identical or substantially similar taxes which are imposed by a Contracting State after the date of signature of the Convention in addition to, or in place of, the existing taxes. The competent authorities of the Contracting States shall notify each other of any changes which have been made in their respective taxation laws.

The DTA applies to IHT which is "substantially similar" to CTT. (Also see s.100 FA 1986 which provides that references to CTT have effect as a reference to IHT.)

70.3.1 *"Tax"*

Article 3(f) USA IHT DTA provides:

> the term "tax" means:
> (i) the Federal gift tax or the Federal estate tax, including the tax on generation-skipping transfers, imposed in the US, or
> (ii) the capital transfer tax imposed in the UK, or
> (iii) any other tax imposed by a Contracting State to which this Convention applies by virtue of the provisions of para (2) of Article 2, as the context requires.

70.4 Definitions

The DTA provides commonsense definitions of the following terms, which are not set out here: US; UK; Enterprise; Competent Authority; Contracting State.

Article 3(2) USA IHT DTA gives terms not otherwise defined their domestic law meanings, following the OECD model wording and commentary, as it stood at the time of the DTA. See 57.11 (Undefined terms have domestic law meanings).

70.4.1 *"National"*

Article 3(e) USA IHT DTA provides:

the term "nationals" means:

(i) in relation to the US, US citizens, and

(ii) in relation to the UK any citizen of the UK and Colonies, or any British subject not possessing that citizenship or the citizenship of any other Commonwealth country or territory, provided in either case he had the right of abode in the UK at the time of the death or a transfer.

70.4.2 *"Decedent"*

The DTA uses the term "decedent" which is an Americanism for "deceased".

70.5 Treaty-domicile

For present purposes there are three types of domicile:

(1) domicile in the ordinary UK law sense (**"UK-law domicile"**)

(2) deemed UK domicile for IHT (**"deemed UK domicile"**)

(3) domicile for the purposes of the treaty (**"treaty-domicile"**)

The definition of treaty-domicile is distinctly non-standard. Article 4(1) USA IHT DTA provides:

> For the purposes of this Convention an individual was domiciled:
>
> (a) in the US:
>
> [i] if he was a resident (domiciliary) thereof or
>
> [ii] if he was a national thereof and had been a resident (domiciliary) thereof at any time during the preceding three years

The definition of "resident (domiciliary)" is crucial: this is a matter of USA law.[2]

Article 4(1) USA IHT DTA provides:

> For the purposes of this Convention an individual was domiciled: ...
>
> (b) in the UK:
>
> [i] if he was domiciled in the UK in accordance with the law of the UK [ie if UK-law domiciled]
>
> [ii] or is treated as so domiciled for the purpose of a tax which is the subject of this Convention [i.e. if deemed UK domiciled].

---

2 The term "resident" for estate tax is defined in Treasury Reg: 20.0-1(b). For gift tax see Treasury Reg: 25.2501-1(b).

Next come a series of tie-breakers to deal with persons who under Art 4(1)(a)(b) would be treaty-domiciled in both jurisdictions:

> (2) Where by reason of the provisions of para (1) an individual was at any time domiciled in both Contracting States, and
>
> (a) was a national of the UK but not of the US, and
>
> (b) had not been resident in the US for Federal income tax purposes in seven or more of the ten taxable years ending with the year in which that time falls,
>
> he shall be deemed to be domiciled in the UK at that time.
>
> (3) Where by reason of the provisions of para (1) an individual was at any time domiciled in both Contracting States, and
>
> (a) was a national of the US but not of the UK, and
>
> (b) had not been resident in the UK in seven or more of the ten income tax years of assessment ending with the year in which that time falls,
>
> he shall be deemed to be domiciled in the US at that time.
>
> For the purposes of this paragraph, the question of whether a person was so resident shall be determined as for income tax purposes but without regard to any dwelling-house available to him in the UK for his use.

The last sentence is based on wording formerly in the s.267 deemed domicile rule, see 61.2.5 (Meaning of "residence" for 17-year residence rule).

Where these tie-breakers fail to break the tie, we turn to Art. 4(4):

> Where by reason of the provisions of para (1) an individual was domiciled in both Contracting States, then, subject to the provisions of paras (2) and (3), his status shall be determined as follows:
>
> (a) the individual shall be deemed to be domiciled in the Contracting State in which he had a permanent home available to him. If he had a permanent home available to him in both Contracting States, or in neither Contracting State, he shall be deemed to be domiciled in the Contracting State with which his personal and economic relations were closest (centre of vital interests);
>
> (b) if the Contracting State in which the individual's centre of vital interests was located cannot be determined, he shall be deemed to be domiciled in the Contracting State in which he had an habitual abode;
>
> (c) if the individual had an habitual abode in both Contracting States or in neither of them, he shall be deemed to be domiciled in the Contracting State of which he was a national; and

(d) if the individual was a national of both Contracting States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

This is the standard OECD Model wording: see 6.8 (Tie-breaker tests for individuals).

70.5.1 *Resident of possession of the US*

Article 5(5) USA IHT DTA relates to nationality and treaty-domicile:

> An individual who was a resident (domiciliary) of a possession of the US and who became a citizen of the US solely by reason of his
> (a) being a citizen of such possession, or
> (b) birth or residence within such possession,
> shall be considered as neither domiciled in nor a national of the US for the purposes of this Convention.

US Revenue Ruling 87-95 lists the following as possessions of the United States: American Samoa, Baker Island, Guam, Howland Island, Jarvis Island, Johnston Island, Kingman Reef, Midway Islands, Northern Mariana Islands, Palmyra, Puerto Rico, Virgin Islands and Wake Islands.

I understand that these are mainly uninhabited islands so few (if any) individuals are affected by this provision.

70.6 IHT exemptions for individuals

Article 5 USA IHT DTA provides two exemptions for individuals. Article 5(1) provides:

> (a) [i] Subject to the provisions of Articles 6 (Immovable Property (Real Property)) and 7 (Business Property of a Permanent Establishment and Assets Pertaining to a Fixed Base Used for the Performance of Independent Personal Services) and the following paragraphs of this Article,
> [ii] if the decedent or transferor was domiciled in one of the Contracting States at the time of the death or transfer, property shall not be taxable in the other State.
> (b) Sub-para (a) shall not apply if at the time of the death or transfer the decedent or transferor was a national of that other State.

This can confer IHT exemption. To qualify for IHT exemption under Art. 5(1) the individual must be:

(1) treaty-domiciled in the USA and
(2) not a UK national.

Article 5(2) USA IHT DTA provides:

> Subject to the provisions of the said Articles 6 and 7, if at the time of the death or transfer the decedent or transferor
> [a] was domiciled in neither Contracting State and
> [b] was a national of one Contracting State (but not of both),
> property which is taxable in the Contracting State of which he was a national shall not be taxable in the other Contracting State.

Can this confer IHT exemption? In order to need and qualify for IHT exemption under art. 5(2):

(1) the individual must be:
   (a) treaty-domiciled in neither state (so in particular not UK domiciled or IHT deemed domiciled) and
   (b) a US national and not a UK national
(2) property must be taxable in the UK (or no relief is needed) so it must be UK situate.
(3) the property must be taxable in the USA.

This is just possible. Condition (1) is possible because a US national is not necessarily treaty-domiciled in the USA. If such an individual held UK situate property, it would be exempt from IHT under Art. 5(2) provided it was taxable in the USA. In practice though this will be rare.

These two exemptions applies to charges on death and on lifetime gifts. The exemptions even apply to UK situate property (so long as the property is not land or a permanent establishment).

70.7 IHT exemption for trusts

Article 5(4) USA IHT DTA provides:

> [a] Paras (1) and (2) shall not apply in the UK to property comprised in a settlement;
> [b] but, subject to the provisions of the said Articles 6[3] and 7[4], tax shall not be imposed in the UK on such property if at the time when the settlement was made the settlor was domiciled in the US and was not a national of the UK.

Article 5(4)[b] provides exemption from:

(1) IHT 10 year and exit charges.

---

3 See 70.10 (Immovable property).

4 See 70.11 (Business property).

(2) The charge on the death of an individual with an estate IIP.
(3) GWR lifetime and death charges.

To qualify for IHT exemption under Art. 5(4) the settlor must at the relevant time be:

(1) treaty-domiciled in the USA and
(2) not a UK national.

The exemption applies even to UK situate assets (so long as the asset is not land or a permanent establishment).

It is an interesting question whether a common form grantor trust is a settlement for this purpose: it is (I think) a settlement for US purposes but not for IHT purposes.[5] It is also an interesting question whether or to what extent UK rules determining when a settlement is made (and who is the settlor) apply for the purposes of this relief. Subject to context, UK courts should apply the UK rules. But the best interpretation is that which gives effect to the object of avoiding double taxation without giving rise to double non-taxation.

70.8 Requirement to pay foreign tax

Article 5(5) USA IHT DTA provides:

> If by reason of the preceding paragraphs of this Article
> [a] any property would be taxable only in one Contracting State and
> [b] tax, though chargeable, is not paid (otherwise than as a result of a specific exemption, deduction, exclusion, credit or allowance) in that State,
> tax may be imposed by reference to that property in the other Contracting State notwithstanding those paragraphs.

The IHT Manual provides:

> **27177. Certification of disclosure and tax enforcement procedure with the USA** [January 2014]
> Before we give up our rights to tax property in accordance with Article 5(1) of the DTC with the USA, we need the US authorities to certify that
> - the assets have been disclosed to them and
> - any tax due has been paid or will be enforced.
>
> This is because Article 5(5) of the DTC allows us to tax the property if the USA is unable to enforce its right to tax. HMRC needs to give a similar certificate if Article 5(1) of the DTC requires the US authorities to give up their right to tax property.

5 See 84.6 (American revocable trusts (grantor trust)).

Until we have a form 742 from the US authorities certifying that the property has been disclosed and that tax has been paid or will be enforced, you should be not close any case where:

Article 5(1) operates to exclude some UK property from the charge to IHT, and

the case would be taxpaying without that exclusion.

You should explain this requirement to the taxpayer and send them two prints of Form 742. You should draw their attention to the paragraphs of the form that they must complete. Where the UK is giving up its taxing rights under the convention, only para 1 applies and paras 2 to 7 are not appropriate. You can close your case when you have received a form that is correctly completed and certified. Refer the case to Technical if there are any errors or any problems arise.

Where the USA gives up the right to tax property under Article 5(1), the US authorities will send two copies of US form 706 CE to us to certify.

Once you have checked the forms (you must not mark them in any way) you should send them to Technical together with the file and a note of any errors or omissions. Technical will then issue the appropriate certificate.

70.9 Dual-situate assets

Article 5(6) USA IHT DTA provides:

If at the time of the death or transfer

[a] the decedent or transferor was domiciled in neither Contracting State and

[b] each State would regard any property as situated in its territory and

[c] in consequence tax would be imposed in both States,

the competent authorities of the Contracting States shall determine the situs of the property by mutual agreement.

This is not relevant if IHT exemption or USA tax exemption applies. It is a different technique from dealing with the problem of dual-situate assets from that adopted in the Estate Duty DTAs, which set out their own treaty-situs rules (as did the former USA estate duty treaty.)

70.10 Immovable property

Article 6 USA IHT DTA provides:

(1) Immovable property (real property) may be taxed in the Contracting State in which such property is situated.

(2) The term "immovable property" shall be defined in accordance with the law of the Contracting State in which the property in question is situated, provided always that debts secured by mortgage or otherwise shall not be regarded as immovable property. The term shall in any case

> include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources; ships, boats, and aircraft shall not be regarded as immovable property.
> (3) The provisions of paras (1) and (2) shall also apply to immovable property of an enterprise and to immovable property used for the performance of independent personal services.

This is what one would expect.

70.11 Business property

Article 7(1) USA IHT DTA provides:

> Except for assets referred to in Article 6 (Immovable Property (Real Property)) assets forming part of the business property of a permanent establishment of an enterprise may be taxed in the Contracting State in which the permanent establishment is situated.

I do not set out the lengthy provisions relating to permanent establishment here, since this will rarely arise.

70.12 Extension of IHT spouse exemption

Under domestic IHT law, the usual IHT spouse exemption may be restricted when the transferor is UK domiciled and the spouse is foreign domiciled.[6] Article 8 restricts this restriction. There are separate provisions for absolute transfers and for transfers to a trust under which the spouse has an IIP. There is no relief for the situation where H has an interest in possession and on H's death W acquires an interest in possession (where the IHT spouse exemption is sometimes available under s.49D IHTA 1984).

70.12.1 *Relief for absolute inter-spouse transfer*

Article 8(3) USA IHT DTA provides:

> Property which passes to the spouse from a decedent or transferor who was domiciled in or a national of the US and which may be taxed in the UK shall, where

6 See 73.2 (Restricted IHT spouse exemption for foreign domiciled spouse).

(a) the transferor's spouse was not domiciled in the UK but the transfer would have been wholly exempt had the spouse been so domiciled, and

(b) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention,

be exempt from tax in the UK to the extent of 50 per cent of the value transferred, calculated as a value on which no tax is payable and after taking account of all exemptions except those for transfers between spouses.

In order for this to be needed and to apply the following conditions must be satisfied:

The transferor is:

(a) Treaty-domiciled in the US or a US national.

(b) UK-law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under IHT domestic law).

The transferee (spouse) is:

(a) not treaty-domiciled in the UK.

(b) not UK-law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under IHT domestic law).

This relief applies on death and on lifetime transfers.

70.12.2 *Meaning of "spouse" in US/UK IHT DTT*

For IHT purposes, the term "spouse" has its UK law meaning.[7] Strictly a civil partner is not a spouse, so this is one of the rare occasions where there is a difference between the taxation of spouses and civil partners; but the introduction of same-sex marriages reduces the significance of that.[8] It is also arguable that the word "spouse" in relation to IHT should here be

---

7 See 57.11 (Undefined terms have domestic law meanings).
A person who has entered into a same-sex marriage may be regarded as a spouse for US tax purposes, depending on the relevant state law; see *Windsor v US http://www.nysd.uscourts.gov/cases/show.php?db=special&id=185* but that is not relevant. IRS Revenue Ruling 2013-17 states: "For Federal tax purposes, the term "marriage" does not include registered domestic partnerships, civil unions, or other similar formal relationships recognized under state law that are not denominated as a marriage under that state's law, and the terms "spouse," "husband and wife," "husband," and "wife" do not include individuals who have entered into such a formal relationship. This conclusion applies regardless of whether individuals who have entered into such relationships are of the opposite sex or the same sex."

8 See App. 1.3 ("Spouse" and related expressions).

construed loosely, to include civil partners.

70.12.3 *Transfer to settlement under which spouse has IIP*

Article 8(4) USA IHT DTA provides:

> (a) Property which on the death of a decedent domiciled in the UK became comprised in a settlement shall, if the personal representatives and the trustees of every settlement in which the decedent had an interest in possession immediately before death so elect and subject to sub-para (b), be exempt from tax in the UK to the extent of 50 per cent of the value transferred (calculated as in para (3)) on the death of the decedent if:
>
> (i) under the settlement, the spouse of the decedent was entitled to an immediate interest in possession,
>
> (ii) the spouse was domiciled in or a national of the US,
>
> (iii) the transfer would have been wholly exempt had the spouse been domiciled in the UK, and
>
> (iv) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention.
>
> (b) Where the spouse of the decedent becomes absolutely and indefeasibly entitled to any of the settled property at any time after the decedent's death, the election shall, as regards that property, be deemed never to have been made and tax shall be payable as if on the death such property had been given to the spouse absolutely and indefeasibly.

In order for this to be needed and to apply the following conditions must be satisfied:

The transferor is:

(a) Treaty-domiciled in the UK.

(b) UK-law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under domestic law).

The transferee (spouse) is:

(a) treaty-domiciled in the US or a national of the US.

(b) not UK-law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under domestic law).

In addition:

(1) An election is required.

(2) The spouse must be entitled to an immediate IIP (this probably rules out relying on s.144 IHTA (discretionary will trusts)).

(3) This relief only applies on the death of the transferor.

70.13 Non-discrimination

Article 10(1)(a) USA IHT DTA provides:

> Subject to the provisions of sub-para (b), nationals of a Contracting State shall not be subjected in the other State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances are or may be subjected.

This would extend IHT agricultural property relief to USA agricultural property, which could be relevant to companies holding agricultural land, but the point will not often arise.

Article 10 continues:

> (2) The taxation on a permanent establishment which an enterprise of a Contracting State has in the other Contracting State shall not be less favourably levied in that other State than the taxation levied on enterprises of that other State carrying on the same activities.
> (3) Nothing contained in this Article shall be construed as obliging either Contracting State to grant to individuals not domiciled in that Contracting State any personal allowances, reliefs and reductions for taxation purposes which are granted to individuals so domiciled.
> (4) Enterprises of a Contracting State, the capital of which is wholly or partly owned or controlled, directly or indirectly, by one or more residents of the other Contracting State, shall not be subjected in the first-mentioned Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which other similar enterprises of the first-mentioned State are or may be subjected.
> (5) The provisions of this Article shall apply to taxes which are the subject of this Convention.

70.14 Other articles

The following articles of the USA IHT DTA are not discussed here:

Article 11: mutual agreement procedure.
Article 12: exchange of information.
Article 13: diplomatic and consular officials.
Article 14: entry into force.
Article 15: termination.

CHAPTER SEVENTY ONE

IHT DTA: SWITZERLAND

71.1 Swiss IHT treaty: Introduction

This chapter considers the Swiss IHT Treaty[1].

For some reason DTAs do not have short titles. I use the expression "**Swiss IHT DTA**" (or, for short, just DTA) to refer to the DTA called "the Convention between the United Kingdom of Great Britain and Northern Ireland and the Swiss Federation for the avoidance of double taxation with respect to taxes on estates and inheritances".

I comment only on the UK (IHT) aspects of the treaty. Swiss law advice will be needed in any case where the treaty applies.

For the interaction of the DTA and transferable nil rate bands, see 69.8 (Transferable nil rate bands and IHT DT reliefs). For claims and disclosure issues see 69.9 (Claims for treaty IHT exemption) and 72.9 (Claims for foreign IHT credit relief).

71.2 Scope

Article 1 Swiss IHT DTA provides:

> This Convention shall apply:
>
> (a) to estates and inheritances where the deceased was domiciled, at the time of his death, in one or both of the Contracting States; and
>
> (b) to property comprised in a settlement made by a person who was domiciled, at the time the settlement was made, in one or both of the Contracting States.

71.3 Taxes covered

Article 2(1) Swiss IHT DTA provides:

---

1 SI 1994 No 3214 *http://www.legislation.gov.uk/uksi/1994/3214/schedule/made*

The existing taxes to which this Convention shall apply are:

(a) in the UK, the inheritance tax, insofar as it applies to the estate of a deceased person (hereinafter referred to as "UK tax");

(b) in Switzerland, the cantonal and communal taxes imposed on estates and inheritances (hereinafter referred to as "Swiss tax").

Thus there is no relief for IHT on lifetime gifts or for 10-year and exit charges on trusts. There is relief for trusts conferring an estate interest in possession.

71.4 Definitions

The DTA provides commonsense definitions of the following terms, which are not set out here: UK; Switzerland; Contracting State; Enterprise; Competent Authority; tax.

Article 3(2) USA IHT DTA gives terms not otherwise defined their domestic law meanings, following the OECD model wording, as it stood at the time of the DTA. See 57.11 (Undefined terms have domestic law meanings).

71.4.1 *"National"*

Article 3(g) Swiss IHT DTA provides:

(g) the term "national" means:

(i) in relation to the UK, any British citizen or any British subject not possessing the citizenship of any other Commonwealth country or territory, provided he has the right of abode in the UK and any legal person, partnership, association or other entity deriving its status as such from the law in force in the UK;

(ii) in relation to Switzerland, any Swiss citizen and any legal person, partnership, association or other entity deriving its status as such from the law in force in Switzerland;

71.5 Treaty-domicile

The definition of treaty-domicile is non-standard. Article 4(1) Swiss IHT DTA provides:

For the purposes of this Convention, a deceased person was domiciled:

(a) in the UK if

[i] he was domiciled in the UK in accordance with the law of the UK or

[ii] is treated as so domiciled for the purposes of a tax which is the subject of the Convention;

That applies to a person who is UK-law domiciled and one who is deemed UK domiciled (s.267 deemed domicile or spouse election domicile).

Article 4(1) continues:

> For the purposes of this Convention, a deceased person was domiciled...
>
> (b) in Switzerland if he was domiciled or was resident in Switzerland in accordance with the law of Switzerland or if he was a Swiss national and Swiss civil law requires his succession to be ruled in Switzerland.

I assume this means:

> For the purposes of this Convention, a deceased person was domiciled:
>
> (b) in Switzerland if
>
> [i] he was domiciled *in Switzerland in accordance with the law of Switzerland* or
>
> [ii] was resident in Switzerland in accordance with the law of Switzerland or
>
> [iii] if he was a Swiss national and Swiss civil law requires his succession to be ruled in Switzerland.

That is, the words "and Swiss civil law requires his succession to be ruled in Switzerland" govern only [iii].

The treaty adds:

> However, a deceased person shall be deemed not to be domiciled in one of the States if that State imposes tax only by reference to property situated in that State.

I do not see how this could apply,[2] but it does not matter.

The definition of domiciled/resident in Switzerland in accordance with the law of Switzerland is crucial: this is a matter of Swiss law. The 1993 Protocol clarifies which Swiss law applies.[3]

Article 4(2) sets out a series of tie-breakers to deal with persons who under art 4(1) would be domiciled in both jurisdictions:

> (2) Where by reason of the provisions of paragraph (1) of this Article a deceased person was domiciled in both States, then, subject to the provisions of the attached Protocol, his status shall be determined as

---

2 Perhaps it was included under a mistaken analogy with art 4(1) OECD model; see 6.7 (Exception where source tax only). Or perhaps there are Swiss tax reasons.

3 It provides: "The reference to Swiss civil law concerns chapter 6 of the loi fédérale sur le droit international privé of 18th December 1987."

follows:

(a) he shall be deemed to have been domiciled in the State in which he had a permanent home available to him; if he had a permanent home available to him in both States, he shall be deemed to have been domiciled in the State with which his personal and economic relations were closer (centre of vital interests);

(b) if the State in which he had his centre of vital interests cannot be determined, or if he did not have a permanent home available to him in either State, he shall be deemed to have been domiciled in the State in which he had an habitual abode;

(c) if he had an habitual abode in both States or in neither of them, he shall be deemed to have been domiciled in the State of which he was a national;

(d) if he was a national of both States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

This is standard OECD Model wording: see 6.8 (Tie-breaker tests for individuals).

The 1993 Protocol provides:

(1) With reference to Article 4:
An individual

[i] who was a national of one of the Contracting States without being a national of the other Contracting State and

[ii] who was domiciled in the State of which he was a national immediately before coming to the other State

shall not be domiciled in the other State for the purposes of this Convention if:

(a) [i] he was temporarily present in that other State by reason only of his employment or

[ii] was a spouse or other dependent of a person temporarily in that other State for such purpose; and

(b) that individual had retained the domicile of the State of which he was a national; and

(c) that individual had no intention of becoming a permanent resident of the other Contracting State.

This could help a Swiss national who is a long term employee in the UK as it could confer better treaty relief even after they become deemed UK domiciled, but that will not often arise. It could similarly hinder a UK national who is an employee in Switzerland as it could prevent them

claiming relief.

71.5.1 *Types of domicile*

When dealing with treaties it is always necessary to distinguish between three different concepts of domicile:

(1) domicile in the domestic English law sense (**"UK-law domicile"**);
(2) deemed UK domicile for IHT ("**deemed UK domicile**");
(3) domicile for the purposes of the treaty ("**treaty-domicile**").

The Swiss IHT DTA distinguishes between:

(1) "A person domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in one of the Contracting States". I call that **"solely UK/Swiss domiciled"**. Someone who is "solely Swiss domiciled" cannot be UK-law domiciled or deemed UK domiciled for IHT purposes.
(2) "A person domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States". I call that **"tiebreaker UK/Swiss domiciled"**. Someone who is tiebreaker Swiss domiciled is UK-law domiciled or deemed UK domiciled but treaty-domiciled in Switzerland because of the tiebreaker clause in the treaty.

71.6 IHT exemptions

There are special rules for immovable property and permanent establishments (articles 5 and 6 discussed below) and ships and aircraft (article 7 not discussed here).

Subject to that, Article 8 Swiss IHT DTA provides various exemptions for individuals.

71.6.1 *UK situate property of solely Swiss domiciliary*

Article 8(1) provides:

> (1) Subject to the following provisions of this Convention:
> (a) property not dealt with in Articles 5, 6 and 7 which is situated in either Contracting State and forms part of the estate of a person:
> (i) domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in one of the Contracting States shall, subject to paragraph (2) of this Article, be taxable only in that latter Contracting State;

Thus UK situate property of a solely Swiss domiciliary qualifies for treaty

exemption on death even though not of course excluded property. To this rule there are four exceptions. Firstly property covered by articles 5, 6, 7 (land, PEs ships and aircraft). Secondly, shares in UK incorporated companies, as article 8(2) provides:

> Shares in a company incorporated in the UK which form part of the estate of a person domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in Switzerland at the time of his death may also be taxed in the UK.

There is not much left for this treaty exemption to apply to, though it could be relevant (eg to UK situate debentures). From a planning point of view it is not generally important since it is usually possible for a solely Swiss domiciliary to avoid IHT by avoiding UK situate property but it could be useful for, say, UK situate chattels.

71.6.2 *Swiss situate property of tiebreaker Swiss domiciliary*

Article 8(1) provides:

> (1) Subject to the following provisions of this Convention:
>
> (a) property not dealt with in Articles 5, 6 and 7 which is situated in either Contracting State and forms part of the estate of a person ...
>
> (ii) domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States shall, subject to paragraph (3) of this Article, be taxable only in the Contracting State in which it is situated;

Thus in principle Swiss situate property of a tiebreaker Swiss domiciliary qualifies for treaty IHT exemption on death even though not of course excluded property (because the individual is actually UK domiciled or IHT deemed domiciled). However five wide exceptions greatly restrict the scope of the rule. The first four are the exceptions mentioned above: property covered by articles 5, 6, 7 and 8(2) (UK land, PEs, ships and aircraft, and shares in UK companies.) Lastly, article 8(3) provides:

> Any property which is situated in Switzerland and which would be taxable only in Switzerland under paragraph (1)(a)(ii) of this Article may also be taxed in the UK if the deceased was:
>
> (a) by virtue of the provisions of paragraph (2) of Article 4 domiciled in the UK at the time of his death; or
>
> (b) by virtue of those provisions domiciled in Switzerland at the time of his death but:

(i) had been domiciled [ie treaty-domiciled] in the UK at any time within the five years preceding his death; and
(ii) was at that time a national of the UK without being a national of Switzerland.

Thus a person who is a UK national[4] cannot take advantage of this treaty IHT exemption until they have been treaty-domiciled in Switzerland for 5 years. A UK national cannot avoid IHT by becoming treaty-domiciled in Switzerland shortly before death. However a non-UK national who is actually UK domiciled or IHT deemed domiciled could in principle do so.

71.6.3 *Property outside UK and Switzerland*

I refer to property outside the UK and Switzerland as **"third country property."**
Article 8(1)(b) provides

(1) Subject to the following provisions of this Convention:
(b) property not dealt with in Articles 5, 6 and 7 which is not situated in either Contracting State and forms part of the estate of a person:
(i) domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in one of the Contracting States shall be taxable only in that Contracting State;
(ii) domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States shall, subject to paragraph (4) of this Article, be taxable only in the Contracting State in which, under paragraph (2) of Article 4, the deceased was domiciled at the time of his death.

Art.8(1)(b)(i) is not relevant for IHT since non UK situate property of a solely Swiss domiciliary is excluded property in any event. However art.8(1)(b)(ii) is important.

However in principle third country property of a tiebreaker Swiss domiciliary qualifies for treaty IHT exemption on death even though not of course excluded property (because the individual is actually UK domiciled or IHT deemed domiciled). However five wide exceptions greatly restrict the scope of the rule. The first four are the exceptions mentioned above: property covered by articles 5, 6, 7 and 8(2) (UK land, PEs, ships and aircraft, and shares in UK companies.) Lastly, article 8(4)

4 Unless also a Swiss national, ie a dual national.

provides a rule equivalent to article 8(3):

> Any property which is not situated in either Contracting State and which would be taxable only in Switzerland under paragraph (1)(b)(ii) of this Article may also be taxed in the UK if the deceased:
>
> (a) had been domiciled [ie treaty-domiciled] in the UK at any time within the five years preceding his death; and
>
> (b) was at that time a national of the UK without being a national of Switzerland.

Thus a person who is a UK national[5] cannot take advantage of this treaty IHT exemption until they have been treaty-domiciled in Switzerland for 5 years. A UK national cannot avoid IHT by becoming treaty-domiciled in Switzerland shortly before death. However a non-UK national who is actually UK domiciled or IHT deemed domiciled could in principle do so.

71.6.4 *Situs rule*

The 1993 Protocol provides:

> (3) With reference to Article 8:
> The situs of any property dealt with in that Article shall be determined by the law of the UK in effect at the date of entry into force of this Convention.

71.7 Extension of IHT spouse exemption

Under domestic IHT law, the usual IHT spouse exemption may be restricted when the transferor is UK domiciled and the spouse is foreign domiciled.[6] Article 10(2) restricts this restriction:

> Property which passes to the spouse from a deceased person who was domiciled in or a national of Switzerland and which may be taxed in the UK shall, where:
>
> (a) the spouse was not domiciled in the UK but the transfer would have been wholly exempt had the spouse been so domiciled, and
>
> (b) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention,
>
> be exempt from tax in the UK to the extent of 50 per cent of the value

5 Unless also a Swiss national, ie a dual national.

6 See 73.2 (Restricted IHT spouse exemption for foreign domiciled spouse).

> transferred, calculated as a value on which no tax is payable and after taking account of all exemptions except those for transfers between spouses.

Civil partners are not mentioned (as the treaty was made before the introduction of civil partnerships). One might construe spouse widely to include "civil partner" particularly if Swiss tax law treats civil partners like spouses.

71.8 Immovable property

Article 5 Swiss IHT DTA provides:

> (1) Immovable property which forms part of the estate of a person domiciled in a Contracting State and which is situated in the other Contracting State may be taxed in that other State.
> (2)The term "immovable property" shall have the meaning which it has under the law of the Contracting State in which the property in question is situated provided always that debts secured by mortgage or otherwise shall not be regarded as immovable property. The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, an interest in the proceeds of sale of land which is held on trust for sale, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources; ships and aircraft shall not be regarded as immovable property.
> (3) The provisions of paragraphs (1) and (2) of this Article shall also apply to immovable property of an enterprise and to immovable property used for the performance of professional services or other activities of an independent character.

This is fairly standard form.

71.9 Business property

Article 6(1) USA IHT DTA provides:

> (1) Except for assets referred to in Articles 5 and 7 and in paragraph (2) of Article 8, movable property of an enterprise which forms part of the estate of a person domiciled in a Contracting State which is the business property of a permanent establishment situated in the other Contracting State, may be taxed in that other State.

This is standard form. I do not set out the lengthy provisions relating to permanent establishment here, since this will rarely arise.

71.10 Other articles

The following articles of the Swiss IHT DTA are standard forms and not discussed here:

Article 11: non-discrimination
Article 12: mutual agreement procedure.
Article 13: exchange of information.
Article 14: diplomatic and consular officials.
Article 15: entry into force.
Article 16: termination.

CHAPTER SEVENTY TWO

FOREIGN IHT CREDIT RELIEF

72.1 Foreign IHT credit: Introduction

"**Foreign IHT credit relief**" arises where foreign tax is set against UK IHT. This may be "**DTA IHT credit**" where a DTA confers a credit or "**Unilateral IHT credit**" where UK tax law (not a DTA) confers a credit.

In this chapter I first consider unilateral IHT credit, the four USA DTAs and the USA IHT DTA. I hope to deal with other treaties in future editions.

72.1.1 *Cross references*

The following matters are considered elsewhere:

69.8 (Transferable nil rate bands and IHT DT reliefs).
65.13 (Deduction for foreign taxes - as opposed to credit).
65.13.5 (Concession for foreign IHT on UK situate shares).

72.2 Unilateral IHT credit

Unilateral IHT credit is important as the UK does not have many IHT DTAs. Section 159(1) IHTA provides:

> Where the Board are satisfied that in any territory outside the UK (an "overseas territory") any amount of tax imposed by reason of any disposition or other event is attributable to the value of any property, then, if—
>
> (a) that tax is of a character similar to that of capital transfer tax[1] or is chargeable on or by reference to death or gifts inter vivos, and
>
> (b) any capital transfer tax chargeable by reference to the same disposition or other event is also attributable to the value of that property,
>
> they shall allow a credit in respect of that amount ("the overseas tax")

---

1 References to CTT include IHT: s.100(1)(b) FA 1986.

> against that capital transfer tax in accordance with the following provisions.

Statute calls this "unilateral relief" but I prefer the term "**unilateral foreign IHT credit**" (or foreign IHT credit relief) which seems clearer. I refer to the foreign tax (which statute calls "the overseas tax" as "**foreign IHT**".

Unilateral relief is based on the international understanding that the state where an asset is located has the primary right of taxation and the state whose claim to tax depends on a personal nexus (residence or, as in the UK, domicile) should provide unilateral relief for double taxation.

The IHT Manual provides:

> **27185 Introduction** [January 2014]
> ... Under Section 159 IHTA 1984, credit can be allowed on death and also in respect of lifetime dispositions where some type of gift tax is charged in the foreign country. The basic conditions to be satisfied in connection with a lifetime or death transfer are:
> - that both Inheritance Tax (IHT) and overseas tax must be chargeable by reference to the same event and attributable to the value of the same property, and
> - that the foreign tax is similar in character to IHT.
>
> In cases of doubt, you must ask for advice from Technical.

72.3 Requirement to pay foreign IHT

The requirement that the foreign IHT must actually be paid is slipped into the definition of "tax imposed". Section 159(6) IHTA provides:

> In this section references to tax imposed in an overseas territory are references to tax chargeable under the law of that territory and paid by the person liable to pay it.

The IHT Manual provides:

> **27185. Introduction** [January 2014]
> ... Before the relief can be finalised, the taxpayer or agent must produce evidence of payment of the foreign tax. This must be in the form of the assessment of foreign tax (or other document showing details of the property charged) and the official receipt.
> Once you decide the amount of relief available this should be entered in the ‹reliefs against tax' box in the appropriate COMPASS screen. If necessary, you must apportion the relief between the instalment and non-instalment option property assessments. (See IHTM31189)

72.4 Use of foreign IHT credit

Credit is only set against "that capital transfer tax" ie IHT attributable to the same property as is subject to the foreign IHT.

The IHT Manual provides:

> **27185. Introduction** [January 2014]
> ... The relief cannot exceed the amount of Inheritance Tax charged with respect to the particular item of property.
> For these purposes, the IHT attributable to any asset that is wholly exempt IHT is nil. Where the item is partly exempt, any IHT charged will be attributed to the chargeable part.
> Where Quick Succession Relief (IHTM22041) is allowed, the amount of IHT attributable to the property is the net amount after allowing the relief.

72.5 Amount of credit

The rules determining the amount of IHT credit differ depending on
(1) situs of property under UK law and
(2) situs of property under the foreign law.
The IHT Manual provides:

> **27185. Introduction** [January 2014]
> ... Because of the terms of S.159(2), (3) and (4) IHTA 1984 you will need to consider the situs (IHTM27071) of property according to UK law and, possibly, foreign law when allowing a credit for foreign tax. You must raise any questions to establish the situs as soon as it seems likely that a S.159 IHTA 1984 credit will be claimed. ...
> The amount of the credit allowed under Section 159 IHTA 1984 is the Sterling equivalent of the foreign tax paid (converted using the exchange rate on the date of payment) so far as that tax is attributable to the foreign property on which IHT has been paid. Any part of the sum paid to the foreign Revenue authorities representing interest or penalties should be excluded. So should any part of the foreign tax that is attributable to income accruing since the date of the transfer. ... SAV (Foreign) will provide the exchange rate...
> **27186 Procedure chart** [January 2014]
> To work out whether relief is due and which provisions it is due under you will need to consider the following questions:
> Is the property situated in the UK under UK law?
> - If the answer is 'yes' and the property is also situated in the foreign country under the law of that country, relief is due under

IHTA84/S159(3)(b),

- If the answer is 'yes' but the property is not situated in the foreign country under their law, no relief is due.
- If the answer is 'no' but the property is situated in the foreign country under UK law, relief is due under IHTA84/S159(2).
- If the answer is 'no' and the property is not situated in the foreign country under UK law, relief is due under IHTA84/S159(3)(a).

Relief should be given under IHTA84/S159 (2) rather than S159 (3)(a) where tax is paid, under an agreement between the provinces concerned:

- in Quebec or Ontario, or Quebec and British Columbia,
- on shares which are situated in the other province, under UK law.

Any case where the taxpayer or agent disagrees with our view that UK law applies, should be referred to Technical.

72.5.1 *Situs in overseas territory*

Section 159(2) IHTA provides:

> Where the property is situated in the overseas territory and not in the UK, the credit shall be of an amount equal to the overseas tax.

The IHT Manual provides:

> **27187. Relief under Section 159(2) IHTA 1984** [January 2014]
> Where the property concerned is situate (under UK law) in the foreign country, relief is due under Section 159(2) IHTA 1984 and the credit due is equal to the foreign tax paid.
> In practice, the credit cannot exceed the IHT attributable to the property concerned.

More accurately, the *credit* (as defined) can exceed the IHT attributable to the property, but this credit is only set against the IHT attributable to the property, so the amount of the relief is the lesser of the credit and that IHT. The IHT Manual goes on to give an example:

> *Example* (Bernice)
> B died in September 2002, leaving an apartment in Spain valued at £50,000. B's total estate amounts to £300,000 (there were no lifetime gifts), with total IHT payable of £20,000.
> The Spanish authorities charge tax equivalent to Sterling £4,000 on the apartment on B's death.
> The IHT payable on the apartment is:
> £50,000 × (£20,000/£300,000) = £3,333.33
> So, the double taxation credit due under Section 159(2) IHTA 1984 is restricted to £3,333.33.

The effect of the credit is that the total tax paid is the higher of the UK and the foreign IHT rates.

72.5.2 *Situs in third country or dual situate property*

Section 159(3) IHTA provides:

> Where the property—
> (a) is situated neither in the UK nor in the overseas territory, or
> (b) is situated both in the UK and in the overseas territory,
> the credit shall be of an amount calculated in accordance with the following formula—
>
> $$\frac{A}{A+B} \times C$$
>
> where
> A is the amount of the capital transfer tax,
> B is the overseas tax and
> C is whichever of A and B is the smaller.

The IHT Manual provides:

> **27188. Relief under Section 159(3) and Section 159(4) IHTA 1984** [January 2014]
> Relief is due under Section 159(3) IHTA 1984 where both the UK and another foreign country charge tax the same property and that property is situate:
> - neither in the UK nor in the foreign country, or
> - both in the UK and in the foreign country.
>
> Where relief is due under Section 159(3) IHTA 1984, it is given on a split credit basis and will be less than the foreign tax paid. [The Manual sets out the formula in s.159(3) and continues:]
> *Example 1*
> Country X and the UK both tax an item of property which is situate neither in Country X or UK.
> Country X charges tax of £40
> UK charges IHT of £60
> The credit is: 60/(60 + 40) × 40 = £24

HMRC IHT Customer Guide gives two examples of unilateral relief calculations:[2]

2 *http://www.hmrc.gov.uk/cto/customerguide/page20.htm#15*.

Example 1
Ann is domiciled in Ruritania, but is also treated as domiciled in the UK. She makes a gift of property situated in Utopia.

Item	Amount
UK inheritance tax (A)	£3,000
Ruritanian inheritance tax (B)	£1,000
C is the smaller of A and B	£1,000
Credit against UK IHT is £3,000 / (£3,000 + £1,000) ×£1,000 = £750	
Net UK tax	**£2,250**

Example 2
Tom is domiciled in Utopia but holds shares in a Ruritanian company, which maintains a duplicate share register in the UK. Under UK law we regard the shares as situated in the UK, but Ruritanian law regards them as situated in Ruritania. Tom dies (but his estate is not liable to Utopian tax).

Item	Amount
UK inheritance tax (A)	£1,000
Ruritanian inheritance tax (B)	£4,000
C is the smaller of A and B	£1,000
Credit against UK IHT is £1,000 / (£1,000 + £4,000) × £1,000 = £200	
Net UK tax	**£800**

This may not be fully adequate to eliminate double taxation. Where an IHT DTA applies a more generous form of credit may apply.

72.5.3 *Property taxed in more than one overseas territory*

Section 159(4) IHTA provides:

> Where tax is imposed in two or more overseas territories in respect of property which—
>
> (a) is situated neither in the UK nor in any of those territories, or
>
> (b) is situated both in the UK and in each of those territories, subsection (3) above shall apply as if, in the formula there set out,
>
> B were the aggregate of the overseas tax imposed in each of those territories and
>
> C were the aggregate of all, except the largest, of A and the overseas tax imposed in each of them. ...

The IHT Manual provides an example:

> **27188 Relief under Section 159(3) IHTA 1984 and Section 159(4)**
> [January 2014]

Example 2
Each of Country X, Country Y and the UK tax an item of property which is not situate in Country X, Country Y nor the UK.
Country X charges £40
Country Y charges £20
UK charges IHT of £60
The credit is 60/(60+40+20) × (40 + 20) = £30

72.5.4 *Interaction of s.159(2)(3)*

Section 159(5) IHTA deals with the interaction of the two reliefs:

> Where credit is allowed under subsection (2) above or section 158 above in respect of overseas tax imposed in one overseas territory, any credit under subsection (3) above in respect of overseas tax imposed in another shall be calculated as if the capital transfer tax were reduced by the credit allowed under subsection (2) or section 158; and where, in the case of any overseas territory mentioned in subsection (3) or (4) above, credit is allowed against the overseas tax for tax charged in a territory in which the property is situated, the overseas tax shall be treated for the purposes of those provisions as reduced by the credit.

The IHT Manual provides:

> **27188 Relief under Section 159(3) IHTA 1984 and Section 159(4)** [January 2014]
> ... If relief is due under Section 159(3)(a) IHTA 1984 or Section 159(4)(a) IHTA 1984, Section 159(5) IHTA 1984 must be considered when calculating the foreign tax paid (B in the formulas above). If the foreign country has allowed a credit against its tax for tax paid in another foreign country, please refer to Technical.
> Where relief is due under Section 159(3)(b) IHTA 1984 or Section 159(4)(b) IHTA 1984, above, the foreign tax at B is simply the gross amount paid. You do not need to take account of any credit for tax paid in another country.
> **27189. Procedure when both Section 159(2) and Section 159(3) IHTA 1984 apply** [January 2014]
> It may happen that relief is due under Section 159(2) IHTA 1984 (or convention relief under Section 158 IHTA 1984) and also under Section 159(3) IHTA 1984.
> If this is the case, Section 159(5) states that the credit allowed under Section 159(3) must be calculated on the basis that A in the formula (the Inheritance Tax paid) is the net amount of Inheritance Tax after allowing the credit under Section 158 or Section 159(2)

72.5.5 *Interaction of unilateral IHT credit relief and DTA credit relief*

Section 159(7) IHTA provides:

> Where relief can be given both under this section and under section 158 above [double tax treaties], relief shall be given under whichever section provides the greater relief.

The IHT Manual provides:

> **27200. Procedure when both forms of relief apply** [January 2014]
> Unilateral relief and relief under a DTC are **not** mutually exclusive. Where both reliefs would appeal to be due on the same item of property, relief is restricted by Section 159(7) IHTA 1984 to whichever is the greater. In practice, where the amount of credit is the same under either, the credit should be treated as convention relief.
> In cases where, either;
> - both reliefs are due, but the unilateral relief appears to be the greater or
> - the interaction of the two reliefs is particularly difficult.
>
> You must refer the case to Technical.
> Unilateral relief may be given for a State tax as well as unilateral or convention relief in respect of tax due in the country where the State is situate.
> *Example* (Giles)
> G, a British citizen, dies domiciled in the UK. His estate includes an apartment in New York, stocks and shares in US Companies and a New York bank account.
> The world-wide estate will be subject to UK tax, but US Federal Estate Tax will (because of the terms of the DTC) be payable only on the immovable property in the USA. The UK will give credit for the US tax under the DTC.
> NY State will also charge State Estate Tax on the movable assets situated there and the UK will give unilateral relief for this tax.
> But the total unilateral and convention credit cannot exceed the amount of UK IHT payable on the property concerned.

72.5.6 *Concession for Canada estate duty?*

The IHT Manual provides:

> **27186 Procedure Chart** [January 2014]
> Relief should be given under S159(2) IHTA 1984 rather than S159(3)(a) where tax is paid, under an agreement between the provinces concerned:

- in Quebec or Ontario, or Quebec and British Columbia,
- on shares which are situated in the other province, under UK law.

Any case where the taxpayer or agent disagrees with our view that UK law applies, should be referred to Technical.

Canada abolished estate duty in 1972. This passage is therefore 40 years out of date! For the current Canadian position, see 65.13.4 (Canadian income tax debts deducted for IHT). However it illustrates an approach which may perhaps be applied to federal estate duties in other federal jurisdictions, if there are any.

72.6 Planning

The rule is in short that the relief is the lesser of (1) foreign IHT and (2) UK IHT attributable to the same property. This requires careful planning to maximise the benefit of the relief.

Suppose T owns land in country X which on T's death will bear IHT in country X. If T makes a chargeable gift of the land (eg a gift by will to T's children) then the foreign IHT credit is available. If T makes an exempt gift (eg to T's spouse or to charity) the foreign IHT credit is lost. Foreign jurisdictions do not normally allow death duty exemption on the grounds that a gift is made to a UK charity.[3] For instance, suppose T wishes to makes a will giving foreign property to a UK charity. The gift may bear foreign death duties which are set against UK IHT so the effective IHT burden is reduced or eliminated.[4] It would be better:

(1) to give the foreign property to beneficiaries who are chargeable under UK law.
(2) to give other (perhaps UK) property to the UK charity which would otherwise bear inheritance tax at the full rate.

In some cases the matter could be put right by a deed of variation.

72.7 DTA IHT credit: USA DTAs

Article VI of the UK/France IHT DTA provides:

> Where one Contracting Party imposes duty on the death of a person who was domiciled in its territory at the time of his death on any property

3 In some cases EU member states may allow relief.

4 The position may be complicated further by foreign rules which make the rate of death duty depend on the relationship of the beneficiary to the deceased; forced heirship rules may also need to be considered.

which, under the present Convention, is situated in the territory of the other Contracting Party, the former Party shall allow against so much of its duty, ascertained in accordance with its law, as is attributable to that property a credit (not exceeding the amount of the duty so attributable) equal to so much of the duty imposed by the other Contracting Party as is attributable to such property.

Similarly, Art.VI of the UK/Italy IHT DTA provides:

(1) Where one Contracting Party imposes duty on any property which is not situated in its territory but is situated in the territory of the other Contracting Party, the former Party shall allow against so much of its duty (as otherwise computed) as is attributable to that property a credit (not exceeding the amount of the duty so attributable) equal to so much of the duty imposed in the territory of the other Contracting Party as is attributable to such property.

(2) For the purposes of this Article, the amount of the duty of a Contracting Party attributable to any property shall be ascertained after taking into account any credit, allowance or relief, or any remission or reduction of duty other than in respect of duty payable in the territory of the other Contracting Party

This does not add much to the unilateral IHT credit otherwise available under domestic law but it would be relevant for an asset which is UK situate under domestic situs rules but not UK situate under treaty situs rules.

India and Pakistan DTAs have similar articles but since these countries do not impose IHT, the articles have no effect.

72.8 USA DTA: Credit for foreign IHT

Article 9 USA IHT DTA provides:

(2) Where under this Convention the UK may impose tax with respect to any property other than property which the UK is entitled to tax in accordance with the said Article 6 or 7 (that is, where the decedent or transferor was domiciled in or a national of the UK), then, except in the cases to which para (3) applies, double taxation shall be avoided in the following manner:

(a) Where the US imposes tax with respect to property in accordance with the said Article 6 or 7, the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property.

(b) Where the US imposes tax with respect to property not referred to in sub-para (a) and the decedent or transferor was a national of the UK and was domiciled in the US at the time of the death or transfer, the UK shall

credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property.

(3) Where both Contracting States impose tax on the same event with respect to property which under the law of the US would be regarded as property held in a trust or trust equivalent and under the law of the UK would be regarded as property comprised in a settlement, double taxation shall be avoided in the following manner:

(a) Where a Contracting State imposes tax with respect to property in accordance with the said Article 6 or 7, the other Contracting State shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the first- mentioned Contracting State with respect to that property.

(b) Where the US imposes tax with respect to property which is not taxable in accordance with the said Article 6 or 7 then

(i) where the event giving rise to a liability to tax was a generation-skipping transfer and the deemed transferor was domiciled in the US at the time of that event,

(ii) where the event giving rise to a liability to tax was the exercise or lapse of a power of appointment and the holder of the power was domiciled in the US at the time of that event, or

(iii) where (i) or (ii) does not apply and the settlor or grantor was domiciled in the US at the time when the tax is imposed,

the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property. ...

(4) The credits allowed by a Contracting State according to the provisions of paras (1), (2) and (3) shall not take into account amounts of such taxes not levied by reason of a credit otherwise allowed by the other Contracting State. No credit shall be finally allowed under those paragraphs until the tax (reduced by any credit allowable with respect thereto) for which the credit is allowable has been paid. Any credit allowed under those paragraphs shall not, however, exceed the part of the tax paid in a Contracting State (as computed before the credit is given but reduced by any credit for other tax) which is attributable to the property with respect to which the credit is given.[5]

The IHT Manual provides:

27170. USA [January 2014]

Where relief takes the form of a simple waiver of taxing rights by one of the two countries, a special instruction applies (IHTM27177).

Where a DT credit is due you may allow the amount claimed on form IHT400 provisionally but the case must not be closed until the payment has been certified by the US authorities on Form 742.

---

5 Art 9(5) deals with claims; see 72.9 (Claims for foreign IHT credit relief).

If a credit seems appropriate, send the taxpayer or agent two prints of Form 742 available from Technical. Ask them to complete the forms and return both copies to us. When you receive the completed Fors 742, send them to Technical, who will then send them on to the USA. The US authorities will keep one copy and certify the other and return it to us. The certified form must be checked and the appropriate credit allowed. If you have any difficulty applying the credit or calculating the tax attributable to the property please seek advice from Technical.

- The credit given cannot be more than the amount of tax payable in the UK on the property concerned.

Certificate of IHT paid for the US authorities

The US form 706 CE is forwarded to this Office in duplicate to be certified by us. The forms must be checked, but you must make sure you do not mark the forms themselves in any way. Send the forms and the file with a note of any error or omission to Technical once all the tax has been paid. If there no further enquiries and all tax has been paid, Technical will arrange for one copy to be certified and sent with a schedule of any necessary amendments to the US authorities; the other copy is filed. The taxpayer is informed that the certificate has been sent and is provided with a copy of any amending schedule.

Where a certificate of tax paid cannot be issued on application because the amount of tax has not been finalised and paid you should explain this to the taxpayer or agents. You should also remind them that they can lodge a provisional claim for a credit with the US authorities (although there is a time limit – under Article 9). When the case is ready you should refer the application and the file to Technical to issue the certificate.

If there is any adjustment of tax after a certificate has been issued the file must again be referred to Technical to issue an amending certificate.

72.9 Claims for foreign IHT credit relief

There is no domestic law provision requiring a claim for unilateral IHT credit relief or for IHT DT relief(unlike the position for IT and CGT where a claim is required by statute). However the treaties assume that a claim is to be made for a credit or a refund of tax and so by implication impose a claim requirement in these cases. The wording varies between treaties.

Article VII India IHT DTA provides:

1. Any claim for a credit or for a refund of duty founded on the provisions of the present Agreement shall be made within six years from the date of the death of the deceased person in respect of whose estate the claim is made, or, in the case of a reversionary interest where payment of duty is deferred until the date on which the interest falls into possession, within six years from that date.

2. Any such refund shall be made without payment of interest on the amount so refunded.

Article VII Pakistan IHT DTA is the same. Article VII France IHT DTA provides:

> 1. Any claim for a credit or for a refund of duty founded on the provisions of the present Convention shall be made within five years from the date of the death of the deceased person in respect of whose estate the claim is made, or, where the event causing duty to be payable occurs at some later date, within five years from that date.
> 2. Any such refund shall be made without payment of interest on the amount so refunded.

Article VII Italy IHT DTA is the same but lacks para 2.

Article 9(5) USA IHT DTA provides:

> Any claim for a credit or for a refund of tax founded on the provisions of the present Convention shall be made within six years from the date of the event giving rise to a liability to tax or, where later, within one year from the last date on which tax for which credit is given is due. The competent authority may, in appropriate circumstances, extend this time where the final determination of the taxes which are the subject of the claim for credit is delayed.

CHAPTER SEVENTY THREE

UK DOMICILIARY MARRIED TO FOREIGN DOMICILIARY

73.1 UK domiciliary married to foreign domiciliary: Introduction

This chapter considers the position of a UK domiciled individual who is married to a foreign domiciled spouse.[1] It is necessary to consider the various taxes separately.

73.1.1 *Cross references*

Joint bank accounts are considered elsewhere: see
77.3 (Joint account: IHT)
77.6 (Remittances from joint accounts).

73.2 Restricted IHT spouse exemption for foreign domiciled spouse

73.2.1 *Restriction on IHT spouse exemption*

Section 18(1) IHTA normally provides complete exemption for transfers between spouses.[2] Section 18(2) IHTA provides an important exception:

> If, immediately before the transfer, the transferor but not the transferor's spouse or civil partner is domiciled in the UK the value in respect of which the transfer is exempt (calculated as a value on which no tax is chargeable) shall not exceed
> [a] the exemption limit at the time of the transfer,
> [b] less any amount previously taken into account for the purposes of the exemption conferred by this section.

---

1 References to "spouse", "marriage", and "widow/er" include a civil partner, civil partnership and a surviving civil partner; see App 1.3 ("Spouse" and related expressions) and App 1.4 (Meaning of "civil partner").

2 For the IHT spouse exemption generally, see 67.1 (IHT spouse exemption) ff; see too 63.10 (GWR spouse exemption).

So where:
(1) the transferor is UK domiciled (or deemed UK domiciled), and
(2) the transferee (the spouse of the transferor) is foreign domiciled
the exemption is in principle restricted to the specified amount. I refer to this as **"the restricted IHT spouse exemption"**.

This restriction does not apply the other way round, where the foreign domiciled individual makes a transfer to their UK domiciled spouse. That makes sense because such a transfer brings assets which would have been outside the scope of IHT within its scope.

The restriction does not apply where neither spouse is domiciled in the UK.

The restriction is modified by the USA and the Swiss IHT DTAs.[3]

The transferee spouse may elect to be treated as UK domiciled so as to avoid the restriction.[4]

Transfers which do not qualify for the IHT spouse exemption will be PETs unless some other exemption is in point.

73.2.2 *The amount of IHT spouse relief where spouse exemption is restricted*

Where the IHT spouse exemption is restricted, s.18 provides that the amount of relief is:

> [a] the exemption limit at the time of the transfer,
> [b] less any amount previously taken into account for the purposes of the exemption conferred by this section.

The exemption limit is defined in s.18(2A) IHTA:

> For the purposes of subsection (2), the exemption limit is the amount shown in the second column of the first row of the Table in Schedule 1 (upper limit of portion of value charged at rate of nil per cent).

That is the nil rate band amount (2014/15, £325,000).

An inter-spouse gift within the limit of the restricted spouse exemption is *not* a PET. Section 3A(1A)(b) IHTA provides that a PET is a transfer of value "which, apart from this section, would be a chargeable transfer".[5]

---

3 See 70.12 (Extension of IHT spouse exemption).

4 See 61.6 (Spouse election domicile).

5 Transfers before 22 March 2006 are governed by s.3A(1) IHTA but the wording on this point is the same.

So if one spouse makes a gift to the other, that gift uses up the lifetime limit even though the gift is made more than seven years from the death and would otherwise qualify as an exempt transfer, as a PET.

The position is different for a gift of excluded property.[6] Such a gift is not a transfer of value at all and therefore it is not a transfer which qualifies for the spouse exemption and does not use up the restricted exemption.

The position is less clear for a transfer (outside s.11) which qualifies for the annual or normal expenditure exemptions. Such a transfer is an exempt transfer under those exemptions: does it also use up the limit for inter-spouse gifts? There is no clear answer in the legislation but it is suggested that these transfers do not use up the limit. That would better fit the scheme of the legislation.

The IHT Manual provides as follows:

> **11033. Spouse or civil partner domiciled outside UK** [November 2013]
> ... The restriction applies to
> - the value before grossing (IHTM26121)
> - the cumulative total of all transfers to a spouse or civil partner. So you must take into account the amounts allowed under earlier transfers to a spouse of civil partner whether or not they were domiciled or treated as domiciled in the UK at the time in considering whether the restriction is exceeded, and
> - since the exemption applies to transfers made by a individual, if that person has been married or in civil partnership with more than person, the restriction applies to the cumulative total of all transfers to all spouses or civil partners.
>
> Where the appropriate limit is exceeded, you should allocate the exemption in the way which is most favourable to the spouse or civil partner. Factors you should bear in mind include which assets bear the tax and whether business relief (IHTM25131), agricultural relief (IHTM24001) or any other reliefs are available.
> ***Example 1*** *(Mr and Mrs Allsop)*
> In May 2012, Mr A, who was domiciled in the UK transferred £200,000 to Mrs A, who was not domiciled in the UK. Of this transfer, £55,000 is exempt under IHTA1984/S18(2), and £145,000 is a PET (IHTN04057) and assumed to be exempt. Mr A dies in 2020 and leaves all his property

6 Likewise a gift within s.11 IHTA; see 73.4 (Disposition for maintenance of spouse and other exemptions).

to his wife, who remains domiciled outside the UK. Even though Mr A has survived for 7 years after making the transfer, the limited exemption under IHTA1984/S18(2) has all been used and is not available on his death.

***Example 2** (Mr and Mrs Costa)*

In January 2013 Mr C transfers a UK property worth £200,000 to Mrs C. Both are domiciled outside the UK. Exemption under IHTA1984/S18 (1) is available in full. In June 2013 Mr C is deemed to be domiciled in the UK and gives another UK property worth £300,000 to his wife, who remains domiciled outside the UK. The restriction on the exemption under IHTA1984/S18 (2) applies at this point.

At the time of the transfer that triggered the restriction, the spouse exemption available to Mr Costa was £325,000. He has already made a gift to Mrs Costa that qualified for exemption under IHTA84/S18 of £200,000, so the exemption available against this transfer is £125,000. This is because IHTA84/S18(2) reduces the amount of the limited exemption available by 'any amount previously taken into account for the purposes of the exemption conferred by this section'. This means that £175,000 of the transfer will be a PET to Mrs Costa and chargeable to tax if Mr Costa dies before July 2020. .

73.2.3 *EU law aspects*

Where the foreign domiciled spouse is domiciled in another member state, the discrimination before the 2013 changes took effect was unlawful in EU law: it was a breach of free movement of capital.

The government sought to justify the discrimination on the grounds of the "potential avoidance risk".[7] The general application of the spouse exemption on a gift to a foreign domiciled spouse would clearly lead to a loss of UK IHT. (The loss of tax is not "avoidance" in the strict sense, but nothing turns on that.) However the funds which fall outside the scope of UK IHT in principle fall within the scope of estate or gift taxes in the MS in which the spouse is resident or domiciled. If an inter-spouse gift gives rise to a tax saving it is because the MS concerned does not impose the tax or not at the UK's (comparatively) high rates. That does not justify the restriction on free movement of capital.[8]

The EC formally objected to the pre-2013 UK law:

---

7 Public Bill Committee debate on Finance Bill, Hansard 13 May 2008 col.181.

8 See 60.8.6 (Counteracting tax advantages of non-residents); 60.11.1 (Discrimination against non-residents).

> The UK legislation provides that transfers between domiciled spouses or civil partners are exempt from inheritance tax. However, transfers between domiciled and non-domiciled spouses or civil partners are not exempt from inheritance tax. Furthermore, in the latter case the rules on the nil rate band applicable to subsequent transfers differ and may result globally in a higher taxation.[9] This difference in tax treatment of transfers between domiciled and non-domiciled spouses is of a discriminatory nature and contrary to EU rules (Article 18 TFEU).
> The Commission's request takes the form of a reasoned opinion (the second step of the infringement procedure)...[10]

HMRC's papers on the 2013 spouse exemption reform did not mention the EU law background, but this point must have been tacitly accepted.

The new law is fairer than the old, so supporters of the EU may claim it as a case where EU law has had a beneficial influence.

73.2.4 *Inter-spouse gifts before 6 April 2013*

Prior to 6 April 2013, s.18(2) IHTA provided:

> *If, immediately before the transfer, the transferor but not the transferor's spouse or civil partner is domiciled in the UK the value in respect of which the transfer is exempt (calculated as a value on which no tax is chargeable) shall not exceed £55,000 less any amount previously taken into account for the purposes of the exemption conferred by this section.*

The FA 2013 has made two changes:

(1) It increased the exemption from £55,000 to the nil rate band.
(2) It introduced the spouse election allows the spouse to opt out of the restriction.[11]

Section 178(4) FA 2013 provides the commencement rule:

> The amendments made by this section have effect in relation to transfers of value made on or after 6 April 2013.

Thus (subject to a claim where appropriate that EU law overrode domestic law) the old £55k limit applies to gifts made before 6 April 2013.

---

9 The point is that an inter spouse gift (above the restriction) reduces the donor's nil-rate band.

10 Reference: IN/2010/2111; Memo Event Date: 24/10/201 *http://europa.eu/rapid/press-release_MEMO-12-794_en.htm?locale=en*

11 See 61.6 (Spouse election domicile).

Moreover, the IHT spouse election cannot be made for such gifts. These rules will continue to be relevant until 2020, when pre-2013 PETs will fall out of charge.

The IHT Manual shows that HMRC intend to take this point:

> **IHTM13046: Domicile: election by non-UK domiciled spouse or civil partner: the date the election takes effect** [November 2013]
> ... A consequence of this is that if a person domiciled in the UK makes a gift to their non-UK domiciled spouse or civil partner before 6 April 2013 and dies within 7 years, the £55,000 limit that applies before that date continues to apply (IHTM11033).
> Example (Jane & Kate)
> In May 2012, J, who was domiciled in the UK transferred £400,000 to her civil partner K, who was not domiciled in the UK.
> Of this transfer, £55,000 is exempt under IHTA1984/S18(2), and £345,000 is a PET and assumed to be exempt.
> J dies in 2017.
> The gift is now a failed PET and after deduction of the nil rate band, £20,000 will be subject to tax.

Where there has been a death before the 2013 rules take effect, a spouse domiciled in a MS should argue for the application of the IHT spouse exemption as a matter of EU law.

73.3 Spouse or widow of settlor becomes entitled to settled property

The termination of an estate interest in possession (during the life of the life tenant) is a transfer of value under s.52 IHTA. Section 53(4) IHTA provides:

> Tax shall not be chargeable under s.52 above if on the occasion when the interest comes to an end—
> (a) the settlor's spouse or civil partner, or
> (b) where the settlor has died less than two years earlier, the settlor's widow or widower or surviving civil partner,
> becomes beneficially entitled to the settled property and is domiciled in the UK.[12]

This relief only applies if the spouse is UK domiciled (or has made a spouse election). The restriction on s.53(4) relief is broadly consistent with the restriction to the spouse exemption considered above.

---

12 Section 53 goes on to set out some exceptions not discussed here.

Section 54(2) IHTA sets out similar rules for the termination of an estate interest in possession on the death of the life tenant.

73.4 Disposition for maintenance of spouse and other exemptions

Where the IHT spouse exemption does not apply, another exemption may sometimes fill the gap. An inter-spouse gift may qualify for relief under s.11(1) IHTA:

> A disposition is not a transfer of value if it is made by one party to a marriage[13] or civil partnership in favour of the other party ... and is—
>
> (a) for the maintenance of the other party ...[14]

This should normally[15] apply, in particular, to the common case where an individual gives a half share in the family home to their spouse. The most basic requirement of "maintenance" is to have a secure roof over one's head.[16] In *Phizackerley v IRC*[17] the Special Commissioners correctly stated that the normal reason for such a gift is to give the donee spouse security in her own home. Unfortunately he concluded that it was not "for the maintenance" of the other party, it was to give the other party security. With respect, this can hardly be right, because "security" and "maintenance" are not alternatives. It is because the gift gives the spouse security that it is for her maintenance. But it will now be necessary to appeal to the High Court to establish this point.

A gift which is within s.11 IHTA (Disposition for family maintenance) is outside the scope of the GWR rules. For such a disposition is not a transfer of value; so it is deemed not to reduce the transferor's estate: s.3 IHTA. So by implication it must be treated as not being a "disposal by way of gift". (Any other conclusion would lead to absurd results. For a

---

13 "Marriage" is defined to include a former marriage in certain cases: s.11(6) IHTA.

14 I mention for completeness the further relief in s.11(3) which overlaps with s.11(1). In practice an inter-spouse gift which qualifies under s.11(3) will also qualify under s.11(1).

15 It would be different if the purpose of the gift was not to provide for the spouse but some other purpose, such as IHT planning.

16 Lump sum payments can constitute "maintenance". Contrast s.2(1)(b) Inheritance (Provision for Family and Dependants) Act 1975 (formerly s.1(4) Inheritance (Family Provision) Act 1938) which states that lump sum payments may constitute "maintenance" for the purpose of the Act. This is also assumed in Sch 15 para 10(1)(d) FA 2004 (which takes gifts within s.11 out of the pre-owned assets rules).

17 [2007] STC (SCD) 328.

disposition between spouses within s.11 is not a transfer of value, and so not within the IHT spouse exemption, and so would come within the GWR rules even if both spouses were UK domiciled.)[18]

The normal expenditure exemption (s.21 IHTA) may also be in point. Gifts which qualify for this exemption are still within the reservation of benefit rule.

73.5 Transferable nil-rate band

Section 8A IHTA provides:

> (1) This section applies where—
> (a) immediately before the death of a person (a "deceased person"), the deceased person had a spouse or civil partner ("the survivor"), and
> (b) the deceased person had unused nil-rate band on death.

Section 8A(2) IHTA defines "unused nil-rate band on death":

> A person has unused nil-rate band on death if M > VT where—
> M is the maximum amount that could be transferred by a chargeable transfer made (under section 4 above) on the person's death if it were to be wholly chargeable to tax at the rate of nil per cent. (assuming, if necessary, that the value of the person's estate were sufficient but otherwise having regard to the circumstances of the person); and
> VT is the value actually transferred by the chargeable transfer so made (or nil if no chargeable transfer is so made).

The amount of the unused nil-rate band depends on the amount of the chargeable transfer on the death of the first spouse. If there is no chargeable transfer, the full nil-rate band is unused and is transferrable.[19]

The IHT Manual provides:

> **43042 Domicile of first spouse or civil partner to die** [October 2009]
> Every person, UK domiciled or not, is entitled to the full nil rate band that can be set against their estate that is subject to IHT.
> The availability of TRNB on the estate of the first to die of a non domiciled spouse or civil partner is calculated only by reference to property that is

18 If my view were wrong the further anomaly would arise that gifts of qualifying investments to charity would fall within the scope of GWR, because such gifts fall within s.12 IHTA and not s.102(5)(d) FA 1986; but it is not necessary to pursue that here.

19 S.8A(3)(4) IHTA.

potentially subject to an UK IHT charge. For a non domiciled spouse or civil partner, **VT** [IHTM43020] will be calculated only by reference to their estate in the UK. Assets held outside the UK, by a person not domiciled, or deemed domiciled in the UK, regardless of the devolution of those assets are not taken into account when calculating the available unused nil rate band.

Thus where the survivor dies in the UK and their spouse or civil partner, who held no UK assets, died abroad leaving all their all overseas assets to their children, none of the nil rate band was used on the first death and the personal representatives of the survivor may claim to transfer 100% of the nil rate band to the estate of the survivor.

Example[20]

Abdul [died] domiciled abroad. His only asset situated in the UK was a US dollar account containing US$250,000. He left this and the remainder of his estate to his son, Jamil who lives in the UK.[21] After the death, his wife, Soroya, moved to the UK to live with Jamil and died domiciled in the UK.[22]

The assets situated outside the UK are not liable to IHT. The US dollar account is left out of account [IHTM04380] in determining Abdul's estate at death. So although whole estate passed to Jamil, no property was chargeable to IHT, leaving the nil rate available for transfer in full on Soroya's death..

The next section needs to be amended to reflect the increase in the limit for the restricted spouse exemption.

IHTM43043 - Domicile: calculation where the domicile of the survivor at the first death is outside the UK [October 2009]

On the death of the first spouse or civil partner, exemption for assets passing to the surviving spouse or civil partner may be limited to £55,000 in accordance with s8(2) IHTA if the surviving spouse or civil partner was not domiciled or deemed domiciled in the UK. [IHTM11033]

If the entire estate passed to the surviving spouse or civil partner, anything over £55,000 is a chargeable legacy. Where the net estate is above the nil rate band plus £55,000 there will be no nil rate band to transfer, as illustrated below.

Example

Susan died in 2002/03. She left an estate worth £450,000 all to her husband Lars who is domiciled in Sweden.

Unused nil rate band calculation

M = £250,000

VT = £395,000 (Estate of £450,000 less limited spouse exemption of £55,000)

M is not greater than **VT**, so there is nothing to transfer.

---

20 The HMRC example, as is the current trend, contains several facts which are wholly irrelevant to the tax position and which only serve to make it harder to identify the relevant points. The following footnotes identify these.

21 Where the son lives, and where he is domiciled (which might not be the same) are completely irrelevant to the example.

22 Where the widow lives and where she dies domiciled, are irrelevant to the example.

Where the net estate is less than the nil rate band plus £55,000, there will still be an amount of nil rate band available to transfer. This example shows how both the amount that the net estate is below the nil rate band, and limited spouse exemption combine to produce the amount of nil rate band available to transfer.

Example

Charles died in 2002/03. He left an estate worth £200,000 all to his wife Helga who is domiciled in Sweden.

Unused nil rate band calculation

M = £250,000

VT = £145,000 (Estate of £200,000 less limited spouse exemption of £55,000)

M is greater than **VT** by £105,000

Transferable nil rate band calculation

E =£105,000

NRBMD = £250,000 so

(105,000 ÷ 250,000) × 100 = 42.0000%

On Helga's death, the nil rate band on her death would be uprated by 42%. This approach will be appropriate on the death of the survivor when either

- they remain domiciled abroad and their UK assets exceed the single nil rate band, or
- between the first death and their own, they became domiciled, or deemed domiciled in the UK.

See too 69.8 (Transferable nil rate bands and IHT DT reliefs).

73.6 Inter-spouse gift of 100% BPR or APR property

This section considers a gift of property qualifying for 100% business or agricultural property relief from a UK domiciled individual to their non-UK domiciled spouse. It is necessary to consider IHT on the gift and the gift with reservation rules. For convenience I refer to "business property" but similar rules govern agricultural property.

73.6.1 *IHT on the gift*

In the normal case of a gift of property qualifying for 100% BPR, the value transferred by the gift is nil. However, s.113A IHTA provides:

Transfers within seven years before death of transferor

(1) Where any part of the value transferred by a potentially exempt transfer which proves to be a chargeable transfer would (apart from this section) be reduced in accordance with the preceding provisions of this Chapter, it shall not be so reduced unless the conditions in subsection (3) are satisfied.

The conditions which must be satisfied are set out in subsection (3):

> The conditions referred to in subsections (1) and (2) above are—
> (a) that the original property was owned by the transferee throughout the period beginning with the date of the chargeable transfer and ending with the death of the transferor; and
> (b) except to the extent that the original property consists of shares or securities to which subsection (3A) below applies that, in relation to a notional transfer of value made by the transferee immediately before the death, the original property would (apart from s.106 above) be relevant business property.

In brief, BPR is lost unless the property is retained by the donee for seven years. (There is an exception for replacement property which is not discussed here.)

73.6.2 *GWR on the gift if the donor survives seven years*

What about GWR? The position varies according to whether or not the donor survives seven years from the gift.

If the donor does survive seven years then s.113A has no application. By subsection (1) it applies to a PET *which proves to be a chargeable transfer*. If the donor survives seven years then the PET does not "prove to be a chargeable transfer". Accordingly the value transferred by the gift remains at nil. The gift therefore normally qualifies as an exempt transfer under:

(1) s.20 IHTA (small gifts); or
(2) s.18 IHTA (IHT spouse exemption).

The gift therefore falls outside the scope of the GWR rules by virtue of s.102(5) FA 1986.

The principle applies to:

(1) outright gifts of 100% BPR property whether or not to spouses;
(2) gifts to trusts under which the spouse has an interest in possession even if such gifts are not "outright gifts" (but consider s.102(5A)).

It does not matter that the property is sold or disposed of by the donee within the seven years as long as the donor has survived seven years. Section 113A(7A) IHTA provides:

> The provisions of this Chapter for the reduction of value transferred shall be disregarded in any determination for the purposes of this section of whether there is a potentially exempt or chargeable transfer in any case.

This is irrelevant because the disregard is only for the purposes of s.113A, not for the purposes of ss.18, 20 IHTA and s.102 FA 1986.

73.6.3 *GWR if donor dies within seven years*

The position is different if the donor dies within seven years. Suppose:
(1) H (UK domiciled) gives 100% BPR property to W (foreign domiciled);
(2) H dies within seven years;
(3) The conditions in s.113A(3) are not satisfied (for instance the property has been sold[23] or disposed of by the donee).

In that case the value transferred is *not* reduced: s.113A(1). It is considered that the disallowance of BPR applies for all purposes of IHT. So the gift falls outside the protection of ss.18 and 20 IHTA (assuming the value transferred exceeds the nil rate band limit and £250 respectively) and the GWR provisions can in principle apply.

It is impossible to believe anybody actually thought through these rules at the time the legislation was enacted. But these are the consequences of the words used and the result, if a little complicated, is relatively sensible.

73.7 Divorce settlement where IHT spouse exemption not available

Suppose:
(1) H transfers assets to W in order to settle a divorce claim, and
(2) The disposition falls outside the IHT spouse exemption.[24]

No IHT charge arises. First, the disposition is not a transfer of value, if made under court order.[25] Secondly, s.10 IHTA provides:

> **Dispositions not intended to confer gratuitous benefit**
> (1) A disposition is not a transfer of value if it is shown that it was not intended, and was not made in a transaction intended, to confer any gratuitous benefit on any person and either—
> (a) that it was made in a transaction at arm's length between persons not connected with each other, or
> (b) that it was such as might be expected to be made in a transaction at arm's length between persons not connected with each other.

H does not normally intend to confer any "gratuitous benefit" on W.

---

23 Though there is a possibility of reinvestment relief in this case: see s.113B IHTA.

24 This may be because H is UK domiciled and W is not; or because the transfer is made after the marriage is dissolved.

25 See *McCutcheon on IHT* (6th ed., 2013), para 2.35. Relief may also be available under s.11 IHTA; see 73.4 (Disposition for maintenance of spouse and other exemptions).

(Assume the divorce settlement is negotiated at arm's length.) Accordingly the disposition falls within s.10 IHTA and is not a transfer of value for IHT purposes.

There is a theoretical HMRC argument that the condition in s.10(1)(b) IHTA is not satisfied. The argument would be that a divorce settlement cannot be "such as might be expected to be made in a transaction at arm's length between persons not connected with each other" since persons not connected with each other would not be in a divorce situation. In my view this argument is not correct. It is the old question of how far one carries the fiction of a deeming provision. The argument carries it too far because it reaches a conclusion which does not fit in with the scheme of the IHTA. IHT Manual (while not explicit) suggests that HMRC do not take the point.[26]

73.8 Associated operations on inter-spouse gift

The IHT Manual provides:

> **14833 Gifts between spouses or civil partner** [January 2010]
> Where property
> - given unconditionally by one spouse or civil partner to the other is
> - subsequently transferred by the latter to a third party,
>
> you cannot use the associated operations provisions to attribute the transfer to the first spouse or civil partner.
> The Chief Secretary to the Treasury assured Parliament that this would be HMRC's practice, and it was publicised in a Press Release dated 8 April 1975.
> However, where the transfer between spouses or civil partners is part of a more complex series of transactions which taken together are the means whereby one of them makes a disposition to a third party, it may be more appropriate to use the associated operations to allocate the transfer(s) to the correct transferor.

73.9 IHT planning for mixed marriage

73.9.1 *Simple gift to foreign domiciled spouse*

A simple and obvious short- and medium-term course is:

---

26 IHTM 4165 [September 2008]: "Dispositions made on divorce or dissolution of a civil partnership (IHTM11032) for the benefit of a former spouse or civil partner, whether under a Court Order or as a result of arm's length negotiations, are normally within s.10 IHTA 1984."

(1) the UK domiciled spouse should give assets to their foreign domiciled spouse absolutely;
(2) the foreign domiciled spouse keeps the assets in a form where they are not UK situate, so they remain excluded property.

The gift may be a PET but that may not in practice be a serious concern. If the reservation of benefits rule applies, however, this effectively neutralises any tax saving. Indeed it may make the position worse. See 63.19 (IHT spouse exemption defence to GWR death charge). This often makes simple gifts impractical.

73.9.2 *Gift to foreign domiciled spouse, followed by settlement by spouse*

A more sophisticated option is:

(1) the UK domiciled spouse gives assets to their foreign domiciled spouse; and
(2) the foreign domiciled spouse subsequently gives the assets to a settlement.

In principle the property in the settlement may be excluded property. One advantage of this is if the donee spouse later becomes UK domiciled: see 66.1 (IHT planning in anticipation of acquiring UK domicile). Another advantage is CGT planning. A third advantage is that this should avoid the gifts with reservation rule.[27] This strategy only works if the UK domiciled spouse is not a settlor: see 80.36 (Planning to create trust with foreign domiciled settlor).

73.10 CGT spouse exemption

Section 58(1) TCGA provides:

> If, in any year of assessment,
> (a) an individual is living with his spouse or civil partner, and
> (b) one of them disposes of an asset to the other,
> both shall be treated as if the asset was acquired from the one making the disposal for a consideration of such amount as would secure that on the disposal neither a gain nor a loss would accrue to the one making the disposal.

I refer to this as "**the CGT spouse exemption**". This exemption applies regardless of the domicile of the spouses. It applies to sales at market value as well as gifts.

---

27 See 63.15 (Gift to foreign domiciled donee who creates a settlement).

The relief does not apply to (1) unmarried couples or (2) married couples living apart. Section 58(2) contains (usually) immaterial exceptions which are not discussed here.

73.11 CGT planning for mixed marriage

73.11.1 *Asset yielding a gain*

Suppose the UK domiciled spouse owns an asset which will give rise to a gain on a disposal. A simple and obvious course is:

(1) The UK domiciled spouse transfers[28] the asset to their foreign domiciled spouse.

(2) The foreign domiciled spouse may be in a position to sell the asset without CGT.[29]

The GAAR might apply if there is an arrangement under which the donee returns the proceeds of sale to the donor.

Comparable points arise for losses: see 54.13 (Inter-spouse transfer).

73.11.2 *Non-resident spouse*

The relief applies regardless of residence, so similar planning points arise if one spouse is UK resident and the other is not. The CG Manual provides:

> **22300 NR spouse or NR civil partner** [August 2008]
> ... There is no longer any authority to treat a non-resident spouse as separated from a resident spouse merely because of their residence status. Similarly a non-resident civil partner may not be treated as separated from a resident civil partner merely because of their residence status. So the possibility of passing assets outside the UK tax net remains.

73.12 Income tax planning for mixed marriage

A simple and obvious course is:

(1) the UK domiciled spouse should give assets to their foreign domiciled spouse absolutely; and

---

28 The transfer may be a gift or a sale at market value. The latter avoids the IHT problems discussed at 73.2 (Restriction on IHT spouse exemption for foreign domiciled spouse) and 63.10 (GWR spouse exemption) but take care on implementation, especially s.58(2) TCGA. In the case of a sale the spouse will need independent legal advice.

29 See 49.1 (Capital gains of UK residents).

(2) the foreign domiciled spouse invests in property giving rise to foreign investment income which is not remitted.

The inter-spouse gift, strictly, satisfies the transfer of asset conditions. The transferor would then fall within s.720 ITA since they have "power to enjoy" their wife's income. This is because s.714(4) ITA provides:

> In this Chapter references to individuals include their spouses or civil partners.

However, RI 201 provides relief:[30]

> Unless transactions are part of a wider arrangement, Revenue practice is not to seek to assess a UK domiciled individual on the income of a non-UK domiciled spouse, where that income arises from a transfer of assets by that spouse and would be outside the charge to tax under s 739 ICTA by virtue of the provisions of s 743(3) ICTA.

The ToA draft guidance cites this and then provides:

> **INTM600460 - General Conditions All Cases: The Individual: Introduction**
> This statement indicates broadly the approach that will be taken to individuals and their spouses or civil partners in relation to the application of these provisions. In general (unless there are wider arrangements) HMRC will not use transfer of assets to charge tax on one spouse or civil partner in respect of income arising to the other spouse or civil partner, where that spouse or civil partner has made a transfer of assets but is, for example, outside the charge because say of the application of non-UK domicile provisions. In effect, the general approach will be to apply the word individual (where the individual has a spouse or civil partner) in a way that is consistent with the individual who has the power to enjoy income of a person abroad, entitlement to capital sums or who receives benefits as a result of relevant transactions. But it may be equally valid in this context to use the term in a way that is consistent with an individual who, by means of relevant transactions, seeks to avoid a liability to income tax. Where spouses or civil partners are therefore in some way connected with relevant transactions and the results of such transactions, regard will be had to the particular facts where the extended meaning of individual may impact upon the potential

30 This is perhaps a concession but the better view is that the inter-spouse transfer is tax mitigation not tax avoidance so the motive defence applies. Tax Bulletin 81 states (obviously) that the same practice applies to civil partners.

charge.

The gift would also be a "settlement" for the purposes of s.624 ITTOIA. However, s.626 ITTOIA normally provides relief:

(1) The rule in s.624(1) does not apply in respect of an outright gift—
  (a) of property from which income arises,
  (b) made by one spouse to the other or one civil partner to the other, and
  (c) meeting conditions A and B.

(2) Condition A is that the gift carries a right to the whole of the income.

(3) Condition B is that the property is not wholly or substantially a right to income.

(4) A gift is not an outright gift for the purposes of this section if—
  (a) it is subject to conditions, or
  (b) there are any circumstances in which the property, or any related property[31]—
    (i) is payable to the giver,
    (ii) is applicable for the benefit of the giver, or
    (iii) will, or may become, so payable or applicable.

73.13 The GAAR and gifts between spouses

The GAAR guidance provides:

D19 **Gifts between spouses**

This example is intended to illustrate standard tax planning on gifts between spouses.

D19.1 ***Background***

D19.1.1 This example considers the capital gains tax position on an arrangement involving a gift of shares between spouses, followed by death of the transferee.

D19.2 ***The facts***

D19.2.1 In January 2012 Mr and Mrs Jones are told that Mrs Jones is terminally ill. In February Mr Jones gives his shares in an investment company, which are standing at a significant gain, to his wife. Under the terms of her Will as drafted at the date of the gift he will inherit those shares when she dies. Mrs Jones has full capacity at the time of the gift.

D19.2.2 Mrs Jones dies in June and the shares pass to Mr Jones under the terms of her Will. Mrs Jones has not executed a new Will since the gift.

---

31 s.626(5) ITTOIA provides that:

"'Related property' has the same meaning in this section as in s.625."

So we turn to s.625(5) which provides:

"In this section 'related property', in relation to any property, means income from that property or any other property directly or indirectly representing proceeds of, or of income from, that property or income from it."

D19.3 ***The relevant tax provisions***

Sections 58, 62(1)(b) and 62(4)(a) TCGA 1992.

D19.4 ***The taxpayer's tax analysis***

D19.4.1 The gift of the shares is a transfer between a husband and wife who are living together. This transaction is treated by s58 TCGA 1992 as taking place for such consideration as will give rise to neither a gain nor a loss.

D19.5 All the assets of the deceased which pass to his or her personal representatives are deemed to have been acquired by them at market value at the date of death under s62(1)(b)TCGA 1992. When beneficial ownership of any asset of the estate passes from the personal representatives to a legatee, S62(4)(a) TCGA 1992 provides that no chargeable gain shall accrue to the personal representatives.

D19.5.1 In summary, there is no chargeable gain on the gift of shares by Mr Jones to Mrs Jones and Mr Jones re-acquires the shares at market value at the date of his wife's death. In effect, the gain that has accrued during the earlier ownership of shares by Mr Jones has disappeared.

D19.6 ***What is the GAAR analysis under [s.207(2) FA 2013]?***

D19.6.1 The main purpose of the arrangement is to obtain a tax advantage. The gift of shares was made by Mr Jones in the hope of washing out the gains on the understanding that his wife would leave them back to him.

D19.6.2 *Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether express or implied) and the policy objectives of those provisions?*

Yes. The principle of s58 TCGA 1992 is to allow assets to be transferred between spouses and between civil partners on the basis of no gain/no loss.

Assets passing on death to personal representatives are treated as taking place at market value and no gain is charged when the assets are passed to the legatees.

D19.6.3 *Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*

The means of achieving the tax results depend upon the gift, the death of Mrs Jones and her choosing to leave the shares to Mr Jones in her Will. There are no abnormal or contrived steps here; the transactions are normal arrangements between spouses or civil partners.

D19.6.4 *Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?*

No.

D19.6.5 *Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*

Yes. HMRC sets out in its instruction Manuals how these transactions are to be treated for CGT purposes.

D19.7 ***Conclusion***

D19.7.1 These arrangements can reasonably be regarded as a reasonable course of action in relation to the tax provisions having regard to all the circumstances. The GAAR would not apply.

D19.8 ***An alternative arrangement - What if the facts were the same as those above but the gift of shares was made on the day of Mrs Jones' death?***

D19.8.1 HMRC's view is that so long as Mrs Jones was in full capacity at the time of the

gift the analysis would be the same and that the GAAR would not apply. This assumes of course that the gift was validly completed prior to death.[32]

This example is not one of the topics discussed in this chapter, but it supports the view that planning of the type discussed in this chapter is not within the scope of the GAAR.

32 HMRC GAAR Guidance Part D (Examples) (April 2013) accessible *http://www.hmrc.gov.uk/avoidance/gaar-partd-examples.pdf*

CHAPTER SEVENTY FOUR

THE FAMILY HOME AND ITS CHATTELS

74.1 The family home and its chattels: Introduction

This chapter deals with two topics: the forthcoming charge to CGT on non-residents dwellinghouses; and the benefit in kind charge where residential property or chattels are held in a company.

The next chapter deals with the corporate residential property regime (the SDLT penal rate, ATED and ATED-CGT), and the general question of planning for the purchase or holding of residential property.

74.2 Forthcoming CGT charge on non-residents dwellinghouse

Non-residents are not normally subject to CGT on gains accruing to them, even if the gains accrue on UK situate assets.[1] However HMRC propose to extend CGT to gains accruing to non-residents disposing of UK residential property. The new charge will arise from April 2015 and apply only to gains arising from that date.

At the time of writing, the only material for discussion is a short[2] consultation document.[3] There is no point in a detailed discussion here, because shortly after publication of this book the consultation document will be superceded by a consultation response document or other announcements. It is sufficient to note that the new CGT charge will apply to all residences held by non-residents, whether individuals, trusts or companies.

---

1 See 49.1 (Territorial scope of CGT).

2 The document is not short, at 41 pages, but only 11 of those pages actually contain a discussion of the proposed reforms.

3 HMRC & HM Treasury, "Implementing a capital gains tax charge on non-residents: consultation" (March 2014) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/298759/CGT_non-residents_condoc.pdf*

The charge will be restricted (for now?) to residential accommodation:

> The government does not intend to change the tax treatment for property, such as office and industrial buildings, which cannot be used as and are not in the course of being converted to a place to live.

There is no relief for property let to third parties (unlike ATED):

> 2.4 However, it would not be right to exclude all disposals of property used for commercial purposes, for example residential property used to generate income from letting. UK residents pay CGT when they sell a home that is not their main residence, including residential property that they have bought for rental purposes. The government believes that it would be unfair to charge CGT on residential property disposed of by a UK person who has the property as a second home, and not to do likewise when an equivalent residential property is disposed of by a non-resident landlord. The government also believes that gains made on disposals of residential property used as an investment should be subject to CGT.
> 2.5 In this respect, the CGT charge on non-residents will differ from the approach the government has introduced for enveloped property where ATED and the ATED-related CGT charge do not apply to property rental businesses.

It is difficult to find a convenient label for the new charge. "The Nonresidents Residence charge" (or variants) will not do. The best I can suggest is: **"the non-residents dwellinghouse charge"**.

74.2.1 *Double taxation relief*

Article 13(1) OECD model provides:

> Gains derived by a resident of a Contracting State from the alienation of immovable property referred to in Article 6 and situated in the other Contracting State may be taxed in that other State.

Article 13(5) OECD Model provides:

> Gains from the alienation of any property, other than that referred to in paragraphs 1, 2, 3 and 4, shall be taxable only in the Contracting State of which the alienator is a resident.

There is no relief where a DTA follows OECD model form, as the gain arises from UK situate land. Taxing rights are given to the residence state and not the source state, but not for land. Instead, foreign taxation should

give a credit for UK tax - but note there are likely to be different methods of computing gains.

74.3 Home owned by company: Benefit in kind charge

The charge on living accommodation is to be found in ss.97 and 102 ITEPA:

> **97 Living accommodation to which this Chapter applies**
> (1) This Chapter applies to living accommodation provided for—
> (a) an employee, or
> (b) a member of an employee's family or household,
> by reason of the employment.
> ...
> **102 Benefit of living accommodation treated as earnings**
> (1) If living accommodation to which this Chapter applies is provided in any period—
> (a) which consists of the whole or part of a tax year, and
> (b) throughout which the employee holds the employment,
> the cash equivalent of the benefit of the accommodation is to be treated as earnings from the employment for that year.
> (2) In this Chapter that period is referred to as "the taxable period".

The EI Manual contains much interesting material on these provisions which cannot be set out here for lack of space.

74.4 "Employee" "family" and "household"

74.4.1 *"Employee"*

For the meaning of "employee" see 22.2 ("Employer", "employee" and "employment") and 74.8 (Who is a shadow director?).

Former employees are not caught. HMRC agree. The EI Manual provides:

> **EIM11408 - Living accommodation: meaning of by reason of the employment: provided by someone other than the employer** [February 2006]
> ...Part 3 Chapter 5 ITEPA 2003 does not apply to a pensioner or a former employee. But if the continued use of living accommodation is provided after termination of employment see EIM12805 onwards [Termination payments and benefits]...

The disguised remuneration rules would need consideration.

74.4.2 *"Family"*

Section 721(4) ITEPA defines "family":

> For the purposes of this Act the following are members of a person's family—
>
> (a) the person's spouse or civil partner,
>
> (b) the person's children and their spouses or civil partners,
>
> (c) the person's parents, and
>
> (d) the person's dependants.

Stepchildren are excluded, as are parents-in-law. They will however still qualify as family if they are dependants.

Illegitimate children do not count as "children"; see s.721(6) ITEPA.[4] This is anomalous by contemporary standards but it will not often be relevant and the parent of illegitimate children is not likely to complain. Section 721(6) should obviously be repealed.

74.4.3 *"Household"*

Section 721(5) ITEPA provides:

> For the purposes of this Act the following are members of a person's family or household—
>
> (a) members of the person's family,
>
> (b) the person's domestic staff, and
>
> (c) the person's guests.

74.5 "By reason of the employment"

The expression "by reason of the employment" is extended by s.97(2) ITEPA so it does not mean "by reason of the employment" at all. In order to follow s.97(2) one needs to read it with s.97(1):

> (1) This Chapter applies to living accommodation provided for—
>
> (a) an employee, or
>
> (b) a member of an employee's family or household,
>
> by reason of the employment.
>
> (2) Living accommodation provided for any of those persons by the employer is to be regarded as provided by reason of the employment ...[5]

---

4 In Scots law there are no illegitimate children so this does not apply to Scots domiciled individuals: s.21 Family Law (Scotland) Act 2006.

5 For completeness: s.97(2) continues:

"unless—

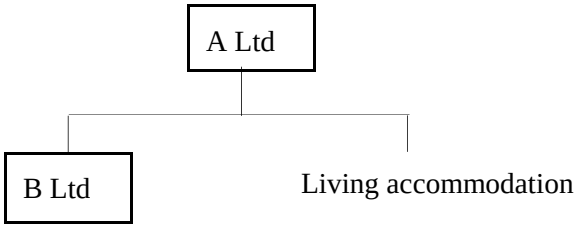
(a) the employer is an individual, and

Thus:

(1) Where the accommodation is provided by the employer, one does not ask whether it is actually provided by reason of employment: it is deemed to be so provided.

(2) Where accommodation is provided by a person other than the employer, the living accommodation charge only applies if the accommodation is actually provided by reason of the employment.

Suppose a company A owns living accommodation (occupied by T) and holds another company, B Ltd:



If T is an employee of A Ltd, T is in principle taxable on the living accommodation. The fact that the property is not provided by reason of the employment is irrelevant as the deeming provision in s.97(2) applies. If T is an employee of B Ltd, T is only taxed if T actually occupies the property by reason of T's employment.

B Ltd is (by definition) a person involved in providing the accommodation[6] but B Ltd is not deemed to provide the accommodation.

74.5.1 *Third party benefits*

The EI Manual provides:

> **EIM20503 - The benefits code: "by reason of the employment": expenses paid and benefits provided by someone other than the employer: third party benefits** [December 2011]
> Expenses payments and benefits made or provided by someone other than the employee's employer are often called "third party benefits". Such payments and benefits are within the rules in the benefits code (EIM20006) where they are made or provided "by reason of the employment" (EIM20501) under the normal meaning of those words.

(b) the provision is made in the normal course of the employer's domestic, family or personal relationships."

The exception is not relevant here.

6 See 74.10.1 (Person involved in providing the accommodation).

But they are not chargeable under those rules if they are otherwise chargeable as earnings, for example, under Section 62 ITEPA 2003. Examples of benefits which are chargeable as earnings are at EIM00530 onwards.

Interaction of "by reason of the employment" with Section 62 ITEPA 2003

It is important to understand the distinction between Section 62 on the one hand, and Sections 70(1) and 201(2) on the other hand. Section 62(1) applies to earnings "in relation to an employment", including anything that is an "emolument of the employment" (Section 62(2)(c)). Section 70(1) and Section 201(3) apply to expense payments and benefits provided "by reason of the employment". Section 62 is based on what was previously Section 19 ICTA 1988, which charged to tax emoluments "from an employment". Case law shows that the phrase "by reason of the employment" has a wider meaning than "from the employment" (EIM00600). The words "from the employment" are not reproduced in Section 62 but earnings chargeable under that section include emoluments "of the employment" and in this context "of the employment" has the same meaning as "from the employment".

Case law guidance: by reason of the employment

In *Wicks v Firth* (56 TC 338) Lord Denning said that "by reason of the employment" covered cases where an employee would not have received a benefit unless he had been an employee. The employment must be one of the causes of the benefit being provided. It need not be the sole cause or even the main one. But it must be an operative cause in the sense that it was a condition of the benefit being granted.

In the same case Lord Oliver said that the question to ask is "what is it that enables the person concerned to enjoy the benefit?" If the answer to that question properly includes "the employment" as one of the factors then that is "by reason of" the employment.

In *Mairs v Haughey* (66 TC 273) Lord Chief Justice Hutton preferred Lord Oliver's way of expressing the test. In particular where the employment was only an incidental factor in past history, and not a current reason for the benefit being provided, his view was that did not amount to "by reason of employment".

These judicial comments were given as general observation and whilst they carry weight they are not a legally binding restriction on the meaning of the words "by reason of". In practice you can normally assume that a benefit which is provided by someone other than the employer and which is plainly connected with the employee's employment has been provided by reason of the employment...

The EI Manual provides:

> **EIM11408 - Living accommodation: meaning of by reason of the employment: provided by someone other than the employer** [February 2006]
> ... Where the living accommodation is provided by someone other than the employer, it is necessary to show that the individual's employment is a factor in its provision. The employment need not be the main reason or the only one so long as it is a factor (see EIM20503).

This goes too far and is not consistent with the first passage cited above.

74.6 Accommodation available but not used

EIM provides:

> **11405 Living accommodation: meaning of provided: the legislation** [February 2006]
> ...
> Provided is not defined in the legislation and its meaning has not been considered by the courts in relation to a charge under s.145 ICTA 1988. (s.145 has now become part of Part 3 Chapter 5 ITEPA 2003). The word provided must be given its ordinary dictionary meaning of supplied or furnished with a thing.
> In some cases provided will mean available for use whereas in others it will mean actually used (see EIM11406 for more detail). The meaning of provided is often an issue in the case of provided holiday living accommodation.
> **11406 Living accommodation: Meaning of provided: Practical considerations** [February 2006]
> For details of the relevance of the word "provided" in living accommodation cases see EIM11405.
> In deciding in a particular case whether provided means available for use, or means actually used, the following questions should be asked.
> - Who can use the living accommodation? We accept that if living accommodation is genuinely available for use by more people than could actually use it at any one time then provided only means the periods actually used. For example if five unrelated employees were allowed to use an employer owned two bedroom holiday villa we would only seek a provided living accommodation charge on each employee for the period in which that employee actually used the villa.
> - Why was the living accommodation bought or rented and how has it been used since acquisition? If the living accommodation was

bought as holiday accommodation for a director and family, provided is likely to mean available for use. By contrast if it was bought as a genuine letting business by the employer and has been let out commercially then provided will only mean the periods of actual use by the employee.

For examples illustrating these points see example EIM11421 onwards.

EIM 11421 to 11423 provides three examples:

11421. Living accommodation: Meaning of provided: Example 1 [October 2007]

[Example 1 is as follows:]

A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company. *The employer advises that the sole reason the property was bought was as a holiday home for the husband and wife. It has only been used by them as a holiday home.*

[Emphasis added to show how example 1 differs from the others]

We would argue in this case that provided is equivalent to available for use. Assuming that the flat was habitable for the whole of the year we would seek a benefit under Part 3 Chapter 5 measured on availability for the whole of the year. The employer may argue that the husband and wife work full time and that this prevents them using the flat for more than the 4 weeks in the year of actual use and so they are effectively only provided with it for 4 weeks. We do not accept that argument.

If the cost of the accommodation exceeds £75,000, then the amount of the cash equivalent would be calculated in accordance with s.106 ITEPA 2003 (see EIM11472). As the annual value is based on the open market rental, under ESC A91b the Inland Revenue restricts the cash equivalent of the benefit to step 1 of s.106. This would mean that the cash equivalent for the tax year would be £15,600 (£500 × 26 + £100 × 26). Under s.108 that would be split between the husband and wife in whatever way was just and reasonable, presumably half each in this case (see EIM11472).

11422. Living accommodation: Meaning of provided: Example 2 [October 2007]

[Example 2 is as follows:]

A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company. *The company bought the property to let as a commercial letting business. They have employed professional agents to let the property and have managed to let the property for*

12 weeks of the year in addition to the period it was used by the husband and wife directors.

[Emphasis added to show how example 2 differs from the others]

In this case we would accept that provided is equivalent to actual use.

If the cost of the accommodation exceeds £75,000, then the amount of the cash equivalent would be calculated in accordance with s.106 ITEPA 2003 (see EIM11472). As the annual value is based on the open market rental, under ESC A91b the Inland Revenue restricts the cash equivalent of the benefit to step 1 of s.106. This would mean that the cash equivalent for the tax year would be £1,200 (£15,600 × 4/52). Under s.108 ITEPA 2003 that would be split between the husband and wife in whatever way was just and reasonable, presumably half each in this case (see EIM11472).

You may ask why the s.105 ITEPA 2003 charge is not £1,600 (being 3 weeks at £500 in the skiing season and 1 week at £100 outside the season). The answer is that the wording of s.105(3) requires us to look at a proportion of the annual rent rather than the rent for the actual weeks it was used.

11423. Living accommodation: Meaning of provided: Example 3 [December 2006]

[Example 3 is as follows:]

A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company. *The employer says that the property was bought to let commercially and for the use of other employees of the company. In fact there have been no commercial lettings during the year and it has only been used for one week of the year by an employee of the company who was the director's secretary.*

[Emphasis added to show how example 3 differs from the others]

This is a case where in practice we would seek to test whether what the employer was telling us was correct. For example, what if any evidence is there of attempts to let the property commercially or to advise other employees of the company of its availability for use by them? Based on that evidence it is then a matter of judgement whether in reality the sole reason the property was bought was as a holiday home for the husband and wife directors, in which case the tax consequences would be as in example EIM11421. Or it may be that genuine attempts have been made to let the property commercially and make it available for use by other employees of the company, in which case the tax consequences in example EIM11422 will follow.

74.7 Shadow directors

The House of Lords decided in *R v Dimsey & Allen* 74 TC 263 that the benefit in kind provisions apply to shadow directors. The reasoning continues to apply under ITEPA. The charge is unfair to a shadow director who does no work for the company. Income tax should be a tax

on income. This is a tax on nothing.[7]

EI Manual states:

> **11413 Living accommodation: Avoidance area: Shadow directors** [February 2006]
>
> A person in accordance with whose directions or instructions the directors of a company are accustomed to act is deemed to be a director of that company by s.67(1) ITEPA. Where such a person (known as a shadow director) is provided with living accommodation by the company the individual will be within Part 3 Chapter 5 ITEPA in the same way as if the individual had held a formal appointment as a director. ...
>
> Many shadow directors are individuals who, although not domiciled in the UK, have come to work and reside here. In order to avoid a possible charge to inheritance tax, which could be imposed if such an individual died whilst working in the UK, an arrangement is made to set up an offshore company that owns the UK property in which the individual lives. Where the individual is a shadow director of that offshore company s.97(2) ITEPA deems the UK property to be provided to the shadow director by reason of the deemed employment.

In practice taxpayers (if they have considered the matter at all) generally seem to have taken the view on their facts that they are not shadow directors. HMRC have themselves had to identify the cases suitable for investigation. But in the author's experience even cases that HMRC have identified are not often pursued with much gusto. Perhaps (this is surmise) HMRC "officially" take the point to deter IHT planning, but at the same time don't bother much about it in practice because of the unfairness of the charge. If so, the tactic (while contrary to the rule of law) works up to a point. Taxpayers cannot afford to plan on the assumption that HMRC's benign neglect of the provisions will apply to them.

74.8 Who is a shadow director?

Section 67(1) ITEPA provides:

> In the benefits code "director" ... includes any person in accordance with

7 The problem did not unduly concern the House of Lords because of the countering unfairness to HMRC of the case where the services of a shadow director were as valuable as a full-time employee. It appears that two wrongs made a right to tax.

> whose directions or instructions the directors of the company (as defined above) are accustomed to act.

Such a person is referred to as a "shadow director".[8]

In *Secretary of State for Trade and Industry v Deverell* Morritt LJ comments on this in numbered paragraphs:[9]

> (1) The definition of a shadow director is to be construed in the normal way to give effect to the parliamentary intention ascertainable from the mischief to be dealt with and the words used. In particular, as the purpose of the Act is the protection of the public and as the definition is used in other legislative contexts, it should not be strictly construed because it also has quasi-penal consequences in the context of the Company Directors Disqualification Act 1986.

This suggests that the comments in *Deverell* will apply in all contexts where the standard definition of "shadow director" is used, including tax contexts. It is difficult to argue that the "shadow director" concept should have a different meaning in a tax context than in the director disqualification context of *Deverell*. But *Deverell* is considering "shadow directorship" in the context of a commercial trading company. The position of a relatively quiescent property holding company is different.

> ... (2) The purpose of the legislation is to identify those, other than professional advisers, with real influence in the corporate affairs of the company.

This paraphrase does not take us very far because it only raises the question as to what is meant by "real[10] influence".

> But it is not necessary that such influence should be exercised over the whole field of its corporate activities. ...

This is uncontentious. The income tax charge could apply where a trust held a company holding both a home and investments, even though the

---

8 A note on terminology. This useful and now familiar label was first used in the Companies Act 1980. The wording of the concept behind the label goes back to the Companies (Particulars as to Directors) Act 1917.

9 [2001] Ch 340 at p.354. *cf.* Kerr LJ's comment on "quotable pontific paragraphs, preferably numbered" in his readable memoir *As Far as I Remember*, Hart Publishing, (2006) p.285.

10 The dangerous and beguiling word "real" is normally an indicator of vague if not sloppy legal thinking.

"shadow director" did not give "instructions" relating to the investments but only to the home.

> (3) Whether any particular communication from the alleged shadow director, whether by words or conduct, is to be classified as a direction or instruction must be objectively ascertained by the court in the light of all the evidence.

Obviously.

> In that connection I do not accept that it is necessary to prove the understanding or expectation of either giver or receiver. In many, if not most, cases it will suffice to prove the communication and its consequence. Evidence of such understanding or expectation may be relevant but it cannot be conclusive.

This is extraordinary. "Directions or instructions" are a subset of "communications" and the feature that distinguishes them is that a person giving instructions expects them to be followed and the person receiving them understands this.

> Certainly the label attached by either or both parties then or thereafter cannot be more than a factor in considering whether the communication came within the statutory description of direction or instruction.

This at least is correct.

> (4) Non-professional advice may come within that statutory description. The proviso excepting advice given in a professional capacity[11] appears to assume that advice generally is or may be included.

This is equally extraordinary, for the concept of "directions or instructions" is the antithesis of the concept of "advice". The distinguishing feature is that the former is mandatory and the other is not. Of course, one may slide into the other. For instance, if a solicitor advises a company that a particular act is required by law, that failure to act would be a criminal offence, and that if the company broke the law the solicitor

---

11 See s.67(2) ITEPA:

> "... a person is not to be regarded as a person in accordance with whose directions or instructions the directors of the company are accustomed to act merely because the directors act on advice given by that person in a professional capacity."

would refuse to act, such advice may arguably be characterised as a direction or an instruction. Since the proviso excepting advice given in a professional capacity can be taken to refer only to this situation it does not shed any light on the general meaning of "shadow director". The inference from the proviso excepting advice is invalidly drawn.[12]

> Moreover the concepts of "direction" and "instruction" do not exclude the concept of "advice" for all three share the common feature of "guidance".

The less said about this line of reasoning the better.

> (5) It will, no doubt, be sufficient to show that in the face of "directions or instructions" from the alleged shadow director the properly appointed directors or some of them cast themselves in a subservient role or surrendered their respective discretions. But I do not consider that it is necessary to do so in all cases. Such a requirement would be to put a gloss on the statutory requirement that the board are "accustomed to act" "in accordance with" such directions or instructions. It appears to me that Judge Cooke, in looking for the additional ingredient of a subservient role or the surrender of discretion by the board, imposed a qualification beyond that justified by the statutory language.

If the statutory language were: "in accordance with whose *wishes* the directors were accustomed to act" this would be a fair comment. But the expression "directions or instructions" shows that the position must be one where the shadow director commands and the properly appointed directors obey.

The points made in the passage are wholly negative. That is, in determining the issue of "shadow directorship":

---

12 The Court of Appeal overlooked the explanation in *Gore-Browne on Companies* (loose-leaf), para 25.4.2:

> "The saving for professional advice might appear, at first sight, to support a wider interpretation of the definition, for the saving would be unnecessary unless a wider meaning were given to that definition. There are two possible explanations. The first, and probably correct, explanation is that the saving appears as a result of pressure from the relevant professions to ensure that no attempt can be made even to argue that their activities are, as such, within the scope of shadow director provisions in company legislation. The second is that it is intended to deal with the case where professional advice is obtained from a person who happens to be a member of the company and, as an ‹insider', potentially a shadow director."

(1) The understanding or expectation of the parties is *not* conclusive.
(2) The label attached by the parties is *not* conclusive.
(3) The fact that the communication is "advice" is *not* conclusive (except in the case of professional advice).
(4) The fact that the properly appointed directors surrender their discretions or act in a "subservient" role is *not* essential.

This does not answer the question: how *does* one identify a shadow director? The mere fact that there is a stream of communications from the individual to the company, which is acted on by the company, is not conclusive. The author regularly sends "communications" to the internet bookshop Amazon, and Amazon act on those communications without fail. Yet the author is not a shadow director of Amazon. The author regularly sends directions (a cheque is a direction) to his bank and Barclays act on those directions without fail. Yet the author is not a shadow director of Barclays Bank. In the 4th edition of this work I therefore concluded:

> that one can expect some back-tracking, refinement or qualification from the Courts in cases they regard as more meritorious than that of Mr. Deverell.

This has now been confirmed by *Ultraframe v Fielding*:[13]

> 1267 ... where the alleged shadow director is also a creditor of the company, he is entitled to protect his own interests as creditor without necessarily becoming a shadow director.
> 1268 [Counsel] submitted that it is critical to distinguish the position of a lender (whether or not also a shareholder) from that of a director. A lender is entitled to keep a close eye on what is done with his money, and to impose conditions on his support for the company. This does not mean he is running the company or is emasculating the powers of the directors, even if (given their situation) the directors feel that they have little practical choice but to accede to his requests. Similarly with customers who may, because of their buying power, be able effectively to dictate conditions to their suppliers (or the other way around). In other words a position of influence (even a position of strong influence) is not necessarily a fiduciary position. To find otherwise would place a wholly unfair and unnatural burden on men of business. In broad terms, I accept this submission.

13 [2005] EWHC 1638, [2007] WTLR 835.

The approach which applies to a creditor of the company also applies to a beneficiary of a trust which holds the company: they are entitled to "protect his own interests … without necessarily becoming a shadow director … In other words a position of influence (even a position of strong influence) is not necessarily a fiduciary position [ie is not necessarily a shadow directorship]."

HMRC sometimes argue that where someone resides in a property held by a company which is held by a trust of which that person is a beneficiary, it is (at least) highly likely that that person must be a shadow director.[14] This is unjustified for the reason set out in *Ultraframe*.

Suppose a person treats the property owned by the company as their own and has no dealings with the directors: they just ignore them. They do nothing (except perhaps charge their fees). In such a case the company may be a sham (or nomineeship). Whether or not that is so, the individual is not a shadow director. They give no instructions.

A non-resident person may be a "shadow director".

74.8.1 *When is an agent of a company a shadow director?*

HMRC accepted that the activities of an agent appointed by trustees to manage the day to day affairs of a trust are not normally relevant in determining the place of general administration (formerly relevant for the purposes of CGT trust residence).[15] It is suggested that a similar principle applies in the context of shadow directorship. An agency agreement under which the occupier of a property is responsible for routine maintenance matters on behalf of the company would not make the individual a "shadow director" as long as the decision to enter into contract was properly made by the directors and the directors properly supervise the work of the individual. This should not be difficult if the directors understand their duties are to all beneficiaries of the trust (not just to the settlor) and if the individual occupier of the property also understands this. It would be different if the agency agreement covered matters not usually delegated by an investment company to an agent.

---

14 Note that there is no support for this view in the HMRC Manuals. Employment Income Manual 11413 [February 2006] states correctly that *where* an individual residing in property is a shadow director, there is a benefit-in-kind charge. It conspicuously does *not* state that the mere fact of occupation makes a shadow directorship "highly likely".

15 See the 5th edition of this book, para 5.6.2.

74.8.2 *Arranging that an occupier is not a shadow director*

Suppose an existing company purchases a home on the open market for a UK resident foreign domiciliary. The choice of a home is a personal one and the individual would normally have to give a "communication" to the company which HMRC may regard as "directions or instructions". So it would normally be difficult to ensure that the individual was not a shadow director (at least applying *Deverell* at face value).

The position is different if:

(1) trustees purchase property directly, and
(2) the trustees transfer the property to a foreign company on their own initiative and without reference to the occupier.

The trustees may reason that if the life tenant dies (or on a ten year anniversary), the UK property would not be excluded property and a charge to inheritance tax would arise – the liability for which would fall on the trust fund. In discharge of their fiduciary duty they could transfer the property to a foreign company to create excluded property and protect the trust from the liability. The point is that the occupier has *not* instructed or even requested the company to purchase the property for them.[16] SDLT makes this expensive but the variant idea of assigning a contract entered into by the trustees may be practical.

It would be best if the directors and trustees were separate persons. All communications should be through the trustees and not the directors of the company. If the foreign domiciliary desires to sell and, perhaps, purchase another property, they should communicate their wishes to the trustees. Then:

(1) The trustees could put the company into liquidation. The liquidator would sell the property.
(2) Alternatively, the trustees may sell the company. That has stamp duty advantages, and should be attractive for a purchaser who is a foreign domiciled individual or non-resident trust.

The procedure may then be repeated for a new purchase. In these circumstances it would continue to be difficult for HMRC even to argue that the occupier was a shadow director.

74.9 The cash equivalent: ss.105 and 106 computations

The charge is on the "cash equivalent". Section 103 ITEPA provides:

---

16 I am grateful to Peter Vaines for this suggestion.

Method of calculating cash equivalent
(1) The cash equivalent is calculated—
(a) under s.105 if the cost of providing the living accommodation does not exceed £75,000; and
(b) under s.106 if the cost of providing the living accommodation exceeds £75,000.

Thus there are two methods of calculating the cash equivalent, here called a s.105 computation and a s.106 computation. This is for historical reasons, the s.106 computation having been introduced by the FA 1983 to supplement the ancestor of s.105. This structure makes the law twice as complicated as it need be.

74.10 Cost of providing accommodation

One needs to know the "cost of providing living accommodation":
(1) in order to decide between the s.105 and s.106 computation;
(2) in order to make the s.106 computation (if applicable, as it usually is).
This expression is defined in s.104:

General[17] **rule for calculating cost of providing accommodation**
For any tax year the cost of providing living accommodation is given by the formula A + I – P

In short, *A* is **A**cquisition cost, *I* is **I**mprovement cost, and *P* is **P**ayment of reimbursement. In full detail:

A is any expenditure incurred in acquiring the estate or interest in the property held by a person involved in providing the accommodation,
I is any expenditure incurred on improvements to the property which has been incurred before the tax year in question by a person involved in providing the accommodation, and
P is so much of any payment or payments made by the employee to a person involved in providing the accommodation as represents—
(a) reimbursement of A or I, or
(b) consideration for the grant to the employee of a tenancy or sub-tenancy of the property.

I consider reimbursement further in 74.17 (Property purchase financed by the foreign domiciliary).

---

17 For the exception see 74.13 (Revaluation of cost in cases of delayed occupation).

74.10.1 *Person involved in providing the accommodation*

Section 112 ITEPA provides the wide definition:

> For the purposes of this Chapter "person involved in providing the accommodation" means any of the following—
> (a) the person providing the accommodation;
> (b) the employee's employer (if not within para (a));
> (c) any person, other than the employee, who is connected[18] with a person within para (a) or (b).

This defined phrase is only used in the definition of "cost of providing living accommodation".[19] ITEPA EN explains:

> 412. This definition makes it clear that it is necessary to look beyond the employer and the apparent owner of an interest in the accommodation. This is anti-avoidance legislation to counter schemes which depress the cost to the employer by using intermediate owners of interests.

74.11 Accommodation costing £75,000 or less: section 105 computation

Section 105 applies where the cost of providing accommodation does not exceed £75,000. This was a meaningful figure when the legislation was introduced in 1983 but inflation, the Chancellor's friend, has whittled away the real value of this limit so it must be exceptional now to find a purchase of less than £75,000. One might think the s.105 computation was a dead letter and one can turn directly to s.106. But s.106 refers back to s.105 so one needs to make the s.105 computation even in a s.106 case.

Section 105 ITEPA provides:

> **Cash equivalent: cost of accommodation not over £75,000**
> (1) The cash equivalent is to be calculated under this section if the cost of providing the living accommodation does not exceed £75,000.
> (2) The cash equivalent is the difference between—
> (a) the rental value of the accommodation for the taxable period, and
> (b) any sum made good by the employee to the person at whose

18 Section 718 ITEPA provides:
"Section 993 of ITA 2007 (how to tell whether persons are connected) applies for the purposes of this Act."

19 See 74.10 (Cost of providing accommodation) and 74.13 (Revaluation of cost in cases of delayed occupation).

> cost the accommodation is provided that is properly attributable to its provision.

The key concepts are "rental value of the accommodation" and "making good".

74.11.1 *"Rental value of the accommodation"*

As from 22 April 2009, s.105 ITEPA provides:

> (3) The "rental value of the accommodation" for the taxable period is (subject to subsections (4) and (4A) the rent which would have been payable for that period if the property had been let to the employee at an annual rent equal to the annual value. ...
> (4) Subsection (4A) applies where—
> (a) a rental amount is payable by the person ("P") at whose cost the accommodation is provided in respect of the whole or part of the taxable period ("the relevant period"), and
> (b) the amount so payable is payable at an annual rate greater than the annual value.
> (4A) Where this subsection applies—
> (a) subsection (3) does not apply to the relevant period, and
> (b) instead the "rental value of the accommodation" for the relevant period is the rental amount payable by P in respect of the relevant period.
> (4B) A reference in subsection (4) or (4A) to a rental amount payable by P in respect of the relevant period is to the sum of—
> (a) any rent for the period payable by P, and
> (b) any amount attributed to the period in respect of a lease premium (see sections 105A and 105B)
> (5) If the rental value of the accommodation for the taxable period does not exceed any sum made good by the employee as mentioned in subsection (2)(b), the cash equivalent is nil.

The key expression is "annual value". This is defined in s.110 ITEPA but it is not usually necessary to refer to that for UK property. ITEPA Explanatory Note states:

> 404. [Section 110] does not affect the Inland Revenue practice of using the gross rateable value as a proxy for "annual value". That practice will continue. The main use of this section is to provide guidance on how to arrive at the annual value of properties for which rent is not paid and in practice is only needed in cases where no gross

rateable value can be found.[20]

The EI Manual provides:

> **11434 Living accommodation: Meaning of annual value for United Kingdom properties** [February 2006]
> The amount of annual value for UK properties is set out in the table below.
>
Country	**When first valued**	**Annual value to take**
England & Wales	All cases	The 1973 gross rating value
Northern Ireland	All cases	The 1976 gross rating value
Scotland		100/270 × 1985 gross rating value
Anywhere in UK	No gross rating value set	Ask the appropriate District Valuer to confirm any estimated figure provided by the employer that you want to check.[21]

> For the formula to convert a net rating value figure to a gross rating value figure see EI Manual 11438 [March 2009].

Thus for most purposes the s.105 computation is rateable value less sums "made good" to the employer. That is usually a trivial amount which has no relation to the value of the benefit of the living accommodation. It is a substantial amount in two cases:

(1) where the company employer pays a market rent for the property;
(2) where the property is not UK situate (and so there is no rateable value).

This practice (which is concession not law) exists for historical reasons. It is not surprising the Tax Law Rewrite did not think it appropriate to express all this in ITEPA. The rules are incoherent.

74.11.2 *"Making good": Meaning*

The EI Manual provides:

---

20 Likewise the EN at Change 23:

> "These provisions [ss.110 and 207 ITEPA] will clarify how to find annual values in respect of those properties for which the practice of using gross rateable values or a proxy for them is inapplicable – for example overseas properties. In the case of both these and other properties, all the current practices used in quantifying the cash equivalent of the benefit of living accommodation will continue."

21 The Manual continues:

> "If no such estimate is provided or the estimate is not acceptable the District Valuer will provide a (not negotiated) figure. If the taxpayer does not accept that figure the District Valuer will try to agree a figure with the taxpayer. For the procedure for referring to the District Valuer see EI Manual 11437 [February 2006]."

> **21120 The benefits code: What is meant by "making good"** [July 2006]
> "Making good" simply means giving something in return for the benefit. What is being made good is the expense incurred by the employer or other person providing the benefit. It follows that in order to make good that expense the employee will give money, or something that can be measured in money. Usually the employee will "make good":
> - by a direct payment or
> - by deduction from salary or
> - by a suitable debit to the employee's current account in the employer's books and records.
>
> Any of these methods is acceptable.
> The giving of services by the employee, or anything that is not measured in money terms is not "making good", see *Stones v Hall* (60 TC 737).
> **(This text has been withheld because of exemptions in the Freedom of Information Act 2000)**[22]
> As regards "making good" by waiver of remuneration see EI Manual 21122.

It is clearly "making good" if:
(1) the company pays the costs of maintenance and insurance; and
(2) the individual reimburses the company by a cash payment.
Does the employee make good the cost if they pay the cost of maintenance and insurance directly? Section 110 ITEPA envisages that this expenditure will be paid by the employer. In addition, the maintenance of the building is probably not a "sum" made good. EIM Manual is equivocal:

> **11439. Living accommodation: annual value of UK property: Employee responsible for repairs or insurance.** [July 2006]
> ...
> An employee may be responsible for the cost of repairs or insurance under the terms of his or her lease or employment. *(This text has been withheld because of exemptions in the Freedom of Information Act*

22 [Author's Note] The "text withheld" announcement was added in June 2006. Previously the Manual stated "In any case where the taxpayer argues that an interest-free loan has been made to this employer specifically to make good the cost or value of a benefit, make a submission to Personal Tax (Technical), Solihull." That instruction probably survives in the withheld text.

2000.)[23] As regards the discharge of the employee's pecuniary liability in respect of such items *see* EIM00580.

Note that the payment of a sum "making good" may constitute taxable property income of the company which receives it. The IHT and CGT implications may also need to be considered, but the sums involved are not usually significant.

74.11.3 *Making good: Timing*

EIM provides:

> **21121. The benefits code: When must making good take place?** [February 2006]
> The legislation does not set a time limit on the "making good". This will usually happen shortly after the expense is incurred by the person providing the benefit. But you need not object to a belated "making good" if it is done within a reasonable time of the employee becoming aware that the chargeable benefit can be reduced, in whole or in part, by reimbursing the expense incurred by the provider.
> What constitutes a "reasonable time" will depend on the facts of the case. Do not allow a deduction for "making good" which takes place after a charge to tax on the benefit concerned has become final and conclusive.

74.12 Accommodation over £75,000: section 106 computation

Section 106 ITEPA provides:

> **Cash equivalent: cost of accommodation over £75,000**
> (1) The cash equivalent is calculated under this section if the cost of providing the living accommodation exceeds £75,000.
> (2) To calculate the cash equivalent—
> *Step 1* Calculate the amount that would be the cash equivalent if s.105 applied (cash equivalent: cost of accommodation not over £75,000).

See 74.11 (Accommodation costing £75,000 or less: section 105

---

23 The text formerly read:
"If an employee claims an adjustment to the annual value (derived from the table in EI Manual 11434) because the facts of an employee's case are not those envisaged by s.110 ITEPA, make a full report to Personal Tax (Technical), Solihull."
It seems a safe bet that that passage survives in the withheld text.

computation).

> *Step 2* Calculate the following amount ("the additional yearly rent")—
> ORI × (c) – £75,000)

In short, *ORI* is **O**fficial **R**ate of **I**nterest; *C* is **C**ost. In full detail:

> ORI is the official rate of interest in force for the purposes of Chapter 7 of this Part (taxable benefits: loans) on 6 April in the tax year, and
> C is the cost of providing the accommodation calculated—
>
> (a) in accordance with s.104 (general rule for calculating cost of accommodation),[24] or
>
> (b) in a case where s.107 applies (special rule for calculating cost of providing accommodation), in accordance with that section instead.[25]

The label "additional yearly rent" is misleading: the "additional yearly rent" calculated in this way will not bear a close relationship with any actual market rent.

> *Step 3* Calculate the rent which would have been payable for the taxable period if the property had been let to the employee at the additional yearly rent calculated under step 2.

This step reduces the "additional *yearly* rent" to that for the "taxable period" (defined in s.102(2)).

> *Step 4* Calculate the cash equivalent by—
>
> (a) adding together the amounts calculated under steps 1 and 3, and
>
> (b) (if allowed by subsection (3)) subtracting from that total the excess rent paid by the employee.
>
> (3) In step 4—
>
> (a) para (b) only applies if, in respect of the taxable period, the rent paid by the employee in respect of the accommodation to the person providing it exceeds the rental value of the accommodation for that period as set out in s.105(3) or (4)(b), as applicable, and
>
> (b) "the excess rent" means the total amount of that excess.

In short, the charge is (1) the s.105 computation (rateable value) and (2) (official rate of interest on purchase price less £75,000) less rent.

---

24 See 74.10 (Cost of providing accommodation).

25 See 74.13 (Revaluation of cost in cases of delayed occupation).

This works (more or less) where the s.105 computation is based on the nominal amount of rateable value. It gives double taxation where the s.105 computation is based on actual market rental value. ESC A91 gives relief here:

> *Living accommodation provided by reason of employment*
> This concession applies to living accommodation treated as earnings under ITEPA 2003 Part 3, Chapter 5. Where ITEPA 2003 s.106 applies and the cash equivalent of the benefit of the accommodation is calculated by reference to the annual rent the property might fetch on the open market, the Inland Revenue will disregard "the additional yearly rent". If "the additional yearly rent" is disregarded then the amount of "the excess rent" is deemed to be nil.[26]

74.13 Revaluation of cost in cases of delayed occupation

Normally the s.106 computation is based on the employer's acquisition cost (ie historic cost). Market value of the property later is not relevant. This rule could favour the HMRC, but as time passes it is likely to favour the taxpayer. In one case only there is an adjustment to market value. Section 107(1) ITEPA provides:

> This section contains a special rule for calculating the cost of providing living accommodation which—
> (a) operates for the purposes of step 2 of s.106(2) (calculating the additional yearly rent), and
> (b) accordingly only operates where the cost of provision for the purposes of s.106(1) (as calculated under s.104) exceeds £75,000.

In practice condition (b) will almost always be satisfied (except perhaps for property purchased many years ago).

Section 107(2) ITEPA provides:

> This section applies if, throughout the period of 6 years ending with the date when the employee first occupied the accommodation ("the initial date"), an estate or interest in the property was held by a person involved in providing the accommodation.
> It does not matter whether it was the same estate, interest or person throughout.

---

26 I do not understand the point of the last sentence, for if the additional yearly rent is disregarded, the "excess rent" is irrelevant.

In short, this condition is that the property has been owned by the company for six years before the employee moves in.
Section 107(3) ITEPA provides:

> For any tax year the cost of providing the living accommodation for the purposes mentioned in subsection (1)(a) is given by the formula—
>
> MV + I – P

In short, *MV* is **M**arket **V**alue; *I* is **I**mprovement cost; *P* is **P**ayments in return. In full detail:

> MV is the price which the property might reasonably be expected to have fetched on a sale in the open market with vacant possession as at the initial date,
>
> I is any expenditure incurred on improvements to the property which has been incurred during the period—
>
> (a) beginning with the initial date, and
> (b) ending with the day before the beginning of the tax year, by a person involved in providing the accommodation, and
>
> P is so much of any payment or payments made by the employee to a person involved in providing the accommodation as represents—
>
> (a) reimbursement (up to an amount not exceeding MV) of any expenditure incurred in acquiring the estate or interest in the property held on the initial date,
> (b) reimbursement of I, or
> (c) consideration for the grant to the employee of a tenancy or sub-tenancy of the property.

This may arise where:
(1) a foreign domiciliary (or trust) purchases a company holding a property acquired more than six years previously;
(2) an individual then occupies the property and becomes a shadow director.

Next is an anti-avoidance provision to block an obvious scheme to devalue MV. Section 107(4) ITEPA provides:

> In estimating MV no reduction is to be made for an option in respect of the property held by—
>
> (a) the employee,
> (b) a person connected with the employee, or
> (c) a person involved in providing the accommodation.

Lastly, for completeness, there is transitional relief where the employee first occupied the property before 31 March 1983: para 21 Sch.7 ITEPA.

74.14 Accommodation provided for more than one employee

Section 108 ITEPA provides:

> **Cash equivalent: accommodation provided for more than one employee**
> (1) If, for the whole or part of a tax year, the same living accommodation is provided for more than one employee at the same time, the total of the cash equivalents for all of the employees is to be limited to the amount that would be the cash equivalent if the accommodation was provided for one employee.
> (2) The cash equivalent for each of the employees is to be such part of that amount as is just and reasonable.

EIM provides at 11411:

> **11411 - Living accommodation: provided to more than one employee in the same period: practical points** [February 2006]
> The following is an example of how s.108 ITEPA 2003 works.
> An employer provides a ten room house for the shared use of three unrelated employees. Each employee has sole use of a bedroom and shared use of the other seven rooms. Without s.108 the cash equivalent of the benefit of the living accommodation provided to each employee would be 80% of the whole house. However s.108 limits the sum of the charges on the three of them to one full charge on the whole house. If there are no special factors each employee will be chargeable on the cash equivalent of a benefit of 33.3% of the cash equivalent for the whole house.
> Section 108 is not relevant in some family situations. For example a husband and wife both work for the same employer and live together in a house provided by their employer. The husband's job is the one that has accommodation provided with it and the wife's does not. The true construction here is that the living accommodation is only provided by the employer to the husband and the wife lives in it with her husband as part of normal domestic arrangements. So the full living accommodation charge would be on the husband with no charge on the wife.
> By contrast for an example of s.108 being relevant in a family situation see example EIM11421.

74.15 Ways to avoid benefit in kind

Ways to avoid the entire benefit in kind charge are (in short):

(1) to ensure that the occupier is

(a) not an officer (ie not a director or company secretary), which is straightforward;
(b) not an employee (which should be straightforward); and
(c) not a "shadow director"; or

(2) not to use a company; or
(3) to reimburse the company for its expenditure.

74.16 Reimbursement as solution to IT charge

Reimbursement of "A" and "I" will solve the s.106 charge if it reduces the "cost of providing the accommodation" to nil (or at least to below £75,000). It does not avoid the s.105 charge **(**but that may be trivial or avoided by "making good" or arranging that the individual is not a shadow director).

74.16.1 *Who makes the reimbursement?*

Reimbursement is only deductible if it is made by the employee. For example, if

(1) a company purchases property;
(2) an individual (F) reimburses the cost;
(3) another individual (G) comes to occupy the property (and is a shadow director);

then F's reimbursement will not reduce the s.106 computation for G. Again, if a member of the family or household of the shadow director occupies the property, and that member of the family or household reimburses the company, that reimbursement will not reduce the s.106 computation for the shadow director. In practice this is not likely to happen often.

The IHT and CGT implications of making the reimbursement need to be considered.

74.17 Property purchase financed by the foreign domiciliary

Sometimes a company structure is set up specifically for the purpose of purchasing the home. That is, there is an arrangement under which:

(1) The individual agrees in principle to purchase a property.
(2) The individual:
(a) lends the purchase price to a company, or
(b) transfers the purchase price to a trust which lends the purchase price to a wholly owned company.

(3) The company makes the purchase.

This section considers whether an arrangement of this kind offers a defence to the benefit in kind charge.

74.17.1 *"Making good" and s.105 computation*

The s.105 computation allows a deduction for:

> any sum made good by the employee to the person at whose cost the accommodation is provided that is properly attributable to its provision.

The taxpayer would have to show that the interest forgone on the interest-free loan from the individual (directly or indirectly to the company):

(1) is a "sum", and

(2) "makes good" the provision of the accommodation.[27]

Whether the interest forgone "makes good" the provision of accommodation is a question of fact. Assuming the reason the interest is forgone is to enable the company to provide the accommodation, this condition should be satisfied.

Whether the interest forgone is a "sum" is a question of law; it is suggested that the word should not be construed strictly or technically, and an amount of interest forgone may be a "sum". See 74.11.2 ("Making good": meaning).

74.17.2 *Loan to company as defence to section 106 computation*

Sums "made good" are not deductible as such in the s.106 computation. Rent is deductible in a s.106 computation but the interest forgone on an interest-free loan is not rent. No-one suggests that the company would be taxable on the interest forgone as property income!

It has been suggested that a company financed by an interest-free loan has not incurred expenditure. If this is so then it is a complete answer to the s.106 charge because the figure *A* in the formula for the cost of providing accommodation is reduced to zero. The suggestion is raised in Brandon, *Taxation of Non-UK Resident Companies and their Shareholders*, paras 5.3.3.8 to 5.3.3.15 citing *Wicks v Firth* [1983] STC 25 at 31:

---

27 It is assumed that the interest forgone exceeds the annual or rateable value of the accommodation, which will normally be the case.

> The scholarships were provided at the cost of ICI and not at the cost of the Trustees because the Trustees with moneys supplied by ICI were only performing fiduciary duties …

However (as Stephen Brandon QC recognises), it is a step from this to argue that a company which is not performing fiduciary duties does not incur expenditure. If the house is in the accounts of the company as an asset, how could it have acquired that asset without "incurring expenditure"? Suppose the boot were on the other foot: a company lent money interest-free to a shadow director to finance his own purchase. Would anyone accept that the company had provided the accommodation purchased by the individual? This is an argument to take *in extremis*.

74.17.3 *Reimbursement by the individual*

In computing the "cost" of providing the accommodation one may deduct payments representing reimbursement. This deduction would reduce the s.106 computation.[28] However, the interest forgone on the loan is not "reimbursement". In addition, it is also not a "payment".

74.17.4 *Release of loan*

A possible solution would be for the individual to release the debt which is due to them from the company.

Statute requires a "payment" representing a reimbursement. It is a moot point whether the release of the debt would be a "payment". One should take the cautious view that it may not be. The matter should be dealt with as follows:

(1) The individual transfers the funds to the company. They should be received in the company's bank account. This should be accompanied by a letter to the company saying: "I have today procured the payment of £X to your account. This is reimbursement for the expenditure you have incurred in acquiring [the property]. However, I require repayment of the debt due to me of £X."
(2) The company may then use its funds to repay its debt due to the individual.

Although this is a circular transaction (the payment being matched by immediate repayment) that does not nullify it for tax purposes: compare *MacNiven v Westmoreland* [2001] STC 237.

---

28 See 74.16 (Reimbursement as solution to IT charge).

If the company incurs additional improvement expenditure in the future, this should be matched by further reimbursements so the total cost of providing the living accommodation (A+I–P) remains less than £75,000.

The reimbursement of the company is not a transfer of value for IHT purposes if the individual is (or is treated as) the beneficial owner of the company. For the same reason the reimbursement is not a disposal by way of gift and so is outside the scope of s.102 FA 1986 (gifts with reservation).

The effect of the gift (the reimbursement) is to increase the value of the shares of the company without any corresponding rise in the CGT base cost. So the gift increases the chargeable gain on the disposal. This should not matter so long as the law remains in its current form.

74.17.5 *Reimbursement: Timing*

When must reimbursement be made? It is considered that the time limit is the same as for "making good". Reimbursement must be done within a reasonable time of the taxpayer becoming aware that the benefit in kind charge can be reduced by reimbursement.[29] In practice HMRC accept this.

74.18 Co-ownership defence to living accommodation charge

This section considers the position where an individual owns a share in the property jointly with the company.

Co-ownership raises similar but not identical issues for all provisions which charge tax on benefits, such as s.87 TCGA, s.731 ITA, s.203 ITEPA, and IHT gift with reservation rules as well as the living accommodation charge. The discussion here is limited to the case where an individual and a company are co-owners. Similar but not identical issues arise with these provisions where an individual and a trust are co-owners.

74.18.1 *The land law position*[30]

The starting point is to ascertain the rights of the co-owners as a matter of land law. Co-owned land in England and Wales is always held on trust. The person(s) holding legal title to the land are here called "the trust-of-

29 See 74.11.3 (Making good: timing)

30 I am grateful to Charles Harpum for his assistance on this section.

land trustees".[31] The position is governed by the Trusts of Land and Appointment of Trustees Act 1996.[32] Section 12(1) TOLATA provides:

> A beneficiary who is beneficially entitled to an interest in possession in land subject to a trust of land is entitled by reason of his interest to occupy the land at any time if at that time—
>
> (a) the purposes of the trust include making the land available for his occupation (or for the occupation of beneficiaries of a class of which he is a member or of beneficiaries in general), or
>
> (b) the land is held by the trustees so as to be so available.

Prior to 1997, a co-owner of land had a right to occupy that land, in the absence of any contrary indication or agreement with the other co-owners:

> It has been well established law ... that a tenant-in-common under a trust for sale has the right to occupy the whole property without payment of rent ...[33]

This co-ownership right has been superseded and replaced by s.12 TOLATA. In *IRC v Eversden*, Lightman J explained:

> On and after 1 January 1997 when the TOLATA came into force, a tenant in common in equity ... was no longer automatically entitled ... to occupation of the property purchased. Section 12 of the TOLATA provided that he should only become so entitled if one of two alternative conditions were satisfied…[34]

While arguments might be advanced to the contrary this analysis should be followed, because it is a clear and workable rule. Otherwise it would

---

31 (The term used in the legislation is "the trustees of land".) The company may be the (or one of the) trust-of-land trustees; it makes little practical difference and no difference at all for tax. (If the company is not a trustee it can apply to court to require the trustees to exercise their powers.) The shares in the company may also be held on trust but that trust is not relevant here.

32 Further consideration is needed for:

(1) Land outside England and Wales.

(2) Jointly owned chattels.

TOLATA does not apply in Northern Ireland. I would be grateful to any reader who could inform me of the position in Scotland.

33 *IRC v Lloyds Private Banking* [1998] STC 559 at p.561; likewise *City of London Building Society v Flegg* [1988] AC 54 at p.81.

34 [2002] STC 1109 at [24] reported 75 TC 340 under the name *IRC v Greenstock's Executors*.

be necessary to consider the pre-1997 law and try to work out the combined effect of that when read with s.12.[35]

In the following discussion, the entitlement to occupy land conferred by s.12(1) is called the "statutory occupation right".

The individual will obviously have a statutory occupation right to occupy the property under s.12 because:

(1) They are a beneficiary under the trust-of-land.
(2) They are beneficially entitled to an interest in possession in the land.
(3) Both conditions (a) and (b) of s.12(1) are satisfied:[36]
    (a) the purposes of the trust-of-land include making the land available for their occupation; and
    (b) the land is held by the trust for land trustees so as to be available for the purpose.

The company does not have a statutory occupation right. It does not meet the conditions of s.12(1). No third person would have a statutory occupation right even if the company sold or sub-let their interest under the trust-of-land to that person. The third person would not satisfy conditions (a) or (b) of s.12(1).[37]

The trust-of-land trustees have various powers, but they do not have

---

35 Barnsley "Co-owner rights to occupy land" [1998] CLJ 123 is a minority view; contrast Smith, *Plural Ownership* (2005) p.136.
This conclusion is not affected by *Re Byford* [2003] EWHC 1267; [2004] 1 P&CR 159. In this case the co-owners were a wife and her former husband's trustee in bankruptcy. The issue was the relative size of their shares. The wife claimed a larger share because she had paid the mortgage since her husband's bankruptcy. The issue is not covered by any provision in TOLATA. So the common law principles (known as "equitable accounting") applied. The general principle of equitable accounting is that one co-owner cannot take the benefit of an increase in the value of the property without making an allowance for what has been expended by the other in order to obtain it. Thus the wife had credit for her payments of mortgage capital and improvement expenditure. She wanted credit for interest payments, but it was held that she must set against that credit the benefit of occupation (the wife had occupied the property and the trustee in bankruptcy of course had not occupied). There is nothing in this which affects rights of occupation or other rights under ss.12, 13 TOLATA; though note Helen Conway's criticism in [2003] *The Conveyancer* 533.

36 Though it would suffice if only one of the conditions of s.12(1) were satisfied.
Section 12(2) provides: "Subsection (1) does not confer on a beneficiary a right to occupy land if it is either unavailable or unsuitable for occupation by him." This will not apply here.

37 Also s.12(2) TOLATA would probably apply, though it is not necessary to rely on that.

power to override the individual's occupation right or to require them to pay an occupation rent. This is fundamental so I set out the provisions in detail.

Section 13(1) TOLATA provides:

> Where two or more beneficiaries are (or apart from this subsection would be) entitled under s.12 to occupy land, the trustees of land [ie the trust-of-land trustees] may exclude or restrict the entitlement of any one or more (but not all) of them.

The trust-of-land trustees cannot under s.13(1) override the individual's statutory occupation right because it is not the case that "two or more beneficiaries are … entitled under s.12 to occupy land".

Section 13(6) TOLATA provides:

> Where the entitlement of any beneficiary to occupy land under s.12 has been excluded or restricted, the conditions which may be imposed on any other beneficiary under subsection (3) include, in particular, conditions requiring him to—
>
> (a) make payments by way of compensation to the beneficiary whose entitlement has been excluded or restricted, or
>
> (b) forgo any payment or other benefit to which he would otherwise be entitled under the trust so as to benefit that beneficiary.

The trust-of-land trustees cannot require the individual to pay compensation (an occupation rent) to the company under s.13(6) because the company has no statutory occupation right: s.13(6) assumes that compensation can only be required in a case where:

(1) a co-owner had such a right; and

(2) the right was excluded or restricted (which can only be done under s.13(1)).

Section 13(3) TOLATA provides another power:

> (3) The trustees of land [ie the trust-of-land trustees] may from time to time impose reasonable conditions on any beneficiary in relation to his occupation of land by reason of his entitlement under s.12.
>
> …
>
> (5) The conditions which may be imposed on a beneficiary under subsection (3) include, in particular, conditions requiring him—
>
> (a) to pay any outgoings or expenses in respect of the land, or
>
> (b) to assume any other obligation in relation to the land or to any activity which is or is proposed to be conducted there.

The trust-of-land trustees can do little under s.13(3) except to require the individual to pay outgoings.[38]

It is reasonably clear that ss.12–14 TOLATA are a comprehensive code and there is no common law right to an occupation rent except in a case of ouster.

The trust-of-land trustees also have power to sell the property but the court has discretion either to prevent or to require a sale.[39] The question here is whether the court would require a sale of the property if the individual did not want a sale but the company did. In my opinion a court would not do so, unless either the individual no longer wished/ceased to occupy the property, or the company had a good reason for a sale, eg it was insolvent. Section 15(1) TOLATA provides:

> The matters to which the court is to have regard in determining an application for an order under s.14 include—
>
> (a) the intentions of the person or persons (if any) who created the trust,
>
> (b) the purposes for which the property subject to the trust is held,
>
> (c) the welfare of any minor who occupies or might reasonably be expected to occupy any land subject to the trust as his home, and
>
> (d) the interests of any secured creditor of any beneficiary.

None of these factors would support a sale.[40]

In short, the company, although co-owner, can do almost nothing while the individual remains in occupation, except require them to pay the

---

38 In particular, the trust-of-land trustees cannot use this power to require the individual to pay an occupation rent, as that must be done under s.13(6) or not at all. Otherwise s.13(6) would be entirely otiose. There is a further restriction in s.13(7) but that is not so important here.

39 Sections 6, 14 TOLATA.

40 An individual's position is even stronger if they have more than a 50% share, as s.11(1) TOLATA normally gives them further support. This provides:

> "The trustees of land shall in the exercise of any function relating to land subject to the trust—
>
> (a) so far as practicable, consult the beneficiaries of full age and beneficially entitled to an interest in possession in the land, and
>
> (b) so far as consistent with the general interest of the trust, give effect to the wishes of those beneficiaries, or (in case of dispute) of the majority (according to the value of their combined interests)."

See too s.15(3) TOLATA which requires a court to have regard to the beneficiary with a majority share. But it is not necessary to rely on this.

outgoings.

Since this is the case, then the fact that the company does nothing, and the individual remains in occupation, does not mean that the company has provided accommodation, or conferred a benefit, in the years in which the individual occupies. This is because the individual has the right of occupation independently of anything the company does or can do.

In *IRC v Eversden*[41] the settlor gave a trustee co-owner a 95% share in a house, the settlor retaining 5%. The settlor continued to occupy. It was held that the trustee had not provided a benefit as the settlor was entitled to occupy. This took place before the TOLATA 1996 but the position would be the same under the TOLATA.

The matter is made more complicated by *Christensen v Vasili* 76 TC 116. This concerned a co-owned car. The question was whether there was a tax charge under (what is now) s.144 ITEPA which applies where a car is "made available" to an employee. The Special Commissioner held that the car was not made available:

> As co-owners the employer and employee each have the right to use the car, but they each have that right because they are each owners, not because one has "made available" the car to the other.[42]

This conclusion was plainly right. Unfortunately it was flatly if unconvincingly rejected in the High Court:

> In their ordinary sense, the question "who made the car available to Mr. Vasili?" must be answered in the sense that his employer did so ...[43]

It is suggested that *Vasili* must be distinguished from the normal co-ownership situation because:

(1) in *Vasili* both employer and employee were entitled to possession of the car: in the co-ownership situation considered here the company is not entitled to occupation;

(2) in *Vasili* the car belonged to the employer before he sold a 5% share to the employee. In that sense the employer made the car available. The position would have been different if the car had been purchased in those shares from the outset.

It is unfortunate that *Eversden* was not cited in *Vasili* since the two cases

41 [2002] STC 1109 reported 75 TC 340 under the name *IRC v Greenstock's Executors*.

42 76 TC 116 at p.124, para 22.

43 76 TC 116 at p.131, para 13.

are difficult to reconcile.

74.18.2 *Employment-related benefit*

It might be argued that the company co-owner provides a benefit other than living accommodation:

(1) If the company is the trustee, by not exercising its powers of sale (or to require the individual co-owner to pay an occupation rent); or

(2) If the company is not sole trustee, by consenting to the trustees not exercising those powers.

There is normally no benefit here because the trustees have no such powers. If there were a benefit, the value of the benefit is "the expense incurred in or in connection with the provision of the benefit". The company incurs no expense, so the value of the benefit for tax purposes is nil.[44]

If the company incurs costs of maintenance, that is an employment related benefit.

74.18.3 *Benefit provided by company entering into co-ownership arrangement*

It follows that the company provides a significant benefit to the individual when and if it uses its funds to acquire a share as co-owner (unless it pays a discounted price for the share). Could this benefit be taxable?[45]

In *IRC v Eversden (Greenstock's Executors)* trustees purchased a 95% share in a house ("Meadows"), and the settlor purchased 5%. The judge said:

> Under the agreement with the trustees (providing as it did for the settlor to pay 5% of the purchase price of Meadows and acquire in consequence a right of occupation) *the trustees conferred on the settlor the right to occupy Meadows for an indefinite period rent free*.[46]
> (Emphasis added)

---

44 It is considered that this particular benefit does not "consist of an asset being placed at the disposal of the employee" so the valuation is not in accordance with s.205 ITEPA.

45 This issue does not arise where the company receives its share of the land gratuitously.

46 75 TC 340, [2002] STC at p.1129. The point was rightly not appealed. Prior to purchasing Meadows another house in joint ownership had been sold. The position for Meadows would be different if the sale of the first house had been conditional on the purchase of Meadows (the new one), that is, if the settlor only agreed to join in the sale of the first if the trustee agreed to join in the purchase of Meadows.

This took place before the TOLATA 1996, but the position would be the same now.

In a case where the company provides its funds towards a joint purchase of a new property, and the individual holds as co-owner, the company has provided a benefit of indefinite rent-free occupation; more accurately the benefit is giving the individual the opportunity to acquire a right to indefinite rent-free occupation at a "knockdown price". The benefit is provided at the time the company completes the contract to purchase the land as co-owner.

The benefit would in principle be chargeable in co-ownership cases under s.87 TCGA or s.731 ITA. Since there are no express valuation rules the charge would be on the market value, which would have to be ascertained as best as one can in the light of the circumstances.

For employment income purposes the position is different. It is arguable that:

(1) The benefit is not the provision of living accommodation.
(2) The value of the benefit for IT purposes is nil because:
    (a) The company incurs no expense in connection with its provision. (The purchase price is not such an expense, because the money going out is matched by a property share coming in.)
    (b) The special valuation rules of ss.205, 206 ITEPA do not apply.

74.18.4 *The HMRC view*

The EI Manual provides at 11414:

> **Living accommodation: Avoidance area: Co-ownership cases**
> [July 2007]
> In these cases the employer and employee co-own the living accommodation. The usual arrangement is that the employer and employee own the property as tenants in common through a trust.
> A tenant in common has a legal right to use 100% of the property 100% of the time even though a tenant in common may only own a much smaller interest in the property (say 30%). It is argued against us in such a case that the employee's rights to use the living accommodation come from the employee's legal rights as a tenant-in-common. So it is argued that no living accommodation has been provided by reason of the employment.
> There are arguments to support a benefit charge within Part 3 Chapter 5 ITEPA in these cases and the strength of those arguments will depend on the facts of the case. PAYE Technical for any case in which you

want to argue the point.[47] Your submission should include a copy of any trust deed under which the land is held.

It is interesting to note that HMRC accept that there is not always a charge in co-ownership cases: "it depends on the facts of the case". That is consistent with the view taken here.

In the context of s.87 TCGA, the current HMRC view is that there is an annual benefit which is the difference between:

(1) the rental value of the property in question; and
(2) the hypothetical rental value of a hypothetical property of a value equal to the proportionate value of the taxpayer's share in the property, ie if the taxpayer holds a 50% share, one looks to the rental value of a property worth 50% of the actual property.[48]

But this view is very difficult to defend.

74.19 Other defences to BiK charge

74.19.1 *The caretaker's defence*

Section 99 ITEPA provides:

> **Accommodation provided for performance of duties**
> (1) This Chapter does not apply to living accommodation provided for an employee if it is necessary for the proper performance of the employee's duties that the employee should reside in it.
> (2) This Chapter does not apply to living accommodation provided for an employee if—
> (a) it is provided for the better performance of the duties of the employment, and
> (b) the employment is one of the kinds of employment in the case of which it is customary for employers to provide living accommodation for employees.

It has been suggested that one can use this to avoid the charge. The idea is to enter into a contract whereby the individual who is to occupy the property does so as caretaker for the company. This does not work. While it may normally be necessary or customary for a caretaker to reside in accommodation, a person does not become a "caretaker" just by being labelled as such. If the individual is occupying an extremely valuable

47 *Sic*. Presumably a phrase such as "Please submit your papers to ..." was accidentally omitted from the start of this sentence.

48 Private correspondence.

property with only nominal caretaking duties, this is not the same "type of employment" as a normal caretaker. The EI Manual rightly provides:

> **11342 Living accommodation exemption: Necessary for proper performance of the duties: Types of employee** [May 2010]
> Part 3 Chapter 5 ITEPA does not apply to living accommodation provided for an employee if it is necessary for the proper performance of the duties that the employee live in the accommodation provided (see EI Manual 11341).
> The following types of employee may be accepted as being within the exemption: ... Caretakers living on the premises. This only covers those with a genuine full time caretaking job. ...

74.19.2 *Payment of rent*

The payment of rent will count as "making good" for the s.105 computation and reduce the s.106 computation. However, this proposal raises the problems of IT on the rent. Also, to reduce the s.106 computation to zero, the rent may have to exceed the market rent, especially for very valuable properties.[49]

74.19.3 *Lease premiums*

The FA 2009 inserts the long and complex provisions of s.105A, 105B ITEPA, which I hope to consider in a future edition.

The EIM suggests an argument that premiums should sometimes be treated as rent. This was discussed in detail in the 2008/09 edition of this work, but I expect that HMRC will generally abandon that point now (if indeed they ever took it seriously).

74.20 Foreign homes relief

Section 100A(1) ITEPA provides a relief which I call "**foreign homes relief**":

> This Chapter does not apply to living accommodation outside the UK provided by a company for a director or other officer of the company ("D") or a member of D's family or household if—
> (a) the company is wholly owned by D or D and other individuals (and no interest in the company is partnership property), and
> (b) the company has been the holding company of the property at

49 By contrast a market rent for the use of chattels will prevent there being a "benefit" for the purposes of the benefit in kind charge on chattels.

all times after the relevant time.

I refer to the company providing the property as "**the provider company**". I refer to the condition in (1)(a) as"**the wholly owned condition**" and the condition in (1)(b) as "**the holding company condition**". Thus the relief applies where:

(1) The provider company provides accommodation for a director[50] of the provider company ("D") or a member of D's family or household. If the accommodation is provided for an employee who is not a director (or a member of a director's family or household) of the provider company the relief will not apply. In practice that is not likely to matter.
(2) The provider company meets the wholly owned condition.
(3) The provider company meets the holding company condition.

74.20.1 *Wholly owned condition*

The relief does not apply if any shares in the provider company are held by a trust or partnership, or if some of the shares are held by a company. The position for 100% subsidiaries is considered below.

74.20.2 *Holding company condition*

Before considering the definition of "holding company of the property" it is necessary to set out a subsidiary definition. Section 100A(4) ITEPA defines "relevant interest in the property":

> "Relevant interest in the property" means an interest under the law of any territory that confers (or would but for any inferior interest confer) a right to exclusive possession of the property at all times or at certain times.

We can now turn to the definition of "holding company" of the property. Section 100A(2) ITEPA provides:

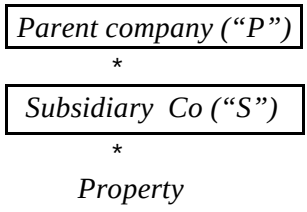
> The company is "the holding company of the property" when—
> (a) it owns a relevant interest in the property,
> (b) its main or only asset is that interest, and
> (c) the only activities undertaken by it are ones that are incidental to its ownership of that interest.

---

50 Or other officer; for brevity references to "directors" in this section include other officers.

74.20.3 *Subsidiary holding company*

Suppose the property is held via a subsidiary company thus:



S is in principle the holding company of the property but it does not meet the wholly owned condition. P is not the holding company of the property within s.100A(2). However s.100A(3) ITEPA provides:

> The company is also "the holding company of the property" when—
> (a) a company ("the subsidiary") which is wholly owned by the company [*ie the parent company]* meets the conditions in paras (a) to (c) of subsection (2),
> (b) the company's [*ie the parent company's]* main or only asset is its interest in the subsidiary, and
> (c) the only activities undertaken by the company *[ie the parent company]* are ones that are incidental to its ownership of that interest.

Thus P also qualifies as "the holding company of the property." Strictly this does not help as P is not the company providing the accommodation but in practice the relief is clearly intended to apply here.

74.20.4 *"The relevant time"*

Section 100A(5)(6) ITEPA defines "relevant time":

> (5) "The relevant time" is the time the company first owned a relevant interest in the property; but this is subject to subsection (6).
> (6) If—
> (a) none of D's interest in the company was acquired directly or indirectly from a person connected with D, and
> (b) the company owned a relevant interest in the property at the time D first acquired an interest in the company,
> "the relevant time" is the time D first acquired such an interest.

74.20.5 *Exceptions*

Section 100B ITEPA sets out three wide exceptions to this narrow relief:

(1) Section 100A(1) does not apply if subsection (2), (3) or (4) applies.

The first two exceptions concern connected[51] companies:

(2) This subsection applies if—
  (a) the company's interest in the property was acquired[52] (directly or indirectly) from a connected company at an undervalue, or
  (b) the company's interest in the property derives from an interest[53] that was so acquired.

(3) This subsection applies if, at any time after the relevant time—
  (a) expenditure in respect of the property has been incurred (directly or indirectly) by a connected company, or
  (b) any borrowing of the company (directly or indirectly) from a connected company has been outstanding (but see subsection (7). ...

(7) For the purposes of subsection (3)(b), no account is to be taken of—
  (a) any borrowing at a commercial rate, or
  (b) any borrowing which results in D being treated under Chapter 7 (taxable benefits: loans) as receiving earnings.

Lastly there is an all-purpose tax motive restriction:

(4) This subsection applies if the living accommodation is provided in pursuance of an arrangement[54] the main purpose, or one of the main purposes, of which is the avoidance of tax or national insurance contributions.

---

51 "Connected" is very widely defined in s.100B(9) ITEPA:
"In this section ‹connected company' means—
  (a) a company connected with D, with a member of D's family or with an employer of D, or
  (b) a company connected with such a company."

52 Section 100B(5) ITEPA provides a commonsense definition:
"In subsection (2), references to the acquisition of an interest include the grant of an interest."

53 Section 100B(6) ITEPA provides a commonsense definition:
"For the purposes of that subsection [subsection (2)], an interest is acquired at an undervalue if the total consideration for it is less than that which might reasonably have been expected to be obtained on a disposal of the interest on the open market; and ‹consideration' here means consideration provided at any time (and, for example, includes payments by way of rent)."

54 Section 100B(8) ITEPA provides an unnecessary definition (this seems now to be in the Parliamentary drafter's handbook):
"In subsection (4) ‹arrangement' includes any scheme, agreement or understanding, whether or not enforceable."

74.20.6 *Commentary*

Foreign homes relief would serve as a case study for what has gone wrong with tax reform in the Blair/Brown administration. Almost every restriction on this relief is anomalous. Why should there be a relief for a company owning land and not for chattels? Yachts and aeroplanes are generally held through companies. Why should the relief apply to companies held by individuals and not by trusts? We need rationalisation and simplification, not yet another narrowly targeted relief. But there it is.

74.21 Benefit in kind: Remittance basis taxpayer

This section deals with the position of a remittance basis taxpayer who is an employee, director or shadow director and receives the benefit in kind of living accommodation.

A specified amount (the cash equivalent) "is treated as earnings from the employment". I refer to this as **"BiK earnings"**.

74.21.1 *Are BiK earnings "chargeable overseas earnings"?*

BiK earnings qualify as "chargeable overseas earnings" if (in short) the duties of the employment are performed wholly outside the UK.[55] Thus one has to ascertain:

(1) what the duties are;

(2) where they are performed.

To ascertain the duties of an employee or formally appointed director is straightforward. To ascertain the duties of a shadow director is problematic. A shadow director has no positive "duties" in the normal sense of the word.

It might be argued that a shadow director has no "duties" within the meaning of s.23 ITEPA. The consequence would be anomalous.[56] I think a court is not likely to accept this. If a shadow director is deemed to have an employment, it follows that they should be deemed to have some "duties".

---

55 See 22.12 (Chargeable overseas earnings).

56 (1) Benefits in kind of a UK resident foreign domiciled shadow director would never qualify as chargeable overseas earnings.

(2) Benefits in kind of a non-resident shadow director would never be subject to tax.

The harder question is: exactly what are the (deemed) "duties" of the "employment" of a shadow director? The duties may be regarded as the instructions or directions which they give to the properly appointed directors.

Another possible view is that everything that the shadow director does for the company (or its assets) is regarded as part of their (deemed) "duties"; or alternatively everything they do if:

(1) they act with the consent of the formally appointed directors; or
(2) their actions concern matters which would (apart from them) be the responsibility of the actual directors.

Whichever of these is correct, where a company holds a UK dwelling house, it would be difficult in practice for a UK resident foreign domiciled individual to ensure that all his "duties" are performed outside the UK. However, it should be possible in other cases, eg where the BiK consists of non-UK situate accommodation or chattels, or for the BiK of employment-related loans. It may help to have a contract of employment which sets out the duties (all of which are to be performed abroad).

74.21.2 *Are BiK earnings remitted to the UK?*

If BiK earnings are "chargeable overseas earnings", they are taxable only if remitted to the UK.

If the accommodation is not in the UK then the BiK earnings are not on any view remitted here.

If the accommodation is in the UK, common sense suggests that there ought to be a charge. But there is a sound technical argument that the deemed earnings cannot be remitted because they do not exist. The tax charge arises only if the earnings are remitted. The property (or the benefit of its occupation) is not the same as the earnings.

HMRC may not agree. The EI Manual provides:

> **20508 Expense payments to and benefits provided for a director or employee whose earnings are taxable on remittance** [February 2006]
> The earnings of a director or employee, except in an excluded employment (EI Manual 20007), who is chargeable on remittances to the UK under either s.22 or s.26 ITEPA include
> - expenses payments remitted to the UK
> - expenses paid in the UK
> - *benefits provided or enjoyed in the UK (for example, a motorbike available for use in the UK)...*

> **EIM40303 Meaning of "remitted to the United Kingdom": benefits in kind and UK-linked debts**[57] [January 2009]
> *Benefits in kind*
> The definition of "remitted to the United Kingdom" in Section 809L ITA 2007 (see EIM40302) includes general earnings brought to, received in or used in and enjoyed in the United Kingdom in a form other than money. The benefits code as defined by Section 63(1) ITEPA 2003 provides a number of examples of earnings that are capable of satisfying the definition including taxable benefits arising from the provision of:
> * *living accommodation*
> * loans
> * cars available for private use.

This view was doubtful before 2008, but it is even harder to defend under the ITA remittance basis because where there is deemed income or gains, the statute specifically deals with the issue by deeming some assets to be derived from those income or gains.

74.22 Benefits in kind: Non-resident individual

This section deals with the position of a non-resident individual who is an employee, director or shadow director and receives benefits in kind. Earnings are taxable only in respect of duties performed in the UK.[58] Thus one must ascertain:

(1) what the duties are;
(2) whether the earnings are in respect of the duties;
(3) where the duties are performed.

The question of what (if any) are the "duties" of a shadow director is discussed in the above paragraph. I conclude there are no real duties but there are deemed duties. Are the earnings "in respect of" the deemed duties? It is tentatively suggested that the answer is "no". Certainly if there were no deemed duties there would be no earnings, but that is not enough. The benefit of living accommodation (which the earnings represent) would arise independently of the deemed duties. There is no income tax avoidance possibility here, because in the sort of case where substantial services were provided by a shadow director (as valuable as an

---

57 I am not sure when this text was updated, though it was in place by August 2009. The term "UK-linked debts" is out of date after the 2008 reforms, but it does not matter.

58 See 22.18 (Non-resident employee).

actual director) then the earnings could be in respect of the duties.[59]

If I am wrong on "in respect of", but all the "duties" are performed outside the UK, the non-resident shadow director is not subject to tax under the benefit in kind provisions. If some of them are performed here, there is an apportionment. The difficulty of apportionment is immense, which suggests that my interpretation of "in respect of" is the correct one. This conclusion is also consistent with the POA non-residence exemption (though consistency between different tax codes does not count for much).

In practice, so far as the author is aware, HMRC do not assess non-resident individuals on benefits in kind. Of course, in many cases, collection of tax would be problematic. But it is significant that EI Manual para 11413 [February 2006] refers only to UK residents.

74.23 Other planning possibilities using companies

More complex possibilities involve:
(1) acquiring a property,
(2) granting (say) a ten-year lease to trustees or to the individual, and
(3) transferring the freehold reversion to a company. Watch SDLT.

The living accommodation charge would not apply, because the company would not be providing living accommodation. Similar arrangements can be carried out with options. In practice, arrangements of this complexity would not often be needed.

74.24 Dealing with companies at risk of IT charge

Many company structures have been set up in the past. The risk of a living accommodation charge depends on the facts of every case, but in practice it is often a serious concern. What can be done?

74.24.1 *Planning involving winding-up of the company*

If practical, the safest course is to extract the property from the company so as to put an end to the charge (or risk of a charge) under the benefit in kind rules. One way to do this for trusts, where the occupier has a recognised interest in possession, is to liquidate the company.

The liquidation may give rise to a capital gain which may rule out this course. The property will be in the estate of the life tenant for IHT purposes but in practice that may not be too much of a problem: see 75.46

---

59 See *R v Dimsey & Allen* [2002] 1 AC 509 at [19].

(Home owned by foreign domiciliary). Another company structure may be entered into later, as set out above.

Another possibility might be for a company to sell the property to the trust, the purchase price remaining outstanding as a loan. In principle the loan is deductible from the value of the property, thus substantially reducing any IHT exposure. See 65.11 (Deduction for debts of trustees). Watch SDLT. CGT may rule out this course.

Another possibility may be to reimburse the company for the cost of providing the accommodation. Watch the CGT implications.

74.24.2 *Planning not involving winding up the company*

CGT may make it impractical to wind up the company. In that case take stringent steps to ensure that the individual is not a shadow director.

74.25 Dealing with living accommodation enquiries in practice

In practice, as *Al Fayed v Advocate General* frankly reports,[60] shadow directorship arguments before the decision in *R v Dimsey & Allen* were "settled by horse trading as opposed to on any strict statutory basis". It is likely that this will continue to be the case. Except for companies which were very carefully set up and run, HMRC will at least be able to exact a sum equal to the cost of litigating the issue before the first-tier tribunal or beyond.

74.26 Living accommodation charge: Commentary

Anyone who has followed the text to this point will agree that the law in this area is seriously defective. It is unnecessarily complicated, rests to a large part on formal and informal concessions, and is sometimes so very unfair that HMRC do not exert themselves to act in accordance with the law as correctly set out in their own Manuals. The following reforms would solve these problems:

(1) Abolish the s.105 charge and extend s.106 to cover the first £75,000 of acquisition cost. All the concessions would then drop away.
(2) It would be fair to charge a little less than ORI rates, since residential market rents are less than the official rate of interest.
(3) The application of the charge to shadow directors who do no real work for the company is a nonsense. Given the widespread use of

60 [2002] STC 910 para 44.

holding companies to hold wealth, *Dimsey & Allen* is arguably one of the worst tax decisions made by the House of Lords in recent times. Simply to abolish the charge (reversing *R v Dimsey & Allen*) would go too far the other way, since it is fair that a shadow director who receives what is in reality remuneration from a company should be charged. The solution is to restrict the rule that any benefit from an employer is deemed to be "by reason of employment". The deeming should not apply to a shadow director (whose connection with the company may be tenuous). That would strike the right balance.

The present BiK rules are being used by HMRC as a raid on ill-advised taxpayers or as a weapon to discourage IHT planning (placing homes in companies for IHT reasons). The latter is not the purpose for which the BiK rules were designed, and it is not surprising that they do not do this job well.

74.27 Section 731 charge

One should arrange, if possible, that any trust or company holding the home and chattels has no relevant income within s.731. Otherwise the use of the property would be a benefit giving rise to an income tax charge on the occupier.[61] This only applies if the benefit is not otherwise chargeable to income tax. If there is a shadow director charge, there is no charge under s.731. One possibility is to arrange that the amount of the shadow director charge is a small one (eg by a reimbursement of the company's expenditure). Whatever the charge is, it will avoid a taxable benefit under s.731.

74.28 Transfer pricing and non-resident company holding family home

The transfer pricing provisions (in short) deem transactions between persons under common control to be at arm's length prices.[62] HMRC accept that transfer pricing applies only to transactions between two "enterprises".[63]

---

61 See 30.4.4 (Interest-free loan and enjoyment of asset in kind).

62 See 17.6 (Transfer pricing and thin capitalisation).

63 Accepting the argument of Venables "The Transfer Pricing Provisions and Benefits from Offshore Structures", 8 OTR 165. See INTM 432090:

"**412030. The affected persons: Enterprises** [August 2012]
Section 147 TIOPA 2010 refers to provision made or imposed between any two (connected) persons, suggesting a broad scope for the schedule, as the term persons includes bodies corporate, partnerships and individuals. However, subsection (1)(d) requires the actual

Where a non-resident company controlled by foreign trustees provides accommodation in the UK for the use of a beneficiary rent free, no charge

provision to be compared with the arm's length provision that would have been made between independent enterprises.

Section 164 TIOPA 2010 requires Part 4 to be construed in accordance with the OECD model convention, as interpreted by the OECD transfer pricing guidelines. Article 9 of the convention sets out the arm's length principle by reference to conditions made or imposed between enterprises. Article 3 defines enterprise as "the carrying on of any business".

This suggests that Part 4 TIOPA 2010 should be applied only where both parties are enterprises, but that this term should be interpreted broadly. The term encompasses more than trading activity, but a natural interpretation implies an intention to make profit or gain, or to undertake activity in a businesslike or commercial way.

In most situations where Part 4 TIOPA 2010 potentially applies there is likely to be little doubt that both the parties to a provision are enterprises. Situations where this may be less clear include the potential application of the schedule to individuals and to charities. It is clear that both individuals and charities can act in a way that would cause them to be regarded as enterprises. This conclusion will follow whenever a trade is being carried on or in other cases where activity is carried on in an organised way with a view to profit or gain. The nature of the activity and whether it carries a commercial flavour will also be relevant.

It is necessary to consider whether a particular provision to which Part 4 TIOPA 2010 potentially applies is one made between two enterprises. Hence it is possible that different conclusions will follow for different provisions made by the same person - some transactions may be made in a capacity unrelated to an enterprise that is being carried on while others may be made in the context of the enterprise.

Examples - Individuals:

- Participation in the management or control of a company does not in itself constitute the carrying on an enterprise. It follows that the office of director, or other employment by a controlled company would not normally constitute a provision made between two enterprises.
- If a company provides residential accommodation rent free to a participant who just makes personal use of it as their home, transfer pricing rules would not generally apply (though other tax rules, eg relating to employee benefit or distributions, might well be relevant).
- Similarly, holding investments in a close investment holding company would not constitute an enterprise for the purpose of considering provisions made between the company and the individual.
- Holding properties for rent in general does constitute an enterprise. However, if an individual holds property principally for private purposes, incidental letting activity that is intended to offset costs rather than to generate income is not likely to constitute an enterprise.
- Lending to connected companies may or may not constitute an enterprise. If the activity is undertaken in a businesslike way with a view to generating gains on shares in the company, this is likely to represent a form of enterprise. On the other hand, isolated loans where the intention is to provide long term funding for a family business may well not be made in the context of an enterprise.
- Where an individual is carrying on an enterprise, it follows that the SME exemption will potentially apply, provided the employment and financial limits are met. These limits will apply on an aggregate basis, including the individual and all connected businesses, including those carried on by controlled companies."

to tax arises since the individual is not an enterprise. Tax Bulletin 46 (April 2000) provides:

> **Will a charge be imputed on a non-resident landlord providing rent-free residential accommodation within the UK to a UK individual who is a participant?**
> It will not be Inland Revenue practice to impute a charge under Sch 28AA [ICTA] in these circumstances.

The provisions could apply in the (unusual) case where:[64]

(1) the individual is using the accommodation in an enterprise, but that is not "just personal use";
(2) a rent (less than a market rent) is charged.

74.29 SDLT on living accommodation charge

Para 12 Sch 4 FA 2003 provides:

> (1) Where a land transaction is entered into by reason of the purchaser's employment, or that of a person connected with him, then—
>
> (a) if the transaction gives rise to a charge to tax under Chapter 5 of Part 3 of the ITEPA (taxable benefits: living accommodation) and—
>
> (i) no rent is payable by the purchaser, or
>
> (ii) the rent payable by the purchaser is less than the cash equivalent of the benefit calculated under s.105 or 106 of that Act,
>
> there shall be taken to be payable by the purchaser as rent an amount equal to the cash equivalent chargeable under those sections;
>
> (b) if the transaction would give rise to a charge under that Chapter but for s.99 of that Act (accommodation provided for performance of duties), the consideration for the transaction is the actual consideration (if any); ...

This will not usually affect a foreign domiciliary who occupies a UK home through a company, even if the foreign domiciliary is a shadow director and within the BiK provisions. The reasons are:

(1) The acquisition of a licence (as opposed to a lease) is not a land transaction. The distinction between lease and licence is fraught but

64 The same point was formerly made in IHTM432090. This was withdrawn but HMRC practice has not changed.

usually the individual will occupy under licence and not a lease.

(2) Even if the shadow director acquires a lease, they will not usually do so by reason of their employment. The extended definition in the BiK code[65] does not apply here.

74.30 Chattels held by companies

Chattels situate in the UK may be placed in a company for the same reasons as the family home: to make them excluded property. This raises IT problems similar but not identical to the living accommodation charge.

74.30.1 *The charge*

The charge is in s.203(1) ITEPA:

> The cash equivalent of an employment-related benefit is to be treated as earnings from the employment for the tax year in which it is provided.

The key expressions are "employment-related benefit" and "cash equivalent".

74.30.2 *Employment-related benefit*

This is defined in s.201(2) ITEPA:

> In this Chapter—
> "benefit" means a benefit[66] or facility of any kind;

There is no benefit – and so no charge – if full consideration is paid for the use of chattels. This is so even if the amount paid is less than the "cash equivalent" as it usually will be; contrast the living accommodation charge. HMRC accept this.[67] EI Manual provides:

> **21002 What is meant by a "benefit"** [February 2006]
> However, something (other than a loan where special provisions apply, see EIM26101 and EIM26111) which is a "fair bargain" (EIM21004) between the employer and the employee is not a "benefit".

Section 201(2) continues:

---

65 See 74.5 ("By reason of the employment").

66 For the meaning of "benefit" see 30.4 (Benefit).

67 HMRC do not argue that the word "facility" applies to a facility which is not a benefit in the ordinary sense. Thus s.201(2) is a non-definition of benefit (it only says that "benefit" means benefit); but non-definitions are quite common in tax legislation.

> "employment-related benefit" means a benefit, other than an excluded benefit,[68] which is provided in a tax year—
>
> (a) for an employee, or
>
> (b) for a member of an employee's family or household,
>
> by reason of the employment.[69]

74.30.3 *"Cash equivalent" etc*

This is defined in s.203(2) ITEPA:

> The cash equivalent of an employment-related benefit is the cost of the benefit less any part of that cost made good[70] by the employee to the persons providing the benefit.

This takes us to the elaborate definition of "cost of the benefit". The starting point is s.204 ITEPA:

> The cost of an employment-related benefit is the expense incurred in or in connection with provision of the benefit (including a proper proportion of any expense relating partly to provision of the benefit and partly to other matters).

There are two exceptions to this basic rule:
(1) asset made available without transfer;
(2) transfer of used or depreciated asset.
Point (2) is not discussed here. The rule in (1) is in s.205 ITEPA:

> (1) The cost of an employment-related benefit ("the taxable benefit") is determined in accordance with this section if—
>
> (a) the benefit consists in—
>
> (i) an asset being placed at the disposal of the employee, or at the disposal of a member of the employee's family or household, for the employee's or member's use, or
>
> (ii) an asset being used wholly or partly for the purposes of the employee or a member of the employee's family or household, and
>
> (b) there is no transfer of the property in the asset.
>
> (2) The cost of the taxable benefit is the higher of—
>
> (a) the annual value of the use of the asset, and

---

68 "Excluded benefit" is defined in s.202.

69 For the definitions of expressions used here see 22.2 ("Employer", "employee" and "employment").

70 See 74.11.2 ("Making good": meaning) for a discussion on "made good".

(b) the annual amount of the sums, if any, paid by those providing the benefit by way of rent or hire charge for the asset,

together with the amount of any additional expense.

This takes us to the definitions of "annual value" and "additional expense":

(3) For the purposes of subsection (2), the annual value of the use of an asset is—

(a) in the case of land, its annual rental value;[71]

(b) in any other case, 20% of the market value[72] of the asset at the time when those providing the taxable benefit first applied the asset in the provision of an employment-related benefit (whether or not the person provided with that benefit is also the person provided with the taxable benefit). ...[73]

(4) In this section "additional expense" means the expense incurred in or in connection with provision of the taxable benefit (including a proper proportion of any expense relating partly to provision of the benefit and partly to other matters), other than—

(a) the expense of acquiring or producing the asset incurred by the person to whom the asset belongs, and

(b) any rent or hire charge payable for the asset by those providing the asset.[74]

74.30.4 *Asset available but not used*

EI Manual provides:

21631 Cash equivalent of assets placed at the disposal of a director or employee [May 2010]

Note that a tax charge may arise if the asset is available for the use of the director or employee. Whether or not it is used is immaterial. This is because the legislation refers to the benefit as being an asset "placed

---

71 "Annual rental value" is defined in s.207 ITEPA. This charge only applies to land other than living accommodation, so in practice it is not important.

72 "Market value" is defined in a commonsense way in s.208 ITEPA.

73 There is transitional relief where those providing the taxable benefit first applied the asset in the provision of an employment-related benefit before 6 April 1980.

74 EIM states at 21631:

> This will include expenditure on running costs and could include expenditure on alterations or improvements, repairs, maintenance, etc depending on whether it was incurred for the purpose of providing the benefit. It would not include interest paid on a loan to acquire the asset.

at the disposal of" the employee. Assets commonly placed at the disposal of directors and employees to which the rule applies are yachts, aircraft, paintings, furniture, TV sets and video machines.

This is correct. The EI Manual gives examples:

21633. Assets placed at the disposal of a director or employee: Example [February 2006]

The following example shows how the chargeable benefit relating to a yacht is calculated. It would apply to all other assets except cars, vans, land and buildings.

Facts

On 6 April a company buys a yacht on the open market for £25,000.

It immediately makes this available for the sole use of a director and his family throughout the tax year.

In the same year the company spends £2,400 on insurance, fuel, maintenance, servicing and mooring charges for the yacht. It also pays £4,500 interest on a loan obtained to purchase the yacht.

The company requires the director to pay £1,500 a year for the use of the yacht.

Calculation of the benefit

The amount chargeable on the director for the benefit from the yacht being made available for his and his family's use is:

"Annual value of the use of" the yacht: 20% of its market value of £25,000	5,000
Running costs borne by the employer	2,400
	7,400
Less "made good" by the director	1,500
Amount of the benefit	5,900

Notes on the example

Note that in the example the "market value" of the yacht is taken as £25,000 as this was the open market price paid by the company immediately before it was first applied as a benefit.[75]

If the company had leased the yacht for £6,000 a year from 6 April, £6,000 would have been substituted for the "annual value of the use of the yacht" of £5,000 shown above (see EIM21630 and EIM21632).

If, exceptionally, the company had leased the yacht for less than the "annual value" of £5,000, the lease rent would have been disregarded. The calculation would have remained as shown in the example above, based on the annual value of £5,000.

The interest paid on the loan to buy the yacht does not enter into the benefit calculation.

21634 Particular benefits: Assets placed at the disposal of a director or employee: Asset unavailable for part of a year [May 2010]

75 [Author's Note] This would not be correct if the yacht was purchased new, as market value would be the secondhand value, which is lower.

Where an asset is not available for part of a year the annual value of its use has to be apportioned (s.204 ITEPA 2003).

For instance, if in the example at EIM21633 the yacht is only made available to the director from 6 October, the chargeable benefit is:

- one half (6/12 months) of the annual value of its use plus
- expenditure on the asset by the person providing it from 6 October to the following 5 April less
- any amount made good by the director (see EIM21120).

21635 Particular benefits: Assets placed at the disposal of a director or employee: Asset also used in the business or by other employees [February 2006]

An apportionment of the full amount of a benefit is required if an asset is made available to two or more directors and employees or is provided partly to the employee as a benefit and is also used partly by the employer in its business (see EIM21200).

For example, if a yacht is made available to two directors and they agree that its availability is shared equally by them, apportion one half of the benefit to each of them. Similarly if the yacht is used partly for business purposes, such as hiring to customers, a proper proportion of the full annual value of its use would not be chargeable.

21636 Particular benefits: Assets placed at the disposal of a director or employee: Asset used by the employee partly for private purposes and partly for work purposes [February 2006]

When an asset is available for the private use of a director or employee but it also has to be used in the performance of his duties, the director or employee may be able to get relief for the work use. This is accomplished by treating the value of the benefit as if it were expenditure so that the business proportion can qualify for deduction under s.336 to 338 ITEPA 2003 (see EIM31620 onwards).

Note that a deduction will not be due if the private and business use of the asset is concurrent, such as a suit of ordinary clothes worn at work (see EIM31660). Only if the use of the asset is at some times exclusively for business, such as a fax machine provided to the employee at home partly for work use, will a part deduction be due (see EIM31661). See example EIM31617.

21637 Particular benefits: Assets placed at the disposal of a director or employee: Assets used partly for private purposes and partly for work purposes: Mixed use benefit; Background to example in EIM21638 [May 2010]

See EIM21638 for an example of the interaction between:

- the calculation of the cash equivalent of a benefit where an asset is placed at the disposal of a director or employee (s.205(1)(a)(i) ITEPA 2003) and
- making an apportionment of that benefit where it is available to a director and for "other matters" (s.204 ITEPA 2003).

Where a benefit is provided partly for the use of a director or employee and partly for "other matters" the cost of the benefit must be apportioned (see EIM21200) between the different uses.

Note that an asset placed at the disposal of a director or employee

represents a benefit (s.205(1)(a)(i)) regardless of the use, if any, to which the director or employee puts the asset. But see EIM21631 for details relating to the two alternative measures of charge and when to apply one or the other.

If the asset is used wholly for business purposes, this does not prevent the provision of the asset representing a benefit. If the business use satisfies the terms of s.365(1) ITEPA 2003, the director or employee will be entitled to a deduction equivalent to the full amount of the benefit, leaving no amount chargeable to tax. **But this is not the same as there being no benefit.** A benefit has been provided but because of the deduction for business use, the chargeable amount has been reduced to nil.

If the benefit is used by a director or employee for private purposes and for business purposes, the business use is not an "other matter" which can be included in the amount of the benefit to be apportioned under Section 204 ITEPA 2003. The full amount of the mixed use of the benefit is chargeable to tax, subject to a deduction under s.365(1) ITEPA 2003 for any business use that meets the conditions of s.336 to 338 ITEPA 2003 (see EIM21210).

On the other hand, use of the asset by other employees, or by the employer company (for example, for transporting goods or customers), or hire to third parties, are "other matters" to be taken into account in an apportionment.

There are no hard and fast rules for calculating the proportion of cost attributable to different uses but the end result should produce an apportionment that is reasonable in the light of the facts of the case and the statutory context in s.204 (see EIM21200).

See the example at EIM21638.

21638 Particular benefits: Assets placed at the disposal of a director or employee: Assets used partly for private purposes and partly for work: Example [May 2010]

For some background information relevant to this example see EIM21637.

Facts

- On 6 June a company purchases a 10 seater aircraft for £800,000,
- the principal shareholder of the company and managing director (MD) holds a pilot's licence,
- the plane is kept at an airfield near to both the company premises and the MD's home. It is available to the MD to use at all times – sometimes, at weekends, he decides on the spur of the moment to take a flight on the plane. The plane is not available to any other director or employee unless given specific permission,
- the company incurs costs on the plane of £20,000 for the 9 months from 6 June to 5 April for landing fees, fuel, insurance, etc.,
- when he uses the plane for private purposes the MD reimburses the company £100 per day as a contribution towards the employer's costs.
- Inspection of the logbook for the period 6 June to 5 April (274 days) shows use as follows:
  1. 10 days – by the MD for travel to business meetings
  2. 20 days – by the company (using an outside pilot hired by the day) to

deliver sensitive documents to customers in remote locations

3. 10 days – commercial hire to third parties at £2,000 per day
4. 10 days – another director of the company wishes to learn to fly and uses the plane for flying lessons with an instructor
5. 60 days – private use by the MD.

What is the amount of the benefit chargeable on the MD?

Section 205(2)(a) ITEPA 2003 determines that when an asset is placed at the disposal of a director or employee (see EIM21631), the amount of the cash equivalent of the benefit is the annual value (s.205(3)(b)) plus additional expenses.

Annual value of plane (£800,000 × 9/12 × 20%)	£120,000
Additional expenses	£20,000
Total amount of the benefit	£140,000

As the plane is made available for several different purposes, if any of those purposes amounts to an "other matter" (s.204), an apportionment of the benefit may be due. Use by the MD, whether for business or private purposes, is not an "other matter". But use by other employees, or use by the company, are "other matters" – 2, 3 and 4 above which amount to 40 days in total.

The amount of the benefit is based on the 274 days in the year when the plane was available for use. On 40 days it was used for "other matters" and the benefit must be apportioned accordingly. On the remaining 234 days it was entirely at the disposal of the director to use as and when he wished. If the plane was not available to the director, or not solely available to him, on all these days, the calculation of the benefit could be different (see EIM21639(. the calculation of the benefit must be:

- apportioned to take account of these other matters and
- reduced by any amount made good by the MD to the employer.

Total amount of the benefit	£140,000
Less proportion for "other matters" (40/274)	£20,438
Benefit after apportionment	£119,562
Less made good by MD (£100 × 60)	£6,000
Amount of the benefit chargeable	£113,562

Finally, if the director's use of the plane satisfies the terms of s.336 ITEPA 2003 he will be due a deduction under s.365(1) for the amount of expenses on business purposes that could have been deducted if incurred by him. This figure may be quantified based on the facts of the case. In this instance the MD used the plane for a total of 70 days in the year, 10 days for business and 60 days for private purposes. A reasonable basis for calculating the deduction due under s.365(1) may be 10/70 of the chargeable benefit – 10/70 × 113,562 = 16,223.

Less deduction for business use (10/70 days)	£16,223
Amount chargeable on MD	£97,339

Note it is necessary to use judgement and common sense when determining the amount that would have been deductible for expenses under s.365(1).

In this case a deduction of approximately £1,600 per day has been allowed for the MD's travel to business meetings. This may seem a large amount but if the alternative is for the company to hire a similar plane for the day at the commercial rate of £2,000, for which the MD paid himself and was later

reimbursed by the company, he would be entitled to a deduction for this amount. Apart from extreme cases, it is better not to become involved in a debate concerning what form of transport (and at what cost) is suitable for the director to use to attend meetings.

The other director who uses the plane for flying lessons will also be chargeable on a benefit based on his 10 days private use of the plane.

74.30.5 *Conveyancing issues for chattels*

The Bills of Sale Act 1878 (in short) applies where a person makes a transfer of goods (a "Bill of Sale" is widely defined) and retains possession of the goods. This could apply on a transfer to a trust or to a company. The transfer is void as against the trustees in bankruptcy of the transferor unless the Bill of Sale is registered in a public register. This is to prevent fraud on creditors. However, it really does not matter if a transfer of chattels is void as against a trustee in bankruptcy, in the event that the individual became bankrupt. After all, every gift and transaction at an undervalue can in principle be set aside by a trustee in bankruptcy for two years, under s.339 Insolvency Act 1986, but no-one suggests that has significant tax implications for solvent taxpayers. Thus it is not necessary to register the transfer of the chattels (the "Bill of Sale") under the Act.

74.31 "Person providing benefit"

This is defined in s.209 ITEPA:

> **Meaning of "persons providing benefit"**
> For the purposes of this Chapter the persons providing a benefit are the person or persons at whose cost the benefit is provided.

CHAPTER SEVENTY FIVE

CORPORATE RESIDENTIAL PROPERTY

75.1 Introduction

This chapter considers three tax charges on corporate residential property held by companies and some company-like entities:

(1) A 15% SDLT charge on acquisition. I refer to this as **"the SDLT penal rate"**. I do not think that is tendentious, though it is not, of course, the statutory term.
(2) Annual Tax on Enveloped Dwellings (**"ATED"**)
(3) CGT on dwellings within ATED (**"ATED-CGT"**)

I refer to them together as the **"corporate residential property ("CRP") regime"**.

At the end of the chapter there is a general discussion of planning issues for the family home, in the light of the discussion in this and the previous chapter.

HMRC have published ATED guidance **("HMRC ATED guidance")**.[1]

The CRP regime is not deliberately aimed at foreign domiciliaries (as far as one can tell) but those are in practice the most affected. A full discussion would require a long book to itself. I focus on the aspects most important to the themes of this book, but I include a general discussion, as it is necessary to view the rules in the round. It will take some years to work out the effect of the provisions in detail.

The legislation is found in three distinct places:

(1) The SDLT penal rate is in Sch 4A FA 2003
(2) ATED is in FA 2013
(3) ATED-CGT is in TCGA

Some definitions therefore need to be written out three times. But brevity

---

1 *http://www.hmrc.gov.uk/so/ated-tech-guide.pdf*

and simplicity were not material considerations to those responsible for rules.

The CIOT comment on the drafting:

> We believe that ATED is an example of poor drafting due to time pressure. The [tax law rewrite] improvements in this respect are not being maintained.[2]

It seems to me that the problems lie more in the conception than in the drafting. The development of the law can be traced from:

(1) A consultation document (May 2012) tendentiously entitled "Ensuring the fair taxation of residential property transactions".[3] I refer to it as **"The Residential Property Consultation Document".**

(2) A consultation response document, which I call **"the Residential Property Consultation response"**.[4]

These are now of mainly historic interest. It should however be recorded that from March to December 2012 no-one had any idea of what were the rules governing the taxation of residential property above £2m.

75.1.1 *"Enveloping"*

Budget 2012 referred to purchase by companies as **"enveloping".** I half balk at this neologism: it is a simplistic reification which hinders clarity of thought. In 2013 it was put into the name of the tax, ATED, so we have to put up with it, but there is much to be said for the use of scare quotation marks around the word.

75.1.2 *The reduction in CRP thresholds*

Budget 2014 announced a reduction in the threshold from £2m to £500k,

---

2 CIOT, "Office for Tax Simplification Review of Definitions in Tax Legislation Response" (2013) para 5.2. *http://www.tax.org.uk/Resources/CIOT/Documents/2013/12/131220%20OTS%20review%20of%20definitions%20in%20tax%20legislation%20-%20CIOT%20comments.pdf*

3 *http://www.hm-treasury.gov.uk/d/consult_ensuring_fair_taxation_residential_property_transactions.pdf.*

4 HMRC, "Ensuring the fair taxation of residential property transactions: summary of responses" (December 2012) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/190256/summary_of_responses_ensuring_fair_taxation_of_residential_property_transactions.pdf*

introduced in a staggered way.[5]

The extension to the penal rate of SDLT took effect for transactions where the effective date (normally the date of completion) is on or after 20 March 2014. I do not consider the transitional relief for contracts entered into before 20 March 2014 but completed on or after that date.

The extension for ATED is introduced in two stages in 2015 and 2016.

(1) ATED will apply to residential properties worth more than £1 million from 1 April 2015. Properties within the £1m - £2m band will be subject to an annual ATED charge of £7,000. There is a minor transitional relief that first year returns applicable to this band will not be required until 1 October 2015 and payment by 31 October 2015.
(2) ATED will apply to residential properties worth more than £500,000 from 1 April 2016. Properties within the £1m - £2m band will be subject to an annual ATED charge of £3,500.

The extension to ATED-CGT charge is also supposed to take effect in two stages:

(1) ATED-CGT is supposed to apply to properties worth more than £1 million from 6 April 2015. The charge will apply only to that part of the gain that is accrued on or after that date.
(2) ATED-CGT is supposed to apply to properties worth more than £500k from 6 April 2015. The charge will again apply only to that part of the gain that is accrued on or after that date. Gains outside ATED-CGT will continue to be treated as at present.

The FA 2014 contains the SDLT legislation and the prospective ATED legislation for 2015 and 2016.

The extension to ATED-CGT is supposed to be introduced in Finance Bill 2015. The decision to defer the legislation was a sensible one, as ATED-CGT needs to be seen in the context of the forthcoming non-residents dwellinghouse CGT charge. Once CGT is extended to a non-residents dwellinghouse, there is not, in fact, much point in retaining ATED-CGT at all, let alone extending it. The relatively small differences in rates and computation rules do not justify the complexity of two distinct sets of rules. But we must wait and see what happens.

The Residential Property Consultation Document provided:

---

5 HMRC press release, "Changes to the taxation of high value UK residential property held by certain non-natural persons" (19 March 2014).

> 2.50 The charging bands will remain the same and there is no intention to lower the starting threshold.

In the 2013/14 edition of this work I referred to this and said:

> There is no need to lower the starting threshold, as inflation will gradually achieve that. £2m is a substantial threshold, but I expect it will not be increased in line with inflation, so it will gradually reduce in real terms. Thus someone purchasing a property worth £1.5m or even £1m needs to consider the likelihood that the property will become worth more than £2m in due course. Someone purchasing a property worth more than £2m must allow for the value to move up into the higher bands of tax in due course.
>
> Although there is a promise not to alter the charging bands, I am not sure if that is meant to be a promise not to increase the rates; even if there were such a promise, I would not place much reliance on it. These are some of the imponderable factors to take into account before purchasing or retaining a property in a company.

I was wrong to expect HMRC to keep the promise in the consultation document. Can one rely on anything in such documents? They apply only until HMRC change their mind. There is an intangible cost in a breach of commitments of this kind which cannot be measured in a TIIN. But there it is.

Budget 2014 justified the reduction in the threshold in the following words:

> [1] ATED has raised 5 times the amount forecast for 2013-14, with significantly more properties above £2 million in envelopes than expected.
>
> [2] As well as discouraging SDLT avoidance, ATED incentivises commercial activities by providing relief where, for example, a property is rented out.[6]

Point [1] is due primarily to the lack of a disincorporation relief.[7] It should not have caused a surprise.

Point [2] will leave the reader rubbing their eyes. An incentive for commercial activities in the case of corporate ownership but not in the case of non-corporate ownership? Perhaps it is not intended to be taken

---

6 Budget 2014 para 1.193,

7 See *http://www.hmrc.gov.uk/ated/basics.htm*

seriously. When HMRC wish to make a reform, it has become common to justify it by every possible argument, good or bad.

The proportion of UK property worth over £500,000 is difficult to ascertain. Land Registry data records that 6.4% of residential properties sold in England and Wales in 2012-2013 exceed £500,000, and 1.3% exceed £1m.[8]

75.2 SDLT penal rate

Para 3 Sch 4A FA 2003 provides:

> (1) Where this paragraph applies to a chargeable transaction—
>
> (a) the amount of tax chargeable in respect of the transaction is 15% of the chargeable consideration for the transaction ...
>
> (2) This paragraph applies to a chargeable transaction if—
>
> (a) the transaction is a high-value residential transaction, and
>
> (b) the condition in sub-paragraph (3) is met.

75.3 "High-value" residential transaction

There is the usual cascade of definitions.

75.3.1 *"Interest in a single dwelling" and appurtenant rights*

First para 1(1) sch 4A FA 2003 provides a commonsense definition:

> In this paragraph "interest in a single dwelling" means so much of the subject-matter of a chargeable transaction as consists of a chargeable interest in or over a single dwelling (together with appurtenant rights).

"Appurtenant rights" are aggregated with the dwelling so:

(1) Their value is taken into account in determining whether market value passes the SDLT or ATED thresholds.

(2) Appurtenant rights are charged at the SDLT penal rate and subject to ATED-CGT along with the principal interest.

Para 9 sch 4A FA 2003 provides a commonsense definition:

> In this Schedule—
>
> "appurtenant rights", in relation to a chargeable interest that is, or is part of, the subject-matter of a transaction, means any rights or interests appurtenant or pertaining to the chargeable interest that are acquired

8 See Land Registry House Price Index *http://www.landregistry.gov.uk/public/house-prices-and-sales*

with it.

Where will one draw the limit of gardens and grounds? CGT private residence cases may be helpful, though without the limit to the "permitted area" of (in short) half a hectare.

75.3.2 *"Higher threshold interest"*

Para 1(2) sch 4A FA 2003 defines "higher threshold interest":

> An interest in a single dwelling is a higher threshold interest for the purposes of this Schedule if chargeable consideration of more than £500,000 is attributable[9] to that interest.

75.3.3 *"High-value" residential transaction*

Then para 2 sch 4A FA 2003 defines *high-value residential transaction*:

> (1) Sub-paragraphs (2) to (8) apply to a chargeable transaction whose subject-matter consists of or includes a higher threshold interest.
> (2) If the main subject-matter of the transaction consists entirely of higher threshold interests, the transaction is a high-value residential transaction for the purposes of paragraph 3.

In 2013, when the threshold was £2m, the expression "high-value" residential transaction was apt. Now it is reduced to £500k it is no longer apt, though when discussing the statutory provision, it may be easier to continue to apply the statutory terminology, but scare quotation marks seem appropriate.

75.4 Corporate purchaser condition ("non-natural person")

Para 3(3) sch 4A FA 2003 provides:

> The condition is that—
> (a) the purchaser is a company,
> (b) the acquisition is made by or on behalf of the members of a partnership one or more of whose members is a company, or
> (c) the acquisition is made for the purposes of a collective investment scheme.

HMRC use the term **"non-natural" person** as label for a body which is

---

9 "Attributable" is (unnecessarily) given a commonsense definition in para 9 sch 4A FA 2003: "attributable" means attributable on a just and reasonable basis.

within para 3(3), that is, a company, a partnership including a company partner, or a CIS. The term is inapt and tends to conceal the complex and arbitrary nature of the concept(s) to which it refers. However it is necessary to have a short label, and no short label could correctly describe this disparate group of entities. It is also convenient to adopt a consistent usage. In order to keep in mind the artificiality of the expression I refer to "non-natural persons" using scare quotation marks.

I refer to the condition in para 3(3) as **"the corporate purchaser condition"**.

The following do not count as "non-natural persons" and so are not within the scope of the SDLT penal rate or ATED:

Trustees

Personal representatives

Clubs and unincorporated associations[10]

HMRC appear to have anticipated that the corporate purchaser condition may not be well drafted. Para 3(10) sch 4A FA 2003 provides power to amend by statutory instrument:

> The Treasury may by order amend this paragraph for the purpose of limiting the circumstances in which the condition in subparagraph (3) is to be treated as met.

75.4.1 *"Partnership"*

Para 1 Sch 15 FA 2003 provides a definition:

> In this Part of this Act a "partnership" means—
>
> (a) a partnership within the Partnership Act 1890,
>
> (b) a limited partnership registered under the Limited Partnerships Act 1907, or
>
> (c) a limited liability partnership formed under the Limited Liability Partnerships Act 2000 or the Limited Liability Partnerships Act (Northern Ireland) 2002,
>
> [d] or a firm or entity of a similar character to any of those mentioned above formed under the law of a country or territory outside the United Kingdom.

Para [d] brings in foreign law LLPs, which are not normally classified as partnerships for tax purposes.

---

10 See 75.4.2 ("Company").

Para 3(6)(7) sch 4A FA 2003 relate to the complex anti-avoidance provision concerning certain partnership transactions; these are not discussed here as a discussion of partnership SDLT would need a chapter to itself.

Section 167 FA 2013 provides the identical definition for ATED.[11]

75.4.2 *"Company"*

Para 9 sch 4A FA 2003 defines "company"

> In this Schedule—
> "company" means a body corporate other than a partnership.[12]

This is otiose: the drafter has overlooked the existing definition in s.100 FA 2003.

The penal rate applies to UK and non-UK resident companies.

Section 166(1) FA 2013 provides a similar definition for ATED:

> In this Part "company" means a body corporate but does not include—
> (a) a corporation sole, or
> (b) any partnership (see section 167(1)).

75.4.3 *"Collective investment scheme"*

Para 9 Sch 4A FA 2003 provides the standard referential definition:

> In this Schedule—
> "collective investment scheme" has the same meaning as in Part 17 of the Financial Services and Markets Act 2000 (see section 235 of that Act);

Section 174 FA 2013 provides the same definition for ATED.

75.4.4 *Joint purchasers*

Para 3(5) sch 4A FA 2003 deals with joint purchasers:

> If there are two or more purchasers acting jointly, the condition in sub-paragraph (3) [the corporate purchaser] is treated as met if it is met in relation to at least one of those purchasers.

This is not fair, but the provision is intended to be penal.

---

11 Except that s.167(1)(a) refers to the Partnerships Act 1890, which is a surprising error, as the Act was correctly named in the FA 2003.

12 "Partnership" is defined in para 1 sch 15 FA 2003.

75.5 Trusts

75.5.1 *Trustee purchaser*

Para 3(4) sch 4A FA 2003 excludes corporate trustees:

> References in sub-paragraph (3) [corporate purchaser condition] to a company do not include a company acting in its capacity as trustee of a settlement.

This is needed as SDLT does not have the IT/CGT rule that trustees are deemed to be separate persons.[13]

75.5.2 *Beneficiary purchaser*

A purchaser of an equitable interest may be caught as they may acquire a chargeable interest.

75.5.3 *Bare trusts*

Para 3(8) sch 4A FA 2003 provides:

> For the purposes of sub-paragraph (3), paragraph 3 of Schedule 16 (bare trustees) applies as if sub-paragraphs (2) and (3) of that paragraph were omitted.

To follow this one needs to set out para 3 sch 16, amended as para 3(8) directs:

> (1) Subject to sub-paragraph (2), where a person acquires a chargeable interest or an interest in a partnership as bare trustee, this Part applies as if the interest were vested in, and the acts of the trustee in relation to it were the acts of, the person or persons for whom he is trustee.
> ~~(2) Sub-paragraph (1) does not apply in relation to the grant of a lease.~~
> ~~(3) Where a lease is granted to a person as bare trustee, he is treated for the purposes of this Part, as it applies in relation to the grant of the lease, as purchaser of the whole of the interest acquired.~~
> (4) Where a lease is granted by a person as bare trustee, he is to be treated for the purposes of this Part, as it applies in relation to the grant of the lease, as vendor of the whole of the interest disposed of.

Para 3(1) is the commonsense rule that a bare trust is transparent for SDLT.

---

13 See 5.3 (Trustees treated as single and distinct person).

The exception in para 3(2)(3) is to block an avoidance scheme under which a rack rent lease was granted to a nominee of the vendor, and then assigned for no value to the tenant.

Para 3(2)(3) sch 16 FA 2003 is excluded for ATED because otherwise a company purchaser might avoid the penal rate by arranging for the vendor to grant a lease to a non-corporate nominee for the purchaser.[14]

The reason for the exception in para 3(4) is unclear but as the charge is paid by the purchaser, not the vendor, it may not matter.

75.6 Consideration in form of rent

Para 3(9) sch 4A FA 2003 provides:

> In the case of a transaction for which the whole or part of the chargeable consideration is rent, this paragraph has effect subject to section 56 and Schedule 5 (amount of tax chargeable: rent).

75.7 Apportionment

The rest of para 2 sch 4A FA 2003 deals with apportionment:

> (3) If the main subject-matter of the transaction includes a chargeable interest other than a higher threshold interest, the transaction ("the primary transaction") is to be treated for the relevant purposes [including the SDLT penal rate][15] as two separate chargeable transactions as follows—
>
> (a) a transaction whose subject-matter is all the higher threshold interests, together with any appurtenant rights;
>
> (b) a transaction whose subject-matter is the remainder of the subject-matter of the primary transaction.
>
> (4) For those purposes, the chargeable consideration for a transaction treated as occurring under sub-paragraph (3) is so much of the chargeable consideration for the primary transaction as is attributable to that transaction.

---

14 I am grateful to Justin Bryant for his comments on this provision.

15 Para 2 sch 4A FA 2003 provides the definition:

"'Relevant purposes' means the purposes of—

(a) paragraphs 3, 5 to 5K and 6A to 6H of this Schedule,

(b) section 55 (amount of tax chargeable: general),

(c) Schedule 5 (amount of tax chargeable: rent),

(d) Schedule 6B (transfers involving multiple dwellings), and

(e) any other provision of this Part, so far as it is necessary because of any of paragraphs (a) to (d) to treat the purposes in question as relevant purposes."

(5) The transaction mentioned in sub-paragraph (3)(a) is a high-value residential transaction for the purposes of paragraph 3.

75.8 Linked transactions

Para 4 Sch 4A FA 2003 provides:

(1) Sub-paragraphs (2) and (3) apply if—

(a) the subject-matter of a chargeable transaction includes a chargeable interest in or over a dwelling,

(b) one or more land transactions, the subject-matter of each of which includes a chargeable interest in or over the dwelling, are linked to that chargeable transaction, and

(c) the total consideration attributable to the interests mentioned in paragraphs (a) and (b) (and to any appurtenant rights, but disregarding any rent) is more than £500,000.

(2) Each of those chargeable interests is treated as a higher threshold interest for the purposes of this Schedule.

(3) If the condition in paragraph 3(3) is met in the case of the transaction mentioned in sub-paragraph (1)(a), it is also treated as met in the case of each transaction mentioned in sub-paragraph (1)(b) that is a chargeable transaction.

75.9 SDLT penal rate reliefs

The following reliefs apply:

Business of letting, trading or redeveloping properties: para 5

Trades involving making a dwelling available to the public: para 5B

Financial institutions acquiring dwellings in the course of lending: para 5C

Dwellings for occupation by certain employees/partners: para 5D

Farmhouses: para 5F

75.10 Annual tax on enveloped dwellings (ATED)

A note on terminology: The term proposed in Budget 2012 was "Annual Residential Property Tax". The current term was announced in March 2013. No reason was given for the change but "ATED" is more focussed, and less likely to concern taxpayers worried about future residential property taxes. The label given to a tax is important for politics, as the community charge/poll tax debate illustrates.

Section 94 FA 2013 provides:

(1) A tax (called "annual tax on enveloped dwellings") is to be charged

> in accordance with this Part.
> (2) Tax is charged in respect of a chargeable interest if on one or more days in a chargeable period–
> (a) the interest is a single-dwelling interest and has a taxable value of more than £1 million,[16] and
> (b) a company, partnership or collective investment scheme meets the ownership condition with respect to the interest.

The requirements for a charge are (in short):

(1) A residence valued above £2m; this is split into 3 requirements:
  (a) A chargeable interest (in short, UK land)
  (b) A single-dwelling interest (in short, a single dwelling)
  (c) Taxable value (in short, market value) above £2m
(2) The ownership condition

SDLT is a tax on acquisition of a chargeable interest, so it is charged once, on the acquisition. By contrast, ATED is a tax on ownership, and it is charged annually.

75.11 The corporate ownership condition

Section 94(2)(b) FA 2013 provides that ATED is charged if:

> a company, partnership or collective investment scheme meets the ownership condition with respect to the interest.

There has to be a company, partnership or CIS, ie a "non-natural" person.[17]

Section 94 FA 2013 provides:

> (4) A company meets the ownership condition with respect to a single-dwelling interest on any day on which the company is entitled to the interest (otherwise than as a member of a partnership or for the purposes of a collective investment scheme).
> (5) A partnership meets the ownership condition with respect to a single-dwelling interest on any day on which a member of the partnership that is a company is entitled to the interest (as a member of the partnership).

---

16 The figure is reduced to £500k from 1 April 2016: see HMRC, *Changes to the taxation of high value UK residential property held by certain non-natural persons, https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/293952/TIIN_9000_changes_to_the_taxation_of_high_value_UK_residential_property.pdf*

17 See 75.4 (Corporate purchaser condition ("non-natural person")).

(6) A collective investment scheme meets the ownership condition with respect to a single-dwelling interest on any day on which the interest is held for the purposes of the scheme.

For clarity I refer to this as **"the corporate ownership condition"**. It is the ATED equivalent of the SDLT corporate purchaser condition.

The corporate ownership condition is the distinguishing feature of ATED.

75.11.1 *"Entitled"*

Section 95 FA 2013 provides:

(1) In this Part "entitled" means beneficially entitled—
(a) whether solely or jointly with another person, and
(b) whether as a member of a partnership or otherwise.
This is subject to subsection (2).

Section 95 FA 2013 provides 3 exceptions:

(2) References in this Part to entitlement to a single-dwelling interest (or any other chargeable interest) do not include—
(a) entitlement in the capacity of a trustee[18] or personal representative, or
(b) entitlement as a beneficiary under a settlement.[19]
(3) Subsection (1)(b) does not apply where the contrary is specified.

A corporate trustee does not meet the corporate ownership condition as it is not "beneficially" entitled to the interest.

A foundation is in principle a company, and, perhaps, beneficial owner, though they are not used as a means of SDLT avoidance.

75.11.2 *Company in liquidation*

The CT Manual provides:

CTM36125 - Particular topics: company winding up etc: beneficial ownership of shares [June 2012]
When winding-up commences, a company loses its beneficial interest in its assets. The company may retain legal title and possession of the

18 The reference to trustee is otiose, since a trustee is not beneficially entitled.

19 Section 95(4) FA 2013 provides a referential definition: "In this section "settlement" has the same meaning as in Part 4 of FA 2003 (see paragraph 1 of Schedule 16 to that Act)."

assets but it loses beneficial ownership of the assets. This includes shares owned in other companies (see *Ayerst v C and K (Construction)* 50 TC 651). The effect is that, where the provisions of the Acts depend on such shareholdings, they can no longer be taken into account when the company owning the shares commences winding-up.

Does the charge to ATED cease when winding up commences?

75.11.3 *"Beneficially entitled": Joint ownership*

Section 94 FA 2013 provides:

> (7) If a company is jointly entitled[20] to a chargeable interest (as a member of a partnership or otherwise), then regardless of whether the company is entitled as a joint tenant or tenant in common (or, in Scotland, as a joint owner or owner in common) the ownership condition is regarded as met in relation to the whole chargeable interest.

This is an unfair rule, but the provisions are intended to be penal, not fair.

75.12 Chargeable person

Section 96(1) F 2013 provides:

> The chargeable person is liable to pay tax charged under this Part.

The definition of chargeable person is broadly what one would expect.

75.12.1 *Chargeable person: company owner*

Section 96(2) FA 2013 provides:

> (2) "The chargeable person" means–
> (a) in relation to tax charged by virtue of section 94(4), the company;

75.12.2 *Chargeable person: company owner*

Section 96(2) FA 2013 provides:

---

20 Section 174 FA 2013 provides a commonsense definition:
"jointly entitled" means–
(a) in England and Wales, beneficially entitled as joint tenants or tenants in common,
(b) in Scotland, entitled as joint owners or owners in common,
(c) in Northern Ireland, beneficially entitled as joint tenants, tenants in common or coparceners.

(2) "The chargeable person" means ...

(b) in relation to tax charged by virtue of section 94(5), the responsible partners.[21]

Section 96(4) FA 2013 provides:

The liability of the responsible partners to pay tax charged on them under this Part is joint and several.

75.12.3 *Chargeable person: CIS owner*

Section 96(3) FA 2013 provides:

In relation to tax charged by virtue of section 94(6) "the chargeable person" means–

(a) if the collective investment scheme is a unit trust scheme, the trustee of the scheme;

(b) if the collective investment scheme is an open-ended investment company, the body corporate referred to in section 236(2) of the Financial Services and Markets Act 2000;

(c) in relation to an EEA UCITS which is not an open-ended investment company or unit trust scheme, the management company for that UCITS;

(d) in any other case, the person who has day-to-day control over the management of the property subject to the scheme.

75.12.4 *More than one chargeable person*

Section 104 FA 2013 provides:

Tax in respect of a given single-dwelling interest is charged only once for any chargeable day even if more than one person is "the chargeable person" with respect to the tax charged

75.13 *Joint owners*

Section 97 FA 2013 provides:

(1) Subsection (2) applies if

(a) a company is within the charge for a chargeable period with

---

21 Section 95(5) FA 2013 provides the definition: "The reference in this section to "the responsible partners" are to all the persons who are members of the partnership concerned on the first day in the chargeable period on which the partnership meets the ownership condition with respect to the single-dwelling interest."

respect to a single-dwelling interest by virtue of section 96(2)(a) and

(b) one or more other persons are jointly entitled to the interest on the first day in that period on which the company is within the charge with respect to it.

(2) The company and the other person or persons are jointly and severally liable for the tax charged for that period with respect to the interest (whether or not those other persons are also within the charge with respect to the interest on the day in question).

Presumably a right of reimbursement is implied.

75.14 Rate of ATED

Section 99 FA 2013 provides:

(1) The amount of tax charged for a chargeable period with respect to a single-dwelling interest is stated in subsection (2) or (3).
(2) If the chargeable person is within the charge with respect to the single-dwelling interest on the first day of the chargeable period, the amount of tax charged is equal to the annual chargeable amount.

This is straightforward unless there is a change of ownership during the chargeable period.

75.14.1 *"Annual chargeable amount"*

Section 99(4) FA 2013 provides:

The annual chargeable amount for a single-dwelling interest and a chargeable period is determined in accordance with the following table, by reference to the taxable value of the interest on the relevant day.

Annual chargeable amount	*Taxable value of the interest on the relevant day*
[£3,500	More than £500,000but not more than £1 million.][22]
[£7,000	More than £1 million but not more than £2 million.][23]
£15,000	More than £2 million but not more than £5 million.
£35,000	More than £5 million but not more than £10 million.
£70,000	More than £10 million but not more than £20 million.
£140,000	More than £20 million.

The rates can be expressed as follows:

22 This takes effect from 1April 2016: see s.104 FA 2014.
23 This takes effect from 1April 2016: see s.103 FA 2014.

Property Value	**ATED**	**% of value**
£2m to £5m	£15,400	0.3% - 0.75%
£5m to £10m	£35,900	0.35% - 0.7%
£10m to £20m	£71,850	0.35% - 0.7%
£20m +	£143,750	< 0.1% - 0.7%

Rather than a straight *ad valorem* charge, APRT uses a banding system. This has been pejoratively described as a "cliff-edge" system, but it was the right decision, as it avoids the necessity for an exact valuation.[24] The consequence is that:

(1) The lower value properties in the range pay the highest rate of tax (computed as a proportion of property value).
(2) Striking results as the value tips over the band:
   (a) Residential property worth £2m will not attract ATED, but if it was worth 1p more then APRT of £15k p/a is payable.
   (b) Residential property worth £5m will also pay ATED of £15,000 p/a, but if it is worth 1p more the rate will be £36k p/a.

However the unfairness at the margins may be mitigated by planning: perhaps renovate the kitchen leaving work outstanding on the valuation date; the ATED saving may fund the renovation.

ATED rates may be less, or slightly more, than the IHT 10 year charges on a relevant property trust: that depends on whether the property is near the top or the bottom of the ATED band. At the very top of the price range, ATED is much less than the IHT. This is surprising until one remembers that ATED is not intended to counter IHT planning using companies.

75.14.2 *Increase of annual chargeable amounts*

Section 101 FA 2013 provides for indexation:

> (1) If the consumer prices index for September in 2013 or any later year ("the later year") is higher than it was for the previous September, section 99(4) applies in relation to chargeable periods beginning on or after 1 April in the year after the later year with the following amendments.
> (2) For each of the annual chargeable amounts stated in the table in section 99(4) (as it applies in relation to chargeable periods beginning

24 Unlike, the much criticised SDLT rates, where valuations are not usually needed, so the banding system has no practical advantage to set against the unfairness.

in the previous 12 months) there is substituted the indexed amount.
(3) "The indexed amount" is found by–
(a) increasing the previous amount by the same percentage increase as the percentage increase in the consumer prices index, and
(b) rounding down the result to the nearest multiple of £50.
(4) In this section "consumer prices index" means the all items consumer prices index published by the Statistics Board.
(5) The Treasury must, before 1 April 2014 and before each subsequent 1 April, make an order stating the amounts that by virtue of this section are to be the annual chargeable amounts for chargeable periods beginning on or after that date.

Indexation is by reference to the CPI and not the RPI.[25]

75.15 Change of ownership during chargeable period

It is necessary to consider the position of the previous owner and the new owner (for convenience here called vendor and purchaser, though the rules do not require a sale).

75.15.1 *Position of purchaser*

The rule is commonsense expressed in a complex way.

The starting point is s.99(3) FA 2013. One needs to read (3) with (2) to follow the sense:

(2) If the chargeable person is within the charge with respect to the single-dwelling interest on the first day of the chargeable period, the amount of tax charged is equal to the annual chargeable amount.
(3) Otherwise, the amount of tax charged is equal to the relevant fraction of the annual chargeable amount.

75.15.2 *"Relevant day"*

The definition of relevant fraction uses the term relevant day.

---

25 The CPI and RPI are similar. The precise weights attached to the individual items in each index differ and the RPI includes a number of items chosen to represent owner-occupier housing costs, including mortgage interest payments and depreciation costs, which are excluded from the CPI. See *http://www.ons.gov.uk/ons/rel/cpi/cpi-rpi-basket/2012/index.html*.
Parliament decided about 2012 to use the CPI instead of the RPI which is said to be a more appropriate measure of the general level of prices, a more accurate reflection of consumer shopping patterns, and more consistent with international indices. It is the basis of the Bank of England's inflation target.

Section 99(5) FA 2013 provides:

> The "relevant day" is ...
>
> (b) for the purposes of subsection (3), the first day in the chargeable period on which the chargeable person is within the charge with respect to the interest.

75.15.3 *"Relevant fraction"*

Section 99(6) FA 2013 provides:

> The relevant fraction is (N ÷ Y) where–
>
> "N" is the number of days from (and including) the relevant day to the end of the chargeable period;
>
> "Y" is the number of days in the chargeable period.

75.15.4 *Relief for vendor*

The vendor is in the first instance charged for the entire chargeable period, even if there is a disposal during the period.

Section 106 FA 2013 provides the relief:

> (1) Where
>
> [a] tax is charged for a chargeable period with respect to a single-dwelling interest and
>
> [b] the adjusted chargeable amount is greater than the initial charged amount,
>
> the amount of tax charged is taken to be increased to the adjusted chargeable amount...
>
> (3) Subsection (4) applies where–
>
> (a) tax is charged for a chargeable period with respect to a single-dwelling interest,
>
> (b) the adjusted chargeable amount is less than the initial charged amount, and
>
> (c) a claim for relief is made under this subsection.
>
> (4) The amount of tax charged for the period with respect to the interest is taken to be reduced (at the end of the chargeable period) to the adjusted chargeable amount.
>
> (5) Relief under subsection (3) must be claimed–
>
> (a) in an ATED return, or
>
> (b) by amending an ATED return.
>
> (6) The claim must be delivered by the end of the chargeable period following the one to which the claim relates.
>
> (7) Relief under subsection (3) may be given by repayment of tax or otherwise.

75.15.5 *"Initial charged amount"*

Section 106(2) FA 2013 provides:

> In this section "the initial charged amount" means the amount of tax charged under section 99 for the period in respect of the interest.

75.15.6 *Adjusted chargeable amount*

Section 105 FA 2013 provides:

> (1) In relation to a person on whom tax is charged for a chargeable period with respect to a single-dwelling interest, the "adjusted chargeable amount" is the total of the daily amounts for all the days in the period on which the chargeable person is within the charge with respect to the interest.
> (2) The daily amount for any such day ("the actual day") is–
> $(1 \div Y) \times A$

That could be written more simply as $(A \div Y)$

> where–
> "Y" is the number of days in the chargeable period;
> "A" is the annual chargeable amount for the single-dwelling interest, determined (under section 99(4)) on the basis that the actual day is the relevant day.

75.16 Taxable value

Section 102(1) FA 2013 provides:

> (1) The taxable value of a single-dwelling interest on any day ("the relevant day") is equal to its market value at the end of the latest day that–
> (a) falls on or before that day, and
> (b) is a valuation date in the case of that interest.

Valuation is on the "valuation date".

75.16.1 *Ascertaining market value*

CGT rules apply for determining market value. Section 98(8) FA 2013 provides:

> For the purposes of this Part "market value" is to be determined as for the purposes of the TCGA 1992 (see, particularly, section 272 of that Act).

One is valuing the interest held by the chargeable person, not the land as such. The Residential Property Consultation Document provides:

> 2.32 Where there is a freehold interest and one or more subordinate leasehold interests in the same dwelling, and each is owned by unconnected persons within the charge, each will need to value their distinct interest and each may be liable to the annual charge based on those valuations. So, for example, when a property is purchased on a lease but the freehold is owned by a separate company, then both the freehold and the leasehold will be valued and the annual charge applied separately to the freehold (if valued over £2 million) and the leasehold (if valued over £2 million if also owned by a non-natural person).

There is no deduction for a mortgage, as CGT principles apply: see s.26(3) TCGA:

> An asset shall be treated as having been acquired free of any interest or right by way of security subsisting at the time of any acquisition of it, and as being disposed of free of any such interest or right subsisting at the time of the disposal...

It is considered that this rule is implied by applying CGT valuation principles.

The Residential Property Consultation Document provides:

> 2.44 ... 'Market value' will be defined in similar terms to the definitions used for capital gains tax, as described in the Royal Institution of Chartered Surveyors Valuation Standards UKGN3 and the VOA Guidance Manuals: *http://www.voa.gov.uk*/

75.16.2 *"Valuation date"*

Section 102(2) FA 2013 provides:

> Each of the following is a valuation date in the case of any single-dwelling interest–
>
> (a) 1 April 2012;
>
> (b) each 1 April falling 5 years, or a multiple of 5 years, after 1 April 2012.

In short, we revalue every 5 years, so diarise 2017 now: January 2017 to review the position, though 1 April will be the valuation date.

75.16.3 *Revaluation on disposal*

Section 102 FA 2013 provides:

> (3) The following are also valuation dates in the case of any single-dwelling interest to which a company is entitled on the relevant day (otherwise than as a member of a partnership)–
>
> (a) the effective date of any substantial acquisition by the company of a chargeable interest in or over the dwelling concerned;
>
> (b) the effective date of any substantial disposal of part (but not the whole) of the single-dwelling interest.

Section 102 FA 2013 provides equivalent rules for a corporate partnership and a CIS:

> (4) The following are also valuation dates in the case of any single-dwelling interest to which a company is entitled on the relevant day as a member of a partnership–
>
> (a) the effective date of any substantial acquisition as a result of which a chargeable interest in or over the dwelling concerned became an asset of the partnership,
>
> (b) the effective date of any substantial disposal of part (but not the whole) of the single-dwelling interest.
>
> (5) The following are also valuation dates in the case of any single-dwelling interest that is on the relevant day held for the purposes of a collective investment scheme–
>
> (a) the effective date of any substantial acquisition, made for the purposes of the scheme, of a chargeable interest in or over the dwelling concerned;
>
> (b) the effective date of any substantial disposal of part (but not the whole) of the single-dwelling interest.

75.16.4 *"Disposal" and "Acquisition"*

Section 102 FA 2013 provides:

> (6) In this section references to a disposal of part of a single-dwelling interest include the grant of a chargeable interest out of the single-dwelling interest.
>
> (7) The grant of an option does not count as the grant of a chargeable interest for the purposes of subsection (6).

75.16.5 *Practice and guidance on valuation*

The Residential Property Consultation Document provides:

> 2.37 Property valuations for the annual charge will be self-assessed by the persons liable to the charge and submitted to HMRC as part of their annual charge tax return. HMRC will have powers to enquire into returns and also to make assessments so that non-compliance can be effectively challenged.

75.16.6 *Is a professional valuation needed?*

The Residential Property Consultation Document provides:

> 2.39 HMRC guidance will set out that a valuation provided to a taxpayer by a suitably qualified valuer of real estate would normally protect the taxpayer from possible penalties should it be subsequently established that their property has been significantly undervalued. A self valuation would bear a higher risk of not providing such protection.

That depends on the facts and will not be true in all cases.

> 2.40 Non-natural persons who believe they own a residential dwelling below, but in the region of, £2 million pounds may be liable to penalties if they fail to take proper care to establish a correct valuation on the appropriate date, and the property interest is in fact worth more than £2 million....
> 2.42 The valuation should provide a point valuation (i.e. a specific price).

There is no need for a point valuation, but it would help HMRC identify borderline cases, and is required for an HMRC pre-return banding check.

> The property can then be placed within one of the banding structures in Table 2.A. ...
> 2.43 Valuations submitted to HMRC will be subject to checking by the Valuation Office Agency (VOA).

HMRC offer inconsistent advice on the issue of whether an independent valuation is needed:

> 3.49 HMRC will not routinely expect taxpayers to commission a professional valuation of their property, which may be expensive. It will seek to use information it already possesses or can readily access to check a customer's declaration.
> 3.50 Just like for any other tax, the taxpayer must make an honest self appraisal of its liability, or lack of liability, and provide a reasonable valuation of the dwelling.
> 3.51 HMRC is not specifying any particular requirements for this: it is

up to the taxpayer to decide what is appropriate in particular circumstances, taking into account when the property was bought and what comparisons can be made from local sales and purchases.

75.16.7 *HMRC valuation service*

HMRC say:

Pre-return banding checks

In certain circumstances, you can ask HMRC to carry out a check on your property details and valuation to see if you need to pay ATED. This is called having a ‹pre-return banding check' (PRBC).

When to ask for a PRBC

Customers might want to contact HMRC where a property is valued at an amount close to one of the band thresholds. This is so they can agree which ATED band the property falls into, or whether it falls outside the tax as it is deemed to be under the £2 million or less threshold. This is called having a PRBC and is available to customers who meet the following:

- you are not due a relief that will reduce the ATED charge to nil
- the value you have placed on the property falls within 10 per cent of a banding threshold

If your property is valued between the thresholds shown below you may be able to apply for a PRBC using the form that will be available on the HMRC website from 1 June 2013.

When they receive your PRBC application form, HMRC will send you an acknowledgement and provide you with a reference number. They aim to provide a response to your application within 30 working days of receiving it.

HMRC will only confirm that they agree to the banding you propose, and not the specific valuation of the property. You can't use this confirmation for any other taxation purposes.

HMRC will either:

- agree that the band that you have chosen is appropriate based on the information you have provided
- ask for further information from you to help them make a decision about whether you have chosen the correct band
- tell you that they don't agree with the valuation band you have chosen

If you decide you need a PRBC, it's important that you apply at least 30 working days before the date on which you need to send your return - the earlier the better. This means HMRC can tell you their decision - particularly if they need more information before giving that decision - in time for you to use it when sending your return.

In some cases, the inside of the building might need to be inspected as part of the check. HMRC will normally be able to accept valuations prepared by a professional property valuer but they reserve the right to:

- enquire into any subsequent ATED returns
- challenge valuations included in those returns where they consider there is a risk that the return or valuation is wrong

What to do if you don't receive your PRBC in time

If you didn't leave enough time for HMRC to give you a PRBC decision, or they have asked you for more information, you might not get their decision in time for the date you need to send your ATED return. If you think you might need to pay ATED then you should send the return along with the appropriate payment of tax. That way you can avoid accruing interest or becoming liable for a penalty for sending the return late.

You should base your ATED return on the banding you think is most appropriate. HMRC may decide to open an enquiry into your return to enable them to continue considering the appropriate banding for your property.

You must include your PRBC reference number on any return or correspondence that you sent to HMRC.

Remember that if you don't complete and send HMRC a return or payment, or you send it late or make a mistake on it, you may have to pay a penalty and interest.

If, after you've sent your return and payment, HMRC tells you that they don't agree with your valuation and you have underpaid, you should complete an amended return and send it, with the additional payment, as soon as you can.

Interest will be payable on any ATED paid late, but HMRC won't charge a penalty if you were waiting for a PRBC decision when your return was due.

If HMRC tells you that they don't agree with your valuation and you've overpaid then you need to send an amended return with a claim for repayment. HMRC will repay you any ATED you've overpaid, and you might be able to claim interest.

If you don't agree with HMRC's decision

You should send your return based on your best estimate of the value of your property. HMRC may decide to open an enquiry into your return to enable them to look in more detail at the appropriate banding for your property.

Where you believe that your property is worth £2 million or less and that a return is not due, HMRC may issue a 'determination' to you based on the banding that they believe to be correct. A 'determination' is where

> HMRC makes a 'best estimate' of the ATED that you owe based on their valuation of your property and issues a demand for payment. You can appeal against this determination if you don't agree with it.
> You should include your PRBC reference number on any return or correspondence that you send to HMRC.[26]

The disadvantage of a PRBC may be a greater likelihood of a valuation dispute.

75.17 "Chargeable period"

This term matters because ATED is charged by reference to chargeable periods.

Section 94 FA 2013 provides:

> (3) The tax is charged for the chargeable period concerned...
> (8) The chargeable periods are–
> (a) the period beginning with 1 April 2013 and ending with 31 March 2014, and
> (b) each subsequent period of 12 months beginning with 1 April.

75.18 "Chargeable interest"

This term matters because ATED is charged on a chargeable interest.

Section 107(1) FA 2013 provides:

> In this Part "chargeable interest" means–
> (a) an estate, interest, right or power in or over land in the United Kingdom, or
> (b) the benefit of an obligation, restriction or condition affecting the value of any such estate, interest, right or power.

This is the same as the definition of "chargeable interest" for SDLT, in s.48 FA 2003.

Section 107(2) FA 2013 provides:

> Where two or more persons are jointly entitled to a chargeable interest the chargeable interest is not regarded, for the purposes of this Part, as consisting of separate interests corresponding to the shares (if any) that those persons have by virtue of their joint entitlement.

75.19 "Exempt interest"

"Exempt interest" is a label for a set of rules: when the drafter wishes to

---

26 *http://www.hmrc.gov.uk/ated/pre-return-banding-checks.htm*

provide exemption it is done by making the interest exempt.

Section 107(3) FA 2013 provides:

> An exempt interest is not a chargeable interest for the purposes of this Part.

There are three types of exempt interest.[27]

The position is effectively the same as for SDLT: see s.48 FA 2003.[28]

75.19.1 *Security interest*

Section 107(4) FA 2013 provides:

> (4) The following are exempt interests–
> (a) any security interest;

Section 107(5) FA 2013 provides a commonsense definition:

> In subsection (4) "security interest" means an interest or right (other than a rent charge[29]) held for the purpose of securing the payment of money or the performance of any other obligation.

If a company lends to a X unsecured, X has an asset but not an interest in land, so not a chargeable interest. If the loan is secured on land, the asset is an interest in land, but an exempt interest and so still not a chargeable interest.

75.19.2 *Licence and tenancy at will*

Section 107(4) FA 2013 provides:

> The following are exempt interests ...
> (b) a licence to use or occupy land;
> (c) in England and Wales or Northern Ireland, a tenancy at will.

75.20 "Single-Dwelling interest"

This term matters as ATED only applies if the chargeable interest is a single-dwelling interest.

---

27 For completeness, s.107 FA 2013 provides:
"(7) The Treasury may by regulations provide that any other description of interest or right in or over a dwelling is an exempt interest."

28 The SDLT legislation provides that an advowson, franchise or manor is an exempt interest, but that is not needed here as these are not dwelling-interests.

29 Section 107(6) FA 2013 makes appropriate provision for Scotland which does not use the term "rentcharge".

75.20.1 *The general rule*

Section 108 FA 2013 provides the general rule:

> (1) References in this Part to a "single-dwelling interest" are to be read in accordance with this section.
> (2) A chargeable interest that is exclusively in or over land consisting (on any day) of a single dwelling is a single-dwelling interest (on that day).

Section 108 FA 2013 defines "in":

> (5) A single dwelling interest is referred to as a single-dwelling interest "in" the dwelling concerned.
> (6) A single-dwelling interest in one dwelling is distinct from any single-dwelling interest in another dwelling, even if the dwellings stand successively on the same land.

Is this looking at the position if a building is knocked down and rebuilt?

75.20.2 *Apportionment*

Section 108(3) FA 2013 deals with a single interest in multiple dwellings (which will not be common):

> Where a person is entitled to a chargeable interest that is exclusively in or over land consisting (on any day) of two or more single dwellings–
> (a) provisions referring to a "single-dwelling interest" operate as if the person had (on that day) a separate chargeable interest in or over each dwelling, and
> (b) the chargeable interest in or over each dwelling is therefore a single-dwelling interest.

Section 108(4) FA 2013 deals with a single interest in a dwelling and other land (eg a house and accompanying estate):

> Where a person is entitled to a chargeable interest in or over land that on any day consists of one or more single dwellings and non-residential[30] land–
> (a) provisions referring to a "single-dwelling interest" operate as if the person had (on that day) a separate chargeable interest in or

30 Section 108(7) FA 2013 provides a commonsense definition of non-residential land: "In this section–
(a) "non-residential land" means land that is not a dwelling or part of a dwelling;"

over each dwelling and a further separate chargeable interest in or over the non-residential land, and

(b) the chargeable interest in or over each dwelling is therefore a single-dwelling interest.

75.20.3 *"Dwelling"*

Section 108(7) FA 2013 provides a partial definition:

> In this section ...
>
> (b) references to a dwelling include a part of a dwelling.

Unlike the SDLT penal rate, ATED provides for the amalgamation of property interests in some circumstances so that a 'dwelling' for the purposes of ATED may encompass a number of single dwellings in a building or which stand in the same grounds, if there is private access between them.

75.21 Different interests held in the same dwelling

Section 109 FA 2013 provides:

> (1) Subsection (2) applies if on one or more days in a chargeable period–
>
> (a) a company is entitled to two or more single-dwelling interests in the same dwelling, or
>
> (b) two or more single-dwelling interests in the same dwelling are held for the purposes of the same collective investment scheme.
>
> (2) This Part has effect with respect to that chargeable period as if those separate interests constituted just one single-dwelling interest, the taxable value of which on any day is the sum of the taxable values of the separate interests.
>
> (3) In calculating the taxable values of the separate interests for the purposes of subsection (2), the market value of each interest is determined, under the provisions of TCGA 1992 applied by section 98(8), on the assumption that the other interest or interests are placed on the open market with that interest (on the valuation date appropriate to that interest).

Why is this needed?

75.22 Interests held by connected persons

The rule that the taxable value is the value of the interest held by the chargeable person would give rise for scope for tax planning by splitting interests.

Section 110(1) FA 2013 provides:

> (1) If on any day
>
> [i] a company ("C") is entitled to a single-dwelling interest in a dwelling and
>
> [ii] another person ("P") who is connected with C is entitled to a different single-dwelling interest in the same dwelling,
>
> this Part has effect–
>
> (a) in relation to C as if C were on that day entitled to P's single-dwelling interest as well as C's single-dwelling interest, and
>
> (b) (if P is a company) in relation to P as if P were on that day entitled to C's single-dwelling interest as well as P's single-dwelling interest.

An obvious case is if A Ltd (a company) holds the reversion and B (a connected person and, perhaps, an individual) holds a lease. A Ltd is taxed as if it holds both interests.

This will raise problems for the common case of a block of flats where the residents hold a lease and the reversion is held by a company of which the residents are the owners (typically a company limited by guarantee of which the residents are the members).

See 75.13 (Joint owners).

75.22.1 *£500k exemption*

Section 110(2) FA 2013 provides:

> This subsection provides for an exception to subsection (1).
>
> Where P is an individual, C is not treated on the day in question as entitled to P's single-dwelling interest unless on that day C is entitled to a single-dwelling interest in the dwelling that is a freehold or leasehold interest with a taxable value of more than £500,000.

75.22.2 *Collective investment scheme*

Section 110 FA 2013 provides a similar rule for a CIS:

> (3) If on any day a single-dwelling interest ("the scheme interest") is held for the purposes of a collective investment scheme and a person ("P") who is connected with the scheme is entitled to a different single-dwelling interest in the same dwelling, this Part has effect–
>
> (a) in relation to the scheme, as if both those separate interests were on that day held for the purposes of the scheme, and
>
> (b) (if P is a company) in relation to P as if P were (on that day)

entitled to the scheme interest as well as P's single-dwelling interest.

(4) If on any day a single-dwelling interest in a dwelling is held for the purposes of a collective investment scheme ("the first scheme") and another interest in the same dwelling is held for the purposes of another collective investment scheme ("the second scheme") that is connected with the first scheme, this Part has effect

(a) in relation to the first scheme, as if both the interests were held on that day for the purposes of that scheme, and

(b) in relation to the second scheme, as if both the interests were held on that day for the purposes of that scheme.

(5) See also-

(a) section 97, for provision about the liability to tax of persons treated under this section (read with section 104) as jointly entitled to a single-dwelling interest;

(b) paragraph 55 of Schedule 33, for provision about returns in cases involving joint entitlement.

(6) The provisions mentioned in subsection (5) are to be read as including corresponding provision for cases where the same single-dwelling interest is treated under this section as held—

(a) for the purposes of different collective investment schemes, or

(b) by a company and for the purposes of a collective investment scheme.

(7) In the application of this section in Scotland-

(a) the reference to a freehold interest is to the interest of the owner;

(b) the reference to a leasehold interest is to a tenant's right over or interest in property subject to a lease.

75.22.3 *Interaction with reliefs*

Section 111 FA 2013 provides:

(1) References in section 110 to a person do not include—

(a) a public body, as defined in section 153,

(b) a body listed in section 154(2) (bodies established for national purposes).
