(2) Subsections (1) to (4) of section 110 do not apply in relation to a single-dwelling interest if—

(a) the day in question is relievable with respect to that interest by virtue of section 150 (providers of social housing),

(b) by virtue of section 151 (charitable companies) the ownership condition is regarded as not met with respect to the interest on

that day, or

(c) the taxable value of the interest on that day is taken to be zero by virtue of section 155 (dwelling conditionally exempt from inheritance tax).

(3) Subsection (4) applies where the separate interests (the "relevant interests") that under section 110 (or that section and section 109) are treated as constituting, on a day, just one single-dwelling interest ("the combined interest") include—

(a) a freehold or leasehold interest, and

(b) a leasehold interest ("the inferior interest") granted out of that interest.

(4) If the inferior interest is the most inferior relevant interest, the combined interest, and the dwelling itself (where relevant), are regarded for the purposes of the relevant relieving provisions as being exploited, on the day mentioned in subsection (3), in the way the inferior interest is exploited on that day.

(5) If the inferior interest is an interest in part only ("the sub-let part") of the land that is the subject-matter of the combined interest, subsection (4) has effect in relation to the combined interest only so far as that interest relates to the sublet part.

(6) In this section "the relevant relieving provisions" means sections 132 to 150.

(7) The inferior interest counts as "the most inferior relevant interest" if no relevant interest (see subsection (3)) is a leasehold interest granted out of it.

(8) In this section the reference to a leasehold interest includes the interest of a lessee under an agreement for a lease.

(9) In the application of this section to Scotland—

(a) the reference to a freehold interest is to the interest of the owner;

(b) the reference to a leasehold interest is to a tenant's right over or interest in property subject to a lease;

(c) the reference to an agreement for lease includes missives of let.

75.23 Partnerships

75.23.1 *ATED treatment of partnership*

Section 167(2) FA 2013 provides:

> This Part has effect as follows in relation to a partnership (for instance, a limited liability partnership formed as mentioned in subsection (1)(c)) that is itself capable of being entitled to, or of acquiring or disposing of, a chargeable interest–

A common law partnership is not capable of being beneficially entitled to any interest. But this would apply to a LLP. (This is what the drafter had in mind with the words in brackets).

Section 167(2) continues:

> (a) transactions entered into on behalf of the partnership are treated as entered into by or on behalf of the partners;
> (b) where the partnership is entitled to a single-dwelling interest, this Part has effect as if the partners were jointly entitled to the interest (and the partnership had no entitlement to it).

This makes partnerships transparent for SDLT. It is the rough equivalent of the LLP provisions governing IT, CGT and IHT.[31]

> (3) For the purposes of this Part a partnership is treated as the same partnership despite a change in membership if any person who was a member before the change remains a member after the change.
> (4) For the purposes of this Part—
> (a) a collective investment scheme is not regarded as a partnership, and
> (b) accordingly, a member of a partnership by or on whose behalf a single-dwelling interest is held for the purposes of a collective investment scheme is not regarded as entitled to the interest as a member of the partnership.

75.23.2 *Administration*

Section 167 FA 2013 provides:

> (5) Anything required or authorised by this Part to be done by or in relation to the responsible partners for a partnership may instead be done by or in relation to any representative partner or partners.
> (6) A representative partner means a partner nominated by a majority of the partners to act as the representative of the partnership for the purposes of this Part of this Act.
> (7) Any such nomination, or the revocation of such a nomination, has effect only after notice of the nomination, or revocation, has been given to an officer of Revenue and Customs.

75.24 Tax consequences of paying ATED

Where the property is owned by a company which is owned by a

---

31 See 41.8 (Limited liability partnership); 82.34.4 (Situs of LLP).

settlement, the payment of tax by a beneficiary may be a transfer of value for IHT. Does it make the beneficiary a settlor?

Bringing funds into the UK to pay the ATED may be a remittance of the funds.

75.24.1 *ATED deduction for Income Tax/Corporation tax on rent*

The CIOT ask:

> 2.12 Where it is not possible to fall within a relief from ATED (for example due to the connection conditions and definition of non-qualifying persons), but nevertheless the property is used for business purposes (for example a property letting business) please can you confirm that the ATED would be deductible for corporation tax (or income tax in the case of a non-resident landlord company) purposes in computing the profits assessable to UK tax.

In principle a deduction should be available.

75.25 ATED Reliefs

Section 132 FA 2013 provides:

> (1) Subsection (2) applies where tax is charged, in respect of a single-dwelling interest, for a chargeable period that includes one or more days that are relievable as a result of any of the provisions listed in subsection (3) (or for more than one such period).
> (2) For any such period, the adjusted chargeable amount is to be calculated on the basis that the chargeable person is not within the charge with respect to the interest on any relievable day.

Section 132(3) FA 2013 sets out 10 reliefs:

> (3) The provisions are—
> s.133 (property rental businesses);
> s.134 (rental property: preparation for sale etc);
> s.137 (dwellings opened to the public);
> s.138 (property developers);
> s.139 (property developers: exchange of dwellings);
> s.141 (property traders);
> s.143 (financial institutions acquiring dwellings in the course of lending);
> s.145 (occupation by certain employees or partners);
> s.148 (farmhouses);
> s.150 (providers of social housing).

The only relief discussed in this work is the relief for a property rental business.

75.25.1 *DT relief*

ATED is not a tax similar to IT or CGT, so it will not fall within DTAs in the OECD model form.

75.26 Property rental business

It is convenient to start with some definitions:

75.26.1 *"Property rental business"*

Section 133(4) FA 2013 puts (I think) a commonsense definition in convoluted drafting:

> A business is a "property rental business" for the purposes of subsection (3) if it is a property business as defined in Chapter 2 of Part 4 of CTA 2009, but–
>
> (a) the question whether or not a business is a property rental business for the purposes of subsection (3) is determined without reference to whether or not any profits of the business are chargeable to corporation tax (and section 204(2) of CTA 2009 is therefore disregarded), and
>
> (b) for the purposes of this subsection the "rents or other receipts" referred to in section 207(1) of CTA 2009 are taken not to include excluded rents

The definition incorporates the CTA 2009 definition with amendments.[32]

Para (a) makes sense: s.204(2) CTA 2009 would restrict the term to property business within the scope of corporation tax; that is disapplied, so the ATED definition extends to a property business of a non-resident company, which falls within the scope of income tax.

One disregards "excluded rents". Section 133(6) FA 2013 provides:

> In this Part "excluded rents" means rents within any of classes 2 to 6 in the table in section 605(2) of CTA 2010.

So we turn to s.605(2) CTA 2010:

> Class 2 Rent in respect of an electric-line wayleave.

---

32 For that definition, see 17.2 ("Property business": terminology)

Class 3 Rent in respect of the siting of a pipeline for gas.
Class 4 Rent in respect of the siting of a pipeline for oil.
Class 5 Rent in respect of the siting of a mast or similar structure designed for use in a mobile telephone network or other system of electronic communication.
Class 6 Rent in respect of the siting of a wind turbine.

I would be grateful for any reader who could suggest why this is needed.

75.26.2 *"Qualifying" property rental business*

Section 133(3) FA 2013 provides:

> In this Part "qualifying property rental business" means a property rental business that is run on a commercial basis and with a view to profit.

For these expressions see 12.10.6 ("Commercial" Trade).

75.26.3 *Relief for property rental business*

Armed with these definitions, we can turn to the relief. Section 133 FA 2013 provides:

> (1) A day in a chargeable period is relievable in relation to a single-dwelling interest if on that day the interest–
>
> (a) is being exploited as a source of rents or other receipts (other than excluded rents) in the course of a qualifying property rental business carried on by a person entitled to the interest, or
>
> (b) steps are being taken to secure that the interest will, without undue delay, be so exploited in the course of a qualifying property rental business that is being carried on, or is to be carried on, by a person entitled to the interest.

75.26.4 *Property for sale or for conversion*

The relief in s.133(1) would not apply if the property is for sale or being converted. Section 134 FA 2013 provides a further relief:

> (1) A day ("day X") on which a person ("P") is entitled to a single-dwelling interest is relievable in relation to that interest if–
>
> (a) on day X the dwelling is unoccupied and any of the first to fourth conditions is met (see below),

I refer to **"rental property relief conditions 1-4"**

> (b) day X is preceded by one or more days ("qualifying days") that are relievable under section 133 in relation to the interest and

on which P, or a relevant partner,[33] was entitled to the interest, and

(c) the days (if any) between day X and the last of the qualifying days to precede day X are all relievable under this section.

75.26.5 Rental property relief conditions

Section 134(1) FA 2013 continues:

First condition [property for sale]
The first condition is that steps are being taken to secure that the interest will be sold without undue delay.
Second condition [demolition]
The second condition is that–

(a) steps are being taken to secure that the dwelling will be demolished without undue delay, and

(b) if it is intended that a new dwelling will be constructed on the site of the existing dwelling, the intention is that it will be used in a relievable way.

Third condition [conversion]
The third condition is that–

(a) steps are being taken to secure that the dwelling will be converted into a different dwelling without undue delay, and

(b) it is intended that the new dwelling will be used in a relievable way.

Fourth condition [conversion]
The fourth condition is that steps are being taken to secure that the dwelling will be converted into a building other than a dwelling without undue delay.
(2) A dwelling is "used in a relievable way" for the purposes of subsection (1) if the single-dwelling interest in question is exploited in such a way, or held in such a way and for such purposes, (or, as the case requires, the dwelling itself is exploited or used in such a way) that a day of such exploitation, ownership or use would be relievable under any of sections 133, 137, 145 and 148.

75.26.6 *"Without undue delay"*

Section 133(5) FA 2013 tries to define "undue delay":

---

33 Defined in s.134(3) FA 2013: "relevant partner", where P is (on day X) entitled to the interest as a member of a partnership, means a person who was at the time in question carrying on the qualifying rental property business concerned as a member of that partnership.

"In subsection (1)(b)
"without undue delay" means without delay except so far as delay is justified by commercial considerations or cannot be avoided."

Since this definition (if it can be called such) only applies for s.133, it is repeated verbatim in s.134(3).

75.26.7 *Non-qualifying occupier: Disapplication of present relief*

Section 133(2) FA 2013 provides:

> A day is not relievable by virtue of subsection (1) or section 134 in the case of a single-dwelling interest if on that day a non-qualifying individual is permitted to occupy the dwelling.

75.26.8 Disapplication of future relief

Section 135 FA 2013 provides:

> (1) Subsection (2) applies if on a day in a chargeable period ("the day of non-qualifying occupation")–
>
> (a) a single-dwelling interest to which a person ("the landlord") is entitled is being exploited as mentioned in section 133(1)(a) or steps are being taken to secure that the interest will be so exploited, as mentioned in section 133(1)(b), and
>
> (b) a non-qualifying individual is permitted to occupy the dwelling.
>
> If this condition is satisfied, s.135(2) disapplies rental property relief (in short) for the next 3 years:
>
> (2) No subsequent day in that chargeable period, or in any of the subsequent 3 chargeable periods, that meets the continuity of ownership condition and would (in the absence of this subsection) be relievable by virtue of section 133(1)(b) is treated as relievable by virtue of that provision unless a day of qualifying use falls between that day and the day of non-qualifying occupation.
>
> (3) A day meets the continuity of ownership condition if on that day—
>
> (a) the landlord is entitled to the single-dwelling interest, or
>
> (b) if the landlord carried on or (as the case requires) intended to carry on the property rental business in partnership, another member of the partnership is entitled to the interest.

75.26.9 *Disapplication of past relief*

Section 135(4) FA 2013 provides:

> Subsection (5) applies if a person who is a non-qualifying individual in

relation to a single-dwelling interest occupies the dwelling on a day in a chargeable period ("the day of non-qualifying occupation").

If that condition is satisfied, s.135 disapplies past relief for the present and preceding year:

(5) An earlier day in that or the preceding chargeable period ("the earlier day") is not relievable by virtue of section 133(1)(b) or 134 if a relevant person is entitled to the single-dwelling interest on that day.
(6) In subsection (5) "relevant person" means—
(a) a person who is entitled to the single-dwelling interest on the day of non-qualifying occupation, or
(b) if a person falling within paragraph (a) is or has been a member of a partnership whose members have at any time exploited the single-dwelling interest as a source of rents and receipts in a property rental business, any other member of that partnership.
(7) Subsection (5) does not apply in relation to the earlier day if a day that is relievable by virtue of section 133(1)(a) falls between that earlier day and the day of non-qualifying occupation.
(8) For the purposes of this section—
(a) "day of qualifying use", in relation to a single-dwelling interest, means a day that is relievable in the case of the interest by virtue of section 133(1)(a);
(b) occupation of any part of a dwelling is regarded as occupation of the dwelling.

75.27 Meaning of "non-qualifying" individual

75.27.1 *"Non-qualifying individual"*

Section 136 FA 2013 provides about the widest definition that the drafter could devise:

(1) In sections 133 and 135 "non-qualifying individual", in relation to a single-dwelling interest, means any of the following–
(a) an individual who is entitled to the interest (otherwise than as a member of a partnership),
(b) an individual ("a connected person") who is connected with a person entitled to the interest,
(c) if a person is entitled to the interest as a member of a partnership, an individual who is, or is connected with, a qualifying member of that partnership,
(d) an individual ("a relevant settlor") who is the settlor in relation to a settlement of which a trustee is (in the capacity of trustee)

connected with a person who is entitled to the interest,
(e) the spouse or civil partner
[i] of a connected person or
[ii] of a relevant settlor,
(f) [i] a relative
[A] of a connected person or
[B] of a relevant settlor,
[ii] or the spouse or civil partner
[A] of a relative of a connected person or
[B] of a relevant settlor,

Thus an uncle or aunt of T is not a connected person; but they are non-qualifying individuals because they are "relatives" (defined to include brother or sister) of a connected person (the parent of T). But the nephew or niece of T is a qualifying individual, as they are not "relatives" (as defined) of any connected person.

(g) a relative of the spouse or civil partner of a connected person or of a relevant settlor,
(h) the spouse or civil partner of a person falling within paragraph (g), or
(i) an individual who is
[i] a major participant in a relevant collective investment scheme or
[ii] is connected with a major participant in a relevant collective investment scheme.

75.27.2 *Supplemental definitions*

Section 136 FA 2013 provides six supplemental definitions:

(2) In subsection 1(c) "qualifying member", in relation to a partnership, means an member of the partnership who is entitled to a 50% or greater share–
(a) in the income profits of the partnership, or
(b) in the partnership's assets.
(3) In subsection (1)(i) "relevant collective investment scheme", in relation to a single-dwelling interest, means a collective investment scheme that meets the ownership condition with respect to the interest.
(4) A person who participates in a collective investment scheme is a "major participant" in the scheme if the person–
(a) is entitled to a share of at least 50% either of all the profits or income arising from the scheme or of any profits or income arising from the scheme that may be distributed to participants, or

(b) would in the event of the winding up of the scheme be entitled to 50% or more of the assets of the scheme that would then be available for distribution among the participants.

(5) The reference in subsection (4)(a) to profits or income arising from the scheme is to profits or income arising from the acquisition, holding, management or disposal of the property subject to the scheme.

(6) For the purpose of subsection (1), section 1122 of CTA 2010 (as applied by section 172) has effect as if subsections (7) and (8) of that section (application of rules about connected persons to partnerships) were omitted.

(7) In this section–

"relative" means brother, sister, ancestor or lineal descendant;

"settlement" and "settlor" have the same meaning as in Chapter 5 of Part 5 of ITTOIA 2005 (see section 620 of that Act).

(8) In subsection 1(d) "trustee" is to be read in accordance with section 1123(3) of CTA 2010 ("connected persons": supplementary).

75.28 ATED Definitions

75.28.1 *"Chargeable day" and "within the charge"*

Section 170 FA 2013 provides:

(1) Any day on which the conditions in section 94(2) are met with respect to a single-dwelling interest is a "chargeable day" for that interest;

(2) Where a day is a chargeable day as a result of subjection (1), the chargeable person is "within the charge" with respect to a single-dwelling interest on that day.

75.29 ATED-CGT

Section 2B(1) TCGA provides:

A person (other than an excluded person) ("P") is chargeable to capital gains tax in respect of any ATED-related chargeable gain accruing to P in a tax year on a relevant high value disposal.

I abbreviate "ATED-related gains" (or losses) to **"ATED-gains"** (or losses). We need to distinguish this charge from ordinary CGT; I refer to it as **"ATED-CGT"**.

Section 2B(3) TCGA provides:

Capital gains tax is charged on the total amount of ATED-related chargeable gains accruing to P in the tax year on relevant high value

disposals, after deducting ring-fenced ATED-related allowable losses in relation to that year.

75.30 Rate of ATED-CGT

Section 4(3A) TCGA provides:

> The rate of capital gains tax in respect of gains chargeable under section 2B accruing to a person in a tax year is 28%.

75.31 Partnerships

Partnerships are treated as transparent in accordance with normal CGT rules. A gain on the disposal of a UK residential property is apportioned between the partners in accordance with their shares in the property. To the extent that any gains are apportioned to "non-natural" partners ATED-CGT is chargeable on them.

An "excluded person" is not within ATED-CGT. Section 2B(2) TCGA provides:

> A person is "excluded" if the person is an individual, the trustees of a settlement or the personal representatives of a deceased person and—
>
> (a) the gain accrues on a disposal of any partnership assets and the person is a member of the partnership, or
>
> (b) the gain accrues on a disposal of any property held for the purposes of a relevant collective investment scheme and the person is a participant in relation to the scheme.

Non-partnerships do not need to be "excluded" as they are not within the scope of ATED in the first place.

75.32 "Relevant high value disposal"

Section 2C(1) TCGA provides:

> A disposal on which a gain or loss accrues to P is a "relevant high value disposal" if conditions A to D are met.

I refer to **"ATED-disposal conditions A to D"**.

75.32.1 *ATED-disposal condition A: Chargeable interest*

Section 2C(2) TCGA provides:

> Condition A is that the disposal is of the whole or part of a chargeable interest ("the disposed of interest").

"The disposed of interest" is a slovenly expression, but it is easiest to follow the statutory terminology.

75.32.2 *ATED-disposal condition B: Single-dwelling interest*

Section 2C(3) TCGA provides:

> Condition B is that the disposed of interest has, at any time during the relevant ownership period, been or formed part of a single-dwelling interest.

75.32.3 *ATED-disposal condition C: ATED applies*

Section 2C(4) TCGA provides:

> Condition C is that—
> (a) P, or
> (b) if the disposed of interest is a partnership asset, the responsible partners, or
> (c) if the disposed of interest is held for the purposes of a relevant collective investment scheme, the person who has day-to-day control over the management of the property subject to the scheme,
>
> has or have been within the charge to ATED with respect to that single-dwelling interest on one or more days in the relevant ownership period which are not relievable days in relation to the interest.

This incorporates the requirements and reliefs of ATED.

75.32.4 *ATED-disposal condition D: £2m threshold*

Section 2C(5) TCGA provides:

> Condition D is that the amount or value of the consideration for the disposal exceeds the threshold amount (see section 2D).

75.32.5 *Minor definitions*

Section 2C TCGA provides:

> (6) In this section and section 2D...
> "the relevant ownership period" means the period which begins—
> (a) if an election has been made under paragraph 5 of Schedule 4ZZA, with the day on which P acquired the chargeable interest or, if later, 31 March 1982, and
> (b) in any other case, with the day on which P acquired the chargeable interest or, if later, 6 April 2013,

and ends with the day before the day on which the disposal occurs; "relievable day" means a day which is "relievable" by virtue of any of the provisions mentioned in section 132 of the Finance Act 2013 (ATED: effect of reliefs) and in respect of which a claim has been made under section 106(3) of that Act...

(7) For the purposes of Condition C—

(a) Part 3 of the Finance Act 2013 applies, in relation to any part of the relevant ownership period falling before 1 April 2013, as if section 94(8)(a) of that Act (first chargeable period for ATED) read "the period beginning with 31 March 1982 and ending with 31 March 1983", and

(b) when determining whether any day falling before 1 April 2013 is a relievable day, the definition of "relievable day" in subsection (6) above is to read as if the words "and in respect of which a claim has been made under section 106(3) of that Act" were omitted.

75.33 "The threshold amount"

Section 2D TCGA provides:

(1) This section applies to determine "the threshold amount" in relation to a disposal which meets Conditions A to C in section 2C ("the current disposal").

(2) If–

(a) the current disposal is not a part disposal of an asset, and

(b) P has not made any relevant related disposals,

the threshold amount is £2 million, subject to subsection (5) (joint interests).

75.33.1 *Part disposals or related disposals*

Section 2D TCGA provides:

(3) If paragraphs (a) and (b) of subsection (2) do not both apply, the threshold amount is the relevant fraction of £2 million, subject to subsection (5) (joint interests).

Section 2D(4) TCGA then defines the relevant fraction:

(4) "The relevant fraction" is (C÷TMV)

In short, C is **C**onsideration and TMV is **T**he **M**arket **V**alue. In full detail:

"C" is the amount or value of consideration for the current disposal;

"TMV" is what would be the market value, at the time of the current

disposal, of a notional asset comprising–

(a) the disposed of interest (see section 2C(2)),

(b) if the current disposal is a part disposal, any part of the chargeable interest held by P that remains undisposed of immediately following that part disposal,

(c) any chargeable interest (or part of a chargeable interest) which was the subject of a relevant related disposal, and

(d) any chargeable interest (or part of a chargeable interest) held by P at the time of the current disposal which, if P had disposed of it at that time, would have been the subject of a relevant related disposal.

75.33.2 *Disposal of share*

Section 2D TCGA provides:

(5) If the disposed of interest is a share of the whole of–

(a) a chargeable interest, or

(b) part of a chargeable interest,

subsections (2) and (3) have effect as if the references to "£2 million" were to the joint share fraction of that amount.

(6) The joint share fraction is the fraction of the whole of the chargeable interest or part represented by the disposed of interest.

Co-owned property is caught even if held by unconnected persons.

75.33.3 *"Relevant related disposal"*

Section 2D(7) TCGA provides:

"Relevant related disposal", in relation to the current disposal, means any disposal by P which–

(a) meets Conditions A to C in section 2C in circumstances where the single-dwelling interest referred to in Condition C is–

(i) the single-dwelling interest by virtue of which Condition C is met in relation to the current disposal, or

(ii) another single-dwelling interest in the same dwelling as that interest, and

(b) was made in the period of 6 years ending with the day on which the current disposal occurs, but not before 6 April 2013.

75.34 Taper relief

Section 2F TCGA provides:

(1) This section applies to an ATED-related gain which accrues on a

relevant high value disposal and is chargeable to capital gains tax by virtue of section 2B.

(2) There is excluded from the gain so much of it as exceeds five-thirds of the difference between-

(a) the amount or value of the consideration, and

(b) the threshold amount (within the meaning of section 2D) in relation to the disposal.

Does this work?

(3) But where the relevant fraction is less than 1, subsection (2) has effect as if the amount determined under that subsection were the relevant fraction of that amount.

75.34.1 *The relevant fraction*

Section 2F TCGA provides:

(4) "The relevant fraction"-

(a) in a case where the ATED-related gain is determined in accordance with paragraph 3 of Schedule 4ZZA, [rebasing] has the meaning given by paragraph 3(4) of that Schedule, and

(b) in a case where the ATED-related gain is determined in accordance with paragraph 6 of that Schedule, has the meaning given by paragraph 6(5)(a) of that Schedule.

(5) Nothing in this section restricts any gain which is not ATED-related, or affects any loss (whether or not ATED-related), accruing on the relevant high value disposal.

Para 3 applies in a rebasing case, and para 6 applies in a non-rebasing case.

75.35 Computation of ATED-related gain

Para 1 Sch 4ZZA TCGA provides:

1 This Schedule applies for the purposes of determining in relation to a relevant high value disposal made by a person ("P")-

(a) whether a gain or loss which is ATED-related accrues to P on the disposal, and

(b) whether a gain or loss which is not ATED-related accrues to P on the disposal.

75.36 Assets held on 5 April 2013: Rebasing

Para 2 Sch 4ZZA TCGA provides:

2 If the interest disposed of was held by P on 5 April 2013-
(a) paragraph 3 applies for the purposes of computing the gain or loss accruing to P which is ATED-related, and
(b) paragraph 4 applies for the purposes of computing the gain or loss accruing to P which is not ATED-related.

75.36.1 *ATED-related gain computation*

Para 3 Sch 4ZZA TCGA provides the general rule:

> 3 (1) An amount equal to the relevant fraction of the notional post-April 2013 gain or loss is the ATED-related gain or loss (as the case may be).

75.36.2 *"Notional post-April 2013 gain"*

Para 3 Sch 4ZZA TCGA provides the definition:

> (2) "Notional post-April 2013 gain or loss" means the gain or loss which (in the absence of section 2B and this Schedule) would have accrued on the relevant high value disposal had P acquired the interest on 5 April 2013 for a consideration equal to its market value on that date.

This imposes a rebasing at 5 April 2013.
Para 3 Sch 4ZZA TCGA provides:

> (3) For the purposes of sub-paragraph (2), the amount of the gain or loss accruing to P is to be computed (whether or not that would otherwise be the case) as if P were within the charge to capital gains tax (but not within the charge to corporation tax on chargeable gains).

This is a convoluted way to exclude corporate indexation relief. Does it do anything else?

75.36.3 *"The relevant fraction"*

Para 3 Sch 4ZZA TCGA provides:

> (4) "The relevant fraction" is (CD ÷ TD)

In short, CD is **C**hargeable **D**ays and TD is **T**otal **D**ays. In full:

> "CD" is the number of days in the relevant ownership period which are ATED chargeable days;
> "TD" is the total number of days in the relevant ownership period.

75.36.4 *"The relevant ownership period"*

Para 3 Sch 4ZZA TCGA provides:

> (5) "The relevant ownership period" means the period beginning with 6 April 2013 and ending with the day before the day on which the relevant high value disposal occurs.

75.36.5 *"ATED chargeable day"*

Para 3 Sch 4ZZA TCGA provides:

> (6) "ATED chargeable day" means any day by virtue of which condition C in section 2C(4) would be met in relation to the relevant high value disposal.

Condition C is being within the charge to ATED.[34]

75.36.6 *ATED/Non-ATED gain computations*

A gain on a disposal may be:
(1) partly ATED-related and
(2) partly non-ATED related (and so within the ordinary CGT regime).
In order to follow the computation, one must first review some defined terms.

75.36.7 *"Notional pre-April 2013 gain or loss"*

Para 4 Sch 4ZZA TCGA provides:

> (2) "The notional pre-April 2013 gain or loss" means the chargeable gain or allowable loss which would have accrued on 5 April 2013 had the interest been disposed of for a consideration equal to its market value on that date.
> (3) For the purposes of sub-paragraph (2), the amount of the gain or loss accruing to P is to be computed (whether or not that would otherwise be the case) as if P were within the charge to corporation tax on chargeable gains (but not within the charge to capital gains tax).

This is a convoluted way to include corporate indexation relief.

> (4) Paragraph 3(2) and (3) (meaning of "notional post-April 2013 gain or loss") also applies for the purposes of this paragraph.

---

34 See 75.32.3 (ATED-disposal condition C: ATED applies).

75.36.8 *"Notional indexation allowance"*

Para 4 Sch 4ZZA TCGA provides:

(5) "Notional indexation allowance" means the relevant fraction of an amount equal to the difference between-

(a) the indexation allowance which (in the absence of section 2B and this Schedule) would be made under Chapter 4 of Part 2 in determining the chargeable gain accruing on the relevant high value disposal were that gain being computed for corporation tax purposes, and

(b) the indexation allowance which is made under Chapter 4 of Part 2 in determining the notional pre-April 2013 gain.

75.36.9 *"Relevant fraction"*

(6) "The relevant fraction" is (TD-CD) ÷ TD
Where "CD" and "TD" have the same meaning as in paragraph 3(4).

75.36.10 *Computation*

Armed with these terms, we can turn to the computation itself.
Para 4 Sch 4ZZA TCGA provides:

4 (1) The gain or loss accruing on the relevant high value disposal which is not ATED-related is computed as follows.
Step 1
Determine the amount of the notional pre-April 2013 gain or loss.
Step 2
In a case where there is a notional post-April 2013 gain-

(a) determine the amount of that gain remaining after the deduction of the ATED-related chargeable gain determined under paragraph 3, and

(b) adjust that remaining gain by reducing it by the notional indexation allowance.

Step 3
In a case where there is a notional post-April 2013 loss, determine the amount of that loss remaining after deduction of the ATED-related allowable loss determined under paragraph 3.
Step 4
Add-

(a) the amount of any gain or loss determined under Step 1, and

(b) the amount of any adjusted gain determined under Step 2 or (as the case may be) any loss determined under Step 3, (treating any amount which is a loss as a negative amount).

If the result is a positive amount, that amount is the chargeable gain on the relevant high value disposal which is not ATED-related.
If the result is a negative amount, that amount (expressed as a positive number) is the allowable loss on the relevant high value disposal which is not ATED-related.

75.37 Election out of rebasing

Para 5 Sch 4ZZA TCGA provides:

> 5 (1) A person may make an election under this paragraph for paragraphs 2 to 4 not to apply in relation to a chargeable interest[35] held by (or any part of which is held by) the person on 5 April 2013.
> (2) An election is irrevocable.

An election will be advantageous if the property is standing at a loss on 5 April 2013.

75.37.1 *Time limit and procedure for the election*

Note the deadline for the election. Para 5 Sch 4ZZA TCGA provides:

> (3) An election must be made by being included in a tax return under the Management Act for the tax year in which the first relevant high value disposal by the person of the chargeable interest (or any part of it) on or after 6 April 2013 occurs.
> (4) The reference in sub-paragraph (3) to an election being included in a return includes an election being included by virtue of an amendment of the return.
> (5) All such adjustments are to be made, whether by way of discharge or repayment of tax, the making of assessments or otherwise, as are required to give effect to an election.

75.38 Computation for assets acquired after 5 April 2013

Para 6 Sch 4ZZA TCGA provides:

> 6 (1) This paragraph applies if-
> (a) an election is made by P under paragraph 5 in respect of the chargeable interest which (or a part of which) is the subject of the relevant high value disposal, or
> (b) the chargeable interest (or part) disposed of by the relevant high

35 Para 5 Sch 4ZZA TCGA contains defines this term by reference: (6) In this paragraph "chargeable interest" has the same meaning as in Part [ATED] of FA 2013 (see section 107 [chargeable interests] of that Act).

value disposal was not held by P throughout the period beginning with 5 April 2013 and ending with the disposal.

That is, para 6 applies to post-5 April acquisitions, or if an election is made out of rebasing. As before, one needs to compute (1) ATED-related gains and (2) non-ATED related gains.

75.38.1 *Computation of ATED-related gain*

Para 6 Sch 4ZZA TCGA provides:

> (2) The ATED-related gain or loss accruing on the relevant high value disposal is computed as follows.
> *Step 1*
> Determine the amount of the gain or loss which would accrue to P, ignoring section 2B and this Schedule (but not the remainder of this Step).
> For this purpose, the amount of the gain or loss is to be computed (whether or not that would otherwise be the case) as if P were within the charge to capital gains tax (but not within the charge to corporation tax on chargeable gains).[36]
> *Step 2*
> An amount equal to the relevant fraction of that gain or loss is the ATED-related gain or loss accruing on the relevant high value disposal.

75.38.2 *Computation of non-ATED-related gain*

Para 6 Sch 4ZZA TCGA provides:

> (3) The gain or loss accruing on the relevant high value disposal which is not ATED-related is to be computed as follows.
> *Step 1*
> In a case where there is a gain under Step 1 of subparagraph (2)-
> (a) determine the amount of the gain remaining after the deduction of the ATED-related chargeable gain, and
> (b) adjust the remaining gain by reducing it by an amount equal to the notional indexation allowance.
> That adjusted gain is the gain accruing on the relevant high value disposal which is not ATED-related.
> *Step 2*
> In a case where there is a loss under Step 1 of subparagraph (2), determine the amount of the loss remaining after deduction of the

36 This is a convoluted way to exclude corporate indexation relief.

ATED-related loss.
That remaining loss is the loss accruing on the relevant high value disposal which is not ATED-related.

75.38.3 *"Notional indexation allowance"*

Para 6 Sch 4ZZA TCGA provides:

(4) "Notional indexation allowance" means the relevant fraction of the indexation allowance which would have been made under Chapter 4 of Part 2 in determining the gain under Step 1 in subparagraph (2) were that gain being computed for corporation tax purposes.

75.38.4 *"Relevant fraction"*

Para 6 Sch 4ZZA TCGA provides:

(5) Subject to sub-paragraph (6), "the relevant fraction"—
(a) in sub-paragraph (2) has the same meaning as in paragraph 3(4), and
(b) in sub-paragraph (4) has the same meaning as in paragraph 4(6).
(6) For the purpose of determining the relevant fraction under subparagraph (5), paragraph 3(5) has effect as if the relevant ownership period began on the day on which P acquired the interest or, if later, 31 March 1982.

75.39 ATED-losses

Section 2B TCGA provides:

(4) Subsections (5) to (7) apply in relation to an ATED-related allowable loss accruing to P in a tax year on a relevant high value disposal.
(5) The loss is not allowable as a deduction from ATED-related chargeable gains accruing in any earlier tax year on relevant high value disposals.
(6) Relief is not to be given under this Act more than once in respect of the loss or any part of the loss.
(7) Relief is not to be given under this Act in respect of the loss if, and so far as, relief has been or may be given in respect of it under the Tax Acts.
(8) The only deductions which can be made from ATED-related chargeable gains are those permitted by this section.

Section 2B(10) provides some supplemental definitions:

In this section:

"ring-fenced ATED-related allowable losses", in relation to a tax year, means–

(a) any ATED-related allowable losses accruing to P in the tax year on relevant high value disposals, and

(b) so far as they have not been allowed as a deduction from ATED-related chargeable gains accruing in any previous tax year on relevant high value disposals, any ATED-related allowable losses accruing to P in any previous tax year (not earlier than the tax year 2013-14) on such disposals.

75.40 Interaction with other taxes, anti avoidance rules and reliefs

75.40.1 *Section 13 TCGA*

Section 13(1A) TCGA provides:

(1A) But this section does not apply if the gain is an ATED-related gain chargeable to capital gains tax by virtue of section 2B (capital gains tax on ATED-related gains).

This takes ATED-gains outside s.13.

75.40.2 *Section 86, 87 TCGA*

ATED-CGT does not overlap with s.86, 87 TCGA as gains accruing to trusts are not ATED-gains. (The drafter may have formed the view that a company could not constitute a settlement for s.87 purposes).

75.40.3 *Private residence relief*

ATED-CGT does not overlap with private residence relief, as that only applies to gains accruing to individuals or trusts, which do fall within ATED-CGT.

75.40.4 *Interaction of ATED-CGT and DTAs*

There is no relief where a DTA follows OECD model form as the gain arises from UK situate land.

75.40.5 *Shadow director charges*

There are no provisions dealing with the interaction with shadow director charges (which include SDLT) so there could in theory be double taxation here. In practice HMRC may not be assiduous to pursue shadow directors, now that the corporate residential property regime achieves the object of discouraging tax planning through companies.

75.41 Charities

A charitable trust does not fall within ATED as it is not a "non-natural" person.

A charitable company would fall within the charge. Relief is available under s.151 FA 2013. For a discussion, see Kessler & Marre, *Taxation of Charities and Non-profit Organisations* (9th ed., 2013), para 38.11 (ATED).[37]

75.42 Application to Scotland

ATED applies to a chargeable interest, defined as an interest in land in the UK, so it applies in Scotland.

Section 80I[38] Scotland Act 1998 provides:

> (1) A tax charged on any of the following transactions is a devolved tax—
>
> (a) the acquisition of an estate, interest, right or power in or over land in Scotland;
>
> (b) the acquisition of the benefit of an obligation, restriction or condition affecting the value of any such estate, interest, right or power.

ATED is not a tax charged on acquisition, so it is not a devolved tax. By contrast, Land and Buildings Transaction Tax (the Scots equivalent of SDLT) is a devolved tax. If the object of ATED is the prevention of avoidance of SDLT/LBTT, then ATED ought to be a devolved tax also. Perhaps no-one noticed, or cared, or perhaps it was thought too difficult to amend the statute. Perhaps a single UK wide tax was thought to be simpler; but simplicity is not a value which rests comfortably with devolution.

75.43 SDLT issues on winding up companies holding land

In the course of winding up of a company holding a UK residence, the company (acting by its liquidator) will normally transfer the land to the shareholders. I refer to this as **"the transfer on liquidation"**. This section considers whether the transfer is subject to SDLT.

---

37 Online version *http://www.taxationofcharities.co.uk*

38 That is, 80 with a capital *I*, not 801.

75.43.1 *SDLT basic principles*

Section 43(1) FA 2003 provides:

> In this Part a "land transaction" means any acquisition of a chargeable interest.

A transfer on liquidation is a land transaction.
Section 49(1) FA 2003 provides:

> A land transaction is a chargeable transaction if it is not a transaction that is exempt from charge.

The transfer on liquidation is a chargeable transaction.
Section 55(1) FA 2003 provides:

> The amount of tax chargeable in respect of a chargeable transaction to which this section applies is a percentage of the chargeable consideration for the transaction.[39]

The amount of SDLT depends on the amount of the chargeable consideration. If there is no chargeable consideration there is no SDLT.

75.43.2 *"Chargeable consideration"*

The starting point in the definition of chargeable consideration is para 1(1) Sch 4 FA 2003:

> The chargeable consideration for a transaction is, except as otherwise expressly provided, any consideration in money or money's worth given for the subject-matter of the transaction, directly or indirectly, by the purchaser or a person connected[40] with him.

"Consideration" is a term commonly used in tax and other statutes. The term is not usually defined in tax legislation. It is a technical term from English contract law. In a tax statute it will in principle bear its contract law meaning:

> The word "consideration" is a term of art in English law, and I think that, used in an English statute, it must be assumed to bear its ordinary meaning in the law, save in so far as the provisions of the statute

---

39 Section 55(1A) sets out exceptions not relevant here.

40 Defined para 1(2) Sch 4 FA 2003: "Section 1122 of the CTA 2010 (connected persons) applies for the purposes of sub-paragraph (1)."

indicate some other meaning.[41]

While context may of course show that "consideration" is used in a special sense,[42] that is not the case here.

Regard should be had to the English[43] contract law textbooks for a full discussion of the meaning of "consideration". In outline, there is "consideration" for a disposal where the disposal forms part of a bargain, under which the purchaser/transferee undertakes to provide some benefit to the vendor/transferor in return for which the vendor transfers the property to the purchaser. There must be a promise to the vendor which is enforceable as a matter of contract law. The meaning of "consideration" is "the price of a promise".[44]

The transfer of a property to shareholders in the course of liquidation is not for consideration, as there is no bargain between the shareholders and the company. (Likewise the transfer from a trust to a beneficiary.)

HMRC agree:

> **Stamp Duty Land Tax on de-enveloping transactions**
> Companies may look to 'de-envelope' a property for a number of reasons, including taking themselves and the persons to whom they distribute the property outside the scope of ATED. Such de-enveloping may occur by a capital distribution to the shareholders following the liquidation of the company. The tax consequences of de-enveloping will

41 *C&E Commissioners v Apple & Pear Development Council* [1985] STC 383 at p.389. The same view was taken in another context in *R v Braithwaite* [1983] 1 WLR 385 at p.391: "In our view the meaning of the word "consideration" must be the legal meaning of it and not any common or garden meaning; that really goes without saying. ... In our judgment the word "consideration" connotes the existence of something in the shape of a contract or a bargain between the parties. ... Consideration deals with the situation where there is a contract or a bargain and something moving the other way."

42 For instance, in the VAT context of *Apple & Pear*, an EU law concept of "consideration" was adopted in preference to the English contract law meaning. In the family context of s.1(3) Inheritance (Provision for Family and Dependants) Act 1975, there could be consideration (provision of benefits) without any contract; but not in the property law context of s.10 of the same Act: *Jelley v Iliffe* [1981] Fam 128 at p.136.

43 Scots law has no concept of consideration.

44 *Dunlop Pneumatic Tyre Co v Selfridge* [1915] AC 847 at p.855. Another classic definition is: "some right, interest, profit or benefit accruing to one party, or some forbearance, detriment, loss or responsibility given, suffered or undertaken by the other"; *Currie v Misa* (1875) LR 10 Ex 153 at p.162.

depend on whether there is any consideration given by the shareholders for the transfer of the property.
There will be two situations where HMRC will not consider there to be any consideration given.
The first is where the company is debt free: its only asset is the property and there are no liabilities (other than issued share capital). In such a situation the shareholders have given no consideration directly or indirectly for the property and therefore there is no SDLT liability.

75.43.3 *Transfer to corporate shareholder*

Further consideration is needed when the transferee is a company (the issue discussed here does not arise on a transfer to an individual).
Section 53 FA 2003 provides:

> (1) This section applies where the purchaser [ie, transfer] is a company and—
>
> (a) the vendor is connected with the purchaser...
>
> (1A) The chargeable consideration for the transaction shall be taken to be not less than—
>
> (a) the market value of the subject-matter of the transaction as at the effective date of the transaction...

However in the case of a transfer on liquidation, s.54 FA 2003 will normally provide relief:

> (1) Section 53 (chargeable consideration: transaction with connected company) does not apply in the following cases.
> In the following provisions "the company" means the company that is the purchaser in relation to the transaction in question.
> ...

Where the transfer is to a corporate trustee, relief is in principle available under case 2:

> (3) Case 2 is where—
>
> (a) immediately after the transaction the company holds the property as trustee, and
>
> (b) the vendor is connected with the company only because of section 1122(6) of the Corporation Tax Act 2010.[45]

If case 2 does not apply (ie if the company purchaser is not a trustee) relief

45 See 85.12 (Connection with trustees).

is in principle available under case 3:

> (4) Case 3 is where—
>
> (a) the vendor is a company and the transaction is, or is part of, a distribution of the assets of that company (whether or not in connection with its winding up), and
>
> (b) it is not the case that—
>
> (i) the subject-matter of the transaction, or
>
> (ii) an interest from which that interest is derived,
>
> has, within the period of three years immediately preceding the effective date of the transaction, been the subject of a transaction in respect of which group relief was claimed by the vendor.

It is possible to envisage circumstances where relief does not apply, but that will rarely if ever happen in practice.

75.43.4 *Company owes debt*

Suppose the company owes a debt. This typically arises if the company has borrowed to purchase the property and owes money to a bank. The company cannot transfer the property to the shareholders and leave the debt outstanding, at least if the debt is to non-shareholders.

Para 8(1) Sch 4 FA 2003 provides:

> Where the chargeable consideration for a land transaction consists in whole or in part of—
>
> (a) the satisfaction or release of debt due to the purchaser or owed by the vendor, or
>
> (b) the assumption of existing debt by the purchaser,
>
> the amount of debt satisfied, released or assumed shall be taken to be the whole or, as the case may be, part of the chargeable consideration for the transaction.

This applies only if the release or assumption of the debt is consideration for the transaction. The point is that the consideration for SDLT purposes is the face value of the debt (the amount owed), and not its market value (which may be less).

Thus if there is an arrangement under which the shareholders undertake to pay the company's debt in consideration for the transfer, (in contract law terminology, a novation) there is a SDLT charge on the amount of the debt. HMRC say:

> **Stamp Duty Land Tax on de-enveloping transactions**
>
> ... where there is a third party (non-shareholder) loan secured on the

property when the company is liquidated, the transfer of the property by the company on a distribution will attract SDLT under paragraphs 1 and 8 of Schedule 4 FA 2003 where there is an assumption by the shareholder(s) of liability for the debt.[46]

Para 8(1A) Sch 4 FA 2003 provides:

> Where—
>
> (a) debt is secured on the subject-matter of a land transaction immediately before and immediately after the transaction, and
>
> (b) the rights or liabilities in relation to that debt of any party to the transaction are changed as a result of or in connection with the transaction,
>
> then for the purposes of this paragraph there is an assumption of that debt by the purchaser, and that assumption of debt constitutes chargeable consideration for the transaction.

This will not apply if the debt is unsecured, before or after the transaction.

Para 8 continues with provisions dealing with apportionment:

> (1B) Where in a case in which sub-paragraph (1)(b) applies—
>
> (a) the debt assumed is or includes debt secured on the property forming the subject-matter of the transaction, and
>
> (b) immediately before the transaction there were two or more persons each holding an undivided share of that property, or there are two or more such persons immediately afterwards,
>
> the amount of secured debt assumed shall be determined as if the amount of that debt owed by each of those persons at a given time were the proportion of it corresponding to his undivided share of the property at that time.
>
> (1C) For the purposes of sub-paragraph (1B), in England and Wales and Northern Ireland each joint tenant of property is treated as holding an equal undivided share of it.
>
> (2) If the effect of this paragraph would be that the amount of the chargeable consideration for the transaction exceeded the market value of the subject-matter of the transaction, the amount of the chargeable consideration is treated as limited to that value.
>
> (3) In this paragraph—
>
> (a) "debt" means an obligation, whether certain or contingent, to pay a sum of money either immediately or at a future date,
>
> (b) "existing debt", in relation to a transaction, means debt created

46 *http://www.hmrc.gov.uk/so/stamps-de-enveloping.htm* (20 December 2013).

or arising before the effective date of, and otherwise than in connection with, the transaction, and

(c) references to the amount of a debt are to the principal amount payable or, as the case may be, the total of the principal amounts payable, together with the amount of any interest that has accrued due on or before the effective date of the transaction.

The SDLT Manual comments on the apportionment provisions:

> **SDLTM04040a - Scope: How much is chargeable: Non-cash consideration: Assumption or release of a debt: Examples** [September 2012]
>
> **Example 1**
>
> A property is transferred by V into the ownership of V and P in equal shares subject to a subsisting mortgage.
>
> P assumes liability for all or part of the debt.
>
> Notwithstanding P's actual liability, which is probably for all of the debt, P is treated as assuming debt equal to 50% of the amount owing. This is because he is treated as owing none before the transaction and 50% after it.
>
> **Example 2**
>
> A property is owned by V and P in 70:30 shares.
>
> It is transferred to the sole ownership of P subject to a subsisting mortgage.
>
> Assuming V is released from the debt or P agrees to indemnify V there is an assumption of debt by P.
>
> P is treated as assuming debt equal to 70% of the amount owning.
>
> This is because P is treated as owing 30% before the transfer and 100% after it...

Suppose:

(1) Shareholders subscribed for new share capital.

(2) The company used the proceeds of the share subscription to repay the debt.

(3) The company was put into liquidation.

This is not caught by para 8(1) as the satisfaction of the debt is not consideration for the land transaction; it is not caught by para 8(1A) as the debt will not be secured at the time of the transaction. The question is whether it is caught by s.75A FA 2003 (anti-avoidance).

75.44 Section 75A: Anti avoidance

Section 75A(1) FA 2003 provides:

This section applies where—

(a) one person (V) disposes of a chargeable interest and another person (P) acquires either it or a chargeable interest deriving from it,

(b) a number of transactions (including the disposal and acquisition) are involved in connection with the disposal and acquisition ("the scheme transactions"), and

(c) the sum of the amounts of stamp duty land tax payable in respect of the scheme transactions is less than the amount that would be payable on a notional land transaction effecting the acquisition of V's chargeable interest by P on its disposal by V.

75.44.1 *"Transaction"*

Section 75A(1) FA 2003 provides:

(2) In subsection (1) "transaction" includes, in particular—

(a) a non-land transaction,

(b) an agreement, offer or undertaking not to take specified action,

(c) any kind of arrangement whether or not it could otherwise be described as a transaction, and

(d) a transaction which takes place after the acquisition by P of the chargeable interest.

(3) The scheme transactions may include, for example—

(a) the acquisition by P of a lease deriving from a freehold owned or formerly owned by V;

(b) a sub-sale to a third person;

(c) the grant of a lease to a third person subject to a right to terminate;

(d) the exercise of a right to terminate a lease or to take some other action;

(e) an agreement not to exercise a right to terminate a lease or to take some other action;

(f) the variation of a right to terminate a lease or to take some other action.

For the concept of a transaction "involved in connection with" a disposal and acquisition, see 75.44.7 (Company owes debt to non-shareholders).

75.44.2 *The notional land transaction*

Section 75A(4) FA 2003 provides:

Where this section applies—

(a) any of the scheme transactions which is a land transaction shall

be disregarded for the purposes of this Part, but

(b) there shall be a notional land transaction for the purposes of this Part effecting the acquisition of V's chargeable interest by P on its disposal by V.

Section 75A(5) FA 2003 defines the chargeable consideration:

> The chargeable consideration on the notional transaction mentioned in subsections (1)(c) and (4)(b) is the largest amount (or aggregate amount)—
>
> (a) given by or on behalf of any one person by way of consideration for the scheme transactions, or
>
> (b) received by or on behalf of V (or a person connected with V within the meaning of section 1122 of the Corporation Tax Act 2010) by way of consideration for the scheme transactions.

Section 75A(6) FA 2003 defines the effective date:

> (6) The effective date of the notional transaction is—
>
> (a) the last date of completion for the scheme transactions, or
>
> (b) if earlier, the last date on which a contract in respect of the scheme transactions is substantially performed.

75.44.3 *Incidental transactions*

Section 75B(1) FA 2003 provides the relief:

> In calculating the chargeable consideration on the notional transaction for the purposes of section 75A(5), consideration for a transaction shall be ignored if or in so far as the transaction is merely incidental to the transfer of the chargeable interest from V to P.

Section 75B(5) FA 2003 deals with cases of partial relief:

> The exclusion required by subsection (1) shall be effected by way of just and reasonable apportionment if necessary.

Section 75B FA 2003 defines "incidental":

> (2) A transaction is not incidental to the transfer[47] of the chargeable interest from V to P—
>
> (a) if or in so far as it forms part of a process, or series of

47 Section 75B(6) FA 2003 defines transfer: "In this section a reference to the transfer of a chargeable interest from V to P includes a reference to a disposal by V of an interest acquired by P."

transactions, by which the transfer is effected,

(b) if the transfer of the chargeable interest is conditional on the completion of the transaction, or

(c) if it is of a kind specified in section 75A(3).[48]

(3) A transaction may, in particular, be incidental if or in so far as it is undertaken only for a purpose relating to—

(a) the construction of a building on property to which the chargeable interest relates,

(b) the sale or supply of anything other than land, or

(c) a loan to P secured by a mortgage, or any other provision of finance to enable P, or another person, to pay for part of a process, or series of transactions, by which the chargeable interest transfers from V to P.

(4) In subsection (3)—

(a) paragraph (a) is subject to subsection (2)(a) to (c),

(b) paragraph (b) is subject to subsection (2)(a) and (c), and

(c) paragraph (c) is subject to subsection (2)(a) to (c).

75.44.4 *Miscellaneous*

Section 75C FA 2003 provides:

(1) A transfer of shares or securities shall be ignored for the purposes of section 75A if but for this subsection it would be the first of a series of scheme transactions.

(2) The notional transaction under section 75A attracts any relief under this Part which it would attract if it were an actual transaction (subject to the terms and restrictions of the relief).

(3) The notional transaction under section 75A is a land transaction entered into for the purposes of or in connection with the transfer of an undertaking or part for the purposes of paragraphs 7 and 8 of Schedule 7, if any of the scheme transactions is entered into for the purposes of or in connection with the transfer of the undertaking or part.

(4) In the application of section 75A(5) no account shall be taken of any amount paid by way of consideration in respect of a transaction to which any of sections 60, 61, 63, 64, 65, 66, 67, 69, 71, 74 and 75, or a provision of Schedule 6A or 8, applies.

(5) In the application of section 75A(5) an amount given or received partly in respect of the chargeable interest acquired by P and partly in respect of another chargeable interest shall be subjected to just and reasonable apportionment.

---

48 See 75.44.1 ("Transaction").

(6) Section 53 applies to the notional transaction under section 75A.
(7) Paragraph 5 of Schedule 4 applies to the notional transaction under section 75A.
(8) For the purposes of section 75A—
(a) an interest in a property-investment partnership (within the meaning of paragraph 14 of Schedule 15) is a chargeable interest in so far as it concerns land owned by the partnership, …
(8A) Nothing in Part 3 of Schedule 15 applies to the notional transaction under section 75A.
(9) For the purposes of section 75A a reference to an amount of consideration includes a reference to the value of consideration given as money's worth.
(10) Stamp duty land tax paid in respect of a land transaction which is to be disregarded by virtue of section 75A(4)(a) is taken to have been paid in respect of the notional transaction by virtue of section 75A(4)(b)...

75.44.5 *Exceptions*

Section 75A(7) FA 2003 provides:

> This section does not apply where subsection (1)(c) is satisfied only by reason of—
> (a) sections 71A to 73, or
> (b) a provision of Schedule 9.

75.44.6 *Company owes debt to shareholders*

Suppose the company owes a debt to its shareholders. This typically arises if the shareholders have lent funds to purchase the property and the debt is outstanding.

HMRC say:

> **Stamp Duty Land Tax on de-enveloping transactions**
> Companies may look to 'de-envelope' a property for a number of reasons, including taking themselves and the persons to whom they distribute the property outside the scope of ATED. Such de-enveloping may occur by a capital distribution to the shareholders following the liquidation of the company. The tax consequences of de-enveloping will depend on whether there is any consideration given by the shareholders for the transfer of the property.
> There will be two situations where HMRC will not consider there to be any consideration given....
> The second of these situations will be where there is debt but this debt

> is owed solely to the shareholder. This is a situation that HMRC has given its views on before and we confirm that the guidance in SDLT Technical News issue 5 (August 2007) still applies. The relevant part is replicated below....
>
> **SDLT Technical News issue 5 (August 2007)**
>
> **Transfer of property on winding up - loan from shareowners**
>
> We would not seek to argue that the dividend in specie should bear SDLT in a situation for example where A owns the shares of B Ltd. A lends money to the company to buy property, the loan being secured by mortgage on the property.
>
> Later B Ltd is wound up and there is a transfer to A as beneficial owner of the equity. That is the reason for the Transfer. The loan is not released etc, but obviously the mortgage will be taken off as the lender also owns the property because of the liquidation.
>
> Clearly (?) in this scenario A has not assumed any liability or given any other form of consideration.[49]

The position does not seem so clear to me, but HMRC do not take the point.

75.44.7 *Company owes debt to non-shareholders*

HMRC say:

> **Stamp Duty Land Tax on de-enveloping transactions**
>
> ... There may be situations where a company had a third party debt that has been repaid as a result of shareholder action (either through the subscription for more issued share capital or by replacing the third party debt with shareholder debt), prior to its liquidation. In such cases it is possible that on distribution of the property there will be no charge to SDLT as it will be a distribution in similar circumstances to the first two situations outlined above.
>
> However, section 75A FA 2003 could apply where the shareholder of a company provides funds to the company to allow it to discharge its debt, before acquiring the property from the company if those actions are involved in connection with that disposal or acquisition. Whether section 75A applies will depend on the facts of each case.
>
> There will be cases where discharging the debt has not occurred as part of the arrangements for the transfer of the property from the company to the shareholders. Equally, there will be cases where the discharge of the debt was one of a number of transactions involved in connection

49 *http://www.hmrc.gov.uk/so/stamps-de-enveloping.htm* (20 December 2013).

with the disposal and acquisition of the property.

There is some judicial guidance that may assist the correct application of section 75A in the decision of the First-tier Tribunal (Tax) in the appeal of *Project Blue Ltd v HMRC*.[50]

For example, the decision (at paragraph 227) confirms that section 75A applies regardless of the purposes or motives of the parties:

> "Whilst it is clear that the purpose of section 75A is to counteract the avoidance of SDLT, the provision contains no requirement that the taxpayer should have a tax avoidance motive or purpose as a precondition or defence to the application of the provision …Parliament obviously intended that the provision should apply regardless of motive".

The Tribunal emphasised that each of the subparagraphs (a) to (c) of section 75A(1) should be construed in the context of the other subparagraphs, rather than as self-standing tests (see paragraph 238 of the decision). In a straightforward de-enveloping situation, the company should be 'V' and the shareholder(s) 'P'.

As to whether in that case transactions are 'involved in connections with the disposal and acquisition', the Tribunal states amongst other things (paragraph 250 of the decision):

> "The word "involved" denotes some form of participation (ie involvement). Thus, a transaction which is part of a series of transactions will not be "involved" with other transactions simply because it is part of a series or sequence of successive conveyancing transactions. The linkage must be more than merely being a party in a chain of transactions and the test must be more than a "but for" test (or, as the classicists would put it, a sine qua non test) otherwise the word "involved" would be deprived of significant meaning."[51]

75.45 Corporate residential property regime: Commentary

The CRP regime (SDLT penal rate, ATED, and ATED-CGT) should be evaluated as a single programme of tax reform.

75.45.1 *Purpose of the residential property regime*

The Residential Property Consultation Response Document provides:

> 1.8 One of the sources of property tax avoidance which the Chancellor highlighted in his Budget speech "...is the way some people avoid the stamp duty the rest of the population pays including by using companies

50 [2013] UKFTT 378 (TC).

51 *http://www.hmrc.gov.uk/so/stamps-de-enveloping.htm* (20 December 2013).

to buy expensive residential property".

1.9 To address this form of avoidance, and to ensure the owners of high value residential property pay their fair share of tax, the Chancellor announced a threefold approach:

- First, the introduction from 21 March 2012 of a 15 per cent rate of SDLT on acquisitions of residential dwellings costing more than £2million by certain non-natural persons (companies, partnerships including a company and collective investment vehicles);
- Second, from 1 April 2013, an annual charge on residential property valued over £2million owned by certain non-natural persons; and
- Third, from 6 April 2013, the extension of Capital Gains Tax (CGT) to gains on the disposal of residential property valued over £2million by non-resident companies and others (but not individuals).

The object is not to raise tax but to prevent the use of corporate owners of companies. Thus the charges are not a tax but a penalty for entering into arrangements or for not unwinding them. In this respect it is like the pre-owned asset regime.[52]

75.45.2 *Response to consultation*

The announcement was preceded by what was called a consultation. In the 2012/13 edition of this work I said:

> The professional bodies will be severely critical. But I expect that HMRC will pay no attention - some will in fact be pleased[53] - and procure the legislation along the proposed lines.

The ICAEW response to consultation provided:

> 191. While we understand the Government's policy concern about the avoidance of SDLT, taken as a whole this package of measures is of serious concern, adding considerable extra complexity and uncertainty into the UK tax system and imposing new administrative burdens on both HMRC and taxpayers while maintaining the unsatisfactory "slab" system of taxation used by SDLT.
>
> 192. ...taken as a whole these measures in effect apply a punitive tax regime to residential properties held in companies and are designed to discourage the holding of residential property through companies. However, the regime will apply regardless of whether the company concerned eventually sells the property which will give rise to an SDLT

52 See 76.39 (Commentary).

53 See 1.9 (The tax consultation framework).

> charge on the purchaser in the normal way. This appears unfair – it would be reasonable to allow the company to elect out of this regime in exchange for providing an undertaking that SDLT would be paid in the normal way if the company was ever sold rather than the property – although we accept that such a measure would add complication to an already highly complicated provision.
> 193. There are many reasons other than tax as to why residential property is held through a company. ...
> 203. The new ATED runs to 60 clauses and two schedules and occupies 49 pages of draft legislation. It adds considerable extra complexity into the UK tax system. In addition there are 10 pages of draft legislation for the new CGT charge on UK companies to apply to disposals from 6 April 2013. It is our opinion that this is too tight a timetable in which to design workable new rules for disposals after 6 April 2013, and we believe that the introduction of the rules should be deferred for a year to allow time for the rules to be finalised and for those affected to take advice and where needed make changes to existing arrangements.[54]

The STEP consultation response provides:

> 4.1 We are disappointed that, contrary to the Government's overarching aim of tax simplification, it proposes to introduce a new tax to prevent the exploitation of existing legislation in relation to SDLT, rather than address the ineffectively drafted legislation to resolve the problem. Not only does the legislation introduce a completely new tax, it imposes additional compliance requirements which will be costly in time and fees for both clients and HMRC alike. All this complexity is created in pursuit of a policy which HM Treasury announced was not intended to raise revenue, but to deter "enveloping and to create more equal tax treatment between UK residents and non-residents".
> 4.2 Indeed, we would suggest that the original goal has been achieved already in relation to high value properties, by the increase in the rate of SDLT for transfers to non-natural persons to 15% with effect from 21 March 2012. We would be interested in HMRC's statistics, if these exist, showing a trend to the contrary.
> 4.3 However, we feel that there is a risk that the fact that the SDLT rates for residential properties have gone to 7% and 15% could potentially have the following impacts:
> • These higher SDLT charges now probably justify the cost of due diligence on a company by the purchaser (which might not have been

54 TAXREP 21/13 (ICAEW REP 25/13) FINANCE BILL 2013 Comments on the draft clauses published on 11 December 2012 (February 2013).

the case in the past).
- The corporate entity still represents a way of reducing SDLT on the effective transfer of the property to nil.
- The CGT charge on [ATED] related gains will never arise if the property is not sold from the company.

75.45.3 *Merits of the CRP regime*

The stated objection to corporate purchasers is that resale of the company allows avoidance of SDLT. This raises various questions:

(1) How much SDLT has been avoided in this way? I suspect not much:
   (a) There is no evidence that SDLT was usually a major factor in the choice of a company purchaser (IHT and non-tax reasons were much more important)
   (b) Purchasers would generally prefer to purchase the land, not the company.

   It might be that the increase in the non-corporate rate of SDLT, now 7%, would increase attractiveness of this SDLT planning.

(2) Are there other or better methods of addressing the problem?

None of this has been addressed.

75.45.4 *Objections to the CRP regime*

There are a number of objections to the CRP regime:

There are good non-tax reasons why it may be desired to purchase land in a company or a trust. In fact most offshore trusts used foreign companies to hold land, as a matter of routine, regardless of tax, because:

(1) limited liability
(2) conflict of laws issues; the validity of a disposition of immovable property and the settlor's capacity to make it are determined by the law of the State where the property is situated.
(3) convenience of segregation of a trustees assets.

This is recognised in the relief given to companies holding non-UK properties.[55]

Complexity: The legislation for the CRP regime extends to 100 pages. There are very few tax problems to which 100 pages of legislation is the right answer; and SDLT avoidance using companies is not one of them.

The House of Lords Economic Affairs Committee agreed:

---

55 See 74.20 (Foreign homes relief).

> We share our witnesses' concern about whether the problem the legislation seeks to address justifies its length and complexity, particularly in view of the Government's commitment (!) to a simpler tax system. In line with our earlier recommendation on better consultation, we think that there were probably simpler and more effective ways of achieving the Government's objectives. We recommend that the lessons from the development of these measures should be learned and applied to the design of future tax policies. [56]

The CRP regime reflects an unexamined assumption that tax planning involving residential properties is more objectionable than other tax planning. It may reflect the Liberal Democrat desire for a mansion tax ("Mansion tax" at present is a slogan: apart from the fact that it involves residential property of above average value, it does not have any settled meaning.)

75.45.5 *Procedural weaknesses in introduction of the regime*

The flawed procedure in the introduction of the CRP regime is also worth recording, though it is a familiar story to those who remember the debacle of the FA 2008:

(1) The provisions were introduced in breach of the proper procedure set out in the Tax Consultation Framework.[57] This is a return to the rabbit out of a hat approach to tax reform.

(2) The uncertainty imposed imponderable choices on those wishing to purchase property or wondering what to do with existing structures.

(3) The CRP regime was a breach of the promise of stability on foreign domicile taxation[58] – though probably no-one had seriously believed that. Nevertheless, the chutzpah of the Residential Property Response Document deserves to be recorded:

> 3.71 ...The likelihood that the measures would impact on non-domiciled individuals more than UK citizens was also raised as a concern.
>
> **Government Response**
>
> 3.72 The Government has taken on board comments raised through this question.

---

56 House of Lords Select Committee on Economic Affairs *The Draft Finance Bill 2013* (March 2013) para 213 *http://www.publications.parliament.uk/pa/ld201213/ldselect/ldeconaf/139/139.pdf*

57 See 1.9 (The Tax Consultation Framework).

58 See 1.8 (The promise of stability).

There is no further reference to the point.

In the 2013/14 edition I concluded:

> Law enacted on this basis cannot be expected to be satisfactory and is not likely to be stable.

The prediction of instability has been borne out by the FA 2014. But at the present time there seems to be no prospect of serious discussion taking place.

75.45.6 *Some ways forward*

A minimal reform would be to make the SDLT and ATED charges avoidable by an election that the company should be regarded as transparent for UK IHT, CGT and SDLT. The election out of the POA charge is a precedent.[59] That would allow the use of companies for non-tax reasons to continue.

A more radical reform would be the repeal of SDLT, in accordance with Mirrlees recommendations ("a strong contender for the UK's worst-designed tax") and replace it with a form of rates.[60] The CRP regime would then fall by the wayside.

75.46 Planning 1: Home owned by foreign domiciliary

There are several ways to arrange the ownership of a UK family home for a foreign domiciled individual. The first possibility is that the individual should own the property directly. This has the attraction of simplicity.

The property is in the individual's estate and in principle within the scope of IHT on his death. One possible method to mitigate this problem is to provide by will that the property should pass to the individual's surviving spouse, or to a trust under which the spouse has an interest in possession. That normally postpones IHT until the occasion of the death of the survivor of the individual and spouse.[61]

The risk of IHT may quite cheaply be covered by insurance. Watch that the insurance policy is not subject to IHT on the death of the individual:

---

59 See 76.33 (POA election) and contrast the US tick the box regime. Double taxation aspects would need consideration but would not be insoluble.

60 IFS Green Budget 2013 accessible *http://www.ifs.org.uk/budgets/gb2013/gb2013.pdf*.

61 See 63.19 (IHT spouse exemption defence to GWR death charge).

(1) Arrange that the policy is not UK situate[62] (so the policy is excluded property); or
(2) transfer the policy to a trust (under which the individual is excluded) but possible IHT charges on the trust make this unattractive for UK situate property.

The amount to be insured will need to be reviewed from time to time in line with house inflation and possible changes in the rate of IHT.

It would be possible to take steps to avoid IHT even at short notice, if the death of the owner became imminent by:

(1) a sale
(2) a transfer of the property to a company so as to acquire excluded property status (the SDLT penal rate is significant but the IHT charge is much greater).

So in practice the IHT risk should be limited to the risk of the sudden death of the individual (or the sudden joint deaths of individual and spouse).

There will be no CGT on the sale of property if main private residence relief applies. If the individual has another residence inside or outside the UK, it may be appropriate to make an election under s.222 TCGA.

There is in principle a taxable remittance, if the purchase price is paid out of foreign income or chargeable gains within the scope of the remittance basis.

Similar points apply to chattels in the home except there is no CGT exemption, apart from the exemption for chattels under £6,000: s.262 TCGA.

75.46.1 *Non-tax aspects of direct ownership*

The use of a trust or company avoids the need for an English grant of probate after the death of the individual.

Personal ownership may be necessary, or at least desirable, in order to secure that the owner of a long lease acquires the right to enfranchisement.

Further consideration will be needed for property in Scotland and Northern Ireland.

75.47 Planning 2: Home owned by estate IIP trust

The IHT position is broadly the same as absolute ownership by the foreign domiciled individual. This course is only practical, however, for estate IIP

62 See 82.25 (Insurance policy).

trusts where:
(1) the life tenant is the settlor; or
(2) the settlor is dead; or
(3) the settlor has no interest in the settlement; or
(4) the settlor can be excluded from a sub-fund (which will hold the UK home); or
(5) the settlement was made before 18 March 1986.

Otherwise HMRC may argue that there is a charge on the death of the settlor under the GWR rules.[63]

In the case of a non-resident trust, the occupation of the property is a capital payment received in the UK, giving a possible s.87 charge if chargeable gains accrue to the trust. Chargeable gains may arise on a disposal of the house, if the private residence exemption is not fully available, for instance if:
(1) the grounds exceed the "permitted area"; or
(2) there is another private residence which qualifies for the relief; or
(3) in relation to chattels which do not qualify for exemption.

75.48 Home owned by discretionary trust

In principle a discretionary trust or non-estate IIP trust could hold the UK home between ten year anniversaries. This might be a convenient short or medium term way to hold a family home. This course is only practical, however, where:
(1) the settlor is dead; or
(2) the settlor has no interest in the settlement; or
(3) the settlor can be excluded from a sub-fund (which will hold the UK home); or
(4) the settlement was made before 18 March 1986.

Otherwise HMRC may argue that there is a charge on the death of the settlor under the GWR rules.[64]

75.49 Home owned by non-resident company

75.49.1 *IHT advantages and sham*

For inheritance tax, the obvious course is for the UK home of a foreign domiciliary to be owned beneficially by a foreign company. The shares

63 See 63.9 (Gift of excluded property).
64 See 63.9 (Gift of excluded property).

in the company are not UK situate, and qualify as excluded property for IHT. The company would usually be held by an offshore trust.

An argument that an arrangement of this kind was a sham was rejected in *Skyparks v Marks* [2001] WTLR 607. But sham is a question of fact in each case. In some badly created structures the taxpayer may wish to argue that the company is a sham, or that it holds its assets as nominee, to avoid a benefit in kind charge or other charges associated with companies.

75.49.2 *Ownership by non-resident company: CGT*

The company will not be subject to CGT or corporation tax on chargeable gains provided it is not resident.

If the company is owned by an individual, the gains will be treated as accruing to the individual under s.13 TCGA.[65]

If the company is held by a trust, the gains would be treated as accruing to the trust, and so be s.2(2) amounts for s.87 purposes.

75.50 Planning

75.50.1 *New purchase*

Purchase by a company has the following advantages:

(1) IHT
(2) SDLT on sale of company
(3) CGT on sale of company

However, the general rule for residential property above £500k will be not to purchase by a "non-natural" person because of:

(1) The SDLT penal charge.
(2) ATED

A "non-natural" person purchasing a property worth under that amount needs to consider the likelihood that the property will sooner or later be worth more than £500k (in nominal terms) and fall within ATED.

75.50.2 *Unwinding existing arrangements?*

For existing structures, the question is whether to wind up or retain.

Winding up the company is sometimes known as "de-enveloping" but I do not think that the neologism is needed, and I do not use it.

The case for retention: In return for paying ATED, you may have:

(1) IHT advantage of excluded property.

---

65 See 53.31 (Private residence relief).

(2) SDLT advantage of being able selling shares in the company free of SDLT. It would take 10 or 20 years for ATED to equal the 7% SDLT on a non-corporate purchase; but:
   (a) ATED is payable sooner and will be index linked (at least)
   (b) A vendor may want to purchase the property, not the company. (The scope of SDLT avoidance by sale of companies rather than of land is more limited than the authors of the CRP regime appear to think.)

   So it will not often be cost-effective to chose to pay ATED, just for the SDLT saving, unless the shareholders anticipate a prompt sale of the company.
(3) ATED-CGT was a reason not to retain property in a company, but the extension of CGT to non-residents in 2015 alters this. Unless CGT private residence relief would apply it is in principle better to hold in a company which could be sold free of CGT, though a purchaser might want some discount to reflect the disadvantages of holding through a company. Those who liquidated companies in 2013/14 in order to avoid ATED-CGT may now come to regret their decision.

Winding up the company will give rise to gains accruing to the company, and gains on the disposal of shares. Thus there will often be a CGT cost under s.13 or s.87 TCGA which will usually exceed any other tax saving. There is no relief for the CGT charges. The result is a strong incentive to retain the company structure.

All the professional bodies made the point. ICAEW said:

> Given that these are punitive measures, there needs to be proper transitional provisions and time given for existing structures to be reorganised or unwound without giving rise to further tax charges. The policy is to discourage "enveloping" residential property valued at more than £2m but the proposals do not provide for taxpayers to effectively "de-envelop" existing arrangements....[66]

The STEP consultation response provided:

> 4.4 The rebasing provisions as currently drafted will not incentivise UK resident non-domiciled individuals to de-envelope due to the interaction between the new rules and ss13 and 87 TCGA 1992. The rebasing rule seems only of benefit to non-resident structures where the

66 TAXREP 21/13 (ICAEW REP 25/13) FINANCE BILL 2013 Comments on the draft clauses published on 11 December 2012 (February 2013).

beneficiaries/shareholders are all also non-resident.

The absence of any relief for existing structures means that in many cases unwinding companies is prohibitively expensive, so if the object of the reforms is to encourage winding up companies, that object will not be achieved. Instead the owners will bear the brunt of the CRP regime in an arbitrary and unfair way. The House of Lords Economic Affairs Committee acknowledged this point:

> We recommend that the Government should consider whether more could be done, possibly deferring the charge on any gain, to help those affected to de-envelope their properties without incurring high tax costs.[67]

But no-one took any notice of that.

67 House of Lords Select Committee on Economic Affairs *The Draft Finance Bill 2013* (March 2013) para 196 *http://www.publications.parliament.uk/pa/ld201213/ldselect/ldeconaf/139/139.pdf*

CONTENTS AT A GLANCE

Chapter **Page**

CHAPTER SEVENTY SIX

PRE-OWNED ASSETS

76.1 Pre-owned assets: Introduction

This chapter considers the provisions in Schedule 15 FA 2004 ("**POA provisions**"). A full discussion of this topic needs a book to itself.[1] This chapter focuses on the matters closest to the themes of this book, but it is necessary to review the general rules to understand these matters in their context.

The supplementary regulations (whose title is so long it cannot sensibly be used)[2] are referred to as "**the POA Regulations 2005**".

"**The CIOT Statement**" gives HMRC answers to a number of questions raised by CIOT, STEP and LITRG.[3]

The label "pre-owned assets" is convenient but inaccurate since the charge may apply to property not previously owned by the taxpayer.

The provisions impose three charges to income tax which I call:

(1) "**The POA land charge**"
(2) "**The POA chattel charge**"
(3) "**The POA intangible property charge**"

Land, chattel and intangible property are given commonsense definitions.[4]

76.2 Purpose of POA rules

The POA rules were designed to counter three distinct IHT avoidance

---

1 And indeed such a book has been written: Chamberlain & Whitehouse, *Pre-Owned Assets and Estate Planning* (3rd ed., 2009).

2 The Charge to Income Tax by Reference to Enjoyment of Property Previously Owned Regulations 2005.

3 *http://www.step.org/resources/policy_and_technical/uk_policy/2006/pre-owned_assets_-_responses.aspx?link=contentMiddle*. The current version of the statement is dated 31 August 2006; earlier versions were dated October 2005 and March 2006.

4 Para 1 Sch 15 FA 2004.

schemes:

(1) Eversden schemes
(2) Ingram schemes
(3) Home loan schemes

In order to understand the provisions it is necessary to understand the schemes at which they were addressed.

76.2.1 *Eversden schemes*

There was only one scheme, but the analysis now depends on whether the asset involved was land or not.

In relation to land, the IHT Manual explains:

> **IHTM44101 - Pre-owned assets: specific avoidance schemes: land - settlement on interest in possession trusts** [March 2012]
> This scheme, known as an ‹Eversden' scheme, involved a spouse putting their marital home into a trust under which the other spouse had a life interest. ... The transaction is exempt from Inheritance Tax and excluded from the reservation of benefit provisions. The life interest(s) are then terminated in most of the fund so that each spouse is treated as making a transfer at that later time. The termination of the life interest meant that the spouse(s) make a PET; but it was not a gift so that it was not caught by the reservation of benefit provisions. The spouses continued to occupy the property through their life interests in the parts of the property retained by the trustees.
> HMRC challenged the scheme and lost in the case of *Eversden v IRC* [2003] STC 822.[5] Consequently, legislation was introduced with effect from 20 June 2003 to reverse the decision (IHTM14318). ...

The HMRC analysis is as follows:

> • where the scheme was effected on or after 20 June 2003:
> the property will be subject to a reservation of benefit for Inheritance Tax purposes by reason of FA86/S102(5A).[6]
> As a result the [POA GWR] exemption under FA04/Sch15/Para11(3) will apply to the settlor.[7]
> There may be a separate reservation of benefit when the spouse's interest in possession terminates and which is treated as a gift under

5 *IRC v Eversden (Greenstock's Executors)* 75 TC 340.
6 See 63.10.2 (Restriction on GWR spouse exemption).
7 See 76.19 (GWR exemptions).

FA86/S102ZA.[8]

This is all somewhat theoretical since the scheme would not be done after 20 June 2003.

- where the scheme was effected before 20 June 2003, the arrangement succeeds in avoiding the reservation of benefit provisions. However, provided the spouse's life interest continues until their death, there will be no POA charge because the transaction is an excluded transaction under FA04/Sch15/Para(10)(1)[9]
- if, however, the spouse's life interest comes to an end during their lifetime, the transaction will not longer be an excluded transaction by virtue of FA04/Sch15/Para10(3) so the POA charge will arise from that point on the settlor, assuming the settlor occupies of the property.

If the spouse's qualifying interest in possession ends after 18 March 2006, she may also be subject to a separate inheritance tax charge on her death under FA86/S102ZA if she still benefits from the property. But as she did not, herself, disposed of this interest in the property, she is not subject to the POA charge.

The scheme could also be used for property other than a dwelling house:

> **IHTM44110 - Pre-owned assets: specific avoidance schemes: intangibles - settlement on interest in possession trusts** [Mar 2012]
> Intangible property may also be settled using an Eversden scheme, where the chargeable person settles cash on interest in possession trusts for their spouse or civil partner, which the trustees then invest in, say, a bond. If the terms of the settlement fall within the definition in FA04/Sch15/Para8 similar results to the scheme involving land apply.
> For example, if the spouse or civil partner's interest in possession ends during their lifetime and the property is now held on discretionary trusts of which the settlor is one of the potential beneficiaries, the POA charge will apply where the settlement was effected before 20 June 2003.
> However, the excluded transaction provisions have no application with regard to intangible property so FA04/Sch15/Para10(1), which may have a bearing in respect of schemes involving land, has no relevance.
> If the settlement was effected on or after 20 June 2003 the property is subject to a reservation of benefit by virtue of FA86/S102(5A) and the POA charge will not apply.

---

8 See 63.17 (GWR on termination of interest in possession).

9 See 76.10.4 (Transfer to trust where spouse has interest in possession).

76.2.2 *Ingram schemes*

There were two varieties of these schemes; I describe both as **"Ingram schemes"**. The IHT Manual explains:

> **IHTM44100 - Pre-owned assets: specific avoidance schemes: land - lease carve-out scheme** [March 2012]
> This scheme, known as an ‹Ingram' scheme, involved a nominee structure where an individual gives their home to nominees who then grant the individual a lease to occupy the house. The lease is usually for 21 years or less at a peppercorn rent. The nominee then gives the property, subject to the lease, away to (usually) the individual's children. The individual continues to occupy the property under the lease.

The HMRC analysis is as follows:

> There is no loss to the transferor's estate when the property is given to the nominees and the individual does not reserve a benefit in the property that was given away - the freehold reversion - although they continue to occupy the property.
> HMRC challenged the scheme and lost in the case of *Ingram v IRC* [1999] STC 37. Consequently, legislation was introduced with effect from 8 March 1999 to reverse the decision (IHTM14360). The impact of this legislation on the POA charge is as follows
> - where the scheme was effected on or after 9 March 1999, the property will be subject to a reservation of benefit for Inheritance Tax purposes by reason of FA86/S102A. As a result the exemption under FA04/Sch15/Para11(3) will apply,
> - where the scheme was effected before 9 March 1999, the arrangement succeeds in avoiding the reservation of benefit provisions and will be subject to the POA charge under FA04/Sch15/Para3(2).
>
> ...
> **IHTM44102 - Pre-owned assets: specific avoidance schemes: land - reversionary leases** [March 2012]
> This scheme is an arrangement where a donor grants a long lease of their property for say 999 years to the proposed donee, and the lease does not take effect until some future date. The period for deferral is usually less than 21 years to avoid breaching the terms of s.149(3) Law of Property Act 1925.
> *Example (Victor)*
> V, who has owned his house since 1990, grants a 999-year lease to his daughter ... in 1998 but it is not to take effect until 2018. V continues to occupy the property.

The HMRC analysis is as follows:

> The effect of this transaction is that
> - V has made a PET of the lease. The loss to his estate will be the difference between the unencumbered freehold and the freehold subject to the lease,
> - V continues to occupy the property as the freeholder, and
> - the value of the freehold interest remaining in V's estate will decline as the time for the lease to commence approaches.
>
> Where a reversionary lease scheme is established before 9 March 1999 - the date legislation was introduced to counteract *Ingram* schemes - the arrangement succeeds in avoiding the reservation of benefit provisions so long as the lease does not contain any terms that are currently beneficial to the donor, such as covenants by the lessee to, say, maintain the property. Consequently, the donor will be subject to the POA charge under FA04/Sch15/Para3(2).
>
> ...
>
> Where a reversionary lease scheme is established on or after 9 March 1999 it was originally considered that FA86/S102A would apply because the donor's occupation would be a "significant right in relation to the land". If that were correct, the reservation of benefit rules would apply and there would be no POA charge.
>
> However, where the freehold interest was acquired more than 7 years before the gift (this is the significance of giving the date of V's purchase in the example above), the continued occupation by the donor is not a significant right in view of FA86/S102A(5), so the reservation of benefit rules cannot apply and a POA charge arises instead.

Section 102A was misdrafted, but POA now fills the gap:

> It follows that if the donor grants a reversionary lease within 7 years of acquiring the freehold interest, FA86/S102A may apply to the gift depending on how the remaining provisions of that section apply in relation to the circumstances of the case - for example, if the donor pays full consideration for the right to occupy or enjoy the land, that would not be a significant right in view of FA86/S102A(3), so the reservation of benefit rules cannot apply and a POA charge arises instead.
>
> But, despite this, and irrespective of when the freehold interest was acquired, the reservation of benefit provisions may apply if the lease contains terms currently beneficial to the donor - see *Buzzoni v HMRC*.[10]

10 See now [2012] UKUT 360.

IHTM44108 - Pre-owned assets: specific avoidance schemes: chattels - lease carve-out scheme [Mar 2012]
Although the use of a lease to carve out an interest in property is more commonly used with land (IHTM44100) it can also apply to chattels. In effect, the owner of the chattels carves out a lease for themselves and then makes a gift of the chattels. Although FA86/S102A is aimed at ensuring such a transaction with land is now subject to the reservation of benefit provisions, that section only applies to interests in land and so does not apply to similar transactions involving chattels.
The transaction is a disposal by the chargeable person and they will be liable to the POA charge under FA04/Sch15/Para6(2)....

76.2.3 *Home loan schemes*

The IHT Manual explains:

IHTM44103 - Pre-owned assets: specific avoidance schemes: land - home loan or double trust scheme [March 2012]
This is a scheme whereby the individual seeks to put the value of their home outside their estate and avoid the reservation of benefit provisions, whilst still continuing to occupy the property. The steps in a typical scheme were:

- the individual creates an interest in possession trust under which they are the life tenant; the trustees have the power to allow the life tenant to use the trust property,
- the individual then sells their house to the trust, usually at the open market value; but because the trustees have no funds, they agree to leave the purchase price outstanding by way of loan,
- the individual creates a second interest in possession trust under which (usually) their children are the life tenants and excludes the taxpayer from any benefit,
- the individual transfers the benefit of the loan to the trustees of the second trust.

The HMRC analysis is as follows:

The Inheritance Tax consequences are intended to be as follows

- there is no loss to the estate on the sale of the property to the first trust as the individual enjoys a life interest in the trust property. On their death, the trust fund forms part of their estate, but the value of the property is largely or wholly covered by the debt now owed to the trustees,
- the transfer of the debt to the second trust is a PET (since the taxpayer is wholly excluded from benefiting under this trust), so that on

> survival for 7 years, the value of their home is not charged to Inheritance Tax.
>
> [The Manual comments on SDLT aspects and continues] The requirements of FA04/Sch15/Para3 are met in that the individual is occupying land which they owned and has now disposed of, so the POA charge applies. However, the property still forms part of their estate as the life tenant of an interest in possession trust, and so the exemption in FA04/Sch15/Para11(1) applies. To bring this scheme within the POA charge, the concept of excluded liabilities is contained in FA04/Sch15/Para11(6) which states that only the value of the property in excess of an excluded liability is treated as forming part of the individual's estate and therefore qualifies for the exemption under FA04/Sch15/Para11(1).
>
> ...
>
> But, this assumes that the scheme succeeds in avoiding the reservation of benefit provisions. HMRC does not accept that the scheme succeeds and is litigating the point. A brief analysis of HMRC's view and the consequences for the POA charge are at IHTM44104 onwards.

The GWR aspect of home loan schemes is an interesting story, but is not discussed here.

76.2.4 *Width of POA provisions*

The POA provisions are widely drafted. This may be because they are aimed at three distinct schemes with nothing in common. Alternatively, with hindsight, one might see the provisions as adopting a style of anti-avoidance provisions under which:

(1) The gateway conditions for the operation of the rules are extremely wide and it is only a slight exaggeration to say that they potentially catch (more or less) everything.
(2) There are a large number of exemptions to the provisions some of which are also very wide.[11]

So the POA provisions apply in situations which have nothing to do with the three schemes at which they were targeted. They need consideration whenever one person provides funds to another to purchase a home, which includes any case where a home is held by a trust or a company. This will often be the case for the home of foreign domiciliaries; my guess is that any effect on foreign domiciliaries is entirely accidental; no-one at all had

11 A good example of this style of drafting is the disguised remuneration rules (not discussed in this book, but I hope to do so in a future edition).

worked it out in the short time available as the provisions were frantically amended and re-amended as the FA 2004 passed through Parliament.

76.3 POA land charge

Para 3(1) Sch 15 FA 2004 provides:

> This paragraph applies where—
> (a) an individual ("the chargeable person") occupies any land ("the relevant land"), whether alone or together with other persons, and
> (b) the disposal condition or the contribution condition is met as respects the land.

In the discussion below the "chargeable person" is called "T" and the land T occupies is called "land occupied by T" (rather than "the relevant land").

76.3.1 *"Occupation"*

"Occupation" is a technical legal concept extensively discussed in rating cases. The IHT Manual provides:

> **IHTM44003 - Pre-owned assets: property in charge: land** [March 2012]
> ...
> The meaning of the word ‹occupies' should be taken quite widely. It goes wider than the chargeable person being physically present at the property concerned. Case law suggests that the word ‹occupy' requires some element of control. So a visitor may not be in occupation (even someone who stays for an extended period of time due to illness) but someone who has a key and can freely enter and leave premises as they please is more likely to be in occupation; even if they are absent for significant periods. It does not necessarily mean the place you reside which implies a greater level of permanence so a lower threshold is required to satisfy the occupation condition.
> A person may be in occupation if they are storing possessions in a property - but only if they also had the right of access to the property to use it as they wished - or if they were the only person with the means of access and used the property from time to time. Storing possessions on its own is not occupation, but may be evidence of occupation. The chargeable person would not be regarded as occupying a property from which they were receiving rental payments from the person(s) actually in occupation.
> If the chargeable person's use of the property is only very limited in its nature or duration, they may not be in ‹occupation' for the purposes of

the POA charge. Each case should be decided on the facts and circumstances relating to it. The guidance at IHTM14333 contains some examples where limited use or occupation of land does not gives rise to a reservation of benefit and are unlikely, on their own, to be ‹occupation' for the POA charge.
Where the chargeable person was occupying part of their former property and was entitled to, and did, use the rest of the property from time to time, you should regard them as being in occupation of the whole of the property for the POA charge. On the other hand, if the chargeable person occupies a self-contained part of their former property and has no access to the remainder which is occupied by others, you should regard the relevant land as limited to the self-contained part. You should consider occasional visits to the remainder of the property in the same manner as social visits mentioned in example 2 at IHTM14333.[12]

76.4 The disposal conditions

Para 3(2) Sch 15 FA 2004 provides:

> The disposal condition is that—
> (a) at any time after 17 March 1986 the chargeable person owned an interest—
> (i) in the relevant land, or
> (ii) in other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of an interest in the relevant land, and
> (b) the chargeable person has disposed[13] of all, or part of, his interest in the relevant land or the other property, otherwise than by an excluded transaction.

This is best regarded as two conditions depending on whether (a) (i) or (ii) applies. I call them **"disposal conditions (i) and (ii)"**. Only one of them needs to be satisfied for the "disposal condition" to be met.

76.4.1 *Disposal condition (i)*

The essence of disposal condition (i) is that:

> (a) T owned an interest in the land occupied by him.... and
> (b) T has disposed of all, or part of, his interest in the land ...

What if T enters into a contract to purchase land and then assigns that

12 See 63.6.3 ("Virtually" to the entire exclusion).
13 "Disposal" is defined in para 3(4) Sch 15 FA 2004.

contract to a trust or company? The contract is an interest in land. However, on completion the contract ceases to exist. That will normally be before the valuation date. Since the asset cannot be valued on the valuation date, it is tentatively suggested that disposal condition (i) does not apply in this situation.

The disposal condition is satisfied by a disposal of land for full consideration. However, in such a case the exclusion for arm's length transactions may apply.

76.4.2 *Disposal condition (ii)*

The essence of disposal condition (ii) is that:

> (a) T owned ... other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of an interest in the land occupied by T, and
> (b) T has disposed of all, or part of, his interest in the ... other property ...

Disposal condition (ii) is probably intended to deal with the situation where:

(1) T disposes of land to A.
(2) A sells the land and uses the proceeds to purchase other land occupied by T.

However, it may apply where:

(1) T disposes of any property (not land or cash) to A; and
(2) A disposes of that property and uses the proceeds to purchase land occupied by T.

This overlaps with the contribution conditions. The overlap matters because the excluded transaction defences to the contribution and disposal conditions are not the same.

The IHT Manual provides:

> **IHTM44004 - Pre-owned assets: property in charge: the disposal condition - land** [March 2012]
> ...
> **Example** (Trevor and Paul)
> T gives The Paddocks to P. P then sells The Paddocks and buys Whiteacre with the proceeds. T then occupies Whiteacre. The disposal condition is met.
> So the disposal condition will apply to the chargeable person's occupation or use of the property even if that property was never actually owned by them. If they give away other property (it does not

have to be land, but see the contribution condition IHTM44005) if the gift is of cash) to another person who then sells such property and uses the proceeds to buy the relevant land, the disposal condition is satisfied, unless it qualifies as an excluded transaction.

A disposition that creates a new interest in land out of an existing interest is taken to be a disposal of part of the existing interest, FA04/Sch15/Para 3(4).

The disposal condition will be met whether the sale or gift is of the whole or part of land and whether or not the sale is at less than the full market value. See IHTM44031 where the disposal is of the whole of the land for full consideration.

FA04/Sch15/Para 3(2)(a)(ii) applies where the proceeds of sale are used to acquire land that is subsequently occupied by the chargeable person. So, in the example above, if P exchanged The Paddocks for Whiteacre, on the face of it the disposal condition is not met; but see IHTM44005

76.5 The contribution conditions

Para 3(3) Sch 15 FA 2004 provides:

> The contribution condition is that at any time after 17 March 1986 the chargeable person has directly or indirectly provided, otherwise than by an excluded transaction, any of the consideration given by another person for the acquisition of—
>
> (a) an interest in the relevant land, or
>
> (b) an interest in any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of an interest in the relevant land.

This is best regarded as two conditions, depending on whether (a) or (b) applies. I call them **"contribution conditions (a) and (b)"**. Only one of them need be satisfied for the "contribution condition" to be met.

76.5.1 *Contribution condition (a)*

The essence of contribution condition (a) is that:

> T has directly or indirectly provided…any of the consideration given by another person for the acquisition of ... the land occupied by T …

This envisages that:

(1) "another person" (which may be a company or trustee) acquires for consideration land occupied by T; and

(2) T has provided that consideration directly or indirectly.

76.5.2 *Contribution condition (b)*

The essence of contribution condition (b) is that:

> T has directly or indirectly provided … any of the consideration given by another person for the acquisition of … any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of ... the land occupied by T.

This applies where:

(1) "another person" ("A") acquires "other property" for consideration.
(2) T has provided that consideration directly or indirectly.
(3) A disposes of the other property.
(4) The proceeds are (directly or indirectly) applied by "another person" (presumably either A himself or another person, "B") towards the acquisition of the land occupied by T.

The drafter may be considering a situation where:

(a) T transfers funds to A who purchases a property; and
(b) A sells that property and uses the proceeds to buy another property occupied by T.

or

(a) T transfers funds to A (eg trustees);
(b) A transfers the funds to B (eg a company held by A);
(c) B uses the funds to purchase a property occupied by T.

In both those cases I would have said that T had indirectly provided consideration given for the land and contribution condition (a) was already satisfied. I cannot think of a situation which falls within condition (b) and which does not fall within condition (a). But it does not much matter.

The IHT Manual provides:

> **IHTM44005 Pre-owned assets: property in charge: the contribution condition - land** [March 2012]
>
> ...
>
> **Example** (Trevor and Paul)
>
> T gives P the funds to buy Blackacre. P then sells Blackacre and buys The Paddocks with the proceeds. T then occupies The Paddocks. The contribution condition is met.
>
> You do not need to show that when the contribution was made, the individual intended to occupy the land purchased by another; if the chargeable person occupies land that they have, as a matter of fact, indirectly contributed to the purchase of, the contribution condition is met.

The contribution condition does not only apply to cash contributions. So in the example at IHTM44004, where P exchanges The Paddocks for Whiteacre, the gift of The Paddocks from T to P is a contribution to the acquisition of the property that T subsequently occupied and so the contribution condition is met.

However, the contribution condition is not met where the chargeable person resides in property purchased by another with money loaned by the chargeable person. This is because the outstanding debt will form part of the lender's estate for Inheritance Tax purposes, and the lender cannot be said to have provided a contribution to the purchase of that property when that money has to be repaid to them, even if the loan was interest free. It follows that the 'lender', in such an arrangement, is not subject to a POA charge.

76.5.3 *Width of contribution conditions*

The contributions conditions apply whenever one person gives funds to another for the purchase of a home. For instance, if H gives funds to W so H and W can purchase a home jointly; but if H and W are spouses, the POA spouse exemption may apply;[14] if H and W jointly occupy the property, the GWR exemption may apply.[15]

76.5.4 *Purpose of contribution conditions*

It is hard to see the purpose of the contribution conditions. *Ingram, Eversden* and home loan schemes would be caught by the disposal conditions. Perhaps it was meant to catch schemes set up on the occasion of purchase of a new property where the settlor would provide cash to a trust. But this was never done in the past; it would have been better to frame more targeted anti-avoidance provisions than this blunderbuss approach.

76.6 "Provide"

"Providing" is the fundamental concept in the contribution conditions and it is not an easy one. Some guidance can be found in cases on the meaning of "settlor" where the statutory language is similar.[16]

---

14 See 76.10.3 (Inter-spouse transfer).

15 See 76.19 (GWR exemptions).

16 Some guidance ought to be found from comparable wording in Stamp Duty and SDLT group relief: s.27 FA 1967; para 2(2) Sch 7 FA 2003. Unfortunately the SD/SDLT position is even more obscure than the POA: SP 3/98; Tax Bulletin 70.

It is considered that "provide" implies an element of bounty. So if T lends money on arm's length terms to A, who uses the money lent to buy the property, T has not "provided" the consideration and the contribution condition is not satisfied.

What if T lends interest-free to A, who uses the money lent to buy the property? At first sight T has provided the consideration. But it might be argued that A provides the consideration himself (by A's promise to repay T) and that T provides nothing.[17] In practice HMRC now[18] accept this.

---

17 One might say that T has provided the interest foregone on the loan, but (1) interest foregone does not exist, and it is difficult to see how one could provide something which does not exist; see 80.19 (Interest-free or back-to-back loan); (2) the interest foregone is not the consideration given for the acquisition of the land.

18 This reverses the view taken in the CIOT Statement:

"6.2 The meaning of the ‹provision' of ‹consideration' in the context of the contribution condition needs to be clarified. On the basis of the case law the word provided suggests some element of bounty.

On this basis our view is that if there is a transfer of Whiteacre by A (or another asset) to his son at full market value which is then sold by son and the sale proceeds used to purchase Blackacre for A to occupy this is a breach of the disposal but not the contribution condition because it lacks the necessary element of bounty.

Similarly the provision of a loan on commercial terms by A to his son to enable son to purchase a house which A then occupies in our view does not fall within the contribution condition.

Question 32

Do HMRC agree with this analysis?

HMRC answer to question 32

In our view, it is arguable that the contribution condition does not depend on a degree of bounty for its application. If, on the contrary, a degree of bounty was necessary, might not the operation of the contribution condition provisions in paras 3(3) and 6(3) of Schedule 15 be circumvented by the relatively simple expedient of A, in your example, providing the wherewithal for the purchase of a house by his son by way of a loan, ostensibly on commercial terms, which is then left outstanding indefinitely?

Having said that, we have considered further the sort of case where a loan is made **and operated** on commercial terms eg a commercial rate of interest is specified and paid and there are provisions for repayment of the loan over the sort of period one would expect to find in a truly commercial loan. Having regard to paras 4(2)(c) or 7(2)(c) of Schedule 15, the chargeable amount would depend on the value of DV in R (or N)×DV/V: that's to say on ‹such part of the value of the land/chattel as can reasonably be attributed to the consideration provided by the chargeable person'. In the case where the loan is on truly commercial terms and conducted in a truly commercial way, we would accept that the attributable amount is nil or de minimis.

In determining ‹reasonable attribution' for the purposes of para 4(2)(c), it is the terms on which the loan is made and operated that are relevant, as indicated above.

The IHT Manual provides:

> **IHTM44005 - Pre-owned assets: property in charge: the contribution condition - land** [March 2012]
> ... However, the contribution condition is not met where the chargeable person resides in property purchased by another with money loaned by the chargeable person. This is because the outstanding debt will form part of the lender's estate for Inheritance Tax purposes, and the lender cannot be said to have provided a contribution to the purchase of that property when that money has to be repaid to them, even if the loan was interest free. It follows that the ‹lender', in such an arrangement, is not subject to a POA charge.

What if:
(1) T lends interest-free to A,
(2) A purchases the property, and
(3) T later releases the loan (or makes a gift to A which A uses to repay the loan, which comes to the same thing)?

Alternatively, more simply, what if:
(1) A purchases the property
(2) T makes a gift to A, or reimburses A for the expense (without being obliged to do so).

If T has not provided the consideration at the time that A purchases the property, T cannot provide it later. However if the steps form part of a single arrangement, it can probably be said that A has provided the consideration indirectly, even if slightly belatedly.

What if T subscribes for shares on arm's length terms? Probably T has provided funds to the company

76.6.1 *Arrangements involving third parties*

The position becomes more complex where more than two persons are involved.

Suppose T provides funds to A, an individual, who gives them to B, an

---

In that context, the period over which the loan is repaid as well as whether a commercial rate of interest is charged is relevant.
Thus, where an interest-free loan is repaid over a typical ‹commercial' period, it would be reasonable to regard the interest foregone as attributable to the consideration provided by the chargeable person. In cases where the principal of the loan was left outstanding indefinitely, such principal could reasonably be regarded as attributable to the consideration provided."

individual, and B purchases the property. It is suggested that T has not provided the consideration if the "clean break" test is satisfied.[19]

Suppose T provides funds to a trust, who lend them to a company owned by the trust, which purchases the property. It is suggested that T has provided the consideration because the "clean break" test is not satisfied.

What if T gives funds to A and A borrows from a third party on the security of those funds, and uses the borrowed funds to buy the property? It is considered that T has not provided the consideration.

If T provides fund X to a company or trust, which borrows fund Y from a third party, and the company or trust uses both funds to acquire the property, then T has provided fund X but not fund Y.

Commonplace arrangements for a foreign domiciliary's residence will often satisfy the contribution condition, for instance where:

(1) an individual gives to a trust which purchases the home (without a company); or
(2) a foreign domiciliary gifts funds to a trust which lends interest-free to the company which acquires the home.

In most cases one exemption or another will apply but it is possible to fall between the gaps.

76.6.2 *Provision of funds for purpose of acquisition*

What is the position if T provides funds, but not for the purpose of the acquisition of the land? Suppose:

(1) In 1987 T created a trust. At the time T had no plans to move to the UK.
(2) In 2005 the trustees make an interest-free loan to a company which purchases a property which T occupies.

The foreign domiciled individual has directly provided the property for the purposes of the trust. They are probably to be regarded as having indirectly provided the consideration given for the acquisition of the land under the principle in *Muir v Muir*.[20] So contribution condition (a) is satisfied.

But if T gives funds to A, an individual, and A later uses those funds to buy a property, it is suggested that T has not provided the consideration,

---

19 See 80.4.1 (When is A an indirect settlor?).

20 [1943] AC 468. This is consistent with para 10(2)(c) Sch 15 FA 2004 which envisages a seven-year gap between the provisions of funds and the occupation of the land. But the contrary view is arguable.

unless the two steps form a single arrangement.

76.6.3 *Guarantees*

Para 17 Sch 15 FA 2004 provides:

> Where a person ("A") acts as guarantor in respect of a loan made to another person ("B") by a third party in connection with B's acquisition of any property, the mere giving of the guarantee is not to be regarded as the provision by A of consideration for B's acquisition of the property.

It is suggested that this applies even if A provides security for A's guarantee or deposits funds with a bank as a back-to-back loan.

What if:

(1) B borrows to purchase property (perhaps with a guarantee by T); and

(2) T later gives funds to B who repays?

If the steps are independent, it is considered that T has not provided the consideration. If, however, the steps form part of a single arrangement, it is suggested that T can be said to have provided the consideration indirectly.

76.6.4 *Secondhand company*

The contribution condition will not be satisfied where:

(1) A has provided funds to a company to purchase a house.

(2) A sells the company to B who occupies the house.

B has not provided the funds for the purchase (unless the two steps form a single arrangement).[21]

76.7 POA chattel charge

Para 6 Sch 15 FA 2004 provides:

> (1) This paragraph applies where—
>
> (a) an individual ("the chargeable person") is in possession of, or has the use of, a chattel, whether alone or together with other persons, and
>
> (b) the disposal condition or the contribution condition is met as respects the chattel.
>
> (2) The disposal condition is that—
>
> (a) at any time after 17 March 1986 the chargeable person had

21 See 28.8.1 (Purchase of secondhand company by individual).

(whether alone or jointly with others) owned—

(i) the chattel, or

(ii) any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of the chattel, and

(b) the chargeable person disposed[22] of all or part of his interest in the chattel or other property otherwise than by an excluded transaction.

(3) The contribution condition is that at any time after 17 March 1986 the chargeable person had directly or indirectly provided, otherwise than by an excluded transaction, any of the consideration given by another person for the acquisition of—

(a) the chattel, or

(b) any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of the chattel.

This follows the form of the POA land charge.

The IHT Manual provides:

IHTM44007 Pre-owned assets: property in charge: the disposal condition- chattels [March 2012]

...

Example (Trevor and Paul)

T gives a painting to P. P then sells the painting and buys a violin with the proceeds, which T then plays. The disposal condition is met.

So the disposal condition will apply to the chargeable person's enjoyment or use of a chattel even if it was never actually owned by them. If they give away another asset (it does not have to be another chattel, but see the contribution condition (IHTM44008) if the gift is of cash) to another person who sells the asset and uses the proceeds to purchase the chattel concerned, the disposal condition is satisfied, unless it qualifies as an excluded transaction.

A disposition that creates a new interest in a chattel out of an existing interest is taken to be a disposal of part of the existing interest, FA04/Sch15/Para 6(4).

The disposal condition will be met whether the sale or gift is of the whole or part of the chattel and whether or not the sale is at less than the market price. See IHTM44031 where the disposal is of the whole of the chattel for full consideration.

22 "Disposal" is further defined in para 6(4) Sch 15 FA 2004.

FA04/Sch15/Para 6(2)(a)(ii) applies where the proceeds of sale are used to acquire a chattel that is subsequently used or enjoyed by the chargeable person. So, in the example above, if P exchanged the painting for the violin, on the face of it, the disposal condition is not met; but see IHTM44008.

IHTM44008 - Pre-owned assets: property in charge: the contribution condition - chattels [March 2012]

...

The contribution condition applies not only where the contribution provided by the chargeable person is directly used to purchase the chattel but also where the contribution is indirect. If the chargeable person provided all or part of the consideration for the purchase of an asset by another person, who then sold that asset and used the proceeds to purchase the chattel used or enjoyed by the chargeable person, the contribution condition is satisfied.

Example (Trevor and Paul)

T gives P the funds to buy a painting. P then sells the painting and buys a violin with the sale proceeds which T then plays. The contribution condition is met.

You do not need to show that when the contribution was made, the individual intended to use or enjoy the chattel purchased by another; if the chargeable person uses or enjoys a chattel that they have, as a matter of fact, indirectly contributed to the purchase of, the contribution condition is met.

The contribution condition does not only apply to cash contributions. So in the example at IHTM44007, where P exchanges a painting for a violin, the gift of the painting from T to P is a contribution to the acquisition of the chattel that T subsequently used or enjoyed and so the contribution condition is met.

However, the contribution condition is not met where the chargeable person uses or enjoys a chattel purchased by another with money loaned by the chargeable person. This is because the outstanding debt will form part of the lender's estate for Inheritance Tax purposes, and the lender cannot be said to have provided a contribution to the purchase of the chattel when that money has to be repaid to them, even if the loan was interest free. It follows that the 'lender', in such an arrangement, is not subject to a POA charge.

76.8 POA intangible property charge

Para 8 Sch 15 FA 2004 provides:

(1) This paragraph applies where—

(a) the terms of a settlement, as they affect any property comprised

in the settlement, are such that any income arising from the property would be treated by virtue of section 624 of ITTOIA (income arising under settlement where settlor retains an interest) as income of a person ("the chargeable person") who is for the purposes of Chapter 5 of Part 5 of that Act the settlor,

(b) any such income would be so treated even if section 625(1) of ITTOIA (settlor's retained interest) did not include any reference to the spouse or civil partner of the settlor, and

(c) that property includes any property as respects which the condition in sub-para (2) is met ("the relevant property").

(2) The condition mentioned in sub-para (1)(c) is that the property is intangible property which is or represents property which the chargeable person settled, or added to the settlement, after 17 March 1986.

In common form settlor-interested discretionary trusts the GWR exemption will apply.

If S lends on favourable terms to a trust from which S is excluded, s.624 applies[23] but para 8 does not apply.[24]

In common form trusts where the settlor has an IIP, the GWR exemption (or for an estate IIP, the estate exemption) will apply.

Accordingly, the POA intangible property charge will not usually affect foreign domiciliaries.

The charge does not apply to intangible property held by a company held by a trust, since that is not property comprised in a settlement, and not caught by s.624, but the shares in the company will be intangible property (except perhaps bearer shares?).

The charge is intended to catch *Eversden* schemes (which will not normally have been carried out by foreign domiciliaries). But it is much wider than that. It applies (in short) to (almost) any settlor-interested trust unless GWR also applies. If A creates a trust to A for life remainder to B absolutely, or to B for life remainder to A absolutely, the charge applies. However, if there is a power of appointment in favour of A, the charge does not apply as in this case there is a GWR. There is no sense in this and in practice HMRC do not take the point. Since s.102ZA FA 1986 stops the *Eversden* schemes, the intangible property charge is an anti-avoidance provision that has lost its purpose[25] and only remains as clutter

23 See 27.3.2 ("Settlor-interested" for IT purposes).

24 Because s.624 only applies because of the loan, and not because of the terms of the settlement (in the IHT sense).

25 Except for *Eversden* schemes carried out before 2003.

in the tax system which will occasionally trap the unwary (if anyone notices or cares). It should be repealed (except for pre-2003 disposals).

The IHT Manual provides:

> **IHTM44009 - Pre-owned assets: property in charge: intangible property** [March 2012]
> ...
> Note that under FA04/Sch15/Para 8(1)(a), income arising from the assets concerned (and not the settlement generally) must be treated as income of the chargeable person. So, if the settled property is partitioned so that the settlor cannot benefit from one part of the fund, the POA charge will only apply to the part of the fund that the settlor can benefit from. If the part the settlor can benefit from contains land - but the settlor does not occupy it - the POA charge on land IHTM44004) cannot apply, and will not apply to the part the settlor cannot benefit from, even if that part contains intangibles.
> You should also note the fact that the settled property may not actually produce any income does not matter, as long as any income that might arise would be treated as income of the settlor, a charge under FA04/Sch15/Para 8 will arise.
> ...
> Note that the intangibles charge does not apply to intangible property which is owned by a company which is in turn owned by a trust since the property owned by the company is not settled property. On the other hand, the shares of the company itself will be settled property and potentially caught by the POA charge subject to any exclusions (IHTM44030).
> **Example** (Andrew and Joan)
> A sets up a trust for his wife J on their marriage in 2005 and as he is excluded from all benefit there is no possibility of a charge under FA04/Sch15/Para 8 arising. If, however, he sets up a trust where J receives the income but he can benefit under, say, an overriding power of appointment or perhaps a remainder interest (although see IHTM44112 in this regard), then a charge under FA04/Sch15/Para 8 arises subject to any relevant exemptions IHTM44040), even though the property forms part of J's estate (being a pre-March 2006 interest in possession).

76.8.1 *"Settlement"*

"Settlement" here has the IHT meaning, not the settlement-arrangement meaning: para 1 Sch 15 FA 2004. See 80.2 (Definitions of "settlement").

The IHT Manual provides:

IHTM44009 - Pre-owned assets: property in charge: intangible property [March 2012]

...

In this context ‹settlement' has the same meaning as it does for Inheritance Tax purposes. The definition of ‹settlement' is in IHTA84/S43(2) (IHTM16042). Unlike the requirement for Income Tax, the fact that there is no element of bounty does not prevent a trust being a 'settlement' for Inheritance Tax - although the legislation does still require the chargeable person to have 'settled' or 'added' property to the settlement. So an arms length sale at full market value to the trust would not be a settlement or addition by the vendor.

...

IHTM44112 - Pre-owned assets: insurance based products: discounted gift trust [March 2012]

A discounted gift trust or plan is where the settlor makes a gift into settlement with certain 'rights' being retained by them. The retained rights may, for example, be a series of single premium policies maturing (usually) on successive anniversaries of the initial investment or on survival, reverting to the settlor, if they are alive on the maturity date; or the settlor carves out the right to receive future capital payments if they are alive at each prospective payment date. The gift with reservation provisions do not apply.

In the straightforward case where the settlor has retained a right to an annual income or to a reversion under arrangements, that right is not property within FA04/Sch15/Para8 as the trustees hold it on bare trust for the settlor. A bare trust is not a settlement for inheritance tax purposes (IHTM16030). The settlor is excluded from other benefits under the policy and so the POA charge does not apply.

There may be more complex cases where the settlor's retained rights or interests are themselves held on trust. But that would normally be construed as being a separate trust of those benefits in which the settlor had an interest in possession. No POA charge will arise where the interest in possession arose before 22 March 2006 by virtue of FA04/Sch15/Para11(1) (IHTM44041).

Where, however, the POA charge does arise, it will be by reference to the value of the rights held on trust for the settlor, not by reference to the value of the underlying life policy. An open market value of those rights will need to be obtained in order to calculate the charge (IHTM44025).

76.9 Excluded transactions

A disposal of property by an excluded transaction is ignored for the

disposal conditions; and the provision of property by an excluded transaction is ignored for the contribution conditions. Para 10(1) Sch 15 FA 2004 defines "excluded transaction" for the disposal conditions and para 10(2) Sch 15 FA 2004 defines it for the contribution conditions. Each sub-paragraph contains five categories of excluded transaction, making 10 in all. Simplicity was evidently not an important consideration to the drafter of the POA rules.

Excluded transactions are not a defence to the POA intangible property charge.

76.10 Excluded transactions: Disposal conditions

76.10.1 *Arm's length transaction: Disposal of whole interest*

Para 10(1) Sch 15 FA 2004 provides:

> For the purposes of ... [the disposal condition], the disposal of any property is an "excluded transaction" in relation to any person ("the chargeable person") if—
>
> (a) it was a disposal of his whole interest in the property, except for any right expressly reserved by him over the property, either—
>
> (i) by a transaction made at arm's length with a person not connected with him, or
>
> (ii) by a transaction such as might be expected to be made at arm's length between persons not connected with each other.

There are two requirements here:

(1) A disposal of the whole interest (except for any rights expressly reserved).

(2) The disposal[26] is (in short) on arm's length terms.

There is no equivalent of this category of excluded transaction for the purposes of the contribution conditions. The reason is that a disposal at arm's length is not likely to amount to "providing" consideration.

The IHT Manual provides:

> **IHTM44031 - Pre-owned assets: excluded transactions: the disposal condition - sale of entire interest** [March 2012]
>
> ...
>
> **Example** (George and Robert)

26 Not the reservation of rights.

G sells his house to his son R for full consideration, but continues to live in the property. As he has not made a gift, there is no reservation of benefit (IHTM14301) and provided the sale falls within FA04/Sch15/Para 10(1)(a)(ii), there will be no POA charge either. The position would be different if G had given R money in the past (IHTM44005).

Example (Robert and James)

R executes an 'Ingram' (IHTM44100) scheme and sells the freehold reversion to J. This would be an excluded transaction, provided that the sale was at arm's length or such as might be expected to be made at arm's length between persons not connected with each other. The reversion is a distinct item of property and R has sold his entire interest in it; he continues to occupy the property by virtue of his leasehold interest which is a separate item of property. There will be a 'marriage' value for the two interests and a truly arm's length transaction must reflect this. In practice, this is likely to be difficult for the taxpayer to show since an independent purchaser would not normally want to pay for marriage value unless he was certain of getting the leasehold interest.

76.10.2 *Arm's length transaction: Part disposal*

Reg. 5(1) POA Regulations 2005 provide a further relief for part disposals:

> Para 3 (land) and para 6 (chattels) do not apply to a person in relation to a disposal of part of an interest in any property if—
>
> (a) the disposal was by a transaction made at arm's length with a person not connected with him;
>
> (b) the disposal was by a transaction such as might be expected to be made at arm's length between persons not connected with each other, and
>
> (i) the disposal was for a consideration not in money or in the form of readily convertible assets[27], or
>
> (ii) the disposal was made before 7 March 2005.

This is wider than Para 10(1) Sch 15 FA 2004 in that it provides relief from the POA land and chattel charges, not just relief where the disposal conditions apply. But it is narrower in that its requirements are more restrictive.

In particular, one might think the word "not" is included accidentally in

27 Defined in reg.5(2).

reg.5(1)(b)(i) but it was deliberate. A written ministerial statement of Hansard 7 March 2005 provides:

> We do not in general think it is appropriate to provide exemption for sales of a part interest which are made otherwise than at arm's length. If one member of a family needs to raise cash, and another member of the family is willing and able to provide it, there are other and more straightforward ways of structuring this than adopting the form of an equity release transaction.

Very few readers will find that satisfactory. But there it is. The statement continues:

> The point was however made in consultation that some intra-family part disposals can arise from patterns of behaviour adopted for good family or business reasons, for example where a child moves in to care for an aged parent and acquires an equitable interest in their shared home as a corollary of that, or where younger members of a family take over the active role in a family partnership, and in doing so acquire an interest from the partners who preceded them.

What is notable is that the drafter seems to have assumed that these are "transactions such as might be expected to be made at arm's length between persons not connected with each other".

The IHT Manual provides:

> **44059. Sale of part share** [March 2012]
> Regulation 5(1)(b)(i))... may also apply where someone acquires their interest in a property by way of an equitable arrangement, rather than for cash, for example where the person has given up work to care for the owner of the property on the understanding that they will acquire a share of the property in return.

The guidance formerly published on the HMRC website was more helpful:

> If Miss B acquired her interest in the property by way of an equitable arrangement rather than for cash – for example, she had given up work to care for Mr A on the understanding that she would receive a share of the property in return – the income tax charge will not apply: Regulation 5
> In considering whether the conditions were satisfied, we would need information about how the essential elements of the transaction had been arrived at. We do recognise that there is a substantial body of case law dealing with the circumstances in which an interest in a house is

> acquired in consequence of a person acting to his detriment. The Ministerial Statement had these sorts of situations in mind and we would interpret Regulation 5 accordingly. In particular, we accept that the requirement that "the disposal was by a transaction such as might be expected to be made at arm's length between persons not connected with each other" would be interpreted with such cases in mind. Where the parties had sought separate advice and acted upon it or had obtained a court order confirming the property entitlement, that would reinforce the claim that the conditions were satisfied. But we would not expect parties to such an arrangement to have done this. We recognise that detriment that the acquirer can demonstrate he has suffered can provide consideration for the acquisition of the interest and prevent the transaction from being gratuitous.

It is straining credulity to describe this as a transaction that may have been expected to have been made at arm's length. But the legislation was not intended to catch this, and HMRC avoid the problem by informal concession dressed up as a statement of practice.

76.10.3 *Inter-spouse transfer*

The second category of excluded transaction is in para 10(1)(b) Sch 15 FA 2004:

> Para 3 (land) and para 6 (chattels) do not apply to a person in relation to a disposal of part of an interest in any property if ...
>
> (b) the property was transferred to his spouse or civil partner (or where the transfer has been ordered by a court, to his former spouse or civil partner),

This applies whether or not the IHT spouse exemption applies on the transfer. The transfer to the spouse need not be by way of gift.

76.10.4 *Transfer to trust where spouse has interest in possession*

The third category of excluded transaction is in para 10(1)(c) Sch 15 FA 2004:

> Para 3 (land) and para 6 (chattels) do not apply to a person in relation to a disposal of part of an interest in any property if ...
>
> (c) it was a disposal by way of gift (or, where the transfer is for the benefit of his former spouse or civil partner, in accordance with a court order), by virtue of which the property became settled property in which his spouse or civil partner or former spouse or civil partner is beneficially entitled to an interest in

possession.[28]

This applies whether or not the IHT spouse exemption applies on the transfer. The disposal to a trust under which a spouse has an interest in possession must be by way of gift if the disposal is to be an excluded transaction. Perhaps the reason is to stop some variants of the home loan scheme, which involves a sale of a house to an interest in possession trust for consideration.

This seems to apply even after 2006, when the interest in possession may not be an estate interest.

The IHT Manual provides:

> **IHTM44032 - Pre-owned assets: excluded transactions: the disposal condition - transfer to spouse or civil partner** [March 2012]
> ...
> The spouse or civil partner must take an interest in possession from the outset, but note that this does not have to be a qualifying interest in possession under IHTA84/S49(1A). The transaction will remain an excluded transaction provided the interest in possession remains in place until the death of the spouse or civil partner. If the interest in possession ends during their lifetime, the transaction ceases to be an excluded transaction, FA04/Sch15/Para 10(3), so the POA charge will arise in the normal way from that point onwards. However, if the spouse or civil partner (or former spouse or civil partner) has become absolutely entitled to the property, you can accept that the benefit of the exclusion is not lost.
> **Example** (Paul and Susan)
> In 2005, P settles his house on qualifying interest in possession trusts for himself for life, then to his wife S with remainders to their children. Both occupy the property. In 2009, the trustees terminate P's life interest; so that S now has a non-qualifying interest in possession, but P continues to occupy the property.
> Initially there would have been no POA charge as the transaction would

28 This is restricted by para 10(3) Sch 15 FA 2004:
"A disposal is not an excluded transaction by virtue of sub-para (1)(c) or (2)(b), if the interest in possession of the spouse or civil partner or former spouse or civil partner has come to an end otherwise than on the death of the spouse or civil partner or former spouse or civil partner."
The former HMRC Website Guidance provided at 1.3.1:
"In cases where the spouse or civil partner or former spouse or civil partner has become absolutely entitled to the property, we would accept that the benefit of the exclusion is not lost."

have been exempt from the charge (IHTM44041). On the termination of the P's life interest, S's interest in possession is **not** an excluded transaction because there is no disposal by way of gift by virtue of which the property becomes settled property in which S has a life interest. So the exclusion under FA04/Sch15/Para 10(1)(c) does not apply and as the exemption no longer applies either, a POA charge arises.

However, as P continues to occupy the property and the termination of his qualifying life interest is deemed to be a gift by the life tenant, FA86/S102ZA IHTM14391), the exclusion under FA04/Sch15/Para 11(3) applies and no POA charge arises.

76.10.5 *Disposition for maintenance of family*

The fourth category of excluded transaction is in para 10(1)(d) Sch 15 FA 2004:

> Para 3 (land) and para 6 (chattels) do not apply to a person in relation to a disposal of part of an interest in any property if ...
>
> (d) the disposal was a disposition falling within section 11 of IHTA (dispositions for maintenance of family).

76.10.6 *Annual exemption and small gifts*

The fifth category of excluded transaction is in para 10(1)(e) Sch 15 FA 2004:

> Para 3 (land) and para 6 (chattels) do not apply to a person in relation to a disposal of part of an interest in any property if ...
>
> (e) the disposal is an outright gift[29] to an individual and is for the purposes of IHTA a transfer of value that is wholly exempt by virtue of section 19 (annual exemption) or section 20 (small gifts).

This will include substantial gifts which qualify for 100% BPR or APR.

76.11 Excluded transactions: Contribution conditions

76.11.1 *Four exclusions*

Para 10(2) Sch 15 FA 2004 provides:

> For the purposes of ... (the contribution condition) the provision by a person ("the chargeable person") of consideration for another's

29 See 76.12 ("Outright gift").

acquisition of any property is an "excluded transaction" in relation to the chargeable person if—

(a) the other person was his spouse or civil partner (or, where the transfer has been ordered by the court, his former spouse or civil partner),

(b) on its acquisition the property became settled property in which his spouse or civil partner or former spouse or civil partner is beneficially entitled to an interest in possession.

These are the equivalent of the exclusions discussed above, see 76.10.3 (Inter-spouse transfer). The spouse trust exclusion here is wider than the spouse trust exclusion for the disposal condition, as the words "by way of gift" do not appear. The last two exclusions in para 10(2) Sch 15 FA 2004 are:

(d) the provision of the consideration is a disposition falling within section 11 of IHTA (dispositions for maintenance of family), or

(e) the provision of the consideration is an outright gift to an individual and is for the purposes of IHTA a transfer of value that is wholly exempt by virtue of section 19 (annual exemption) or section 20 (small gifts).

These are the equivalent of 76.10.5 (Disposition for maintenance of family)) and 76.10.6 (Annual exemption and small gifts).

The IHT Manual provides:

IHTM44035 - Pre-owned assets: excluded transactions: the contribution condition - transfer to spouse or civil partner [March 2012]

...

The spouse or civil partner must take an interest in possession from the outset, but note that this does not have to be a qualifying interest in possession under IHTA84/S49(1A). The transaction will remain an excluded transaction provided the interest in possession remains in place until the death of the spouse or civil partner. If the interest in possession ends during their lifetime, the transaction ceases to be an excluded transaction, FA04/Sch15/Para 10(3), so the POA charge will arise in the normal way from that point onwards. However, if the spouse or civil partner (or former spouse or civil partner) has become absolutely entitled to the property, you can accept that the benefit of the exclusion is not lost.

Example (Jane and Edward)

J has an interest in possession in a trust with remainders to her children. In 2003 her husband E adds £300,000 to the trust. The transfer is

exempt from IHT, although it will initially be subject to the POA intangibles charge if E is a beneficiary (IHTM44009). The trustees purchase a house that J and E occupy. Since, on its acquisition, the property becomes settled property and would otherwise meet the conditions of FA04/Sch15/Para 3(3), the POA charge is excluded by FA04/Sch15/Para 10(2)(b).

If J's interest is terminated during her lifetime, then FA04/Sch15/Para 10(3) prevents the exclusion under FA04/Sch15/Para 10(2)(b) from applying, so the POA charge will arise in the normal way, unless J becomes absolutely entitled to the property, when you can accept that the benefit of the exclusion is not lost. In the event that J's interest comes to an end with her death and E continues to occupy the property, the exclusion will continue to apply.

The timing of such transactions can give rise to very complicated outcomes due to the interaction of FA86/S.102(5A)-(5C) (IHTM14318); FA86/S102ZA (IHTM14391) and changes to the treatment of interest in possession trusts from 18 March 2006 (IHTM16061). Any cases where this mix of circumstances arises should be referred to Technical for advice.

76.11.2 *Outright gift of money*

The remaining exclusion is in para 10(2)(c) Sch 15 FA 2004 where:

> (c) the provision of the consideration constituted an outright gift[30] of money (in sterling or any other currency) by the chargeable person to the other person and was made at least seven years before the earliest date on which the chargeable person met the condition in para 3(1)(a)[31] or, as the case may be, 6(1)(a).[32]

Para (c) applies only to the contribution conditions.

The exemption only applies to gifts of money. I am unable to see any reason for that. The IHT Manual provides:

> **44036 The contribution condition - outright gift of money** [March 2012]
>
> As the earliest date a POA charge can arise is 6 April 2005, any contribution by way of an outright gift of cash made before 6 April 1998 will be an excluded transaction, irrespective of when the person subsequently went into occupation.

---

30 See 76.12 ("Outright gift").

31 ie occupies the relevant land.

32 ie has possession of the chattels.

76.12 "Outright gift"

The expression "outright gift" is used in three of the ten categories of excluded transaction:

(1) Outright gifts to individuals within s.19 (annual exemption) or s.20 (small gifts) are excluded transactions for the disposal and contribution conditions.[33]

(2) Outright gifts of money (whether or not to an individual) are excluded for the disposal condition.[34]

"Outright gift" is not defined.[35] Clearly a loan and a subscription for shares is not an outright gift. It is suggested that a gift to a trust from which the settlor is excluded is in principle an outright gift.

It is tentatively suggested that a gift to an irrevocable discretionary trust of which the donor is merely a discretionary beneficiary is an outright gift. It must be envisaged that the donor occupies the land given or the exclusion will not apply.

76.13 POA exemptions

Para 11 Sch 15 FA 2004 provides a set of exemptions from the POA charges which (in my terminology) are as follows:

(1) Estate exemptions

(2) GWR exemptions

(3) Para 11(5)(b) Sch 15 FA 2004 exemptions (charities and other specialist areas) not discussed here

(4) Para 11(5)(c) Sch 15 FA 2004 exemption (jointly occupied property) not discussed here

(5) Full consideration exemption

76.14 "Relevant property"

A key concept in the POA exemptions is "relevant property" defined in para 11(9) Sch 15 FA 2004. The expression has three possible meanings.

In relation to the POA land and chattel charges, "relevant property" means:

> (i) where the disposal condition ... is met, the property disposed of,

---

33 See 76.10.6 (Annual exemption and small gifts); 76.11.1 (Four exclusions).

34 See 76.11.2 (Outright gift of money).

35 The term "outright gift" is partially defined in s.626 ITTOIA; see 73.12 (Income tax planning for mixed marriage), but that definition does not apply here.

(ii) where the contribution condition ... is met, the property representing the consideration directly or indirectly provided.

In a contribution condition case, the relevant property is the property representing the consideration directly or indirectly provided. Since "provided" is a difficult concept,[36] this is also difficult.

If T gives money to A, who uses it to buy a house, the house represents the consideration provided.

What if T subscribes for shares in A Ltd which purchases the house. Is it the shares or the house which represent the property provided? It is suggested that the relevant property is the house, but the shares may be derived property: see below.

What if T lends money to A interest-free, who purchases a house? Is it the house or the benefit of the loan which represents the consideration provided? In this case HMRC accept that T does not provide the consideration so the contribution condition is not satisfied; but if it mattered, it is suggested that the relevant property is the house and the loan may be derived property.

In relation to the POA intangible property charge, "relevant property" has the meaning given in para 8 Sch 15 FA 2004 (in short, the settled property).[37]

76.15 Estate exemptions

76.15.1 *Full estate exemption*

Para 11(1) Sch 15 FA 2004 provides that the POA charges:

> do not apply to a person at a time when his estate for the purposes of IHTA includes—
>
> (a) the relevant property, or
>
> (b) other property—
>
> (i) which derives its value from the relevant property, and
>
> (ii) whose value, so far as attributable to the relevant property, is not substantially less than the value of the relevant property.

I refer to this as "**the estate exemption**" (or "the **full** estate exemption" if necessary to distinguish it from the partial exemption discussed below).

If T transfers funds to a trust under which T has an estate interest in

---

36 See 76.6 ("Provide").

37 See 76.8 (POA intangible property charge).

possession, the estate exemption will apply. Transfers after 2006 will not normally give rise to an estate IIP, so the exemption is of less importance to post-2006 trusts.

The IHT Manual provides:

> **IHTM44042 - Pre-owned assets: exemptions: examples where relevant property remains part of the Inheritance Tax estate** [March 2012]
>
> **Example** (Brian and Julie)
>
> In 2005, B transfers his house to an interest in possession trust with a life interest for himself and then for his wife, J, with remainders to his children. B continues to occupy the house. The disposal condition (IHTM44004) is met and none of the exclusions (IHTM44030) apply.
>
> The property continues to form part of B's estate under IHTA84/S5(1) and so is exempt from the POA charge under FA04/Sch15/Para11(1) whilst his interest in possession exists.
>
> Note that exemption still applies even though on B's death, the property is exempt from Inheritance Tax as the life interest passes to J. However, should the trustees bring B's life interest to an end during his lifetime, the charge under FA04/Sch15/Para3(2) will apply unless B ceases to occupy the property, another exemption applies or he becomes absolutely entitled to the property.
>
> If the trustees brought B's life interest to an end after 22 March 2006, he will be treated as making a PET under IHTA84/S52(1); but - assuming he continues to occupy the property - he will also be treated as reserving a benefit (IHTM14391) in the property in which his life interest ceased by virtue of FA86/S102ZA(2). Because B is treated as reserving a benefit in the property, he continues to be exempt from the POA charge, but under a different exemption (IHTM44044).
>
> **Example**
>
> If, in the example above, B had made the transfer in 2009, the position would have been quite different, as outlined below.
>
> The transfer into the trust is an immediately chargeable transfer (IHTM04067) and tax would be payable at 20% if the value transferred exceeded the nil-rate band. The trust will also be subject to the normal relevant property trust charges (IHTM42070). B's interest in possession is not part of his estate, so the exemption under FA04/Sch15/Para11(1) (IHTM44041) does not apply. The POA charge will therefore apply, unless B reserves a benefit in the property when a different exemption will apply.
>
> B has made a gift of land to the trust, so the provisions of FA86/S102A (IHTM14360) must be considered. If B has retained a significant right

or interest that entitles him to occupy the land, he will be treated as reserving a benefit in the property, FA86/S102A(2). Although the property does not form part of B's estate for Inheritance Tax purposes, his interest under the trust does entitle him to occupy the property and so he will be exempt from the POA charge under FA04/Sch15/Para11(5) (IHTM44044).

76.15.2 *Partial estate exemption*

Para 11(2) Sch 15 FA 2004 provides:

> Where the estate for the purposes of IHTA of a person to whom para 3, 6 or 8 applies includes property—
>
> (a) which derives its value from the relevant property, and
>
> (b) whose value, so far as attributable to the relevant property, is substantially less than the value of the relevant property,
>
> the appropriate rental value in para 4, the appropriate amount in para 7 or the chargeable amount in para 9 (as the case may be) is to be reduced by such proportion as is reasonable to take account of the inclusion of the property in his estate.

I refer to this as "**the partial estate exemption**".

The concluding words "such proportion as is reasonable to take into account of the inclusion of the property in his estate" are somewhat incoherent. One can speak of "a proportion of a property", but not "a proportion of an inclusion". Presumably it means: "such proportion as is reasonable to take into account of the property which is included in his estate".

76.16 Derived property

In the following discussion:

(1) "**Fully derived property**" is property falling within para 11(1)(b) Sch 15 FA 2004.[38] That is property:

(i) which derives its value from the relevant property, and

(ii) whose value, so far as attributable to the relevant property, is not substantially less than the value of the relevant property.

(2) "**Partly derived property**" is property falling within para 11(2) Sch 15 FA 2004. That is property:

(a) which derives its value from the relevant property, and

(b) whose value, so far as attributable to the relevant property, is

38 In para 11 Sch 15 FA 2004 this is simply called "derived property".

substantially less than the value of the relevant property.

Thus there are three steps to decide whether property is "derived property":

(1) Is its value derived from the relevant property (the house)? If so:
(2) Ascertain how far its value is attributable to the house.
(3) Is that value (the value attributable to the house) "substantially[39] less" than the value of the house?

76.16.1 *Derived property: Shares*

Suppose T subscribes for shares in a company which buys a house and has no other assets. The shares are fully derived property since:

(1) the shares derive their value from the house (the relevant property); and
(2) the value of the shares is attributable to the house; and
(3) that value is not substantially less than the value of the house.

Suppose the company owns a house and other assets. The context shows that the shares are still to be regarded as fully derived property since:

(1) they derive their value from the house;
(2) their value is to some extent attributable to the house;
(3) their value to that extent is not substantially less than the value of the house.

One might question whether it is the case that the shares derive their value from the house. They derive their value in part from the house and in part from other assets. However, the context shows that that satisfies the condition of para 11(1)(b)(i) Sch 15 FA 2004. Otherwise the condition in para 11(1)(b)(ii) Sch 15 FA 2004 is never satisfied.

Suppose the company owns only the house and is subject to a substantial debt. The shares are not fully derived property as their value is substantially less than the house. The shares are partly derived property.

Suppose the company owns the house and other assets, and is subject to

---

39 "Substantially" is, obviously, not a precise word. The IHT Manual provides:

"44043. Property in a person's estate that derives its value from the relevant property [March 2012]

... You should normally regard the value of the derivative property as being 'substantially less' than that of the relevant property where the difference in value is more than 20%. Any case where you consider the exemption should apply (or not apply) in full and there is a reduction of more (or less) than 20% should be referred to Technical."

a debt. It is suggested that the shares are fully derived property so long as the amount of the debt is less than the value of the other assets.

The estate exemption applies so long as T retains the shares in T's estate. If T gifts half the shares to T's spouse the estate exemption ceases to apply and POA land charge is due (but with some relief under the partial estate exemption). HMRC agree. The IHT Manual provides:

> **44043 - Property in a person's estate that derives its value from the relevant property** [March 2012]
> *Example (Bruce)*
> B transfers his house to a company wholly owned by him. The value of the shares in the company which are included in B's estate is fully derived from the value of the house and so the exemption in FA04/Sch15/Para 11(1) applies.
> But if B gave the house to a company which was owned 25% by his civil partner then the value of the 75% shares he holds would be 'substantially less' than the value of the house, so although the POA charge would apply, the appropriate rental value should be reduced by a reasonable proportion, perhaps 75%, to reflect the value of the shares in B's estate.

76.16.2 *Derived property: Benefit of loan*

Suppose T lends interest-free to a company which purchases the house and has no other assets. Initially the loan is fully derived property as the shares have no value. The loan derives its value from the house as, if the loan is called in, it could only be paid by the company:

(1) selling the house and using the proceeds of sale, or
(2) borrowing on the strength of the house (in the sense that no lender would lend if the company did not hold the house) and repaying out of that loan.

Can HMRC argue that:

(1) the loan derives its value from the contractual undertaking that obliges the company to repay; and so
(2) the loan does not derive its value from the underlying property (the house).

Point (1) is correct but point (2) does not follow and is not correct. It is the existence of the house which gives value to the contractual obligation to repay.

If the value of the house increases substantially, the shares and loan (taken together) are fully derived property and taken separately they are partly-derived property.

Unfortunately HMRC may disagree. The CIOT Statement provides:

> 6.3 Clarification is requested on the position where a house is owned by a company but the company is funded by way of loan. The concern is over paras 11(1)(b) and 11(3)(b).
>
> **Example 9**
>
> [1] B owns 100 £1 shares in X Limited and otherwise funds it by shareholder loan.
>
> [2] (Or the house is owned by a company held within an interest in possession trust for B and again the funding for the purchase comes by way of loan from trustees to company.)
>
> X Limited buys the house in which B lives. B *prima facie* falls within the para 3 charge.

In fact HMRC accept that case [1] does not fall within the POA land charge because the interest free loan is not providing consideration.[40] The CIOT Statement continues:

> It would appear that para 11(1) protects him. The shares are not themselves property which derive much value from the house because they are worth substantially less than the house (see para 11(1)(b)(ii)) but the shares and the loan together are comprised in B's estate and between them indirectly derive their value from the house. On that basis para 11(1) does offer full protection.
>
> **Question 33**
>
> Do HMRC agree with this analysis or do they consider that the loan derives its value from the contractual undertakings that oblige the borrowing company to repay?
>
> It would be odd if there is a POA problem when the company is funded by way of loan but not if it is funded by way of share capital.
>
> *HMRC*
>
> In our view, the loan, albeit an asset of B's estate, is not property that derives its value from the relevant property. However, our response to Q32 above[41] would no doubt be applicable here in appropriate circumstances.

This is plainly wrong and I would be surprised if HMRC try to defend it if challenged.[42] It is also inconsistent with GAAR guidance.[43]

---

40 See 76.6 ("Provide").

41 See 76.6 ("Provide").

42 But one could avoid the issue by avoiding loans, eg subscribe for redeemable shares, which are commercially equivalent to loans.

43 See 65.23.2 (The GAAR: borrowing set against UK property).

The position is more complicated if T lends to a company which purchases the house and has other assets. Suppose, for example, the company's assets and liabilities consist of a house worth £1m, investments of £1m, and a debt of £1m. It is still plainly the case that the benefit of the debt and the shares taken together are fully derived property. It is suggested that if the debt is charged on the house it derives its value from the house, and if it is not charged then it does not do so (but the shares do derive their value from the house).

What if T lends to a trust which purchases a house? If the loan is on limited recourse terms[44] the loan is fully derived property. It is suggested that the same applies even if the trustees are personally liable for the loan.

76.16.3 *Derived property: Equitable interests*

If T transfers property to a trust for A for life, remainder to T, T has a reversionary interest which is derived property. The interest is part of T's estate so the full (or partial) estate exemptions apply (depending on whether the value of the reversionary interest is equal to 80% or more of the value of the trust fund).

It T transfers property to a trust for T for life, remainder to A, T's life interest is derived property but it does not form part of T's estate (after 2006) so the estate exemption does not apply.

76.17 Excluded liability rule

Para 11(6) Sch 15 FA 2004 provides a restriction on the estate exemptions:

> Where at any time the value of a person's estate for the purposes of IHTA is reduced by an excluded liability affecting any property...

I call this "**the excluded liability rule**". The effect of the rule if it applies is:

> ... that property is not to be treated for the purposes of sub-para (1) or (2) as comprised in his estate except to the extent that the value of the property exceeds the amount of the excluded liability.

The excluded liability rule only applies for the purposes of the estate and

---

44 ie the trustees' liability to repay is restricted to the trust assets or their value.

partial estate exemptions. The question of to what extent debts may limit the GWR exemption is discussed at 63.18 (GWR property subject to debt).

76.17.1 *"Excluded liability"*

The term "excluded liability" is defined in para 11(7) Sch 15 FA 2004:

> For the purposes of sub-para (6) a liability is an excluded liability if—
> (a) the creation of the liability, and
> (b) any transaction
> [i] by virtue of which the person's estate came to include
> [A] the relevant property or
> [B] property which derives its value from the relevant property or
> [ii] by virtue of which the value of property in his estate came to be derived from the relevant property,
> were associated operations, as defined by section 268 of IHTA.

This is odd because the liability within (a) must relate to the acquisition of the property (within (b) so it appears at first sight that every liability is an excluded liability within this definition. It is suggested that a liability is an excluded liability only if the creation of the liability and the acquisition of the property form part of a single scheme or arrangement.[45]

76.17.2 *"Affecting" property*

The rule only applies to a liability which "affects" property. It is suggested that a liability of an individual or company does not affect property of the individual or company unless secured on that property. A liability of a company does not affect the shares of the company (even if it may reduce their value). A liability of a trust does affect the trust property since the trustees have a lien over the trust fund to meet the liability.

76.18 Value of estate "reduced" by liability

The excluded liability rule only applies if the value of a person's estate is "reduced" by the liability. In what circumstances does a liability reduce the value of an estate? Plainly it does not do so if it is disallowed for IHT.[46]

---

45 See *Reynaud v IRC* [1999] STC (SCD) 185.

46 See 65.2.3 (Disallowed debts).

76.18.1 *Trustees borrow from trust company*

Suppose:
(1) T is the life tenant of an estate IIP trust.
(2) The trustees borrow from a company held by the trust and purchase land occupied by T.

It is considered that the debt does not reduce the life tenant's estate since the benefit of the debt increases the value of the company's shares: the two cancel each other out. So the debt is not an excluded liability. (In addition, if T is the settlor, the GWR exemption will usually apply.)

76.18.2 *Bank borrowing*

Suppose:
(1) T is the life tenant of an estate IIP trust.
(2) The trustees borrow from a bank or third party, and purchase land occupied by T.

It is considered that T's estate is not "reduced" by the liability, since T's estate is not reduced by the transaction: the liability is matched by the receipt of the borrowed money.[47]

Otherwise the excluded liability rule would apply whenever anyone borrows on the security of T's house, which would be absurd.

The CIOT Statement provides:

> 2.5 A common scenario (both for foreign and UK domiciliaries) is where cash is settled into an interest in possession trust for the donor life tenant. The trustees then buy a house for the donor to live in using the gifted cash plus third party barrowings. Although not a home loan scheme, the legislation appears to affect such arrangements.
>
> **Example 4**
>
> E settles cash of £200,000 into an interest in possession trust for himself in 2003. The trustees purchase a property worth £500,000, borrowing £300,000 from a bank. There are other assets in the trust which can fund the interest but the borrowing is secured on the house which E then occupies.
>
> In these circumstances, one would not expect a POA charge. There is no inheritance tax scheme since the property is part of E's estate and the borrowing is not internal. One would argue that E's estate still includes

47 Admittedly s.162(5) IHTA applies and uses the word "reduced" in connection with the same liability. But the question is not whether the value of an *asset* is reduced, but whether the value of the *estate* is reduced.

the house and therefore protection is available under para 11(1). The difficulty is that on one view the loan is an excluded liability within para 11(7) reducing E's estate, albeit it is a loan on commercial terms with a bank.

We would argue that the relevant property for the purposes of para 11 is simply the value of the property net of the commercial borrowing. As this is part of E's estate there is no POA charge.

Question 13

Is the above analysis correct?

HMRC

We agree with your analysis in para 2.5.

It is correct that one would not expect a POA charge, as there is no IHT saving. However, what is the correct analysis of the provisions in this situation? It is wrong to say that the *property* for the purposes of para 11 Sch 15 FA 2004 is its *value* net of the liability, because that confuses two different things: property and the value of property. It is also wrong to say that the asset for the purposes of para 11 Sch 15 FA 2004 is the asset net of the liability; if one said that, the legislation would not work at all. The solution is to say that the liability does not reduce the estate of the individual, E, because E's estate is increased by the proceeds of the loan (as well as being reduced by the liability; the two cancel each other out). So the loan is not an excluded liability.

76.18.3 *Company borrows from individual*

Suppose:

(1) T lends to a company (owned by T).

(2) The company purchases a property occupied by T.

The liability is an excluded liability as defined, but so long as T retains the benefit of the debt the excluded liability rule does not apply because the debt does not reduce T's estate. What if T gives away the debt? The excluded liability rule does not apply unless the debt is secured because the debt does not affect the property.

76.18.4 *Home loan schemes*

The excluded liability rule was intended to catch home loan schemes. Suppose:

(1) T sells T's home to a trust under which T has an interest in possession in return for a debt.

At this point the excluded liability rule does not apply. The liability is an

excluded liability as defined.[48] However, the benefit of the debt is in T's estate. It is considered that the value of T's estate is not "reduced" by the liability.

(2) T gives the benefit of the debt to T's children or to a trust for their benefit.

Is the value of T's estate is now reduced by the liability? One can argue that it is reduced by the gift of the debt, not by the liability. But a purposive construction suggests that this cannot be right.

The provision works as intended.

The IHT Manual provides:

> **IHTM44051 - Pre-owned assets: exemptions: relevant property remains part of the Inheritance Tax estate: excluded liabilities** [March 2012]
>
> ...
>
> **Example**
>
> Duncan sets up a home loan scheme in 2004 where the property is sold to the trust for £500,000. In April 2005, the property is worth £650,000 and the amount of the loan, together with interest accrued at the same date is £550,000. Exemption under FA04/Sch15/Para11(5)(a) applies to the excess of £100,000 and the proportion of the annual rental value that is referable to £550,000 is subject to the POA charge. If the annual rental value was £20,000, the POA charge is 20,000 × (550,000 ÷ 650,000) = £16,923
>
> At the next revaluation date (IHTM44011), the loan should be quantified at that time, taking into account the interest/indexation that has accrued to that date and adding it to the amount of the loan. In the event that part of the loan has been repaid (this is unlikely with a home loan scheme), the reduced amount of the loan - plus accrued interest/indexation - may be taken into account when it occurs and the POA liability recalculated for the tax year in question and subsequently.
>
> It is possible that the property concerned may be sold, some of the proceeds reinvested in a smaller replacement property and the balance retained in the trust as intangibles. This then raises the question of how the loan, which is a general debt of the trust, should be treated. For the sake of simplicity, you should apportion the amount of the loan, at the date the trust assets change, between the two categories of asset and then work out the POA charges in the normal way - although it may now be

48 The transaction by which the person's estate included the house was its purchase not the sale to the trust. The creation of the liability is an associated operation because it affects the same property even if the purchase was many years earlier.

the case, with a smaller property and smaller annual rental that the amount of the POA charge is below the de minimis limit (IHTM44056).

76.19 GWR exemptions

76.19.1 *Full GWR exemption*

Para 11(3) Sch 15 FA 2004 provides:

> (3) Paras 3, 6 and 8 do not apply to a person at a time when—
> (a) the relevant property, or
> (b) any other property—
> (i) which derives its value from the relevant property, and
> (ii) whose value, so far as attributable to the relevant property, is not substantially less than the value of the relevant property,
> falls within sub-para (5) in relation to him.
> ...

The main sub-para (5) case is GWR property. Para 11(5) Sch 15 FA 2004 provides:

> Property falls within this sub-paragraph in relation to a person at a time when it—
> (a) would fall to be treated by virtue of any provision of Part 5 of the 1986 Act (inheritance tax) as property which in relation to him is property subject to a reservation,

In short, the POA charges do not apply to property subject to a reservation. ("**GWR property**"). I refer to this as "**the full GWR exemption**".

Thus in this context it is in the taxpayer's interest to argue that property *is* GWR property, and HMRC's interest is to argue that it is not! The question of whether property is GWR property (subject to a reservation) is considered at 63.4 (Terminology).

Note that property may be GWR property even though it is excluded property. Suppose:

(1) T transfers funds to a discretionary trust under which T is a beneficiary (a GWR).[49]
(2) The trustees lend the funds to a company which purchases a house occupied by T.

The shares and the benefit of the loan are derived property, and are subject

49 The position is the same for a non-estate IIP trust if T is the object of a wide power of appointment (so there is a GWR).

to a reservation. This is so even if they are excluded property. So the GWR exemption applies.

A complication arises if T becomes UK domiciled: see 76.25 (Former foreign domiciliary).

The other sub-para (5) cases are which would be GWR property but for one of nine sets of exemptions. Para 11(5) Sch 15 FA 2004 provides:

> Property falls within this sub-paragraph in relation to a person at a time when it ...
>
> (b) would fall to be so treated but for any of paras (d) to (i) of subsection (5) of section 102 of the 1986 Act (certain cases where disposal by way of gift is an exempt transfer for purposes of inheritance tax),
>
> (c) would fall to be so treated but for subsection (4) of section 102B of the 1986 Act (gifts with reservation: share of interest in land), or would have fallen to be so treated but for that subsection if the disposal by way of gift of an undivided share of an interest in land had been made on or after 9 March 1999, or
>
> (d) would fall to be so treated but for section 102C(3) of, and para 6 of Schedule 20 to, the 1986 Act (exclusion of benefit).

76.19.2 *Partial GWR exemption*

Para 11(4) Sch 15 FA 2004 provides:

> Where any property which falls within sub-para (5) in relation to a person includes property—
>
> (a) which derives its value from the relevant property, and
>
> (b) whose value, so far as attributable to the relevant property, is substantially less than the value of the relevant property,
>
> the appropriate rental value in para 4, the appropriate amount in para 7 or the chargeable amount in para 9 (as the case may be) is to be reduced by such proportion as is reasonable to take account of that fact.

I refer to this as the "**partial GWR exemption**". It is the equivalent of the partial estate exemption discussed above (except that the words at the end of the subsection are grammatical).

76.19.3 *Tracing rules*

For this purpose para 11(8) Sch 15 FA 2004 tinkers with the GWR tracing rules:

> In determining whether any property falls within sub-para (5)(b), (c) or

(d) in a case where the contribution condition in para 3(3) or 6(3) is met, para 2(2)(b) of Schedule 20 [FA 1986] (exclusion of gifts of money) is to be disregarded.

See 63.20.2 (Property received in substitution for gifted property). This extends the GWR tracing rules and so extends the scope of the POA GWR exemption.

The IHT Manual provides:

IHTM44049 - Pre-owned assets: exemptions: cash gifts and exclusion of reservation of benefit provisions [March 2012]
Example (Andrew)
A gives his daughter £150,000 in 2006. In 2008, they decide to buy a property together worth £300,000. The contribution condition (IHTM44005) will be met and A has not made a gift with reservation as the gift was of cash. A has not made a gift of an undivided share of land, so the exemption at IHTM44047 does not apply. So on the face of it, A is subject to the POA charge.
However, the effect of FA04/Sch15/Para 11(8) is to allow the normal tracing rules that apply to substitutions for the reservation of benefit provisions to apply. Therefore the property the donee acquired with cash is treated as being comprised in the original gift. So, as the original gift is treated as a gift of an undivided share of land, the exemption from the POA charge for such gifts (IHTM44047) does apply.
One consequence of this will be that if the donee ceases to occupy the property, the exemption from the POA charge will cease.
If the daughter had purchased the property in her own name and A had given his daughter the money before 6 April 1998, or if he had not moved into the property within 7 years of the gift being made, the exclusion for outright gifts of money (IHTM44036) will apply.

76.20 Reverter to settlor restriction

76.20.1 *The purpose of the rule*

Para 11(11)(12) Sch 15 FA 2004 set out a restriction to the estate and GWR exemptions which I call the "**reverter to settlor restriction**". It is helpful first to explain the problem which the reverter to settlor restriction is intended to address.

EN FB 2006 explains:

17. [The POA] income tax charge was designed to discourage disposals done in a contrived way to avoid IHT. The income tax charge does not therefore apply

> [a] when the original owner has the property back in their estate for IHT purposes (para 11(1) Schedule 15 – for example, because it has been given back to them), or
> [b] when it is treated as back in their estate (para 11(5) – for example, because the original transaction is caught by the IHT "gift with reservation" rules).

This explanation of the estate exemption is correct.

The explanation of the GWR exemption is in essence correct, though strictly speaking, GWR property is not in the individual's estate; it is however taxed as though it is. I stress this point as it will be relevant in the discussion below.

The EN continues:

> 18. There is a mismatch between this relief and an existing IHT exemption for the settled property in "reverter-to-settlor" trusts. The property in such a trust is treated as part of the trust beneficiary's [ie life tenant's] estate for IHT purposes, but it is not actually charged when their interest ends.
> 19. In particular, section 54(1) IHTA provides that, when a person who is beneficially entitled to an interest in possession in settled property dies while the settlor is still living, and the property reverts to the settlor, its value is left out of account in determining the value of the person's estate. [The EN summarises ss.53 and 54 IHTA and continues:]
> 20. This can be used to side-step both IHT and the pre-owned asset income tax charge. For example:
> • B owns an asset, say a house, which he wants to carry on using. B gives it to S, who would otherwise inherit on B's death;
> • S then settles an interest in possession in the house back on B for life, with the condition that it reverts to S on B's death [ie S settles the property on B for life with remainder to S];[50]
> • for IHT purposes, B is therefore treated as owning the house by virtue of section 49 IHTA and so para 11(1) Schedule 15 disapplies the "pre-owned asset" charge;
> • however, although the house is part of B's estate for IHT purposes, there is no IHT charge on B's death by virtue of the exemption in section 54(1) IHTA.

Avoidance of this kind was in fact quite common between 2004 and 2006, and clearly something had to be done.

---

50 Author's Note: This is not generally possible after 2006.

> 21. This clause is aimed at blocking such avoidance by ensuring that the income tax exemption [POA estate and GWR exemptions] does not apply where the property in question (or any derived property) is back in the chargeable person's estate for IHT purposes by virtue of their being beneficially entitled to an interest in possession in it.
> 22. However, the clause also provides that, if the chargeable person does not wish to be subject to the income tax charge, they can elect (like other former owners otherwise liable to the "pre-owned asset" charge) that the property should fall back into their estate for IHT purposes. Thus the clause ensures an effective IHT charge in these circumstances by providing that the [reverter to settlor] exemptions in sections 53(3), 53(4) and 54 IHTA will not apply.

76.20.2 *The reverter to settlor restriction*

Para 11(11) Sch 15 FA 2004 sets out the circumstances in which the reverter to settlor restriction applies:

> (11) Sub-para (12) applies where at any time—
> [i] (a) the relevant property has ceased to be comprised in a person's estate ... , or
> (b) he has directly or indirectly provided any consideration for the acquisition of the relevant property,
> and
> [ii] at any subsequent time the relevant property or any derived[51] property is comprised in his estate ... as a result of section 49(1) IHTA.

In these circumstances, para 11(12) Sch 15 FA 2004 disapplies the estate exemptions and the GWR exemptions:

> (12) Where this sub-paragraph applies, the relevant property and any derived property—
> (a) are not to be treated for the purposes of sub-paras (1) and (2) as comprised in his estate at that subsequent time, and
> (b) are not to be treated as falling within sub-para (5) in relation to him at that subsequent time.

76.20.3 *IIP Trust for settlor from outset*

The condition in para 11[i](b) is a paraphrase of the contribution

---

51 Para 11(13) Sch 15 FA 2004 defines "derived property" in terms which repeat the wording of para 11(1)(b) Sch 15 FA 2004 verbatim.

condition. At first sight, wherever the contribution condition applies, the estate exemption is disapplied. For instance, suppose:
(1) T transfers cash to an estate IIP trust; and
(2) the trustees acquire a UK residence.
The condition in para 11(12)[i](b) is met. At first sight the condition in para 11(12)[ii]) is also met: one might think that at *any subsequent time ... derived property is comprised in his estate ... as a result of section 49(1) IHTA.* So the reverter to settlor restriction applies (even though the reverter to settlor exemption does not apply). So it appears that the POA charge applies. But HMRC do not agree. They say that the condition in para 11(12)[ii] is not met. Published correspondence between STEP and HMRC provides:

> **STEP letter**
> Are the following cases caught by POAT ...
> 1. In 1987, A sets up an interest in possession trust for himself into which he gifts his house. If the house is still held by the trustees now there is no POAT charge because nothing has left his estate.

More accurately, there is no POAT charge as the conditions of para 11(11) are not satisfied.

> However assume that the house has since been sold but he retains an interest in possession. The trust holds a mixture of investments and another house that A occupies. Is para 11(11)(b) satisfied on the basis that A has provided consideration for the acquisition of the land which land has subsequently become comprised in his estate. ...
> 3. In June 2006, C, a disabled person, sets up a trust for himself that qualifies as a disabled person's interest within s89B IHTA. C puts in cash and the trustees invest in equities or a house that C occupies. C will pay POAT. ...

These two examples raise the same point: they are both estate IIP trusts (though after 2006 a trust of that kind can only be made for a disabled beneficiary). But HMRC say that the reverter to settlor restriction does not apply, as the condition in para 11(11)[ii] is not met. That provides:

> [ii] at any subsequent time the relevant property or any derived property is comprised in his estate ... as a result of section 49(1) IHTA.

The HMRC response is as follows:

> As I understand your concern, it is that the new para 11(11)(b) in

Schedule 15 FA 2004 will catch someone who has settled, say, cash on interest in possession trusts for themselves (either before 22 March 2006, or afterwards if it is a "disabled person's interest") and subsequently occupies property bought by the trustees; or where the property they settled initially has been sold and replaced by other property, while the settlor has retained their interest in possession.

... In our view, the words "at any subsequent time" should be read as meaning that a POA charge will arise where

[1] the consideration leaves the donor's estate, as a result of which that estate is reduced, and

[2] later property acquired with such consideration becomes comprised in it again because of their interest in possession. This is consistent with the reasons for Schedule 15.

We do not, therefore, consider that there will be a charge in the scenarios numbered 1 and 3 in your letters, because the assets transferred into trust and any derived assets have always been in the settlor's estate for IHT purposes. We believe that also applies if, in your second scenario,[52] B set up an interest in possession trust from the outset before Budget Day [2006]. The taxpayer should self-assess on the basis that no POAT is due and there is therefore no need to put anything about POAT on the tax return or for him to make the election where the settlor has retained an interest in possession throughout and settled the cash or property directly into trust himself (rather than through any other funding vehicle such as another trust). This is because no POAT charge arises under s80 FA 2006 [which inserted para 11(11) -(13) Sch 15 FA 2004].

In summary we do not consider that s.80 FA 2006 has any implications for:

- a settlement of cash on interest in possession trusts for onself made before 22 March 2006, or made by a disabled person on or after that date, after which the trustees purchase a property in which the settlor resides; or
- the settlement of a house in the same way, which is subsequently sold by the trustees and replaced by other investments or another property.

That remains our view, on the basis that the words "at any subsequent time" mean that new para 11(11)(b) Schedule 15 FA 2004 will only be relevant where:

- the consideration in question leaves the donor's estate, as a result of which that estate is reduced; and
- later, property acquired with such consideration becomes comprised in the estate once more by virtue of an interest in possession.

---

52 See 76.20.4 (Discretionary trust subsequently becomes IIP trust for settlor).

> We do not agree that this interpretation makes para 11(11)(a) redundant,[53] since that relates to cases where the disposal condition is met and para 11(11)(b) to cases where the contribution condition is met.

This is a purposive construction, but taxpayers will not object.

76.20.4 *Discretionary trust subsequently becomes IIP trust for settlor*

The STEP letter sets out one other example:

> Are the following cases caught by POAT ...
> 2. B is a foreign domiciliary who before 22 March 2006 set up a discretionary trust into which he transferred cash. He remains a beneficiary of the trust. The trust then funds a company which buys a house or possibly holds UK investments (and B will pay income tax under [s720 ITA] in respect of any UK income). The trust was before 22 March 2006 converted into an interest in possession trust. If there are any UK intangibles or UK property occupied by A which are held by the trustees within the interest in possession structure he is now subject to POAT. Even if one reads "subsequent time" to mean some time must elapse between the date when the gift is made and the date the property comes back into B's estate this would still not protect B in this example because the trust was originally discretionary.

HMRC comment on this:

> We accept that a POA charge may arise where someone set up a discretionary trust that has subsequently been converted into an interest in possession trust for the benefit of the settlor. (Scenario 2 in your example). However, it remains possible in those circumstances to elect

---

53 This paragraph addresses a point made in the STEP letter in these words: "The potential difficulty with paras 11(11) and 11(12) is that they do not distinguish between reverter to settlor trusts and any trust set up between March 1986 and 22 March 2006 where the settlor has a qualifying interest in possession and would in that event be subject to inheritance tax on his death.
These difficulties arise because paras 11(11) and 11(12) catch not only those transactions where land has been given away and ceased to be comprised in the settlor's estate and then comes back into his estate (condition a above). They also catch transactions where a settlor contributed funds or property to a trust and the trust (or an underlying company) has then used those funds or property representing them to buy the relevant property i.e. the land now occupied (condition b above). There is nothing in the words about "any subsequent time" which suggests that under (b) the property had first to cease to be comprised in his estate before being caught by this provision. Indeed if that was the case the words in (a) would be redundant."

out of the charge. So, take the following example:[54]

- H settles a property on discretionary trusts before 22 March 2006;
- also before that date, the trust is converted into an interest in possession trust for H's benefit, with remainder to his wife, W;
- A POA charge therefore arises because of s.80 FA 2006 but H elects.

As we see it, the effects of the election are:

- the chargeable proportion of the property will be treated as subject to a reservation, but only so far as H is not beneficially entitled to an interest in possession in the property (*para 21(2)(b)(i), Schedule 15 FA 2004*) – i.e. not at all;
- section 102(3) and (4) FA 1986 will apply, but only so far as H is not beneficially entitled to an interest in possession in the property (*para 21(2)(b)(ii)*) – i.e. not at all; and
- the reverter-to-settlor exemptions in s.53(3) and (4) and s.54 IHTA will not apply to the actual interest in possession (*para 21(2)(b)(iii)*).

We do not, therefore, consider that the election affects the availability of spouse exemption on H's interest in possession on his death – or on its termination during his lifetime. That is because, as we have just noted, the election will not cause s.102(3) and (4) FA 86 to apply because of H's interest in possession, so there will be no deemed PET.

It is absurd to expect taxpayers to make an election in this case. It is considered that the condition in para 11(12)[ii] is not satisfied, just as it is not satisfied in STEP examples 1 and 3. The property is in the estate of the settlor as soon as the settlement was made. (The settlor did not have an interest in possession, but it is property subject to a reservation, and one may (loosely) regard such property as being in the estate of an individual. That was the view of the drafter of the provisions.[55]) The statutory words *at any subsequent time the relevant property or any derived property is comprised in his estate* require that the property becomes comprised in the individual's estate by means of a disposition other than the original transfer to the trust by the individual.

In short, the reverter to settlor restriction can and should be construed purposively, so it only applies in cases where the reverter to settlor restriction is actually in point, because that, unquestionably, was the intention when it was enacted.

The IHT Manual provides:

---

54 [Author's footnote] The HMRC reply simplifies the facts of STEP example 2 by omitting the company: that allows HMRC to ignore various additional complications.

55 See 76.20.1 (The purpose of the rule).

> **IHTM44050 - Pre-owned assets: exemptions: relevant property remains part of the Inheritance Tax estate: restriction for subsequent ownership** [March 2012]
> ...
> **Example** (Abel and Eve)
> In 1990 A gave his widowed mother E the money so that she could buy her council house. E died in 2005 leaving her house in trust to A for life with remainder to her grandson. A lives in the house as life tenant, so does not pay any rent. Despite the house being treated as part of A's estate, A is not exempt under FA04/Sch15/Para11(1) - unless the de minimis (IHTM44056) applies.
> **Example** (Adam)
> A settled a holiday cottage in trust in 2000 giving his wife an interest in possession only while they are married, with a defeasible life interest for himself thereafter and remainders on discretionary trust for his children. He shares the occupation of the cottage with his wife. The initial transfer is an excluded transaction (IHTM44032) and also exempt from reservation of benefit (IHTM14318).
> In May 2008 they divorce and A's former wife's interest ends. The initial exclusion comes to an end, but A's subsequent qualifying life interest (a TSI under IHTA/S49C (IHTM16061)) is not exempt under FA04/Sch15/Para11(1).

76.21 Full consideration exemption

Para 11(5)(d) Sch 15 FA 2004 provides a POA exemption where (in my paraphrase) the relevant property or derived property:

> would fall to be treated as property subject to a reservation but for s.102C(3) and Schedule 20 para 6 FA 1986.

There is a set of exemptions here:[56]

(1) Where the GWR rule would apply but for s.102C(3) FA 1986(this section is not discussed here.

(2) Where the GWR rule would apply but for para 6 Sch. 20 FA 1986.

Para 6(1) Sch 20 FA 1986 provides two exemptions to the GWR rule. The first is:

---

56 Another possible reading is that the exemption only applies if s.102C(3) and Sch 20 para 6 both apply, ie it is not enough that Sch 20 para 6 applies if s.102C(3) does not. But a close reading of s.102C shows that s.102C(3) and para 6 Sch 15 FA 2004 are alternatives. They cannot both apply. *Hansard* confirms this (if it were necessary): HC 7 July 2004 col.881, 900.

> In determining whether any property which is disposed of by way of gift is enjoyed to the entire exclusion, or virtually to the entire exclusion, of the donor and of any benefit to him by contract or otherwise—
>
> (a) in the case of property which is an interest in land or a chattel, retention or assumption by the donor of actual occupation of the land or actual enjoyment of an incorporeal right over the land, or actual possession of the chattel shall be disregarded if it is for full consideration in money or money's worth ...

I call this the "**full consideration exemption**". This is particularly important in relation to chattels because full consideration would be much less than the deemed income charge. As to the meaning of "full consideration" see 63.7 (Full consideration exemption).

The full consideration exemption only applies if there would otherwise be a GWR. If an individual has carried out an *Eversden* scheme, they will not qualify for the full consideration exemption even if they pay full consideration for use of the land (though the rent paid will reduce the quantum of the POA charge).

The second exemption in para 6(1)(b) Sch 20 is less likely to be important in practice.

76.22 Partnerships

The guidance formerly published on the HMRC website provided:

> The treatment of a share of a partnership interest for Schedule 15 purposes follows that applied for IHT purposes. In other words, we do not regard the partnership interest as transparent, and the disposal of a share is unlikely to give rise to a Schedule 15 charge in any circumstances.

This is not a view which bears much examination. If a partnership holds land, a partnership interest is an interest in land, and a disposal of that interest meets the disposal condition.[57] But the legislation was not intended to catch partnerships and HMRC avoid the problem by informal concession dressed up as a statement of practice. The passage is not in the

---

57 Contrast the original HMRC guidance (so called "Technical Guidance" 2004) which took the correct (if worrying) line that the POA rules in principle apply "if C, an existing partner, brings his son D into partnership"; see the 6th edition of this work, para 43.10.1.

IHT Manual but HMRC practice may not have changed.

76.23 Non-resident taxpayer

Para 12(1) Sch 15 FA 2004 provides:

> This Schedule does not apply in relation to any person for any year of assessment during which he is not resident in the UK.

This is straightforward.

76.24 UK resident foreign domiciliary

Para 12(2) Sch 15 FA 2004 provides:

> Where in any year of assessment a person is resident in the UK but is domiciled[58] outside the UK, this Schedule does not apply to him unless the property falling within para 3(1)(a), 6(1)(a) or 8(1)(c) is situated in the UK.

This provides three exemptions:

(1) exemption to POA land charge where T occupies non-UK situate land;
(2) exemption to POA chattel charge where T uses non-UK situate chattels; or
(3) exemption to POA intangible property charge where intangible property is not UK situate.[59]

Para 12 Sch 15 FA 2004 does not provide exemption where T transfers assets to a non-UK company which holds UK land occupied by T. But the GWR or estate exemption will usually apply.

76.25 Former foreign domiciliary

Para 12(3) Sch 15 FA 2004 provides:

> In the application of this Schedule to a person who was at any time domiciled[60] outside the UK, no regard is to be had to any property which is for the purposes of IHTA excluded property in relation to

---

58 "Domiciled" is defined in para 12(4) Sch 15 FA 2004:
" For the purposes of this paragraph, a person is to be treated as domiciled in the UK at any time only if he would be so treated for the purposes of IHTA."

59 The exemption (anomalously) does not apply to exempt gilts and AUTs or OEICs which may be excluded property but which are UK situate.

60 See above footnote for definition of "domiciled".

him[61] by virtue of section 48(3)(a) of that Act.[62]

The words "was at any time domiciled outside the UK" refer to a person who was formerly foreign domiciled but who has become UK domiciled. The words do not refer to a person who was and remains foreign domiciled. (The words in isolation could, taken literally, apply in such a case, but the word *was* in para 12(3) Sch 15 FA 2004 is to be contrasted with *is* in para 12(2) Sch 15 FA 2004.)

Suppose:

(1) T (not UK domiciled) creates a discretionary trust of which T is a beneficiary;

(2) The trust holds:
   (a) Non-UK investments.
   (b) A company holding UK property occupied by T.

At this point, the conditions for the POA intangible property charge and the POA land charge are satisfied but the GWR exemption provides relief in both cases.

(3) Suppose T becomes IHT deemed domiciled (or actually UK domiciled).

At first sight T ceases to enjoy the benefit of the GWR and estate exemptions as the trust property is excluded property, so "no regard" is to be had to it.

(1) In relation to the investments, there is still no POA intangible property charge, since the investments are excluded property, so no regard is to be had to them either.

(2) However, the land is not excluded property, so the POA land charge seems to apply.[63] This was certainly not foreseen at the time the legislation was passed. It is suggested that para 12(3) Sch 15 FA 2004 is, like a deeming provision, to be construed to have effect so far as intended but it was not intended to disapply the GWR and estate exemptions. The modern purposive approach to construction

---

61 The words "in relation to him" are misconceived. Property is excluded property or not excluded; but it cannot be excluded property "in relation to" any particular beneficiary. It is considered that these words should simply be disregarded.

62 The exemption (anomalously) does not apply to exempt gilts and AUTs or OEICs which may be excluded property, but not under s.48(3)(a) IHTA.

63 A further tax charge would arise if (as some have argued) T is also caught by the GWR rules on his death; see 63.14 (GWR death charge: excluded property rules for settled property).

of tax statutes may on this occasion assist the taxpayer. The 17 March 1986 POA start date supports this view. That date shows that the object of the rules is to prevent GWR avoidance, not other kinds of IHT mitigation.

HMRC agree. The CIOT Statement provides at para 7:

> Para 12(3) states that no regard is to be had to excluded property. In a case where a trust settled by a foreign domiciliary owns a UK house through a foreign registered company the shares in the company (and any loan to the company) are excluded property. Concern has been expressed that since para 12(3) says that no regard is to be had to these assets, this in turn means that the shares and loan have to be ignored in applying para 11 and in particular cannot be taken into account in determining whether there is derived property which is in the taxpayer's estate or GWR property in relation to him (which the shares and loans otherwise are). We think that this argument is misconceived but it has been advanced.
>
> **Question 42**
>
> Can HMRC confirm that they agree para 12(3) does not operate in this way and that para 11 can still work to protect the UK house or underlying assets owned by the offshore company in these circumstances?
>
> *HMRC*
>
> We agree with what you say in para 7.1 about the interaction between paras 12(3) and 11.

The guidance formerly published on the HMRC website provided at 4.1:

> Para 12(3) of the schedule provides that if any property situated outside the UK became comprised in a settlement when the person settling the property was domiciled outside the UK it will not be subject to the charge. Even if that person becomes domiciled in the UK at a later date this property will remain excluded from the charge.
>
> Para 12(3) provides that a charge under this Schedule shall not arise in relation to property regarded as excluded by virtue of section 48(3) IHTA'84. We do not regard this provision as having an impact on para 11 in determining whether there is derived property in the taxpayer's estate, or GWR property in relation to him (see foreign domiciliary example in appendix).

The passage is not in the present IHT Manual, but HMRC practice may not have changed.

The IHT Manual provides:

IHTM44054 - Pre-owned assets: exemptions: foreign element - foreign domiciliaries [March 2012]

Example (Gregor)
G, who is non-UK domiciled but resident in the UK, gives his French house to an offshore company which is 100% owned by him and continues to live there. This is a disposal of land, but there is no POA charge because of the exemption under FA04/Sch15/Para12(2). However G owns the company shares that derive their value from the house, so he is also exempt under FA04/Sch15/Para11(1). If, after a period of time, G becomes deemed domiciled in the UK, this exemption under FA04/Sch15 /Para12(2) will be lost. However, exemption under FA04/Sch15/Para11(1) (IHTM44041) is still available as G's estate includes property (the company shares) which derives its value from the relevant property.
If G had given his UK house to the offshore company and continued to live there, a POA charge potentially arises. The exemption under FA04/Sch15/Para12(2) does not apply because the property is situated in the UK. However, exemption under FA04/Sch15/Para11(1) is still available as G's estate includes property (the company shares) which derives its value from the relevant property.
Note that in the second scenario above, the exemption still applies even though should G die non-UK domiciled the property will not be liable to Inheritance Tax because the shares in the offshore company will be excluded property (IHTM04260).

IHTM44055 - Pre-owned assets: exemptions: foreign element - foreign domiciliaries: settled property exemption [March 2012]
Where a person who is domiciled outside the UK creates a settlement that contains overseas property, that settlement is an excluded property settlement for Inheritance Tax purposes (IHTM27220). No regard is to be had to any such property for the purposes of the POA charge, FA04/Sch15/Para12(3). This provision provides an exemption for individuals who subsequently become domiciled in the UK and continue to benefit from the settled property and who would therefore no longer be able to rely on the foreign domiciliary exemption (IHTM44054).
If, having become domiciled in the UK the person adds property, wherever it may be situated, to the settlement, the added property may be subject to the POA charge in the normal way. If available, the exemptions and exclusions would apply as they would for any person domiciled in the UK.
The definition for excluded property for inheritance purposes includes

interests in UK unit trusts, OEICs and gilts, but this is not extended to the POA charge.

76.26 Loan to trust

The IHT Manual provides

> **IHTM44113 - Pre-owned assets: insurance based products: gift and loan trust** [March 2012]
> A gift and loan trust is where the settlor makes a small gift into trust, possibly by way of an insurance policy and settles it on trusts for the benefit of others and from which the settlor is entirely excluded. They then make a substantial interest free loan to the trustees, repayable on demand. The trustees use the loan to purchase more policies, and make partial surrenders each year to pay off part of the loan.
> This arrangement is not a gift with reservation for inheritance tax. The settlor is not a beneficiary of the trust itself and the making of the loan does not constitute a settlement for the purposes of Inheritance Tax. No POA charge arises as the benefit to the settlor arises as a creditor and not under the trust.

76.27 Quantum of charge: Land

We find the usual cascade of definitions. Para 3(5) Sch 15 FA 2004 provides:

> Where this paragraph applies to a person in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 4 is to be treated as income of his chargeable to income tax.

76.27.1 *The chargeable amount and deductible expenses*

One therefore turns to para 4 Sch 15 FA 2004 to find the quantum of the charge. Para 4(1) Sch 15 FA 2004 provides:

> For any taxable period[64] the chargeable amount in relation to the relevant land is
> [a] the appropriate rental value ... less
> [b] the amount of any payments which, in pursuance of any legal

64 "Taxable period" is defined in a commonsense way in para 4(6) Sch 15 FA 2004:
"In this paragraph—
‹the taxable period' means the year of assessment, or part of a year of assessment, during which para 3 applies to the chargeable person."

> obligation, are made by the chargeable person during the period to the owner of the relevant land in respect of the occupation of the land by the chargeable person.

To obtain a deduction requires good paperwork:
(1) a legal obligation; and
(2) payment to the owner of the relevant land.
This is straightforward in an *Eversden* scheme, but who is the "owner" of the land in an *Ingram* scheme (where there is a lease owned by T and a reversion owned by others)? Who is owner of the land in a home loan scheme (where the land is held by trustees)?

76.27.2 *"The appropriate rental value"*

This is defined in para 4(2) Sch 15 FA 2004. This provides:

> The appropriate rental value is R × (DV ÷ V)

In short, R is the **R**ental value; V is the capital **V**alue. DV ÷ V is (in a sense) the chargeable part of that value. **DV** stands, perhaps, for Disposal Value.

76.27.3 *"Rental value"*

R is the rental value of the relevant land for the taxable period. "Rental value" is defined in the same manner as the income tax benefit in kind rule: it means the "annual value". The "annual value" is in turn defined in para 5 Sch 15 FA 2004. That is copied from s.110 ITEPA, except that s.110(3), (4) are omitted. It is here called "the POA Annual Value". The POA Annual Value is defined as the rent which will be payable *on the assumption that the landlord (rather than the tenant) pays for all repairs and insurance*. The normal market rent will be lower than the POA Annual Value, because market practice is that the *tenant* pays the cost of repairs and insurance. The difference between POA annual value and normal market rent will vary from one property to another. The difference would be greater with large properties which are expensive to maintain and insure. In relation to other benefits in kind provisions, such as s.87 and s.731, beneficiaries have sometimes been given the benefit of living accommodation on terms that they are responsible for maintenance and insurance. If the maintenance and insurance cost is substantial, they argue that the value of the benefit is small or sometimes even nil. It was perhaps to avoid these arguments that the legislation was framed in this way. It seems extraordinary if one thinks that the legislation is intended

to charge income tax on a benefit in kind. However, the object of the legislation is really to penalise taxpayers who have carried out some IHT planning schemes and so it does make sense.

The wording is derived from rating legislation. There is a substantial amount of case law, and to research this the reader should refer to rating law textbooks.

The reader will recall that the annual value for benefit in kind purposes is by concession taken to be the rateable value.[65] There is no reason to think that this concession will be applied for the POA Annual Value. POA Annual Value is (in short) slightly above market rental value.

76.27.4 *The proportion (DV ÷ V)*

The key expression is DV. Para 4(2) Sch 15 FA 2004 provides:

> DV is—
>
> (a) in a case falling within para 3(2)(a)(i),[66]
>
> [i] the value as at the valuation date of the interest in the relevant land that was disposed of as mentioned in para 3(2)(b) by the chargeable person or,
>
> [ii] where the disposal was a non-exempt sale, the appropriate proportion of that value,
>
> (b) in a case falling within para 3(2)(a)(ii),[67]
>
> [i] such part of the value of the relevant land at the valuation date as can reasonably be attributed to the property originally disposed of by the chargeable person or,
>
> [ii] where the original disposal was a non-exempt sale, to the appropriate proportion of that property, and
>
> (c) in a case falling within para 3(3),[68] such part of the value of the relevant land at the valuation date as can reasonably be attributed to the consideration provided by the chargeable person, and
>
> V is the value of the relevant land at the valuation date.

The drafter does not deal with a case falling within the disposal and the contribution condition, eg if the individual disposes of an interest in a contract to purchase land to another person and also provides the purchase price.

---

65 See 74.11.1 ("Rental value of the accommodation").

66 ie disposal condition (i), see 76.4.1 (Disposal condition (i)).

67 ie disposal condition (ii), see 76.4.2 (Disposal condition (ii)).

68 ie the contribution condition, see 76.5 (The contribution conditions).

76.27.5 *(DV÷V) and the valuation date*

The valuation date is determined by the POA Regulations 2005. The Consultation Document "Taxation of Pre-Owned Assets: Further Consultation" 16 August 2004 explains:

> 5. In the case of land, the "cash equivalent" of enjoyment in a particular tax year is derived from market rental that would be paid for use of the land over the "taxable period" (that is, the tax year or any shorter period for which the asset is "caught" by Schedule 15). This figure is then scaled down, in cases where the taxpayer's "stake" in the caught asset is less than 100 per cent, in the proportion DV/V, where V is the value of the whole asset on the "valuation date" for the year, and DV is the value reasonably attributable to the taxpayer on that date. In many cases, however, we would expect that taxpayers and their advisors will be able to establish the ratio DV/V from the surrounding circumstances without necessarily establishing the absolute amount of V or DV.

76.27.6 *Non-exempt sale*

Para 4(4) Sch 15 FA 2004 provides a relief for a "non-exempt" sale. Para 4(4) Sch 15 FA 2004 begins with the definition of this term:

> The disposal by the chargeable person of an interest in land is a "non-exempt sale" if (although not an excluded transaction) it was a sale of his whole interest in the property for a consideration paid in money in sterling or any other currency;

The label ("non-exempt sale") is chosen, presumably, because the sale is not an excluded transaction. (Perhaps "non-excluded sale" would have been clearer.)

The relief is given by the method of re-defining "the appropriate proportion" to a smaller amount. Para 4(4) Sch 15 FA 2004 continues:

> and, in relation to a non-exempt sale, "the appropriate proportion" is
> (MV–P) ÷ MV
> where—
> MV is the value of the interest in land at the time of the sale;
> P is the amount paid.

This will not often apply as a sale for full value will usually be an excluded transaction and a sale at an undervalue will probably qualify for the GWR exemption.

76.28 Quantum of charge: Chattels

Para 6(5) Sch 15 FA 2004 provides:

> Where this paragraph applies to a person in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 7 is to be treated as income of his chargeable to income tax.

76.28.1 *The chargeable amount*

Para 7(1) Sch 15 FA 2004 provides:

> For any taxable period the chargeable amount in relation to any chattel is
>
> [a] the appropriate amount (as determined under sub-para (2)),
>
> [b] less the amount of any payments which, in pursuance of any legal obligation, are made by the chargeable person during the period to the owner of the chattel in respect of the possession or use of the chattel by the chargeable person.

This follows the format of the POA land charge.

76.28.2 *The appropriate amount*

Para 7(2) Sch 15 FA 2004 provides:

> The appropriate amount is N×(DV ÷ V)

In short, N is **N**otional interest. DV and V are similar to the POA land charge. In detail:

> N is the amount of the interest that would be payable for the taxable period[69] if interest were payable at the prescribed rate on an amount equal to the value of the chattel [at][70] the valuation date,
>
> DV is—
>
> (a) in a case falling within para 6(2)(a)(i),
>
> [i] the value as at the valuation date of the interest in the chattel that was disposed of as mentioned in para 6(2)(b) by the chargeable person or,

---

69 Para 7(5) Sch 15 FA 2004 provides that "the taxable period" means the year of assessment, or part of a year of assessment, during which para 6 Sch 15 FA 2004 applies to the chargeable person.

70 The statute erroneously reads "as".

[ii] where the disposal was a non-exempt sale,[71] the appropriate proportion of that value,

(b) in a case falling within para 6(2)(a)(ii),

[i] such part of the value of the chattel at the valuation date as can reasonably be attributed to the property originally disposed of by the chargeable person or,

[ii] where the original disposal was a non-exempt sale, to the appropriate proportion of that property, and

(c) in a case falling within para 6(3), such part of the value of the chattel at the valuation date as can reasonably be attributed to the consideration provided by the chargeable person, and

V is the value of the chattel at the valuation date.

76.29 Quantum of charge: Intangible property

Para 8(3) Sch 15 FA 2004 provides:

> Where this paragraph applies in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 9 is to be treated as income of the chargeable person chargeable to income tax.

76.29.1 *The chargeable amount*

Para 9(1) Sch 15 FA 2004 provides:

> For any taxable period the chargeable amount in relation to the relevant property is N minus T

In short, **N** is **N**otional income; **T** is **T**ax payable. In more detail:

> N is the amount of the interest that would be payable for the taxable period[72] if interest were payable at the prescribed rate on an amount equal to the value of the relevant property at the valuation date, and
>
> T is the amount of any income tax or capital gains tax payable by the chargeable person in respect of the taxable period by virtue of any of the following provisions—
>
> (a) section 461 [ITTOIA],
>
> (b) section 624 [ITTOIA],

---

71 Non-exempt sale is defined in para 7(3) Sch 15 FA 2004 following the form of the POA land charge: see 76.27.6 (Non-exempt sale).

72 Para 9(3) Sch 15 FA 2004 provides:
"'the taxable period' means the year of assessment, or part of a year of assessment, during which para 8 applies to the chargeable person".

(c) sections 720 to 730 [ITA],
(d) section 77 [TCGA], and
(e) section 86 [TCGA],

so far as the tax is attributable to the relevant property.

Setting notional income against tax is penal and bizarre, but then, the POA regime is bizarre and intended to be penal.

There is no provision for carry forward or back if T exceeds N (but that will be rare).

If foreign income is unremitted and no tax is paid because of the s.624 remittance basis, it is considered that the amount of T is nil.

76.29.2 *The valuation date*

Para 9 Sch 15 FA 2004 continues:

> (2) Regulations may, in relation to any valuation date, provide for a valuation of the relevant property by reference to an earlier valuation date to apply subject to any prescribed adjustments.
> (3) In this paragraph—
> ...
> "the valuation date", in relation to a year of assessment, means such date as may be prescribed.

The date is prescribed in the POA Regulations 2005.

76.30 Overlap of land and intangible property charges

Para 18 Sch 15 FA 2004 provides:

> *Persons chargeable under different provisions by reference to same property*
> (1) Where, in any year of assessment, a person ("the chargeable person") is (apart from this paragraph) chargeable to income tax both—
> (a) under para 3 (land) or para 6 (chattels) by reason of his occupation of any land or his possession or use of any chattel, and
> (b) under para 8 (intangible property) by reference to any intangible property which derives its value (whether in whole or part) from the land or the chattel,
>
> he is to be charged to income tax under whichever provision produces the higher chargeable amount in relation to him.
> (2) Where sub-para (1) applies, only the amount under the paragraph under which he is chargeable is to be taken into account in relation to the chargeable person for the purposes of para 13(2).

76.31 Interaction with benefit in kind charge

Para 19 Sch 15 FA 2004 provides:

> Where, in any year of assessment, a person is (apart from this paragraph) chargeable, in respect of his occupation of any land or his possession or use of any chattel, to income tax both—
>
> (a) under this Schedule, and
>
> (b) under Part 3 of ITEPA,
>
> the provisions of that Part shall have priority and he shall not be chargeable to income tax under this Schedule, except to the extent that the amount chargeable under this Schedule exceeds the amount to be treated as earnings under that Part.

76.32 *De minimis* exemption

The Press Release announcing the POA regime promised "a substantial *de minimis* exemption" (*sic*). This turned out to be £5,000 per annum. As this book predicted, the "substantial" £5,000 figure has not been raised in line with inflation.

Para 13 Sch 15 FA 2004 provides:

> (1) This paragraph applies where, in relation to any person who would (apart from this para) be chargeable under this Schedule for any year of assessment, the aggregate of the amounts specified in sub-para (2) in respect of that year does not exceed £5,000.
>
> (2) Those amounts are—
>
> (a) in relation to any land to which para 3 applies in respect of him, the appropriate rental value as determined under para 4(2),
>
> (b) in relation to any chattel to which para 6 applies in respect of him, the appropriate amount as determined under para 7(2), and
>
> (c) in relation to any intangible property to which para 8 applies in respect of him, the chargeable amount determined under para 9.
>
> (3) Where this para applies, the person is not chargeable for that year of assessment under any of the following provisions—
>
> (a) para 3(5) (land),
>
> (b) para 6(5) (chattels), or
>
> (c) para 8(3) (intangible property).

This is significant if annual value is (contrary to my expectation) construed by concession to mean rateable value. It could also be significant where husband and wife entered into IHT planning arrangements jointly, since each have their own separate allowance. The exception applies to the "appropriate rental value", so deductible expenses

are not relevant. Another problem here is that the £5,000 limit must be satisfied every year.

The *de minimis* limit is not time apportioned so the full £5,000 can be set against a much shorter period of deemed income.

It is therefore necessary to ascertain "the appropriate rental value". That takes us to para 4(2) Sch 15 FA 2004:

> The appropriate rental value is R×(DV/V) where
> R is the rental value of the relevant land *for the taxable period*

The "taxable period" is defined in para 4(6) Sch 15 FA 2004:

> "the taxable period" means the year of assessment, or part of a year of assessment, during which para 3 applies to the chargeable person.

Thus it seems clear that if para 3 Sch 15 FA 2004 only applies for part of the year, the taxable period is reduced, so R is reduced, so the "appropriate rental value" is reduced and so (carrying the chain to the end) the *de minimis* exemption may apply. Note that the estate exemption in para 11(1) Sch 15 FA 2004 disapplies para 3 Sch 15 FA 2004: see para 11(1) Sch 15 FA 2004.

76.33 POA election

One can elect out of the POA regime at an IHT cost. Para 21 Sch 15 FA 2004 deals with the POA land and chattels charges. Para 22 Sch 15 FA 2004 deals with intangible property. They are not quite the same but for reasons of space I only cover the former.

76.33.1 *Conditions for election*

Para 21(1) Sch 15 FA 2004 provides

> This paragraph applies where—
> (a) a person ("the chargeable person") would (apart from this paragraph) be chargeable under para 3 (land) or para 6 (chattels) for any year of assessment ("the initial year") by reference to his enjoyment[73] of any property ("the relevant property"), and
> (b) he has not been chargeable under the paragraph in question in

73 "Enjoyment" is defined in para 21(4) Sch 15 FA 2004:
> "For the purposes of this paragraph a person ‹enjoys' property if—
> (a) in the case of an interest in land, he occupies the land, and
> (b) in the case of an interest in a chattel, he is in possession of, or has the use of, the chattel."

> respect of any previous year of assessment by reference to his enjoyment of the relevant property, or of any other property for which the relevant property has been substituted.

If an election is made by mistake (because the POA regime does not in fact apply) it has no effect.

76.33.2 *Effect of election*

Para 21(2) Sch 15 FA 2004 provides:

> The chargeable person may elect in accordance with para 23 that—
> (a) the preceding provisions of this Schedule shall not apply to him during the initial year and subsequent years of assessment by reference to his enjoyment of the relevant property or of any property which may be substituted for the relevant property ...

This disapplies Schedule 15. The price is in sub-para (b):

> ..., but
> (b) so long as the chargeable person continues to enjoy the relevant property or any property which is substituted for the relevant property—
> (i) the chargeable proportion of the property is to be treated for the purposes of Part 5 of FA 1986 (in relation to the chargeable person) as property subject to a reservation, but only so far as the chargeable person is not beneficially entitled to an interest in possession in the property,
> (ii) section 102(3) and (4) of that Act shall apply, but only so far as the chargeable person is not beneficially entitled to an interest in possession in the property, and
> (iii) if the chargeable person is beneficially entitled to an interest in possession in the property, sections 53(3) and (4) and 54 of IHTA 1984 (which deal with cases of property reverting to the settlor etc) shall not apply in relation to the chargeable proportion of the property.

Suppose a former foreign domiciliary makes an election in relation to a discretionary trust of which they are a beneficiary and the property is excluded property. How does s.102(3) apply? See 63.14 (GWR death charge: excluded property rules for settled property).

76.33.3 *The chargeable proportion*

This takes us to the definition of "chargeable proportion" in para 21(3)

Sch 15 FA 2004:

> In this paragraph, "the chargeable proportion", in relation to any property, means DV ÷ V
> where DV and V are to be read in accordance with para 4(2) or 7(2), as the case requires, but as if—
> (a) any reference in para 4(2) or 7(2) to the valuation date were a reference—
> (i) in the case of property falling within subsection (3) of section 102 of the Finance Act 1986, to the date of the death of the chargeable person, and
> (ii) in the case of property falling within subsection (4) of that section, to the date on which the property ceases to be treated as property subject to a reservation, and
> (iii) in the case of property in which the chargeable person is beneficially entitled to an interest in possession, to the date of his death or if his interest comes to an end on an earlier date) that earlier date, and
> (b) the transactions to be taken into account in calculating DV included transactions after the time when the election takes effect as well as transactions before that time.

I do not see the purpose or effect of para 21(3)(b) Sch 15 FA 2004. How does this work in the case of an *Ingram* scheme?

76.33.4 *Time limit for election*

Para 23(3) Sch 15 FA 2004 provides:

> The election must be made on or before—
> (a) the relevant filing date, or
> (b) such later date as an officer of Revenue and Customs may, in a particular case, allow..

The key expression is "relevant filing date" which is defined in para 23(1) Sch 15 FA 2004:

> "the relevant filing date" means 31 January in the year of assessment that immediately follows the initial year within the meaning of para 21 or (as the case requires) para 22.

Time runs from when the Schedule begins to apply. Normally that will be 6 April 2005,[74] because in the future no-one will deliberately enter into

74 Or 6 April 2007 for those caught by the reverter to settlor restriction in the FA 2006; see 76.20 (Reverter to settlor restriction).

arrangements caught by the Schedule. But where a person is non-resident or domiciled, the Schedule may not begin to apply until a later time when they become UK resident or domiciled, and in such a case time for the election starts at that later time; a sensible rule.

76.33.5 *Revocation of election*

Para 23(5) Sch 15 FA 2004 provides:

> The election may be withdrawn or amended, during the life of the chargeable person, at any time on or before the relevant filing date.

This will only be useful in very exceptional circumstances.

76.33.6 *Retrospective effect of election*

Para 23(6) Sch 15 FA 2004 provides:

> Subject to sub-para (5), the election takes effect for the purposes of inheritance tax from the beginning of the initial year within the meaning of para 21 or (as the case requires) para 22 or, if later, the date on which the chargeable person would (but for the election) have first become chargeable under this Schedule by reference to the property to which the election relates.

76.34 Election and *Eversden* schemes

If a client has lost their appetite for IHT planning, it would be better to unwind an *Eversden* scheme than to elect. Unwinding an *Eversden* scheme is straightforward.

By contrast, unwinding home loan schemes needs considerable care. Watch out for Fraud on a Power.

76.35 Election in case of home loan schemes

Suppose:

(1) The client ("H") has entered into a home loan plan: H has sold H's home to a trust (before 22 March 2006) ("the property settlement") in return for a debt, and given away the debt.
(2) Under the terms of the property settlement, income is paid to H for life, and then for H's widow ("W") after H's death.
(3) Suppose first of all that the home has not increased in value, so that the net value of the trust fund of the property settlement is nil.
(4) A POA election has been made.
(5) H is survived by W.

76.35.1 *Effect of election*

The chargeable proportion (here = the whole) of the property:

> is to be treated for the purposes of Part 5 of FA 1986 (in relation to the chargeable person) as property subject to a reservation.

So it is treated as property to which H is beneficially entitled.

However, H is already entitled to the property as H has an interest in possession in it. The property is subject to the debt. Is this taken into account in valuing the estate of H on H's death? If so the debt scheme still works! In *IRC v Ayrshire Employers Mutual Insurance Association* 27 TC 331 the House of Lords notoriously said that the legislation had "misfired". But the modern approach of the Courts is to make sure that legislation does not "misfire" if they can. Indeed this approach is not so modern, and in 1965 Lord Diplock criticised the *Ayrshire* decision:

> If the Courts can identify the target of Parliamentary legislation their proper function is to see that it is hit: not merely to record that it has been missed.

76.35.2 *Spouse exemption on death of H*

The IHT spouse exemption provides that the transfer of value deemed to be made on the death of H:

> ... is an exempt transfer to the extent that the value transferred is
> [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner; or
> [b] so far as the value transferred is not so attributable, to the extent that the estate is increased.

See s.18(1) IHTA 1984.

H does not qualify for exemption within [b]. We have to argue that the value transferred is "attributable to property" (the home) "which becomes comprised in the estate of the spouse or civil partner".

Does it? Only subject to the debt. The Revenue may reply that "property" in s.49(1) IHTA means net property and this is supported by *St Barbe Green v IRC*:

> Section 49(1) IHTA 1984 [deems] the deceased to be beneficially entitled to "the property" in which his life interest subsists. It does not say "net property" (i.e. the value of the property net of trust liabilities) but that is what it must mean, and the parties to this appeal both agree

that in practice that is the effect the Revenue gives to the section.[75]

On the facts of the above example, no net property becomes comprised in the estate of the spouse. A purposive construction supports that view. It does not make sense for the spouse exemption to apply there.

The spouse exemption would apply to the extent that the value of the property exceeds the debt.

If the debt were released, the problem disappears and it is clear that the spouse exemption would apply.

76.36 Unwinding existing structures

What is to be done when an existing structure falls within the POA land charge?

Do nothing and pay the POA tax? A suitable option where the client has a short life expectancy. Mitigate the charge by arranging that maintenance costs are deductible: see 76.27.1 (The chargeable amount and deductible expenses).

Elect out of the POA regime? Generally unattractive: you have the IHT charge on death usually without CGT uplift or spouse exemption on death.[76] Consider it if IHT is a long term problem (middle-aged clients). Perhaps a future government will scrap these rules in a decade or so's time.

It may be sensible to elect and retain the structure where:

(1) IHT is not a problem (eg insurance is inexpensive);
(2) Shadow directorship is not a problem (expect an investigation to follow the election); and
(3) A sale of the company is envisaged in the short or medium term. See 76.6.4 (Secondhand company).

In most cases shadow directorship may be a problem; it will usually be better to liquidate the company if IHT, CGT and SDLT issues permit.

The best solution is usually unwinding, or reorganising so as to fall within the estate exemption.

76.37 Is existing scheme validly created?

In *Wolff v Wolff* [2004] STC 1633, a husband and wife entered into a reversionary lease of the property in favour of their daughters for 125

75 [2005] STC 288.

76 See 63.19 (IHT spouse exemption defence to GWR death charge).

years starting from 2017. Subsequently, they became aware that from 2017 they had no right to stay in the property and were at the mercy of the owners of the lease! The lease was set aside for mistake.

76.38 Human rights

The Parliamentary Joint Committee on Human Rights considered the POA provisions to be HR compliant[77] – except (intriguingly) in relation to the spouse exemptions (which deny relief to cohabitees) but no-one took any notice of that. The prospect of a successful human rights challenge now seems slender.

76.39 Commentary

76.39.1 *Nature of the POA charge*

What is the nature of the POA charge? Although the charge is imposed under the Income Tax Acts, it is not an income tax (in the sense that it is not a tax on income or in any way relating to income). To put it another way, the provisions impose an income tax charge on income which does not exist. Once it is accepted that income tax is not in general charged on an individual who occupies their own property[78] then it is anomalous to charge income tax on the benefit of occupation through a trust or company. And since the POA intangible property charge applies even if the property also produces income subject to income tax, it is obviously not income which Schedule 15 is seeking to tax.

The POA charge might be seen as an *ersatz* annual IHT charge on property which has slipped through the IHT net.[79] However, the quantum of the charge is penal (compared to IHT rates).

The true nature of the POA charge is therefore that it is a penalty for carrying out (and not unwinding) certain IHT planning. Hardly anyone is seriously expected to pay it. The object is to force taxpayers (by electing or unwinding) to bring themselves back into the IHT net.[80] The POA charge takes the clothes or label of income tax, but – looking beyond the label to the content – it is not income tax; indeed, it is not a "tax" at all, as that word is properly understood. It is well established that a fee, levy

---

78 See Kay and King, *The British Tax System*, (5th ed., 1990), p.80.

79 It is significant that the pre-owned asset charge is dealt with in IHT textbooks and in the HMRC IHT Manual.

80 And to stop similar arrangements being made in the future.

or toll may in fact be a tax despite its name.[81] Likewise provisions carrying the label of a tax do not necessarily constitute a tax.

This point may be relevant to construction, because the principle of construction that penalty provisions are to be strictly construed may have more force than the principle that clear words are required to impose a tax.

76.39.2 *Retrospectivity*

One controversial aspect of the POA regime is that it is retrospective in effect. (One should avoid semantic – indeed Orwellian – debate about the meaning of "retrospective" and look at the effect.) Retrospective legislation is pernicious when it entails liability for conduct which would have been different if the agent had known of the terms of the retrospective law. The POA rules are unashamedly targeted at taxpayers who carried out *Eversden*, *Ingram* and home loan schemes before these were stopped by anti-avoidance legislation.

Those that carried out *Ingram* schemes were particularly unfairly treated. They entered into a package with an IHT advantage (generally) at a significant CGT cost. Parliament removed the benefit and left them with the cost.

In 2004 I said:

> This is unprecedented in the UK tax system, which has traditionally allowed taxpayers to plan their affairs more securely on the basis of the law of the day. One may approve of this as an attack on tax avoidance, or disapprove as contrary to the rule of law. Views may divide on party political lines.

Since 2004, however, retrospective tax legislation has become a matter of routine, having been applied to a somewhat arbitrary selection of tax avoidance schemes and or simply as second thoughts to (what the need for retrospective legislation shows to be) ill thought out legislation.

An interesting question is to what extent this approach will continue under the coalition government. Only time will tell.

76.39.3 *Assessment*

No doubt the POA rules bring some revenue for the Government, though how much is a matter of speculation. Set against the tax raised (whatever

---

81 *Re a By-law of the Auckland City Council* [1924] NZLR 907 at p.911.

it is) and the blow against tax avoidance (however one values or regards that) there are some entries to make on the debit side: the POA rules impose significant costs of compliance and tax planning (for they require taxpayers to incur professional fees in order to rearrange their affairs). They impose the unquantifiable burden of complexity and uncertainty which (combined with unfairness) will lead to an equally unquantifiable loss of taxpayer goodwill. One cannot put a value on that goodwill, but it is essential to successful tax administration.

Back in 2004, I think everyone who understood and cared about the UK tax system was aghast at the conception, enactment process and administration of the POA provisions.[82] Looking back with hindsight it can be seen that the provisions were not an aberration. They are the natural result of a fiscal policy with one and only one priority, the attack on tax avoidance, set against which any other *desiderata* of a tax system count for very little and views of practitioners count for nothing at all.

The HMRC change of view that home loan schemes are caught by the GWR rules is the icing on the cake of poor administration.

It is suggested that

(1) The POA intangible property charge should be repealed except for transactions carried out before the anti-Eversden legislation enacted in 2003. That would be more or less a repeal.

(2) The POA land and intangible property should be repealed and replaced by an IHT charge on the death of the person who carried out *Ingram* or Home Loan arrangements (with credit for POA charges if paid). If this was restricted to death after the new rules comes in, it should not be regarded as offensively retrospective.

That would be a valuable simplification.

82 "The anti-avoidance Pre-Owned Assets regime ... is: retrospective in its effect, disproportionate to the mischief at which it is purportedly aimed, contrary to taxpayers' legitimate expectations, and arbitrary ... ."
CIOT and ICAEW Tax Faculty (October 2004).

CHAPTER SEVENTY SEVEN

JOINT ACCOUNTS

77.1 Introduction

This chapter considers a joint bank or building society account held by two account holders. I refer to money in the account as "account money".

I consider the following topics:

(1) IHT on payments into and out of the account
(2) Who is the settlor on a payment out of the account
(3) Taxation of income arising on the account
(4) Remittances from the account

77.2 The property law background

First one must ascertain the rights of the account holders. It would need a chapter to analyse the relevant case law.[1]

There is an important distinction between:

(1) an account on which either account holder can draw a cheque;
(2) an account on which both account holders must sign a cheque.

This chapter only considers the first type of account.

In outline, three distinct questions arise:

(1) *Beneficial ownership of the account money while in the account.* The possibilities are:
    (a) Entitlement in equal shares (the most common case)

---

1 For a summary see *Dymond's Capital Taxes* (looseleaf 1986 onwards), para 10.400; Law Commission, "Cohabitation: the financial consequences of relationship breakdown" Law Com No 307 (2007), para A.46, accessible *http://lawcommission.justice.gov.uk*.
Further consideration is needed for an account not governed by English law (but an English court will assume English law principles apply in the absence of evidence to the contrary). English law principles apply in Ireland: *Lynch v Burke* ITR Vol 5 p.271.

(b) Entitlement in proportion to contributions and withdrawals[2]
(c) One account holder beneficially entitled to the whole.

(2) *Beneficial ownership of money withdrawn from the account* (or assets purchased with that money). The possibilities are:
(a) Individual who withdraws funds becomes beneficial owner (the most common case)[3] or
(b) Same as beneficial ownership of the account money (as to which see above).

(3) *Beneficial ownership of account money on death of an account holder*. The possibilities are:
(a) The survivor is beneficially entitled by survivorship.
(b) The deceased owner's share (as to which see (1) above) passes under their will or intestacy.

The answer to one of these three questions does not determine the answers to the others. For instance, account money may belong beneficially to one of the account holders, eg H and W may hold as nominees for H. Such an account may be held on terms that:

---

2 In practice the court will assume this is not the case unless there is evidence, such as appropriate records kept by the account holders. *Sillars v IRC* [2004] STC (SCD) 180 at [11] gives cogent reasons for rejecting this analysis for the parent/child account.

3 See *Re Bishop* [1965] Ch 450 at p.456:
"Where a husband and wife open a joint account at a bank on terms that cheques may be drawn on the account by either of them, then, in my judgment, in the absence of facts or circumstances which indicate that the account was intended, or was kept, for some specific or limited purpose, each spouse can draw upon it not only for the benefit of both spouses but for his or her own benefit. Each spouse, in drawing money out of the account, is to be treated as doing so with the authority of the other and, in my judgment, if one of the spouses purchases a chattel for his own benefit or an investment in his or her own name, that chattel or investment belongs to the person in whose name it is purchased or invested: for in such a case there is, in my judgment, no equity in the other spouse to displace the legal ownership of the one in whose name the investment is purchased. What is purchased is not to be regarded as purchased out of a fund belonging to the spouses in the proportions in which they contribute to the account or in equal proportions, but out of a pool or fund of which they were, at law and in equity, joint tenants. It also follows that if one of the spouses draws on the account to make a purchase in the joint names of the spouses, the property purchased, since it is purchased in joint names, is, prima facie, joint property and there is no equity to displace the joint legal ownership. There is, in my judgment, no room for any presumption which would constitute the joint holders as trustees for the parties in equal or some other shares."

(a) on the death of H, the account money passes to W by survivorship;[4] or
(b) the account money may pass under the will of H.

The permutations are almost endless. Note that joint tenancy/tenancy in common is not a comprehensive categorisation since those two terms alone are insufficient to determine the answers to the three questions which may arise.

The property law position depend on the intention of the account holders. In practice spouses and cohabitees generally operate joint accounts without giving any consideration to the ownership of the money; there is just a general desire to pool resources. A search for intention is unrealistic, and the default position is that:

(1) Account money is beneficially owned in equal shares.
(2) Withdrawals belong to the account holder who withdraws the funds.
(3) Beneficial ownership passes by survivorship.

I refer to this as a **"common form account"**.

The circumstances in which parent/child joint accounts arise are different so the rights of the account holders tend to be different. For instance, the terms of the account may be that:

(a) One account holder ("P") may withdraw up to the whole amount of P's benefit and the others may make no withdrawal at all during P's lifetime.
(b) The balance may pass to the survivor by survivorship.[5]

In this case the fund is in the estate of P for IHT purposes. The funds are not in the estate of the other account holder during the life of P: their rights have no substantial value.

The following analysis applies to a common form account.

Further consideration is needed if one party to the account has lost legal capacity.[6]

---

4 As in the parent/child joint account *O'Neill v IRC* 1998 STC (SCD) 110; the apparent breach of the Wills Act 1837, and the possibility that this is a settlement for IHT, are tacitly ignored.

5 This was found to be the case on the facts in *Sillars v IRC* [2004] STC (SCD) 180.

6 According to the British Bankers Association: "If you are the joint account holder and the other joint account holder becomes mentally incapable, you do not automatically have the right to access the account unless you have a Lasting Power of Attorney, Enduring Power of Attorney or an order from the Court of Protection." Banking for people who lack capacity to make decisions England and Wales (2010); *http://www.bba.org.uk/media/article/banking-for-people-who-lack-capacity-to-make-decisions*

77.3 Joint account: IHT

77.3.1 *Account money in estate of both account holders*

In strict law the *whole* of the account money is in the estate of both account holders, under s.5(2) IHTA which provides:

> A person who has a general power which enables him... to dispose of any property other than settled property, ... shall be treated as beneficially entitled to the property ... and for this purpose "general power" means a power or authority enabling the person by whom it is exercisable to appoint or dispose of property as he thinks fit.[7]

Beneficial ownership is therefore irrelevant for IHT and GWR is irrelevant on death of an account holder.

77.3.2 *Payment into joint account by one account holder*

Payment into the joint account by an account holder is not a transfer of value because the estate of the payor is not decreased by the payment. HMRC agree. The IHT Manual provides:

> **15043 Lifetime gifts arising out of a transfer of an account into joint names** [September 2011]
> Where A places money in a joint account (IHTM15042) in the names of A and B as joint tenants (IHTM15082) and retains the right to withdraw the whole of it, as a general rule there will not be a lifetime transfer (IHTM15060) at the time the money is paid into the account.

Payment into the joint account by an account holder is not a GWR. HMRC do not accept that[8] but in practice GWR does not often matter.

I find that somewhat surprising, but it may depend on the documentation of the account.

7 This was accepted without discussion in the Court of Appeal in *IRC v Melville* 74 TC 372 at [36]:
"... the inheritance tax regime produces instances of double taxation ... A clear example is one falling within s 5(2) of the Act, the very common case of a joint bank account which permits any holder to draw on that account. The same property, the moneys in the account, is under s 5(2) taxable on the death of each holder. The Revenue in practice do not strictly enforce that provision and treat each holder as beneficially entitled only to the proportion of monies in the account which he has contributed".

8 The IHT Manual is garbled; so far as relevant it provides:
"15061 Gifts with reservation [September 2011]
An example of a joint ownership arrangements involving a GWR is ... if ... A

77.3.3 *Death of an account holder*

Each account holder is strictly subject to IHT on death on the whole of the account money (subject to exemptions such as the spouse exemption). This rule would result in double taxation but that is undone by concession. The IHT Manual provides:

> **15042 Joint money accounts** [September 2011]
> Applying the Inheritance Tax provisions (IHTM15012) to joint accounts can be particularly difficult. In practice:
> - You should normally regard each account holder as beneficially entitled (IHTM15011) to the proportion of the account which is attributable to their contributions. So - if the deceased provided the whole of the money, the whole of the account at death should be included in the IHT400 (IHTM10021)
> - When calculating this proportion you should assume that any money withdrawn by each person should be set as far as possible against their own contributions, despite the rule in *Clayton's Case* [1816] 1 Mer 572
> - You may want to make enquiries about any withdrawals made from funds the deceased provided by the other joint owner(s) as these are likely to be lifetime transfers (IHTM15043). You should pay particular attention to joint accounts opened shortly before the death.
> - In most cases each joint owner has an unrestricted right to withdraw any part of the amount in credit in the account and keep the funds for their own use (for example, see *Re Bishop* [1965] Ch 450). *You should not use the fact that this right exists to argue that tax is due (for example, by referring to the definition of 'property' in IHTA84/S272 or the 'general power' provision in IHTA84/S5(2)) on a share of the account that is greater than the share provided by the*

---

transfers ... a joint money account into joint beneficial ownership of himself and his son, and then A either

- receives (or has the right to receive) all the ... interest for his own benefit or
- has the right to withdraw all the money in the joint account for his own benefit."

Possibly the Manual means to say that there is a GWR if A transfers *his money* into a joint account and has the right to withdraw all the money. This view is supported by *Sillars v IRC* [2004] STC (SCD) 180 (where the taxpayer was not represented by counsel). But it is considered that a payment into an account of this kind is not a disposal by way of gift. If it were a GWR, many difficulties arise which the Tribunal did not consider in *Sillars*. On the death of A, however, since the property is in the estate of the individual, it does not matter whether payment into the account was a GWR.

joint owner.

- When establishing the share based on the deceased's contributions you should note that the true legal position is far from clear so it is important to establish the facts and obtain any relevant documents, such as application forms, withdrawal mandates, passbooks, terms and conditions of account before considering the legal and equitable rules...

77.3.4 *IHT spouse exemption on death of account holder*

This section considers the IHT spouse exemption on the death of an account holder. For the IHT spouse exemption generally see 67.1 (IHT spouse exemption).

There are two possibilities:

(1) The account holders may not qualify for the spouse exemption because:
   (a) They are married but one is, and one is not, UK domiciled.[9] (This scenario is closest to the themes of this book, but one cannot examine it in isolation from the others.)
   (b) They are cohabitees.
   (c) There is some other unmarried relationship, such as parent and child.

(2) The account holders may qualify for the IHT spouse exemption.

In the second case, the IHT spouse exemption applies to the transfer of value on the death of an account holder. HMRC agree. The IHT Manual passage continues:

> Refer to TG (IHTM01081) any case in which the parties dispute the claim. However, there is no need to refer if the deceased's interest passes to an exempt beneficiary, such as a surviving spouse or civil partner (IHTM11032). You should also avoid questions and arguments on this subject unless the amount of tax at stake is substantial.

This is correct, though it needs a slightly purposive construction to say that property "becomes comprised" in the estate of the surviving spouse when the property is already in that estate.

77.3.5 *One account holder pays in and other withdraws*

Suppose:

---

9 In this section I ignore the limited IHT spouse exemption and the 2013 election rules.

(1) A transfers A's money into the joint account held by A and B and
(2) B withdraws that money into B's own name.
A's estate is reduced at stage (2).

A does not make a transfer of value at stage (2) within the normal definition, as that requires a disposition. Section 3(1) IHTA provides (in short):

> ... a transfer of value is a disposition made by a person ... as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition...

A does not make a disposition.

One might think that A makes a transfer of value by omission under s.3(3) IHTA. This provides:

> Where the value of a person's estate is diminished, and the value—
> (a) of another person's estate, or
> (b) of any settled property, other than settled property treated by s.49(1) below as property to which a person is beneficially entitled,
> is increased by the first-mentioned person's omission to exercise a right, he shall be treated for the purposes of this section as having made a disposition at the time (or latest time) when he could have exercised the right, unless it is shown that the omission was not deliberate.

But the value of the estate of B, the account holder who withdraws the funds, is not increased so s.3(3) does not apply.

However, s.272 IHTA provides an extended definition of "disposition":

> "disposition" includes a disposition effected by associated operations;

It is considered that A makes a disposition (and hence a transfer of value) by associated operations at stage (2). Section 268(3) IHTA provides:

> Where a transfer of value is made by associated operations carried out at different times it shall be treated as made at the time of the last of them;[10]

---

10 For completeness: s.268(3) continues with a proviso:
> "...but where any one or more of the earlier operations also constitute a transfer of value made by the same transferor, the value transferred by the earlier operations shall be treated as reducing the value transferred by all the operations taken together, except to the extent that the transfer constituted by the earlier operations but not that made by all the operations taken together is exempt under s.18 above."

"Associated operation" is defined in s.268(1) IHTA. This provides (so far as relevant):

> (1) In this Act "associated operations" means ... any two or more operations of any kind, being—
>
> (a) operations which affect the same property, or one of which affects some property and the other or others of which affect property which represents, whether directly or indirectly, that property, or income arising from that property, or any property representing accumulations of any such income, or
>
> (b) any two operations of which one is effected with reference to the other, or with a view to enabling the other to be effected or facilitating its being effected, and any further operation having a like relation to any of those two, and so on,
>
> whether those operations are effected by the same person or different persons, and whether or not they are simultaneous; and "operation" includes an omission.

The associated operations are:
(1) A's payment into the account.[11]
(2) B's withdrawal from the account.
HMRC agree. The IHT Manual provides:

> **15043 Lifetime gifts arising out of a transfer of an account into joint names** [September 2011]
>
> Where A places money in a joint account (IHTM15042) in the names of A and B as joint tenants (IHTM15082) and retains the right to withdraw the whole of it, as a general rule there will not be a lifetime transfer (IHTM15060) at the time the money is paid into the account. But if any part is subsequently withdrawn for the benefit of B, the other joint owner, there may be a transfer at that time.
>
> Refer to TG any case where
>
> - there is such a withdrawal
> - it is claimed that there was an immediate gift when the money was paid into the joint account
> - there is evidence that an immediate gift was intended, or
> - the position is more complicated, for example where withdrawals need both signatures
>
> **(This text has been withheld because of exemptions in the Freedom**

But that is not relevant here.

11 It might be argued that the associated operation is A's omission to withdraw from the account; it makes no difference if this is the case.

of Information Act 2000)
15042 Joint money accounts [September 2011]
...You may want to make enquiries about any withdrawals made from funds the deceased provided by the other joint owner(s) as these are likely to be lifetime transfers (IHTM15043). You should pay particular attention to joint accounts opened shortly before the death.....

77.3.6 *IHT spouse exemption on lifetime withdrawal*

The IHT spouse exemption may apply to the transfer of value on the lifetime withdrawal by an account holder. Since HMRC accept the application of the spouse exemption on death, they must also accept its application during the lifetime of the account holders.

The exemption does not of course apply when one spouse is and the other is not UK domiciled because the IHT spouse exemption is restricted. The transfer of value takes place when the funds are withdrawn from the account so that is the point where the conditions for the spouse exemption need to be satisfied. For instance if:

(1) Year 1: H makes a payment into the joint account
(2) Year 2: W makes a payment from the joint account

The IHT spouse exemption applies if the conditions for the exemption are satisfied in Year 2. It does not matter whether or not they are satisfied in Year 1.

77.3.7 *One account holder pays in and same account holder withdraws*

Suppose:

(1) A transfers A's money into the joint account held by A and B.
(2) A withdraws that money into A's own name.

A does not make a transfer of value. What about B? B's estate is reduced at stage (2). But it is considered that B makes no transfer of value. Section 3(3) IHTA does not apply.[12] It might be said that B makes a transfer of value by associated operations, but although B makes an omission, which is an associated operation, B does not make a transfer of value by associated operations, since he does not make a disposition. That is consistent with the policy of s.3(3) IHTA.

77.3.8 *Third party pays into account*

The discussion above assumes that the account money is provided by one

12 See 77.3.5 (One account holder pays in and other withdraws).

or both account holders.

Suppose:

(1) A third party ("C") transfers C's money into a joint account held by A and B.

(2) A dies.

In strictness A is taxed on the whole account, but by concession it appears that A is taxed on half. The IHT Manual provides:

> **15042 Joint money accounts** [September 2011]
> *Example*
> A, B and C share a joint account. They all contribute to it. A dies and his proportion of the account accrues by survivorship to B and C. After A's death, the entitlement of B and C should take into account A's contributions.
> **(This text has been withheld because of exemptions in the Freedom of Information Act 2000)**

Presumably this means that after A's death, B and C are each regarded as entitled to (1) their own contributions to the account and (2) half of the contribution of A.

Suppose:

(1) A third party transfers their money into a joint account held by A and B and

(2) A withdraws that money into A's own name.

It is considered that B does not make a transfer of value; see 77.3.7 (One account holder pays in and same account holder withdraws).

77.3.9 *Payment out of account by way of gift*

If B draws on the account to make a gift to a third party donee, B makes a transfer of value.

If A had paid the account money into the joint account A has also made a transfer of value by associated operations at the time of B's withdrawal.[13] But that is not the case if B, or a third party, has provided the funds. Thus the gift by B gives rise to two transfers of value, a transfer of value by A and a transfer of value by B. It may be in practice HMRC would allow some concession.

---

13 A does not make a transfer of value under s.3(3) IHTA because although the estate of the third party donee is increased, it is not increased by any failure to exercise a right. But A does make a transfer of value by associated operations.

77.4 Who is the settlor of trust made from joint account

If a trust is created by a payment from a joint account, it is considered that the account holder who writes the cheque or makes the transfer is the settlor. The other account holder is only the settlor if they have provided the property indirectly for the settlement, which requires some element of arrangement; see 80.4 (Gift from A to B followed by gift to trust by B).

77.5 Scottish joint account

The IHT Manual provides:

> **15050. Special destinations and proof of donation** [September 2011]
> If two or more people purchase an asset jointly there may be a contractual agreement between them which determines how the property passes on death.
> If the title is just in their joint names, such as to A and B, they own an equal share which passes to their executors (IHTM05012) on their deaths and is part of their free estate.
> But if the title is to A and B and the survivor and they have paid equally for the asset, the survivor will be entitled to the whole on the death of the first to die (*Perrett's Trs v Perrett* [1909] 46 SLR 453). This is known as special (or survivorship) destination.
> Both parties do, however, have the right to dispose of their shares in life (*Steele v Caldwell* [1979] SLT 228), which will defeat the operation of the special destination.
> If the price was not provided equally the question of whether the donor has conferred an immediate beneficial interest (IHTM15011) on the other party will depend on their intention. Such a donor can revoke the survivorship destination, explicitly, by Will (IHTM12047) under s.30 Succession (Scotland) Act 1964. But the donee may not do the same to defeat the donor's right to the whole of the asset.
> If the whole of a joint asset was provided by one person they retain ownership of the whole until they put title into joint names, or, by some other act, show they intend to make an immediate gift to the other joint owner.
> - Proof of gift requires evidence of both intention and delivery. Evidence of intention does not need to be in writing and oral evidence is acceptable.
> - Delivery may be:
>   - actual, for example, physically handing over the asset to the donee, or
>   - constructive, for example, handing over one book from a collection.
>
> If there is no immediate gift (by intention and delivery) the asset remains part of the provider's estate and will only pass to the other under the survivorship destination on their death, unless the Will contains a clause that explicitly revokes it and conforms to s.30 Succession (Scotland) Act 1964.
> **15051. Joint money accounts** [September 2011]
> The fact that a bank account is held in joint names and that receipts for deposits into it are issued in joint names does not necessarily mean it is held in equal

shares. Neither does it mean there is survivorship destination. The extent of each owner's interest will be a question of fact depending on

- the extent of their identifiable contributions, and
- if contributions are unequal whether there can successfully be established donation (IHTM15050) by the greater contributor to the other, or alternatively, whether the asset was held in joint names merely for administrative convenience

You should resist any suggestion by the taxpayer or agent that the terms in which the account is held can effect either a lifetime gift - or pass the property to a survivor, unless there is other supporting evidence. Any cases of difficulty should be referred to Technical.

15052. Land [September 2011]

The title to heritage is proof of its ownership, and the owners interests in it – unless there is evidence to the contrary, normally by way of written document. If there is no special destination (IHTM15050) and there is equal provision of the price, each co-owner can dispose of his own share as part of his estate and there is no accretion among them.

If spouses or civil partners (IHTM11032) are the joint owners you should keep the 'related property' (IHTM09731) provisions in view (S.161 IHTA 1984).

If it is claimed the beneficial interests (IHTM15011) vary from those indicated by the title and the absence of gift is claimed, strong proof is required of parties intentions such as a contemporaneous writing. In cases of difficulty refer to TG (IHTM01081).

15053. Which law to apply to joint investments owned by someone domiciled in Scotland [September 2011]

Scottish law applies to shares of a company registered in Scotland. If the IHT400 (IHTM10021) or other account does not indicate whether a company is Scottish or not, you should be able to find this information on the Internet. If the taxpayer is of Scots domicile (IHTM13000) a joint holding in Government Stock may be regarded as subject to Scots law (*Cunningham's Trs v Cunningham* [1924] SLT 502).

15054. Joint money accounts and special destination [September 2011]

Under Scots Law where Bank or Building Society Accounts are held in joint names and the survivor the special (or survivorship) destination (IHTM15050) does not by itself pass the ownership of the money in the account to the survivor. An account with a Bank or Building Society is not a document of title as it is not a Deed of Trust in terms of the Bank Bonds and Trusts Act 1696. It is a contract between the Bank and the customer which regulates the conditions on which the account is to be operated and is for administrative convenience only. See for example *Cairns v Davidson* 1913 SC 1054.

For this reason the ownership of the funds in the account is determined according to the ordinary principles of ownership. The owner of the funds in the account remains the owner unless and until some transfer of ownership occurs.

Example

James and Lucy (who are married) open an account, governed by Scots law, in their joint names and the survivor. James has provided all he funds. James dies and is survived by his wife, Lucy. On his death:

- In the absence of any act of transfer of ownership to Lucy (for example, a separate Deed of Gift) the whole account should be included in the IHT400.
- If the account passes to (say) the children under the terms of James' Will then the asset will be chargeable to Inheritance Tax
- If the account passes to Lucy under the terms of the will (IHTM11032) then exemption under IHTA84/S18 will apply/

This applies to all Bank/Building Society accounts governed by Scots Law. So it will apply to taxpayers living in England, Wales and Northern Ireland who have an account which is governed by Scots Law.

For the Scots law position see Meston, "Survivorship destinations and bank accounts" 1996 SLPQ 315; Kerrigan, "Special destinations – survivorship and bank accounts revisited" 2011 SLT 5; the Trusts Discussion Forum (May 2007) under the thread "Scottish bank accounts".[14]

77.6 Remittances from joint accounts

This section considers remittance aspects of joint accounts.

The RDR Manual provides:

> **33510 Joint Accounts** [July 2010]
> *... Analysing the account*
> Where an individual has a "joint account" with someone else and one or both of them chooses to be taxed on the remittance basis it is necessary to fully analyse the account (with due regard being given to the "exceptions" identified above). You will need to do this in order to apply Step 1 s.809Q(3) ITA 2007 which deals with transfers from mixed funds and requires you to find each of the categories of the remittance basis user's income and gains in the mixed fund. A joint account will almost certainly be a mixed fund.
> Analyse the account by putting each credit to the account into separate columns, divided between each individual.
> Likewise with the debits; transfers out of the account that are clearly made by or for one or other of the individuals and intended to be made out of "their" share of the income should be debited "under" their column.
> "Joint" expenses, for example items such mortgage payments where the debt is held jointly, or council tax bills and so on may, if appropriate, be split equally between each individual. Alternatively, such debits may be fully appropriated to just one of the account holders if that reflects the reality of their joint financial arrangements; for example it may be that only one partner is working and contributes most of the "credits" to the account in the form of their income. In such circumstances it may be more appropriate to attribute all expenditure to that partner in so far as the overall balance of the account permits. When separating the account in this way it is important that the overall balance remains consistent.

14 Accessible *http://www.trustsdiscussionforum.co.uk*

In practice you should try to take the most pragmatic approach that best reflects the reality of both individuals' situations.

Cases where only one account holder is a remittance basis user

Individuals who are not using the remittance basis are liable to tax on the arising basis, so they will, where appropriate, have paid UK tax in respect of their share of the income and gains that have been credited to the joint account in the tax year. Because UK tax has been (or will be) paid by that individual he or she may bring to the UK or otherwise use their share of the funds that are in the account in any way they wish without triggering an additional tax charge.

However, if at any time during the year they bring to the UK or otherwise use amounts in excess of their share of the funds in the joint account at that point in time then they will be regarded as using their partner's income or gains instead.

Example:

An offshore bank account was opened on 20 June. It is held jointly by A and B, who are civil partners. A is a remittance basis user in this year. The account shows:

Date	**Credit (Debit)**	**Balance**	**Attributable to**
20 June	£2,000	£2,000	A – foreign earnings
27 June	£1,000	£3,000	A – relevant foreign income
1 July	(£800)	£2,200	B – cash taken out in London
27 July	£90	£2,290[15]	B – UK rental income

In analysing the account you need to look at what was in the account i**mmediately before** each debit. In this case, the cash withdrawn by B in London on 1 July can only be attributed to A's income credits and, as B is relevant person, A will be regarded as having remitted that £800.

Remember that in most cases the account holders are likely to be relevant persons in relation to each other, so even transfers from the non-remittance basis using individual may be a taxable remittance on the other partner if it is regarded as consisting of or deriving from the other partner's foreign income or gains.

Cases where both account holders are remittance basis users

You will still need to analyse the account in order to determine which transfers from the mixed fund are taxable remittances, and to determine which account holder is liable to pay any tax due. Again, you should try to take the most pragmatic approach that best reflects the reality of the situation.

Once the account has been split between the individual account holders, any taxable remittances of the foreign income or gains that are the property of the remittance basis user are subject to the normal "ordering" rules that apply to remittances from a "mixed fund".

The following example demonstrates the principles of analysing a joint account and then determining whether the "transfers" are a taxable remittance from a mixed fund. You will also need to refer to RDRM35230 Remittances from mixed funds.

---

15 I have corrected an arithmetical mistake in the original; the exact figures in this line do not matter.

RDRM33515 - Remittance Basis: Identifying Remittances: Specific Topics: Joint Accounts - example [June 2010]

(Erica and John)

E and J have been married for several years, and currently live in the UK. J is domiciled within the UK. E is not domiciled in the UK. E decides to claim the remittance basis for this year.

Both E and J have employment income that is credited to the account. For most of the year E works in the UK but she also has a separate part-time employment with a foreign employer outside of the UK for part of the year.

E and J have a joint bank account in the Isle of Man. Into this account is paid both of their salaries, and some bank interest. They use the account to pay their household bills, including the mortgage on their jointly owned UK home.

Table to show the amounts credited to the account

Date		**Credit (Debit)**	**Balance**
	Opening Balance		£0
30 April	UK salary (Erica)	£3,000	£3,000
30 April	UK salary (John)	£2,000	£5,000
30 April	Overseas salary (Erica)[16]	£2,000	£7,000
30 April	Bank interest not taxed	£200	£7,200
1 May	Direct debit - UK energy co	(£200)	£7,000
5 May	Cash withdrawal (UK)	(£1,000)	£6,000
10 May	Cash withdrawal (UK)	(£1,000)	£5,000
17 May	Direct debit - mortgage	(£3,000)	£2,000
31 May	UK salary (Erica)	£3,000	£5,000
31 May	UK salary (John)	£2,000	£7,000
31 May	Overseas salary (Erica)	£800	£7,800
1 June	Direct debit - UK energy co	(£200)	£7,600
5 June	Cash withdrawal (UK)	(£1,000)	£6,600
10 June	Cash withdrawal (UK)	(£800)	£5,800
17 June	Direct debit - mortgage	(£3,000)	£2,800

The credits and the debits account can be analysed between E and J with the following results:

		Erica Credit	**Erica Balance**	**John Credit**	**John Balance**	**Joint a/c Balance**	**Note**
30 Apr	UK salary	£3,000	£3,000			£3,000	1
30 Apr	UK salary			£2,000	£2,000	£5,000	1
30 Apr	Overseas salary	£2,000	£5,000			£7,000	
30 Apr	Bank interest	£100	£5,100	£100	£2,100	£7,200	2
1 May	Debit to UK co	(£100)	£5,000	(£100)	£2,000	£7,000	
5 May	Cash to UK	(£1,000)	£4,000			£6,000	3
10 May	Cash to UK			(£1,000)	£1,000	£5,000	3
17 May	Mortgage pay't	(£2,000)	£2,000	(£1,000)	£nil	£2,000	4
31 May	UK salary	£3,000	£5,000			£5,000	
31 May	UK salary			£2,000	£2,000	£7,000	

16 The example adds: *not subject to foreign tax*.

31 May	Overseas salary	£800	£5,800			£7,800	
1 Jun	Debit to UK co	(£100)	£5,700	(£100)	£1,900	£7,600	
5 Jun	Cash to UK	(£1,000)	£4,700			£6,600	
10 Jun	Cash to UK			(£800)	£1,100	£5,800	
17 Jun	Mortgate pay't	(£1,900)	£2,800	(£1,100)	Nil	£2,800	4

Note 1: Earned income is attributed to the employee only

Note 2: Because this is a joint account, the interest arising on it is split equally between E and J.

Note 3: This money is withdrawn in the UK by J and E to meet their own personal expenditure, for example travel, meals and so on.

In this example J's "personal expenditure" can be attributed to his "income" credits into the account.

If instead the withdrawals by J were regarded as coming from E's "portion" of the pot, because J is a relevant person and money has been brought into the UK by a relevant person (so Condition A of s.809L(2)(a) ITA 2007 is met) there might still be a taxable remittance, with the tax due payable by E (see below).

Note 4: The mortgage payment is made to a UK bank. The mortgage is held on J and E's UK home and is a joint debt of E and J, and each contributes half of the cost. To the extent that J has money in the account it can be accepted that he has used his taxed income to pay his share of the mortgage.

Money has been brought into the UK to pay this mortgage, so Condition A of s.809L(2)(a) ITA 2007 is met and there is a "transfer" from a mixed fund.

Because this is a mixed fund s.809Q(2) ITA 2007 is in point. So in order to determine whether this money is regarded as consisting of, or deriving from, a remittance basis users' foreign income or gains (such that there is a taxable remittance under Condition B of s.809L(2)(a) ITA 2007) it is necessary to look at the composition of the fund immediately before the "transfer".

This shows that £2,000 of the mortgage payment made on 17 May must be attributable to E's income or gains in the mixed fund. Similarly, £1,900 of the mortgage payment of 17 June is attributable to E's income in the mixed fund.

So far as E is concerned, her share of the account shows (for the purposes of calculating if and to what extent she has made a taxable remittance of her overseas income) is as follows:

E's share of the account		**Credit (Debit)**	**E's balance**	**Category**
30 April	UK salary	£3,000	£3,000	(a)
30 April	Overseas salary[17]	£2,000	£5,000	(b)
30 April	Bank interest	£100	£5,100	(d)
1 May	Direct Debit (energy co)	(£100)	£5,000	
10 May	Cash	(£1,000)	£4,000	
17 May	Direct Debit (mortgage)	(£2,000)	£2,000	
31 May	UK salary	£3,000	£5,000	(a)
31 May	Overseas salary	£800	£5,800	(b)
1 June	Direct Debit (energy)	(£100)	£5,700	

17 The example adds: *not subject to foreign tax*.

5 June	Cash	(£1,000)	£4,700
17 June	Direct Debit (mortgage)	(£1,900)	£2,800

Applying the rules at s809Q ITA 2007 to the first "transfer" to the UK, which is the payment to the energy company on 1 May. Remember the mixed fund rules require the account to be analysed before every "transfer"

Step 1 – Identify the "amount of transfer" in the relevant year		**£100**
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer	**Para (a)** Employment income (UK employment income)	£3,000
	Para (b) Relevant foreign earnings (not subject to a foreign tax)	£2,000
	Para (d) Relevant foreign income (not subject to a foreign tax)	£100
Step 2 – Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund	**Para (a)**	£3,000

Step 3 If the amount at Step 2 is equal to or more than the amount of the transfer treat the whole of the remaining amount of the transfer as coming from that item of income or gain

So E's transfer of £100 is treated as coming from her UK employment income; it is not thus a "taxable" remittance when brought to the UK.
Then apply the rules at s.809Q ITA 2007 to the next "transfer" to the UK, which is the cash withdrawal.

Apply the rules at s.809Q ITA 2007 to the next "transfer" to the UK, which is the cash withdrawal

Step 1 – Identify the "amount of transfer" in the relevant year		**£1,000**
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer	**Para (a)** Employment income (UK employment income)	£2,900
	Para (b) Relevant foreign earnings (not subject to a foreign tax)	£2,000
	Para (d) Relevant foreign income (not subject to a foreign tax)	£100
Step 2 – Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund	**Para (a)**	£1,900

Step 3 If the amount at Step 2 is equal to or more than the amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain

So E's transfer of £1,000 is treated as coming from her UK employment income; it is not thus a "taxable" remittance when brought to the UK.
Then apply the rules at s809Q ITA 2007 to the next "transfer" to the UK, which is the mortgage payment.

Then apply the rules at s809Q ITA 2007 to the next "transfer" to the UK, which is the mortgage payment

Step 1 – Identify the "amount of transfer" in the relevant year		**£2,000**
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer	**Para (a)** Employment income (UK employment income)	£1,900
	Para (b) Relevant foreign earnings (not subject to a foreign tax)	£2,000
	Para (d) Relevant foreign income (not subject to a foreign tax)	£100
Step 2 – Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund	**Para (a)**	£1,900
Step 3 Where the amount transferred is greater than the amount identified at Step 2 the amount transferred is treated as reduced by the amount identified in Step 2.		£2,000 -£1,900 £100
Step 4 - Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.		
Step 2 - repeated	**Para (b)**	£100

Step 3 If the amount at Step 2 is equal to or more than the amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain

> £1,900 of the transfer is treated as coming from E's UK employment income; it is not thus a "taxable" remittance when brought to the UK. The remaining £100 is treated as a remittance of £100 of E's untaxed overseas earnings.

The HMRC analysis stops here. There are in fact three more debits to analyse, but the reader will have the idea. Note that the incomplete analysis of a bank account with only 15 entries has taken 5 pages. It seems safe to say that these are rules which never have, never can and never will be applied in practice. I expect HMRC will accept any reasonable approximation.

77.7 Income from property held jointly by spouses

Section 836 ITA provides:

> (1) This section applies if income arises from property held in the names of individuals—
>
> (a) who are married to, or are civil partners of, each other, and
>
> (b) who live together.
>
> (2) The individuals are treated for income tax purposes as beneficially entitled to the income in equal shares.

Section 836(3) sets out 7 exceptions, of which the first two are the most important:

> (3) But this treatment does not apply in relation to any income within any of the following exceptions.
> *Exception A* Income to which neither of the individuals is beneficially entitled.
> *Exception B* Income in relation to which a declaration by the individuals under section 837 has effect (unequal beneficial interests).
> *Exception C* Income to which Part 9 of ITTOIA 2005 applies (partnerships).
> *Exception D* Income arising from a UK property business which consists of, or so far as it includes, the commercial letting of furnished holiday accommodation (within the meaning of Chapter 6 of Part 3 of ITTOIA 2005).
> *Exception DA* Income arising from an overseas property business which consists of, or so far as it includes, the commercial letting of furnished holiday accommodation (within the meaning of Chapter 6 of Part 3 of ITTOIA 2005) in one or more EEA states.
> *Exception E* Income consisting of a distribution arising from property consisting of—
> (a) shares in or securities of a close company to which one of the individuals is beneficially entitled to the exclusion of the other, or
> (b) such shares or securities to which the individuals are beneficially entitled in equal or unequal shares.
> "Shares" and "securities" have the same meaning as in section 1117 of CTA 2010.
> *Exception F* Income to which one of the individuals is beneficially entitled so far as it is treated as a result of any other provision of the Income Tax Acts as—
> (a) the income of the other individual, or
> (b) the income of a third party.

77.7.1 *Settlor-interested trust provisions*

The income taxation of joint accounts has been thrown into disarray by the decision in *Bingham v HMRC*.[18] In this case, Mr Bingham ("H") transferred money into an account in the joint names of himself, his wife and his adult children. The object was to ensure that the wife and children had income within their personal allowances. The tribunal held that H

18 [2013] SFTD 689.

remained beneficial owner of the money. H, a solicitor, should have paid more attention to documentation (to declare that his children had the desired interest) and implementation (the children did not hold chequebooks so they could not draw out what was said to be their money from the account). So far this is straightforward.

More intriguingly, even if the children held money in the account beneficially, the tribunal would "likely"[19] have held that H was *still* taxable on all the income under s.624, on the grounds that:

(1) The account was a "settlement" (that is clearly right); and

(2) H had an interest since he could withdraw the funds.

It seems to me that point (2) is wrong. If H draws out money for his own benefit, he only does so with the authority of the joint account holders, and the possibility that a donee may give funds back to the donee does not constitute an interest.[20]

I think it is safe to say that no account has ever been dealt with that way in the history of taxation, and the practical difficulties would be immense. In *Bingham* there was clearly a settlement as H provided all the funds. What if the joint account owners provide funds, but unequally? What if a couple shares an account for ordinary domestic purposes?

The problems would attach to husband and wife accounts: the settlor-interested trust provisions take priority over s.836 ITTOA. The relief in s.626 ITTOIA would not apply. This provides (in short):

> (1) The rule in section 624(1) does not apply in respect of an outright gift—
>
> (a) of property from which income arises,
>
> (b) made by one spouse to the other or one civil partner to the other, and
>
> (c) meeting conditions A and B....
>
> (4) A gift is not an outright gift for the purposes of this section if—
>
> (a) it is subject to conditions, or
>
> (b) there are any circumstances in which the property, ... —
>
> (i) is payable to the giver,
>
> (ii) is applicable for the benefit of the giver, or
>
> (iii) will, or may become, so payable or applicable.

If *Bingham* were right, a payment into a joint account would not be an

---

19 at [62]

20 *Glyn v IRC* 30 TC 321 at p.329; *West v Trennery* [2003] STC 580 at [51] (point not discussed on appeal).

outright gift under the definition in s.626(4) ITTOIA.

These arguments were not put to the Tribunal.

77.7.2 *Remittance basis and spouses joint accounts*

How does this interrelate with the remittance basis? Suppose:

(1) Property is held in the names of H and W, but belongs in equity to H alone.
(2) Section 836 applies so that half the income is deemed to be the income of W.
(3) W is a remittance basis taxpayer.

Income of W arising before 2008/09, being merely deemed income, could not be remitted and could not be subject to tax. But income arising from 2008/09 counts as remitted if it is remitted by H, since H is a relevant person in relation to W.

77.8 Income from other joint accounts

Subject to the special rules for spouses joint accounts,

77.9 Planning implications for joint accounts

The best way to avoid the IHT difficulties described in this chapter is that substantial sums should not be put in joint accounts (except where the account holders qualify for the full IHT spouse exemption).

Joint accounts may be useful as a means of probate planning, as the funds in a joint account are immediately available to the survivor; by contrast, funds in a sole account are not available until probate is obtained, which will involve delay and, often, cost as IHT must be paid upfront in order to obtain probate. In this case, the parties should specify carefully the terms on which the account is held, and (if appropriate) keep a record of who provided the funds so the IHT position is clear.

It is recommended that remittance basis taxpayers do not use foreign joint accounts, if the remittance tracing problems discussed above will arise. There will be no problem if:

(1) no substantial interest accrues to the account;
(2) no remittance is made from the account to the UK;
(3) interest is paid to a separate account from which no remittance is made to the UK; or
(4) interest is paid to separate account of each account holder in equal shares.

CHAPTER SEVENTY EIGHT

ESTATES OF DECEASED PERSONS - CGT

78.1 Succession law background

On the death of a person domiciled in England and Wales ("**the deceased**") their property passes to their personal representatives ("**PRs**").[1] The property is known as **"the deceased's estate"** which where the context is clear may be abbreviated to **"the estate"**.

The PRs pay the debts of the deceased, and taxes. Provided that there are sufficient assets available, they pay pecuniary legacies and transfer property which the deceased has specifically gifted. Finally, they transfer the residue of the estate to the residuary legatees Thus on completion of the administration, the residuary legatee becomes entitled to the assets of the estate, and any income which the PRs have not expended in the period of administration. It is possible for PRs to transfer specific assets before completion of administration.

When PRs transfer an asset to a beneficiary, the formal legal terminology is that they "assent to the vesting of the asset in the beneficiary",[2] which may be abbreviated to **"assent"**. But outside formal legal contexts, we prefer the word "transfer". That seems clearer to readers unfamiliar with succession law terminology; there are some differences between an assent and other types of transfer, but they are not relevant here.

During the period of administration, the PRs alone are said to be entitled to the assets which are comprised in the estate. The beneficiaries of the estate have the right to compel due administration of the estate, but it has been repeatedly held by courts of the highest authority that the

---

1 Further consideration is needed if a foreign law applies: see 78.12 (Succession governed by foreign law).

2 See s.36 Administration of Estates Act 1925, set out at 79.6 (Income from specific legacy).

beneficiaries have no legal or equitable interest in the assets of the estate.[3]

Special taxation rules apply during this period of administration. The rules produce some curious results where the deceased or a beneficiary is a remittance basis taxpayer or non-resident. There can sometimes be considerable scope for tax planning.

I consider CGT and in the following chapter income tax.

The starting point is that PRs are "persons" (though not "individuals") so they are in principle subject to IT and CGT.

Similar issues arise where charities are beneficiaries of estates, as to which see Kessler & Marre, *Taxation of Charities and Nonprofit Organisations*.[4]

78.1.1 *When is administration of estate completed?*

How long does the administration period last? This is a question of succession law, not tax law, but it often arises in tax contexts, including income tax, CGT, and estate duty, and has given rise to a substantial case law.

In *Sudeley v Attorney-General* [1897] AC 11 the Privy Council said:

> The thing that the legatee was entitled to was one-fourth share of a residuary estate, consisting, it may be, of many things; and I think it was fallacious on the part of [counsel] to say that the residue was very nearly ascertained, because the question is not only of amount – although I think that of itself would not be sufficient if it were only of amount – but it is a question of substance as well as a question of amount. It is uncertain until the residuary estate has been ascertained of what it will consist:...
>
> Until the thing has been ascertained, until the trust fund has been constituted, the thing of which the trustees are the trustees has not been ascertained. Whether you treat them, therefore, as trustees or executors, the same consideration arises. Now, if the only thing that the legatee is entitled to is the fourth share of an ascertained residuary estate, I say that to my mind it is impossible to maintain that the character of any part of that estate can be ascertained so as to make it possess a specific locality until that has happened; it is a condition precedent to know what the

---

3 *Sudeley v Attorney-General* [1897] AC 11; this (rather odd) principle was re-affirmed in *CSD v Livingston* [1965] AC 694; for a survey of the cases, see *Re Hemming* [2009] Ch 313. Scots law is the same: *Cochrane's Executors v IRC* 49 TC 299.

4 (9th ed., 2013), Chapters 33 and 34 (Estates of deceased persons), online version *http://www.taxationofcharities.co.uk*.

> residuary estate is, and until that has been ascertained you cannot tell of what it will "consist."

In *IRC v Aubrey Smith* the Court of Appeal cited this and said:

> .... I read all those passages because they appear quite clearly to lay down that until the fact is ascertained, or can or ought to be inferred, that the residue has become defined so that the aliquot portion passing to the beneficiary can also be defined, the beneficiary has not, until that time, a definite interest in the sum which will ultimately fall to him. ... it appears to me as Lord Haldane said in the case I first cited that it is largely a question of fact. ...
> What has to be determined here ... is: Is it clear that the portion of each of the sons is ascertained, or has been ascertained, or is capable of ascertainment, and that ascertainment has been assented to by the executor-trustees?[5]

The important points which emerge from the case law are that PRs continue to hold an asset as PRs until:

(1) they transfer an asset to a beneficiary; or
(2) the administration of the estate is complete (at which point there is an implied assent). For this purpose:
    (a) The estate must be completely ascertained. It remains in the course of administration even though this work is nearly done.
    (b) The fact that debts of the deceased remain unascertained or unpaid is a relevant factor but not decisive.
    (c) The fact that the PRs regard themselves as still administering the estate (producing "estate accounts" and not trust accounts) is a relevant factor but not decisive.
    (d) In a marginal case the issue is said to be one of fact and there is a fairly broad "grey area" in which the courts will not interfere with a decision of the first-tier tribunal.

The TSE Manual provides:

> **TSEM7360 Deceased Persons: Definition Of Period Of Administration** [Dec 2011]
> The period during which the personal representatives are settling the estate is called the period of administration. It starts on the day following the date of death of the deceased person and ends when the personal representatives have taken all the steps necessary to complete

5 15 TC 661 at p.672.

the administration of the estate.

The question of when an administration period ends is essentially one of fact and will depend on individual circumstances. It may in some cases coincide with the date when the residue of the estate can be identified. Sometimes the date of issue of the Inheritance Tax clearance certificate is taken as the date the administration was completed.

You should normally accept that the administration ended on the date the personal representatives tell you it did.

The CG Manual provides:

30700 Period of administration [January 2012]

The period during which the personal representatives are settling the estate is called a period of administration. The period starts with the death of the deceased person. The date on which it ends is a question of fact which is often difficult to resolve. During this period the liability for Capital Gains Tax on sales of assets from the estate falls on the personal representatives unless they have taken specific steps to vest the ownership of the assets involved in legatees in advance of the sale, see CG30910.

When considering when administration is complete the Courts look for a construction of the law that leads to an early conclusion of administration. The leading case in this respect is *IRC v Sir Aubrey Smith* 15 TC 661.

In his judgement Lord Hanworth MR set out a principle of general application when he said, at the bottom of page 675, top of page 676

"The question is, in all cases: has the administration of the Estate reached a point of ripeness at which you can infer an assent, at which you can infer that the residuary estate has been ascertained and that it is outstanding and not handed over merely for some other reason."

On this basis we would normally argue that the period of administration ends when residue has been ascertained, see CG30780+.

30710 Extended period of administration [January 2012]

There are some exceptional cases where all the figures are apparently available to enable residue to be ascertained but it has to be accepted that the period of administration is continuing.

One example is where distributing shares in accordance with legatees' fractional entitlements to residue would result in one legatee receiving a majority shareholding whilst the other legatees would only receive minority holdings. Because of the disparity in values between majority and minority holdings it may be necessary for the personal representatives to apply the rule from *Lloyd's Bank v Duker* [1987] 3 All ER 193. This would require them to sell these shares rather than distributing them in specie.

The period of administration would continue in such a case until the shares were sold and the Capital Gains Tax liability arising to the personal representatives was quantified.

The rule referred to above is of fairly limited application. The fact that a majority shareholding would be broken into minority holdings on distribution should not

be accepted as preventing distribution of shares and thus the ending of the period of administration. Nor should minor valuation differences between minority shareholdings passing to the legatees be accepted as covered by the rule in the *Duker* case.

The period of administration may also be extended where the distribution of the estate is being challenged. The personal representatives may be unable to distribute the estate pending the outcome of litigation.

30720 Confusion over terminology [January 2012]

Even where ascertainment of residue marks the end of the administration period for Capital Gains Tax purposes, assets may remain in the hands of the personal representatives after that date. They may have to carry out administrative acts regarding transfer of assets to legatees. In some cases they may sell assets. If so they will be doing this as bare trustees for the legatees. Personal representatives and their agents sometimes regard these acts as forming part of the period of administration. This may lead to confusion when references are made to the period of administration.

Because of the possible confusion it is important to establish precisely what is meant when a reference is made to a period of administration. From the Inland Revenue's side we can try to avoid this confusion for the majority of cases by referring to events as falling before or after residue has been ascertained rather than simply referring to the period of administration.

30780 Necessary to establish if residue ascertained [January 2012]

There are a number of circumstances where it is important to establish whether residue has been ascertained, see CG30700, because it significantly affects the amount of Capital Gains Tax payable. Depending on the circumstances, the personal representatives and legatees may be arguing for residue having been ascertained at an early date or at a late date.

30781 Early date [January 2012]

If there is a will the personal representatives and legatees may claim that administration has ceased and residue has been ascertained at an early date if:

- the legatees would be liable at a lower rate of Capital Gains Tax than the personal representatives on the disposal of assets in the estate
- have any unused annual exemption that could be used to cover the gains
- the legatee is a charity and any gain on the disposal would be exempt.

You will only see claims under the first two bullet points in cases of intestacy as a charity will not qualify as a legatee under the rules of intestacy.

Applying the rule that assets remain vested in the personal representatives until residue has been ascertained unless specific steps have been taken to vest the assets in advance of ascertainment of residue usually defeats unwarranted claims in this area.

30790 Late date [January 2012]

For the years 2008-09 there will be few cases in which it will be to the taxpayers' advantage to argue that there has been an extended period of administration. This is because the rate of Capital Gains Tax payable by personal representatives is either the same as that paid by the legatees or higher. It cannot be lower. There may be a small advantage if the personal representatives have any unused annual exempt amount and the legatee doesn't or the personal representatives may have

unused losses that will be lost.

Unless it is an exceptional case where there are good reasons for accepting that the period of administration must be extended beyond the date residue is ascertained, see CG30710 – CG30712, you should seek the full facts to enable you to determine when residue became ascertainable. You should then argue that the beneficial ownership of the assets vested in the legatees at that date. As stated in CG30701 the attitude of the Courts is to look for an interpretation that allows administration to be completed at an early date.

Unquantified debts

One claim that is sometimes met is that there is an unquantified debt preventing residue being ascertained. This may not be sufficient to prevent the administration period being treated as at an end. Such a situation was considered in *IRC v Sir Aubrey Smith* 15 TC 661. Lord Hanworth commented at page 674

> 'For my own part I think the question of a mortgage debt or any other debt must take its proper place in perspective. It may be in some cases that that is a factor from which a strong inference may be drawn. It may be on the other hand that the device of leaving a debt unpaid is resorted to in order to pretend that the residue of the estate has not been ascertained and is not ascertainable. If such a device were resorted to in any case it ought to be held ineffective'.

When a Solicitor or other professional person is employed by the personal representatives to deal with the administration of the estate, his or her fees will be one of the estate's debts. Sometimes when personal representatives wish to extend the period of administration they arrange that the Solicitor, etc, does not submit a bill in respect of at least some part of his or her fees. They then argue that this has prevented ascertainment of residue and has caused the period of administration to be extended. Any such claim should be resisted on the basis of the above quotation. It should be contended that the information to quantify the bill must be in the Solicitor's records and that administration should therefore be considered to have ended.

30800 How residue is ascertained [January 2012]

In order to ascertain residue the personal representatives must identify all the assets and liabilities of the estate. They then need to quantify these.

In the case of taxation liabilities this process will start with settling any Income Tax and Capital Gains Tax liabilities to the date of death. If any income arises to the personal representatives or if they realise any chargeable gains during the period of administration they will also need to agree their own liabilities for this period.

As far as Inheritance Tax is concerned the personal representatives will need to agree with HMRC - IHT whether any liability arises and if so in what amount. When seeking a grant of probate or letters of administration (or, in Scotland, a confirmation) the personal representatives have to supply HMRC - IHT with a provisional computation of the Inheritance Tax due. HMRC - IHT will review this and, where necessary, check valuations. When it is either agreed there is no liability to Inheritance Tax or the amount has been quantified HMRC - IHT will issue a clearance certificate. We would not normally accept that residue had been ascertained at a date before the date of issue of a clearance certificate. See

IHTM05001+ for detailed guidance on the Inheritance Tax procedures.

30810 Providing funds [January 2012]

When the assets and liabilities have been quantified the personal representatives have to consider how they can pay

- the estate's liabilities and
- any pecuniary legacies provided for in the will.

If they do not have sufficient liquid funds they will have to sell assets in order to raise funds. (Occasionally they may agree with legatees entitled to pecuniary legacies that the legatee should accept an asset in satisfaction or part satisfaction of the pecuniary legacy).

Disposing of assets may give rise to further Capital Gains Tax liabilities which have to be agreed before residue can be ascertained.

Residue is only ascertained when the personal representatives have both established the net worth of the estate and provided the liquid funds to pay liabilities and pecuniary legacies. Once that point is reached residue is ascertained and it is irrelevant that the assets have not been distributed.

30820 Executor's year [January 2012]

For estates in England and Wales, the personal representatives cannot be compelled to distribute the assets of the estate until at least one year has elapsed from the date of death (Section 44 Administration of Estates Act 1925). This is commonly referred to as the executor's year.

When dealing with a dispute about whether a disposal was by personal representatives in that capacity or in their capacity as bare trustees for legatees we would not normally contend that the disposal was on behalf of the legatees if it took place during the executor's year.

Although personal representatives cannot be compelled to distribute assets during the executor's year there is no bar to them doing so. In a simple estate they may have ascertained residue well before the year ends. If there is evidence that they have done and have then distributed assets to the legatees we can accept that the liability relating to disposals during that year but after the date assets were distributed does lie with legatees.

Scotland

In Scotland the rule is that the personal representatives are entitled to distribute the estate after six months from the deceased's death if they have provided funds for payment of all the estate debts and made reasonable enquiries for claims.

78.1.2 *Importance of assents*

PRs transfer assets to beneficiaries by means of an "assent". The assent is fundamental, since a sale after an assent to a non-resident or a remittance basis taxpayer may in broad terms be free of CGT and a sale before assent may not. (Conversely a sale by non-resident PRs or PRs with losses may be CGT free and a sale after an asset may be taxable.)

An assent of land in England and Wales must be in writing. An assent of other property may be oral or implied by conduct. No formal written assent is required if (say) shares are simply transferred to the name of a

beneficiary by stock transfer form. If shares are registered in the names of PRs (or their nominees), and the legatee wants them to be sold, it may be administratively convenient if an assent is made under which the PRs (or their nominees) become nominees for the legatee. Then the shares can be sold without CGT (assuming a non-resident legatee or if the remittance basis applies) without the formality of a transfer of legal title to the legatee.

78.2 Meaning of "PRs" for CGT

Section 288 TCGA provides:

> "personal representatives" has the same meaning as in the Corporation Tax Acts (see section 1119 of CTA 2010);

Se we turn to s.1119 CTA 2010 which provides a commonsense definition:

> "personal representatives", in relation to a person who has died, means—
>
> (a) in the UK, persons responsible for administering the estate of the deceased, and
>
> (b) in a territory outside the UK, those persons having functions under its law equivalent to those of administering the estate of the deceased.
>
> This is the same as the income tax definition.[6]

78.3 Residence and domicile of PRs for CGT

Section 62(3) TCGA provides:

> In relation to property forming part of the estate of a deceased person
>
> [a] the PRs shall for the purposes of this Act be treated as being a single and continuing body of persons (distinct from the persons who may from time to time be the PRs), and
>
> [b] that body shall be treated as having the deceased's residence and domicile at the date of death.

The residence and domicile of the PRs in their private capacity is irrelevant.

The reference here to domicile is otiose, as there are no provisions where

---

6 See 79.3 (Meaning of "PRs" for income tax). If we had a taxes-act-wide definition the repetition would not have been necessary.

the domicile of PRs matters for CGT purposes; though there have been such provisions in the past.

The definition of "residence" for PRs is different for IT.[7]

78.4 Acquisition by PRs

Section 62(1) TCGA provides:

> For the purposes of this Act the assets of which a deceased person was competent to dispose—
>
> (a) shall be deemed to be acquired on his death by the personal representatives or other person on whom they devolve for a consideration equal to their market value at the date of the death, but
>
> (b) shall not be deemed to be disposed of by him on his death (whether or not they were the subject of a testamentary disposition).

This is the so-called tax-free uplift on death.

The expression "assets of which a deceased person was competent to dispose" is given a commonsense definition in s.62(10) TCGA:

> In this section references to assets of which a deceased person was competent to dispose are references to assets of the deceased which (otherwise than in right of a power of appointment or of the testamentary power conferred by statute to dispose of entailed interests) he could, if of full age and capacity, have disposed of by his will, assuming that all the assets were situated in England and, if he was not domiciled in the UK, that he was domiciled in England, and include references to his severable share in any assets to which, immediately before his death, he was beneficially entitled as a joint tenant.

78.5 Transfer from PRs to beneficiaries

78.5.1 *Transfer from PRs to legatee*

Section 62(4) TCGA provides:

> On a person acquiring any asset as legatee (as defined in section 64)—
>
> (a) no chargeable gain shall accrue to the personal representatives, and
>
> (b) the legatee shall be treated as if the personal representatives' acquisition of the asset had been his acquisition of it.

---

7 See 79.4 (Residence of PRs for IT).

Section 64(2) TCGA defines legatee:

> In this Act, unless the context otherwise requires,
> [a] "legatee" includes any person taking under a testamentary disposition or on an intestacy or partial intestacy, whether he takes beneficially or as trustee, and
> [b] a person taking under a donatio mortis causa shall be treated (except for the purposes of section 62) as a legatee and his acquisition as made at the time of the donor's death.

78.5.2 *Appropriation of assets to beneficiary*

Section 64(3) TCGA provides:

> For the purposes of the definition of "legatee" above, and of any reference in this Act to a person acquiring an asset "as legatee", property taken under a testamentary disposition or on an intestacy or partial intestacy includes any asset appropriated by the personal representatives in or towards satisfaction of a pecuniary legacy or any other interest or share in the property devolving under the disposition or intestacy.

Thus, if PRs appropriate assets in satisfaction of a pecuniary legacy, the beneficiary acquires as legatee. This is so even if the appropriation needs the consent of the beneficiary.[8]

If the PRs had no power of appropriation, then an "appropriation" could be authorised only on the basis that it was in fact a sale of the asset to a

---

8 Although for stamp duty purposes that the transfer of the asset to a legatee amounted to a conveyance on sale where the consent of the legatee is required: *Jopling v IRC* [1940] 2 KB 282. CCAB Statement June 1967 provided:

> "The Revenue stated that in their view [TCGA s.62(4)] does not apply in all cases where assets are transferred to beneficiaries in specie. Where assets are appointed by personal representatives to satisfy a legacy in circumstances where such appropriation requires the legatee's consent, ie where the personal representatives do not have (whether by the terms of the will or under the Administration of Estates Act 1925 s.41) powers of appropriation without consent, the Revenue are advised that the acquisition of the asset has a contractual basis and is not strictly an acquisition qua legatee. In practice, however, the disposal of appropriated assets by the personal representatives to a legatee in these circumstances is not treated as an occasion of charge on the personal representatives provided that both they and the legatee agree that the legatee should be treated as acquiring the assets concerned as legatee for the purposes of [TCGA s.62(4)]."

This was written before the enactment of what is now s.64(3) TCGA (by the FA 1969). This brought the law into line with what was formerly HMRC practice.

beneficiary coupled with a payment of the legacy by way of set-off. In that case, the beneficiary would acquire as purchaser and not as legatee. In practice, PRs will generally have a power of appropriation,[9] so the issue does not arise.

78.5.3 *Appointment to beneficiary by executors under overriding powers*

Where executors exercise a power to appoint trust property to a beneficiary, that beneficiary takes under the appointment "as legatee". This follows from the trust law principle that, for the purposes of the rules relating to perpetuities, where trustees exercise a power of appointment, the deed of appointment is read back into the original trust instrument. It is treated as coming into operation at the date of the instrument that creates the power.[10] This rule has been applied for tax purposes, in a different context, in *Chinn v Collins* the exercise of a power of appointment merely "fills in a blank in the original settlement which left blank how the final distribution of a trust asset was to be made".[11]

Quite apart from that, the beneficiary would take as "legatee" in the general sense of the expression. The definition in s.64(2) is inclusive and not a comprehensive definition. The reason that the beneficiaries take as legatee is that they acquire under an assent. They acquire from the PRs acting in their capacity as PRs.

This conclusion is consistent with the general scheme of the TCGA. A person who acquires under an appropriation acquires "as legatee". It would be anomalous if a person who acquired under an appointment would not. (A power of appropriation is sometimes regarded as a dispositive power: *Re Freeston* [1978] Ch 741, though I would not regard that as an essential point.)

In CG Manual 31432–3 (although one might quibble with the language used) it seems that HMRC accept that an appointee acquires as legatee.

78.5.4 *Transfer to trustees of will trust*

If the will appoints non-resident trustees, the PRs may transfer the assets to the trustees without a CGT charge.

If the will appoints UK resident trustees, the PRs may transfer the assets to the trustees but the trust will be within the charge to CGT. If non-

---

10 *Muir v Muir* [1943] AC 468; *Pilkington v IRC* 40 TC 416 at 441.

11 54 TC 311 at p.357.

resident trustees are subsequently appointed, there will in principle be an exit charge.

It should normally be possible to arrange that:

(1) The PRs appoint that the assets are to be transferred to trustees of a new non-resident trust.

(2) The PRs then transfer the assets to the non-resident trustees.

As long as this is done during the administration of the estate, the assets may then become held in a non-resident trust without a charge to CGT.

78.6 Deceased not UK resident

If the deceased was not UK resident at the time of their death (regardless of domicile) the PRs are in principle outside the scope of CGT.[12]

78.6.1 *Is an estate a "settlement" within s.87 TCGA?*

Is a deceased's estate is a "settlement" for the purposes of s.87? The question matters, because if an estate were a "settlement" then:

(1) Gains accruing to non-resident PRs would be s.2(2) amounts (trust gains) for the purposes of s.87 TCGA; so

(2) Capital payments from the PRs to UK resident beneficiaries would in principle be subject to tax under s.87; and

(3) If the will created a will trust, or made a gift to a lifetime trust, unmatched s.2(2) amounts of the PRs would be transferred to the trust on completion of the administration of the estate.[13]

The word "settlement" is used with different definitions; in the terminology of this book:

(1) The **"standard IT/CGT definition"** (a classic settlement).

(2) The "**settlement-arrangement**" definition.[14]

An estate is not a settlement in the standard IT/CGT sense. If the will creates a will trust, a settlement in the standard IT/CGT sense comes into existence when the administration is complete (or if property is transferred to the trustees sooner). However, s.97(7) TCGA provides the settlement-arrangement definition,[15] so the question is whether an estate may be a settlement-arrangement.

---

12 See 49.1.2 (CGT residence condition).

13 See 51.32 (Rebasing: transfers between trusts).

14 See 80.2.1 (Terminology) and 80.2.3 (Settlement-arrangement definition of "settlement").

15 This provides: "settlement" has the meaning given by s.620 of ITTOIA.

In *IRC v Buchanan* 37 TC 366 at p.374, Lord Goddard said:

> I do not think for a minute that a will of a testator comes within section 20[16] at all; it is not a settlement to which the Act applies.

Lord Goddard did not actually say that a will is not a settlement-arrangement but if that is what he meant, the comment was *obiter* and surprising. One might have thought that an estate is a "settlement" in the sense of "arrangement". There is an element of bounty in that the deceased decides who should benefit (or by not making a will, decides that the intestacy rules should apply). However, Lord Goddard's comment was loyally followed.[17] Accordingly CG Manual is right to provide:

> **14590 Connected persons: Trustees** [January 2010]
> A will trust cannot be a Settlement for these purposes [for the purposes of the settlement-arrangement definition].

Similarly, the Company Taxation Manual provides:

> **60150 Tests: Associates** [November 2011]
> On the authority of *Willingale v Islington Green Investment Co* 48 TC 547, a settlement [under the settlement-arrangement definition] does not include a will trust.

For this reason an estate is not a "settlement" within s.87.

This is in fact the sensible result. The scheme of s.87 is designed with trusts in mind and would not work well if extended to estates:

(1) Suppose a will left legacies to (UK resident) legatees, and the residue on trust ("the will trust"). It would be odd if the legatees were subject to CGT under s.87 by reference to gains accruing to the estate, or, subsequently, to the will trust. But that would (almost[18]) necessarily follow, if the estate were a settlement-arrangement.

(2) Suppose a testator left their estate for such of their children as attain the age of 30, and one child reaches that age before death, or during the period of administration. The executors would transfer half of the estate to the older child and (on completion of administration) hold

---

16 Section 20 FA 1943, the predecessor of s.644 ITTOIA.

17 *Willingale v Islington Green Investment* 48 TC 547 at p.556. (The point was not argued on appeal.)

18 A possible way to avoid this unsatisfactory result might be to say that assent of a legacy is not a "capital payment"; but that is a stretch, given the definition that payment includes the transfer of an asset.

> the other half on trust for the younger child until it reached the vesting age. It would be odd if the older child were subject to CGT under s.87 by reference to gains accruing to estate, or to the younger child's will trust fund.

I have considered one possible argument to the contrary. Section 87(6) TCGA provides:

> For the purposes of this section a settlement arising under a will or intestacy shall be treated as made by the testator or intestate at the time of death.[19]

This wording does *not* deem an estate to be a settlement for s.87 purposes. The wording makes sense if one reads it in the context of original s.87 provisions, in the FA 1981. At that time, "settlement" was not expressly defined; for s.87 purposes (what I call) the standard IT/CGT definition applied. So in 1981 it was clear that an estate was not a settlement, and that a will trust was a settlement. However there would be doubt as to who was the settlor of the will trust, and when that settlement was made. These matters are resolved by (what is now) s.87(6). The provision is still needed: the identity of the settlor and domicile at the time of making the settlement are still relevant for s.87, though the relevance is now for transitional relief only.

Another effect of s.87(6) now is to make it clear that a will trust is a settlement for the purposes of s.87.

78.6.2 *CGT planning for estate of non-resident testator*

The estate of a non-resident testator is in principle a CGT free vehicle.

In principle, it would be desirable to arrange that gains accrue to PRs during the period of administration, and not to beneficiaries subsequently. If the PRs transfer assets to UK residents who sell the assets, the gain on the disposal is chargeable in full or on the remittance basis. If the PRs transfer assets to non-resident trustees, who sell the assets, the gain is a s.2(2) amount (trust gain). If the will creates a will trust, the trust comes into the scope of s.87 when administration of the estate is completed (or when property is transferred to the trust, if sooner).

By contrast, assets with losses should be transferred to beneficiaries of the estate *in specie*.

---

19 The wording was previously in s.97(7) TCGA but moved in the 2006 reforms.

It may also be desirable to extend the administration period as long as possible.

If a will creates a will trust, it may be desirable that capital payments are made by the PRs, during the period of administration, not by trustees subsequently. If the trust fund is entirely distributed, no settlement ever comes into existence and s.87 does not operate.

Suppose:

(1) A will creates a discretionary will trust.
(2) The PRs exercise their powers[20] to make a distribution to a beneficiary during the administration period.

There is (at the time) no settlement and s.87 charge. After the completion of administration, the capital payment is not matched to future s.2(2) amounts (trust gains) of the trust. It is considered that s.87(6) TCGA does not retrospectively alter the position. That is not the purpose of the deeming provision.

The position is different if:

(1) A will makes a gift to a separate trust ("the lifetime trust").
(2) The trustees of the lifetime trust exercise their powers to direct the PRs to make a distribution to a beneficiary during the administration period.

That is a capital payment from the trustees of the lifetime trust, which can be matched to trust gains of the lifetime trust and so give rise to a s.87 charge on the beneficiary. An Instrument of Variation may be appropriate.

78.7 Gain accruing to non-resident company held by non-resident PRs

Suppose:

(1) PRs hold a non-resident company.
(2) The company disposes of an asset and realises a gain, which I call "the company gain".

78.7.1 *Position of company and PRs*

The company is in principle not subject to tax on the company gain because it is not UK resident.

The PRs are participators. But if they are not UK resident, they are not treated as if the company gain had accrued to them. The condition in s.13(2)[a] TCGA is not satisfied.

---

20 It is assumed that the PRs have power to do this.

78.7.2 *Position of legatee*

Assume that under the terms of the will the shares pass to a legatee. Is it possible that the legatee should be treated as if the company gain accrued to the legatee, so that:

(1) a UK resident legatee would be subject to tax on the gain under s.13(2) TCGA; or

(2) a non-resident trust legatee would be treated as receiving a s.2(2) amount (trust gain) under s.13(10) TCGA?

78.7.3 *Position of legatee during period of administration*

The first question is whether, at the time the gain accrues to the company (while the estate is still in the course of administration) the legatee is a participator. Section 13(12) TCGA provides:

> In this section "participator", in relation to a company, has the meaning given by section 454 of CTA 2010.

A legatee is a participator under this definition.[21]

However s.13(3) TCGA (identifying the part of the chargeable gain which is deemed to accrue to the participator) provides:

> That part shall be equal to the proportion of the gain that corresponds to the extent of the participator's *interest* as a participator in the company.

Residuary[22] beneficiaries of an estate have no legal or equitable interest in the assets of the estate.[23] They have the right to enforce its proper administration but that right is not properly described as an "interest" in the assets. It is therefore considered that during the period of administration the legatee does not have an "interest" as a participator.[24]

---

21 See 85.17.5 (Personal representatives and beneficiaries of estates).

22 There is however no difference between residuary beneficiaries and specific legatees. The origin of the principle that a residuary legatee has no "interest" in the estate is historical: until the mid 19th century, estates were administered in the ecclesiastical courts and not the Chancery courts. That reasoning would apply to a specific legatee as to a residuary legatee.

23 See 78.1 (Succession law background).

24 See *Willingale v Islington Green Investment* 48 TC 547 at p.562D.
The expressions used in s.13(3) are partially defined in s.13(13):
In this section—
(a) references to a person's interest as a participator in a company are references to

Thus it does not matter that they are participators because nothing can be attributed to them under s.13.

The context can show that the word "interest" is to be understood in a loose or non-technical sense, in which case it might include the rights of a beneficiary of an estate. But there is no reason here to say the word is used loosely or non-technically. My conclusion is supported by the fact that it is not clear what would be the "just and reasonable" apportionment of the gain as between UK resident PRs and legatees. Also if the will creates a will trust, the trust does not come into existence until completion of the administration of the estate.

78.7.4 *Position of legatee on transfer of the shares*

That is not the end of the matter. Normally, on the completion of the administration of the estate the PRs will transfer the shares to the legatee. What is the position of the legatee then?

The legatee is treated as having acquired the shares on the death.[25] Does this apply for the purposes of s.13 TCGA, so the legatee is retrospectively treated as if the company gain accrued to them?

We first consider the position of a residuary legatee, and consider a specific legatee separately below. For a residuary legatee, it is the old question of how far one carries through the deeming in the TCGA.[26] In principle, one carries the deeming all the way and retrospectivity would then follow. However, several difficulties then arise:

(1) Suppose the PRs were UK resident. They would have been taxed in the first instance on the company gain under s.13 TCGA. There is nothing to give them relief on their subsequently transferring the shares to a legatee. (Section 62(4)(b) TCGA states that the *legatee* shall be treated as if the PRs acquisition had been theirs. It makes no comment about the position of the PRs. Relief might perhaps be

---

the interest in the company which is represented by all the factors by reference to which he falls to be treated as such a participator; and

(b) references to the extent of such an interest are references to the proportion of the interests as participators of all the participators in the company (including any who are not resident in the UK) which on a just and reasonable apportionment is represented by that interest.

Section 13(13)(a) does not turn a legatee's right into an "interest" if it is not already an interest.

25 See 78.5.1 (Transfer from PRs to legatee).

26 See App 2.1 (Construction of deeming provisions).

implied, but the approach of the House of Lords in *R v Dimsey & Allen* suggests that it should not.)

(2) Another problem would arise if the PRs receive a dividend from the company, before distributing the shares to the legatee. The legatee would receive the shares but the company at that time may no longer hold funds representing the gain, so it would not be fair that the company gain should be treated as accruing to the legatee. Company distribution relief[27] would not work properly.

(3) There would be an anomalous distinction between:
   (a) an assent of the shares (s.13 applies to the legatee); and
   (b) sale (or liquidation) of the company and assent of the proceeds to the legatee (s.13 TCGA does not apply).

For these reasons it is suggested that the deeming of s.62(4)(b) TCGA does not extend to deem the legatee to receive the company gains under s.13. This construction is also consistent with the limited view of the deeming provision taken in *Marshall* v *Kerr* 67 TC 56.

The arguments are more finely balanced in the case of a specific legacy. In that case, the assent operates retrospectively, as a matter of general law, at least, unless the assent otherwise provides.[28] But it would be anomalous if there were a distinction between a specific legatee and a residuary legatee, and it is suggested that no distinction should be drawn between the two cases.

78.8 Capital payment from company held by estate

Suppose:

(1) An estate holds shares in a non-resident company.[29]

(2) Under the will, the shares are pass to a non-resident trust ("the lifetime trust").

(3) The company makes a capital payment to a beneficiary. This may happen, for instance, if an interest free loan is left outstanding.

The capital payment may be provided directly or indirectly by the lifetime trust, in which case it is potentially subject to tax under s.87 like any other capital payment.

If that is not the case, the capital payment may be deemed to be provided

---

27 See 53.23 (Company distribution relief) .

28 See 79.6 (Income from specific legacy).

29 Similar issues could arise for a UK resident company, but in practice a payment from such a company is less likely to be a capital payment.

by the lifetime trust, under s.96(1) TCGA.[30] That will be the case if the company is "controlled" by the trustees, in the defined sense.

78.9 Deceased UK resident

If the deceased was UK resident and domiciled, the PRs are UK resident and domiciled, and so subject to CGT on all chargeable gains (less losses).

78.9.1 *Deceased UK resident, not UK domiciled*

Suppose at the time of death the deceased was UK resident but foreign domiciled. The PRs are treated as UK resident but not UK domiciled. CG Manual provides:

> **30660 Remittance basis not in administration period** [October 2013] If the deceased was resident and/or ordinarily resident[31] but not domiciled in the UK before his or her death, then on disposing of assets outside the UK he or she would have benefited from the application of the remittance basis in S.12 TCGA ... . Although the PRs have the same residence and domicile status as the deceased had, if they realise chargeable gains from disposals of assets situated outside the UK but do not remit those gains to the UK immediately they cannot benefit from this treatment. This is because the remittance basis applies only to individuals but S.65(2) says that the body of PRs is not to be treated as an individual.

This remains valid after the 2008 reforms. At first sight this seems surprising, but on reflection, it is not absurd to draw a distinction between:
(1) a UK resident foreign domiciled individual, taxed on the remittance basis, and
(2) the PRs of that individual, taxed on an arising basis.

A remittance basis makes less sense for PRs whose role is generally short term.[32]

---

30 See 51.8 (Capital payment from close company).

31 [Footnote original] For 2013-14 and subsequent years ordinary residence does not need to be considered.

32 It has been argued that the HMRC view is wrong. The argument was largely based on the supposed anomalous position of PRs. Following the 2008 reforms, the anomalies work the other way (for if the remittance basis applied, it would be anomalous that PRs did not pay the remittance basis claim charge). The argument would require the word "individual" in s.12(1) TCGA to be construed so as to include PRs, which is contrary to general statutory usage. So I do not think the argument now merits serious attention (but readers can find further discussion in the 2008/09 edition

Of course, if the PRs are actually outside the UK, especially if they are outside the EU, HMRC may not, in practice, be able to recover the tax.

DTR is in principle available to treaty non-resident PRs, which may solve this problem.

78.10 CGT planning for UK resident PRs

If PRs sell assets in the period of administration, then any gain will be subject to CGT, even though the net proceeds of sale will in due course pass to a remittance basis taxpayer. If, by contrast, PRs transfer an asset *in specie* to a legatee, then the PRs will not realise any chargeable gain but the base cost of the recipient beneficiary will be that of the PRs.[33] Where the legatee is a remittance basis taxpayer (or a non-UK resident, or a charity), they will often be able to dispose of the asset free of CGT.

It is thus a fundamental principle of CGT planning that PRs should generally avoid, wherever possible, making disposals of assets which pass under the will to remittance basis taxpayers, non-residents or charities, if a gain (less losses) arises on the disposal.

Suppose that a remittance basis taxpayer is entitled to a pecuniary legacy of £1m under a will. The estate holds a foreign situate asset which had a value of £600k at the date of the death of the deceased and which is now worth £1m. If the PRs sell the asset in order to pay the legacy, they will be liable to CGT. This liability can be avoided by the PRs agreeing to transfer the property to the legatee in satisfaction of their pecuniary legacy.

Suppose the PRs inherit an asset belonging to the deceased which is the subject matter of a specific gift in their will; that they then sell the asset, the sale giving rise to a charge to CGT, and that they subsequently transfer the whole or part of the proceeds of sale to the specific legatee.[34] So if there is such a sale, the PRs bear the CGT and transferring the proceeds of sale to the remittance basis taxpayer does not confer any exemption.

It may be necessary to sell some assets to pay liabilities of the PRs, and

---

of this work).

33 See 78.5 (Transfer from PRs to beneficiaries).

34 Income tax sometimes applies the common law doctrine of relation back; see 79.6 (Income from specific legacy). But this does not apply here. This doctrine would operate only where an asset owned by the deceased is subsequently transferred to the legatee. In any case, the express provisions of the TCGA deal so comprehensively with the situation that any application of the doctrine of relation back to CGT is by necessary implication excluded.

it may be that the assets available for sale will give rise to a chargeable gain.

One solution is as follows:

(1) The PRs transfer the asset to the beneficiary subject to a charge for their liabilities under s.36(10) Administration of Estates Act 1925.
(2) The beneficiary then sells the asset: any gain on the sale accrues to the beneficiary: s.26(2) TCGA.
(3) Under the charge the proceeds are used to pay the PRs' liability.

78.11 CGT planning by IoV

Where there is more than one residuary legatee and some are remittance basis taxpayers, non-residents or charities, it would often make sense for assets with inherent capital gains to be transferred to them rather than to UK resident and domiciled individuals. This can often be done by means of an appropriation under s.41 Administration of Estates Act 1925, but (depending on the terms of the will) an instrument of variation may be necessary. The variation must be made within two years of the death of the deceased.

The basic strategy should be to redirect foreign assets of the estate with inherent capital gains to the remittance basis taxpayer. UK resident and domiciled beneficiaries would instead receive cash or assets without inherent gains. The remittance basis taxpayer might in due course realise the gains free of tax. There would be an overall tax saving, which could be shared between the remittance basis taxpayer and the other beneficiaries by negotiation, or which could be allowed to accrue entirely to the remittance basis taxpayer if the other beneficiaries were so minded.

78.12 Succession governed by foreign law

Further consideration is needed if the succession is governed by a foreign law. Section 62(1) TCGA provides:

> For the purposes of this Act the assets of which a deceased person was competent to dispose—
>
> (a) shall be deemed to be acquired on his death by the personal representatives *or other person on whom they devolve* for a consideration equal to their market value at the date of the death...

In civil law jurisdictions, property devolves directly on the beneficiary without the intervention of PRs during an administration period. *Bentley*

v Pike 53 TC 590 concerned the position under German law (the deceased having died intestate owning a share of land in Germany). The evidence showed:

> ... the principle of *Universalsukzession* ... means that on the death of a person, his or her entire property passes immediately and automatically to his or her heirs. ... No distinction is made between movable and immovable property: on the death of the deceased person both types of property are automatically and without any interval in time or any further outward action of any kind vested in the heirs, whoever they may be, no matter whether they are known or whether it is necessary to take steps to ascertain their identity.

In these circumstances, the ownership of the property devolved on the beneficiary immediately on the death. The gain on the subsequent sale of the property therefore accrued to the beneficiary and not to the German equivalent of PRs.

However the position may be fact sensitive, and one should not assume that all civil law jurisdictions are the same. In Quebec, the executor's seizen has priority over the legatee, and income and gains during the administration period accrue to the executor, not the legatee;[35] so it seems that for UK tax purposes too, gains should be regarded as accruing to PRs and not the legatee.

CHAPTER SEVENTY NINE

ESTATES OF DECEASED PERSONS: INCOME TAX

79.1 Income taxation of estates: Introduction

This chapter considers the income taxation of personal representatives and beneficiaries of estates of deceased persons. A full discussion needs a book to itself. I try to focus on matters closest to the themes of this book, but that can only be done in the context of a more general discussion of the rules.

I do not consider the equivalent provisions applicable for corporation tax which would apply to corporate beneficiaries.

79.2 *Cross references*

The following points are considered elsewhere:
14.2 (Location of source of income: Territorial scope of It)
78.1 (Succession law background).

79.3 Meaning of "PRs" for income tax

Section 989 ITA provides a commonsense definition of PRs:

> The following definitions apply for the purposes of the Income Tax Acts—
> "personal representatives" in relation to a person who has died, means—
> (a) in the UK, persons responsible for administering the estate of the deceased, and
> (b) in a territory outside the UK, those persons having functions under its law equivalent to those of administering the estate of the deceased.

There is no rule for IT purposes that PRs are a single and continuing body of persons separate from the persons who are actually the PRs. This is anomalous, for such a rule applies to PRs for CGT and applies to trustees

for both taxes.[1] It is suggested that there should be a rule. However it will not often matter.

79.4 Residence of PRs for income tax

One must identify the PR's actual place of residence in their personal capacities, applying the statutory residence test to PRs who are individuals,[2] and the corporate residence test to corporate PRs.

PRs are UK resident for income tax if they are all UK resident in their personal capacity. They are non-resident if they are all non-resident in their personal capacity. HMRC agree. Form SA906(Notes) 2013 (Notes on form SA906 Trust and Estate Non-residence 2012/13) provides:

> ***Deciding the personal representatives' residence status for Income Tax purposes***
> You can find out the personal representatives' residence status for Income Tax purposes by working through Questions 4 to 6.
> 4. Were **all** the personal representatives resident in the UK throughout the year to 5 April 2013?
> If 'YES', the personal representatives as a whole are resident in the UK for Income Tax purposes. Tick box 6.1 [Resident in the UK for Income Tax purposes]. Go to Question 7.
> If 'NO', go to Question 5.
> 5. Were **all** the personal representatives not resident in the UK throughout the year to 5 April 2013?
> If 'YES', the personal representatives as a whole are not resident in the UK for Income Tax purposes. Tick box 6.2 [Not resident in the UK for Income Tax purposes.] Please also complete boxes 6.7 to 6.12 as appropriate. Go to Question 7.
> If 'NO', go to Question 6 [mixed resident PRs].[3]

The position where an estate has both resident and non-resident PRs is governed by s.834 ITA:

> (1) This section applies for income tax purposes if the personal representatives of a deceased person ("D") include one or more persons who are UK resident and one or more persons who are non-UK resident.
> (2) If the following condition is met, the person or persons who are non-UK resident are treated, in their capacity as personal representatives, as

---

1 See 78.2 (Meaning of "PRs" for CGT).

2 See 4.2.1 (Residence of trustees and personal representatives).

3 Accessible *http://www.hmrc.gov.uk/worksheets/sa906-notes.pdf*.

> UK resident.
> (3) The condition is that when D died D was UK resident or domiciled in the UK.
> (4) If that condition is not met, the person or persons who are UK resident are treated, in their capacity as personal representatives, as non-UK resident.

Thus it is possible to arrange that PRs are not UK resident for income tax purposes. All of the PRs must be non-resident in their private capacities, (except in the case of a non-resident non-domiciled testator where only one PR need be non-resident).

There are no statutory rules for domicile but the domicile of PRs will not often matter for IT purposes.

The position is different for CGT.[4]

79.4.1 *Death before 2013: 2013 transitional rule*

Prior to 2013, s.834(3) ITA provided:

> (3) The condition is that when D died D was UK resident, ordinarily UK resident or domiciled in the UK.

The underlined words were deleted by para 67(1) sch 46 FA 2013. Para 67(2) provides a transitional rule:

> (2) The amendment made by this paragraph does not apply if D died before 6 April 2013.

79.5 Income taxation of PRs

PRs are "persons" and so pay income tax at the basic rate (or dividend ordinary rate) on the income of the estate if:

(1) the PRs are UK resident, or
(2) the income has a UK source.

79.5.1 *Foreign domiciled testator*

Form SA 906(Notes) 2014 (Notes on form SA 906 Trust and Estate Non-residence 2013/14) provides under the heading "Personal representatives: application to Income Tax":

> [1] If the personal representatives are resident in the UK, their taxable income will depend on the domicile of the deceased, whose estate is

4 See 78.3 (Residence and domicile of PRs for CGT).

> being administered, at the date of death.
> [2] If the deceased was domiciled in the UK, then the personal representatives will be taxable in the normal way on both UK and overseas income.
> [3] If the deceased was domiciled outside the UK, they will only be taxable on UK income. In such circumstances, you should not include such income. Please also tick box 6.6.[5]

Point [3] is not right as a matter of law. UK resident PRs are as a matter of law liable to income tax on foreign income regardless of the domicile of the deceased. (Domicile of the deceased is sometimes relevant to the separate question of whether PRs are UK resident, but it is possible for a foreign domiciled deceased to have UK resident PRs.)

One is nevertheless entitled (perhaps bound) to assume that HMRC mean what they say, in a document as formal as guidance notes to a tax return, unless it is clear that there has been a blunder, that is, if it is clear that they cannot mean what they say. HMRC clearly do mean what they say as they say it more than once and have said it for many years.[6]

There is therefore an informal concessionary practice. A concession is logical where the beneficiary of the estate is non-resident since income tax paid on foreign income would be reclaimed later when the income is paid to the beneficiary. The concession does raise a puzzle where the beneficiary is UK resident and the income is paid to the beneficiary: one might think that the foreign income should not be taken into account in computing the beneficiary's estate income, but that must be too good to be true. I think the effect of the concession should be to treat the PRs as non-resident for IT purposes and that should be followed through for payments made by the PRs (who therefore constitute a foreign estate). Thus a payment of the income to a UK resident beneficiary is taxable under the estate income regime, but a payment to a non-resident (or treaty non-resident) is not.

---

5 Accessible *http://www.hmrc.gov.uk/worksheets/sa906-notes.pdf.* The reference is to box 6.6 in form SA906 (Trust and Estate Non-residence) which reads: "Tick box 6.6 if the deceased whose estate is being administered was domiciled outside the UK at the date of death".

6 The point has been made in the equivalent notes going back at least to the 2005 notes. Similar wording is found in form SA904(Notes) (Notes on form SA904 Trust and Estate Foreign 2013/14) under the heading "Special circumstances – Personal representatives."

79.6 Income from specific legacy

This section considers the position where a testator by their Will gives specific assets to a beneficiary.

In the first instance, the PRs will acquire the assets and they will receive the income arising from them. If they do not need to use the assets or income for the purpose of paying debts, taxes, etc., the PRs will in due course transfer the assets and income to the beneficiary (the formal legal terminology is that the PRs "assent to the vesting of the assets in the beneficiary").

In the first instance, the PRs usually pay tax at the basic rate (or dividend ordinary rate) on income arising from the assets. If the PRs asset and its income vesting in the beneficiary, something rather peculiar happens. The beneficiary is deemed to have been the owner of the asset since the death. The assent is said to "relate back" - that is, it operates retrospectively. For personal property this is a common law rule; for land, it is in s.36 Administration of Estates Act 1925 which provides:

> (1) A personal representative may assent to the vesting, in any person who (whether by devise, bequest, devolution, appropriation or otherwise) may be entitled thereto, either beneficially or as a trustee or personal representative, of any estate or interest in real estate to which the testator or intestate was entitled ....
> (2) The assent shall operate to vest in that person the estate or interest to which the assent relates, and, unless a contrary intention appears, the assent shall relate back to the death of the deceased.

This rule operates for income tax purposes: *IRC v Hawley* 13 TC 327. The beneficiary will, retrospectively, be treated as having received the income year by year as it arose and the PRs will be treated as if they had not received it. The PRs may have paid UK tax. This will retrospectively be treated as being paid by the PRs on behalf of the beneficiary. Thus a beneficiary who is a remittance basis taxpayer can reclaim tax paid by UK resident PRs on unremitted foreign income. A non-resident beneficiary can also reclaim tax (it is not necessary to rely on ESC A14).

TSE Manual provides:

> **7490 Beneficiaries of estates: legacies** [December 2011]
> *Tax rules for specific legacies.*
> A legacy may take the form of an asset that does not produce income – for example a picture or a piece of jewellery. The beneficiary does not receive income and has no tax liability in respect of the legacy.

Other assets can produce income – for example a bank account, shareholding or land. The general rule is that the beneficiary is entitled to the income arising to that asset from the death of the deceased person. Sometimes however the personal representatives may by law be entitled to use the income for some other purpose.

If the beneficiary gets the income it should be treated as his income for the year in which it arises. The authority for this is *IRC v Hawley* 13 TC 327. The beneficiary cannot however be taxed on or given repayment on income that he did not receive.

79.7 Income from residuary estate

During the period of administration, the PRs alone are entitled to the assets in the residue of the estate and its income. On completion of the administration, the residuary legatee becomes entitled to the assets which at that time form part of the estate, and any income which the PRs have not expended in the course of administration. It is possible for PRs to transfer specific assets to a beneficiary before completion of administration.

In order to appreciate the income tax law it is helpful to understand its history. In *R v Special Commissioners, ex p. Dr Barnado's Homes* 7 TC 646, the residuary legatee was a charity. Income arose to the PRs during the period of administration on which the PRs paid income tax. The residuary legatee was not entitled to the income of the residuary estate as it arose during the period of administration, so it could not at that time reclaim income tax paid. Instead it sought to recover the tax when it actually received the income, on completion of administration. The House of Lords held that although the sum received by the charity represented (or was derived from) the PR's income, it was received by the charity as a capital receipt (like accumulated income of a trust). The payment on the completion of administration did not operate retrospectively, the PR's income could not be treated as arising to the residuary legatee. So income tax paid by the PRs could not be recovered by the charity. The rule that an assent of a specific legacy relates back to death was not extended to gifts of residue. The reader may think that the charity had the better argument.[7] But that is now of academic interest: the law is settled.

---

7 See Nitikman, "The Forgotten Law of Assent" Trusts & Trustees, Vol. 18, No. 7, August 2012, p.672. Perhaps the House of Lords was motivated by the (unmentioned) policy argument that any other decision would be inconvenient to the point of unworkable in practice. If so they were right, as the tax rules which have

That was a victory for the Revenue, who were no doubt unperturbed about the unfairness to the charity. But subsequently, predictably, individual residuary legatees successfully contended that they were not liable to super-tax (which became surtax in 1927 and is now higher rate tax) on the income of a residuary estate arising during the administration period.[8] The Revenue then realised they had made a rod for their own back. Legislation was therefore brought in which is now to be found in Chapter 6 Part 5 ITTOIA.

79.8 Absolute/limited/discretionary interest in residue

The legislation distinguishes absolute/limited/discretionary interests in residue.

79.8.1 *Absolute interest in residue*

Section 650(1) ITTOIA provides a fairly commonsense definition:

> A person has an absolute interest in the whole or part of the residue of an estate for the purposes of this Chapter if—
>
> (a) the capital of the residue or that part is properly payable to the person, or
>
> (b) it would be so payable, if the residue had been ascertained.

79.8.2 *Limited interest in residue*

Section 650(2) ITTOIA provides a fairly commonsense definition:

> A person has a limited interest in the whole or part of the residue of an estate during any period for the purposes of this Chapter if—
>
> (a) the person does not have an absolute interest in it, and
>
> (b) the income from it would be properly payable to the person if the residue had been ascertained at the beginning of that period.

In practice the usual example of a limited interest is a life interest.

79.8.3 *Discretionary interest in residue*

Section 650(3) ITTOIA provides a fairly commonsense definition:

> A person has a discretionary interest in the whole or part of the residue

---

replaced their decision do not work: see 79.22 (Reforming the income taxation of estates: Commentary).

8 eg *Corbett v IRC* 21 TC 449. There are several income tax cases on the issue of whether administration was completed.

of an estate for the purposes of this Chapter if—

(a) a discretion may be exercised in the person's favour, and

(b) on its exercise in the person's favour any of the income of the residue during the whole or part of the administration period (see section 653) would be properly payable to the person if the residue had been ascertained at the beginning of that period.

Section 650(4), (6) ITTOIA defines "properly payable" and s.650(5) deals with the situation where PRs have an interest in another estate.

79.9 "UK estate" and "foreign estate"

The legislation distinguishes "UK estates" and "foreign estates". The distinction matters for two purposes:

(1) Computation of the basic amount.

(2) Source of income (relevant to remittance basis taxpayers and non-residents).

These terms are defined in s.651(1) ITTOIA:

> "UK estate", in relation to a tax year, means an estate[9] which meets conditions A and B, or condition C, for that year, and
> "foreign estate", in relation to a tax year, means an estate which is not a UK estate in relation to that year.

I refer below to "**estate conditions A to C**". Unfortunately these conditions are in a tangle.

An estate may be a UK estate in one year and a foreign estate in another year. The question must be addressed each year.

79.9.1 *Estate conditions A and B*

Section 651 ITTOIA provides:

(2) Condition A is that all the income of the estate either—

(a) has borne UK income tax by deduction, or

(b) is income in respect of which the personal representatives are directly assessable to UK income tax for the tax year.

(3) Condition B is that none of the income of the estate is income for which the personal representatives are not liable to UK income tax for

---

9 Section 649(2) ITTOIA provides a commonsense definition of "estate":
In this Chapter—
"estate" means the estate of a deceased person (whether a UK estate or a foreign estate).

the tax year because they are not UK resident.

79.9.2 *Disregarded income and estate condition C*

Section 651(4) ITTOIA provides:

> For the purposes of conditions A and B sums within section 680(3) or (4) (sums treated as bearing tax) are ignored.

The list of disregards in s.680 ITTOIA is as follows:

> (3) The following sums are treated as bearing income tax at the dividend ordinary rate—
>
> (a) a sum charged under Chapter 3 of Part 4 (dividends etc. from UK resident companies etc.), or
>
> (b) a sum that is part of the aggregate income of the estate because of falling within—
>
> (i) section 664(2)(c) (stock dividends), or
>
> (ii) section 664(2)(d) (release of loan to participator in close company where debt due from personal representatives).
>
> (4) A sum that is part of the aggregate income of the estate because of falling within section 664(2)(e) (gains from life insurance contracts etc) is treated as bearing income tax at the basic rate.

It is convenient to have a term to describe these categories of income, so I call it "**disregarded income**".

Why is this income disregarded? Prior to 1996, s.233(1) ICTA 1988 (repealed) provided:

> *Where in any year of assessment the income of any person, not being a company resident in the UK, includes a distribution in respect of which that person is not entitled to a tax credit*
>
> *(a) no assessment shall be made on that person in respect of income tax at the basic rate on the amount or value of the distribution ...*

Thus non-resident PRs who received dividend income would not be assessable and so would count as a foreign estate.

Section 651(5) ITTOIA provides:

> Condition C is that the aggregate income of the estate for the tax year consists only of sums within section 680(3) or (4).

79.9.3 *Examples*

If the PRs are UK resident:

(1) Estate condition A is satisfied (the PRs are directly assessable to IT).

(2) Estate condition B is satisfied[10]

so the estate is a UK estate.

If the PRs are UK resident but the testator was foreign domiciled, it appears that the estate is by concession treated as a foreign estate.[11]

If the PRs are non-resident, and have some foreign source income:

(1) Estate condition A is not satisfied (some of the PR's income is not taxable).
(2) It does not matter whether estate condition B is satisfied
(3) Estate condition C is not satisfied

so the estate is not a UK estate.

If the PRs are non-resident but have only UK source taxable income,

(1) estate condition A is satisfied (they are assessable)
(2) Estate condition B is satisfied (no foreign income) so the estate is a UK estate.

If the PRs are non resident and have some UK income which qualifies for exemption (eg gilts) the estate is a foreign estate.

It is easy to procure that an estate with non-resident PRs qualifies as a "foreign estate" by arranging that there is some foreign income or FOTRA securities.

79.10 "Payment"

The legislation uses the word "payment" but (like "capital payment" for s.87) this is widely defined. Section 681 ITTOIA provides:

> (1) For the purposes of this Chapter—
> (a) a transfer of assets, or
> (b) the appropriation of assets by personal representatives to themselves,

---

10 It takes more than one reading to comprehend the triple negative in condition B (the source legislation was clearer before the ITTOIA rewrite). Suppose PRs are not UK resident and receive foreign source income. The position is that condition B is not satisfied because:

(1) The PRs are not liable to IT on that income
(2) The reason they are not liable is that they are not UK resident: had they been UK resident, they would have been liable.
(3) Thus it is not the case that "none of the income of the estate is income for which the personal representatives are not liable to UK income tax for the tax year because they are not UK resident".

The same applies if non resident PRs receive income from exempt gilts.

11 See 79.5.1 (Foreign domiciled testator).

is treated as the payment of an amount equal to the assets' value at the date of transfer or appropriation.

(2) The set off or release of a debt is treated for the purposes of this Chapter as the payment of an amount equal to it.

(3) If at the end of the administration period—

(a) there is an obligation to transfer assets to any person, or

(b) personal representatives are entitled to appropriate assets to themselves,

an amount equal to the assets' value at that time is treated as payable then for the purposes of this Chapter.

(4) If at the end of the administration period—

(a) there is an obligation to release or set off a debt owed by any person, or

(b) personal representatives are entitled to release or set off a debt in their own favour,

a sum equal to the debt is treated as payable then for the purposes of this Chapter.

79.11 Charge to tax on estate income

Beneficiaries are subject to tax on estate income. There are essentially three parts to the legislation:

(1) The charge to tax on estate income.

(2) The definition of when estate income arises.

(3) The quantification of the amount of estate income.

Section 649(1) ITTOIA provides the charge to tax:

> Income tax is charged on estate income.

Section 659 ITTOIA identifies the person liable:

> (1) If the estate income is from a person's absolute interest or limited interest, that person is liable for any tax charged under section 649 unless subsection (3) or (4) provides that another person is liable.
>
> (2) If the estate income is from a discretionary interest, the person in whose favour the discretion is exercised in making the payment in question is liable for any tax charged under section 649.

Section 659(3)(4) (not set out here) deal with successive interests.

79.12 Estate income

Estate income is a label which brings in different sets of rules for the different types of interest in residue.

Section 649(2) ITTOIA provides:

> (2) In this Chapter—
> "estate income" means the income treated under this Chapter as arising from an absolute, limited or discretionary interest in the whole or part of the residue of an estate ...
> (3) Estate income is treated as income for income tax purposes.
> (4) If different parts of an estate are subject to different residuary dispositions, those parts are treated for the purposes of this Chapter as if they were separate estates.

The circumstances in which estate income is treated as arising depend on the type of interest in residue. These are set out in ss.652–655 ITTOIA. These provisions state *when* estate income is treated as arising. The question of the *amount* of estate income is addressed separately.

79.12.1 *When estate income arises: Absolute interest in residue*

Section 652 ITTOIA provides:

> (1) Income is treated as arising in a tax year from a person's absolute interest in the whole or part of the residue of an estate if—
> (a) the person has an assumed income entitlement for the tax year in respect of the interest (see sections 665 to 670), and
> (b) condition A or B is met.
> (2) Condition A is that a payment is made in respect of the interest in the tax year and before the end of the administration period (see section 653).
> (3) Condition B is that the tax year is the final tax year (see section 653).
> (4) Income treated as arising as a result of this section is estate income for the purposes of this Chapter.

The key term here is "assumed income entitlement;" see 79.15 (Assumed income entitlement).

For completeness, s.653 ITTOIA provides commonsense definitions of "administration period" and "final tax year":

> (1) In this Chapter "the administration period", in relation to the estate of a deceased person, means the period beginning with the deceased's death and ending with the completion of the administration of the estate.
> (2) In the application of subsection (1) to Scotland, the reference to the completion of the administration is to be taken as a reference to the date at which, after discharge of, or provision for, liabilities falling to be met out of the deceased's estate, the free balance held in trust for the residuary legatees or for the persons with the right to the intestate estate

has been ascertained.
(3) In this Chapter "the final tax year" means the tax year in which the administration period ends.

79.12.2 *When estate income arises: Limited interest in residue*

Section 654 ITTOIA provides:

(1) Income is treated as arising in a tax year from a person's limited interest in the whole or part of the residue of an estate in cases A, B and C.
(2) Case A is where—
(a) the interest has not ceased before the beginning of the tax year, and
(b) a sum is paid in respect of the interest in that year and before the end of the administration period.
(3) Case B is where—
(a) the tax year is the final tax year,
(b) the interest has not ceased before the beginning of that year, and
(c) a sum remains payable in respect of the interest at the end of the administration period.
(4) Case C is where—
(a) the tax year is a year before the final tax year,
(b) the interest ceases in the tax year, and
(c) a sum is paid in respect of the interest in a later tax year but before the end of the administration period, or remains payable in respect of it at the end of that period. ...
(6) Income treated as arising as a result of this section or section 674 is estate income for the purposes of this Chapter.

79.12.3 *When estate income arises: Discretionary interest in residue*

Section 655 ITTOIA provides:

(1) Income is treated as arising in a tax year from a person's discretionary interest in the whole or part of the residue of an estate if a payment is made in the tax year in exercise of the discretion in that person's favour.
(2) Income treated as arising as a result of this section is estate income for the purposes of this Chapter.

79.13 Amount of estate income

There are two aspects to the rules: quantifying the "basic amount", and grossing up.

79.13.1 *UK estate*

Section 656(1) ITTOIA provides:

> In the case of a UK estate, tax is charged under section 649 on the amount of estate income treated as arising in the tax year.

Section 656 defines the amount of estate income:

> (2) That amount is the basic amount of that income for the tax year (see subsection (4)) grossed up by reference to the applicable rate for that year (see section 663).
> (3) The gross amount is treated as having borne income tax at that rate.

The applicable rate is not discussed here. The key term is the "basic amount" of estate income.

79.13.2 *Foreign estate*

Section 657(1) ITTOIA provides:

> In the case of a foreign estate, tax is charged under section 649 on the full[12] amount of estate income treated as arising in the tax year.

The section goes on to specify the amount:

> (2) That amount depends on whether the estate income arising in the tax year is paid from sums within section 680(3) or (4) (sums treated as bearing income tax).
> (3) So far as the estate income is paid from such sums, that amount is the basic amount of that income for the tax year grossed up by reference to the applicable rate for that year (see section 663).
> (4) That gross amount is treated as having borne income tax at that rate.
> (5) So far as the estate income is not paid from sums within section 680(3) or (4), the amount of estate income treated as arising in the tax year is the basic amount of that income for that year.

The difference between UK and foreign estates is that in the latter case there is no grossing up.

We turn at last to the key concept "basic amount".

79.14 "Basic amount of estate income"

The quantum of the "basic amount of estate income" depends on the type

12 Section 657 refers to the "full amount" and s.656 refers only to the "amount", but the word "full" is clearly otiose: there is no difference in meaning.

of interest in residue, ie whether there is an absolute, limited or discretionary interest.

79.14.1 *Basic amount of estate income: Absolute interest*

Section 660 ITTOIA provides:

> (1) The basic amount of estate income relating to a person's absolute interest in the whole or part of the residue of an estate for a tax year before the final tax year is the lower of—
>
> (a) the total of all sums paid in the tax year in respect of that interest, and
>
> (b) the amount of the person's assumed income entitlement for the tax year in respect of it.
>
> (2) The basic amount for the final tax year is equal to the amount of the person's assumed income entitlement for that year in respect of that interest.

The next key term is "assumed income entitlement".

79.14.2 *Basic amount of estate income: Limited interest*

Section 661(1) ITTOIA provides:

> (1) The basic amount of estate income relating to a person's limited interest in the whole or part of the residue of an estate for a tax year is the total of the sums within section 654(2)(b), (3)(c) and (4)(c) for that year.

79.14.3 *Basic amount of estate income: Discretionary interest*

Section 662 ITTOIA provides:

> The basic amount of estate income relating to a person's discretionary interest in the whole or part of the residue of an estate for a tax year is the total of the payments made in the tax year in exercise of the discretion in favour of the person.

79.15 Assumed income entitlement

The key term "assumed income entitlement" is relevant to computation of the basic amount. For absolute interests, this is (in brief) calculated as follows.

79.15.1 *"Aggregate income of the estate"*

First one calculates the "aggregate income of the estate". This has a

broadly commonsense definition in s.664 ITTOIA:

> (1) For the purposes of this Chapter the aggregate income of the estate for a tax year is
>
> [a] the total of the income and amounts specified in subsection (2), but
>
> [b] excluding the income specified in subsection (5).
>
> (2) The income and amounts are—
>
> (a) the income of the deceased's personal representatives in that capacity which is charged to UK income tax for the tax year,
>
> (b) the income of the deceased's personal representatives in that capacity on which such tax would have been charged for the tax year if—
>
> (i) it was income of a UK resident, and
>
> (ii) it was income from a source in the UK,[13]

Paragraphs (c) to (e) deal with somewhat specialist topics:

> (c) any amount of income treated as arising to the personal representatives under section 410(4) (stock dividends) that would be charged to income tax under Chapter 5 of Part 4 if income arising to personal representatives were so charged (see section 411),
>
> (d) in a case where section 419(2) applies (release of loans to participator in close company: loans and advances to persons who die), the amount that would be charged to income tax under Chapter 6 of Part 4 apart from that section, and
>
> (e) any amount that would have been treated as income of the personal representatives in that capacity under section 466 if the condition in section 466(2) had been met (gains from contracts for life insurance).

Section 664(3)(4) deal with deductions:

> (3) In calculating the amount of the income within subsection (2)(a), any allowable deductions are to be taken into account.
>
> (4) In calculating the amount of the income within subsection (2)(b), any deductions which would be allowable if the income had been charged to UK income tax are to be deducted from the full amount of the income actually arising in the tax year.

---

13 I cannot see the point in (ii). If it is income of a UK resident, why does the source matter?

Section 664(5) identifies two categories of income not included in "estate income". The first is income from specific legacies:

> (5) The excluded income is—
> (a) income to which any person is or may become entitled under a specific disposition[14]

That is excluded from estate income as the income is deemed to accrue to the legatee.[15]

> (5) The excluded income is ...
> (b) income from property devolving on the personal representatives otherwise than as assets for payment of the deceased's debts.

That would include property which vests in the PRs under the obsolescent settled land act regime.

79.15.2 *"The residuary income of the estate"*

Armed with the figure for "the aggregate income of the estate", one next computes "the residuary income of the estate". This brings in rules for "allowable estate deductions". Section 666(1) ITTOIA provides:

> For the purposes of this Chapter the residuary income of an estate for a tax year is
> [1] the aggregate income of the estate for that year, less
> [2] the allowable estate deductions for that year.
> This is subject to section 669 (reduction in residuary income: inheritance tax on accrued income).

There are four categories of deductions. Section 666(2) ITTOIA provides:

> The allowable estate deductions for a tax year are—
> (a) all interest paid in that year by the personal representatives in that capacity (but see section 233 of IHTA 1984: exclusion of interest on unpaid inheritance tax),

---

14 Defined in subsection (6): "In subsection (5)(a) 'specific disposition' means a gift of specific property under a will, including—
(a) the disposition of personal chattels by section 46 of the Administration of Estates Act 1925 (c 23) (succession on intestacy), and
(b) any disposition which under the law of another country has a similar effect to a gift of specific property by will under the law of England and Wales,
but excluding real property included in a residuary gift made by will by a specific or general description of it or, in Scotland, heritable estate included in such a gift."

15 See 79.6 (Income from specific legacy).

(b) all annual payments for that year which are properly payable out of residue,[16]
(c) all payments made in that year in respect of expenses incurred by the personal representatives in that capacity in the management of the assets of the estate,[17] and
(d) any excess deductions from the previous tax year.[18]

This is subject to subsections (3) to (5).

Subsections (3)(4) prevent double allowances:

(3) No sum is to be treated as an allowable estate deduction if it is allowable in calculating the aggregate income of the estate.
(4) No sum is to be counted twice as an allowable estate deduction.

79.15.3 *"Assumed income entitlement"*

Armed with the figure for the residuary income of the estate, we are at last in a position to compute the assumed income entitlement. Section 665 ITTOIA provides:

(1) Whether a person has an assumed income entitlement for a tax year in respect of an absolute interest in the whole or part of the residue of an estate depends on the results of the following steps.
Step 1 Find the amount of the person's share of the residuary income of the estate that is attributable to that interest for that tax year and each previous tax year during which the person had that interest (see sections 666 to 669).
Step 2 If the estate is a UK estate in relation to any tax year for which an amount has been found under step 1, deduct from that amount income tax on that amount at the applicable rate for that year (see section 670).
Step 3 Add together the amounts found under step 1 after making any deductions necessary under step 2.
Step 4 Add together the basic amounts relating to the person's absolute

---

16 Para (c) should be deleted, as annual payments are not generally allowable; but it does no harm.

17 Section 666(5) restricts this to income expenses: "Payments in respect of expenses are only allowable estate deductions if they are properly chargeable to income (ignoring any specific direction in a will)."

18 This is defined in s.666(6):
"In this section 'excess deductions from the previous tax year' means so much of the allowable deductions for the previous tax year as exceeded the aggregate income of the estate for that year."
This allows unused expenses to be carried forward.

interest in respect of which the person was liable for income tax for all previous tax years (or would have been so liable if the person had been a person liable for income tax for those years).
(2) For the purposes of this Chapter the person has an assumed income entitlement for the tax year if the amount resulting from step 3 exceeds the amount resulting from step 4.
(3) The assumed income entitlement is equal to the excess.
(4) [This deals with successive interests].

79.16 Beneficiary a trustee of a discretionary trust

Section 483 ITA provides:

(1) This section applies if, during or at the end of the administration period for an estate—
(a) the personal representatives pay the trustees of a settlement a sum representing income of the personal representatives, and
(b) if this Chapter had applied to personal representatives, income tax would have been charged on that income at the dividend trust rate or at the trust rate.
(2) The sum is treated as—
(a) being paid as income, and
(b) having borne income tax at the applicable rate.

Lastly we have some definitions by reference (which would have been unnecessary had there been taxes-act-wide definitions):

(3) In this section—
"administration period" has the meaning given by section 653 of ITTOIA 2005, and
"the applicable rate" means the rate referred to in section 663(1) of ITTOIA 2005 (the applicable rate for grossing up basic amounts of estate income).

The drafter has failed to incorporate the extended definition of "payment" but perhaps that may be implied.

79.17 Beneficiary a remittance basis taxpayer

Section 658 ITTOIA brings in the remittance basis:

(1) The charge to tax under section 649 on the amount of income arising in a tax year is subject to Part 8 (foreign income: special rules).
(2) For the purposes of section 830(1) (meaning of "relevant foreign income") amounts charged to tax under section 649—
(a) are treated as arising from a source outside the UK if the estate

is a foreign estate, and

(b) are treated as not arising from such a source if the estate is a UK estate.

The section uses the words "treated as" because the income (being fictional income) does not have a source.[19]

If a beneficiary is a remittance basis taxpayer, it is important to ensure that the estate is a "foreign estate" and not a "UK estate" because the remittance basis only applies to a foreign estate.

Since the estate income is deemed income, not real income, it cannot be remitted. There is no rule that the PRs income or the beneficiary's actual receipts are is deemed to be derived from the estate income.

79.18 Non-resident beneficiary of UK estate: DT relief

International Manual provides:

> **367510 Claims by beneficiaries of a UK estate** [June 2007]
> A distribution made to a beneficiary of income received by a UK estate during its administration period is considered to be a source of income in its own right.[20]
> Where a beneficiary receives a distribution of income that has arisen during the administration of a UK estate, that beneficiary may be entitled to relief on the income under a Double Taxation treaty. Relief will be available in one of two ways:
> • Other Income article: where an other income article of a treaty does not exclude income paid out of a UK estate, that income is considered as other income. ...
> The beneficiary is entitled to full relief from the total tax deemed to have been paid on the income.
> • Extra Statutory Concession A14: where it is not possible to relieve the income under an other income article, Extra Statutory Concession A14 allows us to look through to the underlying sources of income received by an estate and allow relief as if the beneficiary owned the sources of income in their own right.[21] ...

International Manual para 367530 sets out a list of countries where relief is available under the Other Income article on distributions made by UK estates. For this list see 25.11.1 (DTAs with OECD model "other income"

---

19 See 14.6 (Location of source of income when there is no source).

20 Author's footnote: That is, the estate is not considered to be transparent.

21 See 79.19 (Non-resident beneficiary of UK estate: concessionary relief).

article).

> **367540 How to give relief by 'looking through'** [April 2007]
> A repayment claim will be supported by an R185 (Estate Income) (or an R185E) tax certificate prepared by the personal representative(s) showing the rate(s) at which the sources of income have been taxed.
> It should be possible to identify the sources of income from the R185 (Estate Income). If so, you should apply relief at the treaty rate for the type of income. It may not be possible to identify the sources of income on an R185E; if so you will need to find out what they are. Remember that you will have to open an SA enquiry to ask for the information you need. See INTM331200 for guidance on how to open an enquiry. You should ask the claimant or their representative for a breakdown of the underlying sources of income arising to the estate.
> (This text has been withheld because of exemptions in the Freedom of Information Act 2000)

79.19 Non-resident beneficiary of UK estate: Concessionary relief

ESC A14 provides:

> **Deceased person's estate: residuary income received during the administration period**
> A beneficiary who for a year of assessment is not resident or not ordinarily resident in the UK, and is deemed under ITTOIA ss.657, 658(2) and 830(1) to have received income from a UK estate in that year, may claim to have their tax liability on that income from the estate adjusted to what it would be if such income had arisen to them directly and as a result they—
> [1] could claim relief under TA 1988 s.278 (claim to personal reliefs by certain non residents); or
> [2] could claim entitlement to exemption in respect of FOTRA Securities issued in accordance with ITTOIA s.714; or
> [3] could claim relief under the terms of a double taxation agreement; or
> [4] would not have been chargeable to income tax.

The ESC goes on to specify the conditions for the relief.

> Relief or exemption, as appropriate, will be granted to the beneficiary only if the personal representatives of the estate—
> – have made estate returns for each and every year for which they are required, and
> – have paid all tax due and any interest, surcharges and penalties arising, and

– keep available for inspection any relevant tax certificates, together with copies of the estate accounts for all years of the period of administration showing details of all sources of estate income and payments made to beneficiaries.

Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary is deemed to have received the income.

No tax will be repayable to the beneficiary in respect of income they are deemed to have received where the basic amount of estate income, if received by a UK resident beneficiary of an estate, is paid sums within ss.657(3), (4) and 680(3), (4) ITTOIA.

This is the equivalent of ESC B18 for trusts.[22]

79.20 Time limits for claims and assessments

Section 682 ITTOIA provides:

(1) This subsection applies if after the administration period ends it is apparent that a person is liable for income tax on estate income for any tax year who previously appeared not to be so liable or to be liable for tax on a lesser amount.

(2) If subsection (1) applies—

(a) the person may be assessed and taxed for the tax year, and

(b) any relief or additional relief to which the person may be entitled for the tax year is to be allowed if a claim is made.

(3) This subsection applies if after the administration period ends it is apparent that a person who previously appeared to be liable for income tax on estate income for any tax year is not so liable or is liable for tax on a lesser amount.

(4) If subsection (3) applies—

(a) all necessary adjustments and repayments of income tax for the tax year are to be made, and

(b) if the person has been allowed relief which exceeds the relief that could have been given by reference to the amount actually charged for the tax year, income tax is charged on the person for that year under this subsection on the excess.

(4A) The excess charged under subsection (4)(b) is treated as an amount of income for income tax purposes, except so far as it represents a tax reduction given effect at Step 6 of the calculation in section 23 of ITA

22 See 25.9 (Discretionary trusts treated as transparent to allow beneficiaries reliefs).

2007.

(5) An assessment or adjustment made for the purposes of this Chapter or a claim made as a result of this Chapter may be made after the end of the period otherwise allowed if it is made on or before the third anniversary of the normal self-assessment filing date for the tax year in which the administration period ends.

International Manual provides:

367560 Statutory time limit for claims by beneficiaries [April 2007]
It is possible that a beneficiary may receive a distribution from an estate which includes income received by the personal representative outside the normal statutory time limit. However, Section 700(3) ICTA 1988 allows beneficiaries until 3 years from 31 January following the year in which administration was completed to make their claims. This means that a beneficiary is not prevented from claiming relief from UK tax because of the time taken to complete the administration of the estate.
For example, a death occurs during 1994/95. In the normal course of events, the time limit for a beneficiary to claim on administration period income arising in that year would have expired on 5 April 2001. However, if the administration of the estate is not completed until 2002/03 the time limit is extended and the beneficiary has until 31 January 2007 to make the claim.

79.21 HMRC practice (the conventional basis)

The statutory rules are too complicated, and in practice no-one usually takes much notice of them. The TSE Manual first outlines the law:

7655. Statutory - conventional basis of taxation [March 2009]
The statutory basis
The statutory basis is provided in ITTOIA/Ss654, 656 and 661. This requires all sums paid during or payable on completion of the administration period to be taxed over the course of the administration period. The amounts are allocated to tax years as follows:-
1. where
   - the interest has not ceased before the beginning of the tax year
   - the administration period continues after the end of the tax year

   then the amount is the sum paid in the tax year
2. where
   - the interest has not ceased before the beginning of the tax year
   - the administration period ends in the tax year

   then the amount is the total of
   [a] any sum paid in the tax year before the end of the administration

period plus

[b] any amount still due to the beneficiary at the end of the administration period...

The amounts allocated to each year are then deemed to be the net income of the beneficiary for that year. The amount concerned is grossed at the applicable rate...

The TSE Manual then provides a concession:

The conventional basis

The beneficiary is treated as if he had been entitled to the income of the estate (or an appropriate part of the estate) as and when the income arose to the personal representatives. The basis applies for all purposes including repayments.

It is unlikely that there will be cases where it is worthwhile insisting on the statutory basis. If the beneficiary asks for the statutory basis to be applied, you should ask for a computation on that basis. If you have any problems with such a computation, ask HMRC Trusts Edinburgh for advice.

In other words, the estate is treated as transparent for IT purposes. That will normally suit remittance basis taxpayers.

79.22 Reforming the income taxation of estates: Commentary

There could hardly be a stronger condemnation of the current rules than the statement in the Manual that *It is unlikely that there will be cases where it is worthwhile insisting on the statutory basis.* The entire code needs to be rethought and replaced with something simpler. But that is outside the scope of this book.

CHAPTER EIGHTY

WHO IS THE SETTLOR?

80.1 Why does it matter who is the settlor?

The identity of the settlor(s) of a settlement is important for many tax purposes. It is not practical to compile a full list, but the rules include the following:

(1) Rules taxing a settlor on trust income and gains.[1]

(2) Rules taxing trustees (or beneficiaries) if the settlor is UK domiciled or resident. The tax status of the settlor is an appropriate connecting factor for the taxation of trustees and beneficiaries. The most important example is the IHT excluded property rule.[2] So the question of the identity of the settlor often arises in matters concerning foreign domiciliaries.

(3) Connected person rules, which apply if a person is connected with a settlor.

(4) Reverter to settlor rules.[3]

Subsidiary questions may also arise:

- Where a settlement has two settlors, what property each has settlor provided
- Whether a settlor provides additional property
- When a settlor provides property

The person named as "the settlor" in a trust document is not necessarily a settlor, or the only settlor, for tax purposes.[4]

---

1 See 27.1 (Settlor-interested trusts) and 50.2 (Fundamental s.86 conditions).

2 See 62.1 (Excluded property for IHT)..

3 See s.54 IHTA.

4 On nominal settlors see Kessler, *Drafting Trusts and Will Trust*s, (12th ed., 2014), para 10.14 (Nominal Settlor).

80.2 Definitions of "settlement"

Before discussing "settlor" we need to discuss "settlement".

80.2.1 *Terminology*

There are three distinct definitions of "settlement". When discussing statutory provisions it is usually best to use the statutory terminology, but that will not do here. We need labels to distinguish the definitions. I use the following terms:

(1) ***Classic settlements***

(a) ***Standard IT/CGT definition of "settlement"***

This definition applies in the Income Tax Acts, and TCGA unless the context otherwise requires.

It also applies for the CT Acts, so the label should perhaps be "standard IT/CGT/CT definition" but that seems too clumsy; I refer to IT/CGT only as that is the focus of this book.

In some cases the context does "otherwise require" because the settlement-arrangement definition is applied. I cannot think of any other case where the context would "otherwise require".

(b) ***IHT definition of "settlement"***: the definition for IHT purposes. For present purposes (identifying the settlor) the IHT definition is effectively the same as the standard IT/CGT definition, there is no need to distinguish between them.

The term "**classic settlement**" is used to describe a settlement within the standard IT/CGT and IHT definitions.[5] For most purposes the words "settlement" and "trust" are interchangeable[6], so I use **"trust"** as a shorthand to refer to a classic settlement.

(2) ***Settlement-arrangement***

This is the definition which applies for the purposes of the IT settlement provisions. It is also applied in various other contexts.[7]

Equipped with this terminology we can now consider the various

---

5 This convenient term was first used in *Chinn v Collins* 54 TC 311 at p.339, and adopted in *Jones v Garnett* 78 TC 1 HL at [43].

6 See Kessler & Sartin, *Drafting Trusts and Will Trusts* (12th ed., 2014), p.*lix* (Terminology).

7 In earlier editions I called this "the IT definition of Settlement". But that terminology became inappropriate following the introduction of the standard IT/CGT definition in 2006; also the settlement-arrangement definition is adopted for several purposes for CGT.

definitions of "settlement".

80.2.2 *Standard IT/CGT definition of settlement*

Section 466 ITA provides:

> (1) This section applies for the purposes of the Income Tax Acts, except so far as, in those Acts, the context otherwise requires.
> (2) "Settled property" means any property held in trust other than property excluded by subsection (3)...
> (4) References, however expressed, to property comprised in a settlement are references to settled property.[8]

This is formally a definition of "settled property" not "settlement" but, as subs.(4) illustrates, the definition also governs the meaning of the word "settlement".

The exemption in s.466(3) relates to nominees or bare trustees, see 84.5 (Bare trusts/nomineeships).

CGT has equivalent provisions: s.60, 68 TCGA.

The same definition applies for CT: s.1169 CTA 2010.

80.2.3 *Settlement-arrangement definition of settlement*

Section 620(1) ITTOIA provides:

> In this Chapter "settlement" includes[9] any disposition, trust, covenant, agreement, arrangement or transfer of assets...

This is an outstandingly bad definition, because, taken literally, it covers every conceivable transaction. It has been left to the Courts to define the term. In *Jones v Garnett*, Lord Hoffmann explains:

> Not every transfer of property is a settlement for the purposes of [the settlement-arrangement definition]. There has to be an "element of bounty" in the transaction. This old-fashioned phrase, apparently derived from the judgment of Plowman J in *IRC v Leiner* 41 TC 589 and approved by the House of Lords in *IRC v Plummer* [1980] AC 896, conjuring up the image of Lady Bountiful in *The Beaux' Stratagem*, is perhaps not the happiest way of describing a provision for a spouse or

---

8 The legislation is set out in full in ITA and TCGA, but there are no significant differences, so I give the text of ITA only. The CGT equivalent is in ss.60, 68 TCGA.

9 The context shows this is an exhaustive definition, ie the word "includes" really means "means".

> minor children. ... It is nevertheless exactly the kind of thing at which the anti-avoidance provisions are aimed. In *Chinn v Hochstrasser* [1981] AC 533 Lord Roskill cautioned against treating the word "bounty" as if it had been included in the statute. It seems to me that the general effect of the cases is that, under the arrangement, the settlor must provide a benefit which would not have been provided in a transaction at arms' length.[10]

The expression "bounty" was criticised by Lady Hale in the same case, but it is likely to continue in use as a technical term. It is short, accurate, and memorable if archaic.[11]

The bounty requirement is not quite the same as a "commercial" requirement, but the concepts overlap. In *IRC v Levy* the judge stated that "a commercial transaction devoid of any element of bounty is not within the definition". In that case an interest-free loan to a company wholly owned by the lender was held to be a *simple case of a commercial transaction devoid of any element of bounty* and hence not a settlement-arrangement.[12]

By contrast, the standard IT/CGT and IHT definitions of "settlement" do not include a bounty requirement.

It is unfortunate that statute uses the word "settlement" as a label for this concept, but there is nothing to be done about that.

Is an estate of a deceased person, or a trust under a will or intestacy a settlement-arrangement? This question does not arise for the purposes of the IT settlement provisions. Even if it is a settlement-arrangement the settlor, that is, testator (being dead) will not be subject to tax. The

---

10 78 TC 1 at [7]. HMRC agree. The TSE Manual provides:

> "**4110 Restrictions to the definition of settlement** [August 2010]
>
> ...A purely commercial transaction at arms length is outside the meaning of 'settlement'.
>
> Settlement must include an element of bounty, as decided in the tax case of *IRC v Plummer* (54 TC 1). Bounty is the provision of value without any corresponding quid pro quo, usually a gift or a transfer at less than full value."

11 Lord Neuberger agreed in *Jones v Garnett* 78 TC 1 at [76]:

> "The word 'bounty' rings slightly uncomfortably, at least to my ears. … However, in the light of the judicial decisions on these provisions, it seems to me that the law is now tolerably clear and sensible, and, particularly given the need for clarity and the room for difficulties in this area, it would be inappropriate to risk introducing uncertainty or new complications by redefining the principles, even if only linguistically."

12 56 TC 68 at p.87.

settlement-arrangement definition is used in other contexts where the issue does arise: see 78.6.1 (Is an estate a "settlement" within s.87 TCGA?).

80.2.4 *IHT definition of settlement*

The IHT definition of "settlement" is different again. However for the purposes of this chapter (who is the settlor) it is equivalent to the standard IT/CGT definition.[13]

80.3 Definitions of "settlor"

80.3.1 *Terminology*

There are four distinct definitions of "settlor". We need labels to distinguish them, and I use the following terms:

(1) ***The standard IT/CGT definition of settlor***. This definition applies in the Income Tax Acts and TCGA "unless the context otherwise requires". In some cases the context does "otherwise require" because one of the other definitions of settlor is applied. I cannot think of any other case where the context would "otherwise require". The standard IT/CGT definition does not apply for the IT settlement provisions or for s.86 TCGA, so it is not the most important.

(2) ***The settlement-arrangement definition of settlor***. This is the definition which applies for the purposes of the IT settlement provisions. It is applied by reference in various other contexts.

(3) ***The CGT s.86 definition of settlor****:* the definition for the purposes of s.86 TCGA.

(4) ***The IHT definition of settlor****:* the definition for the purposes of IHT.

Equipped with this terminology we can now consider the various definitions of settlor.

80.3.2 *Standard IT/CGT definition of settlor*

Section 467(1) ITA provides:[14]

> In the Income Tax Acts (except where the context otherwise requires) "settlor", in relation to a settlement, means the person, or any of the

13 The differences matter for issues relating to categorisation of foreign institutions; the IHT definition is discussed in 84.3 (Definition of "IHT-settlement").

14 The legislation is set out in full in ITA and TCGA, but there are no significant differences, so I give the text of ITA only. The CGT equivalent here is s.68A TCGA. This definition also applies for CT: s.1169 CTA 2010.

persons, who has made the settlement.

Section 467 ITA sets out various circumstances in which a person is treated as having made a settlement:

> (3) A person ("S") is treated for the purposes of the Income Tax Acts as having made a settlement if—
>
> (a) S has made or entered into the settlement (directly or indirectly), ...

There are four possibilities here:

(1) S is treated as having made a settlement if S has made the settlement directly. This is a tautology.

(2) S is treated as having made a settlement if S has made a settlement indirectly. I am unable to see how one can make a settlement indirectly.

(3) and (4) S is treated as making a settlement if S has entered into it (directly or indirectly). These words have been lifted from the settlement-arrangement definitions of settlement and are not apt here.

I conclude that s.467(3)(a) achieves nothing, but it does no harm. One might take from it a general intent that "making a settlement" is not to be construed narrowly.

Section 467 ITA continues:

> (3) A person ("S") is treated for the purposes of the Income Tax Acts as having made a settlement if ...
>
> (b) the settled property, or property from which the settled property derives, is or includes property within subsection (4).
>
> (4) Property is within this subsection if—
>
> (a) the settlement arose on S's death (whether by S's will, on S's intestacy or in any other way), and
>
> (b) immediately before S's death, the property was property of S—
>
> (i) which was disposable property (see section 468), or
>
> (ii) which represented S's severable share in any property to which S was beneficially entitled as joint tenant.

This is necessary because an intestate does not "make or enter into" a trust arising on intestacy; and it might perhaps be argued that a testator does not "make or enter into" a trust arising under their will.[15]

Section 467(5) ITA provides:

---

15 See 78.6.1 (Is an estate a "settlement" within s.87 TCGA?).

> In particular, S is treated for the purposes of the Income Tax Acts as having made a settlement if—
>
> (a) S has provided property for the purposes of the settlement (directly or indirectly), or
>
> (b) S has undertaken to do that.

This definition of settlor is almost the same as the settlement-arrangement definition, the only differences are that the wording is recast in the plain legal English drafting style, and will trusts are included.

Section 467(6) ITA deals with reciprocal arrangements:

> If a person ("A") makes or enters into a settlement in accordance with reciprocal arrangements with another person ("B")—
>
> (a) B is treated for the purposes of the Income Tax Acts as having made the settlement, and
>
> (b) A is not to be treated for the purposes of the Income Tax Acts as having made the settlement just because of the reciprocal arrangements.

80.3.3 *Settlement-arrangement definition of settlor*

Section 620 ITTOIA provides the settlement-arrangement definition:

> (1) In this Chapter ...
>
> "settlor", in relation to a settlement, means any person by whom the settlement was made.
>
> (2) A person is treated for the purposes of this Chapter as having made a settlement if the person has made or entered into the settlement directly or indirectly.
>
> (3) A person is, in particular, treated as having made a settlement if the person—
>
> (a) has provided funds directly or indirectly for the purpose of the settlement,
>
> (b) has undertaken to provide funds directly or indirectly for the purpose of the settlement, or
>
> (c) has made a reciprocal arrangement with another person for the other person to make or enter into the settlement.

One can identify five parts of the definition. A person is a settlor if and only[16] if they have:

---

16 "Means" in s.620(1) is the term used for an exhaustive definition. The context shows that the words "is treated as" in s.620(2)(3) also constitute an exhaustive (not inclusive) definition.

(1) made the settlement directly or indirectly;
(2) "entered into"[17] the settlement directly or indirectly;
(3) provided funds directly or indirectly for the purpose of the settlement;
(4) undertaken to provide funds directly or indirectly for the purpose of the settlement;[18] or
(5) made a reciprocal arrangement with another person to make or enter into the settlement.

80.3.4 *IHT definition of settlor*

Section 44(1) IHTA provides the IHT definition:

> In this Act "settlor", in relation to a settlement, includes[19]
> [a] any person by whom the settlement was made directly or indirectly,
> [b] and in particular (but without prejudice to the generality of the preceding words) includes any person who
> [i] has provided funds directly or indirectly for the purpose of or in connection with the settlement or
> [ii] has made with any other person a reciprocal arrangement for that other person to make the settlement.

The IHT definition expands "for the purpose of the settlement" into "for the purpose of *or in connection with* the settlement". It is considered that the words make no difference, for if something is provided "in connection

---

17 The words "entered into" are not found in the CGT s.86 or IHT definitions of "settlor". The reason is that (in the context of the settlement-arrangement definition) the word "settlement" includes an agreement or arrangement. One is said to "enter into" an agreement or arrangement even though it is not normal usage to say that one "enters into" a settlement (in the classic sense).
The drafter of the standard IT/CGT definition did not realise this, so they included the words infelicitously, though no harm is done.

18 In practice HMRC may ignore this. TSE Manual formerly provides at 4120: "In practice if someone has undertaken to provide funds, but actually does not, we would not seek to apply s.624 or s.629 ITTOIA." The passage was quietly deleted in February 2011, but with no announcement of a change of practice. Undertakings to provide funds are not found in practice so this has no practical relevance. The IHT and CGT s.86 definitions omits this, presumably it was thought to be unnecessary. The drafter of the standard IT/CGT definition included the words; if they had thought about this they would probably have omitted them, but no harm is done.

19 The IHT definition (unlike the other definitions) uses the non-exhaustive "includes". Perhaps the drafter of the IHT provision had in mind a case where a person was the "settlor" of a settlement in the natural sense of the word but was not within the IHT definition. I cannot think of such a case.

with" a settlement it must be provided "for the purpose of" the settlement; one must bear in mind that "purpose" does not need to be a very focussed or intense purpose.[20] The attraction of this view is that it makes the "who is the settlor" area of tax law more coherent if (so far as possible) the same test applies for all the taxes.[21]

There are specific IHT provisions which may affect the identity of the settlement and settlor for IHT. So sometimes a person who is the actual settlor in the general sense is not regarded as the settlor for IHT. This chapter considers the general sense of settlor; for the IHT provisions see 64.1 (IHT consequences of transfers between trusts).

80.3.5 *CGT s.86 definition of settlor*

TCGA Schedule 5 paras 7, 8 provide the CGT s.86 definition:

> *Meaning of "settlor"*
> 7 For the purposes of section 86 and this Schedule, a person is a settlor in relation to a settlement if the settled property consists of or includes property originating from him.
> *Meaning of "originating"*
> 8– (1) References in section 86 and this Schedule to property originating from a person are references to—
> (a) property provided by that person;
> (b) property representing property falling within para (a) above;
> (c) so much of any property representing both property falling within para (a) above and other property as, on a just apportionment, can be taken to represent property so falling.
> ...
> (3) Where a person who is a settlor in relation to a settlement makes reciprocal arrangements with another person for the provision of property or income, for the purposes of this paragraph—
> (a) property or income provided by the other person in pursuance of the arrangements shall be treated as provided by the settlor, but

---

20 See 80.27 (Purpose: minor settlor).

21 Why did the drafter use a different form of words, if they wanted the same result? Perhaps the reason is that "settlement" for IHT is sometimes narrower than settlement-arrangement. The drafter may have considered cases where it may have been argued that A is a settlor of a settlement-arrangement (providing property for the purpose of the *arrangement*) but A is not a settlor for IHT purposes (not providing for the purposes of the IHT-settlement). For instance in *Crossland v Hawkins* 39 TC 493 the taxpayer accepted that (if there were an arrangement) he would be the settlor of the "arrangement"; but he argued (unsuccessfully) that he was not the settlor of the classic settlement. To anticipate such arguments, perhaps, the drafter added the words "or in connection with".

> (b) property or income provided by the settlor in pursuance of the arrangements shall be treated as provided by the other person (and not by the settlor).
>
> ...
>
> (6) For the purposes of this paragraph references to property representing other property include references to property representing accumulated income from that other property.
>
> (7) For the purposes of this paragraph property or income is provided by a person if it is provided directly or indirectly by the person.

The CGT s.86 definition does not have the words "for the purpose of the settlement". Instead what is provided must be the "settled property". This is slightly narrower. What is provided must necessarily be for the purpose of the settlement (or it would not become settled property).

Very similar to this definition is para 9(3) sch 5 TCGA, which sets out one of the trigger conditions which may bring a pre-1991 trust within the scope of s.86 TCGA:

> The first condition is that on or after 19th March 1991 property or income is provided directly or indirectly for the purposes of the settlement;[22]

HMRC guidance on para 9(3) (which is quite extensive) is therefore relevant to the definitions of settlor more generally.

80.3.6 *Person ceasing to be settlor*

Section 469 ITA provides for someone to cease to be a settlor:

> (1) A person ("S") who is a settlor in relation to a settlement ceases to be so when the following condition is met.
>
> (2) The condition is that—
>
> (a) no property of which S is the settlor[23] is comprised in the

---

22 See 50.5.1 (First s.86 trigger condition: provision of property).
For completeness, para 9(3) continues with two exceptions (arm's length transactions and administrative expenses) but that is not relevant for the purposes of this chapter.

23 Section 467(2) ITA provides a commonsense definition of this expression:
"In the Income Tax Acts (except where the context otherwise requires) a person is a settlor of property if—
(a) the property is settled property because of—
(i) the person's having made the settlement, or
(ii) an event which leads to the person being treated by this Chapter as having made the settlement, or
(b) the property derives from settled property within paragraph (a)."

settlement,

(b) S has not undertaken to provide property (directly or indirectly) for the purposes of the settlement in the future, and

(c) S has not made reciprocal arrangements with another person for that other person to enter into the settlement in the future.[24]

This section is not expressed to apply only to the standard IT/CGT definition of settlor, so it is considered that it also applies to the settlement-arrangement definition.

This has no equivalent in the IHT definition of "settlor", though (if it mattered) it might, perhaps, be implied.

The CG Manual provides a straightforward example:

> **33245 Settlor: from 6 April 2006: Basic principles** [October 2007] [The Manual paraphrases s.469 ITA and continues:] For example A and B execute a deed of variation under which property left to them by their father's will is resettled on behalf of their children. Broadly speaking half the income and capital is held for the children of A and the other half for the children of B. From the time the variation is made, A and B are settlors of the settlement (see CG 33248). In due course the share relating to A's children has been wholly distributed. In this case we should say that A was no longer a settlor.

80.3.7 *Relevance of case law and HMRC statements*

In keeping with the patchwork nature of UK tax law, the three definitions of settlor are based on a common framework but they each have slight differences to the others. The settlement-arrangement definition originated in 1936 and is the ancestor of the other definitions. In IHT there has been a little tidying up of the settlement-arrangement definition; the CGT s.86 definition is perhaps an attempt to extract its essence. There is a single concept underlying all the definitions which also represents the normal meaning of "settlor" in trust law.[25] In most cases the differences in wording between the definitions do not matter.

Cases on one statutory provision will generally be relevant to them all.

This expression is defined for the purposes of the IT Acts, but it is only used here in s.469 apart from the (unimportant) IoV provisions.

The CGT equivalent is s.68A(1)(b) TCGA.

24 The CGT equivalent is s.68A(6) TCGA.

25 Contrast the definition in Article 1 Trusts (Jersey) Law 1984: "'settlor' means a person who provides trust property or makes a testamentary disposition on trust or to a trust").

Similarly, HMRC statements made in connection with one provision are generally applicable to the other provisions.

There is also a link between the concept of bounty which is a requirement of a settlement-arrangement and the concept of providing property for the purposes of a settlement, so cases discussing "settlement-arrangement" can also be relevant to the question of who is the settlor.[26]

There are circumstances where a person is a settlor of a settlement-arrangement but not the settlor of the classic settlement[27] but this is not because of differences in the definitions of "settlor": it is because of differences in the definitions of "settlement".

80.3.8 *Tainting*

It does not generally matter if a person provides a trivial amount of property to a trust (whether the settlor adding to the trust or a person adding to a trust made by another.) But occasionally penal tax rules apply if even trivial value is added. This is known as "**tainting**" a trust.

The most common examples are:

(1) A post-1991 provision of funds to a pre-1991 trust, and a post-1998 provision of funds to a pre-1998 trust, may lose the benefit of 1991 and 1998 transitional reliefs for s.86 TCGA.[28]

(2) A provisions of funds by a UK domiciled person will lose the benefit of 1998 transitional relief for s.87 TCGA.[29]

(3) A provision of funds by a UK-linked person may lose a beneficial mixed resident trustee rule for trustee residence.[30]

In these cases, the question of when funds are provided may also arise.

80.3.9 *Multiple definitions of "settlor": Commentary*

Three definitions of "settlement" seems complicated, but there are material differences between them and each definition is appropriate in its own context. However, four definitions of "settlor" is extravagant, for there is little difference between them.

A rational tax system would have one standard definition of settlor, which would apply for all taxes. Until 2006 we had a number of

---

26 See 80.2.3 (Settlement-arrangement definition of "settlement").

27 See 80.12.2 (Beneficiary assigns interest to individual).

28 See 50.5 (Pre-1998 protected trusts); 50.7 (Pre-1991 protected trusts).

29 See 51.20 (1998 transitional relief).

30 See 5.7 (Trustee residence condition C).

definitions of settlor in different contexts, which had developed piecemeal as the tax system evolved. The FA 2006 introduced the standard IT/CGT definition but only applied it for some (not all) purposes of IT and CGT. It has therefore increased the number of definitions of "settlor" and made a complex situation rather more complex. This is curious because the authors of the proposals were emphatic that the two former definitions of trustee residence (a CGT and an IT definition) should be replaced by a single definition. We live in bad times for UK tax policy, but eventually, perhaps, someone will tidy up this mess. It would not be very hard to introduce a single definition.

80.4 Gift from A to B followed by gift to trust by B

Suppose:
(1) A gives property to B unconditionally;[31] and
(2) B gives the same[32] property to a trust.
Two "settlor" questions arise:[33]
(1) In what circumstances does one say that the A is the settlor of the trust, having provided the property indirectly? That is, what is the meaning of "providing indirectly"?
(2) If A is the settlor (having provided property indirectly), can one say that B is not a settlor, perhaps on the grounds that A is the "real" settlor?

One might expect to find guidance to these questions in *Hatton v IRC*.[34] The facts were as follows:
(1) Mrs Cole ("the mother") made a settlement ("the first settlement")

---

31 The position is different if the gift from A to B is made on terms which require B to transfer the property to the trust. In that case, clearly:
(1) A would be the settlor,
(2) B would not be a settlor.
It is also different if the gift from A to B is made by instrument of variation: see 80.33 (Trust made by instrument of variation).

32 Similar points arise if B gives other property (not the property given by A) if this is part of an arrangement between A and B.

33 Other issues may also arise. If A is a beneficiary of the trust, A's gift to B may become a gift with reservation: see 63.6.2 (Gift from A to B followed by gift to trust by B). Note that even if A is a settlor of the discretionary trust, A has not made a chargeable transfer and no IHT is payable by A on the gift to the trust by B.

34 67 TC 759. For another aspect of this decision see 80.28 (Purpose: advisers and agents of settlor).

conferring on Mrs Hatton ("the daughter") a valuable equitable interest.

(2) The daughter transferred her interest to a new settlement ("the second settlement").

So this was in essence a case of a gift to B followed by gift to trust by B. It is important to note the background facts:

> Once the first settlement had been executed ... it was a virtual certainty that the second would be made on the following day provided that [the mother] was then still living.[35]

80.4.1 *When is A an indirect settlor?*

The Special Commissioners held:

> [the mother] was a settlor of the second settlement having directly or indirectly provided the only funds which were subjected to it.[36]

The judge held (67 TC at p.789):

> The Special Commissioners ... held that [the mother] was properly to be treated as a settlor of the second settlement on the ground that, by making the first settlement, [the mother] was a person who had provided funds directly or indirectly for the purpose of or in connection with the second settlement; and so, in relation to the second settlement, fell within the definition [of settlor]. In my view, they were entitled to reach that conclusion on the facts.

Hatton represents a relatively clear case of providing funds indirectly because the two gifts (from A to B, and from B to the trust) were part of an arrangement and it was a "virtual certainty" that the second gift would follow the first. Are these essential requirements? The Special Commissioners, and the court, did not address this important point.

It is clearly not sufficient that B's funds are historically derived from A. Something more is required, but what? It might be said that all paraphrases are suspect and the court must return to the words of the statute. But when the words are so vague, some gloss is necessary to

---

35 67 TC at 771. The Special Commissioners added:

> [The daughter] was content to leave the details to [the mother's advisers]. There was no real likelihood that she would reject the suggestion that she should make the second settlement when Mr Willcox [her adviser] put it to her.
>
> But nothing turns on that.

36 At p.768G.

avoid hopeless uncertainty. At first sight, the concept of a "clean break" seems a useful one for determining whether property is provided indirectly. That is, if there is a clean break between A's gift to B, and B's gift to the trust, A has not provided property indirectly. But "clean break" is only a metaphor which itself needs elucidation. It is not much more than a colourful label.

It is suggested that A is a settlor (having provided property indirectly) only if (like *Hatton*) there is an arrangement under which:

(1) A makes a gift of property to B, and intends that B should promptly make the gift to the trust.
(2) B gives the property to a trust in fulfilment of the wishes of A.
(3) It is virtually certain that B's gift will be made.

Of course, this formulation will not solve all problems, since the factual questions may arise as to whether there is an "arrangement", what is A's intention and whether B makes a gift in fulfilment of A's wishes. But this is probably the best that can be done. It is consistent with the "conscious association" comments in *Fitzwilliam*.[37] It might be said that this is too narrow a test and it favours the taxpayer as it allows tax planning of the kind considered in 80.36 (Planning to create trust with foreign domiciled settlor). However, the planning is not all that easy! No looser test can be applied without considerable uncertainty. Moreover (see below), the consequences of A being an indirect settlor is that B is not a settlor; this strongly suggests a narrower test is appropriate for if B is a genuinely independent agent B should be the settlor.

80.4.2 *If A is indirect settlor, is B also the settlor?*

In *Hatton* the Special Commissioners held that the daughter did not provide the funds for the second settlement.[38] The reason was, it appears, that the mother had provided the funds indirectly and this excluded the possibility that the daughter had provided them.

The judge held on the appeal that it was immaterial (for the purposes of the IHT provisions being considered) whether the daughter was also a

---

37 See 80.6 (Appointment from old trust to B followed by gift to new trust by B).

38 Page 768H. Confusingly, the Special Commissioners also say that the daughter *was* a settlor within the IHT definition. The reason, presumably, is that, although she did not provide property, she was a person by whom the second settlement was made. But nothing turns on that.

settlor of the settlement.[39] The judge did suggest that the daughter might also be a settlor.[40]

Approaching the matter as one of principle, untrammelled by authority, it is respectfully suggested that the Special Commissioners' approach is to be preferred. While as a matter of logic it is possible for A to provide property indirectly, and B to provide it directly, the legislation is framed on the basis that trust property can have only one "provider". This is clearly the case for the IT and CGT settlor-interested trust provisions.[41] It is suggested that the IHT definition should be construed in the same way. If property is provided indirectly by A, it should not be regarded as provided by B at all.

A similar issue arises in relation to the definition of capital payment (receipt of a benefit directly or indirectly from the trustees) where a similar analysis applies.[42]

80.4.3 *HMRC views*

TSEM 4300 [May 2014] provides:

> **Indirect gift of shares from parent**
> Mr J owns 60 of the 100 issued £1 shares in J Limited. Mr J is the sole company director and is the person responsible for making all the company's profits because of his knowledge, expertise and hard work. On starting up the company, Mr J allowed his mother to subscribe £40 for 40% of the shares but *shortly afterwards* she gifted them to her grandchildren. The circumstances are such that the decision to issue 40 shares at par is a bounteous arrangement (as were the shares in Jones v Garnett). ...

This is essentially a case of:

(1) A gift from Mr J to the grandmother; and

(2) A gift from the grandmother to the grandchildren.

The Manual's tax analysis is as follows:

> The true settlor here is Mr J *rather than the children's grandmother*. Section 629 [ITTOIA] therefore applies and attributes the dividends

---

39 Page 791B.

40 The conclusion that the mother was a settlor "did not lead, necessarily, to the further conclusion that [the daughter] was not also a settlor". See p.791B.

41 See 81.4.1 (Direct and indirect settlors).

42 See 51.7.1 (Indirect receipt from trustees).

received by the children to Mr J for tax purposes.

The words in italics suggest that HMRC accept the views set out above: if J is the settlor then the grandmother is not.

Similarly Helpsheet 270 (Trusts and settlements – income treated as the settlor's) 2013/2014:

> **Example 1**
> Sue gives £1,000 to her brother Roger to put into trust for her children. Roger sets up a trust with this money and although he is the named settlor in the trust deed, Sue is treated as the real settlor because it was she who indirectly provided (or settled) the funds

It is clearly assumed that Roger is not the settlor.

Similarly, the CG Manual provides:

> **CG33246 - Basic terms of trust law as applied to CGT: settlor: from 6 April 2006: anti-avoidance** [January 2010]
> ... If A and B enter into 'reciprocal arrangements' under which A provides property for B's settlement in return for B providing property for A's settlement, then B, *and not A,* is the settlor of B's settlement, and vice versa.

A reciprocal settlement is just another way of providing property indirectly.

80.5 Trust created by B at request of A

> Suppose that a man owing a debt of honour or of gratitude to a friend, without any legal obligation proposed to discharge it by paying £1,000 to the friend, and that the latter asks that the sum be paid not to him but to the trustees of a settlement, which is done. The payment of the money to the trustees would obviously be a provision of funds for the settlement. On a purely objective view the payer could be said to have made that provision, but I think that the friend should properly be regarded as the person making this provision. It would be just as if the money had been first paid to him and then paid by him to the trustees. *The payer would have acted at his behest.*[43]

This *obiter* comment is right if (as Buckley LJ assumes) the payer agrees (albeit without legal obligation) to make the payment at the direction of the friend so that the friend has *de facto* (though not *de jure*) power of

43 *Mills v IRC* 49 TC at 387 (Buckley LJ).

disposition of the funds. The situation is different if a father proposed to make a gift to his son, and the son merely *asks* that the sum be paid to trustees of a settlement for himself and his family. For a father will feel moral obligations to his grandchildren as well as to his son; the father has no (even non-binding) obligation to make a payment to his son; the son has no *de facto* power of disposition over the funds; in such circumstances the father (not the son) is the settlor. The son has not provided funds even indirectly.

If A asks B to transfer a nominal sum as an initial trust fund, and B does so, not because B wishes to benefit the beneficiaries by the payment, but because A has asked B to, as a favour to A, then applying this principle, A is the (indirect) settlor.

80.6 Appointment from old trust to B followed by gift to new trust by B

Fitzwilliam v IRC concerned an arrangement under which:

(1) Trustees of a will trust exercised their power of appointment ("step 3") to confer a valuable equitable interest on Lady Hastings.

(2) Lady Hastings transferred this interest to a new trust shortly afterwards ("step 5").

So this was a relatively simple case of an appointment from the will trust to B followed by a gift to a new trust by B. The question was who was the settlor of the new trust: Lady Hastings or the testator of the will trust (or both). Lord Keith said:

> The argument for the Crown is that, by virtue of the appointment contained in step 3, property was provided to Lady Hastings directly or indirectly for the purpose of or in connection with the settlement which Lady Hastings later made under step 5. The person who provided that property is said to be Earl Fitzwilliam [the testator], because the appointment by the trustees falls to be read back into his will, under the principle of *Muir v Muir* [1943] AC 468 and *Pilkington v IRC* [1964] AC 612. These cases decided that for the purposes of the Scottish rule against successive liferents and the English rule against perpetuities the exercise of a power of appointment must be written into the instrument creating the power. Earl Fitzwilliam is, therefore, to be treated as the settlor so far as concerns the trust purposes contained in the appointment made by his trustees under step 3, but he cannot reasonably be regarded as having provided property directly or indirectly for the purpose of or in connection with the settlement made by Lady Hastings under step 5. The words "for the purpose of or in connection with" connote that there must *at least be a conscious association of the provider of the funds*

> with the settlement in question. It is clearly not sufficient that the settled funds should historically have been derived from the provider of them. If it were otherwise anyone who gave funds unconditionally to another which that other later settled would fall to be treated as the settlor or as a settlor of the funds. It is clear that in the present situation there cannot possibly have been any conscious association of Earl Fitzwilliam with Lady Hastings' settlement.[44]

It seems therefore that if:

(1) a trust ("trust 1") exists and A is its settlor;
(2) there is an arrangement under which:
    (a) the trustees of trust 1 appoint trust property to B;
    (b) B gives the property to a separate trust ("trust 2");

B will be the settlor of trust 2, and A will not be a settlor, unless the creation of trust 2 is envisaged by A at the time that trust 1 is made.

The "conscious association" test is an understandable and generally helpful paraphrase of the statutory words (though of course it does not solve much as the question may arise as to what is a "conscious association". Further, Lord Keith said there must *at least* be a conscious association, suggesting that it is a necessary, but may not be a sufficient, condition). The application of the conscious association test in the context of an appointment followed by a gift really is surprising, but the House of Lords have spoken. The matter is for most practical purposes ended – unless and until the Supreme Court speaks again. For implications for tax planning, see 80.36 (Planning to create trust with foreign domiciled settlor).

80.7 Transfers between trusts: The trust law background

There are (at least) five ways by which property can move between settlements (without a person becoming beneficially entitled to the property in the meantime):

(1) Trustees may exercise a power to transfer trust property to another trust. This is in practice the most common way.
(2) A beneficiary with a power of appointment (typically a general power) may exercise it so as to transfer property to another trust.
(3) (a) A beneficiary who is entitled to a contingent or reversionary interest in the capital of the trust fund of trust 1 may assign that

---

44 *Fitzwilliam v IRC* 67 TC 614 at p.732, emphasis added.

interest to trust 2; and

(b) the trustees of trust 2 in due course become absolutely entitled to the trust fund of trust 1.

(4) Beneficiaries (who between them are absolutely entitled to the trust property) may exercise their powers under the rule in *Saunders v Vautier* to direct trustees to transfer the trust property to another trust.

(5) Where beneficiaries are not absolutely entitled to the trust property, the transfer to another trust may be achieved with the consent of the Court on behalf of minor or unborn beneficiaries under the Variation of Trusts Act 1958.

A transfer to a separate settlement needs to be distinguished from the situation where steps take place which vary the terms on which trustees hold trust property, but without giving rise to a transfer to another trust. The distinction is a matter of trust law.

Where there is a transfer from trust 1 to trust 2, the question discussed here is who is the settlor of trust 2. Is it the settlor of trust 1 or the person(s) who brought about the transfer?[45]

80.8 Transfer between trusts by appointment: IT/CGT appointment rules

Section 470(1) ITA provides:

> Section 471 applies in relation to a transfer of property[46] from the trustees of one settlement ("settlement 1") to the trustees of another settlement ("settlement 2") if the transfer—
>
> (a) is not for full consideration,
>
> (b) is not by way of a bargain made at arm's length, and
>
> (c) is not excluded by subsection (2).

The provision set out above applies for IT and the rules are incorporated

---

45 Trust law questions also arise: whether a power can be exercised to transfer to another trust, and restrictions on accumulation and perpetuity periods.

46 The expression "transfer of property" is widely defined in s.470(3) ITA:

"In this section 'transfer of property' means—

(a) a disposal of property by the trustees of settlement 1, and

(b) the acquisition by the trustees of settlement 2 of—

(i) property disposed of by the trustees of settlement 1, or

(ii) property created by the disposal.

(4) For the purposes of subsection (3) there is an acquisition or disposal of property if there would be an acquisition or disposal of property for the purposes of TCGA 1992."

by reference for CT.[47] The same rules apply for CGT.[48]

At first sight s.470 seems wide enough to cover every type of transfer between trusts. But the exclusions in subsection (2) are also wide,[49] and in practice s.471 usually applies on a transfer between trusts by exercise of a power of appointment. So I refer to the rules in s.470, 471 (and the CGT equivalent) as **"the IT/CGT appointment rules"**. That label does not completely encapsulate the circumstances where s.471 may apply, but no short label could do that.

The CG manual provides:

> **33247 Settlor: from 6 April 2006: Transfer between settlements** [January 2010]
> TCGA92/S68B
> This section is concerned with the situation where the trustees of Settlement 1 ["S1"] transfer property to the trustees of Settlement 2 ["S2"], including cases where property is created by Settlement 1 on behalf of Settlement 2, such as the grant of a lease by the trustees of Settlement 1 to the trustees of Settlement 2.
> Unless the transfer is for full consideration, or by way of a bargain at arm's length Section 68B TCGA applies. The reason for having these two alternatives is to allow for the possibility that Settlement 1 and Settlement 2 are connected persons (so that any transaction between them is not at arm's length by virtue of Section 18 TCGA 1992), and Settlement 1 sells an asset to Settlement 2 for its full market value. In such a case we do not want section 18 to cause section 68B to apply.

80.8.1 *The IT/CGT appointment rules*

Assuming the conditions for the IT/CGT appointment rules are satisfied, we journey on to s.471(1) ITA:

> If there is a transfer of property in relation to which this section applies, then the following subsections apply for the purposes of the Income Tax Acts, except so far as, in those Acts, the context otherwise requires.

Although the drafter adds the words except "where the context otherwise requires", I cannot think of a case where the context would "otherwise

---

47 Section 1169 CTA 2010.

48 The CGT equivalent is s.68B TCGA.

49 See 80.12.1 (Beneficiary assigns interest to new trust); 80.11 (Transfer between trusts under general power of appointment); 80.33.5 (IT and CGT: IoVs from 6 April 2006).

require"; and I expect the drafter has copied without much thought the wording used (appropriately) in s.467 ITA.[50] The IT/CGT appointment rules apply for all IT/CGT definitions of settlor: the standard IT/CGT definition, the settlement-arrangement definition, and the CGT s.86 definition.

> (2) The settlor (or each settlor) of the property disposed of by the trustees of settlement 1 ("the disposed property") is treated from the time of the disposal as having made settlement 2.
> (3) If there is more than one settlor of the disposed property, each of them is treated in relation to settlement 2 as the settlor of a proportionate part of the property acquired by the trustees of settlement 2 on the disposal.
> (4) So far as the disposed property—
> (a) was provided for the purposes of settlement 1, or
> (b) was derived from property so provided,
> the property acquired by the trustees of settlement 2 on the disposal is treated from the time of the disposal as having been provided for the purposes of settlement 2.
> (5) If as a result of subsection (4), property ("the transferred property") is treated as having been provided for the purposes of settlement 2—
> (a) the person who provided the disposed property, or the property from which it was derived, for the purposes of settlement 1 is treated as having provided the transferred property for the purposes of settlement 2, and
> (b) if more than one person provided the disposed property, or the property from which it was derived, for the purposes of settlement 1, each of them is treated as having provided a proportionate part of the transferred property for the purposes of settlement 2.

In short, the settlor of settlement 1 is the settlor of settlement 2.

80.9 Transfers between trusts by appointment: IHT rules

Where there is a transfer from trust 1 to trust 2, by exercise of a power of appointment the question discussed here is who is the settlor of trust 2. Is it the settlor of trust 1 or the person(s) who brought about the transfer?

This section considers the general sense of settlor for IHT purposes. Some special IHT rules apply in particular circumstances: see 64.1

---

50 See 80.3.1 (Terminology).

(Transfers between trusts – Introduction).

IHT has no statutory equivalent of IT/CGT appointment rules. Those statutory provisions applies for IT, CGT and CT purposes only. But the IT/CGT appointment rules only codify the general law position, so the same principles apply for IHT. This explains why the statutory provisions (which originated in the FA 2006) were backdated and apply even if the transfer between trusts was made before 2006.

HMRC agree. The CG Manual provides:

> **33247 Settlor: from 6 April 2006: Transfer between settlements** [January 2010]
> ... It is not unusual for trustees to appoint or advance assets to a newly created trust. See for example *Hart v Briscoe* 52 TC 53. Courts have said, see for example *Chinn v Collins* 54 TC 311, that the trustees in such a situation are perfecting the settlor's original gift in settlement. Therefore in such a case section 68B has the effect that it is the original settlor of Settlement 1 who is the settlor of Settlement 2. The property is treated as having been provided for the purposes of Settlement 2.
> It is not considered that section 68B effected any change in the law.

80.9.1 *Transfer from trust 1 to existing trust made by B*

Suppose:

(1) A transfers property ("A's fund") to a trust ("trust 1"). The trustees have the standard power to transfer property to another trust.
(2) B transfers property ("B's fund") to a separate trust ("trust B").
(3) The trustees of trust A transfer A's fund to trust B.[51]

Trust 2 now has two settlors: A has provided A's fund indirectly, and B has provided B's fund directly. The issue was settled in CGT cases before the enactment of the IT/CGT appointment rules. In *Eilbeck v Rawling* 54 TC 101:

(1) A Gibraltar settlement ("Trust 1") made by "Mr A" held £600k.
(2) A Jersey settlement ("Trust 2") made by "Mr B" held £100.
(3) £315k was transferred from Trust 1 to Trust 2 by exercise of the trustees' powers.

Buckley LJ summarised the trust law background:

---

51 If there is an arrangement under which (1) A transfers to trust 1 and (2) the trustees transfer to trust 2, ie the transfer to Trust B is in contemplation at the outset, then A is the settlor of Trust B. It is here assumed that the transfer was not in contemplation at the time of the creation of Trust A.

> When [the donee of a special power of appointment] exercises that discretion in making an appointment, he acts as the delegate of the settlor. What the donee does in exercise of a special power of appointment is done vicariously by the settlor. It is also settled law of long standing that, for the purposes of the rule against perpetuities, when a special power is exercised, the limitations created under it are to be written into the instrument which created the power. This association of the interests arising under an appointment in the exercise of a special power with the settlement conferring that power is not, in my opinion, confined to the rule against perpetuities.

The answer is then clear:

> If one asks who was the settlor of the £315,000 appointed by the appointment ... the only possible answer is [Mr A] the settlor of the £600,000 comprised in [Trust 1]. [Mr B] did not settle[52] the £315,000; he settled only £100. The [trustees of Trust 1] did not settle the £315,000; it was not the ... trustee's to settle, and making the appointment the ... trustee was only exercising a fiduciary power conferred on him by the settlor [Mr A], whose delegate he was as donee of the power. The exercise of the power had, in my opinion, precisely the same effect as if the [trustee of trust 1] had appointed the £315,000 in favour of the [trustee of trust 2] to be held upon trusts identical with the trusts of [Trust 2] but set out in extenso in the appointment without reference to [trust 2]. If the appointment had taken that form, there could, I think, be no doubt that the trusts so appointed would be trusts taking effect under [trust 1].

The House of Lords approved this reasoning on appeal.[53]

---

52 Buckley is using the word "settle" as a paraphrase of the statutory word "provide".

53 It may be objected that this is not consistent with *Fitzwilliam*: see 80.6 (Appointment from old trust to B followed by gift to new trust by B). There is no "conscious association" between A and Trust 2. However, *Fitzwilliam* was a case where the Court found that an individual beneficiary who assigned an asset to the new trust was the "settlor". The beneficiary displaced the testator from being a settlor by their independent act. There is no equivalent here.
The alternative conclusion that Trust B has no settlor for general tax purposes would have the result, attractive to taxpayers but absurd, that the property in Trust B could be excluded property, as one could not say that "the settlor" was domiciled in the UK at the time that the settlement was made! That can hardly be right.
If (which is doubtful) further authority is needed, see *Trennary v West* [2005] STC 214 at [49].

HMRC agree. The CG Manual provides:

> **33241 Settlor: Up to 5 April 2006** [October 2007]
> Where trustees exercise a special power of appointment, or power of advancement, in such a way as to create a new settlement, see CG33800+, the settlor of the new settlement is the person who was the settlor of the old one. See, for example, *Pilkington v IRC*, 40 TC 416, p.442[54] and *Chinn v Collins*, 54 TC 311, p.351H.[55]

It is considered that the same applies to a transfer for less than full consideration made in exercise of trustees dispositive powers, and to an interest-free loan from trust 1 to trust 2.

80.9.2 *Transfer from trust 1 to new trust created by trustees*

Suppose:
(1) Trustees of a trust made by A ("trust 1") have power to transfer to a new trust.
(2) The trustees transfer the trust fund to new trustees to hold on the terms of a newly created trust, trust 2. All the funds of trust 2 are derived from trust 1.

Who is the settlor (in the general sense) of Trust 2? The trustees of Trust 1 cannot be the settlor as they have merely exercised a fiduciary power. So either A is the settlor or there is no settlor. The answer is that A is the settlor of Trust 2.

80.9.3 *Commentary: Extending IT/CGT appointment rules to IHT*

It was not necessary to enact the IT/CGT appointment rules. But at present we have statutory rules for IT/CGT/CT and case law rules for IHT, the worst of both worlds. It would have been better if the IT/CGT appointment rules had not been enacted. But now we have them, a small simplification would be to extend the statutory rules to IHT. This would not change the law, but would make its explanation slightly easier.

80.10 Transfer between trusts under power of advancement

Suppose:
(1) Trustees of trust 1 have a power of advancement (that is, a power to apply trust property for the benefit of a beneficiary).

---

54 [Author's note] See 80.10 (Power of advancement) where this passage is set out.
55 The same point is made again at CG Manual 34802.

(2) They use that power to transfer trust property to a new trust ("trust 2").[56]

The position for IT/CGT is covered by the IT/CGT appointment rules: the settlor of trust 1 is also the settlor of trust 2.

The same applies for IHT. The consent of the beneficiary is not needed and therefore the beneficiary is not the settlor of the new trust.

Pilkington v IRC concerned a proposal to transfer property to a new settlement by exercise of a power of advancement in favour of a Miss Penelope. Lord Radcliffe said:

> When one asks what person can be regarded as the settlor of Miss Penelope's proposed settlement, I do not see how it is possible to say that she is herself or that the trustees are. She is the passive recipient of the benefit extracted for her from the original trusts; the trustees are merely exercising a fiduciary power in arranging for the desired limitations. It is not their property that constitutes the funds of Miss Penelope's settlement: it is the property subject to trusts by the will of the testator and passed over into the new settlement through the instrumentality of a power which by Statute is made appendant to those trusts.[57]

HMRC agree: see CG33241 set out in 80.8 (Transfer from trust 1 to trust 2 by exercise of trustees' power).

If the power of advancement is used to alter the terms of an existing trust, without a transfer to a new trust, then *a fortiori* neither the trustees nor the object of the power are settlors.

In short, as far as the identity of the settlor is concerned, there is no difference between a power of appointment and a power of advancement.

80.11 Transfer between trusts under general power of appointment

Section 470(2) ITA sets out three exceptions to the IT/CGT appointment rules. The second is:

> A transfer of property is excluded for the purposes of subsection (1) if
> ... (b) it occurs only because of the exercise of a general power of appointment

This excludes the operation of (what I call) the IT/CGT appointment rules.

---

56 See Kessler, *Drafting Trusts and Will Trusts* (12th ed., 2014), para 11.11 (Power of advancement used to create new trusts).

57 *Pilkington v IRC* 40 TC 416 at p.442.

It does not expressly say who is the settlor: general principles apply. The answer is clear enough.

The CG Manual provides:

> **33247 Settlor: from 6 April 2006: Transfer between settlements** [January 2010]
> ... However there are three specific cases which are excluded...
> [2] Under the terms of Settlement 1 D may have a general power of appointment. If so D is the settlor (or additional settlor) of Settlement 2.

80.11.1 *General powers: The trust law background*

The term **"general power of appointment"** is not defined: it is a term of English trust law and will have its trust law meaning. This section considers that meaning.

I refer to the person who exercises a power of appointment as "the trustees" (if the power is vested in trustees) or **"the powerholder"** (if the power is vested in an individual). The traditional trust law term is "donee" (that is, the person to whom the power is given) or appointor (that is, the person exercising the power)

Powers are either:

(1) general powers or
(2) not general powers: the American terminology **"non general"** is the clearest word. The traditional trust law term is "special power"; one sometimes sees "limited power".

The cases are mostly old trust law cases, as general powers are not much used nowadays. However general powers do crop up in some tax planning contexts so the law is not of merely academic interest.

The Court of Appeal explain the term:

> General powers are such as the donee can exercise in favour of such person or persons as he pleases, including himself.
> Limited powers, which are sometimes also called special powers, are such as the donee can exercise only in favour of certain specified persons or classes.[58]

Powers vested in trustees are not likely to be construed to be general powers, as trustees cannot in principle use their powers to benefit themselves.

The commercial reality is that a general power is equivalent to

---

58 *Re Dilke* [1921] 1 Ch 34 at p. 42 citing *Farwell on Powers* (3rd ed.), p. 8.

ownership. There are differences: if the powerholder dies without exercising the power the property will go as in default of appointment, and not under the will or intestacy of the powerholder, and the powerholder may not be entitled to income arising before an appointment. But for many purposes the law recognises the commercial reality and donee is treated in the same way as the owner. Examples are:

(1) The perpetuity period rule. *Re Churston* explains:

> If the powers of appointment are what are commonly known as special powers in which the field of dispositees is plainly limited, then the instrument exercising the power has to be read back into the instrument creating the power for the purpose of applying the rule. ... If the power of appointment is a general power ... then the instrument exercising the power need not be read back into the original settlement for the purpose of applying the rule.[59]

(2) Insolvent powerholder rules
   (a) The holder of a general power must use it to pay their debts before voluntarily using it to benefit others.
   (b) If an insolvent holder of a non-fiduciary power (such as a power of revocation) refuses to exercise the power in their own favour, the courts will appoint a receiver who can exercise the power.

80.11.2 *Consent powers*

The question arises as to the classification of a power to appoint to whoever the powerholder directs, subject to the consent of a second person. I refer to that as **"a consent power"**.

It is considered that a consent power is not a general power. This was decided in *Re Churston* and is clearly right on principle:

> the reason why a general power of appointment in the ordinary sense starts a new settlement, and has not got to be read back into the original settlement, is because the property is treated as vesting in the donee of the general power, though it is not quite strictly accurate to say that it does so; or, in other words, that the test really is: is there somebody who for all practical purposes can be treated as the owner? [60]

---

59 [1954] Ch 334 at p. 341. The perpetuity period rule was codified in 1964 (see now s.11 Perpetuities and Accumulations Act 2009) so the English law cases on the perpetuity period rule are all pre-1964 cases.

60 [1954] Ch 334 at p.347.

A consent power is not the equivalent of ownership.

Churston, it seems to me, successfully cleared up a confusion left by three earlier cases: *Watts*, *Dilke*, and *Philips*. It is necessary for completeness to consider these cases to explain that confusion.

In *Re Watts*, a consent power was also held not to be a general power. In this case however the Court laid some stress on particular features of the power concerned:

(1) The consent power was conferred by a settlement made in consideration of marriage.
(2) The consent power was exercisable during the lifetime of the consentor.
(3) The consentor had to consent both to the exercise of the power of revocation and to the exercise of the power of new appointment.

But as *Churston* pointed out, these features have no bearing on the central question of whether the power is equivalent to ownership.

> He said: "… in interpreting the language used in the settlement one must have regard to the fact that it is a settlement made in consideration of marriage." I must admit that I cannot think why. I cannot think that for the purpose of applying the rule against perpetuities a power to appoint as A thinks fit with the consent of B can have a different effect according to whether it is in a marriage settlement or in any other settlement.[61]

Quite so.

> Again, Bennett J. said: "It is also material, in interpreting the language used in the instrument, to have regard to the fact that the power of revocation and new appointment is restricted in point of time to the lifetime of [the consentor] …,". There again, with all respect, I cannot agree. That, of course, does show that the power is limited in duration; but a power to A to appoint to anybody he thinks fit during the life of B would be a general power of the common kind, though it could not be exercised after the death of B; by the terms of its creation it would thereupon cease to be a power at all. Likewise, a power to A to appoint to anybody he might think fit during a period of 21 years would appear to me to be a general power of the common kind, though obviously it could not be exercised after the expiration of the term of 21 years...[62]

---

61 [1954] Ch 334 at p.342.
62 [1954] Ch 334 at p.342.

Quite so.

> Then he said that regard must also be had to the fact of "her consent in writing being given both to the exercise of the power of revocation and to the exercise of the power of new appointment." Again, I cannot appreciate the bearing of that. The two things are different things.[63]

So in conclusion:

> I therefore cannot say that I can see any real ground of distinction on those facts between *In re Watts* and *In re Dilke* and *In re Phillips*, neither of which, as far as I can make out, really throws any particular light on the present question.[64]

So the decision in *Watts* was correct; but not on the ground that its consent power was different from powers which *Dilke* and *Phillips* considered to be general powers; but on the ground that those cases were not relevant to the definition of "general power".

What were those two cases? *Re Dilke*[65] concerned a consent power which the powerholder exercised so as to confer a general testamentary power on herself, which did not require a consent.[66] The question was whether the consent power was validly exercised. This was a question of construction, and the exercise of the power was rightly held valid. The court described the power as "a general power of appointment to be exercised with certain consent". The question whether the consent power had to be categorised as a general power did not arise and I do not think that the Court decided it.

Re Phillips[67] concerned the insolvent powerholder rule: the holder of a consent power exercised the power and then died insolvent. The question was whether the appointed funds were available for the disappointed creditor – and it was held that they were. The case could have been decided on the basis that the consent power was a general power; but it could equally have been decided on the basis that the insolvent

63 [1954] Ch 334 at p.342

64 [1954] Ch 334 at p.343

65 [1921] 1 Ch 34.

66 [1921] 1 Ch 34. It seems that this was done because of a concern that the donee may lose mental capacity. I suspect there were death duty implications; but it does not matter.

67 [1931] 1 Ch 347.

powerholder rule applied on the exercise of a consent power even though it was not a general power: "the equity of the creditors is as strong as if it were an unfettered general power which the testator could exercise without consent." The court did not clearly distinguish the two possible analyses, but the consent power was not held, or at least not clearly held, to be a general power.

Churlston was approved in *Re Triffitt's Settlement*, which again concerned a consent power:

> for the purposes of the rule against perpetuities, a power such as I have read must be treated as a special or limited power. That seems to be the effect of *In re Watts* and *In re Churston Settled Estates*.[68]

Churlston also decided that a joint power (a power to appoint to whoever two persons jointly direct) is similarly not a general power.

80.11.3 *General power of appointment merely varies existing trust*

A general power of appointment (whether testamentary or not) may be used:
(1) in a manner which creates a new settlement, or
(2) in a manner which merely varies an existing settlement.
In case (2) it is considered that the powerholder is not in principle the settlor, but is in the same position as a person who consents to the exercise of a power.[69]

80.12 Beneficiary assigns or surrenders equitable interest

80.12.1 *Beneficiary assigns interest to new trust*

Section 470(2) ITA sets out three exceptions to the IT/CGT appointment rules. The first is:

> A transfer of property is excluded for the purposes of subsection (1) if—

---

68 [1958] Ch 852 at p.861. For completeness: the Judge continued: "... On the other hand, under the now obsolete Legacy Duty Act, 1796, it would seem that a power in these terms has the character of a general power: see *Platt v Routh* (1841) 3 Beav 257." But *Platt v Routh* did not concern a consent power, but a general testamentary power exercisable by will in favour of anyone in the world other than three named families; so this is not relevant here.
Re Churlston was also approved in *Tasarruf Mevduati Sigorta Fonu v Merrill Lynch Bank and Trust Co* [2011] 4 All ER 704.

69 The position is analogous to 80.14 (Variation or resettlement by beneficiaries).

(a) it occurs only because of the assignment by a beneficiary under settlement 1 of an interest in that settlement to the trustees of settlement 2

This excludes the operation of (what I call) the IT/CGT appointment rules. It does not expressly say who is the settlor: general principles apply. The answer is clear enough. The CG Manual provides:

> **33247 Settlor: from 6 April 2006: Transfer between settlements** [January 2010]
> ... However there are three specific cases which are excluded.
> [1] A beneficiary, B, of Settlement 1 may transfer to Settlement 2 his interest in Settlement 1. In this case it is B who is the settlor (or an additional settlor) of Settlement 2.

A person who assigns an equitable interest under Trust 1 to Trust 2 is the settlor of Trust 2 but does not of course become the settlor of Trust 1.

80.12.2 *Beneficiary assigns interest to individual*

If a person assigns an equitable interest under Trust 1 to another individual there is no "Trust 2". In that case, that person is the settlor for the settlement-arrangement definition[70] so far as they have provided the income, but they are not a settlor of Trust 1 for the IHT definition, the CGT s.86 definition, or the standard IT/CGT definition.

HMRC agree: CG Manual provides:

> **33242 Settlor: Up to 5 April 2006** [October 2007]
> Normally the same person was the settlor for both Income Tax and CGT. But this is not the case where a person has assigned a right to income. Such an assignment could not have affected the identity of the settlor for CGT purposes.

The CG Manual also provides:

> **34801. Meaning of settlor** [October 2007]
> In general if HMRC Trusts Head Office Bootle or Edinburgh, or their predecessors Financial Intermediaries and Claims Office or Claims Branch have advised or ruled that a person is the settlor for Part XV ICTA 1988 or Part 5 Chapter 5 ITTOIA 2005 purposes then the same person should be regarded as the settlor for the purposes of these provisions. In exceptional cases, eg the assignment of a life interest, a

70 *IRC v Buchanan* 37 TC 362.

person may have settled a right to income under an existing settlement without thereby creating a new settlement for CGT purposes. Although the Income Tax Settlements Legislation may apply as regards that income, that person is not thereby a settlor of the main settlement.

The position is similar to a variation of trust by beneficiaries; see below.

80.12.3 *Beneficiary surrenders equitable interest*

If a person surrenders an equitable interest under Trust 1 there is no "Trust 2". In that case, that person is the settlor for the settlement-arrangement definition[71] so far as they have provided the income, but they are not a settlor of Trust 1 for the IHT definition, the CGT s.86 definition, or the standard IT/CGT definition. As far as the identity of the settlor is concerned, there is no difference between a surrender and an assignment.

80.13 Disclaimer

TSEM states at 1840:

> **1840 Deed of disclaimer** [April 2012]
> The person disclaiming is not a "settlor" within [the settlement-arrangement definition] (TSEM4120). Subsequent trusts that result from the disclaimer retain their original settlor.

A disclaimer, if possible, may be preferable to a surrender or assignment. The distinction between a disclaimer and a surrender/assignment is therefore important. This raises questions of property law which cannot be fully discussed here. TSEM provides a brief outline:

> **1840 Deed of disclaimer** [April 2012]
> A person uses a true disclaimer to refuse a gift due under a trust. Effectively the person steps aside. This allows subsequent provisions of the trust to take effect.
> A disclaimer can relate to
> • capital
> • income
> • both.
> A disclaimer has retrospective effect. It applies from the date that the entitlement arose. There may be a lapse of time between the entitlement arising and the disclaimer. This is not conclusive evidence that the deed cannot be a true disclaimer. ...

---

71 *IRC v Buchanan* 37 TC 362.

> The person making a disclaimer may still benefit from another part of the trust income or capital. This is irrelevant. If that person seeks to impose new trusts, the deed is not a disclaimer. It is an assignment (TSEM1845).

Where the disposition is governed by foreign law, the disclaimer/assignment distinction may be more difficult to draw.

See too 67.5 (Forced heirship, legitime & Sharia rights).

80.14 Variation or resettlement by beneficiaries

80.14.1 *Variation or resettlement: The trust law background*

Beneficiaries who are adult and absolutely entitled to trust property[72] may:

(1) create a new settlement ("a resettlement") or

(2) (with the consent of the trustees) vary the terms of an existing settlement ("a variation").[73]

The distinction between a variation and a resettlement is crucial, but careful drafting will normally achieve whichever is desired.

HMRC agree. The CG Manual provides:

> **Variations of trusts**
> **37880. By agreement** [February 2006]

---

72 If there are minor and unborn beneficiaries, a variation can similarly be made with the consent of the court under the VTA 1958.

73 See s.1(1) VTA 1958 which assumes that beneficiaries have power to vary a trust:

> "Where property...is held on trusts arising...under any will, settlement or other disposition, the court may if it thinks fit by order approve on behalf of [unborn or unascertained beneficiaries] any arrangement ... *varying* or revoking all or any of the trusts, or enlarging the powers of the trustees of managing or administering any of the property subject to the trusts. ..."

The Court only approves on behalf of unborn or unascertained beneficiaries, and adult beneficiaries can make a variation without the approval of the Court. See *Re Holt* [1969] 1 Ch 100 at p.120:

> "Under an arrangement approved by the court [under the Variation of Trusts Act 1958] the trusts may be brought wholly to an end. On the other hand, they may be varied; and there is no limit, other than the discretion of the court and the agreement of the parties, to the variation which may be made. Any variation owes its authority not to anything in the initial settlement but to the statute and the consent of the adults coming, as it were, ab extra. *This certainly seems to be so in any case not within the Act where a variation or resettlement is made under the doctrine of Saunders v Vautier by all the adults joining together*; and I cannot see any real difference in principle in a case where the court exercises its jurisdiction on behalf of the infants under the Act of 1958."

If all the beneficiaries of the trust are 18 or over and agree, they may bring it to an end and share out between themselves (and others) the trust property. (There is an exception to this rule in Scotland in that a person with an alimentary liferent cannot exercise consent in this way.) In these circumstances there is a deemed disposal by the trustees of the whole of the settled property under TCGA 1992, s.71(1).

37881. [February 2006]

It is also possible, with the consent of the trustees, to vary the terms of the trust. There are all kinds of variation possible. Some property may pass absolutely to beneficiaries or existing separate settlements. Clearly this must involve disposals under TCGA 1992, s. 71(1). Other property is held on the same trusts as before and/or on different trusts.

37882. [February 2006]

In such circumstances it is necessary to consider, in the light of the principles set out in the preceding paragraphs and also CG33290-33304, what the correct analysis is. The alternatives are

[1] mere variation of the terms of the existing settlement

[2] continuation of the old settlement as regards part of the property, with the remainder being held on one or more new settlements

[3] termination of the old settlement in its entirety being replaced by one or more new settlements. This last is an unlikely analysis unless a significant part of the property is being distributed absolutely. In such circumstances it may be helpful to refer to *Ewart v Taylor* where one reason for the court holding that a new settlement had come into existence was that it was part of a scheme for winding up the old settlement. See 57 TC 401 at 468, Section I.

...

37883. Under Variation of Trusts Act [February 2006]

The trusts of an existing settlement may be varied (in particular when the interests of unborn or minor beneficiaries are involved) by way of an Arrangement agreed between those parties of full age and approved by a Court Order under the Variation of Trusts Act 1958 (in Scotland Section 1 Trusts (Scotland) Act 1961) on behalf of those unable to give consent.

37884. [February 2006]

If so the principles of CG37880 –CG37882 apply. The degree of variation may exceptionally be such as to involve the termination of the original settlement in whole or in part and the creation of a new settlement. The fact that the courts may only consent to variation of the trusts does not prevent this. (If so then consideration must be given to the identity of the settlor, see CG37900.) A variation may also cause a beneficiary to become absolutely entitled to assets as against the trustees. ...

37886. Instrument of variation of will or intestacy [October 2010]

It is quite common for instruments of variation of wills or intestacies to be executed within two years of the testator's (or intestate's) death. In England & Wales the usual form of the instrument is a deed. The general guidance is at IHTM35011+ and guidance on CGT at CG31600+. If an instrument of variation creates a continuing trust which replaces absolute interests in the original will,

> and there is no statement of intent in the deed or before 1 August 2002 no election, under Section 62(7) TCGA 1992, ... the person who gives up the absolute interest in favour of the trustees is to be regarded as the settlor for the purposes of the annual exempt amount and Section 77 TCGA 1992. His personal position is considered at CG32000+, assuming the variation is gratuitous.

This is clearly correct. The Manual then turns to our situation:

> **37887.** [October 2007]
> If, however, in a case where there is no such election or statement of intent, the will or intestacy provided for property to be held subject to trusts, and these trusts are varied or replaced by the deed of variation, then there are two questions to be answered.
> a. Is there a new separate settlement?
> b. If so, who is the settlor of that settlement?
> If there are only minor variations clearly there is no new settlement and the deceased remains the settlor. Minor variations would include for instance changes in the administrative powers of the trustees, or the provision of an ultimate gift over, that is, a provision saying to whom the property is to pass if the trusts fail, or the appropriation of property to particular funds within the settlement. Otherwise it is necessary to determine whether there is a new settlement in accordance with the principles explained at CG37882, and see CG37889. If there is a new settlement then the identity of the settlor should be determined in accordance with CG37900. ...
> **37889.** [October 2007]
> One situation which is quite common[74] is where there is a life interest trust for the spouse of the deceased. For Inheritance Tax reasons this is partly varied so that there is a discretionary trust up to the amount of the Inheritance Tax nil rate band. In such a case, where the spouse continues to be a beneficiary of the new discretionary trust, it would often be appropriate to regard this, except for the purposes of Inheritance Tax, as little more than a cosmetic arrangement, particularly if the broad intention is that the bulk of the income should be paid to the spouse. So this would be regarded for Capital Gains Tax purposes as a variation of the original will trust, and not as giving rise to a new separate settlement. The deceased remains the settlor.

Para 37889 is correct though not for the reason given (which does not bear examination) but for the reason given in 80.12 (Beneficiary assigns or

---

74 [Author's footnote] This ceased to be common after the introduction of transferrable nil rate bands in 2007, but that does not affect the points being made.

surrenders equitable interest).

80.14.2 *Tax consequences of resettlement*

A resettlement (unlike a variation) involves a disposal for CGT, and may lose the benefit of IHT relief for transitional serial interests. It also changes the settlor. The CG Manual provides:

> **37900. Identity of settlor** [February 2006]
> Where there is a variation of a trust of the kind described in CG37880+ [variation by beneficiaries] it is necessary to identify the settlor. If the conclusion taken is that there are no new settlements then for CGT purposes the identity of the settlor is unaffected. However if in effect interests in income have passed from one person to another, the former may well be the settlor of an arrangement for Income Tax purposes.
> **37901. Identity of settlor** [October 2007]
> If however one or more new settlements have come into existence, then the settlors of those settlements are one or more of the parties to the variation. The question should be tackled on a practical basis by determining where each beneficiary's share has gone. ...
> **37903. Example** [October 2010]
> Under a settlement made by X, A and B are each entitled to half the income. On A's death his son P gets half absolutely. On B's death her daughter Q gets half absolutely. The values of their respective interests are, say:
>
> | | |
> |---|---|
> | A's life interest | £60,000 [30% total value] |
> | P's remainder | £40,000 [20% total value] |
> | B's life interest | £75,000 [37.5% total value] |
> | Q's remainder | £25,000 [12.5% total value] |
>
> Under the variation, which is considered to terminate the old settlement:
> A takes 30% of the property.
> 20% goes to a new accumulation and maintenance settlement for P's children.
> B takes 25% of the property.
> The rest [25%] is held for Q for life with remainder to Q's son R.
> P should be regarded as the settlor, for the purpose of the annual exempt amount, of the accumulation and maintenance settlement, because this is how his share has been dealt with.
> B and Q equally should be regarded as the settlors of the other settlement. ...

B and Q are joint settlors: see 81.1 (Trusts with two settlors).

80.15 Variation under Variation of Trusts Act 1958

Where a court approves a variation of trust on behalf of a minor beneficiary, under the VTA, it is considered that the minor beneficiary does not become a settlor. The reason is that the court in giving its approval does not merely act on behalf of the minor: the court has a wider role.[75] The position is analogous to trustees exercising a power of advancement.[76] But HMRC do not agree. CG Manual para 37902 provides:

> **Minor as settlor** [October 2007]
> It is considered that where a court has given consent on behalf of a minor, that minor can be a settlor. The authority lies in *Yates v Starkey*, 32 TC 38, where it was held that a person could be a settlor under compulsion, and *Mills v IRC*, 49 TC 367, where it was held that a minor with very little involvement in the transactions could be the settlor because she provided the property.

Neither of these cases compels a Court to accept the HMRC view.

80.16 Consent to exercise of power

A trust sometimes provides that the trustees can only exercise a power of appointment with the consent of a particular beneficiary (typically the life tenant). If the power of consent is wholly personal (ie proprietary),[77] this raises some intriguing questions. A concise exposition is difficult because of the variety of possible circumstances and taxes. In outline the position is as follows:

(1) A gratuitous consent to an appointment which terminates the consentor's interest in trust income probably makes the consentor the settlor, for the purposes of the settlement-arrangement definition. The consentor has provided income for the purpose of the settlement-

---

75 *Re Steed* [1960] 1 Ch 407; *Re Remnant* [1970] Ch 560. This view is consistent with the fact that where a Court approves a variation on behalf of an unborn beneficiary, that beneficiary clearly does not become a settlor. Further consideration is needed if foreign trust laws apply.

76 See 80.10 (Power of advancement).

77 On this terminology and powers of consent generally see Kessler, *Drafting Trusts and Will Trusts* (12th ed., 2014), para 7.33 (Nature of powers of consent and appointment).

arrangement because they have effectively given up their right to the income by their consent.[78]

(2) For similar reasons a gratuitous consent to an appointment which terminates the consentor's contingent interest in trust capital probably makes the consentor the settlor, for the purposes of standard IT/CGT and IHT[79] definitions from the time that the contingency is satisfied. The consentor has provided capital for the purposes of the settlement because they have effectively given up their right to the capital by virtue of their consent.

(3) By contrast, the giving of the consent to an appointment does not make the consentor a settlor (for any purpose) if:
   (a) the consentor had no interest in the trust immediately before giving the consent; or
   (b) the appointment leaves the interest of the consentor in the trust

---

78 The position is analogous to an assignment or surrender of a life interest. The analogy is not exact. In one case the arrangement consists of the assignment/surrender alone. In the other case the arrangement consists of the consent and the exercise of the trustees' power of appointment. So in a sense there is an arrangement with two settlors: (i) the consentor and (ii) the (actual) settlor of the classic settlement who conferred the power of appointment on the trustees. But HMRC (or the actual settlor) may plausibly argue that the consentor (not the actual settlor) is the settlor for the purposes of s.624. They may take support from *Braybrooke v AG* 9 HLC 149 at p.165, accessible on *http://www.commonlii.org*. (A case on the Succession Duty Act 1853 whose provisions are analogous to current definitions of settlor. Since Succession Duty was only abolished in 1949, the drafter of the original settlement provisions doubtless had it in mind.) The ground of the decision in *Braybrooke* was:

> "that, although the estate of the son arose under a joint power of appointment made by his father and himself, and although therefore the father was in a sense one of the settlors, yet he was not a settlor from whom the interest or any part of the interest of the son, in his character of successor, was derived. And the decision shews that, in order to ascertain who is the settlor 'from whom the interest of the successor is derived,' we must inquire, not who are the parties by whose conveyance the estate has been created, but who is the conveying party out of whose estate the interest in question has been derived." See *Att-Gen. v Charlton* (1877) 2 Ex D 398 at p.417.

79 It is arguable that the consentor is not a settlor for IHT because the power of consent is a settlement power and so not property for IHT purposes. It is the old question of how far one carries through the deeming provisions. The better view is that one does not carry the deeming that far.

unaffected.[80]

In these cases the consentor has not provided any property by their consent.

(4) The giving of a consent is probably not a disposal for CGT[81] of:
   (a) the right to consent (even if it is extinguished); or
   (b) the consentor's interest in the trust (even if that is extinguished).
   The contrary is arguable but it would not normally matter.[82]

(5) The giving of the consent does not give rise to a gift with reservation since:
   (a) A consent is probably not a "disposal" for the purposes of the gift with reservation rule.[83]
   (b) In any event, a consent is not a disposal of property as the power of consent is a "settlement power" and so not property for IHT.[84]

HMRC do not appear to take any of these points at present; but there is cause for caution. The practical conclusion is that it is in principle better not to make a power of appointment subject to the consent of the life tenant (or any other beneficiary).

80.17 Provision of property for company held by trust

HMRC take the view that provision of property to a company wholly

---

80 This is fairly clear from first principles, but some support can be found in two cases. In *Braybrooke* (see fn above) a tenant in tail exercised his power to dispose of the lands entailed, with the consent of the protector. The protector was not the creator of the disposition: "It cannot be argued that a person whose consent is apparently necessary to a disposition, makes that disposition." In *Mills v IRC* the father's consent was apparently thought necessary for the daughter (Hayley Mills) to enter into the arrangements: see 49 TC 367 at p.403. This did not prevent Hayley being a settlor.

81 Under general principles or by virtue of s.24 TCGA (extinction of an asset constituting a disposal).

82 It will matter if the usual CGT exemption on the disposal of an equitable interest does not apply (eg offshore trusts). It could matter if the conditions of TCGA Sch 4A are satisfied, but that would be unusual.

83 See *Baird v Baird* [1990] 2 AC 548 at 557 [the exercise of a power of appointment] "disposes of no property of the appointor". HMRC agreed. The former CTO Advanced Instruction Manual E.91 provided:

> "Nor should you regard the giving of a consent by a limited owner to the exercise of the power of advancement as the making of a disposition."

This passage does is not in the current IHT Manual. But there is no reason to think that HMRC have changed their view.

84 See s.272 IHTA.

owned by a trust is in principle provision of property for the purpose of the trust, and so makes the provider a settlor. SP 5/92 provides:

> 16 The condition in TCGA Sch 5 para 9(3)[85] may be satisfied where property or income is provided to a company in which the trustees are participators.[86]

This is supported by some case law.[87] It is correct for the standard IT/CGT definition, the settlement-arrangement definition and the IHT definition.

However, for the CGT s.86 definition, the question is not whether a person has provided property for the purpose of the settlement. The question is whether a person has provided *settled* property. So if a person only provides property for a company held by a trust, the person is not the settlor under this definition.[88]

80.17.1 *Transactions with wholly owned trust subsidiaries*

SP 5/92 para 18 provides:

> In general, transactions between trustees and companies which they, directly or indirectly, wholly own, or between such companies, are outside the scope of TCGA 1992 Sch 5 para 9(3).[89]

---

85 The condition is that property is provided directly or indirectly for the purposes of the settlement; see 80.3.5 (CGT s.86 definition of settlor).

86 The SP continues with an exception:

"Where, however, the transaction is carried out with the sole object of leaving funds within the company for the company's purposes and it can be shown that any indirect benefit to the trust is merely incidental to that object, the transaction is disregarded for the purposes of para 9(3).

17 Examples of transactions which may be so disregarded are—

– where another shareholder waives an entitlement to all or part of a dividend; or

– where a director restricts withdrawals of remuneration voted,

in order to assist the company's cash flow, and no payments are made, directly or indirectly, to the trustees as a result of this. All relevant factors will be considered in determining whether it is appropriate to apply this practice in a particular case."

87 *Obiter* comments in *Crossland v Hawkins* 39 TC at p.506 followed by Goulding J in *IRC v Mills* 49 TC at p.337.

88 This view, expressed in earlier editions of this work, is confirmed by *Coombes v HMRC* [2008] STC 2984.

89 The SP sets out a commonsense definition of "wholly owned" and continues with a qualification:

"This approach may not, however, be taken where, on the facts of a particular case, it appears that the transaction has been entered into solely or mainly for the

This is right. There can be no element of bounty so a wholly owned company cannot "provide" property to its owner, just as shareholders cannot "provide" property to their company.

80.18 Provision of services

80.18.1 *Services envisaged when settlement made*

In two cases (the "film star" cases):

(1) A friendly third party created a trust.
(2) The trust acquired a company.[90]
(3) Well-known actors (Jack Hawkins, Hayley Mills) entered into a contract to provide services to the company at a substantial undervalue, and the company duly received what the earlier case described as an "enviable salary" for their work as artiste.
(4) The company made profits and paid dividends to the trustees.

In both cases:

(1) the classic trust created at step (1) was clearly a settlement-arrangement by itself;
(2) Steps (1) - (4) together constituted an arrangement which was a settlement-arrangement.[91]

The question was who was the settlor. It was held that the actor was the settlor.[92]

Viscount Dilhorne in *IRC v Mills* 49 TC at 408 considered two situations:

(1) Employees of a company held by trustees contribute by their labour to the profits of the company, and so increase the company's dividends and the income of the settlement.
(2) A stockbroker who gives well founded advice to trustees of a settlement increases the income of the settlement.

One might have said that these were not settlors because they provide no

---

purposes of obtaining a UK tax advantage."

90 The company was UK resident, so transfer of assets abroad issues did not arise.

91 This was disputed in *Crossland v Hawkins* on the (factually doubtful) grounds that the step (3) was not contemplated at the time of step (2) but the CA rightly found against that on the facts.

92 *Crossland v Hawkins* 37 TC 493 approved *Jones v Garnett* 78 TC 1; *IRC v Mills* 49 TC 367. More accurately, the actor was one of the settlors but the contribution by the third party who created the trust was ignored as insignificant.

bounty but what if they do act with gratuitous intent? For instance, suppose the stockbroker chose not to charge for their services? Viscount Dilhorne rightly[93] did not rely on the bounty point:

> The difference between those cases, on the one hand, and *Crossland v Hawkins* and this case [*Mills*], on the other, is that in *Crossland v Hawkins* and in this case funds which ordinarily would have been received by Mr. Hawkins and by Miss Mills for their acting were diverted to companies which were channels for their transmission to trustees. It is not the provision of services but of funds which comes within the section.

The distinction is not between provision of services and provision of funds, because the actors did provide services; the key feature is the provision of services which yields funds *which would otherwise be received by the provider*. It is considered that the test should be whether one can identify funds which:

(1) would (in the absence of the settlement) have been received by the individual, but
(2) were diverted to the trust.

The settlement provisions do not apply unless one can *identify* the funds which are provided by the settlor. In Viscount Dilhorne's examples of employees and stockbrokers, this condition is not met.

Suppose:

(1) an individual has an opportunity of purchasing land, or shares in a private company;
(2) they allow the trust to take up the offer by advising the trust and not pursuing the opportunity themselves;
(3) had the trust not taken up the offer they would have done so.

In this case the individual is a settlor if one can distinguish the return from the trust's investment from the profit from the advice. A clear case being where the trust only invested a nominal amount in the project. But if the trust provides substantial funds for the development, one cannot identify any income as coming specifically from the adviser. One should not apportion the profits between the adviser's contribution (advice) and the settlement's contribution (finance). It is impractical to do so as there is no sufficiently clear answer to how the apportionment should be made. If

93 It is still a principle (notwithstanding wide exceptions) that trustees should act gratuitously, but no-one suggests that trustees thereby become settlors.

that is right, the *Mills* and *Hawkins* line of cases is effectively restricted to "one-man companies" with no substantial capital (as was the case in both *Mills* and *Hawkins*). It appears that HMRC agree. The TSE Manual provides:

> **TSEM4300 - Settlement For Minor Child Who Is Neither Married Nor In A Civil Partnership** [May 2014]
> **...Indirect gift of shares from parent**
> Mr J owns 60 of the 100 issued £1 shares in J Limited. Mr J is the sole company director *and* is the person responsible for making all the company's profits because of his knowledge, expertise and hard work. On starting up the company, Mr J allowed his mother to subscribe £40 for 40% of the shares but shortly afterwards she gifted them to her grandchildren.

The HMRC analysis is as follows:

> The circumstances are such that the decision to issue 40 shares at par is a bounteous arrangement (as were the shares in Jones v Garnett). The true settlor here is Mr J rather than the children's grandmother. Section 629 [ITTOIA] therefore applies and attributes the dividends received by the children to Mr J for tax purposes.

(Emphasis added.) The example derives from Tax Bulletin 64 Example 9 where HMRC expand on the analysis:

> Since Mr. J
> [1] is the person *responsible for making the company's profits* and
> [2] decides on the level of dividends paid,[94]
> it is Mr. J who is the settlor rather than the children's grandmother.
> The legislation could apply in a similar way if the children had subscribed for shares themselves with money received from a third party or even from bank accounts in their own names.

Suppose a stockbroker who is well disposed to the trust (perhaps a trustee or a beneficiary or a parent of beneficiaries) gives free investment advice to trustees to invest in quoted (easily obtainable) investments, and the trust profits from acting on their advice. There is an element of bounty but the stockbroker has not provided funds and is not the settlor. One cannot identify funds which would ordinarily have been received by the stockbroker. On the contrary, the stockbroker was free (if he or she had

94 It is hard to see the relevance of [2].

the resources) to make the same investments as those recommended to the trustees. This is a clear case.

Suppose a property developer who is well disposed to the trust gives free property market advice to trustees, and the trustees use their own funds invest in land successfully because of the advice. The developer has not provided property and is not the settlor. One cannot identify funds which would ordinarily have been received by them.

Suppose a director of a company held on trust seems reasonably well remunerated but HMRC argue that their remuneration is insufficient. Even if HMRC are right, the individual is not the settlor, because one cannot identify funds which would have been received by the director.

Mills and *Hawkins* were cases where it was intended from the outset that the settlor should provide services at an undervalue. In those cases the settlor contracted to provide services. In *Jones v Garnett*, it was likewise anticipated from the outset that Mr. Jones would provide his services at an undervalue. Here there was no contract, but that made no difference:

> It was the *expectation* of such events and the hope of profit which, together with the absence of any risk attached to the children's ownership of the shares, gives the "element of bounty" to the arrangement constituted by the allotment. What subsequently actually happened was not part of the arrangement.[95]

80.18.2 *Services not envisaged when settlement made*

What is the position if:

(1) a company is up and running and well established;
(2) an individual ("T") *subsequently* provides services at an undervalue (to benefit shareholders).

The question may arise in three circumstances:

(1) shares may be held by a spouse or minor children;
(2) shares may be held by a trust:
    (a) of which some other person is the settlor;
    (b) of which T is the settlor.

In case (1) there is (or may be) no settlement-arrangement before T begins to provide T's services. The question is whether a settlement-arrangement comes into existence.

---

95 *Jones v Garnett* 78 TC 1 at [22]. Likewise Lord Walker at [50]:
"A plan which existed when the structure was established."

In case (2) there is a settlement already. The question in 2(a) is whether T becomes the settlor. In case 2(b) T is already the settlor. The question is whether they provide further property (which might taint the settlement).[96] Of course, all the questions are related and they come down to the same question: does T gratuitously provide property for the purposes of the settlement?[97] It is suggested that the answer is, strictly, yes, if one can identify the funds that T has provided: see above. But it appears that HMRC do not take the point. In *Jones v Garnett*, Lord Neuberger envisages a case (1) situation (share held by Mr and Mrs Jones but no settlement-arrangement):

> On that basis, I find it also very hard to see why Mr Jones's decision each year not to take anything like a full salary, thereby increasing substantially the dividend payable to his wife, does not involve an element of bounty. Neither [Counsel for HMRC] (no doubt reflecting the Revenue's policy) nor [Counsel for the taxpayer] (as it would involve his clients losing on this issue) was prepared to adopt this approach. Although it appears to me to be logically attractive, it would be inconvenient in practice, in that it would be difficult to administer, and it might well produce unfair, even arbitrary, results.[98]

80.18.3 *Services provided for full consideration*

In *Mills* in the Court of Appeal, Buckley LJ noted other circumstances why a person who provides services to a trust or company may not be providing property:

(1) A person does not provide funds for a settlement if:
   (a) they are entirely ignorant of the settlement (which would generally be the case for employees of a company held by a trust), or
   (b) they do not have the view of advancing the interests of the trust.

(2) A person does not provide funds for a settlement if they do so for reward in the ordinary course of their professional business.

---

96 See 80.3.8 (Tainting).

97 See *Jones v Garnett* 78 TC 1 at [83]:

> "... the definition of settlement in [s.620 ITTOIA] and of the settlor in [s.620 ITTOIA] are closely connected, and it appears to me to be perfectly proper to rely upon observations as to what can be taken into account when considering who is a settlor, when deciding whether there is a settlement."

98 See *Jones v Garnett* 78 TC 1 at [89].

No-one would suggest that these persons providing their services to the company or trust should be regarded as settlors and the only question is why not? It is suggested that one reason is because there is no element of bounty.

80.18.4 *What is the arrangement?*

In *Jones v Garnett* Mr. Jones worked for a company held equally by himself and his wife. Lord Hoffmann gave "settlement-arrangement" a somewhat limited meaning:

> [HMRC's] second argument is that the transfer of the share [to Mrs Jones] was not the whole of the arrangement, which included the provision of services by Mr Jones, the dividend policy and so forth. Again, I think that would be inconsistent with the argument by which the revenue have, in my opinion, succeeded on the first point. The transfer of the share was in my opinion the essence of the arrangement. The expectation of other future events [i.e. provision of services by Mr Jones] gave that transfer the necessary element of bounty but the events themselves did not form part of the arrangement.[99]

80.19 Interest-free or back-to-back loan

A person who lends interest-free (or on favourable terms) is in principle[100] a settlor. HMRC agree. SP 5/92 para 22 provides:

> A loan made, directly or indirectly to a relevant settlement after 19 March 1991 on non-commercial terms, eg at a low or nil rate of interest is regarded as a provision of funds for the purposes of TCGA 1992 Sch 5 para 9(3). This is the case whether the loan is for a fixed period or repayable on demand.[101]

---

99 78 TC 1 at [29]. Lord Walker said the same at [54] stressing the absence of a contract of employment.

100 It is assumed that the loan is made with gratuitous intent. The position is different if the loan (though on favourable terms) is made without any gratuitous intent, which is conceivable, for instance, in the case of a loan by a life tenant.

101 As to whether an interest-free loan makes the trust a settlor-interested trust, see 27.3.3 (Beneficial loan or guarantee).

SP 5/92 para 19-21 deal with the CGT implications of loans to trusts before 19 March 1991. This is not now important but is set out here for completeness:

"19 A fixed-period loan made, directly or indirectly, to a relevant settlement prior to 19 March 1991 on non-commercial terms, eg at a low or nil rate of interest is, generally, regarded as a provision of property in pursuance of a liability incurred

Likewise Tax Bulletin 8 provides:

> Our view is that a person making a loan to the trustees on better than commercial terms is ... a settlor and transferor and within the provisions of [Chapter 5 Part 5 ITTOIA] or [s.727 ITA].

The same applies to a back-to-back loan. In *IRC v Wachtel*:

(1) the trustees borrowed from a bank, and
(2) an individual guaranteed the trustee loan and deposited funds equal to the trustee borrowing with the bank. The trustees paid only 1% interest on their loan.

The individual was rightly held to be a settlor.[102]

While a person who lends interest-free is in principle a settlor, what is the property provided, and when is it provided? It is considered that the property provided is the money lent, and property derived from that. It is provided at the time that the interest-free loan is made. If the money lent is spent on expenses, there is no property derived from the loan and the lender ceases to be a settlor.

Suppose:

(1) A settlor while abroad lends money to a trust with mixed resident trustees. The loan is interest-free and repayable on demand.
(2) The settlor later comes to the UK and deliberately leaves the loan outstanding.[103]

---

before 19 March 1991, provided the loan remains outstanding on the same terms. As such, it falls within the terms of TCGA 1992 Sch 5 para 9(3)(b) and the first condition set out in para 9(3) is not met.

20 There would, however, be a direct or indirect provision of property for the purposes of the settlement where a fixed-period loan falls to be repaid after 18 March 1991 but repayment is not made and so becomes a repayable on demand loan.

21 An extra-statutory concession D41 ... sets out the position in the case of non-commercial, repayable on demand, loans for the purposes of applying TCGA 1992 Sch 5 para 9(3)."

102 46 TC 543 at p.554I - 555.

103 If the loan is to a company held by the trust, then even if the settlor does provide property by leaving the loan outstanding it did not matter for the CGT rules before 6 April 2007 as the settlor has not provided settled property (so long as company assets are not transferred to the trust). But from 2007 this argument does not apply because the question is not whether the settlor provides settled property, it is whether the settlor provides property for the purposes of the settlement. See 80.17 (Provision of property for company held by trust).

HMRC may contend that the settlor has provided property by deliberately leaving the loan outstanding but it is tentatively suggested that this is not the case: what is the "property" which the settlor has provided? It is not the interest foregone, as that does not exist.[104] Thus the trust continues to be non-resident.

80.20 Indemnities

SP 5/92 provides:

> 34 An indemnity given by the new trustees to retiring trustees is not considered as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3).

This is right because there is no element of bounty. (Also the benefit of the indemnity is held by the *former* trustees so it is not property comprised in the settlement.)

> Other types of indemnity are considered in light of the facts of a particular case.

The standard form indemnity given by a beneficiary who receives trust capital is not the provision of funds, it is made in consideration of the trustees not exercising their trustee lien.

80.21 Guarantees

SP 5/92 continues:

> 35 The giving of a guarantee is regarded as an indirect provision of funds under the terms of TCGA 1992 Sch 5 para 9(3).[105]

---

104 Contrast *Re Marshall* [1965] NZLR 851 where the New Zealand Court of Appeal held that where interest on a debt is payable if demanded, but the right to call for payment is not exercised, there is no gift of the interest foregone. Also see 76.6 ("Provide").

105 SP 5/92 goes on to deal with the CGT implications of guarantees to trusts before 19 March 1991. This is not now important but is set out here for completeness:
"Payment of an obligation under a guarantee given before 9 March 1991 is, in general, regarded as a payment in pursuance of a liability incurred before 19 March 1991 and within para 9(3)(b). This may not, however, apply where-
- the contingent liability under the guarantee cannot be quantified with a sufficient degree of accuracy, eg where the guarantee is open-ended or the contingency is remote; or
- the guarantor does not take reasonable steps to pursue his rights against the debtor."

It is not possible to identify the funds which a guarantor provides. So while a guarantee (if made with gratuitous intent) may amount to tainting a trust, it does not give rise to a charge under s.624 or s.86, unless there is not merely a guarantee but also a back to back arrangement of the kind found in *Wachtel.*

80.22 Repayment of loan made by trustees

SP 5/92 para 23 provides:

> The repayment of any loan made, directly or indirectly, to any person by the trustees is not generally regarded as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3). This does not, however, apply where
> [1] more is repaid than is due under the original terms of the loan or,
> [2] in the case of loans made after 19 March 1991, where the interest charged under the terms of the loan exceeds a commercial rate.

This is clearly correct (apart from point [2] but in practice that is not likely to arise). There is no element of bounty.

80.23 Sale or share issue at on favourable terms

A sale to a trust at a conscious undervalue is the provision of property: the seller is a settlor. Likewise a purchase from a trust at a conscious overvalue: the purchaser is a settlor.

Likewise a person is a settlor if they hold all the shares in a company and consent or procure the company to new shares to a trust at a conscious undervalue.[106] The TSE Manual provides a straightforward example of this:

> **TSEM4120 Definition Of Settlor** [December 2011]:
> ***Example 1***
> X is the director and owns all the 150 issued ordinary £1 shares of X Ltd.
> X Ltd issues 100 new ordinary £1 shares which are acquired for £100 by the X Family Trust.
> The trust has been established for the benefit of X's family by his father, X Senior, who created the trust by settling cash of £100.
> Shortly after the issue of the new shares, a dividend of £100 per share

106 This proposition is self evident but if authority is needed, see *Crossland v Hawkins* 39 TC 493 at pp.506–507.

> is declared and paid and the trust receives dividends of £10,000. X controlled the arrangement for the issue of the shares at par followed by the dividend.

On these facts, HMRC conclude:

> X is therefore the true settlor of the settlement from which income of £10,000 arose. The original settlement of £100 by X Senior is usually disregarded on de minimis grounds.[107]

A sale at market value is not the provision of property. HMRC agree. The CG Manual provides:

> **34891. Multiple settlors** [April 2010]
> Where property is acquired as a result of an arms length transaction the third party is not to be regarded as providing property for the purposes of the settlement, thereby becoming a settlor. Instead the property is regarded as representing the cash previously held.

A bargain at arm's length (at a price regarded by both sides as market value) is not the provision of property even if the parties have mistaken the value and the property is sold at an undervalue.[108]

Similar issues arise in multi-party transactions where the trust is one of the parties. For instance, a company acting at arm's length may issue loan notes and shares, in a transaction where an individual subscribes the loan notes and the trust subscribes to the shares. The question then arises how to apportion the total subscription price between the loan notes and the shares. An under apportionment to the trust would make the individual a settlor. A valuation reached honestly and bona fide between the parties binds HMRC: See *Stanton v Drayton Commercial Investment* 55 TC 286 at p.317.

80.23.1 *Market value adjustment clause*

If the trust participates in a transaction where values are uncertain, the parties may be in a quandary, as if the trust pays too little, the vendor is a settlor and makes a transfer of value; if the trust pays too much, there will

---

107 [Author's footnote] The issue of shares would also have been a transfer of value for IHT, but it is not necessary to pursue that here.

108 This is consistent with the principles that a settlement-arrangement must have an element of bounty: see 80.2.3 (Settlement-arrangement definition of "settlement"), and that arm's length sales confer no "benefit": see 30.4.1 (Arm's length transaction).

be a capital payment to the vendor. In some cases a market value adjustment clause may be a solution. SP 5/92 provides:

> 13 Solely for the purposes of TCGA 1992 Sch 5 para 9(3)(a), a provision in the document governing the transaction for an appropriate adjustment to the consideration where the value agreed by the Revenue differs from the original consideration arrived at by an independent valuer and specified in the sale document is, in general, regarded as falling within the terms of the above definition of an arm's length transaction. The arm's length value of the transaction is to be determined in accordance with the principles set out in para 12 above. This will usually correspond to the value for capital gains tax purposes except, for example, where TCGA 1992 s 19 would apply.
> 14 It would also be necessary for the terms of the contract to provide for compensating interest at a commercial rate to be paid in either direction once the arm's length value is determined. For this purpose, the official rate of interest for [employment-related loans] purposes will usually be regarded as equivalent to a commercial rate of interest, although a different rate may be accepted as so equivalent if the circumstances of a particular case warrant this treatment.
> 15 This practice is, however, subject to the consideration passing on sale being realistically based, ie on a third party valuation by a qualified valuer, all the other terms of the transaction being at arm's length and the compensating interest being timeously paid. The position in a particular case depends on all the facts and circumstances.

Although the SP is said to be "solely for the purposes para 9(3)(a) Sch 5 TCGA", the same practice ought to apply for other purposes.

80.24 Failure to exercise right of reimbursement

SP 5/92 para 24 provides:

> [1] Failure, by or on behalf of any relevant person, to exercise statutory rights to reimbursement e.g. under [s.646 ITTOIA], may be regarded as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3).[109]

---

109 For completeness, Tax Bulletin 8 correctly qualifies this:
"Para 24 of the Statement of Practice [5/92] points out that failure to exercise statutory rights to reimbursement against non-resident trustees may be regarded as the provision of funds for the purposes of the settlement under para 9(3) of Schedule 5, TCGA 1992. This will not, however, apply in respect of a settlor's non-exercise of statutory rights to reimbursement out of the trust income account

Point [1] only applies to a failure to exercise rights which is both deliberate and gratuitous (ie with an element of bounty). This is the reason for the exceptional case which para 24 then addresses:

> [2] The settlement could remain outside the terms of para 9(3) where the exercise of the right to reimbursement is unsuccessful, provided it could be shown that there had been a genuine attempt to enforce rights to reimbursement.

The exception is stingily worded (here as in several other points, SP 5/92 gives the impression that it was intended to make life as difficult as possible for offshore trusts). It is not necessary to show "a genuine attempt to enforce rights to reimbursement". It is sufficient to show that such rights are not enforceable, or that a decision not to obtain reimbursement is a commercial one or that enforcement would not be cost-effective.

80.25 Payment of administrative expenses

SP 5/92 specifies two cases where payment of capital expenses out of a life tenant's income does not make the life tenant a settlor:

> 29 An expense on capital account paid out of trust income is not treated as a provision of income by a beneficiary for the purposes of TCGA 1992 Sch 5 para 9(3) provided that either—
>
> [1] the trust deed permits payment of capital expenses from income and the beneficiary is entitled only to net income after such payments;[110] or

---

where the settlor has a life interest in all the assets of the trust. In such circumstances, failure to exercise the right to reimbursement would, effectively, not add funds to the trust since all income would, in any ease, either be paid to the settlor under the terms of the trust deed or be used to meet expenses chargeable against income.

But even in such cases the settlor may have rights to reimbursement out of the trust capital account, eg in relation to accrued income charges, which if not exercised will be regarded as the provision of funds."

For other issues relating to reimbursement, see 30.4.10 (Reimbursement of tax under statutory indemnity) and 30.22 (Relevant income used to pay expenses).

110 For completeness, Tax Bulletin 8 expands on this:

"Para 29 of the Statement of Practice concerns, inter alia, trust deeds which permit capital expenses to be paid out of the income account. Neither the existence nor the exercise of this power would cause the trust to lose an interest in possession status for IHT purposes."

> [2] the trustees borrow money from the income account which is subsequently restored, along with interest over the period of the loan. The appropriate rate of interest is considered to be that which a Court of Equity would order on the replacement of trust income.[111]

The question, more analytically, is whether the life tenant has provided intentional and gratuitous benefit to the trust. Clearly, in the two cases mentioned, the life tenant does not do this and so does not become a settlor.

Where a trust has no income, someone (typically a beneficiary) may voluntarily pay the expenses. In this case there may also be no gratuitous element. It may be in the beneficiary's interest to make the payment. Subject to that, the SP tacitly suggests that the intentional and gratuitous payment of trustees' expenses *does* make the payor a settlor. But this is not correct. First, in some cases, the payment of expenses may be a provision of services to the trust rather than the provision of property.[112] Secondly, if a non-settlor pays trustees expenses, or pays a sum to the trustees which are immediately consumed in payment of expenses "no property of which S is the settlor" is comprised in the settlement, so the payor of expenses is not the settlor.[113]

HMRC agree. The STEP/CIOT questions[114] consider the IHT problems that arise when:

(1) a person (after 2006) adds property to an estate IIP trust and

---

111 For completeness, Tax Bulletin 8 expands on this. The bulletin sets out para 29[2] and continues:

> "The appropriate rate of interest is considered to be equal to the rate payable on the Basic Account administered by the Court Office of the Supreme Courts of Justice. Such interest will constitute taxable income in the hands of the income beneficiary (either when it is credited in the case of a life tenant, or when it is paid or applied for the benefit of a discretionary beneficiary). It may also be treated as 'relevant income' for [s.731 ITA] purposes.
>
> Income beneficiaries will only be liable on the net amount of income available after deduction of any income which has been applied to meet expenses on capital account. Only when the income account is made good will that income become taxable on the beneficiary."

112 See 80.18 (Provision of services).

113 See 80.3.6 (Person ceasing to be settlor).

114 Accessible at *http://www.tax.org.uk/Resources/CIOT/Migrated%20Resources/0-9/521412013-october-2008-version-sch-20-fa2006-letterdoc.pdf*

(2) the property is spent on trust expenses.

Question 37(2)
... if an addition of cash was made which was then spent by the trustees and HMRC regard this addition as within the relevant property regime (eg an addition to pay expenses or improve properties), how would the proportion of the settled property subject to the new rules be calculated? Would a valuation be needed of the property before and after the improvement?
HMRC Answer
If a payment of cash was made and then spent immediately on, say, a tax liability or another administration expense, then that short period will be the extent of its time as "relevant property" and there will be no question of having to consider what proportion of the existing settled property represents it going forward.
If a payment was made towards the improvement of a property, then this would appear to require "with" and "without" valuations when there is a chargeable event.[115]
Note added 6 August 2008: HMRC have indicated that they are actively reconsidering this response with a view to producing further guidance shortly.[116]

80.26 Trust retains life tenant's income

SP 5/92 para 33 provides:

A life tenant is not regarded as having provided income or property for the purposes of the settlement merely because there is an administrative delay in paying out the income that has vested in that beneficiary. If, however, the beneficiary directs the trustees to retain this income on the terms of the settlement, this is regarded as a provision of funds within TCGA 1992 Sch 5 para 9(3).

---

115 The question goes on to ask: In HMRC's view, do all subsequent post Budget additions need to be kept physically segregated? HMRC say no, which is just as well as money spent can hardly be regarded as segregated:
"It is clearly up to trustees to decide whether to keep post-Budget additions separate from the rest of the trust fund. We think that it may be sensible to do so—or, at least, to keep good records of additions. (The trustees of discretionary trusts already need to do this, of course, in order for the 10-year anniversary value of each addition to be identified correctly in light of the relief in s 66(2) IHTA for property that has not been 'relevant property' for a full 10-year period)."

116 No such guidance has been produced, presumably the issues have been filed as too difficult.

This is fairly obvious.

80.27 Purpose: Minor settlor

In *Mills v IRC* 49 TC 367, the funds of the settlement were derived from acting work of Hayley Mills, then aged 14. She was supposedly[117] unaware of the settlement to which at her direction her earnings were paid. The argument was that she had not provided funds for the *purpose* of the settlement. Viscount Dilhorne said:

> [1] I do not agree with Lord Denning MR that the word "purpose" in this section connotes a mental element or with Buckley LJ that there must be a motivating intention. I do not myself think that it assists to consider whether the question he posed is to be answered objectively or subjectively. I do not consider it incumbent, in order to establish that a person is a settlor as having provided funds for the purpose of a settlement, to show that there was any element of mens rea.
> [2] Where it is shown that funds have been provided for a settlement a very strong inference is to be drawn that they were provided for that purpose,
> [3] an inference which will be rebutted if it is established that they were provided for another purpose.

It is difficult to see what point this sloppy passage is trying to make.[118] It is not that purpose is irrelevant: see [3]. That seems to contradict the sentence at [1], but it is obviously right. "Purpose" and "provide" inescapably connote a mental element. The best explanation of this passage is that it is considering the situation like the facts in *Mills* where Hayley Mills *did* intend to provide funds for the purpose of her trust (as

---

117 The actual evidence recorded that she was "not very interested", which is not the same. The case should have been decided on the simple factual basis that Hayley Mills *did* intend to provide funds for the purpose of the settlement, even if she did not trouble to think very much about it. The judge made this point at p.378:
"The case was put on a factual assumption that Hayley Mills did not subjectively intend to provide funds. This was factually incorrect, and not even conceivable, because it was completely inconsistent with the view that the contract she signed was valid. If Hayley had not thought about it at all, the contract which she signed would be void under the rule *non est factum*."

118 Dilhorne, who took a third in law, was "not in the highest flight of English lawyers" (DNB).

shown by her signing a contract which had that effect) but she took almost no interest in the matter. That is, the comment is restricted to the facts of that particular case.

The legislation sometimes refers to purpose of the settlement (in the singular) and sometimes purposes (in the plural) but there is no distinction.[119]

80.28 Purpose: Advisers and agents of settlor[120]

It is considered that in ascertaining purpose one may have regard not only to the mind of the settlor, but also the mind of those acting for him or her. Agency principles may be applied. See *Crossland v Hawkins* 39 TC 439 at p.508:

> The mere fact that he did not concern himself with some of the 'steps' in the legal machinery involved does not make it any the less his arrangement within the section. A man does not avoid the incidence of [the income tax settlement provisions] by merely being absent from and leaving to his solicitors and accountants certain parts of the legal machinery if he is aware of the proposals for an 'arrangement' or a settlement and actively forwards them by personally carrying out and assisting in the vital parts in which his performance and co-operation are necessary. Nor can he avoid liability by merely giving his solicitors carte blanche to effect some scheme for the benefit of his family and refusing to concern himself with its precise form.

On this analysis many apparent difficulties fall away.

In *Mills*, the father acted on behalf of the daughter.[121] The purpose of the father was to provide the daughter's funds for the purpose of the settlement. That suffices to make the daughter the settlor if she had no purpose of her own. Likewise in *Hatton*[122] the purposes of Mrs Cole's attorney was to provide funds for the settlement, and this purpose should be regarded as the purpose of Mrs Cole.

---

119 "The statute seems to me to use the word 'purpose' and 'purposes' indiscriminately"; *Crossland v Hawkins* 39 TC 493 at p.507.

120 See 32.15 (Purpose: advisors and agents of transferor).

121 See 49 TC 367 at p.382 and p.385.

122 See 80.4 (Gift from A to B followed by gift to trust by B).

80.29 Settlement made by court for person lacking capacity

The court has power to make a settlement for a person lacking capacity "on his behalf". It is considered that the person lacking capacity is the settlor.[123] The Court of Protection agree:

> Trusts set up by an order of the Court of Protection will take the form of a settlement, with the patient being the settlor. ... in the case of trusts set up by an order of the Court of Protection, provision can be made for income to be accumulated, if appropriate, for the lifetime of the patient as section 164(1)(a) Law of Property Act 1925 applies.[124]

80.30 Settlement made by compromise of claim of minor or person lacking capacity

Parties to litigation may make a settlement under a compromise on behalf of a claimant who is a minor or person lacking capacity.[125] The Court of Protection say:

> An award of damages can be settled, by consent, in trust for the patient as part of the terms of compromise of the action between the plaintiff and the defendant, with the approval of the High Court, in circumstances where the award never becomes the absolute property of the patient.
> Trusts set up following an order of the High Court can only be done in the form of a declaration of trust by the trustees ... . The period over which income can be accumulated by the trustees is restricted to 21 years.[126]

This assumes that the minor/person lacking capacity is not a settlor for trust law purposes. The first sentence (which is probably the basis for the conclusion) is unsound. While the *award* never becomes the absolute property of the patient, the award represents the claim, which is the property of the claimant.[127]

---

123 Sections 16, 18(h) Mental Capacity Act 2005. The tax position is the same for settlements made under the Mental Health Act 1983.

124 Court of Protection Practice Note, 15 November 1996, para 4.

125 See Kessler, *Drafting Trusts & Will Trusts*, (12th ed., 2014), Chapter 26 (Trusts of damages).

126 Court of Protection Practice Note on the settlement of personal injury awards to patients, 15 November 1996, paras 2 and 4; set out in the White Book (Civil Procedure) para 6B-119.

127 *Zim Properties v Proctor* 58 TC 371.

But HMRC accept in practice that there is no settlor.[128] It would follow that the trust fund is excluded property, eg if it is an AUT, an OEIC, or not UK situate.

80.31 Trust under Criminal Injuries Compensation Scheme

An award under the Criminal Injuries Compensation Scheme (or the may be transferred to a trust.[129] The applicant under the Criminal Injuries Compensation Scheme is not the settlor of such a trust.[130] That is consistent with the position under the VTA. However, HMRC have apparently expressed the view that the claimant is the settlor, and in practice this view may well favour the taxpayer (as s.624 ITTOIA reduces the IT charge if the settlor is not a higher rate taxpayer).

The same applies to the Victims of Overseas Terrorism Compensation Scheme.[131]

80.32 Trust made in divorce settlement

In *Harvey v Sivyer* 58 TC 569 a separated husband made payments to his minor children under a deed of separation. The payments were not voluntary; they were pursuant to an obligation to maintain the children and contained no element of bounty.[132] The taxpayer argued that for this reason that there was no "settlement" within the settlement-arrangement definition. The argument was rejected and the taxpayer was held to be the settlor. The judge tentatively reconciled his decision with the bounty requirement because "the natural relationship between parent and young child was one of such deep affection and concern that there must always

---

128 Private correspondence.

129 Para 106 Criminal Injuries Compensation Scheme 2012.

130 The drafter of Part 2 Chapter 4 FA 2005 assumed this, though one needs to dig a little into the provisions to see why this is so:

(1) CICS trusts are within the provisions: s.35 FA 2005.

(2) Settlor-interested trusts are outside the scope of the provisions: see s.25(3) and 30 FA 2005. (In relation to CGT this was clearer before s.77 TCGA was repealed in 2008).

(3) The claimant under the CICS would always be a beneficiary, so if he was the settlor the trust would be settlor-interested.

So the drafter must have assumed that the claimant was not the settlor, or the provisions made no sense.

131 Para 99 Victims of Overseas Terrorism Compensation Scheme 2012.

132 58 TC 569 at p.572.

be an element of bounty by the parent, even when the provision is on the face of things made under compulsion".[133] This is romantic nonsense, as any family lawyer will attest. The better way to justify the decision is to note that the bounty requirement is not statutory, and not to be applied unthinkingly. The Court of Appeal noted in an earlier case, "if the legislature had set a limit to the extent to which a taxpayer may divest himself for tax purposes of income by voluntary means, I see no reason why the same principle should not be applied to income of which the taxpayer is compulsorarily divested".[134] So this is simply an exception to the bounty requirement. On this analysis, *Harvey v Sivyer* was correctly decided, though not for the right reasons.

80.33 Trust made by instrument of variation

80.33.1 *The usual situation*

Suppose:
(1) B inherits property absolutely from the estate of a deceased, D.
(2) B varies the will so as to create a settlement of that property; and s.142 IHTA and s.62 TCGA apply.

B is clearly the settlor in the general sense: see 80.4 (Gift from A to B followed by gift to trust by B).

80.33.2 *Settlor for IHT*

For inheritance tax purposes, the effect of s.142 IHTA is probably to override the general sense; the settlor is D and not B. HMRC agree. (The contrary view is arguable but it will not usually be in the taxpayer's interest to argue it.) IHT Manual provides:

> **35151 - IHT implications of an Instrument of Variation: effect of coming within s.142** [February 2006]
> When a variation satisfies the requirements of s.142(1) IHTA and there is a valid election or, on or after 1 August 2002, a valid statement of intent
> • the variation is not a transfer of value, and
> • the IHTA applies as if the deceased had effected the variation
> Consequently, for example ...
> [1] if a variation sets up a non-interest in possession trust, the deceased

133 58 TC 569 at p.577.
134 *Yates v Starkey* 32 TC 38 at p.53.

is treated as the settlor, and

[2] the GWR rules in s.102 FA 1986 cannot apply to a disposition which is accepted as a variation within s.142(1) IHTA.

This is because the effect of s.142(1) IHTA is that the deceased is treated as the donor.

Point [1] states that the deceased is the settlor if a variation sets up a non-interest in possession trust. The same rule must in principle apply if the variation sets up an interest in possession trust (but with the added complication of s.80 IHTA rules, if applicable). Likewise Tax Bulletin 15 provides:

> Our view is that, as the relevant IHT legislation differs from the CGT provisions which were considered in *Marshall v Kerr*, that decision has no application to IHT. Variations which meet all the statutory conditions will continue to be treated for IHT purposes as having been made by the deceased.

80.33.3 *Settlor for IT: Variation before 6 April 2006*

B is the settlor for IT purposes in the case of variations made before 6 April 2006.

80.33.4 *Settlor for CGT: Variation before 6 April 2006*

The identity of the settlor for CGT is an unresolved question.[135] The issue is whether s.62 TCGA overrides the general sense of settlor. The House of Lords held in *Marshall v Kerr* 67 TC 56 that for CGT the settlor is the beneficiary making the variation, not the testator. However, the reasoning relies on the fact that the beneficiary settled a share in an unadministered estate. The position is therefore different if:

(1) the IOV is made after administration of the estate has been completed; or

(2) the will or intestacy is governed by the law of a jurisdiction (such as a civil law jurisdiction) which (unlike common law jurisdictions) does not recognise personal representatives and an administration period; or

(3) the disposition varied is a joint tenancy (because, as in (2), there is no administration period in respect of property passing by survivorship).

In the following discussion cases (1) to (3) above are called "non-

135 See Sokol "*Marshall v Kerr* Revisited", Taxation, 3 May 2001.

administration" cases, and cases where the estate was in administration (like *Marshall v Kerr*) are called "administration cases".

The reasoning of the House of Lords suggests that the law is as follows:

(1) In non-administration cases whenever the IOV is made, it is considered that the deceased is the settlor.

(2) In administration cases:

  (a) If the IOV is made before 31 July 1978 (the passing of the FA 1978) the beneficiary is the settlor: that, at least, is clear from *Marshall v Kerr*.

  (b) If the IOV is made after 31 July 1978, it is suggested that the deceased is the settlor. *Marshall v Kerr* has been reversed by (what is now) s.62(9) TCGA: this subsection was not in force in the tax years relevant to *Marshall v Kerr*.

To distinguish between administration and non-administration cases is highly anomalous, so this view of s.62(9) TCGA brings welcome consistency into the law. It also brings CGT into line with IHT.

It appears to be the HMRC view that the beneficiary is the settlor even in cases (2) and (3). CG Manual 37888 [October 2010] provides:

> The Revenue had always considered that Section 62(7) was concerned with computational matters only, and had no effect on the question whether a new settlement had come into existence or the identity of the settlor. The majority of the House of Lords, in Marshall v Kerr, 67TC56, preferred slightly different reasoning in holding that a residuary legatee, who had executed an instrument of variation so that her 50 per cent share of the estate was settled, was the settlor for the purposes of Section 87 TCGA 1992 (charge on beneficiaries of non-resident settlements). It may be noted that the case was concerned with the pre-1978 version of the relevant legislation and it is considered that the Revenue's arguments in that case are stronger under the later legislation.
>
> Where the instrument was executed before 6 April 2006 this decision should be applied for the purposes of Section 77 TCGA 1992 & Section 86 TCGA 1992 (charge on settlors of certain settlements) and TCGA 1992/SCH1 (annual exempt amount for trustees).[136]

136 Likewise TSEM 1815 [January 2013]:

> "The settlor of a trust created by a deed is not the deceased, unless it's a disclaimer (TSEM1840). It is the person who was entitled to the gift that has now gone into trust. The gift can be capital or income or both. The case of *Marshall v Kerr* (67 TC 56) is relevant. There may be more than one settlor."

The author has been expecting further litigation on this aspect since 1994, but it has not happened yet. In view of the 2006 reforms, HMRC may not dispute the position for variations before 6 April 2006.

80.33.5 *IT and CGT: IoVs from 6 April 2006*

Section 470(2) ITA sets out three exceptions to the IT/CGT appointment rules. The third is:

> A transfer of property is excluded for the purposes of subsection (1) if ... (c) section 473(4) applies in relation to it.

This excludes the operation of (what I call) the IT/CGT appointment rules. Instead the position is governed by s.472, 473 ITA. Section 472 ITA provides:[137]

> (1) This section applies if—
>
> (a) a disposition of property following a person's death is varied, and
>
> (b) section 62(6) of TCGA 1992 applies in relation to the variation.
>
> (2) [i] If property becomes settled property because of the variation [ii] and would not, but for the variation, have become settled property),
>
> a person within subsection (3) is treated for the purposes of the Income Tax Acts (except where the context otherwise requires)—
>
> (a) as having made the settlement, and
>
> (b) as having provided the property for the purposes of the settlement.
>
> (3) The persons within this subsection are—
>
> (a) a person who immediately before the variation was entitled to the property, or to property from which it derived, absolutely as legatee,[138]

---

137 The CGT equivalent is s.68C TCGA.

138 Section 472 provides:

> "(4) For the purposes of subsection (3)—
>
> (a) 'legatee' includes a person taking property—
>
> (i) under a testamentary disposition or on an intestacy or partial intestacy, whether beneficially or as trustee, or
>
> (ii) under a donatio mortis causa, and
>
> (b) a person who is a legatee as a result of para (a)(ii) is treated as acquiring the property when the donor dies.

(b) a person who immediately before the variation would have been so entitled if that person had not been an infant or otherwise lacking legal capacity,
(c) a person who, but for the variation, would have become so entitled, and
(d) a person who, but for the variation, would have become so entitled if that person had not been an infant or otherwise lacking legal capacity.

Section 472 (and its CGT equivalent, s.68C TCGA) applies in the usual situation, where a beneficiary absolutely entitled to property under a will varies the will so as to create a settlement. Section 68C TCGA enacts the HMRC view that the beneficiary is the settlor for CGT. Section 472 confirms (which no-one ever doubted) that the beneficiary is the settlor for IT.

This applies not just for the standard IT/CGT definition, but for all purposes of IT and CGT. Although the drafter adds the words except "where the context otherwise requires", I cannot think of a case where the context would "otherwise require"; and I expect the drafter has copied without much thought the wording used (appropriately) in s.467 ITA.

Section 473 ITA provides:

(1) This section applies if—
(a) a disposition of property following the death of a person ("D") is varied, and
(b) section 62(6) of TCGA 1992 applies in relation to the variation.
(2) If—
(a) property would have become comprised in a settlement within subsection (3), but
(b) as a result of the variation, the property, or property derived from it becomes comprised in another settlement,
D is treated for the purposes of the Income Tax Acts (except where the context otherwise requires) as having made the other settlement.
(3) A settlement is within this subsection if—

---

(5) For the purposes of subsection (4)(a) property taken under a testamentary disposition or on an intestacy or partial intestacy includes any property appropriated by the personal representatives in or towards satisfaction of—
(a) a pecuniary legacy, or
(b) any other interest or share in the property devolving under the disposition or intestacy."

(a) it arose on D's death (whether by D's will or on D's intestacy or in any other way), or
(b) it was in existence immediately before D's death (whether or not D was a settlor in relation to it).

(4) If—
(a) immediately before the variation property is comprised in a settlement and is property of which D is a settlor, and
(b) immediately after the variation the property, or property derived from it, becomes comprised in another settlement,

D is treated for the purposes of the Income Tax Acts (except where the context otherwise requires) as having made the other settlement.

(5) A settlement treated as made by D as a result of this section is treated for the purposes of the Income Tax Acts as made by D immediately before D's death.

(6) But subsection (5) does not apply in relation to a settlement which arose on D's death.

Section 473 applies in the highly unusual situation where property settled by will is re-settled by beneficiaries.[139] Here the opposite rule is enacted: the beneficiaries are *not* settlors for IT or CGT.

Where s.472 applies, s.472(2) imposes two rules:

(a) the beneficiary ("B") is deemed to have made the settlement;
(b) B is deemed to have provided the property for the purposes of the settlement.

By contrast, where s.473 applies, we only have rule (a): the deceased is deemed to have made the settlement. By implication, rule (b) must also apply: the deceased must be deemed to have provided the property.

CG Manual 37888 [October 2010] provides:

> Where the instrument was executed on or after 6 April 2006 and notice is given under Section 62(7) Section 68C TCGA 1992 applies with these consequences.
>
> - Where under the will or intestacy property was to pass absolutely to an individual, and a variation is executed settling that property (or property deriving from that property), then the person to whom the property would have passed is the settlor with regard to that property.
> - Where under the will or intestacy property was to be settled, but the variation is such that a new settlement is created (see CG37887) then the deceased is the settlor.

139 See 80.14 (Variation or resettlement by beneficiaries)).

- Where under the will or intestacy property was to be settled, but the variation is minor, then the deceased would be the settlor without the new legislation in FA 2006 and therefore this case is not provided for specifically.

80.33.6 *Settlor of IoV: Commentary*

What is the reason for s.473? Perhaps because it can be hard to identify settlors on variations of settlements. Perhaps because, if the will actually settled the property, there is little need or scope for tax planning by IOVs. In practice s.473 is not important. It appears to be dead letter tax law (not the only dead letter tax law enacted under the banner of trust modernisation). Does it matter to have on the statute book complex provisions that never apply and no-one need take notice of? I think it does, and maybe some day some reformer will sweep it away, and bring CGT and IHT into alignment. The IHT rule is a sensible one, for it fits the object of the IOV rules, which is to allow beneficiaries to avoid the tax unfairnesses of badly drafted wills.

80.34 Pension trusts and employee benefit trusts

80.34.1 *Is a pension trust or employee benefit trust a settlement?*

Employers generally create pension trusts and employee benefit trusts for commercial reasons. There is normally no element of bounty on the part of the employer. Nor is there any bounty on the part of the employee, who is not in a position to negotiate or reject the arrangements. Such a trust is here called "**a commercial trust**".

A commercial trust is a settlement under the classic settlement definition. However, a commercial trust is not a settlement under the settlement-arrangement definition.

HMRC agree. CG Manual 14596 provides:

> **Pension funds** [January 2010]
> ... It is considered that for the purposes of Income Tax[140] a pension fund, certainly an approved one, is not a settlement, because of the absence of 'bounty'; (see *Berry v Warnett*, 55 TC 92 for a discussion of the bounty test). Accordingly transfers of assets to Pension Funds are not connected persons transactions and there is no restriction of availability

140 The author means, for the purposes of the settlement-arrangement definition of "settlement".

of losses under section 18(3) TCGA 1992.

80.34.2 *Who is the settlor of a commercial trust?*

Since a commercial trust is not a settlement-arrangement, the question of who is the settlor does not arise when the settlement-arrangement definition of settlement is applicable. However the question arises as to who is the settlor of the commercial trust where a classic definition of settlement is applicable.

The answer depends on which definition of settlor applies.

80.34.3 *Settlor of commercial trust: Standard IT/CGT & IHT definitions*

Let us look first at the standard IT/CGT definition and the IHT definition of settlor. Under these definitions "settlor" includes (1) the person who provides property and (2) the person who makes the settlement. It is considered that the position is as follows:

(1) "Providing" property requires an element of bounty, and no-one can be said to "provide" property to a commercial trust.
(2) To "make" (or perhaps to "enter into") a settlement does not require an element of bounty.

HMRC agree. The CG Manual provides:

> **33245. Settlor: from 6 April 2006: Basic principles** [October 2007]
> ...Basically under Section 68A(1) to (3) [TCGA] a person is a settlor if:
> [1] he made or entered into the settlement. This describes the person who has had the deed drawn up on his behalf. The property may come from elsewhere; or the transfer of property to the settlement may be without 'bounty' (see next bullet),
> [2] he has provided property for the purposes of the settlement. On the basis of *IRC v Leiner* 41 TC 589 these words are regarded as applying only where there is 'bounty'.
> [3] the property is settled as a result of his will or intestacy.
> **34800 - Settlor trusts: meaning of settlor** [October 2007]
> For the purposes of TCGA92/S77 a person is a settlor in relation to a settlement if the settled property consists of or includes property directly or indirectly provided by him. ... The word 'provided' is regarded as importing the 'bounty' test.

The employer normally "makes" a commercial trust (normally the employer is a party to the trust deed and the deed is drawn on his behalf) and so the employer is a settlor under the standard IT/CGT definition and the IHT definition. HMRC agree. CG Manual provides:

> **33240 Settlor: Up to 5 April 2006** [October 2007][141]
> ... There is no judicial guidance on the precise meaning of "made" and "entered into" although they have been present in the Income Tax legislation for many years. They would appear to be descriptive of anyone who can reasonably be described as settlor in accordance with the relevant legislation but also anyone who has created a settlement as a formality or put property into a settlement other than for full consideration....
> Because a person who has 'made' or 'entered into' a settlement is within the definition of settlor it is not considered necessary for 'bounty' to have been provided. Therefore employee trusts have a settlor. See CG33580 and CG35020+. ...
> **33580. Trusts for employees** [February 2012]
> Except where specific rules provide otherwise, trusts set up for the benefit of employees are subject to the normal rules relating to settled property. For the purposes of determining the annual exempt amount the settlor is the person who made or entered into the settlement, generally the employer. ... In addition any individual or company which adds property to the settlement is also a settlor. ...

If the employer is the settlor, and is a company, it follows that excluded property status depends on the domicile (ie place of incorporation) of the company. That is a relatively sensible rule. IHT cannot normally operate on the basis that employees are the settlors of an EBT, since they are normally a large and fluctuating body. It would be odd if an EBT had no settlor for IHT purposes.

80.34.4 *Settlor of commercial trust: s.86 definition*

The CGT s.86 definition of "settlor" is different and does *not* include the person who makes or enters into a settlement. So the employer is not a settlor for the purposes of s.86. HMRC appear to agree. This can be inferred from comments in the CG Manual on s.77 TCGA. That section was repealed in 2008 but the comments are relevant because the definition of settlor for s.77 was (in short) the same as for s.86 TCGA. The CG

---

141 This passage is considering Sch 1 TCGA before the 2006 amendments. At that time the Sch 1 applied a classic definition of settlement (so an employee benefit trust was a settlement), and it applied the settlement-arrangement definition of settlor (so someone who made or entered into a settlement was a settlor). The point made here therefore applies to the standard IT/CGT and IHT definitions of settlor which contain similar wording.

Manual provides:

> **34804 Corporate Settlors** [October 2007]:
> Companies frequently create settlements. These are generally settlements for employees, see CG35020, or other commercial arrangements, see CG35023. Such settlements are usually excluded from TCGA Section 77 because of the bounty test.

More analytically, a commercial settlement was a "settlement" for the purposes of s.77 (which applied the IT/CGT definition, not the settlement-arrangement definition). However s.77 did not apply because the company was not within the s.77 definition of settlor. The CG Manual formerly provided:

> **33580. Trusts for employees** [June 2003]
> ... CG35020+ shows that in many circumstances the employer is not the settlor for TCGA 1992 Section 77.

Similarly:

> **35020. Settlor trusts: Share option schemes: Trusts for employees** [February 2006]
> There is nothing in Section 77 [TCGA] itself to prevent it being applied to a company.[142] In particular, where a company has set up a settlement for its employees, the deed may provide that if all the trusts fail, the property may revert to the company. The most common cases are share option schemes and unapproved pension schemes. In the latter case it can also be argued that the employees themselves are also settlors.
> The Revenue Booklet entitled 'The tax treatment of Top-Up Pension Schemes', Para 2.7.5, states:
>
> > 'The 'benefit to settlor' rules in [s.624] and [TCGA 1992, Sections 77–79] can apply to top-up pension schemes. But this is not likely to be the case where the structure and operation of a scheme are broadly similar to an approved pension scheme.'
>
> **35021. Settlor trusts: Share option schemes: Trusts for employees** [February 2006]
> The legal basis of this is that a person is a settlor under Section 79 [TCGA] to the extent that that person has provided property for the purposes of the settlement. The courts have indicated in dealing with similarly worded Income Tax legislation that this means that is necessary for the settlor to have provided 'bounty', and that a commercial

142 This sentence is debatable, but the issue is now of historic interest only.

> transaction does not normally contain bounty. Therefore if a settlement can fairly be regarded as part of an employer's normal commercial arrangements for the remuneration of his employees, neither the employer nor the employees should be regarded as settlors.
>
> **35022. Settlor trusts: Share option schemes: Trusts for employees** [February 2006]
>
> The absence of approval for a share option scheme or a top-up pension scheme does not prevent it from being 'normal'. Cases should only be challenged if the benefits are provided for a very small number of employees, particularly directors and/or shareholders.
>
> **35023. Settlor trusts: Other commercial arrangements** [February 2006]
>
> In exceptional circumstances trusts may be set up for commercial reasons other than to benefit employees. In general Section 77 should not be applied to genuine commercial arrangements, where the main beneficiaries are members of the public, and it is not intended that funds should revert to the person setting up the trust. On the other hand it is possible that the main beneficiary is the settlor, in which case the application of Section 77 should be contended for.

The passage was deleted in February 2012 but there is no reason to think that HMRC have changed their view.

If the company is a close company, see 80.35.1 (Trust made by company: s.86 definition of settlor).

80.34.5 *Could employees be settlors of an employee benefit trust?*

CG Manual para 35020 [February 2006] states in relation to unapproved pension schemes:

> ... it can also be argued that the employees themselves are also settlors.

Similarly, the comment that employers and employees are not settlors is said in the passage set out above to apply only to "normal commercial arrangements".

Why are employees not settlors in normal cases? There may be two reasons:

(1) The employee may not have provided anything as they normally gave up no rights when the employer made the transfer to the trust. The trust is created at the discretion of the employer and these employees play no part in it.

(2) Common form employee benefit trusts benefit a wide class of beneficiaries, so one may not be able to identify any particular part of

the trust fund as provided by any particular employee (even if it is the case that a class of employees have jointly provided the trust property). That would preclude any charge to tax on any employee.

Employees may be settlors where these factors are both absent.

The TSE Manual provides:

> **5355 Summary for FURBS/EFRBS non-resident trustees** [April 2013]
> ***...The Settlements Legislation***
> **Information** The Settlements legislation in Chapter 5 Part 5 ITTOIA will not apply if the scheme is operating on normal commercial lines as part of an employment package. But in certain circumstances you may consider whether the Settlements legislation applies to charge the FURBS/EFRBS trust's income and gains on a director.
> **Action** The Settlements legislation provisions can apply if the trust is apparently not genuinely to provide retirement benefits and/or the beneficiary of the trust has directly or indirectly provided funds for the settlement (see TSEM4120). Apply the following guidelines when examining trust returns and accounts and liaise with the tax office for the company and the employment income tax office, or submit to HMRC Trusts & Estates Technical Edinburgh, as necessary.
> - The Settlements legislation will not apply where only the employer makes contributions - unless the contributions are
>   - made by a close company which the member controls and
>   - unrealistically large by normal commercial standards.
>   - For example, if there is only one director who is also the sole shareholder of the employing company, and substantial contributions are made into the FURBS/EFRBS, you may consider whether the Settlements legislation applies to treat the director/shareholder as the settlor. If you think this may be the case, you must liaise with the tax office for the company. They will consider whether to deny a deduction for the contributions.
> - The Settlements legislation will not apply if the member makes contributions and these are reasonable compared with the member's salary. However, if the member makes **any** contributions, refer the case to the Divisional Technical Adviser.
>
> If you consider the Settlements legislation may apply, submit your papers to HMRC Trusts & Estates Technical Edinburgh...

80.34.6 *Trust of pension scheme death benefits*

The IHT Manual provides:

> **17085. The identity of the settlor** [May 2013]

> The settlor of a discretionary trust created to receive death benefits paid from a pension scheme is the pension scheme member.
> Property settled on the trusts of an employer-financed retirement benefit scheme (EFRBS) (IHTM17027) on or after 6 April 2006 is treated in the same way as settled property in any other discretionary trust. So it is liable to the ten-year anniversary charge and exit charges (IHTM04096). In this case the scheme member is a settlor for Inheritance Tax (IHT) purposes. This applies to:
> - contributions made by the member as an individual, and
> - contributions made by their employer (even where this is non-contributory for the employee (member) and is wholly financed by the employer). This is because pension rights and benefits are derived from payments by the employer as deferred or delayed remuneration for the employee's current work. This principle was established in *Parry v Cleaver* [169] 1AER 555 and *The Halcyon Skies* [1976] 1 AER 856
>
> In this way, the scheme member has provided funds directly or indirectly and is the settlor for IHT purposes.

A member is clearly the settlor if he or she has a general power of appointment over the death benefit and creates the trust by exercise of that power.

In other cases the position is less clear. It is well-settled that:

> ... pensionable employment is more valuable to a man than the mere amount of his weekly wage. It is more valuable because by reason of the terms of his employment money is being regularly set aside to swell his ultimate pension rights whether on retirement or disablement. His earnings are greater than his weekly wage. [Where the wage is £20 with total contributions to the pension fund of £4 per week] his employer is willing to pay £24 per week to obtain his services, and it seems to me that he ought to be regarded as having earned that sum per week. The products of the sums paid into the pension fund are in fact delayed remuneration for his current work. That is why pensions are regarded as earned income.[143]

---

143 *Parry v Cleaver* [1970] AC 1 at p.l6C. Similarly, *Imperial Group Pension Trust v Imperial Tobacco* [1991] 1 WLR 589 at p.579:

> "Pension scheme trusts are of quite a different nature to traditional trusts. The traditional trust is one under which the settlor, by way of bounty, transfers property to trustees to be administered for the beneficiaries as objects of his bounty. Normally, there is no legal relationship between the parties apart from the trust. The beneficiaries have given no consideration for what they receive. The

The non-tax cases cited in the IHT Manual do not address the issue of who is the settlor for IHT purposes. The fact that a pension is delayed remuneration does not answer the tax issue. If the member was not the settlor of the pension trust before the transfer to the death benefit trust, how can they become the settlor? At first sight the transfer from a pension trust to the trust of the death benefit should not alter the identity of the settlor.[144] It may be said that the pension trust represents earning of all the members but the death benefit trust isolates or represents earnings of one particular member. But the required element of bounty is missing.

80.35 Trust made by company: Are shareholders settlors?

The position here is made more complicated by differences in the definitions of settlor.

80.35.1 *Trust made by company: s.86 definition of settlor*

The s.86 definition of settlor is unique in that it makes express provision to treat shareholders and other participators as settlors, where a close company is a settlor. Para 8(4) sch 5 TCGA provides:

> For the purposes of this paragraph—
> (a) where property is provided by a qualifying company[145] controlled[146] by one person alone at the time it is provided, that person shall be taken to provide it;
> (b) where property is provided by a qualifying company controlled by 2 or more persons (taking each one separately) at the time it is provided, those persons shall be taken to provide the property and

---

settlor, as donor, can impose such limits on his bounty as he chooses ... a pension scheme is quite different. Pension benefits are part of the consideration which an employee receives in return for the rendering of his services. In many cases, ... membership of the pension scheme is a requirement of employment. In contributory schemes ... the employee is himself bound to pay for his or her contributions. Beneficiaries of the scheme, the members, far from being volunteers have been given valuable consideration. The company employer is not conferring a bounty."

144 See 80.8 (Transfer from trust 1 to trust 2 by exercise of trustees' power).

145 Para 8(5) sch 5 TCGA provides: "For the purposes of sub-paragraph (4) above a qualifying company is a close company or a company which would be a close company if it were resident in the UK." For a note on this terminology, see 85.22.1 (Non-resident close company).

146 See 50.3.2 ("Control" and "participator").

each one shall be taken to provide an equal share of it;

(c) where property is provided by a qualifying company controlled by 2 or more persons (taking them together) at the time it is provided, the persons who are participators in the company at the time it is provided shall be taken to provide it and each one shall be taken to provide so much of it as is attributed to him on the basis of a just apportionment;

but where a person would be taken to provide less than one-twentieth of any property by virtue of paragraph (c) above and apart from this provision, he shall not be taken to provide any of it by virtue of that paragraph.

The wording is based on s.96(3)-(5) TCGA; see 51.9.2 (Consequence of capital payment to company).

Why does the s.86 definition have this provision which is not found in any other definition of settlor? The answer may be because the s.86 definition is narrower than the others, lacking the rule that someone who makes a settlement is a settlor.[147]

If para 8 applies (so that a participator is "taken to provide" the trust property) it is considered that the company should be taken not to provide the property, ie, it is not the settlor.

80.35.2 *Trust made by company: Other definitions of settlor*

Where a company makes a settlement, the individual controlling shareholder(s) will be settlor(s) if they can be said to provide property indirectly.[148] In relation to companies with only one or two shareholders, this may well be the case, if there is an element of bounty, though it depends on the facts. The CG Manual para 34804 [October 2007] provides:

> Companies frequently create settlements. These are generally settlements for employees, see CG35020, or other commercial arrangements, see CG35023. Such settlements are usually excluded from Section 77 TCGA 1992 because of the bounty test. Exceptionally it may be appropriate to argue that TCGA Section 77 applies to the particular settlement. *Although there is no specific provision comparable to TCGA Schedule 5 Para 8(4), nevertheless it may be appropriate in such a case to consider whether the property entering*

147 See 80.34.4 (Settlor of commercial trust: s.86 definition).

148 Contrast 29.3.2 (Transfer procured by individual).

the settlement has been provided indirectly by the shareholders, both for the purposes of TCGA Section 77 and for the purposes of Section 619 ITTOIA [the settlement-arrangement definition].
(Emphasis added)

80.36 Planning to create trust with foreign domiciled settlor

The "who is the settlor" question may arise in a tax planning context where it is desired to create a foreign domiciled trust by transferring property to a foreign domiciled settlor. These arrangements are always challenging and sometimes impossible to carry out in practice, for it depends ultimately on intention, and that cannot be manufactured to suit the circumstances.

Example 1
(1) H (UK domiciled) gives property to H's wife W (not UK domiciled); and
(2) W gives it to a trust.
Who is the settlor: H or W or both?

The success of schemes involving a transfer to a foreign domiciliary who creates a settlement depends on how the transaction is carried out. Does W have a genuine and wholly independent role?[149] It is suggested that W should retain the property for at least one year; that no decision be made as to whether or not to create a settlement at the time of the gift from H to W; *a fortiori* no decision should be made on the terms of the trust; and W should receive independent legal[150] advice on any proposed gift to a settlement.

Example 2
(1) Trustees of a trust (with a UK domiciled settlor) appoint property to a beneficiary ("B") (not UK domiciled); and
(2) B gives the property to a new trust.
In principle, the settlor of the new trust will be B, not the settlor of the old trust.[151] But it is different if B is acting at the behest of the settlor.[152]

Watch the trust law rule of fraud on a power, and the GAAR. It would

149 See 80.4 (Gift from A to B followed by gift to trust by B).
150 W may also need tax advice, but what matters here is that W has independent advice on the property law aspects of the gift.
151 See 80.6 (Appointment from old trust to B followed by gift to new trust by B).
152 See 80.5 (Trust created by B at request of A).

be better if the terms of the new settlement are different from the terms of the old. For an (almost unbelievable) example of botched execution of this scheme, see *Anker-Petersen v Christensen* [2002] WTLR 313.

CHAPTER EIGHTY ONE

TRUSTS WITH TWO OR MORE SETTLORS

81.1 Trusts with two settlors: Introduction

This chapter considers the IT and CGT position where a settlor-interested trust has more than one settlor. I deal with this in one chapter as the IT issues and CGT issues overlap.

81.1.1 *Cross references*

For settlor-interested trusts with only one settlor, see 27.1 (IT) and 50.1 (CGT).

For IHT aspects of trusts with two or more settlors, see 64.1 (Transfers between trusts and adding to trusts: Introduction).

Similar s.720 issues arise with multiple transferors: see 28.7.2 (Income arising must be identifiable).

81.2 Two settlors of settlor-interested trust: IT

81.2.1 *Position where multiple settlor provision does not apply*

In *Herbert v IRC* 25 TC 93, the facts (in short) were:

(1) Property was held on trust for L for life, remainder to R.

(2) L and R directed that the property should be transferred to a new trust, which was revocable (and so settlor-intested).

L and R were joint settlors of the new trust. The Revenue assessed R on the income of the new trust under a provision equivalent to s.624 ITTOIA.[1] The judge observed:

---

1 I guess that they did not assess L because he was non-resident.

> [R] is not the only settlor. [L] is also a settlor... The Section provides that the income "shall be treated as the income of the settlor and not as the income of any other person". [L] is admittedly a "settlor" and, therefore, the income must be treated as his income and not as the income of any other person: [R] is another person and, therefore, the income cannot be treated as his. If [L] were assessed, the same argument could be raised. If there is no flaw in the argument and the words of the Section are imperative, as they seem to be, the result is that where there is more than one settlor the provisions of the Section become inapplicable.
> ...the Act does not prescribe what is to happen when there is more than one settlor ... It is not suggested that all the settlors can all be assessed in respect of all the income. That, indeed, would seem to be an extravagant proposition. Nor is it suggested by the Crown that the income should be distributed between them....
> The interpretation of the Section put forward on behalf of the Respondents was that where there are two or more settlors the Crown has the option to assess any one of the settlors to the exclusion of the other, and that, in the case of an assessment to Income Tax ... the option must be exercised by the local Inspector of Taxes and that there was no right of appeal by the taxpayer against the Inspector's choice. ... I find myself unable to accept that interpretation. It seems to me fantastic to suppose that Parliament has conferred upon Inspectors of Taxes, or even upon the Special Commissioners, a choice as to whether A, or B, or C should be liable to Income Tax ... .

81.2.2 *Multiple settlor provision*

Section 644 ITTOIA now makes provision for a settlement with multiple settlors:

> (1) In the case of a settlement where there is more than one settlor, this Chapter has effect in relation to each settlor as if that settlor were the only settlor.
> (2) This works as follows.
> (3) In this Chapter, in relation to a settlor—
> (a) references to the property comprised in a settlement include only property originating from the settlor, and
> (b) references to income arising under the settlement include only income originating from the settlor....
> [Subsections (4) and (5) deal with ss.629, 631 and 632 ITTOIA - settlements for minor children of the settlor - not discussed here.]

Section 645 ITTOIA[2] defines "property originating from a settlor":

> (1) References in section 644 to property originating from a settlor are references to—
>
> (a) property which the settlor has provided directly or indirectly for the purposes of the settlement,
>
> (b) property representing property so provided, and
>
> (c) so much of any property which represents both property so provided and other property as, on a just and reasonable apportionment, represents the property so provided.
>
> (2) References in sections 627 and 644 to income originating from a settlor are references to—
>
> (a) income from property originating from the settlor, and
>
> (b) income provided directly or indirectly by the settlor.
>
> (3) In this section references to property or income which a settlor has provided directly or indirectly—
>
> (a) include references to property or income which has been provided directly or indirectly by another person under reciprocal arrangements with the settlor, but
>
> (b) do not include references to property or income which the settlor has provided directly or indirectly under reciprocal arrangements with another person.
>
> (4) In this section references to property which represents other property include references to property which represents accumulated income from the other property.

Thus on the facts of *Herbert*, the income of the new trust would in principle be treated as the income of L for his life, under s.624, and as the income of R after the death of L.

Section 644 applies where there is *one* settlement with more than one settlor. In some IT cases one might say that there are two settlement-arrangements. Eg if S creates a trust and (subsequently and independently) X adds to it, one might say that there are two distinct settlement-arrangements (even if there is only one classic settlement) and S and X are the (sole) settlors of their settlement-arrangement. However s.644 is another route to the same destination, so it does not matter which analysis one takes, and s.644 seems a clearer solution.

---

2 Flagged by s.644(6).

81.3 Two settlors of settlor-interested trust: CGT

The s.86 charge applies to disposals of settled property "originating from the settlor".[3] This wording incorporates rules similar to the IT rules discussed above.

The CG Manual contains guidance which relates to s.77 TCGA (repealed 2008) but which would still be applicable to s.86:

> **34893. Multiple settlors** [April 2010]
> Section 79 provides that trust gains are only to be attributed to each settlor to the extent that those gains accrue on property originating from that person. Where the assets provided by two or more settlors are managed as separate funds, there should be no difficulty in determining to which settlor the gains on the disposal of particular items of property should be attributed. Where the assets provided by different settlors are not appropriated into separate funds, the legislation provides for a just apportionment as between the settlors.
> **34894. Multiple settlors** [April 2010]
> If HMRC Trusts Head Office Bootle or Financial Intermediaries and Claims Office (formerly Claims Branch) have given advice on apportionment for Income Tax purposes, this should be followed for CGT. Otherwise, if settlors together make the settlement, the gains in such a case should be apportioned according to the amounts each put in. If a settlor adds to a settlement, then the amount put in should be compared with the value of the settlement at that time. Trust Offices should endeavour to reach a fair and easily worked solution.
> **34895.** [April 2010]
> If one settlor is within Section 79 and the other is not, the gains are apportioned on the lines suggested, but those relating to the settlor who is outside Section 79 are assessed on the trustees in the normal way after deducting the trustees' annual exempt amount.
> **34900. Example 1** [April 2010]
> A and B each settle ordinary shares in X Limited on a trust under which both Mrs A and Mrs B have an interest as defined by the new provisions. A settles 500 such shares and B 1500. It is accepted that there is only one settlement for CGT purposes and the shares are not appropriated into separate funds.
> In 1988-89 there is a gain of £2,000 on the sale of some of the shares,

3 See 50.10 (Section 86 trust gains condition). The expression "originating from the settlor" is defined in TCGA Sch 5 para 8: see 80.3.5 (CGT s.86 definition of "settlor").

> [there is] a loss of £400 on the sale in 1989/90 of further shares and in 1990-91 a gain of £500 on the sale of shares in Y Limited acquired with the sale proceeds of the shares in X Limited.

The HMRC analysis is as follows:

> In 1988-89, as A and B settled property in the proportion 1:3, there is, on a just apportionment, a chargeable gain of £500 (2000×1/4) accruing to A.
> Similarly a gain of £1500 is treated as accruing to B. Each is assessed as appropriate.

That is straightforward. The example then turns to consider the loss in the next year and the gain in the following year:

> The loss of £400 in 1989-90 is apportioned £100 to A and £300 to B.
> The gain of £500 in 1990-91 is apportioned £125 to A and £375 to B.
> The loss of £100 in respect of the property provided by A is set against the gain of £125, leaving a net gain of £25 to be attributed to A. Similarly the loss of £300 in respect of the property provided by B is set against the gain of £375 on the property provided by him, leaving a net gain of £75 assessable on B.

This is not correct. The losses are not attributed to A or to B (either under the former s.77 or under the existing s.86.) They are carried forward and set against future gains of the trustees. The net gains in 1990/91 is £100 which is apportioned £25 to A and £75 to B. But although the analysis is not correct, the end result is the same.

> **34901. Example 2** [April 2010]
> The facts are as in Example 1 except that by a deed executed during 1988-89 Mrs B irrevocably excludes herself from the class of beneficiaries.

The HMRC analysis is as follows:

> The gains of that year are apportioned and attributed as before because Mrs B had an interest in the settlement at some time during the year.

This is straightforward.

> The losses of 1989-90 and the gains of 1990-91 are apportioned in the same way, and the net gains of £25 for 1990-91 are attributed to A.

This is not correct. The losses are set against the trustees gains; but it is correct that of the net £100 gains, £25 is attributed to A on a just and

reasonable apportionment.

> There can be no attribution to B in 1990-91 because neither he nor his spouse [this should read: neither she nor her spouse] has an interest in the settlement in that year. Accordingly the gains on the assets deriving from the property provided by B are assessable on the trustees and the trustees can claim the annual exemption due to them...[4]

81.4 Multiple settlors: Cases where apportionment not possible

The multiple settlor provisions are straightforward if two individual ("A" and"B") directly transfer property to a trust. A and B are both settlors and the property originating from A and B can be identified.

81.4.1 *Direct and indirect settlors*

Suppose there is an arrangement under which:
(1) A makes a gift of property to B, and
(2) B gifts the property to a trust.
A is a settlor (having provided property indirectly) and it seems at first as if B is also a settlor (having provided the property directly).[5] But A and B have provided the *same* property. There is no provision how to apportion trust income or gains between A and B and, since the income and gains cannot be subject to tax twice, it is considered that s.624 and s.86 do not apply at all; see 81.2.1 (Position where multiple settlor provision does not apply). The solution to the problem is that A is the "real" settlor, and B is not to be regarded as the settlor.

This issue sometimes arises in the context of failed tax planning of the kind discussed at 80.36 (Planning to create trust with foreign domiciled settlor)).

81.4.2 *Beneficial loans, guarantees, payments of trust expenses*

Similar issues arise where:
(1) S makes a settlement; and
(2) X provides further funds indirectly to the settlement, for instance by way of beneficial loans, guarantees, or payments of trust expenses.
X may be a joint settlor, but (even if the trust is settlor-interested) s.624 still does not apply to X unless it is possible to identify the income

---

4 The Manual continues with some (I think erroneous) comments on the interaction of the annual exemption and loss relief; but it is not necessary to pursue that here.

5 See 80.4 (Gift from A to B followed by gift to trust by B).

provided by X, ie arising from X's act of bounty. In some cases one may say that all the income originates from S, so that s.624 applies to S but not to X. In other cases the contribution of S may be nominal, and one may be able to say that all the income originates from X.

CHAPTER EIGHTY TWO

SITUS OF ASSETS FOR IHT

82.1 Concept(s) of situs

Situs[1] of assets matters for many tax and some non-tax purposes. It is not possible to draw up a full list; the most important are IHT excluded property and the CGT remittance basis.[2]

Situs (like domicile) is a concept of private international law (or conflict of law) which has been adopted whenever statutes (usually tax statutes) refer to the location of property (typically referring to property "in" or "within" or "outside" a state). The rules are laid down by the common law.[3] The common law rules apply for tax, except so far as modified by specific rules in tax legislation. Thus one might refer to these rules as common law rules, private international law rules, or IHT rules.

IHT situs is almost entirely based on the common law rules. These are discussed in this chapter. Some IHT double tax treaties override the usual IHT situs rules.[4]

---

1 A note on terminology. The IHTA and TCGA generally refer to the "situation" of assets though the heading to s.275 TCGA refers to "location". Section 59 Stamp Act 1891 (repealed) used the term "locally situate" and some of the older cases referred to the "local situation". The concept in each case is the same. "Situs" has become adopted into legal English usage and should not be written in italics.
Some old cases (unhappy with the concept of situs of intangible property) used the term "quasi locality" but this has not been adopted and situs is the current term.

2 Other tax issues where situs matters include (1) the ITA remittance basis (2) foreign IHT and CGT credit relief (3) stamp duty; see s.14(4) Stamp Act 1891.
In most cases the issue is whether or not the asset is situated in the UK, and if outside the UK it does not matter where. However in cases of foreign IHT and CGT credit relief, it may be necessary to identify the state where assets are situated.

3 I use the term "common law" here to mean judge-made law, including the pre-1857 ecclesiastical law from which the present law is derived.

4 See 69.6 (Treaty-situs); 70.9; (Dual-situate assets).

CGT has statutory situs rules which cover most situations, and the common law is only needed to fill a few gaps. So CGT situs is best regarded as a separate subject, though in a few cases the common law/IHT rules still apply for CGT. Situs for CGT is discussed in the next chapter.

The rules which determine the location of a source of income for income tax purposes are distinct from the rules which determine the situs of assets. For instance, the source of dividends is the place where the company is resident, but the situs of shares is the place where the shares are registered. Situs of assets only occasionally matters for IT, but where it does, the common law rules discussed in this chapter will apply.

As there are diverse statutory situs rules, one should (strictly speaking) not refer to situs in the abstract, but to situs for a specific purpose (CGT, IHT, or whatever). However context may supply the reference, and in this chapter, situs means situs as determined by the common law rules which apply for IHT purposes.

Dicey takes the view that "situs for tax purposes" may be different from situs for the purpose of conflict of law/international law. But this expression conceals a muddle or a mistake. One may correctly refer to situs for *specific* tax purposes, such as CGT, or IHT DTAs, which have statutory situs rules. But in the absence of contrary intention, references in a tax statute (or any statute) to the location of property are taken as references to the common law/international law concept of situs. The law does not distinguish between situs "for (general) tax purposes" and situs for conflict/international law purposes. *AG v Bouwens* (the leading tax case) adopts the situs rules which were developed "to prevent conflicting jurisdictions between different ordinaries".[5] Non-tax situs cases[6] routinely cite and follow tax cases, and vice versa. In a stamp duty case, Lord Lindley referred to situs "for *legal* purposes" (not *tax* purposes) and added:

---

5 See the quote at 82.13 (Simple contract debt). The argument that situs rules should be limited to their original context of probate cases was rejected in *English, Scottish & Australian Bank v IRC* [1932] AC 238 at p.257 ("It was suggested that the doctrine just enunciated was peculiar to probate cases. Apart from the illustrations of its application in other departments of the law which Mr. Greene adduced, I venture to express my agreement with Lord Lindley, who said: "The authorities which bear upon the locality of incorporeal personal property for purposes of probate appear to me to afford the best guides for the solution of the case before us.")

6 Such as *New York Life Insurance Co v Public Trustee* [1924] 2 Ch 101.

> It may perhaps be true that property which has no physical existence may, if necessary, be treated for some purposes in one locality, and for other purposes in some other locality. But, until the necessity for so treating it is apparent, I see no justification for introducing confusion by judicially holding the same property to be legally situate in two different places at one and the same time. But this confusion would be introduced if your Lordships were to decide that the analogy of probate cases was to be no guide in dealing with liability to stamp duty.[7]

It would of course be possible for the common law to develop different situs rules for different purposes. But (except for statutory provisions) a distinction between situs for one purpose and situs for another purpose should be avoided so far as possible, and in practice the common law has not gone down this path.[8]

Scots situs law is the same as English law,[9] except where situs law depends on concepts of property law which are different in Scotland.[10]

Northern Ireland situs law is the same as English law.

For completeness: para 21B Sch 24 FA 2007 authorises regulations to determine situs for the purpose of penalty provisions. That really is unnecessary, and the Treasury presumably agreed, since no regulations have been made. It should be repealed.

82.1.1 *Cross references*

For the situs of intermediated securities (depositary receipts) see 40.3 (Situs of transparent intermediated security for IHT).

82.1.2 *History and terminology of situs law*

To understand the old case law one needs to know some of its history and historic terminology.[11]

As mentioned above, the common law has adopted situs rules which were originally developed "to prevent conflicting jurisdictions between

---

7 *IRC v Muller & Co.'s Margarine* [1901] AC 217 at p.237.

8 Except for a narrow line of Canadian case law concerning expropriation, which requires a lot of explanation, but which does not affect the point being made here.

9 For instance, *Laidlay v Lord Advocate* (1890) 15 App Cas 468 followed the Scots case *Commissioner of Stamp Duty v Salting* [1907] AC 449; see 82.34 (Situs of partnership share).

10 See 82.18.2 (Situs in Scots law).

11 For a discussion of this interesting corner of legal history; see Outhwaite, *The Rise and Fall of the English Ecclesiastical Courts, 1500-1860.*

different ordinaries".[12]

The **"ordinary"** was the judge of an ecclesiastical court with jurisdiction to grant probate for personal property situate in his province or diocese.

Blackstone explains:

> If all the goods of the deceased lie within the same jurisdiction, a probate before the ordinary, or an administration granted by him, are the only proper ones; but if the deceased had *bona notabilia,* or chattels to the value of a hundred shillings in two distinct dioceses or jurisdictions, then the will must be proved, or administration taken out, before the metropolitan of the province, by way of special prerogative; whence the court where the validity of such wills is tried... is called the prerogative court."[13]

The term ***"bona notabilia"*** in the wider sense meant "such goods and debts of a deceased person as require administration being taken thereto, [ie which require a grant of probate or administration] and are therefore denominated *notable.*" The term was more often used to mean "goods and debts belonging or owing to any person at the time of his death, in any other diocese or peculiar jurisdiction, within the province... besides the goods in the diocese or peculiar jurisdiction where he dwelt".[14] The detailed rules of what counted as *bona notabilia* (and so required probate)

---

12 See the quote at 82.13 (Simple contract debt).

13 Commentary on the Laws of England, Book 2 p.509. There were about 250 local courts, and two prerogative courts, in Canterbury and York.
The Solicitor-General said in argument in *AG v Bouwens* (1838) 4 M & W 171 accessible *http://www.commonlii.org* at p.189: "that doctrine [bona notabilia] has no application as between goods in one province or diocese, and out of the kingdom. The defendants must establish that these instruments have no value in the kingdom." In order to understand this, one needs to understand what the Solicitor-General meant by the doctrine of bona notabilia. The Solicitor-General is *not* referring to the set of rules which determine where assets are situate. He is referring to the rule that where the deceased had bona notabilia in more than one diocese, the will must be proved in the prerogative court. Obviously that rule has no application in tax cases such as *Bouwens* where the issue is whether property is situate in the UK or outside the UK. This comment does not cast any doubt on the application of the situs principles developed in the old ecclesiastical probate cases and now adopted in the common law. I mention this because the comment has sometimes been misunderstood.

14 Lawton, *A Brief Treatise of Bona Notabilia* (1825) p.2. Comyn's Digest (Administration, B6): "If the testator had *bona notabilia*, the administration belongs to the archbishop of the province... If the testator had not *bona notabilia*, it belongs to the bishop of the diocese...".

need not be considered here.

In 1857 the jurisdiction of the ecclesiastical courts passed to the Court of Probate. The concept of bona notabilia (in the sense of assets not in the diocese where the deceased was resident) then became obsolete, though the term continued to be used: "bona notabilia in" a certain place became a traditional way of referring to the assets of the deceased situate in that place.

In 1875 the jurisdiction passed to the Chancery Division of the High Court.

82.2 Intangible property has a situs

In *R v Williams* the Privy Council said:

> Shares in a company are "things in action" which have in a sense no real situs, but it is now settled law that for the purposes of taxation ... they must be treated as having a situs which may be merely of a fictional nature.[15]

There are two points here:

(1) Shares (and other choses in action) have a situs.[16]

(2) That situs is "fictional".[17]

The first point is straightforward. The second is more doubtful. It is of course true that an asset with no corporeal existence, such as a debt, shares, or other chose in action, has no material position in the material world. Nevertheless a better analysis is to say that "situs" (of a chose in action) is a term describing an abstract concept. The situs of a chose in action is not "fictional", but perfectly "real" (or at least as real as other legal concepts such as "residence" or "domicile" or indeed "chose in action"). The concept may be described as technical. It might be described as metaphorical (at least in origin), or as "artificial" (though that has pejorative tones which are not apt here). Lawyers are entitled to use ordinary words in special senses and to call a situs (of a chose in action)

---

15 [1942] AC 541 at p.549.

16 Similarly, *English Scottish and Australian Bank v IRC* [1932] AC 238 at p.244 ("it is desirable that [debts] should possess a locality..."; at p.248 ("the legal conception of property involves the legal conception of existence somewhere"); at p.251 (" it is not easy to form a conception of property having no local situation").

17 Similarly, in *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 at p.119 the situs rules for choses in action were described as "legal fictions"; also *English Scottish & Australian Bank v IRC* [1932] AC 238 at p. 248 ("fictionem legis").

a "fiction" is inapt and misleading.[18]

Similarly, for conflict of law purposes, choses in action are categorised as movable or immovable property; but I am not aware of anyone describing that as a fiction.

Once one accepts that intangible assets (shares, debts, etc) have a situs, the law must choose connecting factors to identify the situs, in short, to link the asset to a jurisdiction. There is a large choice of possible connecting factors, and the selection of the determining factor must sometimes be arbitrary:

> probably any system of rules for determining the constructive locality of intangible property must be more or less arbitrary.[19]

One might think that it would not matter much what the rule was, as long as there is some rule and its application is clear. But sometimes choices have to be made between more formal rules (easy to apply) and more substantive rules (which aim to track the economic realities more closely).[20] The desirable rule (at least from the HMRC viewpoint) is one which minimises the scope for persons to chose the situs of their assets, as that would allow tax planning. The common law rules do not achieve that. Inasmuch as they were devised for conflicts purposes, there is no reason why they should. There is no objection to parties being able to chose a situs and it may be convenient if they can do so. The common law situs rules are not so well suited to serve as a territorial limitation for tax. It is not surprising that the common law rules have been modified for CGT. The role of situs in private international law has also decreased, though for different reasons,[21] and sometimes it is still important.

82.3 Every asset has one situs

Under the common law rules, every asset is situate in a jurisdiction and only in one jurisdiction. In *R v Williams* [1942] AC 541 at p.559 the Privy

---

18 See Baker, *The Law's Two Bodies* (2001), Lecture 2 ("Legal Fictions"); MacCormick, *Institutions of Law* (2007), p.136.

19 *Royal Trust Co v Provincial Secretary-Treasurer of New Brunswick* [1925] SCR 94 at p.99.

20 A similar distinction arises in determining the location of a source of income: see 14.5 (Formal v. substantive source rules: the policy background).

21 The role of situs of intangible property in the conflict of laws is criticised in Rogerson "The Situs of Debts in the Conflict of Laws - Illogical, Unnecessary and Misleading" [1990] CLJ 441.

Council said:

> Property, whether movable or immovable, can ...[22] have only one local situation.[23]

This rule is self-evidently necessary if situs rules in private international law are to achieve their object, which is to resolve conflicts of jurisdiction, and if situs rules in tax law are to achieve the object of avoiding double taxation.

It is also implicit in the word situs: a physical object (let us ignore quantum physics) can be situate in only one place.

I stress this as some old cases considered assets could be dual situate. They no longer represent the law.

An asset must be situate in a single legal jurisdiction. The expression "**UK situate**" is in a literal sense inapt because an asset must be situate in England, Scotland or Northern Ireland. It is, however, universally used to describe an asset which is situate in England, Scotland or Northern Ireland. For tax purposes it usually makes no difference where in the UK an asset is situate, though for non-tax purposes that is occasionally important.

82.4 Inconsistent case law

As in any large body of case law – and the body of situs case law is very large – it is sometimes possible to find cases or dicta supporting inconsistent views. It may be possible to reconcile some inconsistent cases by saying that there is one situs for tax and another for conflicts; or that an asset may be dual situate. But where inconsistency exists it would be better to grasp the nettle and prefer one body of authority to the other.

82.5 Situs of shares: General principle

In *Brassard v Smith* the Privy Council said:

---

22 The omitted words are "... for the purposes of determining situs as among the different provinces of Canada in relation to the incidence of a tax imposed by a provincial law upon property transmitted owing to death". These words do not qualify the general principle as there is only one common law situs concept and (subject to statute) that applies for all purposes.

23 Likewise *Laidlay v Lord Advocate* (1890) 15 App Cas 468 at p.483: "locality cannot be both England and India—the choice has to be made between the two". Likewise *Toronto General Trusts Co v The King* [1919] AC 679 at p.684: "it is plainly impossible to hold that [the debts] were situate in both provinces at once."

> This is, in their Lordships' opinion, the true test. Where could the shares be effectively dealt with?[24]

In *R v Williams* the Privy Council approved this passage and said:

> It may be useful here to make some general remarks on the meaning and effect of the principle laid down in *Brassard v Smith* and in the *Erie Beach* case. The first observation is that the phrase used in laying down the principle clearly means "where the shares can be effectively dealt with as between the shareholder and the company, so that the transferee will become legally entitled to all the rights of a member," e.g., the right of attending meetings and voting and of receiving dividends. If the phrase only meant "effectively dealt with as between transferor and transferee of shares," the test would obviously be almost completely useless, since the rights of a shareholder as between himself and a transferee can, speaking generally, effectively be transferred in any part of the world.[25]

These cases concerned registered shares, but the principle is not so restricted and apply to bearer shares also.

The question which follows from this test is: How to identify the place where shares can be dealt with?

82.6 Situs of registered shares

82.6.1 *Place-of-register rule*[26]

The IHT Manual provides:

> **27121 Usual location** [January 2014]
> For the purposes of Inheritance Tax an inscribed[27] and registered security[28] (a shareholding in a Company, for example) is located at the place where the title of ownership must be registered – see *AG v Higgins*.[29]...

---

24 [1925] AC 371, page 376.

25 [1942] AC 541, pages 557-558.

26 See Venables, "The Situs of Registered Shares", PTPR Vol 9 p.115, accessible *http://www.khpplc.co.uk/reviews*

27 Author's footnote: "Inscribed" securities are those whose legal owners are inscribed in a register; the term is, as far as I can see, only an old-fashioned synonym of "registered".

28 Author's footnote: "Securities" here includes shares as well as debt securities.

29 (1857) 2 H & N 339 accessible on *http://www.kessler.co.uk/tfd-archive*. This was approved in *AG v Winans (No. 2)* [1910] AC 27.

> It makes no difference that the business of the company is totally administered outside the country in which the register is kept: see *Baelz v Public Trustee* [1926] Ch 863.

I call this "**the place-of-register rule**".[30] This is a straightforward application of the general principle that shares are situate where they can be dealt with.

It is necessary for completeness to mention *Macmillan v Bishopsgate Trust (No. 3)* [1996] 1 WLR 387. This concerned a company incorporated and with its share register in New York. Auld LJ adopted the place-of-register rule: see p.411E. Alarmingly, Aldous LJ stated without discussion that the situs is the place of incorporation: p.423F. Staughton LJ inclined to the same view but expressed himself more cautiously: p.405E. However, this was a case where the court did not have to decide between place-of-register and place of incorporation as rival situs rules. The court's attention was not on the point and the relevant cases were not discussed. In the circumstances, it is suggested that no weight whatsoever should be given to these dicta. The IHT Manual tactfully ignores this case. Thus the Court of Appeal have accidentally introduced into the law if not an uncertainty at least an inconsistency which needs to be explained away. But there it is.

82.6.2 *Overseas branch register*

Multiple registers raise a problem for a place-of-register rule. If there is only one register applicable to the shares in question, that is where the shares can be dealt with. The IHT Manual provides:

> **27122 Branch registers** [January 2014]
> If a company has more than one register, and any changes must be recorded on one of the registers, the relevant securities are sited in the place where that register is required by law to be kept – not in the place of the head office of the company.

This requires an examination of company law to identify which of the two registers is applicable. The IHT Manual summarises the company law background:

---

30 A "register" is only a record of stockholders and their assignees: see *Ramsay v IRC* 54 TC 101 at p.133.

> **27124 Overseas branch registers of UK companies** [January 2014]
> Under UK law a share cannot, at one and the same time, be registered on more than one register.
> The rule applies even to overseas branch registers (these are branch registers of members resident in the country to which the register relates). Under [s.132 CA 2006], a company that maintains an overseas branch register has to keep a duplicate of it at the place where its principal register is kept.
> And 'no transaction with respect to any shares registered in an overseas branch register shall, during continuance of the registration, be registered in any other register' – see [s.133 CA 2006].
> So, shares on the overseas branch register of a UK company are situated, for Inheritance Tax purposes, in the country where the register is kept.
> Under [s.129 CA 2006] a company may maintain an overseas branch register. The countries and territories in which overseas branch registers may be kept are specified in enable the provisions for overseas branch registers to be extended by Order in Council to countries within the jurisdiction, or under the protection, of the Crown.

This view is confirmed by s.133(3) CA 2006:

> An instrument of transfer of a share registered in an overseas branch register—
> (a) is regarded as a transfer of property situated outside the UK.

82.6.3 *Transfer office*

Another solution may be that the company has only one register and merely a "transfer office" elsewhere. The IHT Manual provides:

> **27125 Duplicate or multiple registers of non-UK companies** [Jan 2014]
> Some overseas company laws allow a shareholder to use duplicate (or multiple) share registers to record the transfer of their securities.
> The South African Companies Act, for example, authorises South African companies to maintain branch registers in any foreign country. Shares can be transferred on any register, but no transfer of shares passing on death can be registered in the UK until any death duty claimed by South Africa on the shares has been paid.
> Remember that some registers merely record information about transfer of securities without providing the legal basis for the transfer. These registers do not affect the locality of the security (IHTM27071)
> Details of transfer arrangements given in the Stock Exchange Year-

Book[31] do not always make the position clear and, if necessary, you must ask the taxpayer to explain.

82.6.4 *Two effective registers*

If that fails one must look for a tie-breaker test:

> **27125 - Duplicate or multiple registers of non-UK companies** [January 2014]
> Where there are many registers the register upon which the shares would normally be dealt with in the ordinary course of business is the register that determines the situs of the security – see *Treasurer of Ontario v Aberdein* [1947] AC 24.

But which is the register which would normally be used? The Manual explains:

> If the share certificates are in the UK, one of the alternative registers is in the UK, and transfers can be effected here the shares will normally be regarded as legally situated here (*Re Clark, McKechnie v Clark* [1904] Ch 294.)

R v Williams [1942] AC 541 is another example: the location of a (signed and endorsed) share certificate acted as a tie-breaker between two competing jurisdictions (each with a share register).[32] The Manual continues:

> This is only an assumption and can be rebutted by the particular circumstances of the case (see *Standard Chartered Bank v IRC* [1978] 1 WLR 1160). But if tax is offered on shares in a foreign company with transfer facilities in the UK, you can assume that the register in the UK is the one on which the shares would normally be dealt with in the ordinary course of business.

---

31 Author's note: The Stock Exchange Official Year Book has long ceased publication; it was first published in 1876 and the most recent edition I have been able to trace was 1994.

32 IHT Manual para 27150 [January 2008]:
"If the company has more than one register on which the holding could be effectively transferred, and the share certificates are found at the material time at a place where a register is located, the holding is for Inheritance Tax purposes situated at that place – see *R v Williams* [1942] AC 541. Cases where none of the effective registers is located where the certificates are found must be referred to TG or your Team Leader, in Scotland."

82.6.5 *Company without register*

The place-of-register test does not work if there is no company register. The IHT Manual provides:

> **27123 Effectiveness of register** [January 2014]
> If shares are entered on a list which does not affect the legal holding of the security (even though the list could be called a register) the location of the list does not affect the situs of the security.
> In *Erie Beach v AG for Ontario* [1930] AC 161, certain shares (on the view that they could, under the Ontario Companies Act, be effectively dealt with only in Ontario) were held to be situated in Ontario for the purposes of Ontario Succession Duty, although they had in fact been entered on a 'register' opened elsewhere.
> It was explained however, in *R v Williams*, that the *Erie Beach* decision was based on the finding that the particular shares in question could be dealt with effectively in Ontario only. In this case it was explained that the decision was 'not an authority for holding that any company subject to the Ontario Companies Act is precluded from establishing registers outside Ontario on which effective transfers can be made, and Ontario companies like other Canadian companies may establish branch registers kept by 'transfer agents' which are equivalent to duplicate or multiple registers (IHTM27125)'.

82.6.6 *Register of share transfers*

The IHT Manual provides:

> **27127 Transfer agencies** [January 2014]
> Many companies incorporated under Canadian law keep a register, or branch register, of transfers kept by one of the company's duly appointed 'transfer agents', not a register of shareholders as with UK companies.
> When considering the question 'where could the shares be effectively dealt with?' (*Brassard v Smith*), to find out where the shares can be taxed we must find out where the company has established transfer agents to operate a register, or branch register, of transfers. There is usually more than one transfer agent to which the shareholder could transfer their holding, regardless of where the share certificate was issued. Some (but relatively few) companies have transfer agents in the UK. These equally available transfer arrangements in various places are said to be 'interchangeable'. For the purposes of situs in relation to Inheritance Tax they can be taken as equivalent to duplicate or multiple registers (IHTM27125).

This applies:

- to shares registered in the name of the taxpayer or their nominee (including marking names),
- whether or not the share certificates are endorsed in blank (*Treasurer of Ontario v Aberdein* [1947] AC 24).,
- whether the company in question was incorporated under Canadian dominion or provincial law.

82.6.7 *Miscellaneous*

The IHT Manual provides:

> **27128 Branch registers of British Colombian and Newfoundland companies** [January 2014]
> Branch registers of companies in these two provinces of Canada can be kept outside the province, so the location of the shares will be determined by the location of the branch register.
> In certain circumstances shares registered on a branch register in the name of a deceased member can be transferred only on a duplicate register kept at the registered office of the company. This restriction does not affect locality for Inheritance Tax purposes on the deceased's death.
> **27129 - Canadian companies: Nova Scotia companies** [January 2014]
> Every company incorporated under the laws of Nova Scotia must keep a duplicate of any branch register kept outside the province at its registered office in the province. In respect of lifetime transfers, we understand that there is a distinction between:
> - Companies incorporated under the Nova Scotia Companies Acts, in which case a lifetime transfer on a branch register appears to be valid and effective. Accordingly if the securities are registered on a branch register in the UK they must be treated as situated in the UK.
> - Companies incorporated under other Acts, in which case no transfer on a branch register is effective until entered in the principal register. In this case , registered securities may be regarded as situated in Nova Scotia, even though they may be registered on a branch register in the UK.
>
> This restriction does not affect locality for Inheritance Tax purposes on the deceased's death.

82.7 Registered debt securities

The rules for registered debt securities[33] are, in general, the same as for

33 I use the term "debt securities" to mean securities which are not shares.

registered shares; the passage from the IHT Manual set out above refers to securities, generally meaning both shares and debt securities.

A UK company is not required by company law to keep a register of debentures, but if it does, it must kept the register in the UK.[34] But the planning by converting registered securities into bearer securities may be possible.[35]

82.7.1 *Place-of-register rule v specialty situs rule*

Shares are not "specialties" so the specialty situs rule cannot apply to them.[36] A debenture may be a specialty so the question arises as to the priority between the place-of-register rule and the specialty situs rule. The IHT Manual formerly provided:

> ***27079 Bonds and debentures under seal*** *[February 2006]*
> *Debentures if under seal, are specialty debts, locally situated where the document is found. So, also, are debts due from the Crown, or under a statute, whether under seal or under hand, and even when they are secured by registered bonds.*

Thus for debentures HMRC accepted that the specialty situs rule overrides the place-of-register rule. For HMRC views as to which securities are "specialties", see 82.15.1 (Situs of specialty).

The Manual has since been amended to reflect HMRC's (untenable) view denying the specialty situs rule:

> **IHTM27079 Specialty debts: bonds and debentures under seal** [January 2014]
> [The Manual outlines the meaning of the term "specialty" and continues:]
> In the past, HMRC's approach to the situs of specialty debts has been that this depends on where the relevant document is found. We now believe this may not be the correct approach in all cases involving specialty debts; specifically that many such debts are likely to be located where the debtor resides, or where property taken as security for the debts is situated. Any cases involving situs and a specialty debt must be referred to Technical. For example, any claim that a debt secured on UK assets is not UK situs property must be sent to Technical.

---

34 Section 743 Companies Act 2006.

35 See 82.8.2 (Bearer shares and securities).

36 See 82.15 (Specialty obligation).

HMRC currently say this guidance is under review.[37]

82.8 Bearer documents and negotiable instruments

82.8.1 *The general law background*

Bearer shares or securities are transferable by delivery, so that the person who holds the document has legal title to them.[38]

An instrument is **"negotiable"** if legal title to it is transferable by delivery or by endorsement and delivery; a transferee who takes bona fide and for value has full legal title including the right to sue in his own name all parties to the instrument.[39] Bills of exchange and promissory notes are typically (though not necessarily) negotiable.

Thus bearer instruments and negotiable instruments are distinct but overlapping categories: bearer instruments are negotiable but negotiable instruments are not necessarily bearer.

Negotiable instruments (other than shares) may be made by deed, and so specialties, in which case situs is governed by the specialty situs rule. But they may not be specialties, in which case the specialty situs rule does not apply.

82.8.2 *Bearer shares and securities*

The place-of-register rule cannot apply to bearer shares or debentures as there is no register of shareholders or debenture holders.

The situs of bearer shares and bearer debt securities is where the document is to be found.

The IHT Manual provides:

> **27076 Bearer securities**[40] [January 2014]
> A bearer security is one where the ownership passes by delivery of the document of title. An example would be a security or bond which is not listed on a register. A bearer security is situated, for Inheritance Tax

37 See 82.15.3 (HMRC view(s)).

38 Bearer shares are possible in UK company law, though that is likely to change: see Discussion Paper "Transparency & Trust: Enhancing the Transparency of UK Company Ownership and Increasing Trust in UK Business" (2013). *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/212079/bis-13-959-transparency-and-trust-enhancing-the-transparency-of-uk-company-ownership-and-increaing-trust-in-uk-business.pdf*

39 *Byles on Bills of Exchange and Cheques* (29th ed., 2013), para 1-06 (Negotiability).

40 Author's note: This passage applies to both shares and debt securities.

> purposes, in the place where the document of title is found at the material time. Special rules apply to securities listed on a register (IHTM27121)
> *Att Gen v Bouwens* [1838] 4 M & W 171, *Winans v Att Gen* [1910] AC 27. This does not apply to certain qualifying international securities (IHTM27141).

Dicey agrees:

> For taxation purposes, bonds, bills of exchange and other securities which can be validly and effectively transferred by delivery with or without endorsement are situate in the country where the paper representing the security is itself from time to time to be found.[41]

This is consistent with the general principle that shares are situate where legal title can be transferred.[42]

Situs of UK registered shares can under current law be changed by converting them into bearer shares and taking the document outside the UK. Similarly, foreign shares could be made UK situate. Stamp duty needs consideration. This planning has been described as tax mitigation, not avoidance,[43] though views on that may differ.

AG v Bouwens concerned foreign government bonds (not specialties) which were bearer instruments so it was not necessary to do any act outside England in order to transfer them. The Court said:

> No ordinary in England could perform any act of administration within his diocese, with respect to debts due from persons resident abroad, or with respect to shares or interests in foreign funds payable abroad, and incapable of being transferred here; and therefore no duty would be payable on the probate or letters of administration in respect of such effects. But, on the other hand, it is clear that the ordinary could administer all chattels within his jurisdiction; and if an instrument is created of a chattel nature, capable of being transferred by acts done here, and sold for money here, there is no reason why the ordinary or his appointee should not administer that species of property. Such an instrument is in effect a saleable chattel, and follows the nature of other

---

41 *The Conflict of Laws* (15th ed., 2012), para 22-044. Dicey cites: *AG v Bouwens*; *AG v Glendining* (1904) 92 LT 87; *Winans v AG (no 2)* [1910] AC 27; *Provincial Treasurer of Manitoba v Bennett* (1937) 2 DLR 1; *Re Moore* [1937] 2 DLR 746; *Lunn v Barber* [1949] OR 34; *Favorke v Steinkopff* [1922] 1 Ch 174.

42 See 82.5 (Situs of shares: general principle).

43 See 32.31.2 (Is the transfer for tax avoidance?).

chattels as to the jurisdiction to grant probate.[44]

82.8.3 *Negotiable instruments which are not bearer*

The IHT Manual gives guidance on bearer securities but does not consider other negotiable instruments (that is, those which are transferable by endorsement and delivery). But the passage from Dicey set out above states that the same rules apply. The same rule applies in Australia:

> *negotiable instruments and securities transferable by delivery* for taxation purposes, bonds, bills of exchange and other securities which can be validly and effectively transferred by delivery with or without endorsement are situate in the country where the paper representing the security is itself from time to time found.[45]

In *Bouwens* the court stressed that there was an active market in England for the bonds (the Royal Exchange). Some cases suggest that this might be a requirement for situs:

> A negotiable instrument will be situate where the instrument is, *at any rate where there is an available market for its negotiation*.[46]

However I think the general trend of the authorities is that the situs of the instrument prevails and whether or not there is a market (which in modern conditions would be difficult to determine) is not relevant.[47] This is the view of the textbooks cited above. In particular, it would be strange to draw a distinction between bearer instruments (which HMRC accept are situate where the document is, regardless of whether there is a market) and other negotiable instruments.

82.8.4 *Eurobonds*

HMRC have commented specifically on the situs of eurobonds in a passage which I mention for completeness but which adds nothing to the general principles:

---

44 (1838) 4 M & W 171 at p.192 accessible *http://www.commonlii.org*. This was approved in *AG v Winans (No. 2)* [1910] AC 27.

45 Taxation Ruling TR 2008/9 *http://law.ato.gov.au/atolaw/view.htm?locid='TXR/TR20089/NAT/ATO/ft20'#ft20*

46 *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.732; the same point is made in *AG v Bouwens* at p.192 (emphasis added).

47 But for a dissenting view, see 82.11 (Letter of allotment of shares).

> ... in the Revenue's view, the *situs* for IHT purposes of Eurobonds and similar fungibles in any issue depends on the terms of that issue and, in particular, where under those terms the bondholder's rights to or rights of action for property exist. Those rights will be determined by reference to general, not Revenue, law principles. So where title to the rights under an issue passes by delivery, the *situs* for IHT purposes of such rights is where the instrument of title is physically.[48]

82.9 CREST

The Law Commission explain the securities law background:

> 2.21 Investment securities constituted under English, Scots and Northern Irish law can take either certificated or dematerialised ('uncertificated') form. CREST is the main securities settlement system in the UK and settles securities in uncertificated form. Unlike system operators in most national settlement systems, CREST does not hold domestically issued securities[49] as a central securities depository for account holders. CREST has no proprietary rights in the securities and is not treated as 'holding' these securities from the issuer on behalf of its participants. Rather, the CREST member is treated as holding directly from the issuer. This CREST member alone is entitled to exercise voting, dividend and other rights attaching to the shares and may do so directly against the issuer.
>
> 2.22 Instead, it is the register operated by CREST which, in the case of UK securities, is actually constituted by statute[50] as the sole legal record of entitlement to the securities. Although the issuer will maintain a regularly reconciled record of what is held in CREST for corporate events purposes, it is the CREST register that confers legal title and which determines the person or entity named in the register as the

---

48 [1994] PCB 139. For completeness, the passage concludes:
"There is little we can add to the foregoing guidance. In particular we cannot offer any undertaking about the likely future IHT liability which may arise in respect of rights to particular Eurobond issues currently extant or which may be issued in future. However, in order to be as helpful as possible, we can say that where a Eurobond issue satisfies the terms and conditions of section 124 ICTA 1988, the Revenue will treat for IHT purposes the rights and interests of the beneficiary-investors in such issues as rights to and interests in a bearer security."
A eurobond within s.124 (now repealed) had to be a bearer security, so this does not take matters much further.

49 Footnote original: That is, in the UK, Republic of Ireland, Isle of Man, Guernsey and Jersey.

50 This footnote is set out in the text above.

shareholder for company law purposes.[51]

The first footnote at para 2.22 is important. It provides:

> For UK companies it is the entry in the CREST register that confers legal title on the owner: Uncertificated Securities Regulations 2001, SI 2001 No 3755 reg 24. For Irish, Manx, Guernsey and Jersey securities, the pre-2001 system still operates. Settlement is through CREST but legal title is transferred when the entry is made in the issuer's register.

Registered securities are in principle situate where the register of title is kept; but the position is different for UK companies and for Irish, IoM and Channel Island companies.

For UK companies, the register of legal title is CREST; the situs of the securities is in the UK, assuming (as is no doubt the case) that CREST keeps a UK situate register.

For the non-UK companies, the company law is different: the register of legal title is kept by the issuer. So holding a security through CREST (rather than in certified form) does not make any difference as to situs.[52]

The position is different for intermediated securities held through intermediaries such as Euroclear and Clearstream.[53]

82.10 Share certificate endorsed in blank

The IHT Manual explains the background law and practice as follows:

> **27150 Share certificates endorsed in blank** [January 2014]
> Certificates of many American and Canadian railroads and of certain other companies include a printed transfer form or power of attorney. When this is signed or endorsed by the registered holder it enables the certificates to be transferred by delivery.
> Often these certificates are 'endorsed in blank', This means the endorsement is to be signed by the registered owner as transferor, and the name of the transferee is left blank.
> Dividends are paid by the company to the registered owner, and if these shares have in fact changed hands by delivery, the beneficial owner for the time being recovers their dividends from the registered owner.

---

51 Law Com., *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (May 2008).

52 Further thought would be needed if the foreign company law were to change from the position which the Law Commission describe in 2008.

53 See 40.1 (Intermediated securities).

> Usually the shares are registered in the name of a recognised broker, bank or discount house. These are known in the UK as a 'good Marking Name' or, in the USA, as a 'Street Name'. This helps to make sure that the purchaser receives their dividends with minimum of trouble and risk.
> A list of good Marking Names recognised by the London Stock Exchange is printed in the Stock Exchange Official Year Book.[54]
> However the beneficial owner can have them registered in their own name, or in the name of some nominee other than a good Marking Name.

I doubt if this is still current practice, but set out the HMRC comments for completeness:

> The local situation of shares for Inheritance Tax purposes is determined as followings:
> [a] If the registered owner is a good Marking Name, the shares are situated where the register is kept, not where the certificates are found. ...[55]
> [b] If the registered owner is the beneficial owner himself, or a nominee of the beneficial owner, or, in the case of settled property, the trustees of the settlement or their nominees, the rules are as at (a) above.[56]

The HMRC view is that one ignores the fact a share transfer form has been endorsed in blank. This is right, because the endorsed certificate does not alter the place where registered shares are dealt with as between shareholder and company: see 82.5 (Situs of shares: general principle). At this point the Manual becomes confused:

> [d] If the registered owner is neither a good Marking Name, the beneficial owner, nor any other of the persons named at (b) above,

---

54 Author's note: The Stock Exchange Official Year Book has long ceased publication; it was first published in 1876 and the most recent edition I have been able to trace was 1994.

55 Omitted text set out at 82.6.2 (Overseas branch register).

56 The Manual continues:

> "[c] In such cases it is considered that the legal and only title of the holder consists in his registration as owner. By bringing the certificates to the UK he is in a position to create, in a purchaser, an equitable interest in the shares which would be situated here, but until he does so the beneficial interest has not been severed from the legal interest so as to have a different locality."

This is garbled, or muddled and wrong.

> and the certificates are physically present in the UK at the material time, the shares are locally situated in the UK for Inheritance Tax purposes, (*Stern v The Queen* [1896] 1 QB 211).

I find it hard to see how [d] can apply: the registered owner will always be one of the persons named at [b] (beneficial owner or a nominee).

> Certificates of this kind, not containing any express obligation or promise, are not specialty debts – see the *Williams* case at [1942] AC 556.

That is correct.

82.11 Letter of allotment of shares

A letter of allotment confers the right to an issue of shares. The letter is normally transferable by delivery: it is a bearer security. One would have thought that the bearer security situs rule would apply. However, in *Young v Phillips*[57] a letter of allotment in respect of a company with UK registered shares was held to be situate in the UK, not where the letter of allotment was held. Nicholls J cited the passage in *AG v Bouwens* set out above[58] and said:

> From this it is apparent that for an instrument to be treated as analogous to a chattel for situs purposes more is required of it than mere transferability of title by delivery. A simple contract debt owed by a foreign debtor to a person resident in England and evidenced by a promissory note might be, and normally would be, freely and effectively transferable in England, but such a debt has as its situs the country where the debtor resides, not the place where the creditor lives or currently holds the promissory note. What is required is that in practice the value of the instrument can be realised by a sale of the instrument for money in the country where the instrument is found: the reason being that if an instrument in England could be so sold, the ordinary could properly and effectively administer that asset by selling it here, there being no need in such a case to have recourse to where the foreign debtor lived. When so saleable an instrument is in practice realisable in the same way as a saleable, valuable chattel, and hence, for situs purposes, it falls to be treated in the same way. ...

---

57 58 TC 232 This case concerned the common law rules before s.275A TCGA and is still relevant for situs for IHT, and for CGT in the case of foreign incorporated companies.

58 See 82.8.2 (Bearer shares and securities).

This approach requires an investigation into whether a market exists. The judge said:

> In the instant case there are no grounds for concluding that in practice the value of the letters of allotment, *which were issued with a life-span of a little over two months*, could have been realised by a sale of those documents for money wherever they were to be found. The Special Commissioners pointed out that no evidence had been led before them to prove that there existed a market in letters of allotment of shares in private companies. Having regard to the fact that shares in private companies may not be the subject of a public issue, they expressed themselves as being far from prepared to assume the existence of such a market. With that approach I agree. And it is to be noted that the "sales" of the letters of allotment which did take place in Sark were not arm's length transactions but were to purchasers wholly under the control of the vendors, and they had been prearranged even before the letters of allotment were issued. Accordingly, applying the principles I have mentioned to the facts of this case, the renounceable letters of allotment in the UK companies do not fall to be treated as saleable chattels, realisable where they might be found from time to time. They are documents evidencing rights against UK companies, which rights were enforceable in the UK.
> (Emphasis added)

The requirement for "marketability" is not supported in textbooks, or much supported in the cases, nor does it make good sense. A buyer could be found for any valuable asset in any community where private property exists, and one buyer makes a market.[59] Whether a market exists is a question of fact, so application of the marketability test will result in assets moving from one jurisdiction to another as markets come and go. It is conceivable that there was no market in Sark (population 600). But with improved communications markets are no longer local to jurisdictions, as was assumed in *Young v Phillips*. An asset can be sold anywhere, even in Sark.

It seems that *Young v Phillips* stretched the law in order to defeat a tax

---

59 This is self-evident, but for an illustration see *FGP v Union of India* 2004 (168) Excise Law Times 289 (Supreme Court of India) accessible *http://www.kessler.co.uk/tfd-archive*. Contrast the sophisticated definition of "asset for which there is a liquid market" in ICAEW Tech 7/03 para 19 (Guidance on the determination of realised profits and losses in the context of company distributions).

avoidance scheme, and in doing so has left something of a mess.

The CG Manual provides:

> **12440 Types of asset (2): Shares and securities etc** [January 2010]
> *Letters of allotment*
> Letters of allotment should be treated as located in the country where the company issuing the letters is registered. In the case of *Young v Phillips* 58 TC 232 bonus shares were issued in respect of registered shares located in the UK. The issue was made in letter of allotment form. The letters were then taken to the Channel Islands and disposed of there. It was held that the letters of allotment were located in the UK because they evidenced rights which were properly enforceable only in the UK.

Thus in the HMRC view *Young v Phillips* is relevant to letters of allotment only, it has no relevance to the situs of bearer debt securities or shares.[60] It is suggested that the reasoning should be restricted to short life assets (such as the letters of allotment in that case which, it was stressed, had a life of only two months).

Even letters of allotment may be situate where the letter is situate, if there is a "market" there (whatever that may require).

82.12 Securities of international organisations

For convenience this section deals with CGT situs as well as IHT situs, as the rules are the same.

82.12.1 *Designated organisations*

Section 126 FA 1984 provides power to designate:

> (1) Where—
> (a) the UK or any of the Communities is a member of an international organisation; and
> (b) the agreement under which it became a member provides for exemption from tax in relation to the organisation, of the kind for which provision is made by this section;
> the Treasury may, by order made by statutory instrument, designate that organisation for the purposes of this section....
> (4) The Treasury may, by order made by statutory instrument, designate

60 In *Mehjoo v Harben Barker* [2013] EWHC 1669 (QB) at [267] ff it was found that HMRC's practice was not to take any *Young v Phillips* point in relation to bearer shares. The point was not considered on appeal.

any of the Communities or the European Investment Bank for the purposes of this section, and references in subsections (2) and (3) above to an organisation designated for the purposes of this section include references to a body so designated by virtue of this subsection.

Section 126(2)(3) set out the consequences of designation:

(2) Where an organisation has been so designated, the provisions mentioned in subsection (3) below shall, with the exception of any which may be excluded by the designation order, apply in relation to that organisation.
(3) The provisions are—
(b) any security issued by the organisation shall be taken, for the purposes of capital transfer tax to be situated outside the UK;

The IHT Manual provides:

27141 List of non-UK situs organisations [January 2014]
Unless they are bearer securities (IHTM27076) and situated physically in the UK[61] securities issued by the following organisations are effectively outside the charge to IHT where:

- they form part of the estate of a person domiciled outside the UK; or
- they are comprised in a settlement and the settlor was not domiciled in the UK at the time the settlement was made:
- ○ the International Monetary Fund:
  - ○ The Bretton Woods Agreement Order in Council, 1946 ((SR & O) 1946 No 36)
  - ○ the International Bank for Reconstruction and Development[62]:
  - ○ The Bretton Woods Agreement, as above
  - ○ the International Finance Corporation:
  - ○ The International Finance Corporation Order, 1955 (SI 1955 No 1954)
  - ○ the International Development Association:
  - ○ The International Development Association Order, 1960 (SI 1960 No 1383)

This list of organisations may not be complete. If you receive a claim for exemption for a security issued by any other international body you should refer the case to Technical.

27142 Designated as non-UK by Treasury [January 2014]
... The following organisations have been so designated.

- The Asian Development Bank: under the International Organisations (Tax Exempt Securities) Order 1984 (SI1984/1215) made on 2 August 1984

61 I do not understand the basis for this exception, but in practice the point may never arise.

62 [Author's footnote] More commonly known as the World Bank.

- The African Development Bank: under the International Organisations (Tax Exempt Securities) (No 2) Order 1984 (SI1984/1634) made on 22 October 1984
- The European Community; The European Coal and Steel Community; The European Atomic Energy Community; The European Investment Bank - under the European Communities (Tax Exempt Securities) Order 1985 (SI 1985 No 1172) made on 25 July 1985.
- The European Bank for Reconstruction and Development - under the International Organisations (Tax Exempt Securities) Order 1991 (SI1991/1202) made on 16 May 1991.

Any security issued by these organisations automatically has a foreign situs for IHT, where the event occurred on or after the date of the order. ...

Section 265 TCGA provides:

(1) Where—
(a) the UK or any of the Communities is a member of an international organisation; and
(b) the agreement under which it became a member provides for exemption from tax, in relation to the organisation, of the kind for which provision is made by this section;

the Treasury may by order designate that organisation for the purposes of this section.

(2) The Treasury may by order designate any of the Communities or the European Investment Bank for the purposes of this section.

(3) Where an organisation has been designated for the purposes of this section, then any security issued by the organisation shall be taken, for the purposes of this Act, to be situated outside the UK.

The CG Manual provides:

12440 Types of asset (2): Shares and securities etc [January 2010]

Securities of International/European Organisations

Special rules are provided for dealing with securities issued by certain designated international organisations.

Section 265 TCGA 1992 allows the Treasury to designate for special treatment certain organisations whose membership includes the UK or any of the Communities of which the UK is a member. Once such an organisation has been designated any securities issued by it are deemed for the purposes of Capital Gains Tax to be located outside the UK. The list of organisations that have been designated under this provision is as follows.

- International Bank for Reconstruction and Development
- Asian Development Bank
- African Development Bank
- The European Economic Community

- The European Investment Bank
- The European Bank for Reconstruction and Development
- The European Coal and Steel Community
- The European Atomic Energy Community

82.12.2 *Inter-American Development Bank and OECD support fund*

Section 131 FA 1976 provides:

> (1) The following provisions of this section shall have effect on the UK's becoming a member of the Inter-American Development Bank ("the Bank").
> (2) A security issued by the Inter-American Development Bank shall be taken for the purposes of capital transfer tax … to be situated outside the UK.

Section 266 TCGA provides a corresponding CGT exemption:

> A security issued by the Inter-American Development Bank shall be taken for the purposes of this Act to be situated outside the UK.

Section 4 OECD Support Fund Act 1975 provides:

> (1) A person not resident in the UK shall not be liable to income tax in respect of income from any security issued by the support fund established by the Agreement if he would not be liable but for the fact that—
>
> (a) the security or income is issued, made payable or paid in the UK or in sterling; or
> (b) the support fund maintains an office or other place of business in the UK;
>
> and such a security shall be taken for the purposes of capital transfer tax and capital gains tax to be situated outside the UK.

82.13 Simple contract debt

A **"simple"** debt is one which is not a specialty (in short, not made by deed).

The basic principles are well established:

> to prevent conflicting jurisdictions between different ordinaries, with respect to choses in action and titles to property, it was established as law, that judgment debts were assets, for the purposes of jurisdiction, where the judgment is recorded; leases, where the land lies; specialty debts, where the instrument happens to be; and simple contract debts,

> where the debtor resides ...[63]

The IHT Manual provides:

> **27091 Debts: contractual** [January 2014]
> In English law, a **simple contract** debt is situated where the debtor resides: *AG v Bouwens*;[64] *English, Scottish and Australian Bank v IRC* [1932] AC 238...

Dicey states:

> Subject to the exceptions set out below, a debt is situate in the country where the debtor resides.[65]

I call this "**the place-of-debtor rule**". Along with the specialty situs rule, this rule can be traced back to Elizabethan times.[66]

There are many cases which state this rule: the most frequently cited, which may be called the two leading cases, are *English, Scottish and Australian Bank* (mentioned above) and *New York Life Insurance Co v Public Trustee* (affirming the passage from *Bouwens* set out above).[67]

A winding-up order against the debtor does not affect the situs of a debt,[68] but judgment against the debtor (turning the debt into a judgment debt) does do so.[69]

82.13.1 *Meaning of "residence"*

In order to apply the place-of-debtor rule one needs to determine where the debtor resides.

For this purpose the definition of residence for a company is neither the common law rule of corporate tax residence (management and control) nor the current statutory rules of corporate tax residence (under which a UK incorporated company is deemed UK resident). The test is where the company carries on business:

> Now, when you are dealing with a corporation, ... you have to examine

---

63 *AG v Bouwens* (1838) 4 M & W 171 accessible *http://www.commonlii.org*. The same applies in Australia: *Haque v Haque* (No.2) (1965) 114 CLR 98 at p.137.

64 See above fn.

65 Dicey Morris & Collins, *Conflict of Law* (15th ed., 2012) para 22-026 (Debts).

66 See 82.15.1 (Situs of specialty).

67 [1924] 2 Ch 101.

68 *Wight v Eckhardt* [2004] 1 AC 147. In practice this issue will not usually arise.

69 See 82.22 (Judgment debt).

> the question where the debt can be said to be situate. It appears to me plain that a corporation according to our law is deemed to reside for the purposes of suit in the place where it carries on business in its own name ...[70]

Moreover for this purpose a company is always resident in the place where it is incorporated and has its registered office, whether or not it is carrying on business in any other place.[71]

I refer to the concept as "**jurisdiction-residence**" to distinguish it from tax-residence. It seems surprising to use the term "residence" in a non-tax sense but it is understandable when one bears in mind the history: the situs rule emerged in the context of conflict of laws, not in the context of tax. In practice it may be rare for there to be any difference between tax-residence and jurisdiction-residence.

What is the test of residence of an individual, for the purposes of the place-of-debtor rule? Here jurisdiction-residence adopts and still operates the common law definition of residence which applied for tax purposes until the SRT in 2013.[72] The statutory residence test is intended to achieve (more or less) the same result, so it should come to the same thing. One difference is that for tax-residence, one is resident in the UK; for jurisdiction-residence the question is whether an individual is resident in England or Scotland or Northern Ireland.

82.13.2 *Dual resident debtor*

A company may be jurisdiction-resident in two states. It has been said that an individual cannot be dual jurisdiction-resident.[73] But I do not understand why; an individual could be dual tax-resident under the

---

70 *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 at p.120 followed *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.733.

71 *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.733. This may be justified on the basis that a company must be carrying on business where it has its registered office.

72 *OJSC Oil Co Yugraneft v Abramovich* [2008] EWHC 2613 (Comm) (also reported under the name *Yugraneft v Abramovich*) at [461]: "... the courts have sought to give the word [residence] the same 'ordinary' meaning in both tax cases (such as *Levene*) and jurisdiction cases (such as *Abbas*). It makes sense to do so. Resident for jurisdiction purposes but not resident for tax purposes is a distinction to be avoided if possible." For the common law (pre-2013) test, see the 2012/13 edition of this work chapter 3 (Residence of individuals).

73 *New York Life Insurance Co v Public Trustee* [1924] 2 Ch 101 at p.114.

common law definition of residence.[74]

Where the debtor is jurisdiction-resident in two states, the place-of-debtor rule does not provide a solution. A tie-breaker is needed, and the solution adopted in *New York Life Insurance v Public Trustee*[75] is to prefer the state of jurisdiction-residence where the debt is payable.

The position where the debtor is jurisdiction-resident in two states and the debt is payable in a third state has not been considered. Perhaps in relation to a company this cannot happen, as if the debt is payable in a state the company will be carrying on business there, so it must be jurisdiction-resident there.

The position where the debtor is jurisdiction-resident in two states and the debt is payable in both states has not been considered. Some suitable tie breaker must be devised; it is suggested that the proper law of the contract would be the most suitable.

82.13.3 *Place-of-enforceability as rationale of the place-of-debtor rule*

In *New York Life Insurance v Public Trustee* the court said:

> The rule of law with regard to the locality of simple contract debts is that it is determined by the residence of the debtor at the material moment. That has been well settled for a long time, and I think the reason for that is that it is
> [1] the residence of the debtor which determines the place where he may be sued, prima facie at all events, and
> [2] is in general the place where the means of satisfying any judgment may be discovered,
> but whatever the reason is, there is no doubt that this is the rule.[76]

These are not absolutely compelling reasons for the place-of-debtor rule. Even when the rule was first laid down, it was not necessarily the case that the debtor could only be sued in his place of residence, or that his assets were there and not elsewhere. Nowadays these are less safe assumptions than formerly, though even now, they are still the case more often than not. However there is no reason why the debt situs rule must have a compelling reason. In fact any situs rule is bound to be slightly arbitrary

---

74 See the 2012/13 edition of this work para 3.13 (Dual residence/dual ordinary residence).

75 [1924] 2 Ch 101 followed *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.733.

76 [1924] 2 Ch 101 at p.114; similarly at p 119.

and any clear rule is better than none.

82.13.4 *Place-of-enforceability as synonym of place-of-debtor rule*

In *Jabbour v Custodian of Absentee's Property of State of Israel* the Court said:

> It is established by the decided cases that not only debts, but also other choses in action, are for legal purposes localised and are situated where they are properly recoverable and are properly recoverable where the debtor resides.[77]

Similarly, Dicey rule 129 provides:

> Choses in action generally[78] are situate in the country where they are properly recoverable or can be enforced.[79]

I think that "properly recoverable" and "can be enforced are synonyms", so Dicey is propounding one test expressed in two different ways. I call this the **"place-of-enforceability test"**.

If this test is synonymous with jurisdiction-residence, it is correct. It is however a confusing and inapt way of expressing the place-of-debtor rule. It would be better to refer to place of residence rather than place of enforceability, and all the leading cases use the term residence;[80] though there are some cases which (under the influence of Dicey) have expressed the rule in this way.[81]

82.13.5 *Place-of-enforceability test as rival to the place-of-debtor rule*

The difficulty with the place-of-enforceability test is that a debt is *not* necessarily recoverable in the place of residence of the debtor, and if that is understood, it is not consistent with the place-of-debtor rule.

The question has been settled in a number of cases which have held that a debt is situate where the debtor is resident, even if the debt is enforceable elsewhere:

---

77 [1954] 1 All ER 145 at p.151.

78 I think "generally" is intended to signpost the exceptions for specialties, bearer documents, negotiable instruments and judgment debts.

79 Dicey Morris & Collins, *Conflict of Law* (15th ed., 2012), 22R-023 rule 129.

80 *AG v Bouwens*; *English, Scottish and Australian Bank v IRC* [1932] AC 238.

81 For instance, *Kwok Chi Leung Karl v Commissioner of Estate Duty* [1988] STC 728 at p.732.

> a simple contract debt ... is deemed by English law to be situated in the place where the debtor resides. The reason for assigning this locality to a simple contract debt was that the place where the debtor resides was in nearly every case the place where it was recoverable. Even in earlier times, it might, of course, occasionally have happened that judgment could be obtained against a debtor in a country where he did not reside. But it was probably thought desirable for the sake of uniformity to adopt in all cases the test of residence rather than the test of recoverability. However, whatever the reason may have been, the rule was laid down, was I have stated it, in *AG v Bouwens*, and was recognised by this court as still being the rule in *New York Life Insurance v Public Trustee*. ... In the present case the debt is payable in this country, but the defendant bank was not residing here on Jan. 10, 1920. ...

A debt from a non-resident is recoverable in the UK if (in short) the Court gives permission, but that does not alter situs:

> The debt was also recoverable here ... had the plaintiffs been successful in obtaining leave to serve the defendant bank out of the jurisdiction. But I know of no authority for the proposition that a simple contract debt is situate in this country, at a time when the debtor is not resident here, merely because he can be sued by putting into operation the provisions of R.S.C., Ord. 11. It would be strange if it were so. For it is always in the discretion of the court in cases coming within the rule, to give or refuse leave for service out of the jurisdiction, a discretion depending upon the balance of convenience. A debt due from a debtor resident out of the jurisdiction cannot therefore be deemed to be in this country until an application has been made for service of the writ out of the jurisdiction and that application has been acceded to. If leave were obtained, the question would then arise whether the order granting leave brought the debt into this country for the first time, or established its presence here as from some earlier date. ...But I need not attempt to answer this question, for in my judgment the fact that a simple contract debt can be recovered here from a debtor out of the jurisdiction does not establish an English locality for the debt....[82]

I set this out in detail because unfortunately the contrary view was reached

---

82 *Re Banque Des Marchands De Moscou (Koupetschesky)* [1954] 2 All ER 746 at p.752 citing *Deutsche Bank und Disconto Gesellschaft v Banque des Marchands de Moscou* (unreported). The passage was also followed in *Re Helbert Wagg & Co* [1956] 1 All ER 129 at p.137.

in one recent case, *Hillside (New Media) v Baasland*. In this case Baasland ("the creditor") deposited money with Hillside ("the debtor"), creating a debt. The debtor was resident in England. The Court should have held that the debt was situate in England because of the residence of the debtor but it did not. The Judge cited Dicey rule 129 set out above and continued:

> Although at common law this principle led to the general rule that (with some exceptions that are irrelevant for present purposes) debts are situate where the debtor resides (see Dicey, Morris & Collins, at para 22-026[83]), its application in a case such as this, where the debtor is a corporation and the case is covered by the Lugano Convention, depends, as I see it, upon the debtor's domicile. That is the primary ground on which a court takes jurisdiction under article 2 of the Lugano Convention. The domicile of a corporation is determined in accordance with section 42 of the Civil Jurisdiction and Judgments Act, 1982. It depends upon where it has its "seat", and this in turn depends upon where it was incorporated and has its registered or other official address or where its central management and control is exercised.[84]

I do not think any weight should be given to the comments on situs in *Hillside,* as the relevant cases were not cited.[85] *Hillside* illustrates how the place-of-enforcement test can mislead if it is intended to be synonymous with the place-of-debtor rule: it ought to be abandoned.

Although jurisdiction was the historic reason for adopting the place-of-debtor rule, now the rule has been chosen, jurisdiction-residence determines situs regardless of where the debt would actually be enforced. So a debt is situate where the debtor resides even though enforceable elsewhere, eg under an exclusive jurisdiction clause in the debt contract. If the historic reason for the place-of-debtor rule now holds less validity, or even no validity (though I think that would be an exaggeration) the rule is still as good as any other. Well-established precedents are not overturned merely because the historic reason for selecting that rule as against any other has become less compelling.

The place-of-debtor situs rule is in fact better than a place-of-

---

83 The text of Dicey has not changed between the 14th edition to which the Judge refers, and the current edition.

84 [2010] EWHC 3336 (Comm) at [33]. The comment may be regarded as obiter as place of residence and place of enforceability were both in England.

85 The creditor (probably insolvent) was not represented.

enforceability rule for several reasons:

(1) It is generally easier to ascertain where a debtor is resident than where a debt may be enforced.
(2) The place of enforcement changes with developments in international law.
(3) A debt may be enforceable in several places against the same debtor.

82.14 Debt enforceable against several persons

Where a debt is guaranteed, the creditor may sue the debtor or the guarantor. This should not affect the situs of the debt, which is the jurisdiction-residence of the debtor, not the guarantor.

Hillside (New Media) v Baasland raised the (perhaps unusual) situation of a debt under a contract with an agent acting for an undisclosed principal. The Judge said:

> [35] ... Hillside... dealt with Mr Baasland in two capacities, (i) as principal in respect of [some funds] and (ii) as agents for an undisclosed principal (or undisclosed principals) in respect of [other funds] In either case, Hillside are liable for the debt represented by the funds ... That chose in action was situate in England
> [36] However, if this analysis is correct, ... Hillside Gibraltar [a Gibraltar company] , as an undisclosed principal of Hillside, would also have been liable to Mr Baasland in debt in respect of [certain funds], and that debt would have been situate in Gibraltar. Similarly, Bet 365 NV [a Netherlands Antilles company] would also have been liable for a debt in respect of [certain funds], and that debt would have been situate in the Netherlands Antilles.[86]

The better analysis of an undisclosed principal case is that the creditor has distinct claims (against the agent and against the undisclosed principal, enforceable in different places) but the claims relate to one single asset. An asset should be regarded as situate in only one place, so here we need a tie breaker between the jurisdiction-residence of the agent and the jurisdiction-residence of the principal. The jurisdiction-residence of the undisclosed agent has the stronger claim as the test of residence. The position of the undisclosed principal is analogous to a guarantor.

There is no authority on the position where a debt is owed by several debtors, whether jointly or severally, who are jurisdiction-resident in

86 [2010] EWHC 3336 (Comm).

different places. Here again some tie-breaker is needed, and the logical one (as in the case of a dual-resident debtor) is the place where the sum is payable.

82.15 Specialty obligation

82.15.1 *Situs of specialty*

If any rule of law can be called established, it is the rule that a debt due under a deed or other specialty is situate where the deed is situate.[87] I call this "**the specialty situs rule**". This rule (along with the place-of-debtor rule) can be traced back to Elizabethan times.[88]

The same rule applies in Australia:

> *specialties* (such as a policy of insurance) - a debt created by deed (a 'specialty') has been held to be located where the deed itself is to be found...[89]

So a debt due from a UK resident can be made non-UK situate for IHT by drafting the debt as a specialty and keeping the document offshore. Conversely a debt, policies, and other specialities can be made UK situate for IHT by bringing the deed here.

82.15.2 *Reason for the specialty situs rule*

What is the reason for the specialty situs rule? In *R v Williams* [1942] AC at 555 the Privy Council offer this explanation:

> [A specialty debt] was for centuries treated as very different from an ordinary debt. Indeed, the act of creating a specialty by deed was at one time possible only to men of the highest rank. Unlike debt, it was

---

87 *AG v Bouwens* (1838) 4 M & W 171 accessible *http://www.commonlii.org*. This was approved in *AG v Winans (No. 2)* [1910] AC 27; *Comr of Stamps (New South Wales) v Hope* [1891] AC 476. Dicey Morris & Collins, *Conflict of Law* (15th ed., 2012), para 22-034 (Specialties) cite another half dozen cases.

88 *Byron v Byron* Cro. Eliz. 472: "The debt is where the bond is, being upon a speciality; but debt upon a contract follows the person of the debtor; and this difference has been oftentimes agreed."

89 Taxation Ruling TR 2008/9

The Ruling cites: *Shaw v R* (1895) 21 VLR 338; 1 ALR 122; *Haque v Haque (No.2)* (1965) 114 CLR 98 at p.137.

> enforced by an action of covenant.[90] The deed itself was the foundation of the action, the original debt, if any, being merged. The terms of the deed were conclusive. Specialty debts till recent [?] times conferred special rights. They used to rank in the administration of the estate of a deceased person in priority to simple contract debts;[91] and, unlike such debts, were enforceable against the real estate.[92] They were said to be "of a higher nature" than debts by contract. It is, therefore, not surprising that specialty debts by deed were treated from an early date as bona notabilia[93] where the deeds were found at the time of the death, unlike ordinary debts which were said "to follow the person of debtor".

The higher status attributed to a deed made sense several centuries ago. Important legal arrangements were recorded in deeds. Less important or casual legal arrangements would not be. The law's view that a deed was of a higher nature than a simple contract reflected the views of the community and the manner in which business was conducted. The specialty rules mentioned by the Privy Council had (by 1942) long ceased to be valid in English law, but it continues to be the case that a specialty has a higher status, for instance, preferential treatment in the law of limitation. In common law jurisdictions it is still the case, in Blackstone's words, that a deed is "the most solemn and authentic act that a man can possibly perform with relation to the disposal of his property."[94]

None of this justifies the specialty situs rule, but it does show that a distinction between situs rules for a specialty debt and other debts should not be regarded as very surprising or anomalous. Still, one might conclude that the specialty situs rule has no reason but *Commissioner of Stamps v Hope* offers a good explanation:

> ... the distinction drawn and well settled has been and is whether it is a debt by contract or a debt by specialty. In the former case, the debt being merely a chose in action – money to be recovered from the debtor and nothing more – could have no other local existence than the personal residence of the debtor, where the assets to satisfy it would presumably

93 See 82.1.2 (History and terminology of situs law).

94 Commentaries Book II (1st ed., 1766), p.297.

> be, and it was held therefore to be bona notabilia[95] within the area of the local jurisdiction within which he resided; but this residence is of course of a changeable and fleeting nature, and depending upon the movements of the debtor, and inasmuch as a debt under seal or specialty had a species of corporeal existence by which its locality might be reduced to a certainty ... it was settled in very early days that such a debt was bona notabilia[96] where it was "conspicuous", i.e. within the jurisdiction within which the specialty was found at the time of death: see *Wentworth on the Office of Executors*, ed. 1763, pp. 45, 47, 60(1).[97]

The reason for the specialty situs rule is not that the specialty has a "species of corporeal existence"[98] though of course the deed does have physical existence. The reason is that the rule is certain and easier to apply than a place-of-debtor rule. There is good sense in that. The specialty situs rule reflects a rational choice in the common tax policy dilemma between formal and substantive rules.[99]

82.15.3 *HMRC view(s)=20 May 2014*

HMRC formerly accepted that the specialty situs rule was correct. The IHT Manual formerly provided:

> ***27091 Contractual*** *[February 2006]*
> *A specialty debt is situated where the instrument happens to be.*

But in January 2013, HMRC announced a change of practice, and the IHTM now provides:

> **IHTM27079 Specialty debts: bonds and debentures under seal** [January 2014]
> ... In the past, HMRC's approach to the situs of specialty debts has been that this depends on where the relevant document is found. We now

---

95 See 82.1.2 (History and terminology of situs law).

96 See 82.1.2 (History and terminology of situs law).

97 [1891] AC 476 at p.481. The passage from Wentworth is accessible *http://www.kessler.co.uk/tfd-archive*.

98 That is either tautologous (if "having a species of corporeal existence" means "situate where the deed itself is situate") or metaphysical (if "having a species of corporeal existence" means anything more than "situate where the deed is situate"). It is not, after all, the case that transfer of the deed brings about a transfer of the debt or right to which the deed relates (except in the case of a bearer instrument).

99 See 82.2 (Situs: policy issues and reform).

> believe this may not be the correct approach in all cases involving special debts: especially that many such debts are likely to be located where the debtor resides, or where property taken as security for the debts is situated. Any cases involving situs and a specialty debt must be referred to Technical. For example, any claim that a debt secured on UK assets is not UK situs property must be sent to Technical.

It is very difficult to see any sound basis for the view, which HMRC claim to have been advised, that specialty debts are situate where the debtor resides. The only possible argument is that the Supreme Court should change the law. In the 2012/13 edition of this work I said:

> In tax cases the point should not often arise as HMRC should not argue the point against their own Manual. ... So the UK courts are not likely to have to examine the issue ...

I was wrong about that!

The courts have shown themselves prepared to amend long established common law rules, such as the rule that there is no recovery for payments made under a mistake of law. The Supreme Court has power to do that. But that power is intended to be applied only in a small number of cases in which previous decisions of the House of Lords/Supreme Court were "thought to be impeding the proper development of the law or to have led to results which were unjust or contrary to public policy".[100] That is not the case here. Well-established rules are not overturned merely because the underlying principle is logically unsound. Moreover, situs is a question of international law and it is "of great importance that some fixed common principles should guide the Courts in every country on international questions. In questions of international law we should not depart from any settled decisions, nor lay down any doctrine inconsistent with them".[101] A change would also upset existing wills, which sometimes make different dispositions for property depending on whether it is situate within and outside the UK So it is considered that the rule will remain even if challenged in the Supreme Court. It should be abolished (if at all)

---

100 *R v National Insurance Comrs, ex p Hudson* [1972] AC 944; see Lee, "The Doctrine of Precedent and the Supreme Court" (2012) accessible *http://www.innertemple.org.uk/education/lecture-series-2012/previous-lecture-series-speakers*

101 *Udny v Udny* 1 Sc. & Div. 441 at p.452.

by Parliament.[102]

There are a number of objections to what HMRC have done. First, the HMRC view of the law is indefensible. Secondly (but perhaps not unconnectedly) no reason is given to defend it. It is not good enough to say that HMRC have received legal advice and take shelter behind professional privilege. Was the advice given by Counsel? And what are the reasons for overturning a rule set out without qualification in every relevant case, textbook and the HMRC manual? HMRC advocate "transparency, engaging in a co-operative, supportive and professional manner in all interactions ... working collaboratively"[103] though perhaps no-one takes that seriously. Perhaps in the event of a dispute HMRC would disclose their advice, in the interests of the open, frank and transparent enhanced relationship which HMRC say they want to have with their customers.[104]

Thirdly, no thought is given to the transitional problems of a change in practice.

It seems safe to predict that the statement will be withdrawn, in the next decade or so.[105] Altogether, HMRC's customers may think this a

---

102 There are precedents for statutory reform: the specialty situs rule was amended for probate duty: s.39 Revenue Act 1862 and it does not usually apply for CGT. Dymond states: "It was formerly considered that s.39 Revenue Act 1862 (which provided that, for Probate Duty purposes, specialty debts owing from persons in the UK, and forming part of the free estate, were to be treated as though they were simple contract debts), was incorporated for Estate Duty purposes... The Irish court, however, decided in *Re Finance Act, 1894 and Deane* [1936] Ir R 556 that [this was not the case] and, accepting this interpretation as correct, such debts are to be regarded as subject to the ordinary rule applicable to specialty debts." See Dymond's Death Duties (15th ed, 1973) p.1267. Of course all this is inconsistent with the current HMRC view.

103 See 87.9 (Above-minimum disclosure for sake of good relations with HMRC).

104 "The minimum amount of openness on the part of revenue bodies that will be necessary for the enhanced relationship to function will include ... a willingness to disclose such information without invoking (except in the very rare case where the public interest requires otherwise) executive and other governmental privileges and immunities to suppress documents and other information reasonably sought by the taxpayer." OECD, "Tax Intermediaries Study Working Paper 6 The Enhanced Relationship" (July 2007), para 43; *http://www.oecd.org/dataoecd/59/61/39003880.pdf.*

105 Contrast the debate over GWR and excluded property where for a decade the IHT Manual instructed inspectors to refer the point to Technical, before finally throwing in the towel and reverting to the original practice.

somewhat unimpressive display of tax administration.

As the statement falls into the category of "clearly wrong" I see no need to disclose to HMRC occasions where a tax charge would arise if their view were right.[106]

In April 2014, HMRC announced:

> The guidance at IHTM27079, IHTM27080 and IHTM27104 is still being reviewed and will be amended again soon.[107]

Perhaps HMRC will back down.

82.15.4 *Commentary: Should we abolish the specialty situs rule?*

There is something to be said for statutory abolition of the specialty situs rule. The change would not bring in any significant amount of tax (as debts could be held by companies whose shares would be non-UK situate) but it would be a simplification. The transitional rules would need thought. Assuming the object is simplification, the new rules should not just apply to new debts. A fair rule would be to apply the new rules after a reasonable delay, say 12 months, to allow taxpayers to review their position. The cost of taxpayers reviewing their affairs ought to be taken into account. After factoring that in, I would not have thought that the improvement was worth the trouble involved in achieving it.

If it could be done as a quid pro quo of a wider review and simplification of the unsatisfactory CGT debt and debenture situs rules[108] the law would be left in a better state. But the best solution is to look at the wider picture altogether: treat all assets other than UK land and securities as non-UK situate for the purposes of IHT and CGT.[109]

82.16 Meaning of "specialty"

"Specialty" is an opaque technical term whose meaning can only be ascertained from the case law. Four categories of asset are "specialties":

(1) Obligations under deeds:
   (a) The paradigm example of a specialty is a debt due under a deed.
   (b) The term also applies to deeds which create or record obligations

---

106 See 87.10 (Voluntary (?) disclosure to avoid allegation of misconduct).

107 HMRC, Trusts & Estates Newsletter, April 2014.

108 See 83.8.4 (Commentary); 83.13.5 (UK law rule: Commentary); 83.9 (Debt situs rule); 83.11 (Commentary).

109 See 82.2 (Situs: policy issues and reform).

which are not debts.[110] A life policy, contract for deferred annuity, capital redemption policy and the like are specialties if made by deed. Shares are not specialties.[111]

(2) For completeness the term also includes some liabilities which are not deeds:
   (a) A debt incurred under a statute.[112]
   (b) Certain debts are by statute given the status of a specialty.[113]

So the terms "deed" and "specialty" are not strictly synonymous, but in most cases a deed is a specialty and vice versa.

82.16.1 *What is a "deed"?*

Since a specialty is a deed, the question arises as to what is a deed.

82.16.2 *English law requirements of a deed*

There are different rules for:
(1) individuals
(2) companies incorporated under the companies acts
(3) other types of company
Land Registry Practice Guide 8 – Execution of deeds (March 2013)[114] contains a helpful summary of English law:

> **2.2 Elements of a deed**
> To be a deed the document:
> • must be in writing
> • must make clear on its face that it is intended to be a deed by the person making it or the parties to it. This can be done by the document describing itself as a deed or expressing itself to be executed as a deed 'or otherwise'
> • must be validly executed as a deed by the person making it or one or more of the parties to it (s.1, LP(MP)A 1989). ...
> **3 Execution of deeds by individuals**
> **3.1 The three elements: signature, attestation and delivery**
> **3.1.1 Signature**
> To be validly executed as a deed by an individual, they must sign the document.

---

110 In *Aiken v Steward Wrightson Agency* [1995] 1 WLR 1281 the term was applied to a contract by deed to provide services (so a claim for breach of contract was "an action upon a specialty" which qualified for a 12-year limitation period).

111 *R v Williams* [1942] AC 541.

112 *Royal Trust v AG for Alberta* [1930] AC 144.

113 In this category there now remain only a few Victorian antiquities of no practical importance, such as s.14 Metropolitan Fire Brigade Act 1865.

114 *http://www.landregistry.gov.uk/professional/guides/practice-guide-8*

Making one's mark on a document is treated as signing it (s.1(4), LP(MP)A 1989). ...

3.1.2 Attestation by a witness

The individual must sign "in the presence of a witness who attests the signature" (s.1(3), LP(MP)A 1989). ...

3.1.3 Delivery

The document must be "delivered as a deed" by each person executing it or a person authorised to deliver it on their behalf (s.1(3)(b), LP(MP)A 1989). Delivery requires that the person expressly or impliedly acknowledges, by words or conduct, an intention to be bound by its provisions.

Where a conveyancer, in a transaction involving the disposal or creation of an interest in land, purports to deliver a document as a deed on behalf of a party to it, there is a conclusive presumption in favour of a purchaser that the conveyancer is authorised to deliver it (s.1(5), LP(MP)A 1989). In practice, we assume that a document has been delivered as a deed unless there is some indication to the contrary. So if, for example, the words of execution have been modified to provide that delivery has not taken place, or that delivery is not to be presumed until some condition has been fulfilled, we will require evidence that delivery has subsequently taken place.

3.2 Attestation clause

The general law does not require a particular attestation clause. It is sufficient if the clause makes clear that the signatures of the parties to the deed are intended to be by way of execution and that they were made in the presence of the witnesses. The wording should also state that the document has been executed "as a deed". Then, even if it is not clear elsewhere in the document that it is intended to be a deed, the words of execution will make this apparent ...

4 Execution of deeds by companies registered under the Companies Acts

On 6 April 2008 s.44, CA 2006 came into force and applies to deeds executed on or after 6 April 2008 by companies registered under previous Companies Acts and also to companies registered in Northern Ireland.

4.1 Execution by a company under its common seal[115]

Where this form of execution is adopted, the common seal will normally be affixed to the deed in the presence of the company secretary and one director, or two directors, who attest the sealing by countersigning the deed and describing themselves by their respective offices of 'secretary' and 'director' or 'director' and 'director'. ...

Under s.1(2A), LP(MP)A 1989 introduced by the RRO 2005, merely sealing a document will not make it a deed. It must be clear on the face of a document that it is intended to be a deed. ...

This form of execution will also apply to deeds executed by Northern Ireland companies on or after 6 April 2008.

Most companies, however, have articles of association that authorise the affixing

115 [Footnote original] This is the common law method of execution by corporations, preserved for companies registered under the Companies Acts by s.36A(2), CA 1985 and for documents executed on and after 6 April 2008 by s.44(1)(a), CA 2006.

of the company seal to a deed in the presence of people other than a director and the secretary. For example, article 101 of Table A[116] provides that:

"The directors may determine who shall sign any instrument to which the seal is affixed and unless otherwise so determined it shall be signed by a director and the secretary or by a second director". ...

4.2 Execution by a company otherwise than under a common seal

A different method of execution can be used by a company which either has no seal or, having one, chooses not to use it. For deeds executed before 6 April 2008, s.36A(4), CA 1985 provides:

"A document signed by a director and secretary of a company, or by two directors of a company, and expressed (in whatever form of words) to be executed by the company has the same effect as if executed under the common seal of the company." ...

The above form of execution can be used for deeds executed on or after 6 April 2008 by virtue of s.44(2)(a) and (3), CA 2006. This form of execution will also apply to deeds executed by Northern Ireland companies on or after 6 April 2008. In addition for deeds executed on or after 6 April 2008 s.44(2)(b), CA 2006 provides that a company may execute a document under the law of England and Wales or Northern Ireland by a single director if that signature is witnessed and attested. ...

4.3 Delivery

As with other deeds, a deed which has been executed by a company must also be delivered in order to be effective.

A document executed by a company that makes it clear on its face that it is intended by the people making it to be a deed is presumed to have been delivered on execution unless a contrary intention is proved (s.46, CA 2006).

In practice, we assume that a document has been delivered as a deed unless there is some indication to the contrary. So if, for example, the words of execution have been modified to provide that delivery has not taken place, or that delivery is not to be presumed until some condition has been fulfilled, we will require evidence that delivery has subsequently taken place.

4.4 Execution where the director or secretary is also a company

The seal of the executing company needs to be affixed to the deed "in the presence of and attested by" the director and secretary or, from 15 September 2005, two directors (s.74(1), LPA 1925, see 4.1 Execution by a company under its common seal). A corporate director or secretary must act through the agency of a real person. That person is required to be physically present at the affixing of the seal and must then attest the affixing with their signature. We suggest the following words of execution (amended as necessary) be used where the director or secretary is also a company. ...

4.5 Execution by directors/secretaries on behalf of several companies

From 15 September 2005, where a person who is a director or secretary of two or more companies executes a deed on behalf of them all, such person must sign

---

116 [Footnote original] That is, Table A in the Schedule to the Companies (Tables A-F) Regulations 1985 (SI 1985/805).

the deed separately for each company (s.36A(4A), CA 1985 and s.44(6), CA 2006). ...

4.6 Execution by Scottish companies registered under the Companies Acts

The question of whether a disposition of land in England and Wales is formally valid must be determined in accordance with the lex situs, that is, the law of England and Wales. It is our view, therefore, that the requirements for an effective transfer etc. of registered land are the same where the disposition is by a Scottish company registered under the Companies Acts as for a disposition by English and Welsh companies so registered.

S.48, CA 2006 provides that "a document signed or subscribed by or on behalf of the company in accordance with the provisions of the Requirements of Writing (Scotland) Act 1995 shall have effect" as if executed by a company affixing its common seal. However, the section begins: "The following provisions form part of the law of Scotland only." It is difficult to see, therefore, how s.48, CA 2006 can be relevant where it is registered land that is being disposed of.

The Overseas Companies (Execution of Documents and Registration of Charges) Regulations 2009 includes provisions as to execution by overseas companies, but a Scottish company is not an overseas company.

5 Execution of deeds by unregistered companies

An unregistered company[117] is a body incorporated in and having a place of business in Great Britain, except:

- a body incorporated by or registered under any public general Act of Parliament
- any body not formed for the purpose of carrying on a business that has for its objects the acquisition of gain by the body or its individual members
- any body for the time being exempted by direction of the Secretary of State.

In practice, unregistered companies are usually incorporated either by royal charter or private Act of Parliament and of a local character, although some large companies, such as certain insurance companies, fall into this category. In transfers of registered land and other instruments whose form is prescribed, the attestation clause should be in the form set out in section 4.1 Execution by a company under its common seal where the unregistered company executes using its common seal. We will need to see the statute, charter or other document of constitution of the company when other forms of attestation clause are adopted.

An unregistered company can make use of the same alternative method of execution as a company registered under the Companies Acts.[118] So an unregistered company may execute without using its seal by arranging for a director and its secretary, or two directors, to sign on its behalf. In the case of a transfer of registered land or other instrument whose form is prescribed, the

---

117 [Footnote original] The definition which follows is derived from s.1043(1), CA 2006.

118 [Footnote original] Companies (Unregistered Companies) Regulations 2009 (SI 2009/2436). The regulations apply s.44, CA 2006 to unregistered companies, and revoke previous regulations.

attestation clause must be in the form set out in section 4.2 Execution by a company otherwise than under a common seal.

For deeds executed on or after 1 October 2009 an unregistered company may also execute deeds by a single director if that signature is witnessed and attested, using Form D(ii), schedule 9, LRR 2003.

6 Execution of deeds by other corporations incorporated in the UK

6.1 General

A corporation is either a corporation sole or aggregate. A corporation sole is an office, such as 'bishop', that has a legal personality separate from the particular holder of the office for the time being. A corporation aggregate is a body of persons that has a legal personality separate from the particular members of the body for the time being.

This section is concerned with corporations aggregate other than companies registered under the Companies Acts and unregistered companies. So among the corporations this section does cover are those incorporated by or registered under public general Acts other than the Companies Acts; this includes building societies, industrial and provident societies, incorporated friendly societies, higher and further education corporations, the governing bodies of maintained schools and local authorities.

The relaxation of the common law requirement for a deed to be executed under seal, which enables sealing to be dispensed with in the case of deeds executed by individuals, does not extend to corporations sole (s.1(10), LP(MP)A 1989). The statutory provision (s.44(2), CA 2006) allowing companies to execute by a signature on behalf of the company does not apply to the corporations aggregate with which this section is concerned. We will, therefore, require that a corporation sole or aggregate executes under seal except where the applicant is able to point to some specific statutory provision in relation to the corporation concerned.

If the corporation is a corporation aggregate and the attestation clause is in the form set out in section 4.1 Execution by a company under its common seal,[119] we will normally accept the deed without further evidence – s.74(1), LPA 1925 will apply in favour of a purchaser.

The legislation or other document (such as a royal charter) under which the corporation is incorporated will normally provide for it to have a corporate seal and for the use of the seal in the execution of deeds. If the corporation is authorised to execute a deed by affixing its seal other than in accordance with s.74(1), and such a method of execution is adopted, then we will need to see the legislation or document of incorporation or regulating its affairs. If, however, incorporation is under the provisions of a public general Act, we will not require a copy of the legislation to be lodged with the deed, although we would ask that reference is made to the appropriate section or sections of the legislation in a covering letter sent with the deed.

---

119 [Footnote original] It will be necessary to adapt this clause if the member of the governing body is not a 'director' or the permanent officer is not the 'secretary': see section 7.1 Execution under common seal.

If a deed is lodged for registration that does not have the common seal affixed and purports to have been:

- executed on behalf of the corporation by signatories
- with descriptions other than as provided for in the relevant statutory provision allowing for execution without a common seal

we will require evidence to be produced to show that the deed has been duly executed. If such evidence cannot be produced we will insist that the deed is executed correctly, either under the common seal or by following the procedure set out in the relevant statutory provision. The same will apply to a deed lodged for registration that purports to have been executed on behalf of the corporation by people who lack any description.

6.2 Limited liability partnerships

... Limited Liability Partnerships (Application of Companies Act 2006) Regulations 2009 (SI 2009/1804) applies ss.44-47, CA 2006 to limited liability partnerships, so they may execute deeds as provided by s.44, CA 2006. The regulations modify s.44, CA 2006 so that the references to a director and the secretary, or two directors, of the company are to be read as references to two members of the limited liability partnership (Regulation 4). ...

Paragraphs 6.3 and 6.4 deal with buildings societies and industrial and provident societies which is too specialist to reproduce here.

7 Execution of deeds by foreign corporations

We are concerned here with corporations from outside the UK.

With the coming into effect of the Overseas Companies (Execution of Documents and Registration of Charges) Regulations 2009 (SI 2009/1917) an overseas company can execute in one of three ways.[120] The regulations apply s.44, CA 2006 to overseas companies with some amendments. ...

7.1 Execution under common seal

A corporation possessing a common seal may execute deeds using that seal. The points made in section 4.1 Execution by a company under its common seal apply if a deed is executed in this way. ...

A foreign corporation may be able to execute in this way even though it has not hitherto had a seal (perhaps because the sealing of deeds is unknown to the law of its domicile). Provided there is nothing in the corporation's constitution or domestic law to fetter its powers in this respect, it would appear to be open to the board, council or other governing body to adopt a seal for the purpose of executing deeds in relation to property in England and Wales. It could use a wafer seal.[121] The attestation clause in the form set out in section 4.1 Execution

120 [Footnote original] There is a possible fourth way, which is to rely on s.74(3), LPA 1925, but this is much the same as the third way authorised by the regulations with the added requirement that the signature be witnessed.

121 [Footnote original] The Law Commission considered that this should be effective: The Execution of Deeds and Documents by or on behalf of Bodies Corporate (Law Com No 253), 4.33.

> by a company under its common seal should then be used, adapted as necessary (see the previous paragraph).
> **7.2 Execution in a manner permitted by the local law**
> Under Regulation 4 of the Overseas Companies (Execution of Documents and Registration of Charges) Regulations 2009 the deed can be executed "in any manner permitted by the laws of the territory in which the company is incorporated for the execution of documents by such a company". ...
> **7.3 Execution by signature of authorised person(s)**
> The Regulations apply s.44(2), CA 2006 amended as follows.
> "(2) A document which:
> (a) is signed by a person who, in accordance with the laws of the territory in which an overseas company is incorporated, is acting under the authority (express or implied) of the company, and
> (b) is expressed (in whatever form of words) to be executed by the company,
> has the same effect in relation to that company as it would have in relation to a company incorporated in England and Wales or Northern Ireland if executed under the common seal of a company so incorporated." ...

For a document to be a "deed" in English law it was formerly a requirement that the document must be sealed but that is not usually now the case. The current rules of what is a deed govern the meaning of "specialty". So a seal is not usually required for an English law document to be a "specialty".[122] No particular form is necessary to be a "specialty" beyond the formalities of a deed.

The same applies in Northern Ireland.[123]

As a shorthand, a deed was formerly referred to as a document "under seal" and a non-deed as a document "under hand". This usage is now out of date (at least in England) but it is still found in HMRC Manuals.

82.16.3 *Which debts are specialties?*

The specialty situs rule requires one to ascertain whether any particular debt is a specialty, which depends on the documentation. The IHT Manual formerly offered a little guidance on some standard categories of securities:

> **27079 Bonds and debentures under seal** [February 2006]
> Debentures if under seal, are specialty debts, locally situated where the

122 The Law Commission took this view in Working Paper No. 85 (1985) and Report No. 253, para 2.12.44. Dicey agrees: *The Conflict of Laws* (15th ed., 2012), para 22-034

123 Article 3 Law Reform (Miscellaneous Provisions) (NI) Order 2005.

document is found. So, also, are debts due from the Crown, or under a statute, whether under seal or under hand, and even when they are secured by registered bonds.

Most UK government securities (e.g. Treasury Loan, Exchequer Stock, War Loan) are registered, so that their locality is determined by the place of registration. However, some bonds issued by the UK government (containing an express obligation to pay) are governed by the general rule that a debt due from the Crown is a specialty debt, situated where the document evidencing the obligation is physically found.

In *Royal Trust v AG for Alberta* [1930] AC 144, the decision related to registered bonds of the Dominion of Canada and their situation for the purpose of Alberta death duties.

27080. Treasury Bills, British Savings Bonds, National Savings Income Bonds [February 2006]

Securities falling within the specialty rule includes Treasury Bills and British Savings Bonds.

Although no actual bonds are in existence holders receive a bond book or, in some cases, a certificate. When the person beneficially entitled to these bonds is domiciled outside the UK, the bonds are regarded for Inheritance Tax purposes as situated outside the UK at any time that the bond book or certificate is situated outside the UK....

The specialty situs rule overrides the place-of-register rule: see 82.6 (Situs of registered shares).

Now the IHT Manual provides:

IHTM27080 Specialty debts: Treasury Bills, British Savings Bonds, National Savings Income Bonds [January 2014]

Treasury Bills, and British Savings Bonds are treated as specialty debts and situs will follow the normal principles (IHTM27079). Any claim that such assets should be regarded as non UK situs at a chargeable event must be referred to Technical.

National Savings Income Bonds are securities registered on the National Savings Stock Register and are situated in the UK.

Any case in which this view is challenged must be referred to Technical.

IHTM27091 Debts: contractual [January 2014]

...Any questions about the situs of specialty debts (IHTM27079) must be referred to Technical.

Corporation mortgages, issued by local authorities under seal, and Northern Irish Land Bonds are examples of specialty debts. You should be careful not to confuse corporation mortgages with corporation stock, which is far more common and which is a registered security, situated where the register is kept.

The Manual text reads confusedly, as it has not been fully rewritten consistently with the new HMRC view that there is no difference between specialty debts and simple debts. HMRC currently say this guidance is under review.[124]

82.16.4 *Isle of Man law requirements of a deed*

The position is as follows:

> While there is no doubt that seals have never been used in the Isle of Man, except by corporations, and that the formality of affixing a seal has never been, and is not now, required in order to constitute a written paper a deed, in my view for a written paper to be a deed there must be some evidence that the parties intended it to be a deed. That will normally be found in the words of the document itself.[125]

82.17 Jurisdictions without "deeds": Channel Islands & Scotland

Common law jurisdictions employ the concept of a "deed", ie

(1) They draw a distinction between:
   (a) a "deed" (a technical term meaning a document which meets some set of formal requirements of execution) and
   (b) an informal document (which does not meet those requirements).
(2) The distinction matters for various purposes, eg certain dispositions of land require a deed; limitation and situs rules differ; etc.

Both the requirements and the consequences of being a deed have varied over the years, but there is a sufficient core to yield a stable and meaningful concept. As far as I know, other jurisdictions do not have this concept or anything very closely comparable.

Jersey and Guernsey do not have the common law concept of a deed and prefer to avoid the word or (if used) to give it an express definition.[126]

Scots law does use the word "deed"[127] but not as a technical term:

> [16]... it is clear that the word "deed" has no technical meaning in Scots

---

125 *Aall Trust & Banking Corporation v Samuel McCormick* 2 OFLR 85, Butterworths Offshore Service Cases, Vol 2, p.479.

126 Kessler and Matthams, *Drafting Trusts & Will Trusts in the Channel Islands* (2nd ed., 2013), para 9.1.

127 For instance, "trust deed" (broadly defined) is used frequently in the Trusts (Scotland) Act 1921.

law. In *Henderson's Trs v IRC*, 1913 SC 987, a case dealing with the question of whether a minute of acceptance of office by trustees engrossed upon a trust disposition and settlement was a deed for the purposes of the Stamp Act 1891, ...

Lord Kinnear stated (at 990):

> "I am entirely of the same opinion, and I agree with your Lordship that for the purpose of this case the word 'deed' is a word of ordinary language, because it is not in our system a term of art. I agree also that it is unnecessary to attempt any exact definition of what the word 'deed' means; but I take the definition ... that a deed was any formal instrument which creates a legal relation".

... It is unnecessary for present purposes to attempt any definition of the word "deed". Nevertheless, I take from these cases that the significant characteristics of a deed are first that it should have some degree of formality and secondly that it must demonstrate an intention to create a legal relation.

[17] The minute of the board meeting of a company, duly signed by the chairman, is to my mind clearly a formal document. Section 382 of the Companies Act 1985 [now s.248 CA 2006]... provided ... that every company shall cause minutes of all proceedings at meetings of its directors to be entered in books kept for that purpose. The reason for that provision is that the minutes serve an important purpose in recording the formal decisions of the board, which is of course the body that is responsible for managing the company. Thus board minutes are important documents. Subsection (2) then provides:

> "Any such minute, if purporting to be signed by the chairman of the meeting at which the proceedings were had... is evidence of the proceedings".

That too indicates a degree of formality in the notion of board minutes; they may have to be relied on in future, and it is important to establish precisely what the directors decided on any particular matter. Apart from the provisions of the Companies Act, section 2 of the Trusts (Scotland) Act 1921 states that the expression "trust deed" shall mean and include "any... resolution of any corporation". That again suggests that formal resolutions taken by a company, whether in general meeting or through its board of directors, are to be regarded as documents that have the requisite degree of formality to constitute a deed. ...[128]

In short, Scots law has a concept of "deed" (albeit somewhat vague) but that is not the common law concept. The use of the same word should not

128 *Low & Bonar Pension Trustees v Mercer* [2010] CSOH 47.

be allowed to obscure the difference. Scots law does not have the concept of a "specialty".[129] Accordingly, Scots law cannot have the rule that a specialty is situate where the document is.

82.18 Conflict of law issues on specialties

82.18.1 *Situs in English law*

An English[130] court may have to determine the situs of debt governed by a foreign law. If the foreign law recognises the concept of a deed (in practice, if it is a common law jurisdiction) then it is considered:

(1) The question whether the document is a specialty is governed by the law of the document.[131]

(2) If the document is a specialty under that law, one applies the English law (common law) rule that the situs is where the document is.

It has been suggested that the specialty situs rule may only apply if the document is situate in a jurisdiction which applies the specialty situs rule. So the situs of a specialty debt would be (say) the Isle of Man if the document was there, but it would be the residence of the debtor if the document was moved to (say) Jersey or Scotland. But there is no authority which supports that, and it is clearly wrong on principle. The question of situs in an English court is decided according to English law rules and under English law an asset may be situate in (say) Ruritania even if under Ruritanian law the asset is not situate there. Those who are concerned about the point will keep the documents in a common law jurisdiction, but that is not strictly necessary.

What is the position if a document is governed by a law which does not have the concept of a deed? There is authority that the document will be a specialty if it is executed in accordance with the English law requirements of a deed.[132] But in practice if one wishes to rely on the

---

129 This is recognised in former companies act legislation; for instance, s.14(2) Companies Act 1985 provided: "Money payable by a member to the company under the memorandum or articles is a debt due from him to the company, and *in England and Wales* is of the nature of a specialty debt." There is no equivalent in the current companies legislation.

130 The same would apply in Northern Ireland.

131 In practice it would be unusual that a document which is a deed under the governing law does not meet the English law requirements for a deed, so the issue of which law applies for this purpose will not often arise.

132 *Alliance Bank of Simla v Carey* (1880) 5 CPD 429.

specialty situs rule, it is possible to avoid the issue, and chose a common law governing law, which does recognise deeds so the issue need not arise.

82.18.2 *Situs in Scots law*

If one turns to the Scots law textbooks on private international law, one finds no discussion at all on the situs of debts. Scotland did not have the jurisdiction of the Ordinary, where the common law rules arose;[133] and its private international law has managed to develop without reference to the situs of debts. I would be grateful to any reader who could direct me to relevant Scots authority if there is any.

Whatever the rule of Scots law, it seems safe to say that it does not apply the specialty situs rule as Scots law does not recognise that concept. It might apply the place-of-debtor rule: a debt is situate where the debtor resides. I would not have thought that was inevitable. The common law cases are not binding in Scotland. But in the absence of other authority, a solution which is more consistent with foreign jurisdictions seems preferable. This is the view of Dymond's death duties:

> The English specialty rule is unknown to Scottish law, so that debts owing by a person resident in Scotland, whether secured by a document under seal or not, are situate there [under Scottish law].[134]

Take the following examples; assume a specialty debt, and (if it matters) governed by English or IoM law (ie a law recognising deeds):

Case	**Specialty in**	**Debtor resident**	**Situs (Scots law)**	**Situs (English law)**
1	IoM	Scotland	Scotland	IoM
2	Scotland	IoM	IoM	Scotland

The situs of the debt (and whether it is excluded property) can hardly depend on whether the issue is litigated in England or in Scotland. It is suggested that the solution to the conundrum is to say that an asset is situated in the UK if:

(1) it is situate in England according to English law

---

133 See 82.1.2 (History and terminology of situs law).

134 *Dymond's Death Duties* (15th ed., 1973), p.1267. The same passage is found in the current Dymond's Capital Taxes with the additional qualification "at any rate if Scots law is the proper law of the debt". *Dymond's Capital Taxes* (looseleaf 1986 onwards), para 30.354. But the authors cite no authority, and have no qualifications to opine on Scots private law. If Scots law follows the common law simple debt cases, the proper law of the debt should not be relevant.

(2) situate in Scotland according to Scots law, or
(3) situate in Northern Ireland according to NI law.[135]

It is situate outside the UK if none of those apply. On that analysis the debt in case 1 is situate in the UK and the debt in case 2 is situate outside the UK. The answer in case 2 is perhaps surprising but the facts of case 2 will not often arise.

The IHT Manual provides:

> **27092 Debts in Scotland** [January 2014]
> In Scotland, the rule that a debt is situated where the debtor resides applies to both to specialty debts (IHTM27079) and to those due on simple contract. For Inheritance Tax purposes debts due from people or companies who are resident or based in Scotland are regarded as situated there.[136]

No reason is given, but the result (although surprising at first sight) is consistent with the analysis of case 1 above.

82.19 Mortgage debt

82.19.1 *The property law background*

This section considers the situs of a debt charged or secured on land (**"a mortgage debt"**). The borrower is **"the mortgagor"** and the creditor is **"the mortgagee"**.

It is not necessarily the case that all mortgage debts should be treated the same way. In English law, mortgages have a long and complex history; in other jurisdictions the nature of a mortgage will vary. The rights of the mortgagee will also depend to some extent on the documentation. However the situs cases have never investigated this, and we can proceed on the basis that all mortgages should be governed by the same situs

---

135 See to 3.13 (Child's domicile in Scotland).

136 For completeness, the passage concludes:
"If the taxpayer or agent disputes this rule, refer the case to Technical.
Any case where a Scottish instrument under seal is outside the UK and the locality of the asset determines whether or not Double Taxation Relief under s.159 IHTA applies must also be referred to Technical.
This guidance on this page relates to specialty debts generally. It covers, for example,
[1] mortgages under seal,
[2] policies under seal, and
[3] covenant debts, and
[4] also applies to debts due from the Crown, or due under a statute."

test(s).

A mortgage debt has a twofold character:

(1) It is an interest in land, conferring (at least when the debt is due and unpaid):
   (a) right to possession
   (b) power of sale
   (c) right to foreclose
(2) It is a debt, conferring a right of action against the debtor (like an unsecured debt).

In short, a mortgage debt confers a bundle of different rights. It should however be regarded as a single asset, and not as two assets. The bundle is indivisible:

> If [the mortgagee] sues on the covenant to pay he must reconvey the land on payment.[137] If he has parted with the land, otherwise than in exercise of a power of sale, he would be restrained from suing on the covenant... The result is that a mortgagee cannot assign the mortgage debt effectually without also transferring the security upon the land.[138]

Since rules applicable to land are often different from rules applicable to debts, the question of how to classify a mortgage debt has often arisen, and has been answered in different ways. That is not surprising, as a mortgage debt partakes of both qualities, and the appropriate answer has depended on the context.

At common law, on the death of an individual, real property passed to the heir and only personal property passed to the personal representatives.[139] In *Thornborough v Baker* Lord Nottingham settled that a mortgage debt is personalty, so that on the death of the mortgagee it passed to his personal representatives. The mortgagee's legal title to the land passed to the heir but he held it on trust for the PRs:

---

137 [Author's footnote] The equivalent in modern law would be a duty to support an application to the land registry to de-register the mortgage.

138 *Re Hoyles* [1911] 1 Ch 179 at p.184. Although this relates to a pre-1925 mortgage (which took the form of the conveyance of land to the mortgagee subject to a right of reconveyance) the same applies to a modern mortgage (a charge by way of legal mortgage).

139 Hence the name "personal representatives". After s.30 Conveyancing Act 1881, the mortgagee's legal title to the land passed to the PRs; but the point would still arise even now if a will gave real property to A and personal property to B: the mortgage debt would pass to B.

> for in natural justice and equity the principal right of the mortgagee is to the money, and his right to the land is only as a security for the money.[140]

On the other hand, a mortgage debt is an interest in land; a gift by will to a charity was void under the Charitable Uses Act 1735. In *Re Hoyles* the will of a testator domiciled in England gave to charity mortgage debts charged on land in Ontario. The majority of the Court of Appeal held that a mortgage debt was immovable property, at least for the purpose of the conflicts rule that succession to immovable property was governed by the law of the place where the land was. The 1735 Act applied in Ontario, so the gift was void. The principle that a mortgage debt was personal property was limited (or brushed aside):

> It is true that a mortgage is as between mortgagor and mortgagee regarded as personal estate for many purposes; ... but the fact that it is so for certain purposes in questions between our fellow subjects here has no bearing on the question whether such a mortgage should be regarded as movable or not in questions of international law. The mortgage undoubtedly affects the land directly; the mortgagee can enter and take possession at any time after his estate has become absolute at law;[141] he can by foreclosure acquire the full title to the land in fee, and the Legislature has forbidden any devises of land for any estate or interest whatsoever in any way charged or incumbered by any person or persons whatsoever in trust or for the benefit of any charitable use whatsoever and has made them void: 9 Geo. 2, c. 36, ss. 1 and 2.[142]

This was a case where the court decided the answer first and the analysis came second:

> [Counsel] invites us to leave the Mortmain Act out of sight and decide as a preliminary abstract question whether mortgages on land are movable or immovable. But we should fail in our duty if we did not consider that Act and the effect of our decision upon devises within it. We must have regard to the fact that such gifts have been regarded as prejudicial to and against the public utility and a public mischief, and we must accordingly come to such conclusion as will avoid these evils.[143]

---

140 (1675) 3 Swans 628 at 630 accessible *http://www.commonlii.org*

141 This is not the case for a mortgage under modern law.

142 [1911] 1 Ch 179 at p.187.

143 [1911] 1 Ch 179 at p.187.

82.19.2 *A principled analysis*

If one accepts (as I think one must) that a mortgage debt is one asset and not two assets, then there are three possible solutions:
(1) The asset is situate only where the land is.
(2) The asset is situate only where the debt is.
(3) The asset is dual situate.
Solution (3) must be rejected if one accepts the view in this book that one asset cannot be situate in two places.[144]

Solution (2) is the rational one. It provides a reasonable result even in a case where the debtor has no assets other than the land, so the debt is paid out of the land. An unsecured debt may be situate in state A even though the debtor's assets used to pay the debt are all in state B.

Solution (1) - that situs depends on location of the land - is not a sensible or workable rule for the following reasons:
(1) One debt may be charged on land in two different countries.
(2) The rule becomes absurd if a large debt happens to be secured on an asset of small value. Would one say a £100m debt is situate in Jersey if it is secured on a property there worth £100,000? But it is not satisfactory to have a rule where the situs depends on relative values of the debt and the security which may fluctuate from time to time.
(3) It has not, I think, been contended that a debt charged on (say) shares is situate where the shares are situate but there is no good reason to distinguish between shares and land.

82.20 Situs of mortgage debts: The case law

All three solutions have support in case law.[145] Some time the Courts will have to review the cases and decide which to prefer.

82.20.1 *Cases supporting view that situs of debt prevails*

These cases in this camp go back at least to *Commissioner of Stamps v Hope* [1891] AC 476. Here:
(1) The testator entered into a contract to sell land in New South Wales for a purchase price payable (in part) by 12 promissory notes falling due at various dates. The contract and promissory notes created

144 See 82.3 (Every asset has one situs).
145 See Hopley, "Reaping the Succession Duty Field: Mortgages and the One Local Situation Rule" (1958) 16 University of Toronto Faculty Law Review 8.

simple contract debts (not made by deed).

(2) Subsequently the purchaser granted a mortgage of the land by deed. This deed included a covenant to pay the promissory notes.

The testator died before the last promissory note was payable, so the question arose as to the situs of the debt. The Revenue argued that the testator held a simple contract debt situate where the debtor was resident (New South Wales). There was some debate about the simple contract debt had merged into the mortgage deed. Under the doctrine of merger, a simple contract debt could merge into a later deed (ie be superceded by the deed) in which case the simple contract debt ceased to exist.[146] Had that happened here then there would only have been a specialty debt. But the Court did not have to decide whether there had been a merger, as even if that had not happened, the debt was a specialty debt:

> The [mortgage] deed contains an express covenant to ... pay the promissory notes; between the same parties it was an existing security under seal, at the time of the testator's death, for the balance then due; it would continue to be a security for a much longer period, and would be attended with advantages not belonging to debt by simple contract. Although it never became necessary to act upon the [mortgage] deed by taking possession or seeking any remedy under it, it was and remained ... of full force and validity. *There is but one debt,* whether in Victoria or New South Wales; and their Lordships fail to see how it can be said that that debt has not become a debt by specialty.[147]

Since the deed was kept in Victoria, the debt was situate there. The Revenue did not argue that the situs of the land in NSW made any difference to the situs of the debt but the Court can hardly have overlooked that fact.

Toronto General Trust Corporation v The King [1919] AC 679 supports the same approach. Here a mortgage debt was represented by two duplicate deeds, one in Ottawa and one in Alberta. In such a case one cannot apply the rule that the debt is situate where the deed is situate. The Court cited *Hope* and distinguished it (there was only one deed in that case) but would otherwise have followed it. Had there been only one deed, the Court would have held the debt to be situate where the deed was.

---

146 Merger was important when there were different remedies for simple contract debts and specialties; but now the doctrine is (more or less) obsolete.

147 [1891] AC 476 at p.484

A comment of the Special Commissioner in *Hafton Properties v McHugh* also supports this view[148] and the same view has been reached in India.[149]

82.20.2 *Cases supporting view that situs of land prevails*

The starting point on this side of the fence is the decision of the Privy Council in *Walsh v The Queen* [1894] AC 144. Here there were a variety of debts owed by non-residents secured on property in Queensland. The documents were kept outside Queensland. Whether one applied the place of debtor rule or the specialty rule, the debts were not situate in Queensland. It was held that the debt should be regarded as being in Queensland up to the lower of the value of the debt and the value of the Queensland property.[150]

I have wondered if one could explain *Walsh* on the basis that it did not concern the common law situs rule. The case turned on an income tax statute (the [Queensland] Dividend Duty Act 1890) which could have operated a different situs rule. But the view that *Walsh* only concerned the Dividend Duty Act and was not a common law situs case is difficult to maintain after the probate duty case *Henty v The Queen.* Here a debt was secured on land in New South Wales. In an *obiter* comment the Privy Council said:

> according to the principles recognised by this Board in *Walsh v. Reg*. the security held by [the creditor] is as much an asset in New South Wales as the real estate there which it affects.[151]

If the court was applying the common law situs rule, the Privy Council in should have referred to *Commissioner of Stamps v Hope* (which the taxpayer cited in argument) or to other leading situs cases. Perhaps the PC thought that *Hope* was wrong and chose to ignore it since they could not overrule it. Or perhaps they thought that the debt was dual-situate.

---

148 "... the debt was a mortgage debt. Such a debt is regarded for private international law purposes ... as a speciality debt, the situs of which is to be found where the mortgage deed is to be found;" 59 TC 420 at p.426.

149 *Dharanidhar Roy v Sethi AIR* 1933 Cal 379 *http://www.indiankanoon.org/doc/959534*

150 Where the debt was secured on property in Queensland and elsewhere, there was an apportionment.

151 [1896] AC 567 at p.574.

82.20.3 *Cases supporting the view that a mortgage debt is dual situate*

Payne v R [1902] AC 552 concerned a debt charged on land in Victoria. The debtor was resident in New South Wales. The Privy Council held at p.560 (without citing authority) that the mortgage debt was an asset in New South Wales *and* tentatively suggested it was situate in Victoria too:

> The debtor as well as the testator resided in Victoria and was domiciled there. The debt, though a specialty debt in New South Wales, was a simple contract debt in Victoria. That being so, it seems to their Lordships that ... the debt was an asset in Victoria and recoverable under a Victorian probate, although it may well be that in order to discharge the mortgage probate duty would also have to be paid in New South Wales, and the debt, if recovered in Victoria, might be retained in Court until the mortgagees were in a position to discharge the mortgage.[152]

The attraction of this solution is that all the cases adopting the situs of debt approach can be reconciled with those adopting the situs of land approach. But there is only one asset which cannot be dual situate.[153] The comment in *Payne* is *obiter,* and should be dismissed as now overruled.

82.20.4 *Textbooks*

Dicey notes that in practice mortgages on land in England are usually specialties and continues:[154]

> [1] A mortgage of land confers an interest in land and will be held situate where the land is situate,[155]
> [2] but where it is necessary (e.g. for taxation purposes) to distinguish between the situs of the mortgagee's interest in land and that of the mortgagor's personal obligation to repay, then the latter (if in the form of a specialty) will be held situate where the deed is situate from time to time.[156] …
> [3] In the conflict of laws the distinction between the interest in land and the personal obligation is not normally made for the purposes of situs, and the asset is regarded as a unity which is situate in the

---

152 [1902] AC 552 at p.560

153 See 82.3 (Every asset has one situs) and 82.4 (Inconsistent case law).

154 Dicey, Morris & Collins, *Conflict of Laws*, (15th ed., 2012), para 22-035.

155 [Dicey's footnote] *Re Hoyles* [1911] 1 Ch 179.

156 [Dicey's footnote] See *Walsh v The Queen* [1894] AC 144; *Payne v R* [1902] AC 552. Also *Henty v The Queen* [1896] AC 567.

country where the land lies.[157]

Dicey's view at [1] and [3] is that the location of the land prevails. This overlooks the authorities cited above. The case cited, *Re Hoyles*, does not support Dicey. It shows that the succession law which applies to a mortgage debt is the law where the land is situate. However, it does not follow from this that the debt should be regarded as situate in that country. This is a case where succession law does not follow the situs of the asset. Situs as such is nowhere discussed in *Re Hoyles*. The suggestion at [2] is that tax law may distinguish between the mortgagee's interest in land and the mortgagees's right to payment. But the distinction is an impossible one: a mortgage debt is a single asset and not two assets.

The IHT Manual passage cited above[158] suggests that the HMRC view is (like mine) that the specialty situs rule prevails, not the location of the land.

82.20.5 *Conclusion*

It is considered that the balance of authority, and principle, both support the view that a mortgage debt is situate where the debt is and not where the land is.

82.21 Debt under letter of credit

The IHT Manual provides:

> **27091 Contractual** [January 2014]
> A debt under a letter of credit has been held to be situated in the place where it is in fact payable against documents (*Power Curber International v National Bank of Kuwait* [1981] 3 All ER 607).

In *Power Curber International*, the bank was resident in Kuwait but the debt payable in Carolina. The majority of the Court of Appeal held the debt was situate in Carolina. The decision on this point was obiter, not fully argued, and the dissenting view was the better one. But the issue will not often arise in an IHT context, as letters of credit are likely to be held by companies, so the situs of the debt will not often matter for tax

---

157 [Dicey's footnote] *Re Hoyles* [1911] 1 Ch 179; *Dicey*; cf Falconbridge, *Selected Essays on the Conflict of Laws*, (2nd ed., 1954), pp.573–580 for an acute discussion of the problem raised in this paragraph.

158 82.15.1 (Situs of specialty); note the references to mortgages in the quotation from the IHT Manual.

purposes. If it did arise, the lower courts are likely to follow the majority view of the Court of Appeal, and even the Supreme Court should prefer to maintain the stability which results from following a decision which has been unchallenged for so long. So the law should be regarded as settled.

82.22 Judgment debt

A judgment debt is situate where the judgment is recorded.[159] Obtaining judgment may therefore have the effect of changing situs, for better or worse.

82.23 Bank account

The IHT Manual provides:

> **27093 Debts: Bank accounts** [January 2014]
> A bank account is a debt, and under general law is situated at the branch of the bank where the account is kept: *R v Lovitt*[160] [1912] AC 212...

This is not a special rule for bank accounts: it is an application of the general rule that, in the case of a company carrying on business in two places, a simple debt is situate where payable; see 82.13.1 (Meaning of "residence" and dual resident debtor).

UK bank accounts may qualify for IHT relief.[161] Guidance on what constitutes a branch of a bank can be found in the discussion of branch and PE.[162]

82.24 Building society account

A standard form building society account is not a debt, it is an interest in the society, so corporation situs rules rather than debt rules should be applied.

The IHT Manual provides:

> **27151[Bank or][163] building society accounts in Channel Islands and Isle of Man** [January 2014]

---

159 *AG v Bouwens* (1838) 4 M & W 171 accessible on *http://www.commonlii.org*.

160 In the Law Reports the name of this case is: *The King v Lovitt.*

161 See 62.20 (Non-residents foreign currency bank accounts).

162 See 86.2 (Meaning of permanent establishment); 86.14 (Meaning of "branch or agency").

163 The reference to a "bank" in the heading seems to be erroneous since the text only relates to building societies.

Any case in which it is claimed that an account with a UK Building Society must be treated as situated in the Channel Islands or the Isle of Man, so it is exempt from IHT, must be referred to Technical.

82.25 Insurance policy

For the purpose of common law situs rules a policy is treated in the same way as a debt, so the place-of-debtor and specialty situs rules apply.[164] That makes sense if one bears in mind the insurance law background: a policy is in fact just a contingent debt[165] (even though in tax law one would not usually expect the word *debt* to include a policy).

The IHT Manual provides:

> **IHTM27101 Foreign Property: Money From A Life Policy: General Rule** [Jan 2014]
> When a life policy is not made by way of deed the policy monies are situated where the debtor (the company) is resident. This is generally the head office of the company.
> You can find more information on policies at IHTM20000 onwards.
> **IHTM27102 Payment Made At Place Other Than Head Office** [Jan 2014]
> Where under the terms of the policy, payment is to be made at some place other than the residence of the head office the monies are deemed to be situated at the place of payment' (*New York Life Insurance Co v Public Trustee* [1924] 2 Ch 101).
> So, if the policy proceeds are to be paid in the UK the policy proceeds are UK sited and chargeable to Inheritance Tax.
> **HTM27103 Policy Issued At Branch Office** [Jan 2014]
> The proceeds of a policy are usually taxed where they are sited (IHTM27071).
> If a policy:
> - is issued by, or through, a branch office of a UK company that is outside the UK, and
> - no reference is made in the terms of the policy as to the place where the policy monies are to be paid,

---

164 *New York Life Assurance v Public Trustee* [1924] 2 Ch 101.

165 *Foskett v McKeown* [2001] 1 AC 102 at p.134: "The word "policy" is here used to describe the bundle of rights to which the policyholder is entitled in return for the premiums. These rights, which may be very complex, together constitute a chose in action, viz, the right to payment of a debt payable on a future event and contingent upon the continued payment of further premiums until the happening of the event."

policy monies are to be treated as situated in the country of the branch office as long as the whole course of business in relation to the policy had been transacted in that country.

The 'whole course of business' means that all the following events must happen in the country of the branch office:

- The policy is issued to a resident in that country from the branch in that country.
- The holder of the policy remains resident and retains the policy there, pays the premiums to the branch there, and dies there.
- The grant of representation to the policy holder's estate is taken out there and the proceeds are collected there.

You should not assume that the policy was situated in the UK without considering all the circumstances surrounding the policy, even if, at the date of the life assured's death:

- the policy is in the UK at the Assurance Company's head office, and
- the life assured has assigned the policy to the assurance company as security for a loan.

Each case must be considered on its own facts. If a small detail prevents the conditions from being fully met this may still mean that the policy is situated outside the UK. But any case where this applies, or where the locality of the policy has to be determined before the policy holder's death must be referred to Technical.

Where a policy not made by way of deed has terms that provide for payment either at its head office or at a branch office, and the 'whole course of business', takes place in the country of the branch office, the monies are also treated as locally situated in that country.

Some of para 27103 is doubtful but the practice will normally favour the taxpayer so the issues will not often arise.

82.25.1 *Policy made by deed*

The IHT Manual provides:

> **IHTM27104 Policies Under Seal** [Jan 2014]
> Policies by way of deed or under seal are specialty debts (IHTM27079) and must be referred to Technical.

It is necessary to investigate whether policies are specialties. The IHT Manual gives a little guidance:

> Most Lloyds policies are embossed with a seal but they are not specialty debts unless they also bear the witnessed personal signature of the General Manager of Lloyds Policy Signing Office. Lloyds policies that

> do not bear this signature are chargeable to Inheritance Tax in the country where the debtor (the company) resides (IHTM27101).

HMRC currently say this guidance is under review.[166]

On IHT treatment of UK situate policies see 33.14 (IHT on policy held by foreign domiciliary).

82.26 Land

The IHT Manual provides:

> **27074 Land and interest in land** [January 2014]
> Immovable property is situated where it is actually located.

That seems self-evident; but if authority is needed, see *Haque v Haque (No 2)* (1965) 114 CLR 98 at p.136. The Manual continues with a discussion of the meaning of "land" though I do not expect that issue will arise very often:

> But, different legal systems may take opposing views as to whether some types of interest in land or relating to land are movable or immovable property.
> These differences are resolved (under Private International Law, and also by specific provision in Double Taxation Conventions where these apply) by the adoption of the view taken by the law of the country in which the land itself is 'situated': *Johnstone v Baker* (1817), 4 Madd 474; *Macdonald v Macdonald* (1932) SLT (HL) 381.
> Land is usually classed as immovable property, so is generally governed by the law of the country in which it is situated ...

82.27 Chattels

The rule is what one would expect. The IHT Manual provides:

> **27075 Chattels** [January 2014]
> ... (chattels) are situated where they happen to be at the relevant time.[167]

It is suggested that this applies even where:

(1) a chattel is moved out of the UK;
(2) the chattel is transferred to another person or trust;
(3) the chattel is returned to the UK.

---

166 See 82.15.3 (HMRC view(s)).

167 The text is found twice: IHT Manual paras 21047 [April 2012] and 27075. For a concession on works of art see 62.21 (Works of art).

The temporary removal of the asset at the time of the disposal cannot be ignored, for tax purposes, even if the time spent out of the UK is short.

82.28 Ships and aircraft

The IHT Manual provides:

> **27073 Ships** [January 2014]
> A ship on the high seas is deemed to be situated at its port of registry but when it comes within territorial waters this artificial situs is displaced by the actual situs: *Trustees Executors & Agency v IRC* [1973] Ch 254.

The situs of aircraft for IHT is, surprisingly, undecided. The choice lies between the chattel rule, the ship rule and the place of registration. In *Kuwait Airways v Iraqi Airways (Nos 4 & 5)* [!] [2002] 2 AC 833 no attempt was made even to argue for place of registration. It is suggested that the ship rule is the most sensible solution.

See now *Dornoch v Westminster International* [2009] 2 All ER (Comm) 399.

82.29 Goodwill and intellectual property

Goodwill is situate where the trade or profession is carried on (see *IRC v Muller* [1901] AC 217).

For intellectual property, see *Forster's Australia v CIT* 302 ITR 289 (AAR) 10 ITLR 939.

Because of IHT business property relief, these issues will not often arise.

82.30 Property subject to contract of sale

An interest in English land subject to a contract of sale is still situated in the UK: *Re Clore, IRC v Stype Investments* [1982] STC 625. It is suggested that a contract of sale does not affect situs.

82.31 Interest under bare trust or nomineeship

The interest of a beneficial owner in property held by a nominee or bare trustee is situate where the underlying asset is situate: a nomineeship[168] or bare trust is transparent for situs. In *Re Clore, IRC v Stype Investments* land in England (the Guy's estate) was held by a Jersey nominee (Stype

168 For present purposes the terms "bare trust" and "nomineeship" are used synonymously.

Investments):

> Immediately after the conveyance of the Guy's estate to Stype Investments and the execution of the declaration of trust which acknowledged that the Guy's estate would "continue to remain in the beneficial ownership of Sir Charles," the Guy's estate belonged in equity to Sir Charles in fee simple and his interest constituted property situate in England. Stype Investments was entitled to be paid any outgoings or charges in respect of the estate, but this entitlement did not affect the nature, quality or situation of the interest of Sir Charles in the estate.[169]

The position is different for unit trusts[170] and intermediated securities[171] which are not straightforward bare trusts and best not described as bare trusts at all.[172]

82.32 Equitable interest under a substantive trust

The situs of an equitable interest under a substantive[173] trust is not often relevant for IHT, but it may matter, eg where a reversionary interest is not excluded property for IHT.

82.32.1 *Baker trusts*

An equitable interest under a *Baker* type trust (ie English law or a jurisdiction following English trust law principles)[174] has a twofold character:

(1) It provides rights enforceable against the trustee

(2) It is an interest in the trust property.

There are many connecting factors which might be used to attribute a situs to an equitable interest, and the courts have not had to consider all possible permutations. *Favorke v Steinkopff* [1922] 1 Ch 174 concerned an English law will trust, with English trustees, but German situate property; the equitable interests of an annuitant, life tenant and remaindermen were held to be situate in England. It is suggested that an equitable interest is in

---

169 [1982] STC 625 at p.633-4.

170 See 39.5 (Situs of unit).

171 See 40.3 (Situs of transparent intermediated security for IHT).

172 See 84.5.1 (Definition(s) of bare trust and associated terminology).

173 By "substantive" I mean a trust other than a bare trust (nomineeship) or unit trust.

174 For the trust law background, see 26.3 (Taxation of life tenant); 26.8 (Baker or Garland trust jurisdiction?).

principle situate where the trustees are resident. If the trustees are resident in different jurisdictions, situs would be determined by an exclusive jurisdiction clause if there is one, or failing that, by the proper law.[175]

This is consistent with the rule that the equitable interest is classified as moveable (not immovable) property. The High Court of Australia said:[176]

> The mere fact that there is land subject to the trust would not result in the beneficiary's interest in the fund being an immovable in the place where the land is situated. The interest in the fund is situated in the country which is the forum of administration of the trust or whose law is the proper law of the trust: *Ewing v. Orr Ewing* (1883) 9 App Cas 34.

There is a sound basis to say that situs of the assets of the trust fund is not relevant to the situs of the equitable interest. If the trust assets are situate in different jurisdictions it would be impossible to ascertain the situs of the equitable interest (if the equitable interest is regarded as a single asset). An equitable interest such as a life or reversionary interest should not be regarded as several separate interests in as many assets as are held by the trustees. Such an equitable interest is generally regarded as one asset and not as many assets as there are items of trust property.

Where the equitable interest is a power of revocation the position is even clearer. Where the equitable interest is an annuity, it would often be impossible to locate the annuity by reference to the situs of the trust assets, because one cannot identify any particular trust asset and say that asset is (to any fixed extent) the source of the annuity.

82.32.2 *Garland trusts*

An interest under a Scots law or other *Garland* type trust is not an interest in the trust property, so the situs of the trust property is irrelevant to situs.

82.33 Unadministered estate of deceased person

The IHT Manual provides:

> **27072 Unadminstered estates or shares therein** [January 2014]
> In general, a person who takes an absolute interest in the residue of an estate is entitled, not to the assets **of the testator, but to a right of**

175 For a contrary view see Harris, *The Hague Trusts Convention*, (2002), Chapter 9 (Situs of equitable interests) and Dicey *The Conflict of Laws* (15th ed., 2012), para 22-048 (Interests under trusts).

176 *Haque v Haque (No 2)* [1965] HCA 38; (1965) 114 CLR 98 Menzies J at [2].

> **action**, enforceable against the executors. This is the case under English law and many other legal systems.[177]
> This means the executors must administer the estate and transfer the clear residue, or a share of it to the beneficiary. The same rule applies in the case of intestacy.
> This is a similar rule to the **ius crediti** to which a beneficiary is entitled in Scotland.

The chose in action is situate where it is enforced, ie where the executors are. The situs of the assets of the estate is not relevant. See *CSD v Livingston* [1965] AC 694. The IHT Manual continues:

> But, for IHT, the deceased is treated as having a direct interest (in the whole or a share) in the net assets of the residuary estate. See IHTM22031[178]
> For this reason you must consider the situs of each of the underlying assets separately.
> For example, the excluded property provisions in s.6(2) IHTA may apply to qualifying securities included in the unadministered estate (IHTM04260)

82.34 Situs of partnership share

The situs of a partnership share may not matter for IHT, because of BPR, but the issue will sometimes arise.

82.34.1 *Partnerships (except LLPs)*

An interest in a partnership is an asset (a chose in action) distinct from the assets of the partnership.[179] It has its own situs distinct from the situs of the partnership assets.

There are several factors that the court might have used to determine situs. In practice the situs of an interest in a partnership is the place where the partnership business is carried on.[180] I refer to that as **"the place-of-business situs test"**.

The place where the partnership business is carried on is not necessarily

---

177 Author's Note: Further consideration will be required for jurisdictions other than England and Wales, especially civil law jurisdictions.

178 See s.91 IHTA.

179 See 11.34.1 (The partnership law background).

180 See *Laidlay v Lord Advocate* (1890) 15 App Cas 468, followed *Commissioner of Stamp Duty v Salting* [1907] AC 449.

the place where the partners reside: there is no concept here of carrying on business by tacit oversight.[181] The law of the partnership is not relevant.

If a partnership is carrying on two businesses in two different places, the place-of-business situs test does not work. This arose in *Beaver v Master in Equity* [1895] AC 251 where the partnership had three businesses, in London, Melborne and Adelaide. The solution adopted was that the partnership businesses were situate in different places; the Melborne business was therefore situate in the state of Victoria. The distinction between one single business and two separate businesses could be somewhat fragile. The issue will not often arise, except, possibly, in some tax planning contexts.

82.34.2 *Situs of share in partnership holding land*

This section considers the position where the partnership assets include land.

Dicey states (tentatively) that "A share in land belonging to the partnership may however be situate where the land is situated."[182] But there is only one case which takes that view. It is unjustified in principle as a partnership share is one asset. "An interest in a partnership is not to be fragmented into as many different interests as the partnership has assets with the consequence that each fragment should be treated as located where the asset with which it is concerned might happen to be".[183] It is also out of line with the authorities. The law is correctly summarised in *Livingston v Commissioner of Stamp Duties:*[184]

> the local situation of the interest in the partnership as a whole being considered in law to be where the business is carried on, so also is the partner's interest in a partnership asset: *In the Goods of Ewing*.[185] In the leading cases of *Laidlay v Lord Advocate*,[186] *Beaver v Master in Equity*[187] and *Stamp Duties Commissioner v Salting*,[188] it occurred to no

186 (1890) 15 App Cas 468.

187 [1895] AC 251.

188 [1907] AC 449.

> one to distinguish for the purposes of locality between the interest in the partnership and the interest in the assets; and indeed in *Beaver v Master in Equity* the emphasis given by the Privy Council to the fact that the business of the partnership in Melbourne was a distinct business from others which the partnership carried on in London and Adelaide indicates that the partner's interest in the Melbourne assets would not have been treated as situate there if there had been only a single business and that had been carried on in London. There is a case in the Supreme Court of Canada in which the contrary view was taken by a majority of the Court, but, with respect, I would prefer the dissenting judgment of Anglin J: *Boyd v AG for British Columbia*.[189]

This is consistent with the rule that even if partnership assets include land, a partnership share is classified as:
(1) moveable (not immovable) property[190] and
(2) personal (not real) property.[191]
If the partnership business is letting land in the UK, it will be a business carried on in the UK and so the partnership interest is UK situate. If that is right, partnerships (unlike companies) cannot easily be used to transfer situs of property outside the UK.

It follows that the existence of a partnership may be important for situs, as the interest of a co-owner of land (in the absence of partnership) is situate where the land is situate.

82.34.3 *Situs of LLP*

A LLP is a body corporate. The situs of a member's interest in a LLP for the purposes of private international law will be determined by the rules applying to companies.

For IHT purposes, however, s.267A IHTA provides:

> For the purposes of this Act and any other enactments relating to inheritance tax—

---

189 (1917) 36 DLR 266.

190 *Re Stokes* (1890) 38 WR 535, 62 LT 176, 6 TLR 154; *Haque v Haque (No 2)* [1965] HCA 38; (1965) 114 CLR 98 Menzies J at [2] sets out the majority view.

191 Until 1996 it was clear that a partnership interest was personalty, as there was a common law rule to that effect codified in s.22 Partnership Act 1890. The Trusts of Land and Appointment of Trustees Act 1996 misguidedly repealed s.22 in England, leaving English law confused but probably unaltered. (Section 22 continues to apply in Scotland). But whatever the effect (if any) of the repeal of s.22, it does not affect situs.

> (a) property to which a limited liability partnership[192] is entitled, or which it occupies or uses, shall be treated as property to which its members are entitled, or which they occupy or use, as partners...

A foreign LLP is not a LLP for this purpose[193] and references to a LLP in the discussion here are to a UK LLP.

Section 267A deems the LLP's property to be property to which its members are entitled *as partners*. It does not deem the partners to be directly entitled to the assets: it puts a LLP in the same position as a conventional partnership. The CIOT correctly say:

> The general intention of s.267A IHTA 1984 would appear to be to treat LLPs as though they were general partnerships for IHT purposes, and the wording of the section would seem to be sufficiently clear to achieve this.[194]

It follows that the place-of-business situs test determines the situs of an interest in a LLP as for a general partnership.

The test does not work if the partners are not carrying on a business. In the case of a general partnership, this situation cannot arise. A partnership only exists while partners are carrying on a business. If at any time they do not do so, there is no partnership:[195] the arrangement is classified as joint ownership. A LLP which ceases to carry on a business is still a LLP. It is considered that for IHT purposes the partners are then treated as joint

---

192 For the meaning of "limited liability partnership" see 41.8.1 (Definition of LLP).

193 See 41.8.1 (Definition of LLP); 84.19 (Foreign limited liability partnership). HMRC agree: See ICAEW Tax Faculty, CIOT and STEP, "IHT Business Property Relief – Interests in Partnerships/LLPs and Surplus Cash Holdings" (2014) para 15: "We confirm that s.267A IHTA 1984 relates solely to UK LLPs." *http://www.tax.org.uk/Resources/CIOT/Documents/2014/01/140106%20Taxguide%20BPR%20and%20LLPs.pdf?j=577452&e=kessler@kessler.co.uk&l=346_HTML&u=13990635&mid=1062735&jb=0*

194 See 41.8.1 (Definition of LLP). HMRC agree: See ICAEW Tax Faculty, CIOT and STEP, "IHT Business Property Relief – Interests in Partnerships/LLPs and Surplus Cash Holdings" (2014) para 15: "We confirm that s.267A IHTA 1984 relates solely to UK LLPs." *http://www.tax.org.uk/Resources/CIOT/Documents/2014/01/140106%20Taxguide%20BPR%20and%20LLPs.pdf?j=577452&e=kessler@kessler.co.uk&l=346_HTML&u=13990635&mid=1062735&jb=0*
ICAEW ref: TECH 01/14 TAX

195 Section 1 Partnership Act 1890.

owners.

The IHT Manual provides:

> **IHTM25094 Limited liability partnerships** [Jan 2008]
> [1] The effect of [s.267A] is that we look through LLPs so that they will be treated in the same way as traditional partnerships. The result of this is that:
> - Where a traditional partnership incorporates itself as a LLP, a partner's period of ownership for the purposes of qualifying for business (or agricultural) relief will not be regarded as being interrupted.
> - The normal reliefs and exemptions available to partners in a traditional partnership will also be available to members of a LLP...
>
> [2] A further change is that an interest in a LLP is deemed to be an interest in each and every asset of the partnership, while an interest in a traditional partnership is a 'chose in action', valued by reference to the net underlying assets of the business.
> [3] This may require you to consider issues of situs of property. In cases of doubt refer to Technical Group (TG) for advice.

Paragraph [2] is terse. It floats the suggestion that a LLP is treated as co-ownership (rather than partnership) for IHT purposes, specifically for valuation, and (logically) for other purposes. But that is wrong and in practice HMRC do not apply that approach in relation, for instance, to BPR (which is considered later in the same paragraph of the Manual). I would be surprised if HMRC seriously argue that the test for situs of an interest in a LLP is different from the test for situs of an interest in a general partnership; I do not think that para [3] should be read as expressing a view on that question, beyond the suggestion to refer difficulties on to TG.

The IHT Manual passage goes on to make some controversial comments on LLPs and BPR, but that takes us too far from the themes of this book to pursue here.

82.35 Situs of pension and death benefits

Death in service benefits payable in respect of service under the Crown, local authorities or overseas governments are generally payable at discretion and so not liable to IHT. However the situs does matter in the exceptional case where the benefit is an asset in the estate of the deceased.

Section 153(2) IHTA provides:

> (2) For the purposes of this Act—

(a) a pension paid under the authority of a scheme made under section 2 of the Overseas Pensions Act 1973 which
  [i] is constituted by the Pensions (India, Pakistan and Burma) Act 1955 or
  [ii] is certified by the Secretary of State for the purposes of this section to correspond to the said Act of 1955
  shall be treated as if it had been paid by the Government of India or the Government of Pakistan (according as the arrangements in pursuance of which the pension was first paid under the said Act of 1955 were made with the one or the other Government);

(b) a pension paid out of any fund established in the UK by the Government of any country which, at the time when the fund was established, was, or formed part of, a colony, protectorate, protected state or UK trust territory shall, if the fund was established for the sole purpose of providing pensions, whether contributory or not, payable in respect of service under the Government be treated as if it had been paid by the Government by which the fund was established;

(c) a pension paid out of the Central African Pension Fund established by section 24 of the Federation of Rhodesia and Nyasaland (Dissolution) Order in Council 1963 shall be treated as if it had been paid by the Government of a territory outside the UK; and

(d) so much of any pension paid to or in respect of any person under—
  (i) the scheme which by virtue of subsection (3) of section 2 of the Overseas Pensions Act 1973 is constituted under that section by section 2 or subsection (2) of section 4 of the Overseas Service Act 1958 or
  (ii) such other scheme made under section 2 of the Overseas Pensions Act 1973 as is certified by the Secretary of State for the purposes of the Taxes Act to correspond to section 2 or subsection (2) of section 4 of the Overseas Service Act 1958
  as is certified by the Secretary of State to be attributable to service under the Government of an overseas territory shall be treated as if it had been paid by the Government of that territory.

(3) ... for the purposes of subsection (2) above—

(a) "pension" includes a gratuity and any sum payable on or in respect of death, and a return of contributions with or without interest thereon or any other addition thereto;

(b) "UK trust territory" means a territory administered by the

Government of the UK under the trusteeship system of the United Nations;

(c) "overseas territory" means any country or territory outside the UK;

(d) references to the Government of any such country or territory as is mentioned in paragraph (b) or (d) of that subsection include a Government constituted for two or more such countries or territories and any authority established for the purpose of providing or administering services which are common to, or relate to matters of common interest to, two or more such countries or territories.

(4) If, by reason of Her Majesty's Government in the UK having assumed responsibility for a pension, allowance or gratuity within the meaning of section 1 of the Overseas Pensions Act 1973 payments in respect of it are made under that section, this section shall apply in relation to the pension, allowance or gratuity, exclusive of so much (if any) of it as is paid by virtue of the application to it of any provisions of the Pensions (Increase) Act 1971 or any enactment repealed by that Act, as if it continued to be paid by the Government or other body or fund which had responsibility for it before that responsibility was assumed by Her Majesty's Government in the UK.

The important effect of this is that the pension (defined to include a death benefit) is not UK situate if it is treated as payable by a foreign government. The IHT Manual provides:

IHTM17058 Pensions: IHT charges: Crown, local authorities and overseas governments [May 2013]

Death in service benefits payable in respect of service under the Crown, local authorities or overseas governments are generally (but not always) payable at the discretion of the pension provider (IHTM17051), so they are not liable to Inheritance Tax.

The following guidance is only general and will not cover every situation. Scheme rules may change and you should check the latest position or ask for advice from Technical. ...

Overseas Service

Sums payable on death to personal representatives by way of return of subscriptions under the regulations of:

- the Indian Military Widows and Orphans Fund;
- the Superior Services (India) Family Pension Fund
- the Indian Military Service Family Pensions Fund; and
- the Indian Civil Service family pension fund

Are not included as part of the estate (IHTA84/S153 (1)).

A lump sum payable on death to personal representatives under a scheme constituted under the Pensions (India, Pakistan and Burma) Act 1955 or a corresponding scheme (a foreign asset by virtue of S153 (2)(a) is part of the estate if the deceased died domiciled (IHTM13000) in the UK. It is excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.

Benefits payable to personal representatives as of right on death of a Colonial Government servant (a foreign asset under S153 (2)(b) are part of the estate if the deceased died domiciled in the UK). They are excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.

Benefits payable under s.1 Overseas Pensions Act 1973 other than 'statutory increases' thereof (a foreign asset by virtue of S153 (4) and S153 (2)(b)) are part of the estate if the deceased died domiciled in the UK. They are excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.

Benefits payable out of the Central African Pension Fund (a foreign asset by virtue of S153 (2)(c)) are part of the estate if the deceased died domiciled in the UK. They are excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.

Lump sum payable on death to personal representatives as of right under a scheme constituted under the Overseas Service Act 1958, or a corresponding scheme (a foreign asset by virtue of S153 (2)(d)) are part of the estate if the deceased died domiciled in the UK. They are excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.

82.36 Reform of IHT/CGT situs rules

Amendment of situs rules for IHT purposes is difficult because of the problem of double inheritance taxation. To the extent that different states adopt the same common law situs rules, they effectively prevent double taxation which otherwise arises if state A regards an asset as situate in state A for IHT purposes and state B regards the same asset as situate in state B. That explains why in 1974 CTT (now IHT) adopted the common law situs rules and not the CGT statutory situs rules. The disparities between CGT and IHT situs are not accidental.[196]

196 It could of course arise that state A regards an asset as situate in state A for CGT purposes and state B regards the same asset as situate in state B; however that is not likely to cause problems in practice, because (in short): (1) a non-resident does not usually pay CGT so double capital gains taxation does not usually arise; (2) a DTA

Two reforms would improve the position:

(1) Treat all assets other than UK land and securities as non-UK situate for the purposes of IHT (and also CGT). That would be a simplification and it is most unlikely that the IHT (or CGT) charge on such assets of foreign domiciliaries brings in any significant tax. There is a precedent in the abolition of stamp duty on UK situate property (other than securities and land).

(2) A counterside would be to introduce a charge on UK private residences held via non-resident close companies.[197]

following the OECD model convention will normally resolve the problem if it does arise.

197 See 75.45.6 (Some ways forward).

CHAPTER EIGHTY THREE

SITUS OF ASSETS FOR CGT

83.1 Situs of assets for CGT – Introduction

This chapter deals with situs of assets for CGT. Strictly one should not refer to situs in the abstract, but to situs for a specific purpose (CGT , IHT, or whatever) but the context may supply the reference, and in this chapter references to situs means situs for CGT purposes.

See 82.1 (Concept(s) of situs).

83.1.1 *Cross references*

The following topics are dealt with elsewhere, see:

39.5.2 (Situs of unit for CGT)
41.7 (Transparency of partnership for CGT)
82.12 (Securities of international organisations)
40.1 (Intermediated securities).

83.2 Meaning of "shares" and "debentures"

The CGT situs rules make specific provision for shares and debentures, so it is necessary to consider the meaning of these terms.

The meaning of debenture is particularly important, because there is an significant distinction for CGT situs between:

(1) Debts which are not debentures, whose situs is generally the residence of the creditor.[1]
(2) Debts which are debentures, whose situs is:
    (a) UK if issued by UK incorporated company, or
    (b) if registered and issued by a non-UK incorporated company, the place of the register.

---

1 See 83.9 (Debt situs rule).

There are two statutory provisions which relate to the definitions but they are of very limited scope. It is convenient to mention them first to clear them out of the way.

83.2.1 Company with no share capital

Section 275(2)(a) TCGA provides:

> In subsection (1) above—
>
> (a) in paras (d), (da) and (e), the references to shares or debentures, in relation to a company that has no share capital, include any interests in the company possessed by members of the company, ...

In UK company law the only type of company with no share capital is a company limited by guarantee. There are also foreign entities which are classified as companies for tax purposes which have no share capital, but I cannot think of any to which s.275(2)(a) is likely to be significant.

So far as it concerns *shares* the rule makes sense up to a point. In short, the rule is that "shares" includes the interest of members of a guarantee company. The only puzzle is why the rule is needed. In practice the situs of interests in guarantee companies will rarely if ever arise. A provision of this kind is quite common in tax.[2] The rule was enacted in other areas to prevent avoidance and perhaps the drafter put it in here without much thought as to whether it was actually needed.

I do not understand why the statutory provision refers to *debentures* and suspect the drafter may be under a misapprehension here. A debenture is a right against the company, not an interest in the company. Whether the company has a share capital is (in the absence of the definition) highly relevant in deciding whether an asset is a "share" but it is wholly irrelevant in deciding whether an asset is a "debenture". I would be grateful to any reader who could offer an explanation. In practice it does no harm.

83.2.2 *Securities issued by non-company*

Section 275(2)(b) TCGA provides:

> in paras (d) and (e), the references to debentures, in relation to a person other than a company, include securities.

---

2 There are too many to list; see for instance s.135(4)(5) TCGA.

This assumes that (in the absence of this definition) securities issued by a non-company would not be, or may not be, debentures. I think that is doubtful. The term "debenture" is normally used in the context of companies, but the concept is not restricted to companies.[3]

Section 275(1)(d) refers to debentures issued by a government authority.[4] Treasury gilts, though "securities" are not normally called "debentures" so perhaps the provision is useful to avoid doubt.

Similarly, other non-companies, such as trusts or individuals, can in theory create "securities" and if such assets might not be regarded as "debentures" then this provision could be needed (though in practice this does not happen).

While unnecessary, this provision does no harm.

83.2.3 *Change from "securities" to "debentures"*

Before 2005 the legislation referred to "securities" where it now has the word "debentures." HMRC explained the reason for the change:

> The scope of the existing rules in s 275 which apply in relation to securities will be extended so that they apply in relation to debentures - this means, for example, that ... all registered debentures (rather than just those which are securities) of a company which is not incorporated in the UK will be treated as being situated where they are registered ...[5]

HMRC were concerned that there might be a debenture which was not a security. One might have thought that any debenture must necessarily be a security.[6] Perhaps the point is that a "security" in the expression "debt on a security" must be marketable; a debt which is not assignable, or which is repayable on demand, is not a "debt on a security" as it is not marketable. A debenture might be unmarketable and so not a security in that sense, and so perhaps not a security for the purpose of the pre-2005

---

3 See Gower and Davies, *Principles of Modern Company Law* (7th ed., 2003), p.806: "The word "debenture" is not restricted to securities of companies or bodies corporate. Clubs not infrequently issue debentures and the name may even be applied to bonds issued by an individual; eg to those issued by the Tichborne Claimant..." This passage is not in the current edition but the point is sound.

4 See 83.4 (Municipal and government securities).

5 BN 36, 16 March 2005.

6 Contrast s.738 CA 2006: "In the Companies Acts "debenture" includes debenture stock, bonds and any other securities of a company..."

situs rules.[7]

The reform raises the question of whether an asset could be a security but not a debenture; if there were such an asset the effect of the 2005 reform was to take it outside the scope of the statutory situs rules applicable to debentures, which was not intended! The better view is that any registered debt security is a debenture so this problem does not arise.

83.2.4 *Meaning of "debenture"*

In the absence of applicable statutory guidance, the word "debentures" should be given its normal meaning. It is a wide and somewhat vague term:

> If we begin by asking what the word "debenture" means, apart from any definition, the reply must be that it has no precise meaning. Chitty J. observed in the case of *Levy v Abercorris Slate and Slab Co.*,[8] that the word "means a document which either creates a debt or acknowledges it, and any document which fulfills either of these conditions is a debenture." ... Sir Nathaniel Lindley had previously stated simply, "What the correct meaning of 'debenture' is I do not know": *British India Steam Navigation Co. v IRC*.[9] In *Lemon v Austin Friars Investment Trust*[10], the same ignorance was professed in the Court of Appeal. Warrington LJ in particular, after observing that it had been said "by a wiser man than himself" that it was impossible to give an exhaustive definition of the word "debenture," went on to remark that he did not propose to incur the reproach of venturing where wise men fear to tread. The textbooks are agreed at least in this that no accurate definition of the word can be found.[11]

Company law draws a distinction between an ordinary debenture and debenture stock:

> Debenture stock is merely borrowed capital consolidated into one mass for the sake of convenience. Instead of each lender having a separate bond or mortgage, he has a certificate entitling him to a certain sum, being a portion of one large loan; and generally debenture stock differs

---

7 The concern that a debenture may not be a "security" is also found in s.251(6) TCGA: "... a debenture ... shall be deemed to be a security (as defined in section 132) if..."

8 (1887) 37 Ch D 260.

9 (1881) 7 QBD 165.

10 [1926] 1 Ch 1.

11 *Knightsbridge Estates Trust v Byrne* [1940] 1 AC 613 at p.621.

from a debenture in form rather than in substance.[12]

No-one doubts that debenture stock is within the general meaning of "debentures".

In the following discussion, I use the word **"securities"** to mean either shares or debentures.

83.3 Co-owned assets

Section 275C TCGA provides:

> (1) This section applies for determining for the purposes of this Act—
> (a) the situation of an interest (see subsection (4)) in an asset, or
> (b) whether the situation of an interest in an asset is in the UK.[13]

"Interest" is normally a wide term, but s.275C(4) defines it narrowly:

> In this section "interest", in relation to an asset, means an interest as a co-owner of the asset (whether the asset is owned jointly or in common and whether or not the interests of the co-owners are equal).

I refer to this as **"co-ownership interests"**. Section 275C applies to co-owned assets of all kinds but the most important cases are co-owned securities and debts.

Section 275C goes on to lay down two rules which govern situs of co-ownership interests:

> (2) The situation of the interest in the asset shall be taken to be the same as the situation of the asset, as determined in accordance with subsection (3) below.
> (3) The situation of the asset for the purposes of subsection (2) above shall be determined on the assumption that the asset is wholly-owned by the person holding the interest in the asset.

I refer to these as **"the co-ownership situs rules"**.

At first sight it is hard to see the point of these rules. If an asset is situate in a jurisdiction, one would expect a co-ownership interest to be situate in the same place and a statutory provision to that effect seems unnecessary.

However, s.275 stipulates the situs of shares, debentures, debts, etc and it might be argued that a person who owns a co-ownership interest in a

---

12 *Re Herring* [1908] 2 Ch 493 at p.497.

13 Paragraph (b) is otiose since the matter is fully covered by (a); but it does not matter.

share, debenture, debt, etc does not own a share, debenture, debt, etc; so it might be argued that these statutory situs rules do not apply to co-ownership interests. Hence s.275C(2) has a role to play.

Section 275C(3) is needed where situs depends on the residence of the owner and the asset is co-owned. For instance, if a debt or a ship is jointly owned by two persons, one UK resident and one non-resident, the interest of the UK resident is regarded as UK situate and the interest of the non-resident is regarded as non-UK situate.

The CG Manual provides:

> **CG12470 interests of co-owners** [January 2010]
> ...Assets held by a partnership, in which the partners therefore each have an interest, are within the scope of this provision.

83.4 Municipal and government securities

Section 275(1)(d) TCGA provides:

> shares or debentures[14] issued by any municipal or governmental authority, or by any body created by such an authority, are situated in the country of that authority.

The CG Manual provides:

> **12440 Location of assets: Shares and securities** [January 2010]
> [The Manual sets out s.275(1)(c) and continues:] This applies to shares and securities issued by such bodies whether they are in registered form or in bearer form.

83.5 Securities of UK incorporated company

Section 275(1)(da) TCGA provides:

> Subject to para (d) above, shares in or debentures of a company incorporated in any part of the UK are situated in the UK.

This rule prevents CGT remittance basis planning for UK incorporated companies by use of bearer shares and foreign share registers. That was common practice before 2005. The spur to the 2005 reform was probably *Chandrasekaran v Deloitte & Touche* [2004] EWHC 1378 which discussed and raised the awareness of this planning.

---

14 For the meaning of "debentures" see 83.2.2 (Securities issued by non-company).

83.6 Registered securities: Non-UK company

Section 275(1)(e) TCGA provides:

> subject to paras (d) and (da) above, registered shares or debentures are situated where they are registered and, if registered in more than one register, where the principal register is situated.

This applies to shares and debentures of foreign incorporated companies but not UK incorporated companies. It (more or less) restates the common law rule.[15]

The CG Manual provides:

> **12440 Types of asset (2): Shares and securities etc** [January 2010]
> *Shares and securities*
> ...Registered shares and securities[16] other than those dealt with in the previous two paragraphs are situated where they are registered. This will normally be in the country where the company was incorporated. If they are registered on more than one register then they are located where the principal register is located, Section 275(1)(e) TCGA 1992. Which register is the principal register is a question of fact.

83.7 Bearer shares

Bearer shares of non-UK incorporated companies are governed by the common law rule.[17] They are situate where the document is situate.

83.8 Bearer debentures: Non-UK company

What is the position for bearer debentures? Unless one of the statutory situs rules applies, the common law rule will apply and the debenture will be situate where the document is situate. Two statutory rules need consideration: the debt situs rule and the UK-law rule.

83.8.1 *Does debt situs rule apply to bearer debentures?*

Section 275(1)(c) TCGA (the debt situs rule) provides:

> subject to the following provisions of this subsection, a debt, secured or unsecured, is situated in the UK if and only if the creditor is resident

---

15 See 82.6 (Situs of registered shares).

16 Following the 2005 reforms, the reference to securities should strictly read "debentures" as that is now the statutory term. But it makes no difference.

17 See 82.8 (Bearer documents and negotiable instruments).

in the UK.[18]

Debenture stock is not a debt[19] so the debt situs rule does not apply to debenture stock.[20]

An ordinary debenture (not debenture stock) is a debt in the normal sense of the word. At first sight it seems that the debt situs rule applies, so a bearer debenture is situate where the creditor is resident. If that were right the situs of the document of a bearer debenture would never determine situs. However it is considered that the context of s.275, the reference to a debt in the debt situs rule means a simple debt and not a debenture. The debt situs rule does not apply to any debentures.

HMRC agree. The CG Manual provides:

> **CG12440 Types of asset (2): Shares and securities etc** [January 2010]
> *Shares and securities*
> ... The Companies Acts allow companies to issue 'share warrants to bearer' or 'stock warrants to bearer' provided the company's Articles of Association allow it. These are commonly called bearer shares and securities. The name of the owner of such bearer securities is not recorded in the register of the company. They can be sold without any necessity to notify the company. The holder of the warrant is entitled to receive payment of dividends and, provided certain conditions are complied with, to vote at general meetings.
> The location of bearer securities issued by any body other than
> • a municipal or governmental authority or
> • any body created by such an authority, or
> • a company incorporated in the UK
> is not covered by a specific capital gains rule. Therefore it has to be decided in accordance with general law, see CG12420-CG12421. General law provides that such securities are located where the certificate is located. As for chattels, the location can change if the certificate is moved in or out of the UK.

---

18 See 83.9 (Debt situs rule).

19 For the meaning of "debenture stock" see 83.2.4 (Meaning of "debenture"). A person who holds debenture stock is not a creditor: *Re Dunderland Iron Ore* [1909] 1 Ch 446. So the asset is not a "debt".

20 Against this, it might be argued that the co-ownership situs rule applies so the situs of the debenture stock is the situs of the underlying debenture. But it is considered that (1) the co-ownership situs rule does not apply in this case and (2) even if it does, the situs of the underlying debenture is not governed by the debt situs rule as the underlying debenture is not a debt for the purposes of that rule.

83.8.2 *Does UK-law rule apply to bearer securities?*

A debenture is an intangible asset and if it is "subject to UK law" (as widely defined) then in principle it appears that the UK-law rule applies, and the debenture will be UK situate.[21]

The CG Manual does not refer to the UK-law rule. One might argue that the reference to an intangible asset in s.275A means intangible assets other than debentures, in which case a debenture of a foreign incorporated company is not UK situate even if it is subject to UK law. This appears to be the HMRC view since the Manual passage above says that the location of bearer securities "is not covered by a specific capital gains rule".

83.8.3 *Planning implications*

Remittance basis taxpayers will generally avoid investing in debentures which are UK situate for CGT purposes. Non-UK incorporated companies who issue debentures and want their investors to include remittance basis taxpayers will in principle wish to ensure that their debentures should not be UK situate for CGT purposes.

To achieve this:

(1) The debenture could be registered and the register kept outside the UK; in that case the position is clear.
(2) The debenture could be a bearer instrument and
    (a) kept outside the UK and
    (b) not "subject to UK law" (as defined) though that may not be necessary.

83.8.4 *Situs of corporate securities: Commentary*

The combination of statutory and common law rules for securities of non-UK incorporated companies is intricate and sometimes impractical. It has never been thought through. It is suggested that *all* corporate securities should be situate in the place of incorporation of the company. That would be logical, and a simplification, with no loss of tax.

83.9 Debt situs rule

A debt is in some cases a chargeable asset for CGT, so its situs may be relevant for CGT. Section 275(1)(c) TCGA provides:

---

21 See 83.13.4 (The UK-law rule).

> subject to the following provisions of this subsection, a debt, secured or unsecured, is situated in the UK if and only if the creditor is resident in the UK.

I refer to this as **"the debt situs rule"**. This reverses the common law rule (under which a simple debt is situate where the *debtor* is situate).

A debt is UK situate if the creditor is dual-resident.

This provision overrides the UK-law rule and common law rules such as the specialty rule and the bearer security rule. However, it is subject to the rules relating to:

(1) debentures;
(2) judgment debts;
(3) bank accounts.

83.10 Judgment debt

Section 275(1)(k) TCGA provides:

> a judgment debt is situated where the judgment is recorded.

The CG Manual explains:

> **12430 Types of asset (1): Land, tangible property and debts** [November 2012]
> Judgment debts, that is, debts created by the judgments, decrees, etc, of courts of record, are located where the judgment is recorded, Section 275(1)(k) TCGA 1992.

Obtaining judgment may have the effect of changing situs.

83.11 Debt rules: Commentary

The effect of the debt situs rule is generally[22] to disapply the CGT remittance basis for debts, because a debt owned by a remittance basis taxpayer is deemed UK situate so the gain from the debt is taxed on an arising basis. That is anomalous, counter-intuitive and a trap for the ill advised foreign domiciliary. I can see no good reason for the rule and it is suggested that s.275(1)(c) should be replaced by a statutory rule that a debt is situate where the debtor is resident (applying the UK tax definition of residence). This would bring CGT and IHT into line.

It is considered that there is no point in a separate rule for judgment debts, and s.275(1)(k) should be repealed. That would be a small but

---

22 An exception is if the individual disposes of the debt while temporarily non-resident.

worthwhile simplification. The statutory rule is based on the common law rule, but that is no reason to retain it.

But the best solution is to look at the wider picture altogether: treat all assets other than UK land and securities as non-UK situate for the purposes of IHT and CGT.[23] The debt situs rule and judgement debt rule would fall by the wayside.

83.12 Bank account

A foreign currency bank account is not normally a chargeable asset for CGT[24] so the question of situs does not normally arise.

If it mattered, s.275(1)(l) TCGA provides:

> a debt which—
>
> (i) is owed by a bank, and
>
> (ii) is not in sterling, and
>
> (iii) is represented by a sum standing to the credit of an account in the bank of an individual who is not domiciled in the UK,
>
> is situated in the UK if and only if
>
> [a] that individual is resident in the UK and
>
> [b] the branch or other place of business of the bank at which the account is maintained is itself situated in the UK.

In short, for UK resident foreign domiciled individuals, the situs of a foreign currency account is the situs of the branch. This restates the common law rule for bank accounts; it is needed because without this provision the situs of the account would be the residence of the creditor (ie the account holder). In cases where the conditions (i), (ii) and (iii) are not all satisfied, the usual CGT debt rule applies.

Section 275(1)(l) only applies to individuals' bank accounts. However the situs of a bank account held by a trust or a company does usually matter for CGT.[25]

---

23 See 82.36 (Reform of IHT/CGT situs rules).

24 See 55.10 (Foreign currency bank accounts: CGT).

25 If it did matter, the usual CGT debt rule would apply so all accounts held by a non-resident trust or non-resident company would be non-UK situate, as situs would depend on residence of the account holder. This means that UK services relating to the account qualify for foreign services relief under s.809W ITA. That could be important for a bank account held by a non-resident close company, which is a relevant person, but in practice the point will rarely if ever arise as such a company would not normally use a UK account.

83.13 UK-law rule

Section 275A TCGA provides a situs rule for intangible assets which I call"**the UK-law rule"**. It is convenient to deal with some definitions before turning to the rule itself.

83.13.1 *"Intangible asset"*

Section 275A(2) TCGA provides a commonsense definition of "intangible asset":

> In this section "intangible asset" means—
> (a) intangible or incorporeal property and includes a thing in action, or
> (b) anything that under the law of a country or territory outside the UK corresponds or is similar to intangible or incorporeal property or a thing in action.

This includes policies and bonds, futures and options.

83.13.2 *Situs of asset "not otherwise determined"*

Section 275B(1) TCGA provides a commonsense explanation of "not otherwise determined":

> For the purposes of section 275A, the situation of an asset is not otherwise determined if, apart from that section, this Act does not make any provision for determining—
> (a) the situation of the asset, or
> (b) whether the situation of the asset is in the UK.

Thus the statutory rules in s.275 TCGA have priority to the UK law rule. For instance, a debt held by a foreign creditor is not UK situate even if subject to UK law; an option to purchase a non UK situate chattel is not UK situate, even if governed by UK law.

83.13.3 *"Subject to UK law"*

The expression "subject to UK law" is widely defined in s.275B(2):

> For the purposes of section 275A, an intangible asset is subject to UK law at a particular time if any right or interest which comprises or forms part of the asset is, at that time,—
> (a) governed by, or otherwise subject to, or
> (b) enforceable under,
> the law of any part of the UK.

Whether or not an asset is subject to UK law depends on the documentation. That will vary from case to case, but I understand that the position for some standard financial contracts is as follows.[26]

LIFFE FTSE 100 index future contract is subject to UK (English) law.[27]

Eurex contracts and CME contracts are not subject to UK law. They are governed by German law[28] and US law.[29]

83.13.4 *The UK-law rule*

Section 275A(1)(3) TCGA need to be read together to follow the sense:

> (1) This section applies for the purpose of determining whether the situation of an intangible asset ("asset A") is in the UK if the situation of asset A is not otherwise determined (see section 275B(1))...
> (3) If asset A is subject to UK law (see section 275B(2)) at the time it is created, it shall be taken for the purposes of this Act to be situated in the UK at all times.

83.13.5 *UK law rule: Commentary*

The UK law rule was introduced (in accordance with the then practice) without consultation or debate. It should be repealed as:

(1) It is impractical for remittance basis taxpayers who want to know how to invest or what to put on their returns. Only the wealthiest taxpayers with a significant budget for UK tax advice can be expected to research what law governs the assets concerned.
(2) It is contrary to UK legal commercial interests, encouraging the use of non UK law and non UK jurisdictions. (The ill effect may be mitigated by the fact that little notice is taken of the rule in practice.)
(3) It brings in no tax.

But the best solution is to look at the wider picture altogether: treat all assets other than UK land and securities as non-UK situate for the

---

26 I am grateful to Lindsay Pentelow of Mazars LLP for his research in this area.

29 Exchanges' Rule 905 (Choice of Law).

purposes of IHT and CGT.[30] The UK law rule would fall by the wayside.

83.14 Futures/options rules

Section 275A contains three situs rules for futures and options which I call **"the futures/options rules"**.

In the absence of these provisions, remittance basis taxpayers could invest in foreign law futures/options which track the value of UK situate intangible assets (because the underlying assets are UK situate). I surmise that these rules are intended to prevent that.

The drafting makes some formal gestures to the conventions of plain English legal drafting, but its structure is remarkably convoluted. If the Parliamentary Counsel's office held an internal competition for the most obscure drafting, within a plain legal English format, this would be a good contender.

It is convenient to deal with some definitions before turning to the rule itself. The definitions are derived from the corporation tax derivatives code now in part 7 CTA 2009. The definitions of expressions used in the UK law rule are also relevant here.

83.14.1 *"Option"*

Section 275B(3) TCGA provides:

> In section 275A—
> "option" has the meaning given by section 580 of that Act.

So we turn to s.580(1) CTA 2009 for a partial definition of option:

> In this Part "option" includes a warrant.

Section 710 CTA 2009 defines a "warrant":

> In this Part [Part 7]
> "warrant" means an instrument which entitles the holder to subscribe for—
> (a) shares in a company, or
> (b) assets representing a loan relationship of a company,
> whether or not the shares or assets exist or are identifiable.

Section 580 CTA 2009 excludes most cash-settled options:

---

30 See 82.2 (Commentary).

(2) References in this Part to an option do not include a contract whose terms—

(a) provide—

(i) that, after setting off their obligations to each other under the contract, a cash payment is to be made by one party to the other in respect of the excess, if any, or

(ii) that each party is liable to make to the other party a cash payment in respect of all that party's obligations to the other under the contract, and

(b) do not provide for the delivery of any property.

(3) Subsection (2) does not prevent an option whose underlying subject matter is currency from being an option.

So cash-settled options do not count, except for currency options; the exception does not matter as currency options are outside the scope of the futures/options rules.

83.14.2 *"Future"*

Section 275B(3) TCGA provides:

In section 275A—
"future" has the meaning given by section 581 of CTA 2009, and

So we turn to s.581 CTA 2009 which defines a "future":

(1) In this Part "future" means a contract for the sale of property under which delivery is to be made—

(a) at a future date agreed when the contract is made, and

(b) at a price so agreed,

but this is subject to subsection (3).

(2) For the purposes of subsection (1)(b), a price is agreed when the contract is made even if—

(a) the price is left to be determined by reference to the price at which a contract is to be entered into on a market or exchange or could be entered into at a time and place specified in the contract, or

(b) in a case where the contract is expressed to be by reference to a standard lot and quality, provision is made for a variation in the price to take account of any variation in quantity or quality on delivery.

Section 581 CTA 2009 excludes most cash-settled futures:

(3) References in this Part to a future do not include a contract whose

terms—

(a) provide—

(i) that, after setting off their obligations to each other under the contract, a cash payment is to be made by one party to the other in respect of the excess, if any, or

(ii) that each party is liable to make to the other party a cash payment in respect of all that party's obligations to the other under the contract, and

(b) do not provide for the delivery of any property.

(4) Subsection (3) does not prevent a future whose underlying subject matter is currency from being a future.

So cash-settled futures do not count, except for currency futures. The exception does not matter as currency futures are outside the scope of the futures/options rules. This is the equivalent of the rule which applies to cash-settled options.

83.14.3 *"Underlying subject matter"*

Section 275B(4) TCGA provides a commonsense definition:

For the purposes of section 275A—

(a) the underlying subject matter of a future is the property which, if the future were to run to delivery, would fall to be delivered at the date and price agreed when the contract is made, and

(b) the underlying subject matter of an option is the property which would fall to be delivered if the option were exercised.

83.14.4 *The futures/options rules*

Armed with these definitions, we can turn to the futures/options rules. Section 275A(4) TCGA provides:

Subsections (5) to (9) below have effect if asset A [the intangible asset]—

(a) is a future or option (see section 275B(3)), and

(b) is not subject to UK law at the time it is created.

The point of (b) is that a future/option which is subject to UK law is UK situate under the UK-law rule and the futures/options rules are not needed. We are therefore only concerned with foreign law futures/options.

One needs to read s.275A(5)(6) together to follow the sense, and it easier to read them in reverse order. Section 275A(6) TCGA provides:

That rule is that where, in the case of any intangible asset,—

(a) the asset is a future or option,[31]
(b) the underlying subject matter (see section 275B(4)) of the asset consists of or includes an asset which is an intangible asset,
and
(c) either—
(i)[A] that intangible asset [the underlying subject matter] is subject to UK law at the time it is created and,
[B] on the assumption that there were no rights or interests in or over that asset,[32] the situation of that asset [the underlying subject matter] would not be otherwise determined, or
(ii) that intangible asset is treated by this subsection as being so subject [ie subject to UK law] at that time,
the intangible asset mentioned in para (a) above [i.e. the future/ option] is to be treated for the purposes of subsection (5) above and this subsection as being so subject [ie subject to UK law] at the time it is created.

This triggers s.275A(5) TCGA:

> If, as a result of the application of the rule in subsection (6) below in relation to asset A or any other asset or assets, asset A falls to be treated as being subject to UK law at the time it is created, it shall be taken for the purposes of this Act to be situated in the UK at all times.

In short, a foreign law future/option over a UK law underlying intangible asset is UK situate.

EN FB 2005 explains the point of s.275A(6)(c)(ii):

> These rules apply recursively. In any case where there is a "nested sequence" of futures or options in which the underlying subject matter of each contract in the sequence consists of or includes the next contract in the sequence, subsection (5) has effect to provide that the first contract is taken for TCGA purposes to be situated in the UK at all times if the [relevant] requirements ... are met in relation to any of the contracts in the sequence.

Suppose:

---

31 Para (a) is otiose, since it repeats s.275A(4)(a); but it does not matter.

32 The words "on the assumption that there were no rights or interests in or over that asset" are difficult to understand, as situs of an asset does not depend of whether there are rights or interests in the asset. I think the words are otiose.

(1) Option 1 is a foreign law option over UK intangible property.
(2) Option 2 is a foreign law option over option 2.
Option 1 is UK situate under s.275A(6)(c)(i) and option 2 is UK situate under s.275A(6)(c)(ii).

Section 275A(6) leaves one gap: it does not apply where the situs of the underlying subject matter is "otherwise determined".[33]

Suppose, for instance, a foreign law option over shares in a UK incorporated company. That is not caught by s.275A(5)(6). The gap is filled by the second of the three futures/options rules, which is in s.275A(7)(8). These subsections follow much of the format of s.275A(5)(6) and I need not repeat the drafting points that they have in common.

One needs to read (7) and (8) together to follow the sense and it easier to read them in reverse order. Section 275A(8) TCGA provides:

> (8) That rule is that where, in the case of any intangible asset,—
> (a) the asset is a future or option, and
> (b) the underlying subject matter of the asset consists of or includes an asset—
> (i) which is, by virtue of
> [A] subsection (9) below or of
> [B] any provision of this Act apart from this section,
> situated in the UK at any time, or
> (ii) which is treated by this subsection as being so situated [ie UK situate] at any time,
> the intangible asset mentioned in para (a) above [the future/option] is to be treated for the purposes of subsection (7) above and this subsection as being so situated [ie UK situate] at that time.

This triggers s.275A(7) TCGA:

> (7) If—
> (a) asset A [the future/option] is not taken to be situated in the UK by virtue of subsection (5) above, and
> (b) as a result of the application of the rule in subsection (8) below

33 At first sight there is a second gap: s.275A does not apply where the underlying subject matter of the future/option is a tangible asset. But that is not a gap, as in such a case the future/option is an interest in that asset, and situs is determined by s.275 275(1)(b) TCGA.

> in relation to asset A or any other asset or assets, asset A falls to be treated as being situated in the UK at any time,
>
> it shall be taken for the purposes of this Act to be situated in the UK at that time.

Suppose:
(1) Option 1 is a foreign law option over a UK security.
(2) Option 2 is a foreign law option over option 2.
Option 1 is UK situate under s.275A(8)(b)(i) and option 2 is UK situate under s.275A(8)(b)(ii).
The rules in s.275A(5)(6) and (7)(8) only apply where there is an identifiable underlying asset in existence. A future/option over an asset class (such as gold) rather than any specific asset is not caught. If the underlying asset is currency, say, rather than a specific asset the futures/options rules do not apply. Hence it does not matter that cash-settled currency futures/options are within the definition of futures/options, as they are not within the scope of the futures/options rules.

83.14.5 *Underlying subject matter unissued shares or debentures*

Section 275A(9) TCGA deals with the case where the underlying subject matter is unissued shares or debentures:

> Where—
>
> (a) the underlying subject matter of a future or option consists of or includes shares or debentures issued by a company incorporated in any part of the UK, but
>
> (b) at the time the future or option is created, those shares or debentures have not been issued,
>
> the underlying subject matter of the future or option, so far as consisting of or including those shares or debentures, is to be taken, for the purposes of subsection (8) above, to consist of or include an asset which is situated in the UK at all times.

83.15 Insurance policy

The situs of policies rarely matters for CGT, because of the relief for policies. UK policies will be UK situate under the UK-law rule and for others the common law rule will apply.[34]

34 A policy is not a debt for the purposes of the CGT debt situs rule.

83.16 Land

Section 275(1)(a) TCGA provides:

> the situation of rights or interests (otherwise than by way of security) in or over immovable property is that of the immovable property.

The CG Manual provides:

> **12430 Types of asset (1): Land, tangible property and debts** [November 2012]
> *Land and buildings (Section 275(1)(a) TCGA 1992)*
> Land and buildings are located in the country where they are found. This applies to all rights and interests in the land and buildings. It will therefore apply to leases of land, tenancies etc.

83.17 Chattels

Section 275(1)(b) TCGA provides:

> subject to the following provisions of this subsection,[35] the situation of rights or interests (otherwise than by way of security) in or over tangible movable property is that of the tangible movable property.

Thus an option to purchase a UK situate chattel (even if governed by a foreign law) is a UK situate asset. The CG Manual provides:

> **12430 Types of asset (1): Land, tangible property and debts** [November 2012]
> *Chattels (Section 275(1)(b) TCGA 1992)*
> Items of tangible moveable property (chattels) are located where they are found at any point in time. This applies to all rights and interests over such assets also. Therefore a lease of a chattel can change from being located in the UK to being located elsewhere if the chattel is removed from the UK to another country.

For the position of temporarily exported chattels, see 82.27 (Chattels).

83.18 Ships and aircraft

Section 275(1)(f) TCGA provides:

> a ship or aircraft is situated in the UK if and only if the owner is then resident in the UK, and an interest or right in or over a ship or aircraft

35 This is referring to the special rules for ships and aircraft.

is situated in the UK if and only if the person entitled to the interest or right is resident in the UK.

The CG Manual provides:

> **12430. Types of asset (1): Land, tangible property and debts** [November 2012]
> *Ships and aircraft (Section 275(1)(f) TCGA 1992*)
> ... Contrary to the general rules of international law,[36] for capital gains purposes the location of a ship or aircraft does not depend on its country of registration. Instead the ship or aircraft is located in the UK if and only if the owner is resident in the UK. Similarly any interest or right in or over the ship or aircraft is located in the UK if and only if the owner of the interest or right is resident in the UK.

This generally[37] disapplies the CGT remittance basis since a ship/aircraft owned by a remittance basis taxpayer is deemed UK situate and the gain taxed on an arising basis. If the individual holds the ship/aircraft through a non-resident company the asset is treated as not UK situate which has two advantages:

(1) The s.13 remittance basis is available on a disposal by the company.
(2) Relief is available under s.809W ITA for services relating to the asset.

83.19 Goodwill

Section 275(1)(g) TCGA provides:

> the situation of good-will as a trade, business or professional asset is at the place where the trade, business or profession is carried on.

The CG Manual provides:

> **12450 Types of asset (3): Intangible assets - goodwill, patents, trademarks etc** [January 2010]
> *Goodwill (Section 275(1)(g) TCGA 1992)*
> Goodwill which is an asset of a trade, profession or vocation is located where the trade, profession or vocation is carried on. If the trade etc is carried on in more than one country part of the goodwill appropriate to the part of the trade etc carried on in any one country should be treated as located in that country.

---

36 The Manual's view (that under international law ships and aircraft are situate where registered) is erroneous: see 82.28 (Ships and aircraft).

37 An exception is if the individual disposes of the asset while temporarily non-resident.

83.20 Interest under bare trust or nomineeship

The interest of a beneficial owner in property held by a nominee or bare trustee is situate where the underlying asset is situate: s.60 TCGA reinforces the common law rule on this point.[38]

For unit trusts see 39.5.2 (Situs of unit for CGT).

83.21 Equitable interest under a substantive trust

The situs of an equitable interest under a substantive trust only rarely matters for CGT because of the exemption for equitable interests. However it may matter, eg in the case of a purchased interest or an interest in a non-resident trust.

If the trust is "subject to UK law" (as defined) the interest will be situate in the UK. This clearly includes the case of a trust with a UK governing law; it may arguably apply to any trust with UK trustees. In other cases the common law rules will apply.

83.22 Intellectual property

Section 275(1)(h) TCGA provides:

> patents, trade marks, registered designs and corresponding rights are situated where they are registered, and if registered in more than one register, where each register is situated, and licences or other rights in respect of any such rights are situated in the UK if they or any right derived from them are exercisable in the UK,

A different solution must be found for copyright, since such rights do not need registration. Section 275(1)(j) TCGA provides:

> copyright, design right, franchises, and corresponding rights, and licences or other rights in respect of any such rights, are situated in the UK if they or any right derived from them are exercisable in the UK.

"Corresponding rights" has a commonsense definition in s.275(3) TCGA:

> In subsection (1) above, in each of paras (h) and (j), "corresponding rights" means any rights under the law of a country or territory outside the UK that correspond or are similar to those within that paragraph.

This will not often concern remittance basis taxpayers. It is important for non-residents carrying on a trade in the UK through a permanent

---

38 See 82.31 (Interest under bare trust or nomineeship).

establishment, who are (in short) subject to CGT on UK situate trading assets.

It seems at first sight that intellectual property is (uniquely) capable of being situate for CGT purposes in more than one jurisdiction. But it is considered that intellectual property exercisable in a number of jurisdictions should be regarded as a number of separate assets, one situate in each jurisdiction. The CG Manual provides:

> **12450 Types of asset (3): Intangible assets - goodwill, patents, trademarks etc** [January 2010]
> *Copyright, design rights, franchises etc (Section 275(1)(j) TCGA 1992)*
> • Copyright, design rights and franchises
> • Any rights or licences to use
> – any copyright work
> – any design in which design rights subsist
> are situated in the UK if they or any right derived from them are exercisable in the UK.

83.23 Unadministered estate of deceased person

If the estate is subject to UK law, it is UK situate for CGT. Other estates are governed by the common law rule.[39]

83.24 CGT planning: Making UK situate property non-UK situate

83.24.1 *Moveable assets in UK*

Moveable assets could in principle be moved offshore prior to a disposal. Consider whether an export licence is needed.

83.24.2 *Unincorporated UK business carried on by foreign domiciliary*

A business could be transferred to a foreign incorporated company under s.162 TCGA and shares later sold. Watch stamp duty. Even if the company were subsequently to become non-resident on emigration of shareholder/directors, no tax would arise except on growth in value since transfer to the company.

83.24.3 *Debts*

There are two ways to deal with a UK situate debt on a security. It may be possible to make the asset non-UK situate. It might be possible to

---

39 See 82.33 (Unadministered estate of deceased person).

make the asset a simple debt (not a debt on a security) so it falls within the relief given by s.251 TCGA. It is important to do this by varying the existing debt, and not by ending the existing debt and creating a new one.[40]

83.24.4 *Use of UK resident foreign incorporated company*

It is not ideal for a foreign domiciled individual to hold a UK incorporated company directly, as a disposal of that asset would give rise to CGT. If the foreign domiciliary does not want to go to the trouble and expense of using an offshore trust, what is the alternative? One possibility is to use a foreign incorporated UK resident company. The shares in the company will not be UK situate for CGT.[41]

40 See *Chitty on Contracts*, (31st ed., 2012), para 22-028 (Substituted contract).

41 See 83.6 (Registered securities: non-UK company).

CHAPTER EIGHTY FOUR

FOREIGN ENTITIES

84.1 Foreign entities: Introduction

UK tax law categorises entities (in short) as companies, partnerships or trusts.[1] With more or less difficulty (depending on the similarity of the law of the country concerned) it is necessary to shoehorn foreign entities into these categories; or more accurately, it is necessary to decide whether references to companies, trusts, partnerships, persons, etc in any particular statutory provision include some particular foreign entity. Similarly, it is necessary to decide whether technical terms such as "share capital" or "interest in possession", or less technical terms such as "interest in", are apt to include rights in or under foreign entities.

Memec v IRC explains the general approach:

> When an English tribunal has to apply the provisions of an UK taxing statute to some transaction, arrangement or entity which is governed by a foreign system of law, the tribunal must take account of the rules of that foreign system (properly proved if not admitted) in order to determine the nature and characteristics of the transaction, arrangement or entity. But having informed itself in this way, the tribunal must then apply the taxing statute as part of English law.[2]

Thus in order to decide whether a reference to (say) a trust or trustee, in any particular statutory provision, includes some particular foreign entity or person, one must ask some fundamental questions:

(1) What is the definition, or determinative characteristics, of a trust or trustee (within the meaning of the section), a question of UK law; and

---

1 And lastly, PRs but PRs are not discussed in this chapter.

2 71 TC 77 (HC) at p.92 approved *Anson v HMRC* [2013] STC 557 at [70]. Avery Jones "Characterisation of Other States' Partnerships for Income Tax", [2002] BTR 375 is essential reading in this area.

(2) Does the foreign entity or person have those characteristics, a question of the foreign law.

Similar issues arise in the application of DTAs to foreign (and UK) entities, for instance, whether an entity is a "person" or a "body corporate" for the purpose of a DTA. Similar issues arise in non-tax contexts.[3]

Most OECD countries adopt the same approach:

> 11. In most [OECD] Member countries, as a matter of principle, tax laws apply on the basis of the legal relationship deriving from other branches of the law. Thus the tax laws of these countries, when referring to partnerships, will, absent special tax definitions, refer to those entities that constitute partnerships according to domestic civil or commercial law.
>
> 12. Difficulties often arise, however, where income is derived by an entity organised under the laws of another jurisdiction. In that case, the entity will have to be classified for purposes of the application of the tax laws of the country where the income is derived, regardless of whether or not that classification is compatible with the civil or commercial law system of the jurisdiction from which the entity derives its legal status.
>
> 13. For example, if the tax system of a country recognises only individuals, companies and partnerships (but not trusts) as taxpayers and provides for a different tax treatment for these three types of taxpayers, that country will have to 'force' foreign entities in one or the other of these categories (with more or less difficulty depending on the similarity of the civil and commercial law of the countries concerned) for purposes of applying its tax system to domestic income derived by these foreign entities.
>
> 14. In doing so, the practice of most countries is to adopt the same approach as the one they apply in a purely domestic context. They will therefore apply their domestic tax classification to foreign entities on the basis of the foreign law's legal characteristics of the entity. In the previous example, the country, for the purposes of taxing the domestic income of a trust established under the law of a foreign jurisdiction, will typically examine the legal characteristics of the trust as they derive from the trust law of the foreign jurisdiction in order to determine whom it should tax and whether that person should be taxed as an individual,

---

3 See for instance s.1208 Companies Act 2006: "partnership" means—
(a) a partnership within the Partnership Act 1890, or
(b) a limited partnership registered under the Limited Partnerships Act 1907,
or a firm or entity of a similar character formed under the law of a country or territory outside the UK.

> company or partnership, which are the only categories recognised under its tax law."[4]

US law adopts the same approach. In *Biddle v Commissioner*[5] the issue was whether tax deducted at source on a dividend by a UK company[6] was regarded as "tax paid by a shareholder" for the purposes of a US statute:

> At the outset it is to be observed that decision must turn on the precise meaning of the words in the statute which grants to the citizen taxpayer a credit for foreign "income taxes paid." The power to tax and to grant the credit resides in Congress, and it is the will of Congress which controls the application of the provisions for credit. The expression of its will in legislation must be taken to conform to its own criteria unless the statute, by express language or necessary implication, makes the meaning of the phrase "paid or accrued," and hence the operation of the statute in which it occurs, depend upon its characterization by the foreign statutes and by decisions under them. ...
> ... The phrase "income taxes paid," as used in our own revenue laws, has for most practical purposes a well understood meaning to be derived from an examination of the statutes which provide for the laying and collection of income taxes. It is that meaning which must be attributed to it as used in § 131.
> Hence the board's finding... that "the stockholder receiving the dividend is regarded in the English income tax acts as having paid 'by deduction or otherwise' the tax 'appropriate' to the dividend" is not conclusive. At most it is but a factor to be considered in deciding whether the stockholder pays the tax within the meaning of our own statute. That must ultimately be determined by ascertaining from an examination of the manner in which the British tax is laid and collected what the stockholder has done in conformity to British law and whether it is the substantial equivalent of payment of the tax as those terms are used in our own statute.

---

4 See OECD, "The Application of the OECD Model Tax Convention to Partnerships" (1999) accessible (at a small charge) from *http://www.oecd.org*.
In Ireland this approach was adopted in *Quigley v Harris* [2009] 2 IR 175. In that case the approach was said to derive from the principle of comity of nations, that is, that the courts of one jurisdiction recognise and give effect to rights and obligations relating to foreign entities, in accordance with the law of the state where the entity is established.

5 302 U.S. 573 (1938).

6 Before the introduction of Corporation Tax.

So far as the topic raises issues of foreign law I necessarily rely on secondary material. I would be interested to hear from readers with foreign law expertise if views expressed in this chapter need correction or refinement, and in particular if they disagree with HMRC official views.

A full discussion of the deeply intriguing issues raised in this chapter would require a book to itself.

84.1.1 *Significance of foreign law classification*

If the applicable foreign law is sufficiently similar to UK law, it is considered that a foreign law classification of an entity as, say, a trust, ought to be relevant, though not of course decisive; but in practice that condition is often not satisfied, or at least, in the event of a dispute, the question whether the foreign law is "sufficiently similar" is likely to be contested.

The upper tribunal have said:

> The meaning of the word [dividend] in the tax legislation is a matter of English law not of Cayman law.
> Although Cayman law uses the word "dividend" to cover the distributions made in the present case ... it does not follow that the Preference Dividends are therefore "dividends" with the meaning of the UK tax legislation.[7]

84.2 "Transparent" and "opaque"

84.2.1 *Terminology*

UK tax law categorises entities as **"transparent"** or **"opaque"**.[8] The International Manual explains this terminology:

> **180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes** [April 2012]
> ... Entities are described [in the official list set out below] as either fiscally "transparent" or "opaque" solely for the purposes of deciding how a member is to be taxed on the income they derive from their interest in the entity. In the case of a "transparent" entity the member is regarded as being entitled to a share in the underlying income of the

7 *HMRC v First Nationwide* 81 TC 738 at [23]. The point was not doubted on appeal. For another example, see 84.6 (American revocable trust (grantor trust)).

8 The term sometimes used is "fiscally transparent" (and "fiscally opaque") but that is synonymous with "transparent" (or "opaque").

> entity as it arises and is charged to tax in the UK on their share of the profits on that basis. But, in the case of an "opaque" entity the member generally is taxed only on the distributions made by the entity.

The terminology is used similarly for CGT: In the case of a transparent entity the member is regarded as being entitled to a share of the underlying gains of the entity as they arise. In the case of an opaque entity the member is in principle taxed only on distributions made by the entity; the entity itself is regarded as receiving the gains. For instance, a partner is regarded as entitled to a share of the underlying gains of a partnership as they accrue, and is charged to CGT on that basis; so a partnership is said to be transparent for CGT.

Strictly, one should not use the term "transparent" without identifying the tax involved, because an entity may be transparent for one tax and not for another.

Classification of an entity as transparent for IT/CGT in the above sense ought logically to entail that the entity is regarded as *not* entitled to the income/gains (since its members, or those who own or have an interest in the entity, *are* regarded as so entitled). For instance, a partnership is transparent and income/gains accrue to the partners and not to the partnership. Perhaps illogically, this is not always the case. For instance, an IIP trust is transparent, but the trustees may still be taxable on the trust income; likewise a settlor-interested trust within s.624. That state of affairs usually favours HMRC (by offering an alternative person liable for the tax) but in the case of DT exemptions, it may favour the taxpayer (by offering an alternative route to DT relief).

Thus classification as transparent or opaque does not answer all the tax questions which may arise in relation to an entity.

The International Manual provides:

> **180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes** [April 2012]
> It should be noted that the expressions "transparent" and "opaque" are not interchangeable with "partnership" and "company" or "body corporate". For example, a fiscally transparent entity is not necessarily a partnership. Likewise an UK company is a "body corporate" and is opaque for the purposes of UK tax on income, but a fiscally opaque entity is not necessarily a "body corporate" or a "company" for UK tax purposes.

Although the expressions are not interchangeable, the issues overlap. A

transparent entity is not necessarily a partnership[9] but a partnership is always transparent for IT and CGT.[10]

The sense explained above is, I think, the paradigm use of the terms transparent/opaque. However the terminology is also used in an analogous way in other contexts; for instance, it may be said that a partnership is not transparent for IHT situs rules. So one should not use the term without identifying the provision or context involved, as an entity may be transparent for one purpose and not for another.[11] Outside the paradigm context, the labels transparent/opaque may be a useful shorthand but it is necessary to focus on the words of the statute and if that is not done, the terminology may mislead. It is better used to summarise a conclusion rather than as the reason for reaching that conclusion.[12]

84.2.2 *How to categorise an entity as transparent or opaque*

The International Manual explains HMRC's approach to categorising an entity as transparent or opaque:

> **180010. Factors to consider in classifying a foreign entity for UK tax purposes** [January 2012]
> ... When considering the classification of a foreign entity (i.e. whether it is either opaque or transparent) for UK tax purposes, due regard is given to the approach of the Court of Appeal in the case of *Memec plc v IRC* (71 TC 77) and the line of case law that precedes it. In particular, the following matters should be considered:
>
> (a) Does the foreign entity have a legal existence separate from that of the persons who have an interest in it?

If the entity does not have a separate legal existence (legal personality) that is the end of the matter. It cannot be opaque (as income cannot be regarded as received by it). On the other hand an entity which does have

---

9 For instance, an IIP trust is also transparent: see 26.3 (Taxation of Life Tenant).

10 See 41.4 (Transparency of partnership for IT); 41.7 (Transparency of partnership for CGT).

11 For instance, a partnership is *not* transparent for the purposes of the ITA remittance basis. See 11.34.2 (Non-transparent nature of partnership for remittance basis purposes).

12 The First-tier Tribunal made this point in *Swift v HMRC* [2010] SFTD 553 at [18]: "The issue is whether the UK tax is 'computed by reference to the same profits or income' or whether he is taxable on the equivalent of a dividend. Asking whether SP LLC is transparent or opaque may be another way of asking the same question but we consider that it is preferable to apply the words of the Treaty."

legal personality can be either opaque or transparent. A Scots partnership is an example of a transparent entity with legal personality.

> (b) Does the entity issue share capital or something else, which serves the same function as share capital?
> (c) Is the business carried on by the entity itself or jointly by the persons who have an interest in it that is separate and distinct from the entity?
> (d) Are the persons who have an interest in the entity entitled to share in its profits as they arise; or does the amount of profits to which they are entitled depend on a decision of the entity or its members, after the period in which the profits have arisen, to make a distribution of its profits.
> (e) Who is responsible for debts incurred as a result of the carrying on of the business: the entity or the persons who have an interest in it?
> (f) Do the assets used for carrying on the business belong beneficially to the entity or to the persons who have an interest in it?
>
> Some of those factors may point in one direction; others may point in another. An overall conclusion is reached from looking at all the factors together, though some have more significance than others. Particular attention is paid to factors c. and d.
>
> In considering these factors we look at the foreign commercial law under which the entity is formed and at the internal constitution of the entity. ... The conclusion that is reached is then used in considering the relevant piece of UK tax law.[13]

84.2.3 *Hybrid entities*

"A hybrid entity" is one that is classified as transparent in one state, and non-transparent in another. Such entities may give rise to tax planning or avoidance.[14] They may also give rise to double taxation. HMRC do not regard the latter as objectionable.[15]

In *Columbus Container Services* the advocate-general observed:

---

13 This passage is also set out in INT Manual 180010. I deal with the omitted sentence in the following paragraph.

14 See OECD, "Hybrid Mismatch Arrangements: Tax Policy and Compliance Issues" (2012) accessible *http://www.oecd.org/tax/aggressive/HYBRIDS_ENG_Final_October2012.pdf*

15 See 84.25 (US S-Corps and LLCs).

> 40. International tax studies on the problem of the transparency of partnerships have highlighted the incredible complexity of this branch of law, due in particular to the classification of a partnership, which is described as a partnership in one state but as a business corporation in another, and to the bilateral or triangular nature of the relationships to be considered (the state of the source of the income, the state of the partnership, the state of residence of the partner). These difficulties may however be eased by the provisions of taxation conventions between states.
> 41. At the current stage of development of Community law, it does not require member states to recognise in their territory the legal and tax status afforded by the domestic law of the other member states to entities which carry out their economic activities there.

84.2.4 *Significance of foreign law classification as transparent/opaque*

The International Manual adopts a parochial approach:

> **180010. Factors to consider in classifying a foreign entity for UK tax purposes** [January 2012]
> ... How the entity is classified for tax purposes in any other country is not relevant.

If the foreign tax law is sufficiently similar to UK law, it is considered that a foreign law classification as transparent/opaque ought to be relevant, though not of course decisive. An incidental attraction of this course is that it reduces the number of hybrid entities, which give rise double taxation and avoidance. But in practice the condition that foreign tax law is sufficiently similar to UK law is often not satisfied, or at least, in the event of a dispute, the question whether the foreign law is "sufficiently similar" is likely to be contested.

84.3 Definition of "IHT-settlement"

It was noted above that it is necessary to consider the UK tax law definition of terms such as partnership, company and trust before deciding whether a foreign entity falls within the definition. The definitions of "partnership"[16] and "company"[17] are fairly uniform throughout tax law.

However quite different definitions of trusts are used in different taxes.

---

16 See 41.2.1 (Partnership).

17 See 84.4 (Meaning of "company").

I discuss terminology in 80.2.1 (terminology); in summary:
"**IHT-settlement**" means a settlement within the IHT definition
"Standard IT/CGT settlement" is a settlement within the standard IT/CGT definition.
"Settlement-arrangement" is a settlement within s.620 ITTOIA, which applies for the purposes of the IT settlement provisions and many other purposes of which the most important is s.87 TCGA**.**

The terms trust and settlement are used (more or less) interchangeably.

Because the definitions are different, it is a mistake to ask if an entity is a trust "for tax purposes". One must ask if it is a trust for IT/CGT, or for IHT purposes, or if it is a settlement-arrangement. An entity may be a trust within one, or two, or all three definitions.

I discuss the IT/CGT and settlement-arrangement definitions elsewhere.[18] Section 43(2) IHTA provides the IHT definition:

> "Settlement" means any disposition or dispositions of property, whether effected by instrument, by parol or by operation of law, or partly in one way and partly in another, whereby the property is for the time being—
>
> (a) held in trust for persons in succession or for any person subject to a contingency, or
>
> (b) held by trustees on trust to accumulate the whole or part of any income of the property or with power to make payments out of that income at the discretion of the trustees or some other person, with or without power to accumulate surplus income, or
>
> (c) charged or burdened (otherwise than for full consideration in money or money's worth paid for his own use or benefit to the person making the disposition) with the payment of any annuity or other periodical payment payable for a life or any other limited or terminable period,
>
> [d] or would be so held or charged or burdened if the disposition or dispositions were regulated by the law of any part of the UK;
>
> [e] or whereby, under the law of any other country, the administration of the property is for the time being governed by provisions equivalent in effect to those which would apply if the property were so held, charged or burdened.

84.3.1 *Limb [d]: Would be so held if disposition were regulated by UK law*

This limb is present for historic reasons only. The former estate duty

18 See 80.2 (Definition of "settlement").

definition of "settlement" in s.22(1)(i) FA 1894 provided (so far as relevant):

> The expression 'settlement' means any instrument, whether relating to real property or personal property, which is a settlement within the meaning of the Settled Land Act, 1925, or if it related to real property would be a settlement within the meaning of that Act

Dick Taverne, then Financial Secretary to the Treasury, explained the problem posed by this definition:

> The definition is primarily by reference to the Settled Land Act 1925, but it brings in property other than settled land by references to instruments which if related to real properly in England and Wales would be a settlement within the meaning of the Act. We now see that it is arguable that we have done no more than equate an English settlement of personalty with one of realty and that we have not caught foreign settlements.[19]

Hence s.36(5) FA 1969 extended the definition:

> In the enactments relating to estate duty—
>
> (a) the expression 'settlement'— (i) for the avoidance of doubt is hereby declared to include ...
>
> (bb) any disposition regulated by the law of a territory outside Great Britain which would constitute a settlement within the meaning of section 22(1)(i) of the Finance Act 1894 if it had been regulated by the law of England or, as the case may require, of Scotland;

The words now in s.43(2)[d] IHTA are derived from para (bb). Now, the definition of settlement for IHT is not by reference to the SLA 1925 and applies to UK and foreign law trusts, so the words in (bb) were not needed. The drafter of the current definition possibly did not notice, but probably thought the words desirable to preclude an argument that "trust" in s.43(2) IHTA meant a trust governed by a UK law. That argument would not have been very convincing but given the history of the provisions might not have been self-evidently wrong.

Limb [d] therefore has no practical effect.

84.3.2 *Limb [e]: Provisions equivalent in effect to a trust*

The standard IT/CGT definition has no equivalent of s.43(2)[e]. So while

---

19 Hansard Standing Committee F, 24 June 1969, col 721.

the IT/CGT definition requires that property is held "in trust" it is (in short) sufficient for IHT that the property is governed by provisions which are equivalent in effect.

Section 43 refers to the *administration* of the property being governed by provisions equivalent in effect. Trust law draws a distinction between administrative and dispositive provisions, but the context here suggests that this is referring to all the provisions which govern the use of the property, and not just administrative provisions in the strict sense.

Two difficulties lie in the short phrase "equivalent in effect":

(1) Equivalent *in effect* presumably requires effective (or substantive) rather than exact equivalence, but where does one draw the line?

(2) Trusts can have the same effect as entails, usufructs, wills, corporations, charges by way of security over assets, and so on, though they are none of those things. A trust is a flexible, protean institution which can have markedly different effects.

In deciding whether a foreign institution is equivalent in effect to a trust, a court should have regard to the context - is it appropriate in the scheme of IHT that an entity should be subject to IHT in the same manner as a trust? This consideration supports the view taken below that a foundation (stiftung) is an IHT-settlement but a usufruct is not.

84.4 Meaning of "company"

Section 1121(1) CTA 2010 provides the definition for the corporation tax acts:

> In the Corporation Tax Acts "company" means any body corporate or unincorporated association, but does not include a partnership, a local authority or a local authority association.[20]

Section 992(1) ITA provides the identical definition for the income tax acts.

Section 288 TCGA provides a similar definition for the TCGA:

> "company" includes any body corporate or unincorporated association but does not include a partnership, and shall be construed in accordance with section 99;

The CGT definition is wider that the IT/CT definition as it includes (1)

---

20 This is subject to some minor (unnecessarily complicated) exceptions not considered here.

unit trusts[21] and (2) local authorities.[22]

The IHTA does not provide a definition of "company" but the definition of close company in the close company rules incorporates the CTA definition. Section 102(1) IHTA provides:

> In this Part of this Act—
> 'close company' means a company within the meaning of the Corporation Tax Acts which is (or would be if resident in the UK) a close company for the purposes of those Acts;

For SDLT, s.100(1) FA 2003 provides a similar definition:

> In this Part "company", except as otherwise expressly provided, means any body corporate or unincorporated association, but does not include a partnership.

84.5 Bare trusts/nomineeships

84.5.1 *Definition(s) of bare trust and associated terminology*

Section 466 ITA provides:

> (2) "Settled property" means any property held in trust other than property excluded by subsection (3).
> (3) Property is excluded for the purposes of subsection (2)
> (a) it is held by a person as nominee for another person,
> (b) it is held by a person as trustee for another person who is absolutely entitled to the property as against the trustee, or
> (c) it is held by a person as trustee for another person who would be absolutely entitled[23] to the property as against the trustee if that other person were not an infant or otherwise lacking legal capacity.

The phrase "absolutely entitled to property as against a trustee" is defined in s.466(5) ITA:

> A person is absolutely entitled to property as against a trustee if the person has the exclusive right to direct how the property is to be dealt

---

21 Section 99 relates to unit trusts; see 39.4 (Gains accruing to unit trust).

22 See Kessler & Marre *Taxation of Charities & Non-profit Organisations* (9th ed., 2013), chapter 43 (Local Authorities).

23 The term "absolutely entitled" is defined in s.466(6) ITA:
"References to a person who is or would be so entitled include references to two or more persons who are or would be jointly absolutely entitled as against the trustee."

with (subject to the trustees' right to use the property for the payment of duty, taxes, costs or other outgoings).

I use the following terms:

"A bare trust" (or **"nomineeship"**, the terms are for present purposes synonymous) is a trust of property:

(1) within s.466(3) ITA and its CGT equivalent, s.60 TCGA (ie, not settled property for IT/CGT purposes) and

(2) not within s.43 IHTA (ie, not settled property for IHT purposes).[24]

These two definitions are not quite identical, but in practice they usually amount to the same.

"A substantive trust" is a trust that is not a bare trust.

This is now standard usage among private client practitioners. But in the past the expression "bare trust" was used in a variety of different senses.[25] This is now of historic interest only, but it needs to be kept in mind, especially when reading older cases, that references to a bare trust may not be a reference to a bare trust in the above sense.

There is some debate as to whether what I call a bare trust should always be described a "trust" but that makes no difference for tax purposes.

84.5.2 *Tax treatment of bare trust*

In short:

(1) A bare trust is transparent for CGT,[26] for IT and for IHT.

(2) A bare trust is not an IT/CGT settlement.

(3) A bare trust is not an IHT-settlement as the property is not held on trust for persons in succession (or governed by provisions equivalent in effect).

(4) A bare trust may be a settlement-arrangement. However it is not within s.87 TCGA as gains do not accrue to the trustees, so there are no s.2(2) amounts (trust gains).

The question of whether a trust is classified as a bare trust or a substantive trust is therefore of some importance.

84.5.3 *The trust law background*

In classifying an entity as a bare or a substantive trust, three rules of trust

---

24 See 84.3 (Definition of "IHT-settlement").

25 The old cases are assembled in *Re Blandy Jenkins* [1917] 1 Ch 46.

26 Section 60 TCGA.

law (or succession law) are particularly relevant:

(1) A substantive trust must confer rights on more than one person. If a trust has only one beneficiary, it can only be a bare trust.

(2) A testamentary disposition has no effect during the life of the testator/settlor, so if a disposition is classified as testamentary, it can only be a bare trust during the lifetime of the testator/settlor.

(3) A trust which is a sham is generally a bare trust.

Of course a foreign law entity may be classified as a bare trust, just as an English law trust may constitute a bare trust.

84.5.4 *Substantive trust must confer rights on more than one beneficiary*

Whether a trust confers rights on more than one beneficiary is a question of construction.

There may be a substantive trust even if the interest of the second beneficiary is a future interest of no economic value. There is no *de minimis* requirement.

Thus in *Corlet v Isle of Man Bank Limited* [1937] 3 DLR 163, and *Anderson v Patton* [1948] 2 DLR 202 lifetime trusts conferred what one might regard as minimal future revocable interests on beneficiaries other than the settlor, but the trusts were valid. The latter case concerned a document reciting:

> received from A $5,000 which I am to hold in trust for A and which I am to pay out as instructed to X and Y if anything should happen to A. The money will be returned if A should demand it.

The Court held by a majority that even this was a valid trust. (One can see the force of the minority view that this was actually intended to be testamentary.)

Lewin on Trusts says:

> The reservation by the settlor of large beneficial powers and interests may leave the lifetime trusts declared in favour of others so squeletic[27] as to be considered illusory. If a power of revocation is also reserved, this can turn a settlement into a will.[28]

This may be read to suggest that a trust may purport to confer some

---

27 This word is not in the OED, but one of the authors of Lewin tells me it means: skeletal.

28 (18th ed, 2008), para. 1-14

interest on other beneficiaries, but if that interest is insufficiently large or important it does not count. I refer to this as a *de minimis* principle.

The term sometimes used is "illusory trusts", but I think it causes confusion to use the term "illusory" unless it is clear what is required to be "illusory"; in other words, to call a trust or an interest "illusory" represents a conclusion of invalidity, rather than a useful test of how to reach that conclusion.

While a substantive trust must confer rights on more than one person, there is no rule that the rights of the second person must exceed some *de minimis* requirement. It is well established that a settlor ("S") may create a valid trust conferring a life interest on S, with power of revocation exercisable by S, and subject to that, for R. The reversionary interest of R is not so small it should be disregarded. But R's interest has a nil economic value and a lifetime settlement of this kind has in substance the same effect as a will. How does one distinguish between revocable reversionary interests, which are valid, and (even) less significant interests (which are not)? Unless one knows what is too small an interest (and different views on that would be possible) it will be impossible to say whether trusts are substantial trusts or bare trusts.

The authorities do not provide any support for a *de minimis* requirement of this kind. The relevant cases are not consistent with any *de minimis* requirement of this kind. The question of whether there is a substantive trust is not determined by asking whether a beneficiary's interest was "squeletic". The question is whether the "beneficiary" (using that word in a non-technical way) has an interest at all.

84.5.5 *Testamentary/non testamentary dispositions*

English law (and foreign laws which adopt common law principles) distinguish between:

(1) testamentary dispositions;

(2) non-testamentary dispositions (here called "lifetime dispositions").

The distinction matters for many reasons including the following:

(1) Different (stricter) formalities apply to testamentary dispositions.[29]

---

29 If a foreign law entity were a testamentary disposition under English law, it might be valid under foreign law even though it would not satisfy English law formality requirements (two witnesses, etc). The entity may then be void in English law, lacking the formalities required for a valid will; but it may be saved by the Wills Act 1963. If the entity is void in English law but valid in foreign law, the applicable

(2) A testamentary disposition only takes effect on death. A lifetime disposition takes effect before death, normally when executed.
(3) A testamentary disposition is revocable until death. A lifetime disposition is only revocable if this is expressly stated, and even if it is revocable, circumstances which normally revoke a testamentary disposition (eg making a new will in common form, or marriage) may not revoke a lifetime disposition.

In particular, if a disposition which creates a trust is a testamentary disposition, the trust must be a bare trust during the life of the settlor/testator.

Statute law recognises the testamentary/non-testamentary distinction[30] but gives no guidance on it. There is a certain amount of (mainly antique) case law. A disposition is testamentary if it is the intention of the writer of the document "that death was the event that was to give effect to it".[31]

A disposition which confers a life interest on the settlor and also a power of revocation is in principle a valid lifetime disposition, not testamentary. In *Thompson v Browne*[32] the Court said:

> If there be anything in that decision [*Attorney-General v Jones*] to support the notion, that where a person by deed settles property to his own use during his life, and after his decease for the benefit of other persons, a power of revocation reserved in such a deed alters the character of the instrument, and renders it testamentary, … I can only say that, if this were law, a great number of transactions of which the validity has never been doubted would be liable to be impeached.[33]

The beneficiaries of a lifetime trust have an equitable interest from the date of the gift, known as a present future interest. They could in theory take proceedings in the event of a breach of trust. However in practice this may be a theoretical possibility only. The difference between a

---

conflict of law principles must be applied to see which legal system has priority.

30 Section 1 Wills Act 1837 merely says that the term "will" includes a testamentary disposition.

31 *Milnes v Foden* (1890) 15 PD 105 at p.107; or (which comes to the same thing) "that it is dependent on the death for its vigour and effect"; *Cock v Cooke* (1866) 1 P&D 241 at p.243. If the document calls itself a will, the intention is usually obvious, but it is not necessary to use the word "will". For instance, a conveyance "not to take effect until after my decease" is obviously testamentary: *In the Goods of Morgan* (1866) 1 P&D 214.

32 (1835) 3 My & K 32.

33 The point is also stated in *Baird v Baird* [1990] 2 AC 548 at p.556.

testamentary disposition and a trust of this kind is then essentially one of form and not one of substance. There is no economic difference. In cases of this kind it could be harder to construe the document and determine whether the intention of the writer is:

(1) to confer a present future interest or

(2) that death is the event which gives effect to the document.

Since it makes no real (economic) difference, the writer of the document may not have formed a clear intention on the point, or even if they have, they may not have expressed that intention clearly in the document. In these cases the form of the document is an important guide to construction. If the document takes the form of a will, (ie describing itself as a will and executed with the formalities of a will) the intention of the writer must be that it is testamentary. If it takes the form of a lifetime settlement (ie describing itself as such and executed as a deed), the intention of the writer must be that it is a lifetime disposition. Of course the form of the document is not decisive. The context may show otherwise. However, the form certainly gives some guidance and in the absence of contrary indications it must be determinative.

The rule that a testamentary disposition does not create a substantive trust during the lifetime of the settlor/testator should be regarded as distinct from the rule that a substantive trust must confer an interest on more than one beneficiary. In the case of a testamentary disposition, there would be someone who is intended to benefit after the death of settlor/testator, but the question is whether they are intended to benefit immediately or on death. However, in practice, factors which suggest that the intention of the writer of the document is testamentary will also tend to show that there was no intention to confer any interest on a beneficiary during the lifetime of the settlor, so the two rules can overlap.

84.5.6 *Sham*

The doctrine of sham applies to trusts and not to other entities such as companies.

Whether or not a foreign entity is void as a sham depends on the applicable foreign law of sham, or some similar doctrine, if the foreign law has one. Most common law jurisdictions broadly follow English law principles and an English court will assume English law applies in the absence of evidence to the contrary.

The sham rule (in short, that a trust is invalid if the settlor lacked the intention to create a trust) is distinct from the rules a trust may be invalid

as merely (1) a testamentary disposition or (2) a bare trust. But in practice where it is the intention to create a testamentary disposition or bare trust, the testator/beneficial owner will not have, or manifest, the intention to create a substantive lifetime trust, so these rules may overlap. For a modern example, see *BQ v DQ*.[34]

84.6 American revocable trust (grantor trust)

Revocable trusts are commonly used in the USA for estate planning.[35] With an American settlor these are almost always grantor trusts (a USA income tax concept) and transparent for USA tax purposes as to income and capital gains, though with non-USA settlors they are only transparent in limited circumstances.

The classification of a USA revocable trust turns on the nature of the rights conferred by the trust, which depends on the drafting and proper law of the trust.[36] Only general comments are possible here.

Under a common form revocable trust, the settlor (the synonymous terms grantor, trustor, creator or donor are often used in American trust documentation) is sole trustee, the trust is revocable and the income and capital is paid to the settlor on demand. Section 603 of the America Uniform Trust Code[37] provides:

> While a trust is revocable [and the settlor has capacity to revoke the trust],[38] rights of the beneficiaries are subject to the control of, and the duties of the trustee are owed exclusively to, the settlor.

A USA revocable trust of this kind is not an IT/CGT settlement as the property is not held "in trust". This seems paradoxical, but the fact that

---

34 Also reported under the name *Re the AQ Revocable Trust* Supreme Court of Bermuda [2011] WTLR 373; [2011] TLI 23; 13 ITELR 260; 6 Tolley's Offshore Service Cases 15; accessible *http://www.gov.bm*

35 I am grateful to Ian Watson for his comments on this section. For other USA trusts, see Sanborn, "US tax classification of trusts", (2005) TQR Vol 3 issue 2 p.16 accessible to STEP members on *http://www.step.org*.

36 Each USA state is a separate common law jurisdiction, with its own trust law, ultimately derived from English law but with statutory and case law variations.

37 Accessible *http://www.nccusl.org*. The uniform code project is an attempt to standardise USA law. Adoption of uniform codes is far from universal, however, and each state adopting them may do so with variations. Some state statutes (eg, California Probate Code section 15800) impose rules almost identical in effect to UPC section 603, though independently of the uniform code project.

38 Square brackets in original, as the wording is intended to be optional.

American lawyers describe something as a trust does not mean that it is a trust within the meaning of the word as used in UK statutes.[39] In English law, "there is an irreducible core of obligations owed by the trustees to the beneficiaries and enforceable by them which is fundamental to the concept of a trust. If the beneficiaries have no rights enforceable against the trustees there are no trusts."[40] The USA revocable trust may appear at first sight to grant rights to beneficiaries, but during the lifetime of the settlor (or at least while the settlor is mentally competent) the rights are unenforceable and do not amount to "rights" at all.

If the settlor is not the sole trustee, there is a trust; but if (in the words of the Uniform Trust Code) "the duties of the trustee are owed exclusively to the settlor" it is considered that the USA revocable trust is a bare trust for UK tax purposes. For CGT, the settlor is absolutely entitled as against the trustee. A USA revocable trust of this kind is similarly not an IHT-settlement, since:

(1) if the settlor is sole trustee there is no trust;

(2) if the settlor is not sole trustee there is only a bare trust.

The property is not held in trust for persons in succession. The better view is that a USA revocable trust of this kind is also not equivalent in effect to a trust for persons in succession. The element of succession is that of a will. In other words, a USA revocable trust of this kind is in English law a bare trust and a testamentary disposition.[41] This view was adopted in *BQ v DQ*.[42]

Depending on the wording, a USA revocable trust of this kind may cease to be a bare trust, and become a settlement (for IHT and IT/CGT) if the settlor loses mental capacity. This could of course have significant UK tax consequences.

---

39 See 84.1.1 (Significance of foreign law classifications and terminology).

40 *Armitage v Nurse* [1998] Ch 241 at p.253. Likewise Hague Convention art.2 ("A trust has the following characteristics ... (c) the trustee has the power and the duty, *in respect of which he is accountable,* to manage, employ or dispose of the assets in accordance with the terms of the trust ...". The rule goes back to *Morice v The Bishop of Durham* (1804) 9 Ves Jun 399 at p.405: "There must be someone in whose favour the Court can decree performance."

41 See 84.5 (Bare trusts/nomineeships). Underhill & Hayton agree: *Law of Trusts & Trustees* (18th ed., 2010), para 4.8 fn1.

42 Also reported under the name *Re the AQ Revocable Trust* Supreme Court of Bermuda [2011] WTLR 373; [2011] TLI 23; 13 ITELR 260; 6 Tolley's Offshore Service Cases 15; accessible *http://www.gov.bm*

One could if desired draft a trust which meets the USA requirements to be a grantor trust and which is a settlement for IT/CGT and IHT purposes. It would need to be one where (during the lifetime of the settlor) the trustees owed duties to beneficiaries other than just the settlor.

84.7 *Garland* trusts

The distinctive feature of *Garland* trusts (unlike English law trusts) is that beneficiaries have no interest in the trust property. The right is *in personam* not *in rem*. In other respects *Garland* trusts are like English trusts. A *Garland* trust is in principle a settlement within the IT/CGT and IHT definitions.

The approach of the tax code is to make some statutory provision in relation to Scotland, and otherwise to ignore the problems.

For the income taxation of *Garland* trusts, and the trust law background, see 26.3 (Taxation of life tenant); 26.7.3 (Garland trusts); 26.8 (Baker or Garland trust jurisdiction?). This section considers IHT and CGT.

84.7.1 *Do Garland trusts confer an interest in possession in settled property?*

The question arises whether a beneficiary of a *Garland* trust should be regarded as having an interest in possession in settled property. (This question does not often matter for IHT for trusts made after 2006.)

"Interest in possession" is a concept of English trust law which has no equivalent in Scots trust law, and maybe in other trust laws. But that does not prevent a beneficiary under a foreign law trust from having an interest which is an interest in possession within the meaning of a UK tax statute. A beneficiary under a Garland trust has an "interest" and if that interest gives an entitlement to income, it is an interest "in possession".

However under a *Garland* trust, a beneficiary does not have an interest *in settled property*. The beneficiary does not have an interest in trust property at all.

In relation to Scots law trusts, the IHT problem is resolved by statute. Section 46 IHTA provides:

> In the application of this Act to Scotland,
> [1] [a] any reference to an interest in possession in settled property is a reference to an interest of any kind under a settlement by virtue of which

[i] the person in right of that interest is entitled to the enjoyment of the property or

[ii] would be so entitled if the property were capable of enjoyment,

[b] including an interest of an assignee under an assignation of an interest of any kind (other than a reversionary interest) in property subject to a proper liferent;

[2] and the person in right of such an interest at any time shall be deemed to be entitled to a corresponding interest in the whole or any part of the property comprised in the settlement.

There is no equivalent provision for CGT (except for proper liferents, which are not trusts). HMRC practice is to treat life tenants in *Garland* trusts as if they had an interest in possession in the settled property. The CG Manual provides:

> **31301 Scottish proper liferents** [October 2007]
> ... There are two ways in which a liferent [ie, life interest] can be set up. In the first case, where the interest is known as an improper liferent, the property is vested in trustees who administer the property and pay the income to the liferenter. In general the trustees have the power to sell the property in question and replace it by other property, whether land and buildings or other assets. On the death of the liferenter the provisions of s.72, s.73 and s.74 TCGA apply as appropriate.

A court applying a purposive approach may well reject as too subtle a distinction between an interest in settled property and an interest under a settlement which is not an interest in settled property. Since this will usually suit taxpayers, it will not often be challenged.

84.7.2 *Reversionary interest in Garland trusts*

Section 47 IHTA provides:

> In this Act "reversionary interest" means a future interest under a settlement, whether it is vested or contingent (including an interest expectant on the termination of an interest in possession which, by virtue of section 50 below, is treated as subsisting in part of any property)...

A beneficiary of a *Garland* trust may have a reversionary interest, within this definition, as although it is not strictly an interest in settled property, it is an interest under a settlement.

84.8 Foundation/*Stiftung*

84.8.1 *Terminology*

This section is concerned with non-charitable foundations, which are long established in Liechtenstein and civil law jurisdictions, and are now established by statute in many if not most tax haven jurisdictions. I focus on Liechtenstein foundations (*Stiftungen*) though I refer at points to other foundations.[43]

Foundation jurisdictions differ widely. One should not assume that foundations in all jurisdictions are so similar that they must be classified in the same way for UK tax purposes, just because they share the same name. One should not even assume that all foundations in the same jurisdiction must be classified the same way, as the drafting of the particular foundation's documentation may make all the difference.[44]

The word "foundation" is sometimes used in the UK as a name for a charity (eg "the British Heart Foundation") but the word has no specific technical meaning in English law. In the USA "private foundation" is a technical term used to describe a specific category of charities and NPOs, in short, those which receive their funds from one person and which are regarded as donor-controlled.[45] I am not concerned with charitable foundations here.[46]

84.8.2 *Is a foundation an IT/CGT settlement, or a company?*

A Liechtenstein foundation normally has legal personality. Biedermann explains:

> Since, in most cases, the Liechtenstein foundation has legal personality, it is subject to the general provisions concerning legal persons and it has a corporate structure with a board of foundation. The *in rem* aspect of

---

43 On this topic see Venables, *The Taxation of Foundations* (2010); Easun, "Trusts & Foundations", ITPA Journal Vol 5, No. 3; Baker, "Beneficiaries of Trusts and Foundations" accessible *http://www.taxbar.com/gitc.html*.

44 For instance, an entity which the USA is called a lifetime trust may (depending on drafting) be regarded in the UK as a testamentary disposition and not a trust: see 84.6 (American revocable trust (grantor trust)).

45 See US Internal Revenue Code § 509 (Private foundation defined).

46 For the question of whether foreign charities qualify for UK charity tax reliefs, see Kessler & Marre, *Taxation of Charities and Nonprofit Organisations* (9th ed., 2013) chapter 2 (Definitions of Charity) (online version *http://www.taxationofcharities.co.uk*).

> the beneficial rights under trusts, i.e. non-reachability of trust property by creditors of the trustee, is not necessary for foundations, since the foundation has its own personality. The beneficial rights under a foundation may be less strong, because there is no specific tracing possibility *vis-à-vis mala fide* purchasers and volunteers. However, this deficiency is overcome by the public faith principle, since anyone dealing with a foundation has to look at the objects and competence clause of a foundation in order to know whether a board of foundation is entitled to *e.g.* sell some specific foundation property.[47]

On the evidence of this passage it is considered that property in a foundation is not held "in trust". An essential (or almost essential)[48] characteristic of a trust is that "the assets constitute a separate fund and are not a part of the trustee's own estate".[49] A foundation does not have this characteristic: A foundation holds property, but there is only one fund, not a fund separate from the foundation's own assets (as would be the case for a trustee). So it is not an IT/CGT settlement.

There are of course other significant differences between a Liechtenstein foundation and a trust, in particular the beneficiaries of a foundation have different and somewhat weaker rights. But the failure to meet what the Hague Convention on the law applicable to Trusts identifies as a defining characteristic is crucial.

A foundation is a body corporate.[50] It is therefore a company for UK tax

---

47 Biedermann, "Foundations vs Trusts" [1993] PCB 283.

48 It is hard to make any comment about trusts without qualification. A charitable trustee incorporated under s.251 Charities Act 2011 might not constitute a separate fund. But that is an anomalous and unusual case and perhaps itself not a "trust" in the ordinary sense.

49 See Article 2 Hague Convention on the Law applicable to Trusts and on their Recognition. *Lewin on Trusts* (18th ed., 2008) regards the Hague Convention definition as "generally applicable": para 1-01. See too Hayton "Principles of European Trust Law" p.23 in *Modern International Developments in Trust Law* 1999, ed. Hayton: "While many mainland European jurisdictions have the functional equivalent of a charitable purpose trust in the guise of a foundation which has legal personality, we deliberately rejected extending our [conception of] trust to cover such functions. It is because a trust is not a company, not a corporate person, but a segregated fund owned by trustees, that different rules from those for companies developed for trusts."

50 See the quote from Biedermann set out above. The OECD commentary on the Model Treaty article 3(3) agrees: "... the term 'person' includes any entity that, although not incorporated, is treated as a body corporate for tax purposes. Thus, e.g. a foundation (*fondation, Stiftung*) may fall within the meaning of the term 'person'."

purposes. A foundation is therefore subject to UK corporation tax on its income and gains if it is UK resident and subject to income tax on UK source income at the basic rate if non-resident. The test of residence is the company test of central management and control.

A foundation is usually a close company as:

(1) The members of the board are directors.
(2) The members of the board are participators.
(3) The foundation is under the control of directors who are participators.[51]

However this depends on the constitution of the foundation.

A foundation is a settlement-arrangement[52] so it is a "settlement" for the purposes of s.87 TCGA.

As to whether a foundation is within s.13 TCGA, see 53.8 (Foundations).

84.8.3 *Foreign law views on foundations*

An Austrian Privatstiftung (non-charitable foundation) is classified as a company, not a trust, for the purposes of Canadian tax law:

> [39] ... the law of Austria does not recognize trusts as understood in Canadian law. However, it is evident that as a practical matter (and putting aside for the moment any income tax considerations), Herbert Sommerer may well have achieved many of the objectives that could have been achieved in a common law jurisdiction by settling a trust for Peter Sommerer, his spouse and their children. He did so by creating and endowing the Sommerer Private Foundation under the Austrian Private Foundations Act and naming Peter Sommerer, his spouse, and their children as beneficiaries and ultimate beneficiaries. But that does not mean as a matter of law that the creation and endowment of the Sommerer Private Foundation was the settlement of a trust, or that a trust existed or came into existence when the Sommerer Private Foundation bought the Vienna shares or the Cambrian shares from Peter Sommerer.
>
> [40] As mentioned above, an Austrian private foundation is a juridical person with the legal capacity to own property in its own right and to deal with its property on its own account. The legal right of an Austrian private foundation to deal with its own property is the same as the legal right of a Canadian corporation to deal with its own property. That is so

51 See 85.20 (Control test).

52 Assuming (as will generally be the case) that the bounty test is satisfied; see too 51.2 ("Settlement" and "trustee").

> despite the fact that the board of an Austrian private foundation must manage its affairs in furtherance of the purposes stipulated in its constating documents. The board of directors of a corporation is similarly constrained, in the sense that it must manage the affairs of the corporation in its best interests, subject to any terms and conditions in its constating documents.
>
> [41] A corporation does not hold its property in trust for its shareholders or members, except to the extent that a trust deed or an analogous legal instrument imposes the legal and equitable obligations of a trustee on the corporation with respect to specific corporate property. Assuming it is theoretically possible for an Austrian private foundation to hold its property in trust (that is, subject to conditions that are analogous to the legal and equitable obligations of a trustee in a common law jurisdiction), that possibility cannot be realized unless those conditions are formally established. Nothing in the constating documents of the Sommerer Private Foundation or the law of Austria, ... supports the conclusion that the right of the Sommerer Private Foundation to deal with its property is constrained by any legal or equitable obligations analogous to those of a common law trustee.
>
> [42] Looking at the situation from another point of view, a shareholder or member of a corporation, as such, is not the beneficial owner of any property or the corporation, and has no legal or equitable claim to the corporate property ... a shareholder or member has only an inchoate right to receive distributions of corporate property from time to time at the discretion of the board of directors, and to share in the distribution of the corporate property upon its dissolution. The same can be said of the interest of a beneficiary or an ultimate beneficiary in the property of an Austrian private foundation. Nothing in the Austrian Private Foundations Act or the constating documents of the Sommerer Private Foundation gives Peter Sommerer a legal or equitable claim to the corporate property that is different from that of a shareholder or member of a corporation.
>
> [43] For these reasons, I doubt that the Sommerer Private Foundation holds any of its property in trust for Peter Sommerer.[53]

Similar reasoning applies in the UK.

In the USA, a Luxemburg stiftung is classified for tax purposes as a

53 *Canada v Sommerer* 2012 FCA 207 accessible *http://www.canlii.org*. This adopted the criticism of the first instance decision made in the 2012/13 edition of this work para 79.6.3 (Foreign law views on foundations).

trust.[54] However the USA has statutory rules on entity classification which are different from UK tax law, so the USA material has no relevance in the UK.

84.8.4 *Is a foundation an IHT-settlement?*

Foundation property is normally held "for persons in succession" or "held with power to make payments out of the income". The question is whether a foundation is "governed by provisions equivalent in effect" to a trust. This raises a question of Liechtenstein law as to the effect of a foundation. Lorenz says:

> It now appears that the Liechtenstein Supreme Court has used Liechtenstein trust law as a basis for the development of a coherent pattern of principles applicable to all types of Liechtenstein asset planning devices, in particular foundations and establishments, and not just the trust …
> … the internal design of foundations will increasingly come to resemble that of trusts, and that disputes relating to foundations will increasingly be resolved by applying principles of trust law.[55]

Biedermann says:

> Operationally speaking, there is no difference between a family foundation and a family trust.[56]

HMRC say:

> In case of family foundations, business activity is not permitted. Accordingly, while a foundation has its own legal personality, its essence and purpose is to preserve and maintain assets for the beneficiaries, as is that of a trust.[57]

On the basis of this evidence, it is considered that a foundation is

---

54 IRS Memorandum AM2009-012 (Entity Classification of Liechtenstein Anstalts and Stiftungs), October 2009, *http://www.irs.gov/pub/irs-utl/am2009012.pdf*.

55 *Disputes involving Trusts*, ed. Vogt, 1999, p.213.

56 Biedermann, "Foundations vs Trusts" [1993] PCB 283. Noseda makes a similar point: "The Foundations (Jersey) Law 2009: A Civilian Perspective" [2010] The Jersey & Guernsey Law Review 48 at [13].

57 Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters, 11 August 2009 *http://www.hmrc.gov.uk/international/joint-declaration-lich.pdf*.

"equivalent in effect" to a trust and is therefore an IHT-settlement. (The contrary argument would focus on the word "equivalent", and state that since there are undoubtedly some differences, the two are not equivalent. The expression "equivalent in effect" is looking at the broad substance rather than absolute equivalence but where to draw the line is hard to tell.)

It is sometimes argued that a foundation cannot be an IHT-settlement if beneficiaries of the foundation have no enforceable rights and no interest in foundation property. But beneficiaries of a *Garland* trust have no interest in trust property. A charitable trust confers no rights at all, and a charitable trust is clearly an IHT-settlement. All that matters is that there is some legal mechanism which recognises their rights and prevents the board of a foundation treating the foundation property as their own.

84.8.5 *Is a foundation an interest in possession settlement for IHT purposes?*

Since a foundation is an IHT-settlement, the question may arise whether a beneficiary's interest under the settlement is an interest in possession. (This question does not often matter for IHT for foundations made after 2006.)

This raises two issues:

(1) What is the test for an "interest in possession". This is a question of UK tax law; "interest in possession" is a technical term of English trust law, and (subject to any particular provisions in the tax statute concerned) it will have its English trust law meaning.

(2) Whether any particular interest meets those requirements; this is a matter of applying Liechtenstein law to the document in question.

An interest in possession is a current right to current income. If a foundation confers such a right, the beneficiary has an interest in possession. Whether that should be regarded as an interest in possession *in settled property* is at first sight more doubtful. As a matter of property law, a beneficiary has no such right, just as a shareholder has no such right. However as "settlement" is given an extended meaning, it is tentatively suggested that the meaning of related expressions such as "interest in possession in settled property" should be given a comparable extended meaning. Thus a beneficiary has an IIP if they have the right to the income of the foundation as it arises.[58]

---

58 See 84.7.1 (Do Garland Trusts confer an interest in possession in settled property?).

Whether a beneficiary has the right to income as it arises depends on the drafting (construed in accordance with Liechtenstein law). At the borderline the distinction between IIP and non-IIP trusts is one of form rather than substance, and not appropriate to a foundation which is not even a trust, but merely equivalent in effect. In such cases one can only answer the question on the basis of "doing the best one can" and with the benefit of appropriate foreign law advice.

84.8.6 *Is a foundation transparent for IT purposes; nature of foundation distributions for IT*

The taxation of a UK resident beneficiary on a distribution from a foundation raises interesting and unexplored questions. It is suggested that a receipt from a foundation is classified as an annual payment and not a dividend or other distribution (even though a foundation is a company and not an IT/CGT trust).

If that is right, the position depends on the drafting of the power which the foundation uses to make or authorise the distribution.[59] If the receipt is classified as income, it is classified as an annual payment, like a trust distribution.

Where the terms of the foundation require distributions to a beneficiary, the distributions are income and the question is whether the foundation are classified as transparent under *Baker/Garland* principles.

If the receipt is classified as capital the position is more straightforward as the usual s.731 and s.87 rules will apply.

84.8.7 *HMRC view*

HMRC say:

> ... foundations ("Stiftungen") [are] to be characterised, recognised and treated as *trusts* for UK tax purposes.[60]

---

59 See 25.8 (Payment from discretionary trust: income or capital receipt?).

60 Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters, 11 August 2009 *http://www.hmrc.gov.uk/international/joint-declaration-lich.pdf*. This is subject to a disclaimer and qualification:

"The Government of the Principality of Liechtenstein has considered and agreed with HMRC the following written guidance and consistent approach on characterisation, recognition and treatment of legal entities and fiduciary relationships for purposes related to the MOU, provided that provisions under

TDSI Guidance Notes (October 2012)[61] para 2.3 provide:

> **Anstalts & Stiftungs**
> [1] Anstalts and Stiftungs are Liechtenstein business entities which are fiscally opaque. ...
> [2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit should be considered to belong to the settlor[62] and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.
> [3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust ... and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.

Point [3] assumes that a foundation can be transparent for IT which contradicts point [1].

HMRC do not refer to any statutory provisions but are clearly saying that in their view foundations are trusts for all tax purposes. It is true that HMRC recognise that there may be special circumstances, but in the absence of special circumstances, if it suits the foundation to take the view that the foundation is a trust for all tax purposes, including the IT/CGT definition, it could properly do so. That might be relevant, for instance, to obtain the benefit of ESC B18, or if a taxpayer wished to argue that a foundation was an interest in possession trust and transparent for income tax purposes.

Liechtenstein and UK law remain the same as currently as related to such characterisation, recognition, and treatment.
For avoidance of doubt, nothing contained herein is to affect the ability of affected persons to rely on UK law or practice permitting alternative characterisation, recognition and treatment. The parties further recognise that the ultimate UK taxation consequences for UK taxpayers will depend on the particular facts as is the case where UK or other common law entities or fiduciary relationships, such as trusts, are involved."

The same point is made in ToA draft guidance: **INTM600380 - General Conditions All cases: Income becomes payable to person abroad: person abroad - examples** "... Generally we treat ... a Stiftung like a discretionary trust."

61 *http://www.hmrc.gov.uk/taxon/guidance-notes.pdf.* For TDSI (tax deduction scheme for interest) see 18.18 (Withholding tax on interest from deposit-takers).

62 [Author's footnote] It is assumed that the foundation is a settlor-interested trust.

84.9 Dutch Foundation (Stichting)

A note on terminology. The German word *Stiftung* and the Dutch word *Stichting* are both translated by the English word "foundation". However the entities should not be regarded as having the same nature for UK tax purposes. Unless the context makes it clear, therefore, one should ideally not use the word "foundation" without specifying what type(s) of foundation is being referred to. When referring to Dutch entity, I use the word *Stichting* and prefer to avoid *Foundation*.

84.9.1 *Stichting Administratiekantoor (STAK)*

Article 2.285 of the Netherlands Civil Code provides:

> 1. A stichting is a legal person formed by means of a juridical act, that has no members, and that intends to carry out its objects, specified in its articles of incorporation, by using capital (property) which has been brought in for this purpose....
> 3. The objects of a stichting may not include the making of distributions to its founders (incorporators) or to those who are participating in its bodies or to others, except, as regards the latter, when these distributions are made for charitable (philanthropic) or social purposes.[63]

de Vries explains:

> In the corporate environment, as a vehicle for orphan structures, foundations are used to hold the shares in financing bodies. In an estate planning environment or employee benefit scheme the foundation can be a vehicle to hold shares and exercise the voting rights or shares, whereas the economic rights related to the shares are transferred through depository receipts to the beneficiaries. This structure is a popular means to address the fact that the separation of voting rights from economic rights on shares in Dutch limited liability companies is not possible. In such cases the board of directors of the foundation are formed by independent persons (in estate planning structures usually persons trusted by the family) or, for example, the management board of other entities in the structure that holds a larger share of the entity which shares are partly transferred to the foundation. The foundation in these structures is usually referred to as a STAK (*stichting administratiekantoor*). In the field of estate planning, foundations are used to own and manage estates whereby the foundation can have a

63 Netherlands Civil Code, available in English on *http://www.dutchcivillaw.com*.

purpose incorporated in the articles of association comparable to a 'letter of wishes', which mandates the board of the foundation to make funds of the foundation available for certain designated purposes, such as funding the education for certain beneficiaries.

...

On a closer inspection of the legal framework of the foundation, it is seen that a foundation is a separate legal entity under Dutch law, which is formed through the execution of a deed of incorporation by the civil law notary, and managed by its board of directors. The board of directors may consist of private individuals, but can also be legal entities, like other foundations or companies. Like other Dutch legal entities, a foundation can hold assets in its own name, can enter into agreements etc. A foundation must have a specific objective (for example, the financing of the education of family members, the protection of the family wealth, and management of certain assets), to be specified in its articles of association.

...

A further legal characteristic of a foundation is that it does not have members or shareholders, which is sometimes considered slightly odd by practitioners in common law jurisdictions, from the author's experience. The foundation can have beneficiaries, but the distribution prohibition (referred to above) establishes that the beneficiaries cannot be the same as the contributors or members of the board of the foundation (an important difference with the private foundation as indicated above regarding the distribution prohibition). A way to work around the distribution prohibition for a foundation may be to issue depositary receipts (*certificaten*) that give beneficial rights to assets that are legally owned by the foundation. It is common practice that through issuing depositary receipts the voting rights and economic rights of the assets (usually shares) are split: the voting rights of the shares remain with the foundation whereas the economic ownership of the assets rests with the holder of the depositary receipts. As referred to above, such a foundation is referred to as a STAK and is often used for asset protection or estate planning. Further a STAK may be used for employment benefit schemes. A STAK is in principle considered transparent for Dutch income tax purposes, and consequently the owners of the depository receipts will be taxed on income derived from the shares/assets held by the STAK. In the case of estate planning the board of the STAK will often be the parents whereas the depository receipts may be issued to the children. In such a way, the parents have control over the estate and can

decide upon distributions to the children.[64]

A STAK is not an IHT-settlement as there is no element of succession. It is not an IT/CGT settlement as it is not a trust (and if it were a trust, it would be a bare trust). There is usually no element of bounty, in which case it is not a settlement-arrangement.

A STAK is a company for tax purposes. However the more important question is what is the nature of the depositary receipt. It is tentatively suggested that the depositary receipt confers a proprietary interest on the holder and so is transparent.[65] The holder is treated for IT and CGT purposes as entitled to the dividends from the underlying assets held by the STAK. HMRC agree: they classify a Dutch stichting as transparent.[66] HMRC are probably considering a STAK here, though that is not expressly stated.

84.9.2 *Pension fund stichting holding Irish common contractual fund*

The Australian Revenue discuss a Dutch pension fund *stichting*:

Issue

Does Australia have the right to tax Australian sourced business profits that a Dutch Stichting (Stichting) receives as a unitholder in an Irish Common Contractual Fund (CCF), under Article 7 of Schedule 10 of the International Tax Agreements Act 1953 (the Netherlands Agreement)?

Decision

No. Australia does not have the right to tax the Australian source business profits the Stichting receives as a unitholder in a CCF under Article 7 of the Netherlands Agreement.

Facts

The Stichting is a legal entity incorporated in the Netherlands.

The Stichting is a pension fund whose sole purpose is to provide superannuation benefits for non-resident persons upon retirement or death.

The Stichting is exempt from income tax in the Netherlands under the tax laws of the Netherlands.

The Stichting has received a declaration from the Netherlands Inspector of Tax Administration to the effect that it is a resident of Netherlands for tax treaty purposes.

The Stichting is not a resident of Australia for the purposes of Australian tax.

The Stichting does not carry on business through a permanent establishment in Australia.

The Stichting is the only unitholder in an Irish CCF.

Irish CCFs are regulated by the European Communities (Undertakings for Collective

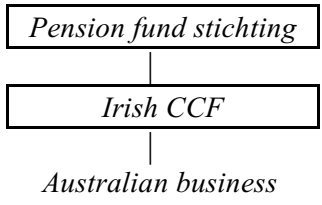
64 De Vries,"The Dutch Foundation" [2011] Journal of International Tax, Trust and Corporate Planning, p.299.

65 See 40.2.4 (Denmark, Germany and the Netherlands).

66 See 84.28 (HMRC official list of transparent and opaque entities).

Investment in Transferable Securities) Regulations 2003 (the Regulations). According to the Regulations a CCF is a contractual arrangement under which participants participate in the co-ownership of assets.
The CCF is not a resident of Ireland or Australia for the purposes of the tax treaty between Australia and Ireland.
The CCF receives Australian source business profits from investing the funds of the CCF.
The CCF does not carry on business through a permanent establishment in Australia.
The relationship between the manager and custodian of the CCF and the Stichting is considered a trust relationship for Australian tax purposes. The manager and custodian are the trustees, and the Stichting is the beneficiary.

I think the last sentence means that a CCF is transparent, which is also the HMRC view. Thus to summarise the structure:



Dutch resident; no Australian PE

Transparent; no Australian PE

Reasons for Decision
[The statement sets out art. 7 (business profits), art. 3 (definition of 'enterprise of one of the States'; these are not set out here as they follow OECD model form.]
Accordingly, for Article 7(1) of the Netherlands Agreement to apply to the Australian sourced business profits derived by the Stichting, the Stichting must be:
· a person
· a resident of the Netherlands, and
· an enterprise.
for the purposes of the Netherlands Agreement.

84.9.3 *Is a stichting a "person" for treaty purposes?*

The Australian Revenue say:

Is the Stichting a 'person' for the purposes of the Netherlands Agreement?
Article 3(1)(d) of the Netherlands Agreement defines the term 'person' to mean 'an individual, a company and any other body of persons'. The term 'company' is defined in Article 3(1)(e) of the Netherlands Agreement to mean 'any body corporate or any entity which is assimilated to a body corporate for tax purposes'. The term 'body corporate' is not defined for the purposes of the Netherlands Agreement, and in accordance with Article 3(3) of the Netherlands Agreement, the term takes its meaning from the tax laws of Australia unless the context otherwise requires.
As there is no definition of the term 'body corporate' under Australia's domestic tax law provisions, the ordinary meaning of the term applies as per tax treaty interpretation principles contained in Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.
The Butterworths Concise Australian Legal Dictionary Second edition defines a body

corporate as 'an artificial legal entity having separate legal personality'.
[The statement sets out Article 285 of the Netherlands Civil Law Code and continues:]
As the Stichting is created under Netherlands law and has a legal personality under Netherlands law, it should be recognised as a legal entity in Australia in accordance with the principle in *Chaff and Hay Acquisition Committee v Hemphill* (1947) 74 CLR 375 (Chaff's Case).
In Chaff's Case, it was found by the High Court that a committee constituted in South Australia under the Chaff and Hay (Acquisition) Act 1944 (SA) was a legal entity despite not being incorporated under South Australian law. Chief Justice Latham found that as the committee was a legal entity in South Australia as distinct from the legal personalities of the natural persons who constitute it, then it is by comity recognised as a legal entity elsewhere. His Honour went on to state (at 384-5) that the same principle applied to the recognition of bodies created by foreign law which have the rights and liabilities distinct from those of the natural persons who constitute them. Justice Starke J further stated (at 388) that 'recognition is given in the case of companies or artificial persons which have come into existence in countries whose law of incorporation is based on principles different from those of England and Australia'.
This principle is also recognised in the Foreign Corporations (Application of Laws) Act 1989. This Act applies in determining a question arising under Australian law where it is necessary to determine the question by reference to a system of law other than Australian law. Section 7(2) provides that any question relating to whether a body or person has been validly incorporated in a place outside Australia is to be determined by reference to the law applied by the people in that place.[67]
As the Stichting is a legal entity created by legal authority in the Netherlands to achieve certain purposes, the Stichting has the features of a body corporate under the ordinary meaning of the term. As such, the Stichting is a 'person' for the purposes of the Netherlands Agreement.

84.9.4 *Is a stichting treaty-resident?*

The Australian Revenue say:

> **Is the Stichting a resident of the Netherlands for the purposes of the Netherlands Agreement?**
> [Article 4 of the Netherlands Agreement provides:
> "For the purposes of this Agreement, a person is a resident of one of the States ... (b) in the case of the Netherlands, if the person is a resident of the Netherlands for the purposes of Netherlands tax but not if he is liable to tax in the Netherlands in respect only of income from sources therein."]

The Australian Revenue treat this issue briefly:

> The Stichting here has received a declaration from the Netherlands Inspector of Tax Administration to the effect that it is a resident of Netherlands for tax treaty

67 The same applies in the UK: see Dicey, Morris & Collins, *The Conflict of Laws* (15th ed., 2012), para 30R-009 (Status).

purposes. The Stichting therefore satisfies this requirement.

Article 4 of the Netherlands Agreement was not the OECD model form definition of residence, so the position may be different under UK tax law.

84.9.5 *Is a stichting an enterprise?*

The Australian Revenue say:

Is the Stichting an enterprise for the purposes of the Netherlands Agreement?
The High Court in *Thiel v Federal Commissioner of Taxation* (1990) 171 CLR 338; (1990) 21 ATR 531; 90 ATC 4717 considered the meaning of the expression 'the profits of an enterprise of one of the contracting states' in the Business Profits Article of the tax treaty between Australia and Switzerland.
Chief Justice Mason and Justices Brennan and Gaudron stated:

> this statement recognises that an activity, as well as a framework within which activities are engaged in, may constitute an "enterprise" for the purposes of the Agreement. Moreover, we agree with Sheppard J. in thinking that an enterprise "may consist of an activity or activities and be comprised of one or more transactions provided they were entered into for business or commercial purposes": (1988) 21 FCR 122 at p.146.

In carrying out the activities of a pension fund, the Stichting is considered to constitute an enterprise as the activities it conducts are entered into for business or commercial purposes.
Conclusion
Accordingly all the necessary elements of Article 7(1) of the Netherlands Agreement are satisfied by the Stichting in order for the taxing rights of the Netherlands and Australia to be determined under Article 7(1) of the Netherlands Agreement.
The Stichting does not have a permanent establishment in Australia and Article 7(1) of the Netherlands Agreement provides a residence-only taxing right to the Netherlands over the business profits of the Stichting. Accordingly, Australia, as the country of source of the business profits, does not have a right to tax the business profits under the Netherlands Agreement.[68]

84.10 Liechtenstein *Anstalt* (Establishment)

Liechtenstein Companies House explains the nature of an anstalt.[69] TDSI Guidance Notes (October 2012)[70] para 2.3 provide:

---

68 ATO ID 2008/62 (April 2008) accessible *http://law.ato.gov.au*

69 *http://www.llv.li/pdf-llv-aju-hr-merkblatt_zur_neueintragung_einer_anstalt.pdf* See too "Half Trust, Half Company, All Anstalt" Bulletin for International Taxation, 1999 (Volume 53), No 8.

70 Accessible *http://www.hmrc.gov.uk/taxon/guidance-notes.pdf*. For TDSI (tax deduction scheme for interest) see 18.18 (Withholding tax on interest from deposit-takers).
The same point is made in ToA draft guidance: **INTM600380 - General Conditions All cases: Income becomes payable to person abroad: person abroad - examples**

> **Anstalts & Stiftungs**
> Anstalts ... are Liechtenstein business entities which are fiscally opaque. The current HMRC view is that Anstalts should all be dealt with as if they are companies. For TDSI, this means that Anstalts should receive gross interest.

Despite this statement, and classification in the official list as "opaque", HMRC practice has not always been consistent.[71] The Liechtenstein disclosure facility takes a different approach:

> 1) An establishment ("Anstalt") in Liechtenstein to be characterised, recognised, and treated for UK tax purposes as follows:
> a) An establishment that according to its articles is permitted to undertake a business activity ("*nach kaufmännischer Art geführtes Gewerbe*"), and therefore is obliged to have an audit, to be characterised, recognised, and treated for UK tax purposes as a *company.*
> b) An establishment that according to its articles is *not* permitted to undertake a business activity ("*nach kaufmännischer Art geführtes Gewerbe*"), and therefore is *not* obliged to have an audit, to be characterised, recognised, and treated for UK tax purposes as follows:
> i) *An establishment with founder's rights or shares* to be characterised, recognised and treated as a *company*.
> ii) *An establishment with no founder's rights or shares* to be characterised, recognised and treated as a *trust.*
>
> For avoidance of doubt, in case of an establishment with founder's rights as used above, the founder (settlor) with founder's rights has full powers to decide upon who the beneficiaries are and to change the beneficiaries, and such powers are transferrable.[72]

In the USA, a Luxemburg anstalt is classified as a company for tax purposes.[73] However the USA has statutory rules on entity classification

---

"... Generally we treat an Anstalt like a company..."

71 Private correspondence.

72 Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters Signed on 11 August 2009 *http://www.hmrc.gov.uk/international/joint-declaration-lich.pdf.* This statement is subject to a disclaimer and qualifications set out at 84.8.7 (HMRC view).

73 IRS Memorandum AM2009-012 16 October 2009 (Entity Classification of Liechtenstein Anstalts and Stiftungs) *http://www.irs.gov/pub/irs-utl/am2009012.pdf.*

which are different from UK tax law, so the USA material has no relevance in the UK.

84.11 Liechtenstein Treuunternehmen

This entity is modelled on the US Massachusetts business trust.

The Liechtenstein disclosure facility records the HMRC view:

> 2) A trust enterprise ("Treuunternehmen") in Liechtenstein to be characterised, recognised, and treated for UK tax purposes in an analogous way as an establishment.[74]

This is controversial.

84.12 Liechtenstein Treuhandschaft

HMRC say:

> Trusts ("Treuhandschaften") ... [are] to be characterised, recognised and treated as *trusts* for UK tax purposes.[75]

84.13 Other Liechtenstein entities

The Liechtenstein disclosure facility provides:

> 1) The European Union harmonised company forms, such as "Aktiengesellschaft" or "AG"; "Gesellschaft mit beschränkter Haftung" or "GmbH"; "Societas Europaea" or "SE", to be characterised, recognised and treated as a *company* for UK tax purposes.
> 2) Entities formed as "Kommanditgesellschaft" or "KG" or "Kollektivgesellschaft" to be characterised, recognised and treated as a *partnership* for UK tax purposes.

84.14 Legal life interest (Northern Ireland)

A Northern Ireland legal life interest is rare in practice, except in home made wills. The CG Manual provides:

---

74 See above footnote.

75 Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters, 11 August 2009 *http://www.hmrc.gov.uk/international/joint-declaration-lich.pdf*. This statement is subject to a disclaimer and qualifications set out at 84.8.7 (HMRC view).

> **31303 Northern Ireland** [October 2007]
> The land law of Northern Ireland, except where there is specific legislation to the contrary, is basically the same as the pre-1925 law of England & Wales. Accordingly it is possible to have a legal interest 'limited for life'. Under Section 43(5) IHTA 1984 in such a situation the property is deemed to be settled property.

This is correct. Section 43(5) IHTA provides:

> In the application of this Act to Northern Ireland this section shall have effect as if references to property held in trust for persons included references to property standing limited to persons...

The Manual continues:

> There was no comparable provision for CGT until Section 63A TCGA 1992 was enacted in FA 2006 with effect from 6 April 2006. Under this provision where a person with a legal interest limited for life dies, a person who acquires in fee simple or fee tail in possession as a consequence of the former person's death is deemed to acquire all the assets forming part of the property at market value at death. This does not apply to land in Ireland outside Northern Ireland.

Section 63A TCGA provides:

> (1) The provisions of this Act, so far as relating to the consequences of the death of a person to whom property in Northern Ireland stands limited for life ("the deceased"), shall have effect subject to the provisions of this section.
> (2) A person who acquires property in fee simple absolute or fee tail in possession as a consequence of the deceased's death shall be deemed to have acquired all the assets forming part of the property at the date of the deceased's death for a consideration equal to their market value at that date.

This confers a tax free uplift on death[76] but does not make the legal life interest into a settlement for IT/CGT purposes. Thus if the life tenant and the remainderman sell their interests:

(1) the relief in s.76 TCGA does not apply.

---

76 This applies even if the life interest is not an estate IIP: the drafter of the 2006 reforms overlooked Northern Ireland life interests.

(2) the life tenant may qualify for CGT private residence relief but the remainderman will not qualify (unless they occupy the property as their main private residence, which would not be usual). The relief in s.225 TCGA will not apply.

In practice, if private residence relief may apply, it is better to create a classic settlement and not a legal life interest because then the property can be sold during the lifetime of the life tenant free of CGT.

84.15 Proper liferent (Scotland)

84.15.1 *Scots law background*

The CG Manual explains the Scots law background:

> **31301 Scottish proper liferents** [October 2007]
> In Scotland the expression 'liferent' is used to describe the situation where the income from particular property is to be paid to a person, the liferenter, for a specified period, generally his or her lifetime. At the end of the period the property will generally pass to a person known as the fiar.
> There are two ways in which a liferent can be set up ... In the second case, the title to heritable property (land and/or buildings) is held by the liferenter. In this situation he or she is a proper liferenter. A proper liferenter cannot dispose of a greater title than his own. He cannot dispose of the property in his will. On his death the property passes to the fiar.
> Where property in Scotland passes to a person for life under a will, and there is no suggestion that it is to be held by trustees, he has a proper liferent.

A proper liferent is rare in practice. I discuss it here because (aside from the intrinsic interest of the questions which arise) that sheds light on the treatment of civil law usufructs.[77] A proper liferent may be regarded as a Scottish version of the usufruct. Erskine states:

> The only one of these servitudes which has been received into our law,

---

77 See *Stronach's Exrs v Robertson* [2002] SC 540 at p.553: "Liferent and fee is a form of land tenure fairly infrequently used in the 21st century. We agree with the sheriff that its lack of popularity might well be attributable, at least in part, to the fiar's inability to control the actings of the liferenter during the currency of the liferent." Note that a trust is significantly different on this point.

is usufruct; which is defined by the Romans, a right which one has to use and enjoy a subject during life, without destroying or wasting its substance; which definition is well enough adapted to the nature of our liferents.[78]

84.15.2 *CGT treatment of proper liferent*

The CG Manual provides:

> **31301 Scottish proper liferents** [October 2007]
> ... A proper liferent does not make the relevant property settled property [for CGT].

That is correct: a proper liferent is not a trust.[79] The Manual continues:

> Section 43(4)(c) IHTA 1984 provides that it is settled property for IHT purposes. TCGA does not go so far, but Section 63 provides that the person entitled to possession on the death of a proper liferenter shall be deemed to have acquired all the assets forming part of the property at their market value at death.

Section 63 TCGA provides:

> (1) The provisions of this Act, so far as relating to the consequences of the death of a proper liferenter of any property, shall have effect subject to the provisions of this section.
> (2) On the death of any such liferenter the person (if any) who, on the death of the liferenter, becomes entitled to possession of the property as fiar[80] shall be deemed to have acquired all the assets forming part of the property at the date of the deceased's death for a consideration equal to their market value at that date.

The Manual concludes:

> The disposal or termination of a proper liferent may qualify for private

---

78 Institute II, Title IX, 39, However the Stair Memorial Encyclopaedia, Vol. 13, para. 1601 cites this passage from Erskine and says: "The historical development of liferents awaits examination. It is not clear whether the concept of liferent derived directly from the Civilian usufruct or was an indigenous - if analogous - concept which was subsequently identified by later writers as being the Civilian usufruct. The prevalence of the non-Civilian terminology of 'fee' and 'liferent' is perhaps evidence in favour of the latter possibility."

79 For the same reason a proper liferent was not regarded as settled property for Estate Duty purposes: *Dymond's Death Duties* (15th ed., 1973) p.303.

80 Some databases erroneously read "heir".

residence relief under section 222 TCGA as it is an interest in land.

As in Northern Ireland, this confers a tax free uplift on death[81] but it does not make the proper liferent a settlement for CGT purposes.

Thus if the liferenter and the remainderman sell their interests:

(1) The relief in s.76 TCGA does not apply.

(2) The liferenter may qualify for CGT private residence relief but the remainderman will not qualify (unless they occupy the property as their main private residence, which would not be usual). The relief in s.225 TCGA will not apply.

In practice, if CGT private residence relief may apply, it is better to create a classic settlement and not a proper liferent, because then the property can be sold during the lifetime of the liferenter free of CGT.

84.15.3 *IHT on proper liferent*

The IHT Manual provides:

> **16071 Introduction** [February 2006]
> The original view was that a proper liferenter was beneficially entitled to the property which was the subject of the liferent and that a proper liferent was a "settlement" within the meaning of [s.43 IHTA 1984] with the result that the liferenter fell to be treated as beneficially entitled to the settled property.[82]
> However the Board were advised that a proper liferenter was beneficially entitled only to his right to the liferent and not to the property itself so that on the death of a proper liferenter the liferenter was beneficially entitled to the liferent and not to the capital in which it subsisted. It follows that on the death of the liferenter the value to be placed on the proper liferent was nil.
> **16072. IHT position** [November 2013]
> Section 93 FA 1980 [now s.43(4)(c) IHTA] brought proper liferents into line with the settled property regime of the [IHTA] ...

Section 43(4) IHTA provides:

> In relation to Scotland "settlement" also includes...

---

81 This applies even if the liferent is not an estate IIP: the drafter of the 2006 reforms overlooked Scottish liferents.

82 This is considering a pre-2006 liferent, which would have conferred an estate interest in possession.

(c) any deed[83] creating or reserving a proper liferent of any property whether heritable or moveable (the property from time to time subject to the proper liferent being treated as the property comprised in the settlement);

Section 47 IHTA provides:

> In this Act "reversionary interest" ... in relation to Scotland includes an interest in the fee of property subject to a proper liferent.

Lastly, for completeness, s.142(7) IHTA provides that for the purposes of s.142 IHTA (deeds of variation):

> In the application of subsection (4) above to Scotland, property which is subject to a proper liferent shall be deemed to be held in trust for the liferenter.

84.16 Usufructs

84.16.1 *The property law background*

A discussion of the law(s) of usufructs[84] is not possible here. In outline, Article 578 of the French Code Civil provides:

> An usufruct is the right to enjoy property belonging to another, as if its owner, at the expense of preserving that property.[85]

The owner of the right is called "**the usufructuary**" and the owner of the property subject to the right is here called "**the encumbered owner**". (I think this is a clearer term than "bare owner" which would be a more literal translation of the French term *nu-propriétaire*.)

84.16.2 *Is a usufruct an IT/CGT settlement?*

The CG Manual provides:

---

83 Section 43(4) provides an artificially wide definition: "for the purposes of this subsection "deed" includes any disposition, arrangement, contract, resolution, instrument or writing."

84 I do not distinguish here between usufructs under different civil law jurisdictions, but it is possible that there are material differences; I would be grateful for the comments of any reader with expertise in these areas.

85 *L'usufruit est le droit de jouir des choses dont un autre a la propriété, comme le propriétaire lui-même, mais à la charge d'en conserver la substance.* The Code Civil is accessible in French on *http://www.legifrance.gouv.fr*.

> **31305 Other interests** [October 2007]
> ... A usufruct governed by French law would be regarded as a non-trust arrangement as it is broadly similar to a Scottish proper liferent.

This is clearly right. Thus if the usufructuary and the encumbered owner sell their interests:

(1) The relief in s.76 TCGA does not apply.
(2) The usufructuary may qualify for CGT private residence relief but the encumbered owner will not qualify (unless they occupy the property, which would be unusual). The relief in s.225 TCGA will not apply.

There is no CGT uplift on the death of the usufructuary.[86]

The result is a CGT discrimination against usufructs.[87] If the usufruct is in an EU jurisdiction, this discrimination is very difficult to justify, and it is suggested that an uplift on death should be available under EU law principles, and, arguably, private residence relief on a sale during the lifetime of the usufructuary.

If an individual creates a usufruct under which they retain an interest, this is a part disposal for CGT purposes as s.70 TCGA (transfers into settlement) does not apply. Some foreign tax laws (eg France) have rules to value the interests of the usufructuary and the encumbered owner for foreign tax purposes, but those rules do not apply for UK tax purposes, so the usual market value rules must be applied.

84.16.3 *Is a usufruct an IHT-settlement?*

HMRC say:

> HMRC has always been of the view that the definition of a settlement in section 43(2) IHTA 1984 means that a usufruct will more than likely fall to be treated as a settlement for Inheritance Tax purposes; although HMRC recognises that the arrangements differ between jurisdictions and the circumstances of each need to be considered. The effect is to

---

86 A Scottish proper liferent qualifies for the CGT uplift on death, and there is similar provision for Northern Ireland: s.63, 63A TCGA. However s.63 provision will not apply to a foreign law usufruct unless the phrase "proper liferenter" is construed to include a usufructuary in non-Scottish laws, which is a strained construction and inconsistent with the heading to the section ("Death: application of law in Scotland").

87 It is not possible to avoid this problem by creating a classic settlement instead of a usufruct, because civil law systems do not usually recognise trusts; even if a trust is theoretically possible, it is probably not practical for tax reasons or because it raises too many uncertainties.

> treat a usufruct as giving rise to an interest in possession in the property concerned.[88]

The question is whether, under the law of the usufruct, "the administration of the property is for the time being governed by provisions equivalent in effect to those which would apply if the property were held on trust for persons in succession." There is an element of succession, but there are important differences. There is no settled property and no trustees.[89] A usufruct is more like a lease for life or a legal life interest than a classic settlement. Overall it is sufficiently unlike a trust that it is suggested that the two should not be regarded as equivalent in effect, so it is not an IHT-settlement.[90]

It might be said that there would be an anomaly if:

(1) a usufruct is not an IHT-settlement; but
(2) a proper liferent in Scotland (which is a usufruct or usufruct-like entity) is an IHT-settlements.

But the boot is on the other foot: if a usufruct were an IHT-settlement, there would have been an anomaly under the legislation between the introduction of CTT in 1975 and the enactment of (what is now) s.43(4)(c) IHTA, during which time a proper liferent was not an IHT-settlement. The enactment of a provision dealing with Scots law liferents should not affect the position of foreign law usufructs.

HMRC newsletters are a useful means of addressing mundane administrative matters. The reader may think that a HMRC statement on the inheritance taxation of usufructs should have been fully explained, with reference to the relevant UK and foreign law sources.[91] It would also have benefited from consultation before the announcement. But there it is.

84.16.4 *IHT position if a usufruct is an IHT-settlement*

HMRC say:

---

88 HMRC, Trusts and Estates Newsletter (April 2013) *http://www.hmrc.gov.uk/cto/newsletter-apr13.pdf*

89 See too 51.2 ("Settlement" and "trustee").

90 This issue does not arise for proper liferents (Scotland) or legal life interests (Northern Ireland) since the last paragraph of the definition dealing with provisions "equivalent in effect" only applies to non-UK legal systems.

91 The Australian revenue practice is exemplary: see for instance 84.9.2 (Pension fund stichting holding Irish common contractual fund).

> [1] Prior to March 2006, the consequence of [the HMRC view that a usufruct was an IHT-settlement] was that a usufruct retained by the transferor did not give rise to a loss to their estate as the transferor remained beneficially entitled to the property under section 49(1) IHTA 1984. The property would continue to form part of the transferor's estate on death. If the usufruct was created in favour of another, the transaction would give rise to a potentially exempt transfer equal to the value of the property concerned and if in favour of the spouse/civil partner, exemption under section 18 IHTA 1984 would be available. HMRC is not aware that this approach was ever challenged.
> [2] Post March 2006, the consequences are rather different and
> [a] the creation of a usufruct will now give rise to an immediately chargeable transfer equivalent to the value of the property concerned and to relevant property.
> [b] It may give rise to a reservation of benefit in the property.
> [c] If the usufruct is in favour of the spouse/civil partner, [IHT spouse] exemption will no longer be available.
> [3] These changes are the natural consequence of the changes made to the Inheritance Tax treatment of settled property in 2006. Whilst the Inheritance Tax consequences of creating a usufruct over property are now much less favourable, HMRC remains of the view that, generally, a usufruct should be treated as giving rise to a settlement for Inheritance Tax purposes.[92]

Para [2] (although it does not say so) is considering the IHT consequences of a lifetime creation of a usufruct by a UK domiciled individual. The author has not thought very deeply about the IHT issues.

If a usufruct is an IHT-settlement, there would in principle be charges to IHT on the following occasions:

(1) On the creation of the usufruct.
(2) On ten-year anniversaries.[93]
(3) On the death of the usufructuary.

The property may qualify as excluded property, depending of course on the domicile of the settlor (and, if a spouse has an initial estate IIP, the domicile of the spouse).

DT relief will sometimes be available.

---

92 HMRC, Trusts and Estates Newsletter (April 2013) *http://www.hmrc.gov.uk/cto/newsletter-apr13.pdf*

93 Not for a usufruct created on death, which will qualify as an IPDI.

A common case is where an owner of property ("S") creates a usufruct under which S is the usufructary and a child is the encumbered owner. If the usufruct is an IHT-settlement, and S is UK domiciled, then:

(1) S makes a transfer of value equal to the value of the property.[94]
(2) The gift is a PET so far as attributable to the child's reversionary interest.[95]

That is so absurd as to make one question whether the analysis that a usufruct is an IHT-settlement can be correct.

(3) The gift is not a gift with reservation as the donor enjoys no benefit from the property given away (the reversion). The pre-owned asset rules need consideration.
(5) The interest of the encumbered owner is a reversionary interest and so in principle excluded property, which is advantageous if the encumbered owner is UK domiciled.
(6) The IHT spouse exemption would in principle be available on the creation of a usufruct on death, which is advantageous.

So depending on the circumstances it will sometimes be in the taxpayers' interest to accept the HMRC view, and sometimes to challenge it.

84.16.5 *Commentary*

There are two problems: (1) the question whether a usufruct is an IHT-settlement is not clear; and (2) if it is an IHT-settlement, the IHT treatment is absurd. The second problem cannot be solved unless one addresses the mess which is the Inheritance Taxation of trusts.[96] In the absence of such a reform, the second best course would be to solve the first problem (and avoid the second) by a provision (in my view confirming the existing law) that a civil law usufruct is not an IHT-settlement. Then at least taxpayers would know where they stand. The problem of transitional rules for existing usufructs would be tricky.[97]

---

94 See s.3(1) IHTA; the value of the usufructuary's interest is disregarded as an interest in possession in settled property: s.5(1)(a)(ii) IHTA.

95 See s.3A(1)(c) and 3A(2)(a) IHTA. The interest of the encumbered owner (the child) is excluded property but nevertheless it forms part of their estate (except on death).

96 As to which, see Kessler, "The Quest for Fair Inheritance Taxation of Trusts" (October 2012) accessible *http://www.kessler.co.uk/wp-content/uploads/2012/10/JK4393-Lecture-Trust-tax-reform-5.pdf*

97 Section 93(4) FA 1980 (turning Scottish proper liferents into IHT-settlements) offers a precedent.

I suspect that only EU pressure could give sufficient impetus to yield reform on this point.

The conclusion to draw for practical purposes is that UK domiciled individuals should not create a usufruct, except:

(1) by will; or
(2) if the value of the property falls within the nil rate band(s) of the owner(s); or
(3) if DT relief is applicable.

84.17 Société civile and société en nom collectif

The former International Tax Handbook provided:

> **304. Company and partnership distinguished**
> A company, therefore, acts for itself and not as agent or representative of its members. When profits arise they arise to the company and not to the shareholders. The shareholders have no right to them as profit. The rights of the shareholders include the right to a dividend when formally declared. In a partnership, on the other hand, each partner is the agent of the other partners. The profits arise to each partner according to the provisions of the partnership agreement. It is the existence of that agency relationship which distinguishes a partnership from a company. It is broadly true to say that a partnership does not have, as a company does, distinct legal persona but the presence of legal persona is not in itself conclusive. In Scotland a partnership is a distinct legal entity but there is, at the same time, an agency relationship between the firm and its members and between its members. That agency relationship is the hallmark of partnership and characterises the Scots partnership as a partnership rather than as a company. Considerations of this sort are important when dealing with some unfamiliar European company cum partnership creations. The French Société Civile is one such body and the Société en nom Collectif is another. Broadly speaking we regard the first as a company the second as a partnership. Both have legal personality but in the former case the profits arise to the body itself and in the latter case we take the view that the profits arise to the partners.
> ...
> **1673. Establish facts**
> The first stage is one of factual enquiry and in relation to any appeal procedure is a matter for the Appeal Commissioners. It can be a difficult stage – even for trained Revenue lawyers. Experts have been known to differ and in a case about these bodies *Dreyfus v IRC* 14 TC 560 we

think the Commissioners came to a wrong decision and we do not follow the Courts ruling. The case involved a French SNC and the Courts said it was a company, being guided by the Commissioners' finding of fact about foreign law. We – after listening to expert advice – think it analogous to a partnership. This question of foreign law is difficult. Where the foreign law is a common law it will often share basic concepts with English law and that eases things a little. But if the foreign law is a civil law – a written code of law – the chances of a communications gap developing between a foreign expert adviser and an English lawyer seeking his advice are much greater.

There are no hard and fast rules governing this question of foreign law; every association has to be considered separately and in the light of its Articles of Association or equivalent code. We look for indicators as to whether the Association carries on the business itself or whether the participators do so jointly; and whether the profits accrue directly to the participators or whether they accrue to the Association which then distributes them to the participators. These conclusions should then help us decide whether the members of the Association are carrying on a trade, profession or vocation solely or in partnerships and, if so, whether the income is immediately derived by the member from the carrying on of that trade.

84.17.1 *Société civile immobilière*

The Employment Income Manual provides:

> **11371 Homes outside the UK owned through a company: General background** [January 2009]
> ...Meaning of company
> Company is defined in section 992 ITA 2007 as any body corporate or unincorporated association other than a partnership, a local authority or a local authority association. This wide definition is not restricted to companies registered in the UK and includes a number of entities formed under foreign law through which individuals may acquire homes outside the UK. Such entities will generally be classified as opaque for UK tax purposes. Examples include the ownership of a home in France through a "Societe Civile Immobiliere" (SCI) or in the United States through a Limited Liability Company (LLC).

The view that a SCI is a company for UK tax purposes is controversial.[98]

98 See Frimston and Urquhart, "La Vie en France" Taxation, 13 Jun 2002 (Vol 149, Issue 3861), p.296.

A société civile is classified as a partnership in the UK/France IHT DTA.[99] The introduction of benefit in kind foreign homes relief and the France/UK DTA have made the issue somewhat less important but it still matters.

The issue arose in *Joseph Carter v Baird* 72 TC 303 where a company sold land and purchased a SCI. The company claimed roll-over relief which only applied on a purchase of land. The company failed since it acquired an interest in the SCI and not land. Unfortunately the question of whether an SCI was transparent for CGT was not argued and the necessary expert evidence was not put to the general commissioners. (The litigant appeared in person and was not represented by counsel). The case therefore has no authority at all, and on another occasion there is nothing to stop a taxpayer putting forward the argument for transparency, properly supported by evidence.

84.18 Jersey general and limited partnerships

A Jersey general partnership is transparent.[100]

HMRC classify a Jersey limited partnership as transparent in the official list.

84.19 Foreign limited liability partnership

References to a LLP in UK legislation are references to UK incorporated LLP (unless the context otherwise requires).[101] It is considered that the statutory rules which (generally) make a UK LLP transparent for tax purposes[102] do not apply to a foreign LLP.

HMRC agree. Business Income Manual provides:

> **82145 Limited Liability Partnership: International aspects** [December 2013]
> *UK branches of overseas LLPs*
> The tax treatment of a UK branch of an overseas LLP, and the members

99 See 69.6.2 (Treaty situs: France and Italy). See too John Avery Jones "Characterisation of Other States' Partnerships for Income Tax", [2002] BTR at p.425.

100 *Padmore v IRC* 62 TC 352; see Jersey Law Commission "The Jersey Law of Partnership" (consultation paper, 2008) para 21.12 ("Viewed as a whole, in fact the law of partnership of [England and Jersey is] essentially the same...").

101 See 41.8.1 (Definition of LLP).

102 See 41.8 (Limited liability partnership); 82.34.3 (Situs of LLP).

> of such a LLP, depends on how the foreign entity is regarded for the purposes of the UK taxation provisions. Where the foreign LLP is regarded as a 'body corporate' for the purposes of the UK Taxes Acts the profits of the UK branch will be chargeable to CT. On the other hand if it is regarded as a partnership then members are separately liable to Income Tax on their share of the branch's profits under the legislation for partnerships. The Limited Liability Partnership Act 2000 only applies to UK registered LLPs.

This discrimination would however be in breach of EU law so foreign LLPs, in Member States at least, may be treated as transparent.

HMRC classify a Jersey LLP as opaque in the official list. This is controversial.[103] However the issue seems unimportant because (partly as a result of the HMRC view and partly due to burdensome Jersey law requirements) only 14 Jersey LLP have been registered at present.[104]

84.20 Hindu undivided property

The CG Manual provides:

> **31305 Other interests** [October 2007]
> ... a case involving Hindu Undivided Property would be regarded as a discretionary trust rather than an unincorporated association.

84.21 Japanese tokkin

HMRC regard a tokkin as transparent. The INTM provides:

> **355160 Claims by Japanese "Tokkin" funds** [February 2006]
> 'Tokkin' is an abbreviation of 'tokutei kinsen', and means 'designated monetary trust'.
> Cash or other assets for this type of fund are deposited by the investor(s) with a trustee who manages them on behalf of the investor(s), and in accordance with his/her/their instructions. The tokkin is set up and managed under the terms of a written agreement between the parties, drawn up under Law No 62 of 21/4/1922 of Japan.
> Because the Dividends and Interest Articles of the convention provide for relief **only to the beneficial owner** (INTM332000) of the income, claims in respect of income paid to tokkin funds **must** be made by the

---

103 Walker, "Limited Liability Partnerships: True Partnerships" [1998] JLR 1 argues that a Jersey LLP is a partnership in the ordinary sense of the word. In *R v IRC ex p. Bishopp* 72 TC 322 the Court was asked but refused to decide the point.

104 *https://www.jerseyfsc.org/registry/documentsearch* accessed 18 June 2014.

beneficial owner of the tokkin (the 'investor(s)'above), and **cannot** validly be made by the tokkin's manager.

So if you see a claim or supporting voucher which makes any reference to tokkin, you should ensure that you consider only claims made by the beneficial owner, that is, the **original investor**, in respect of his/her/their share in the tokkin.

There is no reason why a single investor should not own **all** the funds in a tokkin, but you should make certain that your claim has been made by the beneficial owner and not by the trustee, or an investment manager.

The original investors/beneficial owners may be either individuals or companies.

But it should be clear in either case that **no** relief can be due to the tokkin **itself**.

84.22 Korean Hapja Hoesa

The Australian Revenue have guidance on this subject:

Classification of a Korean Hapja Hoesa for Australian income tax purposes

Issue

Is the Korean Hapja Hoesa a company pursuant to the definition within section 995-1 of the Income Tax Assessment Act 1997 (ITAA 1997)?

Decision

Yes. The Korean Hapja Hoesa is a company within the meaning of section 995-1 of the ITAA 1997.

Facts

The Hapja Hoesa is a legal form of corporation, which may be established under the Korean Commercial Act (Commercial Act). The Hapja Hoesa is also a private equity fund which is regulated by the Korean Indirect Investment Asset Management Business Act (IIAMBA).

In essence, the Hapja Hoesa is an unlimited investment specialty vehicle that is established for the purpose of investing the assets of the entity into the shares or equity of other entities - with the purpose of increasing the value of such entities through participation in the management of the entities or improving the business structure or control structure of the entities. The Hapja Hoesa may be used only for private equity investment purposes.

Currently under Korean legislation, a Hapja Hoesa has the following features:

- a Hapja Hoesa is incorporated, and is formed by registering its incorporation (Article 144-5(2) of the IIAMBA; Article 172 of the Commercial Act);
- a Hapja Hoesa has a legal personality that is separate from the members (Article 171(1) of the Commercial Act);
- a Hapja Hoesa does not have partners, it has members (Article 268 of the Commercial Act);
- a Hapja Hoesa has members with limited liability and members with unlimited liability (Article 144-3 of the IIAMBA; Article 268 of the Commercial Act);

· a Hapja Hoesa has articles of incorporation (Article 144-5 of the IIAMBA; Article 178 of the Commercial Act);
· a Hapja Hoesa exists for a specific term, which must be specified in the articles of incorporation, but after the term expires, the Hapja Hoesa may continue with consent of all or some members (Article 144-5(1) of the IIAMBA; Article 229 of the Commercial Act);
· a member's interest in a Hapja Hoesa is referred to as a share (Article 197 of the Commercial Act);
· in order to transfer their share in the Hapja Hoesa, a member needs the consent of other members (Article 197 of the Commercial Act);
· members can transact with the Hapja Hoesa (Articles 199 and 275 of the Commercial Act);
· subject to limitations for Limited Liability Members, members are jointly and severally liable if assets of the company are insufficient to satisfy its obligations (Articles 212 and 279(1) of the Commercial Act);
· distributions by the Hapja Hoesa are referred to as 'dividends' (Article 279(1) of the Commercial Act).

The articles of incorporation of this particular Hapja Hoesa include the following terms:

· a Limited Liability Member may not transfer any part of their interest in the Hapja Hoesa without the consent of all Unlimited Liability Members;
· an Unlimited Liability Member may not transfer any part of their interest without the consent of all members;
· a Limited Liability member may not withdraw from the Hapja Hoesa without transferring their interest, and the transfer of an interest requires the consent of all Unlimited Liability Members;
· a member does not have a right to a distribution of distributable cash. Instead, a resolution of members is required before any profits can be distributed;
· meetings of the Hapja Hoesa will be convened by the Manager or on request of members;
· a member has one vote per unit of their interest in the Hapja Hoesa;
· members may pass resolutions on dissolution of the Hapja Hoesa; extension or reduction in the term of the Hapja Hoesa; approval of distributions;
· business cannot be transacted at a meeting of the Hapja Hoesa unless a quorum is present;
· the Hapja Hoesa will be dissolved on expiration of its term; with a resolution of the Members; on bankruptcy or insolvency; on an order of the court; or if the Korean Financial Supervisory Commission denies or cancels registration.

Reasons for Decision

'Company' is defined in section 995-1 of the ITAA 1997 as:

(a) a body corporate; or

(b) any other unincorporated association or body of persons;

but does not include a partnership or a non-entity joint venture.[105]

As the term 'body corporate' is not defined in Australia's income tax legislation, the

105 The same applies in the UK; see 84.4 (Meaning of "company").

ordinary meaning of the term applies. The Butterworths Concise Australian Legal Dictionary Second edition defines a body corporate as 'an artificial legal entity having separate legal personality'.

Being an entity that was created by registration, and that has separate legal personality, the Hapja Hoesa is a 'body corporate'. Consequently, it will be a company under paragraph (a) of the definition of 'company' in section 995-1 of the ITAA 1997, providing that it is not also a partnership.

Section 995-1 of the ITAA 1997 defines 'partnership' as:

(a) a body of persons (other than a company or limited partnership) carrying on business as partners or in receipt of ordinary income or statutory income jointly; or
(b) a limited partnership.

The Hapja Hoesa has some features commonly associated with a partnership, and some features associated with a company.

The following features favour characterisation of this particular Hapja Hoesa as a company.

· a resolution of members is required before profits can be distributed. This indicates that profits belong to the Hapja Hoesa, and that the members are not in receipt of income jointly;
· distributions are referred to in the Commercial Act as 'dividends' rather than as a share of profits;
· the Hapja Hoesa was formed by registration of its incorporation, whereas a partnership is generally formed by a partnership agreement between the partners;
· the Hapja Hoesa has members rather than partners;
· the Hapja Hoesa has articles of incorporation, and not a partnership agreement;
· the Hapja Hoesa has a form of perpetual succession. It will not terminate on the withdrawal of a member, as is the case with a partnership. Instead, it will continue until the occurrence of one of the events specified in its articles of incorporation.

The features which favour characterisation of this Hapja Hoesa as a partnership include:

· to withdraw from the Hapja Hoesa a Limited Liability Member in effect needs the consent of all Unlimited Liability Members;
· members' interests are not freely transferable; in order to transfer their share in the Hapja Hoesa, a member needs the consent of other members.

The predominance of characteristics favours classification as a company rather than a partnership. Further, as the Hapja Hoesa does not have partners who carry on its business or who receive income jointly, it is not a partnership for the purpose of the definition of 'partnership' or 'company' in section 995-1 of the ITAA 1997.

As the Hapja Hoesa is a body corporate and not a partnership, it follows that it is a company within the meaning of section 995-1 of the ITAA 1997.[106]

It is considered that the same reasoning should apply in the UK.

84.23 Dutch bewind

Kortmann and Verhagen say:

---

106 ATO ID 2010/27 (28 January 2010) accessible *http://law.ato.gov.au*

> The *bewind* cannot be characterised as a trust in the sense of Article 1 of the Principles. A trust in the sense of the Principles only exists in situations where the trustee legally owns the assets to be managed, which is not so in the case of *bewind*. In the case of *bewind* the beneficiary is legal owner of the assets to be managed. There are, however, restrictions on the beneficiary's right to dispose of the assets placed under *bewind*. Either the legal owner cannot dispose of these assets at all, or he can only do so subject to the *bewind*. The *bewindvoerder*, as the administrator is usually called, acts in the case of *bewind* only as agent for the owner of the assets (the beneficiary). Because the assets to be managed are not legally owned by the *bewindvoerder*, the assets remain unaffected by the bankruptcy of the *bewindvoerder*.[107]

On this basis it is considered that a bewind is a bare trust.[108]

84.24 Netherlands Fonds voor gemene rekening (closed funds for mutual account)

In 2010 the UK and the Netherlands reached the following agreement regarding the application of the UK/Netherlands DTA to investors in closed funds for mutual account *fonds voor gemene rekening* ("closed FGR"):

> This Agreement applies to closed FGRs formed in conformity with the Decree of 11 January 2007, CPP2006/1870M, Dutch. Gov. Gaz. No 15, 2007. A closed FGR can act as a pooled investment vehicle for the assets of pension funds and other investors. The closed FGR invests these assets on behalf of those investors.
> The competent authorities of the Netherlands and the UK agree that a closed FGR[109] is fiscally transparent.
> A closed FGR can also consist of several closed FGRs as described in par. 4 of the Decree of 11 January 2007, CPP2006/1870M, Dutch. Gov. Gaz. No 15, 2007. Such an umbrella fund is also fiscally transparent.

---

107 Hayton, Kortmann and Verhagen, *Principles of European Trust Law, Law of Business and Finance* Vol 1,(1999) p.199. Similarly Gretton "Trusts Without Equity" (2000) 49 Int'l & Comp. L.Q. 599: "Though it functions as a trust, the *bewind* is not a trust, for a simple reason: the location of legal title is the reverse of the trust."

108 See 84.5 (Bare trusts/nomineeships).

109 [Footnote original] Various translations of 'Fonds voor Gemene Rekening' are possible, such as 'fund for mutual account' or 'fund for joint account'.

> Since a closed FGR is fiscally transparent, all income and gains derived by the fund from the fund assets are allocated to the investors in the closed FGR in proportion to their participation in the fund.
> *Request for application of the benefits of a Convention on behalf of the participants*
> A closed FGR which is established in the Netherlands and which receives income arising in the UK may itself, represented by its fund manager or its depository, in lieu of and instead of the investors in the closed FGR, claim the benefits of an agreement for the avoidance of double taxation to which the UK is a party and which is applicable to those investors on behalf of those investors in the closed FGR.
> Such claims may be subject to enquiry and, where requested, a fund manager or depository shall provide relevant information which may include a schedule of investors and allocated income relevant to a claim.
> A closed FGR may not make a claim for benefits on behalf of any investor in the closed FGR if the investor has itself made a claim for benefits in respect of the same income. If a closed FGR intends to make a claim for benefits on behalf of an investor, the fund manager or its depositary should clearly communicate this to the investor to avoid duplicate claims in respect of the same income.
> This Agreement shall be subject to regular review.

84.25 US S-Corps and LLCs

In UK law the terms "company" and "corporation" are used more or less as synonyms (the latter word having perhaps slightly grander overtones). But in US law, a corporation and a limited liability company are different types of entity.

84.25.1 *LLCs: US company law background*

I take the US company law background from Field, "Checking in on Check-the-Box" 42 Loy. L.A. L. Rev. 451 (2009):[110]

> In 1977, in an effort to develop a vehicle that provided owners corporate-like protection from liability for the entity's debts while attempting to achieve pass-through tax treatment under the Kintner regulations, the Wyoming legislature enacted the country's first legislation authorizing LLCs. LLCs combined very desirable characteristics- "limited liability for all members, partnership features

110 *http://digitalcommons.lmu.edu/llr/vol42/iss2/4*. I omit some footnotes for reason of space.

such as dissolution at will and lack of free transferability, and members' ability to participate in control without risking loss of their limited liability." ...

In 1988, the IRS finally resolved the issue of the tax classification of an LLC formed under Wyoming's LLC statute.[111] In a published revenue ruling, the Service concluded that any LLC formed under Wyoming's LLC statute to carry on a business and divide the gains therefrom would necessarily (by virtue of the terms of the LLC statute itself) lack the corporate characteristics of continuity of life and free transferability of interests, and therefore would be classified as a partnership for federal tax purposes. The Service reached this conclusion despite the fact that "neither the managers nor the members of [the LLC] are personally liable for [the LLC's] debts and obligations.

After this IRS pronouncement clarifying the federal tax classification of LLCs, demand for LLCs grew rapidly, and states quickly began enacting their own LLC statutes. Some of these state statutes, like Wyoming's LLC statute, were "bullet-proof," causing any LLC formed thereunder to necessarily lack at least two corporate characteristics, thereby automatically resulting in partnership classification.[112] Other state statutes were sufficiently flexible so as to allow the LLC to qualify as either a partnership or a corporation for federal tax purposes, depending on the terms of the specific LLC agreement.[113]

This flexibility afforded under some state LLC statutes "highlight[ed] the failure of the resemblance test.[114] One commentator explained that, "[p]ractically speaking, there is no difference between a closely-held entity that is organized as an LLC and one that is organized as a corporation .... Left unchanged, two very different tax regimes will govern entities with almost identical management and perhaps even

---

112 [Footnote original] See, e.g., COLO. REV. STAT. ANN. §§ 7-80-101 to -1101 (West Supp. 1994); MICH. CoMP. LAWS ANN. §§ 450.4101-.5200 (West 1994); NEV. REV. STAT. ANN. §§ 86.011-.571 (West 1994); S.D. CODIFIED LAWS §§ 47-34-1 to -59 (1994); VA. CODE ANN. §§ 13.1-1000 to -1073 (West 1993); W. VA. CODE §§ 31-1A-1 to -69 (Cum. Supp. 1994).

113 [Footnote original] See, e.g., DEL. CODE ANN. tit. 6, §§ 18-101 to -1107 (1992); MO. STAT. ANN. §§ 359.70-908 (West 1994) (both allowing flexibility regarding transferability of interests and centralized management). See generally Robert R. Keatinge et al., The Limited Liability Company: A Study of the Emerging Entity, 47 BUS. LAW. 378, 425-30 (1992) (discussing the application of the Kintner factors to LLC statutes from various states); Miller et al., supra note 14, at 586-600 (discussing "bullet proof' versus flexible LLC statutes).

114 [Footnote original] Hobbs, supra note 21, at 517.

> similar financial structures."[115] The failure of the corporate resemblance test was also illustrated by professional corporations and limited partnerships, which are also business organizations that could be classified for tax purposes as partnerships under the corporate resemblance test while retaining significant corporate features like limited liability.[116] Moreover, given the bright line rules set forth in the Kintner regulations and the flexibility afforded under the applicable state business statutes, practitioners were often able to create LLCs and other business entities with a carefully tailored set of rights and responsibilities so as to achieve tax classification as either a corporation or a partnership, as desired by the client, while retaining significant features of the other classification.[117]

To a UK reader, it seems paradoxical to say that a LLC may be a partnership for tax purposes; but only if one forgets that company in foreign law may not have the same meaning as company in UK tax law. One must (try to) look at the position unbiased by the terminology.

84.25.2 *Transparency*

The DTR Manual provides:

> **DT19853A United States of America: United States limited liability companies** [September 2011]
> Generally speaking, United States federal income tax is charged on the profits of LLCs on the basis that they are fiscally transparent, ie tax is imposed on the members of the LLC and not on the LLC itself.
> However, for the purposes of UK tax we have taken the view in relation to those LLCs that we have so far considered that they should be regarded as taxable entities and not as fiscally transparent. Accordingly we tax a UK member of a LLC by reference to distributions of profits made by the LLC and not by reference to the income of the LLC as it arises.

---

115 [Footnote original] Id. at 517-18.

116 [Footnote original] Seeid. at 481-510.

117 [Footnote original but abbreviated] *Littriello v. U.S.*, 484 F.3d 372, 376 (6th Cir. 2007), cert. denied, 128 S. Ct. 1290 (2008) ("These unincorporated business entities had the characteristics of both corporations and partnerships, combining ease of management with limited liability, and were increasingly structured with the Kintner regulations in mind, in order to take advantage of whatever classification was thought to be the most advantageous.").

This view was upheld in *Anson v HMRC* where a Delaware LLC, taxed in the US as a partnership, was held to be opaque for IT purposes.[118]

Tax Bulletin 29 also contained a concession but the problem is now dealt with in the 2001 treaty, see 59.15 (US/UK DTA). Also see 84.30.4 (Ordinary share capital: Delaware LLC).

84.25.3 *Treaty-residence of LLC and S-Corp*

The Canadian Revenue Agency say:

> **US S-Corps and LLCs**
> The Department views U.S. S-Corps to be resident in the United States for the purposes of the Convention. This view is based on the fact that they are "liable to tax" under the Internal Revenue Code (IRC) unless they make an election to be treated as a partnership. Furthermore, notwithstanding the election, an S-Corp. would be taxed in the United States on its world-wide income if certain conditions are not met.
> The Department recognizes that the above position is arguably inconsistent with its view that U.S. LLCs are not resident in the U.S. for the purposes of the Convention. [The Department continues to be of the view that a U.S. LLC that is treated under U.S. tax law as a partnership and which is therefore not liable to tax in the United States, is not a resident of the United States for the purposes of Article IV of the Convention.] Possibly if the Department had had the knowledge and experience it now has in the area of residency determination when it formed its opinion regarding the residence of U.S. S-Corps, it may have reached a different conclusion regarding the residence of U.S. S-Corps.
> In the context of the foreign affiliate legislation, a U.S. LLC which is treated as a partnership under the IRC and which is a foreign affiliate of a resident of Canada would qualify as resident in the United States (i.e., a designated treaty country) under paragraph 5907(11.2)(b) of the Income Tax Regulations provided that such LLC was resident only in the United States under the common law test of residency.[119]

---

118 [2013] STC 557. This will need to be reviewed when the case is final. The decision concerned only this particular Delaware LLC, and since there is wide freedom to vary the terms of a Delaware LLC, it may not be of general application. However I understand that the LLC did not in fact have any particularly unusual features.

119 *http://www.cra-arc.gc.ca/E/pub/tp/itnews-16/itnews-16-e.html* (The Agency go on to comment on Barbados exempt insurance companies, but that is too specialist to be considered here.) For practice under the USA DTA, see 59.16.3 (US partnerships and LLCs).

84.26 Capital contribution

84.26.1 *Company law background*

Capital contributions are a common method for Delaware companies to raise additional capital. The CG Manual explains the company law background:

> **43500 General** [October 2010]
> The company law provisions of some foreign jurisdictions, notably the USA, provide for the making of capital contributions to companies. A capital contribution is a contribution to the equity capital of a company, but is not made in exchange for shares issued to the contributor and it does not constitute a separate asset in its own right. See INTM503050 where any equity function arguments are raised.
> An overseas company receiving a capital contribution may treat it in a number of ways, depending on the law of the foreign jurisdiction concerned and the conditions attaching to the payment. These may give the company a choice whether to designate the contribution as 'surplus' or as 'capital'. Amounts designated as 'surplus' may be available for distribution to shareholders, subject to solvency requirements. Amounts designated as 'capital' may only be repayable by way of a capital reduction. A company's balance sheet will generally show capital contributions made to it as an item of shareholders' funds separate from paid up share capital. Capital contributions may be described, for example, as 'additional paid in capital'.
> Capital contributions are not recognised under UK company law and if a payment is not made as part of the terms of issue of shares, it is possible it is either a loan or a gift. If a UK taxpayer contends that a sum paid to an overseas company is a capital contribution rather than a loan or gift, evidence to support that contention should be sought.
> For example if a UK company suggests a payment to an overseas affiliate is a capital contribution rather than a loan or gift there should be evidence of the appropriate treatment in the company accounts. If however there is a possibility that the money can be repaid, it is likely to be a debt within the loan relationships regime, see CTM51200. It is therefore necessary to examine all the circumstances surrounding the money transfer before coming to any conclusion as to what the nature of the payment is. If however agreement cannot be reached as to the nature of the payment and therefore the tax consequences (see CG43501 and CG43502 below), the decision lies with the Tribunals and the Courts.
> Occasionally a capital contribution may be made to a UK company. As capital contributions are not a concept formally recognised within UK

company law, a contribution received by a UK company should be reported within distributable reserves either as a gift or possibly a donation. If however it can be repaid in any circumstances it should be considered as a loan falling within the loan relationships regime.

The International Manual also makes some comments:

502050 Issues affecting equity function cases [April 2012]
... Capital contributions
As mentioned in INTM502010, company law provisions of some foreign jurisdictions, notably the USA, allow for the making of capital contributions to companies. A capital contribution is a contribution to the equity capital of a company. It is not a loan and creates no obligation to transfer economic benefit to the maker of the contribution.
In the UK there is no company law provision regarding capital contributions. If a UK company receives a capital contribution it will appear as such on the balance sheet within shareholders' funds. If the company makes a capital contribution, it will normally be included in the accounts as an added cost of investment in a subsidiary.
If a UK company contends that a sum paid to an overseas affiliate is a capital contribution rather than a loan, HM Revenue & Customs can only accept the contention if there is evidence supporting it. For example, there should be a written agreement that a capital contribution has been made rather than a loan, and evidence of the appropriate treatment in the company accounts. If there is a possibility that the money can be repaid, it is a 'money debt' under the loan relationships legislation. It is necessary to examine all the circumstances surrounding the money transfer before making a decision. From HMRC's point of view, the amount contributed should not be distributable.

In *Fenston v HMRC* [2007] STC (SCD) 316 the position was explained as follows:

... assuming that at all relevant times the assets of the Company exceeded its liabilities, ... as a result of the Contributions, the state of the Company's stock changed in the sense that the amount of funds distributable with respect to the Shares as a dividend or upon liquidation was increased by the amount of the Contributions.
Under Delaware law, the funds available for payment of dividends, if and when declared by a corporation's board of directors, are payable out of "surplus". 8 Del. C.§ 170. "Surplus" is defined in relation to "capital". "Capital" with respect to no par stock, such as the Shares, is defined as that portion of the consideration received by a corporation for the issued shares of its capital stock that the directors determine to be capital, or if

no such determination is made, the amount of consideration received. 8 Del. C. § 154. The excess, if any, at any given time, of the net assets of the corporation over the amount so determined to be capital shall be "surplus". 8 Del. C. § 154. "Net assets" means the amount by which total assets exceed total liabilities. 8 Del. C. § 154. Therefore, the "surplus" of a corporation is an amount equal to the total assets of the corporation, minus the total liabilities of the corporation, minus the capital of corporation, minus the total liabilities of the corporation, minus the capital of the corporation (as just described). Here, the Contributions increased the Company's net assets, and thus its surplus, thus increasing the amount of funds the Company could lawfully have distributed to the trustees (as stockholders) as a dividend.

With respect to entitlement to distributions on dissolution, when a corporation dissolves, its assets are held in trust for the benefit of creditors, and if creditors are paid in full, the stockholders. Accordingly, when a corporation dissolves it must first pay or provide for its creditors, both fixed and contingent, in full before any distribution can be made to stockholders. However, once creditors are paid or provided for, any residual assets are to be distributed to the corporation's stockholders. 8 Del. C. § 281. As described above, the Contributions increased the Company's total assets. If the Company had been dissolved immediately after such Contributions had been made (which the trustees, as the sole stockholders, could have done pursuant to Section 275(c) of the General Corporation Law, 8 Del. C. § 275(c), then the amounts the trustees (as stockholders) would have been entitled to receive as stockholders upon dissolution with respect to the Shares would [have] been increased by the amount of the Contributions assuming, in each case, that amounts would remain for distribution to the stockholders following the payment in full of the Company's creditors.

Therefore, the Contributions would have increased the amounts that could have been distributed with respect to the Shares either as a dividend or as a liquidating distribution.'

84.26.2 *Capital contribution: Tax analysis*

The CG Manual then turns to the tax analysis:

43501 Made under terms of share issue [February 2006]

A shareholder may make a capital contribution to a company at the same time as the shareholder acquires shares in the company. If the capital contribution is made as part of the terms of issue of the shares, then the capital contribution should be accepted as consideration given wholly and exclusively for the acquisition of the shares within TCGA 1992, Section 38(1)(a). If a capital contribution is made as part of the terms of

a share issue which is treated as a reorganisation for capital gains purposes, then the capital contribution should be accepted as consideration given for the new holding for the purposes of TCGA 1992, Section 128(1). The amount of the capital gains deduction will remain subject to the other general rules, such as TCGA 1992, Section 17 and TCGA 1992, Section 128(2), see CG14530+ and CG51840+-

So far the law is fair. However the Manual continues:

43502. Other contributions not allowable [January 2008]
Where shares are disposed of in a company to which a capital contribution has been paid a claim may be made for a deduction in respect of that contribution in the capital gain computation. The claim will normally be for the contribution to be allowable as enhancement expenditure under Section 38(1)(b) TCGA 1992.
Although a capital contribution will typically affect the value of the shares in the company to which the contribution is made, it does not represent either
[1] expenditure on the shares,[120] or
[2] expenditure reflected in the state or nature of the shares at the time of their disposal.
The Special Commissioners decision in the case of *The Trustees of the F. D. Fenston Will Trusts v HMRC* (SpC589/07) confirmed that a capital contribution which is not made as part of the terms for the issue of shares is not, in the absence of anything to indicate that the rights and privileges attaching to the shares have been enhanced, an allowable deduction within Section 38 TCGA 1992 when shares in the company are disposed of. In particular, the capital contribution does not represent enhancement expenditure within Section 38(1)(b) TCGA 1992.
In applying this decision it may be argued there are circumstances were the tax result will be distorted if the amount of tax payable takes account of value realised, directly or indirectly, by a shareholder from a capital contribution, but the capital contribution itself is not reflected in allowable expenditure for capital gains purposes. Below are some examples where such distortion may be alleged.[121]
[1] A capital contribution is returned by a company to its shareholders as a dividend or distribution and they are taxed on the distribution but

120 Author's footnote: Point [1] is wrong and directly contradicted by the decision in *Fenston* but it would be sufficient if HMRC are right on point [2].

121 Author's footnote: "Distortion" is a euphemism for unfairness, and "alleged" is tendentious since the unfairness of [2] and [3] is obvious and undeniable.

> the shareholder will have had no deduction for the contribution. Our view is that a dividend or distribution is paid out of the surplus of the company so therefore is not a direct return of the capital contribution paid by the shareholder (in which case it is probably a loan). The nature of the receipt is changed when a dividend or distribution is made in comparison with the time when the capital contribution was paid.
>
> [2] A capital contribution is retained by the company at a time when there is a sale of shares in the company. The contribution may be reflected in an increased consideration for the disposal of the shares but a capital gains deduction will not be given.
>
> [3] There is similar scope for distortions where a capital contribution is followed by a share exchange, reconstruction or amalgamation treated as a share reorganisation for capital gains purposes, see CG52500+. This is then followed by a disposal of the new holding for an amount which reflects the capital contribution made to the company in which the original shares were held, and the capital contribution is not allowable expenditure on the original shares.
>
> In these last two cases, unless the capital contribution resulted in a change in the rights and privileges attaching to the shares, and that change is reflected in the nature of the shares at the time of their disposal, it is not an allowable deduction within Section 38(1)(b) TCGA 1992 when those shares in the company, or replacement shares in that or a different company acquired by virtue of a share reorganisation are disposed of.

Section 38(1)(b) TCGA allows a deduction for:

> the amount of any expenditure wholly and exclusively incurred on the asset by him or on his behalf for the purpose of enhancing the value of the asset, being expenditure reflected in the state or nature of the asset at the time of the disposal ...

In *Fenston*, the Special Commissioners correctly held that the capital contribution was expenditure "on the asset for the purpose of enhancing the value of the asset." Unfortunately they held that the expenditure was not reflected in the state or nature of the asset at the time of the disposal:

> 23 ... [1] Further, 'state and nature' for these purposes must be something other than merely the value of the asset—otherwise this phrase would add nothing to the immediately preceding words.
>
> [2] In this case the capital contributions did not result in any increase in the number of shares in issue, or result in any change in the rights or restrictions attaching to the shares. The only effect of the capital

> contributions was to increase the surplus of the company—which would increase the amount available for distribution to shareholders, and therefore presumably the value of the shares. We do not consider this sufficient for the expenditure on the capital contributions to be reflected in the state and nature of the shares, either at the time the expenditure was incurred or at any time subsequently.

Point [1] is wrong[122] and point [2] is not in the least convincing. It is considered that the decision ought not to be followed, though a taxpayer who challenges it risks litigating to the Court of Appeal.

The CG Manual discusses the possibility of relief under the last part of s.38(1)(b) TCGA which allows a deduction for "expenditure wholly and exclusively incurred by them in establishing, preserving or defending his title to, or to a right over, the asset."

> There may also be cases where companies call on their shareholders to provide further capital to meet a specified purpose, in circumstances where a shareholder who fails to provide the additional funds may lose the entitlement to the shares held. In this situation, depending on the particular facts, the shareholder may be able to establish that the additional payment represents expenditure on preserving or defending the title to the shares within the terms of Section 38(1)(b) TCGA 1992.

84.26.3 *Planning implications*

The tax planning advice is that companies should if possible be funded by subscriptions for shares or loans, and not by capital contributions, because the expense of the capital contributions will in most cases be disallowed for CGT purposes (or else the taxpayer will have to litigate to a high level to obtain them).

The HMRC view that "If there is a possibility that the money can be repaid, it is likely to be a debt" mitigates some of the unfairness of the treatment of capital contributions by reducing the number of occasions where a transaction is categorised as a capital contribution.

---

122 The words "reflected in the state or nature of the asset" are needed to cover this situation: suppose T spends £x on a kitchen in T's home. 15 years later the kitchen is replaced by a new kitchen. The £x was "incurred on the asset for the purpose of enhancing the value of the asset" but was not "reflected in the state or nature of the asset" at the time of disposal. In this case it is sensible to disallow the capital expenditure in a CGT computation.

84.26.4 *Commentary: Fairness and the tax system*

Fenston raises an interesting question of policy, leaving aside the narrower legal question of whether it was rightly decided by the Tribunal. Assuming this was an issue where two views of a legal provision were possible, it was a case where one view lead to a fair and sensible result - tax on an economic gain. The other view lead to a patently unfair result. There can be no doubt about that.

(1) Adopting the traditional view summarised in the slogan that "there is no equity in a taxing statute" a tax administration would be expected to take any point. The only criterion is the prospect of success in a court:

> The Inland Revenue is not slow - *and quite rightly* - to take every advantage which is open to it under the taxing statutes for the purpose of depleting the taxpayer's pocket. And the taxpayer is, in like manner, entitled to be astute to prevent, so far as he honestly can, the depletion of his means by the Revenue.[123]

(2) The more modern view pays much more regard to fairness and "the right amount of tax." On this view the appeal should not have been taken, and the decision to take the appeal is greatly to be regretted. One might perhaps adopt the view that fairness applies in favour of HMRC but not the taxpayer; but no-one has had the temerity to advocate that.

Of course the consequence of unfair taxation may be to some extent to increase the tax yield, but unfair tax law has an intangible cost in that it brings the UK tax system into disrepute. There seems no prospect of legislative reform, indeed such reform would difficult to draft. This is another reason for hoping that an appeal will eventually overturn *Fenston:* that would restore credibility to the UK tax system. But there it is.

84.27 USA limited partnership

The Australian Revenue have guidance on this subject:

---

123 *Ayrshire Pullman Motor Services v IRC* 14 TC 794. (The passage is well known for the rhetoric that immediately preceded this: "No man in this country is under the smallest obligation, moral or other, so to arrange his legal relations to his business or to his property as to enable the Inland Revenue to put the largest possible shovel into his stores.")

US Limited Partnership: whether it is a company for the purposes of Article 10 of the US Convention

Issue

Is a United States (US) limited partnership (US LP), which is treated as a partnership for US federal tax purposes, a company for the purposes of Article 10 of the Convention between Australia and the US contained in Schedules 2 and 2A to the International Tax Agreements Act 1953 (the US Convention)?

Decision

No. A US LP which is treated as a partnership for US federal tax purposes is not a company for the purposes of Article 10 of the US Convention.

For the purpose of the US Convention, US LP is neither a 'body corporate' nor 'an entity which is treated as a company or body corporate for tax purposes'. Consequently it is not a company for the purposes of Article 10 of the US Convention, and does not qualify for either of the reduced rates for certain cross-border inter-corporate dividends flowing between Australia and the US.

Facts

US LP is a limited partnership established under US (Delaware) state law (the Delaware Revised Uniform Limited Partnership Act (DRULPA)).

A limited partnership under the DRULPA is formed upon the execution and filing of a certificate of limited partnership under section 17-201 of the DRULPA.

As a limited partnership formed under the DRULPA, US LP is an unincorporated hybrid business entity having features commonly associated with both a business carried on by partners as partners and with a company.

The DRULPA does not incorporate a limited partnership, nor does it provide that a limited partnership is a body corporate.

US LP is a separate legal entity, and exists as such until cancellation of the certificate of limited partnership under paragraph 17-201(b) of the DRULPA. Section 15-201 of the DRULPA also provides that US LP has separate legal personality distinct from its partners.

US LP is 'for all purposes a partnership', per section 15-202 of the DRULPA.

US LP is treated as a partnership (and so is fiscally transparent) for US federal tax purposes and not as a taxable unit.

All income derived by US LP is subject to US tax in the hands of its US resident partners. All partners are US resident corporations.

US LP is a 'person' under Article 3(1)(a) of the US Convention.

US LP is a 'resident' of the US for tax treaty purposes within the meaning of Article 4(1)(b)(iii) of the US Convention, because Article 4(1)(b)(iii) treats a US partnership as a US resident for tax treaty purposes to the extent that the income it receives is subject to US income tax either in its hands or in the hands of a partner.

US LP is not treated as a company by the US for tax treaty purposes because it is treated as a partnership for US federal tax purposes.

US LP owns all the shares in an Australian resident company. During the income year the Australian resident company paid an unfranked dividend (not assessable income and not exempt income) to US LP, which was legally and beneficially entitled to that dividend.

US LP would be taxed as a company under Australian domestic law (Division 5A of the Income Tax Assessment Act 1936, ITAA 1936) if it derived Australian source assessable income. US LP is not a resident of Australia under section 94T of Division 5A of the

ITAA 1936.

US LP is not a 'foreign hybrid limited partnership' under section 830-10 of the Income Tax Assessment Act 1997 (ITAA 1997) as it is not a CFC (per paragraph 830-10(1)(e)) of the ITAA 1997.

Reasons for Decision

To qualify for benefits under the US Convention the claimant must first be a 'person' and a 'resident' for the purposes of the US Convention. In this case US LP, being a US domestic partnership, is both a 'person' and a US 'resident' according to the terms of the US Convention. Note that the US Convention is unusual in that it applies treaty benefits for income derived through fiscally transparent entities such as a partnership, at the level of the entity (in this instance US LP).

Article 10 of the US Convention provides that certain cross-border inter-corporate dividends flowing between Australia and the US are either:

- subject to a maximum of 5% rate of source country tax if the person beneficially entitled to those dividends is a company which holds directly at least 10 per cent of the voting power in the company paying the dividends (Article 10(2)(a) of the US Convention); or
- exempt from source country tax where the person beneficially entitled to the dividends is a company that has owned shares representing 80 per cent or more of the voting power of the company paying the dividends for a 12 month period ending on the date the dividend is declared, and satisfies certain other conditions (Article 10(3) of the US Convention).

The words of the US Convention are quite specific. For the reduced dividend withholding tax rates under Article 10(2)(a) or Article 10(3) of the US Convention to apply to an unfranked dividend paid by an Australian resident company, the person beneficially entitled to the dividend must be a 'company'. Here, the 'person' beneficially entitled to the dividends paid by the Australian resident company is US LP.

Article 3(1)(b) of the US Convention defines 'company' for the purposes of the Convention 'unless the context otherwise requires', to mean 'any body corporate or any entity which is treated as a company or body corporate for tax purposes'.

Accordingly, for the purposes of our analysis, US LP will be a 'company' for the purposes of the US Convention if:

(a) it is a body corporate; or

(b) it is an entity that is treated as a company or body corporate for tax purposes -

unless the context of the US Convention otherwise requires.

(a) Is US LP a ' company' for the purpose of the US Convention by virtue of being a ' body corporate' ?

US LP is not a 'company' for the purpose of the US Convention by virtue of being a 'body corporate' for Australian purposes.

The term 'body corporate' is not defined in the US Convention. Thus, in accordance with Article 3(2) of the US Convention, the term will generally take its meaning from the taxation laws of the country applying the tax treaty (being in this case Australia), 'unless the context otherwise requires'. As 'body corporate' is not defined in Australia's domestic income tax law legislation, the ordinary meaning of the term in Australia may then apply (see the tax treaty interpretation principles set out in paragraphs 63 to 71 of Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements).

The *Butterworths Australian Legal Dictionary*, 1997 defines a 'body corporate' as 'an artificial legal entity having separate legal personality'. The Macquarie Dictionary, Fourth

edition, 2005 defines 'body corporate' in its legal context, as 'a person, association or group of persons legally incorporated in a corporation'. Generally a 'body corporate' is established under an Act of Parliament or under a statutory procedure of registration, such as the Corporations Act 2001 (refer to paragraphs 22-23 of Taxation Ruling IT 2634 and paragraphs 30-34 of Miscellaneous Taxation Ruling MT 2006/1).

As US LP is created under Delaware state law and has a legal personality under that law, it should be recognised as a legal entity in Australia in accordance with the principle in *Chaff and Hay Acquisition Committee v Hemphill* (1947) 74 CLR 375.

While US LP is a legal entity having legal personality, it is essentially quite different in character from the bodies which are incorporated under corporations law in Australia. For example, while a corporation continues in existence until it is dissolved notwithstanding changes in its membership or business, a limited partnership formed under the DRULPA is usually formed for a limited period of time and terminates in the same way as a partnership. A corporation in Australia has perpetual succession, a personality that is continuous and free transferability of interests. US LP does not. Further, the partners of US LP derive the profits made by US LP, and a partner's individual share of the profits in US LP is ascertained in accordance with its interest in US LP, rather than on the basis of distributions made.

Notwithstanding, as US LP is an artificial legal entity having a form of separate legal personality, it is prima facie a 'body corporate' under the ordinary meaning of the term in Australia. Although, generally a 'body corporate' has the 'ability to continue in existence indefinitely and to keep its identity regardless of changes to its membership' (see paragraph 30 of MT 2006/1) and US LP does not enjoy such a continued existence. But, as highlighted above, the requirement in Article 3(2) of the US Convention to in this case interpret an undefined term such as 'body corporate' in accordance with Australian taxation law, applies only if the 'context' does not require an alternative interpretation .... [The statement makes some general observations on treaty interpretation[124] and continues:]

Paragraph 12 of the OECD Commentary on Article 3 emphasises that the interpretation set out in the 'undefined terms' provision applies 'only if the context does not require an alternative interpretation'. It adds that the 'context' is determined in particular by the intention of the Contracting States, as well as 'the meaning given to the term in question in the legislation of the other Contracting State (an implicit reference to the principle of reciprocity on which the Convention is based)'. However, US federal tax law does not specifically define the term 'body corporate'.

In this case, the OECD Commentary on the definition of 'company' is particularly relevant to the context of the term 'body corporate'. Paragraph 3 of the OECD Commentary on Article 3 provides the following:

> 3. The term "company" means in the first place any body corporate. In addition, the term covers **any other taxable unit** that is treated **as a body corporate according to the tax laws** of the Contracting State in which it is **organised**. The definition is **drafted with special regard to the Article on dividends**. The term "company" has a bearing only on that Article, paragraph 7 of Article 5, and Article 16. [Emphasis added]

It follows from the OECD Commentary's statement that the second limb of the term

---

124 Referring to TR 2001/13; see 57.6 (Interpretation of DTAs: ordinary meaning & purposive construction) and following paragraphs.

covers any other taxable unit, that the first limb of the definition of 'company' is designed to deal only with entities which are bodies corporate under general law and also taxable units under tax law (which is a central consideration in applying the terms of Australia's tax treaties).

While the requirement for the entity to also be a 'body corporate' for tax law purposes under the first limb is not explicit, treaties should be interpreted more 'liberally' than domestic legislation to smooth over the gaps, imprecision and ambiguities in the treaty text in a way that addresses the context and meets the object and purpose of the treaty... Where the context of a term allows a specific tax law meaning and a non-tax law meaning, the former should prevail (see paragraph 68 of TR 2001/13).

In addition, it is clear from the OECD Commentary on Article 3 that the question of whether a dividend recipient is an entity 'treated as a body corporate' for tax purposes must be made by reference to 'the tax laws of the Contracting State in which it is organised' - and not the state of source. Thus, paragraph 3 of the OECD Commentary on Article 3 provides with regard to the terms 'company' and 'body corporate' that the relevant taxation laws to consider are those of the country in which the entity was created (i.e. being the domestic laws that apply to the entity). The 'context' requires an examination of US taxation law and not Australian taxation law to determine whether a US entity is a 'company' for the purpose of qualifying for the reduced rate of withholding tax on inter-corporate dividends.

Hence, in determining whether an entity is treated as a 'body corporate' for tax treaty purposes, reference is not made to the tax law of the country applying the treaty (in this case Australia), unless the entity was organised there. Specifically, as indicated above, the 'context' surrounding the terms 'company' and 'body corporate' in the US Convention, for the purpose of US LP qualifying for the either of the reduced rates of withholding tax on the unfranked dividends paid by the Australian resident company, requires an examination of US taxation law.

Accordingly, to determine whether US LP is a 'body corporate' under the US Convention, the relevant consideration is where US LP was organised. US LP was not organised in Australia, but in the US. Hence, the potential Australian tax treatment of US LP (that is, that the entity can be treated as a company for Australian tax purposes by virtue of Division 5A of the ITAA 1936) is irrelevant. Rather, only the US tax treatment of US LP is relevant.

US LP is not a taxable unit and so is not treated and taxed as a 'body corporate' for US federal tax purposes - but is treated and taxed as a partnership.

Finally and importantly, paragraph 3 of the OECD Commentary on Article 3 emphasises that the definition of 'company' is '**drafted with special regard to the Article** on dividends' and 'the term "company" has a bearing only on that Article, paragraph 7 of Article 5, and Article 16.'

Paragraphs 10-11 of the OECD Commentary on Article 10 explains the rationale behind reduced taxation rates for inter-corporate dividends as follows:

> 10. On the other hand, a lower rate (5 per cent) is expressly provided in respect of dividends paid by a subsidiary company to its parent company. If a **company** of one of the States owns directly a holding of at least 25 per cent in a company of the other State, it is reasonable that **payments of profits by the subsidiary to the foreign parent company** should be taxed less heavily to avoid recurrent taxation and to facilitate international investment. The realisation of this intention depends on the **fiscal**

> **treatment of the dividends** in the State of which the **parent company is a resident**....
> 11. If a partnership is **treated as a body corporate under the domestic laws** applying to it, the two Contracting States may agree to modify sub-paragraph (a) of paragraph 2 in a way to give the benefits of the reduced rate provided for parent companies also to such partnership. (Emphasis added)

Paragraph 2 of Article 10 of the OECD Model Tax Convention is not materially different from paragraph 2 of Article 10 in the US Convention, with the exception of the differences in the percentage holding thresholds in the respective treaties.

Klaus Vogel on Double Tax Conventions, Vogel, K et al 1997, 3rd edition, Kluwer Law, The Hague, makes the following statements (at pages 583-584 and 599) about paragraph 2 of Article 10 of the OECD Model Tax Convention:

> Art. 10 is still completely geared to the 'classical' system of company taxation... and is, consequently, based on the conception that it is appropriate to subject income derived by a company (within the meaning of Art. 3(1)(b)MC) to a tax of its own distinct and separate from the tax imposed on the distributions received by a company's shareholders ... the maximum rates on inter-company dividends should differ from those on 'all other' dividends.... Such preferential treatment, however, applies only where direct investments are held by companies and does not apply where a substantial interest is held by an individual or a partnership....
>
> If, under the law of its State of residence, a partnership is considered a body corporate, but is ... not itself subjected to tax ... there would be no justification for allowing it to benefit from the limited rate of 5 per cent, because its interposition actually does not result in any double taxation.

It is apparent, from all of the above, that the intention of Article 10(2) of the OECD Model Tax Convention is to provide reduced rates of withholding tax for dividends derived by companies from direct investments on a reciprocal basis. It would be contrary to the intention of Article 10(2) if the reduced inter-corporate dividend withholding tax rate was to apply where the tax law of the resident country treated the beneficial owner of the dividends as a partnership.

Specifically, in the case of US LP, it would be inappropriate for a partnership formed under US state law and treated as a partnership for US tax purposes, to be able to access the inter-corporate rate of withholding tax for dividends under either Article 10(2) or Article 10(3) of the US Convention. The purpose behind Article 10(2) and 10(3) is to prevent multiple layers of taxation of corporate economic groups. Where the recipient does not have tax imposed (that is, because it is treated as a partnership in its state of residence), the rationale for granting the reduction in (or exemption from) withholding tax disappears.

The context of Article 10 and the OECD Commentary requires the implicit inclusion in the first limb of the definition of 'company', that a 'body corporate' is a taxable unit under the relevant taxation laws. Further, the relevant taxation laws are clearly the domestic laws affecting the entity - that is, those laws under which the entity is organised or created.

US LP is not a taxable unit and not a 'body corporate' for US tax purposes. Therefore, US LP does not satisfy the first limb of the meaning of the term 'company' in Article 3(1)(b) of the US Convention. It follows that US LP will not be a 'company' for the purposes of Article 10 of the US Convention by virtue of being a 'body corporate' for Australian purposes.

(b) Is US LP a ' company' for the purpose of the US Convention under the second limb

of the meaning of the term ' company' - that Is to say, is US LP an entity that is treated as a ' company' or ' body corporate' for tax purposes ?

The OECD Commentary on the definition of 'company' (outlined above) makes it clear that, under the second limb of the definition, the determination is to be made by reference to the laws of the State in which the entity is **organised** (in this case US federal tax law). US LP is not taxed as a 'company' or 'body corporate' for US federal tax purposes. Rather it is treated and taxed as a partnership. This is essentially because, although US LP has a form of separate legal personality under Delaware state law, the US federal tax position is that while state law attributes of an entity control various aspects of business relations, they are not controlling under US tax law (unless the tax law so provides) - see *Morrissey v Commissioner of Internal Revenue*, 296 U.S. 344 (1935); *United States v R Kintner*; 216 F.2d 418 (9th Cir. 1954); *McNamee v Dept of the Treasury*, 2007 U.S. App. LEXIS 12016, 488 F.3d 100, (2nd Cir. 2007).

In general, under the US 'check-the-box' (CTB) Treasury Regulations, any separate business entity other than an incorporated entity may choose its classification for tax purposes. Specifically, US CTB Treasury Regulations §301.7701-2(b)(1) and §301.7701-3(a) do not allow an entity organized under a Federal or State statute, that refers to the organization as 'incorporated', 'corporation', 'body corporate', or 'body politic', to elect its classification. Instead, such an entity is taxed as a corporation; see Checking in on " Check-the-Box", Loyola of Los Angeles Law Review [Vol. 42:451], by Heather M. Field.[125]

The DRULPA does not refer to a limited partnership created under its provisions as 'incorporated', a 'corporation', 'body corporate' or 'body politic' and US LP is not mandatorily taxed as a corporation. Rather, US LP is taxed as a partnership unless it elects to be taxed as a corporation. As no such election was made by US LP, it is not a taxable unit and is not taxed as a corporation under the tax laws of the US.

Hence, US LP is not an 'entity that is treated as a company or body corporate for tax purposes' and so does not satisfy the second limb of the meaning of the term 'company' for the purposes of the US Convention.

Conclusion

For the purpose of the US Convention, US LP is neither a 'body corporate' nor an 'entity that is treated as a company or body corporate for tax purposes'. Consequently it is not a 'company' for the purpose of Article 10 of the US Convention, and does not qualify for either of the reduced rates for certain cross-border inter-corporate dividends flowing between Australia and the US.

This is consistent with the US position for tax treaty purposes which is that a US partnership which does not elect to be taxed as a corporation will not be a 'company' for US treaty purposes. The Issues in International Taxation No. 6 ' The Application of the OECD Model Tax Convention to Partnerships' report includes the US response to the OECD Partnership Report at page 127. This response states that US partnerships (including limited partnerships such as Delaware limited partnerships, but also US LLCs and LLPs) not electing to be treated as corporations are not considered to be companies for the purposes of US tax treaties.

Note. Article 10(2)(b) of the US Convention provides a reduced rate of 15% in some

125 *http://digitalcommons.lmu.edu/llr/vol42/iss2/4*

circumstances, and does not require the recipient of the dividend to be a company. US LP will be entitled to the reduced rate of 15% if it satisfies all of the requirements for that reduction.[126]

84.28 HMRC official list of transparent and opaque entities

The International Manual provides:

> **180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes** [April 2012]
> A list of foreign entities where we have been asked our view on the question of transparency/opacity is set out in INTM180030.

I refer to this as "**the HMRC official list**".[127]

> It should be noted that the list only gives our general view as to the treatment of the specified foreign entity. In a particular case regard may also need to be had to:
> (a) The specific terms of the UK taxation provision under which the matter requires to be considered:
> (b) The provisions of any legislation, articles of association, by-laws, agreement or other document governing the entity's creation, continued existence and management, and;
> (c) The terms of any relevant Double Taxation Agreement.
> It should also be borne in mind that in relation to the classifications set out on the list:
> In some instances HMRCs view was given many years ago, and there may have been significant changes in the relevant foreign law which may mean that a different conclusion as to the status of that entity might now be reached. Changes in foreign law after the publication of these instruments may be significant for the same reason. ...
> Where clarification is sought in relation to a foreign entity we will attempt to give a view in particular cases in line with Code of Practice HMRC document CAP 1 (approvals and clearances).

I here set out a combination of two lists: the TB 83 list, together with the additional references in the version of that list in INT Manual 180030 [November 2010].[128]

---

126 ATO ID 2010/81, 9 April 2010, accessible *http://law.ato.gov.au*

127 HMRC originally published their views in Tax Bulletin 83 (also called RI 279) but the HMRC website states that this is "superseded by INTM180000".

128 I have restored diacritical marks which HMRC somewhat illiterately omitted in the official list and omit the more obvious abbreviations.

I add an English translation, mainly from the IATE database,[129] which also contains some details about the entities. There are no exact equivalents. A legal concept is not just a word: it is a vast theoretical construction, the world in a grain of sand. Some terms can be brought over into English easily; others require a long explanation. There is not often a single standard or correct translation: the IATE database usually offers several choices. In cases where the foreign entity does not have a close English law equivalent, it would generally be better to use the foreign language term rather than a potentially misleading English translation.

Venezuela	Corporations organised under the laws of Venezuela.

84.30 Share capital

84.30.1 *Significance of ordinary share capital*

If an entity issues ordinary share capital, it may be a "75% subsidiary" for tax purposes. It follows that it is possible for the entity to qualify for CGT and IT group reliefs, and to benefit from CGT reliefs for share exchanges.

84.30.2 *When does a body have ordinary share capital?*

HMRC Brief 87/09[169] provides:

Corporation Tax: Meaning of Ordinary Share Capital
HMRC have been asked to provide a list of foreign entities that they consider to have 'Ordinary Share Capital' for the purposes of TA 1988, s 832. Unfortunately as each case will have its own particular set of facts it is not feasible for an exhaustive list to be created, nor, in the context of considering legal systems other than the UK's, that are subject to change, would it be practical to do so.
Set out below is HMRC's interpretation of TA 1988 s 832 and information that, it is hoped, will be useful to companies and advisors, as well as officers within HMRC, in deciding whether a particular non-UK entity has 'Ordinary Share Capital' for the purposes of TA 1988 s 832. Also included below are some details of our position on two of the most often queried foreign entities, the Delaware LLC and the German GmbH.
Please note, this brief only seeks to consider the meaning of 'Ordinary Share Capital' for the purposes of TA 1988 s 832. Specifically, it does not cover the classification of a foreign entity for UK tax purposes (whether it is 'transparent' or 'opaque'). ...
The reader should also note that the Companies Act 2006 received Royal Assent on 8 November 2006 and the Government has announced its intention to commence all parts of the act by 31 October 2008. The DBERR has published an implementation timetable according to which the relevant sections of Part 17, A Company's Share Capital, will come into force on 1 October 2008. This article will be reviewed in due course to ensure it takes account of any necessary amendments due to legislative changes.

168 "A verein" is a misprint but I do not know what is intended.
169 12 January 2010. An earlier version appeared in HMRC Brief 54/07.

Definition

Ordinary share capital is defined in TA 1988 s 832 as follows:

" 'ordinary share capital', in relation to a company, means all the issued share capital (by whatever name called) of the company, other than capital the holders of which have a right to a dividend at a fixed rate but have no other right to share in the profits of the company;"

This definition therefore includes all of the issued share capital of a company, apart from capital carrying a right to a dividend at a fixed rate only. The bracketed wording 'by whatever name called' should not be overlooked as it is important to note that companies often categorise share capital into shares bearing different names, eg A Ordinary; B Ordinary, for purposes which may be of no relevance to the application of the definition above.

Characteristics of issued share capital in a UK company—general principles

UK companies

Ordinarily, references to a company will be understood to mean a limited liability company. Limited liability companies are so called because the liability of each shareholder for the company's debts and other liabilities is limited to the amount which remains unpaid on his shares. There are two types of limited liability company in the UK, public and private. The main difference between these types of company is that a public company can apply to be listed and offer its shares to the public in order to raise capital. There are, however, other types of less commonly used company forms: unlimited companies, with or without share capital, and companies limited by guarantee.

In the latter case the members' liability is limited to amounts they undertake to contribute in the event of a winding up; the amount of this maximum liability of each of the members will be set out in the 'guarantee clause' of the company's memorandum. The total commitment of the members, taken together, is known as the 'guarantee fund'; this fund only comes into existence on a winding up. In practice, this form of vehicle is usually unsuitable for most businesses but is often used, for example, by charities.

Companies limited by guarantee incorporated on or after 22 December 1980 cannot also have a share capital (Section 1(4) Companies Act 1985). Companies limited by guarantee incorporated before that date may, however, also have share capital.

In 1999 the Special Commissioners considered the status of 'founders' deposits' with a company limited by guarantee in the case *South Shore Mutual Insurance v Blair* [1999] STC (SCD) 296. They came to the conclusion that the deposits were not issued share capital; the company did not, in fact, have any authorised share capital and, as a consequence, could not have issued share capital. Although the decision is not binding authority, the case contains a useful review of some of the authorities about share capital.

Shares in UK companies

A company limited by shares is currently required to stipulate the maximum share capital the company may issue and the number and nominal value of the shares into which it is divided, its 'authorised share capital', in a document called the company's memorandum of association (section 2(5)(a), Companies Act 1985).

Note: The reader should note that the Companies Act 2006 abolishes the requirement for a company to have an authorised share capital by the repeal of section 2(5)(a). This should take effect from 1 October 2008. The new act nonetheless requires that, on formation, a company with a share capital will be required to submit a statement of capital and initial shareholdings to the Registrar at Companies House.

The memorandum is one of two essential documents that must be filed at Companies House on incorporation, the second is the company's articles of association; these documents together set out provisions governing the manner in which the company will operate. The amount of authorised share capital set out in the company's memorandum may be later increased by an ordinary resolution of the shareholders (requiring a simple majority of the vote).

The company's assets are owned by the company itself, not by the shareholders individually, although in turn the shareholders together have ownership of the company. The shares express the shareholders' proprietary relationship with the company.

In principle, shares are transferable, but in practice there are often restrictions on transfer, found in the company's articles of association.

The principal rights that usually attach to a share are rights to dividends declared, a right to vote and a right to share in the company's assets in a winding up. The principal responsibility that attaches to a share is to pay what is due on the share. The rights and duties are all subject to the memorandum and articles of association.

For a company limited by shares, the share capital must be stated in a fixed amount. In *Ooregum Gold Mining of India v Roper* [1892] AC 125 Lord Halsbury said:

> "The capital is fixed and certain, and every creditor is entitled to look at that capital as his security."

A share certificate is prima facie evidence of ownership of a share. However, it does not, of itself, constitute ownership of the share and is not essential to demonstrate that share capital has been issued. In order to be a member of a company, under the Companies Act, a person must be entered in the company's register of members. See s 112 Companies Act 2006. The decision in *National Westminster Bank plc v IRC* ([1994] STC 580), confirms this position, ie the 'issue' of share capital is only complete when members are recorded in the company's register of members.

Characteristics of issued share capital in a body incorporated in another country—relevant factors

When looking at whether a body incorporated under the law of another country, it is self evident that UK company law is not directly applicable. In *Ryall v The Du Bois* 18 TC 431, Lord Hanworth M.R. said:

'a share in a foreign company may be something different from and, indeed, is almost necessarily different from, a share as we know it in an incorporated company.'

Slesser L.J. said

'We have to consider what would be analogous to stocks and shares in Germany in dealing with what is a company, and allowing for differences of law in that country'.

Slesser L.J.'s comments were given in the statutory context of whether foreign income was income from stocks and shares for the purposes of Case V Schedule D. However we consider them as authority for proceeding by analogy in deciding whether the capital of a foreign company can be considered as 'issued share capital'.

A number of factors are relevant in deciding whether or not a foreign 'company' has 'issued share capital'.

Firstly the body concerned must have a legal personality separate and distinct from that of its members, able to carry on business and owning its assets in its own right, in the same way as a UK company. If that characteristic is absent the members cannot have the type of proprietorial interest which is characteristic of holders of issued share capital of a company incorporated under the laws of the UK.

If the body concerned possesses a separate legal personality, as described above, the following factors will then become relevant to the question of whether a member's interest in such company is analogous to an interest in 'issued share capital' as understood in the UK:

- whether the member's interest is like shares (that is, a portion of the fixed capital of the corporate body) or like debt (that is, money owed by the body corporate to the members)
- whether any subscription for the members' interests is payable
- whether the subscription payable for the 'shares' remains the member's property or whether it becomes the property of company
- what proprietary rights, such as rights to participate in control by voting, rights to receive a dividend out of the company's profits and rights to share in a distribution out of the company's assets in the event of a winding up, attach to the member's interests and what responsibilities, such as a responsibility to pay up on the 'share' if called, attach to the member
- whether the member's interest can be legally evidenced in accordance with local laws; for example, by being registered in a company-held document, or with a public authority, or by a certificate or similar document
- whether the member's interest is denominated in a stated fixed value
- whether the member's interest forms a fixed and certain amount of capital, or a part of that, to which creditors can look as security
- whether the non-UK law concerned requires amounts subscribed to be allocated to capital of the company which is fixed capital, and the extent to which subscriptions are so allocated
- whether the member's interests is capable of transfer and if so whether such a transfer would be similar to a transfer of a portion of the capital of the company, with attendant proprietary rights, rather than similar to a transfer of money or a loan account; and
- any other factors which point to the member's interests being 'issued' and having the character of ordinary share capital.

The background information a company or its advisers are likely to want to consider includes the following documentation:

- The corporate law of the foreign country which governs the body in question.
- Whatever general commentaries are available on the legal and commercial status of the body in question.
- The documents establishing the body, and any other documents which regulate its activities, especially those which deal with subscription for capital and those which govern what happens to the profits and assets of the body.

The accounts that show the state of affairs of the body, in particular the balance sheet, may be helpful in showing whether, and to what extent, money subscribed or otherwise provided by the members of the body is allocated to a fixed amount of permanent capital or whether it is loan debt.

In deciding whether the body has issued share capital, it is not necessary for every factor to be present, but there should be a preponderance of indicators pointing to there being issued share capital. Different weight may need to be given to the various factors. For instance it would be of considerable importance if the member's interest had the character of debt. However restrictions on transfer of a member's interest would be of lesser importance. It is by no means uncommon for there to be restrictions on transfer of shares

in a UK company.

84.30.3 *Ordinary share capital: German GmbH*

HMRC Brief 87/09 provides:

> A Gesellschaft mit beschränkter Haftung (GmbH) in Germany, literally a 'company with limited liability', is an entity of a very similar kind to a UK private limited liability company. An Aktiengesellschaft (AG), sometimes called a 'joint stock company' may be considered more akin to a UK public limited liability company (plc) as its stock may be listed.
> Under German law, the capital of a GmbH is not divided up into small units. However, a GmbH has a fixed amount of capital (Stammkapital) which corresponds to the maximum amount of share capital that the company may issue, similarly to a UK limited liability company's 'authorised share capital'. The amounts originally contributed (Stammeinlagen) by the members (Gesellschafter) will also be noted, just as in the UK the initial subscriber shares will be noted in the memorandum of a limited liability company.
> Article 5 of the German GmbH law sets out a minimum amount of Stammkapital (authorised share capital) as €25,000, and the minimum amount of Stammeinlage (original contribution/subscription) of each Gesellschafter (member) at €100.
> Based upon GmbH cases HMRC have previously considered, the amounts of Stammeinlage subscribed by the members may normally be regarded as issued share capital for the purposes of the Taxes Acts.

84.30.4 *Ordinary share capital: Delaware LLC*

For the general nature of a Delaware LLC, see 84.25 (US S-Corps and LLCs). This section considers whether a LLC has ordinary share capital.

HMRC Brief 87/09 provides:

> **Delaware Limited Liability Companies**
> ... Section 18–702c of the Delaware Limited Liability Act provides that:
> > 'Unless otherwise provided in a limited liability company agreement, a member's interest in a limited liability company may be evidenced by a certificate of limited liability company interest issued by the limited liability company.'
>
> If a DLLC issues 'shares' in this way and the other factors relating to the company suggest that it has share capital then we will accept that these 'shares' may be regarded as 'ordinary share capital' for the purpose of Section 832 ICTA 1988.
> It should be noted that not all DLLCs issue share certificates but they may still have 'ordinary share capital'. Regard must be had to the particular terms of the agreement by which the LLC has been created. In any case of doubt or difficulty regarding the status of the share certificates HMRC will advise in particular cases in line with Code of

> Practice 10. The contact point is ...
> Other States within the United States of America have comparable legislation to Delaware. Where it can be shown that a particular State has legislation analogous to the Delaware legislation with which we are familiar, HMRC would expect to be able to provide advice in line with that for DLLCs.

In 2010 a Tribunal found that the membership interest in a Delaware LLC was not similar to share capital but something more similar to partnership capital of an English partnership. The membership interest would not have been ordinary share capital. However HMRC took no notice of that,[170] rightly, as it has turned out so far, as the decision has been reversed: *HMRC v Anson*.[171]

84.31 Commentary: Should the UK enact US style check the box rules?

Heather M. Field, "Checking in on Check-the-Box" 42 Loy. L.A. L. Rev. 451 (2009) explains:[172]

> In 1995, the Service acknowledged that the flexibility afforded by applicable state laws undermined the theory of the corporate resemblance test and explained:
>
> > [M]any states recently have revised their statutes to provide that partnerships and other unincorporated organizations may possess characteristics that have traditionally been associated with corporations, thereby narrowing considerably the traditional distinctions between corporations and partnerships....
> >
> > One consequence of the narrowing of the differences under local law between corporations and partnerships is that taxpayers can achieve partnership tax classification for a non-publicly traded organization that, in all meaningful respects, is virtually indistinguishable from a corporation. The Service and Treasury recognize that there is considerable flexibility under the current rules to effectively change the classification of an organization at will ....[173]
>
> Accordingly, the preamble to the proposed CTB regulations explained

> that the "Treasury and the IRS believe[d] that it [was] appropriate to replace the increasingly formalistic rules under the [Kintner] regulations with a much simpler approach that generally is elective."[174]
> Moreover, the Service acknowledged that, under the Kintner regulations, "taxpayers and the IRS must expend considerable resources on classification issues."[175] Since the issuance of Revenue Ruling 88-76, the Service issued seventeen revenue rulings, several revenue procedures, and numerous letter rulings on entity classification issues.[176] Presumably, taxpayers also incurred significant legal fees in obtaining advice on these classification issues. Further, the Service noted that small businesses could be particularly hard hit by the considerable costs of obtaining advice regarding how to structure business entities to obtain the most favourable combination of state law and tax treatment.[177] These additional cost, resource allocation, and distributive considerations contributed to the Service's decision to move to a simplified elective entity classification regime, where taxpayers could "elect to treat certain domestic unincorporated business organizations as partnerships or as associations for federal tax purposes,"[178] while still availing themselves of the local laws' flexibility for structuring unincorporated businesses.[179]

It is suggested that similar regulations would be beneficial in the UK; though it would require careful thought, and the development of the idea

179 [Footnote original] Simplification of Entity Classification Rules, 61 Fed. Reg. at 21,990. This goal of increased flexibility in organizational choice actually dates back to the adoption of subchapter S, enacted to enable "certain corporations to opt out of the double tax system so as to maximize organizational choice for small business owners." Steven A. Bank, The Story of Double Taxation: A Clash over the Control of Corporate Earnings, in BUS. TAX STORIES 153, 178 (Stephen A. Bank & Kirk J. Stark, eds., 2005) (citing S. REP. NO. 85-1983, at 87 (1958)).

to a consultation stage would require some investment in time and resources. Ideally the issue would be dealt with at an EU or even OECD level, though that may not be practical.

CHAPTER EIGHTY FIVE

CONTROL, CONNECTED, CLOSE AND RELATED EXPRESSIONS

85.1 Introduction

This chapter considers meaning of the terms "control", "connected person", "close company" and associated terms such as "participator".

The definitions interlink but need to be considered separately.

85.2 Control

85.2.1 *Why does control matter?*

Control of a company is a concept used so often in tax legislation that it is impossible to write a full list.

The concept is important in particular for the definition of connected person: a person is connected to a company they control. The concepts of control and connected overlap.

85.2.2 *Meaning(s) of "control"*

There are two main definitions of control in the Taxes Acts (as well as numerous specialist definitions not considered here). The legislation does not have terminology to describe them, so I coin the following:

(1) "**Control in the ultra-wide sense**"- the definition in s.450 CTA 2010.

(2) "**Control in the strict sense**" - the definition in s.995 ITA.

Sometimes the word control is used without definition; I refer to that as **"control in a natural (undefined) sense"**; though that sense must be taken from the context as the word does not have a single fixed sense.

The word control is used in accountancy, where it has another set of definitions again.[1] Those definitions do not apply for tax, so a person who

---

1 FRS 102 (The Financial Reporting Standard applicable in the UK and Republic of Ireland, March 2013) para 9.4; IFRS 10 (Consolidated Financial Statements) para 7.

has control in one of the tax senses may not be the same as the person named in company accounts as the ultimate controlling party of the company.

Section 989 ITA provides:

> The following definitions apply for the purposes of the Income Tax Acts—
> "control", in relation to the control of a body corporate or a partnership, is to be read in accordance with section 995.[2]

Thus for IT the strict sense is the default meaning, though in practice the ultra-wide sense is more common.

By contrast, s.288(1) TCGA provides:

> In this Act, unless the context otherwise requires—
> "control" shall be construed in accordance with sections 450 and 451 of CTA 2010;

Thus for CGT the ultra-wide sense is the default meaning.

For IHT, s.269 IHTA provides yet another definition of control. Such is the patchwork nature of UK taxation. The IHT definition is not discussed here as it does not arise in the IHT issues closest to the themes of this book.

85.3 Control in ultra-wide sense

85.3.1 *Introduction*

Section 450 CTA 2010 provides:

> (1) This section applies for the purpose of this Part [Part 10 CTA 2010].

The definition is also applied by reference in many other contexts.

> (2) A person ("P") is treated as having control of a company ("C") if P—
> (a) exercises,
> (b) is able to exercise, or
> (c) is entitled to acquire,
> direct or indirect control over C's affairs.
> (3) In particular, P is treated as having control of C if P possesses or is entitled to acquire—

---

2 The point is repeated (unnecessarily) in s.719 ITEPA and s.1021(2) ITA: "Section 995 (meaning of "control") applies for the purposes of this Act unless otherwise indicated."

(a) the greater part of the share capital or issued share capital of C,
(b) the greater part of the voting power in C,
(c) so much of the issued share capital of C as would, on the assumption that the whole of the income of C were distributed among the participators, entitle P to receive the greater part of the amount so distributed, or
(d) such rights as would entitle P, in the event of the winding up of C or in any other circumstances, to receive the greater part of the assets of C which would then be available for distribution among the participators.

The CT Manual identifies the five heads of control:

> **60210 Control: Definition** [September 2011]
> Control is defined under several headings:
> [1] Control over the affairs of the company (see CTM60220).
> [2] Control through voting power (see (a) of CTM60220).
> [3] Control through share capital or through issued share capital (see (b) of CTM60220).
> [4] Control over income of the company (see (c) of CTM60220).
> [5] Control over assets of the company (see (d) of CTM60220).

In *R v IRC ex p. Newfields Developments*, Lord Hoffmann said:

> [10] It will be seen that although this definition starts in subs (2) with a concept of control which reflects its meaning in ordinary speech ('a person shall be taken to have control of a company if he exercises, or is able to exercise or is entitled to acquire, direct or indirect control over the company's affairs'), that fairly simple notion is enormously widened by subsequent subsections. ...
> [11]… The effect of those cumulative definitions is that for the purpose of deciding whether a person 'shall be taken to have control of a company' under [what is now s.450], it may be necessary to attribute to him the rights and powers of persons over whom he may in real life have little or no power of control. Plainly the intention of the legislature was to spread the net very wide.[3]

The test requires one to ascertain what are the rights exercisable by a shareholder. In *HMRC v UBS*, a provision in the company's articles provided (in short) that when the shareholder was UBS the shares carried no right to dividends and only a right to receive par on a winding-up. The

3 73 TC 532, at p.556.

purpose was to ensure that when UBS held the shares it did not have control of the company. An argument that this should be ignored as a sham was roundly rejected:

> 107. This argument is also hopeless. There was no finding that the participants did not intend article 2(15) to take effect according to its terms and so the argument that it was a sham was rightly rejected. Once this point is reached, I am at a loss to know on what basis article 2(15) can be airbrushed out of the scheme.[4]

Sham is however fact sensitive, and in other circumstances an article of that kind might perhaps be ignored as a sham.

85.3.2 *Control over a company's affairs*

P is treated as having control of C if P—
(a) exercises,
(b) is able to exercise, or
(c) is entitled to acquire,
direct or indirect control over C's affairs.

In the last line of this head, "control" is used in a natural (undefined) sense.

Para (a) concerns someone who *actually* exercises control. It is not clear whether that would apply if P exercises *de facto* control but has no right of control.

Para (b) concerns someone *able* to exercise control. It does not matter if they choose not to exercise any control. It is not clear whether that would apply if P is only able to exercise *de facto* control but has no right of control and chooses not to exercise any control.

It is suggested that para (a) applies where P exercises mere *de facto* control, but para (b) only applies if P has a right of control, ie *able* means legally entitled to. The attraction of this reading is that para (a) and (b) both have some role to play. For if para (a) required a right of control, then (b) would be otiose; if para (b) did not require a right of control, then para (a) would be otiose.[5]

However it would be rare for someone to actually exercise control without having a right to do so, and so fall within para (a). Mere influence

---

4 [2014] EWCA Civ 452 at [107].

5 This view is also consistent with the meaning of "able to control" in ToA enjoyment condition E: see 29.6.7 (Enjoyment condition E: control).

does not constitute control: *de facto* control would only apply if the person with actual control surrendered all independence and acted as a "rubber stamp".

85.3.3 *Control at shareholder level or control at board level*

In *Steele v EVC International* 69 TC 88 the Court of Appeal said:

> ... control of the affairs of the company in s [450] means control at the level of general meetings of the company ... control at that level carries with it the power to make the ultimate decisions as to the business of the company and in that sense to control its affairs.

The CT Manual provides:

> **60220 Control: Over the company's affairs** [September 2011]
> ... As regards the level at which control is exercised, the judgment in *Steele v EVC International NV* 69 TC 88 confirms that what is required is control at the participator or general meeting level, not at administrative or board level.

SP 1/01 provides:

> 54. Where the establishment of a connected person's relationship depends on the question of whether a person falls to be regarded as having control of a company's affairs within the terms of [s.450 CTA 2010], it is not considered that a person's ability (whether de facto or de jure) to appoint the majority of the Board of directors will itself constitute control of the company's affairs—unless, that is, the Board exercises powers which would normally be exercised by the shareholders at a general meeting.

85.3.4 *"Control"*

In *HMRC v UBS*, Rimer LJ said:

> ... the scheme was pre-ordained and involved a co-ordinated course of action between the participants, with Investec and DB, two wholly independent companies, playing pre-ordained and co-ordinated roles, with each having its own commercial interests in bringing the scheme to fruition. It does not, however, begin to follow from this that DB was in relevant control of Investec. If A Ltd proposes to B Ltd, an unconnected and independent company, a co-ordinated course of action with a view to achieving a commercial end to the benefit of both, and B Ltd agrees to the proposal and co-operates in its implementation, it is beyond my comprehension why such a state of affairs should be thought

> to justify the inference that, in playing its own part in the operation, B Ltd is to be regarded as being 'controlled' in what it does by A Ltd. The proposition is wrong. B Ltd will, by inference, want to take part, and will do so. But there will ordinarily be no basis for an inference that the decisions it makes en route to the ultimate goal will be decisions it makes other than independently, and in its own interests, in achieving the proposed end.[6]

85.3.5 *Shares*

> *P is treated as having control of C if P possesses or is entitled to acquire ... (a) the greater part of the share capital or issued share capital of C.*

This is straightforward.

85.3.6 *Votes*

> *P is treated as having control of C if P possesses or is entitled to acquire ... (b) the greater part of the voting power in C.*

This is otiose, since a person with the greater part of the votes has control under s.450(2) CTA 2010: they are able to exercise control over the company's affairs.

85.3.7 *Right to income*

> *P is treated as having control of C if P possesses or is entitled to acquire ... (c) so much of the issued share capital of C as would, on the assumption that the whole of the income of C were distributed among the participators, entitle P to receive the greater part of the amount so distributed.*

Section 450(4) CTA 2010 provides:

> Any rights that P or any other person has as a loan creditor are to be disregarded for the purposes of the assumption in subsection (3)(c).

This will not normally make any difference, as a company would not normally distribute income to loan creditors.

The CT Manual provides:

> **60240. Control: Summary** [February 2006]
> ... The test in (c) of CTM60220 depends on the dividend rights of the

6 [2014] EWCA Civ 452 at [139].

issued capital and will be mainly of interest where shares with no voting rights carry the right to a high dividend.

But this is not the only case. The life tenant of an IIP trust holding a majority of the shares in a company in principle has control of the company under this head.

85.3.8 *Right to capital*

P is treated as having control of C if P possesses or is entitled to acquire ... such rights as would entitle P, in the event of the winding up of C or in any other circumstances, to receive the greater part of the assets of C which would then be available for distribution among the participators.

The CT Manual provides:

60230. Control: Right to receive most assets [September 2011]
Control under (d) of CTM60220 exists where a person or persons have a right to receive the greater part of the assets then available for distribution among participators, in any circumstances, (for example, on redemption of redeemable share capital or on repayment of loans to the company) but also, specifically, on a winding up of the company.
'Participators' for this purpose includes loan creditors (unlike (c) of CTM60220). As regards the definition of loan creditors, see CTM60130. If a loan creditor is an open company, see CTM60300.
The test under CTA2010/S450 (3) ... only applies to the assets that would come to a participator in that capacity. In the case of a bank, for example, no regard would be had to any assets that would come to it in respect of loans made in the ordinary course of its banking business, because it is not deemed to be a loan creditor (and, hence it is not a participator) in respect of such loans by virtue of CTA2010/S453 (4) ...
60240. Control: Summary [February 2006]
...3. The test in CTM60230 will normally be of interest only where loan creditors are participators (see CTM60130) or there exist special rights to participate in the assets available for distribution in a winding-up or in any other circumstances for example, on redemption of redeemable share capital.

But this is not the only case. If trustees hold a company on trust for A for life, remainder to B absolutely, then B has control under this head: for B will in the future be entitled to the assets of the company. If trustees hold a company on trust for B contingently (eg on attaining the age of 25, if B is under 25) then B does not have control under this head.

85.3.9 *"Entitled to acquire"*

Section 451 CTA 2010 provides:

> (1) This section applies for the purposes of section 450.
> (2) A person is treated as entitled to acquire anything which the person—
> (a) is entitled to acquire at a future date, or
> (b) will at a future date be entitled to acquire.

The INT Manual comments on identical wording in the CFC legislation:

> **210050 'Entitled to acquire' and 'entitled to secure'** [February 2006]
> The terms 'entitled to acquire' and 'entitled to secure' in (a), (b) and (c) of INTM210040 apply both where a person is presently entitled to acquire or secure an asset at a future date and where a person will at a future date be entitled to acquire or secure that asset. They do not extend to situations where, in an entirely arm's length transaction, one party temporarily has future rights over the other's property, for instance, in the period between exchange of contracts and completion of a sale of land.
> A person whose entitlement to acquire or secure is contingent on a default of any person, including the controlled foreign company in question, will not be treated as having an interest in the controlled foreign company, unless that default has occurred.
> So, for example, a person will have an interest in a controlled foreign company if, by means of a contractual right or some other arrangement, he can
> • require a shareholder to transfer shares to him, or
> • secure the issue to him of unissued share capital of the company, or
> • secure that if a distribution is made by the company he has a share in the distribution or premium.
> A person will not have an interest in a controlled foreign company solely by virtue of rights over the income or assets of the company which are exercisable on the default of any person. Thus the contingent rights of banks, trade creditors, etc. to acquire some or all of the company's assets in the event of a default would not amount to an interest in the company in advance of the default.

See too 85.17.6 ("Entitled to do").

85.4 "Nominees"

Section 451(3) CTA 2010 provides:

If a person—

(a) possesses any rights or powers on behalf of another person (A), or

(b) may be required to exercise any rights or powers on A's direction or behalf,

those rights or powers are to be attributed to A.

It is self-evident that the powers of a nominee should be attributed to its principal. The section is in fact wider than that, since the cases where "A may be required to exercise rights at the direction of B" extend beyond the case where A is a nominee for B in the strict sense of nominee. However the subsection is otiose, for if A may be required to exercise rights on the direction of B, or on behalf of B, then these are rights which B possesses or is entitled to acquire, so the rights would be taken into account in any event in the test of control.

See Howard, "Remote Control" (Sep 2011) Tax Adviser, p.45.[7]

85.5 Associates

The concept of associates is used in various contexts, but the most important is the rule that (for the definition of control) a person is treated as holding the rights of their associates.[8] This section considers the definition; the next section considers the attribution rule; and the following section gives some examples and concludes with a comment on the difficulties caused by the width of the definition.

The definition of associate has four parts:

(1) Relatives and partners
(2) Trustees
(3) Companies
(4) Personal representatives

85.5.1 *Relatives and partners*

Section 448(1) CTA 2010 provides

In this Part "associate", in relation to a person ("P"), means—

(a) any relative or partner of P

---

7 Accessible *http://www.tax.org.uk/Resources/CIOT/Documents/2011/09/Control_company_RC.pdf*

8 See 85.6 (Attribution of rights of associates and controlled companies).

Section 448(2) CTA 2010 defines relative:

> In this section, "relative" means—
> (a) a spouse or civil partner,
> (b) a parent or remoter forebear,
> (c) a child or remoter issue, or
> (d) a brother or sister.

The Company Taxation manual provides:

> **CTM60150 Tests: Associates** [November 2011]
> ... Separated spouses should be regarded as associated with each other but divorced persons should not. Other relatives in (a)(ii) to (iv) should be regarded as associated only if there is a blood relationship, for example, half-brothers are associated but stepbrothers are not...

The definition of connected person is wider. A spouse of a brother, sister, etc is a connected person but is not an associate; see 85.11 (Connection with family members).

85.5.2 *Trustees & settlor/settlor-relatives*

Section 448(1) CTA 2010 provides:

> In this Part "associate", in relation to a person ("P"), means ...
> (b) the trustees of any settlement in relation to which P is a settlor,
> (c) the trustees of any settlement in relation to which any relative of P (living or dead) is or was a settlor

The definition of connected person is narrower. The relative of a deceased settlor is an associate of the trustees but not a connected person.[9] "Settlement" has the standard IT/CGT meaning; contrast the definition of connected person where the word has the settlement-arrangement meaning.

85.5.3 *Trustees and beneficiaries*

Section 448(1) CTA 2010 provides:

> In this Part "associate", in relation to a person ("P"), means ...
> (d) if P has an interest in any shares or obligations of a company which are subject to any trust, the trustees of any settlement concerned

9 See 85.12 (Connection with trustees).

If the trustees hold shares or securities on trust for A for life, remainder to B, then A and B are associates of the trustees. If the trustees hold on discretionary trusts then the beneficiaries are not associates, as they do not have an interest (in the strict sense); though the person (if any) entitled on the termination of the discretionary trust would be an associate.

There is no equivalent rule for connected persons, which is narrower on this point.

85.5.4 *Companies*

Section 448(1) CTA 2010 provides:

> In this Part "associate", in relation to a person ("P"), means ...
> (e) if P—
> (i) is a company, and
> (ii) has an interest in any shares or obligations of a company which are subject to any trust,
> any other company which has an interest in those shares or obligations ...
> (g) if P—
> (i) is a company, and
> (ii) has an interest in any shares or obligations of a company which are part of the estate of a deceased person,
> any other company which has an interest in those shares or obligations.

This must be a rare case.

85.5.5 *Personal representatives*

Section 448(1) CTA 2010 provides:

> In this Part "associate", in relation to a person ("P"), means ...
> (f) if P has an interest in any shares or obligations of a company which are part of the estate of a deceased person, the personal representatives of the deceased

There is no equivalent rule for connected persons, which is narrower on this point.

85.6 Attribution of rights of associates and controlled companies

Section 451(4) CTA 2010 provides that for the purposes of the definition of control in the ultra-wide sense:

There may also be attributed to a person all the rights and powers—

(a) of any company of which the person has, or the person and associates of the person have, control,[10]

(b) of any two or more companies within paragraph (a),

(c) of any associate of the person, or

(d) of any two or more associates of the person.[11]

In short, a person is treated as holding the rights of associates and controlled companies. Section 451(5) CTA 2010 provides:

The rights and powers which may be attributed under subsection (4)—

(a) include those attributed to a company or associate under subsection (3) [nominees], but

(b) do not include those attributed to an associate under subsection (4).

One is not treated as holding the rights of an associate of an associate.

Section 451 uses the word "may" but here that means "shall". Section 451(6) CTA 2010 provides:

Such attributions are to be made under subsection (4) as will result in a company being treated as under the control of 5 or fewer participators if it can be so treated.

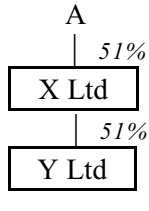
I refer to this as "**the attribution rule**".

This rule does not apply for the purposes of the definition of participator (that is, the fact that A is an associate of a participator does not mean that A is a participator).

85.7 Examples

85.7.1 *Chain of wholly owned companies*

A chain of companies is straightforward. Suppose:



10 Control here has the ultra-wide meaning: see s.450(1) CTA 2010 set out in 85.3.1 (Introduction).

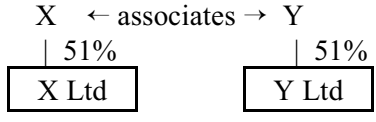
11 Para (b) and (d) must be otiose, but it does not matter.

A controls X Ltd.
A controls Y Ltd for two independent reasons:
(1) A controls it in the undefined sense.
(2) The rights of X Ltd are attributed to A.

It also follows that A is connected to X Ltd and Y Ltd. That is what one might expect.

85.7.2 *Associates each own a company*

Suppose two persons are associates and each own a company:



X controls X Ltd
X also "controls" Y Ltd because the rights of Y are attributed to X.[12]

It also follows that:
(1) X is connected to X Ltd and to Y Ltd.
(2) X Ltd is connected to Y Ltd (as the same person has "control" of both companies).

85.7.3 *Commentary: An excessively wide definition*

The attribution rule - together with the wide definition of associates - is what makes the s.450 definition of control ultra-wide. It is so wide that the word "control" is not apt to describe the concept ("some loose association" would be nearer the mark). It is confusing to depart from statutory terminology, but where the ultra-wide sense of control is used, the actualities demand quotation marks. For instance:
(1) A has "control" of a company owned by a relative (say, a sister) even though A has no beneficial interest in the company, and, of course, no right to know that the relative owns the company or anything about the company.
(2) A has "control" of a company owned by a trust of which a relative is a settlor, even though A is not a beneficiary and has no right to know that the trust had been made, let alone to know anything about the

12 See 85.6 (Attribution of rights of associates and controlled companies).

trust or its property. Indeed the relative need not be the settlor but only *a* settlor, so the rule would apply if (say) a sister provides a nominal amount of property to a trust.

(3) A partner has "control" of a company owned by a partnership even if it is an investment partnership with a large number of unconnected partners. The modern use of partnerships as collective investment vehicles raises this problem, because investment partnerships have large numbers of partners,[13] and partners do not know who their fellow partners are.

This has three noteworthy consequences.

The first is practical: it is not possible for a person to know whether they control a company, or to draw up a list of all companies which they control. In practice there is substantial innocent non-compliance and selective or arbitrary enforcement, where HMRC sufficiently dislike a taxpayer to make enquiries not normally made.

The second point is presentational but nevertheless important: anti-avoidance provisions which refer to control may appear to the non-tax specialist to be reasonable because control seems a sensible limiting factor; but they generally operate unreasonably widely (because the meaning of *control* is so wide).

Thirdly, this leads to complexity. On occasions, where the difficulty caused by the extravagance of the definition has come to be recognised, the definition of control[14] is then restricted.[15] However this is done on a

---

13 In 2014 there were 500 partnerships which file an SA800 return and have more than 50 partners; some have more than 1,000 partners (unfortunately HMRC software does not cope with more than 999) and, anecdotally, one has more than 20,000 partners; data from Office of Tax Simplification "Review of partnerships: interim report" (2014) para 5.25 and appendix A.
https://www.gov.uk/government/publications/partnerships-review

14 or some concept in which the word control is used, such as associate or connected person.

15 For instance, ss.27, 29, 30 CTA 2010. Section 27 CTA 2010 provides:
"(2) In the application of section 451 (meaning of 'control': rights to be attributed) for the purposes of the determination, the references in section 451(4) and (5) to an associate of a person ("P") include a partner of the person only if the condition in subsection (3) below is met.
(3) The condition is that tax planning arrangements which—
(a) involve P and the partner, and
(b) secure a relevant tax advantage,
have at any time had effect in relation to the taxpayer company."

piecemeal basis, where taxpayer lobbying has for some reason given rise to government action. So the result is a complexity which would not arise if a more restrained definition of control had been adopted in the first place.

The same difficulties apply to provisions using the term "connected person" (since that term uses the concept of "control" in the ultra-wide sense). It will in practice be impossible for a person to identify all persons who are "connected" with them. One individual might easily have 500 persons connected with them. If one could write a full list, it would vary continuously. Even an attempt to enquire would be grossly intrusive.

The point was made in responses to the consultation on the substantial donor rules:

> charities described the connected persons rule as an "impossible requirement", a "substantial administrative burden" and a "compliance nightmare".[16]

There was nothing particularly unusual in the substantial donor rules, except, perhaps, that the charities who responded to the consultation felt a greater obligation than most taxpayers to seek to comply with the tax rules: this difficulty applies generally to the use of the concepts of control and connected persons. But HMRC's priority in anti-avoidance legislation is not to produce legislation with which everyone can comply: it is to produce legislation which catches everything that they may wish to catch. Thus the definition of connected person in the tainted donation rules (which replaced the substantial donor rules in 2011) is even wider than the standard ultra-wide definition![17] But there it is.

85.8 Control by two or more persons together

Section 450(5) CTA 2010 provides:

> If two or more persons together satisfy any of the conditions in subsections (2) and (3), they are treated as having control of C.

For instance, if A and B each hold 50% of a company, then A and B

For other examples, see 50.3.2 ("Control" and "participator"); 44.7.4 (HMRC practice on 20% rule).

16 HMRC, Substantial Donors to Charity Consultation Responses Document, (January 2009) para 3.12, [2009] STI 65.

17 See s.809ZQ ITA.

together have control. Why does it matter? This does not mean that A (alone) has control or that B (alone) has control. It matters for the following purposes:

(1) Two companies are connected if (in short) they are under the control of the same (or connected) persons.[18]

(2) Two companies are associated (for the purposes of small profits relief) if (in short) both are under the control of the same persons.

So it is often necessary to identify the persons who together control a company.

The CT Manual provides:

> **60250 Control: In multiple** [September 2011]
> More than one person or one group of persons may 'control' a company. For example, one person may have the greater part of the voting power, while two people hold the greater part of the issued share capital and a group of three people are entitled to the greater part of the assets in a winding up. All three combinations of people can be taken to have control of the company at the same time.
> If say three persons, A, B and C, each hold one third of the shares in a company, and they are not connected in any way which would allow the rights and powers of one to be attributed to another, then control is held by A and B, or B and C, or A and C but not A, B and C together.
> This is because in determining whether companies are 'associated companies', you should only consider 'minimum' controlling combinations. You should disregard combinations containing superfluous members. For example, a company controlled by the unconnected persons A, B and C, but not by any one or two of them alone should not be regarded as associated with any company controlled by one of them alone (as in the first subparagraph above) or by any two of them (as in the second subparagraph above). (See also CTM03730 for an example of this.)
> However deciding on the 'minimum' controlling combination for any of the tests set out at ICTA 1988/416(2)(a) to (c) does not mean you have to establish the smallest controlling combination of each company when determining whether companies are associated companies.
> In his High Court judgment in *R v IRC ex p. Newfields Developments* (73 TC 532 at page 541B) Moses J said that Section 416 [ICTA] had to be exercised for the statutory purposes for which it was conferred:
> "In the context of Section 13 [ICTA], that purpose is to ascertain

18 See 85.15 (Connection with company).

> whether, in the instant case, two companies are under the control of the same person pursuant to Section 13(4). That is the statutory question. If it is possible to answer that in the affirmative, by exercising the power of attribution, in my judgment, that power must be exercised. Conversely, if that question, namely, are the two companies under the control of the same person, can only be answered in the affirmative by refraining from the exercise of the power, then the power should not be exercised".
>
> So in the first sub-paragraph above, you may be able to determine that two companies are associated because the three people who together have an entitlement to the greater part of the assets in a winding up also together hold the greater part of the voting power in another company. In that case you would take this group as controlling the company and not the single or two person combinations. As this example shows, the identical controlling combination does not need to be established by the same test in each company.

This passage is written in the context of (what is now) s.25(4) CTA 2010 which provides:

> For the purposes of this Part, a company is an associated company of another at any time when—
>
> (a) one of the two has control of the other, or
>
> (b) both are under the control of the same person or persons.

The same approach would apply to the definition of connected person: see 85.15 (Connection with company).

85.9 Control in strict sense

This section considers the meaning of what I call "control in the strict sense".[19] Section 995(1) ITA provides:

> This section has effect for the purposes of the provisions of the Income Tax Acts which apply this section.

This is misleading as the s.995 definition is the default definition of control in the income tax acts.

Section 995(2) ITA provides the definition:

> In relation to a body corporate ("company A"), "control" means the power of a person ("P") to secure—

19 See 85.2.2 (Meaning(s) of "control").

(a) by means of the holding of shares or the possession of voting power in relation to that or any other body corporate, or
(b) as a result of any powers conferred by the articles of association or other document regulating that or any other body corporate,

that the affairs of company A are conducted in accordance with P's wishes.

The CT equivalent is s.1124 CTA 2010.

The CT Manual provides:

80165. Arrangements - transfer of company to another group [May 2011]

... The test is whether a person is able to secure that the affairs of the company, including the business of the company as managed by its Board, are conducted in accordance with his wishes. Usually shareholders cannot dictate to or overrule the Board on management matters entrusted to the Board. So a necessary element of control is the ability to determine the composition of the Board, or failing that, to appoint directors who have the power to impose their decisions on directors appointed by any other shareholder.

The voting rights shareholders can exercise in general meetings will normally include the right to vote on the appointment and removal of directors. However, it is not safe to assume that possession of the majority of voting rights will bring automatic control of the Board. In *Irving v Tesco Stores (Holdings)* 58 TC 1, the claimant did not have Boardroom control of the surrendering company because:

- more than half of the directors were to be appointed by the minority shareholder and could not be removed without his consent, and
- the directors appointed by the claimant could not impose their decision on the directors appointed by the minority shareholder.

80170. Control [May 2011]

Section [995 ITA] does not define "control" merely in terms of direct shareholdings and voting rights in the company concerned. A person or persons have Section [995] control if they have power to secure that the affairs of the company are conducted in accordance their wishes. So you may have to consider:

- shareholdings and voting rights in any company, and also
- powers conferred by the documents regulating any company if these affect the "control" situation.

So, to determine whether relevant arrangements exist, you will need to consider:

- the Memorandum and Articles of Association of the company (and

any other document regulating the company), and
- the various documents relating to loans made to the company.

Where a company other than the parent company holds shares, etc, you may also need to consider the shareholdings, etc, of that company.

The same point is made in Employee Share Schemes Unit Manual:

43210. Control of the scheme company [September 2013]
... 'Control' for this purpose is defined as having the meaning given in Section 719 ITEPA 2003. This means having the power to secure that the affairs of the scheme company are conducted in accordance with its wishes.
Control will not necessarily be obtained simply because of the size of a share holding in the scheme company. Shareholders cannot ordinarily dictate to or overrule the Board of Directors in respect of matters of management entrusted to them. So a necessary element of control is (by voting powers or other powers) to have economic control of the company and the power of a person to secure that the affairs of the company are conducted in accordance with their long term wishes. The ability to determine the composition of the Board, or failing that, to appoint directors who have the power to impose their decisions on directors appointed by any other shareholder are indicators of control.
...

The Corporate Finance Manual provides:

35120. What is control? [January 2012]
Meaning of Control
Section 472 CTA 2009 gives the meaning of control. The test is whether a person can 'secure that the company's affairs are conducted in accordance with his wishes'. A person (an individual or company) can do this by
- holding most of the shares, or
- holding most of the voting rights in the company (or another company, such as the ultimate parent), or
- through any other powers, given through any document (such as the company's Memorandum and Articles of Association).

Control through shares
A majority shareholding will usually ensure control, unless different classes of shares carry different voting rights. Share held on trading account and their voting rights are ignored for this purpose.
Control through voting rights: example
MK Ltd's issued share capital is made up of

- 1,000 ordinary shares, carrying one vote each
- 2,000 'A' ordinary shares with no voting rights.

KB Ltd owns 800 ordinary shares.

JR Ltd owns 200 ordinary shares and 2,000 'A' ordinary shares.

Although JR Ltd has the majority of the issued shares, KB Ltd has control because it has the majority of the shares with voting rights, and can therefore use those voting rights to ensure that MK Ltd acts according to its wishes.

Control through other powers: example

AV Ltd owns 40% of the shares of BK Ltd, but it has the power, through BK Ltd's Articles, to appoint more than half of BK Ltd's board of directors. These directors will manage the business according to AV Ltd's wishes, so AV Ltd has control...

See Howard, "Remote Control" Taxation Practitioner, Sep 2011 p.45.

85.9.1 *Control of partnership*

Section 995(3) ITA provides the definition:

> In relation to a partnership, "control" means the right to a share of more than half the assets, or of more than half the income, of the partnership.

85.10 Connected person

There are separate definitions for the separate taxes. There are more definitions elsewhere, sometimes the same and sometimes different.

It is a pity that the tax law rewrite did not tidy up this mess; the opportunity is now lost. However the definition(s) considered in this chapter might be considered to represent a single, (more or less) standard definition.

85.10.1 *IT, CGT & CT definitions of connected person*

For CGT, s.286 TCGA provides:

> [a] Any question whether a person is connected with another shall for the purposes of this Act be determined in accordance with the following subsections of this section ...

For IT, s.989 ITA provides:

> The following definitions apply for the purposes of the Income Tax Acts—
>
> "connected", in relation to two persons being connected with one

> another, is to be read in accordance with sections 993 and 994.[20]

The CGT and IT definitions are substantially the same but the ITA drafting in some respects improves on the TCGA. Where they are the same, I give the text of the TCGA and the IT provision in footnotes.

For CT, s.1122(1) CTA 2010 provides:

> This section has effect for the purposes of the provisions of the Corporation Tax Acts which apply this section (or to which this section is applied).

At first sight that seems more limited. But s.1176(1) CTA 2010 provides:

> Section 1122 (how to tell whether persons are connected) applies for the purposes of this Act unless otherwise indicated (whether expressly or by implication).

Section 1316 CTA 2009 is identical. Thus the CT s.1122 definition applies for the CTAs 2009 and 2010 unless disapplied. It could have been drafted more neatly. I do not consider the CT definition in much detail, but what is said about IT is generally applicable to CT

85.10.2 *IHT definition*

For IHT, s.270 IHTA provides:

> For the purposes of this Act any question whether a person is connected with another shall be determined as, for the purposes of the 1992 Act it falls to be determined under section 286 of that Act, but as if in that section 'relative' included uncle, aunt, nephew and niece and 'settlement', 'settlor' and 'trustee' had the same meanings as in this Act.

Thus IHT adopts the CGT definition of "connected person" with a little tinkering.

85.10.3 *Definition in outline*

The definition of connected person has five parts:

(1) Family members
(2) Trustees
(3) Companies held by trusts
(4) Partnerships

---

20 The point is repeated (unnecessarily) in s.1021(1) ITA: "Section 993 (meaning of "connected" persons) applies for the purposes of this Act unless otherwise indicated."

(5) Companies generally

85.10.4 *Reciprocity of connection*

Section 286(1) TCGA continues:

> [b] (any provision that one person is connected with another being taken to mean that they are connected with one another).

The meaning is that "connected" is a reflexive relationship: if A is connected with B then B is connected with A. For IT, s.994(4) ITA is makes the same point more clearly:

> If any provision of section 993 provides that a person ("A") is connected with another person ("B"), it also follows that B is connected with A.

85.11 Connection with family members

Section 286(2) TCGA provides:

> A person is connected with an individual if that person is
> [a] the individual's spouse or civil partner,
> [b] or is a relative,
> [c] or the spouse or civil partner of a relative,
> [i] of the individual or
> [ii] of the individual's spouse or civil partner.

The CG Manual unpacks this definition:

> **14580 Connected persons** [October 2011]
> A person is connected with an individual if that person is
> [1] the individual's spouse or civil partner
> [2] a relative of the individual
> [3] the spouse or civil partner of a relative of the individual
> [4] a relative of the individual's spouse or civil partner
> [5] the spouse or civil partner of a relative of the individual's spouse or civil partner.

The IT equivalent is better worded, but comes to the same thing. Section 993(2) ITA provides:

> An individual ("A") is connected with another individual ("B") if—
> (a) A is B's spouse or civil partner,
> (b) A is a relative of B,
> (c) A is the spouse or civil partner of a relative of B,
> (d) A is a relative of B's spouse or civil partner, or

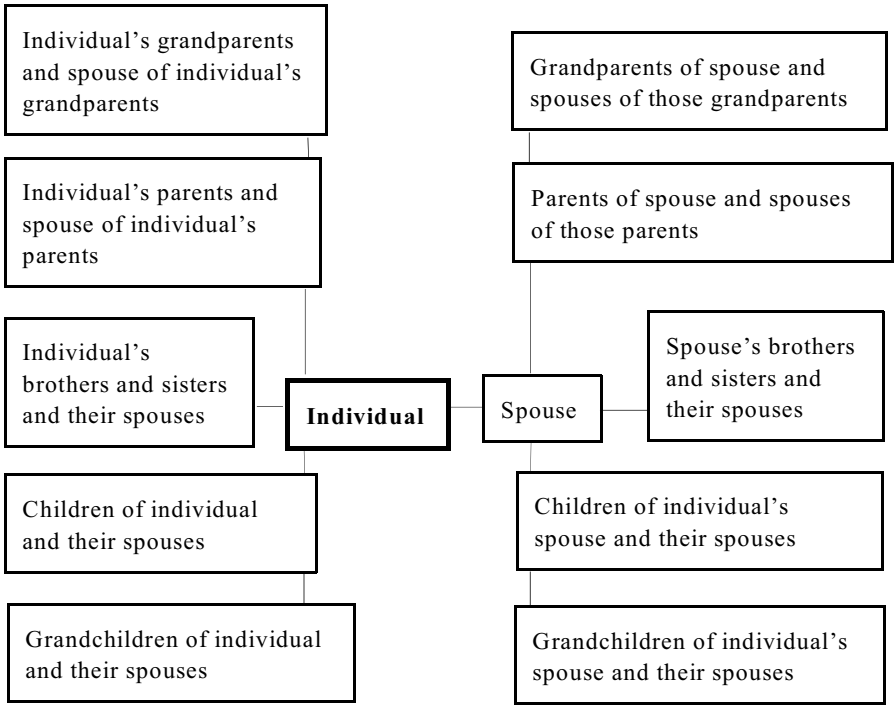
(e) A is the spouse or civil partner of a relative of B's spouse or civil partner.

Section 286(8) TCGA provides:

> In this section "relative" means brother, sister, ancestor or lineal descendant.[21]

The CG Manual provides:

> **14580. Connected persons** [October 2011]
> ... The term 'relative' does not cover all family relationships. In particular, it does not include nephews, nieces, uncles and aunts.
> **14580. Connected persons** [October 2011]
> The following diagram illustrates the provisions of Section 286(2) TCGA 1992. All of the people in the diagram are connected with the individual. They are not all connected with each other[22]



21 For IT the identical definition is in s.994(1) ITA.

22 In this diagram "spouse" includes civil partner.

> All the persons in the diagram are connected with the individual. Excluded are the widows or widowers, or surviving civil partners, of deceased persons, or relatives of a deceased spouse or of a deceased civil partner unless connection can be established by a route not involving the deceased. A dissolution of a civil partnership or a divorce can similarly lead to persons in addition to the former civil partner or spouse ceasing to be connected with the individual.

Readers are invited to speculate whether this diagram is or is not a useful aid to comprehension.

In the definition of connected person for IHT purposes, "relative" also includes an aunt, uncle, nephew and niece.[23] A two dimensional diagram could not do justice to that.

85.12 Connection with trustees

85.12.1 *Settlors and settlor-connected persons*

Section 286(3) TCGA provides:

> A person, in his capacity as trustee of a settlement, is connected with-
> (a) any individual who in relation to the settlement is a settlor,
> (b) any person who is connected with such an individual ... [24]

Similarly for IT, s.993(3) ITA provides:

> A person, in the capacity as trustee of a settlement, is connected with—
> (a) any individual who is a settlor in relation to the settlement,
> (b) any person connected with such an individual,

The CG Manual provides:

> **14590. Connected persons: Trustees** [January 2010]
> ... The trustees are no longer connected to the persons connected to the settlor after the settlor has died.

More accurately, trustees are not connected with family members or other persons who would have been connected with the settlor when the settlor

---

23 See 85.10.2 (IHT definition).

24 For IT, s.993(3) ITA provides similarly:
> A person, in the capacity as trustee of a settlement, is connected with—
> (a) any individual who is a settlor in relation to the settlement,
> (b) any person connected with such an individual ...

was alive.[25]

The CG Manual provides:

> **14590. Connected persons: Trustees** [January 2010]
> [1] A settlor is considered to be connected with the trustee at the moment when property is put into the settlement.
> [2] For the purposes of determining whether a trustee is connected with an individual, the identity of the trustee is irrelevant. So, for example, if the trustee is the wife or civil partner of the individual, he or she is only connected in his or her capacity as trustee if the case is within one of the three cases in CG14590.

Point [2] is correct since trustees are regarded as distinct from the persons who are actually the trustees.

The CG Manual provides:

> **14590. Connected persons: Trustees** [January 2010]
> Although under the tests outlined an individual is not connected with particular trustees, this may not prevent him or her from being connected with a company controlled by the trustees.

This is correct: see 85.15 (Connection with company). The Manual continues:

> Under ICTA 1988, S 417, a beneficiary of a trust can be attributed with the rights and powers of trustees. In such circumstances he or she may control the company through the tests in ICTA 1988, S 416 and ICTA 1988, S 417 and hence be connected under TCGA 1992, S 286.

There is no general rule that the rights of trustees are attributed to beneficiaries. However the attribution will often be made on the grounds that beneficiaries are relatives of the settlor[26] or (sometimes) that beneficiaries possess rights to income or capital.[27]

Suppose:

(1) A creates a trust (trust A) and

---

25 The Tribunal took this view in *Harris v HMRC* [2010] SFTD 1159 at [33]: "Section 839(3)(b) [ICTA] is expressed in the present tense, and s 839(3)(a) requires the settler at the relevant time to be an individual who *is* the settlor. None of this is apt to include a deceased settlor." In s.993 ITA, the tax law rewrite has deleted the second *is* but that makes no difference.
Contrast the definition of associates. See 85.5 (Associates).

26 See 85.6 (Attribution of rights of associates and controlled companies).

27 See 85.3.7 (Right to income); 85.3.8 (Right to capital).

(2) B (who is connected with A, eg a spouse) creates a trust (trust B). A is connected with the trustees of trust A (A is the settlor). A is connected with the trustees of trust B (a connected person is the settlor). However the trustees of trust A are not connected with the trustees of trust B. For the position if the trusts own companies, see 85.15.10 (Example: Trusts with connected settlors own separate companies).

For completeness: s.286(3)(d)(e) TCGA deal with sub-fund settlements.[28] Since sub-fund settlements are (virtually) never found in practice, this is dead-letter law which need not be considered even in a work which seeks to be comprehensive.

Trustees are not connected with a corporate settlor.

85.12.2 *Meaning of settlement and trustee*

Section 286(3ZA) TCGA defines "settlement":

> For the purpose of subsection (3) above-
>
> (a) "settlement" has the same meaning as in section 620 of ITTOIA 2005

Why is the settlement-arrangement definition applied? (Contrast the definition of associate.) Perhaps non-corporate employers complained that a transfer by them to a pension fund was (before 2006) a connected person transaction whereas a transfer by a company to a pension fund was not. Now a transfer to a pension fund is not a connected person as the transferor is not in principle connected with a pension trust.[29] But that is speculation as no reason was ever provided. A consequence is that will trusts are not settlements for the purposes of the connected persons rules, which is odd.[30]

Before 2006, the settlement-arrangement definition applied for IT but not for CGT. The reason for the CGT change might have been that the same rule should apply for both taxes. Of course an alternative would have been to bring IT in line with CGT. Had a reason for the change been

---

28 "(d) if the settlement is the principal settlement in relation to one or more sub-fund settlements, the trustees of the sub-fund settlements, and
(e) if the settlement is a sub-fund settlement in relation to a principal settlement, the trustees of any other sub-fund settlements in relation to the principal settlement."

29 See 80.34.1 (Is a pension trust or employee trust a settlement?).

30 See 78.6.1 (Is an estate a "settlement" within s.87 TCGA?). For completeness: This was overlooked in an obiter passage in *Harris v HMRC* [2010] UKFTT 385 at [32] where the relevant authorities were not cited.

given, the issues could have been publically discussed. But there it is.

Section 286(3ZA)(b) TCGA defines "trustee":

> "trustee", in relation to a settlement in relation to which there would be no trustees apart from this paragraph, means any person in whom the settled property or its management is for the time being vested.

For the definition of control for IHT purposes, "settlement" "settlor" and "trustee" have their IHT meanings: s.270 IHTA.

85.13 Company connected with trustees

Section 286(3) TCGA provides:

> A person, in his capacity as trustee of a settlement, is connected with ...
> (c) any body corporate[31] which is connected with that settlement,

This takes us to s.286(3A) TCGA which provides:

> For the purpose of subsection (3) above a body corporate is connected with a settlement if-
> (a) it is a close company (or only not a close company because it is not resident in the UK) and the participators include the trustees of the settlement; or
> (b) it is controlled (within the meaning of section 1124 of the Corporation Tax Act 2010) by a company falling within paragraph (a) above.

It is confusing that the drafter used the expression "connected with a settlement" since in that expression the term "connected" is not used in the normal CGT sense of connected persons. But it does not matter.

The IT equivalent is more clearly drafted. Section 993(3) ITA provides:

> A person, in the capacity as trustee of a settlement, is connected with ...
> (c) any close company whose participators include the trustees of the settlement,
> (d) any non-UK resident company which, if it were UK resident, would be a close company whose participators include the trustees of the settlement,
> (e) any body corporate controlled (within the meaning of section 995) by a company within paragraph (c) or (d)

---

31 I do not know why the subsection refers to body corporate rather than company, but I don't think it makes any difference.

Thus trustees are connected with any close company in which they have any interest, no matter how small, but non-trustees are connected only if there is some element of "control".

85.14 Connection with partners

Section 286(4) TCGA provides:

> Except in relation to acquisitions or disposals of partnership assets pursuant to bona fide commercial arrangements, a person is connected with
> [a] any person with whom he is in partnership,
> [b] and with
> [i] the spouse or civil partner
> [ii] or a relative
> of any individual with whom he is in partnership.[32]

A partner is connected with a company controlled by a partnership because the partner has "control" of the company[33] and a person is connected to a company of which they have "control".[34]

85.15 Connection with company

Apart from the rule connecting trustees with companies, s.286 TCGA provides two ways by which a company may be connected with another person:
(1) company and person with control;
(2) company and persons acting together to exercise control.
In addition there are two ways by which a company may be connected with another company (an "inter-company connection"):
(1) 2 companies with common control;
(2) 2 companies with groups of connected controllers.

---

32 For IT, s.993 (4) ITA provides similarly:
"A person who is a partner in a partnership is connected with—
(a) any partner in the partnership,
(b) the spouse or civil partner of any individual who is a partner in the partnership, and
(c) a relative of any individual who is a partner in the partnership.
But this subsection does not apply in relation to acquisitions or disposals of assets of the partnership pursuant to genuine commercial arrangements."

33 See 85.5.1 (Relatives and partners).

34 See 85.15.4 (Person controls a company).

For completeness: the standard definition of company is disapplied for the purposes of s.993 and 994 ITA (though not for CGT purposes).[35] So s.994 needs to provide its own definition of company,[36] but since the definition is (almost) the same as the standard definition, this makes (almost) no difference.[37]

For IT, s.994(1) ITA provides:

> In section 993 and this section ...
> "control" is to be read in accordance with sections 450 and 451 of CTA 2010 (except where otherwise indicated)

The only place where the context indicates that "control" is not used in the ultra-wide sense is in the phrase "acting together to secure or exercise control" and for all other references the ultra-wide sense applies. For this reason the concept of being connected with a company is also ultra-wide and no-one can draw a complete list of all the companies with which they are connected.

The CGT equivalent is s.288(1) TCGA. The wording is slightly different: but the position is exactly the same.

85.15.1 *Inter-company connection: One person controls two companies*

Section 286(5)(a) TCGA provides:

> A company is connected with another company-
> (a) if the same person has control of both...

A simple case is if one person owns two companies:

---

35 See 84.4 (Meaning of "company").

36 Section 994 ITA provides:

"(1) In section 993 and this section—

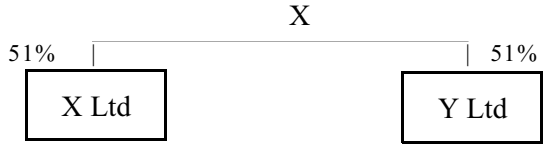
'company' includes any body corporate or unincorporated association, but does not include a partnership (and see also subsection (2)),...

(2) For the purposes of section 993—

(a) a unit trust scheme is treated as if it were a company, and

(b) the rights of the unit holders are treated as if they were shares in the company."

37 The only difference concerns the somewhat specialist topic of local authorities; see Kessler & Marre *Taxation of Charities & Non-profit Organisations* (9th ed., 2013), para 43.5.1 (Group relief).



X Ltd is connected with Y Ltd.

85.15.2 *Inter-company connection: Connected persons control two companies*

Section 286(5)(a) TCGA provides:

> A company is connected with another company-
> (a) if ..
> [i] a person has control of one and
> [ii] [A] persons connected with him, or
> [B] he and persons connected with him,
> have control of the other,

If two persons ("X" and "Y") are associates, this is not needed because the rights of X are attributed to Y.[38] It is relevant in a case where two persons are connected but not associates.

85.15.3 *One group controls two companies*

Section 286(5)(b) TCGA provides:

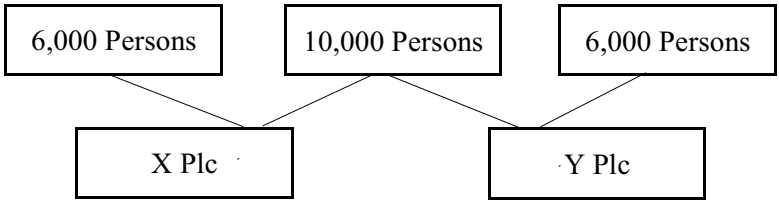
> A company is connected with another company...
> (b) if
> [i] a group of 2 or more persons has control of each company, and
> [ii] the groups either
> [A] consist of the same persons or
> [B] could be regarded as consisting of the same persons by treating (in one or more cases) a member of either group as replaced by a person with whom he is connected.

The group may be vast and does not need any common purpose or identity. In *Kellogg Brown v HMRC*[39], two quoted companies each with over 16,000 shareholders were connected by a somewhat unimaginative

38 See 85.6 (Attribution of rights of associates and controlled companies).

39 *Kellogg Brown & Root Holdings (UK) v HMRC* [2010] STC 925

construction of this head, since there was sufficient overlap between the two groups.



X Plc and Y Plc are connected.

85.15.4 *Person controls a company*

Section 286(6) TCGA provides:

> A company is connected with another person, if
> [a] that person has control of it ...

Since control is ultra-wide, this head of control is also ultra-wide. See 85.7.2 (Associates each own a company).

85.15.5 *Connected persons control a company*

Section 286(6) TCGA provides:

> A company is connected with another person, if ...
> [b] if that person and persons connected with him together have control of it.[40]

---

40 For IT, s.993 ITA provides similarly:
(5) A company is connected with another company if—
(a) the same person has control of both companies,
(b) a person ("A") has control of one company and persons connected with A have control of the other company,
(c) A has control of one company and A together with persons connected with A have control of the other company, or
(d) a group of two or more persons has control of both companies and the groups either consist of the same persons or could be so regarded if (in one or more cases) a member of either group were replaced by a person with whom the member is connected.
(6) A company is connected with another person ("A") if—
(a) A has control of the company, or

If two persons ("X" and "Y") are associates, this is not needed because the rights of X are attributed to Y.[41] For instance, suppose:
(1) X and Y are relatives or partners.
(2) X owns 30% of A Ltd and Y owns 30% of A Ltd.
X "controls" A Ltd so this provision is not needed. It is only relevant in a case where two persons are connected but not "associates".

Suppose
(1) A and B are connected persons but not associates.
(2) B controls X Ltd and A has no interest in X Ltd.
It is considered that A is connected to X Ltd. It might be argued that A and B do not *together* have control, but various anomalies would arise, and that is reading too much into the word *together*.

85.15.6 *Persons acting together to exercise control*

Section 286(7) TCGA provides:

> Any 2 or more persons acting together to secure or exercise control of a company shall be treated in relation to that company as connected with one another and with any person acting on the directions of any of them to secure or exercise control of the company.[42]

For the purposes of discussion I abbreviate "secure or exercise control" to "exercise control".

The CG Manual comments on the phrase "acting together to exercise control":

> **14622 Companies: 2 or more persons acting together to control** [February 2006]
> ... For this subsection to operate it is not sufficient for the persons to have control of the company, the persons do have to act in some way to control the company. However, for example, exercising control could mean refraining from voting in a particular way and so enabling another

---

(b) A together with persons connected with A have control of the company.

41 See 85.6 (Attribution of rights of associates and controlled companies).

42 For IT, s.993(7) ITA provides similarly:
"In relation to a company, any two or more persons acting together to secure or exercise control of the company are connected with—
(a) one another, and
(b) any person acting on the directions of any of them to secure or exercise control of the company."

> person to win a vote, as well as by actually voting.

In *Steele v EVC International* 69 TC 88 one issue was whether two joint shareholders were "acting together". The Court of Appeal said:

> the mere coincidence of voting the same way at general meetings is insufficient. Likewise, combining together to carry a particular resolution would not normally be sufficient to constitute acting together to exercise control either at all or on any continuing basis cf *IRC v Lithgows* 39 TC 270.

So far so good. The Court continued:

> the shareholders' agreement set out in great detail how EVC was to be constituted and administered. At all material times the agreement was in force and performed and observed by each of the shareholders. ... such performance and observation constituted the necessary "acting together".

The existence of a shareholders agreement does not show that the shareholders are acting together to exercise control. It is a question of fact. In *EVC*, most of the terms of the shareholders agreement seem to me to be indicative of each side protecting its interest acting separately! The agreement ensured that the company was deadlocked at board level as it was at general meeting level. However the following term suggested the shareholders were acting together:

> that EniChem and ICI should procure that not less than two-thirds of the profits of the joint venture available for dividend should be distributed to the shareholders and should procure that the shareholders vote accordingly to achieve this.

Foulser v MacDougall[43] is another example of acting together, but the facts were unusual. An individual (in short) owned a company through a life policy wrapper. He arranged the sale of the company on behalf of the insurance company shareholder. The insurance company shareholder and the individual were held to be acting together to exercise control. The Court said:

> there is no reason why the concept of two or more persons "acting together to … exercise control of a company" should, necessarily, be

43 [2005] STC (SCD) 374. The finding was not challenged on appeal.

> confined to cases where each of the persons acting together has less than a controlling shareholding, so that (absent some combination between them) none would be able to exercise control individually. It seems to me that the concept is sufficiently wide to include cases where one person (who has shareholder or voting control) agrees to exercise that control in accordance with the wishes of another.[44]

A more restrictive view was taken in *HMRC v UBS*:

> The UT's view ... appears to have been that if DB controlled Investec in relation to the latter's voting at general meetings of Dark Blue, then 'the test of control in section 416(3) [ICTA = s.993(7) ITA] was satisfied'. Mr Goy submitted, and I agree, that section 416(3) is irrelevant to our facts. Investec, by virtue of its holding in Dark Blue, was formally in control of Dark Blue within the meaning of section 416(1). The relevant question for our purposes, however, is whether Investec was, vis-à-vis its role as a Dark Blue shareholder, itself in the control of DB. If it was, the opening words of section 416(2) are satisfied and DB and Dark Blue are associated companies. If it was not, those words are not satisfied. I do not understand what section 416(3) is thought to have to do with it. It is contemplating a case in which, for example, DB and X Ltd together had relevant control of Dark Blue via their combined control of Investec. On no footing is that this case.[45]

85.15.7 *Directors*

The CG Manual considers the position of directors:

> **14623. Directors of a company** [August 2009]
> Directors of a company are not necessarily connected persons in relation to transactions between themselves. Whether or not one of them controls the company or two or more together control the company, they are not connected persons unless they are 'relatives' or partners. Section 286(7) TCGA 1992 makes two or more directors connected persons only in relation to transactions with the company.

The last sentence means that if directors are acting together to exercise control at shareholder level, they are connected persons only in relation to transactions with the company.

---

44 [2007] STC 973 [42]. *UBS v HMRC* [2012] UKUT 320 (TCC) is an example where companies were held not to be acting together.

45 [2014] EWCA Civ 452 at [133].

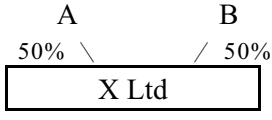
85.15.8 *Personal representatives*

The definition of connected person does not expressly mention PRs (unlike the definition of "associates"). PRs cannot be connected with individuals or trustees.[46]

PRs may be connected with a company. They are "persons" so they are connected if (inter alia) they have control of the company or if they act with others to exercise control.

85.15.9 *Example: Unconnected persons jointly own a company*

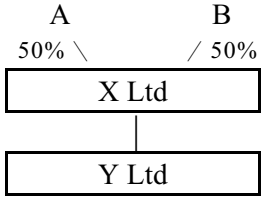
Suppose individuals A and B (who are not connected or associated) each own 50% of X Ltd.



If A and B are not acting together to exercise control then they are not connected with each other or to X Ltd.

Suppose A and B are acting together to exercise control (as may well be the case). In that case they are "treated in relation to that company as connected with one another." A and B are also connected with the company. However, A does not control the company.

Suppose X Ltd has a subsidiary thus:



It is considered that A is connected to Y Ltd since A and persons connected to A (ie X Ltd) together control Y Ltd.[47]

Of course, A and B together control X Ltd. Suppose A and B own two companies thus:

---

46 The same conclusion was reached, though in a more roundabout way, in *Harris v HMRC* [2010] UKFTT 385 at [31] - [33].

47 See 85.15.5 (Connected persons control a company).

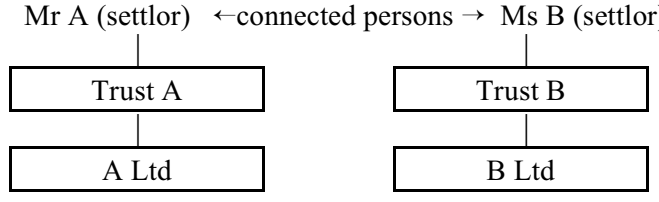
X Ltd and Y Ltd are connected with each other.

85.15.10 *Example: Trusts with connected settlors own separate companies*

Suppose:

(1) A creates a trust (trust A) which owns a company (A Ltd) and

(2) B (who is a relative or spouse of A) creates a trust (trust B) which owns a company (B Ltd), thus:



The analysis is as follows:

(1) A is connected with Trust A (because A is the settlor).

(2) A has "control" of A Ltd (the trustees of trust A are associates of A, because A is the settlor; so their rights are attributed to him).

(3) A is connected with A Ltd (because of that control).

(4) A is connected with the trustees of trust B (because a connected person is the settlor).

(5) A has "control" of B Ltd (the trustees of trust B are associates of A because a relative is the settlor; so their rights are attributed to him).

(6) A is connected with B Ltd (because of that control).

(7) A Ltd is connected with B Ltd (because A has "control" of both).

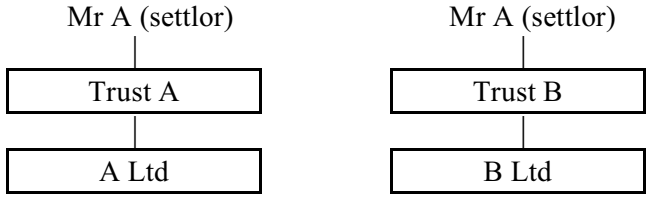
The trustees of trust A are not connected with the trustees of trust B but that does not stop their companies from being connected. Note that it is not necessarily possible for A Ltd or the trustees of trust A to know that A Ltd is connected with B Ltd.

What if A and B have died? If there is any person alive who is a relative of A and B, as defined, the relative has "control" of both companies and so A Ltd and B Ltd are still connected. But if A and B have no relatives (as defined) then the two companies are not in principle connected.

85.15.11 *Example: Trusts with same settlor own separate companies*

Suppose A is the settlor of two trusts (trust A and B) which each own a

company (A Ltd, B Ltd), thus:



The analysis is as follows:

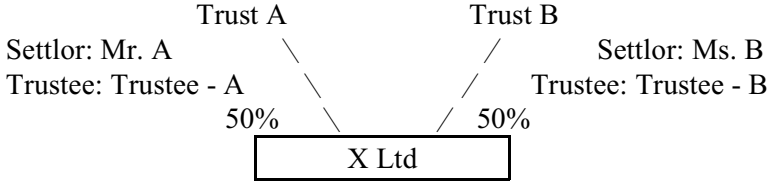
(1) A is connected with Trust A and with Trust B (because A is the settlor).
(2) A has "control" of A Ltd and B Ltd
(3) A is connected with B Ltd (because of that control).
(4) A Ltd is connected with A Ltd and B Ltd (because A has "control" of both).

The trustees of trust A are not connected with the trustees of trust B but that does not stop their companies from being connected.

What if A has died? If there is any person alive who is a relative of A, as defined, the relative has "control" of both companies and so A Ltd and B Ltd are still connected. But if A has no relatives (as defined) then the two companies are not in principle connected.

85.15.12 *Example: Unconnected trusts jointly own a company*

Suppose individuals Mr A and Ms B (who are not otherwise connected) are settlors of trusts which each own 50% of X Ltd. The trustees are Trustee-A and Trustee-B.



If none of Mr A, Ms B, Trustee-A and Trustee-B are acting together to exercise control then none of Mr A, Mr B, Trustee-A, Trustee-B or X Ltd are connected.

Suppose Mr A, Ms B, Trustee-A and Trustee-B are all acting together to exercise control (as may well be the case). In that case they are "treated in relation to that company as connected with one another." Mr A is also connected with the company. They would similarly be connected with a subsidiary of the company. Mr A does not control the company.

85.16 Why does it matter who is a participator?

The term "participator" is used throughout the Taxes Acts, and it is not practical to give a full list. For the purposes of this book, the term is particularly important in the following contexts:

(1) The definition of "relevant person" for the ITA remittance basis
(2) Section 13 TCGA (non-resident company gains attributed to participators)
(3) The test of whether trustees control a company[48]
(4) The definition of "close company"

85.17 Definition of participator

Section 454(1) CTA 2010 provides a general statement:

> For the purposes of this Part, "participator", in relation to a company, means a person having a share or interest in the capital or income of the company.

Section 454(2) CTA 2010 goes on to list five specific categories of participator:

> In particular, "participator" includes—
>
> (a) a person who possesses, or is entitled to acquire, share capital or voting rights in the company,
> (b) a loan creditor[49] of the company,
> (c) a person who possesses a right to receive or participate in
> [i] distributions[50] of the company or
> [ii] any amounts payable by the company (in cash or in kind) to loan creditors by way of premium on redemption,
> (d) a person who is entitled to acquire such a right as is mentioned in paragraph (c), and
> (e) a person who is entitled to secure that income or assets (whether present or future) of the company will be applied directly or indirectly for the person's benefit.

---

48 See 85.13 (Company connected with trustees).

49 See 85.18 (Loan Creditor).

50 Section 454(4) CTA 2010 defines "distribution": "In subsection (2) 'distribution' is to be construed without regard to section 1000(2) (extended definition of distribution for close companies)."

This is so wide that it is difficult to think of a case falling within (1) which is not within (2).

The definition is expressed to apply for the purposes of Part 10 CTA 2010, but it should be a taxes-act-wide definition. When the word participator is used in connection with close companies, the definition is almost always incorporated and where there is no definition it must be implied. Occasionally the definition is adopted with extensions: s.454(6) CTA 2010 anticipates this:

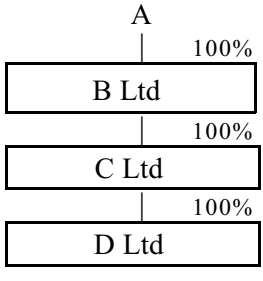
> This section does not affect any provision of this Part requiring a participator in one company to be treated as being also a participator in another company.

85.17.1 *Charge over shares*

Suppose a person has a charge over shares to secure a debt. The charge is an interest in the shares of the company, but not an interest in the capital or income of the company, and it is not in principle within any of the categories of s.454(2). Accordingly a chargee is not in principle a participator.

85.17.2 *Chain of wholly owned companies*

Suppose a chain of wholly owned companies:



C Ltd is obviously a participator in D Ltd. But A and B Ltd are also participators in D Ltd, under s.454(2)(e) CTA 2010.[51] This is so wherever the companies are resident.

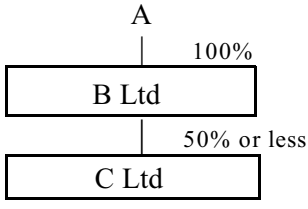
85.17.3 *Chain of partly owned companies*

Suppose a chain of partly owned companies which do not confer control, such as:

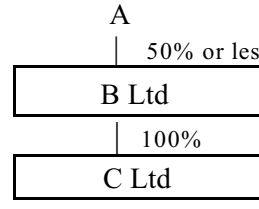
---

51 This view is not universally held.

Example 1



Example 2



A is a participator in B Ltd. A does not control C Ltd[52] and it is considered that A is not a participator in C Ltd. It might be argued that the rights of a minority shareholder are such that A is a participator within s.454(2)(e) - ie that A has the right to secure that the income of C Ltd is applied for A's benefit. I refer to this as the wide view. But this is very doubtful and in practice it appears that HMRC do not take the wide view. Section 455(5) CTA 2010 provides a wider than standard definition of "participator":

> If a company (c) controls[53] another company (D), a participator in C is to be treated for the purposes of this section as being also a participator in D.[54]

This applies in a few specific circumstances, in particular:
(1) For the definition of relevant person in the ITA remittance basis.[55]
(1) For s.1064 CTA 2010 (extended meaning of "distribution" for close companies.)
(2) For s.455 CTA 2010 (loans to participators).

The CT Manual provides:

> **60110 Participator: Extended meaning of** [November 2011]
> ... If, for example, Company B holds all the issued share capital of Company T and Company T makes a loan to W, a shareholder in Company B, that loan is within [s.455 CTA 2010] since W as well as being a participator in Company B is deemed also to be a participator in Company T.

This example is essentially example 2 above. It assumes that the wide view is not correct; that is why the extended definition of "participator"

---

52 In the absence of special facts, eg provisions in the company articles or shareholder agreements.

53 The ultra-wide definition of "control" applies: see 85.3 (Control in ultra-wide sense).

54 This provision is also found in s.459(4) CTA 2010.

55 See 11.5.1 ("Participator").

is needed.

85.17.4 *Trustees and beneficiaries*

Suppose trustees hold a share or interest in a company. The trustees are participators under s.454(1) CTA 2010. A person holding a share or interest as trustee is not a participator in their personal capacity since trustees are (at least for IT and CGT purposes) deemed to be a separate person. Beneficiaries of a *Baker* trust, other than merely discretionary beneficiaries, are also participators under s.454(1) since they too have an interest in the trust property. Beneficiaries of a *Garland* trust do not have an interest in trust property. However they are participators under s.454(2)(a)(c)(d) by virtue of their right to compel administration of the trust.

HMRC agree. The CT Manual provides:

> **60160. 'Interested in'** [February 2006]
> The words 'interested in' have a wide meaning and, for example, where shares are held by trustees, the trustees, the beneficiaries and the remainderman (if any) of the trust are interested in the shares. Where shares are held by trustees under a will for persons in succession, the life tenant and the remainderman, as well as the trustees, are interested in the shares. (See, in this connection, *IRC v Park Investments* 43 TC 200, particularly the judgment of Danckwerts LJ at page 225, *IRC v Tring Investments* 22 TC 679, and *Alexander Drew and Sons v IRC* 17 TC 140.)

As to whether a person holding as nominee is a participator in their private capacity, see *Bramwell on Corporation Tax* (looseleaf) para A.11.1.16.

What about beneficiaries of a discretionary trust? The question is whether they have an "interest" in the company. The general rule is that the word "interest" is ambiguous and may or may not be taken to include the rights of a discretionary beneficiary: the context must decide the question; see *Leedale v Lewis* 56 TC 501. The difficulty is that the concept of participator is used in many contexts, and the definition section itself does not offer much context. *Bramwell on Corporation Tax* takes the view that beneficiaries of a discretionary trust are participators, and for practical purposes it would be safest to proceed on the basis that this may well be correct.

85.17.5 *Personal representatives and beneficiaries of estates*

Suppose PRs hold shares in a company. The PRs are participators under

s.454(1) CTA 2010.

A person holding shares as PR is not a participator in their private capacity for CGT purposes as for CGT the PRs are deemed to be a separate person. The Tribunal reached the same conclusion for IT purposes even in the absence of a provision expressly deeming PRs to be a separate person.[56]

Beneficiaries of the estate are not participators under s.454(1) since they do not have a legal or equitable "interest" (in the strict sense) in the assets of the estate. However they are participators under s.454(2)(a)(c)(d) by virtue of their right to compel administration of the estate.

The CT Manual provides:

> **60160. 'Interested in'** [February 2006]
> ...The executors or administrators are interested in the assets of a deceased person's estate during the period of administration (*Willingale v Islington Green Investment* 48 TC 547). The beneficiaries should be regarded as interested in any assets of the estate from which they may benefit.

85.17.6 *"Entitled to do"*

Section 454(3) CTA 2010 provides:

> For the purposes of subsection (2), a person is treated as entitled to do anything which the person—
> (a) is entitled to do at a future date, or
> (b) will at a future date be entitled to do.

The CT Manual provides:

> **60120. Entitled to acquire or secure** [November 2011]
> The words 'entitled to acquire' and 'entitled to secure' introduce the concept of a potential participator. So, for example, a person is a participator if, by means of a contractual right or by rights arising under a trust deed, they can:
> • require a shareholder to transfer shares to that person, or

---

56 *Harris v HMRC* [2010] SFTD 1159 at [31]: "There must be a distinction between a benefit being received by an individual beneficiary and a benefit being received, albeit by the same person, in a representative capacity.... Otherwise a different result would obtain depending on whether the residuary beneficiaries were the same persons as, or different persons from, the personal representatives."
However *Bibby v IRC* 29 TC 167 was not cited.

- secure the issue to that person of unissued capital of the company, or
- secure that if the company makes a distribution or if a loan is redeemed by the company at a premium, that person has a share in the distribution or the premium.

Similarly, a person is a participator if by means of a contractual right or some other arrangement they can secure that income or assets of the company will be applied directly or indirectly for their benefit. See too 85.3.9 ("Entitled to acquire").

85.18 Loan Creditor

85.18.1 *Why does it matter who is a loan creditor?*

The expression is used too often to set out a full list, but in particular:
(1) A loan creditor is a participator.
(2) The expression is used in the definition of close company.

85.18.2 *Definition of loan creditor*

Section 453 CTA 2010 provides:

> (1) For the purposes of this Part, "loan creditor", in relation to a company, means a creditor—
>
> (a) in respect of any debt within subsection (2), or
>
> (b) in respect of any redeemable loan capital issued by the company.
>
> But this is subject to subsection (4).
>
> (2) Debt is within this subsection if it is incurred by the company—
>
> (a) for any money borrowed or capital assets acquired by the company,
>
> (b) for any right to receive income created in favour of the company, or
>
> (c) for consideration the value of which to the company was (at the time when the debt was incurred) substantially less than the amount of the debt (including any premium on the debt).

The CT Manual paraphrases this provision and continues:

> **60130. Loan creditor** [November 2011]
>
> A person is not a participator merely because he or she is a normal trade creditor of the company.
>
> As the normal debenture issued by a company is redeemable, debenture holders are participators.
>
> Payments to be made under a hire purchase agreement would not

> normally be regarded as part of the company's loan capital. This is because under the usual hire purchase agreement there will be no debt for capital assets acquired by the company. The terms of the typical agreement make it clear that the assets remain in the ownership of the hire company until the final instalment is paid. The payments not made in order to acquire a capital asset, but rather they are rent for the use of the asset.
>
> An example of a sum owing in the circumstances described in [s.453(2)(b)] is where a person contracts to make annual payments to the company, in return for a capital sum due at some later date. The capital sum is treated as loan capital of the company and the person will be a participator.
>
> ... It should be borne in mind that [s.1000 CTA 2010] provides that the interest etc on certain loans is a distribution. As regards such loans, the creditor is in any case a participator as he or she 'possesses a right to receive or participate in distributions of the company' (see [s.454(2)(c)]).

85.18.3 *Interest in debt*

Section 453(3) CTA 2010 provides:

> A person who—
>
> (a) is not the creditor in respect of any debt or loan capital to which subsection (1) applies, but
>
> (b) has a beneficial interest in that debt or loan capital,
>
> is, to the extent of that interest, treated for the purposes of this Part as a loan creditor in respect of that debt or loan capital (but this is subject to subsection (4)).

The words "to the extent of that interest" are not well expressed, since a person either is or is not a loan creditor. One cannot be a loan creditor "to an extent". But it does not matter.

85.18.4 *Bank creditor*

Section 453(4) CTA 2010 provides:

> A person carrying on a business of banking is not treated as a loan creditor in respect of any debt or loan capital incurred or issued by the company for money lent by the person to the company in the ordinary course of that business.

The CT Manual provides:

60130. Loan creditor [November 2011]
Banking business
[The manual summarises the provision and continues:] Where a company has borrowed money from a person, that person is a participator unless the person carries on the business of banking and made the loan in the ordinary course of that business (Section 453(4) CTA 2010... There is no statutory definition of what constitutes carrying on a banking business (the definition of bank in Section 1120 CTA 2010 ... does not apply to Section 453 CTA 2010 ...) so we rely instead on the common characteristics of banking established in the (non-tax) case of *United Dominions Trust v Kirkwood* 1966 2 QB 431 and endorsed in *Hafton Properties v McHugh* 59 TC 420.
If you have any queries on whether a person is carrying on a business of banking, or whether a loan is made in the ordinary course of that business, please consult CTIAA (Technical).

85.19 Close company: Introduction

"Close" company is a concept used so often in tax legislation that it is impossible to write a full list. For the purposes of this book, the concept is important in particular in the definitions of relevant person (for remittances); connected person, and for the application of s.13 TCGA.

"Close company" is one of the most elaborately defined expressions in the taxes acts, and that is really saying something. There are two main tests of close, the control test and the winding up test.

The definition in the CTA is for the purposes of the corporation tax acts. This is extended to income tax by s.989 ITA:

> The following definitions apply for the purposes of the Income Tax Acts—
> "close company" is to be read in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439 of that Act)

The definition is extended to CGT by s.288(1) TCGA:

> In this Act, unless the context otherwise requires—
> "close company" shall be construed in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439)

85.20 Control test

Section 439(1) CTA 2010 provides:

> For the purposes of the Corporation Tax Acts, a "close company" is a company in relation to which condition A or B is met.

I refer to **"close company conditions A and B"**.

85.20.1 *Close company condition A: Control of five or fewer participators*

Section 439(1) CTA 2010 provides:

> Condition A is that the company is under the control—
> (a) of 5 or fewer participators, or
> (b) of participators who are directors

Control has the ultra-wide sense.

85.20.2 *Control of participators who are directors*

This takes us to the idiosyncratic definition of director in s.452 CTA 2010:

> (1) In this Part, "director", in relation to a company, includes—
> (a) a person occupying the position of director of the company, by whatever name called,
> (b) a person in accordance with whose directions or instructions the directors of the company are accustomed to act, and
> (c) a person within subsection (2).

(1)(a)(b) are standard form; but (c) leads to a distinctly non-standard extension:

> (2) A person (P) is within this subsection if P—
> (a) is a manager of the company or otherwise concerned in the management of the company's trade or business, and
> (b) is—
> (i) the beneficial owner of, or
> (ii) directly or indirectly able to control,
> at least 20% of the ordinary share capital of the company.
> (3) For the purposes of subsection (2)(b), P is treated as owning or controlling (as the case may be) what any associate of P owns or controls.

A company controlled by director-participators is a close company, even if the number of director-participators exceeds five. Directors have "control" of a company if (*inter alia*) they exercise direct or indirect control over the company's affairs. This is puzzling as (under standard articles)[57] company law directors manage the business of the company,

57 The Companies (Model Articles) Regulations 2008 Model Article para 3; (formerly Table A paragraph 70).

and may exercise all the powers of the company. In one sense, directors always control their company. It cannot be that every company whose directors happen to be participators is made a close company under this part of the definition. The answer is that "control" here means control at shareholder level, the ability to pass an ordinary resolution in general meeting. Directors do not "control" a company, in the relevant sense, unless they control the company at that level.[58]

It follows that a charitable company is normally close if its directors constitute all or a majority of the members of the company.[59]

As to whether a foundation is a close company, see 84.8.2 (Is a foundation an IT/CGT settlement, or a company?).

85.20.3 *HMRC examples*

The CT Manual gives some examples:[60]

> **CTM60420 - Close companies: tests: examples** [Nov 2011]
> ... The examples refer to companies having shares that are not dealt in or quoted on a stock exchange.
> **Example 1**
> Company X has 1,000 issued shares of £1 held as below.
> Trustees of A's settlement 449
> Mrs A (settlor) 60
> Ten other shareholders 491
> Total issued ordinary shares 1,000
> The ten shareholders are not associated with each other or with A or Mrs A and no one of them holds more than 50 shares.
> The trustees of A's settlement are associates of Mrs A by virtue of CTA2010/S448 (1) (b) and (c) ... and their rights and powers may be

---

58 *Steele v EVC International* 69 TC 88 at p.127. See Venables, *The Taxation of Foundations* (2010) para E2.1.4.3 (Direct or Indirect Control over the Company's Affairs).

59 For example, an Oxford college (a body corporate) may be a close company, since:
(1) Its fellows may be "participators", if they possess voting rights in the body corporate.
(2) Its fellows manage the business of the body corporate, so they are (in principle) "directors".
(3) Its fellows control the body corporate, at shareholder level (or more accurately, at corporate member level).
It appears that HMRC do not take this point in practice.

60 In these examples I omit internal Manual cross references and alter the formatting for increased clarity.

attributed to Mrs A who therefore controls the company.
Company X is therefore a close company.

This is correct, but it is not necessary to rely on the associates rule to reach the conclusion that the company is close. The company would be close even if Mrs A were not the settlor since it is under the control of two (less than five) persons.

The Manual continues:

CTM60420 - Close companies: tests: examples [Nov 2011]
... **Example 2**
The £1 issued shares in a trading company are owned as follows.

Ordinary shares		
Directors		
A	4	
B (cousin of A)	4	
Others: 12 individuals equally, none of whom is a nominee associate, etc, of any other shareholder		4,992
Total issued ordinary shares		5,000
5% preference shares		
A (see above)		5,000
Total nominal and issued capital		10,000

There are no loan creditors ranking as participators or members.
Control by reference to possession of the greater part of the issued share capital (CTA2010/S450 (3).
The company is a close company because A possesses more than half the issued capital.

This is straightforward.

The Manual continues:

CTM60420 - Close companies: tests: examples [Nov 2011]
... **Example 3**
The issued ordinary shares in a trading company carry one vote each but the 'A' ordinary shares do not confer voting rights. The shareholders are as below.

	Ordinary	'A' ordinary
A	280	
Wife of A	100	
B (brother of A)	10	
Trustees of A's settlement	40	
Company X (controlled by A)	80	
	510	

Mrs C (daughter of B)	20	
10 other equal holdings	470	500
Total issued shares	1,000	500

The shares carry equal rights to dividend. A's wife has made a loan of £20,000 to the company at 5% interest. There is no share premium account or other comparable account.
Control by voting rights (CTA2010/S450 (3) ...
The associates of A are:
- his wife and his brother, (ICTA88/S417 (3)(a) and (4), ... and
- the trustees of A's settlement, CTA2010/S448 (1) (b) and (c)...
The rights and powers attributable to A are:
- the rights and powers of his associates (CTA2010/S451 (4) to (6) ... and
- the rights and powers of Company X (CTA2010/S451 (4) to (6)).
As a total of 510 votes are thus possessed by A or attributable to him, the company is a close company controlled by one person.

This is correct, but it is not necessary to rely on the associates rule. The company would be close even if none of the shareholders were associates, since it is under the control of five participators. A's wife's loan is wholly irrelevant and it is difficult to see why the example mentions it.

Alternatively control by holding the greater part of the issued share capital, (CTA2010/S450 (3)), - any eight of the other equal holdings will control the company by holding the greater part of the issued share capital.

I do not understand this comment. Perhaps the text of the example is corrupt.

CTM60420 - Close companies: tests: examples [Nov 2011]
... Example 4
The authorised and issued share capital of Company X is £1,000 in the form of 1,000 ordinary shares of £1 each, held as below.

A	200
B	100
C	50
D	50
E	40
Company Y	99
Other shareholders	461
Total issued ordinary shares	1000

A, B and C are directors.

The issued capital of Company Y, is £100 in the form of 100 ordinary shares of £1 each, held by:

F (son of E)	60
G	40
Total issued shares	100

The shareholders in Company X, other than Company Y, are all individuals and none are related or otherwise associated. No 'other shareholder' holds more than 50 shares.

Control - the rights in the shares held by Company Y in Company X may be attributed to F who controls that company (CTA2010/S451 (4) to (6) ...

F is an associate of E but the rights attributed to F cannot be further attributed to E (CTA2010/S451 (4) to (6)).

No group of five participators or fewer can control Company X, nor do the director/participators control, and nor would the winding up test be of assistance here.

Company X is not a close company.

CTM60420 - Close companies: tests: examples [Nov 2011]

... Example 5

The facts are the same as in Example 4 except that F is the holder of one share in Company X.

Control rights can be attributed to F as below.

Shares held in own right	1
Shares held by E (an associate)	40
Shares held by Company Y (controlled by F)	99
	140

Thus A, B, C, D and F hold (or have attributed to them) the rights in 540 shares and control the company.

Company X is a close company.

This example neatly illustrates the arbitrary nature of the rules. At the margin, there is obviously some scope for tax planning.

CTM60420 - Close companies: tests: examples [Nov 2011]

... Example 6

Company X has authorised capital of £5,000 in £1 ordinary shares of which £3,000 is issued as below.

A	150
B	150
C	150
D	250
E	250
F	250

20 other shareholders (no one holder having over 100 shares)	1800
Total issued ordinary shares	3000

The 20 other shareholders are individuals and none of the shareholders is an associate of any other. A, B and C are the directors. They each enter into a service agreement providing that they are to remain directors for five years from 1 January 1992, and that on 31 December 1996, they shall each have the right to purchase 500 £1 shares in the company at par.
Control - A, B and C each exercises or is entitled to acquire rights in 650 shares (CTA2010/S450 (3) ... and CTA2010/S451 (2) ...- CTM60220).
Thus A, B, C, D and E (or A, B, C, D and F, or A, B, C, E and F) together constitute a group which is 'able to exercise or is entitled to acquire, control' of the company (with 2,450 shares out of 4,500, i.e. the 3,000 issued plus the 1,500 to be issued to the directors).
The company is a close company from 1 January 1992.

CTM60420 - Close companies: tests: examples [Nov 2011]
... Example 7
The authorised and issued capital of an investment company is £33,000and is owned equally by eleven individuals who are not associated. The loan creditors are:

A (director and shareholder)	£35,000
B (not a shareholder)	£13,500

Neither A nor B is a bank. B is not an associate of a director.
In a winding up, the value of the net assets distributable among members, including loan creditors, would be £120,000 as below.

Deposits with local authorities	£30,000
Market value of quoted investments(representing the remainder of the assets)	£110,000
	£140,000
Deduct sundry creditors	
Management expenses	£300
Bank overdraft	£19,700
	£20,000
Value of net assets	£120,000

Control - the company cannot be shown to be controlled by five or fewer participators under CTA2010/S450 (3) (a) to (c)... In a liquidation, the assets would, however, be distributed as below.

A as loan creditor	£35,000
B loan creditor	£13,500
Shareholders (£6,500 each)	£71,500
Value of net assets	£120,000

More than half of this sum would be received by three persons, that is:

A (£35,000 plus £6,500)	£41,500
B	£13,500
Any shareholder other than A	£6,500
Distribution to three persons	£61,500

The company is therefore a close company by reference to CTA2010/S450 (3) (d) ... because the inclusion of loan creditors as participators shows that it is controlled by three participators.

85.21 Close company condition B: Winding-up test

Condition B provides for a case where the participators have rights which do not confer control. Section 439(3) CTA 2010 provides:

(3) Condition B is that 5 or fewer participators, or participators who are directors, together possess or are entitled to acquire—

(a) such rights as would, in the event of the winding up of the company ("the relevant company") on the basis set out in section 440, entitle them to receive the greater part of the assets of the relevant company which would then be available for distribution among the participators, or

(b) such rights as would, in that event, so entitle them if there were disregarded any rights which any of them or any other person has as a loan creditor (in relation to the relevant company or any other company).

The CT Manual provides:

60320 Rights in a winding-up [November 2011]
The tests so far considered in determining whether a company is a close company have depended on the question of control. With effect from 1 April 1989 there is a further test, in which control is irrelevant, based on rights in a winding-up. It is in Section 444 to 449 CTA 2010 and provides that a company ('the relevant company') is close if five or fewer participators, or participators who are directors, together possess or are entitled to acquire such rights as would, in the event of the winding-up of the company, entitle them to receive the greater part of the company's assets then available for distribution among the participators. By reason of Section 451 (4) to (6) CTA 2010 ... there is attributed to any participator all the rights of his associates.
This test is applied first on the basis that loan creditors are included as participators and then on the basis that they are disregarded. The company is close if it satisfies the test on either basis.

Section 440 CTA 2010 sets out the basis of the notional winding-up:

(1) This section applies for the purposes of section 439(3).
(2) In the notional winding up of the relevant company, the part of the assets available for distribution among the participators which any person is entitled to receive is the aggregate of—
- (a) any part of those assets which the person would be entitled to receive in the event of the winding up of the relevant company, and
- (b) any part of those assets which the person would be entitled to receive if—
  - (i) any other company which is a participator in the relevant company and is entitled to receive any assets in the notional winding up were also wound up on the basis set out in this section, and
  - (ii) the part of the assets of the relevant company to which the other company is entitled were distributed among the participators in the other company in proportion to their respective entitlement to the assets of the other company available for distribution among the participators.

(3) In the application of subsection (2)—
- (a) to the notional winding up of the other company mentioned in paragraph (b) of that subsection, and
- (b) to any further notional winding up required by that paragraph (or by any further application of that paragraph),

references to "the relevant company" are to be read as references to the company concerned.

Section 441 CTA 2010 provides:

(1) The following provisions apply for the purpose of determining whether under subsection (3) of section 439 five or fewer participators, or participators who are directors, together possess or are entitled to acquire rights such as are mentioned in paragraph (a) or (b) of that subsection.
(2) A person is to be treated as a participator in or director of the relevant company if the person is a participator in or director of any other company which would be entitled to receive assets in the notional winding up of the relevant company on the basis set out in section 440.
(3) No account is to be taken of a participator which is a company unless the company possesses or is entitled to acquire the rights in a fiduciary or representative capacity.
(4) But subsection (3) does not apply for the purposes of section 440.

CT Manual provides:

> **60320 Rights in a winding-up** [November 2011]
> If in the course of the deemed winding-up of the relevant company assets would be received by a participator which is a company, we proceed on the basis that the corporate participator is itself wound-up and that the assets it received from the winding-up of the relevant company are distributed to its own participators in proportion to their respective entitlement to the assets of that corporate participator. If in the course of that deemed winding-up assets would be received by a further company the process is repeated. The process continues to be repeated until all of the assets of the relevant company are distributed to individuals (with the exception referred to below). The effect is that we 'look through' all participators which are companies.
> The exception to this looking through is any company whose rights are possessed purely in a fiduciary or representative capacity. These stand with the individual participators in determining whether five or fewer participators would be entitled to receive the greater part of the assets available for distribution.
> For the purposes of this test, then, the assets of the relevant company which would be distributed to any participator are the sum of what he would receive directly from the winding-up of that company plus what he would receive indirectly through the winding-up of participators which are companies.
> For the purposes of this provision a person is treated as a participator in the relevant company if he is a participator in any company itself entitled to receive assets, directly or indirectly, in the winding-up of the relevant company.

85.22 Exceptions to close company test

85.22.1 *Non-resident close company*

Section 442 CTA 2010 sets out three exceptions to the general rule:

> A company is not to be treated as a close company if—
> (a) it is non-UK resident

A note on terminology. The rule that only a UK resident company counts as a close company is often disapplied. There are three different drafting techniques used to achieve this:

(1) Statute most often makes provisions which apply to a company "which would be a close company if it were resident in the UK".

(2) Statute sometimes uses the term "qualifying company" defined to mean a close or a non-resident close company.[61]
(3) Statute sometimes redefines the term "close company" to include a non-resident close company.[62]

There is no consistency of terminology across tax legislation; perhaps that is too much to expect. In this book I refer to such a company as **"a non-resident close company"** which I think is the clearest term.

85.22.2 *Industrial & provident society or building society*

For completeness: s.442 CTA 2010 provides:

> A company is not to be treated as a close company if ...
> (b) it is a registered industrial and provident society, or
> (c) it is a building society.

85.22.3 *Company controlled by the Crown*

Section 443 CTA 2010 provides:

> (1) A company is not to be treated as a close company as a result of section 439(2) if it is controlled by or on behalf of the Crown.
> (2) A company is "controlled by or on behalf of the Crown", for the purposes of this section, if it is under the control of the Crown or of persons acting on behalf of the Crown, independently of any other person.
> (3) But a company is not controlled by or on behalf of the Crown, for the purposes of this section, if it is a close company as a result of being under the control of persons acting independently of the Crown.

EN CTA 2010 provides:

> 1340. The [words *as a result of section 439(2)*] leave it open for a company controlled by or on behalf of the Crown to be a close company if condition B in section 439(3) is met.[63] ...
> 1341. The italicised words also leave it open for a company controlled by or on behalf of the Crown to be a close company if condition A in section 439(2) is satisfied by reference to persons acting independently

---

61 For examples see 51.8.2 ("Qualifying company"); 80.35.1 (Trust made by company: s.86 definition of settlor).

62 See 62.16 (Transfer of value by close company).

63 See 85.21 (Close company condition B: Winding-up test).

> of the Crown. See subsection (3).
> 1342. In short, section 414(1)(c) of ICTA is a qualified exception to [close company condition A, control of five or fewer participators] but not an exception to [close company condition B, winding up test].

So strictly the exemption for crown controlled companies is limited. If the crown own all the shares, the company is close under close company condition B. The exemption would only apply if the crown held voting shares only. That must be rare. Perhaps it will not often matter, but the CT Manual does suggest that HMRC do not take that point:

> **60270 Control: By the Crown** [September 2011]
> A company is to be treated as controlled by or on behalf of the Crown (and therefore not a close company) if, and only if, it is by any of the control tests under the control of the Crown or of persons acting on behalf of the Crown, independently of any other person. If, however, it can be shown that under some other control test:
> • five or fewer participators, or
> • participators who are directors,
> control the company and those participators (or director/participators) act independently of the Crown, the company is a close company.
> The Crown for this purpose includes any Minister, Government Department or other person acting on behalf of the Crown.

The next paragraph extends the exemption, though on what authority I do not know:

> **60280. Control: Overseas governments and local authorities** [September 2011]
> A company should not be treated as a close company if the only persons who can be taken to have control of that company are any of the following:
> • Overseas governments.
> • The Crown Agents for Overseas Governments and Administrations.
> • Local authorities or local authority associations exempt from tax under Section 984 CTA 2010 ...
> Nor should a company be treated as a close company if the only persons who can be taken to have control of that company are any of the above together with:
> • a company or companies resident in the UK which are not close, or
> • an overseas company or companies which, if resident in the UK, would not be close.

85.22.4 *Control by open company*

The next, important, exception concern companies controlled by open (ie non-close) companies. Section 444 CTA 2010 provides:

> (1) A company is not to be treated as a close company if condition A or B is met.
> (2) Condition A is that the company—
> (a) is controlled by one or more companies none of which is a close company, and
> (b) cannot be treated as a close company except by taking, as one of the 5 or fewer participators requisite for its being so treated, a company which is not a close company.
> (3) Condition B is that the company—
> (a) would not be a close company were it not for paragraph (a) of section 439(3) or paragraph (d) of section 450(3), and
> (b) would not be a close company if the references in those paragraphs to participators did not include loan creditors which are companies other than close companies.
> (4) References in subsections (2) and (3) to a close company include a company which, if UK resident, would be a close company.

The CT Manual provides:

> **60290 Control: By another company** [September 2011]
> A company is not to be treated as a close company where:
> - the company is controlled ... by an open company, or by two or more open companies, and
> - it cannot be treated as a close company ... except by including an open company in the group of five or fewer participators.
>
> A company is also not to be treated as a close company where:
> - the company can only be shown to be close under the control test in Section 450(3)(d) CTA 2010 ... (entitlement to receive the greater part of the assets in a winding-up, etc, see CTM60230), and
> - the company would not be close under the control test if the reference to 'participators' in Section 450 (3) excluded loan creditors who are open companies.
>
> Where, in considering the above, you have to take into account a company not resident in the UK, the non-resident company is to be treated as a close company if, were it resident in the UK, it would be such a company.
>
> **60300 Open company loan creditor**
> A company is not to be treated as a close company if:
> i) it is only close by virtue of the control test in Section 450 (3)(d)

CTA 2010 ... (see CTM60220) or the 'winding- up' test in Section 439 (3)(a) CTA 2010 ...) (see CTM60320), and

ii) it would not be close if, for the purposes of those tests, open companies were not regarded as participators in respect of their interests in the company as loan creditors.

In arriving at the amount available for distribution among the participators, any amount due to an open company as a loan creditor (including any amount due to it as a holder of loan capital) may be disregarded if the result is that the company ceases to be close (Section 414(5)(b) ICTA 1988).

If the open company loan creditor also holds shares in the company, it will remain a participator in respect of that holding and any amount which would be distributed to it in respect of those shares should be taken into account for the purposes of Section 416(2)(c) and Section 414(2)(a).

85.23 Pension schemes

Section 445 CTA 2010 provides:

(1) If shares in a company ("C") are held on trust for a registered pension scheme, the persons holding the shares are to be treated, for the purposes of section 444(2) and (3)—

(a) as the beneficial owners of the shares, and

(b) in that capacity, as a company which is not a close company.

(2) But subsection (1) does not apply if the scheme is established wholly or mainly for the benefit of—

(a) directors, employees, past directors or past employees of a company within subsection (3), or

(b) dependants of an individual within paragraph (a).

(3) The companies within this subsection are—

(a) C,

(b) an associated company of C,

(c) a company which is under the control of—

(i) a director of C,

(ii) an associate of a director of C, or

(iii) two or more persons each of whom is such a director or associate, and

(d) a close company.

The CT Manual summarises this and provides:

60290 Control: By another company [September 2011]

The broad effect of the above conditions is that the fund or scheme must

be one established for the benefit of employees, etc, of an unrelated company which is not close. A joint fund for the benefit of employees of two or more companies is not disqualified if the majority of the beneficiaries are or were employees of qualifying companies or are dependants of such employees.

85.24 Quoted company exemption

Section 446 CTA 2010 provides:

(1) A company is not to be treated as a close company at a particular time if—

(a) shares in the company carrying at least 35% of the voting power in the company have been allotted unconditionally to, or acquired unconditionally by, and are at that time beneficially held by, the public, and

(b) any such shares have within the preceding 12 months been the subject of dealings on a recognised stock exchange, and the shares have within those 12 months been listed on such an exchange.

(2) But subsection (1) does not apply to a company at any time when the total percentage of the voting power in the company possessed by all of the company's principal members exceeds 85%.

(3) For the purposes of this section, a person is a principal member of a company if the person possesses a percentage of the voting power in the company of more than 5% (but see subsection (4)).

(4) If there are more than 5 persons within subsection (3), a person is a principal member of the company only if—

(a) the person is one of the 5 persons who possess the greatest percentages, or

(b) in a case where there are no such 5 persons because two or more persons possess equal percentages of the voting power in the company, the person is one of the 6 or more persons (including those two or more who possess equal percentages) who possess the greatest percentages.

(5) In determining for the purposes of this section the voting power which a person possesses, there is to be attributed to the person any voting power which would be attributed to the person if section 451(3) to (6) applied for the purposes of this section.

(6) In this section "shares"—

(a) include stock, but

(b) do not include shares entitled to a fixed rate of dividend, whether with or without a further right to participate in profits.

The CT Manual provides:

> **60310 35% or more voting power held by public** [November 2011] ... The total voting power for the purpose of (i) and (ii) above is that of all the issued shares (or stock) including that of shares, etc, entitled to a fixed dividend, etc, which are excluded under (i) above in determining the voting power in the hands of the public. ...
> 1. Where the company holding the shares loses its beneficial interest on commencement of winding-up (see CTM36125) you should not normally contend that a company which was not close before the commencement of that winding-up, thereby becomes a close company.
> 2. Shares beneficially held by an authorised unit trust (see CTM48200 onwards) are to be regarded as beneficially held by a company which is not a close company unless five or fewer persons hold more than half of the units issued by the trust. In determining the number of units held by a person, there should be attributed to him or her any units held by his or her associates (see CTM60150) or by his or her nominees or by any company (or companies) of which he/she has, or he/she and his associates have, control.

85.24.1 *"Held by the public"*

Section 447 defines "shares beneficially held by the public":

> (1) For the purposes of section 446, shares in a company (c) are beneficially held by the public if they are—
> (a) beneficially held by a UK resident company which is not a close company, or by a non-UK resident company which would not be a close company if it were UK resident,
> (b) held on trust for a registered pension scheme, or
> (c) not comprised in a principal member's holding.
> (2) But shares are not beneficially held by the public if they are held—
> (a) by a director of C,
> (b) by an associate of such a director,
> (c) by a company which is under the control of one or more persons each of whom is such a director or associate,
> (d) by an associated company of C, or
> (e) as part of a fund the capital or income of which is applicable or applied wholly or mainly for the benefit of any of individuals within subsection (3).
> (3) Those individuals are—
> (a) employees, directors, past employees or past directors of C or of any company within subsection (2)(c) or (d), and

(b) dependants of any individuals within paragraph (a).

(4) The reference in section 446(1) to shares which have been allotted unconditionally to, or acquired unconditionally by, the public is to be read in accordance with subsections (1) to (3).

(5) For the purposes of subsection (1), a principal member's holding consists of the shares which carry the voting power possessed by him.

(6) The reference in subsection (2) to shares held by any person includes shares the rights or powers attached to which would be attributed to the person if section 451(3) applied for the purposes of that subsection.

(7) Subsections (3) to (5) of section 446 (meaning of "principal member" and determination of voting power possessed) apply for the purposes of this section as they apply for the purposes of that section.

(8) In this section, "shares" includes stock.

The CT Manual provides:

CTM60310 35% or more voting power held by public [November 2011]

Where a company in [s.315(5)(b)(c)] above loses its beneficial interest in the shares, etc, on commencement of winding-up (see CTM36125) you should not normally accept that a company which was close before the commencement of that winding-up, thereby ceases to be close. ...

For the purpose of (b)(iii) above, shares held in accordance with (b)(i) or (ii) above are deemed to be beneficially held by the public (provided that they are not excluded by (c) above) even if they are comprised in a principal member's holding.

The CT Manual provides two simple examples of the quoted company exemption:

CTM60420 - Close companies: tests: examples [Nov 2011]

... Example 8

The issued ordinary capital of a trading company (other issued capital having no voting rights) is held as below.

Company A (not a close company)	280
Company B (a close company)	270
Company C (not a close company)	230
D (director)	40
E (director)	30
F (an individual)	30
20 others	120
Total issued ordinary shares	1,000

Control -the requirements of CTA2010/S444 (2)(a) ... are regarded as

satisfied because, upon one combination of shareholdings, control is in the hands of Company A and Company C, even though by other combinations a controlling group which includes only one of those companies may be established. The company is not a close company if the requirements of CTA2010/S444 (2) (b) ... are also satisfied, that is, if none of the control tests enables control by five or fewer participators to be established without including a non-close company among those participators, and the company is not controlled by its directors and cannot be shown to be close on the or winding up test (CTM60320) without including a non-close company among the five or fewer participators (see, however, Example 9 below).

Example 9

The ordinary shares are held as in Example 8. G, an individual, holds redeemable loan stock and would receive in a winding-up more than half of the assets available for distribution among the participators.

Control - as G is in control of the company by reference to CTA2010/S450 (3) (d) ... the requirements of CTA2010/S444 (3) ... are not met and, irrespective of the control by open companies, the company is a close company.

CHAPTER EIGHTY SIX

PERMANENT ESTABLISHMENT AND BRANCH/AGENCY

86.1 Why does permanent establishment matter?

It is not practical to set out a complete list of the significance of PE for tax, but the following are the most important.

In the absence of a PE, a non-resident *company* trading in the UK is subject to income tax on its income. A non-resident company trading through a PE is subject to corporation tax on income linked to the PE.[1]

In the absence of a PE, a non-resident company is not subject to CGT. A company trading in the UK through a PE is subject to corporation tax on gains linked to the PE.[2]

Corporation Tax may be collected from the branch/agency.[3]

PE of a corporate trustee is relevant to trust residence.

In the absence of a PE, a person treaty-resident in a foreign state with a DTA in OECD model form qualifies for relief for UK source trading income, dividends, interest, royalties, capital gains and other income. All these reliefs are restricted for income/gains linked to a PE in the UK.

If a non-resident *individual or trustee* is carrying on a trade in the UK, the UK domestic law tax position is not affected whether or not they are carrying on their trade through a PE; but similar rules apply if they are carrying on business through a branch/agency, which is a similar concept.[4]

PE and branch/agency (or very similar concepts) are also relevant for many non-tax purposes, such as civil jurisdiction.

---

1 See 15.7 (Trading income of non-resident companies).

2 See 49.8 (Non-resident trade with UK branch).

3 See 43.1 (Collection of tax from UK representatives).

4 See 86.13 (Why does branch/agency matter?).

86.2 Meaning(s) of "permanent establishment"

The definition(s) of PE need a long book to itself and several such books have been written.[5] This chapter is a relatively brief introduction.

The term "permanent establishment" is used in different places with different definitions. It is strictly necessary to distinguish between:

(1) "**UK-law PE**" (which the INT Manual calls domestic law PE), defined in s.1141 CTA 2010.

(2) "**OECD Model PE**" defined in the OECD Model. The INT Manual calls this "treaty PE" but I prefer the term "OECD Model PE" because some treaties have different definitions.[6]

There are two types of PE which I call:

(1) **"Fixed place of business PE"** and

(2) **"Agency PE"**

"A hybrid PE" is an entity which is classified as a PE in one state and not in another. This is currently one of the objects of the OECD project on mismatches, but is not considered here.

86.2.1 *Scope of UK law definition*

Section 1141 CTA 2010 provides:

> For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if ...

This definition applies only for the purposes of the corporation tax acts so it needs to be incorporated in other contexts

For CGT, s.288 TCGA provides:

> In this Act, unless the context otherwise requires—
> "permanent establishment", in relation to a company, is to be read in accordance with Chapter 2 of Part 24 of CTA 2010;

Similarly, for IT, s.989 ITA provides:

> The following definitions apply for the purposes of the Income Tax Acts—
> "permanent establishment", in relation to a company, is to be read in

---

5 There is a bibliography in Reimer, Urban and Schmid (ed), *Permanent Establishments* (2011), para 1.3. See too IFA, *Is there a Permanent Establishment?* Cahiers du Droit International, (Vol 94a, 2009); [2006] BTR at p.722. For Australian Revenue views, see Taxation Ruling TR 2002/5.

6 For instance, see 86.11 (PE in Colonial Model treaties).

> accordance with Chapter 2 of Part 24 of CTA 2010...

Thus we have a taxes-act-wide definition but it only applies in relation to companies. The statutory definition does not apply in relation to a non-company.

If a UK tax statute used the expression PE in relation to a *non-company*, the statutory definition would not apply and the expression would (subject to context) bear its normal meaning. If the view expressed here is right, that UK-law PE has the same meaning as OECD law PE, that would be the normal meaning which would apply. There is no other meaning. But as far as I know, in UK domestic tax law, the term PE is only used in relation to companies; the drafter presumably realised this, which is why they restricted the definition to companies. So the question of the meaning of PE in statutory provisions relating to non-companies does not arise.

86.2.2 *Carrying on trade through a PE*

UK tax provisions refer to a company carrying on a trade through a PE, so one might think that there are two distinct questions:

(1) whether a PE exists

(2) whether the company is carrying on a trade through the PE.

However PE is defined as "a fixed place of business through which the business of the company is carried on"; so if a company owns (say) an office building which it does not use (or which it does not use for its business) then strictly the office building is not a PE at all.

86.3 Fixed place of business PE

Section 1141 CTA 2010 provides:

> For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if (and only if)—
>
> (a) it has a fixed place of business there through which the business of the company is wholly or partly carried on ...

OECD Model PE is substantially the same as UK-law PE. Article 5(1) provides:

> For the purposes of this Convention, the term "permanent establishment" means a fixed place of business through which the business of an enterprise is wholly or partly carried on.

INTM para 264060 [February 2006] discusses UK-law PE but that merely repeats and refers to the INTM discussion of OECD Model PE:

266050 Fixed place of business permanent establishment [September 2011]

[The Manual refers to model treaty Article 5(1) and continues:]

This definition therefore contains the following essential features, all of which must be present:

a. there must be a geographic place of business, possibly premises or a site, although it can, in certain circumstances, be machinery or equipment.
b. the place of business must be fixed, that is, have a certain degree of permanence, and
c. the non-resident's business must be carried on through this fixed place of business, normally by the personnel of the enterprise.

It is possible for an enterprise to have more than one fixed place of business permanent establishment if it carries on business activities from more than one place for the necessary duration of time.

The INTM then goes on to consider these three conditions in more detail.

86.3.1 *Geographic condition*

INTM para 266060 provides:

Fixed place of business permanent establishment – Geographic condition [February 2006]

The words used in article 5(1) make it clear that there is a geographical condition within the fixed place of business treaty permanent establishment definition. There must be a distinct place of business being used for carrying on the business of the enterprise. The place could be premises, facilities, plant or machinery or even a site or installation. But equally the place of business could consist only of a space where premises are not necessarily required for the activities concerned. For example, a street vendor or market barrow enterprise could meet the geographic place condition where the business was carried out from appreciably one place whereas a French travelling salesman arriving in the UK and trading his French produce from door to door before returning to France would not meet the geographic condition and there would be no fixed place of business in the UK. For guidance on the scope for automated machinery to constitute a permanent establishment see INTM266090.

A place of business of one enterprise could be situated in the business premises of a second enterprise, including possibly an affiliated company, if some space were put at the disposal of the first enterprise. In considering whether a place of business is 'at the disposal of' an enterprise it makes no difference whether that enterprise's use is exclusive or shared, whether the enterprise owns, rents or even occupies a place illegally. As an example of when premises would be considered to be 'at the disposal of an enterprise', a travelling salesman would not be considered to have the premises of each of his prospective customers at his

disposal, but a parent company using an office in the headquarters of a subsidiary company to oversee that subsidiary for a period would have had that office space at its disposal. Other examples can be found in the commentary to Article 5.

86.3.2 *Degree of permanency*

INTM para 266070 provides:

Fixed place of business permanent establishment – Time condition – Degree of permanence of activities [February 2006]

The words used in article 5(1) make it clear that there is a time or degree of permanence condition inherent within the term 'fixed place of business' but it is not necessary that equipment or plant be physically fixed to the ground before it could constitute 'a fixed place of business'. There is no certain rule on the period that must pass before a place of business becomes 'fixed' and this can often depend on the nature of the activities. But it is immaterial how long an enterprise operates in another Country if it does not do so at a distinct place.

Since the place of business must be fixed, it also follows that a PE can be deemed to exist only if the place of business has a certain degree of permanency, i.e. if it is not of a purely temporary nature. A place of business may, however, constitute a PE even though it exists, in practice, only for a very short period of time. It is sometimes difficult to determine whether this is the case. Whilst the practices of the different Member States of the OECD are not necessarily consistent in so far as time requirements are concerned, experience has shown that PEs have normally not been considered to exist in situations where a business has been carried on in a country through a place of business that was maintained for less than six months. Conversely practice shows that there were many cases where a PE has been considered to exist where the place of business was maintained for a period longer than six months. One exception to the six month yardstick has been where the activities were of a recurrent nature; in such cases, each period of time during which the place is used needs to be considered in combination with the number of times during which that place is used (which may extend over a period of years). Another exception has been made where activities constituted a business that was carried on exclusively in that country; in this situation, the business may have short duration because of its nature but since it is wholly carried out in that country, its connection with that country is stronger. Temporary interruptions of business activities do not cause a PE to cease to exist. Where a place of business which was, at the outset, designed to be used for such a short period of time that it would not have constituted a PE but it is in fact maintained for such a period that it can no longer be considered as a temporary one, it becomes a fixed place of business and [as brought out at para 6.3 of the commentary to model treaty article 5(1)] can thus retrospectively be a PE. A place of business can also constitute a PE from its inception even though it existed, in practice, for a very short period of time, if as a consequence of special circumstances, e.g. death of the taxpayer, investment failure etc, it was prematurely terminated.

A PE begins to exist as soon as the enterprise commences to carry on business through a fixed place of business. A period of preparation, as distinct from the

real business activities, should not be treated as the business being carried out. The PE ceases to exist with the disposal of the fixed place of business or with the cessation of any activity through it.

A single place of business will generally be considered to exist where, in light of the nature of the business, a particular location within which the activities are moved may be identified as constituting a coherent whole commercially and geographically with respect to the business. For example, the market stall mentioned already if it moved position within a market area. Similarly, a painter who undertook under a single contract to paint a multi-occupied estate would have a single place of business and the duration of his activities at that place would be gauged accordingly. But if the painter entered into individual contracts with unrelated occupants of premises on an estate his activities should be considered separately rather than as a coherent whole.

86.3.3 *Personnel condition*

INTM para 266080 provides:

Fixed place of business permanent establishment – Personnel condition [February 2006]

For a fixed place of business to constitute a PE the business of the enterprise must have been carried on through that place, i.e. persons working in the business must have worked from that place. Those persons could be employees, the entrepreneur or proprietor themselves or any other persons receiving instructions from the enterprise e.g. self-employed consultants.

It would follow that property let out to third parties is not a PE of the landlord.

266090. Fixed place of business permanent establishment – Automated equipment [February 2006]

Where the business of an enterprise is carried out through automated machinery a PE may nevertheless exist if personnel are required to set up, operate, control or maintain such equipment. Whether or not gaming or vending machines and the like set up by a foreign enterprise in another State constitute a PE thus depends on whether or not the enterprise carries on a business activity besides the initial setting up of the machines. A PE does not exist if an enterprise merely sets up a machine and then leases it to another enterprise but it could if the first enterprise also operated and maintained the machine for its own account. This also applies if the machine is operated and maintained by an agent dependent (INTM266150) on the enterprise.

266100. Fixed place of business permanent establishment – E-commerce/ E-tailers/servers/internet trading [September 2011]

The development of e-commerce places a strain on the traditional definition of a PE in cases where the computer equipment is positioned in one territory whilst the enterprise has no personnel active in the business in that territory. The UK does not concur with other OECD Member States on whether a server of itself can constitute a fixed place of business permanent establishment. Accordingly the

> UK has made an observation to that effect in the commentary to the Model Treaty Article 5(1).
> In the UK, we take the view that a server either alone or together with web sites could not as such constitute a PE of a business that is conducting e-commerce through a web site on the server. We take that view regardless of whether the server is owned, rented or otherwise at the disposal of the business.
> Other OECD Member States take the view that a server, as distinct from mere web sites (which cannot fulfil the geographic situs condition) could constitute a PE where the equipment is in fact fixed, i.e. that in fact it is not moved and is located at a specific location for a sufficient duration to indeed become fixed (INTM266050). See also INTM263000 for place of contract in e-commerce.

86.3.4 *Items specifically included as PE*

Section 1141(2) CTA 2010 provides a list of items which constitute a fixed place of business PE. The first seven are:

> For this purpose a "fixed place of business" includes (without prejudice to the generality of that expression)—
> (a) a place of management,
> (b) a branch,[7]
> (c) an office,
> (d) a factory,
> (e) a workshop,
> (f) an installation or structure for the exploration of natural resources,[8]
> (g) a mine, an oil or gas well, a quarry or any other place of extraction of natural resources; ...

This is based on OECD Model Art 5(2). The INTM para 266110 [February 2006] sets out a précis of the article and continues:

> The wording of article 5(2)[9] make it clear that this is not an exhaustive list of the places that could be a permanent establishment.

Obviously. The INTM continues:

> Furthermore, it is clear that, to be a treaty permanent establishment, any of these types of places would also need to have the general attributes of a fixed place of business, i.e. the geographic, period of duration and personnel conditions.

---

7 See 86.14.2 (Meaning of "branch").
8 This is not in the OECD Model definition.
9 The text erroneously reads: 5(1).

The point was less clear and it is helpful to see it in writing.

86.3.5 *Building site, construction or installation project*

This is the eighth item in the list in s.1141(2) CTA 2010:

> For this purpose a "fixed place of business" includes (without prejudice to the generality of that expression)— ...
> (h) a building site or construction or installation project.

The OECD Model moves this item into a paragraph of its own, and the wording is not quite the same. Article 5(3) provides:

> A building site or construction or installation project constitutes a permanent establishment only if it lasts more than twelve months.

This item, like the first seven in the list, is only a PE if it also meets the geographic, time and personnel conditions.

The INTM para 266130 provides:

> **Fixed place of business permanent establishment – Building sites or construction or installation projects** [September 2011]
> The OECD model treaty article 5 includes specific provisions in para 3 that a building site or construction or installation project constitutes a treaty permanent establishment only where it lasts more than 12 months. The commentary makes it clear that this includes also the construction of roads, bridges or canals, the renovation (involving more than mere maintenance or redecoration) of buildings, roads, bridges or canals, the laying of pipes-lines and excavating and dredging. Additionally, the term 'installation project' is not restricted to an installation related to a construction project; it also includes the installation of new equipment, such as a complex machine, in an existing building or outdoors.
> The OECD member states have made this type of activity the subject of a specific rule because of the frequency with which it caused difficulties of interpretation. And, for clarity in the model treaty, 12 months duration has been taken to be a sufficient indication that the activity is a fixed place of business permanent establishment. Of course particular treaties may vary from the model in this respect and indeed different durations are included in many of the UK's treaties all of which can be referred to in full at DT2140 onwards. The UK domestic charging provisions in s.1141(2)(h) CTA 2010] define permanent establishment (see INTM264050) in a way that specifically includes all building sites or construction or installation projects without duration qualification. Although initially this may [!] appear inconsistent you should remember that the treaty provisions will override the domestic legislation. In that way, any duration specified in any applicable treaty within which the site will become a permanent establishment will be the duration that applies.
> If the non-resident is involved (directly or indirectly through subcontractors) in more than one site or project, each should be considered as a potential permanent

establishment separately from the others. The 12 months or other duration test applies to each site or project. A site or project should be regarded as a single potential permanent establishment even if it is based on several contracts provided that it forms a coherent whole commercially and geographically. If it appears that a single site or project has been fragmented to avoid the appearance of being a PE the facts of the original tendering should be investigated.
A site or project exists from when the contractor begins work, including any preparatory work, in the country where the construction etc. is to be established. It continues to exist until the work is completed or permanently abandoned. Temporary discontinuation, seasonal or other temporary interruptions should be ignored.

86.4 Agency PE

Section 1141 CTA 2010 provides:

> For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if (and only if) ...
> (b) an agent acting on behalf of the company has and habitually exercises there authority *to do business on behalf of the company*.

OECD Model PE is different. Article 5(5) provides:

> [a] Notwithstanding the provisions of paras 1 and 2, where a person – other than an agent of an independent status to whom para 6 applies – is acting on behalf of an enterprise and has, and habitually exercises, in a Contracting State an authority *to conclude contracts in the name of the enterprise*, that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise,
> [b] unless the activities of such person are limited to those mentioned in para 4 which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.[10]

I refer to this as "**agency PE**" though the term "dependent agency PE" is sometimes used (as an independent agent is not a PE).

86.4.1 *The policy background*

The OECD Commentary provides:

> 31. It is a generally accepted principle that an enterprise should be treated as having a permanent establishment in a State if there is under certain

10 See 86.9 (PE: preparatory and auxiliary activities).

conditions a person acting for it, even though the enterprise may not have a fixed place of business in that State within the meaning of paragraphs 1 and 2. [Article 5(5)] intends to give that State the right to tax in such cases. Thus paragraph 5 stipulates the conditions under which an enterprise is deemed to have a permanent establishment in respect of any activity of a person acting for it.

86.4.2 *Distinctions between OECD and UK-law agency PE*

Dawn Primarolo (then Paymaster General) explained why the wording of UK-law PE differs from OECD law PE:

> **Dawn Primarolo**: ... the wording used in clause 147(1)(b) [FB 2003, now s.1141 CTA 2010] to define "dependent agent" varies from the exact wording in article 5(5) of the OECD model tax convention. Instead, it is based on guidance given in the commentary on article 5, which can be found in paragraphs 31 to 45, because article 5 refers to an agent who has the authority to conclude contracts in the name of the enterprise.
> However, the OECD commentary on article 5 makes it clear that that phrase is not necessarily to be taken at face value. For instance, it covers contracts in the name of an enterprise, contracts binding on the enterprise but not in its name, and contracts recognised by the agent but signed by some other person, while excluding contracts that do not relate to the business proper of the enterprise, although concluded by the agent. The area is very complicated and there is an interaction between the commentary and the article itself.
> UK legislation cannot be directly interpreted by reference to the commentary,[11] so the phrase used in clause 147 is intended to encapsulate the current OECD interpretation in respect of dependent agents. That would not have been achieved if the wording in article 5(5) were copied directly into UK domestic law.
> **Mr. Burnett:** The Paymaster General will recall ... that the Inland Revenue confirmed that the reference to an agent in clause 147 is restricted to those persons who contractually can and do bind their principals and not to persons acting in some other representative capacity falling short of having such authority. The Paymaster General is obviously well aware of *Pepper v Hart* and the reliance people may put on what she says in Committee. I would welcome her comments on that point raised by the Law Society.
> **Dawn Primarolo:** I was coming to that important point, which was

11 This is not correct, but fortunately no-one reminded Ms Primarolo of (what is now) s.164 TIOPA (Application of OECD principles).

> outlined in a letter to the Law Society and the Chartered Institute of Taxation on 8 May.
> I was trying to explain that the article wording must be read in parallel with the commentary. The commentary needed to be part of the description that went into UK legislation in order to make that clear. In drafting the legislation, the importance of maintaining certainty on international understanding and practice on the OECD guidelines and model conventions while understanding how the commentary affects their operation was one of the major points, which was continually made to the Revenue and me. That is how we chose the clause's wording.
> Amendment No. 101 seeks to add to the definition of dependent agent used in clause 147(1)(b). It would mean that an agent would be a dependent agent of a foreign company as long as they had the authority to enter into arrangements on its behalf and had entered into contractually binding arrangements with it. That may not have been the amendment's intended effect, but I ask the Committee to reject it nevertheless. The suggested addition is unnecessary and the language used in clause 147(1)(b) already reflects the current OECD position on dependent agents. As such, no further clarification or definition is required.... The Bill does not extend the charge to tax on non-resident companies and there is no less certainty for an agent of a non-resident company on whether they are within the charge to corporation tax. The rules are set out in the OECD treaty and commentary and in UK law, which has had and will have specific rules to facilitate foreign investment in the City.[12]

Similarly, the INTM para 264050 provides:

> **Permanent establishment – Domestic law definition** [April 2007]
> The definition of domestic law permanent establishment is at [FA 03 s.148]. This is similar to and has the same broad effect as the OECD model treaty article 5 definition of permanent establishment which is an important factor bearing in mind that treaty law takes precedence over domestic law. So it is unlikely that the application of a treaty that followed the model article 5 would cause any variance to the UK domestic charge to tax on a non-resident trading in the UK through a permanent establishment as defined under domestic law. Because of the similarities of wording and effect between PE under domestic law and under the OECD model treaty

12 House of Commons Standing Committee B, accessible *http://www.publications.parliament.uk/pa/cm200203/cmstand/b/st030520/pm/part1/30520s06.htm*

> the guidance on interpretation of treaty PE at INTM266000 is understandably substantially applicable to domestic law PE as well. A lot of our interpretation of treaty PE is based on the Commentary to Article 5 of the OECD Model Treaty (INTM266030). Although the Commentary is not imported into UK domestic law the UK has contributed to and agreed the content except in specific instances where the UK has put on record either an observation or a reservation to a specific section of the Commentary. So, where the wording of the UK domestic law PE provisions are the same as those used in the OECD Model Treaty Article 5 then the commentary interpretation on those words will apply to those provisions and this guidance will contain cross-references into the guidance on treaty PE at INTM266000. If the Commentary interpretation of PE were to materially vary through periodic update or amendment the changes would have to be accepted by the UK Parliament before they could be taken to apply also to interpretation of UK domestic law PE.

The simpler way to achieve the intention would have been to incorporate the OECD definition by reference, but it is considered that the UK law definition has reached that destination, even though by a less satisfactory route.[13] EN CTA 2010 agrees:

> 3253. This Chapter determines what constitutes a permanent establishment in a territory of a company which is not resident in that territory. ...
> 3254. The determination is in line with various internationally recognised characteristics commonly used in the UK's double tax agreements.

Likewise an HMRC press release when the current law was enacted:

> The rules also alter our current terminology so that in future we tax "permanent establishments", (a term recognised internationally and used in our double taxation agreements), rather than "branches". The new rules are to be interpreted in accordance with OECD guidelines, to ensure that the UK is in accord with international consensus that reflects UK agreement. If internationally agreed changes are made in the future, then any new guidance can be included to assist in the interpretation of the

13 If that is right, it answers the concerns expressed in Nias, "Taxation of non-resident companies and the meaning of agent" [2003] BTR 468.

UK rules, if the UK government decides it wishes to adopt them.[14]

86.5 OECD model agency PE

86.5.1 *Enactment history*

As usual, the wording has varied over the years, but without any change of meaning. The OECD Commentary provides:

> 31... The paragraph was redrafted in the 1977 Model Convention to clarify the intention of the corresponding provision of the 1963 Draft Convention without altering its substance apart from an extension of the excepted activities of the person.

This matters as the old wording survives, for instance in the Luxembourg/UK DTA.

86.5.2 *Authority*

The phrase *authority to conclude contracts in the name of the enterprise* is at the heart of OECD model agency PE. The OECD Commentary provides:

> 32. Persons whose activities may create a permanent establishment for the enterprise are so-called dependent agents i.e. persons, whether employees or not, who are not independent agents falling under para 6. Such persons may be either individuals or companies. It would not have been in the interest of international economic relations to provide that the maintenance of any dependent person would lead to a permanent establishment for the enterprise. Such treatment is to be limited to persons who in view of the scope of their authority or the nature of their activity involve the enterprise to a particular extent in business activities in the State concerned. Therefore, para 5 proceeds on the basis that only persons having the authority to conclude contracts can lead to a permanent establishment for the enterprise maintaining them. In such a case the person has sufficient authority to bind the enterprise's participation in the business activities in the State concerned.

The OECD Commentary provides:

> Lack of active involvement by an enterprise in transactions may be indicative of a grant of authority to an agent. For example, an agent may be considered to possess actual authority to conclude contracts where he

14 REV BN 25 para 8 (17 April 2002).

solicits and receives (but does not formally finalise) orders which are sent directly to a warehouse from which goods are delivered and where the foreign enterprise routinely approves the transactions.

86.5.3 *In the name of the enterprise*

The OECD Commentary provides:

> 32.1 Also, the phrase "authority to conclude contracts in the name of the enterprise" does not confine the application of the paragraph to an agent who enters into contracts literally in the name of the enterprise; the paragraph applies equally to an agent who concludes contracts which are binding on the enterprise even if those contracts are not actually in the name of the enterprise.

The INTM provides:

> **266160. UK common law – Variance with civil law** [September 2011]
> The majority of European countries have civil law codes whereas the UK has a common law code. Any matters of interpretation of undefined terms used in the OECD Model Treaty, article 5 or any other article of a treaty should be interpreted in the UK under UK law or at least common meaning. The civil law concept of agency is different from that under common law in that civil law will not usually regard the actions of an agent as though they were the actions of the principal. Civil law separates the relationship between the principal and the agent on the one hand and that between the agent and the third party (including a customer) on the other. Thus civil law countries do not, as the UK does, necessarily see the presence of the non-resident principal in the actions of the resident agent. In the UK, under common law, we interpret any actions carried out by an agent as having been performed for the principal and binding the principal in the same way as though they had carried out those actions themselves. For example, a contract arranged by an agent in the UK to deliver goods owned by a foreign principal to a customer would be treated for UK tax purposes as though the foreign principal themselves had contracted in the UK for the delivery. This is the case, regardless of whether the contract is written in the name of the principal or in the name of the agent (commentary to model treaty article 5(5), para 32.1 of July 2010 version).

The former International Tax Handbook provided:

> **851.** Treaties following the example of the OECD Model are influenced by the civil law concept of agency. Para 5 of Article 5 of the Model deems an agent to be a permanent establishment if the agent has and habitually exercises an authority to conclude contracts in the name of the enterprise of the treaty partner state, unless the agent is an agent of independent status within para 6. There are two pointers here to civil law influence. One is 'contracts in the name of the enterprise', the other is 'agent of independent status'.

852. In the name of principal

The making of contracts in the name of the principal would be regarded by civil law countries as a characteristic of a dependent agent whereas contracts made in the agent's own name would be characteristic of independent status (though the wording of the Article does not preclude the possibility of independent status even if the contracts are in the name of the 'enterprise'). In our law, if the contracts are made on behalf of and with the authority of the principal the relationship of the agent to the principal is not affected by whether the contract is made in the name of the principal or in the agent's own name. So agents, who in all other respects would be dependent agents according to the OECD Model, could in our law make contracts in their own name. We would not wish such agents to be regarded as agents of independent status under a treaty and therefore resist the literal meaning of 'in the name of' and argue that the words should be interpreted as 'on behalf of', which is an acceptable translation of the words 'au nom de' which appear in the French version of the Model Convention. The commentary on Article 5 of the 1992 Model included a note of our view at para 45 and in 1994 a sentence was added to the commentary itself at para 32 confirming that this is now the accepted interpretation.

The INTM discussion of OECD Model PE at 266140 [September 2011] is a lightly adapted version of the OECD commentary, so is not set out here. Article 6(5) USA/UK DTA provides a definition of agency PE very similar to the OECD model.[15]

The US Department of the Treasury Technical Explanation of the Convention[16] provides:

> The OECD Model uses the term "in the name of that enterprise" rather than "binding on the enterprise". There is no substantive difference. As indicated in paragraph 32 to the OECD Commentary on Article 5, paragraph 5 of the Article is intended to encompass a person who "concludes contracts which are binding on the enterprise, even if those contracts are not actually in the name of the enterprise".
>
> The contracts referred to in paragraph 5 are those relating to the essential business operations of the enterprise rather than ancillary activities.

---

15 "Notwithstanding the provisions of paragraphs 1 and 2 of this Article, where a person—other than an agent of an independent status to whom paragraph 6 of this Article applies—is acting on behalf of an enterprise and has and habitually exercises in a Contracting State an authority *to conclude contracts that are binding on the enterprise,* that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities that the person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in paragraph 4 of this Article that, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph."

16 Accessible *http://www.irs.gov/pub/irs-trty/temod006.pdf*

86.5.4 *Authority to conclude contracts*

It seems to me that "agent" can be used in three broad senses:

(1) A person who can *legally* enter into contracts which bind their principal. I refer to that as a "**contract-law agent**".

(2) A person who can *effectively decide whether* to enter into a contractual relationship which binds their principal though the further step to create a contract is required as a legal formality or "rubber stamping".

(3) In a looser, colloquial sense, an intermediary, spokesperson, or representative (who lacks power to make an effective decision).[17]

The meaning here is meaning (2). If in practice a person can a commercial or substantial commitment, they will be regarded as having authority to conclude contracts, even if they lack formal authority of a contract-law agent, so that any contract needs to be "rubber stamped" by the principal.[18]

A company with an agent of this kind in a state may in fact be resident in that state: an agent who concludes contracts on behalf of the company in a state cause the effective management/management and control of the company to take place in that state.

86.5.5 *Exercise of authority in a contracting state*

What if the negotiating work is done by the agent in a state, but the contract is signed elsewhere? This does not alter the position:

> Moreover the authority has to be habitually exercised in the other State; whether or not this is the case should be determined on the basis of the commercial realities of the situation. A person who is authorised to negotiate all elements and details of a contract in a way binding on the enterprise can be said to exercise this authority

---

17 "The use of the word 'agent' in any mercantile transaction is, of itself, wholly uninformative of the legal relationship between the parties and the use of the words 'independent agent' takes the matter no further. Either is consistent with a self-employed person acting either as a true agent who puts his principal into a contractual relationship with a third party or with such a person acting as a principal." See *Potter v CE* [1985] STC 45 at p.51 cited with approval in *Umbro International v HMRC* [2009] STC 1345 at [29].

18 See Dunahoo, "Contract Conclusion and Agency Permanent Establishments: Here, There and Everywhere" in Baker & Bobbett (eds) *Tax polymath: a life in international taxation: essays in honour of John F. Avery Jones* (2010).
The point has been decided the same way in relation to branch/agency: see 86.14.5 (Difference between branch/agency and PE).

> "in the State", even if the contract is signed by another person in the State in which the enterprise is situated or if the first person has not formally been given a power of representation. The mere fact, however, that a person has attended or even participated in negotiations in a State between an enterprise and a client will not be sufficient, by itself, to conclude that the person has exercised in that State an authority to conclude contracts in the name of the enterprise. The fact that a person has attended or even participated in such negotiations could, however, be a relevant factor in determining the exact functions performed by that person on behalf of the enterprise.

86.5.6 *Auxiliary and preparatory work*

The article 5(4) exemption (auxiliary & preparatory work, etc)[19] applies to agents:

> Since, by virtue of paragraph 4, the maintenance of a fixed place of business solely for purposes listed in that paragraph is deemed not to constitute a permanent establishment, a person whose activities are restricted to such purposes does not create a permanent establishment either.
>
> 33. The authority to conclude contracts must cover contracts relating to operations which constitute the business proper of the enterprise. It would be irrelevant, for instance, if the person has authority to engage employees for the enterprise to assist that person's activity for the enterprise or if the person were authorised to conclude, in the name of the enterprise, similar contracts relating to internal operations only.

The US Department of the Treasury Technical Explanation of the Convention[20] provides a similar example:

> The contracts referred to in paragraph 5 are those relating to the essential business operations of the enterprise rather than ancillary activities. For example, if the agent has no authority to conclude contracts in the name of the enterprise with its customers for the sale of the goods produced by the enterprise, but it can enter into service contracts in the name of the enterprise for the enterprise's business equipment used in the agent's office, this contracting authority would not fall within the scope of the paragraph, even if exercised regularly.

---

19 See 86.9 (PE: preparatory and auxiliary activities).

20 Accessible *http://www.irs.gov/pub/irs-trty/temod006.pdf*

86.5.7 *Habitually*

"Habitually" echoes the requirement of "degree of permanency" for a fixed place of business PE. The OECD Commentary provides:

> The OECD Commentary provides:
>
> 32. ... The use of the term "permanent establishment" in this context presupposes, of course, that that person makes use of this authority repeatedly and not merely in isolated cases.
>
> 33.1 The requirement that an agent must "habitually" exercise an authority to conclude contracts reflects the underlying principle in Article 5 that the presence which an enterprise maintains in a Contracting State should be more than merely transitory if the enterprise is to be regarded as maintaining a permanent establishment, and thus a taxable presence, in that State. The extent and frequency of activity necessary to conclude that the agent is "habitually exercising" contracting authority will depend on the nature of the contracts and the business of the principal. It is not possible to lay down a precise frequency test. Nonetheless, the same sorts of factors considered in para 6 would be relevant in making that determination.[21]

86.5.8 *Extent of agency PE*

The OECD comments on the extent of an agency PE:

> 34. Where the requirements set out in paragraph 5 are met, a permanent establishment of the enterprise exists to the extent that the person acts for the latter, i.e. not only to the extent that such a person exercises the authority to conclude contracts in the name of the enterprise.

86.5.9 *Relationship between fixed place of business and agency PEs*

The OECD Commentary provides:

> 35. Under paragraph 5, only those persons who meet the specific conditions may create a permanent establishment; all other persons are excluded. It should be borne in mind, however, that paragraph 5 simply provides an alternative test of whether an enterprise has a permanent establishment in a State. If it can be shown that the enterprise has a permanent establishment within the meaning of paragraphs 1 and 2 (subject to the provisions of paragraph 4), [fixed place of business] it is not necessary to show that the person in charge is one who would fall

---

21 See 86.3.2 (Degree of permanency).

under paragraph 5.

86.6 Independent agent exemption

The rule in short is that an independent agent is not a PE. I refer to this as **"the independent agent exemption"**.

Investment managers and brokers may be an agency PE, but have a special exemption which clarifies the independent agent exemption; see 44.1 (Investment manager exemptions - Introduction).

86.6.1 *Independent agent exemption: UK-law PE*

Section 1142(1) CTA 2010 provides:

> A company is not regarded as having a permanent establishment in a territory by reason of the fact that it carries on business there through an agent of independent status acting in the ordinary course of the agent's business.

86.6.2 *Independent agent exemption: OECD model PE*

The OECD Model is slightly differently worded, but the differences do not seem material. Article 5(6) provides:

> An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent or any other agent of an independent status, provided that such persons are acting in the ordinary course of their business.

The OECD Commentary summarises:

> 36. Where an enterprise of a Contracting State carries on business dealings through a broker, general commission agent or any other agent of an independent status, it cannot be taxed in the other Contracting State in respect of those dealings if the agent is acting in the ordinary course of his business (cf. paragraph 32 above). Although it stands to reason that such an agent, representing a separate enterprise, cannot constitute a permanent establishment of the foreign enterprise, paragraph 6 has been inserted in the Article for the sake of clarity and emphasis.

I refer to this as **"the independent agent exemption"**.

The view that the independent agent exemption is only inserted for the avoidance of doubt is important in contexts (such as Colonial Model treaties) where the exemption is not stated expressly

37. A person will come within the scope of paragraph 6, i.e. he will not constitute a permanent establishment of the enterprise on whose behalf he acts only if

a) he is independent of the enterprise both legally and economically, and
b) he acts in the ordinary course of his business when acting on behalf of the enterprise.

The requirements of independent status and "ordinary course of business" overlap somewhat, but it is best to consider them separately.

86.7 Independent status

This is a multifactorial concept.

86.7.1 *Control by principal*

The OECD commentary provides:

38. Whether a person is independent of the enterprise represented depends on the extent of the obligations which this person has vis-a-vis the enterprise. Where the person's commercial activities for the enterprise are subject to detailed instructions or to comprehensive control by it, such person cannot be regarded as independent of the enterprise. Another important criterion will be whether the entrepreneurial risk has to be borne by the person or by the enterprise the person represents.

38.1 In relation to the test of legal dependence, it should be noted that the control which a parent company exercises over its subsidiary in its capacity as shareholder is not relevant in a consideration of the dependence or otherwise of the subsidiary in its capacity as an agent for the parent. This is consistent with the rule in paragraph 7 of Article 5. But, as paragraph 41 of the Commentary indicates, the subsidiary may be considered a dependent agent of its parent by application of the same tests which are applied to unrelated companies.

38.2 The following considerations should be borne in mind when determining whether an agent may be considered to be independent.

38.3 An independent agent will typically be responsible to his principal for the results of his work but not subject to significant control with respect to the manner in which that work is carried out. He will not be subject to detailed instructions from the principal as to the conduct of the work. The fact that the principal is relying on the special skill and knowledge of the agent is an indication of independence.

38.4 Limitations on the scale of business which may be conducted by the agent clearly affect the scope of the agent's authority. However such limitations are not relevant to dependency which is determined by consideration of the extent to which the agent exercises freedom in the conduct of business on behalf of the principal within the scope of the authority conferred by the agreement.

38.5 It may be a feature of the operation of an agreement that an agent will

provide substantial information to a principal in connection with the business conducted under the agreement. This is not in itself a sufficient criterion for determination that the agent is dependent unless the information is provided in the course of seeking approval from the principal for the manner in which the business is to be conducted. The provision of information which is simply intended to ensure the smooth running of the agreement and continued good relations with the principal is not a sign of dependence.

86.7.2 *Multiple principals*

The OECD commentary provides:

38.6 Another factor to be considered in determining independent status is the number of principals represented by the agent. Independent status is less likely if the activities of the agent are performed wholly or almost wholly on behalf of only one enterprise over the lifetime of the business or a long period of time. However, this fact is not by itself determinative. All the facts and circumstances must be taken into account to determine whether the agent's activities constitute an autonomous business conducted by him in which he bears risk and receives reward through the use of his entrepreneurial skills and knowledge. Where an agent acts for a number of principals in the ordinary course of his business and none of these is predominant in terms of the business carried on by the agent legal dependence may exist if the principals act in concert to control the acts of the agent in the course of his business on their behalf.

The INTM provides:

264080 Independent agents do not create a permanent establishment [April 2007]

[The INTM summarises s.1142(1) and continues:] Whether an agent is of independent status is tested by reference to the legal, financial and commercial characteristics of the particular business relationship between the non-resident and the agent. If the relationship between them is the same as a relationship between independent businesses dealing with each other at arms length then the agent will be 'an independent agent'. For example, an agent who acted for other independent unconnected businesses on the same terms as those under which he acted for the non-resident could be an 'independent agent' and it would be clear that the agent had been acting in the ordinary course of his business if his activities were repeated for various unconnected customers. Dependent or independent status does not turn on the shareholding relationship between principal and agent. The fact that an agent is a subsidiary company does not necessarily make it a dependent agent.[22] However, a subsidiary company will constitute a domestic law agency PE of its parent company in the same way as any other agent of the parent company if independence by reference to the factors detailed in the guidance that follows cannot be demonstrated.

---

22 See 86.8 (Controlled companies and group companies).

Whether an agent acts in the ordinary course of their own business is something that should be considered by reference to the behavioural facts as opposed to intentions not followed through in business performance. Matters relevant would include (but not necessarily be limited to) the number of unrelated principals that the agent acted for and the extent of the business activities customarily carried out by independent agents in the specific business sector concerned.

Assuming they did act in the ordinary course of their own business, in general, an agent would be independent and would not constitute an agency PE of the foreign enterprise for which it acts where it is independent of the principal enterprise both legally and economically. The perspective of application of this test is with relevance to the business conducted by the agent for the principal rather than, for example, any shareholding relationship between the principal and agent. Other relevant factors of independence may include:

- the extent of the obligations which the agent has vis-à-vis the non-resident;
- whether the agent is subject to detailed instructions or comprehensive control;
- whether the agent bears the entrepreneurial risk for the business that the agent carries out for the non-resident;
- the degree of reliance on the agent's special skill and knowledge by the principal in the business done, and
- Whether there is reference by the agent to the principal for approval of the manner in which the business is to be conducted.

There will undoubtedly be circumstances where, whether deliberately or not, the relationship between a non resident and a UK agent is obscure or even where the declared terms of that relationship are very different from the actual terms. In such cases there is no substitute for detailed enquiry into the relationship to see whether it falls within the category of dependent or independent agent.

INTM discusses the OECD Model wording. It partly duplicates the text of the discussion on domestic law agency PE. The other parts provide:

266150. Agent of independent status – Article 5(6) [September 2011]
... The work done by an agent, where that work was all done for one non-resident client, is unlikely to be viewed as the conduct of his 'own business' but more likely that of the non-resident's business. An exception to that view might be where the concentration on one client was an unusual occurrence within a settled continuous trade involving several clients. ...

86.7.3 *"Ordinary course of business"*

The OECD commentary tries but cannot elucidate this:

38.7 Persons cannot be said to act in the ordinary course of their own business if, in place of the enterprise, such persons perform activities which, economically, belong to the sphere of the enterprise rather than to that of their own business operations. Where, for example, a commission agent not only sells the goods or merchandise of the enterprise in his own name but also habitually acts, in relation to that enterprise, as a permanent agent having an authority to

conclude contracts, he would be deemed in respect of this particular activity to be a permanent establishment, since he is thus acting outside the ordinary course of his own trade or business (namely that of a commission agent), unless his activities are limited to those mentioned at the end of paragraph 5.

38.8 In deciding whether or not particular activities fall within or outside the ordinary course of business of an agent, one would examine the business activities customarily carried out within the agent's trade as a broker, commission agent or other independent agent rather than the other business activities carried out by that agent. Whilst the comparison normally should be made with the activities customary to the agent's trade, other complementary tests may in certain circumstances be used concurrently or alternatively, for example where the agent's activities do not relate to a common trade.

39. [This deals with insurance companies and is not discussed here].

86.7.4 *USA DTA*

Article 4(6) USA/UK DTA is similar to the OECD model.[23]

The US Department of the Treasury Technical Explanation of the Convention[24] provides:

> Whether the agent and the enterprise are independent is a factual determination. Among the questions to be considered are the extent to which the agent operates on the basis of instructions from the enterprise. An agent that is subject to detailed instructions regarding the conduct of its operations or comprehensive control by the enterprise is not legally independent.
>
> In determining whether the agent is economically independent, a relevant factor is the extent to which the agent bears business risk. Business risk refers primarily to risk of loss. An independent agent typically bears risk of loss from its own activities. In the absence of other factors that would establish dependence, an agent that shares business risk with the enterprise, or has its own business risk, is economically independent because its business activities are not integrated with those of the principal. Conversely, an agent that bears little or no risk from the activities it performs is not economically independent and therefore is not described in paragraph
>
> Another relevant factor in determining whether an agent is economically independent is whether the agent has an exclusive or nearly exclusive

23 "An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent, or any other agent of an independent status, provided that such person is acting in the ordinary course of his business as an independent agent."

24 Accessible *http://www.ustreas.gov/offices/tax-policy/library/teus-uk.pdf*

relationship with the principal. Such a relationship may indicate that the principal has economic control over the agent. A number of principals acting in concert also may have economic control over an agent. The limited scope of the agent's activities and the agent's dependence on a single source of income may indicate that the agent lacks economic independence. It should be borne in mind, however, that exclusivity is not in itself a conclusive test; an agent may be economically independent notwithstanding an exclusive relationship with the principal if it has the capacity to diversify and acquire other clients without substantial modifications to its current business and without substantial harm to its business profits. Thus, exclusivity should be viewed merely as a pointer to further investigation of the relationship between the principal and the agent. Each case must be addressed on the basis of its own facts and circumstances.

86.7.5 *Broker and general commission agents*

The precise meanings of broker and general commission agent in the OECD Model PE definition do not greatly matter since both terms are subsumed into "other agent of independent status".

For completeness, "broker" is discussed at 44.5.2 ("Broker"). The former International Tax Handbook explained "general commission agent" in a passage too amusing to omit:

> **935. General commission agent**
> ... Although the words general commission agent appear in the legislation, nobody really knows what a general commission agent is and textbooks on agency make no reference to such a character; the expression is indeed used in our Double Taxation Agreements but it is not a term that our treaty partners are familiar with. They say it has no particular meaning for them and think that it is there because the British were rather insistent about it.
>
> **936. London Produce case**
> The one case to which we most often turn for guidance on who may or may not be a general commission agent is the London Produce case [*Fleming v London Produce Co* 44 TC 582]. The London Produce company acted as agents in importing meat from New Zealand and selling it for commission on the London market. 95 per cent of its business was carried out for one principal. It claimed to be a general commission agent.
>
> Megarry J enjoyed himself with the expression saying that he found it puzzling and unidentified. He wondered whether he might get at a meaning by looking at the words general, commission and agent separately and then adding the constituent parts together. He felt, however, that that was not a good idea because one could not arrive at the meaning of a particular high office by adding together the separate words lord, privy and seal. He came to the conclusion that a general commission agent must have broker-like qualities as it is included in the term

'broker' in the Section and that it is someone who holds himself out as being ready to work for clients generally. In his view Section 82(1) [TMA] (then Section 373(1) ITA 1952) could not be relevant if 'in substance what is done is that (the non-resident) carries on business within the UK through the medium of an agent who is virtually a sole agent running the entire business for him and merely sending him remittances on request'. London Produce lost the case.
The only other case is the earlier one of *Boyd v Stephen* [10 TC 698] (concerned with bacon) when Rowlatt rather summarily dismissed the suggestion that the agents were general commission agents on the grounds that they did much more than such an agent would normally do. What the words are probably getting at is somebody like an import commission agent. That is someone, probably more common in 1915, who, acting for a non-resident producer, will sell goods through a broker on the market in return for a commission. It is unlikely that the authors of the Section had in mind the smaller domestic markets such as meat and bacon.

86.8 Controlled companies and group companies

Article 5(7) OECD Model provides:

> The fact that a company which is a resident of a Contracting State controls or is controlled by a company which is a resident of the other Contracting State, or which carries on business in that other State (whether through a permanent establishment or otherwise), shall not of itself constitute either company a permanent establishment of the other.

The OECD commentary provides:

> 40. It is generally accepted that the existence of a subsidiary company does not, of itself, constitute that subsidiary company a permanent establishment of its parent company. This follows from the principle that, for the purpose of taxation, such a subsidiary company constitutes an independent legal entity. Even the fact that the trade or business is carried on by the subsidiary company is managed by the parent company does not constitute the subsidiary company a permanent establishment of the parent company.
> 41. A parent company may, however, be found, under the rules of paragraphs 1 or 5 of the Article, to have a permanent establishment in a State where a subsidiary has a place of business. Thus, any space or premises belonging to the subsidiary that is at the disposal of the parent company (see paragraphs 4, 5 and 6 above) and that constitutes a fixed place of business through which the parent carries on its own business will constitute a permanent establishment of the parent under paragraph 1, subject to paragraph 3 and 4 of the Article (see for instance, the example in paragraph 4.3 above). Also, under paragraph 5, a parent will be deemed to have a permanent establishment in a State in respect of any

activities that its subsidiary undertakes for it if the subsidiary has, and habitually exercises, in that State an authority to conclude contracts in the name of the parent (see paragraphs 32, 33 and 34 above), unless these activities are limited to those referred to in paragraph 4 of the Article or unless the subsidiary acts in the ordinary course of its business as an independent agent to which paragraph 6 of the Article applies.

41.1 The same principles apply to any company forming part of a multinational group so that such a company may be found to have a permanent establishment in a State where it has at its disposal (see paragraphs 4, 5 and 6 above) and uses premises belonging to another company of the group, or if the former company is deemed to have a permanent establishment under paragraph 5 of the Article(see paragraphs 32, 33 and 34 above). The determination of the existence of a permanent establishment under the rules of paragraphs 1 or 5 of the Article must, however, be done separately for each company of the group. Thus, the existence in one State of a permanent establishment of one company of the group will not have any relevance as to whether another company of the group has itself a permanent establishment in that State.

42. Whilst premises belonging to a company that is a member of a multinational group can be put at the disposal of another company of the group and may, subject to the other conditions of Article 5, constitute a permanent establishment of that other company if the business of that other company is carried on through that place, it is important to distinguish that case from the frequent situation where a company that is a member of a multinational group provides services (e.g. management services) to another company of the group as part of its own business carried on in premises that are not those of that other company and using its own personnel. In that case, the place where those services are provided is not at the disposal of the latter company and it is not the business of that company that is carried on through that place. That place cannot, therefore, be considered to be a permanent establishment of the company to which the services are provided. Indeed, the fact that a company's own activities at a given location may provide an economic benefit to the business of another company does not mean that the latter company carries on its business through that location: clearly, a company that merely purchases parts produced or services supplied by another company in a different country would not have a permanent establishment because of that, even though it may benefit from the manufacturing of these parts or the supplying of these services.

There is no equivalent of art 5(7) in UK-law PE, but it is considered that the same rules should be implied.

86.9 PE: Preparatory and auxiliary activities

Section 1143 CTA 2010 provides:

> (1) If the condition in subsection (2) is met, a company is not regarded as having a permanent establishment in a territory by reason of the fact that—
>
> (a) a fixed place of business is maintained there for the purpose of carrying on activities for the company, or
>
> (b) an agent carries on activities there for and on behalf of the company.
>
> (2) The condition is that, in relation to the business of the company as a whole, the activities carried on are only of a preparatory or auxiliary character.
>
> (3) For this purpose "activities of a preparatory or auxiliary character" include (without prejudice to the generality of that expression)—
>
> (a) the use of facilities for the purpose of storage, display or delivery of goods or merchandise belonging to the company,
>
> (b) the maintenance of a stock of goods or merchandise belonging to the company for the purpose of storage, display or delivery,
>
> (c) the maintenance of a stock of goods or merchandise belonging to the company for the purpose of processing by another person, and
>
> (d) purchasing goods or merchandise, or collecting information, for the company.

This is a slight rewrite of OECD Model para 5(4):

> Notwithstanding the preceding provisions of this Article, the term "permanent establishment" shall be deemed not to include:
>
> a) the use of facilities solely for the purpose of storage, display or delivery of goods or merchandise belonging to the enterprise;
>
> b) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display or delivery;
>
> c) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise;
>
> d) the maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information, for the enterprise;
>
> e) the maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character;
>
> f) the maintenance of a fixed place of business solely for any

combination of activities mentioned in subparas a) to e), provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

The differences in wording do not seem significant.

INTM para 264050 discusses this, but need not be set out as it only refers to (and repeats some material from) the INTM discussion of OECD Model PE:

266120 Fixed place of business permanent establishment – Activities specifically excluded from the definition of permanent establishment [April 2007]

Model treaty Article 5(4) lists certain activities that are not to be treated as permanent establishments even if they are carried on through a fixed place of business.

The Manual sets out a précis of the article and continues:

In deciding whether or not a fixed place of business of a non-resident enterprise is used for activities of a preparatory or auxiliary nature, consider the following factors:

a. Are the services it performs so remote from the actual realisation of profits by the enterprise that it would be difficult to allocate any part of the profit to the fixed place of business? If they are, then the fixed place of business will not be a permanent establishment. The benchmark to gauge the activities against are those of the trade as a whole entity. So, for example, if the UK activities are no different to the essence of the trade, e.g. the UK personnel collect market research information and the non-resident company's main trade is concerned with market research, then the activities in the UK would not be preparatory or auxiliary and there could be a permanent establishment in the UK.

An example is a research division of a trading or manufacturing company.

b. Does the activity of the fixed place of business form an essential and significant part of the enterprise as a whole?

This sentence is from the OECD commentary but with respect it cannot be a correct or helpful test since all the activities specified as auxiliary are significant and some of them are essential.

A fixed place of business whose general purpose is identical to the general purpose of the enterprise is not used for activities of a preparatory or auxiliary nature. Examples of this are fixed places of business used for the purpose of managing an enterprise, or where a fixed place of business is maintained to supply spare parts of machinery supplied by the enterprise to customers and to service such machinery.

Note that the exclusion of activities of a preparatory or auxiliary nature from the definition of a permanent establishment only applies if these activities are solely for the non-resident enterprise. If the activities are performed not only for the

> enterprise but also for other enterprises, including other companies in the same group, then the fixed place of business will not be within the scope of the exclusion.

I find the last paragraph rather surprising though it is in the OECD Commentary. The OECD Commentary explains the reason for the exemption for collecting information:

> The reference to the collection of information in subpara d) is intended to include the case of the newspaper bureau which has no purpose other than to act as one of many "tentacles" of the parent body; to exempt such a bureau is to do no more than to extend the concept of "mere purchase".

86.10 Alternative finance arrangements

Section 1144 CTA 2010 deals with alternative finance arrangements (shari'ah compliant arrangements for interest). This is not discussed here.

86.11 PE in Colonial Model treaties

Article 2(1) of the UK/Jersey DTA provides another definition of PE:

> The term "permanent establishment", when used with respect to an enterprise of one of the territories,
> [a] means a branch, management or other fixed place of business, but
> [b] does not include an agency unless the agent has, and habitually exercises, a general authority to negotiate and conclude contracts on behalf of such enterprise or has a stock of merchandise from which he regularly fills orders on its behalf.

Guernsey and the Isle of Man are the same. This wording is based on s.17 FA 1930 and is clearly an ancestor of the current OECD Model PE.

To what extent is this different from OECD Model PE? It is suggested that the Courts ought to have regard to the general international law understanding of PE (that is, current OECD Model PE) and construe the Colonial Model definition in the same way. Notwithstanding the multiplicity of definitions, a multiplicity of concepts should be avoided or minimised so far as possible. Otherwise we will never know much about the meaning of this expression, as there will never be the litigation to answer all the puzzles which could arise.

86.12 Commentary: Let's have one definition of PE

We only need one definition of PE and it is suggested that the statutory PE

should be repealed and replaced by rule that PE has the same meaning as in the OECD model definition. That is indeed what the current statutory definition is intended to achieve.

It would also be a simplification if the treaties based on the Colonial Model could be amended to adopt standard OECD model wording. Obviously, that cannot be achieved by the UK unilaterally, and the point may not have much priority in the agendas of tax simplification or treaty negotiation, but in the fullness of time it should happen.

86.13 Why does branch/agency matter?

It is not practical to set out a complete list of the significance of branch/agency for tax, but the following are the most important.

In the absence of a PE, a non-resident individual or trust is not generally subject to CGT. An individual or trust trading in the UK through a PE is subject to CGT on gains linked to the branch agency.[25]

IT and CGT may be collected from the branch/agency.[26]

A branch/agency of an individual who is a trustee is relevant to trust residence.

Lastly, the branch/agency is likely to be a PE, which is relevant for DTAs.

Branch/agency is not relevant to companies. In theory one could envisage a situation where a non-resident company does not have a UK PE but does have a UK branch/agency, and such a company would be within the scope of CGT under s.10 TCGA. In practice, this does not happen, or if it does, no-one takes any notice.[27]

86.14 Meaning of "branch or agency"

86.14.1 *The statutory (non-)definition*

Section 10(6) TCGA provides:

> In this Act, unless the context otherwise requires,

---

25 See 49.8 (Non-resident trade with UK branch).

26 See 43.1 (Collection of tax from UK representatives).

27 See for instance the HMRC trustee residence guidance which states conveniently (if not strictly accurately):
"This is in line with section 10B Taxation of Chargeable Gains Act 1992 *which has the effect that an overseas company is not taxed on the gains made by a UK branch or agency, but only on those made by a permanent establishment here*." (Emphasis added).

[a] "branch or agency" means any factorship, agency, receivership, branch or management, but

[b] does not include any person within the exemptions in section 82 of the Management Act (general agents and brokers).

For the purposes of UK representatives rules[28] the term is likewise defined to mean "any factorship, agency, receivership, branch or management". The definition here does not include the restriction for general agents and brokers but these categories are taken out of the UK representative rules by other provisions.

The definition in s.10(6)[a] TCGA is completely useless, since it incorporates both words being defined, merely adding three further obscure or archaic terms which seem to mean "agent" if they mean anything.[29] The INTM expresses the same point more tactfully:

> **264090. Branch or agency – Statutory definition and practical recognition of a branch** [April 2007]
>
> ...
>
> There is a statutory definition of 'branch or agency' at [Section 834(1) ICTA 1988] thus – "any factorship, agency, receivership, branch or management".[30] This is not particularly helpful so we must look for authority elsewhere including case law.

86.14.2 *Meaning of "branch"*

The former International Tax Handbook stated at para 842:

> There is very little guidance on the meaning of 'branch'. We have been

---

28 See 43.1 (Collection of tax from UK representatives).

29 The former International Tax Handbook explained at 842:

> "Factorship and receivership are forms of agency and so, usually, would 'management' be. The former two categories are found in the 1842 machinery provisions, 'Management' was added in 1915 but has acquired more modern associations with the growth in the use of managers such as project managers and investment managers."

To be fair, s.10(6)[a] was not intended to be a definition as such, but simply as an abbreviation, to avoid the more cumbersome wording of, e.g. s.370 ITA 1952:

> "A non-resident person shall be assessable and chargeable in respect of any profits or gains arising, whether directly or indirectly, through or from any factorship, agency, receivership, branch or management, and shall be so assessable and chargeable in the name of the factor, agent, receiver, branch or manager."

30 [Author's Note.] The reference should be s.126(8) FA 1995. However, the definition there is the same, so it does not matter.

> advised that the presence of a principal (in the case of a sole trader or partnership) or of employees on a more or less regular basis is likely to be an essential ingredient of a branch (though employees may also be agents).

That repeats the personnel condition in the definition of PE. The INTM discusses the meaning of branch at para 264090 [April 2007]:

> Most people recognise a branch of a foreign business when they see one and the impression given to the public is helpful in deciding whether or not a branch exists. For example there are many branches of foreign banks that trade on the High Streets of many towns and cities in the UK. We know this, whether we bank with these branches or not, because the name of the foreign bank will be displayed across the shop front of the UK branch. The personnel running the UK branch will be carrying on the part of the foreign bank's trade that takes place in the UK. This amounts to the UK presence of the foreign bank's trade, i.e. a branch of its trade. That's an easy example in part because banks actually call themselves branches but it is worth stressing that whatever terminology is used it is the activities carried on in the UK in relation to the foreign enterprise's overall business activities that are most relevant in deciding whether the UK activities are a branch of the foreign business.

86.14.3 *Meaning of "agency"*

The INTM continues:

> **264100. Agency – Common law concept** [February 2006]
> Practical experience will have introduced all of us to the idea of agency. We do not always deal directly with the principal because we sometimes deal with an intermediary or agent. The agent represents the principal in accordance with the terms of the agreement in place between them. That agreement may be oral or in writing and in legal terms is called the agent's authority. In representing the principal the agent may bring about a legal relationship between that principal and a third party. Typically the agent may conclude a contract on the principal's behalf with a third party – the common situation is that of the UK agent who makes a contract with an UK third party to sell some goods on behalf of a foreign principal.
> The English common law concept of agency is sometimes described by legal writers as the doctrine of identity. This conveys the concept that the agent is the alter ego of the principal. In the act of the agent we see directly the act of the principal; we regard what the agent does for the principal in just the same way as we would have regarded the same act

> if the principal had been here and had done it. If a contract for sale were made in the UK it would follow that a non-resident making a contract here through an agent would be trading here. Thus our domestic law concept of trading within the UK by non-residents and our common law concept of agency are intimately linked although the word agent appears nowhere in the income tax charging legislation. This contrasts with the legal position under civil law, which is detailed in the guidance at INTM266160.

The "agent" need not be an agent in the contract law sense of a person empowered to enter into contracts on behalf of a principal.[31]

86.14.4 *Exception for general agents*

Section 10(6)[b] TCGA provides that branch or agency:

> does not include any person within the exemptions in section 82 of the Management Act (general agents and brokers).

The reference is to s.82 TMA 1970 which was absent-mindedly repealed in 1995! I think the repeal should be regarded as not affecting s.10(6), ie s.82 continues to have effect for this purpose. Taxguide 3/10 records:

> HMRC agreed that the position in respect of the reference to s82 TMA 70 in s10(6) TCGA 1992 is not immediately clear and they will clarify it.[32]

But the point has been forgotten or perhaps filed as too difficult.

Section 82 provides (or provided):

> [a] Nothing in this Part of this Act shall render a non-resident person chargeable in the name of a broker or in the name of an agent not being an authorised person carrying on the regular agency of the non-resident person, in respect of profits or gains arising from sales or transactions carried out through such a broker or agent:
> [b] Provided that where sales or transactions are carried out on behalf of a non-resident person through a broker in the ordinary course of his business as such and the broker
> (a) is a person carrying on bona fide the business of a broker in the UK, and
> (b) receives in respect of the business of the non-resident person which is

---

32 Taxguide 3/10 Trustee Residence: Guidance note agreed by HMRC issued August 2010 by ICAEW, CIOT and STEP accessible *http://www.icaew.com/~/media/archive/files/technical/tax/tax-news/taxguides/TAXGUIDE-3-10-Trustee-Residence.pdf.*

> transacted through him remuneration at a rate not less than that customary in the class of business in question,
>
> then, notwithstanding that the broker is a person who acts regularly for the non-resident person as such broker, the non-resident person shall not be chargeable in the name of that broker in respect of profits or gains arising from those sales or transactions.
>
> In this subsection, "broker" includes a general commission agent.

There are two exceptions here. The exception at [a] applies only to cases where there is no regular agency.[33] This is similar to the rule that casual agents do not constitute an agency PE.[34] The exception at [b] is similar to the broker exemption. There is no statutory exemption for investment managers or other independent agents. This is, I think, an oversight. It is considered that the exemption (or something like it) should be implied.[35] As far as investment managers are concerned, in practice it does not matter much, as individuals or trusts are not likely to be trading in securities (and if they were, I do not expect that anyone would take any notice).

86.14.5 *Difference between branch/agency and PE?*

It is considered that "branch" should have (more or less) the same meaning as fixed place of business PE, and "agency" should have (more or less) the same meaning as agency PE, so the composite expression has (more or less) the same meaning as PE.

HMRC agree. The SALF Manual provides:

> **704 UK representatives of non-residents chargeable under Case I and II Schedule D** [February 2011]
>
> *Definition of UK representative*

---

33 The phrase "not being an authorised person carrying on the regular agency of the non-resident person" governs "broker" as well as "agent", ie the section means:
"Nothing in this Part of this Act shall render a non-resident person chargeable
[i] in the name of a broker *not being an authorised person carrying on the regular agency of the non-resident person*, or
[ii] in the name of an agent not being an authorised person carrying on the regular agency of the non-resident person,
in respect of profits or gains arising from sales or transactions carried out through such a broker or agent..."

34 See 43.5 (Casual agent exemption).

35 See 86.6 (Independent agent exemption) citing the OECD Model commentary:
"... it stands to reason that such an agent, representing a separate enterprise, cannot constitute a permanent establishment of the foreign enterprise, paragraph 6 has been inserted in the Article for the sake of clarity and emphasis."

> Branch or agency has the statutory definition at Section 126(8) FA 1995 of 'Any factorship, agency, receivership, branch or management' but it is interpreted on broadly equal lines to 'permanent establishment'...[36]

In *Brackett v Chater*,[37] the Special Commissioners took a different approach. They treated the term "branch or agency" as composite phrase containing a single concept. They did not think it correct to consider separately whether there was a branch, and whether there was an agent. The difficulty with this approach is that it is far from clear what the single concept is, if it is distinct from the concepts of branch and agency and PE. (The statutory definition, as noted, does not help.) The Special Commissioners' solution is to ignore the wording altogether.[38] It is not necessary to go that far, even when dealing with these 19th century fossils, and at a time when more emphasis is placed on a purposive approach.

The Special Commissioners continued:

> Mr. Brackett represents Drishane in this country and is in sole charge of the day to day conduct of the trading operations other than the formation of contracts. It is not straining language, in our opinion, to say that by entrusting those operations to his care Drishane has established at least a branch in this country. Alternatively Mr. Brackett can properly be described as the manager of those operations, because he personifies them. Nor can we accede to Mr. Brackett's argument that it is inappropriate to assess him as "agent for Drishane" because he does not have the status of an agent under the general law. The definition of "branch or agency" in s 118 Taxes Management Act adds that "branch or agent" shall be construed accordingly. We take that to mean that the term "agent" is used as the cognate noun to describe a person who represents a branch or agency. Mr. Brackett is undoubtedly the personification of the branch or management of Drishane's business in this country and is, in our opinion, properly assessed as "agent for Drishane" on the authority of s 79.

---

36 Similarly the HMRC trustee residence guidance: "The examples all relate to non-UK resident companies that are trustees. The same principles would apply for other non-UK resident persons who are trustees (and for whom the relevant UK-based entity would be a branch or agency rather than a permanent establishment)."

37 60 TC 134 & 639, at p.646.

38 "It would, in our view, be perverse to hold that Drishane, which was effectively trading only in this country, through Mr. Brackett, is not within the charge to tax because of some semantic difficulty in fitting its arrangements with him to the wording of the definition of a branch or agency."

This conclusion does follow from the finding of fact in the first sentence, though the only support it received in the High Court was that the decision was one which the Special Commissioners were entitled to reach.

86.15 Can you trade in the UK without a branch/agency or PE?

In *Brackett v Chater* the judge said:

> ... I find it difficult to imagine how a non-resident company which carries on a trade with any degree of continuity in the UK can do so otherwise than through a "branch or agency" as defined in the Taxes Management Act 1970.[39]

This is *obiter*, but given the breadth of the expression it seems right as a general rule but not as an absolute rule. This applies to a PE as well as to a branch/agency.

The former International Tax Handbook at 846 took the view that trading in the UK without a branch or agency was rare:

> Although such cases are rare it is possible for a non-resident individual to trade here other than through a branch or agency. A non-resident individual might come to this country for a short time so as not to become resident and carry on an itinerant trade. There would in such a situation be no branch and no agency. It is rather more difficult to imagine situations of that sort where the person concerned is a company. But notwithstanding the judge's comments in the *Brackett* case there may be cases where the UK activities of a non-resident company are divided between various persons in such a way that, although the activities amount to trading here, no one person or group of persons can be identified as a branch or agency through which the trade is carried on.

86.16 Commentary: Let's abolish branch/agency

The FA 2003 replaced "branch or agency" with "PE" for the purposes of corporation tax. The reason was to achieve consistency with international tax law. A press release explained the reason:

> The rules also alter our current terminology so that in future we tax "permanent establishments", (a term recognised internationally and used in our double taxation agreements), rather than "branches". The new rules are to be interpreted in accordance with OECD guidelines, to ensure that the UK is in accord with

39 60 TC 134 at p.149.

international consensus that reflects UK agreement.[40]

This was a good reason to change corporation tax, and it is an equally good reason to bring IT and CGT into line. We do not need both concepts. The term PE should replace "branch or agency" altogether. This would be a worthwhile and trouble-free simplification in the law. It would make no difference in practice, because in practice the two terms come to much the same thing, and no-one takes much notice of such differences as there may be, but the reform would remove some puzzles and much complexity and duplication.

86.17 PE: The future

The OECD say:

> **The definition of PE must be updated to prevent abuses.** In many countries, the interpretation of the treaty rules on agency-PE allows contracts for the sale of goods belonging to a foreign enterprise to be negotiated and concluded in a country by the sales force of a local subsidiary of that foreign enterprise without the profits from these sales being taxable to the same extent as they would be if the sales were made by a distributor? In many cases, this has led enterprises to replace arrangements under which the local subsidiary traditionally acted as a distributor by "commissionnaire arrangements" with a resulting shift of profits out of the country where the sales take place without a substantive change in the functions performed in that country? Similarly, MNEs may artificially fragment their operations among multiple group entities to qualify for the exceptions to PE status for preparatory and ancillary activities?
>
> **ACTION 7 Prevent the artificial avoidance of PE status** Develop changes to the definition of PE to prevent the artificial avoidance of PE status in relation to BEPS, including through the use of commissionaire arrangements and the specific activity exemptions.[41]

Action is promised for September 2015.[42]

CHAPTER EIGHTY SEVEN

DISCLOSURE AND COMPLIANCE

87.1 Disclosure and compliance: Introduction

A full discussion of disclosure and compliance issues requires a book to itself. This chapter focuses on matters closest to the themes of this book.

The topic of DOTAS requires a book to itself (and such books have been written); it is not discussed here.

For the Proceeds of Crime Act 2002, see 92.5 (Money laundering: introduction).

87.1.1 *Cross references*

This chapter discusses general principles. The question how specific types of income/gains are disclosed on a tax return is considered in the chapters on that type of income; see:

27.14 (Tax return – disclosure of s.624 income)
29.17 (Tax return – disclosure of s.720 income)
30.40 (Tax return – disclosure of s.731 income)
32.45 (Tax return – disclosure of motive defence)
51.37 (Tax return – disclosure of s.87 gains).

87.2 Standards of disclosure and mistake

87.2.1 *Standards of care: culpability of mistakes*

It is helpful first to define some terminology and draw some distinctions. Errors may be classified by certain standards:

"**An honest error**": where the maker meets the standard of honesty.

"**A careless error**": where the maker meets the standard of reasonable care.

"**A reasonable-excuse error**": where the maker has a reasonable excuse. This is similar to a non-careless error, but perhaps it reflects a higher standard: it is perhaps possible to envisage an error which is not careless

but for which one still cannot find a reasonable excuse. But the difference (if any) is only a matter of nuance and for most purposes they are the same.

The tax penalty regime distinguishes

(1) careless errors

(2) "**deliberate"** errors, (subdivided into those which are or are not concealed).

Deliberate error is similar to dishonesty, though it is just possible to envisage errors which are dishonest but not deliberate; and errors which are deliberate but not dishonest.

The minimum level of care required is that of reasonable care, ie if there is a mistake in a return (or any other document given to HMRC) the error is honest, non-deliberate, and non-careless.

87.2.2 *Standards of disclosure*

Taxpayers disclosure may be classified by various standards:

"**Minimum disclosure**" – the minimum required by statute.

"**Voluntary disclosure**" meeting some higher standard above that minimum. This is a (deliberately) loose expression since (in the absence of context) a variety of standards might be applied. One particular standard (discussed below) I call "***Veltema*-disclosure**" but there can be other standards.

"**Full disclosure**" (in the absence of context) is not an apt expression, and I prefer to avoid it, because one cannot disclose *everything*: that is not practical. Indeed even to try would swamp HMRC with information so they could not identify what is relevant. HMRC are themselves aware of this. SP 1/06 provides:

> 9. A taxpayer can further restrict the opportunity for discovery [assessments] by providing enough information for an HMRC officer to realise within the enquiry period that the self-assessment is insufficient. However taxpayers are encouraged to submit the minimum necessary to make disclosure of an insufficiency. The *Veltema* judgement does not require the provision of enough information to quantify the effect on the assessment. Information will not be treated as being made available where the total amount supplied is so extensive that an officer 'could not have been reasonably expected to be aware' of the significance of particular information and the officer's attention has not been drawn to it by the taxpayer or taxpayer's representative.

87.3 Self-assessment tax return: minimum disclosure

A tax return is a series of questions, and the duty of taxpayers (and their advisers) is simply to answer them. The answers should be honest and non-careless. That is, one cannot always avoid error, but any error in the return should be honest and non-careless.

The standard of honesty is the ordinary standard of reasonable and honest people.[1] In practice debate normally focuses on carelessness.

87.4 Carelessness

87.4.1 *Significance of carelessness*

Carelessness is relevant to time limits of assessment and to penalties.

As far as time limits are concerned, it is convenient to read s.34(1) and 36(1) TMA together:

> **34(1)** Subject to the following provisions of this Act, and to any other provisions of the Taxes Acts allowing a longer period in any particular class of case, an assessment to income tax or capital gains tax may be made at any time not more than 4 years after the end of the year of assessment to which it relates. ...
>
> **36(1)** An assessment on a person in a case involving a loss of income tax or capital gains tax brought about carelessly by the person[2] may be made at any time not more than 6 years after the end of the year of assessment to which it relates ....

---

1 But what is that standard? It ultimately depends on the view of the judge or jury as finders of fact. Did Pepys reflect those standards when he wrote in his diary for 10 December 1660:

> "This afternoon there was a Couple of men with me, with a book in each of their hands, demanding money for polemony; and I overlooked the book and saw myself set down *Samuel Pepys, gent.,* 10*s* for himself and for his servants 2*s.* Which I did presently pay without any dispute; but I fear I shall not escape so, and therefore I have long ago laid by 10*l.* for them; but I think I am not bound to discover myself."

The point of the entry is that Pepys was liable to pay £10 under the Act (12 Car. II c.9) as an esquire. His good fortune continued under the next poll tax: The entry of 20 March 1667 reads:

> "I ... assessed by the late Pole-bill, where I am rated at an Esquire; and for my office, all will come to about 50*l* – but not more then I expected, nor so much by a great deal as I ought to be for all my offices – so I shall be glad to escape so."

2 Section 36(1B) TMA provides: "In subsections (1) and (1A), references to a loss brought about by the person who is the subject of the assessment include a loss brought about by another person acting on behalf of that person."

In short, there is normally an (approximately) 4-year limit on assessments. In the case of carelessness, assessments may be made up to 6 years (and in other specified cases up to 20 years.)

The taxpayer may be subject to penalties if they are guilty of carelessness. In penalty matters the carelessness must (in short) be personal carelessness of the taxpayer, not of their agents[3] (though it is of course possible for both taxpayer and agent to be guilty of carelessness).

87.4.2 *Meaning of "carelessness"*

A note on terminology. Enquiry Manual correctly provides:

> **5125 Culpability: Neglect, Negligence and Negligent Conduct** [May 2013]
> The terms neglect, negligence and negligent conduct are interchangeable.

Modern drafting uses the word "careless" defined to mean "failure to take reasonable care".[4] This is just a Plain English synonym of "negligence" or "neglect". HMRC agree. Compliance Handbook provides:

> **53400. What is careless behaviour?** [May 2013]
> The 6-year time limit applies where income tax, capital gains tax or corporation tax, stamp duty land tax, stamp duty reserve tax and petroleum tax has been under-assessed or over-repaid due to the careless behaviour of
> • the person, see CH51600, or
> • a person acting on their behalf, see CH53200.
> "Careless" means a failure to take reasonable care in relation to your tax affairs.
> Carelessness can be likened to the longstanding concept in general law of "negligence".
> In the 1856 case of *Blyth v Birmingham Waterworks Co*,[5] Baron Alderson said
>
> > Negligence is the omission to do something which a reasonable man, guided upon those considerations which ordinarily regulate the conduct of human affairs, would do, or doing something which a prudent and reasonable man would not do. The defendants might be

3 Para 18(3) Sch 24 FA 2007.

4 See s.29(4) and s.118 TMA as amended; similarly the penalty provisions in Sch 24 FA 2007.

5 (1856) 11 Ex 781, p784.

> liable for negligence, if, unintentionally, they omitted to do that which a prudent and reasonable person would have done, or did that which a person taking reasonable care would not have done.
>
> There is no question of whether or not the person intended to make the inaccuracy or fail to comply with the obligation. If they did that would be deliberate, see CH53700. It is simply a question of examining what the person did or failed to do and asking whether a prudent and reasonable person taking reasonable care would have done that or failed to do that in those circumstances.
>
> Repeated inaccuracies may form part of a pattern of behaviour which suggests a lack of care by a person in developing adequate systems for the recording of transactions or preparing tax returns. Similarly, repeated failures in relation to the relevant obligations in CH53900 to CH54100 inclusive may suggest a lack of care. It is, however, important to keep a sense of proportion. For example, repetition of the same inaccuracy would not always, of itself, indicate a failure to take reasonable care.
>
> People do make mistakes. We do not expect perfection. We are simply seeking to establish whether the person has given the care and attention that could be expected from a reasonable person taking reasonable care in similar circumstances....

The question must be decided in the light of the position as it was at the relevant time without the benefit of hindsight. The fact that a view turns out to be mistaken does not show that it was careless to form that view. Otherwise any judge whose decision is reversed on appeal would be guilty of carelessness and how often does that happen!

The onus of proof rests on HMRC to prove carelessness. An allegation of carelessness is a serious one and it should not be lightly made. I stress these points because HMRC ignore them and allege neglect as a matter of course, whenever carelessness is necessary to justify out of time assessments.[6]

Depending on which statutory provision is in point, it may be necessary to ascertain:

(1) whether the taxpayer is guilty of carelessness; or
(2) whether the taxpayer's agent is guilty of carelessness.

---

6 See eg International Manual which contains this revealing statement:
"**268520 Assessing time limits** [September 2011]
…If we come to the reasonable conclusion that there is a PE, or that the company is resident in the UK, there must have been careless or deliberate conduct in the failure to notify."

87.4.3 *The standard of care: taxpayers*

A taxpayer who is not an expert in taxation must leave technical tax issues to their professional advisers. When tax law is complicated a properly represented taxpayer cannot be expected to identify their advisers' mistakes. So where there are technical errors of law, the issue is normally whether the taxpayer's professional advisers have been guilty of carelessness. HMRC agree (if grudgingly):

> A taxpayer who
> [1] goes to an ostensibly competent professional adviser,
> [2] provides a full and accurate account of the facts,
> [3] checks that advice to the limit of his or her ability and competence,
> [4] and then follows the agent's advice (or signs the return prepared on that basis)
> has not been negligent. He or she has taken reasonable care. If it turns out that the agent has made a careless error in giving the advice or in preparing the tax return the taxpayer who has taken reasonable care will not be penalised.[7]

This wording is somewhat overfavourable to HMRC; paragraphs [2] and [3](depending on what nuance one puts on the expressions used) do seem to exceed a requirement of reasonable care. But the basic point is correct.

An interesting question is what the taxpayer should do if their advisers disagree. A safe course(if the amounts involved make this reasonable) is to seek the advice of counsel, or more senior counsel, or a tax QC, but what is to be done if two QCs disagree or if the amounts do not justify that expense? It is suggested that the correct course is as follows:

(1) The individual must ask himself whether one view or the other is obviously or glaringly wrong. However it is not to be expected that this will often provide a solution.
(2) Subject to that, the individual can in principle follow whichever view suits them, provided that the person whose advice is adopted is suitably experienced, has seen the contrary advice and maintains their view. Then (even if the practitioner whose view is adopted turns out

---

7 "Modernising Powers, Deterrents and Safeguards: Working with Tax Agents" 22 April 2009, accessible: *http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&_pageLabel=pageVAT_RatesCodesTools&propertyType=document&id=HMCE_PROD1_029453*

to be wrong) any error is non-careless and a reasonable-excuse error.

87.4.4 *The standard of care: tax practitioners*

The question then is what reasonable tax practitioners should do in advising or completing a client's tax return. The standard of care is that to be expected of a reasonable practitioner.[8]

A solicitor or accountant is entitled to rely on advice given by an appropriate expert counsel (provided it is not obviously or glaringly wrong). A person who acts in this way is not careless.[9] This rule applies in the completion of a tax return. So where counsel has advised, HMRC would normally need to allege that counsel is guilty of carelessness in order to make an out of time assessment.

What should a practitioner do if the law is so unclear that they are unable to form a view? In many cases the only honest answer to the question of how a court would decide is "I don't know" or "toss a coin". This includes some basic issues, such as the source of interest. In such cases the proper course is to complete the tax return on whichever view best suits the client.

A trickier question is where professional views differ between view A and view B, the practitioner prefers view A, but view B suits the client. It is suggested the practitioner can advise the client to fill in their return on view B. Take, for example, the old chestnut problem of GWR and trusts. Some practitioners (including myself) thought there is no IHT charge on the death of an individual who has a GWR in an excluded property trusts even if they are IHT deemed domiciled (or indeed actually UK domiciled). Some practitioners (I think, a minority) took the view that there is a charge and for a decade or so HMRC also officially took that view.[10] Should they really advise their clients to complete the return on that basis? I would have thought not. If that were wrong, then the best advice one could give would be to change advisers, which can hardly be

---

8 Of course, the adviser's duty is not merely (merely?) to understand the law. He/she must explain it, record it in writing, and identify the risk factors to the client. Is this so obvious that it is unnecessary to say? It is not: *Chandrasekaran v Deloitte & Touche Wealth Management* [2004] EWHC 1378 at [72].

9 *Locke v Camberwell Health Authority* [1991] 2 Med LR 249 accessible *http://www.kessler.co.uk/tfd-archive*.

10 This passage was written before HMRC issued guidance accepting the view put forward in this book, which for practical purposes resolves the problem, but I retain the text as the example neatly illustrates the problem.

right.

87.5 Significance of reasonable excuse

It is not possible to give a full list. The most important is s.59C TMA which imposes a 5% surcharge on tax paid more than 28 days late and another 5% on tax paid more than 6 months late. It is not a requirement that the taxpayer or their agent be guilty of carelessness. (This is no doubt why the term used is "surcharge" and not "penalty".) Instead there is a defence for a taxpayer with a "reasonable excuse".

87.6 Advantages of voluntary disclosure

This section considers whether a tax return should contain more than the minimum disclosure of answering the questions asked. The "white box" section of a tax return "Any other information" is designed for this purpose, or material may be put in a covering letter.

Any such disclosure is voluntary. Everyone who is responsible for completing tax returns has to ask questions and decide on the answers. If an answer is reached, there is in general no obligation to disclose to HMRC the reasons, doubts, and facts which are not considered to affect the position. Failure to disclose these things does not render answers in the return (even if they turn out to be wrong) to be dishonest or careless errors.

The CIOT used to say that clearly:

> *In the preparation of a tax return, there is no duty to provide more information to the tax authorities than the return requires simply because some pieces of information known to the member might support a different tax treatment from that which the member, after due consideration of all the information available to him, honestly considers to be the tax treatment.*[11]

That continues to be the law, and the CIOT have not changed their view, but in the current (2014) version of the code they no longer have the confidence to express it in such clear and uncompromising terms:

---

11 CIOT, *Professional Conduct in Relation to Taxation* (2004), para 3.10.
The Keith Committee recommended that taxpayers' doubts should be disclosed to HMRC but the recommendation was rightly rejected as impractical: see Committee on Enforcement Powers of Revenue Departments (1983) Cmnd 8822 para 7.3.6 and HMRC consultation papers "The Inland Revenue and the Taxpayer" and "Keith: Further Proposals" (1988).

> A tax return must contain at least the minimum information required by law.[12]

That sentence is a truism, and not in any meaningful sense guidance, for the question is to identify the information which is "required by law". However one can infer from what follows that the CIOT view has not changed, as the passage goes on to identify reasons for *voluntary* disclosure:

> In general it is likely to be in a client's own interests to ensure that factors relevant to his tax liability are adequately disclosed to HMRC ... In addition, it may be desirable to make fuller disclosure than is strictly necessary.[13]

The fact that there is a possibility that the courts might disagree with an adviser's view does not in itself require any disclosure. The law could not sensibly take any other view, as that possibility almost always exists, even if the law seems clear. Readers will easily bring to mind long lists of strange decisions, some corrected on appeal[14] and others not,[15] to illustrate the uncertainties – or (which comes to the same thing) the lottery element in litigation.

The same of course applies both ways. When HMRC assess tax to the best of their judgement, they disclose what tax they consider due, but not their doubts or reasons.

Voluntary disclosure (in the words of the CIOT, "fuller disclosure than is strictly necessary") may be desirable for any one or more of the following reasons:

(1) It may curtail HMRC's enquiry period.
(2) It may facilitate good relations with HMRC.
(3) It may help avoid allegations of misconduct, which might later arise if the view taken turns out to be in error, and tax is due:

---

12 *Professional Conduct in Relation to Taxation* (2014), para 3.13 *http://www.tax.org.uk/Resources/CIOT/Documents/2014/02/Professional%20Conduct%20in%20Relation%20to%20Taxation%20190214%20final.pdf*
I refer to this for short as the CIOT's code, but it is in fact issued jointly by all the major professional bodies.

13 CIOT, *Professional Conduct in Relation to Taxation* (2014), para 3.14, 3.15.

14 For example, *Rysaffe v IRC* [2003] STC 536; *Grimm v Newman* [2002] STC 1388.

15 For example, *Phizackerley v HMRC* [2007] STC SCD 328.

(a) Allegations of dishonesty (based on a suspicion that the taxpayer might be relying on HMRC not finding out the facts).
(b) Allegations of carelessness.
(c) Allegations of no reasonable excuse.

87.7 Voluntary disclosure to curtail enquiry period

HMRC usually have 12 months in which to begin an enquiry into a tax return. However, s.29 TMA provides an extension of time in certain cases:

> (1) If an officer of the Board or the Board discover, as regards any person (the taxpayer) and a year of assessment—
>
> (a) that any income which ought to have been assessed to income tax, or chargeable gains which ought to have been assessed to capital gains tax, have not been assessed, ….
>
> the officer or, as the case may be, the Board may, subject to subsections (2) and (3) below, make an assessment in the amount, or the further amount, which ought in his or their opinion to be charged in order to make good to the Crown the loss of tax. ….
>
> (3) Where the taxpayer has made and delivered a return under section 8 or 8A of this Act in respect of the relevant year of assessment, he shall not be assessed under subsection (1) above—
>
> (a) in respect of the year of assessment mentioned in that subsection; and
>
> (b) in the same capacity as that in which he made and delivered the return,
>
> unless one of the two conditions mentioned below is fulfilled.

I refer to these conditions as **"the culpable mistake condition"** and **"the innocent mistake condition"**. The terminology is from *Veltema*.

87.7.1 *The culpable mistake condition*

Section 29(4) TMA provides:

> The first condition is that the situation mentioned in subsection (1) above was brought about carelessly or deliberately by the taxpayer or a person acting on his behalf.

This condition will not be satisfied in the absence of fraud or carelessness. That takes us to the second condition.

87.7.2 *The innocent mistake condition*

Section 29(5) TMA provides:

> The second condition is that at the time when an officer of the Board—
>
> (a) ceased to be entitled to give notice of his intention to enquire into the taxpayer's return under section 8 or 8A of this Act in respect of the relevant year of assessment; or
>
> (b) informed the taxpayer that he had completed his enquiries into that return,
>
> the officer could not have been reasonably expected, on the basis of the information made available[16] to him before that time, to be aware of the situation mentioned in subsection (1) above.

The advantage of voluntary disclosure is that HMRC cannot (after the one-year period has passed) make any further enquiries into the return. If a taxpayer wants security that the matter is closed after one year, therefore, it would be necessary to disclose relevant facts. I refer to disclosure which meets the requirements of the innocent mistake condition as "***Veltema*-standard disclosure**".

Taxpayers are entitled to weigh up the advantages of *Veltema*-standard disclosure (curtailing the enquiry period) against the disadvantages (possible costs).

---

16 Section 29(6) TMA provides:

> "For the purposes of subsection (5) above, information is made available to an officer of the Board if—
>
> (a) it is contained in the taxpayer's return under section 8 or 8A of this Act in respect of the relevant year of assessment (the return), or in any accounts, statements or documents accompanying the return;
>
> (b) it is contained in any claim made as regards the relevant year of assessment by the taxpayer acting in the same capacity as that in which he made the return, or in any accounts, statements or documents accompanying any such claim;
>
> (c) it is contained in any documents, accounts or particulars which, for the purposes of any enquiries into the return or any such claim by an officer of the Board, are produced or furnished by the taxpayer to the officer; or
>
> (d) it is information the existence of which, and the relevance of which as regards the situation mentioned in subsection (1) above—
>
> (i) could reasonably be expected to be inferred by an officer of the Board from information falling within paras (a) to (c) above; or
>
> (ii) are notified in writing by the taxpayer to an officer of the Board."

87.8 *Veltema*-standard[17]

87.8.1 *HMRC views*

The Enquiry Manual provides:

> **3260 Discovery in SA years - Made Available** [January 2010]
> ...
> In *Langham v Veltema* 76 TC 259, Auld LJ considered two issues relating to s 29(6).
> The first issue was 'whether [the inspector's] awareness or inference of actual insufficiency is required to negative the [innocent mistake] condition, or would awareness that it was questionable do'.
> The second issue was 'what is the relevant information before the Inspector on the basis of which he could be said to have been reasonably expected to be aware of an insufficiency'.
> ***First issue***
> In addressing this Auld LJ concluded:
>
> > '.. it is plain from the wording of the statutory test in s 29(5) that it is concerned ... with what he could have been reasonably expected to be aware of. It speaks of an Inspector's objective awareness, from the information made available to him by the taxpayer, of 'the situation' mentioned in s 29(1), namely an actual insufficiency in the assessment. ...
> > It is a mark of the way in which the subsection provides an objective test of awareness of insufficiency, expressed as a negative condition in the form that an officer 'could not have been reasonably expected ... to be aware of the insufficiency. It also allows as s 29(6) expressly does, for constructive awareness of insufficiency, that is, for something less than an awareness of an insufficiency, in the form of an inference of insufficiency.'
>
> ***Second issue***
> Auld LJ considered:
>
> > 'It seems to me that the key to the scheme is that the Inspector is to be shut out from making a discovery assessment under the section only when the taxpayer or his representatives, in making an honest and accurate return or in responding to a Section 9A enquiry, have clearly alerted him to the insufficiency of the assessment in question.'

---

17 See Gordon, "Discovery Assessments – The Consequences of the Decision in *Corbally v Stourton*" 12 PTPR 45, accessible *http://www.khpplc.co.uk/reviews*

There is more HMRC guidance in SP 1/06. This comments on valuation and accountancy issues (not discussed here) and then provides:

> ***Taking a Different View***
> 18. It is open to a taxpayer properly informed or advised to adopt a different view of the law from that published as HMRC's view. To protect against a discovery assessment after the enquiry period, the return or accompanying documents would have to indicate that a different view had been adopted. This might be done by comments to the effect that the taxpayer has not followed HMRC guidance on the issue or that no adjustment has been made to take account of it. This would offer an opportunity to HMRC to take up the return for enquiry. It is not necessary to provide all the documentation that HMRC might need to quantify that insufficiency if an enquiry into the Return is made.
> 19. Provided the point at issue is clearly identified and the stance adopted is not wholly unreasonable, the existence of an under-assessment or insufficiency is demonstrated by the statement that a different view of the law has been followed. In these circumstances the taxpayer achieves finality if no enquiry is opened within the statutory time limit.

87.8.2 *Case law*

There is a growing body of case law and a full discussion would need a long chapter to itself.[18]

In *R v HMRC ex p. Pattullo*[19] the taxpayer entered into a CGT tax avoidance scheme. In his return he put the following:

> 1. On [date] I settled an interest in possession trust with £6,000.
> 2. The trust is called 'The Pattullo 2004 Life Interest Settlement'.
> 3. I had borrowed on commercial terms a sum of £2,665,000 from Investec Bank UK Limited and settled this amount into the trust.
> 4. The trustees 'Nexus Trustee Company Limited' used the funds to acquire a number of capital redemption contracts [and transferred them][20] to me on 4 March 2004.
> 5. I surrendered the Capital redemption contracts on 8 March 2004 and received redemption proceeds of £2,600,000.

---

18 See Gordon, "Discovery Assessments – The Consequences of the Decision in *Corbally v Stourton*" 12 PTPR 45, accessible *http://www.khpplc.co.uk/reviews*

19 [2010] STC 107. Note incidentally that the Latin tag *ex p.* which has been rejected in English law usage seems to have survived in Scotland.

20 The context shows that some words like this were omitted from the law report.

> 6. This has given rise to a capital loss as a consequence of Section 37(1) TCGA 1992 amounting to £2,665,000.

I would have thought this made it obvious to any competent inspector exactly what had happened. However the Court of Session held that this did not reach *Veltema*-standard. The Court said:

> [114] ...the white space does not contain the following:
> 1. A statement that Mr Pattullo was a participant in the CRC Mark II tax avoidance scheme.
> 2. A statement that the petitioner and his advisers had adopted a different view of the law from that published as HMRC's namely: they had taken a view in respect of the tax treatment of Capital Redemption Contracts which is the opposite of that taken by HMRC Capital Gains Tax Manual [*sic*] at CG69004 ... is not contained within the white space.[21] ...

The judge erroneously continues:

> The necessity to make such a declaration in order to comply with the duty to clearly alert has been held to exist in *HMRC v Household Estate Agents* where it was held as follows:
>
> > "Taxpayers who adopt a different view of the law from that published as HMRC's can protect against a discovery assessment after the enquiry period. The return and accounts would have to indicate that a different view had been adopted by entering comments to the effect that they did not follow HMRC guidance on the issue or that no adjustment had been made to take account of it."

This is a reference to a submission made by HMRC, which did not form part of the Commissioners decision in favour of the taxpayer.[22]

> 3. There is no explanation as to how Mr Pattullo contends that Section 37 operates in order to produce the capital loss.
> 4. The details other than the basics of the transactions which have been entered into are not contained within the white space.

The judge wisely does not seek to identify what details were missing.

> 5. There is no indication of any doubt in the disclosure that the petitioner is entitled to the loss. I accept ... that the taxpayer does not require in

---

21 This may be factually incorrect, the judge does not set out the relevant text of the Manual, but that does not affect the point of principle.

22 78 TC 705 at [10]. For completeness, the Commissioners decision in *Household Estate Agents* was reversed on other grounds on appeal.

> order to clearly alert to say there is an insufficiency as of course that is not his position. However, in circumstances such as this a reference to doubt or as I have said to the fact that it is, a position contrary to HMRC's would be necessary to comply with the duty incumbent upon him.
> In the absence of information of the type as above described an inspector of the skill and knowledge as I have earlier defined it could not in my judgment have been aware of actual insufficiency. ...

The judge does not say whether it is generally necessary to indicate a doubt. It is suggested that this should not be necessary except in special cases. There must always be a doubt when there is a white box disclosure, for if there is no doubt, what is the point of disclosure?

In the 10th edition of this work I concluded:

> One can, I think, expect some back-tracking, refinement or qualification from the Courts for taxpayers they regard as more meritorious than Mr. Pattullo.

Subsequently, a less onerous view of the *Veltema*-standard was taken in *Charlton v HMRC*[23] though the taxpayer was no more meritorious. The disclosure was essentially as follows:

> I acquired a life policy on [date] for £205k.
> I made a partial surrender of the policy on [date] for £192k.
> I sold my residual interest in the policy on [date] for £10k.
> The loss on sale is calculated as the difference between the sale proceeds and the cost of acquisition.
> Proceeds from the partial surrender are excluded from the capital gains calculation as they have already been taken into account as a receipt in computing income for the purposes of income tax.

The DOTAS scheme number was also disclosed on the return.[24] It was not mentioned that the scheme had been held to be unsuccessful by the Special Commissioners in *Drummond v HMRC,* the taxpayers advisors having formed the view[25] that *Drummond* (at least as far as concerned their own scheme) was wrongly decided and likely to be reversed on appeal. It was

---

23 [2011] UKFTT 467; the position will need to be reviewed when the decision is final.

24 This did not happen in *Pattullo* where the transactions were carried out before the DOTAS rules took effect.

25 Which the tribunal found to be a reasonable view, though subsequently the Special Commissioner's decision was upheld: *Drummond v HMRC* 79 TC 793.

held this met the *Veltema*-standard

87.8.3 *IHT: voluntary disclosure to curtail enquiry*

The IHT rules are differently worded (and drafted in an earlier era, more concise) but the standard of disclosure is similar. A certificate of discharge discharges "all persons from any further claim for the tax on the value transferred by the chargeable transfer concerned". See s.239(3) IHTA. However, s.239(4) provides:

> A certificate under this section shall not discharge any person from tax in case of fraud or failure to disclose material facts. ...

87.9 Voluntary disclosure for sake of good relations with HMRC

CIOT Professional Conduct in Relation to Taxation used to provide:

> *It may be in the client's best interest to furnish more information than he is strictly required to do because this is likely to lead to a more reasonable approach by the tax authorities, thereby saving money and time in the long run ...*

The CIOT are tentative (note the *may*) and the validity of the point is not easy to assess: it may vary from client to client, from time to time, and from department to department. HMRC solicitors department, for instance, in the author's experience, adopt an uncompromisingly adversarial approach in the conduct of tax litigation.

In the 2010/11 edition of this work I commented:

> It seems to me that the only tangible incentive for above-minimum disclosure is to curtail the enquiry period, and obtaining "a more reasonable approach by the tax authorities" is uncertain, unquantifiable, unenforceable and ultimately chimerical. But readers who deal directly with HMRC on a daily basis will be in a better position than I am to form a view on this issue, and this is (understandably) an attitude that HMRC wish to encourage.[26]

The CIOT may agree, since in 2011 they watered down this passage; it now reads:

---

26 See comments on the "enhanced relationship" in the OECD Study into the Role of Tax Intermediaries, 2008, *http://www.oecd.org/dataoecd/28/34/39882938.pdf* and the OECD's "Engaging with High Net Worth Individuals on Tax Compliance" (May 2009);*http://www.keepeek.com/Digital-Asset-Management/oecd/taxation/engaging-with-high-net-worth-individuals-on-tax-compliance_9789264068872-en*

> In general it is likely to be in a client's own interests to ensure that factors relevant to his tax liability are adequately disclosed to HMRC because:
> - His relationship with HMRC is more likely to be on a satisfactory footing if he can demonstrate good faith in his dealings with them ...[27]

If it is anticipated that questions will be asked, it is sensible to anticipate them by providing details in a tax return.

This debate should be seen in the context of a broader fundamental controversy concerning the relationship between the Revenue and the taxpayer. The traditional view has been that:

(1) The relationship is adversarial: the interests of HMRC and taxpayer are distinct.
(2) The relationship should be characterised by adherence to legal rules (substantive tax rules determining the amount of tax due, and the requirement of honesty) supplemented by procedural professional conduct rules (such as courtesy and efficiency).

A rival (and more recent[28]) view is the opposite:

(1) The relationship should be a mutual one, taxpayer and Revenue working together in harmony towards a common goal, to ascertain the right amount of tax.[29]
(2) The right amount of tax is defined only partly in legal rules but also discernable from a more insubstantial spirit of the rules.[30] (Perhaps

---

27 CIOT, *Professional Conduct in Relation to Taxation* (2014), para 3.14 *http://www.tax.org.uk/Resources/CIOT/Documents/2014/02/Professional%20Conduct%20in%20Relation%20to%20Taxation%20190214%20final.pdf*

28 It is difficult to identify a specific date when this school of thought emerged, but I think it reflects a change of administration around the beginning of the second term of the Labour Government (2001). Contrast the discussion of the term "compliant" in 44.6.4 (Investment manager condition E: customary remuneration).

29 Also called "the proper amount of tax".

30 An example is the Code of Practice on Taxation for Banks, (December 2009) which prescribes that banks should "not undertake tax planning that aims to achieve a tax result that is contrary to the intentions of Parliament; ... not engage in tax planning other than that which supports genuine commercial activity... Remuneration packages for bank employees ... should be structured so that the bank reasonably believes that the proper amounts of tax and national insurance contributions are paid... Relationships with HMRC should be transparent and constructive, based on mutual trust [adding with jarring realism: "wherever possible"]. The features of this relationship should include disclosing fully the significant uncertainties in relation to

> HMRC consider themselves the arbiter of this spirit, or perhaps no arbiter is needed: so far as the point is not governed by law, the question can be fudged.)[31]

I refer to the traditional view as **"the adversarial relationship"**, and the rival view as **"the partnership relationship"**. A range of positions are possible within the two extremes.

The controversy raises empirical questions of whether HMRC and taxpayers actually regard the partnership relationship as the model of their relationship, or pretend to do so; and political and moral questions of whether they should do so, or the extent to which they should do so. The controversy raises the legal questions of whether the Courts would enforce a co-operative approach or only the adversarial approach. The short answer seems to be that the Courts will not enforce a co-operative approach. It rests outside the law.[32] Thus in one case, HMRC noticed that a company had failed to put in a loss election, but did not inform the company until the deadline for the election had passed. The court held that there was nothing wrong in that.[33]

Those who believe that tax should be governed by law will regard the partnership approach with suspicion. For a restatement of the traditional view, see the speech of Anthony Thomas when president of the CIOT:

> We need to return to the "healthy tension" between HMRC and the tax profession that existed ten to 20 years ago: no special relationships, no cosy conferences; no favours, deals and understandings; no inside tracks and private access. ... Senior tax officials did not subject directors, businesses and the professions to the kind of lectures one would expect from a politician. The job of civil servants is, and always has been, to apply the rule of law in an even handed manner.[34]

A full discussion lies beyond the scope of this book, but the issues are

---

tax matters... engaging in a co-operative, supportive and professional manner in all interactions ... working collaboratively...."

31 HMRC say: "Any disagreements arising under the Code will be dealt with using existing processes." See "A Code of Practice on Taxation for Banks - Consultation Response Document" (December 2009).

32 HMRC rightly say (under the heading "The Rule of Law"): The Code is not law. See "A Code of Practice on Taxation for Banks - Consultation Response Document" (December 2009).

33 *R (oao Bampton Property Group) v King* [2014] STC 56.

34 "We Need Trust", Taxation (2 June 2011) p.7.

deep, and will not go away.

87.10 Voluntary (?) disclosure to avoid allegation of misconduct

Disclosure may be sensible to avoid allegations of misconduct, which might later arise if the view taken turns out to be in error, and tax is due: that is, allegations of dishonesty, carelessness or absence of "reasonable excuse". Cases where disclosure is needed for this reason are rare, but examples are:

(1) Where the taxpayer is taking a view which is contrary to a HMRC view which has been formally published in a SP.
(2) The same applies if the HMRC view is clearly known from more informal sources, such as the HMRC Manuals, RI or Business Briefs, or correspondence published by the professional bodies, or private correspondence; unless the HMRC view expressed is fairly clearly wrong.
(3) Where the adviser is following a view in the profession which they themselves do not share.
(4) Where the adviser is following a view in the profession which is very much a minority view, even if the adviser does share that view.[35]

In earlier editions I said that disclosure in circumstances such as these was best practice but not a matter of obligation. On further reflection I am not quite sure about that. The principle that one need not disclose matters of doubt may be pushed beyond breaking point. If tax was in fact due, the sanction for non-disclosure would then be penalties on the basis of deliberate error. Alternatively a hostile court may be inclined to find the taxpayer guilty of neglect.

87.11 IHT reporting requirement on creation of settlement

Section 218(1) IHTA provides:

> Where any person, in the course of a trade or profession carried on by

35 I formerly added another category: Where the taxpayer has carried out a complex, artificial, and aggressive tax avoidance scheme. In such a case (even though it is reasonably considered the scheme should succeed) full disclosure of the transactions should be made so HMRC have a proper opportunity to review the matter. In practice such cases should be caught by DOTAS so the issue of disclosure on a tax return does not arise.

> him, other than the profession of a barrister,[36] has been concerned with the making of a settlement and knows or has reason to believe—
>
> (a) that the settlor was domiciled in the UK, and
>
> (b) that the trustees of the settlement are not or will not be resident in the UK,
>
> he shall, within three months of the making of the settlement, make a return to the Board stating the names and addresses of the settlor and of the trustees of the settlement.

The duty of disclosure rests on a person ("the practitioner") acting in the course of their trade or profession. The duty rests on the firm or company acting and not directly on its employees.

Barristers are exempt. The reason is that they will usually be instructed by others who are subject to the duty.[37]

The practitioner must be concerned with the making of a settlement. This would include not only solicitors who might draft the settlement but other advisers who advise in relation to the creation of a settlement, even if the actual execution of the settlement were delegated to foreign advisers.

The practitioner might advise on the matter generally, leaving the client to take whatever action they wish in light of the advice, perhaps in conjunction with the trustees; in such circumstances they are probably not "concerned with the making of a settlement"; this presupposes the settlement had been established. What if the client had decided against a non-resident settlement after all or wanted to think about it? The practitioner may not know what the client eventually decided to do. The obligation under s.218 must be restricted to those who are able to provide the relevant information.

The practitioner must know or have reason to believe that the settlor is domiciled in the UK. A settlement may have more than one settlor.[38] Suppose one settlor is domiciled in the UK but the other is not. Does the reporting requirement arise? On a literal construction one could not say

---

36 Section 272 IHTA provides: "barrister" includes a member of the Faculty of Advocates.

37 A consultation paper was published in 2009 but the proposed reforms were dropped. See HMRC Consultation Document "Modernising Powers, Deterrents and Safeguards: Tackling Offshore Tax Evasion" (December 2009); HMRC Consultation Response Document "Tackling Offshore Tax Evasion" (March 2010).

38 "Settlor" for this purpose has the usual IHT meaning: see 80.1 (Who is the settlor?). The separate settlements fiction does not apply for this purpose: see 64.3 (The separate settlements fiction).

"the settlor" is UK domiciled and the reporting requirement would not arise. A purposive construction suggests that the duty does arise. That is the better view at least if the foreign domiciled settlor only provides a nominal amount. A practitioner should err on the side of caution.

A question also arises about the time when the settlor's domicile is relevant. Section 218 merely says that it applies if the settlor *was* domiciled in the UK. Does this mean domiciled in the UK at the time the settlement was made? Or does it mean that the settlor had at any time been domiciled in the UK? Context and common sense dictate that the provision is referring to the domicile of the settlor at the time the settlement was made because that is the date that matters for IHT.

IHT Manual para 42993 formerly provided:[39]

> **42993 Section 218 notices** [April 2010]
> ***Where settlor is a company***
> A s.218 notice is still required because s.218 refers to settlors domiciled in the UK
> - 'settlor' in relation to a settlement includes any person by whom the settlement was made (s.44 IHTA)
> - In terms of the Interpretation Act 1889 Rule 19 'the expression person shall, unless the contrary appears, include any body of persons corporate or unincorporate'[40]
> - In general a company is domiciled where it is registered – *Gasque v IRC* [1940] 2 KB 80.
>
> So where a non-UK resident [Employee Benefit Trust] is established by a company registered in the UK a s.218 notice is mandatory.

The person must know or have reason to believe that the trustees of the settlement are not or will not be resident in the UK**.**

In marginal cases the practitioner may be placed in difficulty. It may be necessary in some cases to disclose the creation of the settlement to HMRC out of caution.

There is no requirement under s.218 to notify the amount or nature of the settled property. However, HMRC have power in s.219 IHTA to require information to be provided by "any person" and they would know from the notification to whom further enquiries could be directed.

---

39 Since April 2011 the Manual reads 'our guidance on Employee Benefit Trusts is currently being rewritten'.

40 The text is 30 years out of date; the reference should now be to Sch. 1 Interpretation Act 1978, but the point is still valid.

Sch 5A TCGA imposes overlapping reporting requirements relating to non-resident settlements. But s.218 IHTA is wider in some respects. It applies to settlements which are not necessarily non-resident under the CGT rule.[41] Thirdly, the CGT duty is imposed on the settlor. The IHT duty is on the professional advisers.

For the position where IHT DT relief applies see 72.9 (Claims for foreign IHT credit relief).

87.11.1 *Non-resident practitioner*

It is suggested that no duty will arise on foreign practitioners who have no UK connection; the usual territorial limitation must apply: see *Clark v Oceanic* 56 TC 183. At first sight the requirement that the settlor is domiciled in the UK is sufficient to meet the territorial requirement so that no further territorial limitations should be implied. But the domicile connection may be a faint one. Suppose an individual leaves the UK in 2000 and settles in the USA, and in 2003 he makes a settlement. The individual may still be IHT deemed domiciled, but it is not realistic to expect the US practitioner to file a s.218 return (particularly having regard to the fact that the USA IHT DTA provides some IHT exemption).

87.11.2 *Penalty for failure to disclose*

Failure to make the return gives rise only to a nominal penalty.[42] More seriously, the practitioner faces criminal liability for fraud on HMRC or conspiracy to defraud if:

(1) the practitioner dishonestly fails to disclose in breach of the duty to do so; or

(2) any person dishonestly agreed with another practitioner or a client that there shall be no disclosure in breach of the duty to do so.

See too 8.7 (Disclosure of emigration or treaty-emigration of trust).

87.12 Reporting on death of foreign domiciled individual

I consider here the reporting duty of personal representatives on the death of an individual not domiciled in the UK. The legislation draws a distinction between:

(1) "**excepted estates**"; and

---

41 For IHT Trust residence, see 5.18 (Trustee residence for IHT). This is quite different from the IT/CGT definition.

42 Section 245A(1) IHTA 1984.

(2) "**ordinary estates**"; I coin this term to describe an estate which is not an "excepted estate".

For the position where IHT DT relief applies see 72.9 (Claims for foreign IHT credit relief).

87.12.1 *Meaning of "PRs" for IHT*

The definition of "personal representatives" matters for various purpose for IHT, in particular for liability to pay the tax and duty to put in an account.

Section 272 IHTA provides:

> In this Act, except where the context otherwise requires ...
> "personal representatives" includes
> [a] any person by whom or on whose behalf an application
> [i] for a grant of administration or
> [ii] for the resealing of a grant made outside the UK
> is made, and
> [b] any such person as mentioned in section 199(4)(a) above;

Para [b] takes us to s.199(4)(a) which refers to:

> (a) any person who takes possession of or intermeddles with, or otherwise acts in relation to, property so as to become liable as executor or trustee (or, in Scotland, any person who intromits with property or has become liable as a vitious intromitter) ...

The technical term in succession law is *executor de son tort*. The point is strictly a matter of succession law. The only reported example in a CTT/IHT context is *IRC v Stype Investments (Jersey) Ltd* [1982] STC 625 where a Jersey nominee held land in England subject to a contract for sale. That was a UK situate asset. The beneficial owner died and the Jersey company directed the sale proceeds to be paid outside the UK. That act made it an executor de son tort and so a PR for IHT purposes.[43]

The definition of PRs is different from the definition for IT and CGT purposes.

A person who applies for a foreign grant which is not resealed in the UK

43 The taxpayer was unmeritorious (perhaps dishonest) and this is perhaps another of the Templeman cases where the Court decided the answer first and the reasoning second.

is not a PR within this definition; otherwise para [a][ii] would be unnecessary.

The definition is inclusory but I cannot think of a person who is a PR in the general sense who is not within the statutory words.

87.13 Reporting: ordinary estates

Section 216(1) IHTA provides (so far as relevant):

> Except as otherwise provided by this section or by regulations under section 256 below, the personal representatives of a deceased person ... shall deliver to the Board an account specifying to the best of his knowledge and belief all appropriate property...and the value of that property.

The relevant form is IHT400 (IHT Account, April 2012), together with supplementary pages IHT 401 and following.

87.13.1 *"Appropriate property"*

"Appropriate property" is defined in s.216(3) IHTA which provides (so far as relevant):

> Subject to subsections (3A) and (3B) below,[44] where an account is to be delivered by personal representatives ... the appropriate property is—
>
> (a) [i] all property which formed part of the deceased's estate immediately before his death
>
> [ii] (or would do apart from s.151A(3)(b) or 151C(3)(b) above),[45]
>
> [iii] other than property which would not, apart from section 102(3) of the Finance Act 1986, form part of his estate; and
>
> (b) all property to which was attributable the value transferred by any chargeable transfers made by the deceased within seven years of his death.

Excluded property is not appropriate property as it does not form part of a person's estate immediate before death. Gifts of excluded property are not chargeable transfers and so do not fall within (b).

The term "appropriate property" is perhaps not the best of labels, but it is easier to adopt the statutory terminology.

---

44 Subsections (3A) and (3B) are not relevant here.

45 These provisions relate to certain pension funds.

87.13.2 *Estate without appropriate property*

There is no obligation to complete a return if there is no appropriate property, ie if:
(1) the deceased had no chargeable (non-exempt) property, and
(2) has made no chargeable transfers within 7 years of death.

87.13.3 *Estates with appropriate property*

In other cases (eg if the deceased had some property, even if of very little value) there is an obligation to return the details of the appropriate property.

In making the return there is no statutory obligation to specify excluded property. However Question 22 form IHT401 (Domicile outside the United Kingdom, 2008) asks:

> Did the deceased leave any assets outside the UK? If yes give approximate value.

There is no legal duty to supply this information.[46] But refusal to answer the question may give rise to further enquiries.

In making the return, there is no statutory duty to disclose details of gifts of excluded property which the deceased made before death. However Question 30 form IHT400 asks:

> **Gifts and other Transfers of Value:** Did the deceased make any lifetime gifts or other transfers of value on or after 18 March 1986?

It is considered that the reference in the question to "gifts" means gifts which are transfers of value so that if the deceased made gifts of excluded property it is correct to answer "no". The guidance in IHT400 Notes (August 2013) is consistent with this:

> **Gifts and other transfers of value**
> You can tick 'No' and do not need to fill in Schedule IHT403 if the only gifts made by the deceased were in the following categories:
> • to their spouse or civil partner and Spouse or Civil Partner Exemption

---

46 The former HMRC form D2 (Notes, 12/05) tacitly recognised this:
"*If the deceased was domiciled outside the UK when they died, any assets they owned abroad will not be liable to inheritance tax. Even so, you can help us to deal with this estate more quickly if you can give us a rough idea of the value of all of the deceased's estate outside the UK.*"
I have not found a similar comment in the current forms which were revised in 2008.

applies
- outright gifts to any individual which do not exceed £250 in any one year(these will be covered by the Small Gifts Exemption)
- outright gifts to any individual of money or listed stocks and shares that are wholly covered by the Annual Exemption
- outright gifts made regularly from income where the total gifts did not exceed £3,000 in each year.

These exemptions are detailed on page 72 of this guide.
If the deceased had made any other gifts or 'transfers of value' since 18 March 1986, including transfers into trust, payment of insurance premiums for the benefit of another person, advances out of a trust fund or any assets that were taken out of a trust before death, you must fill in Schedule IHT403 Gifts and other transfers of value. In general, a 'transfer of value' is any transaction where the deceased did not receive full value in exchange.

Question 45 IHT400 provides:

> **Assets held in trust**: Did the deceased have any right to benefit from any assets held in trust (including the right to receive assets held in a trust at some future date)? No/Yes – Use Schedule IHT418.

The word "right" only includes fixed interests, it is not apt to describe discretionary trusts. But it appears that "right to benefit" here is used (confusingly) to mean a right to an estate interest in possession. IHT400 Notes (August 2013) provides:

> ***Schedule IHT418 Assets held in trust***
> You should fill in Schedule IHT418 *Assets held in trust* if the deceased's interest in possession was in:
> • a trust set up before 22 March 2006
> • a trust that was set up on or after 22 March 2006 and was
> — an immediate post death interest
> — a disabled person's interest
> — a transitional serial interest.

This would include an excluded property trust where the deceased had an estate interest in possession. In such a case the answer to Question 45 is, "yes". However only limited information needs to be disclosed in form IHT418. IHT400 Notes (August 2013) provides:

> **Foreign trusts** If the deceased had a right to benefit from settled property where the assets are overseas and the person who set up the trust was domiciled outside the UK when the trust was created, please

answer questions 2 to 5 only.

87.14 Excepted estates

The law is in the IHT (Delivery of Accounts) (Excepted Estates) Regulations 2004, which I abbreviate to **"Excepted Estates Regulations 2004"**.

87.14.1 "Excepted estate"

Regulation 4(1) Excepted Estates Regulations 2004 provides:

> An excepted estate means the estate of a person immediately before his death in the circumstances prescribed by paras (2), (3) or (5).

Thus there are three categories of excepted estate.

87.14.2 Low value estates

Regulation 4(2) Excepted Estates Regulations 2004 provides:

> (2) The circumstances prescribed by this paragraph are that—
> (a) the person died on or after 6th April 2004, domiciled in the United Kingdom;
> (b) the value of that person's estate is attributable wholly to property passing—
> (i) under his will or intestacy,
> (ii) under a nomination of an asset taking effect on death,
> (iii) under a single settlement in which he was entitled to an interest in possession in settled property, or
> (iv) by survivorship in a beneficial joint tenancy or, in Scotland, by survivorship in a special destination;
> (c) of that property —
> (i) not more than £150,000 represented value attributable to property which, immediately before that person's death, was settled property; and
> (ii) not more than £100,000 represented value attributable to property which, immediately before that person's death, was situated outside the United Kingdom;
> (ca) that person was not a person by reason of whose death one of the alternatively secured pension fund provisions applies;
> (d) subject to paragraph (7A), that person died without having made any chargeable transfers during the period of seven years ending with his death other than specified transfers where, subject to paragraph (7), the aggregate value transferred did not

exceed [£150,000; and

(e) the aggregate of—

(i) the gross value of that person's estate,

(ii) subject to paragraph (7), the value transferred by any specified transfers made by that person, and

(iii) the value transferred by any specified exempt transfers made by that person,

did not exceed the IHT threshold.

87.14.3 *Estates qualifying for the IHT spouse or charity exemption*

Regulation 4(3) Excepted Estates Regulations 2004 provides:

(3) The circumstances prescribed by this paragraph are that—

(a) the person died on or after 6th April 2004, domiciled in the United Kingdom;

(b) the value of that person's estate is attributable wholly to property passing—

(i) under his will or intestacy,

(ii) under a nomination of an asset taking effect on death,

(iii) under a single settlement in which he was entitled to an interest in possession in settled property, or

(iv) by survivorship in a beneficial joint tenancy or, in Scotland, by survivorship in a special destination;

(c) of that property—

(i) subject to paragraph (8), not more than £150,000 represented value attributable to property which, immediately before that person's death, was settled property; and

(ii) not more than £100,000 represented value attributable to property which, immediately before that person's death, was situated outside the United Kingdom;

(ca) that person was not a person by reason of whose death one of the alternatively secured pension fund provisions applies;

(d) subject to paragraph (7A), that person died without having made any chargeable transfers during the period of seven years ending with his death other than specified transfers where, subject to paragraph (7), the aggregate value transferred did not exceed £150,000;

(e) the aggregate of—

(i) the gross value of that person's estate,

(ii) subject to paragraph (7), the value transferred by any specified transfers made by that person, and

(iii) the value transferred by any specified exempt transfers made by that person, did not exceed £1,000,000;

(ea) the total value transferred on that person's death by a spouse, civil partner or charity transfer is greater than nil; and

(f) the aggregate of—

does not exceed the IHT threshold, where—

A is the aggregate of the values in sub-paragraph (e),

B, subject to paragraph (4), is the total value transferred on that person's death by a spouse[, civil partner]1 or charity transfer, and

C is the total liabilities of the estate.

87.14.4 *IHT deemed domiciled deceased*

HMRC say that an individual who is IHT deemed domiciled cannot qualify under the first two categories:

IHTM06023 - Rules about excepted estates: what is not an excepted estate

There are instances when an estate cannot qualify as an excepted estate, regardless of the value. These are:

- where the deceased held an interest in possession (IHTM16060) in more than one item of settled property (IHTM16041)
- for deaths on or after 1 September 2006 where a charge arises under IHTA1984 S. 151A-C (IHT charge on an alternatively secured pension fund),
- where , on or after 18 March 1986, the deceased made a gift with reservation of benefit and either:
- the reservation still subsists at the death (IHTM04072), or the property ceased to be subject to the reservation within the seven years before the death - (unless this constituted a specified transfer (IHTM06018),
- the reservation still subsists at the death (IHTM04072), or
- the property ceased to be subject to the reservation within the seven years before the death - (unless this constituted a specified transfer (IHTM06018),
- where the deceased has elected that property should be treated as part of their estate for IHT rather than pay a pre-owned asset charge,
- where the deceased is regarded as deemed domiciled (IHTM13024) in the UK under the provisions of IHTA1984 S.267.

I am not sure about that, but it hardly matters.

87.14.5 *Foreign domiciled deceased*

Regulation 4(5) Excepted Estates Regulations 2004 provides:

> The circumstances prescribed by this paragraph are that—
>
> (a) the person died on or after 6 April 2004;
>
> (b) that person was never
>
> [i] domiciled in the UK or
>
> [ii] treated as domiciled in the UK by section 267 [IHTA];

It is arguable that a person treated as domiciled by a spouse exemption domicile may qualify, but I would not want to rely on that.

> (ba) that person was not a person by reason of whose death one of the alternatively secured pension fund provisions[47] applies; and
>
> (c) the value of that person's estate situated in the UK is wholly attributable to
>
> [i] cash[48] or
>
> [ii] quoted shares or
>
> [iii] securities
>
> passing under his will or intestacy or by survivorship in a beneficial joint tenancy or, in Scotland, by survivorship in a special destination, the gross value of which does not exceed £150,000.[49]

87.14.6 *Disclosure obligations of "excepted estate"*

While an "excepted estate" is not required to put in an account *under s.216 IHTA* it is required to deliver more or less the same information.

The term "excepted estate" is not apt, because the estate is not excepted from the reporting requirements. It is easier to adopt the statutory terminology but quotation marks would be justified.

Regulation 6(1) Excepted Estates Regulations provides:

---

47 Reg 4(9) provides:

> "In this regulation 'the alternatively secured pension fund provisions' means the following sections of the 1984 Act—
>
> (a) section 151A (person dying with alternatively secured pension fund);
>
> (b) section 151B (relevant dependant with pension fund inherited from member over 75); and
>
> (c) section 151C (dependant dying with other pension fund)."

48 IHT Manual 6018 shows that HMRC sensibly construe "cash" widely, so as to include a bank account.

49 See reg.4(5).

(1) Subject to paragraphs (3) and (4), a person who by virtue of these Regulations is not required to deliver to the Board an account under section 216 of the 1984 Act of the property comprised in an excepted estate, must produce
[a] the information specified in paragraph (2)
[b] and, where the criteria specified in regulation 5A(3) and (4) are met, paragraph (2A),
to the Board in such form as the Board may prescribe.

The main requirement is the list in regulation 6(2):

The information specified for the purpose of para (1) is—
(a) the following details in relation to the deceased—
  (i) full name;
  (ii) date of death;
  (iii) marital or civil partnership status;
  (iv) occupation;
  (v) any surviving spouse or civil partner, parent, brother or sister;
  (vi) the number of surviving children, step-children, adopted children or grandchildren;
  (vii) national insurance number, tax district and tax reference;
  (viii) if the deceased was not domiciled in the UK at his date of death, his domicile and address;
(b) details of all property to which the deceased was beneficially entitled and the value of that property;
(c) details of any specified transfers, specified exempt transfers and the value of those transfers;
(d) the liabilities of the estate; and
(e) any spouse, civil partner or charity transfers and the value of those transfers.

The relevant form is IHT207 (Return of estate information, 2006).

It is considered that there is no obligation to give information about excluded property. This is perhaps a purposive construction, because, strictly, excluded property is "property to which the deceased was beneficially entitled" even though it does not form part of their estate for IHT purposes immediately before their death. However, it is absurd to say that there is an obligation on excepted estates to disclose excluded property, when there is no such obligation on ordinary estates. In practice the relevant form (IHT207) does not ask about non-UK property.

The significance of being an "excepted estate" is not to reduce disclosure obligations. At first sight an "excepted estate" has the significant advantage of a discharge from IHT in regulation 8 Exempt Estates Regulations 2004:

> (1) Subject to paragraph (2) and regulation 9, if the information specified in regulation 6 has been produced in accordance with these Regulations, all persons shall on the expiration of the prescribed period be discharged from any claim for tax on the value transferred by the chargeable transfer made on the deceased's death and attributable to the value of the property comprised in an excepted estate and any Inland Revenue charge for that tax shall then be extinguished.
> (2) Paragraph (1) shall not apply if within the prescribed period the Board issue a notice to—
> (a) the person or persons who would apart from these Regulations be required to deliver an account under section 216 of the 1984 Act, or
> (b) the solicitor or agent of that person or those persons who produced the specified information pursuant to regulation 6, requiring additional information or documents to be produced in relation to the specified information produced pursuant to regulation 6.

But regulation 9 Exempt Instrument Regulations undoes the effective benefit of this:

> Regulation 8 shall not discharge any person from tax in the case of fraud or failure to disclose material facts and shall not affect any tax that may be payable if further property is later shown to form part of the estate and, in consequence of that property, the estate is not an excepted estate.

87.14.7 *Territorial limitations*

The statutory provisions fail to provide much of a territorial limitation on the duty to disclose. They merely provide two regimes of disclosure, one for ordinary estates and one for excepted estates.

The Courts may devise further territorial limitation, as they have on occasion done elsewhere: *Clark v Oceanic* 56 TC 183. The question is, what should it be? It is may be that no duty applies to foreign personal representatives, at least in the absence of any IHT liability. But disclosure in one form or another will be required in all cases where the PRs need a UK grant of probate.

87.14.8 *Conclusion*

Disclosure is required for an excepted estate even though no tax is payable on the death (eg because the property falls within the nil rate band). How well observed this requirement is in practice is another matter. However, if a foreign domiciled individual wishes to ensure that their personal representatives are under no duty to put in UK returns on their death, they should not have any UK situate property at the time of their death and perhaps appoint foreign executors. Then there is no duty to disclose the assets of the estate.

CHAPTER EIGHTY EIGHT

SWISS TAX AGREEMENT: INTRODUCTION

88.1 Swiss tax agreement: Introduction

The subject of the next four chapters of this book is the tax agreement made between the UK and Switzerland. Its full title is "The Agreement Between the United Kingdom of Great Britain and Northern Ireland and the Swiss Confederation on Cooperation in the Area of Taxation". The title is not particularly apt. I refer to it as **"the STA"**.

The STA contains two distinct regimes:

(1) The first regime, contained in Part 2,[1] deals with the period before commencement. In short, it offers UK residents with Swiss bank accounts the opportunity to make a one-off payment to clear their existing tax liabilities; with an alternative of one-off disclosure to HMRC. I refer to this as **"the STA clearance facility"**.

(2) The second regime, contained in Part 3, deals with the period afer commencement. It provides a withholding tax for future income/gains and IHT, with an alternative of annual disclosure. I refer to this as **"STA withholding tax"**.

The STA followed the model of the Germany/Switzerland agreement, signed two weeks earlier[2] but rejected by the German Parliament in December 2012.

A similar agreement with Austria was signed on 13 April 2012 and took effect on 1 January 2013. Negotiations on similar agreements are under way with Greece and Italy.[3]

The STA clearance facility is a new development in UK taxation: it is

---

1 Part 1 ("General provisions") is introductory and contains definitions.

2 21 September 2011. A version tracking the differences between the two agreements (in German) is accessible *http://www.kessler.co.uk/tfd-archive*.

3 Swiss Federal Department of Finance Press Release Dec 2012 *http://www.sif.admin.ch/00488/index.html?lang=en&msg-id=47354*

very different from the Liechtenstein/UK agreement made August 2009 and the earlier Offshore Disclosure Facility announced April 2007.

STA withholding tax is in some respects similar to the EU Savings Directive withholding tax, which (in the case of Switzerland) is contained in the agreement made in 2004 between Switzerland and the EU. I refer to that as **"Swiss/EU Savings Tax Agreement 2004"**. STA withholding tax is wider as it applies to all income and gains (not just interest) and it allows clearance and anonymity.

The STA is written in English and French,[4] and (as usual) each text is stated to be "equally authoritative." Some idiosyncrasies in the English language version are probably due to the fact that the text was not composed, or entirely composed, by lawyers whose first language is English.

The STA and its associated documents are available on *http://www.hmrc.gov.uk/taxtreaties/ukswiss.htm*.

The STA is aimed at UK residents who have not complied with UK tax obligations; I describe such persons as **"non-compliant"**. However all UK residents with Swiss accounts must consider its effect.

The STA was came into force on 1 January 2013.

The STA has effect in the UK by virtue of the FA 2012. There is similar enacting legislation in Switzerland.

For commencement of STA withholding tax, see 90.1.1 (Commencement of STA withholding tax).

88.1.1 *Guidance*

HMRC have published brief guidance in a FAQ which I call **"the STA FAQ"**.[5]

The important guidance will be that (if any) issued in Switzerland, since it is in Switzerland that the most important steps for the operation of the STA will take place. If HMRC agree its guidance with the Swiss authorities, it will no doubt be followed there.

The Swiss Bankers Association has issued a Q&A which provides a little background.[6]

---

4 See *http://www.news.admin.ch/NSBSubscriber/message/attachments/24481.pdf* for the French text.

5 *http://www.hmrc.gov.uk/taxtreaties/ukswiss-faqs.htm#12*

6 *http://www.swissbanking.org/en/20111102-5000-masterdoku-einigung_uk_final-cfr.pdf*

88.1.2 *How much tax will the STA raise?*

The amount of tax raised by the STA will depend on:

(1) how much income/gains within the scope of the STA was held by non-compliant individuals when it took effect; and

(2) the willingness of those individuals to regularise their affairs.

The STA may bring in tax in four ways:

(1) The one-off payments under the STA clearance facility. This has turned out to be a £342m receipt in 2012/13 and £804m in 2014/15.[7]

(2) STA withholding tax. I do not think anyone could expect that to amount to much; a few years time will tell.

(3) Tax paid as a result of enquiries following STA voluntary disclosure. This should be little, as taxpayers must opt for STA voluntary disclosure and they will not do so unless they are satisfied that their tax affairs are in order.[8]

(4) Tax paid by individuals who chose the Liechtenstein disclosure facility or other self-disclosure routes, in order to avoid the consequences of STA one-off payment/disclosure. It will not be practical to identify how much tax collected under these other routes is due to the STA.

It is also possible that the STA will discourage future non-compliance

---

7 *http://www.hmrc.gov.uk/statistics/receipts/receipts-stats.pdf* under the heading "Swiss Capital Tax". This is the total of the one-off payments, not including the annual withholding tax (private correspondence). Since a quid pro quo of the STA was that Swiss banks can now operate in the UK under easier conditions, it may be that this payment should not be regarded purely as a tax receipt. Also some of the tax collected under the STA would no doubt have been collected by other means in the absence of the STA. However it is impossible to put a figure on this.

8 Hansard 14 October 2013 records: "To date HMRC has received details of 18,000 accounts under the UK-Swiss Agreement, which it is matching to UK individuals. HMRC will make contact with each and every individual who opted for disclosure and has already written to over 9,000. Switzerland has until the end of December to provide details in respect of those who wish their account details to be disclosed to HMRC." See *http://www.publications.parliament.uk/pa/cm201314/cmhansrd/cm131014/text/131014w0008.htm?j=469995&e=kessler@kessler.co.uk&l=346_HTML&u=12468388&mid=1062735&jb=0#13101535000033*

No conclusions can be drawn from the figure. It is likely that the vast majority of these accounts are of compliant taxpayers, as they have consciously allowed disclosure. There may be some accounts of non-compliant taxpayers who have lost track of their accounts or lost mental capacity.

That discouragement is important but not susceptible to measurement.

In 2011 Dave Hartnett, then Permanent Secretary for Tax, predicted between £4 billion and £7 billion![9] The Office of Budgetary Responsibility rejected the higher figure, but still suggested £4 billion.[10] As predicted in the 2013/14 edition of this work, the evidence has shown that the "market" for qualified amnesties of this kind is only a small fraction of what HMRC had claimed.[11]

No estimate has been published of the cost to taxpayers and banks of administering the STA (including the time of the readers of this book in understanding it). I would have thought it would make a large dent in the £1 billion which the STA may be taken to yield, if, indeed, there was any change at all. But HMRC took a different view on that too:

> Tax compliant individuals may suffer negligible administration costs, involving familiarisation with the terms of the agreement and the cost of proving that they are already compliant.[12]

The yield of the STA will inevitably include tax from compliant taxpayers where the taxpayer failed to opt for disclosure owing to a failure of communication between the bank and the taxpayer, which may not be due to the fault of the taxpayer. It remains to be seen whether HMRC would reimburse tax in these cases, or keep the windfall.

88.1.3 *Assessment of the STA*

HMRC have said that the STA "signals the beginning of the end for offshore evasion" but that is braggadocio intended for the political stage and the media. The STA is more accurately described as a skirmish in the battle between tax evaders and the state, which seems likely to continue for as long as government and human nature remain imperfect.

---

9 [2011] STI 2651.

10 "Ministers and HMRC have publicly stated that the agreement should yield £4 to 7 billion. We have not yet certified this costing formally, but our initial discussions with HMRC suggest there are significant uncertainties, especially regarding the amount of UK funds in Switzerland and the assumed level of compliance. We currently judge that the yield from the agreement is likely to be towards the lower end of the range." *http://cdn.budgetresponsibility.independent.gov.uk/EFO-speaking-note-Nov-2011.pdf*

11 The Liechtenstein disclosure facility was published in 2009, and 876 registrations were received by 30 September 2010: Hansard 2 November 2010 *http://www.publications.parliament.uk/pa/cm201011/cmgeneral/deleg4/101102/101102s01.htm*

12 *http://www.hmrc.gov.uk/tiin/tiin714.pdf*

88.2 EU law compliance

The dispute with the EU seems to have settled with the amending protocol of 20 March 2012. The press has reported that the EU now accept that the revised agreements are EU law compliant, though I have not seen an EU press release to that effect.

88.3 Definitions

88.3.1 *Standard definitions*

Article 2 STA contains standard commonsense definitions (not set out here) for:

"Contracting State"
"Switzerland"
"United Kingdom"
"competent authority"
"United Kingdom taxpayer"
"tax year"
"Swiss anticipatory tax" (the Swiss *impôt anticipé*)

88.3.2 *"Swiss paying agent"*

Article 2 (e) STA provides:

> "Swiss paying agent" means
> [i] banks under the Swiss Banking Act of 8 November 1934,
> [ii] securities dealers under the Swiss Stock Exchange Act of 24 March 1995 and
> [iii] natural and legal persons resident or established in Switzerland, partnerships and permanent establishments of foreign companies, which accept, hold, invest or transfer assets of third parties or merely make payments of income or gains for third parties or secure such payments in the normal course of their business.

This is very similar to the definition in article 6 of the Swiss/EU Savings Tax Agreement 2004. The article continues:

> Notwithstanding the foregoing, for the purposes of Part 3, a person is not considered to be a Swiss paying agent solely because that person pays out dividends and interest directly to its shareholders or creditors, provided that the total amount of these payments does not exceed CHF 1 million per year;

88.3.3 *"Relevant assets"*

Article 2(1)(f) STA provides:

> "relevant assets" means all forms of bankable assets booked or deposited with a Swiss paying agent including, but not limited to, the following:
> [a] cash accounts and precious metals accounts;
> [b] bankable assets held by a Swiss paying agent acting as a fiduciary agent;
> [c] all forms of stocks, shares and securities;
> [d] options, debts and forward contracts;
> [e] other structured products traded by the banks such as certificates and convertibles.

It is hard to see what [b] is for, but it does not matter.

Article 2(1)(f) STA continues:

> The following shall not be regarded as relevant assets for the purposes of this Agreement:
> [a] contents of safe deposit boxes;
> [b] real property;
> [c] chattels;
> [d] insurance contracts which are regulated by the Swiss Financial Market Supervisory Authority, with the exception of assets held by an insurance company in an account separate from the insurance company's main accounts combined with a minimal risk protection and where the pay-out or redemption is not restricted to death, disability or illness (hereinafter referred to as **"insurance wrappers"**);

Relevant assets may not be liquid assets.

88.3.4 *"Account/deposit" and "account/deposit holder"*

Article 2 STA provides commonsense definitions:

> g) "account or deposit" means an account or deposit holding relevant assets but the terms "account" and "deposit" when used independently shall only have this meaning if the context so requires;
> I) "account holder" or "deposit holder" means a person who is the contractual partner of a Swiss paying agent regarding relevant assets;

88.3.5 *Joint account*

Article 2 STA continues:

> If a relevant person holds an interest in a collective or joint account or deposit, the entire assets are to be attributed to the relevant person, unless the Swiss paying agent can determine all the persons holding an interest in such an account or deposit. In this case, the Swiss paying agent shall allocate assets according to the number of contractual partners, unless the Swiss paying agent has been informed of, and has received appropriate documentation regarding, a different allocation. If a relevant person holds an interest in a partnership, the rules for collective or joint accounts and deposits in this subparagraph apply accordingly;

88.3.6 *"Appointed dates"*

Article 2(1)(m) STA provides:

> m) the following terms mean:
> "appointed date 1" the 31 December 2002;
> "appointed date 2" the 31 December 2010;
> "appointed date 3" the last day of the month following a period of four months after the date of entry into force of this Agreement;
> "appointed date 4" the last day of the month following a period of five months after the date of entry into force of this Agreement;

As the STA came into force on 1 Jan 2013:
appointed date 3 is 31 May 2013
appointed date 4 is 30 June 2013.

88.3.7 *Undefined terms*

Article 2(1)(3) STA provides:

> As regards the application of this Agreement at any time by a Contracting State, any term not defined therein shall, unless the context otherwise requires, have the meaning that it has at that time under the law of that Contracting State, any meaning under the applicable tax laws of that Contracting State prevailing over a meaning given to the term under other laws of that Contracting State.

This is standard form, based on Article 3(2) OECD model convention.

88.4 "Relevant person"

This is a key term as the STA only applies to relevant persons.

There are four categories of relevant person, where the individual is:

(1) direct beneficial owner

(2) beneficial owner through a domiciliary company
(3) beneficial owner through an insurance wrapper
(4) beneficial owner through a nominee

88.4.1 *Direct beneficial owner*

The first category is straightforward. Article 2(1)(h) STA provides:

> "relevant person" means any individual resident in the United Kingdom, who:
> [i] as a contractual partner of a Swiss paying agent, is the account holder or deposit holder and beneficial owner of assets;...

That is, in short, an individual with a Swiss bank account.

88.4.2 *Beneficial owner through "domiciliary company"*

The second category is:

> "relevant person" means any individual resident in the United Kingdom, who ...
> [ii] is, in accordance with the conclusions of a Swiss paying agent drawn in line with the prevailing Swiss due diligence obligations and taking into consideration all the circumstances known to it, the beneficial owner of assets held by:
> [a] a domiciliary company (i.e. legal entities, companies, institutions, foundations, trusts, fiduciary companies and other establishments not exercising a trading or manufacturing activity or another form of commercial operations);

The drafting is drawn from the Swiss banks' code of conduct with regard to the exercise of due diligence[13] (**"the Swiss Due Diligence Code"**) article 4.

"Domiciliary company" is a technical term not found in UK domestic tax law.

It may not be a company in the ordinary English sense, and the word "domiciliary" does not seem apt. The expression is perhaps an over-literal translation of *une société de domicile*. In this book I adopt the STA terminology but with quotation marks to avoid confusion by this unusual usage.

---

13 *http://www.swissbanking.org/en/20080410-vsb-cwe.pdf.*

88.4.3 *Beneficial owner*

The key term is beneficial owner. This expression is used in several distinct senses.[14] Here the meaning is the one which applies for "the prevailing Swiss due diligence obligations". For this, see the Swiss Due Diligence Code and its commentary.[15] The question is one of Swiss law.

Article 2 STA specifies two cases where the individual is not the beneficial owner of assets held by the "domiciliary company".

The first case is where the "domiciliary company" is the beneficial owner (so by implication the individual is not). Article 2 STA provides:

> A domiciliary company in the aforementioned sense is considered to be the beneficial owner in exceptional cases if proof is provided
>
> [a] that it is itself subject to effective taxation under the general rules for direct taxation applicable under the law of its place of establishment or its place of effective management, or
>
> [b] that it is treated as non-transparent with reference to its income under United Kingdom law.

The STA FAQ provides:

> **1.4 Examples would be useful of where 'domiciliary companies' are/ are not 'subject to effective taxation'/companies treated as 'non transparent' under UK law etc**
>
> The intention is that this provision will follow the developing EUSD provisions on effective taxation.

This does not answer the question. While the EU Savings Directive does use the expression "effective taxation" it does so only in a very general context[16] and does not shed any light on its meaning.

It is suggested that the "domiciliary company" is transparent if it is within s.624 ITTOIA, or s.720 ITA. The words "in exceptional cases" seem inapt, as neither case [a] nor [b] are exceptional.

---

14 See 25.12.1 (Meaning(s) of "beneficial ownership").

15 Accessible *http://www.step.org/substance-over-form*. See Lofts, "Substance over form A" STEP Journal (October 2011) accessible *http://www.stepjournal.org*.

16 Article 1.1 provides: "The ultimate aim of the Directive is to enable savings income in the form of interest payments made in one Member State to beneficial owners who are individuals resident for tax purposes in another Member State to be made subject to effective taxation in accordance with the laws of the latter Member State."

88.4.4 *Discretionary trusts*

The second case where the individual is not beneficial owner of a "domiciliary company" is important. Article 2 STA continues:

> An individual resident in the United Kingdom is not considered to be a relevant person with regard to assets of associations of persons, asset structures, trusts or foundations, if it is not possible to ascertain the beneficial ownership of such assets, e.g. due to the discretionary nature of the arrangement.

This reflects article 43 of the Swiss Due Diligence Code:

> **43 Assets without any specific beneficial owner**
> In the case of associations of individuals or asset-holding entities and foundations where no specific individuals or entities are the beneficial owners (e.g. discretionary trusts), the contracting partner must be required to provide a written declaration that this is the case, rather than identifying the beneficial owner. ...
> Form T may be used for this declaration. ...

The commentary provides:

> Certain trusts and foundations under common law legal systems have beneficiaries but not beneficial owners. They can be treated as trusts and foundations with no specific beneficial owner. ...
> If an underlying company[17] declares that a trust is the beneficial owner, the underlying company must be identified as the contracting partner...

Protectors or beneficiaries of discretionary trusts are not regarded as beneficial owners and so are not relevant persons.

The STA is therefore aimed at evasion where individuals hold their own funds in Swiss accounts and does not apply to evasion where the individuals put their funds into trusts (or similar structures). This may have been deliberate as the tax issues raised by such trusts are much more complicated. How would clearance extend to beneficiaries and trustees? It seems unfortunate that the treaty does not offer evaders in that class the same opportunity to regularise their affairs, but there is still the Liechtenstein facility.

The position is different for revocable trusts. Article 44 Swiss Due

---

17 [Footnote original] These are companies whose shares are held in a trust/foundation and which open an account relationship for the trust or foundation at a bank.

Diligence Code provides:

> For revocable vehicles (such as revocable trusts), those authorised to issue such revocation must be listed as the beneficial owners.

In practice I think revocable trusts are rarely used.

It is not clear whether HMRC realise this. The STA FAQ provides:

> **1.5 Are discretionary trusts covered?**
> Discretionary trusts are not excluded from the terms of the Agreement. Any beneficiary of a discretionary trust who receives a payment or other benefit from a trust account could be a relevant person for the purpose of the Agreement.

This is wrong.

88.4.5 *Beneficial owner through insurance wrapper*

The third category of relevant person is:

> "relevant person" means any individual resident in the United Kingdom, who ...
>
> [ii] is, in accordance with the conclusions of a Swiss paying agent drawn in line with the prevailing Swiss due diligence obligations and taking into consideration all the circumstances known to it, the beneficial owner of assets held by:...
>
> [b] an insurance company in an insurance wrapper;...
>
> The beneficial owner of an insurance wrapper is not considered a relevant person, where the insurance company confirms to the Swiss paying agent that it will deliver the appropriate certification to the competent authority of the United Kingdom.

"Insurance wrapper" is defined in article 2 STA: see 88.3.3 ("Relevant assets").

88.4.6 *Beneficial owner through nominee*

The fourth category of relevant person is:

> "relevant person" means any individual resident in the United Kingdom, who ...
>
> [ii] is, in accordance with the conclusions of a Swiss paying agent drawn in line with the prevailing Swiss due diligence obligations and taking into consideration all the circumstances known to it, the beneficial owner of assets held by:...
>
> [c] another individual by means of an account or a deposit with

a Swiss paying agent.

This would apply where the account is in the name of a nominee.

Article 2 STA provides:

> Where a Swiss paying agent has information suggesting that the individual
>
> [i] who receives a payment of income or gains in accordance with Article 19 paragraphs 1 and 2 [ie subject to SRT withholding] or
>
> [ii] for whom such a payment is secured
>
> is not the relevant person, that agent shall take reasonable steps to establish the identity of the relevant person. If the Swiss paying agent is unable to identify the relevant person, that agent shall treat the individual in question as the relevant person.

88.4.7 *Exclusion for certain agents*

Article 2 STA continues:

> For the purposes of Part 3, an individual is not considered a relevant person, if he or she:
>
> – acts as a Swiss paying agent; or
>
> – acts on behalf of a legal entity, an investment fund or a comparable investment scheme; or
>
> – acts on behalf of a relevant person who discloses to the Swiss paying agent his or her identity and State or jurisdiction of residence.

88.4.8 *Meaning of "residence"*

A person must be resident in the UK in order to qualify as a relevant person. The word "resident" has a variety of meanings.[18] It is necessary to ascertain the meaning of residence in this context and to determine whether individuals are UK resident within that meaning.

Article 3 STA provides:

> **Art. 3 Identity and residence of relevant persons**
>
> 1. [a] In order to establish the identity and residence of relevant persons the Swiss paying agent shall keep a record of the name, first name, birth date, address and residence details in accordance with the prevailing Swiss due diligence obligations in place when establishing business relationships.
>
> [b] Within this framework, individuals who have their principle [*sic*]

18 See 6.1 (Treaty-Residence - Introduction).

> private address in the United Kingdom based on the due diligence records of the Swiss paying agent are deemed resident in the United Kingdom for the purposes of this Agreement.
>
> 2. For contractual relations entered into, or transactions carried out in the absence of contractual relations, on or after the date of entry into force of this Agreement [1 January 2013], for individuals presenting a passport issued by the United Kingdom who declare themselves to be resident in a State or jurisdiction other than Switzerland or the United Kingdom, residence shall be established by means of a tax residence certificate issued by the competent authority of the State or jurisdiction in which the individual claims to be resident. Failing the presentation of such a certificate, the United Kingdom shall be considered the state of residence.

What is the position for pre-STA arrangements? The original STA provided:

> *For contractual relations entered into, or transactions carried out in the absence of contractual relations, before the date of entry into force of this Agreement, an identical procedure applies as of 1 January 2004 under the Agreement on the Taxation of Savings.*

This has been deleted by the amending protocol of March 2012.

These are rough and ready rules under which a person who is UK resident for UK tax law purposes may be categorised as non-resident, and vice versa; but in most cases they will give the right answer, and they deal with the problems inherent in the current absence of a definition of residence in UK tax law.

88.4.9 *Date of establishing residence*

Article 3 STA provides:

> 3. For the purposes of Part 2, residence shall be determined as at appointed date 2 [31 December 2010].

Thus the following persons do not qualify for the STA one-off payment facility:

(1) An individual who is non-UK resident on 31/12/2010 even if they have tax liabilities from earlier years.
(2) Personal representatives of an individual who died before 31 December 2010 even though even if the estate has tax liabilities from earlier years.

I wonder if that was deliberate. The rule does simplify matters.

88.5 "Non-UK domiciled"

88.5.1 *Non-UK domiciled individual*

Article 2(1)(j) offers separate definitions for the purposes of parts 2 and 3 STA:

> j) "non-UK domiciled individual" means:
> (i) for the purposes of Part 2 only, a person who
> [A] was not domiciled anywhere within the United Kingdom on appointed date 2 [31 December 2010] and
> [B] claimed the remittance basis of taxation for the tax year ending on 5 April 2011 or for the tax year ending on 5 April 2012 ...

That is, for part 2, a non-UK domiciled individual must be a remittance basis taxpayer in 2010/11 or 2011/12. An individual who did not claim the remittance basis in 2010/11 must do so in 2011/12. If a tax return has been made without a claim, an amended return to include the claim is possible until 31 January 2013: s.9A TMA 1970.

Article 2(1)(j) STA continues:

> j) "non-UK domiciled individual" means:
> (ii) for the purposes of Part 3 only, a person who
> [A] is not domiciled anywhere within the United Kingdom and
> [B] claims the remittance basis of taxation in the United Kingdom for the relevant tax year

That is, for part 3 a non-UK domiciled individual must be a remittance basis taxpayer in the relevant tax year (from 2012/13).

The provision is looking at actual domicile, ie an individual deemed UK domiciled for IHT purposes may qualify as a non-UK domiciled individual for the purposes of the STA.

88.5.2 *Domicile certificate*

Article 4 STA provides:

> **Art. 4 Certification process for identifying non-UK domiciled individuals for the purposes of this Agreement**
> 1. A Swiss paying agent may only accept a relevant person as a non-UK domiciled individual when provided with a certificate produced by a lawyer, an accountant or a tax adviser who is a member of a relevant professional body confirming that the relevant person is not domiciled within the UK and has claimed the remittance basis of taxation for the

tax years defined in Article 2 paragraph 1 letter j).
2. The following shall be verified by the lawyer, the accountant or the tax adviser before certifying that a relevant person is a non-UK domiciled individual for the purposes of this Agreement:
a) The UK tax return for the relevant tax year contains a claim or statement to be not domiciled anywhere within the UK; and
b) if appropriate, that tax return also contains a claim for the remittance basis under Part 14 Chapter A1 Income Tax Act 2007 and the tax chargeable under section 809H Income Tax Act 2007 has been paid; and
c) to the best of their knowledge, the domicile status of the relevant person is not formally disputed by the competent authority of the UK.

I refer to this as **"a domicile certificate"**.

88.5.3 *Date for delivery of domicile certificate*

Article 4 STA provides:

3. For the purposes of Part 2, the certificate shall be provided to the Swiss paying agent by appointed date 3 [31 May 2013].
4. For the purposes of Part 3, the relevant person shall first provide by 31 March the Swiss paying agent with a declaration of intent to claim the remittance basis of taxation for the following tax year. This declaration shall then be supported by a certificate to be provided to the Swiss paying agent by 31 March following the end of the relevant tax year.
5. The relevant person shall indicate in the declaration of intent how the Swiss paying agent shall proceed where sufficient funds are not available, whether:
a) the relevant person intends to meet any shortfall within 8 weeks from 31 March following the end of the relevant tax year; or
b) the relevant person authorises the Swiss paying agent to disclose information in line with Article 22 paragraph 3.
Where the relevant person fails to opt for one of the options above, letter b) shall apply as if the relevant person has provided written authorisation to the Swiss paying agent to disclose.

88.6 Anti-abuse

Article 34 STA provides:

1. The Contracting States recognise that the relevant persons remain free to book their assets in any State or jurisdiction of their choice.
2. Swiss paying agents shall not knowingly manage or encourage the use

> of artificial arrangements whose sole or main purpose is the avoidance of taxation of the relevant persons under the provisions of this Agreement in respect of relevant assets.

There are two requirements for article 34(2) STA:
(1) The arrangements are artificial; and
(2) the sole or main purpose is the avoidance of taxation.
What constitutes "artificial" arrangements is impossible to tell. The word is generally used to indicate tax avoidance in the strict sense, as opposed to mitigation,[19] and perhaps that is the meaning here. But since the avoidance/mitigation distinction is itself difficult, that does not take us far. The Swiss authorities will be the arbiters.

It appears from article 34(1) STA that merely booking (ie holding) assets in Switzerland or elsewhere is not artificial avoidance.

Article 34(3) STA provides a sanction for Swiss paying agents who encourage artificial avoidance arrangements but the burden rests ultimately on the individual:

> 3. [a] Notwithstanding that the relevant person is the party liable to the withholding tax in accordance with Article 19 paragraph 4, where a Swiss paying agent acts contrary to paragraph 2, the Swiss paying agent shall be liable to a payment which amounts to the withholding tax avoided. The payment shall be made to the competent authority of Switzerland, which shall transfer it to the competent authority of the UK.
>
> [b] The Swiss paying agent may exercise a right of redress against any such relevant person who participated in such arrangements.

Would the right of indemnity in [b] would be litigated in Swiss or UK courts? In the future, the contracts with the Swiss paying agent will no doubt deal with this.

88.7 Exemption from remittance charge

Where payments are made under the terms of the STA, those payments are not treated as remittances for UK tax purposes.

Para 26A Sch 36 FA 2012 provides:

> (1) Income or chargeable gains of a person are to be treated as not remitted to the United Kingdom if conditions A to D are met.

---

19 See 32.17.2 (Artificial transactions and devices).

(2) Condition A is that (but for sub-paragraph (1)) the income or gains would be regarded as remitted to the United Kingdom by virtue of the bringing of money to the United Kingdom.
(3) Condition B is that the money is brought to the United Kingdom pursuant to a transfer made to HMRC in accordance with the Agreement.
(4) Condition C (which applies only if the money brought to the United Kingdom is a sum levied under Article 19(2)(b)) is that the sum was levied within the period of 45 days beginning with the day on which the amount derived from the income or gain in question was remitted as mentioned in Article 19(2)(b).
(5) Condition D is that the transfer is made in relation to a tax year in which section 809B, 809D or 809E of ITA 2007 (application of remittance basis) applies to the person.
(6) Sub-paragraph (1) does not apply in relation to money brought to the United Kingdom if or to the extent that—

(a) paragraph 18(2), or section 138(4)(a) or 140(5)(a) of TIOPA 2010, is applied in relation to it (set-off against other tax liabilities), or
(b) it is repaid or refunded by HMRC.

Para 26B sch 36 FA 2012 deals with the mixed fund rules:

26B (1) This paragraph applies if—

(a) but for paragraph 26A(1), income or chargeable gains would have been regarded as remitted to the United Kingdom by virtue of the bringing of money to the United Kingdom, and
(b) section 809Q of ITA 2007 (transfers from mixed funds) would have applied in determining the amount that would have been so remitted.

(2) The bringing of the money to the United Kingdom counts as an offshore transfer for the purposes of section 809R(4) of ITA 2007 (composition of mixed fund).

CHAPTER EIGHTY NINE

STA CLEARANCE FACILITY

89.1 Options for UK domiciliary

The STA offered two options to a UK domiciliary within its scope:
(1) one-off payment or
(2) one-off disclosure (which the STA calls "voluntary disclosure").

Article 5 STA provides:

> 1. Subject to paragraph 3 a relevant person who is not a non-UK domiciled individual and who held relevant assets with a Swiss paying agent at appointed dates 2 [31 December 2010] and 3 [31 May 2013] shall have the option
> [1] either to instruct the Swiss paying agent to make a one-off payment in respect of relevant assets in accordance with Article 9 paragraph 2[1] or
> [2] to authorise the Swiss paying agent to make a disclosure in accordance with Article 10.[2]

Thus the STA one-off payment facility only applied if (in short) the individual had a Swiss account at 31 December 2010, and an account (the same or different) in 2013. One could not opt in to the STA clearance facility by opening an account now, but one could opt out by closing it.

What if the individual did nothing? The default option is the one-off payment:

> 3. Where a relevant person fails to exercise by appointed date 3 [31 May 2013] one of the options described in paragraphs 1 and 2, then the Swiss paying agent shall levy the one-off payment in accordance with Article 9 paragraph 2.

---

1 See 89.4 (One-off payment: UK domiciliaries).
2 See 89.9 (Disclosure option).

The deadlines have now passed, but the consequences of the new rules will be worked out over the next few years so the topic is still discussed in this edition.

89.2 Options for non-UK domiciliary

The non-UK domiciliary had 4 options:
(1) Full one-off payment - capital method
(2) Full STA one-off voluntary disclosure
(3) Limited one-off payment ("self-assessment method")
(4) Opt-out
If the individual did nothing, the default option is the full one-off payment - capital method.

89.2.1 *One-off payment: capital method*

Article 5 STA provides:

> 2. Subject to paragraph 3 a relevant person who is a non-UK domiciled individual and who held relevant assets with a Swiss paying agent at appointed dates 2 [31 December 2010] and 3 [31 May 2013] shall have the following options in relation to relevant assets:
>
> a) to instruct the Swiss paying agent to make a one-off payment in accordance with Article 9 paragraph 2 (hereinafter referred to as the **"capital method"**);

This is the same as the one-off payment option for the UK domiciliary. The advantage is that it offers the full clearance.

89.2.2 *Full STA one-off voluntary disclosure*

Article 5 STA provides:

> 2. Subject to paragraph 3 a relevant person who is a non-UK domiciled individual and who held relevant assets with a Swiss paying agent at appointed dates 2 [31 December 2010] and 3 [31 May 2013] shall have the following options in relation to relevant assets...
>
> b) to authorise the Swiss paying agent to make a disclosure in accordance with Article 10;[3]

This is the same as for a UK domiciliary.

---

3 See 89.9 (STA one-off voluntary disclosure).

89.2.3 *One-off payment: self-assessment method*

The next two options are for a non-UK domiciliary only. Article 5 STA provides:

> 2. Subject to paragraph 3 a relevant person who is a non-UK domiciled individual and who held relevant assets with a Swiss paying agent at appointed dates 2 [31 December 2010] and 3 [31 May 2013] shall have the following options in relation to relevant assets...
>
> c) to disclose
>
> [i] all non-UK income and gains which have been remitted to the United Kingdom and
>
> [ii] all amounts which arose from taxable sources within the United Kingdom
>
> between appointed date 1 [31 December 2002] and the date of initialling of this Agreement [24 August 2011] and on which the full amount of UK tax has not been paid (hereinafter referred to as **"omitted taxable base"**) to the Swiss paying agent by
>
> [a] making a self-assessment of the omitted taxable base in the form prescribed and
>
> [b] to instruct the Swiss paying agent to make a one-off payment in accordance with Article 9 paragraph 3
>
> (hereinafter referred to as the **"self-assessment method"**);

Article 9(3) STA provides:

> 3. Where a non-UK domiciled individual has opted for the self-assessment method, the one-off payment shall be 34% of the omitted taxable base disclosed to the Swiss paying agent.

The advantage is that it offers a clearance to the extent of the self-assessed amount at the (relatively attractive) 34% rate.[4] The sanction for failing to self-assess correctly is that clearance is withdrawn: see 89.7.8 (Abuse of self-assessment method).

89.2.4 *Opt-out*

Article 5 STA provides:

> 2. Subject to paragraph 3 a relevant person who is a non-UK domiciled individual and who held relevant assets with a Swiss paying agent at appointed dates 2 [31 December 2010] and 3[31 May 2013] shall have

4 See 89.7.10 (Non-UK domiciled individuals on self-assessment basis).

the following options in relation to relevant assets: ...

d) to confirm to the Swiss paying agent that none of the options a) to c) in this paragraph is chosen (hereinafter referred to as the **"opt out method**").

In practice I expect properly informed non-UK domiciled individuals usually chose the opt-out.

89.3 Selecting the option

89.3.1 *Notice of option*

Article 6 STA provides:

> **Art. 6 Notification of the relevant person by Swiss paying agents**
> 1. Swiss paying agents shall within two months of the date of entry into force of this Agreement [ie by 28 Feb 2013] give notice to the holders of accounts and deposits in respect of which a relevant person has been identified about the content of this Agreement and the resulting rights and duties of relevant persons.
> 2. For relevant persons establishing a business relationship with a Swiss paying agent between the date of entry into force of this Agreement [1 January 2013] and appointed date 3 [31 May 2013], such notice shall be given at the time the contract is finalised and include a reference to the specific rights and duties provided for in Article 8 (change of bank account).

89.3.2 *Exercising the option*

Article 7 STA provides:

> **Art. 7 Rights and duties of relevant persons**
> 1. The relevant person must inform the Swiss paying agent in writing and by appointed date 3 [31 May 2013] which option described in Article 5 paragraphs 1 and 2 he or she chooses with respect to each account or deposit in existence at appointed date 3. This notification is irrevocable. Where a notification was made before the date of entry into force of this Agreement [1 January 2013], it shall become irrevocable if it has not been revoked as at that date.
> 2. The relevant person shall make sufficient funds available to the Swiss paying agent for the settlement of the one-off payment described in Article 9.
> 3. If the account holder or deposit holder is not the relevant person, the Swiss paying agent is entitled to act in accordance with the instructions and declarations of the account holder or deposit holder.

The STA FAQ provides:

> **2.2 Would it be possible for an individual with two accounts at the same bank to opt to treat each differently?**
> There is no bar in the Agreement to a person telling a paying agent to disclose one account and pay the one-off levy on another. However the accounts would need to separate accounts rather than one being the sub account of the other. Where an account is a sub-account both would be treated in the same way by the paying agent.

The view that sub-accounts constitute one single account and not two separate accounts seems odd, but perhaps it depends on what is meant by "sub-account".

89.3.3 *Late exercise of option*

Article 14 STA provides:

> **Art. 14 Failure to identify a relevant person**
> 1. In any case where
> [a] a Swiss paying agent fails to identify a relevant person and inform that person of his or her rights and duties in accordance with Article 7 and
> [b] that relevant person is subsequently identified by the Swiss Paying agent as a relevant person
> then, if the competent authorities of the Contracting States so agree, the relevant person may nonetheless exercise the option set out in Article 5 paragraphs 1 and 2 and the rights and duties set out in Article 7 shall apply until a date to be agreed by the competent authorities of the Contracting States.
> 2. Where a one-off payment is being made in accordance with Article 9,[5] a further amount shall be added to the one-off payment representing interest at the statutory rate applicable in the UK to unpaid tax debts between appointed date 3 [31 May 2013] and the date of payment. The competent authority of the UK shall inform the competent authority of Switzerland of the statutory rate applicable as at appointed date 3 [31 May 2013] and of any changes to the rate thereafter.

That would be a rare case.

89.4 One-off payment: UK domiciliaries

The following applies to UK domiciliaries and non-UK domiciliaries who

---

5 See 89.3.3 (Late exercise of option).

elect for the "capital method" (or having failed to elect, find it applies to them by default).

Article 9 STA provides:

> **Art. 9 One-off payment and clearance of tax liabilities**
> 1. Subject to Articles 8[6] and 13,[7] a Swiss paying agent shall on appointed date 3 [31 May 2013] levy a one-off payment on the relevant assets of relevant persons.
> 2. Subject to paragraph 3, the one-off payment shall be calculated in accordance with Schedule I. The applicable rate is 34%.

89.4.1 *Certificate of payment*

Article 9 STA provides:

> 4. At the time the one-off payment is levied, the Swiss paying agent shall issue a certificate in the form prescribed to the relevant person. The certificate shall be considered approved by the relevant person, if he or she does not object within 30 days of issue.

89.4.2 *Transfer of money to HMRC*

Article 9 STA deals with administration:

> 5. The Swiss paying agent shall at the time of approval of the certificates issued in accordance with paragraph 4 transfer the one-off payments previously levied to the competent authority of Switzerland. Such transfers shall take place monthly starting one month after appointed date 3 [31 May 2013] with the last payment 12 months after appointed date 3.
> Subject to Article 35,[8] the competent authority of Switzerland shall transfer the payments to the competent authority of the UK in monthly instalments starting two months after appointed date 3 with the last instalment 13 months after appointed date 3.
> One-off payments which are levied at a later date in exceptional circumstances, e.g. due to legal proceedings, shall be transferred without delay by the Swiss paying agent to the competent authority of Switzerland, which shall transfer them without delay to the competent

---

6 See 89.8.5 (Change of bank account).

7 See 89.7 (Cases where clearance not allowed).

8 Art. 35 provides: **"Expense allowance**
The competent authority of Switzerland shall deduct an expense allowance of 0.1% from amounts transferred to the competent authority of the United Kingdom in accordance with this Agreement."

authority of the UK.

6. The one-off payments in accordance with paragraphs 2 and 3 shall be calculated, levied and transferred to the competent authority of Switzerland by the Swiss paying agent in sterling. Where sterling is not the reference currency of the account or deposit, the Swiss paying agent shall convert the amount into sterling by using the fixed exchange rate published by the SIX Telekurs AG at the corresponding date. The competent authority of Switzerland shall transfer the payments to the competent authority of the UK in sterling.

The point is that HMRC are not told any details of individuals: thus Swiss principles of secrecy are maintained.

89.5 Computation of one-off payment

89.5.1 *The policy*

The STA FAQ provides:

> **2.9 What is the policy underlying the way the calculation of the formula is set?**
> The aim of the formula is to take into account the speed of growth in the account balances, so that the faster the assets accumulate, the higher the rate that is charged. The effective tax rate is positively dependant on the growth in capital and the level of the final capital in the account (which captures deemed interest). The formula also takes account of the length of time the account has been open.

The Swiss Bankers Association Q&A states that the effective tax rate for bank clients is likely to be between 20% and 25% of total assets.[9]

89.5.2 *Defined terms*

The formula uses the following terms:

T [**T**ax] = One-off payment
tr [**T**ax **R**ate] = 34%
tr(min) [Minimum **T**ax **R**ate] = 19%

n = **N**umber of years of the bank relationship before 31 December 2010
$0 \leq n \leq 8$ [ie, regardless of the number, N cannot exceed 8]

---

9 *http://www.swissbanking.org/en/20111102-5000-masterdoku-einigung_uk_final-cfr.pdf*

C_b [**C**apital **b**ase?] = Capital stock at the end of the year the account was opened. For accounts opened before 1 January 2003, the capital stock at 31 December 2002.

Capital stock means the bank balance or the market value of the relevant assets.

C_i Capital stock at the end of year *i*
i Year *i*, $1 \leq i \leq 10$, whereby year 1 starts on 1 January 2003
That is, *i* may be between 1 and 10 for the years 2003-2012.
For example:
C_8 Capital stock at the end of year 8 (31 December 2010)
C_{10} Capital stock at the end of year 10 (31 December 2012)

Outflows: Inflows years 9 and 10 that compensate for outflows years 1 to 8

The STA FAQ provides:

> **2.8 What is definition of outflow for the purposes of Schedule 1? What is definition of inflow?**
> 'Outflows' are sums which were taken out of the account between 31 December 2002 and 31 December 2010. 'Inflows' are amounts which go into the same account between 1 January 2011 and 31 December 2012 which the relevant person can evidence to the Swiss paying agent equate to the outflows.

r Notional **R**ate of return = 3%.

89.5.3 C_r

The first step is to ascertain C_r.
This presumably stands for **R**elevant **C**apital but that label does not tell us much.
There are 3 possibilities. The first two are easy:

$C_r = C_8$ if $C_{10} < C_8$
That is, if C_{10} is smaller than C_8, then C_r equals C_8

$C_r = C_{10}$ if $C_8 \leq C_{10} \leq 1.2 \times C_8$
That is, if C_{10} is equal or greater than C_8 and equal or smaller than $1.2 \times C_8$, then C_r equals C_{10}

89.5.4 *Formula for C_r if C_{10} is greater than 1.2 × C_8*

The last possibility applies where C_{10} is greater than 1.2 × C_8

In this case C_r is the higher of 1.2 × C_8 and a formula:

$$\sum_{i=9}^{i=10} \text{value increases} + \sum_{i=1}^{i=8} \text{outflows}$$

I take this to mean the sum of the following nine items:

Value increase year 9
Value increase year 10
Outflow year 1
Outflow year 2
Outflow year 3
Outflow year 4
Outflow year 5
Outflow year 6
Outflow year 7
Outflow year 8

Article 9(12)(c) STA summarises the rule:

> 12. ... if C_{10} is greater than 1.2 × C_8, then C_r equals the higher of
> – 1.2 × C_8; or
> – C_8, plus the sum of the following:
> (i) inflows of capital between appointed date 2 [31 December 2010] and the date of entry into force of this Agreement [1 January 2013] which offset outflows between appointed dates 1 and 2 [31 December 2002 and 31 December 2010]; and
> (ii) increases between appointed date 2 [31 December 2010] and the date of entry into force of this Agreement [1 January 2013] in the value of relevant assets as at appointed date 2 (increases in value are income and gains as defined in Article 19 paragraph 1 and unrealised capital gains),
> if the relevant person provides the Swiss paying agent with all necessary documentation to enable it to apply the calculation in subparagraphs (i) and (ii) above by appointed date 3 [31 May 2013].

89.5.5 *Amount of one-off payment*

Once one has ascertained C_r one can move on to ascertain the amount of the STA one-off payment.

This is the higher of two amounts.

The first amount is straightforward – once one has ascertained C_r It is tr(min) × C_r that is, 19% of C_r

The second is the full tax rate (34%) applied to the sum of three elements.

The first element is 2/3 of:
C_r – (n/8 × C_b)
If the first element is negative (C_r less than C_b) then this element is taken as zero.

The second element is 1/3 of: n/10 × C_r
ie n/30 × C_r

The third element is 1/3 of: 1/10 × (C_9' and C_{10}')

This is computed as follows:

$C_9' = C_r + C_r \times r = 1.03 \times C_r$

$C_{10}' = C_r + C_r \times 2r = 1.06 \times C_r$

The STA explains C_9' as "Nominal capital at the end of year 9 (31 December 2011), resp. year 10 (31 December 2012)" .

89.5.6 *HMRC examples*

The STA FAQ gives two examples.
Example 1 is a case where C_{10} is greater than C_8, but less than 1.2 × C_8

> Swiss franc account opened in 1993 (so n = 8), cash amounts have been deposited in the account over the years and interest is credited each year.
>
> Balance 31 December 2002 (C_b) = CHF1m
> Balance 31 December 2010 (C_8) = CHF2m
> Balance 31 December 2012 (C_{10}) = CHF2.1m
>
> First calculate C_r. In this case C_{10} is greater than C_8, but less than 1.2 × C_8, so C_r = C_{10} = CHF2.1m
>
> Second calculate C_9' and C_{10}'.
> $C_9' = C_r \times 103\%$ = CHF2,163,000 and
> $C_{10}' = C_r \times 106\%$ = CHF2,226,000.
> So ½ × (C_9' + C_{10}') = CHF2,194,500
>
> T = 34% × CHF [2/3 × (2,100,000 – 1,000,000) + 1/3 × ((8/10 × 2,100,000) + 2/10 × 2,194,500)]
>
> = 34% × CHF [733,333 + 706300] = CHF489,475

Finally, check that this sum is greater than the minimum T of 19% × C_r (CHF399,000)

It is, so the one-off payment is CHF489,475 that is approximately 23.3% of the December 2012 balance.

Assuming the one-off payment is made in full, as the C_{10} amount is not more than 20 per cent greater than the amount in the account at C_8, the funds in the account at 31 December 12 are 'cleared' (see Article 9(7) STA) - subject to the exclusions in Article 9(13) STA.

The second example is one where C_{10} is less than C_8

Sterling account opened in 2007 (so n = 3), deposits in 2008 to 2011 and a large withdrawal in 2012.

Balance at 31 December 2007 (C_b) = £200,000
Balance at 31 December 2010 (C_8) = £1,000,000
Balance at 31 December 2012 (C_{10}) = £500,000

First calculate C_r. In this case C_{10} is less than C_8, so $C_r = C_8$ = £1,000,000

Second calculate C_9' and C_{10}'.
$C_9' = C_r \times 103\% = 1{,}030{,}000$
$C_{10}' = C_r \times 106\% = £1{,}060{,}000$
So ½ × (C_9' + C_{10}') = £1,045,000

T = 34% × £[2/3 × (1,000,000 – 3/8 × 200,000) + 1/3 × (3/10 × 1,000,000 + 2/10 × 1,045,000)]

= 34% × £[616667 + 169667] = £267,353

Finally, check that this sum is greater than the minimum T of 19% × C_r (£190,000)

It is, so the one-off payment is £267,353 that is approximately 26.7 per cent of the December 2010 balance. Assuming the one-off payment is made, the funds in the account at 31 December 2010 (£1,000,000) are 'cleared' (see Article 9(7)) subject to the exclusions in Article 9(13).

The STA FAQ does not give an example of the third category of case, where C_{10} is greater than 1.2 × C_8. Perhaps the author of the FAQ found the formula too difficult.

Further examples are found in INTM820511.

89.6 Clearance of UK tax liability

Article 9 STA provides:

> 7. [a] Subject to paragraph 12, following approval of the certificate issued under paragraph 4 the relevant person shall cease to have any liability to the UK taxes listed in paragraph 10 for the taxable periods or charges to tax referred to in paragraph 11, in relation to the relevant assets concerning which the one-off payment has been made.
>
> [b] This clearance shall also include without limitation interest, penalties and surcharges that may be chargeable in relation to those tax liabilities.
>
> [c] The relevant person shall also cease to have any liability to the UK taxes listed in paragraph 10 in relation to liabilities which arise from the estate of a deceased person in respect of relevant assets concerning which the one-off payment has been made.
>
> 8. The clearance of the tax liability described in paragraph 7 shall also apply to individuals who are jointly or severally liable....

I adopt the terminology of the STA and refer to this as **"clearance"**.

I do not understand what [c] is referring to, but if it is otiose it does no harm. Perhaps it was relevant to the (now abandoned) German STA.

89.6.1 *Taxes to which clearance applies*

Article 9(10) STA provides:

> 10. The United Kingdom taxes for which the clearance described in paragraph 7 shall apply are those listed in paragraph 63(1)(a), (b), (d) and (f) of Schedule 36 Finance Act 2008, but excluding liabilities to any or all of these taxes that have been transferred to a relevant person

The relevant provisions of para 63(1) Sch 36 FA 2008 are:

(a) income tax
(b) capital gains tax
(d) VAT
(f) inheritance tax

I do not understand what the exclusion refer to. (I also do not understand the reason for the convoluted drafting by reference, but that does not matter.)

National Insurance Contributions are not in the list, which could in principle be important. Clearance does not extend to third parties, such as a close company's liability on making a loan to participators, or an employer's NIC liabilities. Whether an employer's PAYE liabilities qualify for clearance would require further research.

Article 9(15) STA provides:

> Nothing in this Article has any bearing on the calculation of the basis for the collection of own resources accruing from value added tax according to Council Regulation 1553/89/EC

89.6.2 *Period for which clearance applies*

Article 9(11) STA provides:

> Paragraph 7 shall apply to liabilities to the UK taxes listed in paragraph 10 concerning:
>
> a) taxable periods ending before the date of entry into force of this Agreement [1 January 2013]; and
> b) in the case of taxable periods commencing before the date of entry into force of this Agreement but ending on or after the date of entry into force of this Agreement, income arising and gains realised before the date of entry into force of this Agreement; and
> c) where there is no taxable period, charges to tax arising before the date of entry into force of this Agreement.

In short, clearance applies up to the date of the STA.

HMRC say:

> **The Swiss Agreement and Inheritance Tax accounts**
>
> HMRC Trusts & Estates is aware of some instances where the beneficiaries or executors of an estate have paid the 'one-off charge' under the 2011 Tax Agreement between the UK and Switzerland. The payment satisfies historic tax liabilities in respect of assets held in Switzerland. If you have made such a payment, you will have received a clearance certificate from the relevant Swiss bank confirming you cease to have any further liability for, amongst other taxes, Inheritance Tax in relation to the assets detailed on the certificate for charges arising before 1 January 2013.
>
> However, the Swiss asset still forms part of the deceased's estate and may affect the Inheritance Tax that is payable on any other assets in the free estate and any aggregable fund, for example, settled property. It is clear from the cases we have seen, and from some comments on internet forums, that the consequences of making the 'one-off' payment are not fully recognised.
>
> If the Swiss asset was not declared in the IHT400 or IHT205, and either the nil rate band was already exceeded or the additional Swiss asset (for which a clearance certificate is now held) means that the nil rate band is now exceeded, then you must tell HMRC Trusts & Estates about the

> Swiss assets. Whilst the IHT attributable to the Swiss assets is covered by the 'one-off' charge, the tax payable in respect of the Free Estate or other aggregable property remains payable. Please also provide a copy of the clearance certificate from the Swiss bank.[10]

89.6.3 *Extent of clearance*

Article 9(12) STA provides:

> 12. The amount in the account or deposit cleared in accordance with paragraph 7 as of the date of the entry into force of this Agreement [1 January 2013] is equal to C_r as defined in Schedule I. ...

The article continues with an anti-avoidance rule:

> However, to the extent that
> [1] inflows of capital come directly or indirectly from the UK and
> [2] left the UK between the date of signature [6 October 2011] and the date of entry into force of this Agreement,
> the part of the one-off payment paid in respect of those inflows of capital shall be treated by the competent authority of the UK as a payment on account of UK taxes or other liabilities (including without limitation interest, penalties and surcharges) of that person in respect of those inflows of capital.

Thus adding to the Swiss account from the UK after 6/10/11 would not give a tax advantage. However it is accepted that additions to the account from outside the UK would do so.

89.7 Cases where clearance not allowed

There are about a dozen cases where clearance is not allowed.

89.7.1 *Current investigation*

Article 9(13) STA provides:

> 13. Paragraph 7 shall not apply:
> a) where, as at appointed date 3 [31 May 2013], the tax affairs of a relevant person with relevant assets are under investigation, unless prior to this investigation being commenced, a Swiss paying agent has been instructed by the relevant person to make a one-off payment in relation to those relevant assets in accordance with this Article.

---

10 HMRC, Trusts & Estates Newsletter, April 2014.

Article 2(1)(n) STA defines "investigation:"

> n) "investigation" means:
>
> (i) any criminal investigation conducted by the competent authority of the UK relating
>
> [A] to those functions for which HMRC are responsible as set out in the Commissioners for Revenue and Customs Act 2005 and
>
> [B] to any money laundering offence within Part 7 of the Proceeds of Crime Act 2002 which is associated with those functions;
>
> or
>
> (ii) any civil enquiry of any kind that is supported by statutory information powers and is carried out for the purpose of ascertaining whether the UK tax liabilities of the relevant person are correct and up to date; or
>
> (iii) any coordinated, project-based enquiries by the competent authority of the UK into multiple identified taxpayers stemming from specific third party information;

An individual may not know that he or she is under investigation. HMRC say:

> HMRC will shortly begin writing to UK residents and organisations holding Swiss bank accounts with the HSBC in Geneva who may not have reported all their income and gains to HMRC.
>
> The department is acting on information received last year under a tax treaty. This revealed that more than 6,000 individuals, companies, trusts and other bodies held accounts and investments with HSBC Geneva.[11]

These enquiries would seem to fall within paragraph (iii) so no-one holding an HSBC account in Geneva would qualify for clearance.[12]

The STA FAQ provides:

> **1.8 In the definition of investigation, what does 'supported' by statutory information powers mean?**

---

11 Press release NAT 81/11 (13 October 2011).

12 For a review of these enquiries as at 12 September 2011, see Evidence to House of Commons Treasury Committee *http://www.publications.parliament.uk/pa/cm201012/cmselect/cmtreasy/uc1371-iii/uc137101.htm* It was said that all those concerned will receive letters from HMRC within 6 to 9 months of that date..

It means that the enquiry/investigation needs to be one where HMRC could, if required, invoke its statutory powers, for example Schedule 36 FA 2008 to obtain information.

1.9 What was policy behind this definition of investigation at Article 2(1)(m)(iii)?

The ways in which HMRC undertakes enquiries into tax positions is changing. An example of the type of investigation covered by this definition is the approach announced in respect of clients of HSBC Switzerland.

89.7.2 *Concluded investigation without full disclosure by taxpayer*

Article 9(13) STA continues:

13. Paragraph 7 shall not apply...
    b) where the relevant person was the subject of an investigation in the UK which has been concluded before appointed date 3 [31 May 2013]; and:
        (i) in the case of a criminal investigation this led to a conviction for offences which were punishable in the UK by two years or more imprisonment; or
        (ii) in the case of a civil investigation concluded after appointed date 1 [31 December 2002]:
            – HMRC determined that the prevailing guidance issued by the competent authority of the UK at the time warranted the completion of a Certificate of Full Disclosure or a Statement of Assets and Liabilities, or a civil penalty was chargeable under the Customs and Excise Management Act 1979; or
            – the investigation was carried out for the purpose of ascertaining the correct UK tax liability of the relevant person in relation to any assets or interest of the relevant person in Switzerland,

        and the relevant person did not declare an interest in relevant assets in Switzerland held before or during the investigation.

Where the relevant person fully disclosed any relevant assets held at the time of the investigation this letter [ie this paragraph (b)] shall not apply to payments of withholding tax under Part 3;

89.7.3 *Use of other disclosure facilities*

Article 9(13) STA continues:

13. Paragraph 7 shall not apply...
    c) where, at any time before appointed date 3 [31 May 2013], the

relevant person or their authorised representative has engaged with, participated in or been contacted personally by the UK competent authority in respect of any publicised UK disclosure facility, unless prior to this engagement, participation or contact, a Swiss paying agent has been instructed by the relevant person to make a one-off payment in relation to those relevant assets in accordance with this Article;

Article 2(1)(o) STA defines "disclosure facilities":

o) "UK disclosure facility" means any facility or campaign offered by the competent authority of the UK under which any individual liable to tax in the UK is or was able to regularise his or her UK tax position;

89.7.4 *Proceeds of non-tax crime*

Article 9(13) STA continues:

13. Paragraph 7 shall not apply...
d) where the relevant assets represent or are derived from (whether directly or indirectly) the proceeds of crime other than crime connected to non compliance with the tax legislation of the UK;

Clearance seems of academic interest since the proceeds of crime are in any event subject to confiscation.

89.7.5 *Systemic tax fraud*

Article 9(13) STA continues:

13. Paragraph 7 shall not apply...
e) where the relevant assets represent or are derived from (whether directly or indirectly) the proceeds of criminal attacks and systemic fraud against the tax and benefits regimes of the UK, including but not limited to cases where the UK authorities make payments to persons to which they are not entitled.

Examples are:
VAT Missing Trader Intra-Community Fraud
VAT Bogus registration repayment fraud
Organised Tax Credit fraud

89.7.6 *Credit where clearance does not apply*

Article 9(13) STA concludes:

In any of the above circumstances any one-off payment shall be treated

> by the competent authority of the UK as a payment on account of UK taxes or other liabilities (including without limitation interest, penalties and surcharges) of that person in respect of the relevant assets.

Article 9(14) STA provides:

> An individual will not be entitled to credit the one-off payment against any individual assessment in respect of the taxable periods or charges to tax referred to in paragraph 11.

Perhaps this means that the credit is set against all periods pro rata, not against any particular period. That may be important for computing interest on unpaid tax.

89.7.7 *Non-UK domiciled individuals opt-out*

Article 11 STA provides:

> **Art. 11 Opt-out for non-UK domiciled individuals**
> 1. Where relevant persons who are non-UK domiciled individuals have chosen the opt out method, Article 9 paragraphs 7 and 9 [clearance] shall not apply.
> 2. Swiss paying agents shall issue a certificate in the form prescribed to the relevant person.

89.7.8 *Abuse of self-assessment method*

Article 12 STA provides:

> **Art. 12 Wrongful behaviour in relation to non-UK domiciled status**
> 1. Clearance as described in Article 9 paragraphs 7 and 9 shall not be provided where a relevant person has:
> a) falsely declared that he or she is a non-UK domiciled individual; or
> b) elected for the self-assessment method to be applied when there are outstanding tax liabilities in respect of relevant assets which were not declared in the self-assessment.
> 2. Where paragraph 1 applies, the one-off payment shall be treated by the competent authority of the UK as a payment on account of UK taxes or other liabilities (including without limitation interest, penalties and surcharges) of that person.

89.7.9 *Failure to pay correct amount*

Failure to pay the correct one-off payment normally loses the benefit of clearance: see 89.8.2 (Failure to assess correct amount).

89.7.10 *Non-UK domiciled individuals on self-assessment basis*

Article 9 STA provides:

> 9. In the case of relevant persons who are non-UK domiciled individuals:
>
> a) if the capital method is applied, then the provisions of paragraph 7 [clearance] apply and future payments from the amount representing those funds as at the date following the date that the capital method is applied shall not generate a further tax liability in the UK;
>
> b) if the self-assessment method is applied, then the provisions of paragraph 7 [clearance] apply only to the income, gains and amounts disclosed in the self-assessment to the Swiss paying agent.

89.8 Procedure for making the one-off payment

89.8.1 *Insufficient funds*

Normally the one-off payment would be deducted from the account. Difficulties arise if the assets of the account are illiquid, or if funds have been withdrawn leaving insufficient to pay. Article 13 STA provides:

> **Art. 13 Insufficient funds**
>
> 1. [a] Where the relevant person informs in writing the Swiss paying agent that he or she opts for the one-off payment as described in Article 9, or the one-off payment is levied by default under Article 5 paragraph 3, but insufficient funds have been made available by the relevant person to the Swiss paying agent by appointed date 3 [31 May 2013], the Swiss paying agent shall grant the relevant person in writing an extension of up to eight weeks from appointed date 3 in order to secure the one-off payment.
>
> [b] Where Article 8 paragraph 2 applies, [transfer of accounts] but insufficient funds have been made available, the Swiss paying agent shall grant an extension of up to eight weeks from the date it levied the one-off payment.
>
> [c] The notice given by the Swiss paying agent shall include a reference to the possible consequences for the relevant person provided for in paragraph 3.
>
> 2. Where an extension is granted in accordance with paragraph 1, the Swiss paying agent shall levy the one-off payment on the day the extension ends.
>
> 3. Where the relevant person holds relevant assets with a Swiss paying

agent at appointed date 3 and the one-off payment cannot be levied owing to insufficient funds, the Swiss paying agent shall disclose the identity of the relevant person in accordance with Article 10 as if the relevant person had provided written authorisation to the Swiss paying agent to disclose.

89.8.2 *Failure to assess correct amount*

Article 15 STA provides:

> **Art. 15 Partially or wrongly levied one-off payment**
> 1. Where the Swiss paying agent does not levy the one-off payment in full owing to errors in calculation or execution, the Swiss paying agent may levy the missing amount from the relevant person. A further amount representing interest shall be added in accordance with Article 14 paragraph 2. The Swiss paying agent shall remain bound towards the competent authority of Switzerland to make the one-off payment in its entirety. The same shall apply to the interest charged. Subject to Article 34, the competent authority of Switzerland shall transfer without delay the received one-off payment and interest to the competent authority of the UK.
> 2. Clearance under Article 9 paragraphs 7 and 9 shall not be removed in cases falling under paragraph 1, if the relevant person has taken reasonable care in checking the certificate issued by the Swiss paying agent in accordance with Article 9 paragraph 4 and the missing amount was paid upon identification of the error in calculation or execution.
> 3. Where the one-off payment in accordance with Article 9 has been wrongly levied by the Swiss paying agent, the competent authority of the UK shall, on receipt of appropriate evidence, refund the one-off payment including interest less the expense allowance.

Article 34(3) STA also considers double payments:

> ... There are no circumstances in which the UK should retain amounts paid twice in respect of relevant assets. Where amounts have been paid twice, the competent authority of the UK shall refund the overpayment to the competent authority of Switzerland.
> 4. Paragraph 3 shall apply only in individual cases when clear, direct evidence is presented.

89.8.3 *Verification of agent's computations*

Article 16 STA provides:

> **Art. 16 Effect of the certificates**
> Where, for reasons other than the implementation of this Agreement, the

competent authority of the UK becomes aware of relevant assets, the competent authority of the UK may ask the relevant person to provide evidence that these assets were subject to the one-off payment in accordance with Article 9 or disclosed in accordance with Article 10. A valid certificate issued by the Swiss paying agent in accordance with Article 9 paragraph 4 or Article 10 paragraph 3 shall be considered sufficient evidence. Where the validity of a certificate is doubtful, the competent authority of the UK may ask the competent authority of Switzerland to verify its validity.

89.8.4 *Upfront Payment*

Article 17 STA provides:

Art. 17 Upfront payment by Swiss paying agents
1. Swiss paying agents shall within 20 days of the date of entry into force of this Agreement form an implementation vehicle which shall manage on their behalf all rights and obligations arising under this Article and act as a pooling and clearing institution.
2. Swiss paying agents shall make an upfront payment of CHF 500 million to the competent authority of Switzerland within 25 days of the date of entry into force of this Agreement. The competent authority of Switzerland shall transfer the amount of the upfront payment to the competent authority of the UK within one month of the date of entry into force of this Agreement.
3. Once the upfront payment made to the competent authority of the UK in accordance with paragraph 2 and the payments transferred to the competent authority of the UK in accordance with Article 9 paragraph 5 [one-off payments] reach the amount of CHF 1300 million, the competent authority of Switzerland shall offset the further payments under Article 9 paragraph 5 against the upfront payment according to paragraph 2. After complete offsetting of the upfront payment, further payments under Article 9 paragraph 5 shall be transferred to the competent authority of the UK. The above payments shall be converted on the date of offsetting by using the fixed exchange rate published by the SIX Telekurs AG.
4. The competent authority of Switzerland shall at the end of each month transfer to the implementation vehicle the payments by Swiss paying agents under Article 9 paragraph 5 offset with the upfront payment in accordance with paragraph 3.

The Swiss Bankers Association Q&A states, as one might expect, that the banks agreed among themselves how to share the upfront payment. The allocation was based on the size of the business with affected clients at 31

December 2010. As a quid quo pro of the STA, Swiss banks can operate in the British market under easier conditions, so it may perhaps be money well spent even if it were not directly recovered from account holders.[13]

89.8.5 *Change of bank account*

Article 8 STA provides:

> **Art. 8 Establishment of new business relationships**
> 1. Relevant persons establishing a business relationship with a Swiss paying agent between appointed date 2 [31 December 2010] and appointed date 3 [31 May 2013] shall provide the Swiss paying agent by appointed date 4 [30 June 2013] with a written confirmation stating whether:
>
> a) these relevant assets were booked with another Swiss paying agent as of appointed date 2; and
> b) the business relationship with that Swiss paying agent was ongoing as of appointed date 3.
>
> 2. Where the relevant assets referred to in the written confirmation provided in accordance with paragraph 1 were booked with a Swiss paying agent on appointed date 2 and the relevant person terminated the business relationship with that Swiss paying agent before appointed date 3, the new Swiss paying agent shall apply the measures in this Part. Each previous Swiss paying agent shall cooperate with the new Swiss paying agent when so requested. By appointed date 4 [30 June 2013] the relevant person shall:
>
> a) notify the new Swiss paying agent in accordance with Article 7 paragraph 1; and
> b) instruct in writing the new Swiss paying agent to request from each previous Swiss paying agent all necessary information for the application of the option chosen in accordance with Article 7 paragraph 1; and
> c) instruct in writing each previous Swiss paying agent to transfer on request to the new Swiss paying agent all necessary information for the application of the option chosen in accordance with Article 7 paragraph 1.
>
> 3. Where the relevant assets referred to in the written confirmation provided in accordance with paragraph 1 were booked with a Swiss paying agent on appointed date 2 and there is a continuing business relationship with that Swiss paying agent at appointed date 3, the new

13 *http://www.swissbanking.org/en/20111102-5000-masterdoku-einigung_uk_final-cfr.pdf*

Swiss paying agent shall not apply any further measures provided for in this Part on the relevant assets of the relevant person booked with it.
4. Where the relevant assets referred to in the written confirmation provided in accordance with paragraph 1 were not booked with a Swiss paying agent on appointed date 2, the new Swiss paying agent shall not apply any further measures provided for in this Part on the relevant assets of the relevant person booked with it.
5. If the relevant person does not comply with the duties provided for in paragraphs 1 to 4, the new Swiss paying agent shall disclose the available information in accordance with Article 10 as if the relevant person had provided written authorisation to the Swiss paying agent to disclose.

89.9 STA one-off voluntary disclosure

There are (at least) five types of disclosure relevant to our topic, and it is helpful to have terminology to distinguish them. I coin the following terminology:
"STA one-off voluntary disclosure" is disclosure under article 10, discussed in this paragraph.
"STA annual voluntary disclosure" is the disclosure to avoid the annual STA withholding tax.[14]
"**Self-disclosure"** means other forms of self-disclosure to HMRC (such as the Liechtenstein disclosure facility).
"STA government disclosure" is disclosure of information by the Swiss government under the STA.[15]
"DTA disclosure" is disclosure under the UK/Swiss DTA.[16]
Article 10 STA provides:

Art. 10 Voluntary disclosure
1. Where written authorisation by the relevant person has been given to disclose in accordance with Article 7 paragraph 1 the Swiss paying agent shall transfer the following information to the competent authority of Switzerland on a monthly basis starting one month after appointed date 3 [31 May 2013] with the last transfer six months after appointed date 3:
a) the identity (name, first name and date of birth) and address of the relevant person;

14 See 90.8 (Annual voluntary disclosure).
15 See 91.1 (Disclosure of information by Swiss authorities).
16 See 91.1.4 (DTA disclosure).

b) the UK tax reference number, if known;
c) the name and address of the Swiss paying agent;
d) the customer number of the account or deposit holder (customer, account or deposit number, IBAN-code);
e) for the time of the account's or deposit's existence between appointed date 1 [31 December 2002] and the date of entry into force of this Agreement [1 January 2013], the yearly account balance and statement of assets as at 31 December of each relevant year.

2. The competent authority of Switzerland shall communicate the information referred to in paragraph 1 to the competent authority of the UK on a monthly basis starting two months after appointed date 3 with the last communication of such information occurring seven months after appointed date 3. Later disclosures, e.g. due to legal proceedings, shall be communicated without delay by the Swiss paying agent to the competent authority of Switzerland, which shall communicate them without delay to the competent authority of the UK.

3. Swiss Paying agents shall issue a certificate in the form prescribed to the relevant person.

4. The competent authority of the UK may ask the competent authority of Switzerland for clarification or further information in cases where identification of the relevant person is not possible from the information provided.

89.10 Planning points for STA one-off payment facility

89.10.1 *UK resident and domiciled individual*

For a non-compliant UK domiciled individual who is within the STA, the lawful choices were:

(1) STA one-off payment
(2) self-disclosure

Self-disclosure would obviously be better than opting for STA one-off voluntary disclosure and waiting for an HMRC enquiry. The Liechtenstein Disclosure Facility is unaffected by the STA; this was a deliberate decision.[17] The cost of disclosure accompanied by use of the Liechtenstein disclosure facility may be lower than the STA one-off payment, as the basis of assessment is entirely different, the actual tax liabilities, rather than the STA formula. But the STA one-off payment offered the following advantages:

17 HM Treasury press release 98/11 *http://www.hm-treasury.gov.uk/press_98_11.htm*.

(1) A simple computation, no negotiation with HMRC, few professional expenses.
(2) Outside the naming and shaming provisions (s.94 FA 2009).

Note that closing the Swiss account before 31 May 2013 lost the possibility of clearance. Payments into the account could have increased the benefit of clearance.

Advance notice to the paying agent will bring forward the date from which clearance applies.

For a compliant person within the STA, the lawful choices were:
(1) opt for STA voluntary disclosure;
(2) close the account before 31 May 2013.

The person will need to be prepared for some enquiries if they opt for STA voluntary disclosure, but provided the relevant records are all in good order, the professional costs may not be too great.

89.10.2 *Non-UK domiciled UK resident individual*

In order to qualify as a non-UK domiciled individual, and so qualify for the opt-out of STA one off payment/disclosure, an individual must claim the remittance basis in 2010/11 or 2011/12 and obtain the necessary domicile certificate.

89.10.3 *Non-resident*

A non-resident with a UK passport must obtain a non-residence certificate.

89.11 The UK legislation

Sch 36 FA 2012 provides:

> *Application of this Part*
> 3(1) This Part applies if—
> (a) a one-off payment is levied in accordance with Part 2 of the Agreement,
> (b) a certificate is issued under Article 9(4) to a person ("P") in respect of that payment, and
> (c) the certificate is approved by P or considered approved by virtue of that Article.
> (2) The certificate is referred to in this Part as "the Part 2 certificate".
> *Qualifying amounts*
> 4(1) The Part 2 certificate applies to taxable amounts in respect of which the conditions in sub-paragraph (2) are met.
> (2) The conditions are—

(a) P is liable to tax on the amount,
(b) the amount is untaxed,
(c) the taxable event took place before the start date, and
(d) the necessary link with the certificate can be demonstrated.

(3) The necessary link is—
(a) in a case falling within Article 9(3) (non-UK domiciled individuals opting for self-assessment method), that the amount is included in the omitted taxable base by reference to which the one-off payment was calculated, and
(b) in any other case, that the amount forms part of or is represented by the assets comprised in the relevant capital by reference to which the one-off payment was calculated (referred to in the Agreement as C_r).

(4) For the purposes of sub-paragraph (3)(b), amounts are assumed to be attributed to assets in the way that produces the most beneficial outcome for P.

(5) Paragraph 11 makes further provision about the interpretation of subparagraph (2).

(6) Amounts to which the Part 2 certificate applies in accordance with this paragraph are referred to in this Part as "qualifying amounts".

Eligibility for clearance

5 (1) The effect of the Part 2 certificate depends on whether P is eligible for clearance.

(2) P is "eligible for clearance" if—
(a) none of the circumstances listed in Article 9(13)(a) to (e) apply (tax investigations etc), and
(b) Article 12(1) does not apply (wrongful behaviour in relation to non-UK domiciled status).

(3) Otherwise, P is "not eligible for clearance".

Effect if P eligible for clearance

6(1) This paragraph sets out the effect of the Part 2 certificate if P is eligible for clearance.

(2) P ceases to be liable to tax on qualifying amounts.

(3) Sub-paragraph (2) does not apply to a qualifying amount if—
(a) the amount was held in the United Kingdom,
(b) at some point during the period beginning with 6 October 2011 and ending immediately before the start date, it ceased to be held in the United Kingdom, and
(c) after that point (but before the start date) it began to be held in Switzerland.

(4) Instead, such part of the one-off payment as is attributable (on a just and reasonable basis) to the qualifying amount is to be treated as if it

were a credit allowable against the tax due from P taking account of that amount.

(5) The meaning of tax due "taking account of" an amount is explained in Part 5 of this Schedule.

(6) The form in which a qualifying amount was held in the United Kingdom is irrelevant (so references in sub-paragraph (3) to the amount include an asset representing the amount).

(7) The total qualifying amounts to which sub-paragraphs (2) and (4) can apply as a result of the Part 2 certificate is limited to X.

(8) If the total exceeds X, the particular qualifying amounts to which those subparagraphs apply are assumed to be those that would produce the most beneficial outcome for P.

(9) X is—

(a) in a case falling within Article 9(3), the value of the omitted taxable base by reference to which the one-off payment was calculated, and

(b) in any other case, the value shown in the Part 2 certificate as the value of the relevant capital (Cr).

Ceasing to be liable to tax

7(1) The result of "ceasing to be liable" to tax on a qualifying amount depends on the tax (or taxes) in respect of which the amount is untaxed.

(2) For income tax or capital gains tax, the result is that the amount is no longer liable to be brought into account in assessing the income tax or capital gains tax due from P for the tax year in which the amount would otherwise be liable to be brought into account.

(3) For inheritance tax, the result is that any inheritance tax due from P in respect of the chargeable transfer and attributable to the property whose value is included in the amount is no longer due from P.

(4) For VAT, the result is that P is no longer required to account for output tax on the amount in determining the VAT payable by P for the prescribed accounting period in which P would otherwise be required to account for output tax on the amount.

(5) But—

(a) ceasing to be liable to tax on a qualifying amount does not affect P's liability to tax on any other amount, and

(b) P's liability to tax on any other amount remains what it would have been, had the qualifying amount been brought into account in calculating that liability.

(6) Accordingly, if the qualifying amount were ever to be brought into account and it were found that the tax assessed on any other amount should have been higher as a result, P would remain liable for the extra tax due on that other amount and for any associated ancillary charge.

(7) For the purposes of sub-paragraphs (5) and (6), the qualifying amount is assumed to form the top slice of the total sum on which P is liable to tax.

Effect if P not eligible for clearance

8(1) This paragraph sets out the effect of the Part 2 certificate if P is not eligible for clearance.

(2) The one-off payment is to be treated as if it were a credit allowable against the tax due from P taking account of qualifying amounts.

(3) The one-off payment is to be applied for the purposes of sub-paragraph (2)—

(a) in the order specified in sub-paragraph (4), and

(b) subject to that, in the way that produces the most beneficial outcome for P.

(4) The order is—

(a) first, for VAT,

(b) then, for income tax,

(c) then, for capital gains tax, and

(d) finally, for inheritance tax.

Interest, penalties etc

9(1) Where, by virtue of this Part, P ceases to be liable to tax on a qualifying amount, P also ceases to be liable to any ancillary charge directly connected with that amount.

(2) Where, by virtue of this Part, all or part of a one-off payment is treated as if it were a credit allowable against the tax due from P taking account of a qualifying amount, the credit may also be used to offset any ancillary charge directly connected with that amount.

(3) Sub-paragraph (4) applies in the case of a qualifying amount that is part only of—

(a) an amount of income on which income tax is charged,

(b) a chargeable gain,

(c) the value of property forming part of the value transferred by a chargeable transfer, or

(d) the value of a supply on which VAT is charged.

(4) The amount of any ancillary charge directly connected with that qualifying amount is determined by apportioning the ancillary charge directly connected with the income, gain or value on a just and reasonable basis.

Repayments

10 Nothing in this Part entitles any person to a repayment or refund of tax, save for any repayment or refund to which P may be entitled by virtue of paragraph 6(4) or 8(2) if the credit allowable under that paragraph exceeds the total amount of tax against which the credit is

allowable.

Paragraph 4: supplementary provision

11(1) This paragraph explains how paragraph 4(2) is to be read for each description of taxable amount.

(2) For income and chargeable gains—

(a) the reference to P being "liable to tax" includes a case where P would be so liable if the income or gain were to be remitted to the United Kingdom,

(b) "the taxable event" takes place when the income arises or the gain accrues (whether or not, in a remittance basis case, it is remitted to the United Kingdom), and

(c) the income or gain is "untaxed" if it has not been brought into account in an assessment to income tax or, as the case may be, capital gains tax for the tax year in which it is required to be brought into account.

(3) For the value of property forming part of the value transferred by a chargeable transfer—

(a) "the taxable event" takes place when the chargeable transfer is made (or, in the case of a potentially exempt transfer, when death occurs), and

(b) the value of the property is "untaxed" if it has not been brought into account in determining the value transferred by the chargeable transfer.

(4) For the value of supplies on which VAT is charged—

(a) "the taxable event" takes place when P makes the supply, and

(b) the value of the supply is "untaxed" if output tax on the supply has not been accounted for in determining the VAT payable by P for the prescribed accounting period in which P is required to account for output tax on the supply.

(5) Paragraph 4(2)(a) is not satisfied in a case where P is liable to tax only because the liability has been transferred to P as a result of action taken by HMRC (for example, as a result of a notice given under section 77A of VATA 1994 or a direction given under regulation 81 of the Income Tax (PAYE) Regulations 2003 (SI 2003/2682)).

Refund of one-off payment

12 If a one-off payment is refunded by HMRC in accordance with Article 15(3), this Part ceases to apply with respect to that payment.

Part 4 of the schedule deals with IHT:

20 This Part affects inheritance tax.

Application of this Part

21(1) This Part applies if—

(a) an amount is withheld under Article 32(2) in respect of relevant assets of a deceased person ("P"), and
(b) a certificate is issued under Article 32(6) in respect of the withholding of that amount.

(2) The certificate is referred to in this Part as "the Article 32 certificate".

(3) The relevant assets in relation to which the Article 32 certificate is issued are referred to as "the cleared assets".

(4) Any reference in this Part to "the chargeable transfer" is to the transfer made (under section 4 of IHTA 1984) on P's death.

Effect of Article 32 certificate

22(1) The cleared assets are to be treated as if they were excluded property in determining the value of P's estate immediately before P's death.

(2) As a result, any ancillary charge directly connected with those assets is also extinguished.

(3) But—

(a) treating the cleared assets as if they were excluded property does not affect any liability to inheritance tax on the rest of P's estate, and
(b) that liability remains what it would have been, had the cleared assets not been treated as excluded property.

(4) Accordingly, if the cleared assets were ever to be included in an account or further account under section 216 or 217 of IHTA 1984 in respect of the chargeable transfer and it were found that the inheritance tax charged on the value of the property in P's estate other than the cleared assets should have been higher, the extra tax charged on the value of that other property remains due, together with any associated ancillary charge.

(5) For the purposes of sub-paragraphs (3) and (4), the value of the cleared assets is assumed to form the highest part of the value transferred by the chargeable transfer.

Election in respect of Article 32 certificates

23(1) This paragraph applies if the cleared assets for each of the Article 32 certificates issued in respect of P's death are included in full in an account or further account delivered in respect of P's death under section 216 or 217 of IHTA 1984 within the time permitted for delivering such an account or further account.

(2) The person who delivers the account or further account may elect to disapply paragraph 22.

(3) An election under this paragraph must be made in writing at the same time as the account or further account in which all the cleared

assets are included, and signed by each person delivering the account or further account.

(4) An election may only be made under this paragraph if it is accompanied by each of the Article 32 certificates.

(5) If an election is made under this paragraph—

(a) paragraph 22 does not apply to the cleared assets for any of the Article 32 certificates issued in respect of P's death, and

(b) the amounts withheld under Article 32(2) are instead to be treated as if they were credits allowable against the inheritance tax due on the value transferred by the chargeable transfer (calculated with the value of all those cleared assets brought into account).

Repayments

24 Nothing in this Part entitles any person to a repayment or refund of tax, save for any repayment to which a person may be entitled as a result of paragraph 23 if the credit allowable under that paragraph exceeds the inheritance tax due from the person on the value transferred by the chargeable transfer.

CHAPTER NINETY

STA WITHHOLDING TAX

90.1 STA withholding tax

Taxpayers have two options:

(1) STA withholding tax. If this option is taken, it is implied that the income/gains need not be disclosed on a UK return.

(2) STA annual disclosure, in which case UK tax will assessed under UK tax rules.

Article 19 STA provides:

> 1. Subject to the provisions of Article 21[1] a final withholding tax (hereinafter referred to as **"withholding tax"**) shall be levied by a Swiss paying agent in respect of relevant persons on the following income and gains of such persons arising on relevant assets at the rates specified:
>
> a) interest income as defined in Article 25, unless a retention is levied, or disclosure is made, in accordance with the Agreement on the Taxation of Savings: 48%;
>
> b) dividend income as defined in Article 26: 40%;
>
> c) other income as defined in Article 27: 48%;
>
> d) capital gains as defined in Article 28: 27%.

I adopt the STA term **"withholding tax"** (or to distinguish it from other withholding taxes, "STA withholding tax"). The word "final" does not seem apt but perhaps the point is that no expenses can be deducted.[2]

The specified rates are set very slightly below top UK rates. The House of Commons Treasury Committee criticised this:

> 53. We are concerned that the levies on Swiss bank accounts will result in those who have sought to avoid tax by concealing their assets

---

1 See 90.2 (Interaction with other taxes).

2 The tax may be repaid: see 90.3 (Credit for withholding tax).

> offshore receiving more favourable tax treatment than those who were compliant in the first place. The rates of tax to be withheld from income and capital are lower than the top rates of tax in the UK. This seems to reward those who have deliberately avoided tax over those who have not. Mr Hartnett explained that the reason for the withholding rates being slightly lower than the rates that would apply in the UK was that:
>
> > The 48% is a calculation based on the top rate of 50% when money would often not come in, or generally not come in, until 31 January following the end of the tax year. This money will come in earlier, so we calculated a withholding based on that anticipation of money.[3]
>
> 54. This logic is not followed in domestic withholding taxes on UK income, where tax rates do not vary depending on whether income tax is withheld at source (such as through PAYE or withholding tax on savings income) or paid at the end of the tax year following the submission of a tax return. We do not see why those with offshore bank accounts, who may not currently be fulfilling their tax obligations, should be treated any differently.[4]

David Hartnett's position is, with respect, quite right. The analogy with other withholding taxes is inexact, because those are compulsory, whereas the STA is a regime into which the taxpayer may or may not adopt.

STA withholding does not apply to assets in discretionary trusts.[5]

90.1.1 *Commencement of STA withholding tax*

Article 44(2) STA provides:

> Part 3 shall apply to income arising and gains realised on or after the date of entry into force of this Agreement [1 January 2013]. Article 33 shall apply only where a relevant person dies on or after the date of entry into force of this Agreement.

90.1.2 *Remittance basis taxpayer*

Article 19 STA provides:

> 2. A non-UK domiciled individual shall only be liable to the withholding

---

3 Evidence to House of Commons Treasury Committee (12 September 2011) *http://www.publications.parliament.uk/pa/cm201012/cmselect/cmtreasy/uc1371-iii/uc137101.htm*

4 "Closing the Tax Gap: HMRC's record at ensuring tax compliance" (March 2012)

5 See 88.4.4 (Discretionary trusts).

tax in respect of the income and gains described in paragraph 1 where:
a) such income and gains have a UK source; or
b) amounts are derived from such income and gains that do not have a UK source and are remitted to the UK.

There is no guidance on source, but it would be sensible to adopt UK tax law principles - so far as one knows what they are. The STA FAQ provide:

> **3.1 What is the expectation on the banks to determine whether income/gains have a UK source? Simplistically, obvious items such as UK dividends, UK bonds etc can be captured; however it may be more difficult to analyse structured products and derivatives.**
> In the context of there being no clearance if the withholding tax is not paid, the expectation is that the banks will do the best they can.

Article 19(2) STA continues:

> For the purposes of this Agreement only, "remitted" means
> [i] those amounts directly transferred to a payee in the UK, unless the relevant person declares to the Swiss paying agent that such amount is not remitted in a taxable form, or
> [ii] amounts which the relevant person declares to the Swiss paying agent to be a remittance.
> Where transfers or payments other than under letter b) are made which are remittances or deemed remittances under UK law, paragraph 5 shall not apply.

In practice it will be rare for income/gains to be "remitted" in this limited sense, unless a non-domiciliary specifically wanted to do that.

The non-UK domiciled individual does not have an opt-out option for STA withholding tax but tax under para (b) is essentially on an opt-in basis, since it only applies if the individual directs foreign income to be directly received in the UK. An individual might do that to get the benefit of clearance but that would be unusual.

90.1.3 *Uncertified non-UK domiciliary*

Article 19(3) STA provides:

> 3. Where a relevant person has made a declaration of intent in accordance with Article 4 paragraph 4,[6] but his or her status as non-UK

6 See 88.5.3 (Date for delivery of domicile certificate).

> domiciled individual has not been certified by the date specified in that paragraph [31 March following the end of the relevant tax year], the Swiss paying agent shall not treat such a relevant person as a non-UK domiciled individual and shall accordingly levy the tax in accordance with paragraph 1 from the beginning of the relevant tax year...

In this situation, 19(3) nudges the tax rates up to UK top rates, presumably to reflect late payment of withholding tax:

> ...Contrary to paragraph 1, the applicable tax rates are:
> a) interest income as defined in Article 25, unless a retention is levied, or disclosure is made, in accordance with the Agreement on the Taxation of Savings: 50%;
> b) dividend income as defined in Article 26: 42.5%;
> c) other income as defined in Article 27: 50%;
> d) capital gains as defined in Article 28: 28%.

Article 19(3) STA concludes:

> Any withholding tax levied in accordance with paragraphs 1 and 2 shall be fully credited against the withholding tax levied in accordance with this paragraph, even in cases where the credit exceeds the amount of this withholding tax.

How can this happen?

90.1.4 *Failure to pay withholding tax*

Article 19(3) STA provides:

> Where the relevant person has opted to meet any shortfall within 8 weeks from 31 March following the end of the relevant tax year, but fails to do so, the Swiss paying agent shall disclose the identity of the relevant person in accordance with Article 22 as if the relevant person had provided written authorisation to the Swiss paying agent to disclose.

90.1.5 *Computation of liability*

Article 19(3) STA concludes:

> To ensure a proper implementation of this deferred withholding tax, the Swiss paying agent shall compute on an ongoing basis the withholding tax due under paragraph 1.

90.1.6 *Nominees*

Article 19(4) STA provides:

4. The relevant person is the party liable to the withholding tax.

Article 19(4) STA continues:

> Income and capital gains from assets held by a Swiss paying agent acting as a fiduciary agent shall be treated in the same way as the underlying asset would be if held by the relevant person.

90.1.7 *Clearance*

Article 19(5) STA provides:

> 5. [a] Subject to Article 23,[7] where withholding tax is levied in accordance with this Article the relevant person shall cease to have any liability to UK taxes including interest, penalties and surcharges that are chargeable in respect of the income or gains falling within paragraph 1 or 2.

I refer to this as **"clearance"**.

SA106 Notes 2013 provides:

> Do include details of your Swiss income. This applies even if you have paid withholding tax on these amounts ... under the UK/Swiss Tax Cooperation Agreement, which came into force on 1 January 2013.

That seems doubtful. One would have expected that reference to income in the tax return do not include income which is not liable to UK tax.

Article 19(5) STA continues:

> [b] Any other tax liabilities of the relevant person in the UK, including liabilities to tax in respect of income or gains, are not affected by this paragraph.

This may be aimed at the situation where:

(1) T fails to declare income ("the original income").
(2) T transfers the income to a Swiss account and income arises ("new income").

STA withholding applies to the new income but the clearance does not extend to the tax liability for the original income.

90.1.8 *Future amendment of tax rates*

Article 20 STA provides:

---

7 See 90.3 (Credit for withholding tax).

> **Art. 20 Amendment of tax rates**
> 1. The competent authority of the United Kingdom shall without delay inform the competent authority of Switzerland in writing about publicly announced and adopted changes to United Kingdom law regarding the tax rates applicable to income, gains on relevant assets, and inheritances.
> 2. Where the United Kingdom highest rates of taxation on income, gains or inheritances are amended after the date of signature of this Agreement [6 October 2011], the rates of taxes levied under this Part shall simultaneously and correspondingly be amended by the number of percentage points that the statutory rates have been amended, unless the competent authority of Switzerland has informed the competent authority of the United Kingdom in writing, within 30 days of receipt of any information provided under paragraph 1, that it will not adjust the applicable tax rates under this Part. The competent authority of Switzerland shall publish without delay all adjustments to the rates of the taxes levied under this Part and ensure that Swiss paying agents are informed of these adjustments.

Thus the Swiss authorities have a discretion if the UK increases its rates, or if following a decrease, UK rates return to 2011/12 levels: they need not increase the withholding tax rate. Perhaps the point is theoretical.

Article 20(2) STA continues:

> The competent authority of Switzerland shall publish without delay all adjustments to the rates of the withholding tax levied under this Part and ensure that Swiss paying agents are informed of these adjustments.

90.2 Interaction with other taxes

90.2.1 *Swiss/EU Savings Tax Agreement 2004*

Article 1(3) STA provides:

> Notwithstanding any other provision, Part 3 shall not apply to income or gains in respect of which a retention is levied, or disclosure is made, in accordance with the Agreement dated 26 October 2004 between the Swiss Confederation and the European Community providing for measures equivalent to those laid down in Council Directive 2003/48/EC on taxation of savings income in the form of interest payments (hereinafter referred to as "Agreement on the Taxation of Savings").[8]

8 For completeness: art.1(4) anticipates amendments to the Swiss/EU Savings Tax Agreement: "Notwithstanding any other provision, with effect from the date of application of the relevant provisions of any amendment to the Agreement on the

This is carefully drafted not to tread on EU toes.

The amending protocol of March 2012 provides the following declaration:

> **Joint Declaration concerning a tax finality payment**
> According to Switzerland's policy not to attract undeclared funds and the desire of the United Kingdom to provide tax finality to United Kingdom taxpayers who have had retention levied in accordance with the Agreement on the Taxation of Savings, the United Kingdom and Switzerland have agreed the following:
> United Kingdom taxpayers who have paid both the retention under the Agreement on the Taxation of Savings and a 13% tax finality payment on interest income shall cease to have any liability for the relevant tax year to United Kingdom taxes chargeable on those interest payments, including interest, penalties and surcharges that are chargeable on those interest payments.
> By choosing to pay the retention on interest income in application of the Agreement on the Taxation of Savings, a United Kingdom taxpayer is also authorising the payment of 13% on such interest amount. Swiss paying agents shall issue a certificate to United Kingdom taxpayers demonstrating that the tax finality payment has been made. The revenue generated by this payment shall be transferred to the competent authority of the United Kingdom via the competent authority of Switzerland.
> In case of an amendment of the applicable tax rate on interest income according to the Agreement between the United Kingdom of Great Britain and Northern Ireland and the Swiss Confederation on cooperation in the area of taxation, the tax finality payment shall be adjusted accordingly.

90.2.2 *Swiss anticipatory tax*

Article 21 STA considers the interaction of STA withholding with other taxes:

(1) Swiss anticipatory tax (*impôt anticipé*)
(2) UK tax levied at source
(3) Foreign tax

Article 21(1) STA provides:

Taxation of Savings, including by way of a new agreement, the reference in para-graph 3 to the Agreement on the Taxation of Savings shall be to that Agreement as so amended"

> 1. The levy of the Swiss anticipatory tax is not affected by anything in this Agreement. To the extent provided for by the Double Taxation Convention, the Swiss paying agent shall in its own name and on behalf of the relevant person file with the Swiss authorities for total or partial reimbursement. The Swiss anticipatory tax which cannot be claimed back according to the Double Taxation Convention (residual tax) shall be credited against the withholding tax.

90.2.3 *UK tax at source*

Article 21(2) STA provides:

> 2. If tax is levied at source in accordance with the law of the UK on income falling within Article 19 paragraphs 1 and 2 [income subject to STA withholding tax], the Swiss paying agent shall credit this tax at source against the withholding tax. This credit may not, however, exceed the amount of the withholding tax.

It is difficult to see how the credit could exceed the amount of the withholding tax, unless the rates vary considerably in the future.

90.2.4 *Foreign taxes*

Article 21(3) STA provides:

> 3. If tax is levied in a third State or jurisdiction on income falling within Article 19 paragraphs 1 and 2 [income subject to STA withholding tax], the Swiss paying agent shall credit this tax against the withholding tax, to the extent that any arrangements between the UK and that third State or jurisdiction for the avoidance of double taxation exclude the reimbursement of the tax levied in that third State or jurisdiction. This credit may not, however, exceed the amount of the withholding tax.

90.3 Credit for withholding tax

Article 23 STA provides:

> **Art. 23 Treatment of withholding tax as payment on account**
> 1. The relevant person may request, on production to the competent authority of the UK of a certificate issued in accordance with Article 30, that the withholding tax is treated by the competent authority of the UK as a payment on account of UK taxes or other liabilities (including without limitation interest, penalties and surcharges) of that person in respect of the relevant tax year to which the certificate relates. In this circumstance, Article 19 paragraph 5 [clearance] shall not apply.
> 2. Where a payment received by a relevant person has been subject to

taxes and retentions other than as provided for in this Agreement and the UK grants a tax credit for such taxes and retentions in accordance with its national law or double taxation conventions, such other taxes and retentions shall be credited before the procedure in paragraph 1 is applied.
3. Paragraphs 1 and 2 shall not apply to the extent that the taxes or retentions described in paragraph 2 have been credited based on Article 21.

90.4 Basis of assessment of STA withholding tax

90.4.1 *Deductions*

Article 24 STA provides:

> **Art. 24 Basis of assessment**
> 1. The amount on which the withholding tax shall be levied is the amount before any deductions.

90.4.2 *Interest*

Article 24 STA provides:

> 2. The withholding tax on interest income shall be levied as follows:
> a) in the case of interest income within the meaning of Article 25 paragraph 1 letter a): on the gross amount of interest paid or credited;
> b) in the case of interest income within the meaning of Article 25 paragraph 1 letter b) or d): on the amount of interest or revenue referred to in those letters;
> c) in the case of interest income within the meaning of Article 25 paragraph 1 letter c): on the amount of interest referred to in that letter.

This seems a somewhat cumbersome way to express the point, but it does not matter.

90.4.3 *Dividends*

Article 24 STA provides:

> 3. The withholding tax on dividend income shall be levied as follows:
> a) in the case of a dividend within the meaning of Article 26 paragraph 1 letter a): on the gross amount of the dividend paid or credited or, if the dividend is never paid or credited, on the market value of the dividend in kind at the time of accrual;

b) in the case of a dividend within the meaning of Article 26 paragraph 1 letter b): on the amount of dividends referred to in that letter;
c) in the case of a dividend within the meaning of Article 26 paragraph 1 letter c): on the amount of income referred to in that letter.

90.4.4 *Other income*

Article 24 STA provides:

4. The withholding tax on other income shall be levied as follows:
a) in the case of other income within the meaning of Article 27 paragraph 1 letter a): on the gross amount of the other income paid or credited;
b) in the case of other income within the meaning of Article 27 paragraph 1 letter b): on the amount of other income referred to in that letter;
c) in the case of other income within the meaning of Article 27 paragraph 1 letter c): on the amount of other income referred to in that letter.

90.5 Capital gains

90.5.1 *Computation of gain*

Article 24 STA provides:

5. The withholding tax shall be levied on capital gains accruing on the disposal of relevant assets. Capital gains are computed by deducting the acquisition costs and incidental costs of acquisition and disposal from the disposal value, whereby:
a) Acquisition costs are the actual costs of purchase in every case, apart from in the exceptional case where accurate records are no longer available.
b) If accurate records of the acquisition costs are not available, the acquisition costs are the market value of the asset at 31 March 1982 or, if the asset was not in existence at that date, the market value of the asset on the date of creation.
c) If such market value is not known, the acquisition costs are deemed to be nil.

This is not the same as the computation of the gain for CGT principles, for instance it would include gains not chargeable to CGT (such as exempt gilts and qualifying corporate bonds; but the end result will generally be

the same. Sterling is the basis of computation.[9]

90.5.2 *Disposal*

Article 24 STA provides:

> d) The transfer by a relevant person of relevant assets to the account or deposit of a third person constitutes a disposal except in cases where the transfer takes place between spouses or civil partners. In such case the disposal value shall be deemed to be the market value of the assets.

The transfer to a relevant person's own account is not a disposal. The spouse exemption is wider than the CGT spouse exemption, but there is no charity exemption.

90.5.3 *Losses*

Article 24 STA provides:

> 6. Capital losses accruing on the disposal of relevant assets booked in Switzerland can be offset against future capital gains accruing on the disposal of relevant assets booked in Switzerland to the extent they arise on assets held by the same Swiss paying agent.
> 7. Capital losses accruing on the disposal of relevant assets cannot be carried back to set against earlier capital gains or transferred to an account held with another Swiss paying agent.

This may be more generous than the CGT rule for remittance basis taxpayers but may be less generous than the rule for arising basis taxpayers.

Losses from one account may be set against profits in another account, if the accounts are held with the same bank or other paying agent.

90.5.4 *No other reliefs*

> 8. No other allowances or reliefs are available to set against any capital gains or enhance any capital losses accruing on the disposal of relevant assets.

90.6 Definitions for withholding tax

The STA distinguishes between four types of receipt:
(1) interest

---

9 See Article 29(2) STA set out at 90.7 (Administration of STA withholding tax).

(2) dividends
(3) other income
(4) gains

These terms are elaborately defined.

Whether income is classified as interest or as other income does not matter for the STA, as the withholding tax rate is the same, but it matters for Swiss/EU Savings Tax Agreement 2004.

Whether income is classified as dividends or interest/other income matters as the withholding tax rate is different.

90.6.1 *Interest*

Article 25 STA provides:

> **Art. 25 Definition of interest income**
>
> 1. For the purposes of this Part, "interest income" means:
>
> a) interest paid, or credited to an account, relating to debt-claims of every kind, whether or not secured by mortgage and whether or not carrying a right to participate in the debtor's profits. In particular it includes income from government securities and income from bonds or debentures as well as premiums and prizes attached to such securities, bonds or debentures, but excluding interest from loans between private individuals not acting in the course of their business. Penalty charges for late payments shall not be regarded as interest income;
>
> b) interest accrued or capitalised at the sale, refund or redemption of debt claims referred to in a);
>
> c) income deriving from interest payments either directly or through an entity referred to in Article 4 paragraph 2 of Council Directive 2003/48/EC of 3 June 2003 on taxation of savings income in the form of interest payments (hereinafter referred to as the "Directive") distributed or retained by:
>
> (i) undertakings for collective investment domiciled in an EU Member State;
>
> (ii) entities domiciled in an EU Member State which exercise the option under Article 4 paragraph 3 of the Directive and which inform the Swiss paying agent of this fact;
>
> (iii) undertakings for collective investment established outside the territory of the EU and Switzerland;
>
> (iv) Swiss investment funds;
>
> d) income realised upon the sale, refund or redemption of shares or units in the following undertakings and entities:
>
> (i) undertakings for collective investment domiciled in an EU Member State;
>
> (ii) entities domiciled in an EU Member State which exercise the option under Article 4 paragraph 3 of the Directive and which inform the Swiss paying agent of this fact;

(iii) undertakings for collective investment established outside the territory of the EU and Switzerland;
(iv) Swiss investment funds.

2. As regards paragraph 1 letters c) and d), where a Swiss paying agent has no information concerning the proportion of the income which derives from interest payments, the total amount of the income shall be considered to be an interest payment.

This is similar to the definition in art.7 of the Swiss/EU Savings Tax Agreement 2004 and art.6 of the EU savings directive.

90.6.2 *Dividends*

Article 26 STA provides:

Art. 26 Definition of dividend income

For the purposes of this Part, "dividend income" means:

a) dividends paid, or credited to an account being income from shares, "jouissance" shares or "jouissance" rights, mining shares, founders' shares or other rights, not being debt claims, participating in profits as well as income from other corporate shares which is subjected to the same taxation treatment as income from shares by the laws of the State or jurisdiction of which the company making the distribution is a resident;

This wording is based on art.10 OECD model convention.

b) income from dividends either directly or through an entity referred to in Article 4 paragraph 2 of the Directive distributed or retained by:
   (i) undertakings for collective investment domiciled in an EU Member State;
   (ii) entities domiciled in an EU Member State which exercise the option under Article 4 paragraph 3 of the Directive and which inform the Swiss paying agent of this fact;
   (iii) undertakings for collective investment established outside the territory of the EU and Switzerland;
   (iv) Swiss investment funds;
c) income realised upon the sale, refund or redemption of shares or units in the following undertakings and entities:
   (i) undertakings for collective investment domiciled in an EU Member State;
   (ii) entities domiciled in an EU Member State which exercise the option under Article 4 paragraph 3 of the Directive and which inform the Swiss paying agent of this fact;
   (iii) undertakings for collective investment established outside the territory of the EU and Switzerland;
   (iv) Swiss investment funds.

90.6.3 *Other income*

Article 27 STA provides:

Art. 27 Definition of other income

For the purposes of this Part, "other income" means:

a) substitute payments for interest and dividends within the meaning of Articles 25 paragraph 1 letter a) and 26 paragraph 1 letter a) or sums treated for tax purposes as income arising from relevant assets under the taxation laws of the UK, as well as other fees and commissions including those received in connection with structured financial instruments, securities lending, repo business, swaps and comparable transactions;

b) other income either directly or through an entity referred to in Article 4 paragraph 2 of the Directive distributed or retained by:
   (i) undertakings for collective investment domiciled in an EU Member State;
   (ii) entities domiciled in an EU Member State which exercise the option under Article 4 paragraph 3 of the Directive and which inform the Swiss paying agent of this fact;
   (iii) undertakings for collective investment established outside the territory of the EU and Switzerland;
   (iv) Swiss investment funds;

c) income realised upon the sale, refund or redemption of shares or units in the following undertakings and entities:
   (i) undertakings for collective investment domiciled in an EU Member State;
   (ii) entities domiciled in an EU Member State which exercise the option under Article 4 paragraph 3 of the Directive and which inform the Swiss paying agent of this fact;
   (iii) undertakings for collective investment established outside the territory of the EU and Switzerland;
   (iv) Swiss investment funds.

90.6.4 *Capital gains*

Article 28 STA provides:

Art. 28 Definition of capital gains

For the purposes of this Part, "capital gains" means:

a) all gains realised on the disposal of relevant assets, except where the gain is interest income, dividend income or other income in accordance with Articles 25 to 27;

b) capital gains realised either directly or through an entity referred to in Article 4 paragraph 2 of the Directive distributed or retained by:
   (i) undertakings for collective investment domiciled in an EU Member State;

(ii) entities domiciled in an EU Member State which exercise the option under Article 4 paragraph 3 of the Directive and which inform the Swiss paying agent of this fact;
(iii) undertakings for collective investment established outside the territory of the EU and Switzerland;
(iv) Swiss investment funds;

c) income realised upon the sale, refund or redemption of shares or units in the following undertakings and entities:
(i) undertakings for collective investment domiciled in an EU Member State;
(ii) entities domiciled in an EU Member State which exercise the option under Article 4 paragraph 3 of the Directive and which inform the Swiss paying agent of this fact;
(iii) undertakings for collective investment established outside the territory of the EU and Switzerland;
(iv) Swiss investment funds.

90.7 Administration of STA withholding tax

Article 29 STA provides:

> **Art. 29 Administrative handling**
> 1. Swiss paying agents shall levy the withholding tax on an arising basis and transfer all taxes levied not later than two months after the end of the calendar year to the competent authority of Switzerland. With the transfer, the Swiss paying agents shall declare to the competent authority of Switzerland the allocation of the taxes levied under this Part to the different categories of income and capital gains.
> 2. The withholding tax shall be calculated, levied and transferred to the competent authority of Switzerland by the Swiss paying agent in sterling. Where sterling is not the reference currency of the account or deposit, the Swiss paying agent shall convert the amount into sterling by using the fixed exchange rate published by the SIX Telekurs AG at the corresponding date.
> 3. The competent authority of Switzerland shall transfer the withholding tax levied to the competent authority of the UK in sterling in one instalment within a period of three months following the end of the calendar year.

90.7.1 *Certificate of withholding tax*

Article 30 STA provides:

Art. 30 Certificates issued by Swiss paying agents
1. Swiss paying agents shall issue to the relevant person a certificate in the form prescribed at the end of each tax year and when the banking relationship is ended.
2. The competent authority of the UK shall accept certificates issued by Swiss paying agents as sufficient evidence of payments of withholding tax made under this Part.

90.7.2 *Change of paying agent*

Article 31 STA provides:

Art. 31 Transfer of relevant assets
Where a relevant person transfers relevant assets from one Swiss paying agent to the account or deposit of another, the first Swiss paying agent shall transfer the relevant data regarding these assets necessary for the second Swiss paying agent to comply with the terms of this Agreement.

90.8 Annual voluntary disclosure

Article 22 STA provides:

Art. 22 Voluntary disclosure
1. Where a relevant person who is not a non-UK domiciled individual expressly authorises the Swiss paying agent to disclose to the competent authority of the UK the income arisen and capital gains realised on an account or deposit, the Swiss paying agent shall disclose such income and capital gains instead of levying the withholding tax.
2. Where a relevant person who is a non-UK domiciled individual expressly authorises the Swiss paying agent to disclose to the competent authority of the UK the income and capital gains that have a UK source and remittances to the UK from an account or deposit, the Swiss paying agent shall disclose such income, capital gains and remittances instead of levying the withholding tax.
3. A disclosure shall include the following information:
a) the identity (name, first name and date of birth) and address of the relevant person;
b) the UK tax reference number, if known;
c) the name and address of the Swiss paying agent;
d) the customer number of the account or deposit holder (customer, account or deposit number, IBAN-code);
e) the tax year concerned;

For relevant persons except non-UK domiciled individuals:
f) the total amount of income as defined in Article 19 paragraph 1;
g) the total amount of capital gains and losses realised as calculated

in accordance with Articles 24 and 28;

For relevant persons who are non-UK domiciled individuals:

h) the total amount of income and capital gains as defined in Article 19 paragraph 2 letter a);

i) the total amount of remittances as defined in Article 19 paragraph 2 letter b).

This is the equivalent of article 10 (voluntary disclosure)[10] but the disclosure takes place annually.

Article 29(4) STA provides:

> 4. With respect to voluntary disclosures in accordance with Article 22 Swiss paying agents shall transfer the information according to Article 22 paragraph 3 not later than three months after the end of the tax year to the competent authority of Switzerland. The competent authority of Switzerland shall transfer this information to the competent authority of the UK. Such communications shall be automatic and take place once a year within a period of six months following the end of the tax year.

90.9 IHT withholding

The drafting refers to an "authorised person" defined in art.2(1)(q) STA:

> q) "authorised person" means all the personal representatives of a deceased relevant person or the beneficiary or beneficiaries to whom the relevant assets pass as a result of the death.

Article 32 STA provides:

> 1. Where a Swiss paying agent becomes aware of the death of a relevant person, it shall freeze the relevant assets of which the relevant person was the beneficial owner at the date of death. The Swiss paying agent shall cancel the freezing of the relevant assets after tax has been withheld in accordance with paragraph 2 or the authorised person has consented to disclosure in accordance with paragraph 3. Notwithstanding the foregoing, withdrawals shall be allowed up to a maximum of 60% of the relevant assets at the date of the relevant person's death.
>
> The Swiss paying agent shall cancel the freezing of relevant assets when provided by the authorised person in due time with a certificate produced by a lawyer, an accountant or a tax adviser who is a member of a relevant professional body con-firming that the deceased person

10 See 89.9 (Disclosure option).

was not domiciled within the United Kingdom and was not considered as deemed domiciled for inheritance tax purposes in United Kingdom tax law. In that case, no tax shall be withheld in accordance with para-graph 2 and there shall be no disclosure in accordance with paragraph 3.

2. An authorised person can, within a period of one year from the date of the relevant person's death, give the Swiss paying agent written authorisation to make a disclosure in accordance with paragraph 3. In the absence of such authorisation, once this period has expired or upon subsequently becoming aware of the relevant person's death, the Swiss paying agent shall withhold an amount of 40% of the relevant assets booked at the date of the relevant person's death. The Swiss paying agent shall without delay transfer the tax withheld to the competent authority of Switzerland. Article 29 paragraph 2 shall apply to the amount withheld under this paragraph.

3. Where written authorisation has been provided by the authorised person, the Swiss paying agent shall without delay transfer the following information to the competent authority of Switzerland:

a) the identity (name, first name, date of birth and, if known, the date of death) and address of the deceased person;
b) the name and address of the Swiss paying agent;
c) the customer number of the account or deposit holder (customer, ac-count or deposit number, IBAN-code);
d) if known, the name and address of the authorised person;
e) the account balance and statement of assets as at the date of death.

4. Where due to insufficient funds the Swiss paying agent is unable to withhold the full amount of the tax according to paragraph 2, it shall make a disclosure in accordance with paragraph 3 as if the authorised person had provided written authorisation to the Swiss paying agent to disclose, provided that the authorised per-son has not made available the necessary funds within a period specified by the Swiss paying agent, not exceeding eight weeks.

5. The competent authority of Switzerland shall without delay transfer the tax withheld according to paragraph 2 or the information according to paragraph 3 to the competent authority of the United Kingdom.

6. When withholding the tax in accordance with paragraph 2 or making the dis-closure in accordance with paragraph 3, the Swiss paying agent shall issue to the authorised person a certificate in the form prescribed.

7. The authorised person may request, on production to the competent authority of the United Kingdom of a certificate issued in accordance with paragraph 6, that the tax withheld in accordance with paragraph 2

is treated as a payment on account of United Kingdom inheritance tax (including without limitation interest and penalties) payable in respect of the relevant assets at the date of death of the relevant person. The competent authority of the United Kingdom shall refund any excess to the authorised person. In this circumstance, paragraph 8 shall not apply.
8. Where tax is withheld in accordance with paragraph 2, the authorised person shall cease to have any liability to United Kingdom inheritance tax in respect of the relevant assets at the date of death of the relevant person, including interest and penalties that are chargeable. Any other tax liabilities of the deceased person in the United Kingdom, including liabilities to tax in respect of income or gains, are not affected by this paragraph.

90.10 Planning points for STA withholding tax regime

90.10.1 *UK domiciliary*

The withholding tax regime is not likely to be attractive, except for those for whom secrecy is overwhelmingly important. So the practical choice for the UK domiciliary is:
(1) to opt for STA annual voluntary disclosure.
(2) to move the account from Switzerland.
As the disclosure relates to present rather than past income, STA voluntary disclosure should not necessarily lead to greatly increased HMRC enquiries, though one should be prepared for some, especially regarding the source of the funds in the account.

90.10.2 *Non-UK domiciliary*

For the non-UK domiciliary who elects for the remittance basis, the practical course is to certify non-domicile and arrange no UK source income or remittances received directly in the UK.

90.10.3 *Non-resident*

A non-resident with a UK passport must obtain an annual non-residence certificate.

90.11 The UK provisions

Schedule 36 FA 2012 provides:

Taxes affected
13 The taxes affected by this Part are—
(a) income tax, and

(b) capital gains tax.

Application of this Part

14 (1) This Part applies if—

(a) a sum is levied under Article 19 on an amount of income or a gain of a person, and

(b) a certificate is issued to the person under Article 30(1) in respect of the levying of that sum (or sums that include that sum).

(2) This Part also applies if—

(a) a retention is made under EUSA from an amount of income or a gain of a person,

(b) a tax finality payment, as contemplated by the Joint Declaration, is made on the same income or gain, and

(c) a certificate is issued to the person under the Joint Declaration in respect of the making of that payment (or payments that include that payment).

(3) In this Part—

(a) the person is referred to as "P",

(b) the certificate is referred to as "the relevant certificate",

(c) the amount of income, or the gain, is referred to as "the cleared amount",

(d) the account or deposit (within the meaning of the Agreement) to which the certificate relates (or to which certificates relate that include the certificate) is referred to as "the underlying account", and

(e) the sum levied under Article 19 on the cleared amount or, as the case may be, the tax finality payment made on it is referred to as "the transferred sum".

Effect of relevant certificate

15(1) The effect of the relevant certificate depends on whether P makes an election under paragraph 16 in respect of the underlying account for the applicable year.

(2) "The applicable year" is the tax year for which P is liable to income tax or, as the case may be, capital gains tax on the cleared amount.

(3) If P makes an election, the transferred sum is to be treated as if it were a credit allowable against the income tax or, as the case may be, capital gains tax due from P for the applicable year.

(4) If P does not make an election, P ceases to be liable to income tax or, as the case may be, capital gains tax on the cleared amount.

(5) Sub-paragraph (4) is to be read in accordance with paragraph 7.

(6) Where P ceases to be liable to tax on the cleared amount, P also ceases to be liable to any ancillary charge directly connected with that amount.

Election

16(1) P may make an election under this paragraph in respect of the underlying account for a tax year if all the affected amounts are included in full in a return (or amended return) made by P under Part 2 of TMA 1970 for that tax year.

(2) In relation to a tax year, an amount is an "affected amount" if—

(a) a certificate is issued to P under Article 30(1) or the Joint Declaration in respect of the levying of a sum, or the making of a tax finality payment, on that amount,

(b) the account or deposit to which the certificate relates is the underlying account, and

(c) the amount is required to be brought into account in assessing the income tax or capital gains tax due from P for that tax year.

(3) An election under this paragraph must be made in the return or amended return in which the affected amounts are included.

(4) An election may only be made under this paragraph if it is accompanied by all the relevant certificates relating to the underlying account.

(5) For the purposes of paragraph 15, P is treated as making an election under this paragraph in respect of the underlying account for a tax year if a claim is made under Part 3 of TIOPA 2010 (double taxation relief for special withholding tax) in relation to any of the affected amounts.

(6) Section 143 of TIOPA 2010 (taking account of special withholding tax in calculating income or gains) applies with any necessary modifications in relation to a tax finality payment as it applies in relation to special withholding tax.

Other credits to be allowed first

17 Other than a credit allowed under Part 3 of TIOPA 2010, any credit for foreign tax allowed under that Act against the income tax or, as the case may be, capital gains tax due from P for the applicable year is to be allowed before effect is given to paragraph 15(3).

Repayments

18(1) Sub-paragraph (2) applies if the amount of a credit allowable under paragraph 15(3) exceeds the amount of income tax or, as the case may be, capital gains tax due from P for the applicable year (before set-off).

(2) The excess is to be set against any amount of the other tax (income tax or capital gains tax) due from P for that year.

(3) Nothing in this Part entitles any person to a repayment or refund of tax, save for any repayment to which P may be entitled as a result of paragraph 15(3) if, in relation to a credit allowable under that paragraph, there is any remaining balance after applying—

(a) sub-paragraph (2), and
(b) section 138(4)(a) or 140(5)(a) of TIOPA 2010, if applicable to the cleared amount.

Relationship with special withholding tax rules

19 The Joint Declaration does not count for the purposes of section 136(6)(b) of TIOPA 2010 (definition of "special withholding tax") as a corresponding provision of international arrangements.

CHAPTER NINETY ONE

DISCLOSURE OF INFORMATION BY SWISS AUTHORITIES

91.1 Disclosure of information by Swiss authorities

91.1.1 *STA government disclosure*

Article 33 STA provides:

> **Art. 33 Accompanying measures to safeguard this Agreement's purpose**
> 1. Notwithstanding any other provisions under which the competent authority of the UK may request information from Switzerland, in order to safeguard this Agreement's purpose the competent authority of Switzerland shall on request provide information to the competent authority of the UK if the identity of a UK taxpayer and plausible grounds are provided by the competent authority of the UK. The request does not have to include the name of the Swiss paying agent.

I refer to this as "**STA government disclosure"**.

> 2. For the purpose of identifying the UK taxpayer, the competent authority of the UK shall provide name, address, and, if known, date of birth, professional activity and other information identifying the UK taxpayer.

Plausible grounds is defined:

> 3. Plausible grounds for the request exist where the competent authority of the UK has identified on a case-by-case basis a tax risk in relation to the UK taxpayer and sees plausible, non-arbitrary grounds for checking the tax position of a UK taxpayer. These grounds shall be based on an analysis of a range of information such as previous tax returns, level of income, third party information and knowledge of the persons who were involved in completing a tax return. So called "fishing expeditions" are excluded.
> 4. The competent authority of the UK shall inform the UK taxpayer in

advance about the intended request for information, unless the competent authority of the UK has reasonable grounds for believing that this might seriously prejudice the assessment or collection of tax.
5. The competent authority of the UK shall confirm in its request that the requirements for such a request are met and shall indicate for which time period within the ten years prior to the request the information is needed. Based on this request, the competent authority of Switzerland shall investigate the existence of accounts and deposits.
6. Institutions governed by the Swiss Banking Act of 8 November 1934 shall on request by the competent authority of Switzerland disclose to the competent authority of Switzerland the existence of accounts and deposits of UK taxpayers to the extent required by this Article.
7. Where the UK taxpayer subject to this request has an account or deposit in Switzerland in the time period referred to in the request, the competent authority of Switzerland shall provide the name of the institution concerned and the number of existing accounts and deposits during the time period referred to in the request to the competent authority of the UK.

91.1.2 *Protected account*

Article 33 STA provides two exceptions:

8. No information according to paragraph 7 shall be provided:
   a) where the UK taxpayer has no account or deposit;

That seems self-evident, but the next exception is more important:

   b) in respect of accounts or deposits of the UK taxpayer where:
      (i) there was after appointed date 2 [31 December 2010] no change in the beneficial ownership.
      A change of ownership due to an inheritance shall be regarded as a change of beneficial ownership for the purposes of this subparagraph; and
      (ii) the one-off payment was levied in accordance with Article 9 paragraph 2 on all the assets in the account or deposit as at the date of entry into force of this Agreement [1 January 2013]; and
      (iii) the income arising and capital gains realised after the date of entry into force of this Agreement were taxed in accordance with Article 19 paragraphs 1 and 2 [STA withholding] 2, or, if appropriate, the tax finality payment in accordance with the joint declaration concerning a tax finality payment was applied; and
      (iv) no new money was deposited into the account or deposit after

> appointed date 2 [31 December 2010]. For the purposes of this subparagraph, assets deposited between appointed date 2 and the date of entry into force of this Agreement which are part of the relevant assets as defined under Article 9 paragraph 12 do not qualify as new money.

This excludes STA government disclosure where an individual has made the one-off payment. I refer to this as **"a protected account"**. But DTA disclosure may apply.

91.1.3 *Administration*

Article 33 STA continues:

> 9. In any case the competent authority of the UK may request administrative or judicial assistance based on the pertinent legal provisions applicable in Switzerland.
> 10. The competent authority of Switzerland shall inform the UK taxpayer before the information is transmitted about the intended exchange of information. The UK taxpayer may appeal against the intended exchange of information to the extent provided by Swiss law.
> 11. The joint commission shall following the entry into force of this Agreement determine by mutual consent the maximum number of admissible requests per calendar year under this Article. The maximum number of requests must be proportionate to the perceived risk of non-compliance by investors and in the first three years that number shall be in the low to mid hundreds and shall not exceed 500 per year. No requests for information under this Article shall be made until the joint commission has reached agreement on the maximum number of requests.
> 12. The maximum number of requests per calendar year shall be subject to a yearly review at the beginning of the year and, if necessary, adjusted for that year based on the requests made three years before. The first review shall take place at the beginning of 2016. Where the competent authority of the UK has in the year under review requested information in less than 20% of the maximum number of admissible requests under this Article, the maximum number of requests per calendar year shall not be adjusted. Where the competent authority of the UK has in the year under review requested information in 20% or more of the maximum number of admissible requests under this Article, the following rules apply:
> a) Requests leading solely to the identification of accounts or

deposits as defined in paragraph 8 letter b)[1] shall not be taken into consideration when determining the number of successful requests and the total number of requests under letters b) and c).

b) If more than two thirds of the total number of requests as determined in accordance with letter a) lead to the direct or indirect identification of additional UK tax liability which amounts to at least £10,000, the maximum number of requests per calendar year shall increase by 15% for the year of the review.

c) If less than one third of the total number of requests as determined in accordance with letter a) lead to the direct or indirect identification of additional UK tax liability which amounts to at least £10,000, the maximum number of requests per calendar year shall decrease by 15% for the year of the review.

In case of indirect identification of additional UK tax liability, a link between the account or deposit identified under this Article and the additional tax liability found is required.

13. This Article shall apply to requests concerning taxable periods beginning on or after the date of entry into force of this Agreement.

Article 37 STA provides:

Art. 37 Use and disclosure of information received under this Agreement

1. Subject to paragraphs 2 and 3, any information that a Contracting State receives from the other Contracting State under this Agreement shall be treated as confidential and shall, without the consent of the relevant person, only be used for the purposes of the assessment or collection of, the enforcement or prosecution in respect of, or the determination of appeals or the oversight of the above in relation to taxes and tax matters. The Contracting States shall use the information only for such purposes. They may disclose the information in public court proceedings or in judicial decisions.

2. A Contracting State may use information received for other purposes, if this information can be used for such other purposes according to the law of both Contracting States and the competent authority of the supplying Contracting State gives its consent to such other use.

3. Paragraphs 1 and 2 shall not apply to information received by the competent authority of the United Kingdom as a result of voluntary disclosure made by a relevant person under Articles 10 and 22 or an authorised person under Article 33 paragraph 3.

---

1 See 91.1.2 (Protected account).

HMRC state:

> This power is in addition to, and goes further than, the provisions for information exchange under the UK-Switzerland Double Taxation Agreement.

I do not see how it goes further. Dave Hartnett is reported as saying:

> I think it's important to realise that the UK and Switzerland made a change in the double taxation agreement at the beginning of this year, and that is, the article 25[2] of the standard double taxation agreement, which provides for exchange of information on request, applies for Switzerland, so that, if you were investing in Switzerland, and we had reason to be worried about that, we could ask the Swiss what they know about you, but in a specific context. What this extended provision will do is that, in future, if we needed to ask about you, the Swiss will search their banking system - the whole banking system - and provide us with everything they actually know about you, so we would get a lot more information. There's a novelty with this provision as well, and that is that the more successful HMRC is in identifying people who have additional tax liability to pay, the greater the number of people we will be able to search for. The 500 raises like a ratchet. And if we are hopeless at identifying people who have hidden the money the 500 will come down.[3]

It will be interesting to see the number of disclosure requests and their success rate - if that information is made public.

91.1.4 *DTA disclosure*

Article 25 of the Swiss/UK double taxation agreement (revised in 2010) provides:

> **Article 25 Exchange of information**
> 1. The competent authorities of the Contracting States shall exchange such information as is foreseeably relevant for carrying out the provisions of this Convention or to the administration or enforcement of the domestic laws concerning taxes of every kind and description imposed on behalf of the Contracting States, or of their political subdivisions or local authorities, insofar as the taxation thereunder is not contrary to the Convention. The exchange of information is not

2 The original erroneously reads: 26.

3 [2011] STI 2651.

restricted by Articles 1 and 2.

2. Any information received under paragraph 1 by a Contracting State shall be treated as secret in the same manner as information obtained under the domestic laws of that State and shall be disclosed only to persons or authorities (including courts and administrative bodies) concerned with the assessment or collection of, the enforcement or prosecution in respect of, the determination of appeals in relation to the taxes referred to in paragraph 1, or the oversight of the above. Such persons or authorities shall use the information only for such purposes. They may disclose the information in public court proceedings or in judicial decisions. Notwithstanding the foregoing, information received by a Contracting State may be used for other purposes when such information may be used for such other purposes under the laws of both States and the competent authority of the supplying State authorises such use.

3. In no case shall the provisions of paragraphs 1 and 2 be construed so as to impose on a Contracting State the obligation:

a) to carry out administrative measures at variance with the laws and administrative practice of that or of the other Contracting State;

b) to supply information which is not obtainable under the laws or in the normal course of the administration of that or of the other Contracting State;

c) to supply information which would disclose any trade, business, industrial, commercial or professional secret or trade process, or information, the disclosure of which would be contrary to public policy (ordre public).

4. If information is requested by a Contracting State in accordance with this Article, the other Contracting State shall use its information gathering measures to obtain the requested information, even though that other State may not need such information for its own tax purposes. The obligation contained in the preceding sentence is subject to the limitations of paragraph 3 but in no case shall such limitations be construed to permit a Contracting State to decline to supply information solely because it has no domestic interest in such information.

5. In no case shall the provisions of paragraph 3 be construed to permit a Contracting State to decline to supply information solely because the information is held by a bank, other financial institution, nominee or person acting in an agency or a fiduciary capacity or because it relates to ownership interests in a person. In order to obtain such information, the tax authorities of the requested Contracting State shall have the power to enforce the disclosure of information covered by this

> paragraph, notwithstanding paragraph 3 or any contrary provisions in its domestic laws.

I refer to this as **"DTA disclosure"**.

In Parliament, the Exchequer Secretary to the Treasury said:

> The protocol also updates the exchange of information article to the latest OECD standard.
> An additional protocol reproduces material from the OECD model tax information exchange agreement and the commentary to the OECD model double taxation agreement. That material was inserted at Switzerland's request and is designed to provide reassurance that the UK will not engage in fishing expeditions to Swiss banks. It is in line with what Switzerland has agreed with other countries, and we are content that it does not undermine the OECD model provisions. In particular, it does not prevent Switzerland agreeing at some future date to provide more information automatically or spontaneously.[4]

91.2 Tracing withdrawn funds

Article 18 STA provides:

> **Art. 18 Destinations of withdrawn assets**
> The competent authority of Switzerland shall within 12 months of appointed date 3 [31 May 2013] report to the competent authority of the UK the 10 States or jurisdictions to which relevant persons who closed their account or deposit between the date of signature of this Agreement [6 October 2011] and appointed date 3 [31 May 2013] have transferred the largest volume of relevant assets. The report shall also include the number of relevant persons concerned for each State or jurisdiction. The Contracting States shall not make public the data collected and reported based on this Article.

The significance of closing the account before 31 May 2013 is that the relevant person escaped the STA regimes.

The significance of the figure this produces is questionable. Relevant persons who close accounts are not necessarily non-compliant. The figure will not record those who transfer assets but do not close their account (perhaps leaving a small amount which is dealt with by the STA one-off payment).

---

4 *http://www.publications.parliament.uk/pa/cm201011/cmgeneral/deleg4/101102/101102s01.htm*

The UK could make a good guess to which jurisdictions those evading the STA transfer their assets, but this gives better founded data, which may facilitate further action. For now, HMRC content themselves with threats:

> This agreement will ensure that we know where money that flees Switzerland is heading. We won't be far behind.[5]

91.3 Stolen data

A declaration supplemental to the STA provides:

> The Government of the UK declares ... that it will not actively seek to acquire customer data stolen from Swiss banks.

The Swiss Bankers Q&A puts the point differently:

> The UK has committed not to use information from purchased data carriers containing stolen data in future for legal proceedings against Swiss banks or their employees.[6]

If HMRC do use stolen data, the individual concerned is not likely to be able to know, and if they did suspect that, there is not much the individual could do about it.

CHAPTER NINETY TWO

CRIMINAL LAW AND PROFESSIONAL CONDUCT

92.1 Tax offences

This chapter considers criminal law and professional conduct issues raised by the STA.

The principal tax offence is the common law offence of fraud on the revenue.

A UK resident and domiciled individual with an undisclosed Swiss account is likely to commit this offence.

92.2 Waiver (?) of criminal prosecution

HMRC deal with this matter in a document described as a letter. This reflects an attempt to satisfy two incompatible policy considerations:

(1) To encourage defaulters to regularise their affairs. This requires an amnesty or at least the impression of an amnesty. Defaulters are less likely to disclose themselves if there is a risk, or perceived risk, of prosecution.

(2) To keep the possibility of prosecution, or at least the impression of a that possibility, for one or more of the following reasons:
   (a) for use when HMRC feel that justice may require prosecution
   (b) for appearances:
      (i) to placate those opposed to the policy of an amnesty
      (ii) to keep defaulters compliant, by making them dependent on the mercy of HMRC to avoid prosecution
      (iii) *pour encourager les autres.*

Parts of the HMRC letter suggest that there will be (more or less) no prosecution whereas other parts make it plain that they may be.

What is actually intended is left unclear - there is no reason for HMRC to make up their minds, and they may have parked the issue to deal with on an *ad hoc* basis when it arises.

92.3 Prosecution of relevant person (the individual)

The HMRC letter provides:

> In view of the signing of the Agreement between the UK and the Swiss Confederation on cooperation in the area of taxation, the competent authority of the UK [HMRC] wishes to set out its position in relation to the criminal investigation of relevant persons for past liabilities incurred before the date of this Agreement[1] in respect of relevant assets.
> Provided that a relevant person agrees either
> [1] to make a one-off payment in accordance with Article 9 of this Agreement or
> [2] to make a voluntary disclosure in relation to his/her relevant assets in accordance with Article 10 of this Agreement and fully cooperates with HMRC,
> that person is highly unlikely to be subject to a criminal investigation by HMRC for a tax-related offence for past liabilities in respect of relevant assets from the date he or she irrevocably opted for one of the options, unless
> [1] either his/her relevant assets represent the proceeds of crime (other than crime connected to a tax-related offence) or
> [2] represent the proceeds of crime connected to criminal tax-related offences punishable by two years or more imprisonment.

At first sight this appears to be a qualified waiver of prosecution, though "highly unlikely" is wording chosen to fall short of a guarantee.

However the relevant assets will in principle constitute the proceeds of crime (fraud on the Revenue, ie tax evasion), the maximum penalty for which always exceeds two years imprisonment.[2] Thus in terms the "waiver" will never apply. I wonder if that was noticed.

The relevant person cannot irrevocably opt for one of the options until the STA takes effect, which is not before 1 January 2013.[3]

The STA FAQ provides:

> **4.1 HMRC statement re criminal investigations - please confirm what period this is aimed at: the interim period and/or after agreement enters into force?**

---

1 The date the agreement was signed, 6 October 2011? Or the date it came into force, 1 January 2013?

2 As a common law offence, the maximum penalty is life imprisonment.

3 See 89.3 (Selecting the option).

> The statement was given in the context of the position once the agreement comes into force.

That was not in fact stated in the statement but since the statement is so qualified, perhaps it does not matter.

92.4 Prosecution of advisors and paying agents

It is an offence to assist an individual to commit fraud on the revenue, or to agree with someone to do so.

The HMRC letter continues:

> [1] Professional advisers, Swiss paying agents and their employees will need to comply with their legal obligations in respect of money laundering.
>
> [2] Whilst it is never possible to provide an absolute assurance against a criminal investigation,[4] it is highly unlikely to be in the public interest of the UK that professional advisers, Swiss paying agents and their employees will be subject to a criminal investigation by HMRC.

At first sight this again appears to be a qualified waiver of prosecution, though "highly unlikely" is wording chosen to fall short of a guarantee.

What is the relationship between points [1] and [2]? Presumably it is implying that the "waiver" does not extend to money laundering offences. I discuss that topic further below.

> [3] Any assurances relate only to investigations undertaken by HMRC. HMRC does not have sole responsibility for the criminal investigation of tax-related offences and no assurances are given in respect of any activity by other UK law enforcement agencies.

This is a strange restriction on the waiver, given that the STA is an agreement between the *United Kingdom* and Switzerland, not an

---

4 Why not? The authors of the Liechtenstein disclosure facility presumably did not agree, since they gave an unqualified assurance in schedule 7 para 9:

"A relevant person who makes a full, accurate and unprompted disclosure to HMRC under the disclosure facility, will not be subject to criminal investigation by HMRC for a tax-related offence, unless the source of the funds from which the relevant person has benefited or may benefit constitutes "criminal property" within the meaning specified in section 340 of the Proceeds of Crime Act 2002 (provided that the definition of criminal property for this purpose will not include property that has arisen solely as a result of illegal tax evasion)."

agreement made by HMRC.

> [4] Any assurances given in this letter regarding criminal investigation apply only in relation to a criminal investigation against a relevant person in respect of relevant assets in Switzerland. No such assurances can be given regarding a criminal investigation against any person in respect of assets situated outside Switzerland.

That is a commonsense restriction if "relevant assets in Switzerland" just means "relevant assets" since the STA only relates to such assets. It is considered that that is the right construction.

92.5 Money laundering: Introduction

In this section I consider four criminal offences relating to money laundering, which are found in part 7 Proceeds of Crime Act 2002 ("POCA"). A full discussion of this topic requires a book to itself. I focus on the issues relevant to professionals advising on the STA.

Conviction of any of these offences is punishable by up to 14 years imprisonment and an unlimited fine.

92.5.1 *"Money laundering"*

In the normal sense of the expression, money laundering is the process whereby the proceeds of crime are disguised so that they appear to come from a legitimate source.

Section 340 POCA defines the expression more widely. It includes all forms of handling or possessing criminal property, including possessing the proceeds of one's own crime, and facilitating the handling or possession of criminal property:

> (1) This section applies for the purposes of this Part....
> (11) Money laundering is an act which—
> (a) constitutes an offence under section
> [i] 327,[5]
> [ii] 328[6] or
> [iii] 329,[7]
> (b) constitutes an attempt, conspiracy or incitement to commit an offence specified in paragraph (a),

5 See 92.6 (Concealing/transferring criminal property).
6 See 92.7 (Assisting money laundering).
7 See 92.8 (Possession of criminal property).

(c) constitutes aiding, abetting, counselling or procuring the commission of an offence specified in paragraph (a), or
(d) would constitute an offence specified in paragraph (a), (b) or (c) if done in the UK.

92.5.2 *"Criminal property"*

Section 340 POCA provides:

(1) This section applies for the purposes of this Part.
(2) Criminal conduct is conduct which—
(a) constitutes an offence in any part of the UK, or
(b) would constitute an offence in any part of the UK if it occurred there.
(3) Property[8] is criminal property if—
(a) it constitutes a person's benefit from criminal conduct or it represents such a benefit (in whole or part and whether directly or indirectly), and
(b) the alleged offender knows or suspects that it constitutes or represents such a benefit.

The Consultative Committee of Accounting Bodies (CCAB) comment on "criminal property":

2.28 Money laundering occurs only when criminal property has accrued to someone from a criminal act. In addition, it must be borne in mind that for property to be criminal property not only must it constitute a person's benefit from criminal conduct, but the alleged offender (ie, the person alleged to be laundering criminal property) must know or suspect that the property constitutes such a benefit. This means, for instance,

8 Defined s.340 POCA:
(9) Property is all property wherever situated and includes—
(a) money;
(b) all forms of property, real or personal, heritable or moveable;
(c) things in action and other intangible or incorporeal property.
(10) The following rules apply in relation to property—
(a) property is obtained by a person if he obtains an interest in it;
(b) references to an interest, in relation to land in England and Wales or Northern Ireland, are to any legal estate or equitable interest or power;
(c) references to an interest, in relation to land in Scotland, are to any estate, interest, servitude or other heritable right in or over land, including a heritable security;
(d) references to an interest, in relation to property other than land, include references to a right (including a right to possession).

that if someone has made an innocent error, even if such an error resulted in benefit and constituted a strict liability criminal offence, then the proceeds are not criminal property for the purposes of POCA and no money laundering offence has arisen until and unless the offender becomes aware of the error (eg, s167(3), Customs and Excise Management Act 1979). MLROs need to consider carefully before reporting whether the information or other matter they intend to report meets these criteria. Examples of unlawful behaviour which may be observed, and may well result in advice to a client to correct an issue, but which are not reportable as money laundering are given below:

- offences where no proceeds or benefit results, such as the late filing of company accounts. However, businesses and individuals should be alert to the possibility that persistent failure to file accounts could represent part of a larger offence with proceeds, such as fraudulent trading or credit fraud involving the concealment of a poor financial position.
- misstatements in tax returns, for whatever cause, but which are corrected before the date when the tax becomes due.
- attempted frauds where the attempt has failed and so no benefit has accrued (although as this may still be a Fraud Act offence in England, Wales and Northern Ireland or the common law offence of fraud in Scotland, individuals and businesses may wish to consider reporting to their local police force or, once operational, the 'National Fraud Reporting Centre'). This includes '419' letters and other attempted advanced fee frauds where there is no knowledge of benefit accruing. In the case of such letters, individuals and businesses may wish to consider following the guidance on the Metropolitan Police Fraud Alert internet pages (http://www.met.police.uk/fraudalert). Where a client refuses to correct, or unreasonably delays in correcting, an innocent error that gave rise to proceeds and which was unlawful, businesses should consider what that indicates about the client's intent and whether the property has therefore now become criminal property.[9]

For completeness: Section 340 POCA continues with provisions which widen the scope of "criminal property":

9 Anti-money Laundering Guidance for the Accountancy Sector (August 2008) accessible to CIOT members on *http://www.tax.org.uk*.

(4) It is immaterial—
(a) who carried out the conduct;
(b) who benefited from it;
(c) whether the conduct occurred before or after the passing of this Act.

(5) A person benefits from conduct if he obtains property as a result of or in connection with the conduct.

(6) If a person obtains a pecuniary advantage as a result of or in connection with conduct, he is to be taken to obtain as a result of or in connection with the conduct a sum of money equal to the value of the pecuniary advantage.

(7) References to property or a pecuniary advantage obtained in connection with conduct include references to property or a pecuniary advantage obtained in both that connection and some other.

(8) If a person benefits from conduct his benefit is the property obtained as a result of or in connection with the conduct.

92.6 Concealing/transferring criminal property

Section 327(1) POCA provides:

A person commits an offence if he—
(a) conceals[10] criminal property;
(b) disguises criminal property;
(c) converts criminal property;
(d) transfers criminal property;
(e) removes criminal property from England and Wales or from Scotland or from Northern Ireland.

This would include transferring criminal property from a Swiss account to a trust or other entity.

A professional advisor is not likely to commit this offence but if the client has done so, or may do so, that has consequences for the advisor's responsibilities for assisting/disclosing.

92.7 Assisting money laundering

Section 328(1) POCA provides:

10 Defined in subsection (3): "Concealing or disguising criminal property includes concealing or disguising its nature, source, location, disposition, movement or ownership or any rights with respect to it."

> A person commits an offence if he enters into or becomes concerned in an arrangement which he knows or suspects facilitates (by whatever means) the acquisition, retention, use or control of criminal property by or on behalf of another person.

An example would be to suggest to an individual within the scope of the STA that they should transfer their funds to a trust or to a jurisdiction outside Switzerland in order to avoid the STA. (That would also constitute the offence of fraud on the revenue, or assisting or conspiring to commit that offence).

The scope of this was somewhat restricted in *Bowman v Fels* [2005] 1 WLR 3083 which held that the conduct of litigation did not amount to being concerned in an arrangement within s.328.

92.8 Possession of criminal property

Section 329(1) POCA provides:

> A person commits an offence if he—
> (a) acquires criminal property;
> (b) uses criminal property;
> (c) has possession of criminal property.

A professional advisor is not likely to commit this offence but if the client has done so, or may do so, that has consequences for the advisor's responsibilities for assisting/disclosing.

92.9 Defence of authorised disclosure

There is a defence to these offences if an "authorised disclosure" is made under section 338 POCA. If an authorised disclosure is made before a prohibited act under section 327-329, appropriate consent is required.

92.10 Duty to disclose money laundering

Section 330(1) POCA provides:

> A person commits an offence if the conditions in subsections (2) to (4) are satisfied.

I refer to these conditions as the disclosure conditions.

92.10.1 *Disclosure condition 1: Knowledge*

Section 330(2) POCA provides:

> The first condition is that he—

(a) knows or suspects, or
(b) has reasonable grounds for knowing or suspecting,

that another person is engaged in money laundering.

The CCAB offer guidance on "knows or suspects":

> 2.25 Having knowledge means actually knowing that something is the case.
> 2.26 Case law suggests that suspicion is a state of mind more definite than speculation, but falls short of knowledge based on evidence. It must be based on some evidence, even if that evidence is tentative – simple speculation that a client may be money laundering is not sufficient grounds to form a suspicion. Similarly, a general assumption that low levels of crime (eg, not declaring all cash takings) are endemic in particular industry sectors does not amount to reasonable grounds for suspicion of particular clients operating in that sector.
> 2.27 A frequently used description is that '…A suspicion that something exists is more than a mere idle wondering whether it exists or not; it is a positive feeling of actual apprehension or mistrust, amounting to a "slight opinion, but without sufficient evidence"' (*Queensland Bacon PTY v Rees* [1966] 115 CLR 266 at 303, per Kitto J). In another more recent case, *Da Silva* [2007] 1 WLR 303, 'It seems to us that the essential element in the word "suspect" and its affiliates, in this context, is that the defendant must think that there is a possibility, which is more than fanciful, that the relevant facts exist. A vague feeling of unease would not suffice.'[11]

The CCAB comment on "reasonable grounds":

> 2.29 Individuals in the regulated sector must make an internal report or a SAR, as applicable, if there are 'reasonable grounds' for knowledge or suspicion, as well as actual knowledge or suspicion. This 'reasonable grounds' test creates an objective test – persons in the regulated sector will not be able to rely on an assertion of ignorance or naivety where this would not be reasonable to expect of a person with their training and position. For example, a person might be considered to have reasonable grounds for knowledge of money laundering if he had actual knowledge of, or possessed information which would indicate to a reasonable person, that another person was committing or had committed a money laundering offence; or had deliberately ignored the

11 Anti-money Laundering Guidance for the Accountancy Sector (August 2008) accessible to CIOT members on *http://www.tax.org.uk*.

obvious inference from information (ie,. wilfully shutting one's eyes) known to him that another person was committing or had committed a money laundering offence. Please note that the interpretation of 'reasonable grounds' has not, as yet, been tested by the courts for the purposes of POCA.

2.30 'Reasonable grounds' should not be confused with the existence of higher than normal risk factors which may affect certain sectors or classes of persons. For example, cash-based businesses or complex overseas trust and company structures may be capable of being used to launder money, but this capability of itself is not considered to constitute 'reasonable grounds'.

2.31 Existence of higher than normal risk factors require increased attention to gathering and evaluation of 'know your client' information, and heightened awareness of the risk of money laundering in performing professional work, but do not of themselves require a report of suspicion to be made. For 'reasonable grounds' to come into existence, there needs to be sufficient information to advance beyond speculation that it is merely possible someone is laundering money, or a higher than normal incidence of some types of crime in particular sectors.

2.32 It is important that individuals do not turn a blind eye to information, but make reasonable enquiries such as a professional with their qualifications, experience and expertise might be expected to make in such a situation within the normal scope of their assignment or client relationship, and draw a reasonable conclusion such as may be expected of a person of their standing. Individuals should exercise a healthy level of professional scepticism, and if unsure of the action that should be taken, consult with their MLRO or otherwise in accordance with their businesses' procedures. If in doubt, individuals should err on the side of caution and make a report to their MLRO.[12]

92.10.2 *Disclosure condition 2: Professional advisor*

Section 330(2) POCA provides:

> The second condition is that the information or other matter—
>
> (a) on which his knowledge or suspicion is based, or
>
> (b) which gives reasonable grounds for such knowledge or suspicion,
>
> came to him in the course of a business in the regulated sector.

12 Anti-money Laundering Guidance for the Accountancy Sector (August 2008) accessible to CIOT members on *http://www.tax.org.uk*.

Under schedule 9 POCA, the regulated sector includes:

> the provision of advice about the tax affairs of other persons by a firm or sole practitioner who by way of business provides advice about the tax affairs of other persons;

Thus tax practitioners are in the regulated sector.

92.10.3 *Disclosure condition 3: Knowledge of identity*

Section 330(3A) POCA provides:

> The third condition is—
> (a) that he can identify the other person mentioned in subsection (2) or the whereabouts of any of the laundered property,[13] or
> (b) that he believes, or it is reasonable to expect him to believe, that the information or other matter mentioned in subsection (3) will or may assist in identifying that other person or the whereabouts of any of the laundered property.

Disclosure conditions 1 to 3 will be met by an advisor to a non-compliant UK resident and domiciled individual with a Swiss bank account.

92.10.4 *Disclosure condition 4: Disclosure to SOCA*

Disclosure is one option. Section 330(4) POCA provides:

> The fourth condition is that he does not make the required disclosure[14] to—
> (a) a nominated officer, or
> (b) a person authorised for the purposes of this Part by the Director General of SOCA,
> as soon as is practicable after the information or other matter mentioned in subsection (3) comes to him.

Thus in the absence of some other defence, s.330 effectively imposes a duty to disclose the client. There are defences of reasonable excuse and

---

13 This has a commonsense definition in subsection (5A) "The laundered property is the property forming the subject-matter of the money laundering that he knows or suspects, or has reasonable grounds for knowing or suspecting, that other person to be engaged in."

14 Defined subsection (5) "The required disclosure is a disclosure of—
(a) the identity of the other person mentioned in subsection (2), if he knows it,
(b) the whereabouts of the laundered property, so far as he knows it, and
(c) the information or other matter mentioned in subsection (3)."

lack of knowledge which are not discussed here. The main defence is professional privilege.

92.11 Professional privilege

Section 330 POCA provides:

> (6) But he does not commit an offence under this section if...
> (b) he is a professional legal adviser or relevant professional adviser and—
> (i) if he knows either of the things mentioned in subsection (5)(a) and (b), he knows the thing because of information or other matter that came to him in privileged circumstances, or
> (ii) the information or other matter mentioned in subsection (3) came to him in privileged circumstances, or
> (c) subsection (7) or (7B) applies to him.
>
> (7B) This subsection applies to a person if—
> (a) he is employed by, or is in partnership with, a professional legal adviser or a relevant professional adviser to provide the adviser with assistance or support,
> (b) the information or other matter mentioned in subsection (3) comes to the person in connection with the provision of such assistance or support, and
> (c) the information or other matter came to the adviser in privileged circumstances.
>
> (10) Information or other matter comes to a professional legal adviser or . . . relevant professional adviser in privileged circumstances if it is communicated or given to him—
> (a) by (or by a representative of) a client of his in connection with the giving by the adviser of legal advice to the client,
> (b) by (or by a representative of) a person seeking legal advice from the adviser, or
> (c) by a person in connection with legal proceedings or contemplated legal proceedings.

This is similar to legal professional privilege. The Law Society comment:

> 5.3.2. It is important to note that common law privilege and the 330(6) exemption differ particularly in relation to the protection given to "advice".
> 5.4. When advice is given or received in circumstances where litigation is neither contemplated nor reasonably in prospect, common law LPP

will normally only apply to communications between a solicitor and his client for the purpose of obtaining or providing legal advice, or which form part of the chain of correspondence between solicitor and client for the purpose of obtaining legal advice. Therefore, save in limited circumstances, communications between solicitors and third parties will not fall within common law LPP. An exception where common law LPP might apply is where the third party is merely acting as a conduit or post box (see *Jones v Great Central Railway [1910]) AC 4*).

5.5. In contrast, the 330(6) exemption applies, to any information received by a professional legal adviser from a client or a representative of a client for the purpose of giving or obtaining legal advice. A "representative" is not defined in POCA but the Law Society takes a wide interpretation. For example, information communicated by a client's tax adviser to the professional legal adviser may fall within the 330(6) exemption when in the professional legal adviser's hands. The tax adviser is not however a professional legal adviser and therefore falls outside the 330(6) exemption and may of course commit an offence himself under s330 POCA if he fails to make a disclosure under the section.

5.5.1. Following the Court of Appeal's decision in *Three Rivers District Council v Bank of England (No 5)* [2003] QB 1556 (which is unaffected by the House of Lords decision referred to elsewhere) communications by a solicitor with employees of a corporate client may not be protected by common law LPP if the employee cannot be considered to be "the client" for these purposes. The Court of Appeal concluded that some employees may be clients, some may not. However, even if a junior employee might not be a client for the purposes of common law LPP they may fall within the meaning of "representative" for the purposes of the 330(6) exemption.

5.5.2. Under Common law, privileged information can be shared or disclosed within law firms, without losing the protection of LPP, e.g. with secretaries, other fee earners, the MLRO. This can also include those with a common interest, e.g. in certain circumstances co-defendants (see *Gotha City v Sotheby's* (no.1) [1998] 1 WLR 114)). However, except where litigation is in contemplation, arguably the 330(6) exemption only applies to information received by a professional legal adviser from a client or a representative of a client, or from a person seeking legal advice, in the circumstances outlined in section 330(10)(a) and (b). For example, during the course of a transaction a vendor may provide copies to the purchaser of legal advice received by the vendor, but require that it be kept confidential and stipulate that in disclosing it, privilege in the information is not waived. Since the 330(6)

exemption only applies to information provided by a client or his or her representative, to a professional legal adviser, whilst it will apply if the vendor or his lawyer gives it to the purchaser who then passes it to the purchaser's professional legal adviser, it will not apply if it is simply put in a data room and the purchaser's professional adviser inspects it.

What is legal advice in a transaction?

5.6. Whereas the range of those whose communications fall within the 330(6) exemption may be broader than within common law LPP, under both heads the communications must relate to legal advice. A definition of the scope of common law advice privilege has recently been approved by the House of Lords in *Three Rivers District Council and others v Bank of England* [2004] UKHL 48 at 111 as covering "all communications between a solicitor and his client relating to a transaction in which the solicitor has been instructed for the purpose of obtaining legal advice … notwithstanding that they do not contain advice on matters of law and construction, provided that they are directly related to the performance by the solicitor of his professional duty as legal adviser of his client".

5.7. By way of example, in a conveyancing transaction, common law advice privilege will be limited to all such communications with, and instructions from, the client and any advice given to the client, (including any working papers and drafts prepared by the solicitor)[15] for the purpose of giving that advice, provided they are directly related to the performance by the solicitor of his professional duty as legal adviser of his client. Thus before making a disclosure to NCIS under s.338, the solicitor must ensure that his knowledge or suspicion does not arise from information imparted within this definition.

5.8. Adapting the *Three Rivers* definition to the wording of s.330 (10), the exemption under the section will cover all communications between a professional legal adviser and his client or his client's representative relating to a transaction in which the professional legal adviser has been instructed for the purpose of obtaining legal advice, notwithstanding that they do not contain advice on matters of law and construction, provided that they are directly related to the performance by the professional legal adviser of his professional duty as legal adviser of his client.

5.9. In the conveyancing example given above, the 330(6) exemption will cover, in addition to the "common law" items, communications

15 [Footnote original] It will not of course cover documents sent to the other side in a transaction, or any documents of title, including conveyances, transfers, mortgages etc. for these are either not confidential and/or not communications.

with third parties, such as surveyors, tax advisers or accountants, provided to the professional legal adviser to enable him to advise his client and directly related to the performance by the professional legal adviser of his professional duty as legal adviser of his client.
5.10. Thus, a conveyancing solicitor does not commit an offence under s.330 if he fails to disclose, if his knowledge, suspicion, or reasonable grounds for knowledge or suspicion, arose from communications of such a nature with his client or a representative of his client:
Note: Solicitors' costs
Solicitors concerned about their receipt of costs, including payment on account, should have regard not only to paragraph 2.30 of the Guidance which describes the "adequate consideration" defence to the section 329 offence, but also this judgment which confirms that legal professional privilege excludes the reporting requirement under the other principal offences, namely sections 327 and 328.[16]

92.11.1 *Crime/fraud exception*

Section 330 POCA continues:

(11) But subsection (10) does not apply to information or other matter which is communicated or given with the intention of furthering a criminal purpose.

The CCAB guidance provides:

7.42 ... An example of this might be where tax advice was sought ostensibly to enable the affairs of a tax evader to be regularised but in reality was sought to aid continued evasion by improving the evader's understanding of the relevant issues.
7.43 The crime/fraud exception also applies where communication takes place between a client and his adviser in circumstances where the client is the innocent tool of a third party's criminal or fraudulent purpose. An example of this might be where a money launderer gives money to a family member, who is unaware of the source of that money, to purchase a property, for which purpose he communicates with his adviser.
7.44 The crime/fraud exception does not apply where the adviser is approached to advise on the consequences of a crime or fraud or similar conduct that has already taken place and where the client has no intention, in seeking advice, to further that crime or fraud. This means

16 Bowman v Fels guidance 13/09/2005.

> that a person who is concerned that he may be guilty of tax evasion can approach a tax adviser for legal advice in this regard without fear of the exception being invoked. This remains the case even if the potential client declines a client relationship having received the advice, and the adviser does not know whether the person will proceed to rectify his affairs. However, if the person behaves in a way that makes the adviser suspicious that he intends to use the advice to further his evasion, then a money laundering report could be required.
> 7.45 The crime/fraud exception is a difficult area and the Courts will not usually allow the exception to be invoked unless there is reasonably compelling circumstantial evidence available that demonstrates that the communications have in some way been intended to further the crime or the fraud. A mere speculation may not be sufficient as a basis to invoke it. It is strongly recommended that professional or legal advice is sought in all cases of doubt.[17]

Bar Council guidance provides:

> 15. NB Section 330 (11) makes it clear that LPP does not extend to information which is communicated with the intention of furthering a criminal purpose. Under the criminal law, one intends something if one can foresee its natural consequences . It is not clear whose intention is relevant for the purposes of this section. At common law, the client's fraudulent intention is sufficient to throw aside the cloak of LPP even if the legal adviser is unaware of it: see *Cox v Railton* 14 QBD 153. However, in *Bowman v Fels* [2005] 1 WLR 3083 the Court of Appeal expressed some sympathy for the view that unless a barrister is actually aware of his client's intention to further a criminal purpose, the information would be protected from disclosure and no offence would be committed: see paragraphs 93 and 94. Given the serious penal consequence of the statute for barristers if they do not make a relevant disclosure, the Bar Council believes the views tentatively expressed by the Court of Appeal in those passages are correct.[18]

The Law Society say:

> 5.11. Neither common law LPP nor the 330(6) exemption apply to

---

17 Anti-money Laundering Guidance for the Accountancy Sector (August 2008) accessible to CIOT members on *http://www.tax.org.uk.*

18 POCA guidance (January 2008) *http://www.barcouncil.org.uk/for-the-bar/practice-updates-and-guidance/guidance-on-the-professional-conduct-of-barristers/proceeds-of-crime-act-2002/*

communications made with the intention of furthering a criminal purpose. For this exception to apply in either context, the solicitors should have prima facie evidence of such an intention, which as indicated at 4.14, need not be that of the client.
5.12. ... The Law Society believes that a solicitor should not make a report unless there is prima facie evidence that he is being used in the furtherance of a crime.
Note:
The question of protecting client confidentiality is a key consideration for professional legal advisers considering reporting under either the principal money laundering offence provisions (to which common law LPP applies) or under the section 330 failure to report offence (to which the 330(6) exemption applies). In either case solicitors should refer to section 6 regarding tipping off.[19]

92.11.2 *Relevant professional adviser*

This term is defined in s.330 (14) POCA:

> A relevant professional adviser is an accountant, auditor or tax adviser who is a member of a professional body which is established for accountants, auditors or tax advisers (as the case may be) and which makes provision for—
>
> (a) testing the competence of those seeking admission to membership of such a body as a condition for such admission; and
>
> (b) imposing and maintaining professional and ethical standards for its members, as well as imposing sanctions for non-compliance with those standards.

92.12 Overseas conduct exemption

For completeness: All the money laundering offences have a territorial limitation. This is set out each time in the same words.[20] Section 327 POCA provides:

> (2A) Nor does a person commit an offence under subsection (1) if—
>
> (a) he knows, or believes on reasonable grounds, that the relevant criminal conduct[21] occurred in a particular country or territory

19 Bowman v Fels guidance 13/09/2005.

20 See s.328(3), 330(7A) POCA.

21 Defined in subsection (2B): "In subsection (2A) "the relevant criminal conduct" is the criminal conduct by reference to which the property concerned is criminal property."

outside the UK, and

(b) the relevant criminal conduct—

(i) was not, at the time it occurred, unlawful under the criminal law then applying in that country or territory, and

(ii) is not of a description prescribed by an order made by the Secretary of State.

Para 2 Proceeds of Crime Act 2002 (Money Laundering: Exceptions to Overseas Conduct Defence) Order 2006, SI 2006/1070 provides:

(1) Relevant criminal conduct of a description falling within paragraph (2) is prescribed for the purposes of sections 327(2A)(b)(ii), 328(3)(b)(ii) and 329(2A)(b)(ii) of the Proceeds of Crime Act 2002 (exceptions to defence where overseas conduct is legal under local law).

(2) Such relevant criminal conduct is conduct which would constitute an offence punishable by imprisonment for a maximum term in excess of 12 months in any part of the UK if it occurred there other than—

(a) an offence under the Gaming Act 1968;

(b) an offence under the Lotteries and Amusements Act 1976, or

(c) an offence under section 23 or 25 of the Financial Services and Markets Act 2000.

So the overseas conduct exemption does not amount to much. In particular, it does not exclude tax offences (the penalty for which exceeds 12 months).

92.13 Professional conduct

The CIOT and ATT issued guidance **("the CIOT guidance")** on 1 December 2011. This provides:

1 [1]Members can only accept a new client who has past tax irregularities on the basis that they will make full disclosure to the member and propose to regularise their tax affairs completely. (Section 4.2 Professional Rules and Practice Guidelines). Members should therefore enquire into the source of the funds in any Swiss account and the existence of other under declarations unrelated to any Swiss account. This is both an ethical and reputational matter for the member and in the best interests of the client, who otherwise remains exposed to HMRC enquiry, higher penalties and, in the worst case, criminal prosecution.

[2] Note that a member would have to refuse to act for a new or existing client who was determined to wait until 2013 before disclosure since in addition to the points mentioned, if HMRC issued Code 9 to the client in the meantime, it would leave the member open to accusations of

> negligence as Liechtenstein Disclosure Facility access would be denied.

I am not sure about point [2]. Negligence is not the issue, as that can be dealt with by appropriate advice. The CIOT guidance continues:

> 2 Where a member is asked to advise an existing client on an undeclared account, the member should consider whether the relationship of trust between the member and the client has broken down and whether the member should continue to act.

The advisor has the opportunity to sack the client if they wish. The guidance continues:[22]

> 4 The member must undertake the usual money laundering identification checks before accepting the client. The profile of these engagements suggests that these individuals are at higher risk than usual of being involved in money laundering, so extra checks may be needed (Regs 7 and 14 The Money Laundering Regulations 2007 and Section 4 CCAB AML guidance with Tax Sector appendix). Both the need for particular care over money laundering identification and the need to ensure that the prospective client genuinely intends to regularise his/her tax affairs suggest that an initial face to face meeting would usually be appropriate.
> 5 It is possible that criminals may use regularisation of their tax affairs as a method to bring illegally acquired funds back into the regular economy, especially in the case of the Liechtenstein Disclosure Facility. The member would need to be satisfied as to the suitability of the client and the account given as to the source of the funds. If the member became concerned that the client may be using regularisation of their tax affairs as a method to bring illegally acquired funds back into the regular economy during the course of the engagement, the member should consider the need to obtain consent from the Serious Organised Crime Agency (SOCA) to proceed with the engagement (Sections 335-336 Proceeds of Crime Act 2002 and Section 8 CCAB AML guidance with Tax Sector appendix).
> 6 A member should only advise within the scope of his own professional competence (Section 5.2 Professional Rules and Practice Guidelines), so should only accept engagements to advise on undeclared income or gains where he/she has sufficient relevant knowledge and experience.
> 7 The member's advice would normally set out the alternatives available to the client. The options of making a traditional disclosure to HMRC

22 There is no para 3.

> or of using the Liechtenstein Disclosure Facility are clearly valid options that correct the past non-disclosure. We will need to be quite clear whether the option of paying the Swiss Withholding Tax (WHT) anonymously is a legal option which corrects the past non-disclosure in each case. There are a number of uncertainties about this which will need to be assessed as further details of the WHT route are published - see points 8, 9 and 10 below.
> 8 We understand that the WHT route will not regularise funds which have passed through the Swiss bank account but been withdrawn before the reference date. We will need to confirm this as details of the WHT arrangements are published.

That seems perfectly clear.

> The WHT route also does not, of course, regularise any matter unrelated to the Swiss bank accounts. Hence in some cases there are matters which would not be regularised by the WHT route and the WHT route would still leave the client with undeclared income or gains. In such cases the member must advise the client to make a disclosure to HMRC and regularise all their tax affairs and cannot recommend the WHT route.
> 9 A member cannot currently advise a client to take no action until the WHT option comes in. The WHT arrangements will not apply until 2013. Hence advising a client to wait for the WHT option implies advising them to submit another fraudulent tax return (the return due by 31 January 2012). It would also leave the client exposed to an HMRC investigation and potential action (up to criminal prosecution in the worst case) for a considerable period of time. This issue has been raised with HMRC.

It seems extraordinary to announce an amnesty in the future without current effect, even for an extraordinary agreement like the STA.

> 10 We will need to confirm what effect the WHT option has on the taxpayer's obligation to make a correct and complete return in future years. It is understood that paying the WHT on future income and gains does satisfy all future tax obligations relating to the Swiss account, but this needs to be confirmed with HMRC.
> 11 Members must comply with the anti-money laundering reporting requirements during the engagement. The privilege exemption would apply in many situations but not in all circumstances, so members should be alert to their reporting obligations throughout the engagement, particularly given the high risk profile of these engagements (Section 330 Proceeds of Crime Act 2002 and Statutory Instrument 2006 No

308; Sections 6 and 7.26 -7.46 of CCAB AML guidance with Tax Sector appendix and Section 12 of the appendix). Examples of instances where reports to SOCA would be necessary would include situations where the member knows or suspects (or has reasonable grounds to know or suspect) that the funds were generated from wider criminal activities or that the client's tax frauds are more extensive than the client has disclosed to the member in order to obtain professional advice.

APPENDIX ONE

TERMINOLOGY

App. 1.1 Introduction

This appendix considers some ubiquitous statutory terms:
- United Kingdom
- Spouse and Civil Partner
- "Living together as husband and wife"
- Child

App. 1.2 "United Kingdom" and related expressions

App. 1.2.1 *"United Kingdom"*

Interpretation Act 1978 Sch 1 provides that "United Kingdom" means Great Britain and Northern Ireland.

The Isle of Man and the Channel Islands do not form part of the UK.

App. 1.2.2 *"Great Britain"*

"Great Britain" means England, Wales and Scotland: s.1 Union with Scotland Act 1706 provides:

> That the two Kingdoms of England and Scotland shall upon the First day of May which shall be in the year 1707 and forever after be united into one Kingdom by the name of Great Britain …

App. 1.2.3 *"England"*

The definition of "England" is not usually an issue for tax. However, for completeness, para 5(a) Sch 2 Interpretation Act 1978 provides:

> in any Act passed before 1st April 1974, a reference to England includes Berwick upon Tweed and Monmouthshire and, in the case of an Act passed before the Welsh Language Act 1967, Wales.

App. 1.2.4 *Territorial sea*

"Territorial sea" extends 12 nautical miles from shore, further defined in the United Nations Convention on the Law of the Sea.

Section 1013 ITA provides:

> The territorial sea of the UK is treated for the purposes of the Income Tax Acts as part of the UK.

Section 276 TCGA and s.830 ICTA make the same point for CGT and corporation tax. Section 172 SSCBA makes the same point for NIC.

There is no equivalent provision in the IHT legislation so the territorial sea is not part of the UK for IHT purposes (though this will not often be important).[1]

App. 1.3 "Spouse" and related expressions

The word "spouse" is used frequently in tax legislation so its meaning is important. The IHT Manual provides:

> **11032. Definition of spouse and civil partner** [July 2011]
> The IHT legislation does not define 'spouse' or 'civil partner' so the definitions come from general law. Consequently, the exemption applies to transfers between people who are lawfully married to each other at the time of the transfer and to transfers between people who are registered as civil partners of each other at the time of the transfer.
> Spouses include
> - people who are legally married but separated
> - parties to a valid polygamous marriage.[2] The marriage confers the Section 18 IHTA 1984 exemption on all transfers to all the spouses of the transferor or deceased who qualify under Section 18 IHTA 1984. Where the Section 18(2) IHTA 1984 limit applies because of foreign domicile of those spouses (IHTM11033), the total exemption (including any similar lifetime exemptions) may not exceed the

---

1 This is perhaps a consequence of art 127(1) United Nations Convention on the Law of the Sea: "Traffic in transit shall not be subject to any customs duties, taxes or other charges except charges levied for specific services rendered in connection with such traffic."

2 [Author's note] See CG Manual:
22070 Definitions [March 2006]
A polygamous marriage may be recognised as valid in UK law if it was valid in the country in which the ceremony occurred and, broadly, it was contracted by persons domiciled in that country.

Section 18(2) IHTA 1984 limit of £55,000.[3]

The following are not spouses

- people who are living together but not lawfully married, however long the relationship may have lasted (in England, Wales and Northern Ireland)
- In Scotland the one form of irregular marriage that has been recognised by Scots law is that by cohabitation with habit and repute. This arises where a man and woman cohabit together as husband and wife and behave towards each other as such for a considerable length of time, so it is generally believed by the society and neighbourhood in which they live, and among their friends and relatives that they are married. They are then presumed to be married, although it is impossible to state precisely the place and a time when they exchanged the consent which is essential for marriage. Marriage by cohabitation with habit and repute was abolished by The Family Law (Scotland) Act 2006. It will remain an issue for the Courts for some time to come, however, since claims can still be admitted if based on a period of cohabitation that occurred before the commencement of the Act. If it is claimed that this common law style of marriage entitles the parties to the exemption under Section 18(1) IHTA 1984 in either a death or lifetime situation you should refer the file to Technical.
- parties to a bigamous marriage
- people who were formerly lawfully married but divorced before the date of death/transfer

The argument that discrimination between married and unmarried couples is in breach of Art. 14 ECHR (Prohibition of discrimination) has failed, though only narrowly.[4]

App. 1.3.1 "*Spouse" outside formal legal documents*

UK legislation at present distinguishes between a civil partner and a spouse in its terminology and, strictly, the word "spouse" does not (in the absence of special context) include a civil partner. However for (almost) all practical purposes the two are in the same position and in loose language they are elided.[5] It is tiresome to constantly refer to spouse/civil

3 The text has not yet been updated for the FA 2013 changes.

4 *Holland v IRC* [2003] STC (SCD) 43; *Burden v UK* [2007] STC 252.

5 Under foreign law, a civil partner may not be regarded as married, even though a same sex marriage may be recognised: see 70.12.2 (Meaning of "spouse" in US/UK IHT DTT).

partner. So in the discussion in this book "spouse" is generally used to mean either a spouse or a civil partner. The Law Commission does the same[6] and I expect this is standard usage outside the formal context of statutes and legal documentation such as trust deeds and wills.

App. 1.3.2 *Same-sex marriages*

The Marriage (Same Sex Couples) Act 2013 (**"M(SSC)A"**) provides separate rules for:
(1) existing legislation[7] and
(2) new legislation[8]
I refer to **"pre- and post- M(SSC)A legislation"** which is clearer.
For pre-M(SSC) A legislation, para 1 Sch 3 M(SSC)A provides:

> (1) In existing England and Wales legislation—
> (a) a reference to marriage is to be read as including a reference to marriage of a same sex couple;
> (b) a reference to a married couple is to be read as including a reference to a married same sex couple; and
> (c) a reference to a person who is married is to be read as including a reference to a person who is married to a person of the same sex.
>
> (2) Where sub-paragraph (1) requires a reference to be read in a particular way, any related reference (such as a reference to a marriage that has ended, or a reference to a person whose marriage has ended) is

---

6 Law Commission, *Intestacy & Family Provision Claims on Death* (December 2011), para 1.38: "The legal treatment of husbands, wives and civil partners is identical in the law of intestacy and family provision claims, and for brevity we use the term "spouse" in this Report to refer to all three..."

7 Section 11(7) M(SSC)A provides a definition: "In Schedules 3 and 4 "existing England and Wales legislation" means—
(a) in the case of England and Wales legislation that is primary legislation, legislation passed before the end of the Session in which this Act is passed (excluding this Act), or
(b) in the case of England and Wales legislation that is subordinate legislation, legislation made on or before the day on which this Act is passed (excluding legislation made under this Act)".

8 Section 11(7) M(SSC)A provides a definition: "In Schedules 3 and 4 ...
"new England and Wales legislation" means—
(a) in the case of England and Wales legislation that is primary legislation, legislation passed after the end of the Session in which this Act is passed, or
(b) in the case of England and Wales legislation that is subordinate legislation, legislation made after the day on which this Act is passed."

to be read accordingly.
(3) For the purposes of sub-paragraphs (1) and (2) it does not matter how a reference is expressed.

For post-M(SSC)A legislation, para 5(1) sch 3 M(SSC)A provides:

(1) This paragraph applies to provision made by—
(a) this Act and any subordinate legislation made under it, or
(b) new England and Wales legislation,
including any such provision which amends existing England and Wales legislation.

Three sets of definitions follow. The first concerns the ubiquitous terms husband/wife/widow/widower:

(2) The following expressions have the meanings given—
(a) "husband" includes a man who is married to another man;
(b) "wife" includes a woman who is married to another woman;
(c) "widower" includes a man whose marriage to another man ended with the other man's death;
(d) "widow" includes a woman whose marriage to another woman ended with the other woman's death;
and related expressions are to be construed accordingly.

The other definitions concern expressions found only after the M(SSC)A:

(3) A reference to marriage of same sex couples is a reference to—
(a) marriage between two men, and
(b) marriage between two women.
(4) A reference to a marriage of a same sex couple is a reference to—
(a) a marriage between two men, or
(b) a marriage between two women.

I do not know why a distinction is drawn between pre- and post-M(SSC)A legislation. The Act's explanatory notes discuss the provisions without answering this question.[9] For instance, the definition of "relevant

9 103.Part 1 sets out details of how particular terms used in existing legislation in England and Wales are to be read once marriage of same couples becomes possible. The particular terms mentioned in paragraph 1 are references to a marriage, a married couple or married person in existing legislation in England and Wales; these are to be read as also referring to a marriage of a same sex couple, married same sex couples or to a person married to someone of the same sex.
104.Under paragraph 1(2), such references are also to be read across to, for example, cases where a marriage has ended. A reference to a person as a widow would be read

as including a reference to a woman whose marriage to another woman ended with the other woman's death, for example.

105.Paragraph 1(3) ensures that existing England and Wales legislation will be interpreted in accordance with paragraphs 1(1) and (2) no matter what language it uses in making reference to any of the relevant concepts.

106.Paragraph 2 particularly deals with references to couples living together as if married; these are to be read as also referring to a person who is living with someone of the same sex as if they are married.

107.Paragraph 3 deals with legislation where there is existing provision which deals differently with a man and a woman living together as if married, and a same sex couple living together as if civil partners. The effect of this paragraph is to preserve the current effect for same sex couples despite the introduction of marriage of same sex couples. In other words, the current distinction is maintained by which an unmarried opposite sex couple are treated as if married, while an unmarried same sex couple not in a civil partnership are treated as if in a civil partnership.

108.Paragraph 4 ensures that the terms specified in Part 1 of Schedule 3 are not the only terms whose meaning will change once marriage of same sex couples becomes possible.

Examples

• Section 105(1) of the Children Act 1989, as amended, defines the meaning of "child of the family" for the purposes of that Act:

"'child of the family', in relation to parties to a marriage, or to two people who are civil partners of each other, means –

(a) a child of both of them, and

(b) any other child ... who has been treated by both of them as a child of their family;".

The effect of paragraph 1(1)(a) of Schedule 3 means that the reference to "parties to a marriage" is to be interpreted now as including a reference to a marriage of a same sex couple.

• Section 144(4) of the Adoption and Children Act 2002 defines the meaning of "a couple" for the purposes of that Act:

"In this Act, a couple means –

(a) a married couple, or

(aa) two people who are civil partners of each other, or

(b) two people (whether of different sexes or the same sex) living as partners in an enduring family relationship.".

Paragraph 1(1)(b) allows for the reference here to a married couple now to include a married same sex couple.

• Section 2(1) of the Offices, Shops and Railway Premises Act 1963 as amended states that: "This Act shall not apply to any premises to which it would, apart from this subsection, apply, if none of the persons employed to work in the premises is other than the husband, wife, civil partner .....of the person by whom they are so employed." The terms "husband" and "wife" here refer to a person who is married for the purposes of paragraph 1(1)(c) of Schedule 3. This means that "husband" here will be read as including a man or a woman in a marriage of a same sex couple, as well as

person" in the ITA remittance basis includes "the individual's husband or wife."[10] In new legislation that wording would include parties to a same-sex marriage. By normal rules of construction, that should not apply to pre-M(SSC)A legislation! That would be a very strange result indeed. It is suggested that the Courts should apply a commonsense approach, that (where the context requires, as it normally will) references in pre-M(SSC)A legislation to husbands and wives should include same sex spouses, even though that essentially requires one to ignore the words of schedule 3. This is consistent with s.11 M(SSC)A:

> (1) In the law of England and Wales, marriage has the same effect in relation to same sex couples as it has in relation to opposite sex couples.
> (2) The law of England and Wales (including all England and Wales legislation whenever passed or made) has effect in accordance with subsection (1).

In Northern Ireland, a same-sex marriage has the status of a civil partnership,[11] which for tax (as generally) has the same consequences as marriage. In Scotland the position is governed by the Marriage and Civil Partnership (Scotland) Act 2014.

---

a man married to a woman. In a similar way, "wife" will be read as including a woman married to another woman or a man married to a man. The result is that this section is to be read as including both male and female spouses in marriages of same sex couples.

Part 2 – New England and Wales legislation

109. Part 2 governs how new legislation made after the passing of this Act is to be interpreted. It sets out the meanings of specific words relating to marriage (such as "husband" and "wife"). It reflects the main principle of the Act, which is to put marriage of same sex couples on an equal footing with marriage of opposite sex couples. This will ensure that gender-specific terms such as "husband" keep their gender-specific effect.

110. It should be noted that in Part 7 of Schedule 4, paragraph 27 provides a power for the Secretary of State to modify or disapply the provisions of Schedule 3 in specified circumstances.

Example

• The term "husband" will in future legislation include a man who is married to another man (but not a woman married to another woman); and "wife" will include a woman who is married to another woman (but not a man married to another man) unless specific alternative provision is made.

10 See 11.4 (Relevant person: close family).

11 Schedule 2 M(SSC)A 2013.

App. 1.3.3 *Cross references*

For the definition of "spouse" in special contexts, see:
27.3.4 (Meaning of "spouse/civil partner" in settlor-interested trust provision)
70.12.2 (Meaning of "spouse" in US/UK IHT DTT)

App. 1.4 Meaning of "civil partner"

Schedule 1 Interpretation Act 1978 provides:

> "Civil partnership" means a civil partnership which exists under or by virtue of the Civil Partnership Act 2004 (and any reference to a civil partner is to be read accordingly).

This takes us to s.1(1) Civil Partnership Act 2004 which provides:

> A civil partnership is a relationship between two people of the same sex ("civil partners")—
>
> (a) which is formed when they register as civil partners of each other—
>
> (i) in England or Wales (under Part 2),
>
> (ii) in Scotland (under Part 3),
>
> (iii) in Northern Ireland (under Part 4), or
>
> (iv) outside the United Kingdom under an Order in Council made under Chapter 1 of Part 5 (registration at British consulates etc. or by armed forces personnel), or
>
> (b) which they are treated under Chapter 2 of Part 5 as having formed (at the time determined under that Chapter) by virtue of having registered an overseas relationship. ...

Thus there are two types of civil partnership:
(1) those made under UK law, and
(2) overseas relationships.

App. 1.4.1 *Overseas relationships treated as civil partnerships*

Section 212(1) CPA 2004 provides:

> For the purposes of this Act an overseas relationship is a relationship which—
>
> (a) is either
>
> [i] a specified relationship or
>
> [ii] a relationship which meets the general conditions, and
>
> (b) is registered (whether before or after the passing of this Act) with a responsible authority in a country or territory outside the

United Kingdom ...

Thus there are two types of overseas relationships:
(1) specified ones, and
(2) those not specified which meet the general conditions.

Section 213 and schedule 20 CPA 2004 defines "specified relationships":

Country or territory	**Description**
Andorra	uni estable de parella
Argentina	marriage
Argentina: Autonomous City of Buenos Aires	unión civil
Australia: Australian	
Capital Territory	civil partnership
New South Wales	a relationship registered under the Relationships Register Act 2010
Queensland	civil partnership
Tasmania	significant relationship
Victoria	registered domestic relationship
Austria	eingetragene Partnerschaft
Belgium	cohabitation légale, wettelijke samenwoning or gesetzliches zusammenwohnen; marriage
Brazil	marriage; união estável
Canada	marriage
Manitoba	the relationship referred to as common-law relationship or as union de fait
Nova Scotia	domestic partnership
Quebec	union civile or as civil union
Colombia	unión de hecho
Czech Republic	registrované partnertsví
Denmark	marriage; registreret partnerskab
Ecuador	unión civil
Finland	rekisteröity parisuhde or as registrerad partnerskap
France	pacte civile de solidarité
Germany	Lebenspartnerschaft
Greenland	the relationship referred to as nalunaarsukkamik inooqatigiinneq or as registreret partnerskab
Hungary	bejegyzett élettársi kapcsolat
Iceland	marriage; staðfesta samvist
Ireland	civil partnership
Isle of Man	civil partnership
Jersey	civil partnership
Liechtenstein	eingetragene Partnerschaft
Luxembourg	partenariat enregistré or eingetragene partnerschaft
Mexico:	
Coahuila	pacto civil de solidaridad

Mexico City Federal District	marriage; sociedad de convivencia
Netherlands	geregistreerde partnerschap; marriage
New Zealand	civil union
Norway	marriage; registrert partnerskap
Portugal	marriage
Slovenia	zakon o registraciji istospolne partnerske skupnosti
South Africa	civil partnership; marriage
Spain	marriage
Sweden	marriage; registrerat partnerskap
Switzerland	the relationship referred to as eingetragene Partnerschaft as partnenariat enregistré or as unione domestica registrata
USA:	
California	domestic partnership; marriage
Colorado	the relationship between designated beneficiaries
Connecticut	civil union; marriage
Delaware	civil union
Columbia	marriage
Hawaii	civil union; reciprocal beneficiary relationship
Illinois	civil union
Iowa	marriage
Maine	domestic partnership
Massachusetts	marriage
Nevada	domestic partnership
New Hampshire	marriage
New Jersey	civil union; domestic partnership
New York	marriage
Oregon	domestic partnership
Rhode Island	civil union
Vermont	civil union; marriage
Washington	state registered domestic partnership
Wisconsin	domestic partnership
Uruguay	unión concubinaria

Section 214 CPA 2004 explains the "general conditions":

> The general conditions are that, under the relevant law—
>
> (a) the relationship may not be entered into if either of the parties is already a party to a relationship of that kind or lawfully married,
>
> (b) the relationship is of indeterminate duration, and
>
> (c) the effect of entering into it is that the parties are—
>
> (i) treated as a couple either generally or for specified purposes, or
>
> (ii) treated as married.

App. 1.4.2 *Pre-2000 civil partnerships under foreign law: Transitional rules*

Section 215 CPA 2004 provides:

> **215 Overseas relationships treated as civil partnerships: the general rule**
> (1) Two people are to be treated as having formed a civil partnership as a result of having registered an overseas relationship if, under the relevant law, they—
> (a) had capacity to enter into the relationship, and
> (b) met all requirements necessary to ensure the formal validity of the relationship.
> (2) Subject to subsection (3), the time when they are to be treated as having formed the civil partnership is the time when the overseas relationship is registered (under the relevant law) as having been entered into.
> (3) If the overseas relationship is registered (under the relevant law) as having been entered into before this section comes into force, the time when they are to be treated as having formed a civil partnership is the time when this section comes into force.

Persons with existing overseas relationships became civil partners in England law without doing anything more.

App. 1.4.3 *The future*

Civil partnerships are now subject to a review whose terms of reference include an assessment of the need for civil partnerships now that same-sex marriage is available.[12] Abolition of civil partnerships would be a worthwhile simplification; but it remains to be seen whether that is achievable now, or must wait a generation.

App. 1.5 "Living together as husband and wife"

The Claimant Compliance Manual provides:

> **15040 Couples who are Unmarried and Not Civil Partners** [April 2010]
> ... The legislation does not say what conditions must exist before we will conclude that a couple are LTAHAW [living together as husband and wife]. We have therefore adopted the approach used by the DWP. Using the same approach for same-sex couples means they are not treated any more or less favourably. Since 1977 the Department for Work and Pensions (DWP - formerly the Benefits

12 *https://www.gov.uk/government/publications/civil-partnerships-review-terms-of-reference-and-timetable*

Agency) has followed a standard approach to the question of whether a man and woman are living together based on a list of criteria to be considered both individually and as a whole. Working Families' Tax Credit (WFTC) adopted the same criteria and this has continued for WTC and CTC. This approach ensures unmarried couples are not treated any more or less favourably than married couples.

Living together as husband and wife (LTAHAW) has its normal meaning in every day language, but the Courts and administrative practice have developed a number of criteria to help apply that meaning to every day situations. They are:-

- living in the same household - CCM15070-CCM15075
- stability of relationship - CCM15080
- financial support - CCM15090
- dependent children - CCM15100
- public acknowledgement - CCM15110

Remember that these are only indicators to help you form a sustainable view of whether a couple are living together for the purposes of the tax credit claim. They are not intended as a crude checklist and you should not apply a blanket "four out of five ticked" type test. The weight and worth of each indicator will vary from relationship to relationship and you should arrive at your conclusions on the balance of evidence, based on the facts (see CCM15060). However, you need to be aware of the changing nature of relationships - see CCM15045.

15045 Modern-Day Relationships [April 2010]

Since the LTAHAW criteria was devised in the 1970's, the United Kingdom has undergone major social and economic changes. These have had an impact on the nature of personal relationships.

In the 1970's a typical couple might not have lived together before marriage and, after marrying, they might have pooled the whole of their income with the man as the main breadwinner and the woman possibly working part-time and responsible for childcare and running the household.

By 2004, 70% of first domestic partnerships involved unmarried couples and it is now common for each party in a couple to work full-time, keep their own incomes and bank accounts and perhaps only pay money into a joint account for items of joint responsibility. Often because of demands on time both parties share childcare and domestic tasks.

It may therefore be more difficult to identify the criteria shown at CCM15040 but you should still explore all of these items.

15060 Balance of Evidence [February 2013]

It is not possible to lay down hard and fast rules about the weight and worth of the various criteria in establishing that a couple are living together. You will need to decide every case on its merits and on the balance of evidence. Sometimes the conclusion will be obvious, and at other times it will be a very fine judgement. Although you must consider each of the five criteria listed at CCM15040 you might not be able to gather evidence for each of them. For example the customer might say they have no idea what others think of their relationship.

If you are having difficulties in making up your mind about what the evidence

means, you may find it helpful to list the evidence on both sides of the argument. This should help you identify where the balance of evidence lies – though you should not base your decision on a crude numerical assessment, as some elements of the evidence may be far more critical than others.

If you still cannot decide, you may want to discuss the issues with your manager, or with another colleague in your team. If the issues are particularly difficult, you may, after consulting your manager, want to refer to your Claimant Compliance Group Manager.

Where there is no reply to your opening letter – see CCM15370.

15070 Living in the Same Household [February 2013]

The customer may admit they live in the same household as the suspected partner but that does not automatically mean they are Living Together as Husband and Wife (LTAHAW) or Living Together as Civil Partners (LTACP).

There may be any number of reasons why a man and woman share accommodation. They include:

- a couple with disabilities or ill health may care for and support each other
- one of them may require care/support to live a normal life
- the customer may provide accommodation for a friend, or relative or tenant
- the customer may have been provided with accommodation by a friend, relative or landlord in that person's own home.
- a formerly married or unmarried couple may still live in the same house until they reach a financial agreement. During periods when property prices or rents are high, the property market is sluggish, or negative equity is common, former couples may be compelled by economic necessity to share the same premises for some time after the relationship has ended- see CCM15395

The relevant factors to consider when determining whether a couple are living in the same household may be:-

- how/why the couple came together
- is rent received or paid? If so the income will (unless it is exempt under the rent a room scheme) be treated as income in the hands of the recipient.
- what kind of accommodation they share
- if there is no formal rent agreement how are costs shared? How would exceptional expenditure be met? For example, if major unexpected repairs had to be carried out or home improvements made.
- any absences from the household - why and how often - see CCM15073
- any other reasons for them living in the same household.

Even if you establish a couple are living in the same house this does not necessarily mean they are LTAHAW or LTACP. Before you can amend the award you must therefore consider the other criteria detailed at CCM15080-CCM15110.

15073 Absences From The Home [February 2013]

Absences from the home, whether occasional or regular, do not necessarily mean that a couple is not LTAHAW or LTACP. For instance, the absence could be due to:-

- work (eg. oil rig worker or long distance lorry driver)
- hospital in-patient
- holiday

- visit to relatives
- higher education
- custody of less than 52 weeks
- armed forces

This list is not exhaustive, but gives some suggestions to the types of absence. The common feature of all of these reasons for absence is their temporary nature. There is no specific period of time after which an absence ceases to be temporary and you will need to draw conclusions based on the particular facts of each case. Factors to be considered include:

- the length of the absence
- how much longer it is expected to last
- to what extent the couple have maintained contact
- their future intentions

One situation you might encounter is where the partner works away for a few days at a time and either lives with friends or in hotels/bed and breakfast accommodation. They only return to the customer's home for a couple of days at a time, the suggestion is this is purely to see the children and they stay at the customer's home as they have nowhere else to stay in the area. As well as exploring the other criteria described in CCM15080-CCM15110 you will need to establish

- the reason why they have this arrangement
- how long has the arrangement lasted
- how much longer is it likely to last?
- what would happen if the partner lost their job?

15075 Undisclosed Partner has No Other Address [February 2013]

A customer may accept that the suspected partner uses their address for mailing purposes. This could be for:

- tax and benefit purposes
- financial purposes (bank account, credit card, loan)
- for motor vehicle purposes (insurance, vehicle registration)

The customer might suggest this is because the suspected partner has no fixed abode and simply drifts around a series of friends or because their mail is not secure at their own home.

You are entitled to ask for evidence of the suspected partner's other accommodation address and often an appeal tribunal will ask for this sort of information. However, you cannot demand that they provide such information nor can you say that if they do not provide evidence of an alternative address you will treat them as LTAHAW or LTACP and terminate their award.

The absence of such evidence is not conclusive proof that the customer is living with the suspected partner. Where the customer cannot provide such evidence you must still look at all of the other criteria and decide their various strengths and weaknesses. In addition, you should consider whether it is reasonable for the suspected partner to be using the customer's address.

15080.Stability of Relationship [April 2010]

The length of time a couple have been together does not necessarily indicate how stable the relationship is. At one end of the scale you may come across couples who have known each other only a few weeks or days, but who have moved in

together with the firm intention of staying together.[13] At the other end of the scale may be couples who have divorced after say 25 years of marriage and who are still both occupying the formal marital home until they can afford to live apart. Some couples may also have a history of repeated temporary splits and reconciliations.

Relevant factors may be: –

- on what basis they split household chores and responsibilities, such as cooking, cleaning and paying bills
- whether they are both involved in caring for any children who live in the household
- whether they tend to spend their leisure time together or separately
- whether they normally take joint holidays
- whether they plan any future activities or responsibilities jointly or separately
- whether they intend to get engaged or married
- whether the relationship has a volatile history ie. the couple is known to have had several splits and reconciliations.

An established pattern of domestic or financial activity will usually indicate an established relationship.

15090 Financial Support [February 2013]

How a couple organise their finances will vary from couple to couple. Relevant factors may be:

- the existence of joint accounts or investments. If the customer claims that the joint account is being maintained because one of them is credit blacklisted, does the pattern of transactions suggest that the other person is withdrawing his/her wages for their own use? Or are there indications that the wages are available to meet general household expenditure?
- the extent to which money and other financial resources are pooled.
- who pays the household expenses?
- whether the suspected partner makes regular payments to the customer, and if so, what they are for.
- whether the suspected partner would provide financial support if the customer's income ceased.
- whether the customer would support the suspected partner if their income ceased.
- whether a set amount of maintenance to be paid by the absent parent following a decision by the CSA or a binding agreement between the parties.

At any meeting you should attempt to establish the customer's incomings and outgoings so that you can see whether they could exist on their own income. If you have already seen bank statements and household bills you should be ready to challenge suspect items. For example deposits into the bank account, direct

---

13 The RDR Manual makes the same point:

33030. Relevant person - definition [July 2010]

... There is a no minimum period for cohabitation; it is a question of fact as to whether two individuals are living together as spouses or civil partners.

debits, patterns of withdrawal or any expenses for which you would have expected to see bills but none have been produced.

15100 Dependent Children [February 2013]

Joint responsibility for a child or children (who may belong to either or both of the couple) may be an indication that the couple is LTAHAW or LTACP, but it is not conclusive proof. Relevant factors may be:

- parentage of the child or children.
- whether, and how, the couple exercises joint responsibility, for example:
  - who visits the school or delivers/collects to and from the school
  - who would the school contact in an emergency
  - who arranges and takes the children to and from medical and dental appointments
  - who exercises control of or offers guidance to the children
  - who the Child Benefit Office has as the alternative payee
  - who provides financial support/pocket money/pays for treats
  - who buys the clothes and or toys.

An intention to adopt by the non-birth partner could be a particularly telling indication of the couple's long term view of the family unit. You should not, because of its sensitivity, seek out the information; but if it is spontaneously offered you should give it proper weight in arriving at your conclusions. Be wary of drawing conclusions about the current relationship based on say the fact that the children continue to be known by the surname of the ex-husband or ex-partner as this is common practice and is not evidence of a continuing relationship between the parents. Nor does the presence of photographs of the child's father or mother indicate the customer is living with that person.

15110 Public Acknowledgement [February 2013]

An important consideration is how the outside world (including family, friends, neighbours, social workers, employers, schools, childcare providers, etc.), perceive the couple. Relevant factors may be:

- Whether both members use the same surname
- Whether schools/child care providers/employers/others regard them as a couple
- Whether they engage in social activities together
- Whether they are joint members of clubs/leisure centres/societies
- Whether they plan and organise their lives jointly.

CCM5500 lists the third parties you can legally approach for information during the course of your examination. You cannot obtain information from family members, friends, neighbours, social workers or schools, unless they also fall into one of the categories listed at CCM5500.

For example – A family member may also be an employer, or a neighbour may also provide registered child care. But it is perfectly acceptable for you to ask the customer what their family/neighbours etc. would say if they were asked whether they regarded him/her as being a member of a couple.

15120 Sexual Relationship [February 2013]

DWP used to consider the couple's sexual relationship as one of the criteria for determining LTAHAW but this is no longer the case. The couple's sexual relationship is of little help in deciding whether they are living together as

husband and wife or living together as civil partners. There may be no sexual relations in a marriage or civil partnership and sexual relationships of a casual nature, where neither partner has any lasting commitment to the other, are a common feature of contemporary life.

You must not ask any questions about a couple's sexual relationship. If the customer introduces the subject, you should take note of any information volunteered but should bear in mind (and explain to the customer) that it is unlikely to have any relevance to the question of whether they are living together as husband and wife.

Appeal tribunals sometimes ask customers about their sexual relationships, however, it remains our policy that you must not ask such questions. If a tribunal asks you why you have not established the position you should say that our internal policy, in common with that in DWP, is not to ask about this side of the relationship.

In one particular appeal case the Social Security Commissioner said that where there has never been a sexual relationship between the parties, strong alternative grounds are needed to reach the conclusion that the relationship is akin to husband and wife. However, absence of a sexual relationship at anytime where there has been one in the past is not itself indicative that the couple are not LTAHAW.

Where the customer's sole objection to your conclusion is that they have no sexual relationship with the suspected partner or they appeal against a decision on these grounds you should seek further advice via your TALLO from Technical Advice Line.

15150 Reasons for Failure To Report A Partner [February 2013]

Customers may offer a range of reasons or excuses for their failure to report the existence of a partner. These may include:

- S/he does not stay here all of the time - see CCM15073.
- S/he lives at another address but uses my address as a post box - see CCM15075.
- I thought s/he could stay 3 nights a week without it affecting my entitlement.
- S/he does not give me any money, or payments are not regular - see CCM15090.
- S/he is not the mother/father of my child (ren).
- S/he is a lodger - see CCM15070.
- S/he is just a friend.
- It is hard being a single parent.
- The Government does not pay people like me enough.
- The rules on income are not fair.
- We do not have a sexual relationship - see CCM15120.

The 3 nights rule is a popular misconception. No such legal loophole exists. If a suspected partner spends 3 nights with the customers on a regular basis, s/he may be a member of an established couple. Also, the children's parentage is not, in isolation, reliable evidence.

You will need to explain to the customers the criteria which we use to determine whether they are living together as husband and wife or living together as civil partners - see CCM15040. You will then need to establish the facts by

considering all the evidence from all legally available sources, including the customer.

15160 Respecting Customer's Privacy [February 2013]

In all your contacts with customers you must always be aware of Human Rights issues, and of the need to respect the customer's privacy. It is particularly important that you adopt this approach in any discussions which may touch on their private life.

You should avoid any impression that you are examining the customer's home or household for signs of any such relationship. You must not ask about the customer's sleeping arrangements in an attempt to find out whether s/he shares a bedroom with another adult.

Customers may however volunteer information of this kind when, for example, confirming the number of children who live there; describing how friends or relatives sometimes stay to help out with childcare or explaining that their ex-partners stays in the spare room whenever they come to visit the children. If the customer simply says their partner stays overnight when they come to visit or care for the children you must not ask where they sleep.

You should not normally ask customers about the number of bedrooms in their house but if the customer has suggested that an adult who lives in the house is a paying lodger, it is reasonable to expect the lodger would have his/her room rather than sleeping on a sofa or floor.

In the circumstances it will be appropriate to ask how many bedrooms there are and what room(s) the lodger occupies, and to test the answer in the light of other information/evidence. The number of bedrooms and the ages/sexes of the other occupants of the house will be relevant. For example the customer may live in a 3 bedroom house with 2 children, a boy of 12 and a girl of 16, and it will be reasonable to ask what arrangements have been made so that the lodger can occupy his/her own room.

It is important that any questions you need to ask should be directed at establishing the room the lodger occupies and their relationship with the customer and not at establishing who the customer sleeps with.

15170 (This text has been withheld because of exemptions in the Freedom of Information Act 2000) [February 2013]

15180 (This text has been withheld because of exemptions in the Freedom of Information Act 2000) [February 2013]

15190 Customer Has Been Involved in Different Relationships [February 2013]

Where the customer has been involved in relationships with different partners at different times during the year, you should treat the ending of one and beginning of another as a CoC on each occasion. However, where the customer has split up and reconciled with the same partner, you should normally ignore the splits and treat the customer and partner as a couple throughout the period.

If the customer objects to this approach you should consider whether in spite of the temporary break in the relationship, the customer and partner would still be considered a couple in accordance with other relevant criteria eg. nature of any financial support. If you cannot establish that the couple were effectively living together throughout the period, you should apply the CoC provisions to each

break in the relationship.

15195 Date on which Customers Became A Couple [February 2013]

The question of whether the customer was in reality a member of a couple is not just relevant to the date at which the claim commenced. Becoming or ceasing to be a member of a couple is a notifiable change of circumstances so it is also relevant at all other times during the year.

You will sometimes have evidence that places the suspected partner at the customer's address at one or more dates during the year for example a series of letters signed by the partner to his/her employer or tax office. However, you may not be able to point to anything which strongly indicates their presence at the beginning of the year or claim period.

When challenged about the existence of a partner, customers may be reluctant to admit to their failure to declare the partner on the claim, claiming instead that s/he only moved in some time later.

You will need to use your judgement in these cases. As a general rule if you are confident the evidence you have is reasonable proof that the customer was a member of a couple from the date the claim commenced, you should put that date forward to the customer. If you feel there is some doubt around that date, or you would have difficulty in substantiating it, but you are convinced that the customer was a member of a couple at some point during the year, you should propose to the customer an appropriate date from which they should be treated as a member of a couple. You should be prepared to negotiate the date with the customer bearing in mind the important factor of getting the claim on the right basis for the future. However, you must remember that your decision may have to be defended before an appeal tribunal so you must have evidence to support the proposal.

15200 Information held by HMRC [February 2013]

A case identified for enquiry on the grounds of a suspected undisclosed partner will usually have been selected because information held by us indicates another adult living at the customer's address. The CCRO will have checked HMRC and other databases and other available information sources, before passing the case to you. You will therefore already have most of the evidence you will want to discuss with the customer before you open the case.

The information is likely to include some or all of the following sources.

Type	**Identifies**
Voter's List	Suspected partner listed?
HMC address database	What address does the HMRC hold for suspected partner?
Telephone Directory	What address/phone number is listed for suspected partner?
Yellow Pages/Other	Ditto for self employed suspected partner.
SA	Ditto for self employed suspected partner.
TRP Data Mart	Any joint bank accounts etc, listed?
COP/CODA	Any additional allowances?
Child Benefit	Partner shown on original claim/as alternative payee?
Previous Claims	Was partner shown on earlier WFTC/DPTC/WTC/CTC claims?
Equifax/Experian	Is suspected partner shown at customer's address?

DWP	Intelligence suggesting a live-in partner?
CSA	Maintenance paid? Reference to partner in interview notes.
Housing or Council Tax Benefit	Details of occupants. CT reduction for single adult being Received?
Letters on File	Any indication (particularly recent) of suspected partner living at customer's address?

15210. Information from Customer [February 2013]

Despite the information that will have been given to you by the CCRO there will also be information you can only obtain from the customer or with the customer's agreement, for example:

- Bank statements - are they joint? If not, do they contain evidence of joint incomings/outgoings/spending?
- Utilities and other bills - who are these sent to?
- Council tax bills - a single occupier is entitled to a reduction, which will be identified on the statement.
- Mortgage claims/statement - whose name appears on any documentation?
- Rent book - whose name appears in the book as landlord and tenant?
- Hire purchase agreements - whose name is on the documents?
- Services and rentals eg. TV, satellite, telephone agreements - whose name are they in?
- Marriage certificate - does it show a recent marriage to the suspected partner?

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

15220 Short Term Relationships [February 2013]

In some cases the customer might admit they had a partner during the period under review but says they are no longer a couple. You will need to review the facts to establish whether they are in fact still a couple.

Where the customer admits to a short term relationship which you accept has now ended you will need to decide whether the relationship amounted to them living together as husband and wife (LTAHAW) or living together as civil partners (LTACP). You will need to explore the criteria at CCM15040.

There are no hard and fast rules as to the length of time a couple are together before we consider it to be LTAHAW or LTACP. If they are LTAHAW or LTACP then we will treat them as a couple for tax credit purposes even if they are only together a short time. However, in reality a short term relationship (less than 3 months) is unlikely to meet the criteria at CCM15040. They may satisfy one of the criteria but not the others. In such cases you will have to use your judgement and you should consult your manager if necessary. Remember your decision may have to be defended before an appeal tribunal so you must have evidence to support the proposal.[14]

---

14 Earlier versions of this guidance are (1) The Independent Taxation Manual (paragraphs now withdrawn) and (2) the ACG–WFTC/DPTC Applicant Compliance Guide para 9010 (not set out here as it adds nothing to the Claimant Compliance Manual). The text is in the 9th ed of this work.

The Law Commission consultation paper "Intestacy and Family Provision" (October 2009) has some useful comments:

> 2.70 The requirement that the applicant should have been living "as" the spouse or civil partner of the deceased has been the subject of analysis by the courts. In *Re Watson*, it was said that the test is:
>
> > whether, in the opinion of a reasonable person with normal perceptions, it could be said that the two people in question were living together as husband and wife; but, when considering that question, one should not ignore the multifarious nature of marital relationships.[15]
>
> 2.71 Accordingly, it was not determinative in that case that Mr Watson and Miss Griffiths had not continued a sexual relationship during the period when they were living together, nor that they had informally agreed to share outgoings, nor that Miss Griffiths had rejected Mr Watson's marriage proposal. On the whole of the evidence the judge reached the conclusion that Miss Griffiths had been living "as the wife" of Mr Watson.
>
> 2.72 The couple must have been living in the same household, which means that it does not matter if the parties each have a separate home, provided that they have formed one joint household. It has been said that this seems:
>
> > To have elements of permanence, to involve a consideration of the frequency and intimacy of contact, to contain an element of mutual support, to require some consideration of the degree of voluntary restraint upon personal freedom which each party undertakes, and to involve an element of community of resources.[16]

The Law Commission also consider the salacious possibility that an individual may have more than one cohabitee:

> 4.108 ... where the deceased was a party to more than one cohabiting relationship at the date of death, it may be more difficult to determine whether the deceased "was sufficiently involved in either household for

15 [Footnote original] [1999] 1 FLR 878, 883, by Lord Neuberger of Abbotsbury.

16 [Footnote original] *Churchill v Roach* [2002] EWHC 3230, [2004] 3 FCR 744, 761. See also *Kotke v Saffarini* [2005] EWCA Civ 221, [2005] 2 FLR 517, a case on similar wording in section 1(3)(b) of the Fatal Accidents Act 1976, where the Court of Appeal held at [59] that it was correct to distinguish between "wanting and intending to live in the same household, planning to do so, and actually doing so".

one or both to amount to cohabitation at all".[17] However, cases may arise in which it can be shown that both partners are cohabitants within the definition adopted, for example where there are religious marriages which do not qualify as legal marriages.

App. 1.5.1 *Prohibited Relationships*

The Claimant Compliance Manual provides:

> **15025 Prohibited Relationships** [February 2013]
> The law prohibits certain relationships by relatives. For example a woman cannot marry or form a civil partnership with her grandfather or her uncle and a man cannot marry or form a civil partnership with his daughter or sister. A full list of prohibited relationships is contained at CCM15030.
> Where you establish that a customer is living as a couple with a relative who appears on the list of prohibited relationships we do not consider this to be an LTAHAW or LTACP situation. The reason for this is that the couple cannot marry or become civil partners in law so we cannot say they are living together as husband and wife as they could never be husband and wife or living together as civil partners as they could never be civil partners. The customer will therefore be treated as a single customer.
> **15030 List of Prohibited Relationships - Marriage** [February 2013]
> Throughout the United Kingdom and Guernsey, Jersey and the Isle of Man, the law prohibits certain blood relatives, step relatives and relatives-in-law from getting married.
> A man cannot marry his:
> • mother
> • adopted mother/ former adoptive mother
> • daughter
> • adoptive daughter/ former adoptive daughter
> • grandmother
> • granddaughter
> • sister
> • aunt
> • niece
> A woman cannot marry her:
> • father
> • adopted father/ former adoptive father
> • son
> • adoptive son/ former adoptive son
> • grandfather
> • grandson
> • brother

17 [Footnote original] Cohabitation: the Financial Consequences of Relationship Breakdown (2007) Law Com No 307, para 3.68.

- uncle
- nephew

Additionally, people cannot marry if:

- either of them is aged less than 16, or
- in a 'step' relationship, the younger person had, before reaching age 18:
- lived in the same household as the older person, and/or
  - – been treated as a child of the older person's family, or
- in an 'in-law' relationship:
  - – either person involved is aged less than 21, and/or
  - – any person originally involved in creating the 'in-law' relationship' is still alive, for example we do not consider LTAHAW if a man lives in the same household as his daughter-in-law and the man's son or wife is still alive.

If you are unsure whether the customer is in a prohibited relationship you should seek further advice from the Benefits and Credits Technical Team in Preston.

15032. List of Prohibited Relationships - Civil Partners [April 2010]

The law in the United Kingdom prohibits certain blood relatives, step relatives and relatives by civil partnership from forming a civil partnership. The legislation in Scotland is slightly different from the legislation that applies in England, Wales and Northern Ireland.

In England, Wales and Northern Ireland someone cannot form a civil partnership with their:

- parent
- adopted parent/ former adoptive parent
- child
- adoptive child/ former adoptive child
- grandparent
- grandchild
- brother, sister, half-brother or half-sister
- parent's brother, sister, half-brother or half-sister
- niece or nephew

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of grandparent
- Former civil partner of parent
- Former spouse of grandparent
- Former spouse of parent
- Grandchild of former civil partner
- Grandchild of former spouse

If:

- either of them is aged less than 21, or
- the younger person had, before reaching age 18:
- lived in the same household as the older person, and/or
- been treated as a child of the older person's family, or

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse

- Former civil partner of parent
- Former spouse of parent

If:

- either person involved is aged less than 21, and/or
- any person originally involved in creating the relationship is still alive, for example we do not consider LTACP if a woman lives in the same household as her daughter-in-law and the woman's son or husband is still alive.

In Scotland someone cannot form a civil partnership with their:

- parent
- adopted parent/ former adoptive parent
- child
- adoptive child/ former adoptive child
- grandparent
- grandchild
- brother, sister, half-brother or half-sister
- parent's brother, sister, half-brother or half-sister
- niece or nephew

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of grandparent
- Former civil partner of parent
- Former spouse of grandparent
- Former spouse of parent
- Grandchild of former civil partner
- Grandchild of former spouse

App. 1.5.2 *Same-sex cohabitees*

The M(SSC)A again provides separate rules for existing and for new legislation. Para 2 Sch 3 M(SSC)A provides:

> (1) In existing England and Wales legislation—
>
> (a) a reference to persons who are not married but are living together as a married couple is to be read as including a reference to a same sex couple who are not married but are living together as a married couple;
>
> (b) a reference to a person who is living with another person as if they were married is to be read as including a reference to a person who is living with another person of the same sex as if they were married.
>
> (2) Where sub-paragraph (1) requires a reference to be read in a particular way, any related reference (such as a reference to persons formerly living together as a married couple) is to be read accordingly.
>
> (3) For the purposes of sub-paragraphs (1) and (2) it does not matter how a reference is expressed.

3 (1) This paragraph applies to existing England and Wales legislation which deals differently with—

(a) a man and a woman living together as if married, and

(b) two men, or two women, living together as if civil partners.

(2) If two men, or two women, are living together as if married, that legislation applies to them in the way that it would apply to them if they were living together as civil partners.

For new legislation, para 5 M(SSC)A provides:

(1) This paragraph applies to provision made by—

(a) this Act and any subordinate legislation made under it, or

(b) new England and Wales legislation, including any such provision which amends existing England and Wales legislation.

..

(5) A reference to a same sex couple who are not married but are living together as a married couple is a reference to—

(a) two men who are not married but are living together as a married couple, or

(b) two women who are not married but are living together as a married couple.

Fortunately, for tax purposes, and most other purposes, it will not be necessary to distinguish between living together as civil partners or as a married couple.

App. 1.6 Meaning of "child"

In the absence of a specific definition, the position is correctly explained in RDR3:

> **C15** A child can be either an individual's own natural child or a child they have adopted. It does not include step-children, unless the individual has adopted them.

Sometimes step-children are expressly included.

APPENDIX TWO

CONSTRUCTION OF DEEMING PROVISIONS

App. 2.1 Construction of deeming provisions

The general topic of the interpretation (or construction) of statutes requires a book to itself, and many such books have been written. However most of the principles of interpretation can only be expressed at a high level of generality which makes their application doubtful and their usefulness to the practitioner questionable. In short, as Voltaire observed, language is difficult to put into words.

This appendix concerns the specific topic of the construction of deeming provisions. These are common in tax statutes, and the same issues arise at various points in this book. It is therefore convenient to consider them as a separate topic.

The general rule of construction which applies to deeming provisions is this:

> If you are bidden to treat an imaginary state of affairs as real, you must surely, unless prohibited from doing so, also imagine as real the consequences and incidents which, if the putative state of affairs had in fact existed, must inevitably have flowed from or accompanied it.[1]
>
> ... [B]ecause one must treat as real that which is only deemed to be so, one must treat as real the consequences and incidents inevitably flowing from or accompanying that deemed state of affairs...[2]

However context can show that the general rule should not be applied. It is merely a general canon of construction from which "only limited assistance can be derived in choosing between alternative interpretations

2 *Marshall v Kerr* 67 TC 56 at p.79A.

of the Act".[3] Experience shows that Parliament has often failed to foresee all the consequences of its deeming, and nowadays the courts apply deeming provisions in a purposive and context-sensitive manner.[4] This is reaffirmed in *Bricom v IRC*[5] where the Court of Appeal referred to the dictum:

> The hypothetical must not be allowed to oust the real further than obedience to the statute compels.

The Court of Appeal said:

> ... I do not read this as intending to lay down a special rule which requires a statutory hypothesis to be narrowly and literally construed. The scope of a deeming provision is a question of construction and is not subject to any special rule. As on any other question of statutory construction, the Court must attempt to ascertain the intention of Parliament from the words used in the light of the legislative purpose. A statutory hypothesis, no doubt, must not be carried further than the legislative purpose requires, but the extent to which it must be carried depends upon ascertaining what that purpose is.

---

3 *Russell v IRC* [1988] STC 195 at p.205.

4 In *Murphy v Ingram* [1973] Ch 363 at p.446 Megarry J said:

> A research student in search of a suitable topic for a thesis might do worse than to choose as his subject "the Dangers of Deeming".

But the modern approach reduces these dangers and *Murphy* itself would be decided differently today. For an example, see *De Rothschild v Lawrenson* 67 TC 300 at p.316.

5 *Bricom v IRC* 70 TC 272.

APPENDIX THREE

WHAT DO WE MEAN BY "REAL"?

App. 3.1 Introduction

The word "real" (and similar expressions such as "genuine") are often casually used, by lawyers and others, but they require careful thought. The most profound treatment I know is JL Austin, *Sense and Sensibilia*[1] Chapter 7. I set that out here in full with kind permission of OUP. If it was required reading before anyone wrote the word "real", a great deal of confusion might be avoided.

BUT NOW, PROVOKED LARGELY BY THE FREQUENT AND unexamined occurrences of 'real', 'really', 'real shape', &c, in the arguments we have just been considering, I want to take a closer look at this little word 'real'. I propose, if you like, to discuss the Nature of Reality a genuinely important topic, though in general I don't much like making this claim.

There are two things, first of all, which it is immensely important to understand here.

1. 'Real' is an absolutely *normal* word, with nothing new-fangled or technical or highly specialized about it. It is, that is to say, already firmly established in, and very frequently used in, the ordinary language we all use every day. Thus *in this sense* it is a word which has a fixed meaning, and so can't, any more than can any other word which is firmly established, be fooled around with *ad lib*. Philosophers often seem to think that they can just 'assign' any meaning whatever to any word; and so no doubt, in an absolutely trivial sense, they can (like Humpty-Dumpty).

---

1 The text of the entire book is accessible on:
http://selfpace.uconn.edu/class/percep/AustinChs1-6.pdf;
http://selfpace.uconn.edu/class/percep/AustinChs7-11.pdf

There are some expressions, of course, 'material thing' for example, which only philosophers use, and in such cases they can, within reason, please themselves; but most words are *in fact* used in a particular way already, and this fact can't be just disregarded. (For example, some meanings that have been assigned to 'know' and 'certain' have made it seem outrageous that we should use these terms as we actually do; but what this shows is that the meanings assigned by some philosophers are *wrong*.) Certainly, when we have discovered how a word is in fact used, that may not be the end of the matter; there is certainly no reason why, in general, things should be left exactly as we find them; we may wish to tidy the situation up a bit, revise the map here and there, draw the boundaries and distinctions rather differently. But still, it is advisable always to bear in mind *(a)* that the distinctions embodied in our vast and, for the most part, relatively ancient stock of ordinary words are neither few nor always very obvious, and almost never just arbitrary; *(b)* that in any case, before indulging in any tampering on our own account, we need to find out what it is that we have to deal with; and *(c)* that tampering with words in what we take to be one little corner of the field is always liable to have unforeseen repercussions in the adjoining territory. Tampering, in fact, is not so easy as is often supposed, is not justified or needed so often as is often supposed, and is often thought to be necessary just because what we've got already has been misrepresented. And we must always be particularly wary of the philosophical habit of dismissing some (if not all) the ordinary uses of a word as 'unimportant', a habit which makes distortion practically unavoidable. For instance, if we are going to talk about 'real', we must not dismiss as beneath contempt such humble but familiar expressions as 'not real cream'; this may save us from saying, for example, or seeming to say that what is not real cream must be a fleeting product of our cerebral processes.

2. The other immensely important point to grasp is that 'real' is *not* a normal word at all, but highly exceptional; exceptional in this respect that, unlike 'yellow' or 'horse' or 'walk', it does not have one single, specifiable, always-the-same *meaning*. (Even Aristotle saw through this idea.) *Nor* does it have a large number of different meanings - it is not *ambiguous*, even 'systematically'. Now words of this sort have been responsible for a great deal of perplexity. Consider the expressions 'cricket ball', 'cricket bat', 'cricket pavilion',' cricket weather'. If someone did not know about cricket and were obsessed with the use of such 'normal' words as 'yellow', he might gaze at the ball, the bat, the

building, the weather, trying to detect the 'common quality' which (he assumes) is attributed to these things by the prefix 'cricket'. But no such quality meets his eye; and so perhaps he concludes that 'cricket' must designate a *non-natural* quality, a quality to be detected not in any ordinary way but by *intuition*. If this story strikes you as too absurd, remember what philosophers have said about the word 'good'; and reflect that many philosophers failing to detect any ordinary quality common to real ducks, real cream, and real progress, have decided that Reality must be an *a priori* concept apprehended by reason alone.

Let us begin, then, with a preliminary, no doubt rather haphazard, survey of some of the complexities in the use of 'real'. Consider, for instance, a case which at first sight one might think was pretty straightforward - the case of a 'real colour'. What is meant by the 'real' colour of a thing? Well, one may say with some confidence, that's easy enough: the *real* colour of the thing is the colour that it looks to a normal observer in conditions of normal or standard illumination; and to find out what a thing's real colour is, we just need to be normal and to observe it in those conditions.

But suppose *(a)* that I remark to you of a third party, 'That isn't the real colour of her hair'. Do I mean by this that, if you were to observe her in conditions of standard illumination, you would find that her hair did not look that colour? Plainly not - the conditions of illumination may be standard already. I mean of course, that her hair has been *dyed*, and normal illumination just doesn't come into it at all. Or suppose that you are looking at a ball of wool in a shop, and I say, 'That's not its real colour.' Here I *may* mean that it won't look that colour in ordinary daylight; but I *may* mean that wool isn't that colour before it's dyed. As so often, you can't tell what I mean just from the words that I use; it makes a difference, for instance, whether the thing under discussion is or is not of a type which is *customarily* dyed.

Suppose *(b)* that there is a species of fish which looks vividly multi-coloured, slightly glowing perhaps, at a depth of a thousand feet. I ask you what its real colour is. So you catch a specimen and lay it out on deck, making sure the condition of the light is just about normal, and you find that it looks a muddy sort of greyish white. Well, is *that* its real colour? It's clear enough at any rate that we don't have to say so. In fact, is there any right answer in such a case?

Compare: 'What is the real taste of saccharine?' We dissolve a tablet in

a cup of tea and we find that it makes the tea taste sweet; we then take a tablet neat, and we find that it tastes bitter. Is it *really* bitter, or *really* sweet?

(c) What is the real colour of the sky? Of the sun? Of the moon? Of a chameleon? We say that the sun in the evening sometimes looks red - well, what colour is it *really*? (What are the 'conditions of standard illumination' for the sun?)

(d) Consider a *pointilliste* painting of a meadow, say; if the general effect is of green, the painting may be composed of predominantly blue and yellow dots . What is the real colour of the painting?

(e) What is the real colour of an after-image? The trouble with this one is that we have no idea what an alternative to its 'real colour' might be. Its apparent colour, the colour that it looks, the colour that it appears to be? - but these phrases have no application here. (You might ask me, 'What colour is it really?' if you suspected that I had lied in telling you its colour. But 'What colour is it really?' is not quite the same as 'What is its real colour?').

Or consider 'real shape' for a moment. This notion cropped up, you may remember, seeming quite unproblematic, when we were considering the coin which was said to 'look elliptical' from some points of view; it had a real shape, we insisted, which remained unchanged. But coins in fact are rather special cases. For one thing their outlines are well defined and very highly stable, and for another they have a *known* and *nameable* shape. But there are plenty of things of which this is not true. What is the real shape of a cloud? And if it be objected, as I dare say it could be, that a cloud is not a 'material thing' and so not the kind of thing which has to have a real shape, consider this case: what is the real shape of a cat? Does its real shape change whenever it moves? If not, in what posture *is* its real shape on display? Furthermore, is its real shape such as to be fairly smooth-outlined, or must it be finely enough serrated to take account of each hair. It is pretty obvious that there is *no* answer to these questions - no rules according to which, no procedure by which, answers are to be determined. Of course, there are plenty of shapes which the cat definitely is not - cylindrical, for instance. But only a desperate man would toy with the idea of ascertaining the cat's real shape 'by elimination'.

Contrast this with cases in which we *do* know how to proceed: 'Are those real diamonds?', 'Is that a real duck?' Items of jewellery that more or less closely resemble diamonds may not be real diamonds because they are paste or glass; that may not be a real duck because it is a decoy, or a

toy duck, or a species of goose closely resembling a duck, or because I am having a hallucination. These are all of course quite difference cases. And notice in particular *(a)* that, in most of them 'observation by a normal observer in standard conditions' is completely irrelevant; *(b)* that something which is not a real duck is not a *non-existent* duck, or indeed a non-existent anything; and *(c)* that something existent, e.g. a toy, may perfectly well not be real, e.g. not a real duck.[2]

Perhaps by now we have said enough to establish that there is more in the use of 'real' than meets the cursory eye; it has many and diverse uses in many diverse contexts. We must next, then, try to tidy things up a little; and I shall now mention under four headings what might be called the salient features of the use of 'real' - though not *all* these features are equally conspicuous in all its uses.

1. First, 'real' is a word that we may call *substantive-hungry*. Consider:
   'These diamonds are real';
   'These are real diamonds'.

This pair of sentences looks like, in an obvious grammatical respect, this other pair:

'These diamonds are pink';
'These are pink diamonds'.

But whereas we can *just* say of something 'This is pink', we can't *just* say of something 'This is real'. And it is not very difficult to see why. We can perfectly well say of something that it is pink without knowing, without any reference to, what it *is*. But not so with 'real'. For one and the same object may be both a real *x* and not a real *y*; an object looking rather like a duck may be a real decoy duck (not just a toy) but not a real duck. When it isn't a real duck but a hallucination, it may still be a real hallucination - as opposed, for instance, to a passing quirk of a vivid imagination. That is, we must have an answer to the question ' A real *what*?', if the question 'Real or not?' is to have a definite sense, to get any

---

2 'Exist', of course, is itself extremely tricky. The word is a verb, but it does not describe something that things do all the time, like breathing, only quieter - ticking over, as it were, in a metaphysical sort of way. It is only too easy to start wondering what, then, existing *is*. The Greeks were worse off than we are in this region of discourse - for our different expressions 'to be', 'to exist' and 'real' they made do with the single word ..... We have not their excuse for getting confused on this admittedly confusing topic.

foothold. And perhaps we should also mention here another point - that the question 'Real or not?' does not always come up, can't be raised. We *do* raise this question only when, to speak rather roughly, suspicion assails us - in some way or other things may not be what they seem; and we *can* raise this question only if there *is* a way, or ways, in which things may be not what they seem. What alternative is there to being a 'real' after-image?

'Real' is not, of course, the only word we have that is substantive-hungry. Other examples, perhaps better known ones, are 'the same' and 'one'. The same *team* may not be the same *collection of players*; a body of troops may be one *company* and also three *platoons*. Then what about 'good'? We have here a variety of gaps crying out for substantives - 'A good *what*?', Good *at* what? - a good book, perhaps, but not a good novel; good at pruning roses, but not good at mending cars.[3]

2. Next, 'real' is what we may call a *trouser-word*. It is usually thought, and I dare say usually rightly thought, that what one might call the affirmative use of a term is basic - that, to understand '*x*', we need to know what it is to be *x*, or to be an *x*, and that knowing this apprises us of what it is *not* to be *x*, not to be an *x*. But with 'real' (as we briefly noted earlier) it is the *negative* use that wears the trousers. That is, a definite sense attaches to the assertion that something is real, a real such-and-such, only in the light of a specific way in which it might be, or might have been, *not* real. 'A real duck' differs from the simple ' a duck' only in that it is used to exclude various ways of being not a real duck - but a dummy, a toy, a picture, a decoy, &c.; and moreover I don't know *just* how to take the assertion that it's a real duck unless I know *just* what, on that particular occasion, the speaker has it in mind to exclude. This, of course, is why the attempt to find a characteristic common to all things that are or could be called 'real' is doomed to failure; the function of 'real' is not to contribute positively to the characterisation of anything, but to exclude possible ways of being *not* real - and these ways are both numerous for particular kinds of things, and liable to be quite different for things of different kinds. It is identify of general function combined with immense diversity in specific applications which gives to the word 'real' the, at first sight,

---

3 In Greek the case of *σοφος* [wise] is of some importance; Aristotle seems to get into difficulties by trying to use *σοφια* [wisdom] 'absolutely', so to speak, without specification of the field in which *σοφια* is exercised and shown. Compare on *δεινοτης* [cunning] too.

baffling feature of having neither one single 'meaning', nor yet ambiguity, a number of different meanings.

3. Thirdly, 'real' is (like 'good') a *dimension-word*. I mean by this that it is the most general and comprehensive term in a whole group of terms of the same kind, terms that fulfil the same function. Other members of this group, on the affirmative side, are, for example, 'proper', 'genuine', 'live', 'true', 'authentic', 'natural'; and on the negative side, 'artificial', 'fake', 'false', 'bogus', 'makeshift', 'dummy', 'synthetic', 'toy' - and sch nouns as 'dream', 'illusion', 'mirage', 'hallucination' belong here as well.[4] It is worth noticing here that, naturally enough, the *less* general terms on the affirmative side have the merit, in many cases, of suggesting more or less definitely what it is that is being excluded; they tend to pair off, that is, with particular terms on the negative side and thus, so to speak, to narrow the range of possibilities. If I say that I wish the university had a proper theatre, this suggest that it has at present a *makeshift* theatre; pictures are genuine as opposed to *fake*, silk is natural as opposed to *artificial*, ammunition is live as opposed to *dummy*, and so on. In practice, of course, we often get a clue to what it is that is in question from the substantive in the case, since we frequently have a well-founded antecedent idea in what respects the kind of thing mentioned could (and could not) be 'not real'. For instance, if you ask me 'Is this real silk?' I shall tend to supply 'as opposed to artificial', since I already know that silk is the kind of thing which can be very closely simulated by an artificial product. The notion of its being *toy* silk, for instance, will not occur to me.[5]

A large number of questions arises here - which I shall not go into - concerning both the composition of these families of 'reality' words and 'unreality' words, and also the distinctions to be drawn between their individual members. Why, for instance, is being a *proper* carving knife one way of being a real carving knife, whereas being *pure* cream seems

---

4 Of course, not all the uses of all these words are of the kind we are here considering - though it would be wise not to assume, either, that any of their uses are *completely* different, *completely* unconnected.

5 Why not? Because silk can't be a '*toy*'. Yes, but why not? Is it that a toy is, strictly speaking, something quite small, and specially made or designed to be manipulated in play? The water in toy beer-bottles is not toy beer, but *pretend* beer. Could a toy watch actually have clockwork inside and show the time correctly? Or would that be just a *miniature* watch?

not to be one way of being *real* cream? Nor to put it differently: how does the distinction between real cream and synthetic cream differ fro the distinction between pure cream and adulterated cream? Is it just that adulterated cream still is, after all, *cream*? And why are false teeth called 'false' rather than, say, 'artificial'? Why are artificial limbs so-called, in *preference* to 'false'? Is it that false teeth, beside doing much the same job as real teeth, look, and are meant to look, *deceptively* like real teeth? Whereas an artificial limb, perhaps, is meant to do the same job, but is neither intended, nor likely, to be *passed off* as a real limb.

Another philosophically notorious dimension-word which has already been mentioned in another connection as closely comparable with 'real', is 'good'. 'Good' is the most general of a very large and diverse list of more specific words, which share with it the general function of expressing commendation, but differ among themselves in their aptness to, and implications in, particular contexts. It is a curious point, of which Idealist philosophers used to make much at one time, that 'real' itself, in certain uses, may belong to this family. 'Now this is a *real* carving knife!' May be one way of saying that this is a good carving knife.[6] And it is sometimes said of a bad poem, for instance, that it isn't really a poem at all; a certain standard must be reached, as it were, even to *qualify*.

4. Lastly, 'real' also belongs to a large and important family of words that we may call *adjuster-words* - words, that is, by the use of which other words are adjusted to meet the innumerable and unforeseeable demands of the world upon language. The position, considerably over-simplified no doubt, is that at a given time our language contains words that enable us (more or less) to say what we want to say in most situations that (we think) ware liable to turn up. But vocabularies are finite; and the variety of possible situations that may confront us is neither finite nor precisely foreseeable. So situations are practically bound to crop up sometimes with which our vocabulary is not already fitted to cope in any tidy, straightforward style. We have the word 'pig', for instance, and a pretty clear idea which animals, among those that we fairly commonly encounter, are and are not to be so called. But one day we come across a new kind of animal, which looks and behaves very much as pigs do, but not *quite* as pigs do; it is somehow different. Well, we might just keep

6 Colloquially at least, the converse is also found: 'I gave him a good hiding' - 'a real hiding' - 'a proper hiding'.

silent, not knowing what to say; we don't want to say positively that it *is* a pig, or that it is *not*. Or we might, if for instance we expected to want to refer to these new creatures pretty often, invent a quite new word for them. But what we could do, and probably would do first of all, is to say, 'It's *like* a pig'. ('Like' is *the* great adjuster-word, or, alternatively put, the main flexibility-device to whose aid, in spite of the limited scope of our vocabulary, we can always avoid being left completely speechless.) And then, having said of this animal that it's *like* a pig, we may proceed with the remark, 'But it isn't a *real* pig'. If we think of words as being shot like arrows at the world, the function of these adjuster-words is to free us from the disability of being able to shoot only straight ahead; by their use on occasion, such words as 'pig' can be, so to speak, brought into connexion with targets lying slightly off the simple, straightforward line on which they are ordinarily aimed. and in this way we gain, besides flexibility, precision; for if I can say, 'Not a real pig, but like a pig', I don't have to tamper with the meaning of 'pig' itself.

But, one might ask, do we *have* to have 'like' to serve this purpose? We have, after all, other flexibility-devices. For instance, I might say that animals of this new species are 'piggish'; I might perhaps call them 'quasi pigs', or describe them (in the style of vendors of peculiar wines) as 'pig-type' creatures. But these devices, excellent no doubt in their way, can't be regarded as substitutes for 'like', for this reason: they equip us simply with new expressions on the same level as, functioning in the same way as, the word 'pig' itself; and thus, though they may perhaps help us out of our immediate difficulty, they themselves may land us in exactly the same *kind* of difficulty at any time. We have this kind of wine, not real port, but a tolerably close approximation of port, and we call it 'port type'. But them someone produces a new kind of wine, not port exactly, but also not quite the same as what we now call 'port type'. So what are we to say? It is port-type type? It would be tedious to have to say so, and besides there would clearly be no future in it. But as it is we can say that it is *like* port-type wine (and for that matter rather like port, too); and in saying this we don't saddle ourselves with a *new word*, whose application may itself prove problematic if the vintners spring yet another surprise on us. The word 'like' equips us *generally* to handle the unforeseen, in a way in which new words invented *ad hoc* don't, and can't.

(Why then do we need 'real' as an adjuster-word as well as 'like'? Why exactly do we want to say, sometimes 'It is like a pig', sometimes 'It is not a real pig? To answer these questions properly would be to go a long way

towards making really clear the use, the 'meaning', of 'real'.)[7]

It should be quite clar, then, that there are no criteria to be laid down *in general* for distinguishing the real from the not real. How this is to be done must depend on *what* it is with respect to which the problem arises in particular cases. Furthermore, even for particular kinds of things, there may be many different ways in which the distinction may be made (there is not just *one* way of being 'not a real pig')—this depends on the number and variety of the surprises and dilemmas nature and our fellow men may spring on us, and on the purposes and dilemmas we have been faced with hitherto. And of course, if there is *never* any dilemma or surprise, the question simply doesn't come up; if we had simply never had occasion to distinguish anything as being in any way like a pig but not a *real* pig, the words 'real pig' themselves would have no application—as perhaps the words 'real after-image' have no application.

Again, the criteria we employ at a given time can't be taken as *final*, not liable to change. Suppose that one day a creature of the kind we now call a cat takes to talking. Well, we say to being with, I suppose, 'This cat can talk.' But then other cats, not all, take to talking as well; we now have to say that some cats talk, we distinguish between talking and non-talking cats. But again we may, if talking becomes prevalent and the distinction between talking and not talking seems to us to be really important, come to insist that a *real* cat to be a creature that can talk. And this will give us a new case of being 'not a real cat', i.e. being a creature just like a cat except for not talking.

Of course—this may seem perhaps hardly worth saying, but in philosophy it seems it does need to be said—we make a distinction between 'a real *x*' and 'not a real *x*' only if there is a way of telling the difference between what is a real x and what is not. A distinction which we are not in fact able to draw is—to put it politely—not worth making.

---

7 Incidentally, nothing is gained at all by saying that 'real' is a *normative* word and leaving it at that, for 'normative' itself is much too general and vague. Just how, in what way, is 'real' normative? Not, presumably, in just the same way as 'good; is. And it's differences that matter.

APPENDIX FOUR

MEMBERS OF PARLIAMENT

App. 4.1 Residence & domicile of MPs and members of House of Lords

Section 41 Constitutional Reform and Governance Act 2010 provides special rules for MPs and members of the House of Lords ("MLs"):

(1) Subsection (2) applies if a person is for any part of a tax year[1]—
  (a) a member of the House of Commons, or
  (b) a member of the House of Lords.[2]

(2) The person is to be treated for the purposes of the taxes listed in subsection (3) as resident and domiciled in the UK for the whole of that tax year.

(3) The taxes are—
  (a) income tax,
  (b) capital gains tax, and
  (c) inheritance tax.

In practice this means MPs and MLs are deemed UK resident and domiciled for almost all tax purposes, though minor taxes such as NICs slip through the net. EN CRGA provides:

---

1 IHT does not use the concept of tax years, so s.41(9) CRGA 2010 provides:
"In this section, in relation to inheritance tax—
  (a) 'tax year' means a year beginning on 6 April and ending on the following 5 April, and
  (b) 'the tax year 2010-11' means the tax year beginning on 6 April 2010."

2 Section 41(5)(10) CRGA 2010 defines ML:
"For the purposes of this section and section 42 a person is a member of the House of Lords if the person is entitled to receive writs of summons to attend that House....
(10) In determining for the purposes of this section and section 42 whether a person is entitled to receive writs of summons to attend the House of Lords, ignore—
  (a) section 2 of the Forfeiture Act 1870;
  (b) sections 426A and 427 of the Insolvency Act 1986."

> 269.The section provides that MPs and peers are deemed ROD [resident ordinarily resident and domiciled] for the whole of each tax year in which they are a member of either House (including those tax years in which they are a member for only part of the year). This means that they will be deemed ROD from the start of the tax year in which they become a member of that House and to the end of the tax year in which they cease to be a member.

DT relief may apply where a treaty has a suitable tie-breaker.

Section 41(4) CRGA 2010 defines when a person becomes or ceases to be a MP or a ML:

> For the purposes of this section a person—
>
> (a) becomes a member of the House of Commons when (having been elected to that House) the person makes and subscribes the oath required by the Parliamentary Oaths Act 1866 (or the corresponding affirmation), and
>
> (b) ceases to be a member of that House when—
>
> (i) the Parliament to which the person was elected is dissolved, or
>
> (ii) the person's seat is otherwise vacated.

Since a person will know the exact date when they become an MP or ML, they have an opportunity for pre-appointment planning and there may even be some scope for further planning when deemed UK domiciled (eg in relation to the IHT spouse exemption if the spouse if UK domiciled).[3] Note that when a person ceases to be a ML or MP, they will continue to be deemed IHT domiciled for another three or four years.

Sinn Fein MPs do not take their seats at Westminster so happily escape deemed UK residence and domicile.

Section 41(6) CRGA 2010 excludes judges[4] and bishops (the section is after all only a *political* exercise). This level of micro-detail cannot sensibly be covered even in this book which seeks to be comprehensive: it would be surprising if there are more than one or two individuals concerned (if indeed there are any at all).

---

3 See Slevin "Not Quite the Same", Taxation, (19 May 2011).

4 This makes sense, as a ML who holds a disqualifying judicial office is disqualified from sitting or voting in the House of Lords: s.137(7) Constitutional Reform Act 2005.

App. 4.2 Members of the European Parliament

The rules do not apply to MEPs. EN CRGA 2010 para 275 discusses the position of a MEP who is also a member of the House of Lords but as far as I am aware no-one falls in this category.

App. 4.3 Commentary

Stephen Timms (then Financial Secretary to the Treasury) said:

> This is how the vast majority of the UK population is taxed, so it seems right to me ... that MPs and Members of the House of Lords should be taxed on that basis and should not have access to the remittance basis. It is helpful that there is now clear, albeit rather belated, cross-party support for action, following the Conservative's change of position to supporting the principle that MPs and Members of the House of Lords should be required to pay tax in full on their overseas income, gains and assets.[5]

A great deal more could be said about the policy issues relating to these provisions. They were not debated in Parliament: the clauses were a late amendment to the CRGA, which was enacted in a breathless ping pong procedure just before the dissolution of Parliament. But the context of the rules is wholly political - the scrabble for public approval and to knock the opposition - so it would be unrealistic to expect cool and considered reflection. The debate is long-standing.[6]

---

5 Hansard, 5 Jan 2010, Column 52WH.

6 There was a comparable debate in relation to Lord Vestey who (though resident and domiciled when ennobled in 1922) had shortly before been a tax exile: see *"Vestey: Royal Commission evidence and ensuing debate"* accessible *http://www.kessler.co.uk/tfd-archive*.

APPENDIX FIVE

VISITING FORCES

App. 5.1 The treaty background

The taxation of visiting forces is based on two treaties:
(1) NATO Status of Forces Agreement 1951 ("NATO SOFA").[1]
(2) Partnership for Peace Status of Forces Agreement 1995 ("PfP SOFA").[2]
A third treaty, EU Status of Forces Agreement 2003, despite its date, has not yet come into force.[3] Its taxation provisions are similar to the existing treaties.

The PfP SOFA incorporates the 1951 treaty by reference.

---

1 The full title is: Agreement Between the Parties to the North Atlantic Treaty Regarding the Status of Their Forces 19 June 1951.
Accessible *http://www.nato.int/cps/en/natolive/official_texts_17265.htm*.

2 The full title is: Agreement among the States Parties to the North Atlantic Treaty and the other States participating in the Partnership for Peace regarding the Status of their Forces, 19 June 1995.
Accessible *http://www.nato.int/cps/en/natolive/official_texts_24742.htm*.

3 The full title is: Agreement between the member states of the European Union concerning the status of military and civilian staff seconded to the institutions of the European Union, of the headquarters and forces which may be made available to the European Union in the context of the preparation and execution of the tasks referred to in article 17(2) of the treaty on European Union including exercises, and of the military and civilian staff of the member states put at the disposal of the European Union to act in this context.
http://www.official-documents.gov.uk/document/cm75/7572/7572.pdf.
Secondary legislation which will implement EU SOFA has likewise not yet come into force: The Visiting Forces and International Military Headquarters (EU SOFA) (Tax Designation) Order 2012.

App. 5.2 Residence for IT and CGT

App. 5.2.1 *Treaty background*

Article X NATO SOFA provides:

> 1. [a] Where the legal incidence of any form of taxation in the receiving State depends upon residence or domicile, periods during which a member of a force or civilian component is in the territory of that State by reason solely of his being a member of such force or civilian component shall not be considered as periods of residence therein, or as creating a change of residence or domicile, for the purposes of such taxation...

A period of presence would not normally create a change of domicile (except for IHT deemed domicile) but the drafter also had in mind civil law conceptions of domicile which is more like habitual residence.

App. 5.2.2 *"Visiting Forces"*

Section 833 ITA provides:

> (1) This section applies to an individual who—
> (a) is a member of a visiting force of a designated country or of a civilian component of such a force,
> (b) is in the UK, but only because of being a member of the force or the civilian component, and
> (c) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.
> (2) For the purposes of subsection (1)—
> (a) members of the armed forces of a designated country who are attached to a designated international military headquarters[4] are treated as a visiting force of that country, and
> (b) whether an individual is a member of a civilian component of such a force is to be determined accordingly.
> (2A) This section also applies to an individual within subsection (3) or (3A).
> (3) An individual is within this subsection if the individual—

---

4 Defined in subsection (7):
" In this section—
'allied headquarters' means an international military headquarters established under the North Atlantic Treaty, and
'designated' means designated for the purpose in question by or under an Order in Council made for giving effect to an international agreement."

(a) is of a category for the time being agreed between Her Majesty's Government in the UK and the other members of the North Atlantic Council,
(b) is employed by a designated allied headquarters,
(c) is in the UK, but only because of being employed by the designated allied headquarters, and
(d) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen

(3A) An individual is within this subsection if the individual—
(a) belongs to the EU civilian staff,
(b) is in the UK, but only because of serving as part of that staff, and
(c) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.....

(6) Subsections (1) to (3) are to be interpreted as if—
(a) they were in Part 1 of the Visiting Forces Act 1952, and
(b) references in that Act to a country to which a provision of that Act applies were references to a designated country.

I refer to a person within (1) as visiting forces.

Forty-nine countries have been designated:

(1) Designated NATO countries

Albania, Belgium, Bulgaria, Canada, Croatia, Czech Republic, Denmark, Estonia, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Lithuania, Luxembourg, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Turkey, United States of America.[5]

(2) Designated PfP countries

Armenia, Austria, Azerbaijan, Belarus, Bosnia and Herzegovina, Finland, Georgia, Ireland, Kazakhstan, Kyrgyz Republic, Malta, Moldova, Montenegro, Russia, Serbia, Sweden, Switzerland, Tajikistan, the former Yugoslav Republic of Macedonia, Turkmenistan, Ukraine, Uzbekistan.[6]

The following HQs have been designated:

5 The Visiting Forces and International Military Headquarters (NATO and PfP) (Tax Designation) Order 2012 No. 3071, Schedule 2.

6 The Visiting Forces and International Military Headquarters (NATO and PfP) (Tax Designation) Order 2012 No. 3071, Schedule 3.

(1) Headquarters of the Supreme Allied Commander Transformation (HQ SACT)
(2) Supreme Headquarters Allied Powers Europe (SHAPE)
(3) Maritime component Command Headquarters Northwood (CC-MAR HQ Northwood)
(4) Commander Submarines Allied Naval Forces North (COMSUBNORTH)
(5) NATO Airborne Early Warning and Control Force (NAEW&CF)
(6) NATO Joint Electronic Welfare Core Staff (NATO JEWCS)
(7) Headquarters United Kingdom–Netherlands Amphibious Force (UKNLAF)
(8) Headquarters United Kingdom–Netherlands landing Force (UKNLLF)
(9) The European Air Group (EAG)
(10) The Intelligence Fusion Centre (IFC)
(11) Headquarters Allied Rapid Reaction Corps (HQ ARRC)[7]

HMRC TDSI Guidance Notes (October 2012) provide:

> **4.50 Civilian component of visiting armed forces**
> ... A person is a member of a civilian component of a visiting force if his or her passport contains
> • an uncancelled entry made by or on behalf of the sending country stating that the bearer is a member of a civilian component of a visiting force of that country, and
> • an uncancelled recognition stamp of the UK Home Office.
> Employees of foreign contractors hired in the UK are not members of the civilian component of a visiting force. Their residence status is determined according to the normal rules ....[8]

App. 5.2.3 *Residence and domicile relief*

Section 833(4) provides the relief:

> If this section applies to an individual throughout a period, the period is not treated for income tax purposes as—
> (a) a period of residence in the UK, or
> (b) creating a change of the individual's residence or domicile.

---

7 The Visiting Forces and International Military Headquarters (NATO and PfP) (Tax Designation) Order 2012 No. 3071, Schedule 4.

8 HMRC, TDSI Guidance Notes for Financial Institutions (October 2012), see *http://www.hmrc.gov.uk/taxon/guidance-notes.pdf.*

Section 11(1) TCGA extends the relief to CGT:

> If section 833 of ITA 2007 (visiting forces and staff of designated allied headquarters) applies to an individual throughout a period, the period is not treated for capital gains tax purposes as—
>
> (a) a period of residence in the UK, or
>
> (b) creating a change of the individual's residence or domicile.

App. 5.2.4 *Personal allowances*

Section 833(5) ITA provides:

> Subsection (4) does not affect the operation of section 56 or 460 of this Act (residence etc of claimants) in relation to an individual for any tax year.

EN ITA explains:

> 2498. Subsection (5) ensures that an individual to whom this section applies has the benefit of the personal reliefs to which the individual would be entitled if resident in the UK. Such reliefs will, accordingly, be available in calculating the individual's liability to UK income tax on such income as, for example, UK bank interest, dividends from UK resident companies and UK-based earnings which are not exempt under section 303 of ITEPA.

App. 5.3 Employment income

App. 5.3.1 *Treaty background*

Article X.1 NATO SOFA provides:

> ... Members of a force or civilian component shall be exempt from taxation in the receiving State on the salary and emoluments paid to them as such members by the sending State or on any tangible movable property the presence of which in the receiving State is due solely to their temporary presence there.

App. 5.3.2 *The relief*

Section 303 ITEPA provides:

> (1) No liability to income tax arises in respect of earnings if—
>
> (a) they are paid by the government of a designated country to a member of a visiting force of that country or of a civilian component of such a force, and

(b) that person is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.

(2) [*This is a definition provision identical to s.833(2) set out above*]

(3) No liability to income tax arises in respect of earnings if they are paid by a designated international military headquarters to an employee of a category for the time being agreed between Her Majesty's government in the UK and the other members of the North Atlantic Council.

(4) But where the employee is a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen, subsection (3) only applies if it is necessary for it to do so to give effect to an agreement between parties to the North Atlantic Treaty.

(4A) No liability to income tax arises in respect of earnings if—

(a) they are paid by the government of a designated country to a person belonging to the EU civilian staff, and

(b) that person is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.

(5) & (6) [*These are definition provisions identical to s.833(6)(7) set out above]*.

App. 5.4 IHT reliefs

App. 5.4.1 *Excluded property*

Section 155(1) IHTA provides:

> Section 6(4) above applies to—
>
> (a) the emoluments paid by the Government of any designated country to a member of a visiting force of that country, not being a British citizen, a British Dependent Territories citizen, a British National (Overseas) or a British Overseas citizen, and
>
> (b) any tangible movable property the presence of which in the UK is due solely to the presence in the UK of such a person while serving as a member of the force.

This takes us to s.6(4) which provides:

> Property to which this subsection applies by virtue of section 155(1) or (5A) below is excluded property.

In short, emoluments and tangible movable property of visiting forces qualify as excluded property for IHT purposes.

App. 5.4.2 *IHT deemed domicile*

Section 155(2) IHTA provides:

> A period during which any such member of a visiting force as is referred to in subsection (1) above is in the UK by reason solely of his being such a member shall not be treated for the purposes of this Act as a period of residence in the UK or as creating a change of his residence or domicile.

Thus (in short) visiting forces do not become IHT deemed domiciled even if they reside 17 or more years in the UK (but in practice I expect that hardly ever happens). It is considered that the relief does not apply to members of visiting forces who are British citizens (etc) even though on a literal reading one might say that such persons are "referred to" in s.155(1).

App. 5.4.3 *"Visiting Force" and other definitions*

Section 155 IHTA provides

> (3) References in subsections (1) and (2) above to a visiting force shall apply to a civilian component of a visiting force as they apply to the force itself, and those subsections shall be construed as one with Part I of the Visiting Forces Act 1952 but so that for the purposes of this section references to a designated country shall be substituted in that Act for references to a country to which a provision of that Act applies.
> (4) For the purpose of conferring on persons attached to any designated allied international military headquarters the like benefits as are conferred by subsections (1) and (2) above on members of a visiting force or civilian component, any members of the armed forces of a designated country shall, while attached to any such headquarters, be deemed to constitute a visiting force of that country, and there shall be a corresponding extension of the class of persons who may be treated as members of a civilian component of such a visiting force.
> (5A) Section 6(4) also applies to—
>
> (a) the emoluments paid by the Government of any designated country to a person belonging to the EU civilian staff, not being a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen, and
> (b) any tangible movable property the presence of which in the UK is due solely to the presence in the UK of such a person serving as part of that staff.
>
> (5B) A period during which any such person belonging to the EU civilian staff as is referred to in subsection (5A) is in the UK by reason

solely of that person belonging to that staff is not to be treated for the purposes of this Act as a period of residence in the UK or as creating a change of that person's residence or domicile.

Section 155 IHTA provides:

(6) For the purposes of this section—
"allied headquarters" means any international military headquarters established under the North Atlantic Council;
"designated" means designated for the purpose in question by or under any Order in Council made for giving effect to any international agreement.
""the EU civilian staff" means—

(a) civilian personnel seconded by a member State to an EU institution for the purposes of activities (including exercises) relating to the preparation for, and execution of, tasks mentioned in Article 43(1) of the Treaty on European Union (tasks relating to a common security and defence policy), as amended from time to time, and
(b) civilian personnel (other than locally hired personnel)—
  (i) made available to the EU by a member State to work with designated international military headquarters or a force of a designated country, or
  (ii) otherwise made available to the EU by a member State for the purposes of activities of the kind referred to in paragraph (a).

(7) Any Order in Council made under section 73 of the Finance Act 1960 which is in force immediately before the passing of this Act shall have effect for the purposes of this section as if had also been made under this section, and may be varied or revoked accordingly.

The exemption is not available to spouses of visiting forces.

App. 5.5 SDLT

Section 74A FA 1960 provides an exemption for land acquired as barracks or for training; this is too specialist a topic to be discussed here

APPENDIX SIX

STUDENTS

App. 6.1 Introduction

In general a student is taxed in the same way as any other individual.

For school fees paid by trusts, see 30.4.13 (Payment of school/university fees).

App. 6.2 DT relief

Article 20 OECD Model Convention provides:

> Payments which a student or business apprentice who is or was immediately[1] before visiting a Contracting State a resident of the other Contracting State and who is present in the first-mentioned State solely for the purpose of his education or training receives for the purpose of his maintenance, education or training shall not be taxed in that State, provided that such payments arise from sources outside that State.

The OECD commentary provides:

> 3. The Article covers only payments received for the purpose of the recipient's maintenance, education or training. It does not, therefore, apply to a payment, or any part thereof, that is remuneration for services rendered by the recipient and which is covered by Article 15 (or by Article 7 in the case of independent services). Where the recipient's training involves work experience, however, there is a need to distinguish between a payment for services and a payment for the recipient's maintenance, education or training. The fact that the amount paid is similar to that paid to persons who provide similar services and

---

1 The OECD commentary provides: "2. The word "immediately" was inserted in the 1977 Model Convention in order to make clear that the Article does not cover a person who has once been a resident of a Contracting State but has subsequently moved his residence to a third State before visiting the other Contracting State."

are not students or business apprentices would generally indicate that the payment is a remuneration for services. Also, payments for maintenance, education or training should not exceed the level of expenses that are likely to be incurred to ensure the recipient's maintenance, education or training.

4 For the purpose of the Article, payments that are made by or on behalf of a resident of a Contracting State or that are borne by a permanent establishment which a person has in that State are not considered to arise from sources outside that State.

DTR manual provides:

1930 Visiting students and apprentices [February 2006]

Most double taxation agreements provide that students and business apprentices who visit the UK solely for the purpose of their education or training and who, immediately before coming here, were residents of the other country shall be exempt from UK tax on payments which they receive from outside the UK for their maintenance, education or training. Some agreements also provide that certain remuneration which a student or business apprentice receives from employment in this country shall be exempt from UK tax. Various limitations are imposed in particular agreements, often relating to monetary limits, the student's need to supplement grant income, or the type of employment. In every case when an agreement provides an exemption of this type, details of any limitations are given in Part IV of this volume.

Claims for exemption under a students' Article are dealt with in the District which, but for the agreement, would have dealt with any tax on such payments or remuneration. In examining claims, refer to the relevant double taxation agreement to ensure that the conditions for exemption are fulfilled. The following notes give some guidance on matters to be taken into account in considering whether exemption is due

(a) The exemption does not extend to income or capital gains derived by a student or business apprentice from his own investments or from trust income to which he is absolutely entitled.

(b) Whether payments or remuneration are for the student's etc. maintenance, education or training, or for supplementing his resources, or are reasonably necessary, is a question of fact and the onus is on the claimant to provide the evidence. The figures quoted in Statement of Practice SP4/86 (see SE1314) can be used as a guide. Where the payments or remuneration seem to be unreasonably high, refer the case to Personal Tax Division (Schedule E), Sapphire House, Solihull.

(c) If the payments or remuneration exceed the amount needed for the

student's etc. maintenance, education or training, the whole amount is taxable and not merely the excess.

(d) Where the Article provides that remuneration is to be exempted up to a certain monetary limit and the student or business apprentice is resident in the UK under UK domestic law, that amount is additional to the personal allowances available under UK law. For example, if the monetary limit in the agreement is 1,000 and the claimant is entitled to a personal allowance in the relevant year of 3,445, earnings of 4,445 or less will be exempt.

APPENDIX SEVEN

ENTERTAINERS AND SPORTSPEOPLE

App. 7.1 Entertainers and Sportspeople: Introduction

This appendix considers the taxation of non-resident entertainers and sportspeople **("E&S rules")**.

The legislation is scattered: trading income rules are in ITTOIA, withholding tax is in ITA, and the bulk of the rules are in Income Tax (Entertainers and Sportsmen) Regulations 1987 ("ITESR"). The policy of the tax law rewrite was not to rewrite or update statutory instruments, so the ITESR retains the out of date references to the original legislation in schedule 11 FA 1986.[1] The policy is understandable, but the consequence is that the rewrite has left the law in this area more difficult to follow rather than easier. When quoting ITESR, I add the current statutory references in brackets.

HMRC have issued guidance which I call **"HMRC E&S guidance"**.[2]

App. 7.2 Definitions

It is helpful first to deal with some definitions. Because the legislation is scattered, most definitions have to be repeated or cross referenced; but we muddle through.

App. 7.2.1 *"Entertainer" and "performer"*

Reg 2(1) ITESR defines "entertainer":

> In these Regulations unless the context otherwise requires ...
> "entertainer" means any description of individuals (and whether

---

1 The FA 1986 can be found at *http://www.legislation.gov.uk/ukpga/1986/41/pdfs/ukpga_19860041_en.pdf.*

2 HMRC, "A Guide to paying Foreign Entertainers" *http://www.hmrc.gov.uk/leaflets/feu50_0300.htm*

> performing alone or with others) who give performances in their character as entertainers or sportsmen in any kind of entertainment or sport;
> and "entertainment or sport" in this definition includes any activity of a physical kind, performed by such an individual, which is or may be made available to the public or any section of the public and whether for payment or not.

ITTOIA and ITA use the expression:

> an entertainer, sportsman or sportswoman[3] of a prescribed description ("a performer")

This incorporates the same definition.

HMRC E&S guidance provides:

> **Which entertainers and sportsmen are involved?**
> The following list is not exhaustive. athletes, golfers, cricketers, footballers, tennis players, boxers, snooker players, darts players, motor racing drivers, jockeys, ice skaters, contestants in chess tournaments, singers, musicians, conductors, models, dancers, actors, TV and radio personalities, variety entertainers. The person may appear alone or with others in a team, choir, band, group, orchestra, opera company, ballet company, troupe or circus.

App. 7.2.2 *"Relevant activity" and "prescribed description"*

Section 13(8) ITTOIA provides the definition of "relevant activity":

> In this section and section 14—
> "relevant activity" means an activity of a prescribed description[4]

We turn to reg 6(1) ITESR to find the "prescribed description" of a relevant activity:

> Subject to this regulation, any activity performed in the UK by an entertainer (whether alone or involving others) of any of the descriptions in paragraph (2) is an activity of a prescribed description ("relevant activity") for the purposes of paragraph 1 of [Schedule 11 FA 1986], that Schedule and these Regulations.

---

3 Note the change from the "sportsmen" of the 1987 regulations: gender neutral drafting was one of the policies of the tax law rewrite.

4 Section 966(7)(a) ITA repeats the definition for ITA.

That is, the definition in reg. 6 applies for all E&S purposes. So we read on to reg 6(2) ITESR:

> A relevant activity to which paragraph (1) refers is an activity
> [a] performed in the UK by an entertainer
> [b] in his character as entertainer
> on or in connection with a commercial occasion or event ...

The regulation goes on to expand this:

> and includes—
> (a) any appearance of the entertainer by way of or in connection with the promotion of any such occasion or event;
> (b) any participation by the entertainer in or for sound recording, films,[5] videos, radio, television or other similar transmissions (whether live or recorded).

Regulation 6(3) ITESR provides a commonsense definition of "commercial occasion or event":

> A commercial occasion or event to which paragraph (2) refers includes any description of occasion or event—
> (a) for which an entertainer (or other person) might receive or become entitled, for or by virtue of the entertainer's performance of the activity, to receive anything by way of cash or any other form of property; or
> (b) which is designed to promote commercial sales or activity by advertising, the endorsement of goods or services, sponsorship, or other promotional means of any kind.

App. 7.2.3 *"Payment" and "transfer"*

Section 13 ITTOIA provides:

> (9) In this section and section 14—
> (a) references to a payment include references to a payment by way of loan of money, and
> (b) references to a transfer do not include references to a transfer of money but, subject to that, include references to—
> (i) a temporary transfer (as by way of loan), and

5 Defined reg. 6(4) ITESR: "film" includes any record (with or without sound), however made, of a sequence or series of one or more visual images, which is a record capable of being used as a means of showing part or all of that sequence or series as a moving or still picture..."

(ii) a transfer of a right (whether or not a right to receive money).

(10) This section does not apply to payments or transfers of a kind prescribed in regulations under section 966(6) of ITA 2007.

App. 7.3 Deemed UK trade

Section 13(1) ITTOIA provides:

> This section applies if an entertainer, sportsman or sportswoman of a prescribed description (a "performer")—
>
> (a) is non-UK resident in a tax year, and
>
> (b) performs a relevant activity in the UK in the tax year.

ITTOIA EN provides:

> 92. A visiting performer may not be in the UK long enough to become resident for tax purposes. And any relevant activities may not be part of a trade, profession or vocation carried on in the UK. So, without this section, there would be no liability to tax on the activities in the UK.

If the conditions of s.13(1) are met, there are three deemings:

(1) A deemed trade, which is:

(a) Deemed to be a UK trade

(b) Deemed to be a separate trade

(2) Payment to prescribed third parties deemed made to performer.

Firstly the deemed UK trade. Section 13(2) ITTOIA provides:

> If a payment or transfer connected[6] with the relevant activity is made, the performer is treated for income tax purposes as performing the relevant activity in the course of a trade, profession or vocation carried on in the UK.

I refer to this as **"the notional UK trade"**. ITESR refers to it as "Schedule 11 trade". I use the word "trade" to include a profession or vocation.

The income of the notional UK trade is taxed as UK source trading income. The remittance basis does not apply.

The notional UK trade is deemed to be a separate trade. Section 13(7) ITTOIA provides:

---

6 See App 7.4 ("Connected with" a relevant activity) [[#"Connected with" a relevant activity | "Connected with" a relevant activity]].

> If—
>
> (a) income tax is chargeable on profits arising from payments or transfers (made to any person), and
>
> (b) the payments or transfers are connected with the relevant activity,
>
> the tax is charged as if the payments or transfers were received in the course of a separate trade, profession or vocation (distinct from any other trade, profession or vocation carried on by the performer).

I am not quite sure why this is needed; perhaps to emphasise that expenses of the non-UK activity cannot be deducted in computing the profits of the notional UK trade.

App. 7.4 "Connected with" a relevant activity

The expression "connected with" the relevant activity matters because payments/transfers connected with the relevant activity are taxed as part of the deemed trade, and subject to withholding tax.

Section 13(8) ITTOIA provides:

> In this section and section 14 a payment or transfer is connected with a relevant activity if it has a connection of the prescribed kind with that activity.[7]

We turn to reg 3(1) ITESR to find the " prescribed kind" of connection:

> This regulation applies for the purposes of and subject to the provisions of paragraph 2 of [Schedule 11 FA 1986], the other provisions of that Schedule and these Regulations.

That is, the definition applies for all E&S purposes. So we read on to reg 3(2) ITESR:

> Subject to paragraph (3) a payment or a transfer made or, in respect of or which in any way derives either directly or indirectly from, the performance of a relevant activity, has a connection of a prescribed kind with the relevant activity.

Reg 3(3) ITESR provides three exceptions where a payment/transfer is not connected with the relevant activity. The significance is to disapply all the E&S rules.

The first exception is where a deduction of tax regime already applies:

---

7 Section 966(7)(b) ITA repeats the definition for ITA.

(3) The following are descriptions of payments to which paragraph (2) shall not apply—

(a) a payment out of which a sum representing tax is or falls to be deducted under the Taxes Act apart from [Schedule 11 FA 1986] or these Regulations;

Other deduction regimes have priority over the E&S rules. This would apply to royalties.

The second exception concerns payments to UK residents (which should constitute a taxable receipt of the UK resident):

(3) The following are descriptions of payments to which paragraph (2) shall not apply...

(b) (i) a payment (to which paragraph (ii) applies) made to a person who is resident in the UK, not being a person who is connected[8] with or an associate[9] of the entertainer concerned;

(ii) a payment to which paragraph (i) refers is a payment—

(a) which falls to be made for the provision of services ancillary to the performance of a relevant activity, and

(b) which is of an amount or value which does not exceed what would be reasonable for that provision between persons dealing with each other at arms' length;

The third exception concerns royalties for sound recordings:

(3) The following are descriptions of payments to which paragraph (2) shall not apply...

(c) any payment made to an entertainer in respect of the proceeds of sale of records[10] deriving from a sound recording made by the entertainer, being payments calculated by reference to those proceeds or payments on accounts of those proceeds.

The reason for this is, perhaps, that (1) records (unlike concerts and sports

---

8 Regulation 2(2) incorporates the standard definition: "S.533 of the Taxes Act [1970] (meaning of connected persons) applies for the purposes of these Regulations."

9 Regulation 13 ITESR incorporates the close company definition: "associate" has the meaning given to it by section 303(3) of the Taxes Act [1970]; see 85.5 (Associates)[[Control, Connected, Close and Related Expressions#Associates | Associates]].

10 Defined reg. 6(4) ITESR: "record" in this definition includes video.

events) could be made anywhere; or (2) royalties are covered by an entirely different tax regime.

App. 7.5 No notional trade when activity otherwise taxable

Section 13(4) ITTOIA provides two exceptions where there is no notional UK trade:

> (4) Subsection (2) [deemed notional UK trade] does not apply—
> (a) so far as the performer would otherwise be performing the relevant activity in the course of a trade, profession or vocation carried on in the UK, or

In this case the charge is on the actual trade, not a notional UK trade.

The second exception is:

> (4) Subsection (2) [notional UK trade] does not apply...
> (b) if the relevant activity is performed in the course of an employment or office.

In this case the charge is on the employment, not a notional UK trade.

These two exceptions disapply the deemed notional trade under s.13(2), but not the third party rules under s.13(5) to which I now turn.

App. 7.6 Payment to third parties

Section 13(3) ITTOIA provides:

> It does not matter whether the payment or transfer is made to the performer or anyone else.

Section 13(5) ITTOIA provides:

> If a payment or transfer connected with the relevant activity is made to—
> (a) a person other than the performer, and
> (b) that person is of a prescribed description,
> the payment or transfer is treated for income tax purposes as made instead to the performer in the course of a trade, profession or vocation carried on in the UK.

An argument that a territorial principle prevented the application of the charge where the payment was made between non-resident companies was rightly rejected in *Agassi v Robinson* 77 TC 678.

I refer to the person of a prescribed discription as **"a prescribed third party"**.

App. 7.6.1 *Prescribed third parties*

Regulation 7(1) ITESR provides:

> Any description of person in paragraph (2) is a person (not being the entertainer) to whom paragraph 7(1) of [Schedule 11 FA 1986 = s.13(5) ITTOIA] refers.

So we read on to reg 7(2) ITESR. There are four categories of prescribed third party.

The first category is controlled persons:

> (2) The descriptions of persons to whom paragraph (1) refers are-
> (a) any person who is under the control[11] of the entertainer;

The second category is certain non-residents:

> (2) The descriptions of persons to whom paragraph (1) refers are ...
> (b) any person who is—
> (i) not resident in the UK, and
> (ii) not liable to tax by reason of residence, domicile, place of management or otherwise, in a territory outside the UK where the rate of tax charged on the profits or income of such a person is a rate exceeding 25%;[12]

The third category is certain settlements:

> (2) The descriptions of persons to whom paragraph (1) refers are ...
> (c) (i) subject to paragraph (ii), any person in receipt (whether directly or indirectly) of
> [A] a connected payment[13] or
> [B] value transferred[14] by a connected transfer
> which is, is treated as, or falls to be included in the computation of, income arising under a settlement in

---

11 Reg 2 ITESR incorporates the ultra-wide definition: "control" shall be construed in accordance with s.302(2) to (6) of the Taxes Act [1970]; see 85.3 (Control in ultra-wide sense)[[Control, Connected, Close and Related Expressions#Control in ultra-wide sense | Control in ultra-wide sense]].

12 The figure of 25% ought to be reduced in line with the reduction of CT rates since 1987 (when the CT rate was 35%).

13 Defined reg 2 IETSR: a payment or transfer to which reg 3 ITESR applies is described as "connected".

14 Defined reg 2 ITESR: "value transferred" in relation to a transfer means the gross amount to which regulation 17(1) refers.

relation to which the entertainer is a settlor;[15]

The fourth category concerns arrangements under which the performer may benefit:

(2) The descriptions of persons to whom paragraph (1) refers are ...
(d) (i) any person
[A] to whom paragraph (2) of this regulation does not otherwise apply[16]
[B] who receives any connected payment or connected transfer (whether directly or indirectly) at or in respect of a time when there is in force between that person and the entertainer concerned a contract or arrangement to which paragraph (ii) applies;
(ii) a contract or arrangement to which paragraph (i) refers is a contract or arrangement by or under which it is reasonable to suppose that the entertainer (or other person who is connected with or is an associate of the entertainer) is, will or may become, entitled to receive amounts, whether by way of cash or other value, not substantially less than the appropriate amount of profits or gains arising from the connected payment or connected transfer to which [para 8(1) sch 11 FA 1986 = s.13(2) ITTOIA] applies.

App. 7.7 Computation of profits of notional trade

Regulation 8 ITESR provides some self-explanatory rules for the computation of the profits of the deemed UK trade:

(1) Subject to the provisions of these Regulations, the profits or gains (to which paragraph 7(2) of [Schedule 11 FA 1986] refers) shall be computed in accordance with the provisions of the Taxes Act relating to the charging of profits or gains under Case I or II (as the case may be) of Schedule D, so that a just and reasonable amount of such a payment or value transferred by such a transfer is charged to tax as such profits or gains; and

---

15 Para (c)(ii) incorporates the settlement-arrangement definitions of these terms:
"for the purposes of paragraph (i):—
"income arising under a settlement" and "settlor" have the meanings given to them by section 454 of the Taxes Act [1970], and
"settlement" has the meaning given to it by section 444(2) of the Taxes Act [1970]".

16 Para [A] seems otiose, but it does not matter.

(2) Notwithstanding any provision of the Taxes Act, in computing the said profits or gains such deductions of expenses incurred by any person (not being the entertainer) in relation to the payment or transfer concerned shall be made as are just and reasonable.

Regulation 16 ITESR provides for apportionment:

(1) The provisions of paragraph (2) are by way of supplementation of the provisions of section 127 of the Taxes Act.
(2) Where, in the case of any payment, value transferred or profits or gains to which Schedule 11 or these Regulations apply, it is necessary, in order to arrive at the appropriate amount of such payment, value or profits or gains for any tax year or other period, to make any apportionment, division or aggregation of any amounts or values, any such apportionment, division or aggregation, shall be made as is just and reasonable.

Apportionment issues have often proved controversial.

App. 7.8 Trading Losses

Regulation 15 ITESR provides:

(1) In this regulation–
  (a) "world-wide trade" means a trade of an entertainer which is a trade apart from Schedule 11 and these Regulations, and a "Schedule 11 trade" means a trade which is a separate trade of an entertainer only by virtue of Schedule 11 and these Regulations;
  (b) "trade" includes profession or vocation.
(2) For the purposes of section 171 of the Taxes Act (carry forward of losses) the world-wide trade and the Schedule 11 trade shall be treated as the same trade.
(3) For the purposes of section 174 of the Taxes Act (carry back of terminal losses) a loss sustained for any relevant period under a Schedule 11 trade (to which otherwise that section would apply) shall not be a terminal loss except where the world-wide trade is permanently discontinued in that period, in which case such a loss in either trade shall be available under that section to be deducted or set off against profits or gains of those trades.
(4) For the purposes of section 30 of the Finance Act 1978 (losses in early years of trade) the world-wide trade and the Schedule 11 trade shall be treated as the same trade, but that section shall ap-ply to any such loss of an entertainer only in the tax year in which the world-wide

trade was first carried on and in the next 3 succeeding tax years.

App. 7.9 Withholding tax

Section 966 ITA provides:

(1) This section applies if—
  (a) an entertainer, sportsman or sportswoman of a prescribed description ("a performer") who is non-UK resident for a tax year performs a relevant activity in the UK in the tax year, and
  (b) a payment or transfer connected with the relevant activity is made.

(2) It does not matter—
  (a) whether the payment or transfer is made to the performer or anyone else, or
  (b) when the payment or transfer is made...

(6) This section does not apply to payments or transfers of such a kind as may be prescribed.

App. 7.9.1 *Deduction on making payment*

Section 966(3) ITA provides:

> If a payment within subsection (1)(b) is made the person who makes the payment must, on making it, deduct from it a sum representing income tax and account to HMRC for the sum.

App. 7.9.2 *Deduction on making transfer*

Section 966(4) ITA provides:

> If a transfer within subsection (1)(b) is made the person who makes the transfer must account to HMRC for a sum representing income tax.

App. 7.9.3 *Amount of tax deducted*

Regulation 4 ITESR provides:

(1) Each of the sums mentioned in paragraph 2(2) and (3) of Schedule 11 [FA 1986 = s.966 ITA] ("tax payment") shall be calculated in accordance with the rules prescribed by this regulation.

(2) Except where
  [a] it is otherwise provided by these Regulations or
  [b] there is an arrangement to which this regulation refers,
  the tax payment shall be a proportion
    [i] of the connected payment or
    [ii] of the value transferred by a connected transfer

equal to the basic rate of income tax for the tax year in which the payment or transfer is made.

Regulation 17(1) ITESR provides grossing up:

(a) The actual worth of what is transferred by a transfer to which paragraph 2(3) of Schedule 11 [FA 1986 = s.966(4) ITA] applies ("the net value") shall be treated as a net amount corresponding to a gross amount from which income tax at the basic rate has been deducted; and
(b) the said gross amount shall be treated as the value of what is transferred for the purposes of paragraph 2(4) of Schedule 11.

Regulation 17(2) ITESR defines net value:

(a) The net value to which paragraph (1) refers shall be the cost of what is transferred, and
(b) the cost of what is transferred to which sub-paragraph (a) refers is the cost in or in connection with its provision (including its provision to the person who makes the transfer) or transfer, less so much of that cost which has been borne by the entertainer.

App. 7.9.4 *Personal allowance*

Regulation 4(3) ITESR (in short) exempts payments and transfers within the personal allowance:

(3) (a) Subject to sub-paragraph (b), where the connected payments and the value transferred by connected transfers for a tax year made to an entertainer, or to a person who is connected with him or who is an associate of his, do not together exceed the relevant amount[17] the tax payment shall be a nil amount;
(b) connected payments and the value transferred by connected transfers made by any person who is connected with any other person by whom connected payments or connected transfers are made to the entertainer, or by any associate of such other person, shall together be treated as constituting a single connected payment in determining whether they exceed the relevant amount.

17 Reg 2 ITESR defines this: "the relevant amount" means the amount of the personal allowance in section 35(1) ITA 2007 which applies for the tax year in which the payment or transfer is made.

App. 7.10 Agreements with HMRC

Regulation 4(4)-(6) ITESR allows HMRC to make different arrangements:

> (4) An arrangement to which paragraph (2) refers is an arrangement in writing between
>
> [a] the Board and
>
> [b] the person by whom the connected payment or connected transfer is made, the entertainer, or the recipient of the connected payment or connected transfer,
>
> made following a decision by the Board on an application to which regulation 5 refers, under which the tax payment is an amount which, as a proportion of the connected payment or value transferred by the connected transfer, is an amount less than the said basic rate ("reduced tax payment").
>
> (5) The reduced tax payment may be arrived at by reference to a percentage of the connected payment or of the value transferred by a connected transfer or as a lump sum calculated without reference to any such percentage.
>
> (6) In making an arrangement of the kind to which paragraph (2) refers the Board–
>
> (a) shall, subject to sub-paragraph (b) and paragraph (7) below, at all times aim at securing that the tax payment shall be, as nearly as may be, the amount of the liability to tax of the entertainer or other person arising in relation to the connected payment or connected transfer under the Tax Acts, Schedule 11 and these Regulations, and
>
> (b) may take into account the fact that the liability to the Board for tax has, in a manner satisfactory to them, been secured or otherwise provided for, whether by a guarantee (of whatever person) or other means.

HMRC E&S guidance provides:

> **Application to HMRC to limit the amount of tax withheld**
>
> An application may be made in writing by the entertainer or anyone else authorised to do so on their behalf. Where the application is agreed, it allows the payer to deduct an amount other than the basic rate of tax which corresponds as near as to the entertainer's final UK liability on that payment.
>
> An application to HMRC to limit the amount of tax withheld may be made in writing or on form FEU 8. Any letter which advises the Unit that detailed figures are to follow is considered to constitute an advance

notification of an application **but does not constitute the application itself.**

Applications to the Foreign Entertainers Unit must be made no less than 30 days before the date the payment is due.

If the application is not agreed tax must be accounted for at the basic rate on all related payments.

How to make a reduced tax payment application (RTPA)

The information required to enable an agreement to be made includes:

- dates of arrival in and departure from the UK
- whether the entertainer is likely to return to the UK again before the 5 April
- a projection of actual or estimated total income due from all sources
- a schedule confirming; the date of each performance/event, the name and address of the venue and the name and address of the promoter
- a schedule of the projected actual or estimated expenses which will be incurred
- a copy of each relevant engagement contract or agreement (these do not need to be signed copies).

The application should give sufficient information to show how figures have been arrived at (including the basis for any estimates) and how expenditure appropriate to several countries has been apportioned.

In some cases you may be authorised to deduct a reduced rate of tax, a fixed sum or no tax from the gross payment. This could apply, for example, where an entertainer has to meet substantial expenditure out of a gross fee thus reducing the expected UK tax liability.

In reaching an agreement the Foreign Entertainers Unit will make allowances for admissible expenses. What can be allowed depends on the general rules covering expenditure allowable in arriving at taxable business profits under Section 34 Income Tax (Trading and Other Income) Act 2005 and the facts of each case. Normally allowances will be made for:

- general subsistence expenses
- commission, manager's and agent's fees
- UK travel
- international air fares to and from the UK where the entertainer comes to the UK to perform and returns directly to his or her home country

Other expenses may be allowable. What is allowable in each case will need to be agreed with the Foreign Entertainers Unit including the proportion of any costs appropriate to several countries.

Further information can be obtained about Reduced Tax Payment Applications including further advice regarding the preparation of an

entertainer RTPA.
If the point you wish to check is not covered in this guidance or at the above link then contact the Foreign Entertainers Unit.
How do you know that a reduced tax payment has been authorised?
The Foreign Entertainers Unit will authorise you to deduct a reduced amount of tax by sending you a form FEU 4. Even where you have been a party to the agreed arrangement with HMRC you must wait until you get the form FEU 4.
If you have not received an authorisation form FEU 4 by the time the payment is due you must deduct tax at the basic rate on all related payments.

App. 7.11 Chains of payments

Regulation 4(7) ITESR provides:

> Where–
>
> (a) a person makes a connected payment or connected transfer in relation to a relevant activity, and
>
> (b) in respect of the same relevant activity that person has received a connected payment or connected transfer in respect of which the amount of the tax payment has been paid under these Regulations,
>
> the person concerned shall not be required to deduct out of the connected payment or pay in respect of the connected transfer (to which sub-paragraph (a) refers) any sum to which paragraph 2 of Schedule 11 applies unless, and to the extent that, the tax payment which then falls to be made exceeds the amount of the tax payment to which sub-paragraph (b) refers.

The default rule is that deduction is made at the start of the chain.
HMRC E&S guidance provides:

> **How do you deal with payment chains?**
> Some activities may give rise to a chain of payments. Every payer in the chain must deduct tax as required by law unless the payment is exempt.
> *Example*
> A concert is arranged at a venue. The venue owners control the box office and pay over the ticket proceeds to the promoter less their costs and Withholding Tax. The promoter is then required to deduct Withholding Tax from the fee payable to the entertainer. The promoter should deal with this as follows:
> He must deduct Withholding Tax (where it is due) from the payment made to the entertainer and pay over the net amount.

He must issue a tax deduction certificate form FEU 2, to the entertainer confirming the pay and tax details.
He declares the payment made and the tax deducted on the form FEU 1 (boxes 5 & 6) and shows the tax already withheld from the payment made to him in box 8.
Example
A Promoter engages a non-resident entertainer to appear at a UK venue. The Entertainer is the only non-resident entertainer the promoter engages in the quarter. The sequence of payments is as follows:
The Venue pays £100,000 less £20,000 tax to the Promoter
The Promoter pays £60,000 less £12,000 tax to the Entertainer
The Promoter is liable to account to HMRC for £12,000 but as the payment he has received has had £20,000 Withholding Tax deducted from it he can treat the £12,000 as paid.
Entries on the Promoter's return form FEU 1
The amount and income tax columns of the Promoter's return for the relevant period should be completed as follows:

Payment	Amount	Tax
	60,000	12,000
Less tax already paid by Venue		12,000
Tax payable now		Nil

Evidence of the tax already paid must be provided with the FEU1 return by including part 3 of the FEU2 tax deduction certificate which is supplied by the Venue.

However it is possible to agree a different rule. Regulation 5 ITESR provides:

(1) Where a connected payment or connected transfer falls to be made subject to a tax payment to which regulation 4(2) refers the person by whom the connected payment or connected transfer is made, the entertainer, or recipient of the connected payment or connected transfer, may make an application in writing to the Board, not later than 30 days before the connected payment or connected transfer falls to be made, that it shall be subject instead to a reduced tax payment (within the meaning of regulation 4).
(2) Unless and until there is in force an arrangement under which such a reduced tax payment falls to be made regulation 4(2) shall at all times continue to apply to the connected payment or connected transfer.

HMRC E&S guidance provides:

Middleman Applications

Payers can ask for an arrangement which moves the withholding point further down the chain so that payments between specified payers can be made without deduction of tax. This can only be done with the Foreign Entertainers Unit's approval.

If the concert promoter makes a 'Middleman' application, the Unit may agree to the promoter being the witholding point, therefore the venue will not have to withold tax. The promoter will then have to deduct tax at basic rate on his or her payment or a reduced amount if an entertainer's application for a reduced tax payment has been made and agreed.

The Unit will ask for certain information in support of any 'Middleman' application you make, for example, a copy of any contract, dates of appearances, and probably a copy of the budget. If you are submitting a 'Middleman' application for the first time the Unit will be happy to advise you on the procedure and level of information required....[18]

App. 7.12 Position of payor

Reg 12 ITESR provides:

(1) Where under these Regulations there is accounted for and paid to the Board an amount of tax which is–

(a) in respect of a connected payment or connected transfer, or

(b) paid under an assessment made under paragraph 11,

that amount shall, subject to this regulation, be treated as a payment of tax on account of the tax liability (of whatever person) in respect of the connected payment or connected transfer concerned.

(2) Where, in respect of a connected payment or connected transfer, there is a liability to tax under the Tax Acts as well as under Schedule 11 or these Regulations, the Board shall allocate any payment made to them to which paragraph (1) refers as is just and reasonable in discharge of some or all of those liabilities of the entertainer or other person concerned to whom these Regulations apply.

(3) Where–

(a) by virtue of paragraph 8 of Schedule 11 and these Regulations a connected payment or the value transferred by a connected transfer falls to be included in the amount of profits or gains to which paragraph 8(1)(a) refers, and

(b) the amount of the connected payment or the value transferred

18 See *http://www.hmrc.gov.uk/feu/appromers.htm*

(or an amount in respect of that value) is charged to tax under Schedule E

the amount charged under Schedule E (to which sub-paragraph (b) refers) shall be treated as expenditure which falls to be deducted in computing the profits or gains to which sub-paragraph (a) refers.

(4) Where a payment is a connected payment–

(a) which is, is treated as, or falls to be included in a computation of, income of the entertainer chargeable to tax by virtue of the provisions of Part XVI of the Taxes Act, or

(b) which is a receipt of a company which provides the services of the entertainer to perform the relevant activity, being a receipt which falls to be included in the computation of its profits which are chargeable to tax under Schedule D,

the charge under Schedule 11 shall have effect and the charges to which sub-paragraphs (a) and (b) refer shall be disregarded.

(5) A person making a connected payment or connected transfer in respect of which a tax payment has been made by virtue of these Regulations shall furnish the recipient with a certificate showing the gross amount of the payment or the value transferred, the amount of the tax payment, and the amount actually paid.

HMRC E&S guidance provides:

How are payments dealt with in your Self Assessment or Corporation Tax accounts?

If the income you receive is attributed to the entertainer under the rules set out in Regulation 7 ITESR then the tax withheld from the payment you receive will be treated as a payment on account of the entertainer's UK liability.

You will not be charged to UK tax on that income and there will be no repayment of the Withholding Tax to you.

But if:

- you are UK resident and
- the income you receive is not attributed to the entertainer under the above rules then the payment you receive will be a receipt of your own business

The amount of the assessable income will be the payment received plus the amount of the Withholding Tax which has been deducted. You will be able to claim the gross payment you make as a deduction in your UK Income Tax or Corporation Tax accounts.

'Gross payment' means the payment to the entertainer or intermediary plus the tax accounted for to HMRC.

If you make the payment in a series of payments as described at How to

work out the tax, you may be entitled to set off tax withheld from payments you receive against your UK tax liabilities or claim a repayment of tax.

Example

A UK Venue pays box office income of £100,000 to a UK Promoter in respect of the performance of a non-UK resident entertainer. The Entertainer is paid a fee of £60,000 by the Promoter

Withholding Tax

A venue pays £80,000 to the promoter. This is £100,000 less £20,000 which is 20% tax. The £20,000 tax is paid to HMRC.

The promoter pays £48,000 to the entertainer. This is £60,000 less £12,000 which is 20% tax. The £12,000 tax is paid to HMRC.

Treatment in the accounts

The Venue is allowed the expense of £100,000 (that is the gross payment shown in his accounts).

The Promoter has a receipt of £100,000 as income and is allowed £60,000 as an expense in its accounts.

Tax set offs

The Promoter can claim to set the excess Withholding Tax of £8,000 against its Income Tax/Corporation Tax liability for that accounting period. i.e. £20,000 less the payment of £12,000.

If the Promoter had a tax liability of less than £8,000 it can claim a repayment of the amount by which £8,000 exceeds its Income Tax/Corporation Tax liability for that accounting period.

HMRC E&S guidance provides:

Is Withholding Tax due on payments made to Groups, Theatre Companies, Productions, etc, which include both UK resident and non-resident entertainers?

For example, a music group or a theatre company which includes both UK resident and non-resident performers.

Yes, Withholding Tax is due

Unless advised otherwise by the Foreign Entertainers Unit the payer must account for Withholding Tax on the total payment, including expenses, made to or in respect of the group or theatre company.

If the payee/group/theatre company want the payer to calculate and deduct tax only on the non UK resident performers, the payee/group/theatre company must apply to the Foreign Entertainers Unit for agreement to do this.

How to work out the Withholding Tax

Where you are paying or transferring money it is very straightforward to work out the tax.

Assuming the basic rate percentage for the year of payment is 20 per cent then you should deduct this percentage from each payment made.

Example

Gross Payment	£10,000
Tax (10,000 × 20%)	£2,000
Net amount paid to entertainer	£8,000

The same applies to a loan of money. You should deduct tax from the amount of the loan.

All payments of Withholding Tax made to HMRC must be made in sterling. If you make a payment directly or indirectly to an entertainer in a foreign currency you should calculate the Withholding Tax due using the rate of exchange at the time when the payment is made or at the rate used at the time the foreign currency was purchased. The rate of exchange used should be shown on your return form FEU 1.

If the transfer of an asset is involved (for example, a motor car for a 'hole in one' during a golf competition) you must account for the tax as if the asset's cost to you or in connection with providing it was the net amount of the payment.

Withholding Tax is also due on expenses provided for an entertainer. For example, hotel accommodation, airfares, UK transport etc.

In the absence of an agreement with the Foreign Entertainers Unit, Withholding Tax must be accounted for and paid by the payer, from its own funds, on payments made in respect of expenses provided for an entertainer.

The Withholding Tax due must be calculated as follows:

The cost of the expenses, to the payer, must be grossed up, at the basic rate of tax, to give the true cost of the benefit to the artiste.

Withholding Tax due must be calculated at the basic rate on the grossed up value of the expenses.

The withholding tax calculated must be paid by the payer from its own funds: it must not be deducted from the overall payment made to the artiste.

Example

The airline ticket costs you £1,000. You need to work out the gross amount of the payment and pay tax on that amount. To work out the gross amount you do the following sum.

Net amount of payment £1000 × 20 (basic rate of tax) divided by 80 (100% – 20% basic rate of tax) = £250

Add the tax amount £250 to the net payment £1000 to get the gross payment £1250

Add the result to the net payment to get the gross payment.

£250 + £1,000 = £1,250

Tax (£1,250 × 20%) = £250

VAT Implications

VAT is not chargeable on Withholding Tax and you should therefore exclude the VAT when calculating Withholding Tax due.

When calculating the amount of tax due on a payment to be made either to, or in respect of an entertainer you must not include VAT (if any) charged to you.

If you are a venue paying the gross ticket sales to a promoter or entertainer, the VAT element of each individual ticket price must be taken out.

App. 7.13 Administration

Reg 9 ITESR deals with returns:

(1) A person who makes a connected payment or connected transfer shall, in accordance with this regulation, make a return to the Board of the connected payment or connected transfer which he makes and of any tax payment (including a nil amount) for which he is accountable to the Board.

(2) A return shall be made in the tax year for each successive period ending on 30th June, 30th September, 31st December and 5th April.

(3) The return for each period shall be made within 14 days after the end of the period.

(4) [This deals with notices requiring information, but is now effectively superceded by more general HMRC information powers]

(5) The [TMA 1970] shall apply to a return to which this regulation relates as it applies to a return under the Taxes Acts.

Reg 10 ITESR deals with the due date for tax payments:

(1) A tax payment (including any reduced tax payment), whether any deduction out of a connected payment or provision in respect of a connected transfer has been made or not, shall be due at the time by which the return under regulation 9(1) is to be made ("the due date") and payment shall be made before, or at the time when, that return is made.

(2) A payment at any time so due shall be payable by the person who makes the connected payment or connected transfer concerned, without the making of any assessment in respect of it.

(3) Subject to the provisions of regulation 11, tax which has become due and payable under this regulation (whether or not it has been paid when the assessment is made) may be assessed on the per-son from

whom it is due if that tax, or any part of it, is not paid on or before the due date.

Reg 11 ITESR deals with assessments, Reg 13 ITESR deals with tax overpayments of tax and reg. 14 incorporates the TMA rules. These need not be set out here.

App. 7.14 DT Agreements

Article 17 OECD Model Convention provides:

> 1. Notwithstanding the provisions of Articles 7 [Business profits] and 15 [Employment income], income derived by a resident of a Contracting State as an entertainer, such as a theatre, motion picture, radio or television artiste, or a musician, or as a sportsman, from his personal activities as such exercised in the other Contracting State, may be taxed in that other State.
> 2. Where income in respect of personal activities exercised by an entertainer or a sportsman in his capacity as such accrues not to the entertainer or sportsman himself but to another person, that income may, notwithstanding the provisions of Articles 7 and 15, be taxed in the Contracting State in which the activities of the entertainer or sportsman are exercised.

The OECD Model Commentary provides:

> 1. Paragraph 1 provides that artistes and sportsmen who are residents of a Contracting State may be taxed in the other Contracting State in which their personal activities as such are performed, whether these are of a business or employment nature. This provision is an exception to the rules in Article 7 and to that in paragraph 2 of Article 15, respectively.
> 2. This provision makes it possible to avoid the practical difficulties which often arise in taxing artistes and sportsmen performing abroad. Moreover, too strict provisions might in certain cases impede cultural exchanges. In order to overcome this disadvantage, the States concerned may, by common agreement, limit the application of paragraph 1 to business activities. To achieve this it would be sufficient to amend the text of the Article so that an exception is made only to the provisions of Article 7. In such a case, artistes and sportsmen performing in the course of an employment would automatically come within Article 15 and thus be entitled to the exemptions provided for in paragraph 2 of that Article.

About a dozen UK treaties contain a cultural exemption.

App. 7.14.1 *"Artiste" and "Sportsmen"*

The International Manual provides:

> **INTM153190 Description of double taxation agreements: Artistes/entertainers/athletes** [March 2011]
> This Article is generally entitled artistes and athletes, but the terms entertainers and sportsmen can also be used. We do not consider there is any difference between the terms artistes and entertainers and sportsmen and athletes.

The OECD Commentary provides:

> 3. Paragraph 1 refers to artistes and sportsmen. It is not possible to give a precise definition of "artiste", but paragraph 1 includes examples of persons who would be regarded as such. These examples should not be considered as exhaustive. On the one hand, the term "artiste" clearly includes the stage performer, film actor, actor (including for instance a former sportsman) in a television commercial. The Article may also apply to income received from activities which involve a political, social, religious or charitable nature, if an entertainment character is present. On the other hand, it does not extend to a visiting conference speaker or to administrative or support staff (e.g. cameramen for a film, producers, film directors, choreographers, technical staff, road crew for a pop group etc.). In between there is a grey area where it is necessary to review the overall balance of the activities of the person concerned.
> 4. An individual may both direct a show and act in it, or may direct and produce a television programme or film and take a role in it. In such cases it is necessary to look at what the individual actually does in the State where the performance takes place. If his activities in that State are predominantly of a performing nature, the Article will apply to all the resulting income he derives in that State. If, however, the performing element is a negligible part of what he does in that State, the whole of the income will fall outside the Article. In other cases an apportionment should be necessary.
> 5. Whilst no precise definition is given of the term "sportsmen" it is not restricted to participants in traditional athletic events (e.g. runners, jumpers, swimmers). It also covers, for example, golfers, jockeys, footballers, cricketers and tennis players, as well as racing drivers.

The Commentary discusses the concept of sports or entertainment:

> 6. The Article also applies to income from other activities which are usually regarded as of an entertainment character, such as those deriving

from billiards and snooker, chess and bridge tournaments.

7. Income received by impresarios, etc. for arranging the appearance of an artiste or sportsman is outside the scope of the Article, but any income they receive on behalf of the artiste or sportsman is of course covered by it.

App. 7.14.2 *Income derived as an entertainer*

The OECD Commentary provides:

8. Paragraph 1 applies to income derived directly and indirectly by an individual artiste or sportsman. In some cases the income will not be paid directly to the individual or his impresario or agent. For instance, a member of an orchestra may be paid a salary rather than receive payment for each separate performance: a Contracting State where a performance takes place is entitled, under paragraph 1, to tax the proportion of the musician's salary which corresponds to such a performance. Similarly, where an artiste or sportsman is employed by e.g. a one person company, the State where the performance takes place may tax an appropriate proportion of any remuneration paid to the individual. In addition, where its domestic laws "look through" such entities and treat the income as accruing directly to the individual, paragraph 1 enables that State to tax income derived from appearances in its territory and accruing in the entity for the individual's benefit, even if the income is not actually paid as remuneration to the individual.

9. Besides fees for their actual appearances, artistes and sportsmen often receive income in the form of royalties or of sponsorship or advertising fees. In general, other Articles would apply whenever there was no direct link between the income and a public exhibition by the performer in the country concerned. Royalties for intellectual property rights will normally be covered by Article 12 rather than Article 17 (see paragraph 18 of the Commentary on Article 12), but in general advertising and sponsorship fees will fall outside the scope of Article 12. Article 17 will apply to advertising or sponsorship income, etc. which is related directly or indirectly to performances or appearances in a given State. Similar income which could not be attributed to such performances or appearances would fall under the standard rules of Article 7 or Article 15, as appropriate. Payments received in the event of the cancellation of a performance are also outside the scope of Article 17, and fall under Articles 7 or 15, as the case may be.

App. 7.14.3 *Computation*

The OECD commentary provides:

10. The Article says nothing about how the income in question is to be computed. It is for a Contracting State's domestic law to determine the extent of any deductions for expenses. Domestic laws differ in this area, and some provide for taxation at source, at a low rate based on the gross amount paid to artistes and sportsmen. Such rules may also apply to income paid to groups or incorporated teams, troupes, etc. Some States, however, may consider that the taxation of the gross amount may be inappropriate in some circumstances even if the applicable rate is low. These States may want to give the option to the taxpayer to be taxed on a net basis. This could be done through the inclusion of a paragraph drafted along the following lines ...

App. 7.14.4 *Receipts by third parties*

The OECD commentary provides:

11. Paragraph 1 of the Article deals with income derived by individual artistes and sportsmen from their personal activities. Paragraph 2 deals with situations where income from their activities accrues to other persons. If the income of an entertainer or sportsman accrues to another person, and the State of source does not have the statutory right to look through the person receiving the income to tax it as income of the performer, paragraph 2 provides that the portion of the income which cannot be taxed in the hands of the performer may be taxed in the hands of the person receiving the remuneration. If the person receiving the income carries on business activities, tax may be applied by the source country even if the income is not attributable to a permanent establishment there. But it will not always be so. There are three main situations of this kind:

a) The first is the management company which receives income for the appearance of e.g. a group of sportsmen (which is not itself constituted as a legal entity).
b) The second is the team, troupe, orchestra, etc. which is constituted as a legal entity. Income for performances may be paid to the entity. Individual members of the team, orchestra, etc. will be liable to tax under paragraph 1, in the State in which a performance is given, on any remuneration (or income accruing for their benefit) as a counterpart to the performance; however, if the members are paid a fixed periodic remuneration and it would be difficult to allocate a portion of that income to particular performances, member countries may decide, unilaterally or bilaterally, not to tax it. The profit element accruing from a performance to the legal entity would be liable to tax under

paragraph 2.

c) The third situation involves certain tax avoidance devices in cases where remuneration for the performance of an artiste or sportsman is not paid to the artiste or sportsman himself but to another person, e.g. a so-called artiste company, in such a way that the income is taxed in the State where the activity is performed neither as personal service income to the artiste or sportsman nor as profits of the enterprise, in the absence of a permanent establishment. Some countries "look through" such arrangements under their domestic law and deem the income to be derived by the artiste or sportsman; where this is so, paragraph 1 enables them to tax income resulting from activities in their territory. Other countries cannot do this. Where a performance takes place in such a country, paragraph 2 permits it to impose a tax on the profits diverted from the income of the artiste or sportsman to the enterprise. It may be, however, that the domestic laws of some States do not enable them to apply such a provision. Such States are free to agree to other solutions or to leave paragraph 2 out of their bilateral conventions.

11.1 The application of paragraph 2 is not restricted to situations where both the entertainer or sportsman and the other person to whom the income accrues, e.g. a star-company, are residents of the same Contracting State. The paragraph allows the State in which the activities of an entertainer or sportsman are exercised to tax the income derived from these activities and accruing to another person regardless of other provisions of the Convention that may otherwise be applicable. Thus, notwithstanding the provisions of Article 7, the paragraph allows that State to tax the income derived by a star-company resident of the other Contracting State even where the entertainer or sportsman is not a resident of that other State. Conversely, where the income of an entertainer resident in one of the Contracting States accrues to a person, e.g. a star-company, who is a resident of a third State with which the State of source does not have a tax convention, nothing will prevent the Contracting State from taxing that person in accordance with its domestic laws.

App. 7.14.5 *Double tax credit relief*

The INTM provides:

INTM168063 Foreign tax paid on trade income: limitation on credit: Artistes/athletes/sportsmen [January 2011]
As indicated in INTM153190, the country in which an entertainer or

sportsman performs has primary taxing rights over the income he derives from his performances in that country. Many foreign countries impose a withholding tax on the payments made for such performances at a fixed percentage of the gross payments. These are final taxes and normally claims cannot be made to the foreign country to have the expenses incurred in earning the payments deducted from the gross amounts. Where a resident entertainer or sportsman is charged to UK Income Tax on profits or gains arising from any profession or vocation, he is entitled to credit for these foreign taxes against the UK tax on the UK measure of that income, that is, the income less the expenses incurred in earning it. The credit will be the lesser of the foreign tax and the tax at his marginal rate (see INTM165040 onwards).

Where, however, a resident entertainer or sportsman is employed by a service company, the income from his performances is income of that company and he is paid a salary out of that income. Credit for the foreign tax paid on the payments for his performances is due against the Corporation Tax payable by the company on its profits. The income of the entertainer or sportsman is remuneration from the service company and not the original fees paid to the company and he is not therefore entitled to credit for such foreign tax against the UK tax on his salary. Nonetheless, it is possible that that a different treatment may be available where the foreign tax is imposed in a personal capacity on the entertainer etc notwithstanding that the performance payments are made to the service company. This treatment is intended to put the entertainer etc in a similar position when receiving remuneration from a service company in respect of overseas income that can be matched to a particular source, to the one he would have been in had he received the income direct. For instance, if a clear and direct link can be made between the fees for the performance in the overseas country and the income arising to the performer in the form of remuneration from the service company then it may be that the remuneration derived by the entertainer can be identified with the income taxed by the foreign tax authority. Where there such a link can be made, and the interval between the two events is short, it may be possible to allow the tax credit against income tax charged on the entertainer etc. Any credit given to the entertainer etc must be restricted in accordance with TIOPA10/S36 and S37, by reference to expenses (see INTM168010 onwards.)

Please therefore refer to Personal Tax International (PTI) Advisory. (part of Charity, Assets & Residence) where (i) a claim to credit for foreign tax is made by the entertainer or sportsman and (ii) the foreign tax has been imposed on the income received by the service company

but (iii) the overseas tax authority has disregarded the existence of the service company and taxed the income as if it belonged to the entertainer or sportsman. This treatment will not be available where a deduction for the foreign tax has been allowed to the company under S112 TIOPA10.

APPENDIX EIGHT

HOW TO IMPROVE RESIDENCE AND DOMICILE TAXATION

"To tax and to please, no more than to love and to be wise, is not given to men."[1] The following programme of tax reform is therefore split into two parts. Part 1 is a list of short technical improvements with no significant tax cost, no significant winners or losers, and not politically contentious. It represents some cheap and easy improvements to charity tax to which no-one should object or find difficult, the "low lying fruit" of charity tax reform.

Part 2 touches on tax avoidance on which HMRC are very sensitive.

Part 1: Low lying fruit

Proposal	Reference
Those born in the UK and deemed domiciled here on IHT principles (17 years residence) should be treated as UK domiciled for all tax purposes, not just IHT.	See 1.4 (Suitability of domicile as a fiscal test)
Repeal s.721(3) ITEPA.	See 3.3 (The concept of domicile)
Naturalised citizens should be deemed UK domiciled for tax purposes.	See 3.11.5 (Commentary)
English/Northern Ireland law definition of domicile should adopt the amendments made in Scotland. (This involves a general law reform, not just tax law.)	See 3.15 (Child's domicile in Scotland)

1 Edmund Burke, First Speech on the Conciliation with America (1774).

IT/CGT definition of trustee residence should apply for IHT.	See 5.18.1 (Trustee residence for IHT: Commentary)
Repeal s.82 and s.65(3) TCGA (collection of exit charge from trustees).	See 8.5.2 (Commentary)
TNR rules: exemption if foreign tax paid and annual exemptions.	See 9.26 (TNR rules: commentary)
Define RFI to mean all foreign source income; repeal s.830(1)(b), (2), (3) ITTOIA.	See 10.3.2 (Let's simplify the definition of RFI); 56.4 (Withdrawal of unremittable income relief)
"Relevant persons" for remittance purposes should just be the taxpayer, spouse, CP, cohabitee and minor children.; investment relief can be abolished as unnecessary.	See 11.8.1 (Commentary) 11.11 (Commentary: let's simplify remittance and relevant person rules); 12.24 (Remittance investment relief: commentary)
Foreign services relief: delete condition B and repeal s.809W(5) ITA.	See 12.26.4 (Services relief condition B: commentary); 12.26.6 (Exceptions: s.730 & s.87 benefits)
A person remitting from a mixed fund can determine what constituent of the fund the remittance consists of.	See: 13.16 (ITA mixed fund rules: commentary)
Delete requirement that "foreign employers" must be resident outside the UK.	See 22.13 (Foreign employer)
Align taxation of trades, professions and vocations so the same rules apply to all.	See 15.2 (Charge on trading income)
Source of interest should be as specified in OECD model.	No-one knows what the current test is. See 18.10.1 (Commentary)
Define "ordinary place of abode" in line with residence.	See 18.15.6 (Commentary)

The DTA self-certificate system for royalties should apply to interest.	See 18.17.11 (Commentary)
Repeal relief for exempt foreign currency securities.	See 19.8 (Exempt foreign currency securities)
Align treatment of Baker & Garland trusts, ie extend s.464 ITA to all trusts.	See 26.3.5 (Commentary)
Collect tax on income of settlor-interested trust from the settlor.	See 27.8 (Taxation of trustees of settlor-interested trust)
S.731 remittance basis should apply only if benefit is remitted (like the s.87 remittance basis).	See 30.36.9 (Commentary)
The statutory definition of "commercial" in s.738 ITA should be repealed.	See 32.6.4 (Commentary)
Restore motive defence old condition B.	See 30.13.8 (Section 733 computation: commentary)
Abolish Accrued Income remittance basis (make gains subject to CGT).	See 37.9.7 (Commentary)
Transactions in financial assets should in principle be deemed non-trading. The IME, AIF and OFTR exemptions can be repealed.	See 42.11 (Commentary)
Repeal s.56(3)(a)-(f) - an odd list of entitlements to personal allowances.	See 47.6.3 (Commentary)
Repeal relief for pre-1991 protected trusts: there are probably none left in existence.	See 50.7.4 (Commentary: let's abolish relief for pre-1991 protected trusts)
Align definition of "spouse" for CGT and IT settlor-interested trust rules, ie apply s.625(4) ITTOIA for CGT.	See 50.4.2 (Civil partner and same-sex spouse of settlor).
Repeal s.87 interest surcharge.	See 51.13.1 (Commentary)

Schedule 4B & 4C TCGA should only apply where there is a purpose specifically to avoid s.87 or s.86.	See 52.29 (Commentary)
Repeal carry back of losses on death.	See 54.5 (Carry-back of losses on death)
Personal CGT losses should be deductible against s.87 gains.	See 54.7.1 (Commentary)
The taxation of foreign currency should be the same as foreign currency bank accounts.	See 55.11.2 (Commentary)
Yearly exchange rate averaging; Currency conversion date for income remittance is date of receipt, not date of remittance.	See 55.13 (Commentary: solution to remaining foreign currency problems)
Repeal s.80 IHTA. The cure is worse than the disease.	See 62.14.11 (Commentary)
UK bank accounts to qualify as excluded property as non-UK accounts.	See 62.20.4 (Commentary)
Repeal s.731(6) ITEPA (illegitimacy taken into account).	See 74.4.2 ("Family")
Abolish the s.105 charge and extend s.106 to cover all the acquisition cost.	See 74.20.6 (Commentary)
Shadow directors should be taken out of the benefit in kind charge.	See 74.26 (Living accommodation charge: commentary)
Replace POA rules with focussed anti-avoidance rules.	See 76.39.3 (Assessment)
A single definition of "settlor" which applies for all taxes.	See 80.3.9 (Commentary); 80.9.3 (Commentary: extending IT/CGT appointment rules to IHT)

Repeal s.473 ITA (& CGT equivalent); dead letter law.	See 80.33.6 (Commentary)
Repeal para 21B Sch 24 FA 2007 which has never been used.	See 82.1 (Concept(s) of situs)
Treat all assets other than UK land and securities as non-UK situate for the purposes of IHT & CGT.	See 82.36 (Reform of IHT/CGT situs rules)
Failing that, a second best: All securities situate for CGT in the place of incorporation of the company. s.275(1)(c) should be replaced by a rule that a debt is situate where the debtor is resident (applying the UK tax definition of residence). Repeal s.s.275(1)(k) TCGA (situs of judgement debt).	See 83.8.4 (Commentary); 83.13.5 (Commentary). 83.11 (Debt rules: commentary)
Provision that usufruct is not an IHT-settlement.	See 84.16.5 (Commentary)
Define PE by reference to OECD model definition.	See 86.12 (Commentary: let's have one definition of PE)
Replace branch/agency with PE.	See 86.16 (Commentary: let's abolish branch/agency)

Part 2: Reforms involving tax avoidance provisions

Proposal	**Reference**
Repeal POA rules; replace with IHT charge on death in case of *Eversden*, *Ingram* and Home Loan schemes; repeal s.102(5A)-(5C) FA 1986.	See 76.39 (Commentary); 63.10.2 (Restriction on GWR spouse exemption).
Repeal corporate property regime; or allow election for transparency	See 75.45.6 (Some ways forward)

APPENDIX NINE

REFORM OF OFFSHORE ANTI-AVOIDANCE RULES

App. 9.1 Reform of anti-avoidance rules: Introduction

This chapter reviews proposals for simplification of the IT and CGT anti-avoidance rules which apply to non-resident trusts and companies.

The rules discussed in this chapter may be classified in two ways:

"IT rules": s.720, s.731 ITA; s.624 ITTOIA; as opposed to:

"CGT rules": s.13, 86 and 87 TCGA.

Alternatively the rules may be classified as:

"Settlor rules": s.624, 720, and 86, which apply to settlors/transferors, as opposed to:

"Benefit rules": s.731 and s.87, which apply on receipt of benefits.

"The CIOT reform paper" is the CIOT paper entitled "Reform of two anti-avoidance provisions".[1]

App. 9.2 Outline of reforms discussed

The reforms discussed in this chapter are as follows:

(1) To reduce the overlap of IT rules so only one IT rule applies at any one time. At present the IT rules overlap and s.624, s.720 and s.731 rules can all operate at the same time. (The CGT rules overlap rather less.)

(2) To align IT and CGT benefit rules

(3) To align IT and CGT settlor rules

Points (2) and (3) are possible if and so far as the IT/CGT rules are both aiming to achieve the same result, namely (in short) to tax income/gains arising to non resident entities and

---

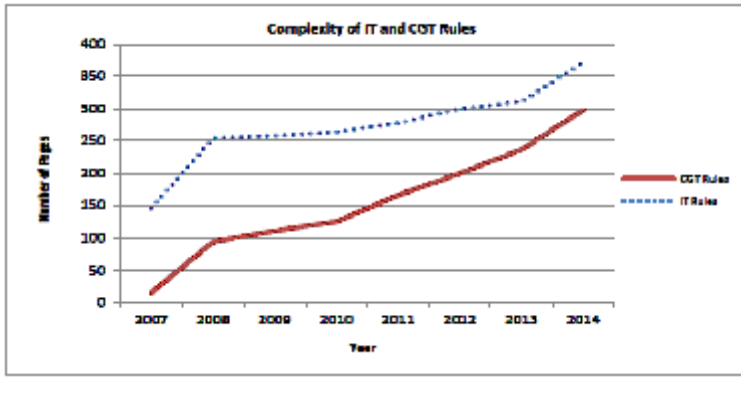
1 (October 2012) accessible *http://www.tax.org.uk/Resources/CIOT/Documents/2012/10/121002_s13_trans_assets_CIOT.pdf*

(a) tax the individual responsible for funding the entity on the entity's income/gains (on an arising basis or remittance basis)
(b) tax other individuals who receive benefits from the entity on the benefits (on a receipts basis or a remittance basis)

The inheritance taxation of trusts is the topic most in need of reform but that issue is not discussed here as it is too far from the themes of this book.[2]

App. 9.3 The need for reform

The burden of operating the many sets of rules has increased in recent years as all the rules have become wider and more complicated. The growth in complexity can be (approximately)[3] measured by the number of pages discussing the topics in succeeding editions of this book. The figures are striking:



The burden of separate codes was, I think, acceptable (if sub-optimal) when they emerged[4] but is now extravagant. No reader who studies this

2 See Kessler, "The Quest for Fair Inheritance Taxation of Trusts" (2012) *http://www.kessler.co.uk/wp-content/uploads/2012/10/JK4393-Lecture-Trust-tax-reform-5.pdf*

3 The page count is a rough proxy for the ever growing complexity of the law, but not an altogether bad one. Some of the page growth is due to better coverage of the law, and does not reflect increasing complexity. However I think it would be correct to say that 90% of the growth is due to ever-increasing complexities. A major change leads to growth over several succeeding years as the implications and HMRC guidance gradually emerge.

4 A historical note: The emergence of distinct IT and CGT benefit rules at the same time in the FA 1981 is puzzling. (The CIOT reform paper uses stronger language: "bizarre ... inexplicable"). The explanation is no doubt that those responsible for

book will doubt the need for reform.

App. 9.4 How to assess proposed reforms

Assessment of proposed reforms raises two sets of issues.

The first is that propounded by the Government in the FA 2008 reforms: do the reforms produce a system which is fairer, simpler, and/or easier to operate;[5] if not in absolute terms, then measured from the starting point of the present system.

The second set of issues is whether there are winners and losers. If there are none, or few, the reforms may be described as **"technical"** and should not be politically controversial.

If a reform produces a balance of winners and losers, the Treasury may not be affected but losers generally object more loudly than winners so the political issues remain. Winners and losers need to be identified and the results defendable.

If the reform produces losers, harder transitional issues may arise.

As the numbers become significant the reforms will become more political.[6]

The emphasis in this chapter is on more technical reforms, but no worthwhile reform can be achieved without some winners or losers. Effective tax simplification cannot be achieved by technical reforms alone.

App. 9.5 Critique of present rules

Alignment of the IT/CGT benefit rules raises the question whether to take the CGT rules or the IT rules as the starting point for an aligned system. Is one better than the other, and if so, which?

App. 9.5.1 *Criticism of s.87 regime*

The Jersey court commented on the s.87 regime, in a variation of trusts case, and was not flattering:

> In essence, as we understand it, as a result of the changes introduced in

---

drafting the one did not liaise with those responsible for the other. There was no public consultation for either.

5 See 1.7 (2008 reforms: assessment)[[Foreign Domicile Tax Reform#2008 reforms: assessment | 2008 reforms: assessment]].

6 In practice politics depends on salience as well as significance; the lively debate on the proposal in Budget 2012 to impost a "Pasty tax" is an illustration.

> the 1998 Finance Act of the United Kingdom, [extending the s.87 regime to settlements with foreign domiciled settlors] UK resident beneficiaries are liable to be assessed for capital gains tax on the uplift in capital value in the underlying settlement assets between the date of the Settlement and the date of any appointment to them. ... such liability might be very significant and indeed account for a major proportion of the Trust assets ever appointed to them. It appears that this particular tax regime disregards the fact that the beneficiaries were not the owners of the assets during which time the gains were made, had no control over what gains were made or how the assets were invested or whether income or capital was appointed or retained. It is not as if the underlying settlement assets were UK beneficially owned assets either or naturally fell within the UK tax net during the period of the Settlements. The tax, as the Court understands it, is calculated by reference to the time during which the beneficiaries were only discretionary objects of the Trust, artificially treating them as if they had a control which neither legally or actually they had. ... this is the clearest possible case where the artificial and unduly harsh nature of the basis of taxation would indeed prompt the exercise of discretion [to vary the trusts].[7]

The essence of the criticism is that the s.87 charge in its post-1998 form is excessively wide; even more so in its post-2008 form. There is no doubt that it operates a very rough justice. The Court approved a variation - adding the settlor as a beneficiary - whose purpose was to facilitate arrangements to avoid the charge.

App. 9.5.2 *Criticism of ToA regime*

The tribunal has described the ToA legislation as "some of the most complex in the Taxes Acts".[8] That is really saying something.

The CIOT reform paper concludes:

> Essentially the current rules [the transfer of assets code] are not fit for purpose.

App. 9.6 Proposal to align benefit rules

It is easier to criticise than to construct. Nevertheless, I think all readers who study the topic will agree with the CIOT, the Jersey Court and the first-tier tribunal, that neither the IT rules nor the CGT rules can be

8 *Williams v HMRC* TC/2011/02663, 23 January 2012 (unreported).

defended as reasonably satisfactory as they stand. That being the case, there may not be much to chose between them. It matters less which set of rules one starts with, if one goes on to tinker with them; the way forward is to combine features of both.

The CIOT's proposal to align the benefit rules would adopt the CGT benefit rules to IT, (but adding a motive defence). The CIOT reform paper provides:

> Income arising to [non-settlor-interested] trusts could, as indicated above, be covered by adapting TCGA 1992 section 87-97 to income, albeit preserving a motive defence.
> Income arising to companies could be covered by adapting TCGA 1992 section 13. This is particularly so now, given that it is now proposed to give s13 a proper motive defence and a sensible de minimis limit.
> As indicated above, the adaptation of TCGA 1992 sections 87-97 to income would have to have a motive defence built into it. The reason is that many trusts, at the time of creation, have no UK connection. It would be wrong to tax a beneficiary who comes to the UK by reference to income arising before he immigrated. A motive defence would be a blunt way of doing this.

App. 9.7 Overlap of ToA and settlor-interested trust rules

The CIOT reform paper provides:

> The key point is that the ToA code is only required if the income arises to a non resident entity which is for income tax purposes opaque. If the entity is not opaque, anti avoidance legislation is not needed at all, as then the income is taxed on general principles as that of the underlying owner or owners....

In particular, a settlor-interested trust within s.624 is transparent.

It is already the case that s.720 does not apply where s.624 does apply.[9] The CIOT proposal is that s.624 should exclude the ToA rules altogether, ie the non-transferor rules (s.731) do not apply so that:

(1) income of a trust within s.624 is not relevant income.
(2) benefits conferred by a trust within s.624 do not count for the purposes of s.731.

Thus only one anti-avoidance rule applies at a time.

---

9 See 27.10 (Sections 624 and 720: comparison)[[Settlor-interested Trusts#Sections 624 and 720: comparison | Sections 624 and 720: comparison]].

For this purpose is a trust is within s.624 when the settlor is UK resident (whether or not a remittance basis taxpayer).

When the settlor is non-resident, the better course would be to amend s.624 so it does not apply, leaving s.731 to apply.

App. 9.8 Overlap of CGT settlor rules and CGT benefit rules

The overlap of s.86 and s87 can be avoided by providing that a trust is not within the scope of s.87 if it is within the scope of s.86.

App. 9.9 Alignment of IT and CGT settlor rules

Residence of individuals is a sensible connecting factor for UK taxation: everyone will accept that an individual who is UK resident should be subject to UK tax on an arising or remittance basis. Residence of *trustees* is a matter which is chosen by the appointment of trustees, and makes very little sense as a connecting factor in the taxation of trusts.[10]

This is recognised in four contexts where trustee residence is (more or less) irrelevant for UK tax purposes:

(1) IT settlor rules: s.624
(2) CGT settlor rules: s.86
(3) Chargeable event gains
(3) Inheritance taxation of trusts

In these cases the connecting factor for UK taxation is the residence or domicile of the settlor: trustee residence is less important or irrelevant.

App. 9.9.1 *IT & CGT settlor rules compared*

The differences between the IT and CGT settlor rules (s.624 and s.86) are striking. The most important are:

(1) Definition of "settlor-interested": CGT definition much wider
(2) Foreign domiciled settlor: within s.624 but not within s.86
(3) Non-resident settlor: partly within s.624 (UK source income) but not within s.86.
(4) Definition of "settlement": Non-classic settlements within s.624 but not within s.86; non-bounteous settlements within s.86 but not s.624.

These distinctions only due to contingent historical development; none are attributable to careful policy deliberation. There is no good policy reason

10 It might be said that UK resident trustees enjoy the benefit of the UK legal system; but it would be more accurate to say that the UK economy enjoys the benefit of work opportunities for UK resident trusts.

why the rules should be different for the two taxes. A simpler and more rational system would apply the same rules.

App. 9.9.2 *Definitions of "settlor-interested"*

The rich variety of rules for the UK taxation of trusts offers four possible starting points:

(1) A trust is within the scope of UK tax if
   (a) the settlor/spouse is UK resident and
   (b) the settlor (or close family) is a beneficiary.
   This is (in short) the IT model under the IT settlor rules.
(2) Ditto but relax (a) so it sufficies if the settlor's wider family is a beneficiary. This is (in short) the CGT model under the CGT settlor rules.
(3) Ditto but delete (a): the beneficiaries do not matter. This is the chargeable event model for life policies
(4) Ditto but relax (b): a trust is within the scope of UK tax if the settlor is UK domiciled at the time the settlement is made. It does not matter who the beneficiaries are. This is (in short) the IHT model.

App. 9.9.3 *The difficulties of aligning settlor rules*

Once one opens up the debate as to which is better, intractable problems appear. Changes in this area would be substantive and not merely technical, and in particular:

(1) Reform will produce losers.
(2) The other proposals made in this chapter are technical reforms on which, I think, there ought to be fairly widespread agreement among those who understand the tax system. But here there will be no general agreement, so there will be less support for any reform. If one sets out all the options, not one of them would command a majority support.

There are fundamental decisions to make, and no logical principles on which to make them; contemplation just leaves one feeling giddy. The basis question is the purpose of settlor rules. In origin the purpose of the rule was to tax the settlor on benefits expected to accrue to the settlor. Hence the IT settlor rule is restricted to settlor-interested trusts. But if more widely extended, as in CGT, the purpose is rather to tax the trust. If that is the purpose, then the logic leads to the conclusion that the rule should not be restricted to *settlor-interested* trusts, as is the case for chargeable event gains and IHT.

App. 9.9.4 *A proposal*

Tax reform, as politics, is the art of the possible. Perhaps the most realistic course is to leave the current settlor rules unaligned. Certainly that would be better if a more ambitious reform programme threatened the less controversial and badly needed technical reforms set out above. The CIOT reform paper wisely did not enter this arena.

If one were sufficiently radical, bold, or foolhardy, to enter into this arena, however, the author's solution would be as follows.

(1) Adopt the CGT definition of a settlor-interested trust.

(2) Extend the CGT rules to settlor-interested trusts.

A remittance basis settlor would qualify for the remittance basis.

Conversely, trusts should be exempt from CGT and IT on foreign income in relation to property provided (or wholly provided) by foreign domiciled non-resident settlors. At that point one falls back on the s.731/s.87 regime.

This is (I think) the basis of trust taxation in Canada, New Zealand and, I suspect, most other common law jurisdictions. HMRC made a proposal of this kind in 1972, though nothing came of it.[11]

DT relief would apply where the trustees are treaty-resident in a foreign state.

Of course, domicile and residence of the settlor are not perfect connecting factors. Such a thing does not exist. International families can sometimes break the link by:

(1) transfers to individuals who are not connected to the UK, and

(2) the individual settles or resettles the property.

However this is easier to say than to do.[12]
