Shares and Assets Valuation are responsible for valuing overseas property and they should provide the open market value with vacant possession of the property. The question of any reduction in value to reflect the impact of a lease should be referred to Technical, once the open market value has been agreed, as should any case where the taxpayer does not accept the position outlined above.

#### 86.16.6 *Usufructs: Critique*

There are two problems: (1) it is unclear whether a usufruct is an IHT-settlement; and (2) if it is an IHT-settlement, the IHT treatment is absurd. The second problem cannot be solved unless one addresses the mess which is the Inheritance Taxation of trusts.<sup>212</sup> In the absence of wholesale reform, the second best course would be to solve the first problem (and

---

212 As to which, see Kessler, “The Quest for Fair Inheritance Taxation of Trusts” [2013] *Trusts & Trustees* 364  
<https://www.kessler.co.uk/wp-content/uploads/2014/08/Kessler-The-Quest-for-Fair-Inheritance-Taxation-of-Trusts.pdf>

avoid the second) by a provision (in my view confirming the existing law) that a civil-law usufruct is not an IHT-settlement. Then at least taxpayers would know where they stand. The problem of transitional rules for existing usufructs would need consideration.<sup>213</sup>

I suspect that only EC pressure could give sufficient impetus to yield reform on this point, and post-Brexit that seems unlikely.

The conclusion to draw for practical purposes is that UK domiciled individuals should not create a usufruct, except:

- (1) by will; or
- (2) possibly, if the value of the property falls within the general nil rate band(s) of the owner(s), or if DT relief is applicable.

### 86.17 Foreign partnership: Legal person

In discussing the question whether a foreign partnership/partnership-like entity has legal personality, bear in mind that this term can have different meanings in UK/foreign law.<sup>214</sup>

Avery Jones says:<sup>215</sup>

In Germany, Switzerland and Italy partnerships are not legal persons because partnership is a personal relationship that does not survive changes in the partners (except in Italy), and the liability of at least one of the partners is unlimited. It follows that in those countries a formal partnership... can have partial legal capacity without being a legal person since it lacks the continuity necessary to be a legal person in their law. If a body identical to a German, Swiss or Italian formal partnership existed in most other civil law countries, its capacity would result in its being a legal person.

In France on the other hand, partnerships formed under both the Commercial Code and Civil Code ... are legal persons following registration in spite of the partners being liable for the legal person's liabilities, but an unregistered, in our terms, informal, partnership is not a legal person. ...

---

213 Section 93(4) FA 1980 (turning Scottish proper liferents into IHT-settlements) offers a precedent.

214 See App.2.9 (Person/legal personality).

215 'Characterisation of Other States' Partnerships for Income Tax' [2002] BTR 375. Some footnotes are omitted or abbreviated.

Although normally in the common law system a partnership is not a legal person, and hence cannot have any legal capacity, because the common law equates the two, a Delaware RUPA partnership and a Scots partnership are legal persons and accordingly have the capacity to carry on business themselves, although it is still the partners that carry on the business because that is the definition of partnership...

In civil law, a partnership's capacity and name is more important than whether it is a legal person, but in common law a partnership does not have legal capacity except in the few cases, such as a Delaware RUPA partnership and Scots partnership, where it is a legal person. This difference in legal capacity between civil law and common law is more a feature of the difference in the laws dealing with agency, than any real difference.

## 86.18 German partnerships

I consider the partnerships governed by the following laws:

Country	Business code			
Germany	Handelsgesetzbuch (HGV) <sup>216</sup>			
Austria	Unternehmensgesetzbuch (UGB) <sup>217</sup>			
Entity	English	See para	HGB Book 2	UGB Book 2
Offene Handelsgesellschaft	General partnership	86.15	Part 1 ss 105-	Part 1 ss 105-
Kommanditgesellschaft GmbH & Co KG	"Ltd partnership"	86.16	Part 2 ss 161- <sup>218</sup>	Part 2 ss 161-
Stille Gesellschaft	"Silent partnership"	86.17	Part 3 ss 230-	Part 3 ss 179-

216 <https://www.gesetze-im-internet.de/hgb> (German); Official English translation [http://www.gesetze-im-internet.de/englisch\\_hgb/englisch\\_hgb.html](http://www.gesetze-im-internet.de/englisch_hgb/englisch_hgb.html) but I have not followed this exactly.

217 <https://www.ris.bka.gv.at/GeltendeFassung.wxe?Abfrage=Bundesnormen&Gesetzesnummer=10001702>

218 Part 1 Book 2 is also applicable, so far as not altered by Part 2. Section 161(2) HGB provides:

Soweit nicht in diesem Abschnitt ein anderes vorgeschrieben ist, finden auf die Kommanditgesellschaft die für die offene Handelsgesellschaft geltenden Vorschriften Anwendung.

Unless this Part provides otherwise, the provisions applicable to a general partnership apply to a limited partnership.

Section 161(2) UGB is substantially the same.

A number of other countries have entities based on the German model.

## 86.19 Offene Handelsgesellschaft

Offene Handelsgesellschaft may approximately be translated as a general partnership; though it would be more precise to use the German term.

Section 105 HGB provides:

(1) Eine Gesellschaft, deren Zweck auf den Betrieb eines Handelsgewerbes unter gemeinschaftlicher Firma gerichtet ist, ist eine offene Handelsgesellschaft, wenn bei keinem der Gesellschafter die Haftung gegenüber den Gesellschaftsgläubigern beschränkt ist.

(1) A partnership formed for the purpose of carrying on a commercial business under a joint business name is a general partnership if no partner's liability is limited vis-à-vis the partnership's creditors.

(2) Eine Gesellschaft, deren Gewerbebetrieb nicht schon nach § 1 Abs. 2 Handelsgewerbe ist oder die nur eigenes Vermögen verwaltet, ist offene Handelsgesellschaft, wenn die Firma des Unternehmens in das Handelsregister eingetragen ist. § 2 Satz 2 und 3 gilt entsprechend.

(2) A partnership, whose commercial enterprise is not a commercial business pursuant to Section 1(2), or which manages only its own assets, is a general partnership if the business name of the enterprise is registered in the Commercial Register. Section 2, second and third sentences, shall apply mutatis mutandis.

Section 124(1) HGB provides:

Die offene Handelsgesellschaft kann unter ihrer Firma Rechte erwerben und Verbindlichkeiten eingehen, Eigentum und andere dingliche Rechte an Grundstücken erwerben, vor Gericht klagen und verklagt werden.

A general partnership can, under its business name, acquire rights and enter into obligations, acquire ownership and other rights in rem in real property and sue and be sued in court.

Both general and limited partnerships have legal personality in the (English law) sense that they are capable of rights and duties. But German (and Swiss) partnerships do not survive a change in the partners,<sup>219</sup> so that they do not have legal personality in the (German law) sense.<sup>220</sup>

The HMRC transparent/opaque list classifies an Offene Handelsgesellschaft as transparent.

## 86.20 Kommanditgesellschaft

### 86.20.1 German law background

Art 161(1) HGB provides:

Eine Gesellschaft, deren Zweck auf den Betrieb eines Handelsgewerbes unter gemeinschaftlicher Firma gerichtet ist, ist eine Kommanditgesellschaft, wenn bei einem oder bei einigen von den Gesellschaftern die Haftung gegenüber den Gesellschaftsgläubigern auf den Betrag einer bestimmten Vermögenseinlage beschränkt ist (Kommanditisten), während bei dem anderen Teil der Gesellschafter eine Beschränkung der Haftung nicht stattfindet (persönlich haftende Gesellschafter).

A partnership formed for the purpose of carrying on a commercial business under a joint business name is a *Kommanditgesellschaft* (limited partnership) if the liability of one or more of the partners is limited vis-à-vis the partnership's creditors to the amount of a specific contribution of assets (limited partners), while the other partners have unlimited liability (general partners).

Kommanditgesellschaft may approximately be translated as limited partnership, though it would be more precise to use the German term. A partner with limited liability is a “Kommanditist” and a partner with unlimited liability is a “Komplementär”.

---

219 Avery Jones et al, “Characterisation of Other States' Partnerships for Income Tax” [2002] BTR 375 (footnotes omitted).

220 See 86.17 (Foreign partnerships: Legal capacity).

Avery Jones et al state:<sup>221</sup>

Limited partnerships are used extensively in Germany, particularly the type known by the name GmbH & Co KG where the general partner is a limited company (ie, a GmbH) often taking no share in the profits of the partnership and with its shares being held by the limited partners who can be authorised by the general partner by power of attorney to manage the partnership without losing their limited liability. In this way, the partners, either as limited partners or as shareholders in the limited company, all have limited liability, but the partnership is transparent for tax purposes.

### 86.20.2 *Austrian law background*

Section 161 UGB provides:

**Begriff, Anwendung der Vorschriften über die offene Gesellschaft**

§ 161. (1) Eine Kommanditgesellschaft ist eine unter eigener Firma geführte Gesellschaft, bei der die Haftung gegenüber den Gesellschaftsgläubigern bei einem Teil der Gesellschafter auf einen bestimmten Betrag (Haftsumme) beschränkt ist (Kommanditisten), beim anderen Teil dagegen unbeschränkt ist (Komplementäre).

**Concept, and application of provisions applicable to general partnerships**

A Kommanditgesellschaft is a partnership, operating under a firm name, under which the liability of some of the partners (Kommanditisten) to the partnership creditors is limited to a specified contribution (Haftsumme), and the other partners (Komplementäre) have unlimited liability.

This is not the same as the HGB wording, but the differences are not material for present purposes. The Austrian KG is a “Gesellschaft”, a category of partnership, and apart from the limited liability of the limited partners, the rules applicable to general partnerships generally apply.

### 86.20.3 *UK tax analysis*

The HMRC transparent/opaque list classifies as transparent:

- (1) Kommanditgesellschaft in Germany, Austria and Switzerland
- (2) GmbH & Co KG in Germany and Austria<sup>222</sup>

---

221 Avery Jones et al, “Characterisation of Other States' Partnerships for Income Tax” [2002] BTR 375 (footnotes omitted).

222 No doubt the omission of Switzerland is accidental, not deliberate.

Similarly, the Liechtenstein disclosure facility<sup>223</sup> provides:

2) A business formed as “Kommanditgesellschaft” or “KG” or “Kollektivgesellschaft” is to be characterised, recognised and treated as a partnership for UK tax purposes.

## 86.21 Stille Gesellschaft

### 86.21.1 German law background

Section 230 HGB provides:

(1) Wer sich als stiller Gesellschafter an dem Handelsgewerbe, das ein anderer betreibt, mit einer Vermögenseinlage beteiligt, hat die Einlage so zu leisten, daß sie in das Vermögen des Inhabers des Handelsgeschäfts übergeht.

(2) Der Inhaber wird aus den in dem Betrieb geschlossenen Geschäften allein berechtigt und verpflichtet.

(1) Whoever participates as a silent partner by means of a contribution of assets in a commercial business carried on by another person shall make the contribution such that it is transferred to the assets of the owner of the commercial business.

(2) Solely the owner shall have rights and obligations arising from transactions concluded in the operation of the business.

“Stille Gesellschaft” is literally and conventionally translated “silent partnership”. That expression conveys no information about the entity. It is better to use the German term. If English is used, it would be appropriate to write “silent partnership” and “silent partner” with scare quotation marks.

*Memec v IRC* summarised the essential characteristics of a stille Gesellschaft:<sup>224</sup>

... the silent partner (stille gesellschafter) makes a capital contribution to a commercial enterprise run by another person who is designated as the owner (inhaber).

---

223 See 86.7 (Liechtenstein: Introduction).

224 71 TC 77 at p.113.

The owner remains the owner of the business assets, and of the income from those assets as it accrues. The silent partner has no proprietary interest in the assets but has a contractual right to payment of his share of the annual profits (if any) as shown by the partnership accounts, and can sue for damages in the event of any misappropriation.

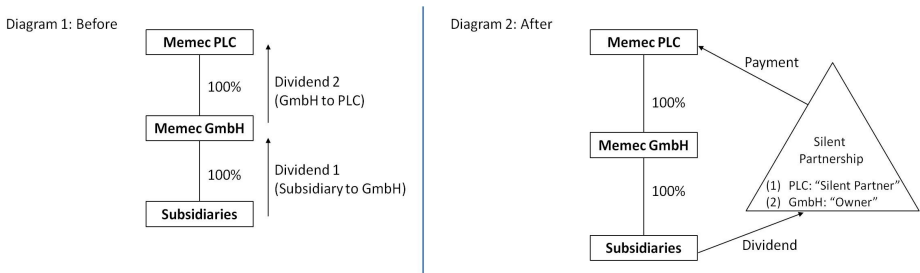

The owner runs the business, though the silent partner has access to information about it. The silent partner is not responsible for liabilities of the partnership beyond the amount of his contribution, but his share of any loss will be debited to his contribution, and must be made good out of his share of profits of alter years before any share of profits is distributed to him.

On termination of the partnership the silent partner gets a return of his capital contribution, so far as it has not been lost.

A silent partnership has no separate legal personality under German law. Its existence is often unknown to customers dealing with the owner.

### 86.21.2 UK tax analysis

The tax treatment of a stille Gesellschaft arose in *Memec v IRC*. In this case a stille Gesellschaft was inserted into a group structure; the business of the stille Gesellschaft was to hold group subsidiary companies and distribute their dividends to Memec PLC, thus:

### In *Memec v IRC*:<sup>225</sup>

A silent partnership, whilst being similar to an English partnership in not being a separate legal entity, differs from both English and Scottish partnerships in a number of respects.

<sup>225</sup> 71 TC 77 at p.113.

The Court identified two key differences:

- (1) The “silent partner” has no proprietary right in the property of a Stille Gesellschaft.
- (2) The “partners” of the Stille Gesellschaft do not carry on business in common.

The statutory question in *Memec* was whether a dividend was “paid by the subsidiaries to PLC”, for the purposes of the relevant DTA provision (credit for underlying tax), notwithstanding that the payment was made through the stille Gesellschaft.<sup>226</sup> This was paraphrased by asking whether the stille Gesellschaft was transparent, or whether the subsidiaries were the source of PLC’s income. I think these paraphrases are appropriate, as long as one remembers that they are a paraphrase of the statutory question. Nothing turns on the use of the specific word “paid”.<sup>227</sup>

The Court concluded:

The position of plc [the “silent partner”] seems to me to be that of a purchaser who, for a consideration consisting of the contribution of a capital sum and an undertaking to contribute to losses of the owner of a business up to the amount of the contribution, purchases a right to income of a fluctuating amount calculated as a share of the annual profits of the business. Neither in English or Scottish law would that leave plc a partner with GmbH [the “owner”].

That in itself is not determinative of transparency, and I of course accept ... that technical differences in the nature of rights should not cause cases which are in substance identical to receive different UK tax treatment. But I see insufficient justification present in the circumstances of the silent partnership for treating the share of the profits of the GmbH business received by plc as the same as the profits of the subsidiaries or the dividends which were paid to GmbH alone as shareholder and not to plc. ...

The [stille Gesellschaft] agreement was, in my judgment, the source of plc's share of the profits of the GmbH business, not the trading operations

---

226 See *Anson v HMRC* [2015] UKSC 44 at [104].

227 See 14.3 (Recognition/attribution: Analysis).

of the subsidiaries or the shares owned by GmbH in the subsidiaries producing the dividends paid to GmbH.<sup>228</sup>

A stille Gesellschaft is transparent for the owner, but not for the “silent partner”, who is like a creditor with a profit-related return. In English law terms, the rights of a “silent partner” to partnership income are contractual rather than proprietary, *in personam* rather than *in rem*.<sup>229</sup> That is an important distinction for tax, even though it does not normally matter for the partners. It would assist clarity of thought not to use the word “technical”.<sup>230</sup>

## 86.22 Société en nom collectif

The former International Tax Handbook provided:

### 304. Company and partnership distinguished

[The manual made some general comments on differences between companies and partnerships, and continued:] Considerations of this sort are important when dealing with some unfamiliar European company cum partnership creations. The French Société Civile is one such body and the Société en nom Collectif is another. Broadly speaking we regard the first as a company the second as a partnership. Both have legal personality but in the former case the profits arise to the body itself and in the latter case we take the view that the profits arise to the partners. ...

### 1673. Establish facts

The first stage is one of factual enquiry and in relation to any appeal procedure is a matter for the Appeal Commissioners. It can be a difficult stage – even for trained Revenue lawyers. Experts have been known to differ and in a case about these bodies *Dreyfus v IRC* 14 TC 560 we think the Commissioners came to a wrong decision and we do not follow the Courts ruling. The case involved a French SNC and the Courts said it was a company, being guided by the Commissioners’ finding of fact about foreign law. We – after listening to expert advice – think it

---

228 The SC in *Anson* went out of its way to say its decision did not affect *Memec*. See So the decision in *Memec* is binding at all levels below the Supreme Court.

229 More accurately, that was the position of *this* stille Gesellschaft on the basis of the facts found. But there is no reason to think that another tribunal would find different facts.

230 See App.1.7 (Technical).

analogous to a partnership. This question of foreign law is difficult. Where the foreign law is a common law it will often share basic concepts with English law and that eases things a little. But if the foreign law is a civil law – a written code of law – the chances of a communications gap developing between a foreign expert adviser and an English lawyer seeking his advice are much greater.

There are no hard and fast rules governing this question of foreign law; every association has to be considered separately and in the light of its Articles of Association or equivalent code. We look for indicators as to whether the Association carries on the business itself or whether the participators do so jointly; and whether the profits accrue directly to the participators or whether they accrue to the Association which then distributes them to the participators. These conclusions should then help us decide whether the members of the Association are carrying on a trade, profession or vocation solely or in partnerships and, if so, whether the income is immediately derived by the member from the carrying on of that trade.

Avery Jones, discussed the issue at length and concludes wistfully:

My preferred approach to the categorisation of a foreign entity would be to weigh up the degree of legal personality and, if this was significantly less than the absolute legal personality of a corporation, even one with unlimited liability, then the body should be categorised as a partnership (or transparent). This was more the approach in an even earlier case<sup>231</sup>, which was not cited in the English *Dreyfus* case, that had decided that a French SNC could not be sued in the partnership name on the ground that it was a partnership and the rules of court only enabled an English partnership to be sued in the firm name. One of the judges said;

According to our modern practice there are three classes who can sue, or appear to writs, - persons, corporations and firms.<sup>232</sup>

This was commented upon in a recent case concerning whether the partners of a Swiss SNC<sup>233</sup> could be sued in which a judge stated that in

---

231 *von Hellfeld v E Rechnitzer and Mayer Freres & Co* [1914] 1 Ch 748.

232 at p.754.

233 *Oxnard Financing SA v Rahn and others* [1998] 1 WLR 1465. A Swiss SNC, in contrast to the French, is not a legal person, although that is more a difference in the meaning of corporation than the nature of the partnership; a partnership with the same capacity would be classified as a corporation in both France and the UK. ...

this quotation “corporations” was used in its correct sense as meaning legal persons wholly distinct from their individual members. Another judge, Mummery LJ, described the Swiss SNC as “not a corporation but is a separate entity with many of the characteristics of a corporation<sup>234</sup>.” That seems neatly to encapsulate the whole problem of categorising other states’ entities.<sup>235</sup>

## 86.23 Société civile

### 86.23.1 French law background

Frimston & Urquhart say:

French *sociétés* are different from English companies. The word ‘*société*’ can be used to describe either what we, in England, would call a company, firm, or partnership. French *sociétés* are divided into the following general categories:

- *société commerciale* — a company that is formed for the purposes of trade;
- *société civile* — an entity (company or partnership) that does not primarily trade;
- *société de capitaux* — a company with limited liability and where subscribers or shareholders provide its capital;
- *société de personnes* — an entity with unlimited liability which groups persons together rather than capital.

Two main types of *société civile* (there are various other types) are:

- *société civile immobilière* — civil property holding entity;
- *société civile professionnelle* — civil professional partnership (used for law firms, etc.).

From the legal point of view, *sociétés civiles immobilières* are subject to the general laws governing *sociétés civiles* contained in the French Civil Code, although certain types of investment vehicles known as *sociétés*

The decision was that it could be sued in England in the names of the partners, making it clear that they were being sued in their capacity as partners, rather than in the partnership name. But it could equally well have been sued in the partnership name.

234 At p.1470E.

235 “The English Dreyfus Case, Categorisation of French SNC for Tax Purposes in the UK” in *Fiscalité et entreprise: politiques et pratiques, Mélanges en l’honneur de Jean-Pierre Le Gall* (2007), p.315.

*civiles de placement immobilier* or *sociétés civiles* constituted for the purpose of building properties with a view to resale (*construction vente*) or *sociétés civiles d'attribution en jouissance à temps partagé* (timeshare companies) have specific regulations attaching to them.

A *société civile* is civil by its character when it:

- has a civil activity or business; and
- is not a *société* on which the law confers a commercial character by reason of its form or its objects.

*Sociétés civiles* are principally governed by Section IX of Book III of the French Civil Code, particularly Articles 1832 to 1873. Commercial companies (*société anonyme*, *société à responsabilité limitée*) are governed by the French Commercial Code.

Individual members of a *société civile immobilière* by virtue of its constitution usually have joint unlimited liability for its debts, but the unlimited nature of their liability is usually only in proportion to and to the extent of their holdings, i.e. it is not several. The usual constitution can however be varied to make the liability of the members expressly both joint and several.

A *société civile immobilière* is for legal purposes a separate legal entity from that of its members and therefore is capable of owning assets, which do not merge with the assets of each individual member.

The principal consequences usually attached to a separate legal entity, a *personnalité distincte de ses membres*, in French law are:

- it may own property;
- it may enter into contracts in its own name;
- it may sue and be sued;
- it will not be wound up by the death of one of its members.

However, in the case of a *société civile immobilière*, the consequences of being a separate legal entity from its members are not in French law as strong as for a trading company for the following reasons.

- *Sociétés civiles* (including a *société civile immobilière*), although separate entities from their members, are created by contract between the members and are therefore based on a relationship that is *intuitus personae*. This is to say that the personality, efforts and interests of each individual member have an important, perhaps essential, part to play in the formation, management and subsequent dissolution of *sociétés civiles*.
- A *société civile immobilière* is both a collective entity with a legal personality of its own and a contract between its various members.

Article 1832 of the French Civil Code defines ‘a société as a contract by which two or more persons agree to combine assets or contributions of work with a view to sharing profits or benefiting from the savings therefrom ...’.

- A *société civile immobilière* must have at least two members (who may be husband and wife).
- A *société civile immobilière* does not (and cannot) have a board of directors nor any directors nor a chairman. It is managed on a day-to-day basis by the *gérant* (manager), appointed by the statutes which are the regulations or deed creating and governing the *société civile immobilière*. Since the vast majority of *société civile immobilière* companies are wholly passive, and do not trade in any sense, except for, perhaps, letting a property, the term ‘management’ should be tightly construed. The duties of the *gérant* generally consist of merely convening a routine annual general meeting and signing the accounts (if any).
- Although French commercial companies such as an ‘SA’ have their capital divided into shares called *actions*, the capital of the *sociétés civiles* (including *sociétés civiles immobilières*) is not divided into *actions* but into *parts d’intérêt*, (participation holdings), the transfer or assignment of which is restricted.

From the legal point of view, a *société civile immobilière* is a single purpose land holding vehicle whose only use is the purchasing and holding of property, land, and the like. Such a vehicle cannot be used for any other purpose.<sup>236</sup>

### 86.23.2 *Société civile immobilière*

The Employment Income Manual provides:

**EIM11371 Homes outside the UK owned through a company: general background** [Jan 2018]

...Meaning of company

[The Manual refers to the statutory definition of “company”<sup>237</sup> and continues:] This wide definition is not restricted to companies registered in the UK and includes a number of entities formed under foreign law

---

236 Frimston and Urquhart, “La Vie en France” Taxation Magazine, 13 June 2002, p.296.

237 See 86.3 (Definition of “company”).

through which individuals may acquire homes outside the UK. Such entities will generally be classified as opaque for UK tax purposes. Examples include the ownership of a home in France through a “Societe Civile Immobiliere” (SCI) or in the United States through a Limited Liability Company.

The view that a SCI is a company for UK tax purposes is controversial.<sup>238</sup> A société civile is classified as a partnership in the UK/France IHT DTA.<sup>239</sup> The introduction of benefit in kind foreign homes relief and the France/UK DTA made the issue somewhat less important but it still matters.

The issue arose in *Joseph Carter v Baird* 72 TC 303 where a company sold land and purchased a SCI. The company claimed roll-over relief which only applied on a purchase of land. The company failed since it acquired an interest in the SCI and not land. Unfortunately the question of whether an SCI was transparent for CGT was not argued and the necessary expert evidence was not put to the general commissioners. (The litigant appeared in person and was not represented by counsel). The case therefore has no authority at all, and on another occasion there is nothing to stop a taxpayer putting forward the argument for transparency, properly supported by evidence.

## 86.24 Société en commandite par actions

Fraser says:<sup>240</sup>

Société en Commandite par Actions (Luxembourg) ... seems to be a hybrid form, which does not occur in English law, that is essentially a limited partnership in which the limited partner interests are divided into freely transferable shares. This form of business association appears also to be found in the legal systems of France, Germany (Kommanditgesellschaft auf Aktien), recognised by the Stamp Office as

---

238 See Frimston and Urquhart, “La Vie en France” Taxation Magazine, 13 June 2002, p.296.

239 See 109.8.2 (Treaty-situs: France/Italy). See too Avery Jones et al, “Characterisation of Other States’ Partnerships for Income Tax”, [2002] BTR at p.425.

240 “Respectez les animaux étrangers! The Inland Revenue lists on entity classification” [2001] BTR 158.

a body corporate and Spain (Sociedad comanditaria por acciones). Its classification as “opaque” in the direct tax list classification is in accordance with the EU directives and with [the OECD Partnerships Report].

This term is sometimes translated as “limited partnership with share capital”<sup>241</sup> and sometimes, though perhaps less often, as “company limited by shares”<sup>242</sup>. It is better to use the French term.

### 86.25 Commanditaire vennootschap (Netherlands)

Fraser says:<sup>243</sup>

... both “open” and “closed” forms are classified in the direct tax list as transparent. However, it appears from the [OECD Partnerships Report] that the “open” form has affinities with the French/Luxembourg société en commandite par actions.

### 86.26 Sociedad civil (Spain)

Fraser says:<sup>244</sup>

... although this is classified in the direct tax list as “opaque”, its name is translated in [the OECD Partnerships Report] as “civil law partnership” and the other data on this form of business association in the report is suggestive of transparency.

### 86.27 Jersey partnerships

A Jersey general partnership is transparent.<sup>245</sup>

---

241 Eg para 1 OECD Model Commentary on art 10; see 29.9.7 (“Dividends”). Likewise the IATE database.

242 The OECD Partnerships Report translates *Société en commandite par actions* as “Company limited by shares” in the list of Belgium entities, and as “Limited partnership with share capital” in the list of French entities. Is that just an accident, or does it reflect differences in French/Belgium law?

243 “Respectez les animaux étrangers! The Inland Revenue lists on entity classification” [2001] BTR 158.

244 “Respectez les animaux étrangers! The Inland Revenue lists on entity classification” [2001] BTR 158.

245 *Padmore v IRC* 62 TC 352; see Jersey Law Commission “The Jersey Law of Partnership” (consultation paper, 2008) para 21.12 (“Viewed as a whole, in fact the

HMRC classify a Jersey limited partnership as transparent in the transparent/opaque list.<sup>246</sup>

## 86.28 Foreign LLP

References to an LLP in UK legislation are references to UK incorporated LLP (unless the context otherwise requires).<sup>247</sup> It is considered that the statutory rules which (generally) make a UK LLP transparent for tax purposes<sup>248</sup> do not apply to a foreign LLP.

HMRC agree. Business Income Manual provides:

**82145 Limited Liability Partnership: International aspects** [Jun 2016]

### UK branches of overseas LLPs

The tax treatment of a UK branch of an overseas LLP, and the members of such a LLP, depends on how the foreign entity is regarded for the purposes of the UK taxation provisions. Where the foreign LLP is regarded as a ‘body corporate’ for the purposes of the UK Taxes Acts the profits of the UK branch will be chargeable to CT. On the other hand if it is regarded as a partnership then members are separately liable to Income Tax on their share of the branch’s profits under the legislation for partnerships. The Limited Liability Partnerships Act 2000 only applies to UK registered LLPs.

This discrimination would however be in breach of EU law so foreign LLPs, in Member States at least, may be treated as transparent.

HMRC classify a Jersey LLP as opaque in the transparent/opaque list. This is controversial.<sup>249</sup> However the issue seems unimportant because

---

law of partnership of [England and Jersey is] essentially the same...”)

[https://jerseylawcommission.files.wordpress.com/2015/06/2008-law-of-parntersh-  
ip.pdf](https://jerseylawcommission.files.wordpress.com/2015/06/2008-law-of-parntersh-<br/>ip.pdf)

246 See 86.40 (HMRC transparent/opaque list).

247 See 82.20.1 (Definition of LLP).

248 See 82.20 (Limited liability partnership); 97.33.3 (Situs of LLP).

249 Walker, “Limited Liability Partnerships: True Partnerships” [1998] JLR 1 argues that a Jersey LLP is a partnership in the ordinary sense of the word. In *R v IRC ex p. Bishopp* 72 TC 322 the court was asked but refused to decide the point.

(partly as a result of the HMRC view and partly due to burdensome Jersey law requirements) the number of Jersey LLPs is small.<sup>250</sup>

## 86.29 European Economic Interest Grouping

### 86.29.1 EEIG law background

The BI Manual provides:

**BIM82160 EEIGs: background information** [Jun 2016]

A European Economic Interest Grouping (EEIG) is a form of business entity governed by EU regulation. The members of an EEIG may be companies, individuals or partnerships from two or more member states of the EU or the European Economic Area. ... An EEIG that has registered its official address in the UK is a body corporate with a legal personality.

See too App.2.9.4 (Legal person: Foreign law).

### 86.29.2 EEIG tax treatment

**s.842 ITA**

(1) The following rules about UK Economic Interest Groupings and European Economic Interest Groupings<sup>251</sup> apply for the purposes of charging income tax—

*Rule 1*

A grouping is treated as acting as the agent of its members.

**s.990 CTA 2010**

(1) The following rules about UK Economic Interest Groupings and European Economic Interest Groupings apply for the purposes of charging corporation tax in respect of income—

[Identical]

**s.285A TCGA**

(1) The following rules about UK Economic Interest Groupings and European Economic Interest Groupings apply for the purposes of charging tax in respect of chargeable gains—

[Identical]

---

250 The number is 104 as at January 2020:

<https://www.jerseyfsc.org/registry/documentsearch>

251 Defined s.842(5) ITA/s.990(7) CTA 2010/s.285A(5) TCGA.

<p><i>Rule 2</i> The activities of a grouping are treated as those of its members acting jointly.</p>	<p>[Identical]</p>	<p>[Identical]</p>
<p><i>Rule 3</i> Each member of a grouping is treated as having a share of the grouping's property, rights and liabilities.</p>	<p>[Identical]</p>	<p>[Identical]</p>
<p><i>Rule 4</i> Any trade or profession carried on by the grouping is treated as carried on in partnership by the members of the grouping.</p>	<p><i>Rule 4</i> Any trade carried on by the grouping is treated as carried on in partnership by the members of the grouping.</p>	<p>[Identical to ITA rule]</p>
		<p>Rule 5 A person is to be regarded as acquiring or disposing of a share of the assets of the grouping not only where there is an acquisition or disposal of assets by the grouping while he is a member of it, but also where he becomes or ceases to be a member of a grouping or there is a change in his share of the property of the grouping.</p>
<p>(2) For the purposes of Rule 3, a member's share of any property, rights or liabilities of a grouping is determined according to the contract under which the grouping is established.</p>	<p>(2) For the purposes of Rule 3, a member's share of any property, rights or liabilities of a grouping is determined in accordance with the contract under which the grouping is established.</p>	<p>[Identical to ITA rule]</p>

(3) If the contract does not provide for this, the member's share is determined by reference to the share of the profits of the grouping to which the member is entitled under the contract.

[Identical]

[Identical]

(4) If the contract does not provide for this either, the members are treated as having equal shares of the property, rights and liabilities of the grouping.

Section 990(5)(6) CTA 2010 addresses loan relationships aspects for CT purposes:

(5) Part 5 of CTA 2009 (loan relationships) applies in relation to a grouping as it applies in relation to a firm.

(6) For the purposes of subsection (5) see in particular the following provisions of Part 5 of CTA 2009—

Chapter 9 (partnerships involving companies),  
section 467 (connections where partnerships involved),  
section 472 (meaning of “control”), and  
sections 473 and 474 (meaning of “major interest” etc).

The BI Manual provides:

**BIM82160 EEIGs: background information** [Jun 2016]

...For the purposes of UK taxation of profits or losses an EEIG is fiscally transparent.

### 86.30 Common investment fund

The UK and the Netherlands have agreed the application of the Netherlands/UK DTA to UK pension scheme and charity investors in UK common investment funds (“CIFs”):

A CIF is an arrangement whereby a number of registered pension schemes have pooled some or all of their investments into a common

fund for investment purposes. The CIF must be no more than an investment agency for the assets of participating schemes. A CIF cannot be a registered pension scheme in its own right (See the HMRC Guidance).

Charity CIFs are set up by Schemes made by the Charity Commission (the Commission) under [what is now] sections 96 to 99 of the Charities Act 2011. They operate as investment vehicles and are deemed by law to be charities themselves. They are therefore eligible for registration as charities in their own right.

This Agreement applies to UK CIFs whose investors are:

- (a) Pension schemes which qualify for benefits under the above Convention;<sup>252</sup>
- (b) Charity organisations which qualify for benefits under the above Convention;<sup>253</sup> and
- (c) Other investors which qualify for benefits under a Convention for the avoidance of double taxation to which the Netherlands is a Contracting State.

A CIF can act as a pooled investment vehicle for the assets of pension schemes or charities. The CIF invests these assets on behalf of those investors.

The competent authorities of the Netherlands and the UK agree that a CIF is regarded as fiscally transparent in both countries. Since a CIF is fiscally transparent, all income and gains derived by the fund from the fund assets are allocated to the investors in the CIF in proportion to their participations in the CIF.

*Request for application of the benefits of a Convention on behalf of the participants*

A CIF which is established in the UK and which derives income and gains arising in the Netherlands may itself, represented by its custodian, manager or depository, in lieu of and instead of the investors in the CIF, claim the benefits of an agreement for the avoidance of double taxation to which the Netherlands is a Contracting State and which is applicable to those investors, on behalf of those investors in the CIF and according to the conditions of such agreement.

---

252 Article 3, paragraph 1, letter l of the Convention and Article III, letter b of the Protocol.

253 See Article 4, paragraph 2, letter b of the Convention.

Such claims may be subject to enquiry and, where requested, a custodian, manager or depository shall provide relevant information which may include a schedule of investors and allocated income relevant to a claim. A CIF may not make a claim for benefits on behalf of any investor in the CIF if the investor has itself made a claim for benefits in respect of the same income. If a CIF intends to make a claim for benefits on behalf of an investor, the custodian, manager or its depository should clearly communicate this to the investor to avoid duplicate claims in respect of the same income.

### 86.31 Dutch stichting/Foundation

A note on terminology. The German word *Stiftung* and the Dutch word *Stichting* are both translated by the English word “foundation”. However the entities are used in different ways, and do not necessarily have the same nature for UK tax purposes. Unless the context makes it clear, therefore, one should not use the word “foundation” without specifying what type of foundation is being referred to. When referring to the Dutch entity, I use the word *Stichting* and prefer to avoid *foundation*.

#### 86.31.1 *Stichting*

Article 2.285 of the Dutch Burgerlijk Wetboek (Civil Code) provides:<sup>254</sup>

1. Een stichting is een door een rechtshandeling in het leven geroepen rechtspersoon, welke geen leden kent en beoogt met behulp van een daartoe bestemd vermogen een in de statuten vermeld doel te verwezenlijken.

1. A stichting is a legal person formed by means of a juridical act, that has no members, and that intends to carry out an object, specified in its articles of incorporation, by using capital (property) which has been provided for this purpose....

---

254 Dutch Civil Code, available in English on <http://www.dutchcivillaw.com>

3. Het doel van de stichting mag niet inhouden het doen van uitkeringen aan oprichters of aan hen die deel uitmaken van haar organen noch ook aan anderen, tenzij wat deze laatsten betreft de uitkeringen een ideële of sociale strekking hebben.

3. The objects of a stichting may not include the making of distributions to its founders (incorporators) or to those who are participating in its bodies or to others, except, as regards the latter, when these distributions are made for charitable (philanthropic) or social purposes.

Para 1 is comparable to the definition of a Liechtenstein Foundation.

The Australian Taxation Office classifies a pension fund stichting as a trust:

#### **Facts**

An overseas pension fund is constituted as a Stichting that is a legal person under Dutch legal concepts.

Under the bye-laws the purpose of the fund is to protect employees, former employees and their legal heirs from the consequences of old age, disablement and death in accordance with the pension regulations.

The property of the pension fund consists of contributions by affiliated employers, investments and fund earnings.

The pension fund is administered by a Board of trustees. The Board is authorised to undertake all actions relating to management and disposition within the framework of the objectives of the fund...

#### **Reasons for Decision**

[The ruling refers to the definition of “trust” in *Harmer v. FCT*; see 86.9.6 (Trust concept in Australia), and continues:]

Having regard to the Bye-laws of the pension fund (the Stichting), all four elements are present so as to give rise to a trust relationship between the Stichting and those individuals entitled to benefits from the pension fund for the purposes of section 115-10 of the ITAA 1997.

The Stichting has ownership and possession of the trust property and is the trustee. The trust property consists of the contributions made to the fund, investments and fund earnings. The beneficiaries are the employees, former employees and their legal heirs.

The Bye-laws of the Stichting impose on it a personal obligation to deal with the trust property for the benefit of the beneficiaries. Having regard to the relationship between the Stichting, contributors, beneficiaries and potential beneficiaries and the express intention that the Stichting hold the property not exclusively for itself, but subject to an equitable obligation to deal with the property for the benefit of the beneficiaries the relationship constitutes a trust for the purposes of section 115-10 of the ITAA 1997.<sup>255</sup>

### 86.31.2 *Stichting Administratiekantoor*

de Vries explains:

In the corporate environment, as a vehicle for orphan structures, foundations are used to hold the shares in financing bodies. In an estate planning environment or employee benefit scheme the foundation can be a vehicle to hold shares and exercise the voting rights or shares, whereas the economic rights related to the shares are transferred through depository receipts to the beneficiaries. This structure is a popular means to address the fact that the separation of voting rights from economic rights on shares in Dutch limited liability companies is not possible. In such cases the board of directors of the foundation are formed by independent persons (in estate planning structures usually persons trusted by the family) or, for example, the management board of other entities in the structure that holds a larger share of the entity which shares are partly transferred to the foundation. The foundation in these structures is usually referred to as a STAK (*stichting administratiekantoor*).

In the field of estate planning, foundations are used to own and manage estates whereby the foundation can have a purpose incorporated in the articles of association comparable to a 'letter of wishes', which mandates the board of the foundation to make funds of the foundation available for certain designated purposes, such as funding the education for certain beneficiaries.

... a foundation is a separate legal entity under Dutch law, which is formed through the execution of a deed of incorporation by the civil law notary, and managed by its board of directors. The board of

---

255 ATO Interpretative Decision ID 2008/2

<https://www.ato.gov.au/law/view/document?locid=aid/aid20082>

directors may consist of private individuals, but can also be legal entities, like other foundations or companies. Like other Dutch legal entities, a foundation can hold assets in its own name, can enter into agreements etc. A foundation must have a specific objective (for example, the financing of the education of family members, the protection of the family wealth, and management of certain assets), to be specified in its articles of association.

...

A further legal characteristic of a foundation is that it does not have members or shareholders, which is sometimes considered slightly odd by practitioners in common law jurisdictions, from the author's experience. The foundation can have beneficiaries, but the distribution prohibition (referred to above) establishes that the beneficiaries cannot be the same as the contributors or members of the board of the foundation (an important difference with the private foundation as indicated above regarding the distribution prohibition). A way to work around the distribution prohibition for a foundation may be to issue depositary receipts (*certificaten*) that give beneficial rights to assets that are legally owned by the foundation. It is common practice that through issuing depositary receipts the voting rights and economic rights of the assets (usually shares) are split: the voting rights of the shares remain with the foundation whereas the economic ownership of the assets rests with the holder of the depositary receipts. As referred to above, such a foundation is referred to as a STAK and is often used for asset protection or estate planning. Further a STAK may be used for employment benefit schemes. A STAK is in principle considered transparent for Dutch income tax purposes, and consequently the owners of the depositary receipts will be taxed on income derived from the shares/assets held by the STAK. In the case of estate planning the board of the STAK will often be the parents whereas the depositary receipts may be issued to the children. In such a way, the parents have control over the estate and can decide upon distributions to the children.<sup>256</sup>

Panico comments:

---

256 De Vries, "The Dutch Foundation" [2011] Journal of International Tax, Trust and Corporate Planning, p.299.

the Dutch and Belgian practice of Stichting administratiekantoor (StAK) achieves a result that is functionally equivalent to an interest in possession trust. Under such an arrangement a foundation issues asset-backed notes or ‘certificates’ linked to some underlying assets (usually corporate shareholdings) so that the holders of such certificates are entitled to the income resulting from such underlying assets (eg dividends). The title to such assets vests in the foundation and the functional outcome may be described as if the foundation held them on trust for the certificate holders. The Dutch expression reads that the assets are held by the foundation *ten titel van beheer* (literally ‘by way of administration’), which is often rendered in English as ‘on trust’ for the certificate holders.

The main defining element of the Dutch model foundation is its corporate nature as a legal person, as opposed to the Germanic and ‘classic’ reliance to the enforcement of the founder’s ‘unilateral declaration of will’. For this reason, Dutch foundations are often referred to as ‘orphan corporate entities’, ie ownerless incorporated legal persons, and as such they may be used in corporate arrangements such as securitization transactions, off-balance sheet collaterals, and top holding structures.<sup>257</sup>

A STAK is not an IHT-settlement as there is no element of succession. It is not an IT/CGT settlement as (if it is a trust) it is a bare trust. There is usually no element of bounty, in which case it is not a settlement-arrangement.

In the case of a STAK, the important question is what is the nature of the depositary receipt. It is tentatively suggested that the depositary receipt confers a proprietary interest on the holder and so is transparent.<sup>258</sup> The holder is treated for IT and CGT purposes as entitled to the dividends from the underlying assets held by the STAK. HMRC agree: they classify a Dutch stichting as transparent.<sup>259</sup> HMRC are presumably considering a STAK here, though that is not expressly stated.

---

257 Panico, “Private foundations and trusts: just the same but different?” [2016] *Trusts & Trustees* 132.

258 See 67.2.6 (Denmark, Germany, Netherlands, Switzerland).

259 See 86.40 (HMRC transparent/opaque list).

86.31.3 *Stichting holds CCF*

The Australian Taxation Office discusses a Dutch pension fund stichting holding an Irish common contractual fund:

**Issue:** Does Australia have the right to tax Australian sourced business profits that a Dutch Stichting (Stichting) receives as a unitholder in an Irish Common Contractual Fund (CCF), under Article 7 of Schedule 10 of the International Tax Agreements Act 1953 (the Netherlands Agreement)?

**Decision:** No. Australia does not have the right to tax the Australian source business profits the Stichting receives as a unitholder in a CCF under Article 7 of the Netherlands Agreement.

**Facts**

The Stichting is a legal entity incorporated in the Netherlands.

The Stichting is a pension fund whose sole purpose is to provide superannuation benefits for non-resident persons upon retirement or death.

The Stichting is exempt from income tax in the Netherlands under the tax laws of the Netherlands.

The Stichting has received a declaration from the Netherlands Inspector of Tax Administration to the effect that it is a resident of Netherlands for tax treaty purposes.

The Stichting is not a resident of Australia for the purposes of Australian tax.

The Stichting does not carry on business through a permanent establishment in Australia.

The Stichting is the only unitholder in an Irish CCF.

[The ruling refers to the definition of an Irish CCF; see 66.11 (Irish Common Contractual Fund).]

The CCF is not a resident of Ireland or Australia for the purposes of the tax treaty between Australia and Ireland.

The CCF receives Australian source business profits from investing the funds of the CCF.

The CCF does not carry on business through a permanent establishment in Australia.

The relationship between the manager and custodian of the CCF and the Stichting is considered a trust relationship for Australian tax purposes. The manager and custodian are the trustees, and the Stichting is the beneficiary.

I think the last sentence means that a CCF is transparent, which is also the HMRC view. Thus to summarise the structure:

**Reasons for Decision**

[The statement sets out art. 7 (business profits), art. 3 (definition of ‘enterprise of one of the States’; these are not set out here as they follow OECD Model form.)]

Accordingly, for Article 7(1) of the Netherlands Agreement to apply to the Australian sourced business profits derived by the Stichting, the Stichting must be:

- a person
  - a resident of the Netherlands, and
  - an enterprise.
- for the purposes of the Netherlands Agreement.

**86.31.4 Stichting a treaty-person**

The Australian Taxation Office say:

**Is the Stichting a ‘person’ for the purposes of the Netherlands Agreement?**

Article 3(1)(d) of the Netherlands Agreement defines the term ‘person’ to mean ‘an individual, a company and any other body of persons’. The term ‘company’ is defined in Article 3(1)(e) of the Netherlands Agreement to mean ‘any body corporate or any entity which is assimilated to a body corporate for tax purposes’. The term ‘body corporate’ is not defined for the purposes of the Netherlands Agreement, and in accordance with Article 3(3) of the Netherlands Agreement, the term takes its meaning from the tax laws of Australia unless the context otherwise requires.

As there is no definition of the term ‘body corporate’ under Australia’s domestic tax law provisions, the ordinary meaning of the term applies as per tax treaty interpretation principles contained in Taxation Ruling TR 2001/13 Income tax: Interpreting Australia’s Double Tax Agreements.

The Butterworths Concise Australian Legal Dictionary 2<sup>nd</sup> ed. defines a body corporate as ‘an artificial legal entity having separate legal personality’.

[The statement sets out Article 285 of the Dutch Civil Law Code and continues:]

As the Stichting is created under Netherlands law and has a legal personality under Netherlands law, it should be recognised as a legal entity in Australia in accordance with the principle in *Chaff and Hay Acquisition Committee v Hemphill* (1947) 74 CLR 375 (Chaff’s Case).

In Chaff’s Case, it was found by the High Court that a committee constituted in South Australia under the Chaff and Hay (Acquisition) Act 1944 (SA) was a legal entity despite not being incorporated under South Australian law. Chief Justice Latham found that as the committee was a legal entity in South Australia as distinct from the legal personalities of the natural persons who constitute it, then it is by comity recognised as a legal entity elsewhere. His Honour went on to state (at 384-5) that the same principle applied to the recognition of bodies created by foreign law which have the rights and liabilities distinct from those of the natural persons who constitute them. Justice Starke J further stated (at 388) that ‘recognition is given in the case of companies or artificial persons which have come into existence in countries whose law of incorporation is based on principles different from those of England and Australia’.

This principle is also recognised in the Foreign Corporations (Application of Laws) Act 1989. This Act applies in determining a question arising under Australian law where it is necessary to determine the question by reference to a system of law other than Australian law. Section 7(2) provides that any question relating to whether a body or person has been validly incorporated in a place outside Australia is to be determined by reference to the law applied by the people in that place.<sup>260</sup>

As the Stichting is a legal entity created by legal authority in the Netherlands to achieve certain purposes, the Stichting has the features of a body corporate under the ordinary meaning of the term. As such, the Stichting is a ‘person’ for the purposes of the Netherlands Agreement.

### 86.31.5 *Is stichting treaty-resident*

The Australian Taxation Office say:

**Is the Stichting a resident of the Netherlands for the purposes of the Netherlands Agreement?**

[Article 4 of the Netherlands Agreement provides:

“For the purposes of this Agreement, a person is a resident of one of the States ... (b) in the case of the Netherlands, if the person is a resident of the Netherlands for the purposes of Netherlands tax but not if he is liable to tax in the Netherlands in respect only of income from sources therein.”]

The Australian Taxation Office treat this issue briefly:

The Stichting here has received a declaration from the Netherlands Inspector of Tax Administration to the effect that it is a resident of Netherlands for tax treaty purposes. The Stichting therefore satisfies this requirement.

Article 4 of the Netherlands Agreement was not OECD Model form definition of residence, so the position may be different under UK tax law.

### 86.31.6 *Is stichting an enterprise*

The Australian Taxation Office say:

**Is the Stichting an enterprise for the purposes of the Netherlands Agreement?**

The High Court in *Thiel v FCT*<sup>261</sup> considered the meaning of the expression ‘the profits of an enterprise of one of the contracting states’ in the Business Profits Article of the tax treaty between Australia and Switzerland.

---

260 The same applies in the UK: see Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 30R-009 (Status).

261 (1990) 171 CLR 338; (1990) 21 ATR 531; 90 ATC 4717.

Chief Justice Mason and Justices Brennan and Gaudron stated:

this statement recognises that an activity, as well as a framework within which activities are engaged in, may constitute an “enterprise” for the purposes of the Agreement.

... an enterprise “may consist of an activity or activities and be comprised of one or more transactions provided they were entered into for business or commercial purposes”.<sup>262</sup>

In carrying out the activities of a pension fund, the Stichting is considered to constitute an enterprise as the activities it conducts are entered into for business or commercial purposes.

### **Conclusion**

Accordingly all the necessary elements of Article 7(1) of the Netherlands Agreement are satisfied by the Stichting in order for the taxing rights of the Netherlands and Australia to be determined under Article 7(1) of the Netherlands Agreement.

The Stichting does not have a permanent establishment in Australia and Article 7(1) of the Netherlands Agreement provides a residence-only taxing right to the Netherlands over the business profits of the Stichting. Accordingly, Australia, as the country of source of the business profits, does not have a right to tax the business profits under the Netherlands Agreement.<sup>263</sup>

## **86.32 Fonds voor gemene rekening**

The UK and the Netherlands have agreed the application of the Netherlands/UK DTA to *fonds voor gemene rekening* (closed funds for mutual account,<sup>264</sup> “closed FGR”):

This Agreement applies to closed FGRs formed in conformity with the Decree of 11 January 2007, CPP2006/1870M, Dutch. Gov. Gaz. No 15, 2007. A closed FGR can act as a pooled investment vehicle for the assets of pension funds and other investors. The closed FGR invests these assets on behalf of those investors.

The competent authorities of the Netherlands and the UK agree that a closed FGR is fiscally transparent.

A closed FGR can also consist of several closed FGRs as described in par. 4 of the Decree of 11 January 2007, CPP2006/1870M, Dutch. Gov. Gaz. No 15, 2007. Such an umbrella fund is also fiscally transparent.

---

262 (1988) 21 FCR 122 at p.146.

263 ATO ID 2008/62 (April 2008) <http://law.ato.gov.au>

264 This may also be translated as ‘fund for mutual account’ or ‘fund for joint account’.

Since a closed FGR is fiscally transparent, all income and gains derived by the fund from the fund assets are allocated to the investors in the closed FGR in proportion to their participation in the fund.

*Request for application of the benefits of a Convention on behalf of the participants*

A closed FGR which is established in the Netherlands and which receives income arising in the UK may itself, represented by its fund manager or its depository, in lieu of and instead of the investors in the closed FGR, claim the benefits of an agreement for the avoidance of double taxation to which the UK is a party and which is applicable to those investors on behalf of those investors in the closed FGR.

Such claims may be subject to enquiry and, where requested, a fund manager or depository shall provide relevant information which may include a schedule of investors and allocated income relevant to a claim.

A closed FGR may not make a claim for benefits on behalf of any investor in the closed FGR if the investor has itself made a claim for benefits in respect of the same income. If a closed FGR intends to make a claim for benefits on behalf of an investor, the fund manager or its depository should clearly communicate this to the investor to avoid duplicate claims in respect of the same income.

This Agreement shall be subject to regular review.

### **86.33 Bewind**

*Bewind* is a distinctively Dutch institution, found only in Dutch law and in the Roman-Dutch system of South African law.

*Bewind* may be translated as fiduciary administration or administratorship. Under a *bewind*, a *bewindvoerder* (fiduciary administrator) has power to manage the assets of another person, the *rechthebbende* (literally, the person entitled; one might translate as “beneficiary” but that term is inapt if it is taken to suggest the existence of a trust).

A *bewind* may be made by will<sup>265</sup> or by lifetime gift.<sup>266</sup>

It may also be used to manage the assets of a person lacking capacity (the English law equivalent is a deputy appointed by the Court of

---

265 A testamentair *bewind*, Dutch Civil Code Book 4 articles 153-178.

266 A *schenkingsbewind*, Dutch Civil Code Book 7 article 182.

Protection, or an attorney appointed by the individual under a lasting power of attorney).

Kortmann and Verhagen say:

The *bewind* cannot be characterised as a trust in the sense of Article 1 of the Principles. A trust in the sense of the Principles only exists in situations where the trustee legally owns the assets to be managed, which is not so in the case of *bewind*. In the case of *bewind* the beneficiary is legal owner of the assets to be managed. There are, however, restrictions on the beneficiary's right to dispose of the assets placed under *bewind*. Either the legal owner cannot dispose of these assets at all, or he can only do so subject to the *bewind*. The *bewindvoerder*, as the administrator is usually called, acts in the case of *bewind* only as agent for the owner of the assets (the beneficiary). Because the assets to be managed are not legally owned by the *bewindvoerder*, the assets remain unaffected by the bankruptcy of the *bewindvoerder*.<sup>267</sup>

There is no close equivalent of a *bewind* in English or Scots law. It is similar in effect to an irrevocable power of attorney, a type of agency. In some ways it is similar in effect to bare trust: the administrator has power to manage the assets similar to a bare trustee; but it is irrevocable (in the sense that the owner cannot call for the assets and terminate the *bewind*) and it is not a trust in that the assets are not held in the name of the fiduciary administrator on trust.<sup>268</sup>

A *bewind* is not a trust under the IT/CGT definition. It is transparent for IT/CGT purposes.

A simple *bewind* is not an IHT-settlement as property is not held for persons in succession,<sup>269</sup> or to accumulate income, or with discretionary power over income.<sup>270</sup> It is transparent for IHT purposes.

---

267 Hayton, Kortmann and Verhagen, *Principles of European Trust Law, Law of Business and Finance* Vol 1 (1999), p.199. Similarly Gretton "Trusts Without Equity" (2000) 49 ICLQ 599 reprinted in Valsan (ed), *Trusts and Patrimonies* (2015) chap 5: "Though it functions as a trust, the *bewind* is not a trust, for a simple reason: the location of legal title is the reverse of the trust."

268 See 1.7 (Bare trust/nomineeship).

269 See 1.6.2 (Limb (a): persons in succession).

270 See 1.6.3 (Limb (b): accumulation /power to make income payment).

Vruchtgebruikbewind (administration in respect of a usufruct) and tweetrapsmakingbewind (administration of fideicommissary disposition) raise different issues, and the question of whether they are equivalent to a trust for persons in succession would need further consideration.

It appears that the South Africa Bewind is similar to the Netherlands.<sup>271</sup>

### 86.34 Limited liability company

In UK law, the terms “company” and “corporation” are more or less synonymous (the latter word having slightly grander overtones). But in US law, a corporation and a limited liability company are different types of entity.

#### 86.34.1 LLCs: US law background

Field explains the US law background:

In 1977, in an effort to develop a vehicle that provided owners corporate-like protection from liability for the entity’s debts while attempting to achieve pass-through tax treatment under the Kintner regulations,<sup>272</sup> the Wyoming legislature enacted the country’s first legislation authorizing LLCs. LLCs combined very desirable characteristics: limited liability for all members, partnership features such as dissolution at will and lack of free transferability, and members’ ability to participate in control without risking loss of their limited liability...

In 1988, the IRS finally resolved the issue of the tax classification of an LLC formed under Wyoming’s LLC statute. In a published revenue ruling, the Service concluded that any LLC formed under Wyoming’s LLC statute to carry on a business and divide the gains therefrom would necessarily (by virtue of the terms of the LLC statute itself) lack the corporate characteristics of continuity of life and free transferability of interests, and therefore would be classified as a

---

271 See du Toia, “The South African Trust in the Begriffshimmel? Language, Translation and Taxonomy” (2015)

[https://www.researchgate.net/publication/283661102\\_The\\_South\\_African\\_Trust\\_in\\_the\\_Begriffshimmel\\_Language\\_Translation\\_and\\_Taxonomy](https://www.researchgate.net/publication/283661102_The_South_African_Trust_in_the_Begriffshimmel_Language_Translation_and_Taxonomy)

272 See 86.43 (UK check-the-box rules?).

partnership for federal tax purposes. The Service reached this conclusion despite the fact that neither the managers nor the members of the LLC are personally liable for the LLC's debts and obligations. After this IRS pronouncement clarifying the federal tax classification of LLCs, demand for LLCs grew rapidly, and states quickly began enacting their own LLC statutes. Some of these state statutes, like Wyoming's LLC statute, were "bullet-proof," causing any LLC formed thereunder to necessarily lack at least two corporate characteristics, thereby automatically resulting in partnership classification. Other state statutes were sufficiently flexible so as to allow the LLC to qualify as either a partnership or a corporation for federal tax purposes, depending on the terms of the specific LLC agreement.

This flexibility afforded under some state LLC statutes highlighted the failure of the resemblance test. One commentator explained that, "practically speaking, there is no difference between a closely-held entity that is organized as an LLC and one that is organized as a corporation .... Left unchanged, two very different tax regimes will govern entities with almost identical management and perhaps even similar financial structures." The failure of the corporate resemblance test was also illustrated by professional corporations and limited partnerships, which are also business organizations that could be classified for tax purposes as partnerships under the corporate resemblance test while retaining significant corporate features like limited liability. Moreover, given the bright line rules set forth in the Kintner regulations and the flexibility afforded under the applicable state business statutes, practitioners were often able to create LLCs and other business entities with a carefully tailored set of rights and responsibilities so as to achieve tax classification as either a corporation or a partnership, as desired by the client, while retaining significant features of the other classification.<sup>273</sup>

A paper entitled "Choice of Business Entity" provides:<sup>274</sup>

---

273 "Checking in on Check-the-Box" 42 Loy. L.A. L. Rev. 451 (2009) (footnotes omitted) <http://digitalcommons.lmu.edu/llr/vol42/iss2/4> Footnotes are omitted.

274 Joint Committee on Taxation, (2015)  
<https://www.jct.gov/publications.html?func=startdown&id=4765>

In the last four decades, States have enacted laws providing for another form of entity, the limited liability company (“LLC”). LLCs are neither partnerships nor corporations under applicable State law, but they generally provide limited liability to their owners for obligations of the business. LLCs are generally treated as partnerships for Federal tax purposes, unless an election is made to be treated as a corporation. Specifically, under regulations promulgated in 1996, any domestic unincorporated entity with two or more members that is not publicly traded is treated as a partnership under the default rules but may elect to be treated as a corporation for Federal income tax purposes, and any single-member unincorporated entity is disregarded (*i.e.*, treated as not separate from its owner) for Federal income tax purposes under the default rules (though it may elect to be treated as a corporation). These regulations, known as the check-the-box regulations, were a response, in part, to the growth of LLCs.

To a UK reader, it may seem paradoxical to say that a limited liability *company* may be a partnership for tax purposes; but only if one forgets that “company” in foreign law may not have the same meaning as it has in UK law, or UK tax law.<sup>275</sup>

### 86.34.2 LLC: Opaque

The DTR Manual provides:

**DT19853A USA: US limited liability companies** [Jan 2020]

Generally speaking, United States federal income tax is charged on the profits of United States LLCs on the basis that they are fiscally transparent, that is, tax is imposed on the members of the LLC and not on the LLC itself.

However, for the purposes of UK tax we have taken the view in relation to those LLCs that we have so far considered that they should be regarded as taxable entities and not as fiscally transparent.

Accordingly, we tax a UK member of an LLC by reference to distributions of profits made by the LLC and not by reference to the income of the LLC as it arises. ...

---

275 See 86.1.2 (Foreign law terminology).

The British Columbia Supreme Court reached the same conclusion in *Boliden Westmin v British Columbia*.<sup>276</sup> The Court found that a Nevada LLC had hallmarks of a corporation (such as limited liability, separate legal person, shares of some sort though of a different name, right for that separate legal person to deal with property, to contract, to sue, in its own name), and held that the LLC was a corporation for Canadian tax purposes.

#### 86.34.3 *LLC US tax credit: Co member*

Art. 24(4)(b) USA/UK DTA provides foreign tax credit for underlying tax paid by a company:

in the case of a dividend paid by a company which is a resident of the United States to a company which is a resident of the UK and which controls directly or indirectly at least 10 per cent of the voting power in the company paying the dividend ...<sup>277</sup>

The DTR Manual provides:

**DT19853A USA: US limited liability companies** [Jan 2020]

... If tax is paid in the United States on the profits of the LLC, we regard that tax as underlying tax (INTM164010)) and credit relief is available for it if the member is a UK company which controls, directly or indirectly, at least 10 per cent of the voting power in the LLC. As indicated in DT19851A, there is no difference in substance between Article 23(2)(b) of the old Agreement and Article 24(4)(b) in the new [2001] Agreement. Relief for underlying tax will continue only to be available to a UK company which has at least a 10% interest in the US LLC. ...

#### 86.34.4 *LLC US tax credit: Generally*

This section considers the position of members of an LLC who do not qualify for the relief for direct investors,<sup>278</sup> because they are not companies, or if companies hold less than 10% of the votes in the LLC.

---

276 [2007] BCSC 351.

277 See 106.26 (Credit for underlying US co tax).

278 See 86.34.3 (LLC US tax credit: Co member).

In *Anson v HMRC* the taxpayer, an individual, was a member of a Delaware LLC. For US tax purposes, the LLC was classified as a partnership, and transparent in the sense that the taxpayer was liable to US tax on his share of the profits. He was a remittance basis taxpayer, but remitted the net income to the UK, and so was liable to UK income tax on the amount remitted. The taxpayer claimed DTA Tax Credit (under the current USA/UK DTA and its predecessor) and Unilateral Tax Credit.<sup>279</sup> There was no material difference between these<sup>280</sup> and I refer to the current DTA.

So far as relevant, art 24(4)(a) USA/UK DTA provides:

United States tax ... shall be allowed as a credit against any UK tax computed by reference to the same ... income ... by reference to which the United States tax is computed.<sup>281</sup>

The Supreme Court went to some length to distinguish two questions:<sup>282</sup>

- (1) The statutory question in *Anson*: whether the UK tax was “computed by reference to the same income by reference to which the US tax was computed”.
- (2) The question which arose in *Memec*: whether dividends paid through a stille Gesellschaft should be regarded as “paid” to the “silent partner”.<sup>283</sup>

The answer to the first question was, yes:

Mr Anson was entitled to the share of the profits allocated to him, rather than receiving a transfer of profits previously vested (in some sense) in the LLC, it follows that his “income arising” in the US was his share of the profits. That is therefore the income liable to tax under UK law, to the extent that it is remitted to the UK. There is no dispute as to the income which was taxed in the US: that was Mr Anson’s

---

279 See 106.1 (Credit for foreign tax).

280 *Anson v HMRC* [2015] STC 1977 at [27].

281 See (Same income rule).

282 at [109]: “The issue in this case is not whether the receipts of the LLC from third parties are to be regarded as having been paid to the members of the LLC, but whether the income on which Mr Anson paid tax in the US is the same as the income on which he is liable to tax in the UK.”

283 See 86.21.2 (UK tax analysis).

share of the profits of the LLC. Mr Anson's liability to UK tax is therefore computed by reference to the same income as was taxed in the US. He accordingly qualifies for [DTA Tax Credit relief under art 24(4)(a) USA/UK DTA].<sup>284</sup>

I think an unstated intuition underlying the decision is that the combination of US and UK taxes, then amounting to a 67% tax rate,<sup>285</sup> would be unfair, and that if possible the DTA should be construed to prevent that. By contrast the Court of Appeal was unconcerned by the unfairness.

It seems to me that some of these issues are also addressed in the 2001 DTA.<sup>286</sup>

The court did not formally decide other questions:

- (1) Whether the income of the member of the LLC should be regarded as dividend income or the same income as received by the LLC, ie what was the source of the member's LLC income, ie, is the LLC transparent in that sense?
- (2) Whether income of the LLC was "paid to" the members so that it could qualify for tax credit relief under art. 24(4)(b) USA/UK DTA, ie, is the LLC transparent in that sense?
- (3) Whether the interest of the member of the LLC was similar to share capital for UK tax purposes (the SC did not decide this, but the FTT found that it was not<sup>287</sup>).

The reasoning set out above shows that the answer to questions (1) and (2) should likewise be yes. But on these points, HMRC do not intend to take much notice of the decision:

Lord Reed delivered the unanimous judgment of the court and he made clear that he relied on the facts found by the FTT, in particular

---

284 [2015] STC 1977 at [121].

285 [2015] STC 1977 at [25]: "The question is whether he is liable to pay [at] an effective rate of taxation of 67% (ie £45 in US taxes for every £100 of income, plus £22 in UK tax, calculated as 40% of the £55 remitted after payment of US taxes), or is entitled to double taxation relief." The 40% rate applied as remitted dividends do not qualify for dividend rates. The rate would now be 45% (46% in Scotland).

286 See 87.4.3 (US hybrid-entity rule).

287 See [2010] UKFTT 88 (TC) at [7].

those regarding the rights of Mr Anson that arose from the Delaware LLC Act and LLC agreement.

The FTT made findings that the profits of the LLC did not belong to the LLC in the first instance but the members became automatically entitled to their share of the profits as the profits arose and before any distribution. The FTT also found that the interest of a member in the LLC was not similar to share capital.

HMRC has after careful consideration concluded that the decision is specific to the facts found in the case.

HMRC go on to identify the consequences of this view:

[1] ... where US LLCs have been treated as companies within a group structure HMRC will continue to treat the US LLCs as companies, [2] where a US LLC has itself been treated as carrying on a trade or business, HMRC will continue to treat the US LLC as carrying on a trade or business. [This should not be contentious as it is consistent with the Courts findings in *Anson*. But the point will not often matter very much].

[3] HMRC also proposes to continue its existing approach to determining whether a US LLC should be regarded as issuing share capital.<sup>288</sup>

Point [3] is difficult to reconcile with the approach of the first-tier tribunal, but the issue did not have to be decided in *Anson*, so the comments are *obiter*. HMRC have some support from Canada, where a US LLC was held to be a company.<sup>289</sup> The HMRC view need not in fact be based on the premise that *Anson* is specific to its facts: it could and, I think, should, say that even on the exact facts of *Anson*, the LLC should be treated as a company, etc.

More controversially, HMRC say:

[4] Individuals claiming double tax relief and relying on the *Anson v HMRC* decision will be considered on a case by case basis.<sup>290</sup>

---

288 See 86.41.12 (Share capital: Delaware LLC).

289 See 86.34.2 (LLC: Opaque).

290 HMRC Brief 15 (2015) “HMRC response to the Supreme Court decision in *Anson v HMRC*”

<https://www.gov.uk/government/publications/revenue-and-customs-brief-15-201>

This raises the issue which *Anson* did decide. But what is the HMRC view? “Considered on a case by case basis” is not exactly guidance. Perhaps HMRC had not had sufficient time to make up their mind, and the need for a statement on the other issues raised by the decision was more pressing.

It is correct that the decision in *Anson* depended on facts:

- (1) The terms of the LLC
- (2) The effect of those terms under US law (which in the UK is a question of fact)

HMRC do not explain which facts may be different in other cases.

Is it the terms of the LLC? In that case a person who wanted FTCDR could obtain the same result by adopting similar terms. Although there is wide freedom to vary the terms of a Delaware LLC, at least one US commentator has expressed the view that the LLC here did not have any particularly unusual features.<sup>291</sup>

If HMRC seriously wish to challenge FTCDR claims, they will have to say that the taxpayer’s expert evidence as to US law was wrongly accepted by the tribunal: “specific to the facts” is a euphemism for “wrong”. Of course courts do from time to time make wrong findings of foreign law, and foreign law is classified as fact, and so there are no binding precedents. But to suggest that the tribunal made wrong finding of US law, without giving particulars, seems somewhat high handed.

If HMRC do refuse to grant tax credit relief to a UK member of an LLC, in the case of an LLC similar to *Anson*, a rerun of the litigation is inevitable, as is, I think, the end result; but “on a case by case basis” allows HMRC room for flexibility. Probably HMRC will back down.

The uncertainty is unnecessary, and altogether, HMRC’s customers may think this an unimpressive display of administration.

---

*5-hmrc-response-to-the-supreme-court-decision-in-george-anson-v-hmrc-2015-uksc-44/revenue-and-customs-brief-15-2015-hmrc-response-to-the-supreme-court-decision-in-george-anson-v-hmrc-2015-uksc-44*

291 Sullivan & Cromwell LLP, “Recent Developments Regarding Entity Classification for UK Tax Purposes” (2011)

[https://www.sullcrom.com/siteFiles/Publications/SC\\_Publication\\_Recent\\_Developments\\_Regarding\\_Entity\\_Classification.pdf](https://www.sullcrom.com/siteFiles/Publications/SC_Publication_Recent_Developments_Regarding_Entity_Classification.pdf)

UK resident members of an LLC should check that, as in *Anson*, the LLC is under an obligation to distribute its profits as they arise, (ie it does not have the power to retain its profits). I expect that is generally the case. Provided that is so, they should be entitled to foreign tax credit relief.

See too 25.30.3 (S corp/LLC lender).

#### 86.34.5 *UK source income of LLC*

The DTR Manual provides:

**DT19853A USA: US limited liability companies** [Jan 2020]

... If an LLC derives income from the UK, the question arises of whether it is entitled to claim relief from UK tax under the agreement. A key issue is whether, under the conditions laid down in the agreement, which in this respect does not follow the approach of the OECD Model (DT153), the LLC can be said to be a resident of the United States. In our view an LLC cannot be said to be a resident of the United States within the terms of the agreement:

- [1] it is not a United States corporation,
- [2] nor is it a person resident in the United States for the purposes of United States tax (because the United States taxes the profits of an LLC not on the LLC itself but on its members).

Point [1] is misconceived, but it is not necessary to pursue that, as HMRC are right to say that the LLC is not a treaty-person because of point [2]. But HMRC did not take the point:

However, we decided as a matter of practice that, in order to relieve double taxation under the agreement where tax would otherwise be imposed on the same income both in the UK and in the United States, we will accept claims to relief from UK tax under the agreement from an LLC, but only to the extent that the income in question is subject to United States tax in the hands of those members of the LLC who are residents of the United States. Subject to the same condition, we will pay a full tax credit to a United States LLC, less the 15 per cent deduction provided for by Article 10(2)(a)(ii) of the agreement.

Under the new [2001] Agreement, this practice is formalised by Article 1(8).<sup>292</sup>

### 86.34.6 *LLCs in non-US jurisdictions*

A number of tax havens have enacted LLC legislation, based on the US model, and Guernsey proposes to follow.

A Guernsey consultation paper provides:

An LLC may, most naturally, fall to be described as a body corporate with legal personality, notwithstanding that the intention is that it would not, by default, be taxed as a company. This would be consistent with the status of Guernsey LLPs, which are the most analogous structures currently available. It is noted that some jurisdictions have provided for an LLC to have legal personality, without being a body corporate.<sup>293</sup> It is thought that this may be to assist in determining domestic tax treatment and/or to strengthen the argument that other jurisdictions should not treat LLCs (or at least those which have not elected to be taxed as companies) as companies for tax purposes in those jurisdictions.<sup>294</sup>

## 86.35 US limited partnership

### 86.35.1 *US law background*

---

292 The Employment Income Manual makes the same point; see the passage set out at 86.23.2 (*Société civile immobilière*).

293 Footnote original: Delaware's LLC Act provides that a Delaware LLC is a legal entity with status governed by its Laws.

A Bermuda LLC has separate legal personality and the liability of its members is limited. Bermuda Limited Liability Company Act 2016 provides for an Exempted LLC, so called because they are exempt from the provision of the Act.

A Jersey LLC will have legal personality but will not be a body corporate. See section 2(2) of the Limited Liability Companies (Jersey) Law 2018.

Section 9(3) of the Cayman Islands Limited Liability Companies Law, 2016 provides that, "From the date of registration, a limited liability company shall be a body corporate (with legal personality separate from that of its members from time to time)...".

294 States of Guernsey, "Consultation on the potential enactment of Limited Liability Companies (LLC) legislation in Guernsey" p.8 (2019)

<https://www.weareguernsey.com/media/6971/llc-consultation-report.pdf>

In the USA, most states have adopted the [US] Revised Uniform Partnership Act 2004. I focus on Delaware, but what I say here should apply generally.

Section 201(a) [US] Delaware Revised Uniform Partnership Act provides:

A partnership is a separate legal entity which is an entity distinct from its partners unless otherwise provided in a statement of partnership existence or a statement of qualification and in a partnership agreement.

This applies to a limited partnership as well as to a general partnership, because s.202 (a) provides:

A limited liability partnership is for all purposes a partnership.

### 86.35.2 *Is limited partnership a co*

The Australian Taxation Office discuss whether a Delaware limited partnership is a company for the purposes of the Australia/US DTA:

#### **US Limited Partnership: whether it is a company for the purposes of Article 10 of the US Convention**

##### **Issue**

Is a United States (US) limited partnership (US LP), which is treated as a partnership for US federal tax purposes, a company for the purposes of Article 10 of the [US/Australia DTA (1983)<sup>295</sup>] (the US Convention)?

##### **Decision**

No...

##### **Facts**

US LP is a limited partnership established under US (Delaware) state law (the Delaware Revised Uniform Limited Partnership Act (DRULPA)).

A limited partnership under the DRULPA is formed upon the execution and filing of a certificate of limited partnership under section 17-201 of the DRULPA.

As a limited partnership formed under the DRULPA, US LP is an unincorporated hybrid business entity having features commonly associated with both a business carried on by partners as partners and with a company.

The DRULPA does not incorporate a limited partnership, nor does it provide that a limited partnership is a body corporate.

US LP is a separate legal entity, and exists as such until cancellation of the certificate of limited partnership under paragraph 17-201(b) of the DRULPA. Section 15-201 of

---

295 <http://www.irs.gov/pub/irs-trty/aus.pdf>

the DRULPA also provides that US LP has separate legal personality distinct from its partners.

US LP is ‘for all purposes a partnership’, per section 15-202 of the DRULPA.

US LP is treated as a partnership (and so is fiscally transparent) for US federal tax purposes and not as a taxable unit.

All income derived by [ie arising to] US LP is subject to US tax in the hands of its US resident partners. All partners are US resident corporations.

US LP is a ‘person’ under Article 3(1)(a) of the US Convention.<sup>296</sup>

US LP is a ‘resident’ of the US for tax treaty purposes within the meaning of Article 4(1)(b)(iii) of the US Convention, because Article 4(1)(b)(iii) treats a US partnership as a US resident for tax treaty purposes to the extent that the income it receives is subject to US income tax either in its hands or in the hands of a partner.<sup>297</sup>

US LP is not treated as a company by the US for tax treaty purposes because it is treated as a partnership for US federal tax purposes.

US LP owns all the shares in an Australian resident company. During the income year the Australian resident company paid an unfranked dividend (not assessable income and not exempt income) to US LP, which was legally and beneficially entitled to that dividend.

US LP would be taxed as a company under Australian domestic law (Division 5A of the Income Tax Assessment Act 1936, ITAA 1936) if it derived Australian source assessable income. US LP is not a resident of Australia under section 94T of Division 5A of the ITAA 1936...

Diagrammatically:

### Reasons for Decision

To qualify for benefits under the US Convention the claimant must first be a ‘person’ and a ‘resident’ for the purposes of the US Convention. In this case US LP, being a US domestic partnership, is both a ‘person’ and a US ‘resident’ according to the terms of the US Convention. Note that the US Convention is unusual in that it applies treaty benefits for income derived through fiscally transparent entities such as a partnership, at the level of the entity (in this instance US LP).

296 This is the US model form, under which “person” includes a partnership: see 8.23.2 (Partnerships in USA/UK DTA).

297 This is US treaty model form, though the wording of the USA/UK DTA is different.

Article 10 of the US Convention provides that certain cross-border inter-corporate dividends flowing between Australia and the US are either:

- subject to a maximum of 5% rate of source country tax if the person beneficially entitled to those dividends is a company which holds directly at least 10 per cent of the voting power in the company paying the dividends (Article 10(2)(a) of the US Convention); or
- exempt from source country tax where the person beneficially entitled to the dividends is a company that has owned shares representing 80 per cent or more of the voting power of the company paying the dividends for a 12 month period ending on the date the dividend is declared, and satisfies certain other conditions (Article 10(3) of the US Convention).

The words of the US Convention are quite specific. For the reduced dividend withholding tax rates under Article 10(2)(a) or Article 10(3) of the US Convention to apply to an unfranked dividend paid by an Australian resident company, the person beneficially entitled to the dividend must be a ‘company’. Here, the ‘person’ beneficially entitled to the dividends paid by the Australian resident company is US LP.

Article 3(1)(b) of the US Convention defines ‘company’ for the purposes of the Convention ‘unless the context otherwise requires’, to mean ‘any body corporate or any entity which is treated as a company or body corporate for tax purposes’.<sup>298</sup>

Accordingly, for the purposes of our analysis, US LP will be a ‘company’ for the purposes of the US Convention if:

- (a) it is a body corporate; or
- (b) it is an entity that is treated as a company or body corporate for tax purposes - unless the context of the US Convention otherwise requires.

***(a) Is US LP a ‘company’ for the purpose of the US Convention by virtue of being a ‘body corporate’ ?***

US LP is not a ‘company’ for the purpose of the US Convention by virtue of being a ‘body corporate’ for Australian purposes.

The term ‘body corporate’ is not defined in the US Convention. Thus, in accordance with Article 3(2) of the US Convention, the term will generally take its meaning from the taxation laws of the country applying the tax treaty (being in this case Australia), ‘unless the context otherwise requires’. As ‘body corporate’ is not defined in Australia’s domestic income tax law legislation, the ordinary meaning of the term in Australia may then apply ...<sup>299</sup>

The ruling then discusses the meaning of “body corporate”:

The *Butterworths Australian Legal Dictionary*, 1997 defines a ‘body corporate’ as ‘an artificial legal entity having separate legal personality’. The *Macquarie Dictionary*, 4<sup>th</sup> ed., 2005 defines ‘body corporate’ in its legal context, as ‘a person, association or group of persons legally incorporated in a corporation’. Generally a ‘body corporate’ is established under an Act of Parliament or under a statutory procedure of registration, such as the

298 This is OECD Model form: see 29.9.4 (“Company” in OECD Model).

299 See 103.11 (Undefined treaty terms).

Corporations Act 2001 (refer to paragraphs 22-23 of Taxation Ruling IT 2634 and paragraphs 30-34 of Miscellaneous Taxation Ruling MT 2006/1).

As US LP is created under Delaware state law and has a legal personality under that law, it should be recognised as a legal entity in Australia.<sup>300</sup>

While US LP is a legal entity having legal personality, it is essentially quite different in character from the bodies which are incorporated under corporations law in Australia. For example, while a corporation continues in existence until it is dissolved notwithstanding changes in its membership or business, a limited partnership formed under the DRULPA is usually formed for a limited period of time and terminates in the same way as a partnership. A corporation in Australia has perpetual succession, a personality that is continuous and free transferability of interests. US LP does not. Further, the partners of US LP derive the profits made by US LP, and a partner's individual share of the profits in US LP is ascertained in accordance with its interest in US LP, rather than on the basis of distributions made.

Notwithstanding, as US LP is an artificial legal entity having a form of separate legal personality, it is prima facie a 'body corporate' under the ordinary meaning of the term in Australia. Although, generally a 'body corporate' has the 'ability to continue in existence indefinitely and to keep its identity regardless of changes to its membership' (see paragraph 30 of MT 2006/1) and US LP does not enjoy such a continued existence.

In UK law the better view is that the Delaware LP is not a body corporate. The fact that a partnership has legal personality does not entail the conclusion that it is a body corporate. The Australian ruling is slightly tentative on the point ("prima facie") but it turns out not to matter:

But, as highlighted above, the requirement in Article 3(2) of the US Convention to in this case interpret an undefined term such as 'body corporate' in accordance with Australian taxation law, applies only if the 'context' does not require an alternative interpretation .... [The statement makes some general observations on treaty interpretation<sup>301</sup> and continues:] Paragraph 12 of the OECD Commentary on Article 3 emphasises that the interpretation set out in the 'undefined terms' provision applies 'only if the context does not require an alternative interpretation'.<sup>302</sup> It adds that the 'context' is determined in particular by the intention of the Contracting States, as well as 'the meaning given to the term in question in the legislation of the other Contracting State (an implicit reference to the principle of reciprocity on which the Convention is based)'. However, US federal tax law does not specifically define the term 'body corporate'.

---

300 The ruling refers to *Chaff and Hay Acquisition Committee v Hemphill* which is more fully considered at 86.31.4 (Stichting a treaty-person).

301 Referring to TR 2001/13; see 103.9 DTA interpretation principles) and following paragraphs.

302 See 103.11 (Undefined treaty terms).

In this case, the OECD Commentary on the definition of ‘company’ is particularly relevant to the context of the term ‘body corporate’. Paragraph 3 of the OECD Commentary on Article 3 provides the following:

3. The term “company” means in the first place any body corporate. In addition, the term covers **any other taxable unit** that is treated **as a body corporate according to the tax laws** of the Contracting State in which it is **organised**. The definition is **drafted with special regard to the Article on dividends**. ...

It follows from the OECD Commentary’s statement that the second limb of the term covers any other taxable unit, that the first limb of the definition of ‘company’ is designed to deal only with entities which are bodies corporate under general law and also taxable units under tax law (which is a central consideration in applying the terms of Australia’s tax treaties).

While the requirement for the entity to also be a ‘body corporate’ for tax law purposes under the first limb is not explicit, treaties should be interpreted more ‘liberally’ than domestic legislation to smooth over the gaps, imprecision and ambiguities in the treaty text in a way that addresses the context and meets the object and purpose of the treaty... Where the context of a term allows a specific tax law meaning and a non-tax law meaning, the former should prevail (see paragraph 68 of TR 2001/13).

In addition, it is clear from the OECD Commentary on Article 3 that the question of whether a dividend recipient is an entity ‘treated as a body corporate’ for tax purposes must be made by reference to ‘the tax laws of the Contracting State in which it is organised’ - and not the state of source. Thus, paragraph 3 of the OECD Commentary on Article 3 provides with regard to the terms ‘company’ and ‘body corporate’ that the relevant taxation laws to consider are those of the country in which the entity was created (i.e. being the domestic laws that apply to the entity). The ‘context’ requires an examination of US taxation law and not Australian taxation law to determine whether a US entity is a ‘company’ for the purpose of qualifying for the reduced rate of withholding tax on inter-corporate dividends.

Hence, in determining whether an entity is treated as a ‘body corporate’ for tax treaty purposes, reference is not made to the tax law of the country applying the treaty (in this case Australia), unless the entity was organised there. Specifically, as indicated above, the ‘context’ surrounding the terms ‘company’ and ‘body corporate’ in the US Convention, for the purpose of US LP qualifying for the either of the reduced rates of withholding tax on the unfranked dividends paid by the Australian resident company, requires an examination of US taxation law.

Accordingly, to determine whether US LP is a ‘body corporate’ under the US Convention, the relevant consideration is where US LP was organised. US LP was not organised in Australia, but in the US. Hence, the potential Australian tax treatment of US LP (that is, that the entity can be treated as a company for Australian tax purposes by virtue of Division 5A of the ITAA 1936) is irrelevant. Rather, only the US tax treatment of US LP is relevant.

US LP is not a taxable unit and so is not treated and taxed as a ‘body corporate’ for US federal tax purposes - but is treated and taxed as a partnership.

Finally and importantly, paragraph 3 of the OECD Commentary on Article 3 emphasises that the definition of ‘company’ is **‘drafted with special regard to the Article on dividends’** and ‘the term “company” has a bearing only on that Article, paragraph 7 of Article 5, and Article 16.’

Paragraphs 10-11 of the OECD Commentary on Article 10 explains the rationale behind reduced taxation rates for inter-corporate dividends as follows:

10. On the other hand, a lower rate (5 per cent) is expressly provided in respect of dividends paid by a subsidiary company to its parent company. If a **company** of one of the States owns directly a holding of at least 25 per cent in a company of the other State, it is reasonable that **payments of profits by the subsidiary to the foreign parent company** should be taxed less heavily to avoid recurrent taxation and to facilitate international investment. The realisation of this intention depends on the **fiscal treatment of the dividends** in the State of which the **parent company is a resident....**

11. If a partnership is **treated as a body corporate under the domestic laws** applying to it, the two Contracting States may agree to modify sub-paragraph (a) of paragraph 2 in a way to give the benefits of the reduced rate provided for parent companies also to such partnership. (Emphasis added)

Paragraph 2 of Article 10 of the OECD Model Tax Convention is not materially different from paragraph 2 of Article 10 in the US Convention, with the exception of the differences in the percentage holding thresholds in the respective treaties.

Klaus Vogel on Double Tax Conventions<sup>303</sup>, 1997, 3rd edn. makes the following statements (at pages 583-584 and 599) about paragraph 2 of Article 10 of the OECD Model Tax Convention:

Art. 10 is still completely geared to the ‘classical’ system of company taxation... and is, consequently, based on the conception that it is appropriate to subject income derived by a company (within the meaning of Art. 3(1)(b)MC) to a tax of its own distinct and separate from the tax imposed on the distributions received by a company’s shareholders ... the maximum rates on inter-company dividends should differ from those on ‘all other’ dividends.... Such preferential treatment, however, applies only where direct investments are held by companies and does not apply where a substantial interest is held by an individual or a partnership....

If, under the law of its State of residence, a partnership is considered a body corporate, but is ... not itself subjected to tax ... there would be no justification for allowing it to benefit from the limited rate of 5 per cent, because its interposition actually does not result in any double taxation.

It is apparent, from all of the above, that the intention of Article 10(2) of the OECD Model Tax Convention is to provide reduced rates of withholding tax for dividends derived by companies from direct investments on a reciprocal basis. It would be contrary to the intention of Article 10(2) if the reduced inter-corporate dividend withholding tax

---

303 See *Klaus Vogel on Double Taxation Conventions* (4<sup>th</sup> ed., 2015). The text of the current edition has changed somewhat.

rate was to apply where the tax law of the resident country treated the beneficial owner of the dividends as a partnership.

Specifically, in the case of US LP, it would be inappropriate for a partnership formed under US state law and treated as a partnership for US tax purposes, to be able to access the inter-corporate rate of withholding tax for dividends under either Article 10(2) or Article 10(3) of the US Convention. The purpose behind Article 10(2) and 10(3) is to prevent multiple layers of taxation of corporate economic groups. Where the recipient does not have tax imposed (that is, because it is treated as a partnership in its state of residence), the rationale for granting the reduction in (or exemption from) withholding tax disappears.

The context of Article 10 and the OECD Commentary requires the implicit inclusion in the first limb of the definition of 'company', that a 'body corporate' is a taxable unit under the relevant taxation laws. Further, the relevant taxation laws are clearly the domestic laws affecting the entity - that is, those laws under which the entity is organised or created.

US LP is not a taxable unit and not a 'body corporate' for US tax purposes. Therefore, US LP does not satisfy the first limb of the meaning of the term 'company' in Article 3(1)(b) of the US Convention. It follows that US LP will not be a 'company' for the purposes of Article 10 of the US Convention by virtue of being a 'body corporate' for Australian purposes.

***(b) Is US LP a 'company' for the purpose of the US Convention under the second limb of the meaning of the term 'company' - that is to say, is US LP an entity that is treated as a 'company' or 'body corporate' for tax purposes ?***

The OECD Commentary on the definition of 'company' (outlined above) makes it clear that, under the second limb of the definition, the determination is to be made by reference to the laws of the State in which the entity is **organised** (in this case US federal tax law). US LP is not taxed as a 'company' or 'body corporate' for US federal tax purposes. Rather it is treated and taxed as a partnership. This is essentially because, although US LP has a form of separate legal personality under Delaware state law, the US federal tax position is that while state law attributes of an entity control various aspects of business relations, they are not controlling under US tax law (unless the tax law so provides)...

[The ruling considers the US tax law and concludes:] US LP is taxed as a partnership unless it elects to be taxed as a corporation. As no such election was made by US LP, it is not a taxable unit and is not taxed as a corporation under the tax laws of the US.

Hence, US LP is not an 'entity that is treated as a company or body corporate for tax purposes' and so does not satisfy the second limb of the meaning of the term 'company' for the purposes of the US Convention.

### **Conclusion**

For the purpose of the US Convention, US LP is neither a 'body corporate' nor an 'entity that is treated as a company or body corporate for tax purposes'. Consequently it is not a 'company' for the purpose of Article 10 of the US Convention, and does not qualify for either of the reduced rates for certain cross-border inter-corporate dividends flowing between Australia and the US.

This is consistent with the US position for tax treaty purposes which is that a US partnership which does not elect to be taxed as a corporation will not be a 'company' for

US treaty purposes. The Issues in International Taxation No. 6 ‘The Application of the OECD Model Tax Convention to Partnerships’ report includes the US response to the OECD Partnership Report at page 127. This response states that US partnerships (including limited partnerships such as Delaware limited partnerships, but also US LLCs and LLPs) not electing to be treated as corporations are not considered to be companies for the purposes of US tax treaties.<sup>304</sup>

## 86.36 Cell companies

### 86.36.1 Cells: Background law

The GI Manual provides:

#### **GIM11020 - Captive insurers: tax havens and local organisation**

[Aug 2016]

#### **Cell companies**

These take two forms, protected cell companies (PCCs) and incorporated cell companies (ICCs). PCCs were originally developed in Guernsey in 1997, and now exist in other territories such as Jersey, Cayman Islands, Irish Republic and Bermuda. ICCs were developed more recently, in Guernsey and Jersey in 2006.

The essential difference between them is that an ICC’s cells are legal entities in their own right, unlike the cells of a PCC.

A variety of terminology is used. What the Manual here calls protected cells are also called unincorporated cells, which is a clearer term. The Irish Collective Asset-management Vehicle Act 2015 refers to an IVAC as having “sub-funds”, but these sub-funds equate to cells of a cell company. We also have “divided company”.

The advantage of cell companies lies in the cost and regulatory time saving in the creation of new cells. Cells of ICCs, with legal personality, can more easily transact with third parties, and the ring fencing is stronger, which is an advantage in relation to use in securitisations and structured financial products. Each cell of the PCC or ICC has the same directors, secretary and registered office as the PCC/ICC but different shareholders.

PCCs were originally developed to make the benefits of captive insurance available to smaller companies by reducing costs. Different

---

304 ATO ID 2010/81, 9 April 2010, <http://law.ato.gov.au> (some references are here omitted).

classes of business can be written into different cells within one vehicle, with one set of formation costs, a single capital requirement and easier repeat transactions. This improved 'rent a captive' arrangements which formerly relied upon only a contractual separation of assets. ICCs take the separation a stage further.

The INT Manual provides:

**INTM236500 Cell companies or similar entities and control** [Jun 2018]

A protected cell company PCC can be thought of as being a standard limited company that has been separated into legally distinct portions i.e. cells. The income, assets and liabilities of each cell are kept separate from all other cells. Each cell has its own separate portion of the PCC's overall share capital, allowing shareholders to maintain sole ownership of an entire cell while owning only a small proportion of the PCC as a whole. Legally a PCC is a single company, but each shareholder/investor retains a separate interest in the company. Similar structures to the PCC include the incorporated cell company (ICC) where each cell is treated as a separate incorporated entity to provide greater protection still for the individual shareholder's assets and income.

Cell companies also exist in UK law.<sup>305</sup>

### 86.36.2 Cells: Legal personality

Dicey states:

It is well established that a corporation duly created in a foreign country is to be recognised as a corporation in England.<sup>306</sup>

Land Registry practice guide 78 (Overseas companies & LLPs) provides:

**3.7 Protected cell companies and incorporated cell companies**

Some jurisdictions provide for protected cell companies and incorporated cell companies. This enables various assets and liabilities of the company to be partitioned off into separate 'cells', which may or may not have a separate legal personality. The precise nature of a protected cell company or incorporated cell company will depend on the law in the territory of

---

305 Part 4 Risk Transformation Regulations 2017.

306 Dicey, Morris & Collins, *Conflict of Laws* (15th ed., 2012) para 30-010 (Status). No doubt the same applies elsewhere.

their creation. When an application is made to register a protected cell company or incorporated cell company as proprietor of an estate or charge we will need evidence as to the constitution and legal personality of the applicant.

For example, under Guernsey law, a protected cell company is a single legal person and distinct cells within the protected cell company structure are not legal persons. A registered estate or registered charge can therefore be registered only in the name of the protected cell company whether or not the property belongs to the core of the protected cell company or only a cell. If the cell has its own trading name and a specific request is made in the application form or in a letter, then this will be included in the register entry.

In view of the company structure, an application for registration of a protected cell company may be accompanied by an application for entry of a restriction.

Unlike a protected cell company, if an incorporated cell company, under Guernsey law, creates a cell within its structure, each incorporated cell is a separate legal person.<sup>307</sup>

The applicable foreign law governs the legal position elsewhere:

- (1) A company with unincorporated cells (a PCC) is one legal person, and the cells are not separate legal persons<sup>308</sup>
- (2) Where a company has incorporated cells, each cell is a legal person, and so is the company itself.

The same will apply for UK tax purposes unless the context or specific provision otherwise provides. HMRC agree.<sup>309</sup>

For some purposes the general law analysis is altered by statute:

- (1) Offshore funds: see 63.10 (Umbrella arrangements)

---

307 <https://www.gov.uk/government/publications/overseas-companies-and-limited-liability-partnerships-pg78/practice-guide-78-overseas-companies-and-limited-liability-partnerships> (Apr 2019)

308 For a UK Cell company, reg 12(7) Risk Transformation Regulations 2017 deals with the point expressly: “ The core and the cells do not have legal personality distinct from the protected cell company, but are nevertheless segregated from each other ...”

309 See quote from IPT manual: “it is the PCC as a whole that is the corporate body”. Also see McCarthy, “Protected Cell Companies and s.13 TCGA” [2009] PCB 316.

- (2) CFCs (see below)
- (3) Insurance premium tax (see below)

I review these here as (although the topics are some way from the themes of this book) the legislation and Manual discussion confirm the view taken above.

### 86.36.3 *Cell co: CFCs*

Section 371VE(1) TIOPA provides:

This Part [Part 9A, CFCs] applies in relation to unincorporated cells and incorporated cells as if they were non-UK resident companies.

Section 371VE TIOPA sets out its definition of unincorporated cell:

(2) An “unincorporated cell” is an identifiable part (by whatever name known) of a non-UK resident company which meets the following condition.

(3) The condition is that, under the law under which the non-UK resident company is incorporated or formed, under the articles of association or other document regulating the non-UK resident company or under any arrangement entered into by or in relation to the non-UK resident company—

- (a) assets and liabilities of the non-UK resident company may be wholly or mainly allocated to the part of the company in question,
- (b) liabilities so allocated are to be met wholly or mainly out of assets so allocated, and
- (c) there are members of the non-UK resident company who have rights in relation to the company's assets which cover only or mainly assets so allocated.

(4) Subsection (1) does not affect the status of the non-UK resident company mentioned in subsection (2) as a company for the purposes of this Part; but its assets and liabilities are to be apportioned between it and the unincorporated cell (and any other unincorporated cells which are part of the company) on a just and reasonable basis.

371VE TIOPA then sets out the definition of incorporated cell:

(5) An “incorporated cell” is an entity (by whatever name known) established under the articles of association or other document regulating a non-UK resident company—

- (a) which, under the law under which the non-UK resident company is incorporated or formed, has a legal personality distinct from that of the non-UK resident company, but
- (b) which is not itself a company (ignoring this section).

But I would have thought that an incorporated cell would be a company within the standard tax definition.

(6) Subsection (1) does not affect the status of the non-UK resident company mentioned in subsection (5) as a company for the purposes of this Part.

The INT Manual provides:

**INTM236500 Cell companies or similar entities and control** [Jun 2018]

... [Cell] arrangements can be used to sidestep the CFC rules (including those on control) by allowing UK resident unconnected parties to run their insurance or investment activities alongside each other within the structure whilst only holding a minority of the total shares in the PCC/ICC and only being entitled to a small proportion of the total profits. The intention and effect is quite different to holding a small passive investment in a third party entity. These structures are replicating the effect of each shareholder controlling their own separate entity. Accordingly for the purposes of Part 9A and in particular the control rules each individual cell is to be taken to be a non-UK resident company in its own right.

[The Manual sets out the relevant definitions and continues]

So in determining whether an individual cell should be taken to be a CFC for the purposes of Part 9A, the control rules will be applied to an individual cell as if it were a non-UK resident company in order to determine whether it is controlled by a UK person or persons under the legal and economic control tests ...

However this does not affect the status of the host entity, either the PCC or ICC (or similar entities) irrespective of whether there are separate cells within those entities treated as CFCs. Regardless of the treatment of the individual cells within the companies, the PCC or ICC will also be treated as a non-UK resident company for the purposes of Part 9A. This means that the control rules will also apply to the company as a whole in determining whether it is controlled by a UK person or UK persons. In the case of a PCC or similar entity, where cells are unincorporated, assets and liabilities are to be apportioned between the cells and the company on a just and reasonable basis. In the case of an incorporated cell company the incorporated nature of the cells means that this further apportionment provision is not needed.

HMRC give the example of an unincorporated cell company:

*Example*

Company X is established by UK resident company Y in an overseas territory. X provides captive insurance facilities to unconnected UK resident companies A to J through ten unincorporated cells. X itself has “core” shares and “cell” shares. The core shares have voting rights and the right to appoint directors; the shares are wholly owned by Y. The cell shares are separate shares issued for each cell and are wholly owned by the unconnected UK resident companies A to J (so that A owns all the cell shares in the first cell, B owns all the shares in the second cell and so on).

Each cell prepares its own accounts, and the assets of each cell are protected from the others. So if one cell makes a loss, it has no impact on the other cells. If a cell were to become insolvent, the creditors have no recourse to the assets held in other cells. However the cells cannot contract in their own name; contracts of insurance are entered into by X but the risks and benefits of the contract are specified to particular cells.

X provides management and underwriting services for each of the ten cells and makes profits that are not included in any of the accounts prepared for the individual cells.

Each separate cell is subject to a test of control and each cell is deemed to be a CFC of each of A to J respectively because of the legal control each has over their cell. The profits potentially subject to a CFC charge are the profits derived from the contracts of insurance (underwriting profits and investment profits).

X is clearly controlled by Y given it owns all of the shares in X (i.e. has legal control) and so is a CFC. The profits potentially subject to a CFC charge are the profits derived from the management and underwriting services.

#### 86.36.4 Cell company: IPT

Para 3A sch 6A FA 1994 provides (in short):

- (6) For the purposes of this paragraph-
  - (a) a company is a “divided company” if under the law under which the company is formed, under the company's constitution or under arrangements entered into by or in relation to the company-
    - (i) some or all of the assets of the company are available primarily, or only, to meet particular liabilities of the company, and
    - (ii) some or all of the members of the company, and some or all of its creditors, have rights primarily, or only, in relation to particular assets of the company;
  - (b) a “division” of such a company means an identifiable part of it (by whatever name known) that carries on distinct business activities and to which particular assets and liabilities of the company are primarily or wholly attributable.

(7) ... the company shall be treated as connected with any person with whom a division of that company would be connected if it were a separate company.

The IPT Manual provides:

**IPT04930 Higher rate of IPT: Protected cell companies** [Sep 2018]

... The defining feature of [PCCs] is that they have within them units that are usually called cells. These cells can be separately owned and they are segregated from one another's assets and liabilities. In effect a cell can be run as if it was a separate company although it remains part of the larger corporate body, the PCC, which itself is a single legal entity.

Prior to the Budget measure, a PCC could be used to avoid the higher rate. Under the Taxes Act, a connected person, in the case of companies, is defined as one person having a controlling share of the company (normally this would be a 51% shareholding in the company). Because of the cellular structure of a PCC, it is possible for a person to wholly own a cell, but only have a minority shareholding in the PCC overall. Thus, a PCC could be set up in such a way that it would not be caught by the connected person definition and it could be used to avoid higher rate IPT.

To close this loophole the Budget measure introduced a new paragraph 3A to schedule 6A of the Finance Act 1994, which extended the definition of connected persons in the higher rate IPT legislation. In practice this meant that to establish whether a PCC was connected for the purpose of the higher rate, you could look at the individual cells of the PCC and consider whether, if the cells were separate entities, they would meet the connected person test. If the answer to that question was yes, then the PCC was to be regarded as connected to the supplier...

To ensure all PCC type companies are covered, by whatever name they are known, the legislation uses the term divided companies.

## **86.37 Hindu undivided property**

The CG Manual provides:

**CG31305 Other interests** [Jul 2019]

... a case involving Hindu Undivided Property would be regarded as a discretionary trust rather than an unincorporated association.

This entity is referred to as Hindu Undivided Family ('HUF'). Whether it is a trust or a company, and if a trust, whether a discretionary trust, requires further examination.

### 86.38 Tokkin (Japan)

HMRC regard a tokkin as transparent. The INTM provides:

#### **355160 Claims by Japanese "Tokkin" funds [May 2012]**

'Tokkin' is an abbreviation of 'tokutei kinsen', and means 'designated monetary trust'.

Cash or other assets for this type of fund are deposited by the investor(s) with a trustee who manages them on behalf of the investor(s), and in accordance with his/her/their instructions. The tokkin is set up and managed under the terms of a written agreement between the parties, drawn up under Law No 62 of 21/4/1922 of Japan.

Because the Dividends and Interest Articles of the convention provide for relief **only to the beneficial owner** (INTM332000) of the income, claims in respect of income paid to tokkin funds **must** be made by the beneficial owner of the tokkin (the 'investor(s)' above), and **cannot** validly be made by the tokkin's manager.

So if you see a claim or supporting voucher which makes any reference to tokkin, you should ensure that you consider only claims made by the beneficial owner, that is, the **original investor**, in respect of his/her/their share in the tokkin.

There is no reason why a single investor should not own **all** the funds in a tokkin, but you should make certain that your claim has been made by the beneficial owner and not by the trustee, or an investment manager. The original investors/beneficial owners may be either individuals or companies.

But it should be clear in either case that **no** relief can be due to the tokkin **itself**.

### 86.39 Hapja Hoesa (Korea)

The Australian Taxation Office have guidance on this:

#### **Classification of a Korean Hapja Hoesa for Australian income tax purposes**

##### **Issue**

Is the Korean Hapja Hoesa a company pursuant to the definition within section 995-1 of the Income Tax Assessment Act 1997 (ITAA 1997)?

**Decision:** Yes. The Korean Hapja Hoesa is a company within the meaning of section 995-1 of the ITAA 1997.

**Facts**

The Hapja Hoesa is a legal form of corporation, which may be established under the Korean Commercial Act (Commercial Act). The Hapja Hoesa is also a private equity fund which is regulated by the Korean Indirect Investment Asset Management Business Act (IIAMBA).

In essence, the Hapja Hoesa is an unlimited investment specialty vehicle that is established for the purpose of investing the assets of the entity into the shares or equity of other entities - with the purpose of increasing the value of such entities through participation in the management of the entities or improving the business structure or control structure of the entities. The Hapja Hoesa may be used only for private equity investment purposes.

Currently under Korean legislation, a Hapja Hoesa has the following features:

- a Hapja Hoesa is incorporated, and is formed by registering its incorporation (Article 144-5(2) of the IIAMBA; Article 172 of the Commercial Act);
- a Hapja Hoesa has a legal personality that is separate from the members (Article 171(1) of the Commercial Act);
- a Hapja Hoesa does not have partners, it has members (Article 268 of the Commercial Act);
- a Hapja Hoesa has members with limited liability and members with unlimited liability (Article 144-3 of the IIAMBA; Article 268 of the Commercial Act);
- a Hapja Hoesa has articles of incorporation (Article 144-5 of the IIAMBA; Article 178 of the Commercial Act);
- a Hapja Hoesa exists for a specific term, which must be specified in the articles of incorporation, but after the term expires, the Hapja Hoesa may continue with consent of all or some members (Article 144-5(1) of the IIAMBA; Article 229 of the Commercial Act);
- a member's interest in a Hapja Hoesa is referred to as a share (Article 197 of the Commercial Act);
- in order to transfer their share in the Hapja Hoesa, a member needs the consent of other members (Article 197 of the Commercial Act);
- members can transact with the Hapja Hoesa (Articles 199 and 275 of the Commercial Act);
- subject to limitations for Limited Liability Members, members are jointly and severally liable if assets of the company are insufficient to satisfy its obligations (Articles 212 and 279(1) of the Commercial Act);
- distributions by the Hapja Hoesa are referred to as 'dividends' (Article 279(1) of the Commercial Act).

The articles of incorporation of this particular Hapja Hoesa include the following terms:

- a Limited Liability Member may not transfer any part of their interest in the Hapja Hoesa without the consent of all Unlimited Liability Members;

- an Unlimited Liability Member may not transfer any part of their interest without the consent of all members;
- a Limited Liability member may not withdraw from the Hapja Hoesa without transferring their interest, and the transfer of an interest requires the consent of all Unlimited Liability Members;
- a member does not have a right to a distribution of distributable cash. Instead, a resolution of members is required before any profits can be distributed;
- meetings of the Hapja Hoesa will be convened by the Manager or on request of members;
- a member has one vote per unit of their interest in the Hapja Hoesa;
- members may pass resolutions on dissolution of the Hapja Hoesa; extension or reduction in the term of the Hapja Hoesa; approval of distributions;
- business cannot be transacted at a meeting of the Hapja Hoesa unless a quorum is present;
- the Hapja Hoesa will be dissolved on expiration of its term; with a resolution of the Members; on bankruptcy or insolvency; on an order of the court; or if the Korean Financial Supervisory Commission denies or cancels registration.

### Reasons for Decision

‘Company’ is defined in section 995-1 of the ITAA 1997 as:

- (a) a body corporate; or
  - (b) any other unincorporated association or body of persons;
- but does not include a partnership or a non-entity joint venture.<sup>310</sup>

As the term ‘body corporate’ is not defined in Australia’s income tax legislation, the ordinary meaning of the term applies. The Butterworths Concise Australian Legal Dictionary 2<sup>nd</sup> ed., defines a body corporate as ‘an artificial legal entity having separate legal personality’.

Being an entity that was created by registration, and that has separate legal personality, the Hapja Hoesa is a ‘body corporate’. Consequently, it will be a company under paragraph (a) of the definition of ‘company’ in section 995-1 of the ITAA 1997, providing that it is not also a partnership.

Section 995-1 of the ITAA 1997 defines ‘partnership’ as:

- (a) a body of persons (other than a company or limited partnership) carrying on business as partners or in receipt of ordinary income or statutory income jointly; or
- (b) a limited partnership.

The Hapja Hoesa has some features commonly associated with a partnership, and some features associated with a company.

The following features favour characterisation of this particular Hapja Hoesa as a company.

- a resolution of members is required before profits can be distributed. This indicates that profits belong to the Hapja Hoesa, and that the members are not in receipt of income jointly;

---

310 The same applies in the UK; see 86.3 (Definition of “company”).

- distributions are referred to in the Commercial Act as ‘dividends’ rather than as a share of profits;
- the Hapja Hoesa was formed by registration of its incorporation, whereas a partnership is generally formed by a partnership agreement between the partners;
- the Hapja Hoesa has members rather than partners;
- the Hapja Hoesa has articles of incorporation, and not a partnership agreement;
- the Hapja Hoesa has a form of perpetual succession. It will not terminate on the withdrawal of a member, as is the case with a partnership. Instead, it will continue until the occurrence of one of the events specified in its articles of incorporation.

The features which favour characterisation of this Hapja Hoesa as a partnership include:

- to withdraw from the Hapja Hoesa a Limited Liability Member in effect needs the consent of all Unlimited Liability Members;
- members’ interests are not freely transferable; in order to transfer their share in the Hapja Hoesa, a member needs the consent of other members.

The predominance of characteristics favours classification as a company rather than a partnership. Further, as the Hapja Hoesa does not have partners who carry on its business or who receive income jointly, it is not a partnership for the purpose of the definition of ‘partnership’ or ‘company’ in section 995-1 of the ITAA 1997.

As the Hapja Hoesa is a body corporate and not a partnership, it follows that it is a company within the meaning of section 995-1 of the ITAA 1997.<sup>311</sup>

It is considered that the same reasoning should apply in the UK.

## 86.40 HMRC transparent/opaque list

The International Manual provides:

### **180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes [Dec 2019]**

A list of foreign entities where we have been asked our view on the question of transparency/opacity is set out in INTM180030.

I refer to this as the “**HMRC transparent/opaque list**”.

The list gives our general view as to whether the foreign entity is to be regarded as opaque or transparent for the purpose of deciding how its members are to be taxed in the UK on the income they derive from their interest in it. Our view of a specific entity may vary depending on –  
[1] the specific terms of the UK taxation provision under which the matter must be considered:

---

311 ATO ID 2010/27 (28 January 2010) <http://law.ato.gov.au>

- [2] the provisions of any legislation, articles of association, by-laws, agreement or other document governing the entity's creation, continued existence and management, and;
- [3] the terms of any relevant double taxation agreement.

HMRC say:

Where an older date is displayed, this is because the classification has been so regarded since then.<sup>312</sup>

However HMRC do not guarantee that the list is up to date:

**180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes** [Dec 2019]

... Our view of the entities shown on the list may also change if:

- HMRC's view was given many years ago, and there have been significant changes in the relevant foreign law
- there are any significant changes in foreign law after the publication of these instructions.

I here set out a combination of two lists:<sup>313</sup> the INTM180030 [Jun 2016] list, supplemented by the additional items in the version of that list in Tax Bulletin 83.<sup>314</sup>

I add an English translation, mainly from the IATE database.<sup>315</sup> There are no exact equivalents. A legal concept is not just a word: it is a vast theoretical construction, the world in a grain of sand. Some terms can be brought over into English easily; others require a long explanation. There is not often a single standard or correct translation: the IATE database usually offers choices. In cases where the foreign entity does not have a

---

312 HMRC "Taxing gains made by non-residents on UK immovable property Summary of Responses" (July 2018) para 3.16.

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/722418/Taxing\\_gains\\_made\\_by\\_non-residents\\_on\\_UK\\_immovable\\_property\\_summary\\_of\\_responses.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/722418/Taxing_gains_made_by_non-residents_on_UK_immovable_property_summary_of_responses.pdf)

313 I have restored diacritical marks, which HMRC somewhat illiterately omitted in the transparent/opaque list, and omit the abbreviations.

314 HMRC originally published their views in Tax Bulletin 83 (also called RI 279) but HMRC state that this is "superseded by INTM180000".

315 <http://iate.europa.eu> This provides some details about the entities.

close English law equivalent, it is better to use the foreign language term rather than a potentially misleading English translation.

I mention in footnotes where OECD, “The Application of OECD Model Tax Convention to Partnerships” (1999) suggests that the tax treatment is different in the foreign state, which would result in a hybrid entity. In some cases the foreign tax treatment is more complex and the entity may be party hybrid, but that is too complex to address in a footnote.

### 86.40.1 HMRC entity clearance

The INT Manual provides:

**180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes [Dec 2019]**

We will provide our view of whether we consider a particular foreign entity to be transparent or opaque in specific cases in line with our guidance on non-statutory clearances.<sup>349</sup>

Applications should be made in writing and include -

- the name and address of the entity to be considered
- why HMRC's view is being requested
- consideration of points a) to f) at INTM180010

345 The equivalent expression in German is: Einfache Gesellschaft.

346 The equivalent expression in French is: Société à responsabilité limitée.

347 The equivalent expression in French is: Société en commandite.

348 This seems to refer to a partnership of Turkish Attorneys (ie, lawyers); I am not sure if it is actually a type of Turkish law entity as such.

349 <http://www.gov.uk/guidance/non-statutory-clearance-service-guidance>

- copies of any legislation, articles of association, by-laws, agreements or other documents governing the entity's creation, continued existence and management
- copies of any documents amending the entity's constitution  
[The Manual gives contact addresses not set out here].

And again:

The views expressed in the list are disclaimed as “general” views, and clearance applications are encouraged for a view on a specific case. Should a sufficient number of clearances be received HMRC will always look to update any relevant guidance.<sup>350</sup>

I would be interested to hear from readers who have obtained HMRC clearance on bodies not in the transparent/opaque list.

### 86.41 Ordinary share capital

The definitions of this term are as follows:

<b>Provision</b>	<b>Applies for</b>
s.989 ITA	Income Tax Acts
s.1119 CTA 2010	Corporation Tax Acts
s.42(4) FA 1930	SD group relief
Para 1 sch 7 FA 2003	SDLT group relief

The IT/CTA definitions are the same, and the SD/SDLT definitions are also the same except that they refer to a body corporate rather than a company. It may be helpful to set out the IT/SD provisions side by side:

#### **s.989 ITA**

The following definitions apply for the purposes of the Income Tax Acts...

#### **s.42(4) FA 1930**

In this section

---

350 HMRC “Taxing gains made by non-residents on UK immovable property Summary of Responses” (July 2018) para 3.16.

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/722418/Taxing\\_gains\\_made\\_by\\_non-residents\\_on\\_UK\\_immovable\\_property\\_summary\\_of\\_responses.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/722418/Taxing_gains_made_by_non-residents_on_UK_immovable_property_summary_of_responses.pdf)

“ordinary share capital”, in relation to a company, means all the company's issued share capital (however described), other than capital the holders of which have a right to a dividend at a fixed rate but have no other right to share in the company's profits

“ordinary share capital”, in relation to a *body corporate*, means all the issued share capital (by whatever name called) of the body corporate, other than capital the holders of which have a right to a dividend at a fixed rate but have no other right to share in the profits of the body corporate.

### 86.41.1 *Equity share capital compared*

Section 548 Companies Act 2006 provides:

In the Companies Acts “equity share capital”, in relation to a company, means its issued share capital excluding any part of that capital that, neither as respects dividends nor as respects capital, carries any right to participate beyond a specified amount in a distribution.

The CT Manual comments:

**CTM00511 meaning of ordinary share capital: general** [Nov 2019]  
 ... The tax and company law definitions are quite similar in effect; “distribution” under company law is defined at CA06/S829 in terms that include “every description of distribution of a company's assets to its members, whether in cash or otherwise” but excludes capital operations such as bonus (capitalisation) issues, capital reductions, redemptions or purchases of shares out of capital and distributions in a winding-up. The Corporation Tax definition of “distribution” at CTA10/PART23 is somewhat broader. It reflects anti-avoidance provisions, aimed for example at certain interest payments which have the character of profit distributions, and covers some capital operations. But the tax definition above focuses on “dividends”.

### 86.41.2 *Significance of ordinary share capital*

The term is used very frequently in tax legislation and it is not possible to give a full list. It is used in particular in the definition of group for group reliefs.

### 86.41.3 *“Ordinary share capital”*

CTM provides:

**CTM00511 meaning of ordinary share capital: general [Nov 2019]**

**Types of share capital**

The reference in the tax definition to “however described” reflects the fact that commercial practice employs a variety of descriptions of types of share capital which broadly describe their characteristics but are not definitive without reference to the articles or other constitutional documents of the issuing company. Examples are deferred ordinary shares; participating preferred ordinary shares; participating preference shares. Sometimes shares will be labelled “non-voting”, “redeemable”, “cumulative” or “convertible”. These are helpful pointers, but the articles must always be consulted.

**CTM00512 meaning of ordinary share capital: share capital [Jun 2019]**

The UK Companies Acts do not define share capital directly but state that references in the Companies Acts to a company having a share capital are to a power under its constitution to issue shares. Share capital is the amount appearing in the balance sheet from the issue of shares and if shares are issued at a premium over their nominal value the premium is reflected in a share premium account separate from the nominal share capital, although for both company law purposes (CA06/S610(4)) and tax law purposes (CTA10/S1025(2)) the premium is treated as forming part of the share capital for the purposes of its “reduction” under company law and its “repayment” under tax law.

This means that share capital reflects the equity (ownership) interests of the company members in their company and, in liquidation, the value of the interests (if any) after creditors have been repaid. Historically, share capital reflects shares in the “joint-stock” lying in the hold of a merchant adventurer trading vessel. Originally investors owned their own trading stock but as time went on it was held jointly and divided into shares. The important point in modern terms is that share capital, together with share premium, other reserves and undistributed profit, reflects company assets net of liabilities, and thus ownership (not creditor claims).

It follows that certificates that simply give rise to an interest in distributions of profit, an income stream, sometimes called “jouissance” shares, are not shares in share capital. The French term is used because there is no (common law) English equivalent. And the translation of

“actions de jouissance” or in German “Genussscheine” is closer to “enjoyment certificates” than to “shares”.

The Manual refers to s.1041 CTA 2006:

- (1) For the purposes of section 1040 (companies authorised to register under this Act) “joint stock company” means a company—
- (a) having a permanent paid-up or nominal share capital of fixed amount divided into shares, also of fixed amount, or held and transferable as stock, or divided and held partly in one way and partly in the other, and
  - (b) formed on the principle of having for its members the holders of those shares or that stock, and no other persons.
- (2) Such a company when registered with limited liability under this Act is deemed a company limited by shares.

The Manual continues:

Members’ liability in the case of a limited company is limited to the nominal amount of the share capital they hold. Limited companies are much the most common, for commercial reasons, but companies may be formed without a share capital and members’ liability may be limited by guarantee. Companies limited by guarantee are generally formed by non-profit seeking members who nevertheless wish to operate via a corporate entity, and are commonly used for charities. Some companies limited by guarantee with a share capital still exist, but since 22 December 1980 (in Great Britain, but 1 July 1983 for Northern Ireland) may no longer be formed.

Unlimited companies are fairly rare but continue to be formed due to their limited reporting requirements. Their members may choose whether or not to have a share capital.

In 1999 the Special Commissioners considered the status of “founders’ deposits” with a company limited by guarantee in the case *South Shore Mutual Insurance Co Ltd v Blair* 1999 STC (SCD) 296. The Special Commissioners came to the conclusion that the deposits were not issued share capital; the company did not, in fact, have any authorised share capital and, as a consequence, could not have issued share capital. Companies Act 2006 abolished the requirement for a company to have an authorised share capital with effect from 1 October 2009, but the case contains a useful review of authorities on share capital.

**CTM00513 what is meant by “shares” [Jun 2019]**

[The Manual makes some general comments companies and company shares, and continues:] Lord Millett gives a useful summary of the “juridical nature of a share” in *IRC v Laird Group plc* [2003] UKHL 54 at [37]. Shares are often described as a bundle (or “fasciculus”) of rights and liabilities. See Lord Wright in *Lowry v Consolidated African Selection Trust Ltd* (1938-41) 23 TC 259 at 298.

For the purposes of CTA10/PART23 (definition of distribution in the Corporation Tax Acts) “share” includes stock and any other interest of a member in a company.

#### 86.41.4 *Issue/allotment of shares*

The IHT Manual continues:

##### **Issue and allotment of shares**

Possession of a share certificate is prima facie evidence of ownership of a share, CA06/S127. This does not, of itself, confirm ownership and certificates are not essential to demonstrate that share capital has been issued. However, in order to be a member of a company under the UK Companies Acts, a person must be entered in the company’s register of members, CA06/S112. From 30 June 2016 certain private companies can report changes of membership to Companies House to be reflected in a public register rather than keeping their own. The issue of share capital is only complete when the processes of application, allotment and issue are complete: *National Westminster Bank plc v IRC* [1994] STC 580. Shares are allotted when a person acquires the unconditional right to be included in the company’s register of members: CA06/S554. TCGA92/S288 (5) provides that, for chargeable gains purposes, shares are treated as issued if they are to be issued under the terms of an unconditional letter of allotment or similar instrument.

#### 86.41.5 *Dividend at fixed rate*

*The CT Manual provides:*

##### **CTM00514 how “ordinary” shares are distinguished** [Nov 2019]

The general meaning of ordinary share capital (see CTM00511) depends on identifying and excluding capital to which the holders have a right to a dividend at a fixed rate but have no other right to share in a dividend. (There are, though, some slightly different definitions of ordinary shares or shares for specific purposes, see for example

CTA10/S160 (group relief, CTM81010) and CTA09/S931U (distribution exemption, INTM653050)).

The concept of “ordinary capital” originated in the wartime Excess Profits Duty at F(2)A1915/SCH4/PART1/PARA6, for the purposes of applying the tax to a subsidiary as though it were a branch of the parent; the aim of that rule being to distinguish equity capital from loan capital for this purpose.

That distinction remains relevant today and is expressed in the current definition. The aim of the current tax legislation is to exclude instruments that are in legal terms shares but in effect represent perpetual debt, namely fixed rate preference shares. The definition appears fairly straightforward but has given rise to a number of issues, addressed in the following table.

Some of the issues are finely balanced, and the table is, except where authority is quoted, only a guide. If arrangements appear to reflect uncommercial elements designed to circumvent the purpose of the legislation in identifying ordinary share capital the principles will be applied accordingly.

<b>Description</b>	<b>Ordinary Share Capital</b>	<b>Comment</b>
Share with no dividend rights	Yes	CTA10/S1119 is silent on rights other than fixed rate of return
Fixed rate preference share with zero coupon	Yes	Right to nothing is not a right to something. See <i>McQuillan v HMRC</i> [2017] UKUT 344
Fixed rate preference share with small coupon	No-but see comment	Could be fact dependent, particularly where there are avoidance concerns
Fixed rate of 10% cumulative	No	Holder knows return is fixed even when profits not available
Fixed rate of 10% non-cumulative	Yes	Some years no dividend will be paid so is more like equity than debt
Preference share with right to “tiered” dividends, meaning they increase on a pattern over time	Yes	Rate is not fixed as can change depending on tier. There is more than one fixed rate, and in context this is not a case where the singular should include the plural

Right to greater of specified sum or dividend paid in respect of another class of shares	Yes	Rate is not fixed and similar analysis applies as for tiered dividends - there is right to a return at one of two fixed rates
Fixed rate preference share but with rights in liquidation	No - but this is finely balanced and may depend on facts of case	A distribution in liquidation is of surplus assets rather than of profits. But, depending on the circumstances, a purposive approach might point to a different conclusion
Preference share with 2 alternative fixed rates	Yes	No fixed rate but a rate that varies between two fixed levels. Similar analysis as for tiered dividends
Fixed rate preference share but with right to further dividend payment were certain events to occur (e.g. breach of banking covenants)	Yes	Right to further payment is another right to share in the profits. But conclusion might be different if circumstances very unlikely to materialise
Preference shares where coupon compounds over time or a preference share where a rate of interest is added if dividend is unpaid	Borderline – this is finely balanced and may depend on facts of case. See <i>Stephen Warshaw v HMRC</i> , an FTT case TC/2017/08674 which is of persuasive rather than precedent authority	If the rate is fixed and cumulative arguably the shares are not ordinary share capital as there is in the end nothing beyond a right to a return at a fixed rate, albeit that the coupon compounds. Where a further rate of interest is added if the dividend is unpaid, the issue is whether the additional interest is seen as a return on the original investment, which would support fixed rate. But if seen as a separate return on amounts outstanding there would be a right to two differing fixed rates, and the tiered dividends analysis would apply

Fixed rate of 10% cumulative but dividend only paid on regulator authorisation / fixed rate of 10% non-cumulative but dividend can only be paid if regulator authorises	Depends on whether cumulative or non-cumulative	Third party involvement does not affect underlying right to income. There is an underlying fixed rate where it is cumulative and the regulator can only prevent payment.
LIBOR plus a fixed percentage	Yes	Rate is not fixed because LIBOR varies – doesn't matter that it is a fixed point of reference

#### 86.41.6 *Permanent interest bearing shares*

HMRC say:

HMRC has also concluded that building society permanent interest bearing shares (PIBS), which are in reality subordinated debt instruments, also should not have been accepted as 'shares' in capital.

#### 86.41.7 *Swiss Participation Certificate*

HMRC say:

However, Swiss Participation Certificates (with par value, as distinct from Profit Sharing Certificates) will qualify as shares in company capital.

With immediate effect, the 'shares' which are not shares in company capital will no longer be accepted as meeting the ordinary shares requirement for Corporation Tax relief under Part 12, CTA 09, on employee share acquisitions.

#### 86.41.8 *Foreign companies*

The Manual continues:

**CTM00515: foreign registered companies** [Jun 2019]

The UK tax rules are based on UK company law. This means that companies formed under foreign law will usually require analysis of at least some of their features by comparison and analogy with the UK Companies Acts.

In *Ryall v The Du Bois Co Ltd* (1933) 18 TC431, Lord Hanworth MR said, “a share in a foreign company may be something different from and, indeed, is almost necessarily different from, a share as we know it in an incorporated company”, and Slessor LJ said, “we have to consider what would be analogous to stocks and shares in Germany in dealing with what is a company, and allowing for differences of law in that country”. Approach by analogy is applied generally in addressing foreign registered companies.

The key feature of issued share capital is that the issuing body has full legal personality separate and distinct from that of its members, able to carry on business and to own assets in its own right. This establishes proprietorial interest though the holding of issued share capital in the body in contrast to partnership interests. In UK partnership law partnership property is held and applied by the partners for the purposes of the partnership (PA1890/S20 (1)) and the partnership is the relation between the persons carrying on the business (PA1890/S1 (1)).

(In Scotland a firm is a legal person distinct from its members, PA1890/S4 (2), but S1 (1) and S20 (1) still apply. This is because, whether partnership property is held in the name of the firm, or in the name of partner or partners, the persons ultimately beneficially interested in it are the partners according to their partnership rights – per *The Scottish Land Court SLC/248/04*) following an examination of the authorities. Partnerships established under Continental civil law present similar challenges; their “legal personality” may mask what is under civil law known as *intuitu personae*, or originating in the persons).

Capital in this context means a contribution that provides the contributor with an equity interest in (i.e. part ownership of) the body, as reflected in the proportion and nature of shares held in the fixed capital. CA06/S5 (3), in considering the remaining class of companies limited by guarantee with a share capital (see CTM00512), observes that any provision that divides a company’s undertaking into shares or interests is a provision for share capital.

This means dividing the company itself, its “corpus”, as referred to in *Rae v Lazard Investment Co Ltd* (1961-64) 41 TC 1. An equity or ownership interest in a body is distinguished from a debt claim against it.

The Special Commissioners in the *South Shore Mutual Insurance* case (see CTM00512), identified characteristics of “incidents” of share capital, but these are pointers rather than absolute requirements. For

instance, shares may be non-voting. Important incidents, in relation to members' interests are:

- whether they are like shares in share capital (a portion of the capital of the corporate body) or like debt (money owed by the body corporate to the members),
- what proprietary rights characteristic of shares attach to them, both economic and voting, and what responsibilities,
- how they are legally evidenced in accordance with local law,
- whether they are denominated in a stated fixed value,
- whether the members' interests compose a fixed and certain amount measuring the company's capital which creditors may look to as security, and
- whether the members' interests are capable of transfer and if so whether such a transfer would amount to transferring of a portion of the capital of the company, with attendant proprietary rights and responsibilities (rather than a claim as creditor).

#### 86.41.9 *Certificates*

The CTM provides:

**CTM00516 foreign registered companies: particular issues** [Jan 2020]

##### **Certificates**

To take an example, a Limited Liability Company (LLC) organised under the law of a US state may issue transferrable interests analogous to shares in share capital but these will not necessarily be evidenced by a certificate of interest (see US Revised Uniform Limited Liability Company Act, Section 502(d)). If there are no certificates, this is not necessarily fatal to the conclusion that the members' interests are analogous to shares in ordinary share capital, provided (as would be expected to be the case) that the interests are clearly defined and recognisable as equity (ownership) interests in the entity.

#### 86.41.10 *No nominal capital*

The CTM provides:

**CTM00516 foreign registered companies: particular issues** [Jan 2020]

##### **No nominal capital**

Since the 1960s there has been an international move away from the “capital maintenance” approach still central to UK company law. Some US jurisdictions, the California Corporations Code for example, dispense with the concept of nominal capital and others, for example Delaware, allow the issue of shares with nil nominal value. A similar approach has been adopted in a number of other jurisdictions. Such shares may be referred to as “zero par” shares or simply “zeroes”.

An adaptable and pragmatic approach is adopted when dealing with overseas company law which does not straightforwardly align with that of the UK (although UK tax and company law are distinct, aspects of UK Corporation Tax law are unmistakably based on the company law capital maintenance principle, for example the distributions code at CTA10/PART23, see CTM00511).

Where there is no nominal capital requirement under overseas law, an amount on the facts subscribed as fixed capital analogous to share premium over nil nominal value shares will be treated as share capital by analogy with CTA10/S1025 (2) for the purposes of determining repayment of share capital.

#### 86.41.11 SCA: Share capital

The CTM provides:

**CTM00516 foreign registered companies: particular issues** [Jan 2020]

**Continental (civil law) “partnerships” with share capital**

Such an institution as a French société en commandite par actions may often be translated as a “limited partnership with a share capital” into English. The word “société” is in fact indeterminate and cannot be definitively translated as company or partnership for the purposes of UK tax law, but the share capital aspect reflects its nature as a société de capitaux (in civil law generally, Latin intuitu pecuniae – compare the reference to intuitu personae at CTM00515). This is consistent with the classification of a French SCA as opaque at INTM180030.

#### 86.41.12 Share capital: Delaware LLC

For the general nature of a Delaware LLC, see 86.34 (Limited liability company). This section considers whether an LLC has ordinary share capital.

CG Manual formerly provided:

**CG-APP11 Meaning of Ordinary Share Capital** [Nov 2018]

... Section 18-702c of the Delaware Limited Liability Act provides that ‘Unless otherwise provided in a limited liability company agreement, a member’s interest in a limited liability company may be evidenced by a certificate of limited liability company interest issued by the limited liability company.’

If a DLLC issues “shares” in this way and the other factors relating to the company suggest that it has share capital then we will accept that these “shares” may be regarded as “ordinary share capital” for the purpose of Section 832 ICTA 1988.

It should be noted that not all DLLCs issue share certificates but they may still have “ordinary share capital”. Regard must be had to the particular terms of the agreement by which the LLC has been created. In any case of doubt or difficulty regarding the status of the share certificates HMRC will advise in particular cases in line with the non-statutory business clearances. Please send in any applications to [address]

Other States within the United States of America have comparable legislation to Delaware. Where it can be shown that a particular State has legislation analogous to the Delaware legislation with which we are familiar, HMRC would expect to be able to provide advice in line with that for DLLCs.

In 2010 a tribunal found as a fact that the membership interest in a Delaware LLC was not similar to share capital but more similar to partnership capital of an English partnership. The membership interest would not have been ordinary share capital. But HMRC do not propose to take any notice of that:

HMRC ... proposes to continue its existing approach to determining whether a US LLC should be regarded as issuing share capital.<sup>351</sup>

351 HMRC Brief 15 (2015) “HMRC response to the Supreme Court decision in *Anson v HMRC*”

<https://www.gov.uk/government/publications/revenue-and-customs-brief-15-2015-hmrc-response-to-the-supreme-court-decision-in-george-anson-v-hmrc-2015-uksc-44/revenue-and-customs-brief-15-2015-hmrc-response-to-the-supreme-court-decision-in-george-anson-v-hmrc-2015-uksc-44>

See 86.34.2 (LLC: Opaque).

In practice this view will often favour the taxpayer, who will not complain.

### 86.41.13 *Share capital: GmbH*

CG Manual formerly provided:

**CG-APP11: Meaning of Ordinary Share Capital** [Nov 2018]

A Gesellschaft mit beschränkter Haftung (GmbH) in Germany, literally a ‘company with limited liability’, is an entity of a very similar kind to a UK private limited liability company. An Aktiengesellschaft (AG), sometimes called a “joint stock company” may be considered more akin to a UK public limited liability company (plc) as its stock may be listed. Under German law, the capital of a GmbH is not divided up into small units. However, a GmbH has a fixed amount of capital (Stammkapital) which corresponds to the maximum amount of share capital that the company may issue, similarly to a UK limited liability company’s “authorised share capital”. The amounts originally contributed (Stammeinlagen) by the members (Gesellschafter) will also be noted, just as in the UK the initial subscriber shares will be noted in the memorandum of a limited liability company.

Article 5 of the German GmbH law sets out a minimum amount of Stammkapital (authorised share capital) as €25,000, and the minimum amount of Stammeinlage (original contribution/subscription) of each Gesellschafter (member) at €100.<sup>352</sup>

Based upon GmbH cases HMRC has previously considered, the amounts of Stammeinlage subscribed by the members may normally be regarded as issued share capital for the purposes of the Taxes Acts.

**Note**

The above information has been set out in order to assist companies and their advisers understand HMRC’s present interpretation of section 832 ICTA 1988 in the context of non-UK entities. The above note reflects our approach as taken in the context of a number of particular cases. Due to the particular facts that will be relevant in each individual case it is not possible for HMRC to offer a general advisory service in respect of other kinds of body throughout the world.

---

352 Article 5 Gesetz betreffend die Gesellschaften mit beschränkter Haftung  
[https://www.gesetze-im-internet.de/gmbhg/\\_5.html](https://www.gesetze-im-internet.de/gmbhg/_5.html)

Fraser says:<sup>353</sup>

*Ryall v Du Bois*<sup>354</sup> encourages a generous construction of the word “shares”. The issue in that case was whether the interest of a member in a German GmbH, which appeared not to be divided into fractional units (in the way that share capital is) or to be registered in a register, was “stocks” or “shares” within the meaning of the then Rule 1 applicable to Case V for Schedule D. The decision may not be absolutely conclusive that the interest of a member in a GmbH (or other overseas entity the ownership interests in which do not have the attributes of shares in an English company) is issued share capital, in that there may still be some room for distinguishing between “issued share capital” for the purposes of group relief from tax and “shares” within the meaning of Rule 1. Rule 1 appears to have been principally intended to distinguish between investment income on the one hand and income from active overseas businesses, on the other. Nevertheless, a conclusion that a GmbH does not have “issued share capital” would appear to be perverse in the extreme. The author would argue that these concepts no longer serve any useful purpose but they can, if strictly construed, create unnecessary hindrances to cross-border investment, where, for instance, a relevant company is incorporated in a jurisdiction where UK concepts of “issue” of shares are not in practice applied.

#### 86.41.14 *Genußscheine/jouissance shares*

HMRC say:

##### **Definition of ordinary share capital for employee share schemes**

Certain tax advantaged share schemes have awarded interests in, or options over, particular types of instruments. As there is no direct English translation, these types of instruments are known as ‘jouissance shares’ (‘actions de jouissance’ in French and ‘Genußscheine’ in German) and HMRC has previously approved such schemes.

Instruments of this type are generally issued by companies in Switzerland, Germany, Austria and France.

After careful consideration HMRC has concluded that such instruments do not satisfy the ordinary share capital conditions as provided for in

---

353 “Respectez les animaux etrangers! The Inland Revenue lists on entity classification” [2001] BTR 158.

354 17 TC 431.

various parts of the employment related securities legislation in ITEPA 2003. While ‘Genußscheine’ and ‘actions de jouissance’ are frequently translated as shares, the better translation of ‘scheine’ and ‘actions’ is ‘certificates’. The concept of ordinary share capital is used elsewhere in the taxes acts and will be interpreted accordingly.

Share capital represents the ownership interest of members in the corpus or assets of a company reflected in its balance sheet after liabilities.

Although ‘Genußscheine’ and ‘actions de jouissance’ carry an interest in dividends and in a winding-up to unpaid dividends, they do not carry an interest in company capital. This means they cannot be shares in share capital.

HMRC will honour existing advantageous Income Tax treatment in relation to interests in or options over such certificates or ‘shares’ already granted, but from 6 April 2019 we will no longer accept these as satisfying the ordinary share capital condition and as such the requirements of the employment related securities legislation will also not be satisfied.

## 86.42 Capital contribution

### 86.42.1 *Company law background*

Capital contribution is a common method for Delaware companies to raise capital. The CG Manual explains the company law background:

#### **43500 General** [Jul 2019]

The company law provisions of some foreign jurisdictions, notably the USA, provide for the making of capital contributions to companies. A capital contribution is a contribution to the equity capital of a company, but is not made in exchange for shares issued to the contributor and it does not constitute a separate asset in its own right...

An overseas company receiving a capital contribution may treat it in a number of ways, depending on the law of the foreign jurisdiction concerned and the conditions attaching to the payment. These may give the company a choice whether to designate the contribution as ‘surplus’ or as ‘capital’. Amounts designated as ‘surplus’ may be available for distribution to shareholders, subject to solvency requirements. Amounts designated as ‘capital’ may only be repayable by way of a capital reduction. A company’s balance sheet will generally show capital contributions made to it as an item of shareholders’ funds separate from

paid up share capital. Capital contributions may be described, for example, as ‘additional paid in capital’.

Capital contributions are not recognised under UK company law and if a payment is not made as part of the terms of issue of shares, it is possible it is either a loan or a gift. If a UK taxpayer contends that a sum paid to an overseas company is a capital contribution rather than a loan or gift, evidence to support that contention should be sought.

For example if a UK company suggests a payment to an overseas affiliate is a capital contribution rather than a loan or gift there should be evidence of the appropriate treatment in the company accounts. If however there is a possibility that the money can be repaid, it is likely to be a debt within the loan relationships regime, see CTM51200. It is therefore necessary to examine all the circumstances surrounding the money transfer before coming to any conclusion as to what the nature of the payment is. If however agreement cannot be reached as to the nature of the payment and therefore the tax consequences (see CG43501 and CG43502 below), the decision lies with the Tribunals and the courts.

Occasionally a capital contribution may be made to a UK company. As capital contributions are not a concept formally recognised within UK company law, a contribution received by a UK company should be reported within distributable reserves either as a gift or possibly a donation. If however it can be repaid in any circumstances it should be considered as a loan falling within the loan relationships regime.

The International Manual also makes some comments:

**502050 Issues affecting equity function cases** [Jan 2018]

**... Capital contributions**

... A capital contribution is ... not a loan and creates no obligation to transfer economic benefit to the maker of the contribution.

In the UK there is no company law provision regarding capital contributions. If a UK company receives a capital contribution it will appear as such on the balance sheet within shareholders’ funds. If the company makes a capital contribution, it will normally be included in the accounts as an added cost of investment in a subsidiary.

If a UK company contends that a sum paid to an overseas affiliate is a capital contribution rather than a loan, HMRC can only accept the contention if there is clear evidence supporting it. For example, there should be a written agreement that a capital contribution has been made rather than a loan, and evidence of the appropriate treatment in the company accounts. If there is a possibility that the money can be repaid,

it is a 'money debt' under the loan relationships legislation. It is necessary to examine all the circumstances surrounding the money transfer before making a decision. From HMRC's point of view, the amount contributed should not be distributable.

In *Fenston v HMRC* the position was explained as follows:

... assuming that at all relevant times the assets of the Company exceeded its liabilities, ... as a result of the Contributions, the state of the Company's stock changed in the sense that the amount of funds distributable with respect to the Shares as a dividend or upon liquidation was increased by the amount of the Contributions.

Under Delaware law, the funds available for payment of dividends, if and when declared by a corporation's board of directors, are payable out of "surplus". "Surplus" is defined in relation to "capital". "Capital" with respect to no par stock, such as the Shares, is defined as that portion of the consideration received by a corporation for the issued shares of its capital stock that the directors determine to be capital, or if no such determination is made, the amount of consideration received. The excess, if any, at any given time, of the net assets of the corporation over the amount so determined to be capital shall be "surplus". "Net assets" means the amount by which total assets exceed total liabilities. Therefore, the "surplus" of a corporation is an amount equal to the total assets of the corporation, minus the total liabilities of the corporation, minus the capital of corporation, minus the total liabilities of the corporation, minus the capital of the corporation (as just described). Here, the Contributions increased the Company's net assets, and thus its surplus, thus increasing the amount of funds the Company could lawfully have distributed to the trustees (as stockholders) as a dividend.

With respect to entitlement to distributions on dissolution, when a corporation dissolves, its assets are held in trust for the benefit of creditors, and if creditors are paid in full, the stockholders. Accordingly, when a corporation dissolves it must first pay or provide for its creditors, both fixed and contingent, in full before any distribution can be made to stockholders. However, once creditors are paid or provided for, any residual assets are to be distributed to the corporation's stockholders. As described above, the Contributions increased the Company's total assets. If the Company had been dissolved immediately after such Contributions had been made (which the trustees, as the sole stockholders, could have done ... then the amounts the trustees (as stockholders) would have been entitled to receive as stockholders upon dissolution with respect to the

Shares would [have] been increased by the amount of the Contributions assuming, in each case, that amounts would remain for distribution to the stockholders following the payment in full of the Company's creditors. Therefore, the Contributions would have increased the amounts that could have been distributed with respect to the Shares either as a dividend or as a liquidating distribution.<sup>355</sup>

#### 86.42.2 *Capital contribution: CGT*

Section 38(1)(b) TCGA allows a deduction for:

- [I] the amount of any expenditure wholly and exclusively incurred
  - [a] on the asset by him or on his behalf
  - [b] for the purpose of enhancing the value of the asset,
  - [c] being expenditure reflected in the state or nature of the asset at the time of the disposal
- [II] and any expenditure wholly and exclusively incurred by him in establishing, preserving or defending his title to, or to a right over, the asset

The CG Manual provides:

#### **43501 Made under terms of share issue** [Jan 2020]

A shareholder may make a capital contribution to a company at the same time as the shareholder acquires shares in the company. If the capital contribution is made as part of the terms of issue of the shares, then the capital contribution should be accepted as consideration given wholly and exclusively for the acquisition of the shares within s.38(1)(a) TCGA. If a capital contribution is made as part of the terms of a share issue which is treated as a reorganisation for capital gains purposes, then the capital contribution should be accepted as consideration given for the new holding for the purposes of s.128(1) TCGA. The amount of the capital gains deduction will remain subject to the other general rules, such as s.17 TCGA and s.128(2) TCGA ...

So far so good. However the Manual continues:

#### **43502. Other contributions not allowable** [Jan 2020]

---

355 [2007] STC (SCD) 316; I omit the references to the Delaware General Corporation Law.

Where shares are disposed of in a company to which a capital contribution has been paid a claim may be made for a deduction in respect of that contribution in the capital gain computation. The claim will normally be for the contribution to be allowable as enhancement expenditure under s.38(1)(b) TCGA 1992.

Although a capital contribution will typically affect the value of the shares in the company to which the contribution is made, it does not represent either

[1] expenditure on the shares,<sup>356</sup> or

[2] expenditure reflected in the state or nature of the shares at the time of their disposal.

The Special Commissioners decision in the case of *The Trustees of the F. D. Fenston Will Trusts v HMRC* (SpC589/07) confirmed that a capital contribution which is not made as part of the terms for the issue of shares is not, in the absence of anything to indicate that the rights and privileges attaching to the shares have been enhanced, an allowable deduction within s.38 TCGA 1992 when shares in the company are disposed of. In particular, the capital contribution does not represent enhancement expenditure within s.38(1)(b) TCGA 1992.

In applying this decision it may be argued there are circumstances where the tax result will be distorted if the amount of tax payable takes account of value realised, directly or indirectly, by a shareholder from a capital contribution, but the capital contribution itself is not reflected in allowable expenditure for capital gains purposes. Below are some examples where such distortion may be alleged.<sup>357</sup>

[1] A capital contribution is returned by a company to its shareholders as a dividend or distribution and they are taxed on the distribution but the shareholder will have had no deduction for the contribution. Our view is that a dividend or distribution is paid out of the surplus of the company so therefore is not a direct return of the capital contribution paid by the shareholder (in which case it is probably a loan). The nature of the receipt is changed when a dividend or distribution is made in comparison with the time when the capital contribution was paid.

---

356 Author's footnote: Point [1] is wrong and directly contradicted by the decision in *Fenston* but it would be sufficient if HMRC are right on point [2].

357 Author's footnote: "Distortion" is a euphemism for unfairness, and "alleged" is tendentious since the unfairness of [2] and [3] is obvious.

- [2] A capital contribution is retained by the company at a time when there is a sale of shares in the company. The contribution may be reflected in an increased consideration for the disposal of the shares but a capital gains deduction will not be given.
- [3] There is similar scope for distortions where a capital contribution is followed by a share exchange, reconstruction or amalgamation treated as a share reorganisation for capital gains purposes, see CG52500+. This is then followed by a disposal of the new holding for an amount which reflects the capital contribution made to the company in which the original shares were held, and the capital contribution is not allowable expenditure on the original shares.

In these last two cases, unless the capital contribution resulted in a change in the rights and privileges attaching to the shares, and that change is reflected in the nature of the shares at the time of their disposal, it is not an allowable deduction within s.38(1)(b) TCGA 1992 when those shares in the company, or replacement shares in that or a different company acquired by virtue of a share reorganisation are disposed of.

In *Fenston*, the Special Commissioners held that the capital contribution was expenditure “on the asset for the purpose of enhancing the value of the asset.” So condition [a] was met. Unfortunately they held that the expenditure was not reflected in the state or nature of the asset at the time of the disposal so condition [c] was not met

23 ... [1] Further, ‘state and nature’ for these purposes must be something other than merely the value of the asset—otherwise this phrase would add nothing to the immediately preceding words.

[2] In this case the capital contributions did not result in any increase in the number of shares in issue, or result in any change in the rights or restrictions attaching to the shares. The only effect of the capital contributions was to increase the surplus of the company—which would increase the amount available for distribution to shareholders, and therefore presumably the value of the shares. We do not consider this sufficient for the expenditure on the capital contributions to be reflected in the state and nature of the shares, either at the time the expenditure was incurred or at any time subsequently.

Point [1] is wrong<sup>358</sup> and point [2] is not convincing. However, the case was approved by the Court of Appeal in *Blackwell v HMRC*,<sup>359</sup> so the law is for most practical purposes settled. But it ought to be changed by extending allowable deductions to include capital contributions, and expenditure of the kind disallowed in *Blackwell*. The current law is an example of egregious over-taxation.<sup>360</sup>

The CG Manual discusses the possibility of relief under s.38(1)(b)[II] TCGA which allows a deduction for expenditure “establishing, preserving or defending his title to, or to a right over, the asset:”

There may also be cases where companies call on their shareholders to provide further capital to meet a specified purpose, in circumstances where a shareholder who fails to provide the additional funds may lose the entitlement to the shares held. In this situation, depending on the particular facts, the shareholder may be able to establish that the additional payment represents expenditure on preserving or defending the title to the shares within the terms of Section 38(1)(b) TCGA 1992.

### 86.42.3 *Planning*

Companies should in general be funded by share subscription or loan, and not by capital contribution, because the expense of the capital contribution will in general be disallowed for CGT purposes.

The HMRC view that “If there is a possibility that the money can be repaid, it is likely to be a debt” mitigates some of the unfairness of the treatment of capital contributions by reducing the number of occasions where a transaction is categorised as a capital contribution.

### 86.43 UK check-the-box rules?

---

358 The words “reflected in the state or nature of the asset” are needed to cover this situation: suppose T spends £x on a kitchen in T’s home. 15 years later that is replaced by a new kitchen. The £x was “incurred on the asset for the purpose of enhancing the value of the asset” but was not “reflected in the state or nature of the asset” at the time of disposal. In this case it is sensible to disallow the capital expenditure in a CGT computation.

359 [2017] STC 1159 at [26].

360 See the discussion of egregious over-taxation at 2.5.3 (Pro-avoidance rationale).

Heather Field explains:<sup>361</sup>

In 1995, the Service acknowledged that the flexibility afforded by applicable state laws undermined the theory of the corporate resemblance test and explained:

[M]any states recently have revised their statutes to provide that partnerships and other unincorporated organizations may possess characteristics that have traditionally been associated with corporations, thereby narrowing considerably the traditional distinctions between corporations and partnerships....

One consequence of the narrowing of the differences under local law between corporations and partnerships is that taxpayers can achieve partnership tax classification for a non-publicly traded organization that, in all meaningful respects, is virtually indistinguishable from a corporation. The Service and Treasury recognize that there is considerable flexibility under the current rules to effectively change the classification of an organization at will ....<sup>362</sup>

Accordingly, the preamble to the proposed CTB regulations explained that the “Treasury and the IRS believe[d] that it [was] appropriate to replace the increasingly formalistic rules under the [Kintner] regulations with a much simpler approach that generally is elective.”<sup>363</sup>

Moreover, the Service acknowledged that, under the Kintner regulations, “taxpayers and the IRS must expend considerable resources on classification issues.”<sup>364</sup>... Presumably, taxpayers also incurred significant legal fees in obtaining advice on these classification issues. Further, the Service noted that small businesses could be particularly hard hit by the considerable costs of obtaining advice regarding how to structure business entities to obtain the most favourable combination of state law and tax treatment.<sup>365</sup> These additional cost, resource allocation,

362 Footnote original: I.R.S. Notice 95-14, 1995-14 I.R.B. 7.

363 Footnote original: Simplification of Entity Classification Rules, 61 Fed. Reg. 21,989, 21,990 (proposed May 13, 1996) (to be codified at 26 C.F.R. pt. 301).

364 Footnote original: *Id.*

365 Footnote original: *Id.*; see also Garcia, “Treasury Officials Address Check-the-Box Entities”, 67 TAX NOTES 1009 (1995) (A Treasury official explained: “It’s a resource allocation question .... Too many resources have been wasted both by the IRS and the private sector in resolving classification issues, even though in the end

and distributive considerations contributed to the Service's decision to move to a simplified elective entity classification regime, where taxpayers could "elect to treat certain domestic unincorporated business organizations as partnerships or as associations for federal tax purposes,"<sup>366</sup> while still availing themselves of the local laws' flexibility for structuring unincorporated businesses.<sup>367</sup>

Staff of the Joint Committee on Taxation, "Choice of Business Entity" provides:<sup>368</sup>

From the 1950s to 1996, the determination of whether a business entity was a C corporation [non-transparent] or a partnership was governed by case law and by 1960 regulations<sup>369</sup> that set forth factors considered indicative of corporate status. These corporate characteristics are (1) continuity of life, (2) centralization of management, (3) limited liability for owners of the entity, and (4) free transferability of interests. An unincorporated entity was classified as a partnership if it lacked any two or more of the four corporate characteristics.

Entity classification issues are not especially relevant to S corporations, passthrough entities which came into being in 1958 Federal tax legislation. S corporation status is open to a domestic corporation, requires an affirmative election, and is subject to specific requirements as to the number and nature of shareholders, class of stock, and other

---

the taxpayer gets the desired status .... Classification becomes a very intricate game that if you have counsel, you get out of the maze and you're home free.") (internal quotations omitted).

366 Footnote original: I.R.S. Notice 95-14, 1995-14 I.R.B. 7

367 Footnote original: Simplification of Entity Classification Rules, 61 Fed. Reg. at 21,990. This goal of increased flexibility in organizational choice actually dates back to the adoption of subchapter S, enacted to enable "certain corporations to opt out of the double tax system so as to maximize organizational choice for small business owners." Steven A. Bank, *The Story of Double Taxation: A Clash over the Control of Corporate Earnings*, in *Bus. Tax Stories* 153, 178 (Stephen A. Bank & Kirk J. Stark, eds., 2005) (citing S. Rep. No. 85-1983, at 87 (1958)).

368 (2015) <https://www.jct.gov/publications.html?func=startdown&id=4765>

369 Footnote original: Former Treas. Reg. sec. 301.7701-2. These were known as the Kintner regulations because they were based on the analysis in *U.S. v Kintner*, 216 F.2d 418 (9th Cir. 1954). See also *Larson v Commissioner*, 66 TC 159 (1976), acq. 1979-2 C.B. 1.

characteristics. These features make identification of an entity as an S corporation relatively unambiguous.

In late 1996, the IRS adopted new entity classification regulations known as the check-the-box regulations.<sup>370</sup> These regulations allow tax classification as either a partnership or a corporation to be explicitly elective subject to minimal restrictions for any domestic nonpublicly traded unincorporated entity with two or more members. The check-the-box regulations also provide that a single-member unincorporated entity may be disregarded for Federal tax purposes, that is, treated as not separate from its owner.

The Institute of Directors argue for a similar regime in the UK:

Trading companies should be allowed to opt out of corporation tax by electing for a ‘tax transparent’ treatment on a similar basis to the successful “S-Corporations” regime in the USA.<sup>371</sup>

This would be beneficial; though the development of the idea to a consultation stage would require some investment in time and resources. It may be objected that this proposal would increase the number of hybrid entities which can be used for avoidance; but the answer to that is a regime which deals with the problems of hybrid entities.

Ideally the issue would be dealt with at an EU or OECD level, but that is not likely to happen.

#### 86.44 Change of entity type

It is possible for an entity to change its type, eg a Foundation may become an Anstalt; a charitable company may become a CIO; an AG may become a GmbH. If the applicable law regards the new entity as the same as the previous entity, UK law will follow that analysis.<sup>372</sup>

The CT Manual considers conversion between a company and a mutual benefit society, which illustrates the point:

---

370 Treas. reg. secs. 301.7701-1 through 301.7701-3.

371 Institute of Directors, “GE2015: The IoD’s Key Priorities for Tax Reforms” (2015) <http://www.iod.com/~media/Documents/PDFs/Influencing/Tax%20Reforms%20Report.pdf>

372 See Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), section 2 (Status).

**CTM40550 conversion to a Companies Act company and vice versa**  
[Feb 2020]

Where a registered society converts to a Companies Act company under CCBS14/S112, or a Companies Act company converts to a registered society under CCBS/S115, this does not cause one entity to cease and another to come into being. They are treated as the same legal entity both before and after the conversion. No change of UTR should be necessary.

... such conversions do not generally give rise to any deemed or actual disposal of chargeable assets or distributions and there is no cessation and recommencement of the business...

Where a registered society is a principal member of a group, a conversion will not stop it being the principal member of that group. Furthermore, where the registered society had acquired an asset in an intra-group transaction, the conversion will not lead to an occasion of charge for CG purposes.

**86.44.1 Redomiciliation**

The term “redomiciliation” is used to describe two distinct types of arrangement.

Some jurisdictions allow a company to change its place of registration:

- (1) The company is registered in a new jurisdiction, typically under legislation which recognises and regulates the procedure.<sup>373</sup>
- (2) The company is struck off the register in its original jurisdiction of incorporation.
- (3) The company is (or is intended to be) regarded a single continuing person.

The process brings about a change in company domicile/place of registration. How that is recognised in the original jurisdiction depends on the company law of that jurisdiction, and how it is recognised in third countries depends on the applicable conflict of law rules. But in principle the company could be the same company despite the changes. Land Registry practice guide 78 provides:

**3.5 Change of domicile**

---

373 See for instance [Isle of Man] Companies (Transfer of Domicile) Act 1998.

Where an overseas company has changed its territory of incorporation we will require the following forms of evidence to be lodged:

- a letter from a qualified lawyer practising in territory A (the original place of incorporation) that makes it clear whether the company will either:
  - cease to be incorporated in that territory, or
  - continue to be incorporated in that territory as well as in territory B

The letter must also state that the law of territory A recognises the company incorporated in territory B as the same legal person as the company that is or was formerly incorporated in territory A, and:

- a letter from a qualified lawyer practising in territory B (the new place of incorporation) that makes it clear that:
  - the company has been incorporated in territory B (not just registered as a foreign company with a branch or place of business there), and:
  - the law of territory B regards the company as the same legal person as the company that is or was formerly incorporated in territory A, rather than as a new company, and:
  - either a duly completed certificate in Form 7 by a qualified lawyer practising in territory B or a certified copy of the charter, statute, rules, memorandum and articles of association or other document(s) reconstituting the company in territory B....

Unless the laws of both territories treat the company registered in territory B as the same legal person as the company registered, or formerly registered, in territory A, the company in territory B must be regarded as a new and different legal person, in which case it cannot be entered in the register unless the estate or charge is transferred to it by the company incorporated in territory A, or its liquidator, in the usual way.<sup>374</sup>

The INTM has an extract from the ITH:

**ITH356 Company residence: incorporation rule**

... Under company law relating to the UK a company cannot move its place of incorporation or registered office out of the country in which it

---

374 <https://www.gov.uk/government/publications/overseas-companies-and-limited-liability-partnerships-pg78/practice-guide-78-overseas-companies-and-limited-liability-partnerships> (Apr 2019) para 3.5.

is domiciled whilst at the same time retaining its identity, except by Private Act of Parliament. Some countries - Switzerland and Spain are examples - have procedures whereby a foreign incorporated company can reincorporate in those countries and retain its identity although Switzerland may now require the procedure to be recognised by the company's country of origin. In English law an English company which uses those procedures and is struck off the English register ceases to exist. The company, now foreign incorporated, is considered to be a different company.

This assumes that UK company law does not regard the foreign company as having the same identity

The term redomiciliation is also used to describe a more traditional type of reorganisation, under which:

- (1) Existing shares of a company ("Oldco") are cancelled.
- (2) Oldco issues shares to a new company ("Newco") in a new jurisdiction.
- (3) Newco issues shares to the former shareholders of Oldco.

In this procedure neither company actually changes its place of registration/domicile: instead shareholders effectively swap shares in a company for shares in another company incorporated in another jurisdiction. Strictly speaking, the term redomiciliation is used rather loosely here; but the usage has become standard<sup>375</sup> and it is pedantic to object.

## 86.45 Proof of foreign law

### 86.45.1 *Foreign law a question of fact*

Dicey says:<sup>376</sup>

In any case to which foreign law applies, that law must be pleaded and proved as a fact to the satisfaction of the judge by expert evidence or sometimes by certain other means.

---

375 For an example, see *Randall & Quilter Investment Holdings* [2013] EWHC 4357 (Comm) at [2].

376 Dicey, Morris & Collins, *The Conflict of Laws* (15th edn) para 9R-001(1); cited *Hartogs v Sequent (Schweiz) AG* [2019] EWHC 1915 (Ch).

A court may direct, in an appropriate case, that foreign law should be ascertained by Counsel's submissions, rather than by expert evidence.

#### 86.45.2 *Assumption that UK law applies*

Dicey says:<sup>377</sup>

In the absence of satisfactory evidence of foreign law, the court will apply English law to such a case.

That may of course suit the taxpayer. But a taxpayer who wrongly proceeds on the basis that foreign law is the same as English law would be subject to penalties if they know, or if a reasonably careful taxpayer would know, that the foreign law is different; and in legal proceedings, misleading the Tribunal by failure to bring relevant facts to its attention may constitute misconduct.

---

<sup>377</sup> *Dicey* para 9R-001(2); see above fn.

## CHAPTER EIGHTY SEVEN

# HYBRID ENTITIES

| 87.16.2 | Chap 7 condition B: hybrid<br>payee         |         |   |

### 87.1 Hybrid entities: Introduction

I use the following terminology.

A “**hybrid entity**” is an entity which is:

- (1) transparent<sup>1</sup> in one State, in the sense that the entity’s income is regarded as income of its members<sup>2</sup> and
- (2) opaque in another State<sup>3</sup>

If an entity is transparent in (say) the US, I call the entity “**US-transparent**” and US is the “**transparent State**”.

A “**non-hybrid**” entity is one which is not hybrid.

Strictly, one should not use the term hybrid/non-hybrid in the abstract. An entity can only be hybrid in relation to two particular States. But where the context is clear it is permissible simply to refer to an entity as

---

1 See 86.2.1 (Transparent/opaque terminology).

2 Terminology is difficult here, because “entity” covers such a wide range. The word “member” is apt if the entity is a partnership or corporate or similar entity. If the entity is a trust, the word “member” is not apt to describe a beneficiary entitled to income, or a settlor deemed to receive income of a settlor-interested trust. TIOPA uses the word “investor” and US regulations use the term “interest holder”. There is no one word to fit all circumstances, and no need to invent one.

3 For a more elaborate statutory definition, see 87.15 (Hybrid entity).

hybrid (or not).

Use of hybrid entities to produce double non-taxation has been called tax arbitrage; this unhelpful term was used as a heading in F(no.2)A 2005. But the current legislation in Part 6A TIOPA has adopted the better, if longer, heading “Hybrid and Other Mismatches”.

Hybrids may also give rise to double taxation; but HMRC do not regard that as objectionable.<sup>4</sup>

In *Columbus Container Services* the advocate-general observed:

International tax studies on the problem of the transparency of partnerships have highlighted the incredible complexity of this branch of law...<sup>5</sup>

But the topic is now much more complex, as a result of OECD model hybrid entity rules and ATAD/Part 6A TIOPA.

## 87.2 Background and guidance

For background to this topic, see:

### *DTA and ATAD/TIOPA issues*

OECD, “Neutralising the Effects of Hybrid Mismatch Arrangements” (“**BEPS Action 2 Report**”)<sup>6</sup>

6 Final Report (2015)

<http://www.oecd.org/ctp/neutralising-the-effects-of-hybrid-mismatch-arrangement-s-action-2-2015-final-report-9789264241138-en.htm>

7 [2017] BTR 295 [https://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=3005860](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3005860)

Brabazon, “BEPS Action 2: Trusts as Hybrid Entities” [2018] BTR 211

## 87.3 Hybrid categories

### 87.3.1 *Examples of hybrid entities*

Straightforward examples of (potentially) hybrid entities include:

Entity	UK law	Foreign law	See para
UK LLP	UK-transparent	Likely foreign-law opaque	82.20; 82.21
US LLC	UK-opaque	US-transparent <sup>8</sup>	86.34; 87.7.1
Unit trust/FCP	Sometimes opaque	Might be anything	66.4

### 87.3.2 *Hybrid: Anti-avoidance attribution rules*

UK anti-avoidance provisions may turn an opaque entity (typically a discretionary trust or a company) into one which may be regarded as UK-law transparent, or effectively transparent. Clearer examples are if:

- (1) trust income is treated as arising to the settlor under s.624
- (2) company gains are treated as accruing to a participator under s.3

Further examples may be: if

- (3) an entity’s income is treated as accruing to a transferor under s.720
- (4) a company profits are treated as accruing to a parent under CFC rules (outside the scope of this work)

To regard entities within s.720/CFC as transparent requires one to overlook that s.720 and CFC income has been categorised as a different source of income, distinct from the income or profits to which it relates.<sup>9</sup> But it is suggested that the hybrid-entity rule should not be construed so technically.

Since a foreign state is most likely<sup>10</sup> to view the entity as opaque, the UK anti-avoidance provisions create what may be regarded as a hybrid.

The same may apply the other way round for a foreign State if that State has comparable rules, and assuming the UK rules do not apply. An example is a US grantor trust, which is US-transparent<sup>11</sup> but may be UK-

<sup>8</sup> Assuming that the LLC elects to be treated as a partnership for US tax purposes.

<sup>9</sup> See 103.22 (Characterisation).

<sup>10</sup> If both countries apply similar anti-avoidance rules the entity may be regarded as a transparent non-hybrid.

<sup>11</sup> See 87.7.1 (US-transparent entities).

opaque.

A comparable situation may arise when two States both agree that an entity is transparent, but take different views as to who is entitled to the income. An example is a settlor-interested IIP trust within s.624: in the UK trust income is treated as arising to the settlor, but in another State it may be regarded as arising to the life tenant (who may not be the settlor). For lack of a better term, I refer to that as a “**quasi-hybrid**”.

Does these types of hybrid count as a hybrid within the scope of the DTA hybrid-entity rules? Under the USA/UK DTA the answer is, yes.<sup>12</sup> In other cases, the position has been doubted, but the object and purpose of the rule suggests that the answer ought to be the same.

### 87.3.3 *Classic & Reverse hybrids*

In the case of a source /members States DTA (which one may call the paradigm case) there are four permutations:

<b>Entity category</b>	<b>Source State</b>	<b>Members State</b>	<b>Model art 1(2)</b>
<i>Non-hybrid</i>			
Transparent	Transparent	Transparent	n/r
Opaque	Opaque	Opaque	n/r
<i>Hybrid</i>			
Classic <sup>13</sup>	Opaque	Transparent	Applies DT relief
Reverse	Transparent	Opaque	Denies DT relief

We are concerned with *Classic* and *Reverse* hybrids. Classic/Reverse are (if one may use the word) rather opaque terms; so I add (*member State transparent/opaque*) and use initial capitals. Strictly, one should not use the terms Classic/Reverse hybrid in the abstract. An entity can only be a Classic/Reverse hybrid in relation to a particular source State and a particular members State. But where the context is clear it is permissible simply to refer to an entity as a Classic/Reverse hybrid.

In structure diagrams in this chapter:

- a triangle represents a transparent non-hybrid (typically a partnership)
- a rectangle represents an opaque non-hybrid (typically a company)
- a combination of the two represents a hybrid entity

<sup>12</sup> See 87.7.8 (s.624/720 income; s.3/86 gain).

<sup>13</sup> Classic hybrid is my term; others refer to this as just a hybrid.

In the case of a hybrid, I note to the right of the diagram whether it is a Classic or a Reverse hybrid.

87.3.4 *Bilateral/triangular situations*

I have not found bilateral/triangular terminology to be helpful when grappling with the issues of hybrids. But I set it out because other writers use this terminology.

In a “**triangular**”<sup>14</sup> situation three States are involved:

<b>My term</b>	<b>Meaning</b>	<b>OECD Partnerships Report Term</b>
Source State	Where income arises	State S
Entity State	Where entity is established <sup>15</sup>	State P (for Partnership)
Members State	Where members are resident <sup>16</sup>	State R

In a “**bilateral**” situation, only two States are involved. This obviously happens if two of the states are the same, ie:

<b>Two states the same</b>	<b>Third state different</b>
Members State & entity State	source State
Source State & entity State	members State
Source State & members State	entity State

But even if the 3 States are different, we may simply be concerned with one treaty, made between two of the States, and for the purposes of that treaty the position under the law of the third State does not matter. We may be concerned with:

14 The word “triangular” is conventional here, though “trilateral” would be more apt.  
 15 It is assumed that the entity is resident where established. BEPS Action 2 Report uses the term “establishment jurisdiction”.  
 Further issues arise if different States apply different tests as to where a entity is established or resident (is it management and control, governing law, etc). But that is not pursued here.  
 16 If members are resident in different States, each State needs to be considered separately.

<b>Treaty</b>	<b>Topic: Taxation of</b>
Source/members States DTA	Income of members & of entity
Source/entity States DTA	Income of entity
Members/entity States DTA	Distribution by entity

In a triangular situation, the entity may be transparent or opaque, under the laws of (1) the members State (2) the entity State and (3) the source State. So there are eight permutations:

Case no.	Source-State law	Entity-State law	Member-State law
1	Transparent	Transparent	Transparent
2	Transparent	Transparent	Opaque
3	Transparent	Opaque	Transparent
4	Transparent	Opaque	Opaque
5	Opaque	Transparent	Transparent
6	Opaque	Transparent	Opaque
7	Opaque	Opaque	Transparent
8	Opaque	Opaque	Opaque

Cases 1 and 8 should raise no difficulties. We are concerned with 6 triangular cases, cases 2 - 7.

Triangular arrangements may concern 2 or even 3 DTAs:

- The source/members States DTA
- The source/entity States DTA
- The entity/members States DTA

It seems at first that this generates up to 18 permutations, ie it is necessary to consider the application of (up to) 3 DTAs to each of the 6 cases (no's 2-7). But it is not that complicated, because if we are looking at a treaty between any two States:

- It will not matter what is the law of the third State
- In some of the permutations, the two treaty States will agree that the entity is transparent, or may both agree that the entity is opaque, so in relation to those States, the entity is non-hybrid.

A triangular situation is just a combination of two bilateral situations. Thus:

<b>Case no.</b>	<b>Source-State law</b>	<b>Entity-State law</b>	<b>Member-State law</b>	<i>DTA status</i> <sup>17</sup>
-----------------	-------------------------	-------------------------	-------------------------	---------------------------------

---

<sup>17</sup> That is, the status of the entity in relation to the two treaty States concerned.

2	Transparent	Transparent	Opaque	
	2a: application of source/members State DTA			<i>Reverse hybrid</i>
	2b: application of source/entity State DTA			<i>Non-hybrid</i>
3	Transparent	Opaque	Transparent	
	4a: application of source/members State DTA			<i>Non-hybrid</i>
	3b: application of source/entity State DTA			<i>Reverse hybrid</i>
4	Transparent	Opaque	Opaque	
	4a: application of source/members State DTA			<i>Reverse hybrid</i>
	4b: application of source/entity State DTA			<i>Reverse hybrid</i>
5	Opaque	Transparent	Transparent	
	5a: application of source/members State DTA			<i>Classic hybrid</i>
	5b: application of source/entity State DTA			<i>Classic hybrid</i>
6	Opaque	Transparent	Opaque	
	6a: application of source/members State DTA			<i>Non-hybrid</i>
	6b: application of source/entity State DTA			<i>Classic hybrid</i>
7	Opaque	Opaque	Transparent	
	7a: application of source/members State DTA			<i>Classic hybrid</i>
	7b: application of source/entity State DTA			<i>Non-hybrid</i>

## 87.4 DTA hybrid-entity rules

### 87.4.1 Terminology

There are (at least) 3 DTA hybrid-entity rules. I coin the following terminology:

<b>Term</b>	<b>Rule found in:</b>
<i>OECD hybrid-entity rule(s):</i>	
OECD Model hybrid-entity rule	art 1(2) OECD Model
BEPS MLI <sup>18</sup> hybrid-entity rule	art 3(1) BEPS MLI
US hybrid-entity rule	art 1(8) USA/UK DTA; art 1(6) US Model

Actual treaties vary in their wording, so it is necessary to check the treaty in each case.

### 87.4.2 OECD hybrid-entity rules

Art 1(2) OECD Model and art 3(1) BEPS MLI are effectively identical (with changes only to conform to MLI's terminology):

---

18 See 103.14 (BEPS MLI).

**Art 1(2) OECD Model**

[a] For the purposes of this Convention, income derived<sup>19</sup> by or through an entity or arrangement<sup>20</sup> that is treated as wholly or partly fiscally transparent under the tax law of either Contracting State

shall be considered to be income of a resident of a Contracting State

[b] but only to the extent that the income is treated, for purposes of taxation by that State, as the income of a resident of that State.

**Art 3(1) BEPS MLI**

[a] For the purposes of a Covered Tax Agreement, income derived by or through an entity or arrangement that is treated as wholly or partly fiscally transparent under the tax law of either Contracting Jurisdiction

shall be considered to be income of a resident of a Contracting Jurisdiction

[b] but only to the extent that the income is treated, for purposes of taxation by that Contracting Jurisdiction, as the income of a resident of that Contracting Jurisdiction.

It is essential to keep in mind which State is which; art 1(2) is easier to follow if it is expanded to read:

For the purposes of this Convention, income derived by or through an entity or arrangement that is treated as wholly or partly fiscally transparent under the tax law of either Contracting State

[a] shall be considered to be income of a resident of [the UK] but only to the extent that the income is treated, for purposes of taxation by [the UK], as the income of a resident of [the UK] [and]

[b] shall be considered to be income of a resident of [the foreign State] but only to the extent that the income is treated, for purposes of taxation by [the foreign State], as the income of a resident of [the

---

19 In British legal English, one would more idiomatically refer to:

(1) Income arising to/received by an opaque entity

(2) Income arising to/received by a member through a transparent entity

But the meaning is the same. See 14.10.1 (“Deriving” income).

20 Is it possible to envisage an arrangement which is not an entity? The word “entity” is used widely, to include arrangements without legal personality, such as English partnerships and trusts, (ie not just legal persons). So the words “or arrangement” seem otiose, at least for the UK. But there may be jurisdictions where the point might otherwise have been unclear, and the OECD Model is intended to be used everywhere.

foreign State].

#### 87.4.3 US hybrid-entity rule

The version relevant to this work is that in the USA/UK DTA. Article 1(8) provides:

An item of income, profit or gain derived through a person that is fiscally transparent under the laws of either Contracting State shall be considered to be derived by a resident of a Contracting State to the extent that the item is treated for the purposes of the taxation law of such Contracting State as the income, profit or gain of a resident.

It is essential to keep in mind which State is which; art 1(8) is easier to follow if it is expanded to read:

An item of income/gain derived through a person that is fiscally transparent under the laws of either Contracting State shall be considered

- [i] to be derived by [ie, arising to] a resident of [the UK] to the extent that the item is treated for the purposes of the taxation law of [the UK] as the income/gain of a resident of [the UK] [and]
- [ii] to be derived by [ie, arising to] a resident of [the US] to the extent that the item is treated for the purposes of the taxation law of [the US] as the income/gain of a resident of [the US].

This rule is in art 1(6) US Model Income Tax Convention, from 1996, and is standard in US treaties,<sup>21</sup> though the current (2016) US Model made minor changes to the wording.

#### 87.4.4 OECD/US rules compared

The OECD wording is derived from the US DTA hybrid-entity rule, and the differences do not seem to be significant:

[a] For the purposes of this Convention, an item of income, profit or gain income derived by or through a person an entity or arrangement that is treated as wholly or partly fiscally transparent under the laws tax law of either Contracting State shall be considered to be derived by income of a resident of a Contracting State

[b] but only to the extent that the ~~item~~ income is treated, for the

---

<sup>21</sup> See Wheeler, *The Missing Keystone of Income Tax Treaties* (2012) para 2.4.5 (Concluded treaties).

purposes of ~~the taxation law of such Contracting State~~ taxation by that State, as the income, profit or gain of a resident of that State.<sup>22</sup>

#### 87.4.5 *Use of OECD Partnerships Report*

OECD Partnerships Report analysed partnership hybrid entities<sup>23</sup> under the OECD Model in its pre-2007 form (ie lacking art 1(2), the OECD hybrid-entity rule). This is important for older treaties if they lack a hybrid-entity rule (which may be the case if the foreign State has opted out of the MLR hybrid-entity rule). The Report also continues to be relevant to DTAs in post-2007 form. OECD Model Commentary provides:

2. [OECD Model art 1(2)] addresses the situation of the income of entities or arrangements that one or both Contracting States treat as wholly or partly fiscally transparent for tax purposes. The provisions of the paragraph ensure that income of such entities or arrangements is treated, for the purposes of the Convention, in accordance with the principles reflected in [the OECD Partnerships Report]. That report therefore provides guidance and examples on how the provision should be interpreted and applied in various situations.

The main conclusions of the OECD Partnerships Report were later set out in the OECD Commentary, so may not be necessary to look back to the text of the Report itself.

### 87.5 MLI hybrid-entity rule: Application

This section considers how the MLI hybrid-entity rule is slotted into pre-2017 DTAs.

#### 87.5.1 *Pre-2017 hybrid rules overridden*

Article 3(4) BEPS MLI provides:

[Art 3(1), MLI hybrid rule] (as it may be modified by paragraph 3<sup>24</sup>)

22 Where they differ, OECD wording is underlined and US wording in ~~strikeout~~.

23 The OECD Commentary provides: “3. The [OECD Partnerships Report], however, dealt exclusively with partnerships and whilst the Committee recognised that many of the principles included in the report could also apply with respect to other non-corporate entities, it expressed the intention to examine the application of the Model Tax Convention to these other entities at a later stage...”

24 See 78.5.4 (BEPS MLI Savings Clause).

shall apply in place of or in the absence of provisions of a Covered Tax Agreement to the extent that they address whether income derived by or through entities or arrangements that are treated as fiscally transparent under the tax law of either Contracting Jurisdiction

[a] (whether through a general rule

[b] or by identifying in detail the treatment of specific fact patterns and types of entities or arrangements)

shall be treated as income of a resident of a Contracting Jurisdiction.

In short, the BEPS MLI hybrid rule has priority over a treaty hybrid rule. MLI article 3 refers several times to “a provision described in para (4)”, ie in art 3(4). I gloss that as a “**pre-2017 hybrid-entity rule**”.

### 87.5.2 Art 3(1) MLI opt-outs

Article 3(5) BEPS MLI provides a variety of options to opt-out of the art 3(1) BEPS MLI hybrid rule:

A Party may reserve the right:

- a) for the entirety of this Article not to apply to its Covered Tax Agreements;
- b) for paragraph 1 [MLI hybrid-entity rule]<sup>25</sup> not to apply to its Covered Tax Agreements that already contain a provision described in [art 3(4), pre-2017 hybrid-entity rule];
- c) for paragraph 1 not to apply to its Covered Tax Agreements that already contain a provision described in paragraph 4 which denies treaty benefits in the case of income derived by or through an entity or arrangement established in a third jurisdiction;
- d) for paragraph 1 not to apply to its Covered Tax Agreements that already contain a provision described in paragraph 4 which identifies in detail the treatment of specific fact patterns and types of entities or arrangements;
- e) for paragraph 1 not to apply to its Covered Tax Agreements that
  - [i] already contain a provision described in paragraph 4 which identifies in detail the treatment of specific fact patterns and types of entities or arrangements and
  - [ii] denies treaty benefits in the case of income derived by or through an entity or arrangement established in a third

---

25 For art 3(1) see 87.4.2 (OECD hybrid-entity rules).

- jurisdiction; ...<sup>26</sup>
- g) for paragraph 1 to apply only to its Covered Tax Agreements that already contain a provision described in paragraph 4 which identifies in detail the treatment of specific fact patterns and types of entities or arrangements.

The UK has not made these reservations.

### 87.5.3 *Art 3(2) MLI*

Article 3(5) BEPS MLI allows States to opt-out of art 3(2) BEPS MLI:

A Party may reserve the right:

- f) for paragraph 2 not to apply to its Covered Tax Agreements;

The UK has reserved the right under para 3(5)(f) for art 3(2) not to apply; in short, it has adopted BEPS MLI art 3(1) but opted out of art 3(2).<sup>27</sup>

### 87.5.4 *BEPS MLI Savings Clause*

For completeness: art 3(3) BEPS MLI provides:

With respect to Covered Tax Agreements for which one or more Parties has made the reservation described in subparagraph a) of paragraph 3 of Article 11 (Application of Tax Agreements to Restrict a Party's Right to Tax its Own Residents),<sup>28</sup> the following sentence will be added at the end of paragraph 1:

“In no case shall the provisions of this paragraph be construed to affect a Contracting Jurisdiction's right to tax the residents of that Contracting Jurisdiction.”

This applies a Savings Clause to the BEPS MLI hybrid-entity rule in cases

---

<sup>26</sup> I deal with para (f) in the next section.

<sup>27</sup> For completeness, art 3(2) provides:

“Provisions of a Covered Tax Agreement that require a Contracting Jurisdiction to exempt from income tax or provide a deduction or credit equal to the income tax paid with respect to income derived by a resident of that Contracting Jurisdiction which may be taxed in the other Contracting Jurisdiction according to the provisions of the Covered Tax Agreement shall not apply to the extent that such provisions allow taxation by that other Contracting Jurisdiction solely because the income is also income derived by a resident of that other Contracting Jurisdiction.”

The reader may be relieved: this para does not yield its meaning on a first reading.

<sup>28</sup> See 104.9.3 (BEPS MLI Savings Clause).

where the Savings Clause is not more generally applicable.

The UK has not made the reservation described in art 11(3)(a),<sup>29</sup> ie it has not opted out of the BEPS MLI Savings Clause. So this would only be relevant if another jurisdiction has done so. But I wonder how often that will happen.

### 87.5.5 *Notifications*

Article 3(6) BEPS MLI provides:

- [a] Each Party that has not made a reservation described in subparagraph a) or b) of paragraph 5 shall notify the Depository of
  - [i] whether each of its Covered Tax Agreements contains a provision described in paragraph 4 that is not subject to a reservation under subparagraphs c) through e) of paragraph 5,
  - [ii] and if so, the article and paragraph number of each such provision.

That applies to the UK, which has published a list of 17 DTAs which contain a provision described in Article 3(4) that is not subject to a reservation under Article 3(5)(c) through (e).<sup>30</sup>

Article 3(6) BEPS MLI continues:

- [b] In the case of a Party that has made the reservation described in subparagraph g) of paragraph 5, the notification pursuant to the preceding sentence shall be limited to Covered Tax Agreements that are subject to that reservation.
- [c] Where all Contracting Jurisdictions have made such a notification with respect to a provision of a Covered Tax Agreement, that provision shall be replaced by the provisions of paragraph 1 (as it may be modified by paragraph 3) to the extent provided in paragraph 4.
- [d] In other cases, paragraph 1 (as it may be modified by paragraph 3) shall supersede the provisions of the Covered Tax Agreement only to the extent that those provisions are incompatible with paragraph 1 (as it may be modified by paragraph 3).

---

<sup>29</sup> See 104.9.4 (Savings Clause opt-out).

<sup>30</sup> [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/725261/Final\\_list\\_of\\_UK\\_reservations\\_and\\_notifications\\_made\\_on\\_deposit\\_of\\_the\\_instrument\\_of\\_ratification.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf)

The UK has not opted in to MLI art 5 (Hybrid Mismatches: Methods for elimination of double taxation).

## 87.6 Hybrid-entity rule: Effect

Para 1(2) OECD Model (the OECD hybrid-entity rule) can be divided into its separate elements as follows:

<b>Text of rule</b>	<b>Comment</b>
[a] For the purposes of this Convention,	Scope of rule
[b] income derived by or through an entity or arrangement	Conditions for application of rule
[c] that is treated as wholly or partly fiscally transparent under the tax law of either Contracting State	
[d] shall be considered to be income of a resident of a Contracting State	Effect of rule
[e] but only to the extent that the income is treated, for purposes of taxation by that State, as the income of a resident of that State.	

The effect of the rule is that:

- (1) To the extent that the member State considers the income to arise to the member in that State:
  - (a) Income arises to the member
  - (b) Income does not arise to the entity
- (2) To the extent that the member State does *not* consider the income to arise to the member:
  - (a) Income arises to the entity
  - (b) Income does not arise to the member

In short, the member State rules determine the issue of transparency /opacity and trump the source State rules. One might say that a classic hybrid is deemed to be transparent, and a reverse hybrid is deemed to be opaque. The consequence may be to apply or disapply DT relief:

<b>Hybrid</b>	<b>Treated as</b>	<b>DT relief</b>
Classic (member State transparent)	Transparent non-hybrid	Applied
Reverse (member State opaque)	Opaque non-hybrid	Disapplied

In short, the rule is to avoid double taxation as well as to avoid double non-taxation.

### 87.6.1 *Considered as income: Effect*

OECD Model Commentary provides:

12. By providing that the income to which it applies will be considered to be income of a resident of a Contracting State for the purposes of the Convention, [art 1(2)] ensures that the relevant income is attributed to that resident for the purposes of the application of the various allocative rules of the Convention [ie the rules allocating taxing rights to one or other State].

Depending on the nature of the income, this will therefore allow the income to be considered, for example, as

- [1] “income derived by” for the purposes of Articles 6, 13 and 17,
- [2] “profits of an enterprise” for the purposes of Articles 7, 8 and 9 (see also paragraph 4 of the Commentary on Article 3<sup>31</sup>) or
- [3] dividends or interest “paid to” for the purposes of Arts 10 and 11.

These 3 expressions raise the same issue, or essentially the same issue, namely, when income/gains should be *recognised*, or *attributed to a person*.<sup>32</sup> So the rule applies in the same way to each.

[4] The fact that the income is considered to be derived by a resident of a Contracting State for the purposes of the Convention also means that where the income constitutes a share of the income of an enterprise in which that resident holds a participation, such income shall be considered to be the income of an enterprise carried on by that resident (e.g. for the purposes of

- [a] the definition of enterprise of a Contracting State in Article 3<sup>33</sup> and
- [b] [art 21(2)<sup>34</sup>].

I think the point is that the enterprise (business) of a Classic hybrid (member State transparent) is deemed to be carried on by the members, not by the entity.

---

31 See 20.22.2 (“Enterprise”).

32 See 14.10 (Income recognition in DTAs).

33 See 20.22.2 (“Enterprise”).

34 See 103.8.2 (Income through PE).

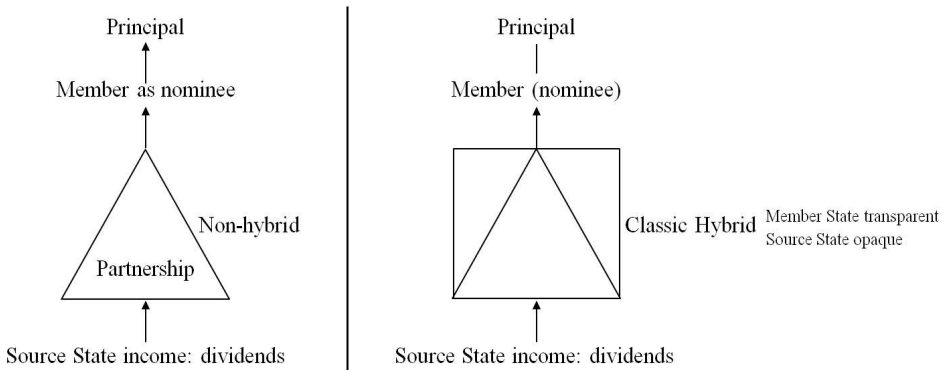

87.6.2 Hybrid is nominee/agent

In the case of a classic hybrid, where the source State is required to consider the income to be the income of/paid to the members, it must normally be required to consider members to be beneficial owners of the income. Otherwise relief in articles 10/11/12 would never apply. That assumes of course that the members of the entity hold their interest in the entity beneficially.

OECD Model Commentary provides:

13. Whilst the paragraph ensures that the various allocative rules of the Convention are applied to the extent that income of fiscally transparent entities is treated, under domestic law, as income of a resident of a Contracting State, the paragraph does not prejudge the issue of whether the recipient is the beneficial owner of the relevant income. Where, for example, a fiscally transparent partnership receives dividends as an agent or nominee<sup>35</sup> for a person who is not a partner, the fact that the dividend may be considered as income of a resident of a Contracting State under the domestic law of that State will not preclude the State of source from considering that neither the partnership nor the partners are the beneficial owners of the dividend.

Diagrammatically:

If the members State was the UK, the hybrid entity rule would not apply here, on the basis that para [e] is not met, ie assuming that the nominee is

35 Author’s footnote: The correct analysis in English law would be that the partners are nominees rather than the partnership. But nothing turns on that.

not resident in the UK, the income is not treated, for purposes of taxation by the UK, as the income of a resident of the UK. But maybe this observation is relevant in some other countries.

### 87.6.3 *Income derived by/through entity*

OECD Model Commentary provides:

7. The reference to “income derived by or through an entity or arrangement” has a broad meaning and covers any income that is earned by or through an entity or arrangement,

[a] regardless of the view taken by each Contracting State as to who derives that income for domestic tax purposes and

[b] regardless of whether or not that entity or arrangement has legal personality or constitutes a person as defined in subparagraph 1 a) of Article 3.

It would cover, for example, income of any partnership or trust that one or both of the Contracting States treats as wholly or partly fiscally transparent.

Note that the rule applies if *both* States consider the entity to be transparent. This would apply to what I call a quasi-hybrid entity (where both states agree the entity is transparent, but do not agree on who is regarded as receiving the income).<sup>36</sup>

### 87.6.4 *Gains*

The OECD hybrid-entity rule refers to income and does not mention gains, but the omission is not intended to be significant. OECD Model Commentary provides:

8. The word “income” must be given the wide meaning that it has for the purposes of the Convention and therefore applies to the various items of income that are covered by Chapter III of the Convention (Taxation of Income) [art 6-21], including, for example, profits of an enterprise and capital gains.

### 87.6.5 *Partly transparent*

OECD Model Commentary considers the situation where an entity is “partly treated as a taxable unit and partly disregarded for tax purposes”:

---

36 See 87.3.2 (Hybrid: Anti-avoidance attribution rules).

4. [Art 1(2) OECD Model] addresses this particular situation by referring to entities that are “wholly or partly” treated as fiscally transparent. Thus, the paragraph not only serves to confirm the conclusions of the Partnership Report but also extends the application of these conclusions to situations that were not directly covered by the report ....

10. In the case of an entity or arrangement which is treated as partly fiscally transparent under the domestic law of one of the Contracting States, only part of the income of the entity or arrangement might be taxed at the level of the persons who have an interest in that entity or arrangement as described in the preceding paragraph whilst the rest would remain taxable at the level of the entity or arrangement.

That seems self-evident.

This, for example, is how some trusts and limited liability partnerships are treated in some countries (i.e. in some countries,

[1] the part of the income derived through a trust that is distributed to beneficiaries is taxed in the hands of these beneficiaries whilst

[2] the part of that income that is accumulated is taxed in the hands of the trust or trustees;

This may have been the case for UK discretionary trusts before 1973, but that is not the case now.<sup>37</sup>

similarly, in some countries, income derived through a limited partnership is taxed in the hands of the general partner as regards that partner’s share of that income but is considered to be the income of the limited partnership as regards the limited partners’ share of the income).

This is not the case for UK limited partnerships.

To the extent that the entity or arrangement qualifies as a resident of a Contracting State, the paragraph will ensure that the benefits of the treaty also apply to the share of the income that is attributed to the entity or arrangement under the domestic law of that State (subject to any anti-abuse provision such as a limitation-on-benefits rule)...

11. As with other provisions of the Convention, the provision applies separately to each item of income of the entity or arrangement.

---

37 See 38.3.1 (Discretionary trust: Source). It could be the case if a trust held two funds on distinct terms.

Assume, for example, that the document that establishes a trust provides that all dividends received by the trust must be distributed to a beneficiary during the lifetime of that beneficiary but must be accumulated afterwards. If one of the Contracting States considers that, in such a case, the beneficiary is taxable on the dividends distributed to that beneficiary but that the trustees are taxable on the dividends that will be accumulated, the paragraph will apply differently to these two categories of dividends even if both types of dividends are received within the same month.

That seems self evident.

87.6.6 *OECD example: Classic hybrid*

OECD Model Commentary provides:

6. The following example illustrates the application of the paragraph: State A and State B have concluded a treaty identical to the Model Tax Convention.

State A [the source State] considers that an entity established in State B is a company and taxes that entity on interest that it receives from a debtor resident in State A.

Under the domestic law of State B, [the members State] however, the entity is treated as a partnership and the two members in that entity, who share equally all its income, are each taxed on half of the interest.

One of the members [“M1”] is a resident of State B and the other [member “M2”] is a resident of a country with which States A and B do not have a treaty.

OECD analysis is:

The paragraph provides that in such case, half of the interest shall be considered, for the purposes of Article 11 [interest article], to be income of a resident of State B.

In more detail, my analysis would be:

State A is the source State.

State B is the members State.

We are concerned with the State A/State B DTA (the source/members State DTA).

*M1's share:*

The entity is a Classic hybrid (members State transparent).

State A must apply the OECD hybrid-entity rule, so M1's income is deemed to arise to M1, the treaty-resident member of the entity, rather than the entity itself.

As M1 is resident of State B, treaty relief applies.

*M2's share:*

As M2 is not resident of State B, the State A/B (source/members States) DTA does not apply.

The OECD Commentary provides:

Also, as illustrated in example 2 of the [OECD Partnerships Report], it does not matter where the entity or arrangement is established: [art 1(2)] applies to an entity established in a third State to the extent that, under the domestic tax law of one of the Contracting States, the entity is treated as wholly or partly fiscally transparent and income of that entity is attributed to a resident of that State.

Regardless of where the entity is established, and regardless of the law of the entity State, the State A/State B DTA (the source/members States DTA) applies for M1's income but not for M2's income.

#### 87.6.7 *Tax on entity: OECD Model*

OECD Model Commentary provides:

14. [Art 1(2)] applies for the purposes of the Convention and does not, therefore, require a Contracting State to change the way in which it attributes income or characterises entities for the purposes of its domestic

law. In the example in paragraph 6 above,<sup>38</sup> whilst [art 1(2)] provides that half of the interest shall be considered, for the purposes of Article 11, to be income of a resident of State B, this will only affect the maximum amount of tax that State A will be able to collect on the interest and will not change the fact that State A's tax will be payable by the entity.

Thus, assuming that the domestic law of State A provides for a 30% withholding tax on the interest, the effect of [art 1(2)] will simply (?) be [1] to reduce the amount of tax that State A will collect on the interest so that

[a] half of the interest would be taxed at 30% [State A WHT rate]

[b] and half at 10% under the treaty between States A and B)<sup>39</sup> and

[2] will not change the fact that the entity is the relevant taxpayer for the purposes of State A's domestic law.

Point [2] could be justified in two ways:

- (1) From the point made here that art 1(2)] "applies for the purposes of the Convention"
- (2) From the OECD Savings Clause<sup>40</sup>

Following through the example: suppose the entity received interest of £100. Ignoring tax in the residence/entity State, the position would be:

	<b>Pre-tax profit</b>	<b>Tax rate</b>	<b>Tax</b>	<b>Post-tax profit</b>
M1's share	£50	10%	£5	£45
M2's share	<u>£50</u>	30%	<u>£15</u>	<u>£35</u>
Total	<u>£100</u>	20%	<u>£20</u>	<u>£80</u>

Would the hybrid entity distribute the post-tax profit:

- (1) to each member equally ignoring DT relief (£40 each), or
- (2) to each member after DT relief (£45 to M1, £35 to M2)

In principle, route (2) seems fairer; but the answer depends on the entity's constitution and governing law.

38 See 87.6.6 (Example: Classic hybrid).

39 It is assumed the DTA is in Model form, which provides for a 10% cap on the source State's rate of tax on the interest..

40 See 87.7.7 (Tax on entity: US Model); 87.5.4 (BEPS MLI Savings Clause).

This would be relevant if a DTA lacked the words "for the purposes of the Convention"; though only if the entity is resident in the source State.

## 87.7 US hybrid-entity rule: Guidance

### 87.7.1 US-transparent entities

The USA/UK DTA Technical Explanation identifies some US-transparent entities:<sup>41</sup>

[Art 1(8) USA/UK DTA] applies to any resident of a Contracting State who is entitled to income derived through an entity that is treated as fiscally transparent under the laws of either Contracting State. Entities falling under this description in the United States include

[1] partnerships

[2] common investment trusts under section 584 [US Internal Revenue Code]

[3] grantor trusts

[4] ... US LLCs that are treated as partnerships for US tax purposes.

### 87.7.2 IRS examples

IRS give some examples. As the USA/UK wording is similar to the OECD Model, these should also be relevant to OECD Model DTAs.

Examples 1 - 3 concern UK source income where the issue is whether UK relief is available under USA/UK DTA. In order to follow the examples, one needs to bear in mind that the USA/UK DTA provides that UK source interest which is beneficially owned by a US resident is not taxed in the UK.<sup>42</sup> The question is whether DT relief applies when interest is “derived through a person that is fiscally transparent”.

### 87.7.3 US example: Classic hybrid

The first IRS example is equivalent to that in the OECD Commentary.<sup>43</sup> This concerns UK source interest paid to a US-transparent entity with US members:

[1] [a] For example, if a UK company pays interest to an entity that is treated as fiscally transparent for US tax purposes, the interest will be considered derived [ie received] by a resident of the US only to the extent that the taxation laws of the United States treats one or more US residents

---

41 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

42 See 25.26.2 (DTAs with 100% interest relief).

43 See 87.6.6 (OECD example: Classic hybrid).

(whose status as US residents is determined, for this purpose, under US tax law) as deriving [ie, receiving] the interest for US tax purposes.<sup>44</sup>

In this example:

UK is the source State.

US is the members State.

The entity is US-transparent.

We are not told if the entity is UK-transparent or UK-opaque.

- (a) If the entity is UK-transparent, then it is a transparent non-hybrid, and no difficulty arises.
- (b) If the entity is UK-opaque, it is a Classic hybrid (member state transparent). The member state (US) rules determine the issue of transparency and override the source state (UK) rules, so treaty relief applies. Diagrammatically:

Example 2 is the same but with non-US resident partners:

[2] Also, it follows that persons whom the United States treats as partners but who are not US residents for US tax purposes may not claim a benefit for the interest paid to the entity under the [USA/UK] Convention, because they are not residents of the United States for purposes of claiming this treaty benefit.

In this case the USA/UK DTA does not provide relief. But of course a members state/UK DTA could do so:

---

44 The Technical Explanation continues: “In the case of a partnership, the persons who are, under US tax laws, treated as partners of the entity would normally be the persons whom the US tax laws would treat as deriving [receiving] the interest income through the partnership.”

This is straightforward in the UK, as a partnership is also UK-transparent, so a partnership is a non-hybrid.

If, however, the country in which they are treated as resident for tax purposes, as determined under the laws of that country, has an income tax convention with the UK, they may be entitled to claim a benefit under that convention.

87.7.4 USA as entity State

The next example concerns UK source interest arising to a US-opaque entity which is US resident:

In contrast, if, for example, an entity is organized under US laws and is classified as a corporation for US tax purposes, interest paid by a UK company to the US entity will be considered derived by a resident of the United States since the US corporation is treated under US taxation laws as a resident of the United States and as deriving the income.

In this example:

UK is the source State.

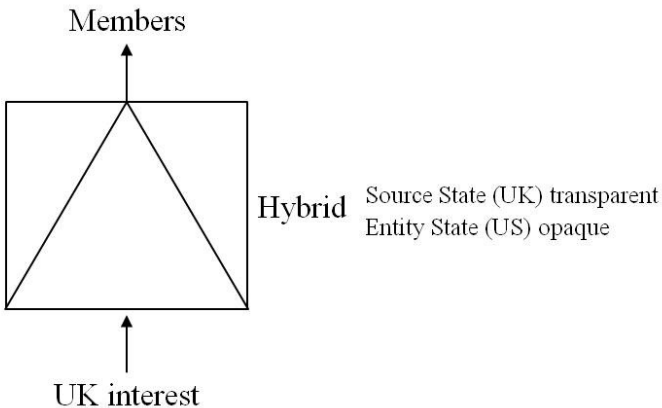

US is the entity State.

The entity is US-opaque.

Again, we are not told if the entity is UK-transparent or UK-opaque.

- (a) If the entity is UK-opaque, then it is a non-hybrid, and no difficulty arises.
- (b) If the entity is UK-transparent, it is a Reverse hybrid (member state opaque). The member state (US) rules determine the issue of opacity and override the source state (UK) rules.

Diagrammatically:

Treaty relief applies.

The following factors do not matter:

- (1) the UK tax classification as transparent/opaque
- (2) a third State's tax classification as transparent/opaque

[4] The same result obtains even if the entity were viewed differently under the tax laws of the UK (e.g., as not fiscally transparent in the first example above where the entity is treated as a partnership for US tax purposes).

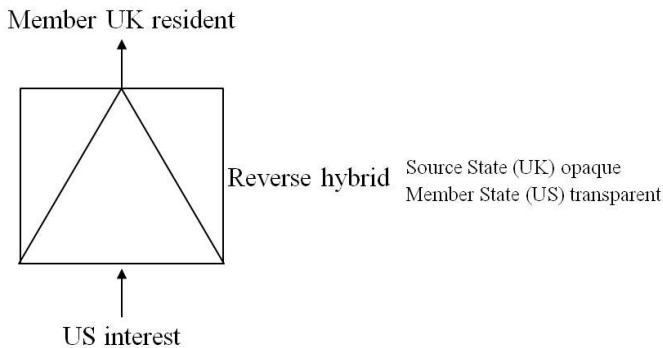

Similarly, the characterization of the entity in a third country is also irrelevant, even if the entity is organized in that third country. The results follow regardless of whether the entity is disregarded as a separate entity under the laws of one jurisdiction but not the other, such as a single owner entity that is viewed as a branch for US tax purposes and as a corporation for UK tax purposes. These results also obtain regardless of where the entity is organized (i.e., in the United States, in the UK, or, as noted above, in a third country).

#### 87.7.5 *Reverse hybrid*

The example given considers US source income accruing to an entity which is UK-opaque.

[5] For example, income from US sources received by an entity organized under the laws of the United States, which is treated for UK tax purposes as a corporation and is owned by a UK shareholder who is a UK resident for UK tax purposes, is not considered derived by the shareholder of that corporation even if, under the tax laws of the United States, the entity is treated as fiscally transparent. Rather, for purposes of the treaty, the income is treated as derived by the US entity.

Diagrammatically:

The UK member is not entitled to interest relief under the USA/UK DTA even if the income is distributed to them, though FTCD may apply.

#### 87.7.6 US-transparent trust

These principles also apply to trusts to the extent that they are fiscally transparent in either Contracting State.

The next example concerns a trust which is US-transparent:

For example, if X, a resident of the UK, creates a revocable trust in the United States<sup>45</sup> and names persons resident in a third country as the beneficiaries of the trust, X would be treated under US law as the beneficial owner of income derived from the United States. In that case, the trust's income would be regarded as being derived by a resident of the UK only to the extent that the laws of the UK treat X as deriving the income for UK tax purposes by application of the UK "settlor trust" rules.

If s.624 ITTIOA applies, the trust is UK-transparent and is a transparent non-hybrid, and no difficulty arises. But s.624 is not likely to arise, as the trust is likely to be a protected trust (alternatively, possibly, the remittance basis may apply).

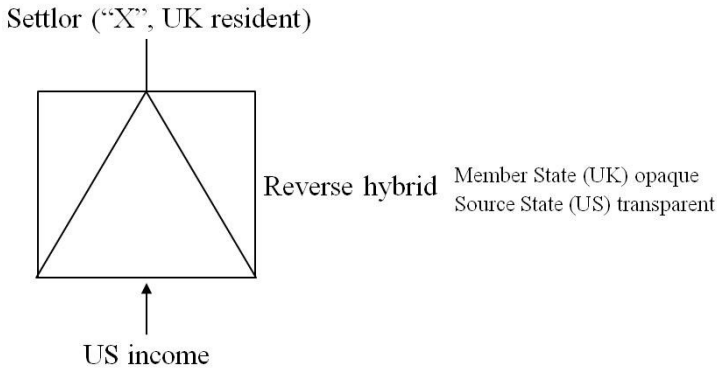

If the trust is discretionary in form, it is UK-opaque, it is a reverse hybrid (member state opaque). The member state (UK) rules determine the issue of transparency and override the source state (US) rules, so treaty relief does not apply.

---

<sup>45</sup> I am not sure that it matters where the trust is established; but that is a matter of US law.

The trust might be interest in possession in form, in which case it is actually UK transparent. But it may be regarded as a hybrid, or at least treated as one, because under US law the income accrues to X (UK resident), but under UK law it accrues to the beneficiary (resident in a third country).

Diagrammatically:

### 87.7.7 Tax on entity: US Model

An Exchange of Notes between the UK and USA discusses the taxation of the entity itself:

*With reference to paragraph 8 of Article 1 [US hybrid-entity rule]—*  
 [1] it is understood that where an item of income, profit or gain is derived through a person which is a resident of a Contracting State the provisions of the paragraph shall not prevent that Contracting State from taxing the item as the income, profit or gain of that person.

The OECD commentary makes the same point.<sup>46</sup> The USA/UK DTA Technical Explanation<sup>47</sup> justifies the point by reference to the US Savings Clause:<sup>48</sup>

[7] [Art 1(8) USA/UK DTA, the US hybrid entity rule] is not an exception to the saving clause of [art 1(4)]. Accordingly, the notes

46 See 87.6.7 (Tax on entity: OECD Model).

47 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

48 See 104.9.5 (US Savings Clause).

confirm that [art 1(8)] does not prevent a Contracting State from taxing an entity that is treated as a resident of that State under its tax law.

For example, if a US LLC with UK members elects to be taxed as a corporation for US tax purposes, the United States will tax that LLC on its worldwide income on a net basis, without regard to whether the UK views the LLC as fiscally transparent.<sup>49</sup> The portion of the notes relating to Article 24 (Relief from Double Taxation)<sup>50</sup> provides rules for determining which Contracting State has the primary right to tax and which State must provide a credit in such circumstances.

The Exchange of Notes continues:

- [2] It is further understood that, where, by virtue of [art 1(8)],
- [a] an item of income, profit or gain is considered by a Contracting State to be derived by a person who is a resident of that Contracting State, and
  - [b] the same item is considered by the other Contracting State to be derived [by that person or]<sup>51</sup> by a person who is a resident of that other Contracting State,
- [art 1(8)] shall not prevent either Contracting State from taxing the item as the income, profit or gain of the person considered by that State to have derived the item of income, profit or gain.

It is essential to keep in mind which State is which; this paragraph is easier to follow if it is expanded to read:

- It is further understood that, where, by virtue of art 1(8),
- [a] an income/gain is considered by the UK to be derived by a person who is a resident of the UK, and
  - [b] the same item is considered by the US to be derived by that person or by a person who is a resident of the US,
- the paragraph shall not prevent
- [i] the UK from taxing the item as the income/gain of the person considered by the UK to have derived the item;
  - [ii] the US from taxing the item as the income/gain of the person considered by the US to have derived the item.

---

49 Author's footnote: The UK will normally view a LLC as opaque, but it might be transparent if the ToA rules apply.

50 See 87.7.9 (Hybrids: art.24 tax credit).

51 I do not understand the words in brackets and would be grateful to any reader who could explain.

## 87.7.8 s.624/720 income; s.3/86 gain

The Exchange of Notes continues:

[3] It is further understood that, in applying [para 1(8)], the UK shall, exceptionally, regard an item of income, profit or gain arising to a person as falling within the paragraph where another person is charged to UK tax in respect of that item of income, profit or gain—

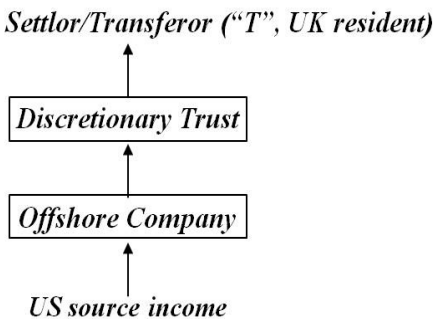

- (a) under [what is now s.624 ITTOIA & s.720 ITA]; or
- (b) under section [77 or<sup>52</sup>] 86, TCGA 1992.

[4] It is further understood that, in applying the paragraph, a person shall be regarded as fiscally transparent under the laws of the UK in relation to an item of income, profit or gain where a charge is made on another person on that item either—

- (a) by virtue of [what is now s.3 TCGA]; or
- (b) because that other person has (or, under [what is now s.464 ITA<sup>53</sup>], is treated as having) an equitable right in possession in a trust.

Thus trusts within s.624 and companies within s.720 are regarded as UK-transparent for IT; trusts within s.86 and companies within s.3 are regarded as UK-transparent for CGT.

Take a standard structure:

Suppose:

- (1) T is UK-law UK resident but treaty-resident in the US.
- (2) The entities are US-transparent, so T regarded for US purposes as

---

52 Author's footnote: I add the brackets because s.77 is now repealed.

53 See 39.3.4 (Scots trusts).

receiving OC's income.

(3) Section 720 applies so T is taxed for UK tax purposes on OC's income

For USA/UK DTA purposes, T is treated as receiving OC's income. Thus for US tax, USA should allow treaty relief even if in the US the structure is opaque.<sup>54</sup>

#### 87.7.9 Hybrids: art.24 tax credit

Foreign Tax Credit Relief is provided by art 24 USA/UK DTA.<sup>55</sup> The Exchange of Notes provides:

*With reference to Article 24 (Relief from double taxation)—*

[1] It is understood that, under paragraph 4 or 8 of Article 1 (General scope) [US savings clause/US hybrid-entity rule], the provisions of the Convention

[a] may permit the Contracting State of which a person is a resident (or, in the case of the United States, a citizen),<sup>56</sup> to tax an item of income, profit or gain derived through another person (the entity) which is fiscally transparent under the laws of either Contracting State, and

[b] may permit the other Contracting State to tax

(a) the same person [the entity member];

(b) the entity; or

(c) a third person

with respect to that item.

[2] Under such circumstances, the tax paid or accrued by the entity shall be treated as if it were paid or accrued by the first-mentioned person [the entity member] for the purposes of determining the relief from double taxation to be allowed by the State of which that first-mentioned person [the entity member] is a resident (or, in the case of the United States, a citizen),

There is an exception in the case of land:

[3] except that, in the case of

[a] an item of income from real property to which paragraph 1 of

---

54 The transferor is entitled to the relief as a matter of UK law; see 46.24 (DT relief: s.720 income).

55 See 106.2 (DTA/Unilateral Credit compared).

56 The Exchange of Notes describes this person as “the first-mentioned person” but for clarity I gloss this as the “entity member”.

- Article 6 (Income from real property) of the Convention applies,  
or  
[b] a gain from the alienation of real property to which paragraph 1  
of Article 13 (Gains) applies,  
the tax paid or accrued by the person who is a resident of the  
Contracting State in which the real property is situated shall be  
treated as if it were paid or accrued by the person who is a resident of  
the other Contracting State.

The Exchange of Notes continues:

- [4] [A] In the case where the same item of income, profit or gain derived  
through a trust is treated by each Contracting State as derived by different  
persons resident in either State, and  
(a) the person taxed by one State is the settlor or grantor of a trust;  
and  
(b) the person taxed by the other State is a beneficiary of that trust,  
the tax paid or accrued by the beneficiary shall be treated as if it were  
paid or accrued by the settlor or grantor for the purposes of determining  
the relief from double taxation to be allowed by the State of which that  
settlor or grantor is a resident (or, in the case of the United States, a  
citizen),

There is again an exception in the case of land:

- [4B] except that,  
[a] in the case of an item of income from real property to which  
paragraph 1 of Article 6 (Income from real property) of the  
Convention applies, or  
[b] a gain from the alienation of real property to which paragraph 1  
of Article 13 (Gains) applies,  
the tax paid or accrued by the person who is a resident of the  
Contracting State in which the real property is situated shall be  
treated as if it were paid or accrued by the person who is a resident of  
the other Contracting State.  
[5] It is further understood that paragraphs 2 and 5 of Article 24 shall  
apply to such an item of income, profit or gain to the extent necessary  
to provide relief from double taxation.

In *Anson v HMRC*, income arose to an LLC which the Court of Appeal held was transparent for US purposes but not for UK purposes. The income was distributed to a UK resident shareholder. I would have thought that this was a case where the Exchange of Notes should have applied.

Unfortunately the Court of Appeal refused to consider the point (on the grounds that the taxpayer raised it too late).<sup>57</sup> The Supreme Court held that FTCR applied for other reasons.<sup>58</sup>

## 87.8 Hybrid entities: Part 6A TIOPA

### 87.8.1 *Anti-tax avoidance directive*

Council Directive (EU) 2016/1164 (Anti-Tax Avoidance Directive, known as “ATAD”) was adopted on 12 July 2016.

Council Directive (EU) 2017/952, sometimes called “ATAD 2”, was adopted on 27 May 2017. It amended ATAD by introducing hybrid mismatch rules: articles 2, 9, 9a and 9b ATAD.

ATAD does not have direct effect. The rules in the UK are implemented by Part 6A TIOPA (Hybrid and other mismatches).

Article 1 ATAD provides:

This Directive applies to all taxpayers that are subject to corporate tax in one or more Member States, including permanent establishments in one or more Member States of entities resident for tax purposes in a third country.

In short, ATAD only applies to “corporate tax”. So it applies to Corporation Tax; does it also apply to income tax when payable by companies? HMRC must have thought not, as the UK rules in Part 6A TIOPA apply to corporation tax, though it can affect LLPs not otherwise subject to CT.<sup>59</sup> But the issue is less important now that property income

---

57 [2013] EWCA Civ 63 at [92]:

“There is clearly some dispute as to the mischief to which the exchange of notes is directed. There would have to be further evidence to resolve that dispute.”

The view that a court hears evidence to decide the scope or mischief of a DTA might be described as unconventional. But perhaps it is better that the CA did not address the point, as they did not seem sympathetic to the taxpayer:

“Moreover, the words “with respect to that item”, ... are, on the face of it, consistent with [counsel for HMRC’s] principal submission that no change is made in the requirement for the profits taxed in each jurisdiction to be the same profits in order to qualify for DTR. If an alteration to article 23 [of the 1980 USA/UK DTA, now article 24 of the 2001 DTA] was intended, it is surprising that it was dealt with in this oblique way.”

58 See 106.5 (Same income rule).

59 But see 87.22.5 (Charge to CT).

of non-resident companies has moved from IT to CT.

### 87.8.2 *TIOPA Part 6A: Navigation*

The numbering system of Part 6A is idiosyncratic.<sup>60</sup> Each Chapter is designated by a letter: A, B, etc, up to N for Chapter 14. Each section in a Chapter begins with 259, then the Chapter letter, and sections after the first are numbered A, B, etc; so the sections of Chapter 2 are numbered 259B, 259BA, etc up to 259BF. Sections introduced subsequently are slotted in with an additional letter, such as s.259NEA.

#### **Chapter/Letter/Sections Topic**

1 A 259A Overview

2 B 259B-259BF Key definitions

#### *Deduction/non-inclusion mismatches*

3 C 259C-259CE Payments under financial instruments

4 D 259D-259DG Repos/stock lending/ transfers of financial instruments

5 E 259E-259ED Payments: payer a hybrid entity

6 F 259F-259FB Internal transfer: from UK PE to where co is resident

7 G 259G-259GE Payments: payee a hybrid entity

8 H 259H-259HC Payments: payee a multinational company

#### *Double deduction mismatches*

9 I 259I-259ID Hybrid entity

10 J 259J-259JD Dual resident company/multinational company

11 K 259K-259KD Imported mismatches

12 L 259L-259LD Adjustment where (a) supposition was mistaken  
(b) Deduction denied under Part 6A, & income arises later

#### *Supplemental provisions*

13 M 259M Hybrid & mismatch TAAR

14 N 259N-259NF Definitions and interpretation

I here consider Chapter 7; I hope to consider some other Chapters in subsequent editions; others mainly concern corporate tax practitioners. I do not consider the rules relating to CFCs.

### 87.8.3 *Part 6A definitions: Navigation*

Part 6A TIOPA has a specialist technical vocabulary.

Chapter 2 contains a dozen “key” definitions; Chapter 14 has half a dozen

---

<sup>60</sup> See App.11.3 (Section numbering system).

or so definitions, and other terms are defined where they are used. In this work I only discuss terms employed in Chapter 7:

<b>Term</b>	<b>See para/section</b>		
Control group	87.25	Payee	87.12; 87.11
Equivalent provision	87.24.3	Payer	87.10; 87.11
Financial instrument	s.259N	Payment	87.10
Hybrid entity	87.15	Permanent Establishment	s.259BF
Investor	87.15.4	Quasi-payment	87.11
Investor jurisdiction	87.15.4	Related person	s. 259NC
Mismatches	87.9	Relevant deduction	87.10
Ordinary income	87.14	Relevant investment fund	s.259NA
-do- included in profits	s.259BC(8)	Tax	87.24.1
Partnership income	87.26	Taxable period	87.24.4
		50% / 25% investment	100.8

#### 87.8.4 Introduction to Part 6A

This is a daunting topic. BEPS Action 2 Report, and HMRC hybrid guidance,<sup>61</sup> are each nearly 500 pages in length; and a full discussion would require more than one volume.

Changes were made to the rules in 2017, 2018, and in 2019 in the light of ATAD 2 and again in FB 2021. The FB changes have been amended in committee stage. They are not yet written up in this chapter.

It is unlikely that the current law is stable.

The background to Part 6A TIOPA can be found in consultation papers in 2014 and December 2016, but these are now of historical importance only.

A further consultation paper was published in March 2020<sup>62</sup>, focussing on:

---

61 See INTM850000 (Hybrid and other mismatches) published on [http://www.hmrc.gov.uk/gds/INTM/images/INTM850000\\_hybrids.pdf](http://www.hmrc.gov.uk/gds/INTM/images/INTM850000_hybrids.pdf)

The text is not published online with the rest of the INTM, so it is missing in publishers tax databases.

CIOT expressed concern that the draft of this guidance was “used as a substitute for clear, well targeted legislation and that it conflicts with the wording of the legislation”.

62 HMRC “Hybrid and other Mismatches”

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/873562/Consultation\\_Hybrid\\_and\\_other\\_mismatches.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/873562/Consultation_Hybrid_and_other_mismatches.pdf)

- (1) Chapters 9 and 10 (double deduction mismatches)
- (2) Acting together/connected party rules
- (3) Exempt investors in hybrid entities

This is the background to the 2021 changes.

INTM provides this introduction:

**INTM550020: Hybrids: Chapter 1 - Introduction: What is a hybrid or other mismatch?** [Dec 2019]

Part 6A of Taxation (International and Other Provisions) Act 2010 (TIOPA 2010) addresses arrangements that give rise to hybrid mismatch outcomes leading to a tax mismatch.

The legislation is based on the OECD recommendations in relation to Action 2 of the Base Erosion Profit Shifting (BEPS) project. The legislation is deliberately broader in scope than the OECD recommendations in some areas. Consequently, outcomes under this legislation may differ from those under the OECD recommendations.

For example, the UK's hybrid mismatch legislation includes:

- rules to deal with mismatches involving permanent establishments, and
- rules that counter hybrid mismatches where a hybrid entity is in a territory with no corporate income tax.

Mismatches can involve either double deductions for the same expense, or deductions for an expense without the corresponding receipt being fully taxed.

Hybrid mismatch outcomes can arise from hybrid financial instruments and hybrid entities, and from arrangements involving permanent establishments. They can also arise from hybrid transfers and dual resident companies.

The legislation aims to neutralise the tax mismatch created under these arrangements by altering the tax treatment of either the deduction or the receipt, depending on the circumstances. The rules are designed to work whether both the countries affected by a cross-border arrangement have introduced rules based on the OECD recommendations, or just the UK. This legislation follows the OECD recommendations in providing alternative responses to mismatches which fall within the scope of the legislation. These are described as a 'primary response' and a 'secondary response'.

In the case of deduction/non-inclusion, the primary response is generally to deny a deduction to the payer. If this does not occur, the secondary defensive response is to bring the receipt into charge for the payee.

In the case of double deductions the primary response is to deny a deduction to the parent or investor company. If this does not occur (because the tax law in the country in which the parent or investor company is resident does not provide for this), the secondary response is to deny the deduction to the hybrid entity or permanent establishment, as appropriate.

## 87.9 Mismatches

Part 6A TIOPA identifies two types of mismatch:

- (1) a deduction/non-inclusion (“D/NI”) mismatch
- (2) a double deduction mismatch

### 87.9.1 Deduction/non-inclusion mismatch

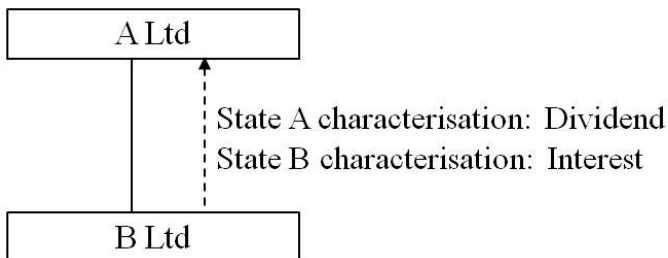

Section 259A(2) TIOPA provides:

A deduction/non-inclusion mismatch arises where an amount is deductible from a person’s income-

- (a) without a corresponding amount of ordinary income arising to another person, or
- (b) where an amount of ordinary income does arise to a person but is under taxed.

This can happen with a hybrid entity.

It also happens in other circumstances. A mismatch may happen if States characterise a payment in different ways, for example:

State A may characterise the payment as dividend (perhaps not taxed)

State B may characterise the payment as interest (perhaps deductible)

A mismatch may happen if States differ on what constitutes a PE; for example State A may characterise the arrangement as a permanent establishment, whose profits are taxable in State B; and State B may not regard it as a PE, and regard the profits as taxable in State A. One might

describe that as a “**hybrid PE**”.

This chapter only considers the issues of hybrid entities.

### 87.9.2 *Double deduction mismatch*

Section 259A(3) TIOPA provides:

A double deduction mismatch arises where-

- (a) an amount is deductible from more than one person’s income, or
- (b) an amount is deductible from a person’s income for the purposes of more than one tax.

This can happen with a hybrid.

It also happens in other circumstances, for instance, a company may make a gift to charity which qualifies for gift aid relief in the UK and a similar relief elsewhere. But I do not consider double deduction mismatches in this chapter.

### 87.9.3 *Other mismatches*

Mismatches are not caught unless they are of one of these kinds. Brabazon comments:

It is difficult to see why the "D" element of a D/NI outcome should be required where arbitrage is based on differences in the tax treatment of a reverse hybrid trust. Arbitrage is successfully achieved if income, which might be derived from a stranger and may or may not be deductible to that person, is untaxed or lightly taxed at source and then escapes effective residence taxation in any jurisdiction. This might be called a NI/NI (double no-inclusion) outcome. There are plenty of investments, particularly passive ones, that produce cross-border income subject to zero or light source taxation. A trust is perfectly adapted to make such investments and, if it is a reverse hybrid, a NI/NI outcome is the obvious consequence.<sup>63</sup>

The rules were created by corporation tax practitioners with multinational groups in mind, and without much regard for private client aspects.

See too 106.9 (Tax in accordance with DTA).

## 87.10 Payment

---

63 [2018] BTR at 225.

Section 259BB(1) TIOPA provides:

In this Part [Part 6A, hybrids/mismatches] “payment” means any transfer-

- (a) of money or money’s worth directly or indirectly from one person (“the payer”) to one or more other persons, and
- (b) in relation to which (disregarding this Part and any equivalent provision under the law of a territory outside the UK) an amount (a “relevant deduction”) may be deducted from the payer’s income for a taxable period (the “payment period”) for the purposes of calculating the payer’s taxable profits.

“Payment” has an artificial definition: it means a *deductible* payment. I write it with an initial capital to reflect the technical nature of the word.

How is the payee meant to know whether a Payment is deductible? It has to be “reasonable to suppose” a Payment; that recognises that the question is imponderable, but does not actually help.<sup>64</sup>

### 87.11 “Quasi-payment”

Section 259BB(2) TIOPA provides:

For the purposes of this Part [Part 6A, hybrids/mismatches], there is a “quasi-payment”, in relation to a taxable period (the “payment period”) of a person (“the payer”), if (disregarding this Part and any equivalent provision under the law of a territory outside the UK)-

Two conditions then follow:

- (a) an amount (a “relevant deduction”) may be deducted from the payer’s income for that period for the purposes of calculating the payer’s taxable profits, and

This is the same condition as for “Payment”.

- (b) making the assumptions in subsection (4), it would be reasonable to expect an amount of ordinary income to arise to one or more other persons as a result of the circumstances giving rise to the relevant deduction.

**INTM550540 Payment and quasi-payment, Securitisation companies [Dec 2019]**

---

<sup>64</sup> See App.2.21 (Reasonable-to-assume).

...In most instances a payment will also fall within the definition of a quasi payment.

A simple example of a quasi-payment would be an interest free convertible loan note being treated as issued at a discount that qualifies for finance relief (see example at INTM551280). The deduction arises from the terms of the loan note, which creates economic rights between the payer and payee.

In contrast, a deduction granted by a territory for an amount of deemed interest on an interest free loan would not be a quasi-payment (see example at INTM551270). The deemed deduction does not arise from the terms of the existing loan nor from any amendment to it. It arises from the operation of the territory's tax rules.

### **Securitisation Companies**

For the avoidance of doubt, payments or quasi-payments could arise to an entity which is charged to corporation tax under Regulation 14 of The Taxation of Securitisation Companies 2006 (SI 2006/3296). This could occur where transactions giving rise to the Retained Profit (on which the CT charge is calculated) represent an allowable deduction.

Section 259BB(5) TIOPA provides:

In this Part [Part 6A, hybrids/mismatches]-

- (a) references to a quasi-payment include all the circumstances giving rise to the relevant deduction mentioned in subsection (2)(a), and
- (b) references to a quasi-payment being made are to those circumstances arising.

#### 87.11.1 *Deemed income*

Section 259BB(3) TIOPA provides:

But a quasi-payment does not arise under subsection (2) if-

- (a) the relevant deduction is an amount that is deemed, under the law of the payer jurisdiction, to arise for tax purposes, and
- (b) the circumstances giving rise to the relevant deduction do not include any economic rights, in substance, existing between the payer and a person mentioned in subsection (2)(b).

#### 87.11.2 *Quasi-payment assumptions*

Section 259BB(4) TIOPA provides:

The assumptions are that (so far as would not otherwise be the case)-

- (a) any question as to whether an entity is a distinct and separate person from the payer is determined in accordance with the law of the payer jurisdiction,
- (b) any persons to whom amounts arise, or potentially arise, as a result of the circumstances giving rise to the relevant deduction adopt the same approach to accounting for those circumstances as the payer, and
- (c) any persons to whom amounts arise, or potentially arise, as a result of those circumstances-
  - (i) are, under the law of the payer jurisdiction, resident in that jurisdiction for tax purposes, and
  - (ii) carry on a business, in connection with which those circumstances arise, in the payer jurisdiction.

## 87.12 Payer/Payee/Relevant deduction

### 87.12.1 Payer/relevant deduction

Definitions of payer and relevant deduction are found in the definitions of payment and quasi-payment set out above.

### 87.12.2 Payee

Section 259BB(6) TIOPA provides:

In this Part [Part 6A, hybrids/mismatches] “payee” means-

- (a) in the case of a payment, any person-
  - (i) to whom the transfer is made as mentioned in subsection (1)(a),<sup>65</sup> or
  - (ii) to whom an amount of ordinary income arises as a result of the payment, and
- (b) in the case of a quasi-payment, any person-
  - (i) to whom it would be reasonable to expect an amount of ordinary income to arise as mentioned in subsection (2)(b), or
  - (ii) to whom an amount of ordinary income arises as a result of the quasi-payment.

### 87.12.3 Payer is also payee

Section 259BB(7) TIOPA provides:

---

<sup>65</sup> See 87.10 (Payment).

For the purposes of this Part [Part 6A, hybrids/mismatches], in the case of a quasi-payment, the payer is “also a payee” if-

- (a) an entity is not a distinct and separate person from the payer for the purposes of a tax charged under the law of the UK,
- (b) that entity is a distinct and separate person from the payer for the purposes of a tax charged under the law of the payer jurisdiction, and
- (c) it would be reasonable to expect an amount of ordinary income to arise to that entity as mentioned in subsection (2)(b).

The INT Manual provides:

**INTM550550 Payer and payee** [Dec 2019]

**... Payer is also payee**

The payer can also be a payee where the entity is treated as the payer under UK law, but as a separate entity in the other jurisdiction.

For example, a payment made by a partnership to one of the partners has the same payer and payee from a UK perspective.

### **87.13 “Payer/payee jurisdiction”**

Section 259BB TIOPA provides:

(8) In this section “payer jurisdiction” means the jurisdiction under the law of which the relevant deduction may (disregarding this Part [Part 6A, hybrids/mismatches] and any equivalent provision under the law of a territory outside the UK) be deducted.

(9) In this Part [Part 6A, hybrids/mismatches] “payee jurisdiction”, in relation to a payee, means a territory in which-

- (a) the payee is resident for tax purposes under the law of that territory, or
- (b) the payee has a permanent establishment.

### **87.14 “Ordinary Income”**

“Ordinary income” matters for the definition of deduction/non-inclusion mismatch.

#### *87.14.1 Basic rule*

Section 259BC(1) TIOPA provides:

This section has effect for the purposes of this Part [Part 6A, hybrids/mismatches].

The definition uses the term relevant tax.

Section 259BC(9) TIOPA provides:

In this section “relevant tax” means a tax other than the CFC charge or a foreign CFC charge.

Armed with that definition, we can turn to the definition of ordinary income. Section 259BC(2) TIOPA provides:

“Ordinary income” means income that is brought into account, before any deductions, for the purposes of calculating the income or profits on which a relevant tax is charged (“taxable profits”).

In short: Ordinary Income means taxable income. I write it with initial capitals, to reflect the technical nature of the term.

#### 87.14.2 “Brought into account”

Section 259BC(3) TIOPA provides:

But an amount of income is not brought into account for those purposes to the extent that

- (a) it is charged to the relevant tax at a nil rate, or
- (b) it is excluded, reduced or offset by any exemption, exclusion, relief, or credit-
  - (i) that applies specifically to all or part of the amount of income (as opposed to ordinary income generally), or
  - (ii) that arises as a result of, or otherwise in connection with, a payment or quasi-payment that gives rise to the amount of income.

#### 87.14.3 Tax refunded

Section 259BC TIOPA provides:

(4) If all the relevant tax charged on taxable profits is, or falls to be, refunded, none of the income brought into account in calculating those taxable profits is “ordinary income”.

(5) If a proportion of the relevant tax charged on taxable profits is, or falls to be, refunded, the amount of any income brought into account in calculating those taxable profits that is “ordinary income” is proportionally reduced.

(6) For the purposes of subsections (4) and (5) an amount of relevant tax is refunded if and to the extent that-

- (a) any repayment of relevant tax, or any payment in respect of a credit for relevant tax, is made to any person, and
- (b) that repayment or payment is directly or indirectly in respect of the whole or part of the amount of relevant tax,

#### 87.14.4 *Loss relief*

Section 259BC(6) TIOPA concludes:

but an amount refunded is to be ignored if and to the extent that it results from qualifying loss relief.

Section 259BC(7) TIOPA provides:

In subsection (6) “qualifying loss relief” means-

- (a) any means by which a loss might be used for corporation tax or income tax purposes to reduce the amount in respect of which a person is liable to tax, or
- (b) any corresponding means by which a loss corresponding to a relevant tax loss might be used for the purposes of a relevant tax other than corporation tax or income tax to reduce the amount in respect of which a person is liable to tax,

(and in paragraph (b) “relevant tax loss” means a loss that might be used as mentioned in paragraph (a)).

#### **INTM550560 Ordinary income** [Dec 2019]

[The Manual refers to the definition in s259BC(2) and continues:]

Entities such as charities and many pension funds may not have ordinary income where the income received falls wholly within relevant exemptions. This is because that income is not brought into account in calculating profits on which a relevant tax is charged...

A receipt may remain within the definition of ordinary income even where it has been characterised differently under the payee regime. For example, a finance return may be characterised as proceeds from a share sale by a share trader, but still be included within trading profits as income. In those circumstances the receipt is taxed at the same rate as a finance return would have been and so is ordinary income. See the example at INTM551380...

A qualifying loss relief is a loss that might be used to reduce the amount on which a person is liable to income tax or corporation tax on income in the UK, or a corresponding non-UK loss. This will include, for example, refunds arising from relief for or equivalent to

- UK group relief,

- UK loss carry back
- UK generic allowable expenditure incurred in earning the profits that exceeds the income received.

A full or partial refund of the relevant tax as a consequence of anything that is not a qualifying loss relief will result in the amounts being excluded from ordinary income. This may occur where it is a feature of the relevant jurisdiction's tax regime that the tax on income can be refunded, whether to the company or another person, without the application of a qualifying loss relief, but perhaps because it is income of a specified character..

## 87.15 Hybrid entity

### 87.15.1 *Hybrid entity*

Section 259BE(1) TIOPA provides:

For the purposes of this Part [Part 6A, hybrids/mismatches], an entity is “hybrid” if it meets conditions A and B.

I refer to “**hybrid conditions A & B**”.

### 87.15.2 *Hybrid condition A: personality*

Section 259BE(2) TIOPA provides:

Condition A is that the entity is regarded as being a person for tax purposes under the law of any territory.

The entity must be a person in at least one territory: if not, it cannot be hybrid. I refer to it as the “**entity-person**”.

### 87.15.3 *Hybrid condition B*

Section 259BE TIOPA provides:

(3) Condition B is that-

There are two ways to satisfy Hybrid condition B, which I call condition B(a) and B(b). Condition B(a) is:

- (a) some or all of the entity's income or profits are treated (or would be if there were any) for the purposes of a tax charged under the law of any territory, as the income or profits of a person or persons other than the person mentioned in subsection (2)

In short, in some territory the entity-person is not taxable on its profits. Condition B(b) is:

- (b) [i] under the law of a territory other than the one mentioned in subsection (2),  
 [ii] the entity is not regarded as a distinct and separate person to an entity or entities that are distinct and separate persons under the law of the territory mentioned in that subsection.

In short, in some territory the entity-person lacks personality. But in that case it cannot be taxable on its profits: what does this add to condition B(a)? Perhaps the purpose is to facilitate the definition of “investor” set out below.

**INTM550580 Hybrid entities, residence, investors and investor jurisdiction** [Dec 2019]

... For example, a UK company which has elected to be disregarded for US tax purposes under the check the box regime will satisfy condition B. Hybrid entities within Part 6A will include -

- those where applying the domestic law of two territories to the general characteristics of the entity leads to different outcomes as to whether the entity should be regarded as opaque or transparent for tax purposes.
- those where a territory’s domestic law treats an entity of a specific type in a certain manner for tax purposes and that treatment is not followed under the domestic law of other territories.

For example, the income and gains of a UK Limited Liability Partnership (LLP) that carries on a business are treated as transparent under UK tax law. Other territories may treat a UK LLP in line with its form, as a body corporate, and regard it a distinct taxable entity in its own right.

- those where a territory’s domestic law allows certain entities to determine whether they are to be treated as opaque or transparent for tax purposes.

For example the US tax code allows entities to make an election to be treated as transparent or opaque for tax purposes under their check the box rules.

87.15.4 *Investor in hybrid*

Section 259BE(4) TIOPA provides:

For the purposes of this Part [Part 6A, hybrids/mismatches]-

- (a) where subsection (3)(a) applies, a person who is treated as having the income or profits of the hybrid entity is an “investor” in it,
- (b) where subsection (3)(b) applies, an entity that-
  - (i) is regarded as a distinct and separate person to the hybrid entity under the law of the territory mentioned in subsection (2), but
  - (ii) is not regarded as a distinct and separate person to the hybrid entity under the law of another territory, is an “investor” in the hybrid entity...

In a case within para (a), the investor will normally be a member of the entity. In a para (b) case the entity itself is the “investor” in the entity.

#### 87.15.5 *Investor jurisdiction*

Section 259BE TIOPA provides:

- (4) For the purposes of this Part [Part 6A, hybrids/mismatches] ...
  - (c) any territory under the law of which an investor is within the charge to a tax is an “investor jurisdiction” in relation to that investor.

### 87.16 Chap 7 application conditions

Section 259GA contains the conditions that must be met for Chapter 7 to apply. Section 259GA(1) TIOPA provides:

This Chapter [Chapter 7] applies if conditions A to E are met.

I refer to “**Chapter 7 conditions A to E**”.

#### 87.16.1 *Chap 7 condition A: arrangement*

Section 259GA(2) TIOPA provides:

Condition A is that a payment or quasi-payment is made under, or in connection with, an arrangement.

It is hard to see how there could not be an arrangement.

#### 87.16.2 *Chap 7 condition B: hybrid payee*

Section 259GA(3) TIOPA provides:

Condition B is that a payee is a hybrid entity (a “hybrid payee”).

### 87.16.3 Chap 7 condition C: CT payer/investor or LLP

Section 259GA(4) TIOPA provides:

Condition C is that-

- (a) the payer is within the charge to corporation tax for the payment period,
- (b) an investor in a hybrid payee is within the charge to corporation tax for an accounting period some or all of which falls within the payment period, or
- (c) a hybrid payee is a limited liability partnership.<sup>66</sup>

These are alternatives: only one need be satisfied.

### 87.17 Chap 7 condition D: D/NI mismatch

Section 259GA(5) TIOPA provides:

Condition D is that it is reasonable to suppose<sup>67</sup> that, disregarding the provisions mentioned in subsection (6), there would be a hybrid payee deduction/non-inclusion mismatch in relation to the payment or quasi-payment (see section 259GB).

Section 259GA(6) TIOPA identifies the disregarded provisions:

The provisions are-

- (a) This Chapter [Chapter 7] and Chapters 8 to 10, and
- (b) any equivalent provision under the law of a territory outside the UK.

#### 87.17.1 Hybrid payee D/NI mismatch

“Hybrid payee deduction/non-inclusion mismatch” is a clumsy phrase, but it is difficult to think of a better one.

Section 259GB defines:

- (1) hybrid payee deduction/non-inclusion mismatch and
- (2) the amount of the mismatch

Section 259GB(1) TIOPA provides:

There is a “hybrid payee deduction/non-inclusion mismatch”, in relation

---

<sup>66</sup> See 87.22 (Hybrid LLP payee).

<sup>67</sup> See App.2.21 (Reasonable-to-assume).

to a payment or quasi-payment, if-

- (a) the relevant deduction exceeds the sum of the amounts of ordinary income that, by reason of the payment or quasi-payment, arise to each payee for a permitted<sup>68</sup> taxable period, and
- (b) all or part of that excess arises by reason of one or more payees being hybrid entities.

### 87.17.2 *Amount of mismatch*

Section 259GB(2) TIOPA provides:

The extent of the hybrid payee deduction/non-inclusion mismatch is equal to the excess that arises as mentioned in subsection (1)(b).

### 87.17.3 *Deemed mismatch amount*

Section 259GB TIOPA provides:

- (3) A relevant amount of the excess is to be taken (so far as would not otherwise be the case) to arise as mentioned in subsection (1)(b) where-
  - (a) a payee is a hybrid entity,
  - (b) there is no territory-
    - (i) where that payee is resident for the purposes of a tax charged at a higher rate than nil under the law of that territory, or
    - (ii) under the law of which ordinary income arises to that payee, by reason of the payment or quasi-payment, for the purposes of a tax that is charged on that payee by virtue of that payee having a permanent establishment in that territory, and
  - (c) no income arising to that payee, by reason of the payment or

---

68 Defined in subsection (6): "A taxable period of a payee is "permitted" in relation to an amount of ordinary income that arises as a result of the payment or quasi-payment if-

- (a) the period begins before the end of 12 months after the end of the payment period, or
- (b) where the period begins after that-
  - (i) a claim has been made for the period to be a permitted period in relation to the amount of ordinary income, and
  - (ii) it is just and reasonable for the amount of ordinary income to arise for that taxable period rather than an earlier period."

quasi-payment, is brought into account in calculating chargeable profits<sup>69</sup> for the purposes of the CFC charge or a foreign CFC charge.

(4) For the purposes of subsection (3), the “relevant amount” of the excess is the lesser of-

- (a) the amount of the excess, and
- (b) an amount equal to the amount of ordinary income that it is reasonable to suppose<sup>70</sup> would, by reason of the payment or quasi-payment, arise to the payee for corporation tax purposes, if-
  - (i) the payee were a company, and
  - (ii) the payment or quasi-payment were made in connection with a trade carried on by the payee in the UK through a permanent establishment in the UK.

#### 87.17.4 Mismatch: partnership payee

Section 259GB(4A) TIOPA provides:

In applying subsection (4)(b) in a case where the payee is a partnership,<sup>71</sup> it is to be assumed that no amount of ordinary income arises to the payee, by reason of the payment or quasi-payment, if-

- (a) a partner in the partnership is entitled to the amount, and
- (b) having regard only to-
  - (i) the law of the territory where the partnership is established, and
  - (ii) the law of the territory where the partner is resident for tax purposes or, if the partner is not resident anywhere for tax purposes, where the partner is established,

the payee would not be regarded as a hybrid entity.

For a worked example, see 87.27.2 (LLP example: Condition D).

Pibworth explains:

---

<sup>69</sup> Defined in subsection (5): “In subsection (3)(c) “chargeable profits”-

(a) in relation to the CFC charge, has the same meaning as in Part 9A (see section 371VA), and

(b) in relation to a foreign CFC charge, means the concept (by whatever name known) corresponding to chargeable profits within the meaning of that Part.”

<sup>70</sup> See App.2.21 (Reasonable-to-assume).

<sup>71</sup> Defined s.259GB(4B) TIOPA: “In subsection (4A) “partnership” has the meaning given by section 259NE(4).” See 87.26 (Partnership income).

Prior to a recent change to the Hybrid Rules (see below), in certain circumstances, the application of Part 6A Chapter 7 TIOPA potentially gave rise to odd outcomes where there was a partnership in the structure. Let us say that there are three corporate partners (each incorporated in different jurisdictions) each holding a 33.33% share in an English limited partnership, with the partnership holding 100% of the shares in a UK company. The limited partnership advances a loan to the UK company. The UK company is able to claim a deduction for UK corporation tax purposes in respect of interest payments on the loan. Under applicable law, each of the UK company debtor and two of the partners treat the English limited partnership as tax transparent but the third corporate partner treats the partnership as tax opaque.

Given that the English partnership is treated as transparent by two of the partners but opaque by the other, the partnership is treated as a hybrid entity for the purposes of the Hybrid Rules, and so is a hybrid payee for the purposes of Part 6A Chapter 7 TIOPA. On one reading of Chapter 7 it was arguable that because one partner treated the partnership as opaque, then Chapter 7 had the effect of denying in full the deduction for the UK debtor on interest payments to the partnership even though, economically, there was only a deduction/non-inclusion mismatch in respect of 33.33% of any interest paid.

The Hybrid Rules have now been amended to address this outcome where the hybrid payee is a partnership.<sup>26</sup> The effect of this change is to apply Chapter 7 on a partner-by-partner basis which means that there should only be a counteraction under Chapter 7 to the extent of the actual deduction/non-inclusion mismatch. So, in the example above, 33.33% (rather than 100%) of the deduction claimed by the UK debtor would be counteracted under Chapter 7. Helpfully, the Guidance also includes an example addressing this specific scenario noting that the purpose is to ensure that "any disallowance is proportionate".<sup>72</sup>

#### 87.17.5 *Amortisation*

Section 259GB(1A) TIOPA provides:

But there is no hybrid payee deduction/non-inclusion mismatch so far as the relevant deduction is-

- (a) a debit in respect of amortisation that is brought into account under section 729 or 731 of CTA 2009 (writing down the

---

<sup>72</sup> [2018] BTR 247.

- capitalised cost of an intangible fixed asset), or
- (b) an amount that is deductible in respect of amortisation under a provision of the law of a territory outside the UK that is equivalent to either of those sections.

### 87.18 Chap 7 condition E

Section 259GA(7) TIOPA provides:

Condition E is that-

- (a) [i] it is a quasi-payment that is made as mentioned in subsection (2) and  
[ii] the payer is also a hybrid payee (see section 259BB(7)),
- (b) the payer and a hybrid payee or an investor in a hybrid payee are in the same control group (see section 259NB) at any time in the period-
- (i) beginning with the day on which the arrangement mentioned in subsection (2) is made, and
- (ii) ending with the last day of the payment period, or
- (c) that arrangement is a structured arrangement.

These are alternatives: only one need be satisfied.

#### 87.18.1 *Structured arrangement*

This brings in a purpose test. Section 259GA TIOPA provides:

- (8) The arrangement is “structured” if it is reasonable to suppose<sup>73</sup> that-
- (a) the arrangement is designed to secure a hybrid payee deduction/non-inclusion mismatch, or
- (b) the terms of the arrangement share the economic benefit of the mismatch between the parties to the arrangement or otherwise reflect the fact that the mismatch is expected to arise.
- (9) The arrangement may be designed to secure a hybrid payee deduction/non-inclusion mismatch despite also being designed to secure any commercial or other objective.

### 87.19 Chap 7 counteraction: Outline

Assuming the Chapter 7 application conditions are met, we move on.

---

<sup>73</sup> See App.2.21 (Reasonable-to-assume).

Chapter 7 counteracts D/NI mismatches in three ways. In order of priority:

Response	Section	Condition	Counteraction	See para
Primary	259GC	Payer within CT	Non-deduction	87.20
Secondary	259GD	Investor within CT	Charge on investor	87.21
Tertiary	259GE	Hybrid LLP	Treat LLP as corporate	87.22

### 87.20 Counteraction: Disallow deduction

Section 259GC counteracts the D/NI mismatch where the payer is within the charge to corporation tax.

Section 259GC TIOPA provides:

- (1) This section applies where the payer is within the charge to corporation tax for the payment period.
- (2) For corporation tax purposes, the relevant deduction that may be deducted from the payer's income for the payment period is reduced by an amount equal to the hybrid payee deduction/non-inclusion mismatch mentioned in section 259GA(5).

### 87.21 Counteraction: CT charge

Section 259GD counteracts the D/NI mismatch where:

- (1) an investor in the payee is within the charge to corporation tax and
- (2) the mismatch is not counteracted by s.259GC

Section 259GD(1) TIOPA provides:

This section applies in relation to an investor in a hybrid payee where-

- (a) the investor is within the charge to corporation tax for an accounting period some or all of which falls within the payment period, and
- (b) it is reasonable to suppose<sup>74</sup> that-
  - (i) neither section 259GC<sup>75</sup> nor any equivalent provision under the law of a territory outside the UK applies, or
  - (ii) a provision of the law of a territory outside the UK that is equivalent to section 259GC applies, but does not fully counteract<sup>76</sup> the hybrid payee deduction/non-inclusion

<sup>74</sup> See App.2.21 (Reasonable-to-assume).

<sup>75</sup> See 87.21 (Counteraction: Payer within CT).

<sup>76</sup> Defined in subsection (2): "A provision of the law of a territory outside the UK that is equivalent to section 259GC does not fully counteract that mismatch if (and only

mismatch mentioned in section 259GA(5).

### 87.21.1 *Relevant amount*

Section 259GD(3) TIOPA provides:

In this section “the relevant amount” is-

- (a) in a case where subsection (1)(b)(i) applies, an amount equal to the hybrid payee deduction/non-inclusion mismatch, or
- (b) in a case where subsection (1)(b)(ii) applies, the lesser of-
  - (i) the amount by which that mismatch exceeds the amount by which it is reasonable to suppose<sup>77</sup> the relevant deduction is reduced by a provision of the law of a territory outside the UK that is equivalent to section 259GC, and
  - (ii) the amount of the relevant deduction that may still be deducted as mentioned in subsection (2)(b).

### 87.21.2 *Charge on investor*

Section 259GD TIOPA provides:

- (4) If the investor is the only investor in the hybrid payee, the appropriate proportion of the relevant amount is to be treated as income arising to the investor for the counteraction period.
- (5) If there is more than one investor in the hybrid payee, an amount equal to the investor’s share of the appropriate proportion of the relevant amount is to be treated as income arising to the investor for the counteraction period...

The charge is under the miscellaneous income sweep up charge. Section 259GD TIOPA provides:

- [a] An amount of income that is treated as arising under subsection (4) or (5) is chargeable to corporation tax on the hybrid payee (as opposed to being chargeable to tax on any of its members) under

---

if)-

- (a) it does not reduce the relevant deduction by the full amount of the mismatch, and
- (b) the payer is still able to deduct some of the relevant deduction from income in calculating taxable profits.”

<sup>77</sup> See App.2.21 (Reasonable-to-assume).

Chapter 8 of Part 10 of CTA 2009 (income not otherwise charged)<sup>78</sup>  
 [b] (despite section 979(2) of that Act).<sup>79</sup>

### 87.21.3 *Appropriate proportion*

Section 259GD TIOPA provides:

(6) For the purposes of subsections (4) and (5) the “appropriate proportion of the relevant amount”-

- (a) if the hybrid payee is the only hybrid payee, is all of the relevant amount, or
- (b) if there is more than one hybrid payee, is the proportion of the relevant amount apportioned to the hybrid payee upon an apportionment of that amount between all the hybrid payees on a just and reasonable basis having regard (in particular) to-
  - (i) any arrangements as to profit sharing that may exist between some or all of the payees, and
  - (ii) the extent to which it is reasonable to suppose<sup>80</sup> that the hybrid payee deduction/non-inclusion mismatch mentioned in section 259GA(5) arises by reason of each hybrid payee being a hybrid entity.

(7) The investor’s share of the appropriate proportion of the relevant amount is to be determined by apportioning that proportion of that amount between all the investors in the hybrid payee on a just and reasonable basis, having regard (in particular) to any arrangements as to profit sharing that may exist between some or all of those investors.

### 87.21.4 *Counteraction period*

Section 259GD(9) TIOPA provides:

The “counteraction period” means-

- (a) if an accounting period of the investor coincides with the payment period, that accounting period, or
- (b) otherwise, the first accounting period of the investor that is wholly or partly within the payment period.

---

<sup>78</sup> See 32.1 (Misc Sweep-up Income).

<sup>79</sup> Section 979(2) provides that deemed income is not within Chapter 8 Part 10, so it needs to be disappplied to tax the deemed income in this case. See 32.1.3 (Deemed income).

<sup>80</sup> See App.2.21 (Reasonable-to-assume).

## 87.22 Hybrid LLP payee

Section 259GE counteracts the mismatch where

- (1) a payee is a hybrid entity and limited liability partnership and
- (2) the mismatch is not otherwise counteracted

Section 259GE TIOPA provides:

- (1) This section applies in relation to a hybrid payee where
  - [A] the hybrid payee is a limited liability partnership and
  - [B] it is reasonable to suppose<sup>81</sup> that-
    - (a) none of the following provisions applies-
      - (i) section 259GC;
      - (ii) section 259GD;
      - (iii) any provision under the law of a territory outside the UK that is equivalent to either of those sections, or
    - (b) [i] one or more of those provisions apply, but
    - [ii] the hybrid payee deduction/non-inclusion mismatch mentioned in section 259GA(5) is not fully counteracted.

### 87.22.1 Fully counteracted

Section 259GE TIOPA provides:

- (2) The mismatch is not fully counteracted if (and only if), after the application of such of those provisions as apply-
    - (a) the relevant deduction is not reduced by the full amount of the mismatch,
    - (b) the payer is still able to deduct some of the relevant deduction from income in calculating taxable profits, and
    - (c) the lesser of-
      - (i) the difference between the amount of the mismatch and the amount by which it is reasonable to suppose the relevant deduction is reduced, and
      - (ii) the amount of the relevant deduction that may still be deducted,
- exceeds the sum of any amounts of income treated as arising under section 259GD or any equivalent provision under the law of a territory outside the UK.

---

81 See App.2.21 (Reasonable-to-assume).

### 87.22.2 “The relevant amount”

Section 259GE(3) TIOPA provides:

In this section “the relevant amount” is-

- (a) in a case where subsection (1)(a) applies, an amount equal to the hybrid payee deduction/non-inclusion mismatch mentioned in section 259GA(5), or
- (b) in a case where subsection (1)(b) applies, an amount equal to the excess mentioned in subsection (2)(c).

### 87.22.3 Charge on LLP

Section 259GE(4) TIOPA provides:

If the hybrid payee is the only hybrid payee, an amount equal to the relevant amount is to be treated as income arising to the hybrid payee on the last day of the payment period.

### 87.22.4 Multiple hybrid payees

Section 259GE TIOPA provides:

(5) If there is more than one hybrid payee, an amount equal to the hybrid payee’s share of the relevant amount is to be treated as income arising to the hybrid payee on the last day of the payment period.

(6) The hybrid payee’s share of the relevant amount is to be determined by apportioning that amount between all the hybrid payees on a just and reasonable basis, having regard (in particular) to-

- (a) any arrangements as to profit sharing that may exist between some or all of the payees, and
- (b) the extent to which it is reasonable to suppose<sup>82</sup> that the hybrid payee deduction/non-inclusion mismatch mentioned in section 259GA(5) arises by reason of each hybrid payee being a hybrid entity.

### 87.22.5 Charge to CT

Section 259GE(7) TIOPA provides:

An amount of income that is treated as arising under subsection (4) or (5) is chargeable to corporation tax on the hybrid payee (as opposed to being

---

<sup>82</sup> See App.2.21 (Reasonable-to-assume).

chargeable to tax on any of its members) under Chapter 8 of Part 10 of CTA 2009 (income not otherwise charged) (despite section 979(2) of that Act).

This is the same as the charge on the investor in the hybrid; see 87.21.2 (Charge on investor).

Section 259GE(8) TIOPA provides:

[a] Section 863 of ITTOIA 2005 (treatment of certain limited liability partnerships for income tax purposes) and

[b] section 1273 of CTA 2009 (treatment of certain limited liability partnerships for corporation tax purposes)<sup>83</sup>

are disapplied in relation to the hybrid payee to the extent necessary for the purposes of subsection (7).

This switches off the usual LLP deemed partnership/transparency rule. But other transparent entities are not affected.

#### 87.22.6 Pt 6A chapters priority

Section 259GE(9) TIOPA provides:

This section is to be disregarded for the purposes of determining whether the hybrid payee is within the charge to corporation tax for the purposes of any other provision of this Part [Part 6A, hybrids/mismatches], except section 259M (anti-avoidance).

### 87.23 Hybrids TAAR

Section 259M(1) TIOPA provides:

This section applies where-

- (a) relevant avoidance arrangements exist,
- (b) as a result of those arrangements, any person (whether party to the arrangements or not) would, apart from this section, obtain a relevant tax advantage, and
- (c) that person is-
  - (i) within the charge to corporation tax at the time the person would obtain the relevant tax advantage, or
  - (ii) would be within the charge to corporation tax at that time but for the relevant avoidance arrangements.

---

83 See 82.21.1 (LLP treated as partnership).

### 87.23.1 *Counteraction*

Section 259M TIOPA provides:

- (2) The relevant tax advantage is to be counteracted by making such adjustments to the person's treatment for corporation tax purposes as are just and reasonable.
- (3) Any adjustments required to be made under this section (whether or not by an officer of Revenue and Customs) may be made by way of an assessment, the modification of an assessment, amendment or disallowance of a claim, or otherwise.

This is a counteraction-style TAAR.

### 87.23.2 *Relevant tax advantage*

Section 259M TIOPA provides:

- (4) A person obtains a "relevant tax advantage" if-
  - (a) the person avoids, to any extent, any provision of this Part [Part 6A, hybrids/mismatches], or any equivalent provision of the law of a territory outside the UK, restricting whether or how that person may make a deduction from income for the purposes of calculating taxable profits, or
  - (b) the person avoids, to any extent, an amount being treated as income of that person under any provision of this Part [Part 6A, hybrids/mismatches] or any equivalent provision of the law of a territory outside the UK.

### 87.23.3 *Relevant avoidance arrangements*

Section 259M(5) TIOPA provides:

"Relevant avoidance arrangements" means arrangements the main purpose, or one of the main purposes, of which is to enable any person to obtain a relevant tax advantage.

So far this is standard "tax advantage" wording, but s.259M then brings in an avoidance test (already suggested by use of the word "avoids" in the definition of "relevant tax advantage"):

- (6) But arrangements are not "relevant avoidance arrangements" if the obtaining of the relevant tax advantage can reasonably be regarded as consistent with the principles on which the provisions of this Part [Part

6A, hybrids/mismatches], or the equivalent provisions under the law of a territory outside the UK, that are relevant to the arrangements are based (whether express or implied) and the policy objectives of those provisions.

(7) For the purposes of determining the principles and policy objectives mentioned in subsection (6), regard may, where appropriate, be had to the Final Report on Neutralising the Effects of Hybrid Mismatch Arrangements published by the Organisation for Economic Cooperation and Development (“OECD”) on 5 October 2015 or any replacement or supplementary publication.<sup>84</sup>

## 87.24 Minor definitions

### 87.24.1 “Tax”

Section 259B TIOPA provides:

- (1) In this Part [Part 6A, hybrids/mismatches] “tax” means-
  - (a) income tax,
  - (b) the charge to corporation tax on income,
  - (c) diverted profits tax,
  - (d) the CFC charge,
  - (e) foreign tax, or
  - (f) a foreign CFC charge.
- (2) In subsection (1) “foreign tax” means a tax chargeable under the law of a territory outside the UK so far as it-
  - (a) is charged on income and corresponds to UK income tax, or
  - (b) is charged on income and corresponds to the UK charge to corporation tax on income.
- (3) A tax is outside the scope of subsection (2) if it-
  - (a) is chargeable under the law of a province, state or other part of a country, or
  - (b) is levied by or on behalf of a municipality or other local body.
- (3A) The payment of any withholding tax in respect of any amount is to be ignored for the purposes of this Part [Part 6A, hybrids/mismatches].

CGT is not within the definition of tax; likewise CT on chargeable gains.

---

<sup>84</sup> Defined in s.259M(8) TIOPA: “In subsection (7) “replacement or supplementary publication” means any document that is approved and published by the OECD in place of, or to update or supplement, the report mentioned in that subsection (or any replacement of, or supplement to, it).”

So CGT mismatches are not caught.

The INT Manual provides:

**INTM550520 Meaning of tax** [Dec 2019]

... For example, US Federal taxes on income correspond to the UK taxes, being imposed at national level, and so are regarded as foreign tax within Part 6A. US State taxes are not foreign tax within Part 6A - they do not correspond to UK taxes on income because they are not imposed at national level and there is another tax in the US that is.

Sales or turnover taxes are not foreign taxes that correspond to the UK income tax or charge to corporation tax on income in the UK.

Withholding taxes are specifically excluded from Part 6A (259B(3A)).

87.24.2 “Residence”

Section 259B(5) TIOPA provides:

In any case where-

- (a) a person is resident in a territory outside the UK generally for the purposes of the law of the territory or for particular purposes under that law, and
- (b) the law of the territory has no provision for a person to be resident for tax purposes under its law,

any reference in Chapter 8 or 11 to a person’s residence for tax purposes in the territory is to be read as a reference to the person’s residence as mentioned in paragraph (a).

87.24.3 *Equivalent foreign provision*

Section 259BA TIOPA provides:

(1) A reference in this Part [Part 6A, hybrids/mismatches] to provision under the law of a territory outside the UK that is equivalent to-

- (a) this Part [Part 6A, hybrids/mismatches], or
- (b) a provision of this Part,

is to be read in accordance with subsection (2).

(2) The reference is to provision under the law of a territory outside the UK that it is reasonable to suppose<sup>85</sup>-

- (a) is based on the Final Report on Neutralising the Effects of Hybrid Mismatch Arrangements published by the Organisation for Economic Cooperation and Development (“OECD”) on 5

---

85 See App.2.21 (Reasonable-to-assume).

October 2015 or any replacement or supplementary publication,  
and

(b) has effect for the same, or similar, purposes to this Part or (as the case may be) the provision of this Part.

(3) In paragraph (a) of subsection (2) “replacement or supplementary publication” means any document that is approved and published by the OECD in place of, or to update or supplement, the report mentioned in that paragraph (or any replacement of, or supplement to, it).

#### 87.24.4 “Taxable period”

Section 259NF ITTOIA provides a commonsense definition:

“taxable period” means—

(a) in relation to corporation tax, an accounting period,

(b) in relation to income tax, a tax year,

(c) in relation to the CFC charge, a relevant corporation tax accounting period (within the meaning given by section 371BC(3)),

(d) in relation to a foreign CFC charge, a period (by whatever name known) that corresponds to a relevant corporation tax accounting period,  
and

(e) in relation to any other tax, a period for which the tax is charged;

#### 87.25 “Control group”

This matters for Chapter 7 Condition E, among other matters.

Section 259NB(1) TIOPA provides:

A person (“A”) is in the same control group as another person (“B”)-

(a) throughout any period for which they are consolidated for accounting purposes,

(b) on any day on which the participation condition is met in relation to them, or

(c) on any day on which the 50% investment condition is met in relation to them.

Thus there are three conditions, or sets of conditions, only one of which needs to be satisfied.

##### 87.25.1 *Consolidated for accounting*

Section 259NB(2) TIOPA provides:

A and B are consolidated for accounting purposes for a period if-

- (a) their financial results for the period are required to be comprised in group accounts,<sup>86</sup>
- (b) their financial results for the period would be required to be comprised in group accounts but for the application of an exemption, or
- (c) their financial results for the period are in fact comprised in group accounts.

### 87.25.2 Participation condition

Section 259NB(4) TIOPA provides:

The participation condition is met in relation to A and B (“the relevant parties”) on a day if, within the period of 6 months beginning with the day-

- (a) one of the relevant parties directly or indirectly participates in the management, control or capital of the other, or
- (b) the same person or persons directly or indirectly participate in the management, control or capital of each of the relevant parties.

This brings in a wide and complex set of tests.<sup>87</sup>

### 87.25.3 50% investment condition

Section 259NB(6) TIOPA provides:

The 50% investment condition is met in relation to A and B if-

- (a) A has a 50% investment in B, or
- (b) a third person has a 50% investment in each of A and B.

The definition of “50% investment” is in s.259ND TIOPA; see 100.8 (% investment tests).

---

86 Defined in subsection (3): “In subsection (2), “group accounts” means accounts prepared under-

- (a) section 399 of the Companies Act 2006, or
- (b) any corresponding provision of the law of a territory outside the UK.”

87 Section 259NB(5) provides a signpost: “For the interpretation of subsection (4), see sections 157(1), 158(4), 159(1) and 160(1) (which have the effect that references in subsection (4) to direct or indirect participation are to be read in accordance with provisions of Chapter 2 of Part 4).” See 100.1, 14.1 (Participation).

#### 87.25.4 Acting together

Section 259ND TIOPA provides:

(6) For the purposes of subsections (3) and (4), in determining what percentage investment a person (“P”) has in another person (“U”), where P acts together with a third person (“T”) in relation to U, P is to be taken to have all of T’s rights and interests in relation to U.

(7) P is to be taken to “act together” with T in relation to U if (and only if)-

- (a) P and T are connected (within the meaning given by section 163),<sup>88</sup>
- (b) for the purposes of influencing the conduct of U’s affairs-
  - (i) P is able to secure that T acts in accordance with P’s wishes,
  - (ii) T can reasonably be expected to act, or typically acts, in accordance with P’s wishes,
  - (iii) T is able to secure that P acts in accordance with T’s wishes, or
  - (iv) P can reasonably be expected to act, or typically acts, in accordance with T’s wishes,
- (c) P and T are party to any arrangement that-
  - (i) it is reasonable to suppose<sup>89</sup> is designed to affect the value of any of T’s rights or interests in relation to U, or
  - (ii) relates to the exercise of any of T’s rights in relation to U, or
- (d) the same person manages-
  - (i) some or all of P’s rights or interests in relation to U, and
  - (ii) some or all of T’s rights or interests in relation to U.

(8) But P does not “act together” with T in relation to U under paragraph (d) of subsection (7) where-

- (a) the person who manages the rights or interests of P mentioned in sub-paragraph (i) of that paragraph, does so as the operator of a collective investment scheme,<sup>90</sup>
- (b) that person manages the rights or interests of T mentioned in sub-paragraph (ii) of that paragraph as the operator of a different

---

88 See 100.6 (s.161 test: s.148, 175 financing).

89 See App.2.21 (Reasonable-to-assume).

90 Defined by reference in subsection (9): “In subsection (8) "collective investment scheme" and "operator" have the same meaning as in Part 17 of the Financial Services and Markets Act 2000 (see sections 235 and 237 of that Act).”

- collective investment scheme, and
- (c) the Commissioners are satisfied that the management of the schemes is not coordinated for the purpose of influencing the conduct of U's affairs.

## 87.26 Partnership income

Section 259NE TIOPA provides:

- (1) This section applies where a person is a member of a partnership.<sup>91</sup>
- (2) Any reference in this Part [Part 6A, hybrids/mismatches] to income, profits or an amount of the person includes a reference to the person's share of (as the case may be) income, profits or an amount of the partnership.

That seems self evident, since partnerships are transparent.

- (3) For this purpose "the person's share" of income, profits or an amount is determined by apportioning the income, profits or amount between the partners on a just and reasonable basis.

The INT Manual provides:

### **INTM550630 Partnership and partnership members [Dec 2019]** **Partnerships**

There is no definition of a partnership for the purposes of Part 6A TIOPA 2010, so the term will take its usual meaning in UK law, that is, the relation between persons carrying on a business in common with a view to profit.

259NE considers partnerships and the treatment of a person who is a member of a partnership.

A partnership is a person for the purposes of the hybrid mismatch rules. A partnership is regarded as transparent for UK tax purposes, with the result that the partnership's income, profits etc. are treated as the income, profits etc. of its partners. However, some partnerships may be treated as opaque under the tax laws of other territories, leading to potential hybrid mismatches.

---

91 Section 259NE(4) TIOPA provides a foreign entity definition: "In this section-

(a) "partnership" includes an entity established under the law of a territory outside the UK of a similar character to a partnership, and

(b) "member" of a partnership is to be read accordingly."

This is unnecessary but harmless; see 86.1.1 (Foreign-entity definitions).

S259NE(4)(a) includes entities established under the law of a territory outside the UK that are of a similar character to a UK partnership. An entity regarded as transparent is not necessarily of a similar character to a UK partnership and must be considered on the full facts and characteristics. This subsection is intended to ensure that the treatment of non-UK partnerships, for Part 6A purposes, is consistent with the treatment of UK partnerships and not to extend the definition of a partnership...

## 87.27 HMRC example: LLP

### INTM555210 Calculating the mismatch where there are multiple payees [Dec 2019]

#### Background

- ABC Partnership is established in Country X, which regards it as transparent for tax purposes.
- ABC Partnership holds all the issued share capital in UK Co, which is resident in the UK and liable to tax there. The UK regards ABC Partnership as transparent for tax purposes.
- Trust A, which is established in Country A, is a partner in ABC Partnership. Country A regards ABC Partnership as transparent for tax purposes.
- Trust A is entitled to a 40% share of the profits etc. of ABC Partnership.
- Trust A is a tax exempt entity in Country A, and is not taxed on profits etc. derived from ABC Partnership.
- Individual B, who is resident in Country B, is a partner in ABC Partnership. Country B regards ABC Partnership as transparent for tax purposes.
- Individual B is entitled to a 50% share of the profits etc. of ABC Partnership.
- Individual B is liable to tax in Country B on the profits etc. derived from ABC Partnership.
- C Co, resident in Country C, is a partner in ABC Partnership. Country C regards ABC

Partnership as opaque.

- C Co is entitled to a 10% share of the profits etc. of ABC Partnership.
- C Co is liable to tax on its own profits etc. in Country C, but is not liable to tax on profits etc. derived from ABC Partnership.
- UK Co makes a payment of interest to ABC Partnership in respect of a loan from ABC Partnership.

<b>Dramatis personae: State</b>	<b>Taxed in home State</b>	<b>State view LLP</b>	<b>Payee</b>
LLP: State X	No (as transparent)	Transparent	
UK Co	Yes (subject to CT)	Transparent	Yes
Trust A: State A	No (as tax exempt)	Transparent	No
B: State B	Yes	Transparent	Yes
C Ltd: State C	No (as LLP opaque)	Opaque	No

### 87.27.1 LLP: Chap 7 application conditions

#### **Analysis – Applying the tests in s259GA TIOPA 2010**

Does the interest payment satisfy the relevant conditions and fall within the scope of the hybrid payee deduction/non-inclusion mismatch rules?

I think the chapter 7 application conditions are straightforward, apart from condition D.

#### **Condition A: Is a payment made under, or in connection with, an arrangement?**

There is a payment of interest by UK Co to ABC Partnership under the loan agreement. The loan agreement is an arrangement.

Condition A is satisfied.

#### **Condition B: Is a payee a hybrid entity?**

ABC Partnership is a hybrid entity because Country C regards it as a person for tax purposes, whilst Countries A, B, X and Z treat some or all of its income or profits as belonging to another person/persons for tax purposes.

*[Who are Payees]*

Trust A is not a payee because

- [1] it is not a person to whom a transfer is made,<sup>92</sup> and
- [2] as a tax-exempt entity, ordinary income is not brought into account for the purposes of calculating the profits on which a relevant tax is charged.

Company C is not a payee because

- [1] it is not a person who whom a transfer is made, and
- [2] because Country C regards ABC Partnership as opaque, so ordinary income does not arise on Company C as a result of the payment.

Condition B is satisfied.

---

92 Author's footnote: Point [2] is right but is point [1] right and does it matter?

**Condition C: Is the payer or an investor within the charge to corporation tax for the relevant period, or is the hybrid payee a limited liability partnership?**

The charge to corporation tax is the charge to corporation tax in the UK. UK Co, the payer, is liable to corporation tax in the UK.

Condition C is satisfied.

*87.27.2 LLP example: Condition D***Condition D: Is it reasonable to suppose that there is, or will be, a hybrid payee deduction/non-inclusion mismatch in relation to the payment?**

It is reasonable to suppose that UK Co will be permitted a deduction of £1,000 from income for the interest payment made (the relevant deduction) for a taxable period.

It is also reasonable to suppose that

- ABC Partnership does not have any ordinary income arising as a result of the payment,
- Individual B will have ordinary income of £500 representing 50% of the payment.
- Neither Trust A nor C Co have ordinary income arising as a result of the payment made by UK Co.

There is a hybrid payee deduction/non-inclusion mismatch under s259GB(1) if

- the relevant deduction exceeds the sum of ordinary income arising to each payee, and
- all or part of the excess arises by reason of one or more payees being hybrid.

In this case, the relevant deduction of £1,000 is matched by ordinary income of £500 arising to a payee (Individual B). The excess is therefore £500, representing the amounts attributable to Trust A and C Co by ABC Partnership.

The next step is to test whether that excess of £500 arises by reason of ABC Partnership being a hybrid entity. Part of the excess, the amount of £100 allocated to C Co, arises by reason of ABC Partnership being a hybrid entity. If Country C viewed ABC Partnership as transparent, then the amount allocated to C Co would be ordinary income of C Co and no mismatch would arise.

The £400 allocated to Trust A, does not arise by reason of ABC Partnership being a hybrid entity as both Country X and Country A view ABC Partnership as transparent. However, the provisions at section 259GB(3) that may apply to treat part of the excess as arising by reason of ABC Partnership being a hybrid entity (to the extent that is not already the case).

Section 259GB(3) treats a relevant amount of the excess to arise by reason of one on the payees being a hybrid entity where -

- a payee is a hybrid entity, and
- that payee is not resident for tax purposes in any territory,
- that payee does not have ordinary income from a permanent establishment in any territory as a consequence of the payment, and
- income arising to that payee is not brought into account in computing profits for a CFC charge.

Applying these tests to the facts given –

- ABC Partnership is a payee
- ABC Partnership is a hybrid entity,
- there is no territory where ABC Partnership is resident for the purposes of a tax charged under the law of that territory,
- there is no territory where ABC Partnership has ordinary income arising from a permanent establishment and
- no income arises to ABC Partnership which is brought into account for the purposes of a CFC charge.

As the conditions for s259GB(3) are met the next step is to establish what the relevant amount of the excess is that needs to be considered. The relevant amount is computed as set out in s259GB(4), as amended by s259GB(4A) in partnership cases.

Section 259GB(4) defines the relevant amount of the excess as the lower of –

- the amount of the excess, and
- an amount equal to the amount of ordinary income that it is reasonable to suppose would arise to the payee if the payee were a company trading in the UK through a UK permanent establishment and the payment was received in connection with that trade.

This amount of ordinary income to be used in this comparison is amended by s259GB(4A) where –

- the payee is a partnership,
- a partner in the partnership is entitled to an amount of the payment, and
- the partnership would not be regarded as a hybrid entity under the laws of the territories where the partnership and the relevant partner are tax resident/established.

If these conditions are met, it is assumed that no ordinary income arises to the payee for the amount of the payment to which the partner is entitled when carrying out the comparison at s259GB(4).

In this example, the conditions under s259GB(4A) are met in relation to Trust A as -

- ABC Partnership is a payee and is a partnership
- Trust A is entitled to £400 of the payment of £1,000 received by ABC Partnership
- ABC Partnership would not be regarded as a hybrid entity if only the laws of Country A and Country X applied.

Consequently, for the purposes of the comparison at s259GB(4) it is assumed that no ordinary income arises to the ABC Partnership to the extent of the amount of £400 to which Trust A is entitled.

The conditions under s259GB(4A) are also met in relation to Individual B as -

- ABC Partnership is the payee and is a partnership
- Individual B is entitled to £500 of the payment of £1,000 received by ABC Partnership
- ABC Partnership would not be regarded as a hybrid entity if only the laws of Country B and Country X applied.

Consequently, for the purposes of the comparison at s259GB(4) it is assumed that no ordinary income arises to the ABC Partnership to the extent of the amount of £500 to which Individual B is entitled.

The conditions under s259GB(4A) are not met in relation to C Co as ABC Partnership is regarded as a hybrid entity if the laws of Country C and the UK are applied.

Returning to comparison under s259GB(4) the relevant amount of the excess is £100, that

is, the lower of–

- £500, the excess, and
- £100, the amount of ordinary income that would arise to ABC Partnership in respect of the payment of £1,000, as reduced in respect of Trust A and Individual B under s259GB(4A).

As the relevant amount of the excess is the £100 already identified as a hybrid payee deduction/non-inclusion mismatch under s259GB(1)(b), there is no need to deem a further amount of the excess as arising by reason of the hybridity of ABC Partnership.

Condition D is satisfied, and the extent of the hybrid payee deduction/non-inclusion mismatch is £100.

**Condition E: Are the payer and the hybrid payee or investor in the same control group or is there a structured arrangement?**

UK Co (the payer) and ABC Partnership (the hybrid payee) are in the same control group as ABC Partnership owns 100% of the issued shares in UK Co.

UK Co (the payer) and Individual B (an investor in the hybrid payee) are in the same control group as Individual B has a 50% investment in UK Co.

Condition E is satisfied.

There is no indication that this is a structured arrangement.

**Conclusion**

All the relevant conditions are satisfied to characterise the arrangement as a hybrid payee deduction/non-inclusion mismatch, so the relevant counteractions will need to be considered.

### 87.27.3 *LLP example: Counteraction*

**Counteraction where the UK is the payer jurisdiction**

**Primary Response**

As the UK is the payer jurisdiction, s259GC applies to reduce the deduction available to UK Co by the extent of the hybrid payee deduction/non-inclusion mismatch.

In this instance, UK Co would be denied £100 of the £1,000 deduction.

**Counteraction where the UK is in the position of Country B (investor jurisdiction)**

**Secondary Response**

If the UK were in the position of Country B, counteraction under s259GD should be considered to the extent that the mismatch is not countered under s259GC (or a non-UK equivalent provision).

In this instance, s259GD cannot apply as Individual B includes their share of the income from the partnership as ordinary income, and in any case an individual is not within the charge to corporation tax.

[If Individual B were a company (B Co), it did not include its 50% share of partnership income in ordinary income and there was no primary response to counter this mismatch, s259GD(4) would apply to treat the hybrid payee deduction/non-inclusion mismatch as income of B Co].

**Counteraction where a hybrid payee is a UK Limited Liability Partnership (LLP)**

**(UK is Country X)****Tertiary response**

If ABC Partnership were a UK LLP then, to the extent that the hybrid payee deduction/non-inclusion mismatch has not already been fully counteracted under s259GC or s259GD (or non-UK equivalent provisions), s259GE applies.

Under s259GE(4) an amount equal to the hybrid payee deduction/non-inclusion mismatch (that is, £100 of the deduction claimed by UK Co) is treated as income of ABC Partnership arising on the last day of the payment period. This income is brought within the charge to corporation tax on ABC Partnership under Chapter 8 of Part 10 of CTA 2009.

S259GE(8) dis-applies s863 ITTOIA 2005 (treatment of certain limited liability partnerships for income tax purposes) and s1273 CTA 2009 (treatment of certain limited liability partnerships for corporation tax purposes) in relation to ABC Partnership to the extent needed to give effect to the counteraction under s259GD.

**87.28 HMRC example: tax-exempt investor**

**INTM555220: Hybrids: Chapter 7 - Hybrid Payee: Example: investor is a tax-exempt entity [Dec 2019]**

**Background**

Note: A reverse hybrid is any person that is treated as a separate entity by an investor and as transparent under the laws of the establishment jurisdiction. A deductible payment made to a reverse hybrid payee may give rise to a mismatch in tax outcomes, where that payment is not included in the ordinary income in the jurisdiction where the payee is established, or in the jurisdiction of any investor in that payee.

- A Co is a company resident in Country Y
- A Co is exempt from tax under Country Y law
- B Co is an entity incorporated in Country X and is wholly owned by A Co
- Country X treats B Co as transparent for X tax purposes, i.e. it is not a separate taxable person from A Co
- Country Y treats B Co as opaque, i.e. as a separate taxable person from A Co
- Borrower Co is a company resident in Country X, and is not connected to either A Co or B Co

- Borrower Co borrows money from B Co on arm's length and standard commercial terms (the Loan)
- Country X allows Borrower Co a deduction for interest payments made on the loan
- Country X does not tax the interest receipt by B Co as it regards the income as belonging to A Co.
- Country Y does not tax the interest receipt as it regards the income as belonging to B Co (a company resident in Country X).
- The arrangements have been designed to secure a hybrid mismatch.

**Analysis – Applying the tests in s259GA TIOPA 2010**

Do the interest payments satisfy the relevant conditions and thus fall within the scope of the hybrid payee deduction/non-inclusion mismatch rules?

**Condition A: Are payments made under, or in connection with, an arrangement?**

Transactions took place resulting in a transfer of money (the interest payments) directly from Borrower Co (payer) to B Co (payee), which represents a payment.

There was an arrangement (the Loan agreement), and payments were made under that arrangement.

Condition A is therefore satisfied.

**Condition B: Is the payee a hybrid entity?**

B Co is the payee. Country X regards B Co as transparent for tax purposes, so the income or profits are treated by Country X as those of A Co. Country Y treats B Co as a taxable person separate from A Co, and regards the income as arising to B Co (a company resident in Country X).

B Co has the characteristics of a hybrid entity, and Condition B is met.

When a person (in this instance, B Co) is treated as a separate entity by an investor (A Co) and as transparent under the laws of the establishment jurisdiction (Country X), this is a reverse hybrid.

**Condition C: Is the payer or investor within the charge to corporation tax for the relevant period, or is the hybrid payee a limited liability partnership?**

The charge to corporation tax is the charge to corporation tax in the UK. In this example condition C will be satisfied if

- the UK is Country X, or
- the UK is Country Y, or
- the hybrid payee is a LLP

If none of these circumstances are satisfied then Condition C is not met, and it is not necessary to consider the remaining conditions.

**Condition D: Is it reasonable to suppose that there is, or will be, a hybrid payee deduction/non-inclusion mismatch in relation to the payment?**

Given the background above it is reasonable to suppose that if the hybrids legislation, or its foreign equivalent, did not apply

- Borrower Co would deduct an amount from income for the interest paid on the Loan (the relevant deduction), and
- Neither B Co nor A Co would include the interest received from Borrower Co in its ordinary income.

This mismatch arises as a consequence of the contrasting treatment of B Co for tax purposes in Country X and Country Y, so is directly attributable to the fact that B Co is

a hybrid entity. If B Co had been recognised as an entity separate from A Co in Country X it is reasonable to suppose that B Co would have included the interest payments in its ordinary income.

Condition D is satisfied.

**Condition E: Is the payer also a hybrid payee, are the payer and either the hybrid payee or the investor within the same control group or is there a structured arrangement?**

This condition has three possible tests that can be met, so we must examine these in turn. If any of the three are met then this condition is met.

In this example, the payer (Borrower Co) is not a hybrid payee. Condition E is not met by this test.

The hybrid payee, B Co, is not in the same control group as Borrower Co. Condition E is not met by this test.

However, the arrangements were designed to secure the mismatch, so there is a structured arrangement.

Condition E is satisfied.

**Amount of the mismatch**

If conditions A to E are satisfied, the payment of interest by Borrower Co under the Loan is a hybrid payee deduction/non-inclusion mismatch, and UK counteraction must be considered.

The extent of the mismatch must be calculated by quantifying the excess, which in this example is given by

- the amount of Borrower's deduction from income for the interest paid, less
  - the amount of that interest payment included as ordinary income of A Co and B Co.
- How much of that amount arises because B Co is a hybrid entity is then considered. In this example, if B Co were not a hybrid entity then either B Co would be recognised by Country X as a separate taxable person or Country Y would recognise it as a transparent entity. In either scenario it would be reasonable to suppose that the amount of ordinary income, equal to the interest received, would be recognised, and that a mismatch would not arise.

The extent of the mismatch arising by reason of B Co being a hybrid entity is therefore the full amount of the interest.

**Conclusion**

Assuming all the relevant conditions are satisfied to characterise the arrangement as a 'hybrid payee deduction/non-inclusion mismatch', the relevant counteractions will need to be considered.

**Counteraction**

The counteraction applicable will depend upon whether the UK is in the position of Country X or Country Y or if B Co is an LLP.

**Counteraction where the UK is in the position of Country X (payer jurisdiction)**

**Primary Response**

The primary counteraction is against the payer.

If the UK is Country X (the payer jurisdiction) Borrower Co's deduction for interest payments to B Co is restricted (s259GC).

**Counteraction where the UK is in the position of Country Y (investor jurisdiction)**

### Secondary Response

In this example, if the UK is Country Y and it is concluded that Country X has no provisions that apply to counteract the mismatch on the payer, then the UK legislation applies to treat the entire mismatch as income of A Co.

If it is concluded that Country X has provisions that apply but they do not fully counteract the mismatch then the UK provisions apply to treat part of the mismatch as income of A Co, to ensure the hybrid payee deduction/non-inclusion mismatch is fully counteracted.

### Counteraction where B Co is an LLP

#### Tertiary Response

In this example the tertiary response (counteraction against a LLP that is a hybrid payee) is unlikely to apply - as both the payer and the hybrid payee are resident in the UK, the primary response applied against the payer takes priority, and will fully counteract the mismatch.

## 87.29 HMRC example: Reverse hybrid

**INTM555230: Example: Payments to hybrid entity (reverse hybrid) partially excluded** [Dec 2019]

### Background

- Two individuals, one resident in Country Y (Individual A) and one in Country Z (Individual B) agree to make a loan to A Co.
- Individual A wholly owns A Co.
- Individual A and Individual B each hold 50% of the voting power in B Co.
- B Co is incorporated in Country Z.

- B Co is treated by Country Z as transparent (i.e. its income or profits are treated in Country Z as those of Individual A and Individual B).
- Individuals A & B do not make the loan directly to A Co but make equal contributions of the relevant amount into B Co, which then loans this amount to A Co (the Loan).
- The Loan does not satisfy the conditions required to fall within the ‘hybrids and other mismatches from financial instruments’ rules. This is because the mismatch does not arise from a feature of the instrument but rather because of the presence of a hybrid entity.
- A Co pays interest on the Loan and may claim a deduction for that expense in Country Y.
- B Co attributes half the interest receivable to Individual A and half to Individual B.
- Individual B is subject to tax on his share of the interest receivable at the full marginal rate applicable to interest income in Country Z.
- Individual A does not include the interest receivable in his ordinary income in either Country Z or Country Y. Country Z does not tax foreign source income attributable to a non-resident person. Country Y recognises B Co as a separate person for tax purposes so Individual A is not subject to tax on income from B Co.

Note: In practice the background above may not be easily obtained from the relevant tax return. If standard information requests to the relevant company do not address concerns it may be necessary to consider other powers available, such as 3rd party information notices or potential cross-country information requests (through JITSIC). Your local International Tax Specialist may have further information on how certain entities are characterised for tax purposes under foreign tax regimes.

#### **Analysis – Applying the tests in s259GA TIOPA 2010**

Do the interest payments satisfy the relevant conditions and thus fall within the scope of the hybrid payee deduction/non-inclusion mismatch rules?

#### **Condition A: Are payments made under, or in connection with, an arrangement?**

Transactions took place resulting in a transfer of money (the interest payments) from A Co. (payer) to B Co (payee), which represents a payment.

There was an arrangement encompassing the contributions to B Co, the Loan agreement with A Co, and the allocation of that interest to Individual A and Individual B.

Condition A is satisfied.

#### **Condition B: Is a payee a hybrid entity?**

The payees are B Co (the person receiving the interest payment), and Individual B (who has ordinary income arising as a result of the payment).

Country Y regards B Co as a separate taxable person to Individual A. Country Z regards B Co. as transparent so treats B Co’s interest receipts as ordinary income of Individual A and Individual B. .

B Co has the characteristics of a hybrid entity, and Condition B is met. A reverse hybrid is any person that is treated as a separate entity by an investor and as transparent under the laws of the establishment jurisdiction.

Individual B is not a hybrid entity, as he is regarded as a person under the laws of both Country Z and Country Y.

#### **Condition C: Is the payer or an investor within the charge to corporation tax for the relevant period, or is the hybrid payee a limited liability partnership?**

The charge to corporation tax is the charge to corporation tax in the UK. In this example condition C can be satisfied if

- the UK is Country Y (the payer jurisdiction), or
- the UK is Country Z and the hybrid payee is a LLP.

If the UK is neither Country Y nor Country Z condition C is not met, and it is not necessary to consider the remaining conditions.

If that is the case, and the mismatch is not countered by another territory, the imported mismatch rules at Chapter 11 should be considered.

**Condition D: Is it reasonable to suppose that there is, or will be, a hybrid payee deduction/non-inclusion mismatch in relation to the payment?**

It is reasonable to suppose that A Co will be permitted a deduction against its ordinary income for the interest payments made under the Loan (the relevant deduction) for a taxable period.

It is also reasonable to suppose that neither B Co nor Individual A will be charged to tax on the interest receipts attributable to Individual A.

Consequently, this mismatch is attributable to the contrasting treatment of B Co for tax purposes in Country Y and Country Z, and so results from the fact that B Co is a hybrid entity. If either:

- B Co had been recognised as an entity separate from Individual A in Country Z, or
  - B Co had not been recognised as an entity separate from Individual A in Country Y
- then it is reasonable to suppose that either B Co (in the former situation) or Individual A (in the latter situation) would have included the interest payments in its ordinary income. It therefore arises by reason of B Co (a payee) being a hybrid entity.

Condition D is therefore satisfied.

To the extent that the amounts attributable to Individual B have been subject to tax in Country Z, there will be no hybrid payee deduction/non-inclusion mismatch arising from those payments.

The extent of the hybrid payee deduction/non-inclusion mismatch is equal to the payments attributable to Individual A.

**Condition E: Are the payer and the hybrid payee or investor in the same control group or is there a structured arrangement?**

A Co (payer) and B Co (reverse hybrid) are all part of the same control group, as defined under s259NB, as Individual A, who holds at least 50% of the voting power both companies.

(Even if Individual A were to hold less than 50% of the voting power in B Co, the facts suggest that the arrangement was designed to secure a hybrid payee deduction/non-inclusion mismatch, and therefore it may qualify as a structured arrangement).

Condition E is met.

**Conclusion**

As all the relevant conditions are satisfied to characterise the arrangement as a hybrid payee deduction/non-inclusion mismatch, the extent of the mismatch and counteractions need to be considered.

**Counteraction**

As all of the conditions are met the mismatch should be counteracted under Chapter 7.

### **Counteraction where the UK is in the position of Country Y (payer and investor jurisdiction)**

#### **Primary Response**

Where the UK is in the position of Country Y, then A Co will be denied a deduction to the extent of the hybrid payee deduction/non-inclusion mismatch, which in this instance would be the full amount of the hybrid payee deduction/non-inclusion mismatch (being 50% of the payments).

#### **Secondary Response**

If the UK is the investor jurisdiction, there is no secondary response under s259GD as Individual A is not within the charge to corporation tax.

#### **Counteraction where a hybrid payee is a UK Limited Liability Partnership (LLP)**

Where B Co is an LLP the UK then, to the extent that the hybrid payee deduction/non-inclusion mismatch has not already been fully counteracted in Country Y, then the remaining amount of the mismatch (i.e. the amount attributable to Individual A) will be treated as income arising to B Co on the last day of the payment period. If no counteraction has been applied, then the counteraction under s259GE TIOPA 2010 will apply to the full amount attributed to Individual A.

This income will be brought within the charge to corporation tax on B Co under Chapter 8 of Part 10 of CTA 2009.

Section 863 ITTOIA 2005 (treatment of certain limited liability partnerships for income tax purposes) and section 1273 of CTA 2009 (treatment of certain limited liability partnerships for corporation tax purposes) may apply to allocate the income of an LLP to its members where that LLP is carrying on a trade, business or (if income tax) profession with a view to profit. For the purposes of these rules, s259GE(8) will dis-apply those sections for the purposes of bringing this income into charge on B Co.

## **87.30 Interaction with other provisions**

### *Between Pt. 6A Chapters*

Section 259A TIOPA provides:

(19) Each of Chapters 3 to 10 contains provision specifying that some or all of this Part [Part 6A, hybrids/mismatches] (and any corresponding provision under the law of a territory outside the UK) is to be disregarded when determining whether a mismatch arises for the purposes of that Chapter and, if so, in what amount, see-

- (a) section 259CA(4) and (5),
- (b) section 259DA(5),
- (c) section 259EA(5) and (6),
- (d) section 259FA(4), (5) and (6),
- (e) section 259GA(5) and (6),
- (f) section 259HA(6) and (7),
- (g) section 259IA(2) and (3), and

(h) section 259JA(5).

(20) The effect of the provisions mentioned in subsection (19) is that Chapters 3 to 10 (or any corresponding provision under the law of a territory outside the UK) have effect in the following sequence-

- (a) Chapter 4,
- (b) Chapter 3,
- (c) Chapter 5,
- (d) Chapter 6,
- (e) Chapter 7,
- (f) Chapter 8,
- (g) Chapter 9, and
- (h) Chapter 10.

Why the non-numerical order?

### 87.30.1 *Corporate interest restriction*

Section 259NEA TIOPA provides:

For the purposes of this Part [Part 6A, hybrids/mismatches], the provisions of Part 10 (corporate interest restriction) are to be treated as of no effect.

### 87.30.2 *Interaction with other legislation*

**INTM550080: Hybrids: Chapter 1 – Introduction: Interaction with other legislation** [Dec 2019]

Counteraction under Part 6A TIOPA 2010 should be considered alongside the UK's other domestic rules. Examples of the type of rules that might be applicable are

- [1] distribution exemption,
- [2] transfer pricing
- [3] group mismatch legislation [Part 21B CTA 2010] and
- [4] unallowable purpose for loan relationships.<sup>93</sup>

We would expect to apply the hybrids mismatch legislation in priority to the corporate interest restriction rules.

Although there is no statutory provision requiring it to be considered in priority, the distribution exemption provisions may also be considered before applying the hybrid mismatch rules – see INTM551170.

The hybrid mismatch rules do not contain a priority order for considering

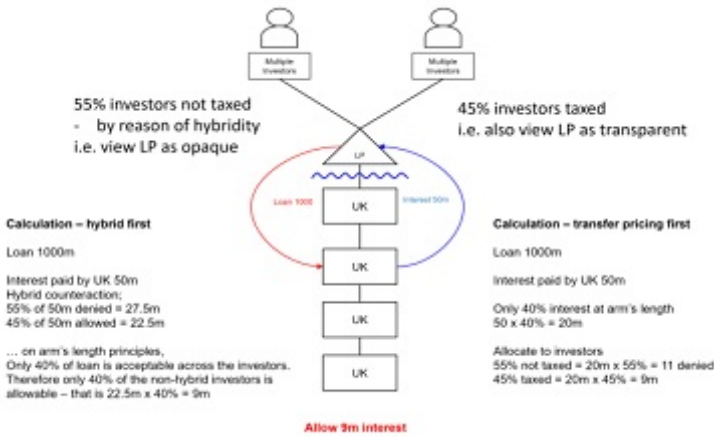

---

93 See 2.12.3 (Loan relationship TAAR guidance).

the application of other legislation. This means that customers will need to consider all relevant rules as part of their self-assessment. In general the hybrid rules will need to be considered whenever a mismatch within scope of Part 6A arises, unless the application of other rules removes the mismatch entirely.

**Interaction with Transfer Pricing**

For example, a customer may need to consider both transfer pricing and Part 6A in relation to a deduction arising in connection with a hybrid financial instrument. If a transfer pricing adjustment reduced the allowable deduction to the point where there was no mismatch in connection with the hybrid financial instrument, then Part 6A would not apply. If there were still a mismatch after the transfer pricing adjustment was made, Part 6A would apply to the extent of the remaining mismatch. A similar result would be expected if Part 6A were considered in priority to transfer pricing. If the deduction after adjusting for the mismatch under Part 6A were still in excess of the arm's length price, then the transfer pricing rules would apply to further reduce the deduction to the arm's length price.

In the same circumstances, the transfer pricing and Part 6A rules may have to be applied to different amounts within the same deduction, where the deduction includes a number of payments/quasi-payments in connection with more than one financial instrument.

## CHAPTER EIGHTY EIGHT

# PROTECTED TRUSTS

88.1	88.12.3		
88.5.10	2017 domicile: Transitional relief	Protected trust/co income compared	
88.6.1	Why protected foreign-source income matters	88.15	Protected-trust conditions: Navigation
		88.17	Tax return: Protected income/gains

### 88.1 Protected-trust regime

This chapter contains:

- (1) An outline of the protected-trust regime
- (2) The definitions of “protected foreign-source income” which apply for this regime
- (3) Protected-trust reliefs

The rules were introduced in 2017 and 2018. The general scheme is that:

- (1) UK resident foreign domiciliaries qualify for the remittance basis on their own income/gains until they become deemed domiciled.
- (2) Trusts made by foreign domiciliaries have a protected status, both before and after the settlor becomes deemed domiciled.<sup>1</sup> In short:
  - (a) Trust income/gains are not subject to tax on the usual settlor-interested trust rules (s.624, s.720, s.86)
  - (b) The income/gains are subject to tax on distribution:
    - (a) on general principles; or
    - (b) under special provisions which only apply to protected trusts

---

<sup>1</sup> Protected-trust relief does not apply to formerly-domiciled residents. References in this chapter to deemed domicile are references to deemed domicile under the 15-year rule only.

It is helpful to coin some terminology, and in this book:

- I refer to these rules as the “**protected-trust regime**”
- A trust within the regime is a “**protected trust**”

There are four parts to the regime:

- (1) **Protected-trust reliefs**, which prevent charges on the settlor under s.86, 624, 720, and associated provisions
- (2) **Close-family/settlor charges** which apply to benefits from protected trusts to close-family/settlors
- (3) **Settlor-attribution rules** which attribute income/gains of close-family to the settlor
- (4) **Onward-gift rules**

It is best to consider these as separate topics. However the rules interact, and the resulting picture is a complex one.

The protected-trust reliefs are as follows:

Charge	Relief	Tax	Topic
s.86 TCGA	para 5A sch 5 TCGA	CGT	Settlor-interested trust
s.624 ITTOIA	s.628A ITTOIA	IT	Settlor-interested trust
s.629 ITTOIA	s.630A ITTOIA	IT	Payment to child of settlor
s.633 ITTOIA	s.635(2) ITTOIA	IT	Capital payment to settlor
s.720 ITA	s.721(3B) rule 2	IT	ToA transferor charge
s.727 ITA	s.728(1A) rule 2	IT	ToA capital sum charge

I refer to all these as reliefs, though in some cases they are expressed in the form of a relief (eg “The rule in s.624 does not apply...”) and in other cases the rule slots in the relevant provisions and is not expressed in the style of a relief.<sup>2</sup> It comes to the same thing.

The close-family/settlor charges are:

Section	Name of charge	See para
s.643A(1) ITTOIA	s.643A close-family benefit charge	44.19
s.731(1A)/s.732(1)(d) ITA	s.731 extended to transferor	47.16

These charges are not closely aligned, because there was already a ToA charge on benefits, s.731; but the scope of that charge has been extended

---

<sup>2</sup> Eg s.720 relief is in s.721(3B) rule 2; s.633 relief slots in the definition of “available income”, see 44.14.1 (“Available income”).

to include transferors and non-resident beneficiaries.

There is no CGT equivalent because there was already a charge on benefits which included benefits conferred on the settlor.

The settlor-attribution rules are:

Section	Name (my terminology)	See para
s.87G, 87H TCGA	s.87 settlor-attribution rule	57.29
s.643A(3)(4), E, ITTOIA	s.643A settlor-attribution rule	44.27
s.733A, 735B ITA	s.731 settlor-attribution rule	47.44

The onward gift rules are:

Section	Name (my terminology)	See para
s.87 I - M TCGA	s.87 onward gift rule	57.30
s.643 I - N ITTOIA	s.643A onward gift rule	44.30
s.733B - E ITA	s.731 onward gift rule	47.48

The changes go far beyond what was necessary to accommodate the 2017 deemed domicile rules: HMRC took the opportunity for a wide-ranging reform of offshore trusts taxation. This revolution - the term is not too strong - was introduced in breach of the Tax Consultation Framework, as the proposals first emerged in the HMRC summary of responses to the original consultation paper. In fact there was little consultation on the principles at all, and only limited opportunity to consult on the drafting, since the draft published September 2017 differed substantially from the Finance Bill, which in turn received 32 amendments at committee stage. Parliamentary discussion in the Public Bill committee was perfunctory.

### 88.1.1 Protected-trust guidance

Guidance (my terminology)	Date	Issued by
HMRC protected-trust guidance <sup>3</sup>	2018	HMRC
Protected-trust Q&As <sup>4</sup>	2018	Professional bodies

3 <https://www.gov.uk/government/publications/trust-protections-and-capital-gains-tax-changes>

4 The full title is “Deemed domicile changes – trust protections” (March 2018). ICAEW published this under the name Taxguide 07/18. See: <https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2018/taxguide-0718-deemed-domicile-changes--trust-protections.ashx> or <https://www.tax.org.uk/policy-technical/submissions/finance-no-2-act-2017-taxation-non-uk-domiciliaries>

Protected-trust Note<sup>5</sup>                      2020                      Professional bodies

HMRC protected-trust guidance was lengthy but rudimentary. The Protected-trust Q&As asked 18 pages of questions, with suggested answers. It would have been interesting to see the answers, but HMRC did not provide them. Perhaps it was filed as too difficult.

In 2020, as it was clear that HMRC were not going to answer the Protected-trust Q&As, the professional bodies issued the Protected-trust Note. This restates views expressed as suggested answers in the 2018 Q&As.

Background can be found in a series of papers listed at 4.1 (Deemed domicile: Introduction), but that is now of historical interest only.<sup>6</sup>

## 88.2 Protected trusts: Policy

In the absence of protected-trust reliefs of some kind, wealthy foreign domiciliaries would have a strong incentive to leave the UK, before becoming deemed domiciled under the 15-year rule, at which point all their income/gains (including income/gains of settlor-interested trusts) would become taxable on an arising basis. The regime represents a new solution to an old problem, namely, how much can HMRC squeeze out of the UK's foreign domiciled long-term residents, before they leave? or

---

This document is not to be confused with (what I call) the Protected-trust Note 2020, which has the same title (see the next footnote).

- 5 The full title is “Deemed Domicile Changes - Trust Protections - Notes on practical points and areas of uncertainty” (December 2020). ICAEW published this under the name Taxguide 02/21. See:

<https://www.tax.org.uk/policy-technical/submissions/taxation-non-uk-domiciliaries-finance-no-2-act-2017-finance-act-2018> or  
[https://www.step.org/sites/default/files/2020-12/deemed\\_domicile\\_changes\\_trust\\_protections\\_note\\_041220.pdf](https://www.step.org/sites/default/files/2020-12/deemed_domicile_changes_trust_protections_note_041220.pdf)

This document is not to be confused with (what I call) Protected-trust Q&As, which has the same title (see the previous footnote).

- 6 Draft provisions were published in December 2016. They were intended for the FA 2017, but dropped because they were not ready in time: HMRC, “Guidance - Non-domicile taxation: technical briefing on overseas trusts” (March 2017)  
<https://www.gov.uk/government/publications/non-domicile-taxation-technical-briefing-on-overseas-trusts/non-domicile-taxation-technical-briefing-on-overseas-trusts>  
 But the drafts of December 2016 and September 2017, like the background papers, are now of historical interest only.

more precisely, before the loss due to leavers exceed the gain from those who stay. The new regime aims to collect more from those who chose to stay, but does not charge tax so far as income/gains accumulate in non-resident trusts. On the Conservatives' view:

It is vital that these changes [deemed domicile for IT/CGT] are not introduced in a way that would drive non-doms out of the UK altogether.<sup>7</sup>

Of course the current rules are not satisfactory to those who believe there should be no distinction between deemed domiciliaries and UK domiciliaries:

The changes in the [F(no.2)A 2017] are superficial ... and designed to give the impression that the Government are seriously clamping down on tax avoidance. Why else would an exemption be built into the measures for offshore trusts? ... those are things that the architect of the measures would do if they were of a mind to completely undermine the measures' effectiveness...

What we want is genuinely not unrealistic or far removed from the observations of most members of the public, which is, in short, the removal of the exemption for offshore trusts...<sup>8</sup>

Some settlors will be better off under the protected-trust regime, as they do not have to pay the remittance basis charge in order to qualify for protected-trust reliefs. By and large, tax liabilities will increase. So it is disheartening to read the Labour claim (the relief will "completely undermine the measures' effectiveness") and the Government's counter-claim:

The changes ... will bring an end to permanent non-domicile tax status. When people live in the UK permanently, it is right that they should

pay the same tax as everyone else.<sup>9</sup>

Is the speaker muddled, exaggerating, misleading or dishonest? Discuss.

### 88.3 s.86 protected-trust relief

The s.86 charge does not apply to a foreign domiciled settlor.<sup>10</sup> The following is therefore relevant to a deemed-domiciled settlor.

Para 5A(1) sch 5 TCGA provides:

Section 86 does not apply in relation to a year (“the particular year”) if Conditions A to D are met.

I refer to these as “**s.86 protected-trust conditions**”.

#### 88.3.1 Condition A: 2017/18 or later

Para 5A(2) sch 5 TCGA provides:

Condition A is that the particular year is—

- (a) the tax year 2017-18, or
- (b) a later tax year.

This is just a commencement provision and (read with para 5A(1)) it is also a roundabout way of defining “particular year”.

#### 88.3.2 Conditions B/C: Non-dom settlor

Para 5A(3) sch 5 TCGA provides:

Condition B is that when the settlement is created the settlor—

- (a) is not [actually] domiciled in the UK, and
- (b) if the settlement is created on or after 6 April 2017, is not deemed domiciled in the UK.

(4) Condition C is that there is no time in the particular year when the settlor is—

- (a) [actually] domiciled in the UK, or
- (b) deemed domiciled in the UK by virtue of Condition A in

---

<sup>9</sup> Mel Stride (Paymaster General) Hansard, 19 Oct 2017.

[https://hansard.parliament.uk/commons/2017-10-19/debates/f87da5ea-33a7-4a01-b497-1f3aaa15830e/FinanceBill\(FourthSitting\)](https://hansard.parliament.uk/commons/2017-10-19/debates/f87da5ea-33a7-4a01-b497-1f3aaa15830e/FinanceBill(FourthSitting))

<sup>10</sup> See 56.10 (Settlor residence/domicile conditions).

section 835BA of ITA 2007 [formerly-domiciled resident<sup>11</sup>].

That is:

- (1) s.86 protected-trust relief ceases to apply to those who become actually UK domiciled
- (2) The relief does not apply to formerly-domiciled residents

#### 88.4 Condition D: Tainting

The next condition concerns adding to the trust. Para 5A(5) sch 5 TCGA provides:

Condition D is that

[A] no property or income is provided directly or indirectly for the purposes of the settlement

[B] by

[i] the settlor, or

[ii] the trustees of any other settlement of which the settlor is a beneficiary or settlor,

[C] at a time in the relevant period<sup>12</sup> when the settlor is—

(a) [actually] domiciled in the UK, or

(b) deemed domiciled<sup>13</sup> in the UK.

The wording is based on previous s.86 transitional reliefs,<sup>14</sup> on which there has been some guidance. I discuss this material here, as this now is the context in which it most often arises. There are some differences of wording between previous s.86 transitional reliefs and 2017 protected-trust relief, but most of the guidance is still applicable.

Condition D applies if property is provided by:

- (1) the settlor, or

11 See 4.4.1 (Condition A: formerly dom).

12 Defined para 5A(6): “In sub-paragraph (5) “relevant period” means the period—

(a) beginning with the start of 6 April 2017 or, if later, the creation of the settlement, and

(b) ending with the end of the particular year.”

Tainting during the year removes protected status for the entire year. Split year rules do not apply.

13 Para 5A(9) provides the expected definition: “In this paragraph “deemed domiciled” means regarded for the purposes of section 86(1)(c) as domiciled in the UK as a result of section 835BA of ITA 2007 having effect.”

14 See 56.6.1 (Trigger 1: Providing property); 94.6 (Tainting).

(2) another trust of which the settlor is a beneficiary or settlor

I refer to a trust within (2) as a “**connected trust**”, and a person who is not within (1) or (2) is a “**third party**”.

What if property is provided to a trust by a third party? That does not affect protected trust-relief. (Though the third party may be taxed as joint settlor on gains attributable to the addition). In this respect the 2017 tainting rule is more sensible than previous s.86 transitional reliefs.

#### 88.4.1 *Inter-trust transfer*

The condition is (in short) that:

[A] no property ... is provided ... for the purposes of the settlement by ... the trustees of any other settlement of which the settlor is a beneficiary or settlor,

I would have said that trustees do not “provide” property, as they are only fiduciaries. But the context shows that for tainting purposes, an inter-trust transfer is regarded as the provision of property by trustees.

So if property is provided to a protected trust, even from another *protected* trust, at a time when the settlor is UK domiciled, the transferee trust becomes tainted and loses protected status. This applies to gratuitous transfer and to transactions at an undervalue. There is no good reason to penalise inter-trust transfers, but the issue may not often arise.

#### 88.4.2 *Meaning of “Beneficiary”*

Beneficiary is not defined. Para 3 Protected-trust Note 2020 provides:

Most settlements contain a wide power of addition so virtually any settlement from which the settlor is not specifically excluded enable the settlor to be added as a beneficiary even if that person is not currently a beneficiary. But, unless and until someone is added, they are not in fact a beneficiary, and the trustees do not need to consider whether to confer any benefits on them.

It is therefore considered that a ‘beneficiary’ in this context means someone who is currently a beneficiary of the settlement. Until a person is added as a member of the class of beneficiaries that person is not a beneficiary.

This is correct if it is true as a matter of trust law to say that “unless and

until someone is added, they are not in fact a beneficiary, and the trustees do not need to consider whether to confer any benefits on them.” But is that really so?<sup>15</sup> It would not be wise to rely on this view.

### 88.4.3 Adding value

Para 5A(7) sch 5 TCGA provides:

For the purposes of Condition D, the addition of value to property comprised in the settlement is to be treated as the direct provision of property for the purposes of the settlement.

I refer to this as the “**adding-value rule**”. This rule is novel. It will not usually make any difference. Adding value will usually amount to providing property indirectly.

Examples of adding value without providing property are perhaps:

- (1) Leaving an interest-free loan outstanding<sup>16</sup>
- (2) Failure to exercise a right of reimbursement<sup>17</sup>
- (3) Working for a trust, or for a company held by a trust, at less than market remuneration<sup>18</sup>

Whether any of these were actually the purpose of the adding-value rule is speculation; more likely, I think, the drafter had some inchoate concern that the traditional wording (“providing property”) might possibly leave a gap which an adding-value rule might possibly fill.

Para 1 Protected-trust Note 2020 provides:

The words ‘provided ...for the purposes of the settlement’ connote an intention on the part of the provider to confer some bounty on the settlement or its beneficiaries (see *IRC v Leiner* (1964) 41 TC 589). Under the tainting rules an addition of value to the property comprised in the settlement is deemed to be a provision without regard to intention, but the basic requirement that bounty be intended is

---

<sup>15</sup> See 74.6.1 (Gift to settlor-interested trust).

<sup>16</sup> The official HMRC view is that leaving an interest-free loan outstanding is providing property. But that is not correct; see 94.26.2 (On-demand loan left unpaid). Perhaps HMRC quietly recognised this, and the adding value rule is part of the programme to bring the law into line. See too 88.7.5 (Loan pre-deemed dom date).

<sup>17</sup> See 96.5.1 (Right of reimbursement).

<sup>18</sup> See 94.25 (Provision of services).

preserved by the rule requiring the provision of property or income to be ignored if there is no intention to confer gratuitous benefit [in my terminology, disregard (b)].

I would have thought that adding value, like providing property, required or implied some mental element. However that may be, it was clearly not the purpose of the adding-value rule to remove the “bounty” requirement, because disregard (b) restores or restates it.

## 88.5 The 7 disregards

Para 5B sch 5 TCGA provides:

- (1) This paragraph applies for the purposes of Condition D in paragraph 5A.
- (2) Ignore—

A set of 7 items then follow, which I call “**disregards (a) - (g)**”. Some of these derive from 1991 and 1998 transitional reliefs for s.86:<sup>19</sup>

Disregard	Topic	1998 relief: sch 5	1991 relief: sch 5
(a)	Arm’s length transaction	Para 2A(2)(a)	Para 9(3)(a)
(b)	Gratuitous intent	-	-
(c)-(e)	Loans	-	-
(f)	Pre-2017 liability	Para 2A(2)(b)	Para 9(3)(b)
(g)	Expenses	Para 2A(3)	Para 9(3) proviso

The 1998/1991 transitional reliefs are not now important, but guidance in SP 5/92 on the 1991 relief is relevant to protected trusts, so references to para 9(3) are still common. It would be helpful if SP 5/92 could be reissued to refer expressly to the current protected trust legislation; but that does not seem likely to happen.

### 88.5.1 *Gratuitous intent: Disregards (a)(b)*

The first two disregards are:

- (a) property or income provided under a transaction, other than a loan, where the transaction is entered into on arm’s length terms,
- (b) property or income provided, otherwise than under a loan, without any intention by the person providing it to confer a gratuitous

---

<sup>19</sup> See 56.6.1 (Trigger 1: provide property); 56.8.2 (Trigger 1: Providing property).

benefit on any person

Disregard (a) is otiose because a case within disregard (a) must fall within disregard (b).<sup>20</sup>

Disregard (b) seems otiose because “providing property” requires an element of bounty (gratuitous intent) but it might perhaps be needed to restrict the adding-value rule.

However that may be, these two disregards do no harm.

A transaction between connected persons is treated for CGT as “otherwise than by way of a *bargain* made at arm’s length”.<sup>21</sup> But apparently may nevertheless be a “*transaction* entered into on arm’s length terms” for the purpose of disregard (a). SP 5/92 provides:

12. ... This [disregard (a)] applies irrespective of whether the parties to the transaction are connected persons under TCGA 1992 s 286.<sup>22</sup>

That leads to the sensible result that the protected-trust rules are the same for IT and CGT, even though IT does not have the CGT connected person rule. But if it is right to say that disregard (a) is otiose, then this is not important.

For this purpose there is no difference between a transaction with the trustees and a transaction with a company held by the trust.

### 88.5.2 Pre-2017 liability: Disregard (f)

Para 5B sch 5 TCGA provides:

(2) Ignore ...

(f) property or income provided in pursuance of a liability incurred by any person before 6 April 2017

This relief may be overridden by the tainting-loan rules.

Para 1 Protected-trust Note 2020 provides:

If property is transferred to the trust in pursuance of a liability incurred before an individual becomes deemed domiciled, it is not considered tainting occurs as the provision is made when the obligation to provide the property is incurred. The disregard in TCGA 1992 Schedule 5

20 See App.4.6 (Arm’s length).

21 See App.4.6.7 (Deemed non-arm’s length).

22 See too 57.7.8 (Arm’s length transaction).

paragraph 5B(2)(f) and the equivalent income tax provisions might indicate that property is provided when it is transferred to the trust not when the liability is incurred. It is however considered that the specific disregard in Schedule 5 paragraph 5B(2)(f) is for the avoidance of doubt. But the liability must be legally binding prior to the settlor becoming deemed domiciled even if it is conditional on certain events occurring.

### 88.5.3 Expenses: Disregard (g)

Para 5B sch 5 TCGA provides:

(2) Ignore ...

(g) where the settlement's expenses relating to taxation and administration for a tax year exceed its income for that year, property or income provided towards meeting that excess if the value of any such property and income is not greater than the amount of—

- (i) the excess, or
- (ii) if greater, the amount by which such expenses exceed the amount of such expenses which may be paid out of the settlement's income.

SP 5/92 provides:

26 The following items are not regarded as “expenses relating to administration” within the terms of the proviso ...—

- loan interest (other than interest on a loan taken out to meet expenses of administration within the terms of the proviso);
- the costs of acquiring, enhancing or disposing of an asset;
- expenses incurred in connection with a particular trust asset to the extent that such expenditure can be set against income arising from that asset. For the purpose of the proviso ... , the measure of the gross income from such a source is net of expenses.

27 The term “expenses relating to... taxation” ... is regarded as encompassing UK or foreign taxes to which the trustees are liable, along with any interest and penalties due on that tax. It could also include certain costs incurred by the trustees under the terms of the trust in obtaining information regarding the beneficiaries' tax liabilities. One example might be where the trustees, in order to ensure they were acting in a beneficiary's best interests, had to ascertain the tax implications for the beneficiary in adopting a particular course of

action.

28 It is only the settlement's expenses relating to administration or taxation which are within the terms of the proviso ... Expenses of, for example, a company wholly owned by the trustees fall outside its scope....

30 Normally the specific date on which the liability to an expense relating to administration or taxation was incurred determines the year into which it falls for the purpose of applying the proviso ... Where, however, the expense is incurred for a period rather than on a specific date, the basis of allocating expenses adopted by the trustees in preparing trust accounts or returns is, generally, regarded as acceptable provided that this basis is consistently adopted and is in accordance with conventional trust accounting practice.

31 Additions to meet the difference between expenses relating to administration and taxation and any income arising to the trust do not have to be made by 5 April in the relevant year of assessment. There must, however, be a clear connection between the amount added and the computed shortfall. Additions should, therefore, be made as soon as the relevant figures are available.

32 Income, for the purposes of the proviso ... is the total income which arises to the trustees in the relevant year, rather than the income which is (or would be if the trust were resident in the UK) subject to UK tax. Usually, items of income will need to be allocated to the year in which they arise for the purposes of the proviso, but, in practice, income arising from a trade carried on by the trustees may be apportioned on a time basis, provided that this basis is consistently followed.

## **88.6 Sale for instalments of capital**

An individual might consider selling an asset to a trust for a series of instalments of capital.

In order for the payments received by the seller to constitute capital and not income, the payments should be fixed and should continue to fall due notwithstanding the death of the seller.

The total value of the instalments would, of course, be greater than the current market value, to compensate the seller for delay in payment. In calculating the price for the asset, the parties and their advisers would take into account interest rates for the relevant period. It is important, however, that the documentation is in terms of instalments of capital.

Otherwise, each payment may consist of partly capital and partly interest.<sup>23</sup> If the instalments are due over a very long period, part of the payment may constitute interest even if it is described as capital in the documentation.<sup>24</sup> There should be no objection to the instalments being index-linked, but this is contentious.<sup>25</sup>

In the case of a sale for instalments of capital the consideration is deemed to be the total amount receivable without a discount for postponement of the right to receive it.<sup>26</sup> This rule could throw up an artificial capital gain. Fortunately, if the sale is to a connected person, the transaction would be deemed to be for market value of the asset and not the total amount of the capital payments.<sup>27</sup>

## 88.7 Tainting-loan rules

Para 5B has a number of provisions dealing with loans (“tainting-loan rules”).

“Loan” is not defined, so in these rules it bears its strict meaning: loan of money.<sup>28</sup>

In summary:

<b>Loan</b>	<b>Topic</b>	<b>Provision</b>	<b>See para</b>
<i>to</i> trust	Paying money lent to trust	5B(2)(c)	88.7.2
	Clawback	5B(3)(4)	88.7.2
	Pre-deemed-domicile loan	5B(5)(6)(7)	88.7.5, 88.7.10
<i>from</i> trust	Paying interest to trust	5B(2)(d)	88.7.3
	Repaying money lent to trust	5B(2)(e)	88.7.3

### 88.7.1 “Arm’s length loan”

Tax normally distinguishes between:

- (1) Loan on commercial terms
- (2) Loan on beneficial terms (beneficial to borrower, eg interest-free)
- (3) Loan on onerous terms (onerous to borrower, eg a higher than market

23 See *IRC v Church Commissioners* 50 TC 516.

24 See *Vestey v IRC* 40 TC 112.

25 See 25.4 (Premium).

26 Section 48 TCGA. HMRC have some discretion to allow payment of tax by instalments.

27 See App.4.4 (Deemed MV consideration).

28 See App.2.7 (Loan).

interest; in practice this is rare, usually one is only concerned with market and beneficial loans)

Para 5B(8) sch 5 TCGA confuses matters:

For the purposes of this paragraph a loan is on “arm’s length terms”—

- (a) in the case of a loan made to the trustees of a settlement, only if interest at the official rate<sup>29</sup> or more is payable at least annually under the loan;
- (b) in the case of a loan made by the trustees of a settlement, only if any interest payable under the loan is payable at no more than the official rate.

This is not the normal meaning of “arm’s length terms”: it is an artificial definition. I write it with initial capitals, to reflect the technical nature of the expression; some may prefer scare quotation marks. The definition does have the advantage that it is easy to see whether a loan is on Arm’s Length Terms, as it is not necessary to consider what would be market rates.

Thus there are potentially six types of loan:

- (1) Loan on “Arm’s Length Terms” which may be:
  - (a) commercial terms
  - (b) beneficial terms
  - (c) onerous terms

In practice, perhaps, “Arm’s Length Terms” will generally amount to commercial terms.

- (2) Loan on “non-Arm’s Length Terms” which may be:
  - (a) commercial terms
  - (b) beneficial terms
  - (c) onerous terms

One might have thought that lending money (paying the money borrowed to the borrower/trustees) on commercial terms is not providing property, even if it is not on “Arm’s Length Terms”. But the wording of disregard

---

29 Defined by reference in para 5B(9): ““official rate”, in relation to interest, means the rate of interest applicable from time to time under section 178 of the Finance Act 1989 for the purposes of Chapter 7 of Part 3 of ITEPA 2003.” See 81.5 (Official rate of interest).

(b) implies that property provided “under a loan” will taint a trust, even if it is on commercial terms, if it is not on “Arm’s Length Terms”.

Similarly, one might have thought that paying interest under a loan on commercial terms is not providing property, even if it is not on “Arm’s Length Terms”. But again, the wording of disregard (b) implies that for tainting purposes, paying interest will taint a trust, even if it is on commercial terms, if it is not on “Arm’s Length Terms”.

Para 1 Protected-trust Note 2020 provides:

Loans represent an exception to the rule that tainting does not occur if there is no intention to confer gratuitous benefit. It is considered that with loans the sole issue is whether the statutory requirements relating to the payment of interest are satisfied.

### 88.7.2 *Loan to trust*

Para 5B sch 5 TCGA provides:

(2) Ignore ...

- (c) the principal of a loan which is made to the trustees of the settlement on arm’s length terms

Para 5B(3) sch 5 TCGA provides a clawback charge:

Where—

- (a) a loan is made to the trustees of the settlement by
  - [i] the settlor or
  - [ii] the trustees of a settlement connected with the settlor, and
- (b) the loan is on arm’s length terms, but
- (c) a relevant event occurs,

the principal of the loan is to be regarded as having been provided to the trustees at the time of that event (despite sub-paragraph (2)<sup>30</sup>).

There are 3 types of relevant event. Para 5B(4) sch 5 TCGA provides:

In sub-paragraph (3) “relevant event” means—

- (a) capitalisation of interest payable under the loan,
- (b) any other failure to pay interest in accordance with the terms of the loan,

---

<sup>30</sup> Subpara (2) contains the 7 disregards, so the tainting-loan rules override the usual disregard for pre-2017 liabilities.

Would (b) apply if payment is, say, one day late?

The third type of relevant event is:

- (c) variation of the terms of the loan such that they cease to be arm's length terms.

These rules concern loans to a trust made by:

- (1) the settlor or
- (2) a trust of which the settlor is a beneficiary or settlor

The tainting rules do not apply to a loan to a trust made by a third party.

### 88.7.3 *Loan from trust*

Para 5B sch 5 TCGA provides:

- (2) Ignore ...
  - (d) the payment of interest to the trustees of the settlement under a loan made by them on arm's length terms

Para 5B sch 5 TCGA provides:

- (2) Ignore ...
  - (e) repayment to the trustees of the settlement of the principal of a loan made by them

In the case of repayment, it does not matter whether the loan is on "Arm's Length Terms".

These rules concern loans from the trust to:

- (1) the settlor or
- (2) trustees of a trust of which the settlor is a beneficiary or settlor

The tainting rules do not apply to property provided by a third party.

### 88.7.4 *Loan to/from underlying co*

A loan to or from an underlying company held by the trust is not within these rules. Para 16 Protected-trust Note 2020 provides:

The provisions regarding arm's length loans are expressed in terms of loans to or interest paid to the trustees of the settlement. It is not considered this prescriptive language extends to loans to or interest paid to underlying companies. On a literal view at least the exclusion of transactions at arm's length or not intended to confer gratuitous benefit

do not cover these loans either. However such loans would only constitute tainting if property has been provided to the settlement or value added to it. It is therefore considered loans on arm's length terms do not amount to tainting. Strictly the requirement that interest be paid as distinct from compounded would not be in point, but it is considered that to run an argument on these lines would be provocative.

HMRC's published guidance indicates that in HMRC's view loans to and interest paid to underlying companies should be treated in the same way as loans to and interest paid to the settlement. Should interest at the official rate differ from the arm's length it will be a matter of judgement as to whether to rely on apparent HMRC practice.

The last sentence while true is not exactly guidance. Perhaps it is intended as a tactful warning that it is not safe to rely on HMRC guidance.

#### 88.7.5 *Loan pre-deemed-dom date*

A loan from the settlor to a trust made at a time when the settlor is not UK domiciled (or deemed domiciled) does not in principle matter, as the tainting rule only applies if property is provided by a settlor (or connected trust) at a time when the settlor is UK domiciled (or deemed domiciled).<sup>31</sup> So the loan need not be on Arm's Length Terms.

However para 5B sch 5 TCGA provides:

- (5) Sub-paragraph (6) applies (subject to sub-paragraph (7)) where—
- (a) the settlor becomes deemed domiciled in the UK on or after 6 April 2017,
  - (b) before the date on which the settlor becomes deemed domiciled in the UK (“the deemed domicile date”), a loan has been made to the trustees of the settlement by—
    - (i) the settlor, or
    - (ii) the trustees of a settlement connected with the settlor,
  - (c) the loan is not entered into on arm's length terms, and
  - (d) any amount that is outstanding under the loan on the deemed domicile date (“the outstanding amount”) is payable or repayable on demand on or after that date.
- (6) Where this sub-paragraph applies, the outstanding amount is to be regarded as property directly provided on the deemed domicile date by

---

<sup>31</sup> See 88.4 (Condition D: Tainting).

the lender for the purposes of the settlement (despite sub-paragraph (2)<sup>32</sup>).

### 88.7.6 *Change in official rate*

Protected-trust Q&As Question 21 provides:

HMRC's guidance indicates that a loan is on arm's length terms if the interest rate is equal to the official rate at the date the loan is entered into ... It is not however clear whether:

- a. it makes any difference whether the loans are for a fixed term or whether they are repayable on demand; or
- b. HMRC will also accept that the loans are on arm's length terms if, in fact, the terms of the loans provided for the interest rate to be varied so as to track the official rate from time to time.

*Suggested answer:*

1. Provided that the interest rate is equal to the official rate at the date of the loan, it makes no difference whether the loan is for a fixed term or repayable on demand.
2. HMRC also accepts that the loan is on arm's length terms if the interest rate is at the official rate at the date the loan is entered into and the loan agreement provides that thereafter the interest rate will track the official rate from time to time.<sup>33</sup>

Point 2 is correct but point 1 is not clear.

### 88.7.7 *Funding bonds to pay interest*

Protected-trust Q&As Question 24 provides:

In some cases, companies which are controlled by a settlement may not have funds available to fund interest payments...

Assuming that the settlement will be tainted if interest remains unpaid in these circumstances:

Would the issue of a funding bond (even if this is not foreseen in the loan documentation) be regarded as payment for these purposes, and so avoid the trust being tainted. The issue of the funding bond in this case should mean that the interest is treated as paid, and so is taxable on the

---

32 Subpara (2) contains the 7 disregards, so the tainting-loan rules override the usual disregard for pre-2017 liabilities.

33 The same point is made in para 18 Protected-trusts Note.

settlor.

Will the interest be treated as paid in a case where it is paid and then immediately loaned back to the company on arm's length terms, and the settlor treats the interest as having been received by them and taxed accordingly.

*Suggested answer:*

1. Provided that the arrangements for payment of interest on arm's length terms result in the settlor as lender being in receipt of interest income for UK tax purposes, the arrangements described will not fall foul of Condition D.
2. Loans from persons other than the settlor (other than a trust where he is the settlor or beneficiary) would not taint the trust as such although may, depending on their particular terms, raise other tax issues in relation to that lender.

Point 2 is straightforward. On point 1 the question is, is there a payment?<sup>34</sup> But the rules do not apply to a loan to a company held by a trust, so the issue does not apply.

#### 88.7.8 *Swiss franc/Japanese yen loan*

Para 19 Protected-trust Note 2020 provides:

There are different official rates for loans denominated in Swiss francs and Japanese yen subject to certain conditions. It is not considered that these separate rates must be used in respect of loans denominated in these currencies as they apply only to loans made by reason of employment to individuals who normally live in Switzerland or Japan.<sup>35</sup>

#### 88.7.9 *Fixed term loan: IHT*

Protected-trust Q&As Question 27 provides:

Paragraph 5B(8) sets out the circumstances where a loan is considered to be on 'arm's length terms'. These provisions are repeated in the equivalent income tax provisions. However, there are no comparable inheritance tax provisions, which may produce uncertainties in some circumstances. For example, assume that trustees make a ten year fixed

---

<sup>34</sup> Contrast *MacNiven v Westmoreland Investments* [2001] UKHL 6; and see 16.4.1 (When interest arises).

<sup>35</sup> See 81.5.1 (Foreign currency loan).

term loan to a UK resident settlor at a rate that does not exceed the official rate of interest. Further assume that a bank would charge interest at a rate that exceeds the official rate of interest in such circumstances. The settlor cannot pay a higher rate without tainting the settlement. In such circumstances it is accepted that the provisions of IHTA 1984 s. 10<sup>36</sup> would apply because paying interest at no more than the official rate is not intended to confer a benefit on any person and is required under the capital gains tax and income tax rules for the purpose of ensuring that the loan is deemed to be on arm's length terms. As a result there will be no possibility of an exit charge under IHTA 1984 s.65.

*Suggested answer:* HMRC does not intend to trigger inheritance tax liabilities and reporting requirements as a result of settlors and trustees complying with the statutory provisions under the anti-tainting provisions that treat the provision of loans and payment of interest as being under arm's length terms under those rules.

Para 23 Protected-trust Note 2020 returns to this topic and express the same view:

For example, trustees may make a ten year fixed term loan to a UK resident settlor at a rate that does not exceed the official rate of interest in circumstances where a bank would charge interest at a rate that exceeds the official rate of interest. The settlor cannot pay a higher rate without tainting the settlement. It is considered that the provisions of IHTA 1984 section 10 would apply because paying interest at no more than the official rate

- [1] is not intended to confer a benefit on any person<sup>37</sup> and
- [2] is required under the capital gains tax and income tax rules for the purpose of ensuring that the loan is deemed to be on arm's length terms.

However, the loan may be (and usually is) made repayable on demand, so the issue does not arise.

#### 88.7.10 2017 domicile: Transitional relief

Para 5B(7) sch 5 TCGA provides:

---

<sup>36</sup> See 70.12 (Arm's length transaction).

<sup>37</sup> Author's footnote: but this depends on the facts of the case.

But if the deemed domicile date<sup>38</sup> is 6 April 2017, sub-paragraph (6) does not apply if—

- (a) the principal of the loan is repaid, and all interest payable under the loan is paid, before 6 April 2018, or
- (b) the loan becomes a loan on arm's length terms before 6 April 2018 and—
  - (i) before that date interest is paid to the lender in respect of the period beginning with 6 April 2017 and ending with 5 April 2018 as if those arm's length terms had been terms of the loan in relation to that period, and
  - (ii) interest continues to be payable from 6 April 2018 in accordance with those terms.

This gave one year's grace to put the loan on "Arm's Length Terms". Protected-trust Q&As Question 16 provides:

A repayable on demand loan which was made directly or indirectly to a relevant settlement prior to 6 April 2017 on non-arm's length terms and which remains outstanding on that date will be regarded as a provision of property for the purposes of the settlement and therefore the trust protections will not apply if the settlor has become deemed domiciled. The transitional grace period alleviates the position, where the deemed domicile date is 6 April 2017 and the loan is either repaid in full together with any outstanding interest before 6 April 2018 or made subject to arm's length terms, and arm's length interest is paid to the lender for the period from 6 April 2017 to 5 April 2018 and continues to be payable in subsequent years.

In the interests of clarity, could it be confirmed that the existing on demand loan by the settlor that was not on arm's length terms need not be repaid and replaced with a new loan on arm's length terms, but that it is sufficient to satisfy the transitional provision if the existing loan becomes on arm's length terms by the introduction of new arm's length terms to the loan agreement?

*Suggested answer:* There is no requirement to repay the loan and replace it with a new loan as long as the existing loan becomes a loan on arm's length terms as defined.<sup>39</sup>

---

38 The expression is given a commonsense definition in para 5B(5)(b), set out above.

39 The Protected-trust Note (2020) para 14 makes the same point.

That would be sensible but is it the law? Similarly, para 14 Protected-trust Note 2020 provides:

A loan to the trust for a fixed term of ten years repayable in 2026 might have been made before 6 April 2017 on non-arm's length terms by the settlor. There is no tainting as the liability was incurred before 6 April 2017. As long as the loan is put on arm's length terms before the end of the fixed term within the statutory definition it is considered there is no tainting even if it is documented as a continuation of the existing loan rather than the making of a new loan. Under the statutory definition interest at the official rate must be payable and paid at least annually.

This raises the same question.

#### 88.7.11 *Interest paid from trust to trust*

Protected-trust Q&As Question 18 provides:

Schedule 5 paragraph 5B (7) precludes an interest free loan left outstanding on 6 April 2017 from tainting inter alia if interest at the official rate is paid before 6 April 2018 in respect of the period from 6 April 2017 to 5 April 2018. In many cases the lender will be another trust. It is assumed that payment of such interest will not taint the lending trust.

*Suggested answer:* In the circumstances described the lending trust will not be tainted.

A good question.

### 88.8 Protected income: Terminology

“Protected foreign-source income” is one of three distinct terms with almost identical labels.<sup>40</sup>

Term	Use	See para
Protected foreign-source income	Throughout protected-trust code	<i>Here &amp; below</i>
Protected Income	s.731 protected-trust close-family/settlor charges	47.44
PFSI	s.643A protected-trust close-family/settlor charges	44.22.1

---

<sup>40</sup> In addition statute uses the term “Transitionally protected income” but it is not necessary to consider that here; see 88.15.3 (Pre-2017 s.720 income).

The term “protected foreign-source income” itself has *three* distinct definitions. It is necessary to distinguish them. Statute refers to:

- protected foreign-source income for the purposes of section 628A(1)
- protected foreign-source income as defined by section 721A
- protected foreign-source income as defined by section 729A

Or else statute applies one of the definitions by reference:

Sections 628A(2) to (12) and 628B (meaning of “protected foreign-source income”) have effect also for this purpose.

I coin the following terms to describe the different types of protected foreign-source income:

<b>My terminology</b>	<b>Definition</b>
Protected s.624 income	s.628A ITTOIA
Protected s.720 income	s.721A ITA
Protected s.720 trust income	s.721A(3) ITA
Protected s.720 company income	s.721A(4) ITA
Protected s.727 income	s.729A ITA
Protected s.727 trust income	s.729A(3) ITA
Protected s.727 company income	s.721A(4) ITA

To describe the statutory terminology as clumsy or bad drafting scarcely does it justice. Perhaps the Parliamentary Counsel Office held an internal competition for the most unhelpfully labelled set of definitions; by that measure the drafter has excelled. But the reader will simply have to bear in mind that statute distinguishes about a dozen concepts, and describes them with labels using slight variants of the words “protected income”; and it then becomes possible to proceed.

There is no comparable definition of “protected gains” for the purposes of CGT protected-trust relief, as all gains are protected, (ie all gains of non-resident trusts qualify for s.86 protected-trust relief), whether UK source or not.

### 88.8.1 *Why protected foreign-source income matters*

The term “protected foreign-source income” is used in the following contexts:

- (1) Protected-trust reliefs:
  - (a) s.624 (and s.629) protected-trust relief

- (b) s.720 protected-trust relief
- (c) s.727 protected-trust relief
- (d) Transitional reliefs for pre-2007 s.624/s.720 income
- (2) Protected-trust close-family/settlor charges:
  - (a) The definition of “Protected Income” for s.731<sup>41</sup>
  - (b) The definition of PFSI for s.643A<sup>42</sup>

## 88.9 Protected s.624 income

Protected s.624 income matters because:

- (1) It qualifies for s.624 protected-trust relief and so is not taxed under s.624 on the arising or the remittance basis.
- (2) It is potentially taxable under the s.643A close-family charge.

Section 628A(2) ITTOIA provides the definition of “protected foreign-source income”, which I call “**protected s.624 income**”:

For this purpose, income arising under a settlement in a tax year is “protected foreign-source income” for the tax year if Conditions A to F are met.

I refer to these as “**s.624 protected-trust conditions**”.

For the related term “protected s.720 income” see 88.12 (Protected s.720 income).

For this purpose, s.628A(13) contains the standard form to disapply the artificial s.624 remittance basis timing rule.<sup>43</sup>

The definition is said to be for the purpose of s.628A (which I call s.624 protected-trust relief); but it applies more widely, as it is incorporated by reference elsewhere.<sup>44</sup>

### 88.9.1 Condition A: RFI

Section 628A(3) ITTOIA provides:

Condition A is that the income would be relevant foreign income if it were income of a UK resident individual.

---

41 See 36.44 (“Protected Income”).

42 See 44.22.1 (PFSI).

43 See 44.8.4 (Remittance basis timing rule).

44 The list includes: s.633C(3)(c) ITTOIA.

I call this the “**RFI condition**”.

The drafting is based on the wording of the s.720 remittance basis,<sup>45</sup> and there is a similar requirement in the s.624 remittance basis.<sup>46</sup>

### 88.9.2 *Originating from settlor*

Section 628A(4) ITTOIA provides:

Condition B is that the income is from property originating from the settlor (see section 645).

This deals with the issue of multiple settlors.<sup>47</sup>

### 88.9.3 *Cond. C/D: non-dom settlor*

Section 628A ITTOIA provides:

(5) Condition C is that when the settlement is created the settlor—

- (a) is not [actually] domiciled in the UK, and
- (b) if the settlement is created on or after 6 April 2017, is not deemed domiciled in the UK.

(6) Condition D is that there is no time in the tax year when the settlor is—

- (a) [actually] domiciled in the UK, or
- (b) deemed domiciled in the UK by virtue of Condition A in section 835BA of ITA 2007 [formerly-domiciled resident<sup>48</sup>].

This is the equivalent of s.86 protected-trust conditions B and C.<sup>49</sup> The difference in the wording (particular year has become tax year) does not seem material.

Conditions C/D are satisfied for the tax year even if the settlor dies during the year.

### 88.9.4 *Non-resident trustees*

Section 628A(7) ITTOIA provides:

<sup>45</sup> See 46.20 (s.720 remittance basis). For the reason for the wording (“would be RFI if it were the individual’s”), see 15.10.2 (Relevant foreign income).

<sup>46</sup> See 44.8.2 (Remittance basis rule).

<sup>47</sup> See 95.1.2 (Multiple settlor provisions).

<sup>48</sup> See 4.4.1 (Condition A: Formerly dom).

<sup>49</sup> See 88.3.2 (Conditions B/C: Non-dom settlor).

Condition E is that the trustees of the settlement are not UK resident for the tax year.

*Individuals* are resident (or not) *for* a tax year.<sup>50</sup> That is not the case for trustees: the drafter has used the wrong phrase. But it does not matter. In context, the meaning is that trustees must be non-resident throughout the tax year.

### 88.9.5 Condition F: Tainting

Section 628A(8) ITTOIA provides:

Condition F is that no property or income is provided directly or indirectly for the purposes of the settlement by the settlor, or by the trustees of any other settlement of which the settlor is a beneficiary or settlor, at a time in the relevant period<sup>51</sup> when the settlor is—

- (a) [actually] domiciled in the UK, or
- (b) deemed domiciled in the UK.<sup>52</sup>

This is the equivalent of s.86 protected-trust condition D.<sup>53</sup>

Section 628A(10) and s.628B ITTOIA are the equivalent of the CGT tainting rules in para 5A(7) and para 5B sch 5A. The wording is identical, so these provisions need not be set out again here.

## 88.10 s.624 protected-trust relief

Armed with the definition of protected s.624 income, we can turn to the s.624 protected-trust relief.

S.624 protected-trust relief is not like s.86 protected-trust relief, because the s.86 relief applies to all trust gains, but s.624 relief applies only to protected s.624 income.

<sup>50</sup> See 9.1 (Residence throughout tax year).

<sup>51</sup> Defined s.628A(9) ITTOIA: “In subsection (8) “relevant period” means the period—

(a) beginning with the start of 6 April 2017 or, if later, the creation of the settlement, and

(b) ending with the end of the tax year.”

<sup>52</sup> Section 628A(12) ITTOIA defines deemed domicile in a clumsy fashion: “In this section “deemed domiciled” means regarded for the purposes of section 809(1)(b) of ITA 2007 as domiciled in the UK as a result of section 835BA of ITA 2007 having effect.”

<sup>53</sup> See 88.4 (Condition D: Tainting).

Section 624 provides the general rule that income of a settlor-interested trust is treated as income of the settlor.

Section 628A(1) ITTOIA provides the relief:

The rule in section 624(1) does not apply to income which arises under a settlement if it is [s.624] protected foreign-source income for a tax year.

Section 624 protected-trust relief is better than the s.624 remittance basis, which applies to a remittance basis settlor in the absence of protected-trust relief, because:

- (1) To obtain protected-trust relief it is not necessary to claim the remittance basis (which involves losing personal allowances as well as the remittance basis claim charge).
- (2) Protected s.624 income is not subject to income tax even if remitted to the UK.

#### 88.10.1 *Pre-2017 income: Outline*

There are two reliefs for pre-2017 income. In outline:

##### **Charging**

<b>section</b>	<b>Statutory term</b>	<b>Relief</b>	<b>See para</b>
s.624	Transitional trust income	s.628C ITTOIA	88.10.2
s.720	Transitionally protected income	s.726(6)(7) ITA	88.15.3

It is a pity that these two reliefs are not better aligned. CIOT commented on the draft legislation: “Given the significant overlap in the scope of the settlements code and the transfer of assets provisions, we strongly urge a consistent approach in terms of drafting.”<sup>54</sup> But no-one took any notice.

#### 88.10.2 *Pre-2017 s.624 income*

Income arising before 2017/18 did not qualify for s.624 protected-trust relief, but it could qualify for the s.624 remittance basis.

---

54 CIOT, “Deemed domicile: Income and Capital Gains Tax – draft clauses published 13 July 2017: Response by the Chartered Institute of Taxation” (August 2017) [https://www.tax.org.uk/system/files\\_force/file\\_uploads/170817%20Deemed%20domicile%20-%20Income%20and%20Capital%20Gains%20Tax%20-%20draft%20clauses%20published%2013%20July%202017%20-%20CIOT%20comments.pdf?download=1](https://www.tax.org.uk/system/files_force/file_uploads/170817%20Deemed%20domicile%20-%20Income%20and%20Capital%20Gains%20Tax%20-%20draft%20clauses%20published%2013%20July%202017%20-%20CIOT%20comments.pdf?download=1)

Section 628C(1) ITTOIA provides:

For the purposes of applying section 809L of ITA 2007 (meaning of remitted to the UK) in relation to transitional trust income, “relevant person” in that section does not include the trustees of the settlement concerned.

Section 628C(2) ITTOIA provides the definition of “transitional trust income”:

“Transitional trust income” means income—

- (a) that arises under a settlement in the period beginning with the tax year 2008-09<sup>55</sup> and ending with the tax year 2016-17 (“the protection period”),
- (b) that would be protected foreign-source income<sup>56</sup> for the purposes of section 628A(1) if section 628A(2)—
  - (i) had effect for the protection period, and
  - (ii) so had effect with a reference to conditions A to E (instead of A to F),

Para (b)(ii) disapplies condition F.<sup>57</sup> The point is that additions to a trust, which (post-2017) would taint the trust and lose s.624 protected-trust relief, do not affect the transitional relief for pre-2017 income.

- (c) that prior to 6 April 2017 has neither been
  - [i] distributed by the trustees of the settlement nor
  - [ii] treated under section 624(1) as income of the settlor,<sup>58</sup> and
- (d) that would for the tax year in which it arose under the settlement have been treated under section 624(1) as income of the settlor if the settlor had been domiciled in the UK for that year.

So a receipt in the UK of 2008-2017 trust income by trustees of a settlor-interested trust does not constitute a taxable remittance. This is of limited importance, though it might facilitate UK investment by the trust.<sup>59</sup>

For this purpose, s.628C(3) contains the standard form to disapply the

55 The reason for this start date is that pre-2008 income qualified for a different transitional relief: see 44.8.5 (Pre-2008 income: Transitional).

56 See 88.9 (Protected s.624 income).

57 See 88.9.5 (Condition F: Tainting).

58 Para [ii] is otiose: it would only arise if the s.624 income was remitted pre-2017.

59 Contrast 44.8.5 (Pre-2008 income: Transitional).

artificial s.624 remittance basis timing rule.<sup>60</sup>

Protected-trust guidance provides:

Importantly this provision only removes trustees from the definition of “relevant person” in s809L ITA 2007. Underlying companies etc. will all remain relevant persons. Hence a loan of unremitted trustee income from, say, 2010 to an underlying company would trigger a taxable remittance upon subsequent use by the company in the UK. This will also include investing funds in the UK save where Business Investment Relief is applicable.<sup>61</sup>

That is strange, perhaps absurd, because the same relief for s.720 is more generous; but it appears to have been a deliberate decision. In practice, UK investment by the trustees (ie at trust level rather than underlying company level) is likely to be ruled out for IHT reasons. The reader may wonder whether this has been properly thought through.

It would be sensible if the restriction on the concept of “relevant person” applied generally, as the definition is too wide;<sup>62</sup> in that respect, this particular transitional rule might be viewed as a timid step in the right direction.

Protected-trust guidance provides:

The rules on transitional trust income apply only to income that would for the tax year it arose have been treated as that of the settlor under S624(1) if the settlor had been domiciled in the UK. The transitional provisions do not extend to income treated as that of the settlor under S629(1) or S633.

But this will not often be important.

### 88.10.3 *Planning: Segregate income*

In the following discussion “**unprotected income**” is income of a settlor-

<sup>60</sup> Section 628C(3) sets out the standard form which disapplies the artificial remittance basis timing provision; “Section 648(3) to (5) (relevant foreign income treated as arising under settlement only if and when remitted), and corresponding earlier enactments, do not apply for the purposes of subsection (2)(a) and (d).” See 44.8.4 (Remittance basis timing rule).

<sup>61</sup> Para 2.19.

<sup>62</sup> See 17.11 (Relevant person: Critique).

interest trust which is not protected s.624 income. This will normally constitute pre-2017 trust income.<sup>63</sup>

There are now two different regimes for foreign income of a settlor-interested trust:

- (1) Protected s.624 income: not taxed if remitted to the UK
- (2) Unprotected income: taxed if remitted to the UK

It may be advantageous to segregate the two types of income, so trustees can use one or the other as desired. If the two are brought together, there is a mixed fund and mixed fund rules apply.

It may be advantageous to segregate UK source income, as that can be distributed without a further tax charge.

### **88.11 s.629 protected-trust relief**

Section 629 ITTOIA provides the general rule that (in short) income of a minor child of the settlor is treated as income of the settlor.<sup>64</sup>

Section 628A(1) ITTOIA provides the protected-trust relief:

The rule in section 629(1) does not apply to income which arises under a settlement if it is [s.624] protected foreign-source income<sup>65</sup> for a tax year.

Section 630A(3) contains the standard form to disapply the artificial remittance basis timing rule.<sup>66</sup>

### **88.12 Protected s.720 income**

Protected s.720 income matters because:

- (1) It qualifies for s.720 protected-trust relief, and so is not taxed under s.720 on the arising or the remittance basis.
- (2) The transferor is potentially taxable on it under s.731 close-family rules.

---

63 For periods during which the settlor is UK resident; I simplify the discussion by assuming that the settlor is UK resident throughout.

64 See 44.15 (Payment to settlor's child).

65 Section 631A(2) ITTOIA provides the definition by reference: "Sections 628A(2) to (12) and 628B (meaning of "protected foreign source income") have effect also for this purpose." See 88.9 (Protected s.624 income).

66 See 44.8.4 (Remittance basis timing rule).

- (3) The s.731 onward gift rule applies only if s.731 income is matched to protected s.720 income.

Section 721A ITA provides the definition of “protected foreign-source income”, which I call “**protected s.720 income**”.<sup>67</sup>

Section 721A(1) ITA provides:

This section has effect for the purposes of rule 2 of section 721(3B)<sup>68</sup> (cases where the individual [transferor] is not UK domiciled and is not deemed domiciled by virtue of Condition A in section 835BA [formerly-domiciled resident<sup>69</sup>]).

The definition is said to be for the purpose of s.721(3B) rule 2 (which I call s.720 protected-trust relief); but it applies more widely, as it is incorporated by reference elsewhere.<sup>70</sup>

Section 721A(2) ITA provides:

The income of the person abroad is “protected foreign-source income” so far as it is within subsection (3) or (4).

So there are two types of protected s.720 income:

Type of income (my terminology)	ITA	See para
Protected s.720 trust income	s.721A(3)	88.13
Protected s.720 company income	s.721A(4)	88.14

### 88.13 Protected s.720 trust income

Section 721A ITA provides:

(2) The income of the person abroad is “protected foreign-source income” so far as it is within subsection (3) or (4).

(3) Income is within this subsection if—

A set of 5 conditions then follow, which I call “**s.720 protected-trust conditions**”.

#### 88.13.1 Condition (a): RFI

<sup>67</sup> See 88.8 (Protected income: Terminology).

<sup>68</sup> See 88.15.2 (Transferor not UK domiciled).

<sup>69</sup> See 4.4.1 (Condition A: formerly dom).

<sup>70</sup> The list includes: s.731(1A) ITA: see 47.43 (Non-resident beneficiary); s.733A(1)(b)(i) (s.731 close-family charge); s.733B(1).

Section 721A ITA provides:

- (3) Income is within this subsection if—  
 (a) it would be relevant foreign income if it were the individual's

This is similar to s.624 protected-trust condition A, but not quite the same.<sup>71</sup> I call it the “**RFI condition**”.

If the individual is non-resident, the income does not meet this requirement,<sup>72</sup> so it is not protected s.720 income. Similarly if the individual has died, the income is not protected s.720 income.<sup>73</sup>

For whether offshore income gains and accrued income profits constitute protected s.720 income, see 64.12.2 (OIG: Protected s.720 income?); 27.15 (AIP: Protected-trust reliefs).

#### 88.13.2 *Condition (b): Settlement*

Section 721A ITA provides:

- (3) Income is within this subsection if ...  
 (b) the person abroad is the trustees of a settlement

Trust-protection guidance notes that for this purpose, “settlement” includes “foreign entities that fall to be treated like trusts under the principle in *Memec plc v IRC* e.g. certain types of foundations”.

Company income does not meet this condition: it may instead come within s.721A(4) discussed below.

#### 88.13.3 *Cond. (c): Non-resident trust*

Section 721A ITA provides:

---

71 See 88.9.1 (Condition A: RFI). For the reason for the wording (“would be RFI if it were the individual's”), see 15.10.2 (Relevant foreign income).

72 See 16.4.1 (“Relevant foreign income”).

73 This is also the view of the professional bodies in their paper “Finance Act 2018 Section 35 and sch 10 Settlements: Anti-avoidance Notes on practical points and areas of uncertainty” (Mar 2019): “The transfer of assets onward gift rules can only apply if the original benefit is matched against “protected foreign source income”. This requires the income to have arisen after 5 April 2017 at a time when the settlor is UK resident.”

<https://www.tax.org.uk/sites/default/files/190329%20FA%202018%20Schedule%2010%20Notes.pdf>

- (3) Income is within this subsection if ...
  - (c) the trustees are non-UK resident for the tax year

Condition (c) is the equivalent of s.624 protected-trust condition E.<sup>74</sup>

#### 88.13.4 *Cond. (d): Non-dom transferor*

Section 721A ITA provides:

- (3) Income is within this subsection if ...
  - (d) when the settlement is created, the individual [transferor] is—
    - (i) not [actually] domiciled in the UK, and
    - (ii) if the settlement is created on or after 6 April 2017, not deemed domiciled<sup>75</sup> in the UK

The individual will usually be the settlor as well as the transferor, but that is not necessarily the case, and is not required.

#### 88.13.5 *Condition (e): Tainting*

Section 721A ITA provides:

- (3) Income is within this subsection if ...
  - (e) no property or income is provided directly or indirectly for the purposes of the settlement by the individual [transferor], or by the trustees of any other settlement of which the individual is a beneficiary or settlor, at a time in the period—
    - (i) beginning with the start of 6 April 2017 or, if later, the creation of the settlement, and
    - (ii) ending with the end of the tax year, when the individual [transferor] is domiciled or deemed domiciled in the UK.

Condition (e) is the tainting rule which applies for all the protected-trust reliefs.<sup>76</sup> The wording here is different from the TCGA and ITTOIA equivalents, but there is no difference in meaning.

Section 721B (tainting) is the equivalent of the rule in para 5B sch 5A TCGA. The wording here is identical, so these provisions need not be

---

<sup>74</sup> See 88.9.4 (Non-resident trustees).

<sup>75</sup> Section 721A(7) ITA provides the standard IT definition.

<sup>76</sup> See 88.4 (Condition D: Tainting).

discussed again here.

### 88.13.6 *s.624/s.720 compared*

It may be helpful to set out the definitions of protected s.624 income/protected s.720 trust income, side by side, for comparison:

#### **s.628A: protected s.624 income**

**(3) Condition A is that the income would be relevant foreign income if it were income of a UK resident individual.**

[No equivalent as s.624 requires income arising under a settlement]

(4) Condition B is that the income is from property originating from the settlor (see section 645).

(5) Condition C is that when the settlement is created the settlor—  
(a) is not domiciled in the UK, and  
(b) if the settlement is created on or after 6 April 2017, is not deemed domiciled in the UK.

(6) Condition D is that there is no time in the tax year when the settlor is—  
(a) domiciled in the UK, or  
(b) deemed domiciled in the UK by virtue of Condition A in section 835BA of ITA 2007.

(7) Condition E is that the trustees of the settlement are not UK resident for the tax year.

#### **s.721A(3): s.720 prot'd trust income**

(3) Income is within this subsection if—

(a) it would be relevant foreign income if it were the individual's [the settlor's/transferor's],

(b) the person abroad is the trustees of a settlement,

(d) when the settlement is created, the individual [the transferor] is—  
(i) not domiciled in the UK, and  
(ii) if the settlement is created on or after 6 April 2017, not deemed domiciled in the UK, and

(c) the trustees are non-UK resident for the tax year,

(8) Condition F is that no property or income is provided directly or indirectly for the purposes of the settlement by the settlor, or by the trustees of any other settlement of which the settlor is a beneficiary or settlor, at a time in the relevant period when the settlor is—

- (a) domiciled in the UK, or
- (b) deemed domiciled in the UK.

(9) In subsection (8) “relevant period” means the period—

- (a) beginning with the start of 6 April 2017 or, if later, the creation of the settlement, and
- (b) ending with the end of the tax year.

(e) no property or income is provided directly or indirectly for the purposes of the settlement by the individual [transferor], or by the trustees of any other settlement of which the individual is a beneficiary or settlor,

at a time in the period—

- (i) beginning with the start of 6 April 2017 or, if later, the creation of the settlement, and
- (ii) ending with the end of the tax year, when the individual is domiciled or deemed domiciled in the UK.

## 88.14 Protected s.720 company income

Section 721A ITA provides:

- (2) The income of the person abroad is “protected foreign-source income” so far as it is within subsection (3) or (4)...
- (4) Income is within this subsection if—

A set of 7 conditions then follow, which I call “**s.720 protected-company conditions**”. These are (more or less) the same as the five s.720 protected-trust conditions, except:

- (1) Para (b) requires that the person abroad is a company (rather than a trust); and
- (2) Paras (c)(d) are added.

### 88.14.1 *Cond. (c): Trustee participator*

Section 721A ITA provides:

- (4) Income is within this subsection if...
  - (c) the trustees of a settlement—

- (i) are participators<sup>77</sup> in the person abroad, or
- (ii) are participators in the first in a chain of two or more companies
  - [A] where the last company in the chain is the person abroad and
  - [B] where each company in the chain (except the last) is a participator in the next company in the chain,

Company income is not protected s.720 income unless the trustees are participators; in short, condition (c) requires that the company is held in a trust. If the transferor holds a company directly, outside a trust, there is no s.720 protected-trust relief.

That seems surprising, but the rule is deliberate.<sup>78</sup> No reason has been given. I infer the reason is that allowing protected trust relief to a structure is part of a package which also includes the application of s.731 to benefits received from the structure. In the absence of condition (c) and (d), a transferor could obtain the benefit of s.720 protected trust relief without paying the price of a s.731 charge on benefits.

The transferor will normally be the settlor, but that need not necessarily be the case.

If the company is transferred to a trust, income arising after the transfer will meet condition (c) and can qualify as protected s.727 company income.

Para 12 Protected-trust Note 2020 considers chains of companies:

Read literally, this could mean income arising to intermediate companies in the chain cannot be PFSI. However, a purposive construction avoids this result, if ‘the last company in the chain’ is taken to be the company which has received the income, even if that company may have direct or indirect subsidiaries. It is considered this purposive construction must be correct.

This is correct, but it does not require a particularly loose or purposive

---

77 Section 721A(7) provides the standard definition: “In this section “participator”, in relation to a company, has the meaning given by section 454 of CTA 2010”.

78 HM Treasury, “Reforms to the taxation of non-domiciles: response to further consultation” (Dec 2016) para 2.3.3.

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/574450/non\\_doms\\_consultation\\_response\\_final.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf)

construction to reach that conclusion.

#### 88.14.2 Condition (d): Power to enjoy

Section 721A ITA provides:

(4) Income is within this subsection if...

- (d) the individual's power to enjoy the income results from the trustees being participators as mentioned in paragraph (c)(i) or (ii)

“Results from” is the language of causation, and causation often causes intractable legal puzzles.

Suppose this structure:

This is a simple structure; and the question, is the company income s.720 protected income? seems a simple question. But the tax question does not have a simple or single answer because the position depends on the terms of the trust and how the structure has come about.

The position is simpler if all the company income arises as a result of the loan, not as a result of other transfers; eg the company has no significant assets other than the loaned funds.

(1) *Case 1: the trust excludes T and T's spouse.* In this case T in principle has power to enjoy the company income. T has that power as a result of the loan, not as a result of the trustees being participators, so the company income is not s.720 protected income.

(2) *Case 2: T is a beneficiary.* In this case the individual in principle has power to enjoy the income of the company for two reasons, either of which would suffice: the trust's shareholding *and* the benefit of the loan. In that case does the power to enjoy result from the trustees being participators? In philosophical terms, where A or B are sufficient to cause a result, the result is said to be overdetermined. Can one say that A caused the result? In legal terms the answer depends on the context.

Condition (d) does not say expressly whether or not the individual's power to enjoy must result *only* from the trustees being participators. In

this situation one should ask what solution makes more sense having regard to the object of the rule. I think the object is to ensure that a structure with s.720 protected company income is within s.731. If that is right then the company income in case 2 should not be protected. The analogy with case 1 also supports the view that the income is not protected.

Section 727 also needs consideration, as the capital receipt conditions are likely to be met.<sup>79</sup> The s.727 analysis provides further support for the view that the income is not s.720 protected income.

In practice the solution may be for the T to transfer the loan to the trust. The position is more complicated if the company has assets in addition to the loaned funds. In that case there would have been other significant transfers of assets, a transfer to the trust and a transfer to the company:

- (1) Who are the transferors in relation to each transfer? The analysis is simpler if T made all the transfers, but that need not be the case.
- (2) What is the income arising to the company (the person abroad) as a result of each of those transfers? It would then be necessary to consider:
  - (a) “Company loan income”: income arising to the company as a result of the loan
  - (b) Company non-loan income: other income of the company

I do not pursue these permutations here.

Suppose:

T’s power to enjoy 25% of the company’s income results from his or her shareholding, and power to enjoy 75% of the income results from the trustees being participators. It is suggested one can apportion and 75% of the company’s income is protected s.720 company income. But it would

---

<sup>79</sup> See 88.16 (s.727 protected-trust relief).

be better to avoid this problem.

Suppose one company is held by two settlor-interested trusts:

It is suggested that the company income can be protected s.720 income, as the singular includes the plural.

88.14.3 *Protected trust/co income compared*

It may be helpful to set out the definitions of protected s.720 trust/co income side by side for comparison:

**Protected s.720 trust income**

**Protected s.720 company income**

(3) Income is within this subsection if—  
 (a) it would be relevant foreign income if it were the individual's,

(4) [identical]

(b) the person abroad is the trustees of a settlement,

(b) the person abroad is a company,

[No equivalent]

(c) the trustees of a settlement—  
 (i) are participators in the person abroad, or  
 (ii) are participators in the first in a chain of two or more companies where the last company in the chain is the person abroad and where each company in the chain (except the last) is a participator in the next company in the chain,

[No equivalent]

(d) the individual's power to enjoy the income results from the trustees being participators as mentioned in paragraph (c)(i) or (ii),

(c) the trustees are non-UK resident for the tax year,

(e) [identical to (c)]

(d) when the settlement is created, the individual is—  
 (i) not domiciled in the UK, and  
 (ii) if the settlement is created on or after 6 April 2017, not deemed domiciled in the UK, and

(f) [identical to (d)]

(e) no property or income is provided directly or indirectly for the purposes of the settlement by the individual, or by the trustees of any other settlement of which the individual is a beneficiary or settlor, at a time in the period—  
 (i) beginning with the start of 6 April 2017 or, if later, the creation of the settlement, and  
 (ii) ending with the end of the tax year, when the individual is domiciled or deemed domiciled in the UK.

(g) [identical to (e)]

### 88.15 s.720: Protected-trust relief

Armed with the definition of “protected s.720 income” we can turn to the s.720 protected-trust relief.

Section 721(3B) ITA provides:

The amount of the income treated as arising under subsection (1) [the amount of s.720 income] is (subject to sections 724 and 725<sup>80</sup>) given by the following rules-

#### 88.15.1 *Transferor UK domiciled*

Section 721(3B) ITA provides:

##### *Rule 1*

The amount is equal to the amount of the income of the person abroad if the individual [transferor]-

- (a) is [actually] domiciled in the UK at any time in the tax year, or
- (b) is at any time in the tax year regarded for the purposes of

---

<sup>80</sup> The exceptions referred to in brackets will rarely if ever apply. For s.724, see 46.16.3 (Amount of charge: enjoyment condition C). s.725 concerns interaction with CFC rules.

section 718(1)(b) as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met [formerly-domiciled resident<sup>81</sup>].

In para (b) the words *for the purposes of section 718(1)(b)* are not apt. That section defines the expression “person abroad”.<sup>82</sup> We are concerned here with the (deemed) domicile of the transferor, not the person abroad. The words should be disregarded under the slip rule, or para (b) cannot be applied at all.

### 88.15.2 *Transferor not UK domiciled*

Section 721(3B) ITA continues:

*Rule 2*

In any other case ...

That is, if the transferor is not actually UK domiciled, and not a formerly-domiciled resident (this requirement is the effective equivalent of s.86 protected-trust condition C<sup>83</sup>):

... the amount is equal to so much of the income of the person abroad as is not protected foreign-source income (see section 721A).

In short, protected foreign-source income (which I call protected s.720 income) is not subject to the s.720 charge. The wording seems exceptionally clumsy, but it works.

I refer to this rule as “**s.720 protected-trust relief**” though it is not expressed in the form of a relief.

Section 720 protected-trust relief is better than the s.720 remittance basis, which applies to remittance basis transferors in the absence of protected-trust relief, because:

- (1) To obtain protected-trust relief it is not necessary to claim the remittance basis (which involves losing personal allowances as well as the remittance basis claim charge)
- (2) s.720 protected-trust income is not subject to income tax even if remitted to the UK.

---

81 See 4.4.1 (Condition A: formerly dom).

82 See 45.5 (“Person abroad”).

83 See 88.3.2 (Conditions B/C: Non-dom settlor).

88.15.3 *Pre-2017 s.720 income*

Income arising before 2017/18 did not qualify for s.720 protected-trust relief, but it could qualify for the s.720 remittance basis.

Section 726(6) ITA provides:

In addition,<sup>84</sup> where the tax year in which any foreign deemed income [foreign source s.720 income] arises is earlier than the tax year 2017-18, section 832 of ITTOIA 2005 does not apply to the foreign deemed income so far as it—

- (a) is remitted to the UK<sup>85</sup> in the tax year 2017-18 or a later tax year, and
- (b) is transitionally protected income.

Section 726(7) ITA provides the definition of “transitionally protected income”:

In subsection (6) ...

“transitionally protected income” means any foreign deemed income where the income mentioned in section 721(2) [that is, the income of the person abroad]—

- (a) arises in a tax year earlier than the tax year 2017-18,
- (b) would be protected foreign-source income as defined by section 721A<sup>86</sup> if section 721A—
  - (i) had effect for tax years earlier than the tax year 2017-18, and
  - (ii) so had effect with the omission of its subsections (3)(e), (4)(g), (5) and (6) [tainting rule], and
- (c) has not prior to 6 April 2017 been distributed by the trustees of the settlement concerned.

The conditions in para (a) to (c) are similar to s.624 transitional relief for pre-2017 income,<sup>87</sup> but the relief is wider:

- (1) In this case, s.832 is disapplied so there is no charge on remittance.<sup>88</sup>
- (2) The relief applies to all pre-2017 income (not just income in the

<sup>84</sup> The words “In addition” are otiose; but it does not matter.

<sup>85</sup> See 17.1 (ITA remittance basis).

<sup>86</sup> See 88.12 (Protected s.720 income).

<sup>87</sup> See 88.10.2 (Pre-2017 s.624 income).

<sup>88</sup> See 16.13 (Charge on remitted RFI).

period 2008 - 2017).<sup>89</sup>

That seems generous, but it makes sense because the transferor is (from 2017/18) within the scope of s.731 in relation to pre-2017 s.720 income (which is relevant income); that is a retrospective extension of the scope of the charge.<sup>90</sup>

Remittance of the income of the person abroad is also relevant for the s.731 remittance basis.

### 88.16 s.727 protected-trust relief

Section 729A ITA sets out the definition of protected foreign-source income (which I call protected s.727 income) for the purposes of s.727 protected trust relief..

As for protected s.720 income, there are two types of protected s.727 income, which I call protected s.727 trust income/protected s.727 company income.<sup>91</sup>

I need not discuss this definition in full, because it mostly follows the definition of protected s.720 income.<sup>92</sup>

There are however two differences between the definitions of s.720/727 protected company income:

- (1) Para (d) of the definition of s.727 protected company income is not worded the same as the equivalent for s.720 protected company income).
- (2) Para (e) of the definition is added.

This is easier to follow if the definitions are set out side by side, and para (d) needs to be read with para (c):

**s.720 protected co income: s.721A(4)      s.727 protected co. income: s.729A(4)**

---

89 There is another transitional relief for pre-2008 income; see 46.20.3 (Pre-2008 s.720 income).

90 See 47.15.3 (Transferor not relevantly domiciled).

91 See 88.8 (Protected income: Terminology).

92 See 88.12 (Protected s.720 income).

|--|--|

Protected-trust Q&As Question 15 provides:

[The Q&A summarises conditions (d) and (e) and continues:]

Read literally, this could mean that there are many circumstances where the income of such a company would not be PFSI [in my terminology, s.727 protected company income] for the purposes of the capital sum rules.

*[Example 1]*

For example, if

[1] a settlor establishes an overseas investment company and transfers £10 million to that company before

[2] subsequently transferring the shares in the company to a trust, the trustees become participators as a result of the transfer of the shares to the trustees but the income arises in the company as a result of the original transfer of the £10 million to the company – these are different relevant transactions.

Is it accepted that, in these circumstances, the income of the company is PFSI within ITA 2007 s.729A(4) (assuming the other conditions are satisfied)?

*Suggested answer:* the intention is that the income of an underlying

company in these circumstances should be PFSI for the purposes of the capital sum rules to the extent of the trustees' interest in the company as a participator.

Therefore, if the company is wholly owned by the trustees and there are no external interests, it is accepted that the income qualifies as PFSI. This is on the basis of a purposive construction of s.729A(4)(e) so that the condition is treated as being satisfied as long as the income arises as a result of any 'relevant transaction' rather than the income having to arise as a result of exactly the same relevant transaction by which the trustees became participators in the company.<sup>93</sup>

This is correct, but does not require a particularly loose or purposive construction. The condition in para (e) refers to that "relevant transaction", not that "transfer of assets". Relevant transaction includes associated operations.<sup>94</sup> In the example, the transfer of cash to the company, and the transfer of the shares to the trust, are in principle associated operations. So the company income can in principle meet condition (e) and can be protected s.727 income.

If there were a problem, the solution would be to wind up the company so the assets are held directly by the trust.

*[Example 2]*

The position would however be different if, for example,

- [1] the settlor had made a loan to the company as a result of which income arose to the company and
- [2] the settlor retained the benefit of the loan [and
- [3] the settlor transferred the shares to the trust<sup>95</sup>].

Diagrammatically:

---

93 Para 13 Protected-trust Note 2020 makes the same point.

94 See 45.12 (Why associated operations matter).

95 It must be envisaged that the shares are held by the trust. It is not clear in the example whether the shares became held in the trust before or after the loan was made to the company; it probably makes no difference.

In these circumstances, the income of the company which was attributable to the loan would not be PFSI for the purposes of the capital sum rules.

This is because the series of ‘relevant transactions’ giving rise to the trustees’ participation in the company is completely separate to the chain of ‘relevant transactions’ which results in income from the proceeds of the loan being received by the company. There is therefore no link between the relevant transaction resulting in the trustees becoming participators in the company and the relevant transaction giving rise to the income.

But s.727 does not matter, because in this situation the income would not be protected s.720 income: HMRC need not rely on s.727.<sup>96</sup>

### 88.17 Protected-trust conditions: Navigation

It may help navigation to summarise the protected-trust conditions in 3 tables:

#### s.86 protected-trust conditions

<i>Condition</i>	<i>sch 5 para</i>	<i>Rule</i>	<i>See para</i>
A	5A(2)	2017/8 or later (commencement)	88.3.1
B	5A(3)	Settlor non-dom when trust made	88.3.2
C	5A(4)	Settlor non-dom in year	88.3.2
D	5A(5)	Tainting	88.4

#### s.624 protected-trust conditions

<i>Condition</i>	<i>Section</i>	<i>Rule</i>	<i>See para</i>
A	628A(3)	Foreign income	88.9.1
B	628A(4)	Multiple settlor rule	88.9.2
C	628A(5)	Settlor non-dom when trust made	88.9.3
D	628A(6)	Settlor non-dom in year	88.9.3
E	628A(7)	Non-resident trust	88.9.4
F	628A(8)	Tainting	88.9.5

<sup>96</sup> See 88.14.2 (Condition (d): Power to enjoy).

**s.720 protected-trust conditions and s.624/87 equivalents**

<i>Company</i>	<i>Trust</i>	<i>Rule</i>	<i>Equivalent: s.624 s.86</i>	
721A(4)(a)	721A(3)(a)	Foreign income	A	–
721A(4)(b)	721A(3)(b)	Person abroad is co/trust	–	–
721A(4)(c)	–	Trustee participator	–	–
721A(4)(d)	–	Power to enjoy as participator	–	–
721A(4)(e)	721A(3)(c)	Non-resident trust	E	–
721A(4)(f)	721A(3)(d)	Settlor non-dom when trust made	C	B
721A(4)(g)	721A(3)(e)	Tainting	F	D
721(3B) Rule 2 <sup>97</sup>	<i>ditto</i>	Settlor non-dom in year	D	C

It would have been better if the wording was more closely aligned; but there it is.

**88.18 Protected-trusts: Commencement**

Para 39 sch 8 F(no.2)A 2017 provides:

The amendments made by paragraphs 19 to 38 have effect for the tax year 2017-18 and subsequent tax years.

Paras 19-38 include all the ITTOIA and ITA protected-trust provisions, including the settlor-interested trust rules in s.628A-C ITTOIA, and the ToA rules in s.721A-B, s.733A, 735B ITA.

Pre-2017 income is not protected s.624/s.720 income.

For CGT commencement, see 88.3.1 (Condition A: 2017/18 or later).

**88.19 Tax return: Protected income/gains**

Protected income/gains is not taxable and tax returns do not require any details. Form SA106 (2019/20) boxes 10/12 ask about income received by a person abroad, but SA106 (notes) 2019/20 provides:

If the income received by the person abroad is ‘protected foreign income’, do not enter details of protected foreign income in boxes 10 to 13.1.

---

97 This is not expressed as part of the definition of “protected s.720 income” but it is effectively a condition of s.720 protected-trust relief.

## CHAPTER EIGHTY NINE

# NON-DOM/NON-RESIDENT SPOUSE

89.1

### *Cross references*

Joint bank accounts are considered elsewhere:

90.3 (Joint account: IHT)

90.6 (Remittance from joint account)

### **89.1 Non-dom/non-resident spouse**

This chapter considers tax issues which arise where:

- (1) a UK domiciliary has a foreign domiciled spouse<sup>1</sup>
- (2) a UK resident has a non-resident spouse<sup>2</sup>

FA 1988 abolished the former rule that income/gains of a married women were deemed to accrue to her husband, and established the general principle of independent taxation of husband and wife. The rules must be understood in that context, and in the light of conflicting policy considerations:

- (1) Tax should be marriage-neutral: marriage should not impose additional tax or give a tax advantage
- (2) To facilitate inter-spouse transfers by reliefs for tax charges which arise on other transfers
- (3) (a) To prevent avoidance;  
(b) More fundamentally, to determine what in this context constitutes avoidance, and what is acceptable tax planning<sup>3</sup>

---

1 References to spouses here include civil partners; see App 3.2 (“Spouse”) and App 3.3 (“Civil partner”).

2 I do not consider the temporary non-residence rules in this chapter.

3 See 2.5.8 (Views of non-tax practitioners) under the heading *Spouses sharing income*.

The various taxes raise (more or less) the same policy issues but the solutions are all different, so each tax need to be considered separately. Such is the patchwork nature of UK taxation.

## 89.2 Restricted IHT spouse exemption

### 89.2.1 *The restriction*

The IHT spouse exemption (s.18(1) IHTA) normally provides complete exemption for transfers between spouses.<sup>4</sup> Section 18(2) IHTA provides an important exception:

If, immediately before the transfer, the transferor but not the transferor's spouse or civil partner is domiciled in the UK the value in respect of which the transfer is exempt (calculated as a value on which no tax is chargeable) shall not exceed

- [a] the exemption limit at the time of the transfer,
- [b] less any amount previously taken into account for the purposes of the exemption conferred by this section.

So where:

- (1) the transferor is UK domiciled (or deemed UK domiciled), and
  - (2) the transferee (the spouse of the transferor) is foreign domiciled
- the exemption is in principle restricted to the specified amount. I refer to this as the “**restricted IHT spouse exemption**”.

This restriction does not apply the other way round, where the foreign domiciled individual makes a transfer to their UK domiciled spouse. That makes sense because such a transfer brings assets which would have been outside the scope of IHT within its scope.

The restriction does not apply where neither spouse is domiciled in the UK.

The restriction is modified by the USA and the Swiss IHT DTAs.<sup>5</sup>

The transferee spouse may elect to be treated as UK domiciled so as to avoid the restriction.<sup>6</sup>

Transfers which do not qualify for the IHT spouse exemption will be

4 For the IHT spouse exemption generally, see 72.5.1 (Spouse exemption: Introduction); see too 74.10 (GWR spouse exemption).

5 See 113.13 (IHT spouse exemption extended).

6 See 4.13 (Spouse election domicile).

PETs unless some other exemption is in point.

### 89.2.2 *Amount of restricted relief*

Where the IHT spouse exemption is restricted, s.18 provides that the amount of relief is:

- [a] the exemption limit at the time of the transfer,
- [b] less any amount previously taken into account for the purposes of the exemption conferred by this section.

The exemption limit is defined in s.18(2A) IHTA:

For the purposes of subsection (2), the exemption limit is the amount shown in the second column of the first row of the Table in Schedule 1 (upper limit of portion of value charged at rate of nil per cent).

That is the nil-rate band amount, which is fixed at £325k until end 2020/2021.<sup>7</sup>

An inter-spouse gift within the limit of the restricted spouse exemption is *not* a PET. Section 3A(1A)(b) IHTA provides that a PET is a transfer of value “which, apart from this section, would be a chargeable transfer”.<sup>8</sup> So if one spouse makes a gift to the other, that gift uses up the exemption limit even though the gift is made more than seven years from the death and would otherwise qualify as an exempt transfer, as a PET.

The position is different for a gift of excluded property.<sup>9</sup> Such a gift is not a transfer of value at all and therefore it is not a transfer which qualifies for the spouse exemption and does not use up the exemption limit.

The position is less clear for a transfer (outside s.11) which qualifies for the annual or normal expenditure exemptions. Such a transfer is an exempt transfer under those exemptions: does it also use up the limit for inter-spouse gifts? There is no clear answer in the legislation but it is suggested that these transfers do not use up the limit. That would better fit the scheme of the legislation.

The IHT Manual provides:

---

<sup>7</sup> Section 10 F(no.2)A 2015.

<sup>8</sup> Transfers before 22 March 2006 are governed by s.3A(1) IHTA but the wording on this point is the same.

<sup>9</sup> Likewise a gift within s.11 IHTA; see 89.4 (Disposition for maintenance of spouse).

**11033. Spouse or civil partner domiciled outside UK [Jan 2017]**

... The restriction applies to

- the value before grossing (IHTM26121)
- the cumulative total of all transfers to a spouse or civil partner. So you must take into account the amounts allowed under earlier transfers to a spouse or civil partner whether or not they were domiciled or treated as domiciled in the UK at the time in considering whether the restriction is exceeded, and
- since the exemption applies to transfers made by a individual, if that person has been married or in civil partnership with more than person, the restriction applies to the cumulative total of all transfers to all spouses or civil partners.

Where the appropriate limit is exceeded, you should allocate the exemption in the way which is most favourable to the spouse or civil partner. Factors you should bear in mind include which assets bear the tax and whether business relief (IHTM25131), agricultural relief (IHTM24001) or any other reliefs are available.

***Example 1 (Mr and Mrs Allsop)***

In May 2012, Mr A, who was domiciled in the UK transferred £200,000 to Mrs A, who was not domiciled in the UK.

Of this transfer, £55,000 is exempt under IHTA1984/S18(2), and £145,000 is a PET (IHTM04057) and assumed to be exempt.

Mr A dies in 2020 and leaves all his property to his wife, who remains domiciled outside the UK.

On Mr A's death, the limited exemption under IHTA1984/S18(2) has increased to £325,000, so that exemption of £270,000 (£325,000 - £55,000) is now available on his death.

***Example 2 (Mr and Mrs Costa)***

In January 2013 Mr C transfers a UK property worth £200,000 to Mrs C. Both are domiciled outside the UK. Exemption under IHTA1984/S18 (1) is available in full.

In June 2013 Mr C is deemed to be domiciled in the UK and gives another UK property worth £300,000 to his wife, who remains domiciled outside the UK. The restriction on the exemption under IHTA1984/S18 (2) applies at this point.

At the time of the transfer that triggered the restriction, the spouse exemption available to Mr C was £325,000. He has already made a gift to Mrs C that qualified for exemption under IHTA84/S18 of £200,000, so the exemption available against this transfer is £125,000. This is

because IHTA84/S18(2) reduces the amount of the limited exemption available by 'any amount previously taken into account for the purposes of the exemption conferred by this section'. This means that £175,000 of the transfer will be a PET to Mrs C and chargeable to tax if Mr C dies before July 2020.

### 89.2.3 Spouse exemption: EU-law

The discrimination, at least before the 2013 changes took effect, was unlawful in EU law. In 2010 the EC had formally objected<sup>10</sup> on the grounds that the difference in tax treatment of transfers between domiciled and non-domiciled spouses is discrimination contrary to Art.18 TFEU.<sup>11</sup>

The government formerly sought to justify the discrimination on the grounds of the "potential avoidance risk".<sup>12</sup> This was a lame excuse,<sup>13</sup> and the government did not attempt to defend it. HMRC papers on the 2013 spouse exemption reform did not mention the EU-law background, but this point must have been tacitly accepted. The EC infringement proceedings closed on 20/11/2013 so it seems the EU accepted that the new law is EU-law compliant. But this may be reviewed.<sup>14</sup>

The new law is fairer than the old, so EU supporters may claim it as a case where EU law has had a beneficial influence.

### 89.2.4 Inter-spouse gift pre-2013

Prior to 6 April 2013, s.18(2) IHTA provided:

---

10 Reference: IN/2010/2111;

[http://europa.eu/rapid/press-release\\_MEMO-12-794\\_en.htm?locale=en](http://europa.eu/rapid/press-release_MEMO-12-794_en.htm?locale=en)

11 See 102.17 (Discrimination on grounds of nationality).

12 Public Bill Committee debate on Finance Bill, Hansard 13 May 2008 col.181.

13 An unlimited spouse exemption on a gift to a foreign domiciled spouse would clearly lead to a loss of UK IHT. (The loss of tax is not "avoidance" in the strict sense, but nothing turns on that.) However the funds which fall outside the scope of UK IHT in principle fall within the scope of estate or gift taxes in the MS in which the spouse is resident or domiciled. If an inter-spouse gift gives rise to a tax saving it is because the MS concerned does not impose the tax, or not at the UK's (comparatively) high rates. That does not justify the restriction on free movement of capital. See 102.16.3 (Counteracting non-residents tax advantage); 102.20.1 (Discrimination against non-residents).

14 See 4.13.7 (Spouse exemption: EU-law).

*If, immediately before the transfer, the transferor but not the transferor's spouse or civil partner is domiciled in the UK the value in respect of which the transfer is exempt (calculated as a value on which no tax is chargeable) shall not exceed £55,000 less any amount previously taken into account for the purposes of the exemption conferred by this section.*

The FA 2013 made two changes:

- (1) The exemption limit increased from £55k to the nil-rate band.
- (2) Spouse election-domicile allows the spouse to opt out of the restriction.<sup>15</sup>

Section 178(4) FA 2013 provides the commencement rule:

The amendments made by this section have effect in relation to transfers of value made on or after 6 April 2013.

Thus (subject to a claim that EU law overrode domestic law) the old £55k limit applies to gifts made before 6 April 2013. Moreover, the IHT spouse election cannot be made for such gifts. These rules will continue to be relevant until 2020, when pre-2013 PETs will fall out of charge.

The IHT Manual indicates that HMRC intend to take this point:

**IHTM13046: election by non-UK domiciled spouse or civil partner: the date the election takes effect** [Jan 2020]

... if a person domiciled in the UK makes a gift to their non-UK domiciled spouse or civil partner before 6 April 2013 and dies within seven years, the £55,000 limit that applies before that date continues to apply (IHTM11033).

Example (Jane & Kate)

In May 2012, J, who was domiciled in the UK transferred £400,000 to her civil partner K, who was not domiciled in the UK.

Of this transfer, £55,000 is exempt under IHTA1984/S18(2), and £345,000 is a PET and assumed to be exempt.

J dies in 2017.

The gift is now a failed PET and after deduction of the nil rate band, £20,000 will be subject to tax.

Where there has been a death before the 2013 rules take effect, a spouse

---

<sup>15</sup> See 4.13 (Spouse-election domicile).

should argue for the application of the IHT spouse exemption as a matter of EU law.

### **89.3 Settlor spouse/widow: trust receipt**

The termination of an estate interest in possession (during the life of the life tenant) is a transfer of value under s.52 IHTA.<sup>16</sup> Section 53(4) IHTA provides:

Tax shall not be chargeable under s.52 above if on the occasion when the interest comes to an end—

- (a) the settlor's spouse or civil partner, or
  - (b) where the settlor has died less than two years earlier, the settlor's widow or widower or surviving civil partner,
- becomes beneficially entitled to the settled property and is domiciled in the UK.<sup>17</sup>

This relief only applies if the spouse is UK domiciled (or has made a spouse election). The restriction on s.53(4) relief is broadly consistent with the restriction to the spouse exemption considered above.

Section 54(2) IHTA sets out similar rules for the termination of an estate interest in possession on the death of the life tenant.

### **89.4 Disposition for maintenance of spouse**

Where the IHT spouse exemption does not apply, another exemption may sometimes fill the gap. An inter-spouse gift may qualify for relief under s.11(1) IHTA:

A disposition is not a transfer of value if it is made by one party to a marriage<sup>18</sup> or civil partnership in favour of the other party ... and is—

- (a) for the maintenance of the other party ...<sup>19</sup>

---

16 See 72.10 (Termination of qualifying IIP).

17 Section 53 goes on to set out some exceptions not discussed here.

18 "Marriage" is defined to include a former marriage in certain cases: s.11(6) IHTA.

19 I mention for completeness the further relief in s.11(3) which overlaps with s.11(1).

In practice an inter-spouse gift which qualifies under s.11(3) will also qualify under s.11(1).

This should normally<sup>20</sup> apply, in particular, to the common case where an individual gives a half share in the family home to their spouse. The most basic requirement of “maintenance” is to have a secure roof over one’s head.<sup>21</sup> In *Phizackerley v IRC*<sup>22</sup> the Special Commissioners correctly stated that the normal reason for such a gift is to give the donee spouse security in her own home. Unfortunately he concluded that it was not “for the maintenance” of the other party, it was to give the other party security. With respect, this can hardly be right, because “security” and “maintenance” are not alternatives. It is because the gift gives the spouse security that it is for her maintenance. But it will now be necessary to appeal to the Upper Tribunal to establish this point.

A gift which is within s.11 IHTA (Disposition for family maintenance) is outside the scope of the GWR rules. For such a disposition is not a transfer of value; so it is deemed not to reduce the transferor’s estate: s.3 IHTA. So by implication it must be treated as not being a “disposal by way of gift”. (Any other conclusion would lead to absurd results. For a disposition between spouses within s.11 is not a transfer of value, and so not within the IHT spouse exemption, and so would come within the GWR rules even if both spouses were UK domiciled.)<sup>23</sup>

The normal expenditure exemption (s.21 IHTA) may also be in point. Gifts which qualify for this exemption are still within the reservation of benefit rule.

## **89.5 Transferable nil-rate band**

### *89.5.1 The two nil-rate bands*

---

20 It would be different if the purpose of the gift was not to provide for the spouse but some other purpose, such as IHT planning.

21 Lump sum payments can constitute “maintenance”. Contrast s.2(1)(b) Inheritance (Provision for Family and Dependents) Act 1975 (formerly s.1(4) Inheritance (Family Provision) Act 1938) which states that lump sum payments may constitute “maintenance” for the purpose of the Act. This is also assumed in sch 15 para 10(1)(d) FA 2004 (which takes gifts within s.11 out of the pre-owned assets rules).

22 [2007] STC (SCD) 328.

23 If my view were wrong the further anomaly would arise that gifts of qualifying investments to charity would fall within the scope of GWR, because such gifts fall within s.12 IHTA and not s.102(5)(d) FA 1986; but it is not necessary to pursue that here.

For deaths from 6 April 2017, we have two distinct nil-rate bands:

- (1) The General Nil-rate band (GNRB)
- (2) The Residence Nil-rate band (RNRB)

See too 108.7 (Nil-rate band and DTAs).

### 89.5.2 *General nil-rate band*

Section 8A(1) IHTA provides:

This section applies where—

- (a) immediately before the death of a person (a “deceased person”), the deceased person had a spouse or civil partner (“the survivor”), and
- (b) the deceased person had unused nil-rate band on death.

Section 8A(2) IHTA defines “unused nil-rate band on death”:

A person has unused nil-rate band on death if  $M > VT$  where—

$M$  is the maximum amount that could be transferred by a chargeable transfer made (under section 4 above) on the person’s death if it were to be wholly chargeable to tax at the rate of nil per cent. (assuming, if necessary, that the value of the person’s estate were sufficient but otherwise having regard to the circumstances of the person); and  
 $VT$  is the value actually transferred by the chargeable transfer so made (or nil if no chargeable transfer is so made).

The amount of the unused nil-rate band depends on the amount of the chargeable transfer on the death of the first spouse. If there is no chargeable transfer, the full nil-rate band is unused and is transferable.<sup>24</sup>

### 89.5.3 *Transfer of GNRB non-dom spouse*

The IHT Manual provides:

**43042 Domicile of first spouse or civil partner to die** [Sep 2018]

Every person, UK domiciled or not, is entitled to the full nil rate band to be set against their estate that is subject to IHT.

The availability of TRNB on the estate of the first to die of a non domiciled spouse or civil partner is calculated only by reference to property that is potentially subject to an UK IHT charge. For a non

---

<sup>24</sup> Section 8A(3)(4) IHTA.

domiciled spouse or civil partner, VT [IHTM43020] will be calculated only by reference to their estate in the UK. Assets held outside the UK, by a person not domiciled, or deemed domiciled in the UK, regardless of the devolution of those assets are not taken into account when calculating the available unused nil rate band.

Thus where the survivor dies in the UK and their spouse or civil partner, who held no UK assets, died domiciled abroad leaving all their overseas assets to their children, none of the nil rate band was used on the first death. The personal representatives of the survivor may claim to transfer 100% of the nil rate band to the estate of the survivor.

*Example*<sup>25</sup> (Abdul, Soroya and Jamil)

A [died] domiciled abroad.

His only asset situated in the UK was a US dollar account containing US\$250,000.

He left this and the remainder of his estate to his son, J who lives in the UK.<sup>26</sup> After the death, his wife, S, moved to the UK to live with J and died domiciled in the UK.<sup>27</sup>

The assets situated outside the UK are not liable to IHT.

The US dollar account is left out of account [IHTM04380] in determining A's estate at death.<sup>28</sup>

So although the whole estate passed to J, no property was chargeable to IHT, leaving the nil rate available for transfer in full on S's death..

The next section needs to be amended to reflect the increase in the limit for the restricted spouse exemption and the possibility of an IHT spouse election; but it still illustrates relevant points.

**IHTM43043 calculation where the domicile of the survivor at the first death is outside the UK [Sep 2018]**

On the death of a first spouse or civil partner who was domiciled in the UK, exemption for assets passing to the surviving spouse or civil partner will be limited by IHTA84/S18(2) to £55,000 for transfers before 6

25 The HMRC example, as is the current trend, contains several facts which are wholly irrelevant to the tax position which makes it harder to identify the relevant points. The following footnotes identify these.

26 Where the son lives, and where he is domiciled (which may not be the same) are irrelevant to the example.

27 Where the widow lives and where she dies domiciled, are irrelevant to the example.

28 See 72.13 (Foreign currency account). It must be assumed that A is non-resident as well as non-domiciled at the time of his death.

April 2013, and the applicable nil-rate band for transfers on or after this date, if the surviving spouse or civil partner was not domiciled or deemed domiciled in the UK. (IHTM11033)

If the entire estate passed to the surviving spouse or civil partner, anything over the S18(2) limit is a chargeable legacy. Where the net estate is above the nil rate band plus the S18(2) limited exemption there will be no nil rate band to transfer, as illustrated below.

**Example**

Susan died on 1 June 2008, domiciled in the UK. She left an estate worth £450,000 all to her husband Lars who is domiciled in Sweden.

**Unused nil rate band calculation**

**M** = £312,000

**VT** = £395,000 (Estate of £450,000 less limited spouse exemption of £55,000)

**M** is not greater than **VT**, so there is nothing to transfer.

Where the net estate is less than the nil rate band plus the S18(2) limit, there will still be an amount of nil rate band available to transfer. The following example shows how both the amount that the net estate is below the nil rate band, and limited spouse exemption, combine to produce the amount of nil rate band available to transfer.

**Example**

Charles died on 1 October 2014, domiciled in the UK. He left an estate worth £520,000 all to his wife Helga who is domiciled in Sweden.

**Unused nil rate band calculation**

**M** = £325,000

**VT** = £195,000 (Estate of £520,000 less limited spouse exemption of £325,000)

**M** is greater than **VT** by £130,000

**Transferable nil rate band calculation**

**E** = £130,000

**NRBMD** = £325,000 so

$(130,000 \div 325,000) \times 100 = 40.0000\%$

On Helga's death, the nil rate band on her death would be uprated by 40%. This approach will be appropriate on the death of the survivor when either

- they remain domiciled abroad and their UK assets exceed the single nil rate band, or
- between the first death and their own, they became domiciled or deemed domiciled in the UK.

However, if Helga elects to be treated as if she is domiciled in the UK

(IHTM13040) under the provisions of IHTA84/S267ZA and S267ZB from a date before Charles's death, the limit on the amount of spouse exemption will not apply and the nil rate band on her death would then be uprated by 100%.

## 89.6 Residence Nil-rate Band

### 89.6.1 Tapered withdrawal of RNRB

There is a tapered withdrawal of the residence nil-rate band for estates over £2 million. The withdrawal rate of £1 for every £2 over this threshold.

Section 8D(5) IHTA provides:

(g) the person's "adjusted allowance" is—

- (i) the person's default allowance, less
- (ii) the amount given by—

$$(E - TT) \div 2$$

but is nil if that amount is greater than the person's default allowance.

The key terms are E (**E**state) and TT (**T**aper **T**hreshold).

TT is a fixed sum: £2m (+ indexation): s.8D(5)(b)(c) IHTA.

Section 8D(5)(d) IHTA provides:

E is the value of the person's estate immediately before the person's death.

Excluded property is not part of a person's estate immediately before death<sup>29</sup> so does not reduce the the RNRB.

### 89.6.2 Withdrawal of transferable RNRB

Section 8G(5) IHTA provides for taper of transferable RNRB

If the value ("RPE") of the related person's estate immediately before the related person's death is greater than £2,000,000, the amount treated under subsection (4)(a) as available for carry-forward is reduced (but not below nil) by—

$$(RPE - £2,000,000) \div 2$$

For the same reason, excluded property will not reduce the transferable RNRB.

---

<sup>29</sup> 1 See 70.2 ("Estate").

## 89.7 Gift of BPR/APR property to spouse

This section considers a gift of property qualifying for 100% business or agricultural property relief from a UK domiciled individual to their non-UK domiciled spouse. It is necessary to consider IHT on the gift and the gift with reservation rules. For convenience I refer to business property but similar rules govern agricultural property.

### 89.7.1 IHT on gift

In the normal case of a gift of property qualifying for 100% BPR, the value transferred by the gift is nil. However, s.113A IHTA provides:

#### **Transfers within seven years before death of transferor**

(1) Where any part of the value transferred by a potentially exempt transfer which proves to be a chargeable transfer would (apart from this section) be reduced in accordance with the preceding provisions of this Chapter, it shall not be so reduced unless the conditions in subsection (3) are satisfied.

The conditions which must be satisfied are set out in subsection (3):

The conditions referred to in subsections (1) and (2) above are—

- (a) that the original property was owned by the transferee throughout the period beginning with the date of the chargeable transfer and ending with the death of the transferor; and
- (b) except to the extent that the original property consists of shares or securities to which subsection (3A) below applies that, in relation to a notional transfer of value made by the transferee immediately before the death, the original property would (apart from s.106 above) be relevant business property.

In brief, BPR is lost unless the property is retained by the donee for seven years. (There is an exception for replacement property which is not discussed here.)

### 89.7.2 GWR if donor survives 7 years

What about GWR? The position varies according to whether or not the donor survives seven years from the gift.

If the donor does survive seven years then s.113A has no application. By subsection (1) it applies to a PET *which proves to be a chargeable transfer*. If the donor survives seven years then the PET does not “prove

to be a chargeable transfer”. Accordingly the value transferred by the gift remains at nil. The gift therefore normally qualifies as an exempt transfer under:

- (1) s.20 IHTA (small gifts); or
- (2) s.18 IHTA (IHT spouse exemption).

The gift therefore falls outside the scope of the GWR rules by virtue of s.102(5) FA 1986.

The principle applies to:

- (1) outright gifts of 100% BPR property whether or not to spouses;
- (2) gifts to trusts under which the spouse has an interest in possession even if such gifts are not “outright gifts” (but consider s.102(5A)).

It does not matter that the property is sold or disposed of by the donee within the seven years as long as the donor has survived seven years.

Section 113A(7A) IHTA provides:

The provisions of this Chapter for the reduction of value transferred shall be disregarded in any determination for the purposes of this section of whether there is a potentially exempt or chargeable transfer in any case.

This is irrelevant because the disregard is only for the purposes of s.113A, not for the purposes of ss.18, 20 IHTA and s.102 FA 1986.

### 89.7.3 *GWR if donor dies in 7 years*

The position is different if the donor dies within seven years. Suppose:

- (1) H (UK domiciled) gives 100% BPR property to W (foreign domiciled);
- (2) H dies within seven years;
- (3) The conditions in s.113A(3) are not satisfied (for instance the property has been sold<sup>30</sup> or disposed of by the donee).

In that case the value transferred is *not* reduced: s.113A(1). It is considered that the disallowance of BPR applies for all purposes of IHT. So the gift falls outside the protection of ss.18 and 20 IHTA (assuming the value transferred exceeds the nil-rate band limit and £250 respectively) and the GWR provisions can in principle apply.

---

<sup>30</sup> Though there is a possibility of reinvestment relief in this case: see s.113B IHTA.

It is impossible to believe anybody actually thought through these rules at the time the legislation was enacted. But these are the consequences of the words used and the result, if a little complicated, is relatively sensible.

## 89.8 Divorce settlement

Suppose:

- (1) H transfers assets to W in order to settle a divorce claim, and
- (2) The disposition falls outside the IHT spouse exemption.<sup>31</sup>

No IHT charge arises. First, the disposition is not a transfer of value, if made under court order.<sup>32</sup> Secondly, s.10 IHTA provides:

### **Dispositions not intended to confer gratuitous benefit**

(1) A disposition is not a transfer of value if it is shown that it was not intended, and was not made in a transaction intended, to confer any gratuitous benefit on any person and either—

- (a) that it was made in a transaction at arm's length between persons not connected with each other, or
- (b) that it was such as might be expected to be made in a transaction at arm's length between persons not connected with each other.

H does not normally intend to confer any “gratuitous benefit” on W. (Assume the divorce settlement is negotiated at arm's length.) Accordingly the disposition falls within s.10 IHTA and is not a transfer of value for IHT purposes.

There is a theoretical HMRC argument that the condition in s.10(1)(b) IHTA is not satisfied. The argument would be that a divorce settlement cannot be “such as might be expected to be made in a transaction at arm's length between persons not connected with each other” since persons not connected with each other would not be in a divorce situation. In my view this argument is not correct. It is the old question of how far one carries the deeming.<sup>33</sup> The argument carries it too far because it reaches a

---

31 This may be because H is UK domiciled and W is not; or because the transfer is made after the marriage is dissolved.

32 See *McCutcheon on IHT* (7<sup>th</sup> ed., 2017), para 2.35. Relief may also be available under s.11 IHTA; see 89.4 (Disposition for maintenance of spouse).

33 See App 7.1 (Deeming provisions: Introduction).

conclusion which does not fit in with the scheme of the IHTA. IHT Manual (while not explicit) suggests that HMRC do not take the point.<sup>34</sup>

### **89.9 Spouse gift: Associated operations**

For the background law, see 70.14.1 (Channelling). The IHT manual provides:

#### **14833 Gifts between spouses or civil partner [Sep 2018]**

Where property

- given unconditionally by one spouse or civil partner (IHTM11032) to the other is
  - subsequently transferred by the latter to a third party,
- you cannot use the associated operations provisions to attribute the transfer to the first spouse or civil partner.

The Chief Secretary to the Treasury assured Parliament that this would be HMRC's practice,<sup>35</sup> and it was publicised in a Press Release dated 8

34 IHTM04165 [September 2008]: "Dispositions made on divorce or dissolution of a civil partnership for the benefit of a former spouse or civil partner, whether under a Court Order or as a result of arm's length negotiations, are normally within s.10 IHTA 1984."

35 Lord Barnett, then Chief Secretary to the Treasury, said (Hansard HC Deb, 10 Mar 1975, vol 888 col 56):

"... it is reasonable for a husband to share capital with his wife when she has no means of her own. If she chooses to make gifts out of the money she has received from her husband, there will be no question of using the associated operation provisions to treat them as gifts made by the husband and taxable as such.

In a blatant case, where a transfer by a husband to a wife was made on condition that the wife should at once use the money to make gifts to others, a charge on a gift by the husband might arise under the clause..."

But the conditional gift would not qualify for the IHT spouse exemption.

"I want to give an example of certain circumstances that could mean the clause having to be invoked. There are complex situations involving transactions between husband and wife and others where, for example, a controlling shareholder with a 60% holding in a company wished to transfer his holding to his son. If he gave half to his son, having first transferred half to his wife, and later his wife transferred her half share to the son, the effect would be to pass a controlling shareholding from father to son. The Revenue would then use the associated operations provisions to ensure that the value of a controlling holding was taxed."

But this overlooks s.161 IHTA (related property).

"There are ordinary, perfectly innocent transfers between husband and wife. For example, where a husband has the money and the wife has no money—or the other

April 1975.<sup>36</sup>

## 89.10 Non-dom spouse: IHT planning

### 89.10.1 *Gift to non-dom spouse*

A simple short- and medium-term course is:

- (1) the UK domiciled spouse should give assets to their foreign domiciled spouse absolutely;
- (2) the foreign domiciled spouse keeps the assets in a form where remain excluded property (in short, non UK situate).

The gift may be a PET but that may not in practice be a serious concern. If the reservation of benefits rule applies, however, this effectively neutralises any tax saving. Indeed it may make the position worse. See 74.19 (GWR on death: Spouse exemption). This often makes simple gifts impractical.

### 89.10.2 *Gift to spouse + gift to trust*

A longer term approach may be:

- (1) the UK domiciled spouse gives assets to their foreign domiciled spouse; and
- (2) the foreign domiciled spouse subsequently gives the assets to a settlement.

---

way round, which happens from time to time—and the one with the money gives something to the other to enable the spouse to make a gift to a son or a daughter on marriage, that transaction would not be caught by the clause. It would be a reasonable thing to do.”

But there is no mention of reasonableness in the associated operations rules, and the IHT Manual does not seek to read it in.

This illustrates the difficulties in relying on Hansard, because the author is not familiar with the newly introduced CTT rules, and his answer would not have reached a pass standard in the CTA examination. However one can collect from the earliest times a strong inclination not to use associated operations in inter-spouse transfers

<sup>36</sup> [1975] STI 191: “Section [286] is not seen as affecting the ordinary case where a gift between husband and wife is followed by a gift from the recipient spouse to a third party, unless it was a condition of the first gift that the second should be made. It may, however, be apt to apply in more complex situations where a transfer between husband and wife forms part of a series of associated operations, the effect of which as a whole are merely the means whereby one of them makes a disposition in favour of a third party.”

In principle the property in the settlement may be excluded property. One advantage of this is if the donee spouse later becomes UK domiciled.<sup>37</sup> Another advantage is CGT planning. A third advantage is that this should avoid the gifts with reservation rule.<sup>38</sup> This arrangement only works if the UK domiciled spouse is not a settlor.<sup>39</sup>

### 89.11 CGT spouse exemption

Section 58(1) TCGA provides:

If, in any year of assessment,

(a) an individual is living with<sup>40</sup> his spouse or civil partner, and

(b) one of them disposes of an asset to the other,

both shall be treated as if the asset was acquired from the one making the disposal for a consideration of such amount as would secure that on the disposal neither a gain nor a loss would accrue to the one making the disposal.

I refer to this as the “**CGT spouse exemption**”.

This exemption applies regardless of the domicile of the spouses. It applies to sales at market value as well as gifts.

The relief does not apply to:

- (1) Unmarried couples
- (2) Married couples living apart

Section 58(2) TCGA provides two exceptions:

This section shall not apply—

(a) if until the disposal the asset formed part of trading stock of a trade carried on by the one making the disposal, or if the asset is acquired as trading stock for the purposes of a trade carried on by the one acquiring the asset, or

(b) if the disposal is by way of donatio mortis causa [gift in anticipation of death]<sup>41</sup>

Section 58(2) TCGA provides:

---

37 See 72.17.2 (Anticipation of UK domicile).

38 See 74.16 (Gift to non-dom who creates trust).

39 See 94.41 (Planning to create excluded property trust).

40 See App 3.4.3 (Living together: married couple).

41 See 84.7.3 (Gift in anticipation of death).

... but this section shall have effect notwithstanding the provisions of section 18 or 161, or of any other provisions of this Act fixing the amount of the consideration deemed to be given on a disposal or acquisition.

## 89.12 Non-dom spouse: CGT

### 89.12.1 *Asset yielding gain*

Suppose the UK domiciled spouse owns an asset which will give rise to a gain on a disposal. A simple course is:

- (1) The UK domiciled spouse transfers<sup>42</sup> the asset to their foreign domiciled spouse.
- (2) The foreign domiciled spouse may be in a position to sell the asset without CGT.<sup>43</sup>

The same may apply if one spouse claims the remittance basis and the other does not.

### 89.12.2 *Non-resident spouse*

Section 282 ICTA 1988, which also applied for CGT purposes, formerly provided (so far as relevant):

*(1) A married woman shall be treated for income tax purposes as living with her husband unless ...*

*(b) they are in fact separated in such circumstances that the separation is likely to be permanent.*

*(2) Where a married woman is living with her husband and ...*

*(a) one of them is, and the other is not, resident in the UK for a year of assessment ...*

*the same consequences shall follow for income tax purposes as would have followed if, throughout that year of assessment, they had been in fact separated in such circumstances that the separation was likely to be permanent.*

---

42 The transfer may be a gift or a sale at market value. The latter avoids the IHT problems discussed at 89.2 (Restricted IHT spouse exemption) and 74.10 (GWR spouse exemption) but take care on implementation, especially s.58(2) TCGA. In the case of a sale the transferee spouse will need independent legal advice.

43 See 53.4 (Territorial scope of CGT).

The effect was that the CGT spouse exemption did not apply where one spouse was non-resident. But s.282(2) was repealed in 1988, so now the CGT spouse exemption applies regardless of residence, provided they are “living together”.

The CG Manual provides:

**22300 NR spouse or NR civil partner** [Jul 2019]

... There is no longer any authority to treat a non-resident spouse as separated from a resident spouse merely because of their residence status. Similarly a non-resident civil partner may not be treated as separated from a resident civil partner merely because of their residence status.

The point is repeated in CG26060.

It follows that CGT planning by a transfer to non-resident spouses is not avoidance, in the strict sense, because by repealing s.282(2) Parliament has clearly accepted it.<sup>44</sup>

The temporary non-residence rules need to be considered.<sup>45</sup>

### **89.13 Non-dom/non-resident spouse: IT**

A simple course is:

- (1) The UK domiciled spouse (“donor spouse”) may give assets to their foreign domiciled spouse absolutely; and
- (2) The foreign domiciled spouse may invest in foreign property giving rise to foreign investment income which is not remitted.

Similarly:

- (1) A UK resident spouse (“donor spouse”) may give assets to their non-resident spouse absolutely; and
- (2) The non-resident spouse invests in property whose income is not subject to IT (foreign source or within the non-residents income tax exemption).

### **89.14 s.624 spouse exemption**

---

<sup>44</sup> The position was different before 1988 when s.282(2) was in force. That is self-evident, but if authority is needed, see *R v IRC ex p. Fulford-Dobson* 60 TC 168 at p.179.

<sup>45</sup> In particular, the usual CGT relief for post-departure acquisitions does not apply. See 10.8 (Post-departure acquisitions).

An inter-spouse gift is a settlement-arrangement,<sup>46</sup> and in principle the settlor would be taxed under s.624 ITTOIA. However, s.626(1) ITTOIA provides relief:

- The rule in s.624(1) does not apply in respect of an outright gift—
- (a) of property from which income arises<sup>47</sup>,
  - (b) made by one spouse to the other or one civil partner to the other, and
  - (c) meeting conditions A and B.

I refer to this as the “**s.624 spouse exemption**”.

There are (in short) three main conditions: outright gift, condition A and condition B.

This relief applies regardless of the residence and domicile of the spouses.

#### 89.14.1 *Outright gift*

Section 626(4) ITTOIA provides:

- A gift is not an outright gift for the purposes of this section if—
- (a) it is subject to conditions, or
  - (b) there are any circumstances in which the property, or any related property<sup>48</sup>—
    - (i) is payable to the giver,
    - (ii) is applicable for the benefit of the giver, or
    - (iii) will, or may become, so payable or applicable.

In *Young v Pearce* the issue of shares at an undervalue was an outright gift:

If the creation and allotment of the preference shares constituted a settlement, the subject-matter of which was the preference shares allotted to the wife of each of the taxpayers, it must follow that the allotment of the preference shares taken by each wife was an outright gift from which income (the dividends paid on the preference shares)

---

46 See 85A.5 (Settlement-arrangement definition).

47 The words “from which income arises” seems otiose, because if no income arises, s.624 cannot operate. But it explains the reference to “the income” in condition A.

48 s.626(5) ITTOIA provides a referential definition: ‘Related property’ has the same meaning in this section as in s.625. See 44.6.2 (“Settlor-interested” for s.624”).

arose.<sup>49</sup>

In *Jones v Garnett* the purchase of shares of an “off the shelf” company was an outright gift.<sup>50</sup>

The Revenue say ... there was no gift of the share by Mr Jones to Mrs Jones. He never owned the share which she took. It belonged to the formation agents and Mrs Jones bought it from them for £1.

It was Mr Jones's consent to the transfer of a share with expectations of dividend to Mrs Jones for £1 which gave the transfer the “element of bounty” for the purposes of [the settlor-interested trust code]. By the same token, I think it made the transfer a “gift” for the purposes of [what is now s.626(4)]. And there is no dispute that, if it was a gift, it was outright.

And again:

Mr Jones did not actually make a transfer by way of gift to his wife of one of the two issued shares in Arctic. She bought it at par from the company formation agents. But it was not the sort of arrangement that would have been made between strangers dealing with each other at arm's length. Arctic was the chosen vehicle through which Mr Jones was to offer his valuable services as an IT consultant, and it was an act of bounty on his part to permit his wife to acquire half its equity for the nominal sum of £1. In my opinion that amounted to an outright gift of the share within the meaning of [what is now s.626(4)].

In strictness, I would have thought that a purchase of the share was an arm's length transaction between Mrs Jones and the company formation agent vendors; and it was not “made by one spouse to the other”. The reader may think that both these cases have adopted a loose and generous reading. But it is purposive and sensible, avoids anomalies,<sup>51</sup> and the law is settled.

A dividend waiver is not an outright gift of property from which income

---

49 70 TC 331 at p.345.

50 [2007] UKHL 35 at [27] and [53]. For other aspects of this case, see App.2.2.6 (Identifying the arrangement).

51 Mr Jones could have subscribed for the 2 shares himself, and then given one to his wife. Indeed, if he had been better advised, that is what he would have done. That would have more clearly been an outright gift made by one spouse to the other. But the end result is the same.

arises.<sup>52</sup>

### 89.14.2 *Subject to conditions*

TSEM provides a straightforward example:

**TSEM4205 outright gifts between spouses or civil partners** [Jul 2017]

...

**Example 4 - outright gift**

X owns a property that is let at a commercial rent to an unconnected third party. X transfers the property by outright gift to his spouse Y who then receives the rents. X has no further interest in or rights over the property. The rents that Y receives are not subject to the settlements legislation. They are Y's income for tax purposes.

That is self-evident. The point is to set the scene for the next example.

**Example 4a - no outright gift**

The facts are as in example 4 but the gift is subject to an agreement under which X can require his spouse to return the property to him at a future date. This is a gift with conditions and there are circumstances in which the gifted property may return to the giver so it is not an outright gift. The rents that Y receives are subject to the settlements legislation. They are X's income for tax purposes.

### 89.14.3 *Condition A*

Section 626(2) ITTOIA provides:

Condition A is that the gift carries a right to the whole of the income.

This is otiose, as if the gift does not carry the right to the whole of the income, it is surely not an outright gift.

### 89.14.4 *Condition B*

Section 626(3) ITTOIA provides:

Condition B is that the property is not wholly or substantially a right to income.

---

<sup>52</sup> This is self-evident, but if authority is needed, see *Donovan v HMRC* [2014] UKFTT 048 (TC) discussed at 94.19 (Dividend-waiver settlement).

In *Young v Pearce*<sup>53</sup> a company owned jointly by A & B issued preference shares to the spouses of A and B, for a nominal £50.

The preference shareholders were entitled to:

- (1) 30% of the dividends (if dividends were declared)
- (2) on liquidation, repayment of the £50 subscribed for the shares
- (3) to speak but not to vote at shareholder meetings

So apart from that right to income, the only rights were to repayment of the nominal £50 paid on the issue of the shares, to attend but not vote at shareholder meetings, and general shareholder rights such as the right not to be unfairly prejudiced. The rights attached to the preference shares were not wholly a right to income. But the rights were “substantially” a right to income.

Contrast an ordinary share. In *Jones v Garnett*:<sup>54</sup>

... the revenue say that the property given, i.e. the share, was “wholly or substantially a right to income”. It is true that the value in the share arose from the expectation that it would generate income. But that is true of many shares, even in quoted companies. The share was not wholly or even substantially a right to income. It was an ordinary share conferring a right to vote, to participate in the distribution of assets on a winding up, to block a special resolution, to complain under [what is now s.994 CA 2006]. These are all rights over and above the right to income. The ordinary share is different from the preference shares in *Young v Pearce*, which conferred nothing except the right to 30% of the net profits before distribution of any other dividend and repayment on winding up of the nominal amount subscribed for their shares. Those shares were substantially a right to share in the income of the company.

I would have said the Revenue argument was almost hopeless, but one judge found the point “rather difficult”.<sup>55</sup>

See too 94.21.1 (Partnership with spouse).

### 89.15 Gift to spouse: s.720

A non-resident or non-domiciled individual is a “person abroad”. A gift

---

<sup>53</sup> 70 TC 331.

<sup>54</sup> [2007] UKHL 35 at [30].

<sup>55</sup> at [56].

to a non-resident or non-dom spouse is (at least at first sight) a relevant transfer.<sup>56</sup> The donor has “power to enjoy” the income of the donee.<sup>57</sup> So (at least at first sight) the transferor (donor spouse) is in principle taxed under s.720 ITA.

However RI 201 states that HMRC do not take this point:

Unless transactions are part of a wider arrangement, Revenue practice is not to seek to assess a UK domiciled individual on the income of a non-UK domiciled spouse, where that income

[1] arises from a transfer of assets by that spouse and

[2] would be outside the charge to tax under [s.720 ITA] by virtue of the provisions of [s.726 ITA, ToA remittance basis].<sup>58</sup>

ToA draft guidance cites this and continues:

**INTM600460 - General Conditions All Cases: The Individual: Introduction**

This statement [RI 201] indicates broadly the approach that will be taken to individuals and their spouses or civil partners in relation to the application of these provisions. In general (unless there are wider arrangements) HMRC will not use transfer of assets to charge tax on one spouse or civil partner in respect of income arising to the other spouse or civil partner, where

[1] that spouse or civil partner has made a transfer of assets

[2] but is, for example, outside the charge because say of the application of non-UK domicile provisions.<sup>59</sup>

---

56 See 45.3 (“Relevant transfer”) and 45.5 (“Person abroad”).

57 See 45.20 (Spouses of individuals).

58 Tax Bulletin 81 states (obviously) that the same practice applies to civil partners.

59 For completeness, the guidance continues: “In effect, the general approach will be to apply the word individual (where the individual has a spouse or civil partner) in a way that is consistent with the individual who has the power to enjoy income of a person abroad, entitlement to capital sums or who receives benefits as a result of relevant transactions. But it may be equally valid in this context to use the term in a way that is consistent with an individual who, by means of relevant transactions, seeks to avoid a liability to income tax. Where spouses or civil partners are therefore in some way connected with relevant transactions and the results of such transactions, regard will be had to the particular facts where the extended meaning of individual may impact upon the potential charge.”

I am unable to follow this paragraph. Perhaps the author was muddled, or perhaps it just fails to articulate the point.

This confirms the practice in RI 201. RI 201 does not consider the case of a gift to a non-resident donee spouse, but the same principle must apply, and that is also suggested by the words “for example” in the ToA draft guidance.

Is this law or concession? The transferor may not mind if they are untaxed by law or concession, but the issue might arise:

- (1) If HMRC change their practice, or argue that it does not apply in a particular case.
- (2) Before a tribunal, which will apply the law and not a concession.<sup>60</sup>

It is considered that the practice is correct in law. An inter-spouse transfer is not a transfer of assets, for the purposes of the ToA rules, and so not a relevant transfer. References to an individual include the spouse,<sup>61</sup> and one cannot transfer an asset to oneself. This is consistent with the purpose of the deeming provision: In the age of independent taxation, it is not likely to be the intention of parliament to tax the donor spouse on a straightforward inter-spouse transfer.

### **89.16 Gifts to spouse: GAAR**

GAAR example D19<sup>62</sup> is not is not precisely on-topic, but it does support the view that inter-spouse transfers discussed in this chapter are not within the scope of the GAAR.

---

60 The motive defence may also be in point, but no-one expects the transferor to claim the motive defence in their tax return.

This issue might arise in the context of divorce, where the spouses would need to ascertain their potential tax liabilities, as both transferor and transferee are potentially liable, if the ToA rules apply; but in practice the issue is not likely to cause concern.

61 See 45.20 (Spouse of transferor).

62 See 84.5.5 (Rebasing on death: Planning).

## CHAPTER NINETY

# JOINT ACCOUNTS

- 90.1
  - 90.3.1 Account in both a/c holders estates
  - 90.3.2 Account holder pays into joint a/c
  - 90.3.4 IHT spouse exemption on death of a/c holder
  - 90.3.5 One a/c holder pays in, other withdraws
  - 90.3.6 IHT spouse exemption on withdrawal
  - 90.3.7 One a/c holder pays in & withdraws
- 90.4 Trust from joint account: Who is settlor
  - 90.6.1 One account holder remittance basis user
  - 90.6.2 Both account holders remittance basis users
  - 90.7.2 Remittance basis and spouses joint accounts

### 90.1 Introduction

This chapter considers a joint bank or building society account held by two account holders. I refer to money in the account as “account money”.

I consider the following topics:

- (1) IHT on payments in and out of the account
- (2) Who is the settlor on a payment from the account to a trust
- (3) Taxation of income arising from the account
- (4) Remittances from the account

### 90.2 Property law background

First one must ascertain the rights of the account holders. It would need a chapter to analyse the relevant case law.<sup>1</sup>

---

1 For a summary see *Dymond's Capital Taxes* (looseleaf), para 10.400; Law Commission, “Cohabitation: the financial consequences of relationship breakdown” Law Com No 307 (2007), para A.46  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/228881/7182.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/228881/7182.pdf)

There is an important distinction between:

- (1) an account on which a transfer can be made by either account holder
- (2) an account on which a transfer needs the approval of both account holders

This chapter only considers the first type of account.

In outline, three distinct questions arise:

- (1) *Beneficial ownership of the account money while in the account.* The possibilities are:
  - (a) Entitlement in equal shares (the most common case)
  - (b) Entitlement in proportion to contributions and withdrawals<sup>2</sup>
  - (c) One account holder beneficially entitled to the whole
- (2) *Beneficial ownership of money withdrawn from the account* (or assets purchased with that money). The possibilities are:
  - (a) Individual who withdraws funds becomes beneficial owner (the most common case)<sup>3</sup> or

Further consideration is needed for an account not governed by English law; but an English court will assume English law principles apply in the absence of evidence to the contrary, see 86.45.2 (Assumption that UK law applies). I expect English law/common law principles apply in most common law jurisdictions; eg in Ireland, *Lynch v Burke* ITR Vol 5, p.271.

- 2 In practice the court will assume this is not the case unless there is evidence, such as appropriate records kept by the account holders. *Sillars v IRC* [2004] STC (SCD) 180 at [11] gives cogent reasons for rejecting this analysis for the parent/child account.
- 3 See *Re Bishop* [1965] Ch 450 at p.456:
 

“Where a husband and wife open a joint account at a bank on terms that cheques may be drawn on the account by either of them, then, in my judgment, in the absence of facts or circumstances which indicate that the account was intended, or was kept, for some specific or limited purpose, each spouse can draw upon it not only for the benefit of both spouses but for his or her own benefit. Each spouse, in drawing money out of the account, is to be treated as doing so with the authority of the other and, in my judgment, if one of the spouses purchases a chattel for his own benefit or an investment in his or her own name, that chattel or investment belongs to the person in whose name it is purchased or invested: for in such a case there is, in my judgment, no equity in the other spouse to displace the legal ownership of the one in whose name the investment is purchased. What is purchased is not to be regarded as purchased out of a fund belonging to the spouses in the proportions in which they contribute to the account or in equal proportions, but out of a pool or fund of which they were, at law and in equity, joint tenants. It also follows that if one of the

- (b) Same as beneficial ownership of the account money (as to which see above)
- (3) *Beneficial ownership of account money after death of an account holder.* The possibilities are:
  - (a) The survivor is beneficially entitled by survivorship
  - (b) The deceased owner's share (as to which see (1) above) passes under their will or intestacy

The answer to one of these questions does not determine the answers to the others. For instance, account money may belong beneficially to one of the account holders, eg H and W may hold as nominees for H. Such an account may be held on terms that:

- (a) on the death of H, the account money passes to W by survivorship;<sup>4</sup>  
or
- (b) the account money may pass under the will of H.

The permutations are almost endless. Note that joint tenancy/tenancy in common is not a comprehensive categorisation since those two terms alone are insufficient to determine the answers to the three questions which may arise.

The property law position depend on the account documentation. That should answer the question, but if it does not, the position depends on the intention of the account holders.<sup>5</sup> In practice spouses and cohabittees generally operate joint accounts without giving any consideration to the ownership of the money; there is just a general desire to pool resources. A search for intention is unrealistic.

Account documentation can vary, as can the intentions of account holders, but the usual position is that:

- (1) Account money is beneficially owned in equal shares

spouses draws on the account to make a purchase in the joint names of the spouses, the property purchased, since it is purchased in joint names, is, prima facie, joint property and there is no equity to displace the joint legal ownership. There is, in my judgment, no room for any presumption which would constitute the joint holders as trustees for the parties in equal or some other shares.”

4 As in the parent/child joint account *O'Neill v IRC* 1998 STC (SCD) 110; the apparent breach of the Wills Act 1837, and the possibility that this is a settlement for IHT, are tacitly ignored.

5 *Whitlock v Moree* [2017] UKPC 44.

- (2) Withdrawals belong to the account holder who withdraws the funds
- (3) Beneficial ownership passes by survivorship

I refer to this as a “**common form account**”.

The circumstances in which parent/child joint accounts arise are different so the rights of the account holders tend to be different. For instance, the terms of the account may be that:

- (a) One account holder (“P”) may withdraw up to the whole amount of P’s benefit and the others may make no withdrawal at all during P’s lifetime.
- (b) The balance may pass to the survivor by survivorship.<sup>6</sup>

In this case the fund is in the estate of P for IHT purposes. The funds are not in the estate of the other account holder during the life of P: their rights have no substantial value.

The following analysis applies to a common form account.

Further consideration is needed if one account holder has lost legal capacity.<sup>7</sup>

### 90.3 Joint account: IHT

#### 90.3.1 *Account in both a/c holders estates*

In strict law the *whole* of the account money is in the estate of both account holders, under s.5(2) IHTA which provides:

A person who has a general power which enables him... to dispose of any property other than settled property, ... shall be treated as beneficially entitled to the property ... and for this purpose “general power” means a power or authority enabling the person by whom it is

---

<sup>6</sup> This was found to be the case on the facts in *Sillars v IRC* [2004] STC (SCD) 180.

<sup>7</sup> According to the British Bankers Association: “If you are the joint account holder and the other joint account holder becomes mentally incapable, you do not automatically have the right to access the account unless you have a Lasting Power of Attorney, Enduring Power of Attorney or an order from the Court of Protection.” *Banking for people who lack capacity to make decisions England and Wales (2010)*; <https://www.bba.org.uk/publication/leaflets/banking-for-people-who-lack-capacity-to-make-decisions-scotland/>

I find that somewhat surprising, but it may depend on the documentation of the account.

exercisable to appoint or dispose of property as he thinks fit.<sup>8</sup>

Beneficial ownership is therefore irrelevant for IHT and GWR is irrelevant on death of an account holder.

### 90.3.2 Account holder pays into joint a/c

Payment into the joint account by an account holder is not a transfer of value because the estate of the payor is not decreased by the payment. HMRC agree. The IHT Manual provides:

**IHTM15043 Lifetime gifts arising out of a transfer of an account into joint names** [May 2020]

If A places money in a joint account (IHTM15042) in the names of A and B as joint tenants (IHTM15082) and retains the right to withdraw the whole of it, as a general rule there will not be a lifetime transfer (IHTM15060) at the time the money is paid into the account. ...

Payment into the joint account by an account holder is not a GWR. HMRC do not accept that<sup>9</sup> but in practice GWR does not often matter.

---

8 This was accepted without discussion in the Court of Appeal in *IRC v Melville* 74 TC 372 at [36]:

“... the inheritance tax regime produces instances of double taxation ... A clear example is one falling within s 5(2) of the Act, the very common case of a joint bank account which permits any holder to draw on that account. The same property, the moneys in the account, is under s 5(2) taxable on the death of each holder. The Revenue in practice do not strictly enforce that provision and treat each holder as beneficially entitled only to the proportion of monies in the account which he has contributed.”

9 The IHT Manual is garbled; so far as relevant it provides:

**“IHTM15061 Gifts with reservation** [May 2020]

An example of a joint ownership arrangements involving a GWR is ... if ... A transfers ... a joint money account into joint beneficial ownership of himself and his son, and then A either

- receives (or has the right to receive) all the ... interest for his own benefit or
- has the right to withdraw all the money in the joint account for his own benefit.”

Possibly the Manual means to say that there is a GWR if A transfers *his money* into a joint account and has the right to withdraw all the money. This view is supported by *Sillars v IRC* [2004] STC (SCD) 180 (where the taxpayer was not represented by counsel). But it is considered that a payment into an account of this kind is not a disposal by way of gift. If it were a GWR, many difficulties arise which the

### 90.3.3 *Death of account holder*

Each account holder is strictly subject to IHT on death on the whole of the account money (subject to exemptions such as the spouse exemption). This rule would result in double taxation but that is undone by concession. The IHT Manual provides:

**IHTM15042 Joint money accounts** [May 2020]

Applying the Inheritance Tax provisions (IHTM15012) to joint accounts can be particularly difficult. In practice:

- You should normally regard each account holder as beneficially entitled (IHTM15011) to the proportion of the account which is attributable to their contributions. So - if the deceased provided the whole of the money, the whole of the account at death should be included in the IHT400 (IHTM10021)
- When calculating this proportion you should assume that any money withdrawn by each person should be set as far as possible against their own contributions, despite the rule in *Clayton's Case* [1816] 1 Mer 572
- You may want to make enquiries about any withdrawals made from funds the deceased provided by the other joint owner(s) as these are likely to be lifetime transfers (IHTM15043). You should pay particular attention to joint accounts opened shortly before the death.
- In most cases each joint owner has an unrestricted right to withdraw any part of the amount in credit in the account and keep the funds for their own use (for example, see *Re Bishop* [1965] Ch 450). *You should not use the fact that this right exists to argue that tax is due (for example, by referring to the definition of 'property' in IHTA84/S272 or the 'general power' provision in IHTA84/S5(2)) on a share of the account that is greater than the share provided by the joint owner.*
- When establishing the share based on the deceased's contributions you should note that the true legal position is far from clear so it is important to establish the facts and obtain any relevant documents, such as application forms, withdrawal mandates, passbooks, terms

---

Tribunal did not consider in *Sillars*. On the death of A, however, since the property is in the estate of the individual, it does not matter whether payment into the account was a GWR.

and conditions of account before considering the legal and equitable rules...

#### 90.3.4 *IHT spouse exemption on death of a/c holder*

This section considers the IHT spouse exemption on the death of an account holder. For the IHT spouse exemption generally see 72.5.1 (IHT spouse exemption).

There are two possibilities:

- (1) The account holders may not qualify for the spouse exemption because:
  - (a) They are married but one is, and one is not, UK domiciled.<sup>10</sup> (This scenario is closest to the themes of this book, but one cannot examine it in isolation from the others.)
  - (b) They are cohabitants.
  - (c) There is some other unmarried relationship, such as parent and child.
- (2) The account holders may qualify for the IHT spouse exemption.

In the second case, the IHT spouse exemption applies to the transfer of value on the death of an account holder. HMRC agree. The IHT Manual passage continues:

Refer to TG (IHTM01081) any case in which the parties dispute the claim. However, there is no need to refer if the deceased's interest passes to an exempt beneficiary, such as a surviving spouse or civil partner (IHTM11032). You should also avoid questions and arguments on this subject unless the amount of tax at stake is substantial.

This is correct, though it needs a slightly purposive construction to say that property "becomes comprised" in the estate of the surviving spouse when the property is already in that estate.

#### 90.3.5 *One a/c holder pays in, other withdraws*

Suppose:

- (1) A transfers A's money into the joint account held by A and B and
- (2) B withdraws that money into B's own name.

---

<sup>10</sup> In this section I ignore the limited IHT spouse exemption and spouse election rules.

A's estate is reduced at stage (2).

A does not make a transfer of value at stage (2) within the normal definition, as that requires a disposition. Section 3(1) IHTA provides (in short):

... a transfer of value is a disposition made by a person ... as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition...

A does not make a disposition.

One might think that A makes a transfer of value by omission under s.3(3) IHTA. This provides:

Where the value of a person's estate is diminished, and the value—  
 (a) of another person's estate ...  
 is increased by the first-mentioned person's omission to exercise a right, he shall be treated for the purposes of this section as having made a disposition at the time (or latest time) when he could have exercised the right, unless it is shown that the omission was not deliberate.

But the value of the estate of B, the account holder who withdraws the funds, is not increased so s.3(3) does not apply.

However, s.272 IHTA provides an extended definition of "disposition":

"disposition" includes a disposition effected by associated operations;

It is considered that A makes a disposition (and hence a transfer of value) by associated operations at stage (2). The associated operations are:

- (1) A's payment into the account
- (2) B's withdrawal from the account<sup>11</sup>

HMRC agree. The IHT Manual provides:

**IHTM15043 Lifetime gifts arising out of a transfer of an account into joint names** [May 2020]

If A places money in a joint account (IHTM15042) in the names of A and B as joint tenants (IHTM15082) and retains the right to withdraw the whole of it, as a general rule there will not be a lifetime transfer

---

<sup>11</sup> See 70.10 ("Associated operation") and 70.14 (Disposition by 2 operations). It might be argued that the associated operation is A's omission to withdraw from the account; it makes no difference if this is the case.

(IHTM15060) at the time the money is paid into the account. But if any part is subsequently withdrawn for the benefit of B, the other joint owner, there may be a transfer at that time.

Refer to Technical any case where

- a withdrawal of this kind has been made
- it is claimed that there was an immediate gift when the money was paid into the joint account
- there is evidence that an immediate gift was intended, or
- the position is more complicated - for example where withdrawals need both signatures

**(This content has been withheld because of exemptions in the Freedom of Information Act 2000)**

**IHTM15042 Joint money accounts** [May 2020]

...You may want to make enquiries about any withdrawals made from funds the deceased provided by the other joint owner(s) as these are likely to be lifetime transfers (IHTM15043). You should pay particular attention to joint accounts opened shortly before the death.....

### 90.3.6 *IHT spouse exemption on withdrawal*

The IHT spouse exemption may apply to the transfer of value on the lifetime withdrawal by an account holder. Since HMRC accept the application of the spouse exemption on death, they must also accept its application during the lifetime of the account holders.

The exemption does not of course apply when one spouse is and the other is not UK domiciled because the IHT spouse exemption is restricted. The transfer of value takes place when the funds are withdrawn from the account so that is the point where the conditions for the spouse exemption need to be satisfied. For instance if:

- (1) Year 1: H makes a payment into the joint account
- (2) Year 2: W makes a payment from the joint account

The IHT spouse exemption applies if the conditions for the exemption are satisfied in Year 2. It does not matter whether or not they are satisfied in Year 1.

### 90.3.7 *One a/c holder pays in & withdraws*

Suppose:

- (1) A transfers A's money into the joint account held by A and B.
- (2) A withdraws that money into A's own name.

A does not make a transfer of value. What about B? B's estate is reduced at stage (2). But it is considered that B makes no transfer of value. Section 3(3) IHTA does not apply.<sup>12</sup> It might be said that B makes a transfer of value by associated operations, but although B makes an omission, which is an associated operation, B does not make a transfer of value by associated operations, since he does not make a disposition. That is consistent with the policy of s.3(3) IHTA.

### 90.3.8 *Third party pays in*

The discussion above assumes that the account money is provided by one or both account holders.

Suppose:

- (1) A third party ("C") transfers C's money into a joint account held by A and B.
- (2) A dies.

In strictness A is taxed on the whole account, but by concession it appears that A is taxed on half. The IHT Manual provides:

**IHTM15042 Joint money accounts** [May 2020]

*Example*

A, B and C share a joint account. They all contribute to it. A dies and his proportion of the account passes by survivorship to B and C. After A's death, the entitlement of B and C should take into account A's contributions.

**(This content has been withheld because of exemptions in the Freedom of Information Act 2000)**

Presumably this means that after A's death, B and C are each regarded as entitled to (1) their own contributions to the account and (2) half of the contribution of A.

Suppose:

- (1) A third party transfers their money into a joint account held by A and B and
- (2) A withdraws that money into A's own name.

It is considered that B does not make a transfer of value; see 90.3.7 (One

---

<sup>12</sup> See 90.3.5 (1 account holder pays in and other withdraws).

a/c holder pays in, other withdraws).

### 90.3.9 *Gift from account*

If B draws on the account to make a gift to a third party donee, B makes a transfer of value.

If A had paid the account money into the joint account A has also made a transfer of value by associated operations at the time of B's withdrawal.<sup>13</sup> But that is not the case if B, or a third party, has provided the funds. Thus the gift by B gives rise to two transfers of value, a transfer of value by A and a transfer of value by B. It may be in practice HMRC would allow some concession.

### 90.4 Trust from joint account: Who is settlor

If a trust is created by a payment from a joint account, it is considered that the account holder who writes the cheque or makes the transfer is the settlor. The other account holder is only the settlor if they have provided the property indirectly for the settlement, which requires some element of arrangement; see 94.7 (A gives to B, B gives to trust).

But STEP CRS guidance provides:

1.4 ... an alternative scenario where (C) and (D) are joint settlors. For example, it may not be uncommon for a husband and wife to make a transfer of assets to a trust for their children and wider family. If, in these circumstances, C and D contribute assets to the trust from assets that they hold jointly, then it would be fair to regard both parties as 'joint' settlors for CRS purposes.<sup>14</sup>

This seems a common sense view, but it does not take full account of the nature of the joint account. In practice the issue may not often arise.

### 90.5 Scottish joint account

The IHT Manual provides:

**IHTM15050. Special destinations and proof of donation** [May 2020]

If two or more people purchase an asset jointly there may be a contractual

---

13 A does not make a transfer of value under s.3(3) IHTA because although the estate of the third party donee is increased, it is not increased by any failure to exercise a right. But A does make a transfer of value by associated operations.

14 For the CRS consequences, see 121.23.3 (Joint settlors).

agreement between them which determines how the property passes on death. If the title is just in their joint names, such as to A and B, they own an equal share which passes to their executors (IHTM05012) on their deaths and is part of their free estate.

But if the title is to A and B and the survivor and they have paid equally for the asset, the survivor will be entitled to the whole on the death of the first to die (*Perrett's Trs v Perrett* [1909] 46 SLR 453). This is known as special (or survivorship) destination.

Both parties do, however, have the right to dispose of their shares in life (*Steele v Caldwell* [1979] SLT 228), which will defeat the operation of the special destination.

If the price was not provided equally the question of whether the donor has conferred an immediate beneficial interest (IHTM15011) on the other party will depend on their intention. Such a donor can revoke the survivorship destination, explicitly, by Will (IHTM12047) under s.30 Succession (Scotland) Act 1964. But the donee may not do the same to defeat the donor's right to the whole of the asset.

If the whole of a joint asset was provided by one person they retain ownership of the whole until they put title into joint names, or, by some other act, show they intend to make an immediate gift to the other joint owner.

- Proof of gift requires evidence of both intention and delivery. Evidence of intention does not need to be in writing and oral evidence is acceptable.
- Delivery may be:
  - actual, for example, physically handing over the asset to the donee, or
  - constructive, for example, handing over one book from a collection.

If there is no immediate gift (by intention and delivery) the asset remains part of the provider's estate and will only pass to the other under the survivorship destination on their death, unless the Will contains a clause that explicitly revokes it and conforms to s.30 Succession (Scotland) Act 1964....

#### **IHTM15051. Joint money accounts** [May 2020]

The fact that a bank account is held in joint names and that receipts for deposits into it are issued in joint names does not necessarily mean it is held in equal shares. Neither does it mean there is survivorship destination. The extent of each owner's interest will be a question of fact depending on

- the extent of their identifiable contributions, and
- if contributions are unequal whether there can successfully be established donation (IHTM15050) by the greater contributor to the other, or alternatively, whether the asset was held in joint names merely for administrative convenience

You should resist any suggestion by the taxpayer or agent that the terms in which the account is held can effect either a lifetime gift - or pass the property to a survivor, unless there is other supporting evidence. Any cases of difficulty should be referred to Technical.

#### **IHTM15052. Land** [May 2020]

The title to heritage is proof of its ownership, and the owners interests in it –

unless there is evidence to the contrary, normally by way of written document. If there is no special destination (IHTM15050) and there is equal provision of the price, each co-owner can dispose of his own share as part of his estate and there is no accretion among them.

If spouses or civil partners (IHTM11032) are the joint owners you should keep the 'related property' (IHTM09731) provisions in view (S.161 IHTA 1984).

If it is claimed the beneficial interests (IHTM15011) vary from those indicated by the title and the absence of gift is claimed, strong proof is required of the parties intentions such as a contemporaneous writing. In cases of difficulty refer to Technical.

**IHTM15053. Which law to apply to joint investments owned by someone domiciled in Scotland [May 2020]**

Scottish law applies to shares of a company registered in Scotland. If the IHT400 (IHTM10021) or other account does not indicate whether a company is Scottish or not, you should be able to find this information on the Internet. If the taxpayer is of Scots domicile (IHTM13000) a joint holding in Government Stock may be regarded as subject to Scots law (*Cunningham's Trs v Cunningham* [1924] SLT 502).

**IHTM15054. Joint money accounts and special destination May 2020]**

Under Scots Law, where Bank or Building Society Accounts are held in joint names the special (or survivorship) destination (IHTM15050) does not by itself pass the ownership of the money in the account to the survivor.

An account with a Bank or Building Society is not a document of title as it is not a Deed of Trust in terms of the Bank Bonds and Trusts Act 1696. It is a contract between the Bank and the customer which regulates the conditions on which the account is to be operated and is for administrative convenience only. See for example *Cairns v Davidson* 1913 SC 1054.

For this reason the ownership of the funds in the account is determined according to the ordinary principles of ownership. The owner of the funds in the account remains the owner unless and until some transfer of ownership occurs.

Example

James and Lucy (who are married) open an account, governed by Scots law, in their joint names and James has provided all the funds. James dies and is survived by his wife, Lucy. On his death:

- In the absence of any act of transfer of ownership to Lucy (for example, a separate Deed of Gift) the whole account should be included in the IHT400.
- If the account passes to (say) the children under the terms of James' Will then the asset will be chargeable to Inheritance Tax
- If the account passes to Lucy under the terms of the will (IHTM11032) then exemption under IHTA84/S18 will apply/

This applies to all Bank/Building Society accounts governed by Scots Law. So it will apply to taxpayers living in England, Wales and Northern Ireland who have an account which is governed by Scots Law.

For the Scots law position see Meston, "Survivorship destinations and

bank accounts” 1996 SLPQ 315; Kerrigan, “Special destinations – survivorship and bank accounts revisited” 2011 SLT 5; the Trusts Discussion Forum (May 2007) under the thread “Scottish bank accounts”.<sup>15</sup>

## 90.6 Remittance from joint account

This section considers remittance aspects of joint accounts.

The RDR Manual provides:

### **RDRM33510 Joint Accounts** [May 2020]

#### **... Analysing the account**

Where an individual has a “joint account” with someone else and one or both of them chooses to be taxed on the remittance basis it is necessary to fully analyse the account (with due regard being given to the “exceptions” identified above). You will need to do this in order to apply Step 1 s.809Q(3) ITA 2007 which deals with transfers from mixed funds and requires you to find each of the categories of the remittance basis user’s income and gains in the mixed fund. A joint account will almost certainly be a mixed fund.

Analyse the account by putting each credit to the account into separate columns, divided between each individual, for each year.

Likewise with the debits; transfers out of the account that are clearly made by or for one or other of the individuals and intended to be made out of “their” share of the income should be debited “under” their column.

“Joint” expenses, for example items such mortgage payments where the debt is held jointly, or council tax bills and so on may, if appropriate, be split equally between each individual. Alternatively, such debits may be fully appropriated to just one of the account holders if that reflects the reality of their joint financial arrangements; for example it may be that only one partner is working and contributes most of the “credits” to the account in the form of their income. In such circumstances it may be more appropriate to attribute all expenditure to that partner in so far as the overall balance of the account permits. When separating the account in this way it is important that the overall balance remains consistent. In practice you should try to take the most pragmatic approach that best reflects the reality of both individuals’ situations.

### 90.6.1 *One account holder remittance basis user*

The RDR Manual provides:

### **RDRM33510 Joint Accounts** [May 2020]

...Individuals who are not using the remittance basis are liable to tax on the

---

<sup>15</sup> <http://www.trustsdiscussionforum.co.uk>

arising basis, so they will, where appropriate, have paid UK tax in respect of their share of the income and gains that have been credited to the joint account in the tax year. Because UK tax has been (or will be) paid by that individual he or she may bring to the UK or otherwise use their share of the funds that are in the account in any way they wish without triggering an additional tax charge. However, if at any time during the year they bring to the UK or otherwise use amounts in excess of their share of the funds in the joint account at that point in time then they will be regarded as using their partner's income or gains instead.

*Example:*

An offshore bank account was opened on 20 June. It is held jointly by A and B, who are civil partners. A is a remittance basis user in this year. The account shows:

<b>Date</b>	<b>Credit (Debit)</b>	<b>Balance</b>	<b>Attributable to</b>
20 June	£2,000	£2,000	A – foreign earnings
27 June	£1,000	£3,000	A – relevant foreign income
1 July	(£800)	£2,200	B – cash taken out in London
27 July	£90	£2,290 <sup>16</sup>	B – UK rental income

In analysing the account you need to look at what was in the account **immediately before** each debit. In this case, the cash withdrawn by B in London on 1 July can only be attributed to A's income credits and, as B is relevant person, A will be regarded as having remitted that £800. ...

Remember that in most cases the account holders are likely to be relevant persons in relation to each other, so even transfers from the non-remittance basis using individual may be a taxable remittance on the other partner if it is regarded as consisting of or deriving from the other partner's foreign income or gains.

### 90.6.2 Both account holders remittance basis users

The RDR Manual provides:

#### **RDRM33510 Joint Accounts** [May 2020]

You will still need to analyse the account in order to determine which transfers from the mixed fund are taxable remittances, and to determine which account holder is liable to pay any tax due. Again, you should try to take the most pragmatic approach that best reflects the reality of the situation.

Once the account has been split between the individual account holders, any taxable remittances of the foreign income or gains that are the property of the remittance basis user are subject to the normal "ordering" rules that apply to remittances from a "mixed fund".

The following example demonstrates the principles of analysing a joint account and then determining whether the "transfers" are a taxable remittance from a

---

<sup>16</sup> I have corrected an arithmetical mistake in the original; the exact figures in this line do not matter.

mixed fund. You will also need to refer to RDRM35230 Remittances from mixed funds.<sup>17</sup>

**RDRM33515 - Remittance Basis: Identifying Remittances: Specific Topics: Joint Accounts - example [May 2020]**

*(Erica and John)*

E and J have been married for several years, and currently live in the UK. J is domiciled within the UK. E is not domiciled in the UK. E decides to claim the remittance basis for this year.

Both E and J have employment income that is credited to the account. For most of the year E works in the UK but she also has a separate part-time employment with a foreign employer outside of the UK for part of the year.

E and J have a joint bank account in the Isle of Man. Into this account is paid both of their salaries, and some bank interest. They use the account to pay their household bills, including the mortgage on their jointly owned UK home.

*Table to show the amounts credited to the account*

Date		Credit (Debit)	Balance
	Opening Balance		£0
30 April	UK salary (Erica)	£3,000	£3,000
30 April	UK salary (John)	£2,000	£5,000
30 April	Overseas salary (Erica) <sup>18</sup>	£2,000	£7,000
30 April	Bank interest not taxed	£200	£7,200
1 May	Direct debit - UK energy co	(£200)	£7,000
5 May	Cash withdrawal (UK)	(£1,000)	£6,000
10 May	Cash withdrawal (UK)	(£1,000)	£5,000
17 May	Direct debit - mortgage	(£3,000)	£2,000
31 May	UK salary (Erica)	£3,000	£5,000
31 May	UK salary (John)	£2,000	£7,000
31 May	Overseas salary (Erica)	£800	£7,800
1 June	Direct debit - UK energy co	(£200)	£7,600
5 June	Cash withdrawal (UK)	(£1,000)	£6,600
10 June	Cash withdrawal (UK)	(£800)	£5,800
17 June	Direct debit - mortgage	(£3,000)	£2,800

The credits and the debits account can be analysed between E and J with the following results:

	Erica Credit	Erica Balance	John Credit	John Balance	Joint a/c Balance	Note
30 Apr UK salary	£3,000	£3,000			£3,000	1
30 Apr UK salary			£2,000	£2,000	£5,000	1
30 Apr Overseas salary	£2,000	£5,000			£7,000	
30 Apr Bank interest	£100	£5,100	£100	£2,100	£7,200	2

17 See 19.2.3 (When are funds mixed).

18 The example adds: *not subject to foreign tax.*

1 May	Debit to UK co	(£100)	£5,000	(£100)	£2,000	£7,000	
5 May	Cash to UK	(£1,000)	£4,000			£6,000	3
10 May	Cash to UK			(£1,000)	£1,000	£5,000	3
17 May	Mortgage pay't	(£2,000)	£2,000	(£1,000)	£nil	£2,000	4
31 May	UK salary	£3,000	£5,000			£5,000	
31 May	UK salary			£2,000	£2,000	£7,000	
31 May	Overseas salary	£800	£5,800			£7,800	
1 Jun	Debit to UK co	(£100)	£5,700	(£100)	£1,900	£7,600	
5 Jun	Cash to UK	(£1,000)	£4,700			£6,600	
10 Jun	Cash to UK			(£800)	£1,100	£5,800	
17 Jun	Mortgate pay't	(£1,900)	£2,800	(£1,100)	Nil	£2,800	4

**Note 1:** Earned income is attributed to the employee only.

**Note 2:** Because this is a joint account, the interest arising on it is split equally between E and J.

**Note 3:** This money is withdrawn in the UK by J and E to meet their own personal expenditure, for example travel, meals and so on.

In this example J's "personal expenditure" can be attributed to his "income" credits into the account.

If instead the withdrawals by J were regarded as coming from E's "portion" of the pot, because J is a relevant person and money has been brought into the UK by a relevant person (so Condition A of s.809L(2)(a) ITA 2007 is met) there might still be a taxable remittance, with the tax due payable by E (see below).

**Note 4:** The mortgage payment is made to a UK bank. The mortgage is held on J and E's UK home and is a joint debt of E and J, and each contributes half of the cost. To the extent that J has money in the account it can be accepted that he has used his taxed income to pay his share of the mortgage.

Money has been brought into the UK to pay this mortgage, so Condition A of s.809L(2)(a) ITA 2007 is met and there is a "transfer" from a mixed fund.

Because this is a mixed fund s.809Q(2) ITA 2007 is in point. So in order to determine whether this money is regarded as consisting of, or deriving from, a remittance basis users' foreign income or gains (such that there is a taxable remittance under Condition B of s.809L(2)(a) ITA 2007) it is necessary to look at the composition of the fund immediately before the "transfer".

This shows that £2,000 of the mortgage payment made on 17 May must be attributable to E's income or gains in the mixed fund. Similarly, £1,900 of the mortgage payment of 17 June is attributable to E's income in the mixed fund.

So far as E is concerned, her share of the account shows (for the purposes of calculating if and to what extent she has made a taxable remittance of her overseas income) is as follows:

<i>E's share of the account</i>		<b>Credit (Debit)</b>	<b>E's balance</b>	<b>Category</b>
30 April	UK salary	£3,000	£3,000	(a)
30 April	Overseas salary <sup>19</sup>	£2,000	£5,000	(b)

19 The example adds: *not subject to foreign tax.*

30 April	Bank interest	£100	£5,100	(d)
1 May	Direct Debit (energy co)	(£100)	£5,000	
10 May	Cash	(£1,000)	£4,000	
17 May	Direct Debit (mortgage)	(£2,000)	£2,000	
31 May	UK salary	£3,000	£5,000	(a)
31 May	Overseas salary	£800	£5,800	(b)
1 June	Direct Debit (energy)	(£100)	£5,700	
5 June	Cash	(£1,000)	£4,700	
17 June	Direct Debit (mortgage)	(£1,900)	£2,800	

Applying the rules at s809Q ITA 2007 to the first “transfer” to the UK, which is the payment to the energy company on 1 May. Remember the mixed fund rules require the account to be analysed before every “transfer”

<b>Step 1</b> – Identify the “amount of transfer” in the relevant year		<b>£100</b>
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer	<b>Para (a)</b> Employment income (UK employment income)	£3,000
	<b>Para (b)</b> Relevant foreign earnings (not subject to a foreign tax)	£2,000
	<b>Para (d)</b> Relevant foreign income (not subject to a foreign tax)	£100

**Step 2** – Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund **Para (a)** £3,000

**Step 3** If the amount at Step 2 is equal to or more than the amount of the transfer treat the whole of the remaining amount of the transfer as coming from that item of income or gain

So E’s transfer of £100 is treated as coming from her UK employment income; it is not thus a “taxable” remittance when brought to the UK.

Then apply the rules at s.809Q ITA 2007 to the next “transfer” to the UK, which is the cash withdrawal.

*Apply the rules at s.809Q ITA 2007 to the next “transfer” to the UK, which is the cash withdrawal*

<b>Step 1</b> – Identify the “amount of transfer” in the relevant year		<b>£1,000</b>
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer	<b>Para (a)</b> Employment income (UK employment income)	£2,900
	<b>Para (b)</b> Relevant foreign earnings (not subject to a foreign tax)	£2,000
	<b>Para (d)</b> Relevant foreign income (not subject to a foreign tax)	£100

**Step 2** – Identify the earliest paragraph above for the relevant year, which has an amount of **Para (a)** £1,900

income or gain in the mixed fund

**Step 3** If the amount at Step 2 is equal to or more than the amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain

So E’s transfer of £1,000 is treated as coming from her UK employment income; it is not thus a “taxable” remittance when brought to the UK.

Then apply the rules at s809Q ITA 2007 to the next “transfer” to the UK, which is the mortgage payment.

*Then apply the rules at s809Q ITA 2007 to the next “transfer” to the UK, which is the mortgage payment*

<b>Step 1</b> – Identify the “amount of transfer” in the relevant year		<b>£2,000</b>
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer	<b>Para (a)</b> Employment income (UK employment income) <b>Para (b)</b> Relevant foreign earnings (not subject to a foreign tax) <b>Para (d)</b> Relevant foreign income (not subject to a foreign tax)	£1,900 £2,000 £100
<b>Step 2</b> – Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund	<b>Para (a)</b>	£1,900
<b>Step 3</b> Where the amount transferred is greater than the amount identified at Step 2 the amount transferred is treated as reduced by the amount identified in Step 2.		£2,000 <u>-£1,900</u> <u>£100</u>

**Step 4** - Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.

**Step 2** - repeated **Para (b)** £100

**Step 3** If the amount at Step 2 is equal to or more than the amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain

£1,900 of the transfer is treated as coming from E’s UK employment income; it is not thus a “taxable” remittance when brought to the UK. The remaining £100 is treated as a remittance of £100 of E’s untaxed overseas earnings.

The HMRC analysis stops here. There are in fact three more debits to analyse, but the reader will have the idea. Note that the incomplete analysis of a bank account with only 15 entries has taken 5 pages. It seems safe to say that these are rules which never have, never can and never will be applied in practice. I expect HMRC will accept any reasonable approximation.

**90.7 Property held jointly by spouses**

Section 836 ITA provides:

- (1) This section applies if income arises from property held in the names of individuals—
- (a) who are married to, or are civil partners of, each other, and
  - (b) who live together.
- (2) The individuals are treated for income tax purposes as beneficially entitled to the income in equal shares.

Section 836(3) sets out 7 exceptions, of which the first two are the most important:

But this treatment does not apply in relation to any income within any of the following exceptions.

*Exception*<sup>20</sup>

- A* Income to which neither of the individuals is beneficially entitled.
- B* Income in relation to which a declaration by the individuals under section 837 has effect (unequal beneficial interests).
- C* Income to which Part 9 of ITTOIA 2005 applies (partnerships).
- D* Income arising from a UK property business which consists of, or so far as it includes, the commercial letting of furnished holiday accommodation (within the meaning of Chapter 6 of Part 3 of ITTOIA 2005).
- DA* Income arising from an overseas property business which consists of, or so far as it includes, the commercial letting of furnished holiday accommodation (within the meaning of Chapter 6 of Part 3 of ITTOIA 2005) in one or more EEA states.
- E* Income consisting of a distribution arising from property consisting of—
  - (a) shares in or securities of a close company to which one of the individuals is beneficially entitled to the exclusion of the other, or
  - (b) such shares or securities to which the individuals are beneficially entitled in equal or unequal shares...<sup>21</sup>
- F* Income to which one of the individuals is beneficially entitled so far as it is treated as a result of any other provision of the Income Tax

---

<sup>20</sup> I have altered the layout here for clarity.

<sup>21</sup> Exception E goes on to incorporate the standard distribution code definition of shares and securities: “Shares” and “securities” have the same meaning as in section 1117 of CTA 2010. See App 2.15 (“Security” in distribution code).

Acts as—

- (a) the income of the other individual, or
- (b) the income of a third party.

### 90.7.1 *Settlor-interested trust*

The income taxation of joint accounts has been thrown into disarray by the decision in *Bingham v HMRC*.<sup>22</sup> In this case, Mr Bingham (“H”) transferred money into an account in the joint names of himself, his wife and his adult children. The object was to ensure that the wife and children had income within their personal allowances. The tribunal held that H remained beneficial owner of the money. H, a solicitor, should have paid more attention to documentation (to declare that his children had the desired interest) and implementation (the children did not hold chequebooks so they could not draw out what was said to be their money from the account). So far this is straightforward.

More intriguingly, even if the children held money in the account beneficially, the tribunal would “likely”<sup>23</sup> have held that H was *still* taxable on all the income under s.624, on the grounds that:

- (1) The account was a “settlement” (that is clearly right); and
- (2) H had an interest since he could withdraw the funds.

It seems to me that point (2) is wrong. If H draws out money for his own benefit, he only does so with the authority of the joint account holders, and the possibility that a donee may give funds back to the donee does not constitute an interest.<sup>24</sup>

I think it is safe to say that no account has ever been dealt with that way in the history of taxation, and the practical difficulties would be immense. In *Bingham* there was clearly a settlement as H provided all the funds. What if the joint account owners provide funds, but unequally? What if a couple shares an account for ordinary domestic purposes?

The problems would attach to husband and wife accounts: the settlor-interested trust provisions take priority over s.836 ITA. The relief in s.626 ITTOIA would not apply. This provides (in short):

---

22 [2013] SFTD 689.

23 at [62]

24 *Glyn v IRC* 30 TC 321 at p.329; *West v Trennery* [2003] STC 580 at [51] (point not discussed on appeal).

- (1) The rule in section 624(1) does not apply in respect of an outright gift—
  - (a) of property from which income arises,
  - (b) made by one spouse to the other or one civil partner to the other, and
  - (c) meeting conditions A and B...
- (4) A gift is not an outright gift for the purposes of this section if—
  - (a) it is subject to conditions, or
  - (b) there are any circumstances in which the property, ... —
    - (i) is payable to the giver,
    - (ii) is applicable for the benefit of the giver, or
    - (iii) will, or may become, so payable or applicable.

If *Bingham* were right, a payment into a joint account would not be an outright gift under the definition in s.626(4) ITTOIA.

These arguments were not put to the Tribunal.

### 90.7.2 Remittance basis and spouses joint accounts

How does this interrelate with the remittance basis? Suppose:

- (1) Property is held in the names of H and W, but belongs in equity to H alone.
- (2) Section 836 applies so that half the income is deemed to be the income of W.
- (3) W is a remittance basis taxpayer.

Income of W arising before 2008/09, being merely deemed income, could not be remitted and could not be subject to tax. But income arising from 2008/09 counts as remitted if it is remitted by H, since H is a relevant person in relation to W.

## 90.8 Planning for joint account

The best way to avoid the IHT difficulties discussed in this chapter is that substantial sums should not be put in joint accounts (except where the account holders qualify for the full IHT spouse exemption).

Joint accounts may be useful as a means of probate planning, as the funds in a joint account should be immediately available to the survivor; by contrast, funds in a sole account are not available until probate is obtained, which will involve delay and, often, cost as IHT must be paid upfront in order to obtain probate. In this case, the parties should specify

the terms on which the account is held, and (if appropriate) keep a record of who provided the funds so the IHT position is clear.

It is recommended that remittance basis taxpayers do not use foreign joint accounts, if the remittance tracing problems discussed above will arise. There will be no problem if:

- (1) no substantial interest arises to the account
- (2) no remittance is made from the account to the UK
- (3) interest is paid to a separate account from which no remittance is made to the UK or
- (4) interest is paid to separate account of each account holder in equal shares.

## CHAPTER NINETY ONE

# FOREIGN CURRENCY ISSUES

### 91.1 Foreign currency: Introduction

#### *Cross references*

The following topics are considered elsewhere:

- 45.16.4 (Loan relationship and Forex income: ToA)
- 62.3.4 (Computation of gains: OIG)
- 28.4 (Foreign currency security: Deeply discounted securities)
- 92.9 (Position if no relief claim made: Unremittable assets)
- 72.13 (Foreign currency account: IHT excluded property)

The position of UK resident companies is not considered.

### **91.1 Foreign currency: Introduction**

It is generally accepted that UK tax is assessed in sterling. For instance, the RDR Manual provides:

#### **RDRM31190 Exchange Rates [Jan 2019]**

All entries on the SA Return should be in pounds sterling.

Foreign currency must be translated into sterling. For this purpose it is necessary to identify the date on which the exchange rate is determined (“**currency conversion date**”).

HMRC put their views in a technical note dated 12 October 2009 (the “**HMRC currency technical note**”).

Once one has identified the currency conversion date, one needs to ascertain the exchange rate on that date. HMRC publish monthly exchange rates.<sup>1</sup> Daily rates can be found on commercial websites. These no doubt use different criteria, and disagree slightly among themselves,

---

<sup>1</sup> <https://www.gov.uk/government/collections/exchange-rates-for-customs-and-vat>

but in practice any published rate is acceptable.<sup>2</sup>

HMRC say:

HMRC publishes average monthly exchange rates as a guide but customers and their advisors are welcome to use actual daily rates were appropriate for transactions. HMRC may however challenge customers on the rates used and so it would be prudent to keep a record of the rates and dates involved should evidence be required.<sup>3</sup>

## 91.2 CGT: Currency conversion date

There are two possible ways to compute the gain where an asset is purchased and sold in a foreign currency.

*Method 1:*

- (a) Compute the gain in foreign currency. For instance, suppose an asset is purchased for \$100 and sold for \$200; the gain is the \$ sale price less the \$ acquisition price = \$100.
- (b) Then convert that foreign currency gain to sterling at the date of disposal.

*Method 2:*

---

2 The SAI Manual provides:

**“SAIM4310. Special calculations: Foreign currency securities** [Dec 2019]

...Although the London closing rate should in strictness be used in all the above cases, figures of rates of exchange supplied by taxpayers or their agents should normally be accepted, provided that they come from a reputable source (for example, an exchange rate quoted by the taxpayer’s bank for the day in question) and the basis is used consistently.”

Similarly, International Manual provides:

**“INTM162620. Rate of exchange to use** [Dec 2019]

... Any reasonable established basis of conversion which has previously been applied in any particular case may continue to be used in that case if the customer agrees to its consistent application. If there is a dispute which cannot be resolved within the terms of the established practice, the general basis described above should be adopted.”

Where the official rate of exchange is different, it is considered that one should use commercial (black market) rates; this view is adopted in the USA: *Cinelli v Commissioner of Internal Revenue* (1974) 502 F2d 695 United States Court of Appeals, Sixth Circuit.

3 Expatriate Forum Minutes Oct 2019

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/855596/Expat\\_Forum\\_minutes\\_10\\_October\\_2019.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf)

- (a) Compute the sale price converted to sterling at the rate on the date of disposal
- (b) Then deduct allowable expenditure, in short:
  - (i) The acquisition cost converted to sterling at the rate on the date of acquisition
  - (ii) Any improvement costs converted to sterling at the rate on the date the costs were paid

For CGT it is settled that method (2) is correct. In *Bentley v Pike* 53 TC 590 the taxpayer inherited German property when it was worth DM132k, and later sold it for DM152k. She argued that the gain was the difference between the two Deutschmark values, ie DM30k, and the currency conversion date was the date of disposal. The court held that the gain was the sterling value of the DM proceeds (currency conversion date at the date of disposal) less the sterling value of the property at the time of acquisition. This decision was approved in *Capcount Trading v Evans* 65 TC 545 where the issue was argued more fully before the Court of Appeal. In short, the taxpayer acquired shares for \$85m and sold them for \$50m. The taxpayer argued that they made a loss of \$35m. That was rejected. The gain/loss was calculated as the value of the proceeds (converted into sterling at the date of disposal) less the acquisition cost (converted into sterling at the dates of acquisition).<sup>4</sup>

The CG Manual provides:

**CG25391 Remittance basis: gains to be computed in Sterling** [Nov 2019]

Sterling is the currency in which capital gains computations are carried out (see *Bentley v Pike*, (53 TC 590) and *Capcount Trading v Evans* (65 TC 545)). You should therefore carry out a computation of the gain arising on the disposal of the foreign assets in sterling. Where transactions take place in foreign currency you should convert each separate entry for the computation into sterling using the spot rate applying at the date that part of the transaction occurred.

---

4 If the law were otherwise, further difficulties would arise. What would the position be if an asset was purchased in one currency and sold for a different currency? Would the basis of computation depend on the situs, bearing in mind that situs is itself a somewhat artificial concept? But as the law is settled, it is not necessary to pursue this.

This method of computation is used whether the gain is taxed on an arising or the remittance basis. The RDR Manual provides:

**RDRM31190 Exchange Rates** [May 2020]

*Foreign Chargeable Gains*

Foreign chargeable gains are calculated using sterling translations at the date of acquisition and the date of disposal. So the consideration received will be translated into sterling using the exchange rate at the time of disposal and allowable deductions will be translated using the exchange rate(s) at the time the expenditure was incurred (for example, when the asset was acquired). Thus the gain will be denoted in pounds sterling and will be the same whether taxed on the arising or the remittance basis.

The manual continues:

If the gain is held as foreign currency, the taxable sterling amount of the gain will not change, but separate gains or losses may accrue if the foreign currency gains or loses value with respect to sterling before the gain is remitted...

This sentence is a decade out of date: it represents the law before 2012.<sup>5</sup>

### 91.3 Trading and property income

The position for trading income subject to income tax is governed by SP 2/02 (Exchange rate fluctuations); this is not discussed here.

Property income is computed on accountancy principles, like trading income, so the same practice applies.

### 91.4 Arising basis: Conversion date

The RDR Manual 31190 provides:

**RDRM31190 Exchange Rates** [Jan 2019]

*Foreign Income*

Foreign income taxed on the arising basis is converted to pounds sterling at the exchange rate applicable on the day that it arose overseas.

Similarly, the EI Manual provides:

---

<sup>5</sup> See 91.10 (Foreign currency bank account: CGT).

**EIM40033 Earnings paid in foreign currency** [Nov 2019]**General earnings taxable when received**

General earnings that are taxable when received by virtue of the charging provisions in Sections 15 or 27 ITEPA ... will be chargeable whether paid or payable in foreign currency. It is simply necessary to quantify the amount chargeable in pounds sterling.

The amount chargeable is strictly the sterling equivalent at the date the employee becomes entitled to be paid the earnings or, if earlier, the date they are paid. This can be calculated using the relevant exchange rates in operation at the time.

No deduction can be given for costs of converting currency or for losses incurred on the exchange.

This is not controversial. HMRC accept the use of the average rate for a tax year where income arises regularly through the year.<sup>6</sup>

**91.5 Income converted to foreign currency**

The HMRC currency technical note provides:

6. Income that is regarded as ‘foreign income’ may be received offshore in sterling. It may later be converted into a foreign currency, for example if paid into a non-sterling account. In such cases the amount of a remittance basis user’s foreign taxable income will be the amount actually due and originally received in sterling. It is of no relevance whether the eventual ‘taxable remittance’ that is, or that is derived from, that income is made in a foreign currency or is converted back into sterling before being remitted.

This is not controversial.

**91.6 Remittance basis: Conversion date**

Where income is taxed on the remittance basis, there are two possible views:

- (1) The currency conversion date is the date of remittance. I refer to this as the “**HMRC view**”.
- (2) The currency conversion date is the date that the income arises. I refer to this as the “**practitioners view**” since it is adopted by ICAEW and the great majority of practitioners.

---

<sup>6</sup> Private correspondence.

An intermediate, pragmatic view would allow either approach as long as it is adopted consistently.

### 91.6.1 *HMRC view*

The RDR Manual 31190 provides:

**RDRM31190 Exchange Rates** [Jan 2019]

*Foreign Income*

... Foreign income taxed on the remittance basis ... is subject to UK tax only when it is remitted to the UK. This remitted income should be translated into sterling at the exchange rate prevailing on the date of remittance.

The Manual gives a straightforward example.<sup>7</sup>

Similarly, the EI Manual provides:

**EIM40033 Earnings paid in foreign currency** [Nov 2019]

**... General earnings taxable when remitted to the UK**

For earnings that are taxable when remitted to the UK the conversion should be made at the date they were remitted.

### 91.6.2 *Basis of HMRC view*

The HMRC currency technical note sets out HMRC's arguments in support of the view that the currency conversion date is the date of remittance and not the date of receipt.

5. [1] Remittance basis users may receive income offshore in a foreign currency.

[2] Such foreign income and earnings which are chargeable to tax on the remittance basis only become chargeable to UK tax when they are remitted to the UK. The remittance to the UK is the event that triggers the UK tax charge.

[3] It is only at this point that it is necessary to ascertain the taxable

---

7 *“Example (remittance) - Christophe*

C is a remittance basis user and has €8,000 income paid into his French bank account in June 2011 when the exchange rate is €0.705 to the pound, the equivalent of £5,642. He remits all €8,000 of this foreign income on 1 May 2013 when the exchange rate was €0.681.

He uses this 1 May exchange rate to convert this amount, giving a remitted amount of foreign income of £5,453; this is the amount he is taxed on.”

amount (in sterling) remitted to the UK that is taxable as foreign income.

[4] It follows that it is the date on which that amount is treated as remitted to the UK that the translation to sterling should occur.

Para 5[2] is not correct. RFI is chargeable whether or not remitted, though the amount on which tax is charged is limited to what is remitted.<sup>8</sup> The same applies for RFE.<sup>9</sup>

Para 5[3] is correct but [4] does not follow from it. For CGT it is likewise only necessary to ascertain the taxable amount when there is a remittance but no-one suggests that gains are converted at the date of remittance.

The HMRC currency technical note contains a lengthy discussion of case law, but there are no cases which address the issue, and analogies from CGT and IT cases in other contexts are not decisive. HMRC say:

15. There is little case law that addresses this point directly. Some early case law from the 1920s and 1930s deals with the taxation of companies and whether foreign exchange gains or losses should be regarded as capital or investment items, or form part of the company's trade. It is possible to draw only tentative principles from this, especially as in many cases the issue of arising or remittance basis was not in point.

16. The 1933 case of *Magraw v Lewis* (18 TC 222) concerned a pension of 229 South African pounds, paid to a UK resident, which had been awarded by the Government of the Union of South Africa and was paid by them through the High Commissioner of the Union Government in London. At the time such foreign income was chargeable when received in the UK. The case concerned certain deductions made by the SA Government from the pension, but during the case the issue of how much should be taxed in British pound sterling was raised. In *Magraw*, the pension was actually paid to the appellant in the UK in sterling, so the exchange issue was a little different.<sup>10</sup> In the course of his judgement at the High Court Finlay J said, at page 225,

What happened was this. The Appellant was paid a particular sum in UK pounds and by reason of the state of the exchange, the amount which he was paid in UK pounds was larger—a greater number of pounds—than the pension awarded to him in South Africa reckoned in South African pounds.

---

8 See 2.4.1 (Unremitted RFI “chargeable”).

9 Chargeable gains actually are chargeable on remittance but HMRC do not say that gains are converted at the date of remittance.

10 [Author's note] Since the pension was paid in sterling, the exchange issue did not arise at all.

He says that he ought not to pay Income Tax upon the amount which he has received in this country. I am bound to say that in regard to that the law appears to be as plain as in the other case...It is clear that the Income Tax authorities can have regard only to what is paid. What is paid is a pension of a particular amount in UK pounds, £268 I think it is -but the exact amount does not matter- that is paid to the Appellant.

That is what he has to pay tax upon, and he has to pay on that in the appropriate number of pounds in British currency. As I say, about that point there does not appear to be any legal difficulty-indeed, I do not think there is any legal difficulty about either point...I cannot myself see that any one, even a layman, could conceive that there was any grievance when he gets a particular income in UK pounds, in paying tax in UK pounds at the appropriate rate upon that income.

17. In *Thomson v Moyses* 39 TC 291, whilst addressing a point about whether a remittance required a transmission from abroad, at the House of Lords Lord Reid said at p329 (bold emphasis added)

Before considering these authorities, I think it well to see what the effect would be if this view were right. I take a case which no one has ever even suggested would not be within the scope of these provisions - the case of a bank acting as a collecting agent. If a customer hands to an English bank for collection a cheque drawn on a foreign bank, the English bank will send the cheque abroad for collection and, when notified that the money has been collected, it will give to the customer in this country the equivalent in sterling **at the current rate of exchange**.

18. References to other case law have been made to HMRC with regard to this issue.

*Bentley v Pike* [1981] STC 360 and *Capcount Trading v Evans* [1993] STC 11 - these concern Capital Gains Tax on chargeable gains accruing on the disposal of an asset, and therefore have no bearing on the issue of overseas income. They state that where there is an acquisition and disposal in a foreign currency the taxable capital gain is calculated by deducting the sterling value of the acquisition at the time of acquisition from the sterling value of the sale proceeds at the time of sale.

*Pattison v Marine Midland* 57 TC 219 related to tax on trading profits and the House of Lords upheld the decision of the Court of Appeal rejecting HMRC's contention that, with respect to a loan made by a company, the difference in sterling terms between the value of the dollars at the time of the loan and the time of the repayment represented a taxable trading profit of the company.

In *Capcount* the Court of Appeal specifically distinguished *Marine Midland* on the basis that it was concerned with trading profits whereas *Capcount* was concerned with capital gains. Nolan LJ states:

“Against that background I do not find it surprising that, in the case of trading companies operating abroad the commercial accounting procedures which, it seems, commonly result in the profit being first computed in the particular overseas currency and then translated into sterling for tax purposes

should be adopted and accepted by the Revenue...the income tax legislation, unlike the capital gains tax legislation, is not generally concerned with the measurement of a gain or loss on a single disposal but with a balance at the year end and computed on accounting principles.”

19. The calculation of gains arising on non-sterling acquisitions and/or disposals in sterling is different from the calculation of the amount of taxable income in sterling; it is clear from *Bentley v Pike* that the sterling translation must be made using the exchange rate in force at the dates of the transaction (i.e. date of acquisition for acquisition cost, and disposal for disposal proceeds) and the calculation completed in sterling. This is understandable for CG calculation purposes, as CG is fundamentally a transaction-based tax.

20. Apart from the £2,000 threshold (see below), this note only concerns remittances of foreign income. *Bentley* and *Capcount* concern capital gains, not income, and are therefore not relevant. *Marine Midland* supports the approach taken by HMRC in the guidance. *Marine Midland* concerned trading profits rather than income but an individual's income is more on a par with the profits of a business than with capital gains because neither an individual's income nor the profits of a business require individual disposals. Consequently, there is no conflict between the principles established in *Marine Midland* and HMRC's position on the treatment of an individual's income.

For completeness, the HMRC currency technical note also states:

7. In all cases HMRC will tax the individual's foreign income as income; the question is simply what sterling value to give that income, and more importantly, when is it necessary to calculate that value. HMRC will never tax an amount greater than the income received; for example, if \$50,000 US dollars are received then only \$50,000 US dollars will ever be subject to tax - that is, the sterling equivalent of that \$50,000 for income tax purposes at the time at which the UK tax liability occurs.

8. For a remittance basis user whose foreign income is received offshore in, say, dollars, there is no requirement to value the dollars twice (that is on date of receipt offshore and on the date an amount becomes taxable by virtue of being remitted to the UK). In other words, for income tax purposes, in order to tax the income received in dollars the conversion into sterling should only be made once, namely on the occasion that the income comes into charge...

12. This approach is in the remittance basis user's favour. This is because, whether the exchange rate on the date the income arises or the date it is remitted is used to translate the foreign income into sterling, there has to be consistency between the two - it has to be one or the other. An individual has an element of control over the date of remittance and can choose to remit income when the exchange rate is in his favour or not to remit income when the exchange rate is not in his favour. An individual does not generally have similar control over the date on which foreign income arises.

These are not arguments, or at least not arguments to be taken seriously.

### 91.6.3 Conversion date: correct view

Since there is no statutory guidance, and no clear guidance from the case law, the right answer is that which best suits the scheme of the provisions. It is considered that the correct view is that the currency conversion date is the time the income arises, not the date of remittance. I call this the practitioners view.

The HMRC view gives rise to many anomalies. Firstly, contrast the arising basis where the currency conversion date is the date income arises. Secondly, contrast the CGT remittance basis where the currency conversion date is (in short) when the gain arises. The anomaly is more striking when one bears in mind that offshore income gains are computed on CGT principles but subject to income tax on remittance. Thirdly, contrast the IT remittance basis where income is received in sterling and immediately converted into a foreign currency.<sup>11</sup> Fourthly, contrast tax credits in a foreign currency where the currency conversion date is the date the income arises, or near that date.<sup>12</sup>

The HMRC view does not work in cases of double representation, ie where there are two distinct assets which both represent the same income/gains.<sup>13</sup>

The next set of problems arises on the HMRC view if a remittance basis taxpayer receives foreign currency income and converts it into another asset, rather than paying it directly into a bank account. In these circumstances HMRC appear to have accepted (inconsistently) that their view does not apply.<sup>14</sup>

Suppose T receives income in euros, converts the euros into sterling, and remits the sterling.

- (1) Does T adopt the euro rate at the time of conversion into sterling?  
Then tax depends on administrative acts such as how the receipt is dealt with.
- (2) Does T then adopt the euro rate at the time of remittance? That would

11 The HMRC view assumes that one always knows what currency income is received, but in the case of deemed income that is not the case, and in the case of trading income it may depend on arbitrary choice of accounting practice.

12 See 91.9 (Foreign tax credit: currency conversion date).

13 See 17.16.9 (Double representation).

14 See 53.14.10 (Rebasing: currency fluctuation).

be absurd and also gives rise to this further problem: Suppose T receives equal amounts of (a) foreign interest in euros and (b) foreign interest in sterling; T converts the euros to sterling and pays all the interest into one foreign sterling account, and later remits one half of the account to the UK. If one converts at the time of remittance T needs to decide whether T has remitted the sterling interest or the (former) euro interest. The answer is far from clear. On the practitioners view this tracing problem does not arise.

Section 731 raises further problems on the HMRC view. If relevant income arises in a foreign currency, when does one convert that to sterling? If one converts at the time the income arises there is a further anomaly between s.731 and ordinary income. If one converts at the time there is a benefit, then a currency conversion may have to be done every time a benefit is conferred, which is unworkable.

#### 91.6.4 *Foreign currency depreciates*

HMRC say that their view (currency conversion date is the date of remittance) produces the right result where foreign currency depreciates against sterling, whereas the practitioners view causes an additional tax charge for taxpayers which HMRC are anxious to avoid. The HMRC currency technical note provides:

13. ... Compare two taxpayers: Mr A is taxed on the arising basis. Mrs R on the remittance basis. Both receive RFE:

*Exchange rates:*

1 May Year 1 \$1 = £1.20

1 May Year 2 \$1 = £1.10

1 May Year 3 \$1 = £1.50

Mr A and Mrs R receive \$100,000 on 1 May in Year 1.

Mr A will have to pay tax on £120,000 in Year 1. Whether he brings the \$100,000 in to the UK on 1 May in Year 1 when it is worth £120,000, or on 1 May in Year 2 when it is worth £110,000, or on 1 May in Year 3, when it is worth £150,000, has no impact on Mr A's income tax liabilities.

That is correct.

If Mrs R, on the other hand, translates her foreign income into sterling on 1 May Year 1 she will, on [the practitioners view], be said to have taxable RFE of £120,000.

- In Year 2, she could remit every one of the \$100,000 dollars received, which would translate only to £110,000 and yet still pay tax on £120,000 - which

would appear that we are taxing an additional \$9090,<sup>15</sup> or we are applying a tax rate of c.43.5%.

14. ...Theoretically, given large fluctuations in currency exchange rates, or with changes in higher tax rates, a situation could arise in which the tax due is actually more than the monies the individual actually receives in the UK ...

It is indeed unfair for a remittance basis taxpayer to be taxed on an amount larger than the sum which they remit to the UK. But this observation does not much support the HMRC view. This is in the HMRC view the position on the remittance of an asset derived from foreign income/gains, if the asset has fallen in value. In this case, HMRC appear to have no compunction in taxing a larger amount than remitted. In the HMRC view “a situation could arise in which the tax due is actually more than the monies the individual actually receives in the UK.”<sup>16</sup>

### 91.6.5 *Pragmatic approach*

Cleansing Q&As<sup>17</sup> Question 1 provides:

Foreign domiciliaries will often have foreign currency bank accounts. As such, mixed fund analysis of foreign currency accounts will often need to be carried out. The HMRC Manuals deal with some very simplified examples and suggest that the analysis should take place in the foreign currency with the conversion to sterling only occurring when the remittance takes place.

There is no legislation covering the issue and no specific case law.

Case law is definitive about the need for chargeable gains to be computed in sterling. In addition, from a practical perspective it is difficult to see how anything other than a sterling analysis can (without extreme complexity) work where there are multiple transfers (in some cases hundreds if not thousands) between accounts in multiple currencies. To add to the difficulties in such situations you can have numerous instances of investments acquired using funds from one currency, where the investment is denominated in a separate currency and the sale proceeds go into a third account in another currency.

Since the area is not covered by any legislation there should be a pragmatic position taken. Provided the individual is consistent year on

---

15 The correct figure appears to be \$10,000.

16 See 17.32.2 (Change in property value).

17 For this document, see 19.11 (Cleansing mixed funds).

year when the analysis is prepared for a foreign currency account he or she should be able to carry out the mixed fund analysis in either the foreign currency or in sterling. Does HMRC agree?

**Suggested answer:** Provided a consistent year on year approach is taken for each specific foreign currency account a mixed fund analysis can be carried out in either the foreign currency or in sterling.

**Example (Clara)**

C is a UK resident foreign domiciliary. She meets the criteria such that she can cleanse her mixed fund accounts. She has:

- a Swiss franc account with QRS Offshore Bank; and
- five different foreign currency accounts with LMS Offshore Bank (Swiss francs, US dollars, Euros, Australian dollars and Canadian dollars) as well as a sterling account and an active trading portfolio (buying and selling investments in various different currencies often with the currency used for the purchase not being the same as the currency the investment is denominated in and with the sale proceeds being in a different currency and going to a different account). Various transfers are made between the different currency accounts.

The account with QRS Offshore bank is analysed in Swiss francs.

The complexity of the issues with respect to the accounts with LMS Offshore Bank means that all those foreign currency accounts are analysed in sterling.

In both cases a consistent year on year approach is taken with respect to the mixed fund analysis, so both the analysis for the QRS Offshore bank and the accounts with LMS Offshore Bank are acceptable.

This would be sensible, if extra-statutory, but the HMRC response was negative:

**HMRC Comments**

- Analyse in currency held in the account as per current guidance<sup>18</sup>, converted to sterling if/when remitted to the UK. Strictly this isn't a cleansing question.
- You can cleanse in any currency as long as there is a consistent approach (see also response to question 50).

Also see 53.14.10 (Rebasing: currency fluctuation).

---

18 Footnote original: That is for foreign currency bank accounts, the HMRC Guidance says perform the mixed fund analysis in the currency concerned with the conversion to sterling only occurring when the remittance takes place.

### 91.6.6 Conclusion

Cleansing Q&As provides:

It should be noted that we think that the HMRC view is not the better technical interpretation so, it is our view that, provided disclosure is made there are good grounds for not filing on that basis. This issue was discussed with HMRC in 2012 and 2013. The conclusion of these discussions was an agreement to differ in our technical opinions.<sup>19</sup>

It is considered that the HMRC view is clearly wrong, so that a tax return could properly be made on that basis even without disclosure, though the consequence would be to extend the time limit for a discovery assessment.

### 91.7 Sub-£2k taxpayer: Currency conversion date

The RDR Manual provides:

#### **RDRM31190 Exchange Rates** [Jan 2019]

*Remittance basis users below the “£2,000 threshold”*

... For the purposes of determining whether the amount of an individual’s foreign income which is “not remitted” in a tax year is below £2,000 they obviously cannot apply [what HMRC regard as] the usual principle for remittance basis users of using the exchange rate at the time of remittance. Instead the balance of the unremitted foreign income is converted to pounds sterling *at the rate of exchange prevailing on the last day of the tax year.*

ITA07/s809D(2) provides that the amount of an individual’s “unremitted” foreign income and gains for a tax year is-

- (a) the total amount of what would (if this section applied) be the individual’s foreign income and gains for that year, minus
- (b) the total amount of those income and gains that are remitted to the UK in that year.

So the above formula may be carried out in the foreign currency, looking at total income received and total income remitted, per currency, during the tax year. The balance which is left is the “unremitted foreign income”. This is translated into sterling using the exchange on the last day of the tax year (5 April) to ascertain whether the ‘unremitted foreign

---

19 “Cleansing of mixed funds – professional bodies Q&As” (version 3) question 8  
<https://www.lawsociety.org.uk/support-services/documents/qas-cleansing-of-mixed-funds-professional-bodies-march-2019>

income' is below the £2,000 limit.

Thus the currency conversion date is that on 5<sup>th</sup> April of each year. I refer to this as the “**5 April conversion view**”. This practice only applied for the purposes of the £2k test and only for income, not for gains:

This practice applies for the purposes of deciding whether ITA07/s809D applies ONLY. All of the individual's foreign income amounts for a tax year must be taken into account.

*Example: Michaela*

M received foreign income on 10 April of \$5,000 when the exchange rate was (£1=\$2).

She remitted \$1,500 to the UK on 15 May when the exchange rate was £1=\$1.50 She will pay tax on the sterling amount of £1,000.

At the end of the tax year, M's 'unremitted foreign income' will be calculated using the exchange rate at the end of the tax year, which is £1=\$1.80.

This is calculated as follows:

Total foreign income and gains for that year	\$5,000
less	
Amount of that foreign income remitted during year	<u>(\$1,500)</u>
Unremitted foreign income	<u>\$3,500</u>

\$3,500 is £1,944 using the exchange rate at the end of the tax year; she may use s809D if she wishes to use the remittance basis.

If the exchange rate at the end of the year was £1=\$1.50 then the \$3,500 unremitted foreign income would be £2,333, which is above the threshold. ...

The HMRC currency technical note provides the reason for the 5 April conversion view:

29. On further consideration of the wording of s809D, HMRC took the view that for foreign income, this calculation can only be made on the last day of the tax year, as that is the only date an individual's total and unremitted foreign income for a tax year can be ascertained. Consequently the foreign currency should be translated into sterling on that date also, for both the total foreign income and the remitted foreign income for the purposes of s.809D only.

30. Although UK income tax is charged on sterling amounts, it does not follow that the calculations to get to an income threshold such as this in s809D necessarily have to be made in sterling. Consequently the formula of deducting the remitted income from the total income can be carried out in the foreign currency on the last day of the tax year and then the balance which is left namely the “unremitted foreign income” can be translated into sterling on that date to

ascertain whether it is below the £2,000 limit.

Thus the basis for the 5 April conversion view is the (erroneous) HMRC view that the currency conversion date for remitted income is the date of remittance. If the practitioners view is accepted, that the currency conversion date is the date that the income arises, s.809D does not raise any problem, as obviously the same approach should apply there also.

### 91.8 Nominated income/gains: Currency conversion date

The RDR Manual provides:

**RDRM31190 Exchange Rates** [Jan 2019]

*Nominated income and gains*

Nominated income and gains are charged to UK tax on the arising basis... This means that any foreign income that is nominated for the purpose of the Remittance Basis Charge is converted to pounds sterling at the exchange rate that applied on the date the income arose.

Foreign chargeable gains are always calculated in pounds sterling at the rate of exchange that applied on the date the gain is realised.

The Manual gives a straightforward example.<sup>20</sup>

### 91.9 Foreign tax credit: Currency conversion date

International Manual provides:

**INTM162620. Rate of exchange to use** [Dec 2019]

For the purpose of computing tax credit relief, foreign tax, payable directly or by deduction, should be converted into sterling at the rate of exchange obtaining on the date when the foreign tax for which credit is to be allowed becomes payable.

*In practice*

1. Officers need not make enquiries in all cases in order to establish the precise date on which the foreign tax became payable under the foreign country's laws. Where the date is not known, the date of payment of the tax can normally be taken as the payable date. Where the foreign tax has

---

<sup>20</sup> *Example (Francoise)*

F is a non-domiciled individual who is subject to the Remittance Basis Charge. She decides to nominate €20,000 of foreign income. The exchange rate on the date the income arose was €0.744 to the pound. She uses this rate to calculate the equivalent nominated amount of foreign income in sterling, which is £14,880."

been deducted at source from income, for example, from dividends, interest or royalties, the payable date will normally be the same date as the date on which the income is paid. If, however, the customer objects, or a substantial amount of tax is involved, the actual payable date should be determined. In many cases the date can be obtained from the demand note, provided that there has been no appeal against the foreign charge. If any difficulty arises in determining the payable date, in a case where such date is material, or if the customer objects to this basis, the case should be submitted to the Business, Assets & International, Assets Residence & Valuation in the case of individuals and to CSTD, Business Assets & International, Base Protection Policy Team in all other cases. See, however, INTM167190 in the case of interest on a loan relationship. Any reasonable established basis of conversion which has previously been applied in any particular case may continue to be used in that case if the customer agrees to its consistent application. If there is a dispute which cannot be resolved within the terms of the established practice, the general basis described above should be adopted.

The Manual does not distinguish between an arising basis taxpayer and a remittance basis taxpayer. So on the HMRC view, the currency conversion date for remitted income is the date of remittance, but the currency conversion date for the tax credit on the same income is the date that the tax was paid, which may not even be close. That is yet another anomaly arising from the HMRC view that the currency conversion date is the date of remittance.

See *Greig v Ashton* 36 TC 581.

### **91.10 Foreign currency bank account: CGT**

The TCGA deals separately with foreign currency bank accounts and foreign currency not in a bank account (banknotes and coins).<sup>21</sup> But bank accounts are the usual way to hold money, so that is the more important area.

A bank account is a debt, and a chargeable gain does not usually arise from a debt, because of the CGT debt exemption in s.251(1) TCGA.<sup>22</sup>

Section 252(1) TCGA provides:

---

21 See 91.11 (Foreign banknotes/coins).

22 See 53.21 (CGT debt exemption).

[A] Section 251(1) does not apply in relation to a gain accruing to a person on a disposal of a foreign currency debt (or an interest in such a debt)

[B] unless that person is--

- (a) an individual,
- (b) the trustees of a settlement, or
- (c) the personal representatives of a deceased person.

Section 252(2) TCGA defines “foreign currency debt”:

A “foreign currency debt” is a debt--

- (a) owed by a bank<sup>23</sup> in a currency other than sterling, and
- (b) represented by a sum standing to the credit of an account holder in an account in that bank.<sup>24</sup>

The label “foreign currency debt” is not apt; “foreign currency bank account debt” would be better; but there it is. Adopting the terminology of s.252(1)[A], it notionally disapplies CGT debt exemption, in the case of a “foreign currency debt”. But then para [B] then adds an exception so large that the exemption is (more or less) restored.

The relief in para [B] does not apply to companies, but that does not matter, as:

- (1) UK companies are governed by the loan relationship rules (not discussed here).
- (2) Foreign currency debts of non-resident companies are essentially outside the scope of CGT.<sup>25</sup>

It would have been simpler to apply CGT debt exemption to all persons,

23 “Bank” is not defined, but it does not matter.

24 CG Manual 78330 formerly provided: “Foreign currency certificates of deposit in bearer form are not within TCGA 1992, s.252.” The passage was deleted in 2010. One is left to speculate as to whether HMRC have changed their view. The issue would require an examination of the nature of certificates of deposit.

25 See 60.4 (Computing gains: CT rules).

HMRC say: “There is no need to include companies in the exemption because companies’ returns from FCBA [foreign currency bank accounts] are not liable to tax on capital gains.” Reform of the taxation of non-domiciled individuals: summary of responses to consultation (2011) para 2.102

[http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc\\_responses\\_non\\_domicile\\_reform.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf)

ie to repeal the whole of s.252 TCGA; but there it is.

There could be a chargeable gain on a foreign currency debt which is not a bank account debt, if s.251 relief did not apply, such as a secondhand debt or a debt on a security. But it is not necessary to consider the topic here.<sup>26</sup>

### 91.11 Foreign banknotes/coins

Foreign currency is an asset on which a gain may accrue. Section 21(1) TCGA provides:

All forms of property shall be assets for the purposes of this Act, ... including ...

(b) currency, with the exception (subject to express provision to the contrary) of sterling ...

CG Manual provides:

**CG78316 Identification of disposals with acquisitions** [Jul 2019]

Foreign currency is subject to the same rules of identification and pooling as unquoted shares and securities. See CG50500+.

The share pooling/matching rules apply.<sup>27</sup> Cryptoassets (such as bitcoin) are not currency.<sup>28</sup>

#### 91.11.1 *Foreign currency for personal expenditure*

There is an exemption for foreign currency needed for personal expenditure abroad. This is not likely to affect remittance basis taxpayers, as gains on disposals of this kind are not likely to be remitted, but it is important for others. Section 269 TCGA provides:

A gain shall not be a chargeable gain if accruing on the disposal by an individual of currency of any description acquired by him for the personal expenditure outside the UK of himself or his family or dependants (including expenditure on the provision or maintenance of any residence outside the UK).

#### 91.11.2 *Critique*

---

26 See the 2011/12 edition of this work chap 49 (Foreign currency issues).

27 See 53.10 (Share pooling and matching).

28 See 97.35.1 (What are cryptoassets).

The taxation of foreign banknotes/coins should be the same as foreign currency bank accounts, and the relief in s.251 should be extended. However in practice this is not so important as it would be unusual for a person to hold substantial foreign currency outside a bank account (except perhaps as trading receipts outside CGT).

### 91.12 Interaction with mixed fund rules: HMRC examples

The CG Manual provides examples of the following:

- (1) Remittance of part of FC account holding capital gain (Fatima)
- (2) Ditto with previous offshore transfer (example 2)
- (3) Remittance of part of FC account holding income & gain (example 3)

The RDR Manual provides examples of the following:

- (4) Remittance of part of FC account holding income (Julius).
- (5) Remittance of part of FC account holding RFI and RFE (Tom)
- (6) Ditto with previous offshore transfer (Gelda)

The examples are discussed in the 2011/12 of this work, but this is not set out here as it is overtaken by the 2012 reforms.

### 91.13 Foreign currency issues: Critique

The 2012 reform, which was advocated in the 2011/12 edition of this book, genuinely deserves the title of simplification. The problems which remain could be solved as follows.

*Annual exchange rate averaging* The problem (for arising basis and remittance basis taxpayers) is the general impracticability when there are a significant number of transactions of converting foreign currency to sterling at a variety of moments during the year: the moment that income arises, the moment that gains arise, and the moment that capital expenditure is incurred. The solution is in the HMRC practice to allow use of an annual average rate in any currency during the year and to average out acquisitions and disposals. HMRC should publish rates each year for every currency. Provided taxpayers are not allowed to switch adventitiously between accurate and average exchange rates, this would have no significant cost implications.

*Currency conversion date* The second set of problems (for remittance basis taxpayers) arise from HMRC's mistaken view that the currency conversion date for income of a remittance basis taxpayer is the date of

remittance. The solution is to recognise the existing law, or (if that is not accepted) to amend the law to the practitioners view. This would have no cost implications.

## CHAPTER NINETY TWO

# UNREMITTABLE ASSETS

### 92.1 Unremittable assets: Introduction

#### 92.1 Unremittable assets: Introduction

There are five reliefs for receipts which cannot be brought to the UK, typically due to exchange control:

<b>Provision</b>	<b>Relief for:</b>
s. 842 ITTOIA	Foreign income
Chap 13 pt 2 ITTOIA	Trading receipts
s.668, 669 ITA	Accrued income profits
s.279 TCGA	Foreign gains
s.1275 CTA 2009	CT

In this chapter I focus on the reliefs for foreign income/gains, which I call “**unremittable income/gains relief**”.

The SAIM provides:

#### **SAIM1150 unremittable income** [Feb 2020]

Some countries impose exchange controls to regulate the flow of money. Where a person has income arising in one of these countries, it may be impossible to bring the income into the UK either because it is not permitted by the authorities in that country or because it is difficult to obtain foreign currency there. In these circumstances, tax could become due on income that was not available to pay the tax bill and hardship could result. Special rules in Chapter 4 Part 8 of ITTOIA 05 allow an individual or trustee to claim that unremittable income should not be brought into charge when it arises.

The most common example is that of a UK resident who has a bank account in a country that imposes restrictions on the movement of currency...

## 92.2 Unremittable asset relief

For foreign income, s.841(1) ITTOIA provides:

This Chapter applies if—

- (a) a person is liable for income tax on income arising in a territory outside the UK, and
- (b) the income is unremittable.

The CGT equivalent is s.279(1) TCGA which provides:

Subsection (2) below applies where—

- (a) chargeable gains accrue from the disposal of assets situated outside the UK, and
- (b) the person charged or chargeable makes a claim, and
- (c) the conditions set out in subsection (3) below are, so far as applicable, satisfied as respects those gains (“the qualifying gains”);...<sup>1</sup>

## 92.3 “Unremittable” income

Section 841(2) ITTOIA provides:

For the purposes of this Chapter, income is unremittable if conditions A and B are met.

I refer to “**unremittable income conditions A and B**”.

### 92.3.1 *Cond. A: Cannot transfer to UK*

For foreign income, s.841(3) ITTOIA provides:

Condition A is that the income cannot be transferred to the UK by the person who is liable for income tax in respect of the income because of—

- (a) the laws of the territory where the income arises,
- (b) executive action of its government, or
- (c) the impossibility of obtaining there currency that could be transferred to the UK.

For CGT, s.279(3) TCGA provides:

---

<sup>1</sup> For completeness: s.279(1) concludes with provision for pre-TCGA 1992 claims (which will now be very rare): “... and subsection (2)(b) also applies where a claim has been made under section 13 of the 1979 Act.”

- (3) The conditions are—
- (a) that the claimant was unable to transfer the qualifying gains to the UK, and
  - (b) that the inability was due to the laws of the territory where the assets were situated at the time of the disposal, or to the executive action of its government, or to the impossibility of obtaining foreign currency in that territory, and
  - (c) that the inability was not due to any want of reasonable endeavours on the part of the claimant.

The predecessor provision in ICTA included a requirement that the income was unremittable notwithstanding the taxpayer's reasonable endeavours. This remains for CGT but was omitted in the ITTOIA rewrite, as it added little if anything to the general rule that the income cannot be transferred. That condition is not met if reasonable endeavours could procure a transfer. EN ITTOIA provides:

The condition contained in section 585(1)(c) of ICTA and the similar words about “reasonable endeavours” in section 584(2) of ICTA are not rewritten in [ITTOIA]. They are regarded as adding little to the requirements of sections 584(1)(a) and 585(1)(a) and (b) of ICTA. If, by reasonable endeavours, the taxpayer could transfer the income to the United Kingdom, the test in section 584(1)(a) of ICTA of his being prevented from transferring it and the similar tests in section 585(1)(a) of ICTA about being unable to transfer the income or remit the proceeds of transfer must not be met, and there would then be no inability to transfer because of local law, government action or the impossibility of obtaining foreign currency as required under section 585(1)(b) of ICTA.

The SAIM provides:

**SAIM1150 unremittable income** [Feb 2019]

... The earlier [ICTA] rules also required that the income should not be unremittable due to ‘want of reasonable efforts’ on the taxpayer’s part, but this requirement was omitted from ITTOIA05 and should not be interpreted harshly for 2004-05 and earlier years.

Example (*Laura*)

L has a bank account in another country where money is deposited from her mother’s estate. She cannot bring the money back to the UK because of strict exchange controls. She has the option of putting the money into low yield government bonds in that country, and income from these

bonds can be remitted to the UK. HMRC will accept that it is not reasonable for L to have to put the money in low yield bonds, and that the interest on the account is unremittable.

Although in origin a comment on the “reasonable endeavours” requirement (still applicable to CGT but not now to IT) the example is also relevant to the question of whether unremittable income condition A is met, ie whether it is the case that the income “cannot” be transferred.

In *Coxon v HRMC* the taxpayer purchased a property in Cyprus “off plan”, that is, the property was not then constructed but the vendor developer undertook to build the property. The taxpayer transferred funds to a Cyprus bank account in his name. The funds could not be transferred to the UK because:

- (1) Under the contract with the developer, they were to be released to the developer in installments as the development proceeded, an arrangement known as an escrow account.
- (2) The funds were also charged for a debt to the bank.

Interest on the funds could not be transferred to the UK. But this was because of the contracts the taxpayer had chosen to make, and not because of the laws of Cyprus (even though the contracts were governed by Cyprus law):

We do not consider that s 841(3)(a) [ITA] assists Mr Coxon. We consider that provision applies to overseas legislation such as foreign exchange control restrictions, or blocked funds accounts arising from trading boycott sanctions. It is not sufficient to cover an inability to transfer funds to the UK because of a contractual provision restricting one party's ability to deal with those funds (here, the bank's security charge over the Escrow Account). [The taxpayer's representative] made reference to Cypriot banking laws but, at least in the absence of further detail, we conclude that a contractual restriction, albeit one legally enforceable under Cypriot law, is insufficient to bring s 841(3)(a) into play.<sup>2</sup>

### 92.3.2 *Cond. B: Remittable funds*

Section 841(4) ITTOIA provides:

---

<sup>2</sup> [2013] UKFTT 112(TC) at [19].

Condition B is that the person who is liable for income tax in respect of the income has not realised it outside that territory for an amount in sterling or in another currency which the person is not prevented from transferring to the UK.

It is difficult to see what this adds to unremittable income condition A; but it does not matter.

## 92.4 The relief

For foreign income, s.842(1) ITTOIA provides:

If a person liable for income tax on unremittable income makes a claim for relief under this section in respect of that income, it is not taken into account for income tax purposes.

The CGT equivalent is s.279(2)(a) TCGA which provides:

For the purposes of capital gains tax—

- (a) the amount of the qualifying gains shall be deducted from the amounts on which the claimant is assessed to capital gains tax for the year in which the qualifying gains accrued to the claimant.

## 92.5 ECGD payment

### 92.5.1 *Payment before claim*

For foreign income, s.842 ITTOIA provides:

(3) No claim under this section may be made in respect of any income so far as an ECGD payment has been made in relation to it.

(4) In subsection (3) “ECGD payment” means a payment made by the Export Credit Guarantee Department under an agreement entered into as a result of arrangements made under—

- (a) section 2 of the Export and Investment Guarantees Act 1991 (insurance in connection with overseas investment), or
- (b) section 11 of the Export Guarantees and Overseas Investment Act 1978.<sup>3</sup>

---

<sup>3</sup> This Act was repealed by the Export and Investment Guarantees Act 1991 but the need to update was overlooked.

The CGT equivalent is s.279(4) TCGA which provides:

Where under an agreement entered into under arrangements made by the Secretary of State in pursuance of

[a] section 1 of the Overseas Investment and Export Guarantees Act 1972<sup>4</sup> or

[b] section 11 of the Export Guarantees and Overseas Investment Act 1978<sup>5</sup>

any payment is made by the Exports Credits Guarantee Department in respect of any gains which cannot be transferred to the UK, then, to the extent of the payment, the gains shall be treated as gains with respect to which the conditions mentioned in subsection (3) above are not satisfied (and accordingly cannot cease to be satisfied).

## 92.6 Claims

Both CGT and IT require a claim.

The claim for foreign income is made by ticking box 1 of form SA106 (Foreign) 2019/20. The rubric to the box reads:

**Unremittable income** If you were unable to transfer any of your overseas income to the UK, put 'X' in the box – and give details in the 'Any other information' box on your tax return or on a separate sheet

Section 842(5) ITTOIA provides:

A claim under this section must be made on or before the first anniversary of the normal self-assessment filing date for the tax year for which the income would be charged to tax if no claim were made.

EN ITTOIA provides:

The time limit is tied to the tax year for which the income would otherwise be chargeable, rather than to the tax year in which the income arises (as in the source legislation). This brings the time limit into line with the normal time limit for claims. See Change 140 in Annex 1.

But following the abolition of the preceding year basis, there are not many

---

4 This Act was repealed by the Overseas Development and Co-operation Act 1980 but unfortunately the need to update the reference was overlooked.

5 This Act was repealed by the Export and Investment Guarantees Act 1991 but unfortunately the need to update the reference was overlooked.

cases where income arises in one year and is chargeable in another. Perhaps the remittance basis offers an example.

The SAIM provides:

**SAIM1160 unremittable income: claims** [Jan 2020]

... A claim under ITTOIA/S842 does not mean that the income can be omitted from the tax return. The income must still be declared on the tax return but it will not be brought into charge if the claim is valid. This ensures that the amount of the income for each year is known so it can be assessed when the income becomes remittable.

That follows from s.42(1A) TMA: see 117.3 (Quantification of claim). The CGT time limit is different. Section 279(5) TCGA provides:

No claim under this section in respect of a chargeable gain shall be made—

- (a) in the case of a claim for the purposes of capital gains tax, at any time not more than 4 years after the end of the year of assessment in which the gain accrues; or
- (b) in the case of a claim for the purposes of corporation tax, more than 4 years after the end of the accounting period in which the gain accrues.

For gains, the claim is made in form SA108 (2019/20) box 54 (Any other information). HMRC, “Capital gains summary notes” (2019/20) provides:

Please put any additional information in this box. For example ... any gains out of your computations, such as foreign gains that you are unable to bring into the UK

## 92.7 Remittance basis claimant

EN ITTOIA provides:

The relief [in chapter 4] applies only to income charged on the arising basis so does not apply to income charged on the remittance basis.<sup>6</sup>

---

6 The same point was made in the former HMRC6 para 12.27 (Unremittable income): “Unremittable income should not be confused with unremitted foreign income and gains which is relevant only if you use the remittance basis. Having unremittable income is relevant to your tax affairs only if you use the arising basis.”

This was the case in the pre-ITTOIA legislation. The former s.584 ICTA1988 applied:

*Where a person is chargeable to tax by reference to the amount of any income arising in a territory outside the UK ...*

That relief only applied to arising basis taxpayers.<sup>7</sup> Now it is considered that an individual who is a remittance basis taxpayer at the time the unremittable income arises may also qualify for unremittable income relief; but that issue only arises in circumstances where the income is:

- (1) unremittable (for the purposes of unremittable income relief) but
- (2) treated as remitted under the ITA remittance basis (so a claim is needed for unremittable income relief).

That would not happen before the extension of the remittance basis in 2008 and even now will rarely happen. If it did, there is no good reason for not applying the relief, and that would be consistent with the position for unremittable gains relief.

## 92.8 Clawback of unremittable income relief

For foreign income, s.843(1) ITTOIA provides:

This section applies if—

- (a) a claim under section 842<sup>8</sup> has been made in relation to any income, and
- (b) either—
  - (i) the income ceases to be unremittable, or
  - (ii) an ECGD payment is made in relation to it.

If these conditions are satisfied, the relief is withdrawn. Section 843(3) ITTOIA provides:

If income ceases to be unremittable, the income is treated as arising on the date on which it ceases to be unremittable.

---

7 Contrast the former s.585 ICTA 1988 which applied if: “A person charged or chargeable for any year of assessment in respect of income from any source with tax which (apart from this section) falls to be computed ... on the amount of income received in the UK...”

8 This will include a claim made under the pre-2005 legislation, if the income ceases to be unremittable after 2005.

For gains, s.279(2)(b) TCGA provides for withdrawal of the relief:

- (b) the amount so deducted shall be assessed to capital gains tax on the claimant (or his personal representatives) as if it were an amount of chargeable gains accruing in the year of assessment in which the conditions set out in subsection (3) below cease to be satisfied.

The remittance basis may apply on a clawback of the relief.

If the individual (or the PRs) are non-resident in the year the gain accrues, there is no charge to CGT.<sup>9</sup>

CG Manual gives this example:

**CG78408 - Foreign currency: example** [Jul 2019]

In 1983, Ms A who is both resident and domiciled<sup>10</sup> in the UK buys a property overseas for foreign currency, which she acquired for £50,000 on the date of purchase of the property ....

In 1986-87 she sells the property for 3,000,000 units of the foreign currency at a time when the exchange rate is 40 to £1. The sterling equivalent of the currency so obtained is therefore £75,000.

The chargeable gain (subject to expenses) is £75,000 less £50,000 equals £25,000, before indexation, and this is assessable for 1986-87.

Ms A makes a claim under TCGA92/S279 and establishes that she is unable to transfer any of the sale proceeds to the UK because of the foreign country's currency regulations. The gain of £25,000 less indexation is no longer assessable for 1986-87, and any assessment which may have been made should be adjusted accordingly.

In 1991-92, the foreign country relaxes its currency regulations and Ms A is then able to transfer the sale proceeds to the UK. She becomes assessable for that year (whether or not she remits the sale proceeds to the UK) on £25,000 less indexation (that is, the amount by which the assessment for 1986-87 was reduced) ...

The SAIM provides:

**SAIM1160 unremittable income: claims** [Jan 2020]

...Relief continues until the income becomes remittable. Exchange controls do change so anyone who makes a claim must check that the conditions for relief continue to be satisfied each year.

---

<sup>9</sup> Except for NRCGT?

<sup>10</sup> The point of mentioning domicile is that Ms A is an arising basis taxpayer.

**Withdrawal of relief**

The income is assessable at the time it becomes possible to remit the income to the UK (ITTOIA05/S843). There is no requirement that the income must actually be remitted in order for the charge to arise. If the source has ceased, the income is taxed as if the source had not ceased (ITTOIA05/S844).

92.8.1 *Clawback: after ECGD payment*

Section 843(4) ITTOIA provides:

If an ECGD payment<sup>11</sup> is made in relation to income, the income is treated, to the extent of the payment, as arising on the date on which the ECGD payment is made.

92.8.2 *Clawback: after source ceased*

Section 844 ITTOIA provides:

- (1) This section applies if—
  - (a) income is treated as arising as a result of section 843, and
  - (b) at the time it is so treated the person who would have become liable for income tax as a result of that section—
    - (i) has permanently ceased to carry on the trade, profession, vocation or property business from which the income arises, or
    - (ii) in the case of income from another source, has ceased to possess that source.
- (2) In the case of income from a trade, profession or vocation—
  - (a) the income is treated as a post-cessation receipt for the purposes of Chapter 18 of Part 2 (trading income: post-cessation receipts), but
  - (b) in the application of that Chapter to that income, section 243 (extent of charge to tax) is omitted.
- (3) In the case of income from a property business—
  - (a) the income is treated as a post-cessation receipt from a UK property business for the purposes of Chapter 10 of Part 3 (property income: post-cessation receipts), but
  - (b) in the application of that Chapter to that income, section 350

---

11 Defined by reference in s.832(2) ITTOIA: “In this section “ECGD payment” has the meaning given by section 842(4).”

(extent of charge to tax) is omitted.

(4) In the case of income from another source, the income is taxed as if the person continued to possess that source.

### 92.8.3 *Remittance basis taxpayer*

The rules here are odd. The position depends on whether or not the source of income exists at the time that the relief is withdrawn. If it does, then the income is relevant foreign income and if the individual is a remittance basis taxpayer at the time the income arises, the remittance basis will apply.

If the source has ceased, however, the income is within s.844 ITTOIA, and s.830(3) ITTOIA provides:

But “relevant foreign income” does not include income chargeable as a result of section 844 (unremittable income: income charged on withdrawal of relief after source ceases).

The surprising consequence is that the remittance basis does not apply to income deemed to arise on a withdrawal of relief after the source of the income has ceased.<sup>12</sup>

The reason for this is historical. EN ITTOIA provides:

Income charged by virtue of [section 844] is not “relevant foreign income”, as defined in section 830 (see subsection (3) of that section). In the source legislation, the charge is under Schedule D Case VI (rather than Schedule D Cases IV or V). The potential relevance of such income to relief under section 392 of ICTA (Case VI losses) has been preserved by the appropriate entry in section 836B of ICTA (introduced by paragraph 340 of Schedule 1 to this Act).

It is obvious that s.830(3) serves no useful purpose, and should be repealed, if only for the sake of simplification; in practice I expect the point will rarely arise; if it does, it would often be overlooked.

### 92.8.4 *Clawback: Non-resident*

As the income is foreign source income, there is no tax charge if the taxpayer is then non-resident. In appropriate cases, split-year rules,

---

<sup>12</sup> The law ought to be simplified by repealing s.830(3): see 15.10.4 (RFI definition: Critique).

temporary non-resident rules and DT relief need to be considered.

### 92.8.5 *Death before relief withdrawn*

For foreign income, s.843(7) ITTOIA provides:

If a person who would have become liable for income tax as a result of this section has died—

- (a) the personal representatives are liable for the tax instead, and
- (b) the tax is a debt due from and payable out of the estate.

The PRs tax liability is on the basis that the income is treated as accruing to the estate when it becomes remittable. That seems reasonable as the PRs should receive the (formerly unremittable) income.

In the case of a remittance basis taxpayer, it could work unfairly if the PRs do not qualify for the remittance basis. But a remittance basis taxpayer will not normally claim unremittable income relief.

If the PRs are non-resident, they will not be taxable.

The CGT equivalent is s.279(6) TCGA which provides:

The personal representatives of a deceased person may make any claim which he might have made under this section if he had not died.

Why was this thought to be necessary?

### 92.8.6 *Clawback: Income computation*

Section 843(5) ITTOIA provides:

The income treated as arising under subsection (3) or (4), and any tax payable in respect of it under the law of the territory where it arises, are taken into account for income tax purposes at their value at the date on which the income is treated as arising.

The SAIM provides:

#### **SAIM1160 unremittable income: claims** [Jan 2020]

... The income is treated as arising on the date on which the qualifying conditions cease to be satisfied. The foreign currency amount is translated into sterling at the market rate on that date, or if there is no market in the currency, the official exchange rate for the country concerned (ITTOIA05/S845).

#### *Example (Martin)*

M has income from an interest-bearing account in Ruritania. Ruritania

has exchange controls, and he cannot remit the income to the UK. The income first arises in 2002/03, when the account earns interest of 1,000 Ruritanian doubloons (RUD). RUD 1,250 arises in 2003/04, and RUD 1,600 in 2004/05. In March 2005, M travels to Ruritania, closes the account and spends the money.

On 1 January 2008, Ruritania lifts the exchange controls and the income becomes remittable.

The HMRC analysis is as follows:

M has validly claimed relief under ITTOIA/S842 (1). But in 2007/08, the income is brought back into charge under ITTOIA/S843. It does not matter that he no longer possesses the source of income (ITTOIA05/S844 (4)). M must include total income of RUD 3,850 (1,000 + 1,250 + 1,600), translated into sterling at the exchange rate prevailing on 1 January 2008, in his 2007/08 self-assessment.

#### 92.8.7 *Prevention of double charge*

Section 843(6) ITTOIA provides:

Subsections (3) to (5) do not apply so far as the income has already been treated as arising as a result of this section.

EN ITTOIA provides:

For example, if relief has been withdrawn because an ECGD payment is received, there is no further charge under this section – to the extent of that payment – if the income itself subsequently becomes remittable.

### 92.9 **Position if no relief claim made**

A claim should normally be made, but it may occasionally be better not to claim, to avoid clawback issues when unremittable income will subsequently become remittable:

- (1) Bunching income and bringing it into a higher rate.
- (2) If it is anticipated that the foreign currency may appreciate against sterling.
- (3) A remittance basis taxpayer at the time the income arises does not usually need the relief.

If no claim is made for the relief, an arising basis taxpayer will be chargeable, but on what amount? Section 845 ITTOIA provides:

- (1) If no claim is made under section 842 in relation to unremittable income arising in a territory outside the UK, the amount of the income to be taken into account for income tax purposes is determined as follows.
- (2) If the currency in which the income is denominated has a generally recognised market value in the UK, the amount is determined by reference to that value.
- (3) In any other case, the amount is determined according to the official rate of exchange of the territory where the income arises.

### **92.10 Unremittable trading/property income**

The former ESC B38 explains the limits of s.841 unremittable income relief:

1. A person resident in the UK who carries on a trade partly overseas and partly in the UK is normally liable to UK income or corporation tax on all the profits from that trade. For this purpose the calculation of profits will include, in respect of overseas transactions—

- (i) amounts paid to the trader which are not remittable to the UK
- (ii) amounts owed to the trader which temporarily cannot be paid, and
- (iii) amounts owed to the trader which even when paid will not be remittable to the UK.

solely as a consequence of local foreign exchange control restrictions.

2. Relief from tax is not available for such amounts under [s.841 unremittable income relief] ... because the profits of the trader of which they are a component part do not arise outside the UK. Nor does the fact that the amounts are unremittable to the UK entitle the trader to relief under [s.35 ITTOIA] (bad and doubtful debts).

Instead, Chapter 13 Part 2 ITA 2007 provides relief. Section 272 ITTOIA applies that Chapter for the purposes of Part 3 of ITTOIA (property income). This is too specialist a topic to consider here.

### **92.11 Unremittable accrued income profits**

Section 841 would not apply to accrued income profits as the proceeds of the sale of accrued income securities are not the income. But in any event, s.841(5) ITTOIA provides:

This Chapter does not apply to accrued income profits which a person is treated as making under Chapter 2 of Part 12 of ITA 2007, but see

sections 668 and 669 of that Act (which make similar provision).

Instead, ss 668, 669 ITA provide relief. This is too specialist a topic to consider here.

## 92.12 Interaction with anti-avoidance rules

Interactions of unremittable income relief and various anti-avoidance provisions raise a fine set of puzzles.

### 92.12.1 *Unremittable s.3 gains*

*Van-Arkadie v Plunket* concerned a minority shareholder in a company resident in Rhodesia. The company realised a gain, part of which was treated as accruing to the shareholder under s.3 TCGA. The company could not transfer its gain to the UK. The claim for unremittable gains relief was refused:

Section [279 TCGA] is concerned only with the case where a chargeable gain accruing on an actual or deemed disposal is represented by something, money or money's worth, which comes into the hands of the taxpayer. It is only in respect of that money or money's worth that it can be sensibly asked whether the taxpayer was unable to transfer it to the UK, and if he was whether the inability was due to the laws of the territory where the gain accrued and whether, if it was, that inability was due to any want of reasonable endeavours on his part. That last requirement seems to me in itself conclusive against the Respondent's case. In this case the Respondent's inability to remit the gain on which he is chargeable was not due to any want of reasonable endeavours to remit moneys to the UK; it was due to the fact that the company did not distribute and that he could not as a minority shareholder compel it to distribute the gain.<sup>13</sup>

This was an unfair result, but in practice the restrictions on s.3 introduced in 2013 reduce the problem significantly.

A shareholder with a majority of the company could compel the company to distribute, and in those circumstances unremittable gain relief should be available.

### 92.12.2 *s.624/720 income or benefit*

---

<sup>13</sup> 56 TC 310 at p.316. Although there was a DTA with Rhodesia, it did not cover CGT.

If the income is unremittable income of a settlor-interested trust, it is suggested that unremittable income relief is available if the income is actually received by the settlor who is unable to remit it.

If a transferor receives s.720 income, it is suggested that unremittable income relief does not apply, though the contrary view is arguable.

If a beneficiary receives a benefit within s.731/s.643A/s.87, and is unable to remit the benefit, it is suggested that unremittable income or gain relief applies, but in any event, the benefit must be valued taking into account the restriction on remittance, so it may not have much value.

## CHAPTER NINETY THREE

# ATED AND SDLT

93.1	ATED
93.5.2 Co in liquidation not beneficial owner	93.26.3 High-value residential transaction
93.12.3 Interest in dwelling+ other land	93.38.2 Trust transfers co to beneficiary
93.16 Tax consequences of paying	

### 93.1 ATED regime

This chapter considers:

- (1) Annual Tax on Enveloped Dwellings (“ATED”)
- (2) Aspects of SDLT:
  - (a) 15% SDLT rate on acquisition within ATED (“ATED-SDLT”)
  - (b) SDLT surcharge on acquisition by non-residents

The focus of this chapter is ATED. I deal with the SDLT topics, which are in part related, but in less detail. I do not consider LBTT/LTT (the Scots/Welsh equivalents of SDLT) though I hope to do so in a future edition.

A third part of the former ATED regime, CGT on property within ATED (“ATED-CGT”), has long gone: that is now superseded by the general charge on UK property of non-residents.

A full discussion of ATED would require a book to itself and SDLT would need several volumes. I focus on the aspects most important to the themes of this book, but include a general discussion, as it is necessary to view the rules in the round.

HMRC have published over 100 pages of guidance (“**HMRC ATED**

guidance”).<sup>1</sup>

The development of the law can be traced from:

- (1) A consultation document tententiously entitled “Ensuring the fair taxation of residential property transactions”.<sup>2</sup> I refer to it as the “**Residential Property Consultation Document**”.
- (2) A consultation response document, which I call the “**Residential Property Consultation response**”.<sup>3</sup>

These are now of historical interest only.

The ATED/ATED-SDLT legislation is found in two distinct places:

- (1) ATED is in FA 2013
- (2) ATED-SDLT is in sch 4A FA 2003

ATED and ATED-SDLT share a common framework and common terminology, even though the common definitions are written out twice. Brevity and simplicity were not material considerations in the ATED regime.

## 93.2 ATED terminology

### 93.2.1 “Partnership” for ATED/SDLT

“Partnership” matters for the following purposes for ATED/SDLT:

- (1) ATED applies if residential property is held by a partnership including a company.
- (2) ATED-SDLT applies if residential property is acquired by a partnership including a company.

<https://www.gov.uk/government/publications/stld-annual-tax-on-enveloped-dwellings-ated>

2 [http://www.hm-treasury.gov.uk/d/consult\\_ensuring\\_fair\\_taxation\\_residential\\_property\\_transactions.pdf](http://www.hm-treasury.gov.uk/d/consult_ensuring_fair_taxation_residential_property_transactions.pdf) (May 2012).

3 HMRC, “Ensuring the fair taxation of residential property transactions: summary of responses” (December 2012)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/190256/summary\\_of\\_responses\\_ensuring\\_fair\\_taxation\\_of\\_residential\\_property\\_transactions.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/190256/summary_of_responses_ensuring_fair_taxation_of_residential_property_transactions.pdf)

For SDLT, para 1 sch 15 FA 2003 provides a definition:

In this Part of this Act a “partnership” means—

- (a) a partnership within the Partnership Act 1890,
- (b) a limited partnership registered under the Limited Partnerships Act 1907, or
- (c) a limited liability partnership formed under the Limited Liability Partnerships Act 2000 or the Limited Liability Partnerships Act (Northern Ireland) 2002,
- [d] or a firm or entity of a similar character to any of those mentioned above formed under the law of a country or territory outside the UK.

Para [d] brings in foreign law LLPs, which are not classified as partnerships for other tax purposes, so this definition is wider than the normal tax sense of the word.

Section 167 FA 2013 provides the identical definition for ATED.<sup>4</sup> So I refer to this as the “**ATED/SDLT definition of partnership**”.

### 93.2.2 “Company” for ATED/SDLT

The ATED and ATED-SDLT definitions are similar, and conveniently read side by side:

#### **s.166(1) FA 2013: ATED**

In this Part “company” means a body corporate<sup>5</sup> but does not include—

- (a) a corporation sole,<sup>6</sup> or
- (b) any partnership (see section 167(1)).

#### **Para 9 sch 4A FA 2003: ATED-SDLT**

In this Schedule—

“company” means a body corporate other than a partnership.

The rules apply to UK and non-UK resident companies.

This is narrower than the standard tax definition (which classifies an unincorporated association as a company).<sup>7</sup>

4 Except that s.167(1)(a) erroneously reads “Partnerships Act 1890”, which is a surprising error, as the Act was correctly named in the FA 2003.

5 See 86.4 (Body corporate).

6 Corporation sole is a very specialist topic, of mainly ecclesiastical interest.

7 See 86.3 (Definition of “company”).

### 93.2.3 “Collective investment scheme”

For ATED-SDLT, para 9 sch 4A FA 2003 provides the standard referential definition:

In this Schedule—

“collective investment scheme” has the same meaning as in Part 17 of the Financial Services and Markets Act 2000 (see section 235 of that Act);

Section 174 FA 2013 provides the identical definition for ATED.

### 93.2.4 “Connected person”

Section 172(1) FA 2013 incorporates the standard definition<sup>8</sup> by reference:

Section 1122 of the Corporation Tax Act 2010 (connected persons) has effect for the purposes of this Part (except where otherwise stated).

Section 172 goes on to provide a definition of “connected” in relation to a collective investment scheme, which is not discussed here.

### 93.2.5 “Non-natural person”

HMRC use the term “**non-natural**” person as label for a body which is a company, a partnership with a company partner, or a CIS. The term is inapt and tends to conceal the complex and arbitrary nature of the concept(s) to which it refers. However it is useful to have a label, and no short label could correctly describe this disparate group of entities. It is also convenient to adopt a consistent usage. In order to keep in mind the artificiality of the expression I refer to “non-natural persons” using scare quotation marks.

The following do not count as “non-natural persons” and so are not within the scope of ATED or ATED-SDLT:

Trustees

Personal representatives

Clubs and unincorporated associations<sup>9</sup>

### 93.2.6 *Enveloping/De-enveloping*

---

<sup>8</sup> See 93.2.4 (“Connected person”).

<sup>9</sup> See 93.2.2 (“Company” for SDLT/ATED).

Budget 2012 referred to acquisition of a residence by companies as “**enveloping**”. At the time, I half balked at that neologism: it is a simplistic reification which hinders clarity of thought. In 2013 it was put into the name of the tax, ATED, and since then we have become familiar with it. It is now perhaps too pointed to put scare quotation marks around the word but its arbitrary nature should be kept in mind.

Winding up the company is called “**de-enveloping**”. I did not originally favour this neologism, particularly when we have the established term “disincorporation” (or indeed liquidation); but language evolves and now it has become familiar it seems an acceptable shorthand.

### 93.3 “Chargeable interest”

For this term see App 2.18 (Interest in land/chargeable interest).

Section 107(2) FA 2013 provides:

Where two or more persons are jointly entitled to a chargeable interest the chargeable interest is not regarded, for the purposes of this Part [Part 3 FA 2013, ATED], as consisting of separate interests corresponding to the shares (if any) that those persons have by virtue of their joint entitlement.

### 93.4 Annual tax on enveloped dwellings

Section 94(1) FA 2013 provides the charge to ATED:

A tax (called “annual tax on enveloped dwellings”) is to be charged in accordance with this Part.

A note on terminology: Budget 2012 proposed the term “Annual Residential Property Tax”. That changed to ATED in 2013. No reason was given for the change, but “ATED” is more focussed, and was probably thought to sound less threatening to taxpayers worried about wider reaching residential property taxation. Names are important in politics; contrast community charge/poll tax, and bedroom tax/under-occupancy penalty, in the context of housing benefit. But the extension of CGT to non-residents in 2019 shows that taxpayers would have been right to be concerned.

Section 94(2) FA 2013 provides the charge to ATED:

Tax is charged in respect of a chargeable interest<sup>10</sup> if on one or more days in a chargeable period–

- (a) the interest is a single-dwelling interest and has a taxable value of more than £500,000, and
- (b) a company, partnership or collective investment scheme meets the ownership condition with respect to the interest.

SDLT is a tax on acquisition of a chargeable interest, so it is charged once, on acquisition. ATED is a tax on ownership, and is charged annually.

### 93.5 Corporate ownership condition

Section 94(2)(b) FA 2013 provides that ATED is charged if:

a company, partnership or collective investment scheme meets the ownership condition with respect to the interest.

There has to be a company, partnership or CIS, ie a “non-natural” person. ATED-SDLT is the same.<sup>11</sup>

Section 94 FA 2013 provides:

(4) A company meets the ownership condition with respect to a single-dwelling interest on any day on which the company is entitled to the interest (otherwise than as a member of a partnership or for the purposes of a collective investment scheme).

(5) A partnership meets the ownership condition with respect to a single-dwelling interest on any day on which a member of the partnership that is a company is entitled to the interest (as a member of the partnership).

(6) A collective investment scheme meets the ownership condition with respect to a single-dwelling interest on any day on which the interest is held for the purposes of the scheme.

I refer to this as the “**ATED corporate ownership condition**”. It is the ATED equivalent of ATED-SDLT corporate purchaser condition.

#### 93.5.1 “Entitled”

Section 95(1) FA 2013 provides:

---

<sup>10</sup> See 93.3 (“Chargeable interest”).

<sup>11</sup> See 93.27 (Co purchaser (non-natural person))

In this Part [Part 3 FA 2013, ATED] “entitled” means beneficially entitled—

- (a) whether solely or jointly with another person, and
- (b) whether as a member of a partnership or otherwise.

This is subject to subsection (2).

Section 95(2) FA 2013 provides 3 exceptions:

References in this Part to entitlement to a single-dwelling interest (or any other chargeable interest) do not include—

- (a) entitlement in the capacity of a trustee<sup>12</sup> or personal representative, or
  - (b) entitlement as a beneficiary under a settlement<sup>13</sup>.
- (3) Subsection (1)(b) does not apply where the contrary is specified.

A corporate trustee does not meet the ATED corporate ownership condition as it is not “beneficially” entitled to the interest.

### 93.5.2 *Co in liquidation not beneficial owner*

The CT Manual provides:

#### **CTM36125 company winding up etc: beneficial ownership of shares** [Jun 2016]

When winding-up begins, a company loses beneficial interest in and ownership of its assets, although retaining legal title to and possession of them. Assets include shares owned in other companies (see *Ayerst v C and K (Construction) Ltd* (1974) 50 TC 651). The effect is that, where the provisions of the Taxes Acts depend on such shareholdings, they can no longer be taken into account when the company owning the shares commences winding-up.

Does the charge to ATED cease when winding up commences?

Further consideration is needed if the company is governed by foreign law.

### 93.5.3 *Joint ownership*

Section 94(7) FA 2013 provides:

---

12 The reference to trustee is otiose, since a trustee is not beneficially entitled.

13 See 1.4 (Settlement: Standard IT/CGT definition).

If a company is jointly entitled<sup>14</sup> to a chargeable interest (as a member of a partnership or otherwise), then regardless of whether the company is entitled as a joint tenant or tenant in common (or, in Scotland, as a joint owner or owner in common) the ownership condition is regarded as met in relation to the whole chargeable interest.

This is an unfair rule, but the provisions are intended to be penal. The same rule applies for ATED-SDLT.<sup>15</sup>

### 93.6 Chargeable person

Section 96(1) FA 2013 provides:

The chargeable person is liable to pay tax charged under this Part [Part 3 FA 2013, ATED].

The definition of chargeable person is broadly what one would expect.

#### 93.6.1 *Chargeable person: Company*

Section 96(2) FA 2013 provides:

“The chargeable person” means—

- (a) in relation to tax charged by virtue of section 94(4), the company;

#### 93.6.2 *Chargeable person: Partnership*

Section 96(2) FA 2013 provides:

“The chargeable person” means ...

- (b) in relation to tax charged by virtue of section 94(5), the responsible partners.<sup>16</sup>

14 Section 174 FA 2013 provides a commonsense definition:

“jointly entitled” means—

- (a) in England and Wales, beneficially entitled as joint tenants or tenants in common,
- (b) in Scotland, entitled as joint owners or owners in common,
- (c) in Northern Ireland, beneficially entitled as joint tenants, tenants in common or coparceners.

15 See 93.27.1 (Joint purchasers).

16 Section 95(5) FA 2013 provides the definition: “The reference in this section to “the responsible partners” are to all the persons who are members of the partnership concerned on the first day in the chargeable period on which the partnership meets

Section 96(4) FA 2013 provides:

The liability of the responsible partners to pay tax charged on them under this Part [Part 3 FA 2013, ATED] is joint and several.

### 93.6.3 *Joint owners*

Section 97 FA 2013 provides:

- (1) Subsection (2) applies if
  - (a) a company is within the charge for a chargeable period with respect to a single-dwelling interest by virtue of section 96(2)(a) and
  - (b) one or more other persons are jointly entitled to the interest on the first day in that period on which the company is within the charge with respect to it.
- (2) The company and the other person or persons are jointly and severally liable for the tax charged for that period with respect to the interest (whether or not those other persons are also within the charge with respect to the interest on the day in question).

Presumably a right of reimbursement is implied.

### 93.6.4 *Chargeable person: CIS owner*

Section 96(3) FA 2013 provides:

In relation to tax charged by virtue of section 94(6) “the chargeable person” means–

- (a) if the collective investment scheme is a unit trust scheme, the trustee of the scheme;
- (b) if the collective investment scheme is an open-ended investment company, the body corporate referred to in section 236(2) of the Financial Services and Markets Act 2000;
- (c) in relation to an EEA UCITS which is not an open-ended investment company or unit trust scheme, the management company for that UCITS;
- (d) in any other case, the person who has day-to-day control over the management of the property subject to the scheme.

### 93.6.5 *More than 1 chargeable person*

---

the ownership condition with respect to the single-dwelling interest.”

There may be more than one chargeable person where:

- (1) property is owned by a partnership
- (2) property is owned jointly

Section 104 FA 2013 prevents a double charge:

Tax in respect of a given single-dwelling interest is charged only once for any chargeable day even if more than one person is “the chargeable person” with respect to the tax charged

### 93.7 Rates of ATED

Section 99 FA 2013 provides:

- (1) The amount of tax charged for a chargeable period with respect to a single-dwelling interest is stated in subsection (2) or (3).
- (2) If the chargeable person is within the charge with respect to the single-dwelling interest on the first day of the chargeable period, the amount of tax charged is equal to the annual chargeable amount.

This is straightforward unless there is a change of ownership during the chargeable period.

#### 93.7.1 “Annual chargeable amount”

Section 99(4) FA 2013 now provides:

The annual chargeable amount for a single-dwelling interest and a chargeable period is determined in accordance with the following table, by reference to the taxable value of the interest on the relevant day.

<i>Annual chargeable amount</i>	<i>Taxable value of the interest on the relevant day</i>	
	<i>More than</i>	<i>but not more than</i>
£3,700	£500,000	£1 million
£7,500	£1 million	£2 million
£25,300	£2 million	£5 million
£59,100	£5 million	£10 million
£118,600	£10 million	£20 million
£237,400	£20 million	

Rather than charging a straightforward percentage of market value, ATED uses a banding system. The consequence is that:

- (1) The lower value properties in each range pay the highest rate of tax (computed as a proportion of property value).
- (2) Striking results as the value tips over to the next band:

- (a) Residential property worth £500k will not attract ATED, but if it is worth 1p more then ATED of £3.7k p/a is payable.
- (b) Residential property worth £2m will pay ATED of £7,500 p/a, but if it is worth 1p more the rate will be £25k; etc.

This may be pejoratively described as a “cliff-edge” system, but it does have the merit of avoiding the necessity for a more exact valuations.<sup>17</sup> In the early days of ATED, I thought banding was the better solution, despite the anomalies, but the subsequent increases in ATED rates have increased the unfairness. But there it is.

The unfairness at the margins might in theory be mitigated by planning: perhaps renovate the kitchen leaving work outstanding on the valuation date; the ATED saving may more than fund the renovation. But valuation is not an exact science.

### 93.7.2 *Indexation of ATED rates*

Section 101 FA 2013 provides for indexation:

- (1) If the consumer prices index for September in 2013 or any later year (“the later year”) is higher than it was for the previous September, section 99(4) applies in relation to chargeable periods beginning on or after 1 April in the year after the later year with the following amendments.
- (2) For each of the annual chargeable amounts stated in the table in section 99(4) (as it applies in relation to chargeable periods beginning in the previous 12 months) there is substituted the indexed amount.
- (3) “The indexed amount” is found by–
  - (a) increasing the previous amount by the same percentage increase as the percentage increase in the consumer prices index, and
  - (b) rounding down the result to the nearest multiple of £50.
- (4) In this section “consumer prices index” means the all items consumer prices index published by the Statistics Board.
- (5) The Treasury must, before 1 April 2014 and before each subsequent 1 April, make an order stating the amounts that by virtue of this section are to be the annual chargeable amounts for chargeable periods

---

17 Unlike SDLT, where valuations are not usually needed. So for SDLT, the banding system (abolished for residential property but still in force for non-residential property) has no practical advantage to set against the unfairness.

beginning on or after that date.

Indexation is by reference to CPI, not RPI.<sup>18</sup>

### 93.8 Change of ownership

It is necessary to consider the position of the previous owner and the new owner (for convenience here called vendor and purchaser, though the rules do not require a sale).

#### 93.8.1 *Position of purchaser*

The rule is commonsense expressed in a complex way.

The starting point is s.99(3) FA 2013. One needs to read (3) with (2) to follow the sense:

(2) If the chargeable person is within the charge with respect to the single-dwelling interest on the first day of the chargeable period, the amount of tax charged is equal to the annual chargeable amount.

(3) Otherwise, the amount of tax charged is equal to the relevant fraction of the annual chargeable amount.

#### 93.8.2 *“Relevant day”*

The definition of relevant fraction uses the term relevant day.

Section 99(5) FA 2013 provides:

The “relevant day” is ...

(b) for the purposes of subsection (3), the first day in the chargeable period on which the chargeable person is within the charge with respect to the interest.

#### 93.8.3 *“Relevant fraction”*

Section 99(6) FA 2013 provides:

---

18 CPI and RPI are similar. The precise weight attached to individual items differs and the RPI includes items representing owner-occupier housing costs, such as mortgage interest and depreciation, which are excluded from the CPI. See <http://www.ons.gov.uk/ons/rel/cpi/cpi-rpi-basket/2012/index.html> Parliament decided about 2012 to use the CPI instead of the RPI, CPI is said to be a more appropriate measure of price levels, a more accurate reflection of consumer shopping patterns, and more consistent with international indices. It is the basis of the Bank of England’s inflation target.

The relevant fraction is  $(N \div Y)$  where—

“N” is the number of days from (and including) the relevant day to the end of the chargeable period;

“Y” is the number of days in the chargeable period.

#### 93.8.4 *Relief for vendor*

The vendor is in the first instance charged for the entire chargeable period, even if there is a disposal during the period.

Section 106 FA 2013 provides the relief:

(1) Where

[a] tax is charged for a chargeable period with respect to a single-dwelling interest and

[b] the adjusted chargeable amount is greater than the initial charged amount,

the amount of tax charged is taken to be increased to the adjusted chargeable amount...

(3) Subsection (4) applies where—

(a) tax is charged for a chargeable period with respect to a single-dwelling interest,

(b) the adjusted chargeable amount is less than the initial charged amount, and

(c) a claim for relief is made under this subsection.

(4) The amount of tax charged for the period with respect to the interest is taken to be reduced (at the end of the chargeable period) to the adjusted chargeable amount.

(5) Relief under subsection (3) must be claimed—

(a) in an ATED return, or

(b) by amending an ATED return.

(6) The claim must be delivered by the end of the chargeable period following the one to which the claim relates.

(7) Relief under subsection (3) may be given by repayment of tax or otherwise.

#### 93.8.5 *“Initial charged amount”*

Section 106(2) FA 2013 provides:

In this section “the initial charged amount” means the amount of tax charged under section 99 for the period in respect of the interest.

### 93.8.6 *Adjusted chargeable amount*

Section 105 FA 2013 provides:

(1) In relation to a person on whom tax is charged for a chargeable period with respect to a single-dwelling interest, the “adjusted chargeable amount” is the total of the daily amounts for all the days in the period on which the chargeable person is within the charge with respect to the interest.

(2) The daily amount for any such day (“the actual day”) is—  
 $(1 \div Y) \times A$

That could be written more simply as  $(A \div Y)$

where—

“Y” is the number of days in the chargeable period;

“A” is the annual chargeable amount for the single-dwelling interest, determined (under section 99(4)) on the basis that the actual day is the relevant day.

### 93.9 Taxable value

Section 102(1) FA 2013 provides:

The taxable value of a single-dwelling interest on any day (“the relevant day”) is equal to its market value at the end of the latest day that—

- (a) falls on or before that day, and
- (b) is a valuation date in the case of that interest.

Valuation is on the “valuation date”.

#### 93.9.1 *Ascertaining market value*

CGT rules apply for determining market value. Section 98(8) FA 2013 provides:

For the purposes of this Part [Part 3 FA 2013, ATED] “market value” is to be determined as for the purposes of the TCGA 1992 (see, particularly, section 272 of that Act).

One is valuing the interest held by the chargeable person, not the land as such. The Residential Property Consultation Document provides:

2.32 Where there is a freehold interest and one or more subordinate leasehold interests in the same dwelling, and each is owned by

unconnected persons within the charge, each will need to value their distinct interest and each may be liable to the annual charge based on those valuations. So, for example, when a property is purchased on a lease but the freehold is owned by a separate company, then both the freehold and the leasehold will be valued and the annual charge applied separately to the freehold (if valued over £2 million) and the leasehold (if valued over £2 million if also owned by a non-natural person).

There is no deduction for a mortgage, as CGT principles apply: see s.26(3) TCGA:

An asset shall be treated as having been acquired free of any interest or right by way of security subsisting at the time of any acquisition of it, and as being disposed of free of any such interest or right subsisting at the time of the disposal...

It is considered that this rule is implied by applying CGT valuation principles.

The Residential Property Consultation Document provides:

2.44 ... ‘Market value’ will be defined in similar terms to the definitions used for capital gains tax, as described in the Royal Institution of Chartered Surveyors Valuation Standards UKGN3 and the VOA Guidance Manuals: <http://www.voa.gov.uk/>

### 93.9.2 “Valuation date”

Section 102 FA 2013 provides:

(2) Each of the following is a valuation date in the case of any single-dwelling interest—

(a) 1 April 2012;

(b) each 1 April falling 5 years, or a multiple of 5 years, after 1 April 2012.

(2A) But a day that is a valuation date only because of subsection (2)(b) (a “5-yearly valuation date”) is to be treated as if it were not a valuation date for the purpose of determining the taxable value of a single-dwelling interest on any day in the chargeable period beginning with that 5-yearly valuation date.

In short, we revalue every 5 years, so 1 April 2017 is now the valuation date.

### 93.9.3 Revaluation on disposal

Section 102 FA 2013 provides:

(3) The following are also valuation dates in the case of any single-dwelling interest to which a company is entitled on the relevant day (otherwise than as a member of a partnership)–

- (a) the effective date of any substantial acquisition by the company of a chargeable interest in or over the dwelling concerned;
- (b) the effective date of any substantial disposal of part (but not the whole) of the single-dwelling interest.

Section 102 FA 2013 provides equivalent rules for a corporate partnership and a CIS:

(4) The following are also valuation dates in the case of any single-dwelling interest to which a company is entitled on the relevant day as a member of a partnership–

- (a) the effective date of any substantial acquisition as a result of which a chargeable interest in or over the dwelling concerned became an asset of the partnership,
- (b) the effective date of any substantial disposal of part (but not the whole) of the single-dwelling interest.

(5) The following are also valuation dates in the case of any single-dwelling interest that is on the relevant day held for the purposes of a collective investment scheme–

- (a) the effective date of any substantial acquisition, made for the purposes of the scheme, of a chargeable interest in or over the dwelling concerned;
- (b) the effective date of any substantial disposal of part (but not the whole) of the single-dwelling interest.

#### 93.9.4 “Disposal” and “acquisition”

Section 102 FA 2013 provides:

(6) In this section references to a disposal of part of a single-dwelling interest include the grant of a chargeable interest out of the single-dwelling interest.

(7) The grant of an option does not count as the grant of a chargeable interest for the purposes of subsection (6).

### 93.10 Valuation for ATED

Valuation may be needed for ATED thresholds and banding.

### 93.10.1 *Valuation practice*

The Residential Property Consultation Document provides:

2.37 Property valuations for the annual charge will be self-assessed by the persons liable to the charge and submitted to HMRC as part of their annual charge tax return. HMRC will have powers to enquire into returns and also to make assessments so that non-compliance can be effectively challenged.

### 93.10.2 *Is expert valuation needed*

The Residential Property Consultation Document provides:

2.39 HMRC guidance will set out that a valuation provided to a taxpayer by a suitably qualified valuer of real estate would normally protect the taxpayer from possible penalties should it be subsequently established that their property has been significantly undervalued. A self valuation would bear a higher risk of not providing such protection.

That depends on the facts and will not be true in all cases.

2.40 Non-natural persons who believe they own a residential dwelling below, but in the region of, [the ATED threshold] may be liable to penalties if they fail to take proper care to establish a correct valuation on the appropriate date, and the property interest is in fact worth more than [the threshold]....

2.42 The valuation should provide a point valuation (i.e. a specific price).

There is no need for a point valuation, but it would help HMRC identify borderline cases, and is required for an HMRC pre-return banding check.

The property can then be placed within one of the banding structures in Table 2.A. ...

2.43 Valuations submitted to HMRC will be subject to checking by the Valuation Office Agency (VOA).

HMRC offer inconsistent advice on the issue of whether an independent valuation is needed:

3.49 HMRC will not routinely expect taxpayers to commission a professional valuation of their property, which may be expensive. It will

seek to use information it already possesses or can readily access to check a customer's declaration.

3.50 Just like for any other tax, the taxpayer must make an honest self appraisal of its liability, or lack of liability, and provide a reasonable valuation of the dwelling.

3.51 HMRC is not specifying any particular requirements for this: it is up to the taxpayer to decide what is appropriate in particular circumstances, taking into account when the property was bought and what comparisons can be made from local sales and purchases.

### 93.10.3 *HMRC valuation service*

HMRC say:

#### **Pre-return banding checks**

In certain circumstances, you can ask HMRC to carry out a check on your property details and valuation to see if you need to pay ATED. This is called having a 'pre-return banding check' (PRBC).

#### **When to ask for a PRBC**

Customers might want to contact HMRC where a property is valued at an amount close to one of the band thresholds. This is so they can agree which ATED band the property falls into, or whether it falls outside the tax as it is deemed to be under the ... threshold. This is called having a PRBC and is available to customers who meet the following:

- you are not due a relief that will reduce the ATED charge to nil
- the value you have placed on the property falls within 10 per cent of a banding threshold

If your property is valued between the thresholds shown below you may be able to apply for a PRBC using the form that will be available on the HMRC website from 1 June 2013.

When they receive your PRBC application form, HMRC will send you an acknowledgement and provide you with a reference number. They aim to provide a response to your application within 30 working days of receiving it.

HMRC will only confirm that they agree to the banding you propose, and not the specific valuation of the property. You can't use this confirmation for any other taxation purposes.

HMRC will either:

- agree that the band that you have chosen is appropriate based on the information you have provided
- ask for further information from you to help them make a decision

about whether you have chosen the correct band

- tell you that they don't agree with the valuation band you have chosen
- If you decide you need a PRBC, it's important that you apply at least 30 working days before the date on which you need to send your return - the earlier the better. This means HMRC can tell you their decision - particularly if they need more information before giving that decision - in time for you to use it when sending your return.

In some cases, the inside of the building might need to be inspected as part of the check. HMRC will normally be able to accept valuations prepared by a professional property valuer but they reserve the right to:

- enquire into any subsequent ATED returns
- challenge valuations included in those returns where they consider there is a risk that the return or valuation is wrong

### **What to do if you don't receive your PRBC in time**

If you didn't leave enough time for HMRC to give you a PRBC decision, or they have asked you for more information, you might not get their decision in time for the date you need to send your ATED return. If you think you might need to pay ATED then you should send the return along with the appropriate payment of tax. That way you can avoid accruing interest or becoming liable for a penalty for sending the return late.

You should base your ATED return on the banding you think is most appropriate. HMRC may decide to open an enquiry into your return to enable them to continue considering the appropriate banding for your property.

You must include your PRBC reference number on any return or correspondence that you sent to HMRC.

Remember that if you don't complete and send HMRC a return or payment, or you send it late or make a mistake on it, you may have to pay a penalty and interest.

If, after you've sent your return and payment, HMRC tells you that they don't agree with your valuation and you have underpaid, you should complete an amended return and send it, with the additional payment, as soon as you can.

Interest will be payable on any ATED paid late, but HMRC won't charge a penalty if you were waiting for a PRBC decision when your return was due.

If HMRC tells you that they don't agree with your valuation and you've overpaid then you need to send an amended return with a claim for repayment. HMRC will repay you any ATED you've overpaid, and you

might be able to claim interest.

**If you don't agree with HMRC's decision**

You should send your return based on your best estimate of the value of your property. HMRC may decide to open an enquiry into your return to enable them to look in more detail at the appropriate banding for your property.

Where you believe that your property is worth £2 million or less and that a return is not due, HMRC may issue a 'determination' to you based on the banding that they believe to be correct. A 'determination' is where HMRC makes a 'best estimate' of the ATED that you owe based on their valuation of your property and issues a demand for payment. You can appeal against this determination if you don't agree with it. You should include your PRBC reference number on any return or correspondence that you send to HMRC.<sup>19</sup>

The disadvantage of a PRBC may be a greater likelihood of a valuation dispute.

### 93.11 "Chargeable period"

This term matters because ATED is charged by reference to chargeable periods.

Section 94 FA 2013 provides:

- (3) The tax is charged for the chargeable period concerned...
- (8) The chargeable periods are—
  - (a) the period beginning with 1 April 2013 and ending with 31 March 2014, and
  - (b) each subsequent period of 12 months beginning with 1 April.

### 93.12 "Single-dwelling interest"

This term matters as ATED only applies if the chargeable interest is a single-dwelling interest.

#### 93.12.1 *The general rule*

Section 108 FA 2013 provides the general rule:

- (1) References in this Part [Part 3 FA 2013, ATED] to a "single-dwelling interest" are to be read in accordance with this section.

---

<sup>19</sup> <https://www.gov.uk/annual-tax-on-enveloped-dwellings-pre-return-banding-checks>

(2) A chargeable interest that is exclusively in or over land consisting (on any day) of a single dwelling is a single-dwelling interest (on that day).

Section 108 FA 2013 defines “in”:

(5) A single dwelling interest is referred to as a single-dwelling interest “in” the dwelling concerned.

(6) A single-dwelling interest in one dwelling is distinct from any single-dwelling interest in another dwelling, even if the dwellings stand successively on the same land.

Is this looking at the position if a building is knocked down and rebuilt?

### 93.12.2 *Interest in multiple dwellings*

Section 108(3) FA 2013 deals with a single interest in multiple dwellings:

Where a person is entitled to a chargeable interest that is exclusively in or over land consisting (on any day) of two or more single dwellings–

- (a) provisions referring to a “single-dwelling interest” operate as if the person had (on that day) a separate chargeable interest in or over each dwelling, and
- (b) the chargeable interest in or over each dwelling is therefore a single-dwelling interest.

This would arise in relation to flat management companies.<sup>20</sup>

### 93.12.3 *Interest in dwelling+ other land*

Section 108(4) FA 2013 deals with a single interest in a dwelling and other land (eg a farm or estate including one or more dwellings):

Where a person is entitled to a chargeable interest in or over land that on any day consists of one or more single dwellings and non-residential<sup>21</sup> land–

- (a) provisions referring to a “single-dwelling interest” operate as if the person had (on that day) a separate chargeable interest in or over each dwelling and a further separate chargeable interest in

---

<sup>20</sup> See 93.14.4 (Flat management company).

<sup>21</sup> Section 108(7) FA 2013 provides a commonsense definition of non-residential land: “In this section–  
(a) “non-residential land” means land that is not a dwelling or part of a dwelling;”

- or over the non-residential land, and  
 (b) the chargeable interest in or over each dwelling is therefore a single-dwelling interest.

#### 93.12.4 “Dwelling”

See App 2.19 (Dwelling/residential property).

Section 108(7) FA 2013 provides:

In this section ...

- (b) references to a dwelling include a part of a dwelling.

Unlike ATED-SDLT, ATED provides for the amalgamation of property interests in some circumstances so that a ‘dwelling’ for the purposes of ATED may encompass a number of single dwellings in a building or which stand in the same grounds, if there is private access between them.

### 93.13 Different interests in 1 dwelling

Section 109 FA 2013 provides:

(1) Subsection (2) applies if on one or more days in a chargeable period—

- (a) a company is entitled to two or more single-dwelling interests in the same dwelling, or  
 (b) two or more single-dwelling interests in the same dwelling are held for the purposes of the same collective investment scheme.

(2) This Part [Part 3 FA 2013, ATED] has effect with respect to that chargeable period as if those separate interests constituted just one single-dwelling interest, the taxable value of which on any day is the sum of the taxable values of the separate interests.

Why is this needed?

Section 109(3) FA 2013 deals with valuation of multiple interests:

In calculating the taxable values of the separate interests for the purposes of subsection (2), the market value of each interest is determined, under the provisions of TCGA 1992 applied by section 98(8), on the assumption that the other interest or interests are placed on the open market with that interest (on the valuation date appropriate to that interest).

### 93.14 Interests of connected person

The rule that the taxable value is the value of the interest held by the chargeable person would give rise for scope for tax planning by splitting interests and arranging them to be held by different persons.

Section 110(1) FA 2013 deals with this:

- (1) If on any day (“the relevant day”)
- [i] a company (“C”) is entitled to a single-dwelling interest in a dwelling and
  - [ii] another person (“P”) who is connected<sup>22</sup> with C is entitled to a different single-dwelling interest in the same dwelling, this Part [Part 3 FA 2013, ATED] has effect—
    - (a) in relation to C as if C were on that day entitled to P’s single-dwelling interest as well as C’s single-dwelling interest, and
    - (b) (if P is a company) in relation to P as if P were on that day entitled to C’s single-dwelling interest as well as P’s single-dwelling interest.

I refer to this as the “**aggregation rule**”.

See 93.6.3 (Joint owners).

#### 93.14.1 *Exemptions for individuals*

There are exceptions to the aggregation rule where P is an individual.

Prior to 2015, the position was simple. Section 110(2) FA provided:

*...Where P is an individual, C is not treated on the day in question as entitled to P’s single-dwelling interest unless on that day C is entitled to a single-dwelling interest in the dwelling that is a freehold or leasehold interest with a taxable value of more than £500,000.*

There are now two narrower exceptions.

Section 110(2) FA 2013 provides:

This subsection provides for an exception to subsection (1).

Where P is an individual, C is not treated as entitled to P’s single-dwelling interest on the relevant day unless on that day C is entitled to a single-dwelling interest in the dwelling that is a freehold or leasehold

---

22 See 93.2.4 (“Connected person”).

interest<sup>23</sup> with a taxable value of more than £250,000.

This disapplies the aggregation rule where C's interest is worth up to £250k.

Section 110 FA 2013 provides:

(2A) Subsection (2B) applies in any case where—

(a) C would (without subsection (2B)) be treated, as a result of subsection (1) (read with section 109),<sup>24</sup> as entitled to a single-dwelling interest with a taxable value (on the relevant day) of more than £2 million, but

(b) C would not be so treated if the value specified in subsection (2) were £500,000 (instead of £250,000).

(2B) Subsection (2) has effect as if the value specified in it were £500,000 (instead of £250,000).

This disapplies the aggregation rule where C's interest is worth up to £500k, but only if the aggregate of P and C's interests exceeds £2m. It is hard to make sense of that. EN FB 2015 says something different. First it correct summarises the pre-2015 rule:

4. The ATED legislation contains a rule which provides that where two or more chargeable interests are held in the same dwelling by connected persons, then those interests must be aggregated and ATED paid on the aggregate amount, where that amount falls within the ATED entry threshold. However, the legislation provides for an exception to this rule where the connected person is an individual. In this case the company's interest must be more than £500,000 for the aggregation rule to apply.

Then it explains the intention of subsections (2A) and (2B):

5. Following the lowering of the ATED entry threshold from properties valued at more than £2 million to properties valued at more than £500,000, an additional limit of £250,000 is introduced for interests valued up to £2 million. The changes have effect for chargeable periods beginning on or after 1 April 2015.

Perhaps that is how HMRC will apply the legislation in practice.

---

23 Section 110(7) FA 2013 provides the appropriate definitions of freehold and leasehold interests for land in Scotland.

24 See 93.13 (Different interests in 1 dwelling).

### 93.14.2 *Collective investment scheme*

Section 110 FA 2013 goes on to provide an aggregation rule for a CIS. This is not discussed here.

### 93.14.3 *Interaction with reliefs*

Section 111(1)(2) FA 2013 (in short) disapplies the aggregation rule where an interest is held by charities, public bodies, or qualifies for IHT conditional exemption. These specialist exemptions are not discussed here.

Section 111 FA 2013 continues:

(3) Subsection (4) applies where the separate interests (the “relevant interests”) that under section 110 (or that section and section 109) are treated as constituting, on a day, just one single-dwelling interest (“the combined interest”) include—

- (a) a freehold or leasehold interest,<sup>25</sup> and
- (b) a leasehold interest (“the inferior interest”) granted out of that interest.

(4) If the inferior interest is the most inferior relevant interest, the combined interest, and the dwelling itself (where relevant), are regarded for the purposes of the relevant relieving provisions as being exploited, on the day mentioned in subsection (3), in the way the inferior interest is exploited on that day.

(5) If the inferior interest is an interest in part only (“the sub-let part”) of the land that is the subject-matter of the combined interest, subsection (4) has effect in relation to the combined interest only so far as that interest relates to the sublet part.

(6) In this section “the relevant relieving provisions” means sections 132 to 150.

(7) The inferior interest counts as “the most inferior relevant interest” if no relevant interest (see subsection (3)) is a leasehold interest granted out of it.

In particular, in order to decide whether the property rental business

---

25 Subsection (8) provides: “In this section the reference to a leasehold interest includes the interest of a lessee under an agreement for a lease.” Subsection (9) provides the appropriate definitions of freehold/leasehold/agreement for a lease, for land in Scotland.

exemption applies,<sup>26</sup> one must look at whether the inferior interest is being exploited in a property business (not the company's interest).

#### 93.14.4 *Flat management company*

A common arrangement is that:

- (1) A flat management company owns the freehold (or superior lease) of a block of flats.
- (2) The tenants (who hold long leases of the flats) own the company and are directors.

The company would be within ATED (even without the aggregation rule) if its interest was above the ATED minimum threshold. But that would not arise for a normal flat management company. One looks at the value for each individual dwelling, not the total value of the interest.<sup>27</sup>

The company would be within ATED if:

- (1) the aggregation rule applies to aggregate the value of the company's interest and that of the tenants or some of them and
- (2) the aggregate value exceeds the ATED minimum threshold.

The issue is whether the tenants are connected with the company. This subdivides.

A tenant is connected with the company if they personally have control over the company owner but in practice that would not be the case for a flat management company.

A tenant is connected with the company if the tenant and persons connected with them has control of the company. That could happen (eg in a block of 3 flats of which 2 are held by relatives) but in practice it would be rare, for a flat management company.

Tenants are connected with the company if they act together to exercise control of the company but HMRC say this is not normally the case.<sup>28</sup>

If the company's interest exceeded the ATED band, the last question would be whether the property rental business exemption would apply. This depends on use by the tenant, not use by the company, and in practice

---

26 See 93.18.3 (Relief for property business).

27 See 93.12.2 (Interest in multiple dwellings).

28 See 99.15.8 (Acting together to control).

exemption would not generally apply.<sup>29</sup>

As CIOT note, whatever may be the purpose of ATED, it is not to catch flat management companies. If, exceptionally, cases are caught, I expect the point will be overlooked or ignored by noncompliant taxpayers, and HMRC may not spot it or turn a blind eye.

## 93.15 Partnerships

### 93.15.1 ATED treatment of partnership

Section 167(2) FA 2013 provides:

This Part [Part 3 FA 2013, ATED] has effect as follows in relation to a partnership (for instance, a limited liability partnership formed as mentioned in subsection (1)(c)) that is itself capable of being entitled to, or of acquiring or disposing of, a chargeable interest—

An English partnership is not capable of being beneficially entitled to any interest. But this would apply to an LLP (which the drafter had in mind with the words in brackets) and a Scots partnership.

Section 167(2) continues:

- (a) transactions entered into on behalf of the partnership are treated as entered into by or on behalf of the partners;
- (b) where the partnership is entitled to a single-dwelling interest, this Part has effect as if the partners were jointly entitled to the interest (and the partnership had no entitlement to it).

This makes partnerships transparent for ATED. It is the rough equivalent of the LLP provisions governing IT, CGT and IHT.<sup>30</sup>

- (3) For the purposes of this Part a partnership is treated as the same partnership despite a change in membership if any person who was a member before the change remains a member after the change.
- (4) For the purposes of this Part—
  - (a) a collective investment scheme is not regarded as a partnership, and
  - (b) accordingly, a member of a partnership by or on whose behalf a single-dwelling interest is held for the purposes of a collective

---

<sup>29</sup> See 93.14.3 (Interaction with reliefs).

<sup>30</sup> See 82.20 (Limited liability partnership); 97.33.3 (Situs of LLP).

investment scheme is not regarded as entitled to the interest as a member of the partnership.

### 93.15.2 *Administration*

Section 167 FA 2013 provides:

(5) Anything required or authorised by this Part [Part 3 FA 2013, ATED] to be done by or in relation to the responsible partners for a partnership may instead be done by or in relation to any representative partner or partners.

(6) A representative partner means a partner nominated by a majority of the partners to act as the representative of the partnership for the purposes of this Part of this Act.

(7) Any such nomination, or the revocation of such a nomination, has effect only after notice of the nomination, or revocation, has been given to an officer of Revenue and Customs.

## 93.16 Tax consequences of paying ATED

Where the property is owned by a company which is owned by a settlement, the payment of tax by a beneficiary could be a transfer of value for IHT but the normal expenditure exemption will often apply. Does it make the beneficiary a settlor? Probably not.<sup>31</sup>

Bringing funds into the UK to pay the ATED may be a taxable remittance of the funds.

### 93.16.1 *ATED deduction for CGT*

CIOT ask:

2.12 Where it is not possible to fall within a relief from ATED (for example due to the connection conditions and definition of non-qualifying persons), but nevertheless the property is used for business purposes (for example a property letting business) please can you confirm that the ATED would be deductible for corporation tax (or income tax in the case of a non-resident landlord company) purposes in computing the profits assessable to UK tax.

In principle a deduction should be available.

---

31 See 94.30 (Payment of admin expenses).

### 93.17 ATED reliefs

Section 132 FA 2013 provides:

(1) Subsection (2) applies where tax is charged, in respect of a single-dwelling interest, for a chargeable period that includes one or more days that are relievable as a result of any of the provisions listed in subsection (3) (or for more than one such period).

(2) For any such period, the adjusted chargeable amount is to be calculated on the basis that the chargeable person is not within the charge with respect to the interest on any relievable day.

Section 132(3) FA 2013 sets out 12 reliefs:

The provisions are—<sup>32</sup>

Topic	FA 2013	See para
Property rental business	s.133	93.18
Rental property: preparation for sale	s.134	
Dwellings opened to the public	s.137	
Property developers	s.138	
Property developers: exchange of dwellings	s.139	
Property traders	s.141	
Financial institution acquiring in course of lending	s.143	
Regulated home reversion plans	s.144A	
Occupation by employee/partner of qualifying trade/rental business	s.145	
Caretaker flat owned by management company	s.147A	
Farmhouses	s.148	93.20
Social housing	s.150	

The only reliefs discussed in this work are ATED rental relief and farmhouse relief

#### 93.17.1 DT relief

ATED is not a tax similar to IT or CGT, so it will not fall within DTAs in OECD Model form.

### 93.18 ATED rental relief

It is convenient to start with some definitions:

---

32 For clarity I have set this out in tabular form and use my own terminology, rather than a precise quote of the statute.

### 93.18.1 “Property rental business”

Section 133(4) FA 2013 puts (I think) a commonsense definition in convoluted drafting:

A business is a “property rental business” for the purposes of subsection (3) if it is a property business as defined in Chapter 2 of Part 4 of CTA 2009, but–

- (a) the question whether or not a business is a property rental business for the purposes of subsection (3) is determined without reference to whether or not any profits of the business are chargeable to corporation tax (and section 204(2) of CTA 2009 is therefore disregarded), and
- (b) for the purposes of this subsection the “rents or other receipts” referred to in section 207(1) of CTA 2009 are taken not to include excluded rents.

The definition incorporates the CTA 2009 definition with amendments.<sup>33</sup>

Para (a) makes sense: s.204(2) CTA 2009 would restrict the term to property business within the scope of corporation tax; that is disapplied, so the ATED definition extends to a property business of a non-resident company, which falls within the scope of income tax.

One disregards “excluded rents”. Section 133(6) FA 2013 provides:

In this Part [Part 3 FA 2013, ATED] “excluded rents” means rents within any of classes 2 to 6 in the table in section 605(2) of CTA 2010.

So we turn to s.605(2) CTA 2010:

- Class 2 Rent in respect of an electric-line wayleave.
- Class 3 Rent in respect of the siting of a pipeline for gas.
- Class 4 Rent in respect of the siting of a pipeline for oil.
- Class 5 Rent in respect of the siting of a mast or similar structure designed for use in a mobile telephone network or other system of electronic communication.
- Class 6 Rent in respect of the siting of a wind turbine.

I would be grateful for any reader who could suggest why this is needed.

### 93.18.2 “Qualifying” rental business

---

33 For that definition, see 23.2 (“Property business”: Terminology).

Section 133(3) FA 2013 provides:

In this Part “qualifying property rental business” means a property rental business that is run on a commercial basis and with a view to profit.<sup>34</sup>

### 93.18.3 *Relief for property business*

Armed with these definitions, we can turn to the relief. Section 133(1) FA 2013 provides:

A day in a chargeable period is relievably in relation to a single-dwelling interest if on that day the interest—

- (a) is being exploited as a source of rents or other receipts (other than excluded rents) in the course of a qualifying property rental business carried on by a person entitled to the interest, or
- (b) steps are being taken to secure that the interest will, without undue delay, be so exploited in the course of a qualifying property rental business that is being carried on, or is to be carried on, by a person entitled to the interest.

I refer to this as “**ATED rental relief**”.

### 93.18.4 *Property for sale or conversion*

The relief in s.133(1) would not apply if the property is for sale or being converted. Section 134(1) FA 2013 provides a further relief:

A day (“day X”) on which a person (“P”) is entitled to a single-dwelling interest is relievably in relation to that interest if—

- (a) on day X the dwelling is unoccupied and any of the first to fourth conditions is met (see below),

I refer to “**rental relief conditions 1-4**”

- (b) day X is preceded by one or more days (“qualifying days”) that are relievably under section 133 in relation to the interest and on which P, or a relevant partner,<sup>35</sup> was entitled to the interest, and

---

34 See App 5.1 (Commercial basis/view to profit).

35 Defined in s.134(3) FA 2013: “relevant partner”, where P is (on day X) entitled to the interest as a member of a partnership, means a person who was at the time in question carrying on the qualifying rental property business concerned as a member of that partnership.

- (c) the days (if any) between day X and the last of the qualifying days to precede day X are all relievable under this section.

### 93.18.5 *Rental relief conditions*

Section 134(1) FA 2013 continues:

*First condition* [property for sale]

The first condition is that steps are being taken to secure that the interest will be sold without undue delay.

*Second condition* [demolition]

The second condition is that–

- (a) steps are being taken to secure that the dwelling will be demolished without undue delay, and
- (b) if it is intended that a new dwelling will be constructed on the site of the existing dwelling, the intention is that it will be used in a relievable way.

*Third condition* [conversion]

The third condition is that–

- (a) steps are being taken to secure that the dwelling will be converted into a different dwelling without undue delay, and
- (b) it is intended that the new dwelling will be used in a relievable way.

*Fourth condition* [conversion]

The fourth condition is that steps are being taken to secure that the dwelling will be converted into a building other than a dwelling without undue delay.

(2) A dwelling is “used in a relievable way” for the purposes of subsection (1) if the single-dwelling interest in question is exploited in such a way, or held in such a way and for such purposes, (or, as the case requires, the dwelling itself is exploited or used in such a way) that a day of such exploitation, ownership or use would be relievable under any of sections 133, 137, 145 and 148.

### 93.18.6 *“Without undue delay”*

Section 133(5) FA 2013 tries to define “undue delay”:

“In subsection (1)(b)

“without undue delay” means without delay except so far as delay is justified by commercial considerations or cannot be avoided.”

Since this definition (if it can be called such) only applies for s.133, it is

repeated verbatim in s.134(3).

#### 93.18.7 *Non-qualifying occupier*

Section 133(2) FA 2013 provides:

A day is not relievable by virtue of subsection (1) or section 134 in the case of a single-dwelling interest if on that day a non-qualifying individual is permitted to occupy the dwelling.

#### 93.18.8 *Disapplication of future relief*

Section 135 FA 2013 provides:

(1) Subsection (2) applies if on a day in a chargeable period (“the day of non-qualifying occupation”)–

(a) a single-dwelling interest to which a person (“the landlord”) is entitled is being exploited as mentioned in section 133(1)(a) or steps are being taken to secure that the interest will be so exploited, as mentioned in section 133(1)(b), and

(b) a non-qualifying individual is permitted to occupy the dwelling. If this condition is satisfied, s.135(2) disapplies rental property relief (in short) for the next 3 years:

(2) No subsequent day in that chargeable period, or in any of the subsequent 3 chargeable periods, that meets the continuity of ownership condition and would (in the absence of this subsection) be relievable by virtue of section 133(1)(b) is treated as relievable by virtue of that provision unless a day of qualifying use falls between that day and the day of non-qualifying occupation.

(3) A day meets the continuity of ownership condition if on that day—

(a) the landlord is entitled to the single-dwelling interest, or

(b) if the landlord carried on or (as the case requires) intended to carry on the property rental business in partnership, another member of the partnership is entitled to the interest.

#### 93.18.9 *Disapplication of past relief*

Section 135(4) FA 2013 provides:

Subsection (5) applies if a person who is a non-qualifying individual in relation to a single-dwelling interest occupies the dwelling on a day in a chargeable period (“the day of non-qualifying occupation”).

If that condition is satisfied, s.135 disapplies past relief for the present and

preceding year:

(5) An earlier day in that or the preceding chargeable period (“the earlier day”) is not relievable by virtue of section 133(1)(b) or 134 if a relevant person is entitled to the single-dwelling interest on that day.

(6) In subsection (5) “relevant person” means—

(a) a person who is entitled to the single-dwelling interest on the day of non-qualifying occupation, or

(b) if a person falling within paragraph (a) is or has been a member of a partnership whose members have at any time exploited the single-dwelling interest as a source of rents and receipts in a property rental business, any other member of that partnership.

(7) Subsection (5) does not apply in relation to the earlier day if a day that is relievable by virtue of section 133(1)(a) falls between that earlier day and the day of non-qualifying occupation.

(8) For the purposes of this section—

(a) “day of qualifying use”, in relation to a single-dwelling interest, means a day that is relievable in the case of the interest by virtue of section 133(1)(a);

(b) occupation of any part of a dwelling is regarded as occupation of the dwelling.

## **93.19 Non-qualifying individual**

### **93.19.1 “Non-qualifying individual”**

Section 136 FA 2013 provides about the widest definition that the drafter could devise:

(1) In sections 133 and 135 “non-qualifying individual”, in relation to a single-dwelling interest, means any of the following—

(a) an individual who is entitled to the interest (otherwise than as a member of a partnership),

(b) an individual (“a connected person”) who is connected with a person entitled to the interest,

(c) if a person is entitled to the interest as a member of a partnership, an individual who is, or is connected with, a qualifying member of that partnership,

(d) an individual (“a relevant settlor”) who is the settlor in relation

- to a settlement<sup>36</sup> of which a trustee<sup>37</sup> is (in the capacity of trustee) connected with a person who is entitled to the interest,
- (e) the spouse or civil partner
    - [i] of a connected person or
    - [ii] of a relevant settlor,
  - (f) [i] a relative<sup>38</sup>
    - [A] of a connected person or
    - [B] of a relevant settlor,
  - [ii] or the spouse or civil partner
    - [A] of a relative of a connected person or
    - [B] of a relevant settlor,

Thus an uncle or aunt of T is not a connected person; but they are non-qualifying individuals because they are “relatives” (defined to include brother or sister) of a connected person (the parent of T). But the nephew or niece of T is a qualifying individual, as they are not “relatives” (as defined) of any connected person.

- (g) a relative of the spouse or civil partner of a connected person or of a relevant settlor,
- (h) the spouse or civil partner of a person falling within paragraph (g), or
- (i) an individual who is
  - [i] a major participant in a relevant collective investment scheme or
  - [ii] is connected with a major participant in a relevant collective investment scheme.

### 93.19.2 *Supplemental definitions*

Section 136 FA 2013 provides supplemental definitions:

- (2) In subsection 1(c) “qualifying member”, in relation to a partnership, means an member of the partnership who is entitled to a 50% or greater

---

36 Defined by reference in s.136(7) FA 2013: In this section ... “settlement” and “settlor” have the same meaning as in Chapter 5 of Part 5 of ITTOIA 2005 (see section 620 of that Act).

37 Defined by reference in s.136(8): In subsection 1(d) “trustee” is to be read in accordance with section 1123(3) of CTA 2010 (“connected persons”: supplementary).

38 Defined in s.136(7): (7) In this section ... “relative” means brother, sister, ancestor or lineal descendant.

share—

- (a) in the income profits of the partnership, or
- (b) in the partnership’s assets.

(3) In subsection (1)(i) “relevant collective investment scheme”, in relation to a single-dwelling interest, means a collective investment scheme that meets the ownership condition with respect to the interest.

(4) A person who participates in a collective investment scheme is a “major participant” in the scheme if the person—

- (a) is entitled to a share of at least 50% either of all the profits or income arising from the scheme or of any profits or income arising from the scheme that may be distributed to participants, or
- (b) would in the event of the winding up of the scheme be entitled to 50% or more of the assets of the scheme that would then be available for distribution among the participants.

(5) The reference in subsection (4)(a) to profits or income arising from the scheme is to profits or income arising from the acquisition, holding, management or disposal of the property subject to the scheme.

Lastly, s.136(6) tinkers with the usual definition of “connected person”:

For the purpose of subsection (1), section 1122 of CTA 2010 (as applied by section 172)<sup>39</sup> has effect as if subsections (7) and (8) of that section (application of rules about connected persons to partnerships) were omitted.

## 93.20 Farmhouses

Section 148 FA 2013 provides:

- (1) This section applies where on a day in a chargeable period—
  - (a) a dwelling (“the farmhouse”) forms part of land occupied for the purposes of a qualifying trade<sup>40</sup> of farming,<sup>41</sup> and

---

39 See 93.2.4 (“Connected person”).

40 Defined in s.148(3) FA 2013: A trade of farming is a “qualifying trade of farming” only if it is carried on—

- (a) on a commercial basis, and
- (b) with a view to profit.

41 Defined in s.148(4) FA 2013: In this section—

“farming” has the same meaning as in the Corporation Tax Acts (see section 1125 of CTA 2010), except that in this section “farming” includes market gardening;

- (b) a person carrying on the trade is entitled to, or connected with a person who is entitled to, a single-dwelling interest in the farmhouse.
- (2) That day is relievable in relation to the single-dwelling interest if on that day the farmhouse is occupied—
  - (a) by a farm worker who occupies<sup>42</sup> it for the purposes of the trade, or
  - (b) by a former long-serving farm worker, or the surviving spouse or civil partner of a former farm worker.

This is different from the IHT agricultural property relief rules.

### 93.20.1 “Farm worker”

Farm worker is defined in s.149 FA 2013:

- (1) An individual is a “farm worker” in relation to the qualifying trade of farming mentioned in section 148(1) at any time when the individual has a substantial involvement in—
  - (a) the day-to-day work of the trade, or
  - (b) the direction and control of the conduct of the trade.

### 93.20.2 Former farm worker

Former long-serving farm worker is elaborately defined in s.149 FA 2013:

- (2) Where section 148 applies, an individual occupying the farmhouse on the day mentioned in section 148(1) is a “former long-serving farm worker” if the individual had, before that day, been a farm worker in relation to the qualifying trade of farming for—
  - (a) a qualifying period of 3 or more years, or
  - (b) qualifying periods together amounting to 3 or more years within a 5 year period.
- (3) In subsection (2) “qualifying period” means a period throughout which—
  - (a) the individual occupied the farmhouse for the purposes of the trade,
  - (b) the land of which the farmhouse forms part was occupied for the

---

“market gardening” has the same meaning as in the Corporation Tax Acts (see section 1125(5) of CTA 2010).

42 Defined in s.149(4) FA 2013: “A person occupying part of a dwelling is regarded as occupying the dwelling for the purposes of this section and section 148.”

- purposes of the trade,
- (c) the trade was carried on by—
    - (i) a person who is entitled to the single-dwelling interest in the farmhouse on the day mentioned in section 148(1), or
    - (ii) a person connected with such a person, and
  - (d) a person who is entitled to the single-dwelling interest in the farmhouse on the day mentioned in section 148(1) was entitled to that interest.

### 93.21 “Chargeable”, “within the charge”

Section 170 FA 2013 provides:

- (1) Any day on which the conditions in section 94(2) are met with respect to a single-dwelling interest is a “chargeable day” for that interest;
- (2) Where a day is a chargeable day as a result of subsection (1), the chargeable person is “within the charge” with respect to a single-dwelling interest on that day.

### 93.22 ATED returns

Returns are governed by the Annual Tax on Enveloped Dwellings (Returns) Regulations 2013, which is not considered here.

### 93.23 SDLT: Introduction

A full discussion of SDLT would require many volumes. A brief outline is needed in order to see ATED-SDLT in its context.

#### 93.23.1 *Charge to SDLT*

Section 42 FA 2003 provides the charge to SDLT:

- (1) A tax (to be known as “stamp duty land tax”) shall be charged in accordance with this Part on land transactions.
- (2) The tax is chargeable—
  - (a) whether or not there is any instrument effecting the transaction,
  - (b) if there is such an instrument, whether or not it is executed in the UK, and
  - (c) whether or not any party to the transaction is present, or resident, in the UK.

#### 93.23.2 “*Land transaction*”

Section 43(1) FA 2003 provides:

In this Part a “land transaction” means any acquisition of a chargeable interest.

93.23.3 “Chargeable transaction”

Section 49(1) FA 2003 provides:

A land transaction is a chargeable transaction if it is not a transaction that is exempt from charge.

**93.24 Ordinary SDLT rates**

93.24.1 Residential property

Section 55 FA 2003 sets out the usual SDLT rates:

(1) The amount of tax chargeable in respect of a chargeable transaction to which this section applies is determined in accordance with subsections (1B) and (1C).

(1A) This section applies to any chargeable transaction other than a transaction to which paragraph 3 of Schedule 4A or step 4 of section 74(1A) (higher rate for certain transactions) applies.

(1B) If the transaction is not one of a number of linked transactions, the amount of tax chargeable is determined as follows—

*Step 1*

Apply the rates specified in the second column of the appropriate table below to the parts of the relevant consideration specified in the first column of the appropriate table.

The “appropriate table” is—

- (a) Table A, if the relevant land consists entirely of residential property, and
- (b) Table B, if the relevant land consists of or includes land that is not residential property.

*Step 2*

Add together the amounts calculated at Step 1 (if there are two or more such amounts).

**Table A: Residential**

<i>Relevant consideration</i>	<i>Percentage</i>
So much as does not exceed £125,000	0%
So much as exceeds £125,000 but does not exceed £250,000	2%
So much as exceeds £250,000 but does not exceed £925,000	5%

So much as exceeds £925,000 but does not exceed £1,500,000	10%
The remainder (if any)	12%

### 93.24.2 *Non-residential property*

We are not concerned with non-residential property in this chapter, but for completeness, s.55 FA 2003 provides:

**Table B: Non-residential or mixed**

<i>Relevant consideration</i>	<i>Percentage</i>
So much as does not exceed £150,000	0%
So much as exceeds £150,000 but does not exceed £250,000	2%
The remainder (if any)	5%

### 93.24.3 “*Relevant land/consideration*”

Section 55(3) FA 2003 provides:

For the purposes of subsection (1B)

- (a) the relevant land is the land an interest in which is the main subject-matter of the transaction, and
- (b) the relevant consideration is the chargeable consideration for the transaction.

### 93.24.4 “*Chargeable consideration*”

Para 1(1) sch 4 FA 2003 defines “chargeable consideration”:

The chargeable consideration for a transaction is, except as otherwise expressly provided, any consideration in money or money’s worth given for the subject-matter of the transaction, directly or indirectly, by the purchaser or a person connected<sup>43</sup> with him.

See App 4.2 (Consideration).

## 93.25 ATED-SDLT rate

ATED-SDLT overrides the rates set out above. Para 3 sch 4A FA 2003 provides:

- (1) Where this paragraph applies to a chargeable transaction—
  - (a) the amount of tax chargeable in respect of the transaction is

---

43 Defined para 1(2) sch 4 FA 2003: “Section 1122 of the CTA 2010 (connected persons) applies for the purposes of sub-paragraph (1).”

15% of the chargeable consideration for the transaction ...

- (2) This paragraph applies to a chargeable transaction if—
- (a) the transaction is a high-value residential transaction, and
  - (b) the condition in sub-paragraph (3) is met.

### 93.26 “High-value” transaction

There is the usual cascade of definitions.

#### 93.26.1 *Appurtenant rights*

First para 1(1) sch 4A FA 2003 provides a commonsense definition:

In this paragraph “interest in a single dwelling” means so much of the subject-matter of a chargeable transaction as consists of a chargeable interest in or over a single dwelling (together with appurtenant rights).

“Appurtenant rights” are aggregated with the dwelling so:

- (1) Their value is taken into account in determining whether market value passes the SDLT threshold.
- (2) Appurtenant rights are charged at ATED-SDLT.

Para 9 sch 4A FA 2003 provides a commonsense definition:

In this Schedule—

“appurtenant rights”, in relation to a chargeable interest that is, or is part of, the subject-matter of a transaction, means any rights or interests appurtenant or pertaining to the chargeable interest that are acquired with it.

Where will one draw the limit of gardens and grounds? CGT private residence cases may be helpful, though without the limit to the “permitted area” of (in short) half a hectare.

#### 93.26.2 *“Higher threshold interest”*

Para 1(2) sch 4A FA 2003 defines “higher threshold interest”:

An interest in a single dwelling is a higher threshold interest for the purposes of this Schedule if chargeable consideration of more than £500,000 is attributable<sup>44</sup> to that interest.

---

44 The drafter attempts to define “attributable” in para 9 sch 4A FA 2003: “attributable” means attributable on a just and reasonable basis.

### 93.26.3 *High-value residential transaction*

Para 2 sch 4A FA 2003 defines “high-value residential transaction”:

- (1) Sub-paragraphs (2) to (8) apply to a chargeable transaction whose subject-matter consists of or includes a higher threshold interest.
- (2) If the main subject-matter of the transaction consists entirely of higher threshold interests, the transaction is a high-value residential transaction for the purposes of paragraph 3.

In 2013, when the ATED threshold was £2m, the expression “high-value” residential transaction was apt. Now it is reduced to £500k it is no longer apt. When discussing the statutory provision, it may be easier to continue to apply the statutory terminology, but scare quotation marks would be appropriate.

### 93.27 **Co. purchaser (non-natural person)**

ATED-SDLT applies if the condition in para 3(3) sch 4A FA 2003 is satisfied. This provides:

The condition is that—

- (a) the purchaser is a company,
- (b) the acquisition is made by or on behalf of the members of a partnership one or more of whose members is a company, or
- (c) the acquisition is made for the purposes of a collective investment scheme.

I refer to the condition in para 3(3) as the “**ATED-SDLT corporate purchaser condition**”.

HMRC appear to have anticipated that the corporate purchaser condition may not be well drafted. Para 3(10) sch 4A FA 2003 provides power to amend by statutory instrument:

The Treasury may by order amend this paragraph for the purpose of limiting the circumstances in which the condition in subparagraph (3) is to be treated as met.

#### 93.27.1 *Joint purchasers*

Para 3(5) sch 4A FA 2003 deals with joint purchasers:

If there are two or more purchasers acting jointly, the condition in

sub-paragraph (3) [the corporate purchaser condition] is treated as met if it is met in relation to at least one of those purchasers.

This is not fair, but the provision is intended to be penal.

## 93.28 Trusts

### 93.28.1 *Trustee purchaser*

Para 3(4) sch 4A FA 2003 excludes corporate trustees:

References in sub-paragraph (3) [corporate purchaser condition] to a company do not include a company acting in its capacity as trustee of a settlement.

This is needed as SDLT does not have the IT/CGT rule that trustees are deemed to be separate persons.<sup>45</sup>

### 93.28.2 *Beneficiary purchaser*

A purchaser of an equitable interest may be caught by ATED-SDLT as they may acquire a chargeable interest.

### 93.28.3 *Bare trust*

Para 3(8) sch 4A FA 2003 provides:

For the purposes of sub-paragraph (3), paragraph 3 of Schedule 16 (bare trustees) applies as if sub-paragraphs (2) and (3) of that paragraph were omitted.

To follow this one needs to set out para 3 sch 16, amended as para 3(8) directs:

(1) Subject to sub-paragraph (2), where a person acquires a chargeable interest or an interest in a partnership as bare trustee, this Part applies as if the interest were vested in, and the acts of the trustee in relation to it were the acts of, the person or persons for whom he is trustee.

~~(2) Sub-paragraph (1) does not apply in relation to the grant of a lease.~~

~~(3) Where a lease is granted to a person as bare trustee, he is treated for the purposes of this Part, as it applies in relation to the grant of the lease, as purchaser of the whole of the interest acquired.~~

(4) Where a lease is granted by a person as bare trustee, he is to be

---

<sup>45</sup> See 6.3 (Trustees a distinct person).

treated for the purposes of this Part, as it applies in relation to the grant of the lease, as vendor of the whole of the interest disposed of.

Para 3(1) is the commonsense rule that a bare trust is transparent for SDLT.

The exception in para 3(2)(3) is to block an avoidance scheme under which a rack rent lease was granted to a nominee of the vendor, and then assigned for no value to the tenant.

Para 3(2)(3) sch 16 FA 2003 is excluded for ATED because otherwise a company purchaser might avoid the ATED-SDLT rate by arranging for the vendor to grant a lease to a non-corporate nominee for the purchaser.<sup>46</sup>

The reason for the exception in para 3(4) is unclear but as the charge is paid by the purchaser, not the vendor, it may not matter.

### 93.29 Linked transactions

Para 4 sch 4A FA 2003 provides:

- (1) Sub-paragraphs (2) and (3) apply if—
  - (a) the subject-matter of a chargeable transaction includes a chargeable interest in or over a dwelling,
  - (b) one or more land transactions, the subject-matter of each of which includes a chargeable interest in or over the dwelling, are linked to that chargeable transaction, and
  - (c) the total consideration attributable to the interests mentioned in paragraphs (a) and (b) (and to any appurtenant rights, but disregarding any rent) is more than £500,000.
- (2) Each of those chargeable interests is treated as a higher threshold interest for the purposes of this Schedule.
- (3) If the condition in paragraph 3(3) is met in the case of the transaction mentioned in sub-paragraph (1)(a), it is also treated as met in the case of each transaction mentioned in sub-paragraph (1)(b) that is a chargeable transaction.

### 93.30 ATED-SDLT reliefs

ATED-SDLT has the following reliefs:

Letting, trading or redeveloping properties: para 5

Dwelling available to the public: para 5B

---

<sup>46</sup> I am grateful to Justin Bryant for his comments on this provision.

Financial institutions acquiring dwellings in course of lending: para 5C  
Dwellings for occupation by employees/partners: para 5D  
Farmhouses: para 5F

### 93.31 SDLT on winding up company

In the course of winding up a company holding a UK residence, the company (acting by its liquidator) will normally transfer the property to the shareholders. I refer to this as the “**transfer on liquidation**”. This section considers whether the transfer is subject to SDLT.

A transfer on liquidation is a land transaction.

The transfer on liquidation is a chargeable transaction.

The amount of SDLT depends on the amount of the chargeable consideration. If there is no chargeable consideration there is no SDLT. A transfer on liquidation is in principle not made for consideration, and so is in principle not subject to SDLT.<sup>47</sup>

#### 93.31.1 *Transfer to co. shareholder*

Further consideration is needed when the transferee is a company.

Section 53 FA 2003 provides:

(1) This section applies where the purchaser [ie, transferor] is a company and—

(a) the vendor is connected with the purchaser...

(1A) The chargeable consideration for the transaction shall be taken to be not less than—

(a) the market value of the subject-matter of the transaction as at the effective date of the transaction...

However in the case of a transfer on liquidation, s.54 FA 2003 will normally provide relief:

(1) Section 53 (chargeable consideration: transaction with connected company) does not apply in the following cases.

In the following provisions “the company” means the company that is the purchaser in relation to the transaction in question...

Where the transfer is to a corporate trustee, relief is in principle available under case 2:

---

47 See App 4.2.5 (Transfer on liquidation).

- (3) Case 2 is where—
- (a) immediately after the transaction the company holds the property as trustee, and
  - (b) the vendor is connected with the company only because of section 1122(6) of the Corporation Tax Act 2010.<sup>48</sup>

If case 2 does not apply (ie if the company purchaser is not a trustee) relief is in principle available under case 3:

- (4) Case 3 is where—
- (a) the vendor is a company and the transaction is, or is part of, a distribution of the assets of that company (whether or not in connection with its winding up), and
  - (b) it is not the case that—
    - (i) the subject-matter of the transaction, or
    - (ii) an interest from which that interest is derived,
 has, within the period of three years immediately preceding the effective date of the transaction, been the subject of a transaction in respect of which group relief was claimed by the vendor.

It is possible to envisage circumstances where relief does not apply, but that will rarely happen in practice.

### 93.32 Company in liquidation owes debt

Suppose the company owes a debt. This typically arises if the company has borrowed to purchase the property and owes money to a bank. The company cannot transfer the property to the shareholders and simply leave the debt outstanding, at least if the debt is to non-shareholders.

Para 8(1) sch 4 FA 2003 provides:

- Where the chargeable consideration for a land transaction consists in whole or in part of—
- (a) the satisfaction or release of debt<sup>49</sup> due to the purchaser or owed by the vendor, or

---

<sup>48</sup> See 99.14 (Connected: Trustees).

<sup>49</sup> Para 8(3) sch 4 FA 2003 provides a commonsense definition: “In this paragraph—  
 (a) “debt” means an obligation, whether certain or contingent, to pay a sum of money either immediately or at a future date”.

(b) the assumption of existing debt<sup>50</sup> by the purchaser, the amount<sup>51</sup> of debt satisfied, released or assumed shall be taken to be the whole or, as the case may be, part of the chargeable consideration for the transaction.

This applies only if the release or assumption of the debt is consideration for the transaction. The point is that the consideration for SDLT purposes is deemed to be the face value of the debt (the amount owed), instead of its market value (which may be less).

Para 8(2) sch 4 FA 2003 provides a cap on the charge:

If the effect of this paragraph would be that the amount of the chargeable consideration for the transaction exceeded the market value of the subject-matter of the transaction, the amount of the chargeable consideration is treated as limited to that value.

Thus there is a SDLT charge if there is an arrangement under which the shareholders undertake to pay (in the statutory terminology, assume) the company's debt, in consideration for the transfer. In contract law terminology, the arrangement is known as a novation. The charge is on the lower of the amount of the debt and the market value of the land.

Para 8(1A) sch 4 FA 2003 provides:

Where—

- (a) debt is secured on the subject-matter of a land transaction immediately before and immediately after the transaction, and
- (b) the rights or liabilities in relation to that debt of any party to the transaction are changed as a result of or in connection with the transaction,

then for the purposes of this paragraph there is an assumption of that debt by the purchaser, and that assumption of debt constitutes chargeable consideration for the transaction.

- 
- 50 Para 8(3) sch 4 FA 2003 provides a commonsense definition: "In this paragraph ... (b) "existing debt", in relation to a transaction, means debt created or arising before the effective date of, and otherwise than in connection with, the transaction".
- 51 Para 8(3) sch 4 FA 2003 provides a commonsense definition: "In this paragraph ... (c) references to the amount of a debt are to the principal amount payable or, as the case may be, the total of the principal amounts payable, together with the amount of any interest that has accrued due on or before the effective date of the transaction."

This will not apply if the debt is unsecured, before or after the transaction.

### 93.32.1 *Joint vendors/purchasers*

Para 8 continues with provisions dealing with apportionment in the case of joint vendors or joint purchasers. This is less likely to arise but I cover it for completeness:

- (1B) Where in a case in which sub-paragraph (1)(b) applies—
- (a) the debt assumed is or includes debt secured on the property forming the subject-matter of the transaction, and
  - (b) immediately before the transaction
    - [i] there were two or more persons each holding an undivided share of that property, or
    - [ii] there are two or more such persons immediately afterwards,

the amount of secured debt assumed shall be determined as if the amount of that debt owed by each of those persons at a given time were the proportion of it corresponding to his undivided share of the property at that time.

(1C) For the purposes of sub-paragraph (1B), in England and Wales and Northern Ireland each joint tenant of property is treated as holding an equal undivided share of it.

The SDLT Manual comments on the apportionment provisions:

**SDLTM04040A Assumption or release of a debt: Examples** [Nov 2019]

#### **Example 1**

A property is transferred by V into the ownership of V and P in equal shares subject to a subsisting mortgage.

P assumes liability for all or part of the debt.

Notwithstanding P's actual liability, which is probably for all of the debt, P is treated as assuming debt equal to 50% of the amount owing. This is because he is treated as owing none before the transaction and 50% after it.

#### **Example 2**

A property is owned by V and P in 70:30 shares.

It is transferred to the sole ownership of P subject to a subsisting mortgage.

Assuming V is released from the debt or P agrees to indemnify V there is an assumption of debt by P.

P is treated as assuming debt equal to 70% of the amount owing.  
This is because P is treated as owing 30% before the transfer and 100% after it.

### 93.32.2 *Company debt to shareholders*

Suppose the company owes a debt to its shareholders. This typically arises if the shareholders have lent funds to purchase the property.

The SDLT Manual provides:

**SDLTM04043 Transfer of property on winding up - loan from shareowners** [Nov 2019]

... We would not seek to argue that the dividend in specie should bear SDLT in a situation for example where A owns the shares of B Ltd. A lends money to the company to buy property, the loan being secured by mortgage on the property.

Later B Ltd is wound up and there is a transfer to A as beneficial owner of the equity. That is the reason for the Transfer. The loan is not released etc, but obviously the mortgage will be taken off as the lender also owns the property because of the liquidation.

Clearly (?) in this scenario A has not assumed any liability or given any other form of consideration.

The position does not seem so clear to me, but HMRC do not take the point.

### 93.32.3 *Co. debt to non-shareholders*

The SDLT Manual continues:

**SDLTM04042 SDLT on de-enveloping transactions** [Feb 2020]

...However, where there is a third party (non-shareholder) loan secured on the property when the company is liquidated, the transfer of the property by the company on a distribution will attract SDLT under paragraphs 1 and 8 of Schedule 4 FA 2003 where there is an assumption by the shareholder(s) of liability for the debt. ...

Suppose:

- (1) Shareholders subscribe for new share capital.
- (2) The company uses the proceeds of the share subscription to repay the debt.
- (3) The company is put into liquidation.

This is not caught by para 8(1) as the satisfaction of the debt is not consideration for the land transaction; it is not caught by para 8(1A) as the debt will not be secured at the time of the transaction. The question is whether it is caught by s.75A FA 2003 (anti-avoidance).

### 93.33 Section 75A: Anti-avoidance

#### 93.33.1 *Basic requirements*

Section 75A(1) FA 2003 sets out the basic requirements:

This section applies where—

- (a) [i] one person (V) disposes of a chargeable interest and  
[ii] another person (P) acquires either it or a chargeable interest deriving from it,
- (b) a number of transactions (including the disposal and acquisition) are involved in connection with the disposal and acquisition (“the scheme transactions”), and
- (c) the sum of the amounts of stamp duty land tax payable in respect of the scheme transactions is less than the amount that would be payable on a notional land transaction effecting the acquisition of V’s chargeable interest by P on its disposal by V.

In *Project Blue v HMRC*:

It is clear from (i) subsection (1)(a), which refers to P acquiring either V’s chargeable interest “or a chargeable interest deriving from it”, and (ii) subsection (3)(a), which refers to “the acquisition by P of a lease deriving from a freehold owned *or formerly owned* by V” (emphasis added), that the section may operate not only when P acquires the chargeable interest directly from V but also when P acquires a chargeable interest, such as a lease, which is derived from a chargeable interest which V formerly owned. Thus the section can cover a series of transactions by which V disposes of its chargeable interest which comes to be acquired by another person and P ultimately acquires a chargeable interest derived from it from that other person.<sup>52</sup>

#### 93.33.2 “*Transaction*”

Section 75A(2) FA 2003 provides just about the widest definition the

---

52 [2018] UKSC 30 at [45].

author could devise:

In subsection (1) “transaction” includes, in particular—

- (a) a non-land transaction,
- (b) an agreement, offer or undertaking not to take specified action,
- (c) any kind of arrangement whether or not it could otherwise be described as a transaction, and
- (d) a transaction which takes place after the acquisition by P of the chargeable interest.

### 93.33.3 “Scheme transaction”

Scheme transactions are the transactions (including the disposal and acquisition) “involved in connection with the disposal and acquisition”.

Section 75A(3) FA 2003 provides:

The scheme transactions may include, for example—

- (a) the acquisition by P of a lease deriving from a freehold owned or formerly owned by V;
- (b) a sub-sale to a third person;
- (c) the grant of a lease to a third person subject to a right to terminate;
- (d) the exercise of a right to terminate a lease or to take some other action;
- (e) an agreement not to exercise a right to terminate a lease or to take some other action;
- (f) the variation of a right to terminate a lease or to take some other action.

In *Project Blue v HMRC* in the Upper Tribunal:

The scheme transactions are not necessarily confined to those transactions which took place between the disposal by V and the acquisition by P. Paragraphs (b) and (c) of section 75A(3) plainly contemplate that the scheme transactions can involve persons in addition to V and P. Section 75A(2)(d) shows that a transaction which takes place after the acquisition by P can be relevant; this is subject to the other parts of section 75A and 75B which require that a scheme transaction is “involved in connection with” the acquisition. Section 75B(3)(c) shows that a transaction for the purposes of funding an

acquisition can be part of the scheme.<sup>53</sup>

The first-tier tribunal made some general comments on the phrase “in connection with”<sup>54</sup> and said:

250. ... in section 75A the phrase “in connection with” is deliberately used in conjunction with the word “involved.” In our view, the word “involved” must be intended to qualify the phrase “in connection with.” The word “involved” denotes some form of participation (i.e. involvement). Thus, a transaction which is part of a series of transactions will not be “involved” with other transactions simply because it is part of a series or sequence of successive conveyancing transactions. The linkage must be more than merely being a party in a chain of transactions and the test must be more than a “but for” test (or, as the classicists would put, it a sine qua non test) otherwise the word “involved” would be deprived of significant meaning.<sup>55</sup>

### 93.34 Notional land transaction

Section 75A(4) FA 2003 provides:

Where this section applies—

- (a) any of the scheme transactions which is a land transaction shall be disregarded for the purposes of this Part, but
- (b) there shall be a notional land transaction for the purposes of this Part effecting the acquisition of V’s chargeable interest by P on its disposal by V.

Section 75C(10) FA 2003 provides:

Stamp duty land tax paid in respect of a land transaction which is to be disregarded by virtue of section 75A(4)(a) is taken to have been paid in respect of the notional transaction by virtue of section 75A(4)(b).

#### 93.34.1 *Notional consideration*

Section 75A(5) FA 2003 defines the notional chargeable consideration:

The chargeable consideration on the notional transaction mentioned in

---

53 [2014] UKUT 564 (TCC) at [64].

54 See App 2.6.2 (In connection with).

55 [2013] UKFTT 378 (TC).

subsections (1)(c) and (4)(b) is the largest amount<sup>56</sup> (or aggregate amount)—

- (a) given by or on behalf of any one person by way of consideration for the scheme transactions, or
- (b) received by or on behalf of V (or a person connected with V within the meaning of section 1122 of the Corporation Tax Act 2010) by way of consideration for the scheme transactions.

### 93.34.2 *Notional effective date*

Section 75A(6) FA 2003 defines the effective date:

The effective date of the notional transaction is—

- (a) the last date of completion for the scheme transactions, or
- (b) if earlier, the last date on which a contract in respect of the scheme transactions is substantially performed.

### 93.34.3 *Incidental transactions*

Section 75B(1) FA 2003 provides a relief for incidental transactions:

In calculating the chargeable consideration on the notional transaction for the purposes of section 75A(5), consideration for a transaction shall be ignored if or in so far as the transaction is merely incidental to the transfer of the chargeable interest from V to P.

This overlaps with the definition of scheme transaction, as if a transaction is merely incidental, then it may not be involved in connection with the disposal and acquisition (within the meaning of the section).

“Incidental” is undefinable, but s.75B FA 2003 seeks to define it. Section 75B(2) FA 2003 identifies some non-incidental transactions:

A transaction is not incidental to the transfer<sup>57</sup> of the chargeable interest from V to P—

- (a) if or in so far as it forms part of a process, or series of transactions, by which the transfer is effected,

---

56 Section 75C(9) FA 2003 provides: “For the purposes of section 75A a reference to an amount of consideration includes a reference to the value of consideration given as money’s worth.”

57 Section 75B(6) FA 2003 defines transfer: “In this section a reference to the transfer of a chargeable interest from V to P includes a reference to a disposal by V of an interest acquired by P.”

- (b) if the transfer of the chargeable interest is conditional on the completion of the transaction, or
- (c) if it is of a kind specified in section 75A(3).<sup>58</sup>

Section 75B(3) FA 2003 then suggests some incidental transactions:

A transaction may, in particular, be incidental if or in so far as it is undertaken only for a purpose relating to—

- (a) the construction of a building on property to which the chargeable interest relates,
  - (b) the sale or supply of anything other than land, or
  - (c) a loan to P secured by a mortgage, or any other provision of finance to enable P, or another person, to pay for part of a process, or series of transactions, by which the chargeable interest transfers from V to P.
- (4) In subsection (3)—
- (a) paragraph (a) is subject to subsection (2)(a) to (c),
  - (b) paragraph (b) is subject to subsection (2)(a) and (c), and
  - (c) paragraph (c) is subject to subsection (2)(a) to (c).

This only goes so far as to say that the transaction *may* be incidental, though one may infer that the transaction would be incidental unless there are some special circumstances.

Section 75B(5) FA 2003 deals with cases of partial relief:

The exclusion required by subsection (1) shall be effected by way of just and reasonable apportionment if necessary.

#### 93.34.4 *Transfer of securities*

Section 75C(1) FA 2003 provides:

A transfer of shares or securities shall be ignored for the purposes of section 75A if but for this subsection it would be the first of a series of scheme transactions.

#### 93.34.5 *Reliefs and other interactions*

Section 75C FA 2003 provides:

(2) The notional transaction under section 75A attracts any relief under this Part which it would attract if it were an actual transaction (subject

---

<sup>58</sup> See 93.33.2 (“Transaction”).

to the terms and restrictions of the relief).

(3) The notional transaction under section 75A is a land transaction entered into for the purposes of or in connection with the transfer of an undertaking or part for the purposes of paragraphs 7 and 8 of Schedule 7, if any of the scheme transactions is entered into for the purposes of or in connection with the transfer of the undertaking or part.

(4) In the application of section 75A(5) no account shall be taken of any amount paid by way of consideration in respect of a transaction to which any of sections 60, 61, 63, 64, 65, 66, 67, 69, 71, and 74, or a provision of Schedule 6A or 8, applies.

These provisions are not relevant here. They concern:

<b>Section</b>	<b>Topic</b>
s.60, 61	Compulsory purchase/Compliance with planning obligations
s.63, 64	Demutualisation of insurance company/building society
s.65	Incorporation of LLP
s.66, 67	Public bodies/parliamentary constituencies
s.69, 71	National Bodies/Registered social landlords
s.74	Collective rights of tenants of flats

(5) In the application of section 75A(5) an amount given or received partly in respect of the chargeable interest acquired by P and partly in respect of another chargeable interest shall be subjected to just and reasonable apportionment.

(6) Section 53 applies to the notional transaction under section 75A.<sup>59</sup>

(7) Paragraph 5 of Schedule 4 [exchanges] applies to the notional transaction under section 75A.

(8) For the purposes of section 75A—

- (a) an interest in a property-investment partnership (within the meaning of paragraph 14 of Schedule 15) is a chargeable interest in so far as it concerns land owned by the partnership,<sup>60</sup>

(8A) Nothing in Part 3 of Schedule 15 [transactions involving partnerships] applies to the notional transaction under section 75A.

Section 75A(7) FA 2003 provides:

This section does not apply where subsection (1)(c)<sup>61</sup> is satisfied only by

---

59 See 93.31.1 (Transfer to co. shareholder).

60 Subsection 8(b) has been repealed.

61 See 93.33.1 (Basic requirements).

reason of—

- (a) sections 71A to 73, or
- (b) a provision of Schedule 9.

These exceptions are not relevant here. They concern:  
 71A-73: Alternative property finance (Sharia finance)  
 sch 9: Tenants right to buy and similar transactions

### 93.34.6 *Avoidance not required*

The SDLT Manual provides:

**SDLTM09175 Section 75A FA 2003, Overall approach** [Nov 2019]

Section 75A is an anti-avoidance provision. HMRC therefore takes the view that it applies only where there is avoidance of tax.

This view does not bear much examination, as the Supreme Court observed:

The heading of the section, “Anti-avoidance”, is the only indication in the section which could support [the taxpayer’s] contention. The heading is relevant to assist an understanding as to the mischief which the provision addresses, but it says nothing as to the motives of the parties to the scheme transactions. There is nothing in the body of the section which expressly or inferentially refers to motivation. The provision was enacted to counter tax avoidance which resulted from the use of a number of transactions to effect the disposal and acquisition of a chargeable interest. It is sufficient for the operation of the section that tax avoidance, in the sense of a reduced liability or no liability to SDLT, resulted from the series of transactions which the parties put in place, whatever their motive for transacting in that manner. This is clear (?) from subsection (1)(c) which compares the amount of SDLT payable in respect of the actual transactions against what would be payable under the notional land transaction in section 75A(4), by which P acquired V’s chargeable interest on its disposal by V.<sup>62</sup>

The Manual will need to be rewritten.

### 93.34.7 *Application on liquidation*

The SDLT Manual provides:

---

<sup>62</sup> *Project Blue v HMRC* [2018] UKSC 30 at [42].

**SDLTM04042 SDLT on de-enveloping transactions** [Feb 2020]

... There may be situations where a company had a third party debt that has been repaid as a result of shareholder action (either through the subscription for more issued share capital or by replacing the third party debt with shareholder debt), prior to its liquidation. In such cases it is possible that on distribution of the property there will be no charge to SDLT as it will be a distribution in similar circumstances to the first two situations outlined above.

However, section 75A FA 2003 could apply where the shareholder of a company provides funds to the company to allow it to discharge its debt, before acquiring the property from the company if those actions are involved in connection with that disposal or acquisition. Whether section 75A applies will depend on the facts of each case.

There will be cases where discharging the debt has not occurred as part of the arrangements for the transfer of the property from the company to the shareholders. Equally, there will be cases where the discharge of the debt was one of a number of transactions involved in connection with the disposal and acquisition of the property.

... In a straightforward de-enveloping situation, the company should be 'V' and the shareholder(s) 'P'. ...

CIOT say:

2.2 In our view, the capitalisation of debt should not comprise a 'scheme transaction' for the purposes of Section 75A. Ownership of shares is clearly a pre-requisite to distributing the property out by way of liquidation but this could be by virtue of its existing shareholding. There is no need for the capitalisation to establish the shareholding necessary for the distribution. The capitalisation will clearly be a step in the transfer of the property, but it does not affect the nature or interest of the property which is being transferred on the liquidation.

2.3 We therefore do not believe that Section 75A should apply, since the capitalisation is not a scheme transaction and consequently the only transaction which takes place is the real transaction, namely the transfer of the property from the company to the individual or trustee.<sup>63</sup>

---

63 CIOT, "Removing barriers to de-enveloping residential property" (Jun 2016). [https://www.tax.org.uk/system/files\\_force/file\\_uploads/160621%20De-enveloping%20joint%20submission%20FINAL.pdf?download=1](https://www.tax.org.uk/system/files_force/file_uploads/160621%20De-enveloping%20joint%20submission%20FINAL.pdf?download=1)

### 93.35 Charities and ATED taxes

A charitable trust does not fall within ATED as it is not a “non-natural” person. A charitable company would fall within ATED. Relief is available under s.151 FA 2013.<sup>64</sup>

Similarly a charity purchaser should not be subject to ATED-SDLT, as the usual charity SDLT exemption should apply.

### 93.36 ATED in Scotland\Wales

ATED applies to a chargeable interest, defined as an interest in land in the UK, so it applies in Scotland and Wales.

Section 80I Scotland Act 1998 provides:

- (1) A tax charged on any of the following transactions is a devolved tax—
- (a) the acquisition of an estate, interest, right or power in or over land in Scotland;
  - (b) the acquisition of the benefit of an obligation, restriction or condition affecting the value of any such estate, interest, right or power.<sup>65</sup>

ATED is not a tax charged on acquisition, so it is not a devolved tax. By contrast, LBTT/LTT (the Scots/Welsh equivalents of SDLT) are devolved taxes. If the object of ATED is the prevention of avoidance of SDLT/LBTT/LTT, then ATED ought to be a devolved tax also. Perhaps no-one noticed, or cared, or perhaps it was thought too difficult. Perhaps a UK-wide tax was thought to be simpler; but simplicity is not compatible with devolution.

### 93.37 De-enveloping

Where a property is held in a company, the question is whether to wind up or retain.

*Advantages of retention:* In return for paying ATED, a shareholder may have the advantages of being able to sell the company rather than the land:

---

64 See Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (14<sup>th</sup> ed, 2019/20), para 39.14 (Annual Tax on enveloped dwellings) online version <https://www.taxationofcharities.co.uk>

65 See s. 15 Wales Act 2014 for the Welsh equivalent.

- (1) SDLT advantage of being able selling shares in the company free of SDLT. It takes between 4 and 30 years for ATED to equal the SDLT on a non-corporate sale, about 15 years on average;<sup>66</sup> but ATED is payable sooner and will be index-linked (at least). It will not be cost-effective to continue to pay ATED, just for the SDLT saving, unless a fairly prompt sale of the company is expected.
- (2) A purchaser who will be within ATED (in short, intending to use the property as a home) may prefer to purchase the property, not the company or may want a discount to reflect the disadvantages of holding through a company. On the other hand, a purchaser for investment, who can qualify for ATED rental relief,<sup>67</sup> and who is prepared to undertake corporate due diligence, is likely to prefer to purchase the company.

### 93.38 Methods of de-enveloping

This section considers some methods of de-enveloping where (as is common) the house is held in a company held in a trust made by a foreign domiciled settlor. Diagrammatically:

In the following discussion:

The “**house value**” is the market value of the house.

The “**2015 rebased gain**” is the gain allowing for 2015 rebasing.

The “**house gain**” is the gain on the disposal of the house: the amount by which the house has risen in value since acquisition.

The “**company share value**” is the market value of the company shares. This is likely to be less than the value of the house (the company’s asset).<sup>68</sup>

It is assumed (to avoid having to cover some less likely permutations)

---

66 See 93.7 (Rates of ATED).

67 See 93.18 (ATED rental relief).

68 See 78.20 (Co holds residence: valuation).

that:

- (1) There is at least some house gain. (At the higher end of the market this may not be the case).
- (2) The trust has no trust gains (other than those which accrue on disposals discussed below) and no trust losses.
- (3) The beneficiary is UK resident.
- (4) The settlor was not UK domiciled when the trust was made.

SDLT issues are discussed elsewhere; see 93.31 (SDLT on winding up company).

### 93.38.1 *Trust winds up co*

One straightforward proposal is:

- (1) the trustees wind up the company and
- (2) the trustees transfer the house to a beneficiary.<sup>69</sup>

The tax implications of the trustees winding up the company are:

- (1) A gain (the 2015 rebased gain) will accrue to the company on the disposal of the house. That gain will be subject to corporation tax.
- (2) A gain will accrue to the trustees on the disposal of the shares, on the liquidation (“the trustee shareholder gain”)
  - (a) The gain is computed by reference to the value of what the trustees receive (the house less the CT charge paid by the company)
  - (b) This gain will be a s.1(3) amount (trust gain).

The tax implications of the trustees transferring the house to the beneficiary will be:

- (1) The transfer will be a capital payment.
  - (a) The amount of the capital payment is equal to the value of what the beneficiary receives (which may be the house less the CT charge).
  - (b) The capital payment will be matched to trust gains so there will be a s.87 charge.

---

<sup>69</sup> There could be two transfers: (1) the liquidator transfers the house to the trustees (2) the trustees transfer the house to the beneficiary. In practice the trustees may direct the liquidator to transfer the house directly to the beneficiary, but that is just a matter of conveyancing.

- (c) The capital payment will not qualify for the remittance basis as the benefit is received in the UK.
- (2) There may also be a small IHT exit charge.<sup>70</sup>

### 93.38.2 *Trust transfers co to beneficiary*

Another straightforward proposal is:

- (1) The trustees transfer the shares in the company to the beneficiary.
- (2) The beneficiary winds up the company.

The tax implications of the transfer of the company shares from the trust to the beneficiary will be:

- (1) A gain will accrue to the trustees on the disposal of the shares, on the transfer (“the trustee shareholder’s gain”).
  - (a) This gain is computed by reference to the market value of the shares (which will be less than the house value, to reflect the drawbacks of corporate ownership).
  - (b) This gain will be a s.1(3) amount (trust gain).
  - (c) This gain will not be immediately charged to tax.
- (2) The transfer of the shares to the beneficiary will be a capital payment.
  - (a) The amount of the capital payment will be equal to the market value of the shares.
  - (b) The capital payment will be matched to the trust gains.
  - (c) If the beneficiary is a remittance basis taxpayer, the s.87 charge will in the first instance qualify for the remittance basis as the benefit is received outside the UK.
- (3) There may be a small IHT exit charge.

The tax implications of the beneficiary winding up the company are:

- (1) A gain (the 2015 rebased gain) will accrue to the company on the disposal of the house. That gain will be subject to corporation tax.
- (2) A gain may accrue to the individual on the disposal of the shares, on the liquidation (“the liquidation gain”).
  - (a) The liquidation gain will not qualify for the remittance basis as the proceeds of the liquidation are received in the UK.
  - (b) The amount of the liquidation gain will in principle be small, or

---

<sup>70</sup> See 72.9.2 (Excluded property time apportionment).

nil, as the shares are acquired at market value.<sup>71</sup>

- (3) If the remittance basis applied to the capital payment, it now comes into charge, as the beneficiary receives the benefit (the house) in the UK.

The trustee shareholders gain could qualify for hold-over relief, in which case there would be no trust gain to match to the capital payment, but that is matched by a larger gain on the liquidation.

An option may be to transfer the property to a non-resident beneficiary, if there is someone suitable, but the onward gift rules would need consideration.

### 93.38.3 *Non-tax aspects of unwinding*

The beneficiary who acquires the property will need to review their will, as the property will pass under the will rather than under the terms of the settlement. A new UK-law will may be needed for this purpose.

## 93.39 ATED regime: Critique

ATED and ATED-SDLT share rules and objectives; they should be evaluated together.

### 93.39.1 *Number of homes held by co*

It is relevant to consider how many homes are currently held by companies within ATED. In summary, for 2018/19 the figures are<sup>72</sup>

Properties held by companies				ATED
Property band	no properties	% of total	ATED rate	receipts £m
£500k-£1m	1880	30%	£3k	6
£1m-£2m	1860 <sup>73</sup>	29%	£7k	12
£2m – £5m	1660	26%	£25k	37
£5m – £10m	590	9%	£59k	31

71 If there is a gain, company distribution relief avoids a double CGT charge (on the liquidation gain and the s.3 gain); see 60.21 (s.3 distribution relief).

72 HMRC, “ATED Statistics 2018/19” (Mar 2020)  
<https://www.gov.uk/government/statistics/uk-ated-statistics>

73 In 2015, I guessed that “the number of properties under £2m may not be large (was it worth using a company for relatively small value properties?) and the yield is likely to be limited.”

£10m - £20m	200	3%	£118k	21
£20m -	<u>150</u>	<u>2%</u>	£237k	<u>32</u>
Total	<u>6340</u>	<u>100%</u>		<u>139</u>

**Relief declarations**

Rental relief	15260
Development relief	2730
Other reliefs	<u>1690</u>
Total	<u>19670</u>

I noted in 2015 that “One would expect the figure to diminish as in many cases the companies would be unwound if possible” and that has proved to be correct. There may be additional cases of accidental or deliberate non-notification, though how many is a matter of speculation.

A consultation paper<sup>74</sup> gave the figure of properties registered in the names of foreign companies as “up to 100,000 titles”!<sup>75</sup> (The words “up to” are revealing.) But the number (whatever it actually was) will include non-residential property, and residential property held by

- (1) corporate trustees
- (2) nominees
- (3) diversely held entities (outside the scope of ATED)
- (4) sovereign bodies (outside the scope of taxation)

So the figure of properties registered in the names of foreign companies, whatever it may be, gives little if any indication of how many companies fall within ATED or the IHT residence-property code.

93.39.2 *Objections to ATED*

There are so many objections to ATED that it is hard to know where to begin.

*Reasonable to use companies to hold land:* There are non-tax reasons why

74 Department for Business Innovation & Skills, “Beneficial Ownership Transparency” (2016) para 44

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/512333/bis-16-161-beneficial-ownership-transparency.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/512333/bis-16-161-beneficial-ownership-transparency.pdf)

75 The statistic was misreported in the press as meaning that 100,000 (The Guardian), or “more than 100,000” (The FT), properties are owned by foreign companies. But that is just sloppy journalism.

it may be desired to hold a residence in a company.<sup>76</sup>

Most offshore trusts used foreign companies to hold land, as a matter of routine, regardless of tax, because of issues relating to:

- (1) Limited liability
- (2) Conflict of laws; the validity of a disposition of immovable property may but need not necessarily be determined by the law of the State where the property is situated.
- (3) Segregation of a trustees assets.

This is recognised in the relief given to companies holding non-UK properties.<sup>77</sup>

*Complexity and administrative burden:* ATED extends to 80 sections and 3 schedules. There are very few tax problems to which 100 pages of legislation is the best answer. The House of Lords Economic Affairs Committee agreed:

We share our witnesses' concern about whether the problem the legislation seeks to address justifies its length and complexity, particularly in view of the Government's commitment (!) to a simpler tax system. In line with our earlier recommendation on better consultation, we think that there were probably simpler and more effective ways of achieving the Government's objectives.<sup>78</sup>

*Uncertainty and instability:* There is firstly the uncertainties of the statutory rules, which contain about the same level of uncertainty as any

76 I think this is self-evident to practitioners. But this is confirmed (if that were necessary) by HMRC Research Report 384 "Views and behaviours in relation to ATED" (2015) section 5 (why are properties enveloped), citing privacy, foreign succession law, and asset protection among non-tax reasons for use of companies. [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/457946/HMRC\\_Research\\_Report\\_384\\_-\\_Views\\_and\\_behaviours\\_in\\_relation\\_to\\_the\\_Annual\\_Tax\\_on\\_Enveloped\\_Dwellings.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/457946/HMRC_Research_Report_384_-_Views_and_behaviours_in_relation_to_the_Annual_Tax_on_Enveloped_Dwellings.pdf)

77 See 79.28 (Foreign homes relief).

78 House of Lords Select Committee on Economic Affairs *The Draft Finance Bill 2013* (2013) para 213 <http://www.publications.parliament.uk/pa/ld201213/ldselect/ldeconaf/139/139.pdf> The passage concluded: "We recommend that the lessons from the development of these measures should be learned and applied to the design of future tax policies." But of course no-one took any notice of that.

other 100 pages of tax legislation.

The law is also unstable: In the 2013/14 edition I concluded:

Law enacted on this basis cannot be expected to be satisfactory and is not likely to be stable.

The prediction of instability was borne out by the FA 2014, the F(no.1)A 2015 and Summer Budget 2015. The instability of the law imposes imponderable choices on those wishing to purchase property or wondering what to do with existing structures.<sup>79</sup>

### 93.39.3 *ATED purpose at outset*

The Residential Property Consultation Response Document provides:

1.8 One of the sources of property tax avoidance ...is the way some people avoid the stamp duty the rest of the population pays including by using companies to buy expensive residential property.

1.9 To address this form of avoidance, and to ensure the owners of high value residential property pay their fair share of tax, the Chancellor announced a threefold approach [ATED, ATED-SDLT and the former ATED-CGT].

The reason for the introduction of the ATED regime in 2013 was to prevent SDLT avoidance by corporate ownership of land. No other object was mentioned.

While views on the priority of preventing avoidance may differ, it seems to me that very few of those who actually have to grapple with the provisions would consider SDLT saving an adequate benefit to set against the objections to the ATED regime outlined above.

In any event SDLT was not a major driver in the use of companies. The 2015 IHT residential property paper belatedly acknowledges that point:

19. Properties held in companies or other envelopes can be 'sold' by transferring the shares of that company. Such a transaction is not subject

---

79 This is self-evident to practitioners. But it is confirmed (if that were necessary) by HMRC Research Report 384 "Views and behaviours in relation to ATED" (2015) 8.7ff citing uncertainty as a reason for not unwinding corporate structures.  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/457946/HMRC\\_Research\\_Report\\_384\\_-\\_Views\\_and\\_behaviours\\_in\\_relation\\_to\\_the\\_Annual\\_Tax\\_on\\_Enveloped\\_Dwellings.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/457946/HMRC_Research_Report_384_-_Views_and_behaviours_in_relation_to_the_Annual_Tax_on_Enveloped_Dwellings.pdf)

to any SDLT. ATED was introduced in FA 2013 to ensure that people enveloping residential property in corporate vehicles pay a price for that privilege by a higher SDLT rate on entry into the corporate structure and ATED. ATED is targeted only at residential property held through a company where it is occupied rather than let out to an unconnected person. Properties let to unconnected parties qualify for relief and are therefore exempt from the ATED charge.

20. HMRC's research suggests that the most common reason for enveloping properties is IHT planning undertaken by non-doms.

HMRC research states what every practitioner knew.<sup>80</sup> It follows that the ATED regime was misconceived, insofar as it was aimed at SDLT planning or avoidance.<sup>81</sup>

In this context it is worth noting that the ATED regime was introduced in breach of the Tax Consultation Framework.<sup>82</sup> The ATED regime was the rabbit out of a hat approach to tax reform which the Tax Consultation Framework tried, not very successfully, to abolish.<sup>83</sup>

Readers may think it pointless to cry "foul" in a game which has no referee, and whose result has been declared. But I think the story deserves to be noted, not just as a lesson in how not to legislate, for which tax provides so many, but because this history supports the case that the case

80 This is confirmed (if that were necessary) by HMRC Research Report 384 "Views and behaviours in relation to ATED" (2015) para 5.18: "... avoiding SDLT was not often mentioned by agents as a main driver for enveloping a property" and citing an interviewee as saying (rightly) "the scale of the stamp duty avoidance was vastly exaggerated."

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/457946/HMRC\\_Research\\_Report\\_384\\_-\\_Views\\_and\\_behaviours\\_in\\_relation\\_to\\_the\\_Annual\\_Tax\\_on\\_Enveloped\\_Dwellings.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/457946/HMRC_Research_Report_384_-_Views_and_behaviours_in_relation_to_the_Annual_Tax_on_Enveloped_Dwellings.pdf)

81 One might infer from an absence of comment in the HMRC announcements that those who introduced the ATED regime were unaware of any IHT implications until they were pointed out in the consultation process. The chutzpah of the Residential Property Response Document deserves to be recorded:

"3.71 ...The likelihood that the measures would impact on non-domiciled individuals more than UK citizens was also raised as a concern.

**Government Response**

3.72 The Government has taken on board comments raised through this question."

82 See 1.12 (State of UK tax reform).

83 The ATED regime was also a breach of the promise of stability on foreign domicile taxation. See 1.11 (The promise of stability).

for ATED and ATED-SDLT needs to be thought through: there was no such thinking when it was introduced.

#### 93.39.4 *Role of ATED today*

The starting point is that ATED is not a tax of a conventional kind, but:

- (1) a penalty (the principal element in a set of penalties) for entering into certain arrangements or for not unwinding them; or
- (2) a charge for certain tax privileges (avoidance of SDLT, but perhaps not just that.)

This is not itself a criticism. It may be sensible to have such a charge and there are precedents.<sup>84</sup> But it does follow that an assessment of the ATED regime requires an analysis of the tax advantages and disadvantages of corporate ownership. These changed in 2015 (NRCGT) and again in 2017 (IHT residence-property code) so fresh assessment is needed.

The advantage today is a possible SDLT saving by a sale of the company rather than a sale of property. The advantage has increased following the 2015 increase of SDLT residential property rates.

“Possible” avoidance of SDLT raises the question: How much SDLT has been or would be avoided in this way? Back in 2013, not much.<sup>85</sup> Subsequent increases in SDLT residential property rates increase the benefit of this SDLT planning, perhaps to the point where it becomes attractive.

Assessing the advantage one has to allow for the fact that UK resident and domiciled purchasers (certainly the large majority by numbers) are likely to prefer to purchase the property, not the company.

The CGT saving by a sale of the company ceased to apply after the introduction of CGT on land-rich companies in 2019.

#### 93.39.5 *The way forward*

In the 2017/18 edition of this work I said:

---

84 In this respect ATED is like the pre-owned asset tax; see 80.39 (Critique).

One might say that ATED, despite its name, is not a tax at all. But the border between taxation and non-tax disincentives is fraught, and the general question whether ATED is correctly described as a tax is best avoided (except in contexts where the distinction makes a practical difference).

85 See 93.39.3 (ATED purpose at outset).

A rational reform would be as follows:

- (1) Abolish ATED-CGT and ATED-SDLT:<sup>86</sup> there is little point in extravagantly complex rules which (in short) only raise the marginal SDLT rate by 0%-3% and CGT by a slight increase in the method of computing the gain.
- (2) Make ATED avoidable by an election (irrevocable once made) that the company should be regarded as transparent for UK CGT and SDLT. The election out of the POA charge is a precedent.<sup>87</sup> That would allow the use of companies for non-tax reasons to continue. It avoids the unfairness that ATED is a fixed charge for potential tax advantages the benefit of which (if any) varies considerably from one case to another. It also allows effective unwinding of existing structures.
- (3) See ATED rates to broadly match the tax advantages of corporate status. This would result in an increase which compensates (or may more than compensate) for any loss of tax in points (1) and (2).

The result would, I think, be reasonably satisfactory and a considerable simplification on the current position. It could also avoid the need for the proposed residential non-excluded property rule, which is highly complex, and is likely to be unsuccessful, measuring success by amount of tax it may raise. An important question is why (or whether) the ATED regime should be restricted to residential property. The current rules possibly reflect an unexamined assumption that tax planning involving residential properties is more objectionable than other tax planning. Or perhaps the aim is an economic one: not to affect the commercial property market, while accepting, or perhaps welcoming, the effects on the residential property market. But this is speculation as the policy reasons have never been discussed.

If NRCGT were extended beyond non-residential property, an extension to the ATED regime (and abolition of many of its reliefs) would follow in consequence; that would be a further simplification (and increase in yield).

Of these four proposals, two require further comment.

The NRCGT response paper rejected point (1) (abolition of ATED-CGT):

5.14 ATED-related CGT addresses tax avoidance that occurs when companies are used to buy residential property (“enveloping”) in order to avoid paying the tax due. The extension of CGT to non-residents disposing of UK residential property is not about addressing avoidance but rather

---

86 A more radical reform would be the repeal of SDLT, in accordance with Mirrlees recommendations (“a strong contender for the UK’s worst-designed tax”) and replace it with a form of rates. See IFS Green Budget 2013 <http://www.ifs.org.uk/budgets/gb2013/gb2013.pdf>

87 See 80.33 (POA election). The US tick the box regime is another precedent. Double taxation aspects would need consideration but would not be insoluble.

rectifying an unfair system in which non-residents can make use of tax breaks<sup>88</sup> that are not available to UK residents.

5.15 The government believes that ATED-related CGT and the extension of CGT to non-residents address separate issues, and have separate policy rationale. Therefore, **the government is clear that to the extent a gain is ATED-related then ATED-related CGT should continue to apply at 28%**. The remaining part of the gain post 6 April 2015 will be subject to [NRCGT].

This decision comes at a heavy cost in terms of complexity. Readers who have worked through the interaction of NRCGT and ATED-CGT may well think this the most objectionable aspect of the entire ATED regime. The residential property consultation response contained one reference to simplicity, but in an incoherent sentence, from which one may infer that for the authors of the ATED regime, simplicity did not count for anything.<sup>89</sup>

But the position has changed now:

- (1) the IHT residence-property code has been introduced, and
- (2) CGT now applies to non-residents holding UK land<sup>90</sup>

The sensible course is abolition of ATED and ATED-SDLT. Though a better reform still would be to abolish the IHT residence-property code and set ATED rates to collect the IHT saved by use of companies.<sup>91</sup>

### 93.39.6 *A new unwinding relief*

The absence of relief for unwinding existing structures means that in many, perhaps most, cases, unwinding companies is prohibitively expensive. If an object of the reforms is to encourage winding up companies, that object has not been and will not be achieved. Instead the owners bear the brunt of ATED in an arbitrary and unfair way. The House

88 See App.1.9 (Loophole/tax break).

89 Response paper para 1.15: “the government has been mindful of the overarching objectives of this reform: fairness, sustainability and simplicity.” I suspect the sentence was cut and pasted from a paper on social care where “sustainability” is used to mean long-term affordability. It makes no sense in this context (unless perhaps it is intended to mean stability).

90 HMRC, “Taxing gains made by non-residents on UK immovable property: Consultation document” (Nov 2017)  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/661467/Taxing\\_gains\\_made\\_by\\_non-residents\\_on\\_UK\\_immovable\\_property\\_-\\_consultation.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/661467/Taxing_gains_made_by_non-residents_on_UK_immovable_property_-_consultation.pdf)

91 See 78.22.2 (Replace residence-code with ATED).

of Lords Economic Affairs Committee made this point:

We recommend that the Government should consider whether more could be done, possibly deferring the charge on any gain, to help those affected to de-envelope their properties without incurring high tax costs.<sup>92</sup>

The 2015 IHT residential property paper provided hope for optimism.<sup>93</sup> But the 2016 consultation paper rejected the idea:

At the 2015 Summer Budget, the government said that it would consider the cost associated with de-enveloping of properties. However, while the government can see there might be a case for encouraging de-enveloping, it does not think it would be appropriate to provide any incentive to encourage individuals to exit from their enveloped structures at this time.

**Question 9:** Are there any hard cases or unintended consequences that will arise as a result of there not being any tax relief for those who want to exit their enveloped structures?

The answer to question 9 seems to be that:

- (1) There are hard cases; but
- (2) They are not unintended.

### 93.40 SDLT non-resident surcharge

The background can be found in HMRC consultation papers:

SDLT: non-UK resident surcharge consultation (2019)

Non-UK Resident SDLT Surcharge Summary of Responses (2020) (“the

---

92 House of Lords Select Committee on Economic Affairs *The Draft Finance Bill 2013* (2013) para 196

<http://www.publications.parliament.uk/pa/ld201213/ldselect/ldeconaf/139/139.pdf>

93 “21. ... some non-doms and trusts may wish to remove the envelope and move into a simpler more straightforward structure outside the scope of future ATED charges, ATED reporting or ATED-related CGT. If the property is mortgaged or has increased in value since 2013 there may (?) however, be significant costs in de-enveloping.

22. The government will consider the costs associated with de-enveloping and any other concerns stakeholders may have during the course of the consultation regarding de-enveloping.”

surcharge response paper”)<sup>94</sup>

The surcharge response paper provides:

4.6 The government does not propose altering the application of the surcharge in relation to collective enfranchisement arrangements or first-time buyers’ relief.<sup>95</sup>

4.7 Changing the rules to exempt purchasers where first-time buyers’ relief is claimed would place additional pressures on HMRC to establish if an individual benefitting from relief plans to use the property as his/her main residence. All first-time buyers will be able to benefit from a refund of the surcharge under the refund rules set out above.

The term surcharge was used in the consultation and response papers, but the FA chose the more anodyne term “additional rate”.

### 93.41 Non-resident surcharge

Section 75ZA FA 2003 provides:

(1) In its application for the purpose of determining the amount of tax chargeable in respect of a chargeable transaction that is a non-resident transaction, this Part has effect as if 2% were added to each rate specified in the rate-specifying provisions.

(2) The “rate-specifying provisions” are—

- (a) in section 55(1B), Table A;
- (b) in Schedule 4ZA, in paragraph 1(2), Table A;
- (c) in Schedule 4A, paragraph 3(1)(a);
- (d) in Schedule 5, in paragraph 2(3), Table A;
- (e) in Schedule 6ZA, in paragraph 4, Table A;
- (f) in section 74(1A), Step 4.

SDLT reliefs such as group relief and charities relief<sup>96</sup> will in principle

---

94 <https://www.gov.uk/government/consultations/stamp-duty-land-tax-non-uk-resident-surcharge-consultation>

95 The surcharge consultation paper at 5.4 states: Non-UK residents who meet the criteria for first time buyers’ relief (FTBR) will pay the surcharge at 1% on the chargeable consideration between £0 - £300,000 and 6% (5% + the 1% surcharge) on any portion between £300,000 - £500,000. (The proposed 1% surcharge rate has become 2%).

96 See Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12th ed., 2019/20), para 39.7.3 (Non-residents surcharge).  
online version <https://www.taxationofcharities.co.uk>

apply.

### 93.42 “Non-resident transaction”

Para 2 sch 9A FA 2003 provides:

(1) A chargeable transaction is a “non-resident transaction” for the purposes of this Part of this Act if—

A set of 4 conditions follows.

#### 93.42.1 *Non-resident purchaser*

Para 2 sch 9A FA 2003 provides:

(1) A chargeable transaction is a “non-resident transaction” for the purposes of this Part of this Act if—

(a) the purchaser is, or (if there is more than one) the purchasers include, a person who is non-resident in relation to the transaction

#### 93.42.2 *Major interest in dwelling*

Para 2 sch 9A FA 2003 provides:

(1) A chargeable transaction is a “non-resident transaction” for the purposes of this Part of this Act if ...

- (b) the main subject-matter of the transaction consists of—
- (i) a major interest in one or more dwellings, or
  - (ii) a major interest in one or more dwellings and other property,
- (c) that major interest, at the beginning of the effective date of the transaction, is not a term of years absolute or leasehold estate that has 7 years or less to run

Para 2(2) sch 9A FA 2003 provides:

A reference in sub-paragraph (1)(b) or (c) to a major interest in a dwelling includes an undivided share in a major interest in a dwelling.

#### 93.42.3 *De minimis test*

Para 2 sch 9A FA 2003 provides:

(1) A chargeable transaction is a “non-resident transaction” for the purposes of this Part of this Act if ...

(d) the de minimis threshold is exceeded.

The threshold is set low:

(3) For the purposes of sub-paragraph (1)(d), the de minimis threshold is exceeded if—

- (a) in a case in which the chargeable consideration for the transaction does not consist of or include rent, the chargeable consideration for the transaction is £40,000 or more;
- (b) in a case in which the chargeable consideration for the transaction consists of or includes rent—
  - (i) the chargeable consideration other than rent is £40,000 or more, or
  - (ii) the annual rent is £1,000 or more.

(4) In sub-paragraph (3) “annual rent” in relation to a transaction, means the average annual rent over the term of the lease to which the transaction relates or, if—

- (a) different amounts of rents are payable for different parts of the term, and
- (b) those amounts (or any of them) are ascertainable at the effective date of the transaction,

the average annual rent over the period for which the highest ascertainable rent is payable.

### 93.43 Residence of individual

Para 3 sch 9A FA 2003 provides:

For the purposes of this Schedule, an individual is “non-resident” in relation to a chargeable transaction if the individual is not UK resident in relation to the transaction (see paragraphs 4 and 5).

So we move on to para 4 sch 9A FA 2003 which provides the basic rule:

(1) For the purposes of this Schedule, an individual is “UK resident” in relation to a chargeable transaction if the individual is present in the UK on at least 183 days during any continuous period of 365 days that falls within the relevant period.

Presence is decided by the usual midnight test:

(4) References in this paragraph to an individual being present in the UK on a day are to the individual being present in the UK at the end of that day.

As this definition only applies for the purposes of para 4, it has to be

repeated verbatim in para 5.

Although SDLT is only payable on land in England and Northern Ireland, for the purposes of the SDLT residence test it is days spent in the whole of the UK that count, not just days spent in England or Northern Ireland.

### 93.43.1 *Relevant period*

Para 4 sch 9A FA 2003 provides:

- (2) “The relevant period” means the period that—
- (a) begins with the day 364 days before the effective date of the chargeable transaction, and
  - (b) ends with the day 365 days after the effective date of the chargeable transaction.

So it may not be clear whether an individual meets the UK resident requirement until a year after the transaction. SDLT is then paid upfront, and reclaimed if appropriate.

### 93.43.2 *Residence: Policy issues*

The SDLT surcharge does not adopt the SRT definition of residence, because that was so complicated. HMRC give themselves a pat on the back for that decision. The surcharge response paper provides:

many respondents spoke positively of the government’s decision to favour simplicity, where possible, in designing the surcharge

The reader studying the 20 pages of text on this topic may think it is complicated. The weasel words here are “where possible”.

The surcharge response paper provides:

1.8 In recognition that most stakeholders welcomed the government’s proposal for a simple test of an individual’s residence for the purposes of the surcharge, the government will legislate the SDLT residence test for individuals as set out in the consultation.

1.9 While the government has considered whether special provisions are needed to allow for exceptional circumstances to be taken into account, on balance it believes that the residence test and the proposed approach to refunds as detailed in Chapter 3 provide sufficient flexibility for the vast majority of customers.

1.10 The government will not use the SRT to determine the residence status of an individual for the purposes of the surcharge. Using the SRT,

a test based on a tax year is ill suited for a transaction tax like SDLT and would be complicated as individuals would have to judge their residence under the SRT in almost all cases before the tax year has ended. This would create burdens for HMRC to check taxpayers' declarations whilst also complicating the surcharge as taxpayers who do not routinely assess their tax residence could be forced to engage with the SRT rather than the more straightforward SDLT test.

### **93.44 When post-acquisition period ignored**

Para 5 sch 9A FA 2003 provides:

(1) For the purposes of this Schedule, an individual is "UK resident" in relation to a chargeable transaction to which this paragraph applies if the individual is present in the UK on at least 183 days during the period that—

- (a) begins with the day 364 days before the effective date of the chargeable transaction, and
- (b) ends with the effective date of the chargeable transaction.

(2) This paragraph applies to a chargeable transaction if any of conditions A to C is met in relation to the transaction.

#### *93.44.1 Company purchaser*

Para 5 sch 9A FA 2003 provides:

(3) Condition A is that the purchaser is, or (if there is more than one) the purchasers include—

- (a) a company, or
- (b) a person acting as a trustee of a unit trust scheme.

#### *93.44.2 Partnership purchaser*

Para 5 sch 9A FA 2003 provides:

(4) Condition B is that the purchaser is, or (if there is more than one) the purchasers include, an individual who is treated as entering into the transaction by virtue of paragraph 2 of Schedule 15 (transaction entered into for the purposes of a partnership treated as entered into by partners).

The surcharge response paper provides:

2.12 ... for SDLT purposes partnerships are treated as if the partners are

joint purchasers of partnership property.<sup>97</sup> In line with this, the government proposed that the surcharge would apply where any one of the partners was non-UK resident as defined by the relevant residence tests for individuals and non-natural persons set out in the consultation.

2.13 As was also set out in the consultation, there are special rules that apply to partnership transactions involving the transfer of property. The government proposed that where, under these rules, the partnership is treated as the purchaser, the above rules will apply. Where conversely, the purchaser is or includes a partner, former partner or person connected with either a partner or former partner, the residence status of the purchaser alone will determine whether the surcharge applies.

2.14 A number of respondents expressed concern that the proposed treatment of partnerships would be unfair and disproportionate for the residence status of one partner to render the entire partnership liable to the surcharge, with several questioning the policy rationale of deeming purchases by a partnership comprising wholly of UK residents as preferable to those of a partnership comprising a single non-UK resident.

2.15 Some commented that it would be onerous for large partnerships and complex fund structures to establish the residence of every partner for the purposes of the surcharge using a test other than the existing SRT.

2.16 A significant number of respondents advocated in favour of a threshold, under which minor non-UK resident interests would be disregarded for the purposes of the surcharge. A smaller number were in favour an apportionment test that would restrict the amount of the surcharge payable to reflect the proportion of nonUK resident interests in the partnership. Government response

2.17 The government will legislate for the surcharge to apply to partnerships as set out in the consultation. It is usual practice within SDLT to treat partners as joint purchasers of a property and for joint purchaser rules to apply irrespective of the relative interests being purchased by different partners.

### 93.44.3 *Trust purchaser*

Para 5 sch 9A FA 2003 provides:

(5) Condition C is that—

---

<sup>97</sup> Para 2 sch 15 FA 2003.

- (a) the purchaser is, or (if there is more than one) the purchasers include, an individual who is acting as a trustee of a settlement, and
- (b) under the terms of the settlement no beneficiary is entitled—
  - (i) to occupy the dwelling or dwellings for life, or
  - (ii) to income earned in respect of the dwelling or dwellings.

The consultation response paper provides:

2.23... the residence status of a trustee is determined using the relevant SDLT residence test (depending on whether the trustee is an individual or company). Where there are multiple trustees, the trust will be UK-resident only if all the trustees are UK-resident under the SDLT tests.

### 93.45 Crown employees

Para 6 sch 9A FA 2003 provides:

- (1) For the purposes of paragraphs 4 and 5, an individual is (subject to sub-paragraph (3)) treated as present in the UK at the end of a day if at that time the individual—
  - (a) is in Crown employment, and
  - (b) is present in a country or territory outside the UK for the purpose of performing activities in the course of that employment.
- (2) For the purposes of paragraphs 4 and 5, an individual is (subject to sub-paragraph (3)) treated as present in the UK at the end of a day if at that time the individual—
  - (a) is the spouse or civil partner of an individual who is treated as present in the UK at the end of that day under sub-paragraph (1), and
  - (b) is living with<sup>98</sup> that spouse or civil partner. (3) Sub-paragraph (1) or (2) applies in relation to an individual only if a claim that it should so apply is included in a land transaction return or an amendment of such a return.
- (4) “Crown employment” means employment under the Crown—
  - (a) which is of a public nature, and
  - (b) the earnings from which are payable out of the public revenue

---

98 Para 6(5) incorporates the standard tax definition of “living together”: see [App 3.4.3](#) (Living together: Married couple).

of the UK or of Northern Ireland.

There is no relief for other employees seconded abroad. The Surcharge response paper provides:

3.6 ... The application of the Income Tax legislation for crown employees places them in a materially different position to other Income Tax payers, making it appropriate for the government to provide a relief for this category of taxpayer.

### **93.46 Non-resident company**

Para 7 sch 9A FA 2003 provides:

- (1) For the purposes of this Schedule a company is “non-resident” in relation to a chargeable transaction if either of the following conditions is met.
- (2) The first condition is that, on the effective date of the chargeable transaction, the company is not UK resident for the purposes of the Corporation Tax Acts (see Chapter 3 of Part 2 of CTA 2009).

### **93.47 Foreign-controlled company**

The surcharge response paper provides:

2.4 For UK resident close companies, the government proposed looking through to the residence of participators and apply the surcharge where control could be directly or indirectly exercised by one or more non-UK resident person(s). The residence status of the participators will be determined as if they were direct purchasers of the property acquired by the close company using the SDLT residence test set out in this document. This treatment was proposed to prevent non-UK residents using UK resident companies to circumvent the surcharge.

Anyone using a UK resident company to avoid the surcharge would need their head examined. But there it is.

Para 7 sch 9A FA 2003 provides:

- (1) For the purposes of this Schedule a company is “non-resident” in relation to a chargeable transaction if either of the following conditions is met...
- (3) The second condition is that, on the effective date of the chargeable transaction, the company (though UK resident for the purposes of the Corporation Tax Acts)—

- (a) is a close company (see paragraph 8),
- (b) meets the non-UK control test in relation to the transaction (see paragraphs 9 and 10), and
- (c) is not an excluded company (see paragraph 11).

### 93.47.1 “Close company”

Para 8 sch 9A FA 2003 tinkers with the standard definition:

- (1) For the purposes of this Schedule, a company is a “close company” if it is a close company within the meaning given by Chapter 2 of Part 10 of CTA 2010 (basic definitions), applying that Chapter subject to the following modifications.
- (2) Section 444 (companies involved with close companies) applies as if condition A in that section were omitted.
- (3) Section 446 (particular types of quoted company not treated as close) is treated as omitted.

This brings certain open companies into the scope of the SDLT surcharge: see 99.31 (Open company exemption); 99.33 (Quoted company exemption).

### 93.48 *Non-UK control*

Para 9 sch 9A FA 2003 provides:

- (1) For the purposes of this Schedule, a company meets the “non-UK control test” in relation to a chargeable transaction if it is a close company within the meaning given by Chapter 2 of Part 10 of CTA 2010 (basic definitions), applying that Chapter subject to the following modifications.
- (2) Section 439 (“close company”) applies as if—
  - (a) references to a participator were to a relevant participator, and
  - (b) references to five or fewer participators were to any number of relevant participators.

Amended as para 9(2) requires, s.439 CTA 2010 provides:

- (1) For the purposes of the Corporation Tax Acts, a “close company” is a company in relation to which condition A or B is met.
- (2) Condition A is that the company is under the control—
  - (a) of 5 or fewer relevant participators, or
  - (b) of relevant participators who are directors.

(3) Condition B is that 5 or fewer relevant participators, or relevant participators who are directors, together possess or are entitled to acquire—

(a) such rights as would, in the event of the winding up of the company (“the relevant company”) on the basis set out in section 440, entitle them to receive the greater part of the assets of the relevant company which would then be available for distribution among the participators, or

(b) such rights as would, in that event, so entitle them if there were disregarded any rights which any of them or any other person has as a loan creditor (in relation to the relevant company or any other company).

Para 9(4)(5) extend the concept of close co by repeating verbatim the rules set out in para 8; see 93.47.1 (“Close company”).

#### 93.48.1 *Relevant participator*

Para 9 sch 9A FA 2003 provides:

(3) In sub-paragraph (2), “relevant participator” means a participator (within the meaning given by Chapter 2 of Part 10 of CTA 2010) who—

- (a) is non-resident in relation to the chargeable transaction (within the meaning of this Schedule), and
- (b) is not a general partner in a limited partnership.<sup>99</sup>

#### 93.49 Attribution of rights and powers

Para 9 sch 9A FA 2003 provides:

(6) Section 451 (attribution of rights and powers) has effect subject to the limitations set out in paragraph 10.

So we move on to para 10 sch 9A FA 2003, which tinkers with the Associate-attribution rule<sup>100</sup>:

(1) This paragraph sets out limitations on the rights and powers of a person (A) that, apart from this paragraph, would be capable of being

---

99 Para 9(7) sch 9A FA 2003 provides: “The reference in sub-paragraph (3)(b) to a general partner does not include a general partner who possesses, or is entitled to acquire, rights that entitle the general partner, in the event of the winding up of the company or in any other circumstances, to receive more than 1% of the assets of the company which would then be available for distribution among its members.”

100 See 99.7 (Associate-attribution rule).

attributed to another person (B) under section 451(4) of CTA 2010, as that provision applies for the purposes of paragraph 9(1).

#### 93.49.1 *Attribution: Partners*

Para 10 sch 9A FA 2003 provides:

(2) Where A and B are partners in a partnership, no rights and powers of A may be attributed to B under paragraph (c) or (d) of section 451(4) of CTA 2010 by virtue of that fact.

#### 93.49.2 *Attribution: Spouse*

Para 10 sch 9A FA 2003 provides:

(3) Where—

- (a) A and B are spouses or civil partners of each other,
  - (b) A and B are living together,<sup>101</sup> and
  - (c) A is UK resident in relation to the chargeable transaction,
- no rights and powers of A may be attributed to B under paragraph (c) or (d) of section 451(4) of CTA 2010 by virtue of the fact mentioned in paragraph (a).

#### 93.49.3 *Attribution: De minimis rule*

Para 10 sch 9A FA 2003 provides:

(4) Where A's interest in a company is de minimis, no rights and powers of A in relation to the company may be attributed to B under any of paragraphs (a) to (d) of section 451(4) of CTA 2010.

(5) For this purpose, A's interest in a company is "de minimis" if—

- (a) the proportion of the share capital or issued share capital in the company that A possesses or is entitled to acquire is less than 5%,
- (b) the proportion of the voting rights in the company that A possesses or is entitled to acquire is less than 5%,
- (c) the issued share capital in the company that A possesses or is entitled to acquire would, on the assumption that the whole of the income of the company were distributed among the participators, entitle A to receive less than 5% of the income so distributed, and
- (d) A's rights in the company entitle A, in the event of the winding

---

101 Para 10(7) incorporates the standard tax definition of "living together": see [App 3.4.3](#) (Living together: Married couple).

up of the company or in any other circumstances, to less than 5% of the assets of the company which would then be available for distribution among the participators.

(6) Any rights A has as a loan creditor are to be disregarded for the purposes of the assumption in sub-paragraph (5)(c).

## 93.50 Funds

### 93.50.1 *Excluded companies*

REITs are generally required to be open companies, but can under certain exemptions be close.

Para 11 sch 9A FA 2003 provides:

(1) A company is an “excluded company” for the purposes of paragraph 7(3)(c) if it is any of the following—

- (a) a PAIF [property authorised investment fund];
- (b) a body corporate that is a 51% subsidiary of PAIF;
- (c) a company UK REIT;
- (d) a company that is a member of a group UK REIT.

(2) In this paragraph—

- (a) “PAIF” means a body corporate that is a property AIF for the purposes of Schedule 7A to this Act by virtue of paragraph 2(2) of that Schedule;
- (b) “51% subsidiary” has the same meaning as in the Corporation Tax Acts (see Chapter 3 of Part 24 of CTA 2010);
- (c) “company UK REIT” has the same meaning as in Part 12 of CTA 2010 (see section 524(5) of that Act);
- (d) “group UK REIT” has the same meaning as in Part 12 of CTA 2010 (see section 523(5) of that Act).

### 93.51 *Co-ownership contractual scheme*

Para 15 sch 9A FA 2003 provides:

(1) Subject to sub-paragraph (2), a co-ownership authorised contractual scheme is not “non-resident” in relation to any chargeable transaction.

(2) A collective investment scheme that is a co-ownership authorised contractual scheme by virtue of section 102A(7) (EEA schemes) is “non-resident” in relation to all chargeable transactions.

The surcharge response paper provides:

2.3 The consultation also set out how entities regarded as companies for

SDLT purposes would be treated. Where the entity is a unit trust, residence will be based upon the SDLT residence principles as related to trusts. Where the entity is a co-ownership authorised contractual scheme (CoACS), the scheme will be treated as non-UK resident if it is constituted by arrangements that create rights in the nature of co-ownership where the arrangements take effect as a result of the law of a territory outside of the UK

### 93.52 Spouses

Para 12 sch 9A FA 2003 provides:

- (1) This paragraph applies where—
  - (a) there are two or more purchasers in relation to a chargeable transaction who are or will be jointly entitled to the interest acquired, and
  - (b) the following conditions are met in relation to those purchasers.
    - (2) The conditions are—
      - (a) that, on the effective date of the transaction, the purchasers, or (if there are more than two) two of them, are spouses or civil partners of each other;
      - (b) that, on the effective date of the transaction, those spouses or civil partners are living together;<sup>102</sup>
      - (c) that one of those spouses or civil partners is UK resident in relation to the chargeable transaction;
      - (d) that (apart from this paragraph) one of those spouses or civil partners is non-resident in relation to the chargeable transaction;
      - (e) that neither of the spouses or civil partners is acting as a trustee of a settlement.
- (3) For the purposes of this Schedule, the spouse or civil partner mentioned in sub-paragraph (2)(d) is UK resident in relation to the chargeable transaction.

### 93.53 Bare trust acquiring lease

Para 13 sch 9A FA 2003 provides:

- (1) Sub-paragraph (2) applies to a chargeable transaction if—
  - (a) the purchaser is, or (if there is more than one) the purchasers

---

102 Para 12(4) incorporates the standard tax definition of “living together”: see [App 3.4.3](#) (Living together: Married couple).

include, a person (P) who is acting as a trustee of a bare trust, and

- (b) paragraph 3(3) of Schedule 16 (trustee of bare trust granted a lease treated as purchaser of the whole of the interest acquired) applies in relation to P.

(2) In determining for the purposes of this Part of this Act whether the chargeable transaction is a “non-resident transaction”, paragraph 2(1)(a) (condition that purchaser be non-resident) has effect as if a reference to the purchaser or purchasers—

- (a) included the beneficiary or beneficiaries of the bare trust, and
- (b) did not include P.

### 93.54 Trust purchaser

Para 14 sch 9A FA 2003 provides:

- (1) Sub-paragraph (2) applies to a chargeable transaction if—
  - (a) the purchaser is, or (if there is more than one) the purchasers include, a person (P) who is acting as a trustee of a settlement,<sup>103</sup> and
  - (b) under the terms of the settlement a beneficiary is entitled—
    - (i) to occupy the dwelling or dwellings for life, or
    - (ii) to income earned in respect of the dwelling or dwellings.
- (2) In determining for the purposes of this Part of this Act whether the chargeable transaction is a “non-resident transaction”, paragraph 2(1)(a) (condition that purchaser be non-resident) has effect as if a reference to the purchaser or purchasers—
  - (a) included the beneficiary or beneficiaries of the settlement, and
  - (b) did not include P.

### 93.55 Alternative property finance

Para 16 sch 9A FA 2003 deals with alternative property finance (Sharia finance) and is not discussed here.

### 93.56 SDLT surcharge: administration

The Stamp Duty Land Tax (Administration) (Amendment) Regulations 2021 amended the return form.

---

<sup>103</sup> For completeness: para 14(3) provides: “In this paragraph “settlement” does not include a settlement under a unit trust scheme.” Was it necessary to say this?

Para 18 sch 9A FA 2003 provides:

- (1) Sub-paragraph (2) applies in relation to a land transaction return in respect of a chargeable transaction if—
  - (a) in order to determine whether the chargeable transaction is a non-resident transaction, it is necessary to determine whether one or more individuals are UK resident in relation to the transaction under paragraph 4(1), and
  - (b) that individual or any of those individuals, at the beginning of the day on which the land transaction return is delivered, has not yet met the condition in that provision (but might turn out to do so depending on their residence during the remainder of the relevant period).
- (2) The land transaction return must be prepared on the assumption that the individual or (as the case may be) each of the individuals is resident outside the UK throughout the period—
  - (a) beginning with the day on which the land transaction return is delivered, and
  - (b) ending at the end of the relevant period.
- (3) In this paragraph “the relevant period” has the same meaning as in paragraph 4(1).

#### 93.56.1 *Individual becomes UK resident*

Para 19 sch 9A FA 2003 provides:

- (1) Sub-paragraph (2) applies where—
  - (a) a land transaction return in respect of a chargeable transaction is prepared on the assumption mentioned in paragraph 18(2), and
  - (b) the individual or (as the case may be) each of the individuals in respect of whom the assumption was made subsequently meets the condition in paragraph 4(1) (with the result that the transaction is not a non-resident transaction).
- (2) The land transaction return may be amended, at any time before the end of the period of 2 years beginning with the day after the effective date of the transaction, to take account of the fact that the transaction is not a non-resident transaction.
- (3) Where a land transaction return is amended under sub-paragraph (2), paragraph 6(2A) of Schedule 10 (notice of amendment of return to be accompanied by the contract for the transaction etc) does not apply in relation to the amendment.

### 93.57 Dwelling

Para 20 sch 9A FA 2003 provides:

- (1) This paragraph sets out rules for determining what counts as a dwelling for the purposes of this Schedule.
- (2) A building or part of a building counts as a dwelling if—
  - (a) it is used or suitable for use as a single dwelling, or
  - (b) it is in the process of being constructed or adapted for such use.
- (3) Land that is, or is to be, occupied or enjoyed with a dwelling as a garden or grounds (including any building or structure on that land) is taken to be part of that dwelling.
- (4) Land that subsists, or is to subsist, for the benefit of a dwelling is taken to be part of that dwelling.
- (5) The main subject-matter of a transaction is also taken to consist of or include an interest in a dwelling if—
  - (a) substantial performance of a contract constitutes the effective date of that transaction by virtue of a relevant deeming provision,
  - (b) the main subject-matter of the transaction consists of or includes an interest in a building, or a part of a building, that is to be constructed or adapted under the contract for use as a single dwelling, and
  - (c) construction or adaptation of the building, or part of a building, has not begun by the time the contract is substantially performed.
- (6) In sub-paragraph (5)—
  - “contract” includes any agreement;
  - “relevant deeming provision” means any of sections 44 to 45A or paragraph 5(1) or (2) of Schedule 2A or paragraph 12A of Schedule 17A;
  - “substantially performed” has the same meaning as in section 44.
- (7) A building or part of a building used for a purpose specified in section 116(2) or (3) is not used as a dwelling for the purposes of sub-paragraph (2) or (5).
- (8) Where a building or part of a building is used for a purpose mentioned in sub-paragraph (7), no account is to be taken for the purposes of sub-paragraph (2) of its suitability for any other use.

### 93.58 Surcharge: Commencement

Para 6 sch 16 FA 2021 provides:

- 6 (1) The amendments made by this Schedule have effect in relation to

any land transaction of which the effective date is, or is after, the commencement date.

- (2) But those amendments do not have effect in relation to—
- (a) a transaction effected in pursuance of a contract entered into and substantially performed before the commencement date, or
  - (b) a transaction that—
    - (i) is entered into pursuant to a contract entered into before 11 March 2020, and
    - (ii) is not excluded for the purposes of this paragraph.
- (3) A transaction is excluded for the purposes of paragraph (b) of subparagraph (2) if—
- (a) there is any variation of the contract, or assignment of rights under the contract, on or after 11 March 2020,
  - (b) the transaction is effected in consequence of the exercise on or after that date of any option, right of pre-emption or similar right, or
  - (c) on or after that date there is an assignment, subsale or other transaction relating to the whole or part of the subject-matter of the contract as a result of which a person other than the purchaser under the contract becomes entitled to call for a conveyance.
- (4) In this paragraph “the commencement date” means 1 April 2021.

Para 17 sch 9A FA 2003 provides:

In a case within section 44(8) (contract substantially performed and subsequently completed by a conveyance) the later of the notifiable transactions mentioned in that provision is a “nonresident transaction” for the purposes of this Part if and only if the earlier of those notifiable transactions is a non-resident transaction for the purposes of this Part.

## CHAPTER NINETY FOUR

# WHO IS THE SETTLOR?

94.1

### *Cross references*

The following topics are considered elsewhere:

90.4 (Trust from joint account: Who is settlor)

## 94.1 Why settlors matter

The identity of the settlor(s) of a settlement is important for many tax purposes. It is not practical to compile a full list, but the rules include:

<b>Topic</b>	<b>See</b>
Taxing settlor on trust income/gains	44.1 (Trust income); 56.3 (Trust gains)
IHT taxation of trusts	71.1 (Excluded property)
Connected person rules	99.14 (Connected: Trustees )
Reverter to settlor exemption	s.54 IHTA

Residence/domicile of the settlor are appropriate connecting factors for taxation of settlors, trustees and beneficiaries. So the question of the identity of the settlor often arises in matters concerning foreign domiciliaries.

Subsidiary questions may also arise:

- If a settlement has two settlors, what property has each settlor provided
- Whether a settlor provides additional property
- When a settlor provides property

The identity of the settlor also matters for non-tax purposes. For instance, a settlor is a “controlling person” whose details need to be disclosed under CRS, and a “beneficial owner” whose details need to be disclosed under

TRS.<sup>1</sup>

The focus of this chapter is identifying settlors; but it is sometimes convenient to address other aspects of a topic together with settlor questions.

## 94.2 Definitions of “settlor”

### 94.2.1 Terminology

There are three tax definitions of settlement.<sup>2</sup> For the purposes of this chapter (who is the settlor), the differences between them do not usually matter.

There are five tax definitions of “settlor”. We need labels to distinguish them, and I use the following terms:

<b>Definition of settlor</b>	<b>Application</b>
Standard IT/CGT definition(s)	Default definition(s) for IT/CGT
Settlement-arrangement definition	Settlor-interested trust code, & more
CGT s.86 definition	Applies for s.86 TCGA
IHT definition	Applies for IHT

Equipped with this terminology we can now consider the various definitions of settlor.

### 94.2.2 The 5 tax definitions

It is helpful to see the basic definitions side by side:

<b>IT definition s.467 ITA</b>	<b>CGT definition s.68A TCGA</b>	<b>Settlement-arrangement s.620 ITTOIA</b>	<b>IHT definition s.44(1) IHTA</b>	<b>CGT s.86 def'n sch 5 TCGA</b>
(1) In the Income Tax Acts (except where the context otherwise requires)	(1) In this Act, unless the context otherwise requires—	(1) In this Chapter [Chapter 5 Part 5 ITTOIA]—	(1) In this Act	7 For the purposes of section 86 and this Schedule,
“settlor”, in relation to a settlement, means	(a) “settlor” in relation to a settlement means	“settlor”, in relation to a settlement, means	“settlor”, in relation to a settlement, includes	a person is a settlor in relation to a settlement if

1 See 121.23 (Controlling Person: Trust); 122.16 (Beneficial owner: Trust).

2 See 1.2 (Definitions of “settlement”).

the person, or any of the persons, who has made the settlement.	the person, or any of the persons, who has made, or is treated for the purposes of this Act as having made, the settlement ... [note 1]	any person by whom the settlement was made.	any person by whom the settlement was made directly or indirectly,	the settled property consists of or includes property originating from him.
(3) A person (“S”) is treated for the purposes of the Income Tax Acts as having made a settlement if—.	(2) A person is treated for the purposes of this Act as having made a settlement if—	(2) A person is treated for the purposes of this Chapter as having made a settlement if	and in particular (but without prejudice to the generality of the preceding words) includes	
(a) S has made or entered into the settlement (directly or indirectly) ... [note 2]	(a) he has made or entered into the settlement, directly or indirectly, [note 2]	the person has made or entered into the settlement directly or indirectly.	[words <i>directly or indirectly</i> already included, see above]	
(5) In particular, S is treated for the purposes of the Income Tax Acts as having made a settlement if—	(3) A person is, in particular, treated for the purposes of this Act as having made a settlement if—	(3) A person is, in particular, treated as having made a settlement if the person—		<b>8(1)</b> References in section 86 and this Schedule to property originating from a person are references to—
(a) S has provided property for the purposes of the settlement (directly or indirectly), or	(a) he has provided property directly or indirectly for the purposes of the settlement, or	(a) has provided funds directly or indirectly for the purpose of the settlement,	any person who has provided funds directly or indirectly for the purpose of or in connection with the settlement	(a) property provided by that person; [note 3]
(b) S has undertaken to do that.	(b) he has undertaken to provide property directly or indirectly for the purposes of the settlement.	(b) has undertaken to provide funds directly or indirectly for the purpose of the settlement [note 4]		

Notes

- 1 For s.68A(1)(b) TCGA see 94.2.10 (Property of which S is settlor)
- 2 For s.467(3)(b) and (4) ITA/s.68A(2)(b) TCGA, see 94.2.9 (Will trust or intestacy)
- 3 Para 8(1) sch 5 TCGA continues with provisions dealing with “representing” assets,<sup>3</sup> and para 8(7) provides:  
For the purposes of this paragraph property or income is provided by a person if it is provided directly or indirectly by the person.
- 4 Section 620(1) ITTOIA continues: “(except that it does not include a charitable loan arrangement)”. This exemption is not discussed here.<sup>4</sup>

For the provisions dealing with reciprocal arrangements, see 94.4 (Reciprocal arrangements).

The settlement-arrangement definition originated in 1936 and is the ancestor of the other definitions.

See too 46.5.8 (Transferor/settlor compared).

### 94.2.3 *Definitions: General comments*

The first four definitions are mostly the same, and the CGT s.86 definition is only slightly different. So case law, and guidance, in the context of one definition is generally relevant to them all.

The common theme to all 5 definitions is that the settlor is the person who provides funds/property. (Two of the definitions use the word “funds” where others use the word “property” but the words are synonymous.) Funds/property includes both income and capital.

In most cases, the same person, the person providing funds, is the settlor under all 5 definitions and in the general sense.

Unpacking definitions 1-4, a person is a settlor if, directly or indirectly, they provide funds or:

- (1) Made/enter into the settlement
- (2) Undertake to provide funds

But points (1) and (2) are only relevant to a person who does not provide funds; if they provide funds, it does not matter whether they also

---

3 See 95.1.3 (Originating).

4 See Kessler, Wong and Birkbeck, *Taxation of Charities and Nonprofit Organisations*, 2019/20 ed, para 20.2 (IT settlement provisions). Online version <https://www.taxationofcharities.co.uk>

make/enter into the settlement, or undertake to provide funds.

#### 94.2.4 *Guidance*

Para 9(3) sch 5 TCGA refers to providing property for the purposes of a settlement;<sup>5</sup> this is the wording at the heart of the tax definitions of settlor. SP 5/92 gives extensive guidance on para 9(3) which is therefore relevant to all the definitions of settlor.

I also refer to STEP guidance on the concept of settlor for CRS (“**STEP CRS guidance**”).<sup>6</sup>

The concept of bounty (gratuitous intent) is a requirement of:

- (1) the settlement-arrangement of settlement<sup>7</sup>
- (2) providing property for the purposes of a settlement, which is part of the definition of settlor.

So cases discussing settlement-arrangement/bounty can also be relevant to the question of who is the settlor; and vice versa.<sup>8</sup>

#### 94.2.5 *Are the definitions exclusive?*

The IT/CGT definitions apply “unless the context otherwise requires”. This acknowledges that in some cases the settlement-arrangement or the CGT s.86 definitions may apply instead. I cannot think of any other case where the context would “otherwise require”.

The IT/CGT/Settlement definitions use the word “means” which is the term used for an exhaustive definition. The context shows that the words “is treated as” in the later part of these definitions also constitute an exhaustive (not inclusive) definition.<sup>9</sup>

---

5 See 56.8.2 (Trigger 1: Providing property).

6 CRS and Trusts (March 2017)

[https://www.step.org/system/files/media/files/2020-03/Guidance\\_note\\_CRS\\_and\\_trusts.pdf](https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf)

7 See 1.5 (Settlement-arrangement definition).

8 See *Jones v Garnett* [2007] UKHL 35 at [83]:

“... the definition of settlement ... and of the settlor [both in s.620 ITTOIA] are closely connected, and it appears to me to be perfectly proper to rely upon observations as to what can be taken into account when considering who is a settlor, when deciding whether there is a settlement.”

9 See **App 7.6** (Deemed/treated misused).

The IHT definition (unlike the other definitions) uses the non-exhaustive term, “includes”. The drafter of the IHT provision must have had in mind the possibility that a person might be the settlor of a settlement in the natural sense of the word, but was not within the IHT definition. It is difficult to think of such a case, but it is also difficult to say it could not happen. However that may be, for practical purposes at least, “includes” here means “means”.

#### 94.2.6 *Make/enter into settlement*

A person is a settlor under three of the definitions if they make/enter into a settlement directly or indirectly. It is not obvious how one can make/enter into a settlement indirectly, but the words do show that “make/enter into” is not to be narrowly understood.

The words “enter into” are not found in the IHT definition of “settlor”. That does not make any difference. Perhaps the drafter thought that make/enter into are synonymous and there was no need for both. Or perhaps the reason is that:

- (1) In the context of the settlement-arrangement definition, the word “settlement” includes not just a trust, but also an agreement or arrangement. One makes a trust. One “enters into” an agreement or arrangement.
- (2) The IHT definition does not include an agreement or arrangement.

If that is right, the drafter of the standard IT/CGT definitions did not realise it, so those definitions include the words “enter into”, I think infelicitously; but no harm is done.

*Dunsby v HMRC* was a tax avoidance scheme involving a number of steps:<sup>10</sup>

120. Mr Dunsby made the arrangement, which I have regarded as the settlement. He (as shareholder in the Company) passed the resolutions, which created the S share. He (as shareholder in the Company and the sole director) permitted [G] to subscribe the S share at its nominal value. [G] transferred the S share to the Trust under arrangements put in place by Mr Dunsby... But when [G] did so, there was no real value in the S share; whether or not any value would accrue to the Trust remained

---

<sup>10</sup> [2020] UKFTT 271 (TC); for the facts see App.2.2.7 (Pre-arrangement steps).

entirely under the control of Mr Dunsby.

121. Mr Dunsby was in control of all of these steps. The arrangement was as much a settlement made by Mr Dunsby as if Mr Dunsby had transferred ordinary shares to the Trust himself or had reorganized the share capital of the Company to create the S share and had transferred that share to the Trust himself. This was the case even though Mr Dunsby did not, at any stage, acquire the property (i.e. the S share) which came to be subject to the Trust. In this respect, Mr Dunsby was in much the same position as Mr Hawkins (in *Crossland*) or the Wildin brothers (in *Butler*)...

127. [Counsel for HMRC] argues that [G] did not “make” or “enter into” the settlement... . However, the definitions in s620 of “settlement” and “settlor” are deliberately broad; they are intended to bring a wide range of arrangements within the scope of the provisions. ... On that basis, I should also treat [G] as a settlor either on the basis that she also “made” the settlement or that she “entered into” the settlement...

One might reached the same conclusion in an easier way by saying:

- (1) Mr Dunsby was the settlor on the grounds that he provided that property indirectly, or that G acted at his behest.
- (2) G was the settlor as she provided property (a share, more or less worthless, but not totally worthless).

There are many routes to the same destination.

#### 94.2.7 Undertaking to provide

“Undertaking to provide” is found in the IT/CGT and settlement-arrangement definitions.

TSE Manual formerly provided at TSEM4120:

In practice if someone has undertaken to provide funds, but actually does not, we would not seek to apply s.624 or s.629 ITTOIA.

The passage was quietly deleted in 2007, though with no announcement of a change of practice. It seems self-evidently right, as no income arises from an undertaking (unless and until followed up by a payment).

The IHT and CGT s.86 definitions omit the reference to undertakings, but that should make no difference. An undertaking to provide is provision of property, namely, a contractual right (the undertaking).

Undertakings to provide funds are rarely found in practice so this has

limited practical importance. Examples are an indemnity to trustees, or a guarantee, if not called on.

#### 94.2.8 *Settlor: IHT definition*

The IHT definition (only) expands “for the purpose of the settlement” into “for the purpose of *or in connection with* the settlement”. It is considered that the words make no or no significant difference, for if something is provided “in connection with” a settlement it must be provided “for the purpose of” the settlement; bearing in mind that “purpose” does not need to be a very focussed or intense purpose.<sup>11</sup> The attraction of this view is that it makes the “who is the settlor” area of tax law more coherent if (so far as possible) the same test applies for all the taxes.<sup>12</sup>

There are specific IHT provisions which may affect the identity of the settlement and settlor for IHT.<sup>13</sup> So sometimes a person who is the actual settlor in the general sense is not regarded as the settlor for IHT. This chapter considers the general sense of settlor.

#### 94.2.9 *Settlor: CGT s.86 definition*

The wording is derived from the provisions dealing with multiple settlors.<sup>14</sup>

There are two differences between the CGT s.86 definition and the other definitions of settlor, which can be important.

The CGT definition does not have the words “make/enter into a settlement”. This is deliberate, to exclude from s.86 an employer who makes a pension or other commercial trust.

---

11 See 94.33 (Purpose: Inattentive settlor).

12 Why did the drafter use a different form of words, if they wanted the same result? Perhaps the reason is that “settlement” for IHT is sometimes narrower than settlement-arrangement. The drafter may have considered cases where it may have been argued that A is a settlor of a settlement-arrangement (providing property for the purpose of the *arrangement*) but A is not a settlor for IHT purposes (not providing for the purposes of the IHT-settlement). For instance in *Crossland v Hawkins* 39 TC 493 the taxpayer accepted that (if there were an arrangement) he would be the settlor of the settlement-arrangement; but he argued (unsuccessfully) that he was not the settlor of the classic settlement. To anticipate such arguments, perhaps, the drafter added the words “or in connection with”.

13 See 75.2 (Addition/transfer to trust); 71.13 (Initial interest of settlor/spouse).

14 See 95.2.2 (Multiple settlor provisions).

Under the CGT s.86 definition the settlor must provide “settled property”. Under the other definitions, the settlor must provide property “for the purposes of the settlement”. The s.86 definition is slightly narrower. Providing property for a company held by a trust is the provision of property for the purposes of the settlement, but it is not the provision of settled property.<sup>15</sup>

94.2.10 *Ceasing to be settlor*

<b>IT definition: s.469 ITA</b>	<b>CGT definition: s.68A(6) TCGA</b>
(1) A person (“S”) who is a settlor in relation to a settlement ceases to be so when the following condition is met.	A person who has been a settlor in relation to a settlement shall be treated for the purposes of this Act as having ceased to be a settlor in relation to the settlement if—
(2) The condition is that— (a) no property of which S is the settlor <sup>16</sup> is comprised in the settlement, (b) S has not undertaken to provide property (directly or indirectly) for the purposes of the settlement in the future, and (c) S has not made reciprocal arrangements with another person for that other person to enter into the settlement in the future.	(a) no property of which he is a settlor is comprised in the settlement, (b) he has not undertaken to provide property directly or indirectly for the purposes of the settlement in the future, and (c) he has not made reciprocal arrangements with another person for that other person to enter into the settlement in the future.

This rule does not apply for the settlement-arrangement definition of settlor,<sup>17</sup> though it is difficult to think of a case where that matters, and if it did, the rule might perhaps be implied.

There is no equivalent in the IHT definition of “settlor”, but if it

15 See 94.24 (Property provided to co in a trust).

16 See 94.2.11 (Property of which S is settlor).

17 Section 467(8) ITA provides: “This section and sections 469 to 473 do not apply for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (amounts treated as income of settlors).”

mattered, the separate settlement fiction would have a similar effect.<sup>18</sup>

The CG Manual provides a straightforward example:

**CG33245 Settlor: from 6 April 2006: Basic principles** [Jul 2019]  
 [The Manual paraphrases s.68A(6) TCGA and continues:] For example A and B execute a deed of variation under which property left to them by their father’s will is resettled on behalf of their children. Broadly speaking half the income and capital is held for the children of A and the other half for the children of B. From the time the variation is made, A and B are settlors of the settlement (see CG 33248).  
 In due course the share relating to A’s children has been wholly distributed. In this case we should say that A was no longer a settlor.

94.2.11 *Property of which S is settlor*

This expression is used in two (relatively unimportant) provisions: s.469 ITA/68A(6) TCGA (person ceasing to be settlor); and the IoV provisions.

<b>IT definition: s.467(2) ITA</b>	<b>CGT definition: s.68A(1) TCGA</b>
(2) In the Income Tax Acts (except where the context otherwise requires) a person is a settlor of property if—	(1) In this Act, unless the context otherwise requires ... (b) a person is a settlor of property which—
(a) the property is settled property because of—	(i) is settled property by reason of
(i) the person's having made the settlement, or	his having made the settlement
(ii) an event which leads to the person being treated by this Chapter [Chapter 2 Part 9 ITA] as having made the settlement, or	(or by reason of an event which causes him to be treated under this Act as having made the settlement), or
(b) the property derives from settled property within paragraph (a).	(ii) derives from property to which sub-paragraph (i) applies.

94.2.12 *“Derives”*

---

<sup>18</sup> See 75.5 (Separate-settlement fiction).

“Derive” is used in the definition of settlor in s.467 ITA/68A TCGA; s.471 ITA/68B TCGA (inter-trust transfer) and the IoV settlor provisions.

<b>IT definition s.465(7) ITA</b>	<b>CGT definition s.68A(7) TCGA</b>
For the purposes of this Chapter [Chapter 2 Part 9 ITA] property is derived from other property if—	(7) For the purpose of this section and sections 68B and 68C property is derived from other property—
(a) it derives (directly or indirectly and wholly or partly) from that other property or any part of that other property, and	(a) if it derives (directly or indirectly and wholly or partly) from that property or any part of it, and
(b) in particular, if it derives (directly or indirectly and wholly or partly) from income from that other property or any part of that other property.	(b) in particular, if it derives (directly or indirectly and wholly or partly) from income from that property or any part of it.

94.2.13 *Settlor definitions: Critique*

Three definitions of “settlement” seems complicated, but there are material differences between them, and each definition is appropriate in its own context. However, five definitions of “settlor” is extravagant, as four of them are (more or less) identical, and the CGT s.86 definition has only small differences (and needs even fewer).

A rational tax system would have one standard definition of settlor, which would apply generally, subject to specific amendment where needed.<sup>19</sup> We live in bad times for UK tax policy, but eventually, perhaps, someone will tidy up this mess. It should not be so hard.

---

<sup>19</sup> The s.86 definition needs to be different in one respect only.

Of course the various definitions of settlor developed piecemeal as the tax system evolved. The FA 2006 introduced the standard IT/CGT definition but only applied it for some (not all) purposes of IT and CGT. It therefore increased the number of definitions of “settlor” and made a complex situation rather more complex. This is curious because the authors of the 2006 reforms were emphatic that the two formerly distinct definitions of trustee residence (CGT and IT definitions) should be replaced by a single definition. But this is now of historical interest only.

94.2.14 *Non-tax definitions*

Outside tax, the word “settlor” is sometimes used with no definition, for instance in MLA 2007.<sup>20</sup> Subject to context, it has its normal meaning. It is considered that means, a person who provides property for the purposes of a trust.<sup>21</sup>

The CRS definition is (more or less) the same.<sup>22</sup>

**94.3 Will trust or intestacy**

<b>IT definition: s.467 ITA</b>	<b>CGT definition: s.68A TCGA</b>
<p>(3) A person (“S”) is treated for the purposes of the Income Tax Acts as having made a settlement if ...</p> <p>(b) the settled property, or property from which the settled property derives, is or includes property within subsection (4)</p>	<p>(2) A person is treated for the purposes of this Act as having made a settlement if ...</p>
<p>(4) Property is within this subsection if—</p> <p>(a) the settlement arose on S's death (whether by S's will, on S's intestacy or in any other way), and</p> <p>(b) immediately before S's death, the property was property of S—</p> <p>(i) which was disposable property (see section 468), or</p> <p>(ii) which represented S's severable share in any property to which S was beneficially entitled as joint tenant.</p>	<p>(b) [i] the settled property, or property from which the settled property is derived, is or includes property of which he was competent to dispose immediately before his death, and [ii] the settlement arose on his death, whether by will, on his intestacy, or otherwise.</p>

20 See 122.16 (Beneficial owner: trusts).

21 For completeness: Art 1 Trusts (Jersey) Law 1984 provides:

“settlor” means a person who provides trust property or makes a testamentary disposition on trust or to a trust.

This definition is (more or less) the same as the natural meaning.

22 See 121.23.2 (Settlor).

	(5) In subsection (2)(b) “property of which he was competent to dispose immediately before his death” shall be construed in accordance with section 62(10) (reading each reference to “assets” as a reference to “property”).
--	---

Disposable property/competent to dispose is defined as follows:

**s.468 ITA**

**s.62(10) TCGA as amended by s.68A(5)**

(1) This section applies for the purposes of section 467(4)(b)(i).	In this section
(2) Property is disposable if S could have disposed of it by S's will. (3) In working out whether any property could have been so disposed of— (a) make the assumptions mentioned in subsection (4), and (b) ignore the powers mentioned in subsection (5).	references to <u>assets property</u> of which a deceased person was competent to dispose are references to <u>assets property</u> of the deceased which (otherwise than in right of a power of appointment or of the testamentary power conferred by statute to dispose of entailed interests) he could, if of full age and capacity, have disposed of by his will,
(4) Assume that— (a) S is of full age and capacity,	[words <i>full age &amp; capacity</i> already included, see above]
(b) the property is situated in England and Wales, and	assuming that all the <u>assets property</u> were situated in England
(c) if S is not domiciled in the UK, S is domiciled in England and Wales.	and, if he was not domiciled in the UK, that he was domiciled in England,
(5) The powers to be ignored are— (a) any power of appointment giving S the right to dispose of the property, and (b) any testamentary power conferred by statute to dispose of entailed interests.	and include references to his severable share in any <u>assets property</u> to which, immediately before his death, he was beneficially entitled as a joint tenant.

One might have thought that this was not needed. An intestate does not make/enter into a trust arising on intestacy; and it might perhaps be argued that a testator does not make/enter into a trust arising under their will. One might have thought that a testator or intestate provided property for the

purposes of the settlement. But the cases do not support that view,<sup>23</sup> so express provision is needed.

This rule does not apply for the settlement-arrangement definition of settlor.<sup>24</sup>

### 94.4 Reciprocal arrangements

A reciprocal settlement is just another way of providing property indirectly, but it is dealt with expressly in each of the five definitions:

<b>s.467(6) ITA</b>	<b>s.68A(4) TCGA</b>	<b>s.620(3) ITTOIA</b>	<b>s.44(1) IHTA</b>	<b>p.8(3) sch 5 TCGA</b>
If a person (“A”) makes or enters into a settlement in accordance with reciprocal arrangements with another person (“B”)—	Where one person (A) makes or enters into a settlement in accordance with reciprocal arrangements with another person (B), for the purposes of this Act—	A person is, in particular, treated as having made a settlement if the person ...	In this Act “settlor”, in relation to a settlement ... includes any person who ...	Where a person who is a settlor in relation to a settlement makes reciprocal arrangements with another person for the provision of property or income, for the purposes of this paragraph—
(a) B is treated for the purposes of the Income Tax Acts as having made the settlement, and	(a) B shall be treated as having made the settlement, and	(c) has made a reciprocal arrangement with another person for the other person to make or enter into the settlement.	has made with any other person a reciprocal arrangement for that other person to make the settlement	(a) property or income provided by the other person in pursuance of the arrangements shall be treated as provided by the settlor, but

---

23 See 84.8.1 (Is estate a “settlement” for s.87).

24 Section 467(8) ITA provides: “This section and sections 469 to 473 do not apply for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (amounts treated as income of settlors).”

(b) A is not to be treated for the purposes of the Income Tax Acts as having made the settlement just because of the reciprocal arrangements.

(b) A shall not be treated as having made the settlement by reason only of the reciprocal arrangements.

(b) property or income provided by the settlor in pursuance of the arrangements shall be treated as provided by the other person (and not by the settlor).

It is considered that the differences in wording do not matter.

Three of the definitions say expressly that each party is to be treated as only having made one settlement, not both; but that should be implied for the other two.

It sometimes happens that spouses (or other members of one family) make trusts at the same time, and each settlor may benefit under the other’s trust. It is considered that these are not “reciprocal settlements” unless one trust is specifically made in return for the other.<sup>25</sup> The mere knowledge the two settlements are being made at the same time is not enough.

### 94.5 Nominal settlor

The document which creates a trust (generally called the “trust deed”<sup>26</sup>) is typically made between two parties:

- (1) a person described in the trust deed as “the settlor” and
- (2) the original trustees

Sometimes the person named as settlor provides only a nominal amount of

---

25 There is an interesting discussion of reciprocity from a sociological perspective in Bauman, *Postmodern Ethics* (1<sup>st</sup> ed, 1993), pp. 56-58.  
[https://www.kessler.co.uk/wp-content/uploads/2012/04/Bauman\\_Postmodern\\_Ethics.pdf](https://www.kessler.co.uk/wp-content/uploads/2012/04/Bauman_Postmodern_Ethics.pdf)

Bauman rightly observes that the essential element of reciprocity is that it affects motive. The distinction is between (1) disinterested generosity and (2) conduct inspired by considerations of self-interest. Reciprocity (like so much in life) offers shades of grey, matters of fact and degree, which the tax system must resolve into black or white.

26 If the document is not made by deed, the correct term is “trust instrument”.

trust property (eg £10).<sup>27</sup> Such a person is a settlor under the standard IT/CGT definition, the settlement-arrangement definition and the IHT definition. This is for two reasons (either one would suffice):

- (1) They make/enter into the settlement
- (2) They provide property (even though only a nominal amount)

Such a person is called a nominal settlor. The nominal settlor is not usually the only settlor, for there will be another person who provides more substantial trust property. Practitioners sometimes express the distinction by using the term “economic settlor” to describe the person who provides the substantial trust property.<sup>28</sup>

The fact that the nominal settlor has provided a nominal sum, and is a settlor within the tax definitions, does not normally matter for tax. It does not normally matter for trust/property law purposes.<sup>29</sup> But it matters for CRS. STEP CRS guidance provides:

**‘nominal’ and joint settlors**

There may be trusts in existence where an individual (X) acts as the named settlor of the trust and contributes a nominal amount on its creation but where another individual (Y) then makes the substantive contribution of assets to the trust. In circumstances where trustees satisfy themselves that X has only made a nominal contribution to trust assets and that Y has made the substantive contribution, then applying AML/KYC [anti-money laundering/know your client] principles, Y should be regarded as the settlor of the trust for CRS purposes rather than X. However, in accordance with CRS and FATF recommendations, HMRC consider that it is also necessary to identify and disclose X as a settlor and that the full value of the trust assets should be reported with respect to both X and Y notwithstanding the fact that X had added only

---

27 See Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), para 10.14 (Nominal settlor), where this style of drafting is discouraged.

28 See App 6.5.1 (Economic terms with antonym).

29 *JSC Mezhdunarodniy Promyshlennyi Bank v Pugachev* [2017] EWHC 2426 (Ch) at [214]: “At times the defendants made submissions about the intentions of the “settlor”, by which they meant the trust companies. I reject that approach. It is true that these deeds are drafted so that the declaration of trust is over a nominal sum and so from that perspective the trust company could be called a settlor. However this is unreal. The real settlor of these trusts is Mr Pugachev.”

a nominal amount.<sup>30</sup>

Sometimes the person named as settlor may not provide any property at all. The trust documentation typically says or suggests that they have, but in practice I suspect it is often not done. In these cases it is suggested that:

- (1) The nominal settlor is not a settlor for CRS purposes as they have not provided any property.
- (2) The nominal settlor is still a settlor under those three (wider) tax definitions, because they make/enter into the settlement by signing the trust deed and assuming such powers and position as the trust deed may provide.

A nominal settlor is typically the “settlor” for the purposes of the trust deed, as the term settlor is defined that way. That definition does not determine who is (and who is not) the settlor within the various tax definitions but some aspects of the general sense of settlor may seep into the statutory definitions. This may explain why no-one suggests that the original trustees are settlors, though they are parties to the trust deed. Likewise the protector is not a settlor, though the protector is sometimes a party to the trust deed.

## 94.6 Tainting

It does not generally matter if someone provides a trivial amount of property to a trust. But sometimes important tax consequences follow if anything is provided, even if very little. This is known as “**tainting**” a trust.<sup>31</sup> This may be the case whether the funds are provided by the settlor or by someone who was not the settlor.

In particular, provision of trivial funds may lose the benefit of the following reliefs:

<b>Relief</b>	<b>See para</b>
Protected-trust reliefs (for s.86, s.624, s.720)	88.4; 88.9.5; 88.13.5
<i>Various transitional reliefs:</i>	

---

30 CRS and Trusts (2017) para 1.3

[https://www.step.org/system/files/media/files/2020-03/Guidance\\_note\\_CRS\\_and\\_trusts.pdf](https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf)

31 This term was adopted by Parliament in F(no.2)A 2017.

1991 and 1998 transitional reliefs for s.86	56.6; 56.8
1998 transitional relief for s.87	57.41
Trust residence for mixed resident trustees	6.7

Unfortunately the statutory drafting is different in each of these reliefs. This does make a coherent explanation more difficult, but such is the patchwork nature of UK tax.

The Protected-Trust Note 2020<sup>32</sup> comments on trivial additions:

HMRC has given no indication they would be willing to apply a de minimis disregard even though it would obviate the administrative burden of establishing evidence of intent or inadvertency. It follows that even a minimal addition can taint a settlement. However, in practice many minimal additions are unintentional and here absence of gratuitous intent would prevent tainting.

Provision of trivial funds in principle makes the provider a settlor and so a connected person.

In these cases, the question of when funds are provided may also arise.

For the position where a lender leaves a loan outstanding, see 94.26 (Loans).

#### **94.7 A gives to B, B gives to trust**

Suppose:

- (1) A gives property to B unconditionally;<sup>33</sup> and
- (2) B gives the same<sup>34</sup> property to a trust.

Two “settlor” questions arise.<sup>35</sup>

32 See 88.1.1 (Protected-trust guidance).

33 The position is different if the gift from A to B is made on terms which require B to transfer the property to the trust. In that case, clearly:

- (1) A would be the settlor,
- (2) B would not be a settlor.

It is also different if the gift from A to B is made by instrument of variation: see 94.38 (Trust made by deed of variation).

34 Similar points arise if B gives other property (not the property given by A) if this is part of an arrangement between A and B.

35 Other issues may also arise. If A is a beneficiary of the trust, A’s gift to B may become a gift with reservation: see 74.6.3 (A gives to B, B gives to trust). Note that even if A is a settlor of the discretionary trust, A has not made a chargeable transfer

- (1) In what circumstances does one say that A is the settlor of the trust, having provided the property indirectly? That is, what is the meaning of “providing indirectly”?
- (2) If A is the settlor (having provided property indirectly), can one say that B is not a settlor, perhaps on the grounds that A is the “real” settlor?

One might expect to find guidance to these questions in *Hatton v IRC*.<sup>36</sup> The facts were as follows:

- (1) Mrs Cole (“the mother”) made a settlement (“the first settlement”) conferring on Mrs Hatton (“the daughter”) a valuable equitable interest.
- (2) The daughter transferred her interest to a new settlement (“the second settlement”).

So this was a case of a gift to B followed by gift to trust by B. It is important to note the background facts:

Once the first settlement had been executed ... it was a virtual certainty that the second would be made on the following day provided that [the mother] was then still living.<sup>37</sup>

#### 94.7.1 *Is A an indirect settlor?*

The Special Commissioners held:

[the mother] was a settlor of the second settlement having directly or indirectly provided the only funds which were subjected to it.<sup>38</sup>

The judge held:

The Special Commissioners ... held that [the mother] was properly to be

---

and no IHT is payable by A on the gift to the trust by B.

36 67 TC 759. For another aspect of this decision see 94.34 (Purpose: Adviser/agent of settlor).

37 67 TC at p.771. The Special Commissioners added:

[The daughter] was content to leave the details to [the mother’s advisers]. There was no real likelihood that she would reject the suggestion that she should make the second settlement when Mr Willcox [her adviser] put it to her.

But nothing turns on that.

38 At p.768G.

treated as a settlor of the second settlement on the ground that, by making the first settlement, [the mother] was a person who had provided funds directly or indirectly for the purpose of or in connection with the second settlement; and so, in relation to the second settlement, fell within the definition [of settlor]. In my view, they were entitled to reach that conclusion on the facts.<sup>39</sup>

*Hatton* is a clear case of providing funds indirectly because the two gifts (from A to B, and from B to the trust) were part of an arrangement and it was a “virtual certainty” that the second gift would follow the first. Are these essential requirements? Unfortunately the Special Commissioners, and the court, did not address this point.

It is clearly not sufficient that B’s funds are historically derived from A.<sup>40</sup> Something more is required, but what? It might be said that all paraphrases are suspect and the court must return to the words of the statute. But when the words are so vague, some gloss is necessary to avoid hopeless uncertainty. At first sight, the concept of a “clean break” seems a useful one for determining whether property is provided indirectly. That is, if there is a clean break between A’s gift to B, and B’s gift to the trust, A has not provided property indirectly. But “clean break” is only a metaphor which itself needs elucidation. It is not much more than a colourful label.

It is suggested that A is a settlor (having provided property indirectly) if and only if (like *Hatton*) there is an arrangement under which:

- (1) A makes a gift of property to B, and intends that B should promptly make the gift to the trust.
- (2) B gives the property to a trust in fulfilment of the wishes of A.
- (3) It is virtually certain that B’s gift will be made.

Of course, this formulation will not solve all problems, since the factual questions may arise as to whether there is an “arrangement”, what is A’s intention and whether B makes a gift in fulfilment of A’s wishes. But this is probably the best that can be done. It is consistent with the “conscious

---

<sup>39</sup> 67 TC at p.789.

<sup>40</sup> This is self-evident; but if authority is needed, see the quote from *Fitzwilliam* at 94.9 (Trust appoints to B, B gives to new trust).

association” comments in *Fitzwilliam*.<sup>41</sup> It might be said that this is too narrow a test and it favours the taxpayer as it allows tax planning of the kind considered in 94.41 (Planning to create excluded property trust). However, the planning is not all that easy! No looser test can be applied without considerable uncertainty. Moreover (see below), the consequences of A being an indirect settlor is that B is not a settlor; this suggests a narrower test is appropriate, for if B is a genuinely independent agent B should be the settlor.

#### 94.7.2 *Is B also a settlor?*

In *Hatton* the Special Commissioners held that the daughter did not provide the funds for the second settlement.<sup>42</sup> The reason was, it appears, that the mother had provided the funds indirectly and this excluded the possibility that the daughter had provided them.

The judge held on the appeal that it was immaterial (for the purposes of the IHT provisions being considered) whether the daughter was also a settlor of the settlement.<sup>43</sup> The judge did suggest that the daughter might also be a settlor.<sup>44</sup>

Approaching the matter as one of principle, untrammelled by authority, it is suggested that the Special Commissioners’ approach is to be preferred. As a matter of logic it is possible for A to provide property indirectly, and B to provide it directly, but the legislation is framed on the basis that trust property can have only one “provider”. This is clearly the case for the IT and CGT settlor-interested trust provisions.<sup>45</sup> It is suggested that the IHT definition should be construed in the same way. If property is provided indirectly by A, it should not be regarded as provided by B.

A similar issue arises in the definition of capital payment (receipt of a

---

41 See 94.9 (Trust appoints to B, B gives to new trust).

42 at p.768H. Confusingly, the Special Commissioners also say that the daughter *was* a settlor within the IHT definition. The reason, presumably, is that, although she did not provide property, she was a person by whom the second settlement was made. But nothing turns on that.

43 at p.791B.

44 The conclusion that the mother was a settlor “did not lead, necessarily, to the further conclusion that [the daughter] was not also a settlor”. See p.791B.

45 See 95.2.1 (Direct and indirect settlors).

benefit directly or indirectly from the trustees) where a similar analysis applies.<sup>46</sup>

### 94.7.3 HMRC views

The TSE Manual provides:

**TSEM4300 settlement for unmarried minor child** [Jul 2017]

**Indirect gift of shares from parent**

Mr J owns 60 of the 100 issued £1 shares in J Limited. Mr J is the sole company director and is the person responsible for making all the company's profits because of his knowledge, expertise and hard work. On starting up the company, Mr J allowed his mother to subscribe £40 for 40% of the shares but *shortly afterwards* she gifted them to her grandchildren. The circumstances are such that the decision to issue 40 shares at par is a bounteous arrangement (as were the shares in *Jones v Garnett*). ...

This is essentially a case of:

- (1) A gift from Mr J to the grandmother; and
- (2) A gift from the grandmother to the grandchildren.

The Manual's tax analysis is as follows:

The true settlor here is Mr J *rather than the children's grandmother*. Section 629 [ITTOIA] therefore applies and attributes the dividends received by the children to Mr J for tax purposes.

The words in italics suggest that HMRC accept the view set out above: if J is the settlor then the grandmother is not.

Similarly Helpsheet 270 (Trusts and settlements – income treated as the settlor's) (2016, updated 2020):

**Example 1** (Sue and Roger)

S gives £1,000 to her brother R to put into trust for her children. R sets up a trust with this money and although he is the named settlor in the trust deed, S is treated as the real settlor because it was she who indirectly provided (or settled) the funds.

It is implied that R is not the settlor.

---

<sup>46</sup> See 57.8.1 (Indirect receipt from trust).

## 94.8 B makes trust at A's request

In *Mills v IRC*:

Suppose

- [1] that a man owing a debt of honour or of gratitude to a friend, without any legal obligation proposed to discharge it by paying £1,000 to the friend, and
- [2] that the latter asks that the sum be paid not to him but to the trustees of a settlement, which is done.

The payment of the money to the trustees would obviously be a provision of funds for the settlement. On a purely objective view the payer could be said to have made that provision, but I think that the friend should properly be regarded as the person making this provision. It would be just as if the money had been first paid to him and then paid by him to the trustees. *The payer would have acted at his behest. ... the payer of the £1,000 would not have been actuated by any desire to benefit the persons interested under the trusts. Although in this instance his action would not have been self regarding, it would not have been related to any motive connected with the settlement.*<sup>47</sup>

This comment is right if (as is assumed) the payer agrees (albeit without legal obligation) to make the payment at the direction of the friend so that the friend has *de facto* (though not *de jure*) power of disposition of the funds.

The position is different if a parent proposed to make a gift to a child, and the child merely *asks* that the sum be paid to trustees of a settlement for themselves and their family. For a parent will feel moral obligations to his grandchildren as well as to the child; the parent has no (even non-binding) obligation to make a payment to the child; the child has no *de facto* power of disposition over the funds; in such circumstances the parent (not the child) is the settlor. The child has not provided funds even indirectly.

Suppose:

- (1) A asks B to transfer a nominal sum as an initial trust fund, and
- (2) B does so, not because B wishes to benefit the beneficiaries by the

---

<sup>47</sup> *Mills v IRC* 49 TC 367 at p.387. Note that while the friend is the settlor, the friend does not make a transfer of value: only the payer makes a transfer of value.

payment, but because A has asked B to, as a favour to A

Applying this principle, A is the (indirect) settlor of the nominal sum

### 94.9 Trust appoints to B, B gives to new trust

*Fitzwilliam v IRC* concerned an arrangement under which:

- (1) Trustees of a will trust exercised their power of appointment (“step 3”) to confer a valuable equitable interest on a beneficiary.
- (2) After a short interval,<sup>48</sup> the beneficiary (“B”) transferred this interest to a new trust (“step 5”).

So this was in essence a case of an appointment from a trust to B, followed by a gift to a new trust by B (though in the context of two artificial IHT avoidance schemes). One question was: who was the settlor of the new trust: the beneficiary or the testator of the will trust (or both). Lord Keith said:

The argument for the Crown is that, by virtue of the appointment contained in step 3, property was provided to [B] directly or indirectly for the purpose of or in connection with the settlement which [B] later made under step 5. The person who provided that property is said to be [the testator], because the appointment by the trustees falls to be read back into his will, under the principle ... that for the purposes of the Scottish rule against successive liferents and the English rule against perpetuities the exercise of a power of appointment must be written into the instrument creating the power.<sup>49</sup>

This argument was rejected:

[The testator] is, therefore, to be treated as the settlor so far as concerns the trust purposes contained in the appointment made by his trustees under step 3, but he cannot reasonably be regarded as having provided property directly or indirectly for the purpose of or in connection with

---

48 Steps 3/5 took place on 14 Jan/7 Feb, so the time gap was 24 days. (The taxpayer’s advisers described this a “respectable interval”). During this time the beneficiary received separate legal advice. But the decision did not turn on those facts.

The outcome would have been different if the beneficiary had been under an obligation to create the settlement at step 5 (though this possibility did not arise on the facts and was not discussed.)

49 See App.4.7.5 (Trust appointment: Filling blanks).

the settlement made by [B] under step 5.

The words “for the purpose of or in connection with” connote that there must *at least be a conscious association of the provider of the funds* with the settlement in question. It is clearly not sufficient that the settled funds should historically have been derived from the provider of them. If it were otherwise anyone who gave funds unconditionally to another which that other later settled would fall to be treated as the settlor or as a settlor of the funds. It is clear that in the present situation there cannot possibly have been any conscious association of [the testator] with [B’s] settlement.<sup>50</sup>

It seems therefore that if:

- (1) A trust (“trust 1”) exists and A is its settlor
- (2) There is an arrangement under which:
  - (a) the trustees of trust 1 appoint trust property unconditionally to B
  - (b) B gives the property to a separate trust (“trust 2”)

then B will be the settlor of trust 2, and A will not be a settlor, unless the creation of trust 2 is envisaged by A at the time that trust 1 is made.

The “conscious association” test is an understandable and generally helpful paraphrase of the statutory words, though it does not solve much as:

- (1) The question may arise as to what is a “conscious association”.
- (2) Lord Keith said there must *at least* be a conscious association, suggesting that it is a necessary, but may not be a sufficient, condition.

STEP CRS guidance adopts this approach:

**settlors following absolute appointments**

There will be circumstances where

- [1] trust assets are appointed from an existing trust (Trust 1) settled by A outright to B.
- [2] B then, in due course,<sup>51</sup> transfers some of those assets to a new trust, Trust 2.

In this scenario, B should be regarded as the settlor of Trust 2 under

---

<sup>50</sup> *Fitzwilliam v IRC* (1993) 67 TC 614 at p.732, emphasis added. HL split 3:2 on the main issue (the *Ramsay* doctrine) but the minority did not dissent on this point.

<sup>51</sup> Author’s footnote: I think the words *in due course* suggest a fact pattern similar to *Fitzwilliam*, ie a short time gap but no obligation on B to make the transfer to trust 2.

AML/KYC principles because he has become the outright owner of assets that have then subsequently been contributed to a new trust arrangement. In these circumstances, only B should be reported as the settlor for CRS purposes.<sup>52</sup>

The application of the conscious association test in the context of an appointment followed by a gift is surprising, but the House of Lords have spoken. In editions of this work up to the 2021/21 edition I said “The matter is for most practical purposes ended – unless and until the Supreme Court speaks again”. But time has moved on, and perhaps that exaggerates the doctrine of precedent. I do not think anyone should be surprised if the decision is narrowly interpreted, distinguished perhaps on the basis that it is a question of fact in each case, and finally, reversed.

This has implications for tax planning, see 94.41 (Planning to create excluded property trust).

## **94.10 Inter-trust transfer: Trust law background**

A note on terminology: A transfer from one trust to another may be described as a resettlement, but I prefer to use the more transparent term “**inter-trust transfer**”.

### *94.10.1 Role of trust law principles*

There are trust law rules which determine for trust law purposes:

- (1) Whether one trust exists, or whether two (or more) distinct and separate trusts exist
- (2) If two distinct trusts exist, whether trust property can be transferred, or has been transferred, from one to the other

Subject to context, and specific tax rules, these rules apply for tax purposes. That is, in the absence of specific context or rules, these questions are governed by trust law principles. These are sometimes called “general trust law” rules, meaning, I think, non-tax law rules.

There are of course differences in the trust laws of different jurisdictions. But as far as I am aware, there are no differences which might affect the

---

52 CRS and Trusts (2017) para 1.9

[https://www.step.org/system/files/media/files/2020-03/Guidance\\_note\\_CRS\\_and\\_trusts.pdf](https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf)

question of what constitutes a separate trust for UK tax purposes, and what constitutes a transfer between trusts. In addition, in the absence of expert evidence to the contrary, an English court would in any event assume that English trust law principles apply.

### 94.10.2 *Inter-trust transfers*

There are (at least) 4 ways by which property can move between trusts (without a person becoming beneficially entitled to the property in the meantime):

- (1) Trustees may exercise a power to transfer trust property to another trust. This is in practice the most common way.<sup>53</sup>
- (2) A beneficiary with a power of appointment (typically a general power) may exercise it so as to transfer property to another trust.
- (3) (a) A beneficiary who is entitled to a contingent or reversionary interest in the capital of the trust fund of trust 1 may assign that interest to trust 2; and  
(b) the trustees of trust 2 in due course become absolutely entitled to the trust fund of trust 1.
- (4) Beneficiaries absolutely entitled to trust property may direct the transfer of the property to another trust.<sup>54</sup>

A transfer to a separate trust needs to be distinguished from the situation where steps take place which vary the trust, but without giving rise to a transfer to another trust.

Where there is a transfer from trust 1 to trust 2, the question discussed here is who is the settlor of trust 2. Is it the settlor of trust 1 or the person(s) who brought about the transfer?

## **94.11 Inter-trust transfer: Appointment**

### 94.11.1 *Trust law background*

Trustees may have power:

---

<sup>53</sup> See 94.22 (Resettlement by beneficiaries).

<sup>54</sup> Further consideration is needed if the trust is not governed by English law or English law principles. In Scotland, for instance, a beneficiary with an alimentary liferent cannot exercise consent in this way.

- (1) to vary the terms of the trust (“a variation”)<sup>55</sup>; or
- (2) to transfer trust property to a distinct trust (“an inter-trust transfer”).

In *Roome v Edwards*, after some general comments on the distinction<sup>56</sup> the House of Lords comment in the context of trustees powers:

Many settlements contain powers to appoint a part or a proportion of the trust property to beneficiaries: some may also confer power to appoint separate trustees of the property so appointed, or such power may be conferred by law... It is established doctrine that the trusts declared by a document exercising a special power of appointment are to be read into the original settlement... If such a power is exercised, whether or not separate trustees are appointed, I do not think that it would be natural ... to say that a separate settlement had been created: still less so if it were found that provisions of the original settlement continued to apply to the appointed fund, or that the appointed fund were liable, in certain events, to fall back into the rest of the settled property.

On the other hand, there may be a power to appoint and appropriate a part or portion of the trust property to beneficiaries and to settle it for their benefit.<sup>57</sup> If such a power is exercised, the natural conclusion might be that a separate settlement was created, all the more so if a complete new set of trusts were declared as to the appropriated property, and if it could be said that the trusts of the original settlement ceased to apply to it.

There can be many variations on these cases each of which will have to be judged on its facts.<sup>58</sup>

#### 94.11.2 *Appointment rule conditions*

The rules are set out twice, once for IT and once for CGT. The IT rules are incorporated by reference for CT.<sup>59</sup>

---

55 One might emphasise the distinction by referring to a *mere* variation.

“Appointment” is a broader term which refers to an exercise of trustees powers which may be a mere variation of the trusts or an inter-trust transfer.

56 See 94.22.2 (Variation or resettlement?).

57 Modern trusts do not usually include a power in these terms, but they confer an express power to transfer to a new trust, where it is clear that the effect is an inter-trust transfer.

58 54 TC 359.

59 Section 1169 CTA 2010.

**s.470(1) ITA**

Section 471 applies in relation to a transfer of property<sup>60</sup> from the trustees of one settlement (“settlement 1”) to the trustees of another settlement (“settlement 2”) if the transfer—

- (a) is not for full consideration,
- (b) is not by way of a bargain made at arm’s length, and
- (c) is not excluded by subsection (2).

**s.68B(1) TCGA**

This section applies in relation to a transfer of property from the trustees of one settlement (“Settlement 1”) to the trustees of another (“Settlement 2”) otherwise than—

- (a) for full consideration, or
- (b) by way of a bargain made at arm's length.

At first sight s.470 seems wide enough to cover every transfer between trusts. But the exclusions in s.470(2) are also wide,<sup>61</sup> and in practice s.471 usually applies on a transfer between trusts by exercise of a power of appointment. So I refer to the rules in s.470, 471 (and the CGT equivalent) as the “**IT/CGT appointment rule**”. That label does not encapsulate all the circumstances where s.471 may apply, but no short label could do that.

The CG Manual explains the need for para (a) and (b):

**CG33220: Basic terms** [Mar 2020]

... The reason for having these two alternatives is to allow for the

---

60 The expression “transfer of property” is widely defined in s.470 ITA:

“(3) In this section ‘transfer of property’ means—

- (a) a disposal of property by the trustees of settlement 1, and
- (b) the acquisition by the trustees of settlement 2 of—
  - (i) property disposed of by the trustees of settlement 1, or
  - (ii) property created by the disposal.

(4) For the purposes of subsection (3) there is an acquisition or disposal of property if there would be an acquisition or disposal of property for the purposes of TCGA 1992.”

The CGT equivalent is s.68B(2) TCGA. Thus the grant of a lease, for example, is a “transfer of property”.

61 See 94.17.1 (Beneficiary assigns to trust); 94.14 (Inter-trust transfer: General power); 94.38.5 (IT/CGT: IoV post-2006).

possibility that S1 and S2 are connected persons (so that any transaction between them is not at arm's length by virtue of TCGA92/S18), and S1 sells an asset to S2 for its full market value. In such a case we do not want section 18 to cause section 68B to apply...

### 94.11.3 *IT/CGT appointment rule*

Assuming the conditions for the IT/CGT appointment rule are satisfied, we journey on:

#### **s.470(1) ITA**

If there is a transfer of property in relation to which this section applies, then the following subsections apply for the purposes of the Income Tax Acts, except so far as, in those Acts, the context otherwise requires.

#### **s.68B(3) TCGA**

For the purposes of this Act, except where the context otherwise requires—

Although the drafter includes the words “except where the context otherwise requires”, I cannot think of a case where the context would “otherwise require”. Perhaps the drafter has copied without much thought the wording used (appropriately) in s.467 ITA.<sup>62</sup> But perhaps a case of this kind might happen.

#### **s.470(2) ITA**

The settlor (or each settlor) of the property disposed of by the trustees of settlement 1 (“the disposed property”) is treated from the time of the disposal as having made settlement 2.

#### **s.68B(1) TCGA**

(a) the settlor (or each settlor) of the property disposed of by the trustees of Settlement 1 shall be treated from the time of the disposal as having made Settlement 2, and

In short, the settlor of trust 1 is the settlor of trust 2.

The IT/CGT appointment rule applies for all IT/CGT definitions of settlor: the standard IT/CGT definition, the settlement-arrangement

---

<sup>62</sup> See 94.2.1 (Terminology).

definition, and the CGT s.86 definition.<sup>63</sup>

**s.470 ITA**

(3) If there is more than one settlor of the disposed property, each of them is treated in relation to settlement 2 as the settlor of a proportionate part of the property acquired by the trustees of settlement 2 on the disposal.

(4) So far as the disposed property—

(a) was provided for the purposes of settlement 1, or

(b) was derived from property so provided,  
the property acquired by the trustees of settlement 2 on the disposal is treated from the time of the disposal as having been provided for the purposes of settlement 2.

**s.68B TCGA**

(b) if there is more than one settlor of the property disposed of by the trustees of Settlement 1, each settlor shall be treated in relation to Settlement 2 as the settlor of a proportionate part of the transferred property.

(4) For the purposes of this Act, except where the context otherwise requires, if and to the extent that the property disposed of by the trustees of Settlement 1 was provided for the purposes of Settlement 1, or is derived from property provided for the purposes of Settlement 1, the transferred property shall be treated from the time of the disposal as having been provided for the purposes of Settlement 2.

---

63 For completeness: the IT/CGT appointment rule would not apply on a transfer to or from an entity which was not a settlement within the standard IT/CGT definition. A Liechtenstein Stiftung (Foundation) might perhaps be an example. But the common law rules discussed below in relation to IHT would normally give the same result; though that may depend on the terms of the Stiftung.

(5) If as a result of subsection (4), property (“the transferred property”) is treated as having been provided for the purposes of settlement 2—

(a) the person who provided the disposed property, or the property from which it was derived, for the purposes of settlement 1 is treated as having provided the transferred property for the purposes of settlement 2, and

(b) if more than one person provided the disposed property, or the property from which it was derived, for the purposes of settlement 1, each of them is treated as having provided a proportionate part of the transferred property for the purposes of settlement 2.

(5) If transferred property is treated by virtue of subsection (4) as having been provided for the purposes of Settlement 2—

(a) the person who provided the property disposed of by the trustees of Settlement 1, or property from which it was derived, for the purposes of Settlement 1 shall be treated as having provided the transferred property, and

(b) if more than one person provided the property disposed of by the trustees of Settlement 1, or property from which it was derived, for the purposes of Settlement 1, each of them shall be treated as having provided a proportionate part of the transferred property.

This could have been expressed more concisely, but it works.<sup>64</sup>

#### 94.11.4 *Inter-trust value shift*

The IT/CGT appointment rule only applies on a transfer of property from the trustees of trust 1 to the trustees of trust 2. So it does not apply on a transfer from a company held by trust 1; or on a transfer to a company held by trust 2. But in these cases the common law rules apply, and in principle the settlor of trust 1 becomes the (or a) settlor of trust 2.

The IT/CGT appointment rule does not apply to a transfer for full consideration, so it does not apply to an interest free loan from trust 1 to trust 2. But again, the common law rules will apply so that the settlor of trust 1 may become a settlor of trust 2.

#### 94.12 **Inter-trust transfer: IHT**

---

<sup>64</sup> Trust law questions also arise: whether a power can be exercised to transfer to another trust, and restrictions on perpetuity/accumulation periods. This is not discussed here.

The IT/CGT appointment rule only applies for IT/CGT and CT purposes. IHT has no statutory equivalent. But the IT/CGT appointment rule only codifies the general law position, which I call the “common law rules”; so the same principles apply for IHT.<sup>65</sup> If there is a transfer from trust 1 to trust 2, by exercise of a power of appointment, the settlor of trust 1 is in principle<sup>66</sup>, to the extent of the transferred property, the settlor of trust 2 for IHT purposes.

HMRC agree. The CG Manual provides:

**CG33220: Basic terms** [Mar 2020]

... It is not unusual for trustees to appoint or advance assets to a newly created trust. See for example *Hart v Briscoe* 52 TC 53. Courts have said, see for example *Chinn v Collins* 54 TC 311, that the trustees in such a situation are perfecting the settlor’s original gift in settlement.<sup>67</sup> Therefore in such a case section 68B has the effect that it is the original settlor of S1 who is the settlor of S2. The property is treated as having been provided for the purposes of S2.

[The Manual notes the 3 exceptions in s.470(2) and continues:]

It is not considered that section 68B effected any change in the law.

Likewise, STEP CRS guidance provides:

**trust to trust appointment**

In some cases, trusts are not established directly by a transfer of assets from an individual but by a transfer from an existing trust or similar entity such as a foundation. In these circumstances, applying AML/KYC principles, it would be necessary for a trustee of the receiving trust (Trust 2) to make enquiries of the appointing trust (Trust 1) as to who its economic settlor was when it was created. In the absence of any ‘break in continuity’ (for instance where the assets pass to an individual and become that individual’s personal property), it will normally be safe to assume that the settlor of Trust 1 should also be regarded for CRS

---

65 This explains why the statutory provisions (which originated in the FA 2006) were backdated and apply even if the transfer between trusts was made before 2006.

66 This section considers the general sense of settlor for IHT purposes. Some special IHT rules apply in particular circumstances: see 75.2 (Addition/transfer to trust).

67 Author’s footnote: For the passage referred to, see App 4.7 (Providing property/bounty).

purposes as the settlor of Trust 2.<sup>68</sup>

#### 94.12.1 *Transfer: A's trust to B's trust*

Suppose:

- (1) A transfers property ("A's fund") to a trust ("trust 1"). The trustees have the standard power to transfer property to another trust.
- (2) B transfers property ("B's fund") to a separate trust ("trust 2").
- (3) The trustees of trust A transfer A's fund to trust 2.<sup>69</sup>

Trust 2 now has two settlors: A has provided A's fund indirectly, and B has provided B's fund directly. The issue was settled in CGT cases before the IT/CGT appointment rule was enacted. In *Eilbeck v Rawling*:<sup>70</sup>

- (1) A Gibraltar trust ("Trust 1") made by A held £600k.
- (2) A Jersey trust ("Trust 2") made by B held £100.
- (3) £315k was transferred from Trust 1 to Trust 2 by exercise of the trustee's powers.

Buckley LJ summarised the trust law background:

When [the donee of a special power of appointment] exercises that discretion in making an appointment, he acts as the delegate of the settlor. What the donee does in exercise of a special power of appointment is done vicariously by the settlor.

The answer is then clear:

If one asks who was the settlor of the £315,000 appointed by the appointment ... the only possible answer is [A,] the settlor of the £600,000 comprised in [Trust 1]. [B] did not settle<sup>71</sup> the £315,000; he settled only £100. The [trustee of Trust 1] did not settle the £315,000; it was not the ... trustee's to settle, and making the appointment the ...

---

68 CRS and Trusts (2017) para 1.2

[https://www.step.org/system/files/media/files/2020-03/Guidance\\_note\\_CRS\\_and\\_trusts.pdf](https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf)

69 If there is an arrangement under which (1) A transfers to trust 1 and (2) the trustees transfer to trust 2, ie the transfer to Trust 2 is in contemplation at the outset, then A is the settlor of Trust 2. It is here assumed that the transfer was not in contemplation at the time of the creation of Trust A.

70 54 TC 101.

71 Buckley is using the word "settle" as a paraphrase of the statutory word "provide".

trustee was only exercising a fiduciary power conferred on him by the settlor [A], whose delegate he was as donee of the power. The exercise of the power had, in my opinion, precisely the same effect as if the [trustee of Trust 1] had appointed the £315,000 in favour of the [trustee of Trust 2] to be held upon trusts identical with the trusts of [Trust 2] but set out in extenso in the appointment without reference to [Trust 2]. If the appointment had taken that form, there could, I think, be no doubt that the trusts so appointed would be trusts taking effect under [Trust 1].

The House of Lords approved this reasoning on appeal.<sup>72</sup>

HMRC agree. The CG Manual provides:

**CG33220: Basic terms** [Mar 2020]

... Where trustees exercise a special power of appointment, or power of advancement, in such a way as to create a new settlement, see CG33800+, the settlor of the new settlement is the person who was the settlor of the old one. See, for example, *Pilkington v IRC*, 40 TC 416, p.442<sup>73</sup> and *Chinn v Collins*, 54 TC 311, p.351H.<sup>74</sup>

It is considered that the same applies to a transfer for less than full consideration made in exercise of trustees dispositive powers, and to an interest-free loan from trust 1 to trust 2.

#### 94.12.2 *Transfer to new trust*

Suppose:

---

<sup>72</sup> It may be objected that this is not consistent with *Fitzwilliam*: see 94.9 (Trust appoints to B, B gives to new trust). There is no “conscious association” between A and Trust 2. However, *Fitzwilliam* was a case where the court found that an individual beneficiary who assigned an asset to the new trust was the “settlor”. The beneficiary displaced the testator from being a settlor by their independent act. There is no equivalent here.

The alternative conclusion that Trust 2 has no settlor for general tax purposes would have the result, attractive to taxpayers but absurd, that the property in Trust 2 could be excluded property, as one could not say that “the settlor” was domiciled in the UK at the time that the trust was made! That can hardly be right.

If (which is doubtful) further authority is needed, see *Trennary v West* [2005] STC 214 at [49].

<sup>73</sup> Author’s footnote: See 94.13 (Inter-trust transfer: Advancement) where this passage is set out.

<sup>74</sup> The same point is made again at CG Manual 34802.

- (1) Trustees of a trust made by A (“trust 1”) have power to transfer to a new trust.
- (2) The trustees transfer the trust fund to new trustees to hold on the terms of a newly created trust, trust 2. All the funds of trust 2 are derived from trust 1.

Who is the settlor (in the general sense) of Trust 2? The trustees of Trust 1 cannot be the settlor as they have merely exercised a fiduciary power. So either A is the settlor or there is no settlor. The answer is that A is the settlor of Trust 2.

### 94.12.3 *Appointment rules: Critique*

It was not necessary to enact the IT/CGT appointment rule. But at present we have statutory rules for IT/CGT/CT and case law rules for IHT, the worst of both worlds. It would have been better if the IT/CGT appointment rule had not been enacted. Now we have it, a small simplification would be to extend the statutory rule to IHT so the three taxes are aligned. This would not change the law, but it would make its explanation slightly easier. But the change is more trouble than it is worth, unless it is part of a wider reform of aligning the various definitions of settlor.<sup>75</sup>

### 94.13 **Inter-trust transfer: Advancement**

Suppose:

- (1) Trustees of trust 1 have a power of advancement (that is, a power to apply trust property for the benefit of a beneficiary).
- (2) They use that power to transfer trust property to a new trust (“trust 2”).<sup>76</sup>

The position for IT/CGT is covered by the IT/CGT appointment rule: the settlor of trust 1 is also the settlor of trust 2.

The same applies for IHT. The consent of the beneficiary is not needed and therefore the beneficiary is not the settlor of the new trust.

---

<sup>75</sup> See 94.2.13 (Definitions of “settlor”: Critique).

<sup>76</sup> See Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), para 11.9 (Power of advancement used to create new trusts).

*Pilkington v IRC* concerned a proposal to transfer property to a new trust by exercise of a power of advancement in favour of a Miss Penelope:

When one asks what person can be regarded as the settlor of Miss Penelope's proposed settlement, I do not see how it is possible to say that she is herself or that the trustees are. She is the passive recipient of the benefit extracted for her from the original trusts; the trustees are merely exercising a fiduciary power in arranging for the desired limitations. It is not their property that constitutes the funds of Miss Penelope's settlement: it is the property subject to trusts by the will of the testator and passed over into the new settlement through the instrumentality of a power which by Statute is made appendant to those trusts.<sup>77</sup>

HMRC agree: see CG33241 set out in 94.12.1 (Transfer: A's trust to B's trust).

If the power of advancement is used to alter the terms of an existing trust, without a transfer to a new trust, then *a fortiori* neither the trustees nor the object of the power are settlors.

In short, as far as the identity of the settlor is concerned, there is no difference between a power of appointment and a power of advancement.

#### 94.14 Inter-trust transfer: General power

Section 470(2) ITA/s.68B(6) TCGA set out three exceptions to the IT/CGT appointment rule. The second is:

##### s.470(2) ITA

A transfer of property is excluded for the purposes of subsection (1) if ... (b) it occurs only because of the exercise of a general power of appointment

##### s.68B(6) TCGA

But subsections (3) and (4) do not apply in relation to a transfer of property ... (b) which occurs by reason only of the exercise of a general power of appointment

This excludes the operation of (what I call) the IT/CGT appointment rule. It does not expressly say who is the settlor: general principles apply. The answer is clear enough.

The CG Manual provides:

---

<sup>77</sup> *Pilkington v IRC* 40 TC 416 at p.442.

**CG33220: Basic terms** [Mar 2020]

... However there are three specific cases which are excluded...

[2] Under the terms of S1 D may have a general power of appointment.

If so D is the settlor (or additional settlor) of S2.

For the meaning of general power, see 1.12 (General power).

**94.15 Settlement powers**94.15.1 *Power of revocation*

HMRC say:

Certain trusts require the settlor to have the power to revoke the trust to safeguard the position of beneficiaries. HMRC will not regard the failure to exercise such a power the same as an addition of property or value to the trust and therefore it will not cause the trust to lose its protection [protected trust status].<sup>78</sup>

The first sentence is a reference to US tax law, under which a power of revocation may be required for a trust to qualify as a grantor trust.<sup>79</sup> But the principle expressed here must apply to all revocable trusts. It gives a sensible result. It is consistent with the rules for disclaimer.<sup>80</sup>

Assuming this is right, why is there a provision of property in the case of a failure to exercise other rights, such as a right to indemnity or a right to call in a loan? The difference is that a power of revocation arises under the terms of the settlement, and the other rights arise outside the settlement.

94.15.2 *Settlement power*

A power of revocation is an instance of a wider category known as settlement powers. Section 47A defines settlement power:

In this Act “settlement power” means any power over, or exercisable (whether directly or indirectly) in relation to, settled property or a settlement.

That includes a right of revocation whether it arises:

---

78 Open letter from HMRC to CIOT, 14 Feb 2017, posted on Trusts Discussion Forum.

79 See 86.5 (US grantor trust).

80 See 94.18 (Disclaimer).

- (1) Under the terms of a settlement
- (2) Under common law principles, eg when a settlement is voidable under rules relating to capacity of the settlor, mistake, undue influence
- (3) Under foreign law forced heirship rules, eg legitime and Sharia, where family of the testator may have power to set aside a testamentary gift to a settlement<sup>81</sup>

It does not include a contractual right (eg repayment of a loan) or a right of reimbursement from trustees, which is a right against the trustees not relating to the settlement or settled property.

Section 272 IHTA provides:

In this Act, except where the context otherwise requires ...  
“property” includes rights and interests of any description but does not include a settlement power

It follows that:

- (1) The power is not an asset in the estate of the powerholder
- (2) The non-exercise or release of the power is not a transfer of value for IHT<sup>82</sup>

It is considered that waiver or non-exercise of the power does not make the powerholder a settlor or constitute a transfer of assets for ToA purposes.

#### **94.16 Consent to exercise power**

A trust sometimes provides that the trustees can only exercise a power of appointment with the consent of a particular beneficiary (typically the life tenant). If the power of consent is wholly personal (ie proprietary),<sup>83</sup> this raises some intriguing questions. A concise exposition is difficult because of the variety of possible circumstances and taxes. In outline the position is as follows:

- (1) A gratuitous consent to an appointment which terminates the

---

81 See 73.7 (Forced heirship/legitime/Sharia).

82 In the case of forced heirship, a disclaimer or variation under s.142 IHTA if practical might be desirable to put the position beyond doubt.

83 On this terminology and powers of consent generally see Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), para 7.31 (Nature of powers of consent and appointment).

consentor's interest in trust income probably makes the consentor the settlor, for the purposes of the settlement-arrangement definition. The consentor has provided income for the purpose of the settlement-arrangement because they have effectively given up their right to the income by their consent.<sup>84</sup>

- (2) For similar reasons a gratuitous consent to an appointment which terminates the consentor's contingent interest in trust capital probably makes the consentor the settlor, for the purposes of standard IT/CGT and IHT<sup>85</sup> definitions, from the time that the contingency is satisfied. The consentor has provided capital for the purposes of the settlement because they have effectively given up their right to the capital by virtue of their consent.
- (3) By contrast, the giving of the consent to an appointment does not make

---

84 The position is analogous to an assignment or surrender of a life interest. The analogy is not exact. In one case the arrangement consists of the assignment/surrender alone. In the other case the arrangement consists of the consent and the exercise of the trustees' power of appointment. So in a sense there is an arrangement with two settlors: (i) the consentor and (ii) the (actual) settlor of the classic settlement who conferred the power of appointment on the trustees. But HMRC (or the actual settlor) may plausibly argue that the consentor (not the actual settlor) is the settlor for the purposes of s.624. They may take support from *Braybrooke v AG* 9 HLC 149 at p.165 at <http://www.commonlii.org> (A case on the Succession Duty Act 1853 whose provisions are analogous to current definitions of settlor. Since Succession Duty was only abolished in 1949, the drafter of the original settlor-interested trust code doubtless had it in mind.) The ground of the decision in *Braybrooke* was:

“that, although the estate of the son arose under a joint power of appointment made by his father and himself, and although therefore the father was in a sense one of the settlors, yet he was not a settlor from whom the interest or any part of the interest of the son, in his character of successor, was derived. And the decision shews that, in order to ascertain who is the settlor ‘from whom the interest of the successor is derived,’ we must inquire, not who are the parties by whose conveyance the estate has been created, but who is the conveying party out of whose estate the interest in question has been derived.” See *Att-Gen. v Charlton* (1877) 2 Ex D 398 at p.417.

85 It is arguable that the consentor is not a settlor for IHT because the power of consent is a settlement power and so not property for IHT purposes. It is the old question of how far one carries the deeming. See App 7.1 (Deeming provisions: Introduction). The better view is that the deeming does not carry that implication.

the consentor a settlor (for any purpose) if:

- (a) the consentor had no interest in the trust immediately before giving the consent; or
- (b) the appointment leaves the interest of the consentor in the trust unaffected.<sup>86</sup>

In these cases the consentor has not provided any property by their consent.

- (4) The giving of a consent is probably not a disposal for CGT<sup>87</sup> of:
  - (a) the right to consent (even if it is extinguished); or
  - (b) the consentor's interest in the trust (even if that is extinguished). The contrary is arguable but it would not normally matter.<sup>88</sup>
- (5) The power to consent is not an asset in the estate of the consentor because:
  - (a) it is not property in the general sense, or
  - (b) if it is property in the general sense, it is a "settlement power" and so not property for IHT.<sup>89</sup>
- (6) The giving of the consent does not give rise to a gift with reservation since:
  - (a) A consent is probably not a "disposal" for the purposes of the gift with reservation rule.<sup>90</sup>

---

86 This is fairly clear from first principles, but some support can be found in two cases. In *Braybrooke* (see fn above) a tenant in tail exercised his power to dispose of the lands entailed, with the consent of the protector. The protector was not the creator of the disposition: "It cannot be argued that a person whose consent is apparently necessary to a disposition, makes that disposition." In *Mills v IRC* the father's consent was apparently thought necessary for the daughter (Hayley Mills) to enter into the arrangements: see 49 TC 367 at p.403. This did not prevent Hayley being a settlor.

87 Under general principles or by virtue of s.24 TCGA (extinction of an asset constituting a disposal).

88 It will matter if the usual CGT exemption on the disposal of an equitable interest does not apply (eg offshore trusts). It could matter if the conditions of TCGA Sch 4A are satisfied, but that would be unusual.

89 See s.272 IHTA.

90 See *Baird v Baird* [1990] 2 AC 548 at 557 [the exercise of a power of appointment] "disposes of no property of the appointor". HMRC agreed. The former CTO Advanced Instruction Manual E.91 provided:

"Nor should you regard the giving of a consent by a limited owner to the exercise

(b) In any event, a consent is not a disposal of property: see above.

(7) Waiver or non-exercise of the power does not make the powerholder a settlor or constitute a transfer of assets for ToA purposes.

HMRC do not appear to take any of these points at present; but cautious advisers may think that it is in principle better not to make a power of appointment subject to the consent of the life tenant (or any other beneficiary).

## 94.17 Beneficiary assigns interest

### 94.17.1 *Beneficiary assigns to trust*

Section 470(2) ITA/s.68B(6) TCGA set out three exceptions to the IT/CGT appointment rule. The first is:

#### **s.470(2) ITA**

A transfer of property is excluded for the purposes of subsection (1) if—  
(a) it occurs only because of the assignment by a beneficiary under settlement 1 of an interest in that settlement to the trustees of settlement 2

#### **s.68B(6) TCGA**

But subsections (3) and (4) do not apply in relation to a transfer of property—  
(a) which occurs by reason only of the assignment or assignation by a beneficiary under Settlement 1 of an interest in that settlement to the trustees of Settlement 2,

This excludes the operation of (what I call) the IT/CGT appointment rule. It does not expressly say who is the settlor: general principles apply. The answer is clear enough. The CG Manual provides:

#### **CG33220: Basic terms** [Mar 2020]

... However there are three specific cases which are excluded.

[1] A beneficiary, B, of S1 may transfer to S2 his interest in S1. In this case it is B who is the settlor (or an additional settlor) of S2.

A person who assigns an equitable interest under Trust 1 to Trust 2 is the

---

of the power of advancement as the making of a disposition.”

This passage does not appear in the current IHT Manual. But there is no reason to think that HMRC have changed their view.

settlor of Trust 2 but does not of course become the settlor of Trust 1.

#### 94.17.2 *B assigns to individual*

If a person (“the assignor”) assigns an equitable interest under Trust 1 to another individual there is no “Trust 2”.

If the assignment is for no consideration, the assignor is the settlor for the settlement-arrangement definition<sup>91</sup> so far as they have provided the income, but they are not a settlor of Trust 1 for the IHT definition, the CGT s.86 definition, or the standard IT/CGT definition.

HMRC agree: CG Manual provides:

#### **CG33220: Basic terms** [Mar 2020]

... Normally the same person was the settlor for both Income Tax and Capital Gains Tax. But this was not the case where a person had assigned a right to income. Such an assignment could not have affected the identity of the settlor for Capital Gains Tax purposes.

The CG Manual also provides:

#### **CG34801. Meaning of settlor** [Jul 2019]

In general if HMRC Trusts Head Office Bootle or Edinburgh, or their predecessors Financial Intermediaries and Claims Office or Claims Branch have advised or ruled that a person is the settlor for ... Part 5 Chapter 5 ITTOIA 2005 purposes then the same person should be regarded as the settlor for the purposes of these provisions. In exceptional cases, eg the assignment of a life interest, a person may have settled a right to income under an existing settlement without thereby creating a new settlement for CGT purposes. Although the Income Tax Settlements Legislation may apply as regards that income, that person is not thereby a settlor of the main settlement. ...

The position is similar to a variation of trust by beneficiaries; see below.

If the assignment is for full consideration, the assignor is not the settlor.

*Nader v HMRC* concerned a tax avoidance scheme whose facts are perhaps unlikely to recur, but I mention it for completeness. There was an arrangement under which, in short:

- (1) £1m was transferred (the details are not entirely clear) to a new trust under which a life tenant had an equitable interest (“the trust”).

---

91 *IRC v Buchanan* 37 TC 362.

(2) D purchased the equitable interest for £1m.<sup>92</sup>

D was held to be the settlor of the trust. That is right, because D provided property for the purposes of the trust (looking at the arrangement as a whole); or because D provided property in connection with the trust.<sup>93</sup>

### 94.17.3 *Beneficiary surrenders interest*

If a person surrenders an equitable interest under Trust 1 there is no “Trust 2”. In that case, that person is the settlor for the settlement-arrangement definition<sup>94</sup> so far as they have provided income, but they are not a settlor of Trust 1 for the IHT definition, the CGT s.86 definition, or the standard IT/CGT definition. As far as the identity of the settlor is concerned, there is no difference between a surrender and an assignment.

## 94.18 Disclaimer

### 94.18.1 *Disclaimer: Property law background*

*In Re Paradise Motor Co Ltd*:<sup>95</sup>

a disclaimer operates by way of avoidance, and not by way of disposition.

TSEM provides a brief outline:

#### **TSEM1840 Deed of disclaimer** [Mar 2017]

A person uses a true disclaimer to refuse a gift due under a trust. Effectively the person steps aside. This allows subsequent provisions of the trust to take effect.

A disclaimer can relate to

- capital
- income
- both.

A disclaimer has retrospective effect. It applies from the date that the

<sup>92</sup> The interest was in fact worthless, though in the event the trust fund passed to Miss D’s family, as intended. But that makes no difference as far as the “who is a settlor” issue is concerned.

<sup>93</sup> [2018] UKFTT 0294 (TC). This is not quite the way that the Tribunal put the point, and there are some gaps in the Tribunal’s analysis; but the Tribunal dealt with the matter very briefly, as the scheme had already failed for two other reasons.

<sup>94</sup> *IRC v Buchanan* 37 TC 362.

<sup>95</sup> [1968] 1 WLR 1125 at p.1143 followed *Allied Dunbar v Fowle* [1994] BCC 422.

entitlement arose. There may be a lapse of time between the entitlement arising and the disclaimer. This is not conclusive evidence that the deed cannot be a true disclaimer...

The person making a disclaimer may still benefit from another part of the trust income or capital. This is irrelevant. If that person seeks to impose new trusts, the deed is not a disclaimer. It is an assignment (TSEM1845).

**IHTM16180: Settled property: disclaimers** [May 2020]

... There is no time limit within which the person may disclaim. This is a necessary provision because the person taking the (unwanted) benefit might do so as a result of an unexpected contingency, and many years after the trusts began.

A disclaimer need not be made in writing. Disclaimer by action is possible although, apart from writing, an oral message to the trustees might be more common.

Disclaimer cannot be made if the interest has been accepted, i.e. if any benefit has been taken under it. However, where an interest in possession has vested the beneficiary can validly disclaim before any benefit has been accepted...

Under a true disclaimer, the beneficiary in question falls out of the picture and the trusts of the will or settlement take effect ignoring that beneficiary. It follows that the beneficiary cannot purport to disclaim and redirect the benefit to someone else...

94.18.2 *Disclaimer: Tax consequences.*

A disclaimer operates retrospectively as between the parties to a disposition: their position is as if the disclaimed disposition had not been made.

The tax position depends on the applicable statutory provisions. There is no general rule that a disclaimer operates retrospectively for tax purposes, or is to be ignored for tax purposes. There are a number of statutory provisions which say just that, but they apply in specific situations only. For instance, s.93 IHTA provides:

Where a person becomes entitled to an interest in settled property but disclaims the interest, then, if the disclaimer is not made for a consideration in money or money's worth, this Act shall apply as if he

had not become entitled to the interest.<sup>96</sup>

Deeds of variation are another statutory example. Section 17 IHTA provides:

None of the following is a transfer of value—  
 (a) a variation or disclaimer to which section 142(1) below [instruments of variation] applies ...

Where there is no express provision, it is a matter of looking at the provisions applicable generally. What if an individual disclaims a gift or inheritance which is not an interest in settled property? Section 93 does not apply, but it is not needed. A disclaimer is not a disposition, so it is not a transfer of value.<sup>97</sup> A disclaimer is likewise not a disposal, so GWR does not apply.<sup>98</sup> A disclaimer may be a disposal for CGT, on the basis that it amounts to the entire loss, destruction, dissipation or extinction of an asset.<sup>99</sup> But a disclaimer promptly on acquisition is not likely to give rise to a gain.

It is considered that a disclaimer is not a transfer of assets for ToA purposes.

A disclaimer, if possible, may be preferable to a surrender or assignment. The distinction between disclaimer and surrender/assignment is therefore important.

#### 94.18.3 *Person disclaiming: a settlor?*

TSEM provides:

**TSEM1840 Deed of disclaimer** [Mar 2017]

...The person disclaiming is not a “settlor” within [the settlement-arrangement definition]. Subsequent trusts that result from the disclaimer retain their original settlor.

---

96 See IHTM16180: Settled property: disclaimers [May 2020]: “The interest capable of being disclaimed need not be an interest in possession. It can be a reversionary interest, or a right under a non- - interest in possession settlement. S93 says ‘interest’ and in the case of a NIIP [non-IIP] settlement the object has the right to be considered; which is his ‘interest’.”

97 See 70.3 (Transfer of value/value transferred).

98 See 74.5 (Disposal by way of gift).

99 See 53.2.3, 53.2.3 (“Disposal”).

But absent a statutory provision, there is no general principle that a disclaimer operates retrospectively for tax purposes: *Re Stratton's disclaimer*.<sup>100</sup> It does not seem clear that the TSEM statement would be upheld if challenged. HMRC may change their mind or it may suit a taxpayer to argue that it is wrong.

#### 94.18.4 *Partial disclaimer*

IHTM provides:

**IHTM16180: Settled property: disclaimers** [May 2020]

At English law a partial disclaimer is not possible so that the whole of the interest must be disclaimed (this however is subject to the terms of the trust)...

SP E18 provides:

**E18 Partial disclaimers of residue**

Under Scots law there are certain circumstances in which a residuary legatee can make a partial disclaimer. Where this is possible the Commissioners for HMRC accept that the provisions of IHTA 1984 s 142 which deal with disclaimers, apply.

More analytically, references to a partial disclaimer (if possible) is a disclaimer, in the general sense of the word and within statutory provisions.

#### 94.18.5 *Foreign law disclaimer*

Where the disposition is governed by foreign law, the disclaimer/assignment distinction may be more difficult to draw.

For instance, art 10A Jersey (Trusts) Law 1984 provides:

- (1) Despite the terms of the trust, a beneficiary may disclaim, either permanently or for such period as he or she may specify, the whole or any part of his or her interest under a trust if he or she does so in writing.
- (2) Paragraph (1) applies whether or not the beneficiary has received any benefit from the interest.
- (3) Subject to the terms of the trust, if the disclaimer so provides it may be revoked in accordance with its terms.

---

100 [1958] Ch 42.

If a beneficiary has received a benefit, they may still disclaim the interest, but do they keep the benefit?<sup>101</sup> If so, it is suggested that an act (to use a neutral term) which Jersey law describes as a “disclaimer” is not a disclaimer for UK tax purposes, and in particular, is not within s.93 IHTA. (Of course the fact that Jersey law calls something a “disclaimer” does not make it so in UK law. Scare quotation marks are appropriated here.) The same may apply if the “disclaimer” extends to the benefit as well as the interest. It is an assignment or perhaps a surrender. The same would apply to what Jersey law would call a “revocable disclaimer” (though I wonder if that is ever used in practice).

### 94.19 Dividend-waiver settlement

There have been two dividend-waiver cases. Simplifying to bare essentials: in *Donovan v HMRC*<sup>102</sup> shares were held by H (80%) and W (20%).<sup>103</sup> In *Buck v HMRC*<sup>104</sup> the disparity was more extreme as H had 999 shares and W had 1 share. In both cases, H waived dividends, so that W received more dividends (taxable at W’s lower rate).

Running through the s.624 issue list, it was held:<sup>105</sup>

- (1) The waiver was a settlement-arrangement. I refer to this as a **“dividend-waiver settlement”**.
- (2) H (the waiving shareholder) was the settlor.
- (3) The income arising under the settlement was the additional dividends received by W as a result of the waiver (the **“Additional Dividends”**).
- (4) The property from which that income arose was:<sup>106</sup>
  - (a) W’s shares; or arguably
  - (b) H’s shares

Either way this was property in which the settlor (H) had an interest.<sup>107</sup>

---

101 The drafting might deal with this expressly; but the question arises if there is a simple disclaimer of an interest, where the point is not dealt with one way or the other.

102 [2014] UKFTT 48 (TC).

103 In point of detail, the company was held by two individuals and their spouses, in the proportion 80% (husbands) and 20% (spouses). But nothing turns on that.

104 [2008] UKSPC SPC00716.

105 See 44.5 (Settlor-interested trust).

106 See 44.3.1 (Property comprised in a settlement).

107 See 44.6.2 (“Settlor-interested” for s.624).

(5) The s.624 spouse exemption did not apply.<sup>108</sup>

Accordingly, in both cases, H was taxed on the Additional Dividends under s.624. See too 14.7 (Waiver of interest/dividends).

In the reported cases the amounts involved were modest, and the tribunal did not have the benefit of full argument by Counsel for each side. These cases did not explore two issues which might arise with waivers:

- How does one ascertain the amount of the Additional Dividends? In both reported cases dividends could not have been declared in the absence of the waivers because there were insufficient profits available for distribution. Was that essential?
- What is the property from which the Additional Dividends arises? It arises directly from W's shares, but indirectly from H's shares (which provided the waiver which allowed the Additional Dividends to be received by W).

TSEM provides:

**TSEM4220: about dividend waivers** [Jul 2017]

Where a close company declares a dividend and one or more of the shareholders waives the dividend in circumstances where other shareholders may benefit, there may be an arrangement where the settlements legislation could apply.

In such cases, we argue that the person making the waiver has indirectly provided funds for an 'arrangement' or 'settlement' by giving up a sum to which he or she is, or may become, entitled.

The bounty will be represented by the enhanced part of the dividend that the non-waiving shareholders received.

Such a dividend waiver is a settlement of income and where the person benefitting under the arrangement is a spouse or civil partner the settlor will have retained an interest and ITTOIA/S624 will apply. Where the person benefitting under the arrangement is a minor child of the settlor ITTOIA/S629 will apply.

94.19.1 *Donee not spouse/minor child*

What about a dividend waiver where the person benefitting (the non-

---

108 See 89.14 (s.624 spouse exemption). If H had given the shares to W outright, this exemption would have applied.

waiving shareholder) is not a spouse/minor child of the waiving shareholder, but, say, an adult child or cohabitee? TSEM continues:

Where the person benefiting under the arrangement is not a spouse, civil partner or minor child the settlements legislation will not apply unless there are arrangements under which the money will be paid, or used to benefit the settlor (or spouse etc).

The income arising under the settlement is the Additional Dividends. The HMRC analysis assumes, I think generously, that the property from which that income arises is the shares held by the person who benefits from the waiver (the non-waiving shareholder). Adopting the “broad and realistic” view which *Jones v Garnett* commends, the better view that the property from which Additional Dividends arise is or includes the settlor’s shares which provided the waiver. If that is right, then s.624 will apply even if the person benefiting under the waiver-settlement is not a spouse or minor child. Perhaps the issue will not arise very often.

#### 94.19.2 *Distributable profits*

TSEM provides:

**TSEM4225 dividend waiver: when settlements legislation may apply**  
[May 2019]

Not all dividend waivers are vulnerable to challenge. ...You should look out for the following factors, which would indicate that the settlements legislation is likely to apply.

- [1] The level of retained profits, including the retained profits of subsidiary companies, is insufficient to allow the same rate of dividend to be paid on all issued share capital.
- [2] Although there are sufficient retained profits to pay the same rate of dividend per share for the year in question, there has been a succession of waivers over several years where the total dividends payable in the absence of the waivers exceed accumulated realised profits.
- [3] There is any other evidence, which suggests that the same rate would not have been paid on all the issued shares in the absence of the waiver.
- [4] The non-waiving shareholders are persons whom the waiving shareholder can reasonably be regarded as wishing to benefit by the waiver.

[5] The non-waiving shareholder would pay less tax on the dividend than the waiving shareholder...

**Example 12 - dividend waivers**

Mrs H owns 80 ordinary shares in H Limited. Mr H owns 20 shares. In 2000, the company made a profit of £25,000.

Mrs H waived her right to any dividend. The company then declared a dividend of £1,000 per share, and Mr H, who had no other income, received a dividend of £20,000.

The HMRC analysis is as follows:

No property has been transferred so the settlement is one of income. As such, the exemption for outright gifts to spouses is not in point

This is correct.

and we would apply the settlements legislation in these circumstances. Clearly a dividend of this amount could not have been paid from the company's profits on all the shares,

That is correct assuming there are no profits available for distribution carried forward from earlier years. Perhaps with small family companies that is typically the case.

so the waiver arrangement enhanced the dividend paid to Mr H. £16,000 of the dividend paid to Mr H is attributed to Mrs H under ITTOIA/S624 because the waiver was a bounteous arrangement.

The implication is that if (or so far as) the company had sufficient profits to pay the dividends without the dividend waiver(s) then there is no income arising under the settlement, in my terminology, no Additional Dividends. And that seems right, because if the company did have sufficient profit to pay all the dividends without the waiver, the effect of the waiver is not to benefit the non-waiving shareholder (typically the spouse) directly; the effect of the waiver is to benefit the company (which enures to the benefit of all shareholders including the shareholder who waives the dividends (who is typically the largest shareholder, as was the case in *Donovon* and *Buck*).

**94.20 Alphabet shares**

This section considers arrangements under which a company with different

classes of shares may pay dividends to one class, to the exclusion of others. This is sometimes called “alphabet shares” and I use that term for lack of better.<sup>109</sup>

Running through the s.624 issue list<sup>110</sup> the position is in principle as follows:

- (1) The arrangement is a settlement-arrangement.<sup>111</sup> I refer to this as an “**alphabet-share settlement**”.
- (2) A person who controls the company<sup>112</sup> is the settlor of the dividends because they provide the dividends (directly or indirectly).
- (3) The income arising under the settlement is the whole of the dividends.
- (4) The property from which that income arose is the shares which carry control together with the shares which pay the dividends.<sup>113</sup>
- (5) The settlor has an “interest” in that property.<sup>114</sup>
- (6) The s.624 spouse exemption would not apply.<sup>115</sup>

TSEM provides:

**TSEM4225 dividend waiver: when settlements legislation may apply**

[May 2019]

**Example 13 - dividends on certain shares**

As in example 12<sup>116</sup>, but in this case Mrs I owns [80] A shares and Mr I owns [20] B shares. Both A and B shares rank equally.

Again profits of £25,000 are made and a dividend of £20,000 is voted on the B shares while no dividend is voted on the A shares.

109 The idea is an old one: It was used in *Chamberlain v IRC* where it was defeated on the Revenue’s second attempt, 28 TC 88, on the basis of (now repealed) close company apportionment provisions.

110 See 44.5 (Settlor-interested trust).

111 This is self-evident, but if authority is needed, see *Patmore v HMRC* [2010] UKFTT 334 (TC) at [72]: “that a decision by the controlling shareholder to only issue a dividend on one class of shares rather than another ... can be an arrangement caught by [s.624].”

112 Further thought would be needed if there is no one person with control.

113 See 44.3.1 (Property comprised in a settlement).

114 See 44.6.2 (“Settlor-interested” for s.624).

115 See 89.14 (s.624 spouse exemption). If H had given the shares to W outright, this exemption would have applied.

116 The original erroneously reads: example 1. For example 12, see 94.19 (Dividend-waiver settlement).

This appears to be an alphabet share arrangement. Under the company articles, typically, Mrs I (as she has control) could procure the dividend to be paid any shareholder at her discretion, including herself.

The HMRC analysis is as follows:

Clearly by not voting dividends on the A shares (which rank equally with the B shares) this is a bounteous arrangement as the dividend paid on the B shares could only be paid if no dividend was declared in respect of the A shares.

On the facts of the example one can accept that “the dividend paid on the B shares could only be paid if no dividend was declared in respect of the A shares.” (It is assumed there are no profits available for distribution carried forward from earlier years.) But I would have thought this was a bounteous arrangement (ie, a settlement-arrangement) even the profits were, say £40k, so that a dividend could have been paid on the A shares).

£16,000 of the dividend paid to Mr I is attributed to Mrs I under ITTOIA/S624 because the decision only to vote dividends on certain shares was a bounteous arrangement.

The entire dividend of £20k should be attributed to the settlor, not just 80%. The analysis of the Manual appears to have followed its analysis of dividend waivers. But the analogy is mistaken, assuming (as is typically the case) that the holder of alphabet shares has no right to any dividends unless the shareholder with control votes to declare them.

What if the B shares were held by a person other than the spouse or minor child of the settlor? The example suggests that s.624 does not apply. But it is considered that it does.<sup>117</sup>

The topic arose in *Patmore v HMRC*<sup>118</sup> but the facts were unusual. The judge found that the beneficial ownership of the shares was as follows:

	<b>A shares</b>	<b>B shares (no votes)</b>	<b>Total</b>
H	57.5	0	67.5
W	<u>42.5</u> <sup>119</sup>	<u>10</u>	<u>52.5</u>

117 For the reasons see 94.19.1 (Donee not spouse/minor child).

118 [2010] UKFTT 334 (TC).

119 This was on the basis of a somewhat surprising constructive trust, but the outcome should have been the same even without the constructive trust; what mattered was

Total    100                    10                                    110

Dividends were paid on A and B shares, the amounts varying from one year to the next. The judge's solution was:

- (1) Ascertain the total annual dividends, whether paid on A or B shares
- (2) 42.5% of the total was the regarded as income of W
- (3) the balance was regarded as income of H

This could be justified by a "broad and realistic" view of what is the income arising under the settlement.<sup>120</sup> The key fact was that W had (in short) provided 42.5% of the consideration for the acquisition of the shares. More commonly, where alphabet shares and dividend waivers are concerned, the donee (typically, a spouse or children or a family trust) under the arrangement does not provide any consideration. Then the *Patmore* approach will not apply.

Alphabet shares raise other issues in addition to the settlor-interested trust code. The list includes:

- (1) The dividends may be employment income<sup>121</sup>
- (2) The shares may be employment-related securities (not discussed here)
- (3) The creation of alphabet shares may give rise to an IHT charge<sup>122</sup>
- (4) Company law issues (do unfair prejudice rules constrain the power to declare dividends on the alphabet shares?) - not discussed here.

Ill-advised taxpayers are playing with fire.

## 94.21 Partnership-settlement

TSEM provides:

### **TSEM4215: Settlements legislation: partnerships** [Jul 2017]

The creation of a partnership may be regarded as an arrangement for transferring income from a settlor to members of his or her immediate family - see BIM82065.

Where the incoming partner receives a share of profits out of all

that W provided (in short) 42.5% of the consideration.

120 The tax analysis proposed here is not quite that of the judge, but once again, the judge did not have the benefit of hearing Counsel for both sides.

121 See *HMRC v PA Holdings* [2011] EWCA Civ 1414.

122 See 77.6 (Change in share capital/rights). But if the company is a trading company, IHT business property relief is likely to apply.

proportion to the contribution made to the partnership, the arrangement would include an element of bounty.

Where the incoming partner is a spouse or civil partner and he or she acquires an unlimited share in the partnership assets and income and there are no other arrangements or conditions applied to the gift then the exemption for outright gifts will apply and a challenge under the settlements legislation is not appropriate.

#### 94.21.1 *Partnership with spouse*

This is a settlement-arrangement, and within s.624 unless the s.624 spouse exemption applies.<sup>123</sup>

TSEM provides:

**TSEM4215: Settlements legislation: partnerships** [Jul 2017]

... The settlements legislation will apply where there is an arrangement under which the property received by the spouse or civil partner is wholly or mainly a right to income.

HMRC give some straightforward examples:

Example	Facts	Analysis
8	Arm's length terms (no bounty)	No settlement
<i>Arrangements with bounty:</i>		
9	P'ship share of income + capital	Settlement but s.624 spouse exemption
10	P'ship share of income only	Settlement, no exemption
11	P'ship capital reverts to settlor	Settlement, no exemption

**Example 8 sleeping partner - settlements legislation does not apply**

Mr and Mrs O and their friend Mr P have a business idea. They want to open a Cycle Repair Shop. Mrs O does not want to work but agrees to invest in the business without taking an active part, that is to say she is a sleeping partner. Each partner invests £10,000 and the £30,000 is used to lease a shop, buy equipment and stock and keep the business going until trade builds up. Under the partnership agreement Mr O and Mr P receive £500 a week with all the remaining profits split three ways between the partners.

The business is a huge success and makes large profits and continues to grow. Within five years Mrs O is receiving £50,000 a year as her share of the partnership profits.

---

<sup>123</sup> See 89.14 (s.624 spouse exemption).

Although Mrs O does not work in the business, and her initial investment has turned out to be very successful, the settlements legislation would not apply to treat her share of the partnership profits as Mr O's. Mrs O's original investment was vital to get the business started and she risked losing it if the business failed.

More analytically, there is no element of bounty (gratuitous intent) and so no settlement. Though had there been a settlement, it would not have been settlor-interested.

**Example 9 - Gifted shares in partnership as an outright gift not wholly or substantially a right to income**

Mr Alpha and Mr Beta are in partnership as second-hand car dealers. They own the freehold premises through which the partnership trades (valued at £200,000) and routinely carry a stock of 50 used cars. The business is successful and has established goodwill in the locality as a reliable trader. It employs a number of salesmen and office staff. Profits of £100,000 a year are split equally between the partners. They decide to admit their wives to the partnership and amend the partnership agreement in order to split profits and capital equally four ways. Mrs Alpha and Mrs Beta do no work in the partnership. Although this is a bounteous transaction it is an outright gift that is not substantially a right to income and is excluded from the definition of settlement by ITTOIA/S626.

**Example 10 - sleeping partner - settlements legislation does apply**

Mr Y, an architect, commences business as a sole trader. The business is successful and a few years later annual profits are in the region of £80,000. The business is transferred to a new partnership of Mr & Mrs Y. A deed is executed under which income profits are to be shared equally but the rights to share in capital profits belong solely to Mr Y. Mrs Y subscribes no new capital and carries out no work whatsoever for the partnership, that is to say she is a sleeping partner. Profits for the year are £80,000 and £40,000 belongs to Mrs Y. This is a bounteous arrangement transferring income from one spouse to another. The settlements legislation will apply and Mrs Y's share of the profits will continue to be assessed on Mr Y.

#### 94.21.2 *Partnership with non-spouse*

Where the incoming partner is not a spouse or civil partner the legislation [the settlements code] will not apply unless there are arrangements or conditions where the property can revert to the settlor

(or spouse or civil partner).

**Example 11 - Gift with conditions attached**

Mr T is in partnership with his wife Mrs T. Their daughter is a university student. The deed is altered to admit the daughter as a partner. All the partners agree that on finishing her course the daughter's interest in the partnership will come to an end. The amendment of the partnership agreement under which the daughter is included without any additional capital or value being added by her is an arrangement with the requisite element of bounty. The gift from the parents is subject to conditions under which the property given will revert to them. The daughter's income is therefore treated as the income of the parents under ITTOIA/S624...

The Income Streams Code also needs consideration.<sup>124</sup>

## 94.22 Resettlement by beneficiaries

### 94.22.1 Power to vary/resettle: Trust law background

Beneficiaries absolutely entitled<sup>125</sup> under a trust may in principle:

- (1) transfer trust property to a distinct trust ("a resettlement") or
- (2) vary the terms of a trust ("a variation").<sup>126</sup>

The same trust law rules apply to an estate of a deceased person: where an estate creates a will trust, or intestacy, the beneficiaries of the estate may

124 See 51.12 (Partnership income stream).

125 If there are minor and unborn beneficiaries, a variation requires the consent of the court under the VTA 1958 discussed in the next section.

126 See s.1(1) VTA 1958 which assumes that beneficiaries have power to vary a trust: "... the court may ... approve on behalf of [unborn or unascertained beneficiaries] any arrangement ... *varying* or revoking all or any of the trusts..."

The court only approves on behalf of unborn or unascertained beneficiaries, and adult beneficiaries can make a variation without approval of the court. See *Re Holt* [1969] 1 Ch 100 at p.120:

"Any variation owes its authority not to anything in the initial settlement but to the statute and the consent of the adults coming, as it were, *ab extra*. *This certainly seems to be so in any case not within the Act where a variation or resettlement is made under the doctrine of Saunders v Vautier by all the adults joining together; and I cannot see any real difference in principle in a case where the court exercises its jurisdiction on behalf of the infants under the Act of 1958.*"

Further consideration is required if the trust is not governed by English law, or by a jurisdiction which adopts English law principles.

in principle vary or resettle the property of the estate.<sup>127</sup>

The variation/resettlement distinction matters for various purposes; I discuss it here because one must identify the settlement in order to identify the settlor.

#### 94.22.2 Variation or resettlement?

Careful drafting can normally achieve whichever is desired.

The leading case is *Roome v Edwards* where the issue was whether the exercise of a power of appointment gave rise to a new trust distinct from the original trust. The House of Lords comment on what constitutes a distinct trust:

There are a number of obvious indicia which may help to show whether a settlement, or a settlement separate from another settlement, exists. One might expect to find separate and defined property; separate trusts; and separate trustees. One might also expect to find a separate disposition bringing the separate settlement into existence. These indicia may be helpful, but they are not decisive. For example, a single disposition, eg, a will with a single set of trustees, may create what are clearly separate settlements, relating to different properties, in favour of different beneficiaries, and conversely separate trusts<sup>128</sup> may arise in what is clearly a single settlement, eg when the settled property is divided into shares. There are so many possible combinations of fact that even where these indicia or some of them are present, the answer may be doubtful, and may depend upon an appreciation of them as a whole. ... I think that the question whether a particular set of facts amounts to a settlement should be approached by asking what a person, with knowledge of the legal context of the word under established doctrine and applying this knowledge in a practical and common-sense manner to the facts under examination, would conclude.<sup>129</sup>

---

127 But the tax consequences for an estate may be different: see 94.38 (Trust made by deed of variation).

128 The term usually used now is “sub-funds”.

129 54 TC 359 at p.389. Practicality and common sense seem a sound basis for approaching most questions, but how far do they take us? I suspect they are invoked most often when the writer is unable to articulate anything precise or conceptual. Lord Wilberforce also said that “settlement” and “trusts” are “terms which are also used by businessmen or laymen in a business or practical sense.” But they are not. If business or lay persons were asked what these terms meant, they would say “You

The CG Manual provides:

**Variations of trusts**

**37881.** [June 2016]

It is also possible, with the consent of the trustees, to vary the terms of the trust. There are all kinds of variation possible. Some property may pass absolutely to beneficiaries or existing separate settlements. Clearly this must involve disposals under TCGA 1992, s. 71(1). Other property is held on the same trusts as before and/or on different trusts.

**37882.** [June 2016]

In such circumstances it is necessary to consider, in the light of the principles set out in the preceding paragraphs and also CG33290-33304, what the correct analysis is. The alternatives are

- [1] mere variation of the terms of the existing settlement
- [2] continuation of the old settlement as regards part of the property, with the remainder being held on one or more new settlements
- [3] termination of the old settlement in its entirety being replaced by one or more new settlements. This last is an unlikely analysis unless a significant part of the property is being distributed absolutely. In such circumstances it may be helpful to refer to *Ewart v Taylor* where one reason for the court holding that a new settlement had come into existence was that it was part of a scheme for winding up the old settlement. See 57 TC 401 at 468, Section I.

...

**37887.** [June 2016]

If, however, in a case where there is no such election or statement of intent [under s.62(6)(7) TCGA], the will or intestacy provided for property to be held subject to trusts, and these trusts are varied or replaced by the deed of variation, then there are two questions to be answered.

- a. Is there a new separate settlement?
- b. If so, who is the settlor of that settlement?

If there are only minor variations clearly there is no new settlement and the deceased remains the settlor. Minor variations would include for instance changes in the administrative powers of the trustees, or the provision of an ultimate gift over, that is, a provision saying to whom the property is to pass if the trusts fail, or the appropriation of property to

---

had better ask a lawyer”.

But perhaps nothing turns on these observations.

particular funds within the settlement. Otherwise it is necessary to determine whether there is a new settlement in accordance with the principles explained at CG37882, and see CG37889. If there is a new settlement then the identity of the settlor should be determined in accordance with CG37900. ...

#### 94.22.3 *Will varied: NRB band trust*

The CG Manual provides:

**37889.** [June 2016]

One situation which has been quite common<sup>130</sup> is where under the will there is a life interest trust for the spouse of the deceased. For Inheritance Tax reasons this is partly varied so that there is a discretionary trust up to the amount of the Inheritance Tax nil rate band. In such a case, where the spouse continues to be a beneficiary of the new discretionary trust, it would often be appropriate to regard this, except for the purposes of Inheritance Tax, as little more than a cosmetic arrangement, particularly if the broad intention is that the bulk of the income should be paid to the spouse. So this would be regarded for Capital Gains Tax purposes as a variation of the original will trust, and not as giving rise to a new separate settlement. The deceased remains the settlor.

Is the arrangement is aptly described as “little more than cosmetic”? If that is how the parties understand it, have they have misunderstood the position? Discuss. But it does not much matter.

More analytically, whether or not the discretionary trust fund constitutes a distinct trust from the rest of the trust fund would depend on the drafting: it might be possible to achieve a resettlement. But in practice the drafting is not likely to be done that way. If the parties to the variation are the spouse and the trustees but not all the other beneficiaries, there could not be a resettlement. See too 94.17 (Beneficiary assigns interest).

#### 94.22.4 *Resettlement: Who is settlor?*

A resettlement (unlike a variation) involves a possible change of settlor. The CG Manual provides:

**CG37900. Identity of settlor** [Feb 2020]

---

<sup>130</sup> Author’s footnote: This ceased to be common after the introduction of transferable nil-rate bands in 2007, but that does not affect the point being made.

Where there is a variation of a trust of the kind described in CG37880+ [variation by beneficiaries] it is necessary to identify the settlor. If the conclusion taken is that there are no new settlements then for CGT purposes the identity of the settlor is unaffected. However if in effect interests in income have passed from one person to another, the former may well be the settlor of an arrangement for Income Tax purposes.

**CG37901. Identity of settlor** [Jul 2019]

If however one or more new settlements have come into existence, then the settlors of those settlements are one or more of the parties to the variation. The question should be tackled on a practical basis by determining where each beneficiary's share has gone. ...

**CG37903. Example** [Jul 2019]

Under a settlement made by X, A and B are each entitled to half the income. On A's death his son P will get half absolutely. On B's death her daughter Q will get half absolutely. The values of their respective interests are, say:

A's life interest	£60,000 [30% total value]
P's remainder	£40,000 [20% total value]
B's life interest	£75,000 [37.5% total value]
Q's remainder	£25,000 [12.5% total value]

Under the variation, executed when all the beneficiaries are adults, which is considered to terminate the old settlement:

A takes 30% of the property.

20% goes to a new accumulation and maintenance settlement for P's children.

B takes 25% of the property.

The rest [25%] is held for Q for life with remainder to Q's son R.

P should be regarded as the settlor, for the purpose of the annual exempt amount, of the accumulation and maintenance settlement, because this is how his share has been dealt with.

B and Q should be regarded as the settlors of the other settlement. ...

B and Q are joint settlors: see 95.1 (Trusts with two settlors).

## 94.23 Variation under VTA 1958

### 94.23.1 VTA law background

Section 1 VTA 1958 provides (so far as relevant):

(1) ... the court may ... approve on behalf of—

(a) any person ... who by reason of infancy or other incapacity is

- incapable of assenting, or
- (b) any person ... who may become entitled... to an interest ... or
  - (c) any person unborn, or
  - (d) any person in respect of any discretionary interest of his under protective trusts ...

any arrangement ... varying ... the trusts ...

Provided that except by virtue of paragraph (d) of this subsection the court shall not approve an arrangement on behalf of any person unless the carrying out thereof would be for the benefit of that person.

The CG Manual summarises:

**CG37883. Under Variation of Trusts Act [Feb 2020]**

The trusts of an existing settlement may be varied (in particular when the interests of unborn or minor beneficiaries are involved) by way of an Arrangement agreed between those parties of full age and approved by a Court Order under the Variation of Trusts Act 1958 (in Scotland Section 1 Trusts (Scotland) Act 1961) on behalf of those unable to give consent. ...

94.23.2 *VTA: Variation or resettlement?*

The CG Manual provides:

**CG37884.** [Jul 2019]

If so the principles of CG37880 – CG37882 apply. The degree of variation may exceptionally be such as to involve the termination of the original settlement in whole or in part and the creation of a new settlement. The fact that the courts may only consent to variation of the trusts does not prevent this. (If so then consideration must be given to the identity of the settlor, see CG37900.) ...

But the power under the VTA is a power to *vary* trusts, so the court order cannot have the result of an inter-trust transfer. This is confirmed by *Wyndham v Egremont*:

[25] ... The concern here is whether, on the ground that they give rise to a resettlement, the variations to the trust, principally the extension of the trust period, might be said to give rise to a ‘deemed disposal’ under s 71(1) TCGA or might lead to adverse consequences for inheritance tax or stamp duty land tax purposes. I propose to take this very shortly because, in my view, [*Roome v Edwards*] is in point. I do not consider

... that the arrangement does give rise to a resettlement.<sup>131</sup>

### 94.23.3 Tax consequences of variation

Where a court approves a variation of trust on behalf of a minor beneficiary, under the VTA, it is considered that the minor beneficiary does not become a settlor for two reasons (either of which would suffice):

- (1) It is not likely that the minor provides any property. The variation must be for the benefit of the minor.
- (2) The court in giving its approval does not merely act on behalf of the minor: the court has a wider role.<sup>132</sup> The position is analogous to trustees exercising a power of advancement.<sup>133</sup>

HMRC may not agree with point (2). CG Manual para 37902 provides:

**Minor as settlor** [June 2016]

It is considered that where a court has given consent on behalf of a minor, that minor can be a settlor. The authority lies in *Yates v Starkey*, 32 TC 38, where it was held that a person could be a settlor under compulsion, and *Mills v IRC*, 49 TC 367, where it was held that a minor with very little involvement in the transactions could be the settlor because she provided the property.

Neither of these cases compels a court to accept the HMRC view. But in practice the issue is unlikely to arise.

## 94.24 Property provided to co in a trust

HMRC take the view that providing property to a company owned by a trust is in principle provision of property for the purposes of the trust, and so makes the provider a settlor. SP 5/92<sup>134</sup> provides:

16 The condition in TCGA Sch 5 para 9(3) may be satisfied where property or income is provided to a company in which the trustees are

---

<sup>131</sup> 12 ITCLR 461 at p.471.

<sup>132</sup> *Re Steed* [1960] 1 Ch 407; *Re Remnant* [1970] Ch 560. This view is consistent with the fact that where a court approves a variation on behalf of an unborn beneficiary, that beneficiary clearly does not become a settlor.

Further consideration is needed if foreign trust laws apply.

<sup>133</sup> See 94.13 (Inter-trust transfer: Advancement).

<sup>134</sup> For SP 5/92 and para 9(3) see 94.2.4 (Guidance).

participators.<sup>135</sup>

This is supported by some case law.<sup>136</sup> It is correct for 3 definitions of settlor: the standard IT/CGT definition, the settlement-arrangement definition and the IHT definition.

However, for the CGT s.86 definition of settlor, the question is not whether a person has provided property for the purpose of the settlement. The question is whether a person has provided *settled property*. So if a person only provides property for a company held by a trust, the person is not the settlor under this definition.<sup>137</sup> It is suggested that the s.86 definition wording ought to be aligned with the other definitions.

#### 94.24.1 *Transfer within trust/co group*

SP 5/92<sup>138</sup> para 18 provides:

In general, transactions between trustees and companies which they, directly or indirectly, wholly own, or between such companies, are outside the scope of TCGA 1992 Sch 5 para 9(3).<sup>139</sup>

---

135 The SP continues with an exception:

“Where, however, the transaction is carried out with the sole object of leaving funds within the company for the company’s purposes and it can be shown that any indirect benefit to the trust is merely incidental to that object, the transaction is disregarded for the purposes of para 9(3).

17 Examples of transactions which may be so disregarded are—

- where another shareholder waives an entitlement to all or part of a dividend; or
- where a director restricts withdrawals of remuneration voted,

in order to assist the company’s cash flow, and no payments are made, directly or indirectly, to the trustees as a result of this. All relevant factors will be considered in determining whether it is appropriate to apply this practice in a particular case.”

136 Comments in *Crossland v Hawkins* 39 TC at p.506 followed in *Mills v IRC* 49 TC 367.

137 See *Coombes v HMRC* [2007] EWHC 3160 (Ch). The case adopts a non-purposive construction which does not seem attractive; see App 2.11.5 (Do shares represent co assets). If the point had arisen today it would likely have been decided differently. But the decision has stood for so long that Parliament may be taken to have acquiesced; and in the interests of stability it ought to be upheld if it now came to the Court of Appeal.

138 For SP 5/92 and para 9(3), see 94.2.4 (Guidance).

139 The SP sets out a commonsense definition of “wholly owned” and continues with a qualification:

“This approach may not, however, be taken where, on the facts of a particular

This is right. There can be no element of bounty (gratuitous intent) so a wholly-owned company cannot “provide” property to its owner, just as a 100% shareholder cannot “provide” property to their company.

## 94.25 Provision of services

### 94.25.1 *Service envisaged at outset*

In two cases (the “film star” cases):

- (1) A friendly third party created a trust.
- (2) The trust acquired a company.<sup>140</sup>
- (3) A well-known actor (Jack Hawkins/Hayley Mills) entered into a contract to provide services to the company at a substantial undervalue.<sup>141</sup>
- (4) The company resold the actor’s services and duly received what the earlier case described as an “enviable” fee.
- (5) The company made profits and paid dividends to the trustees.

In both cases the classic trust created at step (1) was a settlement-arrangement. The question was who was the settlor. It was held that the actor was the settlor.<sup>142</sup>

---

case, it appears that the transaction has been entered into solely or mainly for the purposes of obtaining a UK tax advantage.”

For s.87 aspects of transactions within a trust/company structure, see 57.12 (Trust/company group disregard).

140 The company was UK resident, so transfer of assets abroad issues did not arise. In *Crossland v Hawkins* the company was created first, and it was said (implausibly) that the trust was not contemplated at that time; but that made no difference: see App 2.2.4 (Identifying the arrangement).

141 The position is clearer where there is a contract between the settlor and the underlying trust company, because the settlor indirectly provides *two* assets for the purposes of the settlement:

- (1) the contract (provision to the company is provision for the purposes of the settlement); and
- (2) the dividends

But point (2) is sufficient. In *Jones v Garnett* there was no contract between Mr Jones and the company, but that made no difference.

142 *Crossland v Hawkins* 37 TC 493 approved *Jones v Garnett* [2007] UKHL 35; *Mills v IRC* 49 TC 367. More accurately, the actor was one of the settlors but the contribution by the third party who created the trust was ignored as insignificant.

Viscount Dilhorne in *Mills v IRC* considered two situations:

- (1) Employees of a company held by trustees increase the company's profits, and the trust income, by their work.
- (2) A stockbroker who gives good advice increases the trust income.

in a sense all the employees of a public company, some shares in which are held by trustees of a settlement, could be said to contribute to the profits of the company and so to the shareholders' dividends or the value of their shares, and so to the income of the settlement or the value of its capital assets. If, ... activities which result in an increase in the income or value of a settled fund can constitute the provision of funds for the settlement, it might be said that every employee of such a company in some measure provides funds for a settlement on the trusts of which some shares of the company are held; but it would be ridiculous to suppose that Parliament intended that in such a case every employee of the company should be treated as a settlor.

A stockbroker who advised trustees of a settlement to invest part of their trust fund in shares of a company which he expects to be shortly taken over on advantageous terms, including, perhaps, a payment in cash over and above the existing market value of the shares, might in the event of his expectations being fulfilled be said in a sense to have provided funds for the purpose of the settlement. The exercise of his personal skill or specialised knowledge would have resulted in an increase in the assets of the trust, but I cannot suppose that Parliament intended that such a man should be treated as a settlor.

No-one would suggest otherwise, but why not? In the Court of Appeal:

One reason, in my opinion, why the definition of "settlor" ... would not apply to either of these cases is that neither the employees of the company nor the stockbroker would have been concerned with the objects or purposes of the settlement. The employees of the company would in all probability have been entirely ignorant of the settlement. The stockbroker would have been likely to have known of the settlement's existence and would have advised the trustees with a view to advancing the interests of the trust, but would have done so for reward in the ordinary course of his professional business.<sup>143</sup>

In these cases there is no element of bounty (gratuitous intent). Clearly they

---

143 49 TC 367 (CA) at p.387.

are not settlors unless they provide bounty (gratuitous intent) but what if they do act with gratuitous intent? For instance, suppose the stockbroker chose not to charge for their services?<sup>144</sup> Viscount Dilhorne did not rely only on the bounty point:

The difference between those cases, on the one hand, and *Crossland v Hawkins* and this case [*Mills*], on the other, is that in *Crossland v Hawkins* and in this case funds which ordinarily would have been received by Mr. Hawkins and by Miss Mills for their acting were diverted to companies which were channels for their transmission to trustees. It is not the provision of services but of funds which comes within the section.<sup>145</sup>

The distinction is not between provision of services and provision of funds, because the actors did provide services; the key feature is the provision of services which yields funds *which would otherwise be received by the provider*. It is considered that someone who provides services is a settlor if one can identify funds which:

- (1) would (in the absence of the settlement) have been received by the individual, but
- (2) were diverted to the trust.

If that is right, the *Mills* and *Hawkins* line of cases is effectively restricted to “one-man companies” with no substantial capital (as was the case in both *Mills* and *Hawkins*), which are set up with gratuitous intent.

It appears that HMRC agree. The TSE Manual provides:

**TSEM4300 - Settlement For Minor Child [Jul 2017]**

**...Indirect gift of shares from parent**

Mr J owns 60 of the 100 issued £1 shares in J Limited. Mr J is the sole company director and is the person responsible for making all the company's profits because of his knowledge, expertise and hard work. On starting up the company, Mr J allowed his mother to subscribe £40 for 40% of the shares but shortly afterwards she gifted them to her grandchildren.

There is clearly a settlement-arrangement, but who is the settlor, is it J or

---

144 It is still a principle (notwithstanding wide exceptions) that trustees should act gratuitously; but no-one suggests that trustees thereby become settlors.

145 49 TC 367 at p.408.

his mother? There are two reasons why J may be the settlor:

- (1) J has provided the grandchildren's shares indirectly by an arrangement under which J provided the shares to his mother, and the grandmother to the grandchildren.
- (2) J has provided the dividends paid to the grandchildren by working for the company at an undervalue.

The HMRC analysis takes point 1:

The circumstances are such that the decision to issue 40 shares at par is a bounteous arrangement (as were the shares in *Jones v Garnett*). The true settlor here is Mr J rather than the children's grandmother. Section 629 [ITTOIA] therefore applies and attributes the dividends received by the children to Mr J for tax purposes.

The example derives from Tax Bulletin 64 Example 9, where the HMRC analysis takes point 2:

Since Mr. J

[1] is the person responsible for making the company's profits and  
[2] decides on the level of dividends paid,<sup>146</sup>

it is Mr. J who is the settlor rather than the children's grandmother.

The legislation could apply in a similar way if the children had subscribed for shares themselves with money received from a third party or even from bank accounts in their own names.

Suppose an investment adviser who is well disposed to the trust (perhaps a trustee or a beneficiary or a parent of beneficiaries) gives free investment advice to trustees to invest in quoted (easily obtainable) investments, and the trust profits from acting on their advice. There is an element of bounty but the stockbroker has not provided funds and is not the settlor. One cannot identify funds which would ordinarily have been received by the stockbroker. On the contrary, the stockbroker was free (if they had the resources) to make the same investments as those recommended to the trustees. This is a clear case.

Suppose a property developer who is well disposed to the trust gives free property market advice to trustees, and the trustees use their own funds invest in land successfully because of the advice. The developer has not

---

146 It is hard to see the relevance of [2]; point [1] is the key point.

provided property and is not the settlor. One cannot identify funds which would ordinarily have been received by them.

Suppose a director of a company held on trust seems reasonably well remunerated but HMRC argue that the remuneration is insufficient. Even if HMRC are right, the individual is not the settlor, because one cannot identify funds which would have been received by the director.

#### 94.25.2 *Service not envisaged at outset*

What is the position if:

- (1) a company is up and running and well established;
- (2) an individual (“T”) *subsequently* provides services at an undervalue (to benefit shareholders).

The question may arise in three circumstances:

- (1) Shares may be held by a spouse or minor children
- (2) Shares may be held by a trust:
  - (a) of which some other person is the settlor; or
  - (b) of which T is the settlor

In case (1) there is (or may be) no settlement-arrangement before T begins to provide T’s services. The question is whether a settlement-arrangement comes into existence.

In case (2) there is a settlement already. The question in 2(a) is whether T becomes the settlor. In case 2(b) T is already the settlor. The question is whether T provides further property (which might taint the settlement).<sup>147</sup> Of course, all the questions are related and they come down to the same question: does T (gratuitously) provide property for the purposes of the settlement? It is suggested that the answer is, strictly, yes, if one can identify funds that T has provided: see above. But it appears that HMRC do not take the point.<sup>148</sup>

#### 94.25.3 *Provision of investment opportunity*

Suppose:

- (1) an individual has an opportunity of purchasing land, or shares in a private company;

---

147 See 94.6 (Tainting).

148 See 85A.6.6 (Retesting bounty).

- (2) they allow the trust to take up the offer by advising the trust and not pursuing the opportunity themselves;
- (3) had the trust not taken up the offer they would have done so.

This may be regarded as the provision of a service; service is a wide word. But it is not exactly like the services provided by the actors which were sold on to third parties.

In this case is the individual is a settlor? In practice it may be hard to provide an opportunity without providing some finance, as in *Butler v Wildin*, where the settlors provided a bank guarantee.

Perhaps the person providing the opportunity might be a settlor where the trust only invested a nominal amount in the project. But if the trust provides substantial funds for the development, one cannot identify any income as coming specifically from the adviser. One should not apportion the profits between the adviser's contribution (advice) and the settlement's contribution (finance). It is impractical to do so as there is no clear answer to how the apportionment should be made.

#### 94.25.4 *Employment-related shares*

Protected-trust Q&As<sup>149</sup> Question 6 provides:

**Does ongoing employment by the settlor taint a protected settlement**

Assume that a protected settlement owns shares of a company in which the settlor is a senior employee. The shares contain the usual good-leaver / bad-leaver provisions, such that if the settlor leaves employment with the company then the shares are lost (either through forfeiture, conversion into deferred shares, change in share rights, sale back to the company, compulsory sale to other shareholders or some other similar mechanism). If the settlor is a 'bad-leaver' then the shares will be lost on disadvantageous terms (eg they may have to be sold back to the company for only £1).

Does the settlor remaining in employment – thereby preserving the value of the shares for the trustees – constitute an 'addition of value' to the settlement thereby causing the settlement to lose protected status?

*Suggested answer:* No. The settlor remaining in employment merely preserves the value of the shares rather than adding to their value. However, even if there were some enhancement of the value of the

---

149 For this document, see 88.1.1 (Protected-trust guidance).

shares, the use of the term ‘provided’ in Condition D indicates, as in other tax contexts, that there must be some element of bounty or gratuitous intent on the part of the settlor ... Typically, the settlor will wish to remain in employment for other reasons unconnected to the shares. Except in extreme cases (for instance where the employment is contrived and the overall terms of employment are not undertaken on a commercially justifiable basis), it is not thought that this would constitute the direct or indirect provision of property or income within Condition D.

That must be right, assuming employment is fully remunerated.

**Question 6a – share options or deferred shares**

As above, save that the settlement owns shares under an American-style deferred shares plan (or alternatively owns options under a European-style option-scheme). Under the deferred shares plan, restrictions on the shares fall away as the shares ‘vest’. Typically, this will be because the settlor remains in employment with the company in question. This more clearly ‘enhances’ the value of the shares...

*Suggested answer:* ... Although the settlor remaining in employment may enhance the value of the shares or options, as long as the overall terms of employment are undertaken on a commercially justifiable basis), this would not be considered to be the provision of property or income or the addition of value which disapplied Condition D. Only in extreme cases, where the settlor deliberately acted solely with the objective of enhancing the value of the shares or the share-option scheme was otherwise contrived to achieve this result, would this taint the settlement.

That is less clear, but the issue is fact-sensitive. The Protected-trust Note (2020) restates this view.<sup>150</sup>

---

150 For this document, see 88.1.1 (Protected-trust guidance). It provides:

“A trust may own shares/share options or an interest in a business which have been awarded as a result of the settlor's work/employment. These awards may be subject to vesting provisions (or the economic equivalent) under which the award may increase in value the longer the settlor works or if certain targets are met but which may also decrease in value or become worthless if the settlor ceases to work in the business or for the relevant company.

As long as the award was held by the trust before the settlor became deemed domiciled, the fact it may increase in value as a result of the settlor's work is not in general considered to amount to a provision of property or an addition of value. The reason for this is that any gratuitous intent existed only when the award was

## 94.26 Loans

Lending on commercial terms will not make lender (or borrower) a settlor, as there is no element of bounty (gratuitous intent).

The following discussion mostly refers to interest-free loans, which are common; but the same will apply to a low-interest loan, or any loan on terms favourable to the borrower.<sup>151</sup>

### 94.26.1 *Making a loan*

A person who makes an interest-free loan to a trust<sup>152</sup> is in principle<sup>153</sup> a settlor. HMRC agree. SP 5/92<sup>154</sup> para 22 provides:

A loan made, directly or indirectly to a relevant settlement after 19 March 1991 on non-commercial terms, eg at a low or nil rate of interest is regarded as a provision of funds for the purposes of TCGA 1992 Sch 5 para 9(3). This is the case whether the loan is for a fixed period or repayable on demand.<sup>155</sup>

While a person who lends interest-free is in principle a settlor, what is the property provided, and when is it provided? It is considered that the property provided is the money lent. It is provided at the time that the

---

made/transferred to the trust. The settlor has no gratuitous intent when continuing to work in the business or for the company.

The position may be different where the overall terms of the work/employment were or are not arms' length or the settlor deliberately acted with the objective of enhancing the value of the award held by the trust or the terms of the award were otherwise contrived to achieve this result. It is likely that, in these circumstances, such an arrangement would taint the settlement."

151 As to whether an interest-free loan makes the trust a settlor-interested trust, see 44.6.4 (Beneficial loan or guarantee).

152 Likewise a loan to a company held by a trust; see 94.24 (Property provided to co in a trust).

153 It is assumed that the loan is made with gratuitous intent. The position is different if the loan (though on favourable terms) is made without gratuitous intent. That is conceivable, for instance, in the case of a loan from a life tenant, if trust income roughly matches interest foregone.

154 For SP 5/92 and para 9(3), see 94.2.4 (Guidance).

155 Likewise Tax Bulletin 8: "Our view is that a person making a loan to the trustees on better than commercial terms is ... a settlor ... and within the provisions of [Chapter 5 Part 5 ITTOIA] ..."

interest-free loan is made. If the money lent is spent on expenses, there is no property derived from the loan and the lender ceases to be a settlor.

#### 94.26.2 *On-demand loan left unpaid*

This section considers whether a person provides property by allowing an interest-free repayable on demand loan to remain outstanding after it has been made. This typically arises where:

- (1) Year 1: A settlor while non-domiciled lends money to a trust. The loan is interest-free and repayable on demand.
- (2) Year 2: The settlor becomes deemed domiciled in the UK and leaves the loan outstanding.

It is suggested that the settlor has not provided property in year 2: for what is the “property” which the settlor has provided? It is not the funds lent, which were provided in year 1; it is not the interest foregone, as that does not exist.<sup>156</sup> If that is right, tainting rules only apply where the statute makes express provision for loans or adding value. This is consistent with the principle that failure to exercise a power of revocation is not providing property.<sup>157</sup>

#### 94.26.3 *Fixed-term loan left unpaid*

SP 5/92 provides:

19 A fixed-period loan made, directly or indirectly, to a relevant settlement prior to 19 March 1991 on non-commercial terms, eg at a low or nil rate of interest is, generally, regarded as a provision of property in pursuance of a liability incurred before 19 March 1991, provided the loan remains outstanding on the same terms. As such, it falls within the terms of TCGA 1992 Sch 5 para 9(3)(b) and the first condition set out in para 9(3) is not met.<sup>158</sup>

More correctly, a fixed-term loan, on favourable terms, is a provision of

---

156 Contrast *Re Marshall* [1965] NZLR 851: the New Zealand Court of Appeal held that where interest on a debt is payable on demand, but the right to call for payment is not exercised, there is no gift of the interest foregone. Also see 80.6 (“Provide”).

157 See 94.15.1 (Power of revocation). The same reasoning may apply to the case considered in the next paragraph, of a fixed-term loan which is left outstanding, but that seems less clear.

158 For SP 5/92 and para 9(3), see 94.2.4 (Guidance).

property at the time of the loan, and no property is provided subsequently during the term of the loan. It is not necessary to rely on para 9(3)(b). But the HMRC analysis leads to the same result.

20 There would, however, be a direct or indirect provision of property for the purposes of the settlement where a fixed-period loan falls to be repaid after 18 March 1991 but repayment is not made and so becomes a repayable on demand loan.

This may be correct, for on the expiry of the fixed-term loan, credit is granted; in effect, a favourable loan comes into existence. But in practice fixed-term loans are not common.

HMRC do not agree:

A repayable on demand loan which was made directly or indirectly to a relevant trust prior to 6 April 2017 on non-commercial terms e.g. at a low or nil rate of interest and which remains outstanding on that date will generally be regarded as a provision of property for the purposes of the settlement. Consequently, where after 5 April 2017 a loan has not been repaid or adjusted to commercial terms, the condition at new sub paragraph [5A(5) sch 5 TCGA] would be met.

The provision at [5A(5)] will apply equally where the loan was initially for a fixed period but falls to be repaid after 6 April 2017 such that it becomes a repayable on demand loan...<sup>159</sup>

ESC D41 provided:

**Non-resident Trusts: Loans Repayable on Demand**

... A repayable on demand loan which was made, directly or indirectly, to a relevant trust prior to 19 March 1991 on non-commercial terms, eg at a low or nil rate of interest will, generally, be regarded as a provision of property for the purposes of the settlement. Consequently, where, after 18 March 1991, a loan has not been repaid or adjusted to commercial terms, the condition in TCGA 1992 Sch 5 para 9(3) would be met.

The concession was as follows:

The condition is not, however, regarded as met where, before 31 July 1992, the loan is either -

---

159 Open letter from HMRC to CIOT, 14 Feb 2017, posted on Trusts Discussion Forum.

- (a) repaid in full, together with any outstanding interest ; or
- (b)[i] made subject to fully commercial terms, including a commercial rate of interest payable at least annually for the year ending 5 April 1993 and subsequent years
  - [ii] and, in addition, interest at a commercial rate or a sum in lieu thereof has been paid in respect of the year ended 5 April 1992.

The concession then discusses the consequences of paying a sum in lieu of interest (under para (b)[ii]):

Amounts paid under an agreement entered into by the trustees after 5 April 1992 under (b) above in respect of the year ended 5 April 1992 are treated as capital payments under TCGA 1992 s 97, made in 1992-93. Where the lender is not a beneficiary of the trust, the payment is not treated as falling within the scope of TCGA 1992 Sch 5 para 9(6). In addition, where such payments are matched, under TCGA 1992 ss 92-95, to qualifying amounts for 1990-91, TCGA 1992 s 91(2) does not apply.

Amounts paid under (b) above under an agreement entered into by the trustees before 6 April 1992, or in respect of periods after 5 April 1992, are regarded as interest in the hands of the recipient and taxable accordingly.<sup>160</sup>

#### 94.26.4 *Back-to-back loan*

The same points apply to a back-to-back loan. In *IRC v Wachtel*:

- (1) Trustees borrowed from a bank.
- (2) An individual guaranteed the trustee loan and deposited with the bank funds equal to the trustee borrowing.
- (3) The trustees paid only 1% interest on their loan.

The individual was rightly held to be a settlor.<sup>161</sup>

#### 94.26.5 *Repayment of loan*

SP 5/92 para 23 provides:

- [1] The repayment of any loan made, directly or indirectly, to any person

---

<sup>160</sup> [1992] STI p.535.

<sup>161</sup> 46 TC 543 at p.5541 - 555.

by the trustees is not generally regarded as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3).

[2] This does not, however, apply where

- [a] more is repaid than is due under the original terms of the loan or,
- [b] in the case of loans made after 19 March 1991, where the interest charged under the terms of the loan exceeds a commercial rate.<sup>162</sup>

This is considering a loan the other way: a loan from the trust to another person.

The points made are straightforward, indeed self-evident. In case [1] there is no element of bounty (gratuitous intent). The borrower pays the trustees what is due. In case [2][a] the borrower provides bounty (repaying the trustees more than is due) and so becomes a settlor.

Similarly in case [2][b]: if the borrower pays the trustees interest exceeding a commercial rate, of course the borrower becomes a settlor (in principle by virtue of the loan agreement rather than by the subsequent payment, but that is not likely to matter). This point is not likely to arise as excessive interest (if it be interest) is likely to be taxable or raise other tax issues.

## 94.27 Giving an indemnity

SP 5/92 provides:

34 An indemnity given by the new trustees to retiring trustees is not considered as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3).<sup>163</sup>

This is right because there is no element of bounty (gratuitous intent). (Also the benefit of the indemnity is held by the *former* trustees, so it is not property comprised in the settlement.)

Other types of indemnity are considered in light of the facts of a particular case.

A standard form indemnity given by a beneficiary who receives trust capital is not the provision of funds, it is made in consideration of the

---

<sup>162</sup> For SP 5/92 and para 9(3), see 94.2.4 (Guidance).

<sup>163</sup> For SP 5/92 and para 9(3), see 94.2.4 (Guidance).

trustees releasing their trustee lien.<sup>164</sup>

## 94.28 Giving a guarantee

SP 5/92 continues:

35 The giving of a guarantee is regarded as an indirect provision of funds under the terms of TCGA 1992 Sch 5 para 9(3).<sup>165</sup>

It is not usually possible to identify the property which a guarantor provides.<sup>166</sup> So while a guarantee (if made with gratuitous intent) may amount to tainting a trust, it does not give rise to a charge under s.624 or s.86, unless there is not merely a guarantee but also a back-to-back arrangement of the kind found in *Wachtel*.

The Protected-trust Note<sup>167</sup> agrees:

Where trustees borrow commercially from a bank and pay an arm's length rate of interest the bank may require the settlor to guarantee the loan. The bank does not require collateral for the guarantee. No payment is made by the trustees to the settlor for giving the guarantee as there is no realistic risk that the trustees will not be able to repay the loan.

SP5/92 takes the position on a generic basis that the guarantee by the settlor of an obligation of the trustees is to be treated as the provision of property for the purposes of the settlement. It was widely considered SP5/92 was incorrect in taking this position on the basis that there is no provision of property to the trustees unless and until the guarantee is

---

164 See Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), para 34.3 (Trustees lien).

165 SP 5/92 goes on to deal with the CGT implications of guarantees to trusts before 19 March 1991. This is not now important but is set out here for completeness:

“Payment of an obligation under a guarantee given before 9 March 1991 is, in general, regarded as a payment in pursuance of a liability incurred before 19 March 1991 and within para 9(3)(b). This may not, however, apply where-

- the contingent liability under the guarantee cannot be quantified with a sufficient degree of accuracy, eg where the guarantee is open-ended or the contingency is remote; or
- the guarantor does not take reasonable steps to pursue his rights against the debtor.”

166 Apart from the contractual rights under the covenant itself but the owner of those rights may not be the trustee. Further consideration would be needed if the warranty is called on.

167 For this document, see 88.1.1 (Protected-trust guidance).

called. In the case of a loan the trustees have borrowed money but they have the obligation to repay the money along with an arm's length rate of interest. There is no risk in reality that they will default on their obligations.

In practice, a third party providing a guarantee to the bank in these circumstances would charge a fee. On one view, failure by the settlor to charge a fee does not taint the settlement as it is not an addition of value to the particular items of property comprised in the settlement. The more prudent view is that this distinction is too technical, and accordingly that failure to charge a fee would amount to tainting.

A secured guarantee could on one view be said to be the direct or indirect provision of the property over which security is provided even though the property in question never becomes comprised in the settlement. It is considered necessary for an arms' length fee to be charged in order to avoid any risk of the borrowing trust being tainted. The fee may be small if there is no realistic prospect of a default.

#### **94.29 Transaction on favourable terms**

A sale to a trust at a conscious undervalue is the provision of property: the seller is a settlor. Likewise a purchase from a trust at a conscious overvalue: the purchaser is a settlor.

Likewise a person is a settlor if they hold all the shares in a company and consent or procure the company to issue shares to a trust at a conscious undervalue.<sup>168</sup> The TSE Manual provides a straightforward example of this:

##### **TSEM4120 Definition Of Settlor [Jul 2017]**

###### ***Example 1***

X is the director and owns all the 150 issued ordinary £1 shares of X Ltd. X Ltd issues 100 new ordinary £1 shares which are acquired for £100 by the X Family Trust.<sup>169</sup>

The trust has been established for the benefit of X's family by his father,

---

168 This proposition is self evident but if authority is needed, see *Crossland v Hawkins* 39 TC 493 at pp.506–507; *Young v Pearce* 70 TC 331. An issue of shares at an undervalue also raises issues of value shifting for CGT purposes, the IHT close-company code, and if a non-resident trust or company is involved, ToA.

169 Author's footnote: The issue of shares at an undervalue would also constitute a transfer of value for IHT, and a value-shifting disposal for CGT, but it is not necessary to pursue that here.

X Senior, who created the trust by settling cash of £100.  
Shortly after the issue of the new shares, a dividend of £100 per share is declared and paid and the trust receives dividends of £10,000.

The HMRC analysis is as follows:

X controlled the arrangement for the issue of the shares at par followed by the dividend. X is therefore the true settlor of the settlement from which income of £10,000 arose. The original settlement of £100 by X Senior is usually disregarded on de minimis grounds.

A sale at market value is not the provision of property. HMRC agree. The CG Manual provides:

**CG34891. Multiple settlors** [June 2016]

Where property is acquired as a result of an arms length transaction the third party is not to be regarded as providing property for the purposes of the settlement, thereby becoming a settlor. Instead the property is regarded as representing the cash previously held.

A bargain at arm's length (at a price regarded by both sides as market value) is not the provision of property even if the parties have mistaken the value and the property is sold at an undervalue.<sup>170</sup>

Similar issues arise in multi-party transactions where a trust is one of the parties. For instance, a company may issue loan notes and shares, in a transaction where an individual subscribes to the loan notes and a trust subscribes to the shares. The question then arises how to apportion the total subscription price between the loan notes and the shares. An under apportionment to the trust would in principle make the individual a settlor. A valuation reached honestly and bona fide between parties acting at arm's length binds HMRC.<sup>171</sup>

## **94.30 Payment of admin expenses**

### *94.30.1 Trust income used to pay expenses*

SP 5/92 specifies two cases where payment of capital expenses out of a life

---

170 This is consistent with the principles that a settlement-arrangement must have an element of bounty: xxxsee 1.5 (Settlement-arrangement definition), and that arm's length sales confer no "benefit": see 47.5.1 (Arm's length transaction).

171 See App 4.3 (Value of consideration).

tenant's income does not make the life tenant a settlor.<sup>172</sup>

29 An expense on capital account paid out of trust income is not treated as a provision of income by a beneficiary for the purposes of TCGA 1992 Sch 5 para 9(3) provided that either—

[1] the trust deed permits payment of capital expenses from income and the beneficiary is entitled only to net income after such payments;<sup>173</sup>  
or

[2] the trustees borrow money from the income account which is subsequently restored, along with interest over the period of the loan. The appropriate rate of interest is considered to be that which a Court of Equity would order on the replacement of trust income.<sup>174</sup>

The question, more analytically, is whether the life tenant has provided intentional and gratuitous benefit to the trust. Clearly, in the two cases mentioned, the life tenant does not do this and so does not become a settlor. The consent of the life tenant is not normally needed.

#### 94.30.2 *Payment of expenses*

Where a trust has no income, someone (typically a beneficiary) may voluntarily pay trust expenses. In this case there may also be no gratuitous

172 For SP 5/92 and para 9(3), see 94.2.4 (Guidance).

173 For completeness, Tax Bulletin 8 expands on this:

“Para 29 of the Statement of Practice concerns, inter alia, trust deeds which permit capital expenses to be paid out of the income account. Neither the existence nor the exercise of this power would cause the trust to lose an interest in possession status for IHT purposes.”

174 The words borrow and loan are used loosely here, as what is envisaged is not a loan or borrowing in the strict sense.

For completeness: Tax Bulletin 8 expands on this; it sets out para 29[2] and continues:

“The appropriate rate of interest is considered to be equal to the rate payable on the Basic Account administered by the Court Office of the Supreme Courts of Justice. Such interest will constitute taxable income in the hands of the income beneficiary (either when it is credited in the case of a life tenant, or when it is paid or applied for the benefit of a discretionary beneficiary). It may also be treated as ‘relevant income’ for [s.731 ITA] purposes.

Income beneficiaries will only be liable on the net amount of income available after deduction of any income which has been applied to meet expenses on capital account. Only when the income account is made good will that income become taxable on the beneficiary.”

element. It may be in the beneficiary's interest to make the payment. Subject to that, the SP tacitly suggests that the intentional and gratuitous payment of trustees' expenses *does* make the payor a settlor. But this is not correct. First, in some cases, the payment of expenses may be a provision of services to the trust rather than the provision of property.<sup>175</sup> Secondly, if a non-settlor pays trustees expenses, or pays a sum to the trustees which are immediately consumed in payment of expenses "no property of which S is the settlor" is comprised in the settlement, so the payor of expenses is not the settlor.<sup>176</sup>

HMRC agree. A STEP/CIOT Q&A<sup>177</sup> considers the IHT issues that arise when:

- (1) a person (after 2006) adds property to an estate IIP trust and
- (2) the property is spent on trust expenses.

**Question 37(2)**

... if an addition of cash was made which was then spent by the trustees and HMRC regard this addition as within the relevant property regime (eg an addition to pay expenses or improve properties), how would the proportion of the settled property subject to the new rules be calculated? Would a valuation be needed of the property before and after the improvement?

**HMRC Answer**

If a payment of cash was made and then spent immediately on, say, a tax liability or another administration expense, then that short period will be the extent of its time as "relevant property" and there will be no question of having to consider what proportion of the existing settled property represents it going forward.

If a payment was made towards the improvement of a property, then this would appear to require "with" and "without" valuations when there is a chargeable event.<sup>178</sup>

---

175 See 94.25 (Provision of services).

176 See 94.2.10 (Ceasing to be settlor).

177 "Questions by STEP/CIOT and Answers From HMRC to sch 20 FA 2006". The most recent version is dated October 2008 and the text can be found in Tolley's Yellow Tax Handbook.

178 The question goes on to ask: In HMRC's view, do all subsequent post Budget additions need to be kept physically segregated? HMRC say no, which is just as well as money spent can hardly be regarded as segregated:

"It is clearly up to trustees to decide whether to keep post-Budget additions separate

*Note added 6 August 2008: HMRC have indicated that they are actively reconsidering this response with a view to producing further guidance shortly.*<sup>179</sup>

### 94.31 Property maintenance/management

This raises similar questions. Protected-trust Q&As Question 9 provides:

**Preserving the value of trust property rather than increasing it**

A protected settlement owns a UK residential property in which the settlor lives. The settlor lives there rent-free by virtue of a licence granted by the trustees. The settlor generally keeps the property in good order and repair. Does this constitute an ‘addition of value’?

*Suggested answer:* No. Incurring expenditure of a revenue nature to maintain the property in good order and repair merely preserves the value of the property rather than enhancing it. Whilst it is not necessary, a requirement to keep the property in good order and repair could be included in the licence.

Para 7 Protected-trust Note makes the same point:

It is not considered the settlor taints a settlement where he keeps a trust property in good order and repair if he is living rent-free in the property and the cost to the settlor is no more than the rent he would have to pay if he was renting the property on arm’s length terms. Should the settlor pay for improvements, it is considered tainting occurs if the value of the property is increased by the improvements.

**Question 9b – saving the trustees an expense**

As above, but the property is a block of flats (or other nearby properties). The settlor lives in one of the flats, but the others are let on arm’s length terms to third party tenants. As the settlor lives nearby, he assists the trustees with certain practical day-to-day matters such as interviewing new tenants, assisting with rent collection and generally in answering practical queries and passing these onto the trustees. But he does not do

---

from the rest of the trust fund. We think that it may be sensible to do so—or, at least, to keep good records of additions. (The trustees of discretionary trusts already need to do this, of course, in order for the 10-year anniversary value of each addition to be identified correctly in light of the relief in s 66(2) IHTA for property that has not been ‘relevant property’ for a full 10-year period).”

<sup>179</sup> No guidance has been produced. Perhaps the issue was filed as too difficult, or perhaps on reconsideration HMRC were satisfied with their original answer.

so on an overly regular basis, such as to make him a dependent agent of the trustees.

What is meant by an overly regular basis? The concept of dependent agent, borrowed from the terminology of PEs, does not seem apt here.

Does the position differ if the settlor lives nowhere near the property or properties, but fulfils the role which a managing agent would otherwise have fulfilled?

*Suggested answer:* It is natural for a settlor or beneficiary to seek to assist the trustees to maintain the value of settlement property. Helping to maintain the value of the existing settlement is not the same as an addition of property, income or value (which contemplates value coming into the settlement 'from outside' it). Even if the trustees are thereby saved an expense, so long as this is through the settlor's own efforts, this would not appear to be an addition of value.

The position would be different if the settlor met an expense which the trustees should properly have met (e.g. the settlor paid professional managing agents to save the trustees from doing so).

The Protected-trust Note puts the point this way:

It is considered that tainting does not occur if the trustees own rental property and the settlor assists the trustees on an occasional basis with certain practical day-to-day matters such as interviewing new tenants, assisting with rent collection and generally in answering practical queries and passing these onto the trustees. The position could be otherwise if the settlor is in the business of property management and does not charge a fee.

That is less clear. The Q&As continue:

**Question 10 – investment suggestions from settlor – addition of value?**

The trustees of a protected settlement invest the settlement fund in a portfolio of financial investments. The portfolio is regularly reviewed both with professional investment advisers and with the beneficiaries (which may include the settlor). The settlor herself works in the finance industry (say a hedge-fund manager) and offers helpful advice to the trustees about the investment of the portfolio. The trustees accept this advice which results in a better return than would have been the case had the settlor not been consulted. Does this amount to an addition of property?

*Suggested answer:* No. Trustees are typically under a duty to take into account the wishes and views of the settlor and other beneficiaries as part of the proper exercise of their role. So long as the investments are purchased at market value or otherwise on arm's length terms, the value added to the settlement is not by the settlor, even though the settlor may have recommended a good investment.

A good question. This is not providing property but is it adding value?

**Question 10a – investment advice to trustees with additional features**

As in question 10 above, but with one or more of the following additional features:

- (a) the settlor is a financial professional and routinely provides free advice, such that the trustees save on the fees which would otherwise have had to be paid to an independent financial adviser;
- (b) the settlor introduces the trustees to bespoke opportunities which would not have been available to the general public (but nonetheless the price paid by the trustees is market value or otherwise on arm's length terms);
- (c) The trust deed specifically reserves the role of “investment advisor” or “investment director” to the settlor and the trustees are obliged by the settlement deed either to consult the settlor or, in some cases, the trustees have no investment discretion at all and must follow the views of the settlor.

*Suggested answer:* As in question 10, as long as all the investments are acquired at market value or otherwise on arm's length terms, there is no addition of property, income or value here. Any addition of value comes from the settlement fund being invested well, not from the settlor adding ‘external’ value. Introducing an ‘opportunity’ of itself should not amount to an addition of property. That the trustees are saved an expense by virtue of the settlor doing what any beneficiary or settlor would naturally do (namely aiming to work with the trustees to improve the investment of the trust fund) is not something that should be considered to be an addition of value.

(By contrast, if the trustees are saved an expense for which they are liable, because the settlor pays that expense for them that would constitute an addition of value– see question 9b above).

This is the same as question 10.

**Question 11 - reduced management fees or other preferential terms**

**due to wider relationship with settlor**

The trustees of a protected settlement invest the settlement fund in a professionally managed investment fund. The settlor is an employee or partner in the fund along with others and is unlikely to control the fund terms and conditions. It is common in private equity and private investment funds to provide that as long as the settlor is an employee or partner management fees are not charged or are set at a lower amount for the settlor, his family and related trusts than would be the case for a third party investor. If the settlor’s employment or work relationship with the fund ceases this benefit also ceases. The settlor would not receive any additional salary or benefit if the trust did not take advantage of this benefit.

Alternatively lower fees are charged (or perhaps a higher return is given) because the settlor, in parallel, has his or her own funds with the same institution – and because both the settlor and the trustees are co-invested, the total investment moves into a higher tier.

A similar point arises where the investment fund is willing to charge reduced fees where the investment into the fund is made by an individual or an entity associated with that individual that the fund wishes to attract because of that person’s ‘name’ in the market.

*Suggested answer:* There is no provision of property or income, or addition of value to the settlement by the settlor. Whilst another investor might have been charged a higher fee in similar circumstances, the settlor has not provided any income or added value to the settlement. Condition D is not engaged.

This must be right.

**94.32 Retaining life tenant income**

SP 5/92 para 33 provides:

A life tenant is not regarded as having provided income or property for the purposes of the settlement merely because there is an administrative delay in paying out the income that has vested in that beneficiary. If, however, the beneficiary directs the trustees to retain this income on the terms of the settlement, this is regarded as a provision of funds within TCGA 1992 Sch 5 para 9(3).<sup>180</sup>

---

180 For SP 5/92 and para 9(3), see 94.2.4 (Guidance).

That is self-evident.

### 94.33 Purpose: Inattentive settlor

In *Mills v IRC* 49 TC 367, the trust funds were derived from acting work of Hayley Mills, then aged 14. She was supposedly<sup>181</sup> unaware of the settlement to which at her direction her earnings were paid. The argument was that she had not provided funds for the *purpose* of the settlement. Viscount Dilhorne said:

- [1] I do not agree with Lord Denning MR that the word “purpose” in this section connotes a mental element or with Buckley LJ that there must be a motivating intention. I do not myself think that it assists to consider whether the question he posed is to be answered objectively or subjectively. I do not consider it incumbent, in order to establish that a person is a settlor as having provided funds for the purpose of a settlement, to show that there was any element of mens rea.
- [2] Where it is shown that funds have been provided for a settlement a very strong inference is to be drawn that they were provided for that purpose,
- [3] an inference which will be rebutted if it is established that they were provided for another purpose.

This is poorly expressed.<sup>182</sup> It is not that purpose is irrelevant: see [3]. That seems to contradict the sentence at [1], but it is obviously right. “Purpose” inescapably connotes a mental element, and so does “provide”<sup>183</sup>. The explanation is that this passage is considering the situation like the facts in *Mills* where Hayley Mills *did* intend to provide

---

181 The actual evidence recorded that she was “not very interested”, which is not the same. The case should have been decided on the simple factual basis that Hayley Mills *did* intend to provide funds for the purpose of the settlement, even if she did not trouble to think very much about it. In the High Court, the judge made this point at p.378:

“The case was put on a factual assumption that Hayley Mills did not subjectively intend to provide funds. This was factually incorrect, and not even conceivable, because it was completely inconsistent with the view that the contract she signed was valid. If Hayley had not thought about it at all, the contract which she signed would be void under the rule *non est factum*.”

182 Dilhorne, who took a third in law, was “not in the highest flight of English lawyers” (DNB).

183 See 1.5 (Settlement-arrangement definition).

funds for the purpose of her trust (in the sense that intention can be inferred by her signing a contract which had that effect); that is so even though she took (more or less) no personal interest in the matter, or had (more or less) no personal knowledge of it; she no doubt signed what was put in front of her. A person who is in that sense a source of funds is not permitted to say that they did not intend to provide them because they were not paying sufficient attention. The comment is applicable to a person who creates a settlement, as the UK was said to have conquered half the world, “in a fit of absence of mind”.

The legislation sometimes refers to purpose of the settlement (in the singular) and sometimes purposes (in the plural) but there is no distinction.<sup>184</sup>

#### **94.34 Purpose: Adviser/agent of settlor<sup>185</sup>**

It is considered that in ascertaining purpose one may have regard not only to the mind of the settlor, but also the mind of those acting for him or her. Agency principles may be applied. See *Crossland v Hawkins* 39 TC 439 at p.508:

The mere fact that he did not concern himself with some of the ‘steps’ in the legal machinery involved does not make it any the less his arrangement within the section. A man does not avoid the incidence of [the settlor-interested trust code] by merely being absent from and leaving to his solicitors and accountants certain parts of the legal machinery if he is aware of the proposals for an ‘arrangement’ or a settlement and actively forwards them by personally carrying out and assisting in the vital parts in which his performance and co-operation are necessary. Nor can he avoid liability by merely giving his solicitors carte blanche to effect some scheme for the benefit of his family and refusing to concern himself with its precise form.

On this analysis many apparent difficulties fall away.

In *Mills*, the father acted on behalf of the daughter.<sup>186</sup> The purpose of the

---

184 I think this is self-evident, but if authority is needed, see *Crossland v Hawkins* 39 TC 493 at p.507: “The statute seems to me to use the word ‘purpose’ and ‘purposes’ indiscriminately”.

185 See 49.13 (Purpose: Adviser/agent).

186 See 49 TC 367 at p.382 and p.385.

father was to provide the daughter's funds for the purpose of the settlement. That suffices to make the daughter the settlor if she had no purpose of her own. Likewise in *Hatton*<sup>187</sup> the purposes of Mrs Cole's attorney was to provide funds for the settlement, and this purpose should be regarded as the purpose of Mrs Cole.

#### **94.35 Trust by court: Person lacking capacity**

The court has power to make a settlement for a person lacking capacity "on his behalf". It is considered that the person lacking capacity is the settlor.<sup>188</sup> The Court of Protection agree:

Trusts set up by an order of the Court of Protection will take the form of a settlement, with the patient being the settlor. ... in the case of trusts set up by an order of the Court of Protection, provision can be made for income to be accumulated, if appropriate, for the lifetime of the patient as section 164(1)(a) Law of Property Act 1925 applies.<sup>189</sup>

#### **94.36 Trust by compromise: Minor/person lacking capacity**

Parties to litigation may make a settlement under a compromise on behalf of a claimant who is a minor or person lacking capacity.<sup>190</sup> The Court of Protection say:

An award of damages can be settled, by consent, in trust for the patient as part of the terms of compromise of the action between the plaintiff and the defendant, with the approval of the High Court, in circumstances where the award never becomes the absolute property of the patient. Trusts set up following an order of the High Court can only be done in

---

187 See 94.7 (A gives to B, B gives to trust).

188 Sections 16, 18(h) Mental Capacity Act 2005. The tax position is the same for settlements made under the previous legislation, the Mental Health Act 1983. Further consideration would be needed in the case of Scotland or foreign jurisdictions.

189 Court of Protection Practice Note, 15 November 1996, para 4. The point of the last sentence is that under pre-2009 law, accumulation was permitted during the lifetime of the settlor (but not during the lifetime of other persons). As the rule against accumulation is, happily, abolished, the Practice Note has become obsolete. But the implicit point that the patient is the settlor remains important.

190 See Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), Chapter 28 (Trusts of Damages).

the form of a declaration of trust by the trustees ... . The period over which income can be accumulated by the trustees is restricted to 21 years.<sup>191</sup>

This assumes that the minor/person lacking capacity is not a settlor for trust law purposes. The first sentence (which is presumably the basis for the conclusion) is unsound. While the *award* never becomes the absolute property of the patient, the award represents the claim, which is the property of the claimant.<sup>192</sup>

But HMRC accept in practice that there is no settlor.<sup>193</sup> It would follow that trust property is excluded property if it is not UK situate, or an AUT/OEIC.

### 94.37 Trust under Criminal Injuries Compensation Scheme

An award under the Criminal Injuries Compensation Scheme (or the may be transferred to a trust.<sup>194</sup> The applicant under the Criminal Injuries Compensation Scheme is not the settlor of such a trust.<sup>195</sup> That is consistent with the position under the VTA. However, HMRC have apparently expressed the view that the claimant is the settlor, and in practice this view may well favour the taxpayer (as s.624 ITTOIA reduces the IT charge if the settlor is not a higher rate taxpayer).

The same applies to the Victims of Overseas Terrorism Compensation

191 Court of Protection Practice Note on the settlement of personal injury awards to patients, 15 November 1996, paras 2 and 4; formerly set out in the White Book (Civil Procedure) para 6B-119.

192 This is self-evident, but if authority is needed, see *Zim Properties v Proctor* 58 TC 371.

193 Private correspondence.

194 Para 106 Criminal Injuries Compensation Scheme 2012.

195 The drafter of Part 2 Chapter 4 FA 2005 assumed this, though one needs to dig a little into the provisions to see why this is so:

- (1) CICS trusts are within the provisions: s.35 FA 2005.
- (2) Settlor-interested trusts are outside the scope of the provisions: see s.25(3) and 30 FA 2005. (In relation to CGT this was clearer before s.77 TCGA was repealed in 2008).
- (3) The claimant under the CICS would always be a beneficiary, so if he was the settlor the trust would be settlor-interested.

So the drafter must have assumed that the claimant was not the settlor, or the provisions make no sense.

Scheme.<sup>196</sup>

## 94.38 Trust made by deed of variation

### 94.38.1 *The general rule*

Suppose:

- (1) B inherits property absolutely from the estate of a deceased, D.<sup>197</sup>
- (2) B varies the will so as to create a settlement of that property; and s.142 IHTA and s.62 TCGA apply.

B is clearly the settlor in the general sense.<sup>198</sup>

CG Manual provides:

**CG37886. Instrument of variation of will or intestacy** [Feb 2020]

It is quite common for instruments of variation of wills or intestacies to be executed within two years of the testator's (or intestate's) death. In England & Wales the usual form of the instrument is a deed. The general guidance is at IHTM35011+ and guidance on CGT at CG31600+. If an instrument of variation creates a continuing trust which replaces absolute interests in the original will, and there is no statement of intent in the deed or before 1 August 2002 no election, under Section 62(7) TCGA 1992, ... the person who gives up the absolute interest in favour of the trustees is to be regarded as the settlor for the purposes of the annual exempt amount and Section 77 TCGA 1992.<sup>199</sup> His personal position is considered at CG32000+, assuming the variation is gratuitous.

### 94.38.2 *Settlor for IHT*

For inheritance tax purposes, the effect of s.142 IHTA is probably to override the general sense; the settlor is D and not B. HMRC agree. (The contrary view is arguable but it will not usually be in the taxpayer's interest to argue it.) IHT Manual provides:

**IHTM35151 IHT implications of IOV: effect of coming within s.142**  
[May 2020]

---

<sup>196</sup> Para 99 Victims of Overseas Terrorism Compensation Scheme 2012.

<sup>197</sup> For where beneficiaries vary/resettle a will trust, see 94.22 (Resettlement by beneficiaries).

<sup>198</sup> See 94.7 (A gives to B, B gives to trust).

<sup>199</sup> Section 77 was repealed in 2008, so the manual is more than a decade out of date, but this does not affect the general point made.

When a variation satisfies the requirements of s.142(1) IHTA and there is a valid election or, on or after 1 August 2002, a valid statement of intent

- the variation is not a transfer of value, and
- the IHTA applies as if the deceased had effected the variation

Consequently, for example ...

[1] if a variation sets up a non-interest in possession trust, the deceased is treated as the settlor, and

[2] the GWR rules in s.102 FA 1986 cannot apply to a disposition which is a variation within s.142(1) IHTA. This is because s.142(1) IHTA states that the donor is the settlor.

Point [1] states that the deceased is the settlor if a variation sets up a non-interest in possession trust. The same rule must in principle apply if the variation sets up an interest in possession trust (but with the added complication of s.80 IHTA rules, if applicable). Likewise Tax Bulletin 15 provides:

Our view is that, as the relevant IHT legislation differs from the CGT provisions which were considered in *Marshall v Kerr*, that decision has no application to IHT. Variations which meet all the statutory conditions will continue to be treated for IHT purposes as having been made by the deceased.

#### 94.38.3 Settlor for IT: IoV Pre-2006

B is the settlor for IT purposes in the case of variations made before 6 April 2006.

#### 94.38.4 Settlor for CGT: Pre-2006

The identity of the settlor for CGT is an unresolved question.<sup>200</sup> The issue is whether s.62 TCGA overrides the general sense of settlor. The House of Lords held in *Marshall v Kerr*<sup>201</sup> that for CGT the settlor is the beneficiary making the variation, not the testator. However, the reasoning

---

200 See Sokol “*Marshall v Kerr* Revisited”, Taxation, 3 May 2001.

201 67 TC 56. Lord Walker found the House of Lords’ reasoning unpersuasive: ‘As If...’—The Wonderland of Statutory Hypotheses [2016] Statute Law Rev 37. The reader may agree. But courts below the level of the Supreme Court ought to follow it.

relies on the fact that the beneficiary settled a share in an unadministered estate. The position is therefore different if:

- (1) the IoV is made after administration of the estate has been completed;  
or
- (2) the will or intestacy is governed by the law of a jurisdiction (such as a civil law jurisdiction) which (unlike common law jurisdictions) does not recognise personal representatives and an administration period;  
or
- (3) the disposition varied is a joint tenancy (because, as in (2), there is no administration period in respect of property passing by survivorship).

In the following discussion cases (1) to (3) above are called “non-administration” cases, and cases where the estate was in administration (like *Marshall v Kerr*) are called “administration cases”.

The reasoning of the House of Lords suggests that the law is as follows:

- (1) In non-administration cases whenever the IoV is made, the deceased is the settlor.
- (2) In administration cases:
  - (a) If the IoV is made before 31 July 1978 (the passing of the FA 1978) the beneficiary is the settlor: that, at least, is clear from *Marshall v Kerr*.
  - (b) If the IoV is made after 31 July 1978, it is suggested that the deceased is the settlor. *Marshall v Kerr* has been reversed by (what is now) s.62(9) TCGA: this subsection was not in force in the tax years relevant to *Marshall v Kerr*.

To distinguish between administration and non-administration cases is highly anomalous, so this view of s.62(9) TCGA brings welcome consistency into the law. It also brings CGT into line with IHT.

It appears to be the HMRC view that the beneficiary is the settlor even in cases (2) and (3). CG Manual provides:

**CG37886: instrument of variation of will or intestacy** [Sep 2020]

... The Revenue had always considered that Section 62(7) was concerned with computational matters only, and had no effect on the question whether a new settlement had come into existence or the identity of the settlor. The majority of the House of Lords, in *Marshall v Kerr*, 67 TC 56, preferred slightly different reasoning in holding that a residuary legatee, who had executed an instrument of variation so that her 50 per

cent share of the estate was settled, was the settlor for the purposes of TCGA92/S87 (charge on beneficiaries of non-resident settlements). It may be noted that the case was concerned with the pre-1978 version of the relevant legislation and it is considered that the Revenue’s arguments in that case are stronger under the later legislation.

Where the instrument was executed before 6 April 2006 this decision should be applied for the purposes of TCGA92/S77 & TCGA92/S86 (charge on settlors of certain settlements) and TCGA92/SCH1 (annual exempt amount for trustees).<sup>202</sup>

The author would have expected litigation on this aspect, but it has not happened. In view of the 2006 reforms, HMRC may not dispute the position for variations before 6 April 2006.

94.38.5 IT/CGT: *IoV post-2006*

Section 470(2) ITA/s.68B(6) TCGA set out three exceptions to the IT/CGT appointment rule. The third is:

**s.470(2) ITA**

A transfer of property is excluded for the purposes of subsection (1) if ...  
(c) section 473(4) applies in relation to it.

**s.68B(6) TCGA**

But subsections (3) and (4) do not apply in relation to a transfer of property ...  
(c) to which section 68C(6) applies.

This excludes the operation of (what I call) the IT/CGT appointment rule. Instead the position is governed by s.472, 473 ITA. Section 472 ITA provides:<sup>203</sup>

- (1) This section applies if—
  - (a) a disposition of property following a person’s death is varied, and
  - (b) section 62(6) of TCGA 1992 applies in relation to the variation.

202 Likewise TSEM1815 [January 2013]:

“The settlor of a trust created by a deed is not the deceased, unless it’s a disclaimer (TSEM1840). It is the person who was entitled to the gift that has now gone into trust. The gift can be capital or income or both. The case of *Marshall v Kerr* (67 TC 56) is relevant. There may be more than one settlor.”

203 The CGT equivalent is s.68C TCGA.

- (2) [i] If property becomes settled property because of the variation  
 [ii] and would not, but for the variation, have become settled property),  
 a person within subsection (3) is treated for the purposes of the Income Tax Acts (except where the context otherwise requires)—
- (a) as having made the settlement, and
  - (b) as having provided the property for the purposes of the settlement.
- (3) The persons within this subsection are—
- (a) a person who immediately before the variation was entitled to the property, or to property from which it derived, absolutely as legatee,<sup>204</sup>
  - (b) a person who immediately before the variation would have been so entitled if that person had not been an infant or otherwise lacking legal capacity,
  - (c) a person who, but for the variation, would have become so entitled, and
  - (d) a person who, but for the variation, would have become so entitled if that person had not been an infant or otherwise lacking legal capacity.

Section 472 (and its CGT equivalent, s.68C TCGA) applies in the usual situation, where a beneficiary absolutely entitled to property under a will varies the will so as to create a settlement. Section 68C TCGA enacts the HMRC view that the beneficiary is the settlor for CGT. Section 472

---

204 Section 472 provides:

- “(4) For the purposes of subsection (3)—
- (a) ‘legatee’ includes a person taking property—
    - (i) under a testamentary disposition or on an intestacy or partial intestacy, whether beneficially or as trustee, or
    - (ii) under a donatio mortis causa, and
  - (b) a person who is a legatee as a result of para (a)(ii) is treated as acquiring the property when the donor dies.
- (5) For the purposes of subsection (4)(a) property taken under a testamentary disposition or on an intestacy or partial intestacy includes any property appropriated by the personal representatives in or towards satisfaction of—
- (a) a pecuniary legacy, or
  - (b) any other interest or share in the property devolving under the disposition or intestacy.”

This is based on the CGT definition: see 84.7.2 (“Legatee”).

confirms (which no-one ever doubted) that the beneficiary is the settlor for IT.

This applies not just for the standard IT/CGT definition, but for all purposes of IT and CGT. Although the drafter adds the words except “where the context otherwise requires”, I cannot think of a case where the context would “otherwise require”; and I expect the drafter has copied without much thought the wording used (appropriately) in s.467 ITA.

Section 473 ITA provides:

- (1) This section applies if—
  - (a) a disposition of property following the death of a person (“D”) is varied, and
  - (b) section 62(6) of TCGA 1992 applies in relation to the variation.

- (2) If—
  - (a) property would have become comprised in a settlement within subsection (3), but
  - (b) as a result of the variation, the property, or property derived from it becomes comprised in another settlement,

D is treated for the purposes of the Income Tax Acts (except where the context otherwise requires) as having made the other settlement.

- (3) A settlement is within this subsection if—
  - (a) it arose on D’s death (whether by D’s will or on D’s intestacy or in any other way), or
  - (b) it was in existence immediately before D’s death (whether or not D was a settlor in relation to it).

- (4) If—
  - (a) immediately before the variation property is comprised in a settlement and is property of which D is a settlor, and
  - (b) immediately after the variation the property, or property derived from it, becomes comprised in another settlement,

D is treated for the purposes of the Income Tax Acts (except where the context otherwise requires) as having made the other settlement.

(5) A settlement treated as made by D as a result of this section is treated for the purposes of the Income Tax Acts as made by D immediately before D’s death.

(6) But subsection (5) does not apply in relation to a settlement which arose on D’s death.

Section 473 applies in the highly unusual situation where property settled

by will is re-settled by beneficiaries.<sup>205</sup> Here the opposite rule is enacted: the beneficiaries are *not* settlors for IT or CGT.

Where s.472 applies, s.472(2) imposes two rules:

- (a) the beneficiary (“B”) is deemed to have made the settlement;
- (b) B is deemed to have provided the property for the purposes of the settlement.

By contrast, where s.473 applies, we only have rule (a): the deceased is deemed to have made the settlement. By implication, rule (b) must also apply: the deceased must be deemed to have provided the property.

CG Manual 37888 [June 2016] provides:

Where the instrument was executed on or after 6 April 2006 and notice is given under Section 62(7) Section 68C TCGA 1992 applies with these consequences.

- Where under the will or intestacy property was to pass absolutely to an individual, and a variation is executed settling that property (or property deriving from that property), then the person to whom the property would have passed is the settlor with regard to that property.
- Where under the will or intestacy property was to be settled, but the variation is such that a new settlement is created (see CG37887) then the deceased is the settlor.
- Where under the will or intestacy property was to be settled, but the variation is minor, then the deceased would be the settlor without the new legislation in FA 2006 and therefore this case is not provided for specifically.

#### 94.38.6 *Settlor of IoV: Critique*

What is the reason for s.473? Perhaps because it can be hard to identify settlors on variations of settlements. Perhaps because, if the will actually settled the property, there is little need or scope for tax planning by IoVs. In practice s.473 is not important. It appears to be dead letter tax law (not the only dead letter tax law enacted under the banner of trust modernisation). Does it matter to have on the statute book complex provisions that never apply and no-one need take notice of? I think it does, and maybe some day some reformer will sweep it away, and bring CGT and IHT into alignment. The IHT rule is a sensible one, for it fits the

---

<sup>205</sup> See 94.22 (Resettlement by beneficiaries).

object of the IoV rules, which is to allow beneficiaries to avoid the tax unfairnesses of badly drafted wills, and to avoid the need for testators to review their wills annually, as tax law changes.

## 94.39 Pension/employee benefit trust

### 94.39.1 *Is pension/EBT a settlement*

Employers generally create pension trusts and employee benefit trusts for commercial reasons. There is normally no element of bounty (gratuitous intent) on the part of the employer. Nor is there any bounty on the part of the employee, who is not in a position to negotiate or reject the arrangements. Such a trust is here called “**a commercial trust**”.

A commercial trust is a settlement under the classic settlement definition. However, a commercial trust is not a settlement under the settlement-arrangement definition.

HMRC agree. CG Manual provides:

#### **CG14596 Pension funds** [Jul 2019]

[1] ... It is considered that for the purposes of Income Tax<sup>206</sup> a pension fund, certainly an approved one, is not a settlement, because of the absence of ‘bounty’; (see *Berry v Warnett*, 55 TC 92 for a discussion of the bounty test).

[2] Accordingly transfers of assets to Pension Funds are not connected persons transactions and there is no restriction of availability of losses under section 18(3) TCGA 1992.<sup>207</sup>

### 94.39.2 *Commercial trust: Who is settlor*

Since a commercial trust is not a settlement-arrangement, the question of who is the settlor does not arise when the settlement-arrangement definition of settlement is applicable. However the question arises as to who is the settlor of the commercial trust where a classic definition of settlement is applicable.

The answer depends on which definition of settlor applies.

---

206 The author means, for the purposes of the settlement-arrangement definition of “settlement”.

207 Point [2] is correct but only relevant for individuals, as a corporate settlor is not connected with the trustees; see 99.14.1 (Settlor/connected persons). For the restriction on losses, see 61.19 (Loss on connected person disposal).

### 94.39.3 *Settlor of commercial trust: IT/CGT/IHT definitions*

Let us look first at the standard IT/CGT definition and the IHT definition of settlor. Under these definitions “settlor” includes (1) the person who provides property and (2) the person who makes the settlement. It is considered that the position is as follows:

- (1) Providing property requires an element of bounty, and no-one can be said to “provide” property to a commercial trust.
- (2) To make (or enter into) a settlement does not require an element of bounty.

HMRC agree. The CG Manual provides:

**CG33220: Basic terms** [Mar 2020]

... Basically under S68A(1) to (3) a person is a settlor if:

- [1] he made or entered into the settlement. This describes the person who has had the deed drawn up on his behalf. The property may come from elsewhere; or the transfer of property to the settlement may be without ‘bounty’ (see next bullet),
- [2] he has provided property for the purposes of the settlement. On the basis of *CIR v Leiner* 41 TC 589 these words are regarded as applying only where there is ‘bounty’.
- [3] the property is settled as a result of his will or intestacy.

The employer normally “makes” a commercial trust (normally the employer is a party to the trust deed and the deed is drawn on his behalf) and so the employer is a settlor under the standard IT/CGT definition and the IHT definition. HMRC agree. CG Manual provides:

Similarly, HMRC Business Brief 18/11:

The settlor of an Employee Benefit Trust will usually be the company, whether or not it is a Close Company.

If the employer is the settlor, and is a company, it follows that excluded property status depends on the domicile (ie place of incorporation) of the company. That is a relatively sensible rule. IHT cannot normally operate on the basis that employees are the settlors of an EBT, since they are normally a large and fluctuating body. It would be odd if an EBT had no settlor for IHT purposes.

### 94.39.4 *Settlor of commercial trust: s.86 definition*

The CGT s.86 definition of “settlor” is different and does *not* include the person who makes or enters into a settlement. So the employer is not a settlor for the purposes of s.86. HMRC agree:

**CG38445: Settlor - TCGA92/S86** [Jul 2019]

[The Manual refers to the CGT s.86 definition and continues:] The basic requirement is that the property is provided by them. *CIR v Leiner* 41 TC at page 596 shows that the word “provided” must connote bounty in appropriate circumstances. Therefore a settlement devoid of bounty is not within section 86. An example would be a genuine commercial arrangement by a company to attract, retain and motivate good quality staff. HMRC published this view in Tax Bulletin 16.

94.39.5 *Employee settlor of EBT*

CG Manual para 35020 [June 2016] states in relation to unapproved pension schemes:

... it can also be argued that the employees themselves are also settlors.

Similarly, the comment that employers and employees are not settlors is said in the passage set out above to apply only to “normal commercial arrangements”.

Why are employees not settlors in normal cases? There may be two reasons:

- (1) The employee may not have provided anything as they normally gave up no rights when the employer made the transfer to the trust. The trust is created at the discretion of the employer and these employees play no part in it.
- (2) Common form employee benefit trusts benefit a wide class of beneficiaries, so one may not be able to identify any particular part of the trust fund as provided by any particular employee (even if it is the case that a class of employees have jointly provided the trust property). That would preclude any charge to tax on any employee.

Employees may be settlors where these factors are both absent.

The TSE Manual provides:

**TSEM5350 Settlements legislation for EFRBS** [Mar 2018 ]

The Settlements legislation in Chapter 5 Part 5 ITTOIA will not apply if the scheme is operating on bona fide commercial lines, as part of an

employment package. But in certain circumstances, the Settlements legislation may apply to charge the EFRBS trust's income on a director/member.

The Settlements legislation provisions can apply if the trust is not genuinely to provide retirement benefits and/or the beneficiary of the trust has directly or indirectly provided funds for the settlement (see TSEM4120).

The Settlements legislation will not apply where only the employer makes contributions - unless the contributions are

- made by a close company which a member controls and
- unrealistically large by normal commercial standards.

For example, if there is only one director who is also the sole shareholder of the employing company and substantial contributions are made into the EFRBS, the Settlements legislation may apply to treat the director/shareholder as the settlor. The Settlements legislation will not apply if a member makes contributions that are reasonable compared to their salary. If you think the Settlements Legislation may apply, see (TSEM4000) onwards...

## **94.40 Property provided by company**

The position is complicated by differences in the definitions of settlor.

### *94.40.1 Co settlor: s.86 definition*

The s.86 definition of settlor is unique in that it makes express provision to treat shareholders and certain other participators as settlors, where a close company provides property.

Para 8(4) sch 5 TCGA provides:

For the purposes of this paragraph...

The rule depends on whether the company is controlled:

- (a) by one person alone
- (b) by 2 or more persons (taking each one separately)
- (c) by 2 or more persons (taking them together)

Para (a) - (c) are conveniently read side by side:

<b>Para 8(4)(a)</b>	<b>Para 8(4)(b)</b>	<b>Para 8(4)(c)</b>
<b>Control by: one person</b>	<b>persons separately</b>	<b>persons together</b>

where property is provided by a qualifying company<sup>208</sup> controlled<sup>209</sup> by one person alone at the time it is provided,

where property is provided by a qualifying company controlled by 2 or more persons (taking each one separately) at the time it is provided

where property is provided by a qualifying company controlled by 2 or more persons (taking them together) at the time it is provided,

that person shall be taken to provide it;

those persons shall be taken to provide the property and

the persons who are participators<sup>210</sup> in the company at the time it is provided shall be taken to provide it and

each one shall be taken to provide an equal share of it;

each one shall be taken to provide so much of it as is attributed to him on the basis of a just apportionment;

but where a person would be taken to provide less than one-twentieth of any property by virtue of paragraph (c) above and apart from this provision, he shall not be taken to provide any of it by virtue of that paragraph.

The wording is based on s.96(3)-(5) TCGA; see 57.11.2 (Consequence of capital payment to co).

Why does the s.86 definition have this provision which is not found in any other definition of settlor? The answer may be because the s.86

208 Para 8(5) sch 5 TCGA provides: “For the purposes of sub-paragraph (4) above a qualifying company is a close company or a company which would be a close company if it were resident in the UK.” For a note on this terminology, see 99.29.1 (Non-resident close company).

209 See 56.4.2 (“Control” and “participator”).

210 See 56.4.2 (“Control” and “participator”).

definition is narrower than the others, lacking the rule that someone who makes a settlement is a settlor.<sup>211</sup>

If para 8 applies (so that identified person(s) are “taken to provide” the trust property) it is considered that no other person should be taken to provide the property; in particular, the close company itself is not the settlor for s.86 purposes (even if it may otherwise be said to provide property). But the point may not arise.<sup>212</sup>

#### 94.40.2 *Co settlor: Other definitions*

Where a company makes a settlement, by providing its own property or issuing shares at an undervalue, the individual controlling shareholder(s) will be settlor(s) on the basis that they have provided the property indirectly.<sup>213</sup>

In relation to companies with only one shareholder, it will usually be clear that the shareholder is providing property indirectly, assuming an element of bounty (gratuitous intent).

The same applies to quasi-partnership companies, that is, companies that are in practical terms run as a partnership between the shareholders. In *Copeman v Coleman* a company held equally by husband and wife issued shares at an undervalue to their children. This was a settlement-arrangement and the husband was a settlor:

[the husband] was a<sup>214</sup> ‘settlor’ ... I am unable to see how the word “indirectly” can be limited in the way which is suggested so as to exclude the settlements which are made through the interposition of a company.<sup>215</sup>

---

211 See 94.39.4 (Settlor of commercial trust: s.86 definition).

212 See 56.16 (Corporate settlor).

213 Contrast 46.4 (A procurement test).

214 In fact, husband and wife were joint settlors, though this was not specifically addressed. It did not need to be, as at the time:

- (1) Tax was deducted from dividends and could be reclaimed if the recipient was not taxable. The case concerned a claim by the children for a refund of tax.
- (2) The income of a married woman was deemed to arise to her husband.

215 22 TC 594 at p.601, followed in *Young v Pearce* 70 TC 331. Further authority is not needed, but for completeness there is: *Clipperton v HMRC* [2021] UKFTT 12 (TC) at [223]; *Bird v HMRC* [2008] UKSPC SPC00720 (noteworthy for finding that the taxpayer was not negligent for having failed to understand the definition of

See too 121.23 (Controlling person); App.4.7.6 (No intention to benefit others).

The company may also be a settlor, having provided the property directly, but it will not normally matter if it is.

94.40.3 *Transaction with underlying company*

Of course the position is different if a company is wholly owned by the trust: transactions between a trust and its underlying companies cannot amount to providing property.<sup>216</sup>

94.40.4 *Company held by trust*

Suppose a transfer from a company held by trust 1 to trust 2:

The settlor of trust 1 will be a settlor of trust 2, having provided the property indirectly.

What about the s.86 definition? As trust 1 controls the company, para 8(4) states that the trustees of trust 1 are taken to have provided the property! But the context shows that here too, the settlor of trust 1 is the settlor of trust 2; and the para 8(4) deeming is not intended to apply to make the trustees of trust 1 settlors of trust 2: the scheme of the TCGA is that trustees are fiduciaries and cannot be settlors.

**94.41 Planning to create excluded property trust**

The “who is the settlor” question may arise in a tax planning context where it is desired to create an excluded property trust by transferring property to a foreign domiciliary, who will then make a settlement. These arrangements are always challenging and sometimes impossible to carry

---

“settlement”).

216 See 94.24.1 (Transfer within trust/co group).

out in practice, for the outcome depends ultimately on intention, and that cannot be manufactured to suit the circumstances.

*Example 1*

- (1) H (UK domiciled) gives property to W (not UK domiciled).
- (2) W gives the property to a trust.

Who is the settlor: H or W or both?

The success of schemes involving a transfer to a foreign domiciliary who creates a settlement depends on how the transaction is carried out. Does W have a sufficiently independent role?<sup>217</sup> It is suggested that W should retain the property for at least one year; that no decision be made as to whether or not to create a settlement at the time of the gift from H to W; *a fortiori* no decision should be made on the terms of the trust; and W should receive independent legal<sup>218</sup> advice on any proposed gift to a settlement.

*Example 2*

- (1) Trustees of a trust (with a UK domiciled settlor) appoint property to a beneficiary (“B”) (not UK domiciled).
- (2) B gives the property to a new trust.

In principle, the settlor of the new trust will be B, not the settlor of the old trust.<sup>219</sup> But it is different if B is acting at the behest of the settlor.<sup>220</sup>

Watch the trust law rule of fraud on a power, and the GAAR. It would be better if the terms of the new settlement are different from the terms of the old. For an (almost unbelievable) example of botched execution of this planning, see *Anker-Petersen v Christensen*.<sup>221</sup>

---

217 See 94.7 (A gives to B, B gives to trust).

218 W may also need tax advice, but what matters here is that W has independent advice on the property law aspects of the gift.

219 See 94.9 (Trust appoints to B, B gives to new trust).

220 See 94.8 (B makes trust at A’s request).

## CHAPTER NINETY FIVE

# MULTIPLE SETTLORS

- 95.1 Trust with multiple settlors
- 95.2 Two settlors: IT
  - 95.2.1 Where multiple settlor provision does not apply
  - 95.2.2 Multiple settlor provisions
- 95.3 Two settlors: CGT
- 95.4 Just & reasonable apportionment
  - 95.4.1 Direct and indirect settlors
  - 95.4.2 Loan/guarantee/paying trust expenses

### *Cross references*

The following topics are considered elsewhere:

- Settlor-interested trusts with only one settlor, see 44.1 (Settlor-interested trust code) and 56.1 (CGT on non-resident trusts)
- 44.10.1 (Beneficiary relief conditions)
- s.720 issues for multiple transferors: see 45.9.2 (Income must be identifiable)
- IHT aspects of trusts with two or more settlors: see 75.2 (Addition/transfer to trust)

## **95.1 Trust with multiple settlors**

This chapter considers the IT and CGT position where a settlor-interested trust has more than one settlor. I deal with this in one chapter as the IT/CGT issues overlap. For IHT issues, see 75.5 (Separate-settlement fiction).

### 95.1.1 *Where multiple settlor provision does not apply*

In *Herbert v IRC*,<sup>1</sup> the facts (in short) were:

- (1) Property was held on trust for L for life, remainder to R.
- (2) L and R directed that the property should be transferred to a new trust, which was revocable (and so settlor-interested).

---

<sup>1</sup> 25 TC 93.

L and R were joint settlors of the new trust. R was assessed on the income of the new trust under a provision equivalent to s.624 ITTOIA.<sup>2</sup> The judge observed:

[R] is not the only settlor. [L] is also a settlor... The Section provides that the income “shall be treated as the income of the settlor and not as the income of any other person”. [L] is admittedly a “settlor” and, therefore, the income must be treated as his income and not as the income of any other person: [R] is another person and, therefore, the income cannot be treated as his. If [L] were assessed, the same argument could be raised. If there is no flaw in the argument and the words of the Section are imperative, as they seem to be, the result is that where there is more than one settlor the provisions of the Section become inapplicable.

...the Act does not prescribe what is to happen when there is more than one settlor ... It is not suggested that all the settlors can all be assessed in respect of all the income. That, indeed, would seem to be an extravagant proposition. Nor is it suggested by the Crown that the income should be distributed between them....

The interpretation of the Section put forward on behalf of the [Revenue] was that where there are two or more settlors the Crown has the option to assess any one of the settlors to the exclusion of the other, and that, in the case of an assessment to Income Tax ... the option must be exercised by the local Inspector of Taxes and that there was no right of appeal by the taxpayer against the Inspector’s choice. ... I find myself unable to accept that interpretation. It seems to me fantastic to suppose that Parliament has conferred upon Inspectors of Taxes, or even upon the Special Commissioners, a choice as to whether A, or B, or C should be liable to Income Tax...

What seemed “fantastic” in 1943 does not seem so today. The reader may wonder if a Court would have reached the same decision today: the answer is no, see below.

### 95.1.2 *Multiple settlor provisions*

Section 644 ITTOIA now makes provision for a settlement with multiple settlors:

---

<sup>2</sup> I guess that L was not assessed because he was non-resident.

(1) In the case of a settlement where there is more than one settlor, this Chapter has effect in relation to each settlor as if that settlor were the only settlor.

(2) This works as follows.

(3) In this Chapter, in relation to a settlor—

(a) references to the property comprised in a settlement include only property originating from the settlor, and

(b) references to income arising under the settlement include only income originating from the settlor....

[Subsections (4) and (5) deal with ss.629-632 ITTOIA (settlements for minor children of the settlor) which is not discussed here.]

Similarly, for s.86, para 7 sch 5 TCGA provides:

For the purposes of section 86 and this Schedule, a person is a settlor in relation to a settlement if the settled property consists of or includes property originating from him.<sup>3</sup>

### 95.1.3 *Originating*

There are commonsense definitions of property/income “originating from” a person:

#### **s.645 ITTOIA**

#### **para 8 sch 5 TCGA**

(1) References in sections 628A and 644 to property originating from a settlor are references to—	(1) References in section 86 and this Schedule to property originating from a person are references to—
(a) property which the settlor has provided directly or indirectly <sup>4</sup> for the purposes of the settlement,	(a) property provided by that person;

<sup>3</sup> See 56.11 (Section 86 gains condition); 94.2.9 (CGT s.86 definition of “settlor”).

<sup>4</sup> Section 645(3) ITTOIA deals with reciprocal arrangements: “In this section references to property or income which a settlor has provided directly or indirectly—  
(a) include references to property or income which has been provided directly or indirectly by another person under reciprocal arrangements with the settlor, but  
(b) do not include references to property or income which the settlor has provided directly or indirectly under reciprocal arrangements with another person.”  
See 94.4 (Reciprocal arrangements).

(b) property representing <sup>5</sup> property so provided, and	(b) property representing property falling within paragraph (a) above;
(c) so much of any property which represents both property so provided and other property as, on a just and reasonable apportionment, represents the property so provided.	(c) so much of any property representing both property falling within paragraph (a) above and other property as, on a just apportionment, can be taken to represent property so falling.
(2) References in sections 627 and 644 to income originating from a settlor are references to—	(2) References in this Schedule to income originating from a person are references to—
(a) income from property originating from the settlor, and (b) income provided directly or indirectly by the settlor.	(a) income from property originating from that person; (b) income provided by that person.
	(7) For the purposes of this paragraph property or income is provided by a person if it is provided directly or indirectly by the person.

Thus on the facts of *Herbert*, the income of the new trust would in principle be treated as the income of L for his life, under s.624, and as the income of R after the death of L. How would gains be apportioned? It is suggested, by reference to actuarial values at the date of the resettlement. But it will not happen often, if at all.

Section 644 applies where there is *one* settlement with more than one

---

5 See App 2.11 (“Representing assets). There is the standard provision:

**s.645(4) ITTOIA**

**para 8(6) sch 5 TCGA**

In this section references to property which represents other property include references to property which represents accumulated income from the other property.	For the purposes of this paragraph references to property representing other property include references to property representing accumulated income from that other property.
--	--

settlor. In some IT cases one might say that there are two settlement-arrangements. Eg suppose:

- (1) S creates a trust
- (2) Subsequently, and independently, X adds to it.

One might say that:

- (1) there are two distinct settlement-arrangements (even if there is only one classic settlement)
- (2) S and X are the (sole) settlors of their settlement-arrangement.

However s.644 is another route to the same destination. It does not matter which analysis one takes, though s.644 seems a clearer solution.

#### 95.1.4 *Two settlors: CGT guidance*

The CG Manual contained guidance which related to s.77 -79 TCGA. Those sections were repealed in 2008 but the guidance remained in the Manual until 2020 when it was finally removed. I set it out here as it is still relevant to s.86:

**CG34893 Multiple settlors** [Version of Jul 2019, removed 2020]

Section 79 [TCGA] provides that trust gains are only to be attributed to each settlor to the extent that those gains accrue on property originating from that person. Where the assets provided by two or more settlors are managed as separate funds, there should be no difficulty in determining to which settlor the gains on the disposal of particular items of property should be attributed. Where the assets provided by different settlors are not appropriated into separate funds, the legislation provides for a just apportionment as between the settlors.

**CG34894 Multiple settlors** [Version of Jul 2019, removed 2020]

If HMRC Trusts Head Office Bootle or Financial Intermediaries and Claims Office (formerly Claims Branch) have given advice on apportionment for Income Tax purposes, this should be followed for CGT. Otherwise, if settlors together make the settlement, the gains in such a case should be apportioned according to the amounts each put in. If a settlor adds to a settlement, then the amount put in should be compared with the value of the settlement at that time. Trust Offices should endeavour to reach a fair and easily worked solution.

**CG34895 multiple settlors** [Version of Jul 2019, removed 2020]

If one settlor is within Section 79 [TCGA] and the other is not, the gains are apportioned on the lines suggested, but those relating to the settlor

who is outside Section 79 are assessed on the trustees in the normal way after deducting the trustees' annual exempt amount.

**CG34900 Example 1** [Version of Jul 2019, removed 2020]

A and B each settle ordinary shares in X Limited on a trust under which both Mrs A and Mrs B have an interest as defined by the new provisions. A settles 500 such shares and B 1500. It is accepted that there is only one settlement for CGT purposes and the shares are not appropriated into separate funds.

In 1988-89 there is a gain of £2,000 on the sale of some of the shares, [there is] a loss of £400 on the sale in 1989/90 of further shares and in 1990-91 a gain of £500 on the sale of shares in Y Limited acquired with the sale proceeds of the shares in X Limited.

The HMRC analysis is as follows:

In 1988-89, as A and B settled property in the proportion 1:3, there is, on a just apportionment, a chargeable gain of £500 ( $2000 \times \frac{1}{4}$ ) accruing to A.

Similarly a gain of £1500 is treated as accruing to B. Each is assessed as appropriate.

That is straightforward. The example then turns to consider the loss in the next year and the gain in the following year:

The loss of £400 in 1989-90 is apportioned £100 to A and £300 to B. The gain of £500 in 1990-91 is apportioned £125 to A and £375 to B. The loss of £100 in respect of the property provided by A is set against the gain of £125, leaving a net gain of £25 to be attributed to A. Similarly the loss of £300 in respect of the property provided by B is set against the gain of £375 on the property provided by him, leaving a net gain of £75 assessable on B.

More analytically, the loss is not attributed to A or to B (either under the former s.77 or under the existing s.86.) It is carried forward and set against future gains of the trustees. The net gain in 1990/91 is £100 which is apportioned £25 to A and £75 to B. But the end result is the same.

**CG34901 Example 2** [Version of Jul 2019, removed 2020]

The facts are as in Example 1 except that by a deed executed during 1988-89 Mrs B irrevocably excludes herself from the class of beneficiaries.

The HMRC analysis is as follows:

The gains of that year are apportioned and attributed as before because Mrs B had an interest in the settlement at some time during the year.

More analytically, this result obtains because at some time in the year *Mr B* had an interest in the settlement, for the purposes of s.77 TCGA, because his spouse Mrs B could benefit.<sup>6</sup> But the end result is the same.

The losses of 1989-90 and the gains of 1990-91 are apportioned in the same way, and the net gains of £25 for 1990-91 are attributed to A.

More analytically, the losses are set against the trustees gains; but it is correct that of the net £100 gains, £25 is attributed to A on a just and reasonable apportionment.

There can be no attribution to B in 1990-91 because neither he nor his spouse has an interest in the settlement in that year. Accordingly the gains on the assets deriving from the property provided by B are assessable on the trustees and the trustees can claim the annual exemption due to them...<sup>7</sup>

## 95.2 Just & reasonable apportionment

The multiple settlor provisions are straightforward if two individual (“A” and “B”) directly transfer property to a trust. A and B are both settlors and the property originating from A and B can be identified.

### 95.2.1 *Direct and indirect settlors*

Suppose there is an arrangement under which:

- (1) A makes a gift of property to B, and
- (2) B gifts the property to a trust.

A is a settlor (having provided property indirectly) and it seems at first as if B is also a settlor (having provided the property directly).<sup>8</sup> But A and B have provided the *same* property. There is no provision how to

---

6 The trust created in the example is unusual, because the settlors Mr A and Mr B are excluded, but their spouses are beneficiaries. But this might be done in practice, to avoid GWR issues.

7 The Manual continues with some (I think erroneous) comments on the interaction of the annual exemption and loss relief; but it is not necessary to pursue that here.

8 See 94.7 (A gives to B, B gives to trust).

apportion trust income or gains between A and B and, since the income and gains cannot be subject to tax twice, it is considered that s.624 and s.86 do not apply at all; see 95.1.1 (Where multiple settlor provision does not apply). The solution to the problem is that A is the “real” settlor, and B is not to be regarded as the settlor.

This issue sometimes arises in the context of failed tax planning of the kind discussed at 94.41 (Planning to create excluded property trust).

The issue arose in *Dunsby v HMRC*.<sup>9</sup> This was a tax avoidance scheme involving a number of steps under which Mr Dunsby made a gift to G, and G made a gift to a trust. D was a settlor and G was also a settlor.<sup>10</sup> The judge said:

134. The legislation does not deal easily with circumstances in which more than one person could be regarded as providing the same property to the settlement. One reading of s645(1) might be that, in such circumstances, both Mr Dunsby and [G] must each be treated as having provided the entire property in the S share to the settlement (under s645(1)(a)), in which case, the full amount of the dividend income could be treated as the income of either or both of them under s645(2). That approach could, in other circumstances, result in the same income being taxed in the hands of multiple settlors. To my mind, that cannot be the correct construction of s645, which is clearly designed to allocate property within a settlement (and so the income derived from that property) between the various settlors. In my view, the better construction is that, in circumstances where property may have been provided directly or indirectly by more than one settlor, the property should be regarded as provided partly by each such settlor and the provisions of s645(1)(c) should apply to require a just and reasonable apportionment of the property between them.

The FTT could not have reached that decision if *Herbert* had been cited. However it could have reached its decision on the basis that for the purposes of the settlor-interested trust code, Mr Dunsby should be treated as the real or effective settlor. A higher court may well decide that *Herbert* should not be followed and prefer the solution of a just and reasonable apportionment. But on the facts here, these are two different

---

9 [2020] UKFTT 271 (TC); for the facts see [App 2.2.7](#) (Pre-arrangement steps).

10 That seems self-evident; for the reasoning see 94.2.6 (Make/enter into settlement).

routes to the same destination:

135. In the present circumstances, that apportionment can only lead to one answer. All or substantially all of the value in the S share has been provided to the settlement by Mr Dunsby. As I mentioned above, [G] was a mere functionary in the process of the creation of the settlement. On that basis, a just and reasonable apportionment would treat all or substantially all of the property in the settlement (i.e. the S share) as originating from Mr Dunsby (s645(1)) and accordingly all or substantially all of the income from that property (i.e. the dividend income on the S share received by the trustee) as income originating from Mr Dunsby (s645(2)). I can see little basis for attributing any of the property to [G].

### 95.2.2 *Loan/guarantee/paying trust expenses*

Similar issues arise where:

- (1) S makes a settlement; and
- (2) X provides further funds indirectly to the settlement, for instance by way of beneficial loan, guarantee, or payment of trust expenses.

X may be a joint settlor, but (even if the trust is settlor-interested) s.624 still does not apply to X unless it is possible to identify the income provided by X, ie arising from X's act of bounty. In some cases one may say that all the income originates from S, so that s.624 applies to S but not to X. In other cases the contribution of S may be nominal, and one may be able to say that all the income originates from X.

## STATUTORY TAX INDEMNITIES

96.1

### 96.1 Statutory tax indemnities

The taxes acts often authorise one taxpayer to recover tax from another. I refer to these as “**statutory tax indemnities**”. They arise in a variety of cases.

In the paradigm case, the settlor has an indemnity against trustees (“**settlor trust-tax indemnities**”). These include:

<b>Tax charge on settlor</b>	<b>Indemnity</b>
s.624/629 ITTOIA	s.646 ITTOIA
s.86 TCGA	para 6 sch 5 TCGA
Policy/chargeable event gain	s.538 ITTOIA

Settlor-attribution rules provide an indemnity for the settlor from the original recipient: see 57.28 (Settlor-attribution indemnity).

Rules imposing a tax charge on agents provide an indemnity for the agent against their principal:

<b>Topic</b>	<b>Indemnity</b>	<b>See para</b>
Non-resident landlord representative	s.971 ITA	19.18
Agent of non-UK resident	s.835X ITA	51.6.4

Other more specialist statutory tax indemnities include:

<b>Topic</b>	<b>Indemnity to</b>	<b>Statutory ref</b>	<b>See para</b>
Clawback of hold-over relief	Donor	s.168(9) TCGA	11.2
Trust migration	Retired trustee	s.82(4) TCGA	11.5
Disposal of equitable interest	Disponor	para 11 sch 4A TCGA	

In other cases there is no statutory indemnity, but there is some tax relief if the relevant person chooses to make a payment, which could effectively be used to reimburse the taxpayer.<sup>1</sup>

The focus of this chapter is settlor trust-tax indemnities. However similar considerations may apply to other types of indemnity, including indemnities in non-tax statutes, and non-statutory indemnities.<sup>2</sup>

## 96.2 Settlor trust-tax indemnities

The 3 settlor trust-tax indemnities use standard form wording:

<b>s.646(1) ITTOIA</b>	<b>Para 6 sch 5 TCGA</b>	<b>Section 538 ITTOIA</b>
	(1) This paragraph applies where any tax becomes chargeable on, and is paid by, a person in respect of gains treated as accruing to him in a year under section 86(4).	(1) This section applies if— (a) immediately before a chargeable event the rights under the policy or contract, or the part of or share in them in question, were held on non-charitable trusts, (b) an individual is liable for tax under this Chapter for the tax year on the gain from the event, and (c) the income tax for which the individual is liable for the tax year, after any relief available in respect of the gain under section 535 (top slicing relief), <sup>3</sup> exceeds that for which the individual would have been liable apart from the event.

1 See 60.23 (Reimbursement by non-resident co); 48.3 (Distribution relief).

2 On whether person granting an indemnity to a trust provides property, or adds value, see 98.27 (Giving an indemnity).

3 Section 538(4) ITTOIA provides

“If the individual's relief under section 535 for the tax year does not relate only to the gain from the event in question, for the purposes of subsection (1)(c) a proportionate part of that relief is taken to be relief in respect of that gain.”

A settlor is entitled to recover from—  
 (a) any trustee, or  
 (b) any other person to whom the income is payable in connection with the settlement,  
 the amount of any tax paid by the settlor which became chargeable on the settlor under section 624 or 629.

(2) The person shall be entitled to recover the amount of the tax from any person who is a trustee of the settlement.

(2) The individual is entitled to recover that excess from the trustees, subject to the restriction specified in subsection (3).  
 (3) The amount recovered must not exceed the total of—  
 (a) any sums received by the trustees because of the chargeable event, and  
 (b) the value of any benefits so received.

These indemnities do not extend to interest or penalties.

Where the settlor has an indemnity against the trustees it is the beneficiaries who ultimately bear the burden of the tax charge, but they do so at the settlor's marginal rates. This may favour the taxpayer, because trust income/gains may otherwise be taxed at the trust rates, ie the top rates; so in a very rough and ready way the rules can mitigate the unfairness of taxing trusts at the trust rates, whose beneficiaries may be lower taxpayers.

### 96.2.1 *Repayment of indemnity*

If the trustees pay tax which the settlor reclaims, the settlor is required to reimburse the trustees. This is most likely to arise where the income charged on the settlor has had tax deducted at source; a repayment of tax may be made to the settlor because of the settlor's allowances or reliefs.

Section 646 ITTOIA provides:

- (4) Subsection (5) applies if a settlor chargeable to tax under section 624 or 629 obtains a repayment by reason of the payment of the tax by—
  - (a) any trustee, or
  - (b) any other person to whom the income is payable by virtue of or as a result of the settlement.
- (5) The settlor must pay an amount equal to the repayment to—
  - (a) the trustee, or
  - (b) the other person to whom the income is payable by virtue of or as a result of the settlement.

- (6) If there are two or more such persons, the amount must be apportioned among them as the case may require.

It is suggested that the same rule would in principle apply to other tax indemnities, even in the absence of an express provision of this kind; the liability would arise under the law of restitution.<sup>4</sup>

### 96.2.2 *Amount of tax*

For the purpose of this indemnity, it is necessary to ascertain the amount of any tax paid by the settlor which became chargeable on the settlor under section 624 or 629. The position is governed by s.619A ITTOIA:

- (1) This section applies to income which is treated as income of a settlor as a result of section 624 (income where settlor retains an interest) or 629 (income paid to unmarried minor children of settlor).
- (2) The income is treated as the highest part of the settlor's total income for the purposes of section 619 (so far as it relates to the income).
- (3) See section 1012 of ITA 2007 (relationship between highest part rules) for the relationship between—
- (a) the rule in subsection (2), and
  - (b) other rules requiring particular income to be treated as the highest part of a person's total income.

Contrast 60.21.1 (Amount of distribution tax) - s.3 distribution relief.

### 96.2.3 *Certificate of tax paid*

#### **s.646(1) ITTOIA**

(6A) For the purpose of subsection (5), the settlor may require an officer of Revenue and Customs to provide the settlor with a certificate specifying—

- (a) that the settlor has obtained a repayment as mentioned in subsection (4), and
- (b) the amount of the repayment.

#### **Para 6 sch 5 TCGA**

(3) For the purposes of recovering that amount, the person shall also be entitled to require an inspector to give him a certificate specifying—

- (a) the amount of the gains concerned, and
- (b) the amount of tax paid,

#### **s.538 ITTOIA**

(5) An individual may require an officer of Revenue and Customs to certify an amount recoverable by the individual under this section.

---

4 Further consideration would be needed if Scots law or foreign law applied.

(6B) A certificate provided under subsection (6A) is conclusive evidence of the facts stated in it.	and any such certificate shall be conclusive evidence of the facts stated in it.	(6) Such a certificate is conclusive evidence of the amount.
---	--	--

#### 96.2.4 *Life policy indemnity*

Section 538(3) ITTOIA provides a cap:

The amount recovered must not exceed the total of—

- (a) any sums received by the trustees because of the chargeable event, and
- (b) the value of any benefits so received.

### 96.3 Enforceability of indemnity

For enforceability of statutory tax indemnities in foreign jurisdictions, see: Campbell, “CGT: The Settlor’s Predicament” [1999] PCB 277  
 Peacock, “CGT: A Worthless Right?” [1999] PCB 204  
 Sartin, “Tax Recovery Claims by the Settlor” [1999] PTPR 237

### 96.4 Tax on indemnity payment

SP 5/92 provides:

- 8[1] The settlor’s right, under Para 6 Sch 5 TCGA, to reimbursement (or any payment in reimbursement) of tax paid under that Schedule is not regarded as creating an interest in a trust for the settlor under the provisions of [the settlor-interested trust code] where the settlor, the settlor’s spouse, and any companies in which they are participators cannot otherwise benefit from the trust, eg where the only beneficiaries are the settlor’s children.
- [2] Similarly, this statutory right to, or payment in, reimbursement is not regarded as bringing the settlor within the provisions of [s.633 ITTOIA, and the ToA provisions],
- [3] nor as a capital payment for the purposes of s.97 TCGA.<sup>5</sup>

---

<sup>5</sup> The CG Manual makes same point:

**“CG38625: Capital payments** [Jul 2019]

A beneficiary or settlor who has pays tax in respect of a non-resident settlement may have a statutory right to recover that tax from the trustees. For example, a repayment of Income Tax to a settlor under ITTOIA05/S646 or Capital Gains Tax under

- 9[1] Further, this statutory right is not regarded as a reservation of benefit for inheritance tax purposes;
- [2] nor is a provision in the trust deed either requiring the trustees to recognise the settlor's right to reimbursement under Para 6 Sch 5 TCGA or to reimburse the settlor...<sup>6</sup>
- 10 A provision written into a settlement deed requiring the trustees to recognise the settlor's right to reimbursement under Para 6 Sch 5 TCGA, or to reimburse the settlor,
- [a] is not, of itself, regarded as giving the settlor an interest in the settlement for the purposes of Sch 5,
- [b] nor as bringing into play the provisions of [s.624 ITTOIA, and the ToA Provisions].

There are many points bundled in this list, but they all arise from the same fundamental point, namely, that a payment to the settlor under a settlor trust-tax indemnity is not a benefit to the settlor.

Why not, when the exercise of the indemnity involves the payment of a sum to the settlor? The answer may be that one looks at the matter as a whole: the settlor has received £x and paid £x in tax; so looked at overall, the settlor is no better off than before.

Another possible answer may be that before the repayment the settlor has a valuable right - the right to the repayment, so the settlor is no better off after the payment. This answer requires one to ignore the possibility, which will sometimes be the case, that the indemnity is not in fact enforceable.

The same applies to:

- (1) All statutory tax indemnities
- (2) Trust law indemnities<sup>7</sup>

TCGA92/Sch5para6. This is not treated as a capital payment.”

- 6 SP 5/82 makes similar points for the indemnity to a former trustee of an exit charge:
- 6 An amount recovered from present trustees by a former trustee in respect of capital gains tax under TCGA 1992 s 82 is not regarded as a capital payment under s 97. Further, such amounts do not fall within the provisions of [what is now s.720, 727 or 731 ITA] nor are there any inheritance tax implications.
- See 11.5 (Trustees liable for exit charge).
- 7 Eg s.31 Trustee Act 2000 which provides:
- “A trustee-
- (a) is entitled to be reimbursed from the trust funds, or
  - (b) may pay out of the trust funds,

- (3) Contractual indemnities, such as may arise on retirement of trustees
- (4) Equivalent foreign tax law indemnities

A settlor is not entitled to claim under the indemnity until they have paid the tax due to HMRC. What if reimbursement is made sooner, before the settlor has paid the tax? It is considered that there is no benefit (or the value of the benefit is nil) when trustees pay a sum to a settlor in *bona fide* settlement of a claim or prospective claim for reimbursement.<sup>8</sup>

Income spent in meeting a statutory indemnity ceases to be relevant income for s.731.<sup>9</sup>

## 96.5 Failure to claim indemnity

### 96.5.1 Settlor/tainting issues

SP 5/92 para 24 provides:

- [1] Failure, by or on behalf of any relevant person, to exercise statutory rights to reimbursement e.g. under [s.646 ITTOIA],<sup>10</sup> may be regarded as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3).<sup>11</sup>

Point [1] only applies to a failure to exercise rights with gratuitous intent

---

expenses properly incurred by him when acting on behalf of the trust.”

8 HMRC once floated the contrary view, but it was a bad point, and perhaps they have now dropped it.

9 See 47.27 (Relevant income spent).

10 See 96.1 (Statutory tax indemnities).

11 For completeness, Tax Bulletin 8 correctly qualifies this:

“Para 24 of the Statement of Practice [5/92] points out that failure to exercise statutory rights to reimbursement against non-resident trustees may be regarded as the provision of funds for the purposes of the settlement under para 9(3) of Schedule 5, TCGA 1992. This will not, however, apply in respect of a settlor’s non-exercise of statutory rights to reimbursement out of the trust income account where the settlor has a life interest in all the assets of the trust. In such circumstances, failure to exercise the right to reimbursement would, effectively, not add funds to the trust since all income would, in any case, either be paid to the settlor under the terms of the trust deed or be used to meet expenses chargeable against income.

But even in such cases the settlor may have rights to reimbursement out of the trust capital account, eg in relation to accrued income charges, which if not exercised will be regarded as the provision of funds.”

(ie with an element of bounty). This is the reason for the exceptional case which para 24 then mentions:

- [2] The settlement could (?) remain outside the terms of para 9(3) where the exercise of the right to reimbursement is unsuccessful, provided it could be shown that there had been a genuine attempt to enforce rights to reimbursement.

The exception is stingily worded.<sup>12</sup> It is not necessary to show “a genuine attempt to enforce rights to reimbursement”. It is sufficient to show that such rights are not enforceable, or that a decision not to obtain reimbursement is a commercial one because enforcement, or even just taking advice on enforcement, would not be or does not seem cost-effective.

It is strongly arguable that even a deliberate and gratuitous refusal to exercise a right of reimbursement does not amount to providing property. For what is the property provided? It would however count as adding value.

See too 98.15 (Settlement powers).

#### 96.5.2 *IHT issues*

SP 5/92 provides:

- 9... where a settlor does not pursue the statutory right to reimbursement, the failure to exercise this right may give rise to an inheritance tax claim under s.3(3) IHTA,<sup>13</sup> in which case the usual rules for lifetime transfers would apply.

In the case of income tax indemnities, the IHT normal expenditure exemption may apply, but the amounts are not likely to be so great.

---

12 Here, as elsewhere, SP 5/92 gives the impression that it was intended to make life as difficult as possible for offshore trusts. In 1992 that was considered striking; though nowadays it would hardly merit a mention.

13 See 70.5 (Omission: Deemed disposition).

## CHAPTER NINETY SEVEN

# SITUS OF ASSETS FOR IHT

- |         |  |         |  |

### *Cross references*

The following topics are considered elsewhere:

- 66.8 (Situs of unit)
- 67.3 (Situs of transparent intermediated security for IHT & IT)

## 97.1 Concepts of situs

Situs<sup>1</sup> of assets matters for many tax and some non-tax purposes. It is not possible to draw up a full list; the most important are:

- (1) IHT excluded property (which applies to non-UK situate assets)
- (2) CGT remittance basis (which applies to non-UK situate assets)
- (3) ITA remittance rules (which apply if an asset is received in the UK, ie, UK situate when received)<sup>2</sup>

---

1 A note on terminology. IHTA and TCGA generally refer to the “situation” of assets though the heading to s.275 TCGA refers to “location”. Section 59 Stamp Act 1891 (repealed) used the term “locally situate” and some older cases referred to the “local situation”. These expressions are synonymous.

Some old cases were uncomfortable with the concept of situs of intangible property, and used the term “quasi locality”, but this has not been adopted and situs is the current term.

“Situs” has become adopted into legal English usage and should not be written in italics.

- 2 Other tax issues where situs matters include:
  - (1) foreign IHT and CGT credit relief

Situs (like domicile) is a concept of private international law<sup>3</sup> which has been adopted whenever tax statutes (or other statutes) refer to the location of property (typically referring to property “in” or “within” or “outside” a state). The rules are laid down by the common law.<sup>4</sup> The common law rules apply for tax, except so far as modified by specific rules in tax legislation. Thus one might refer to these rules as common law rules, private international law rules, or IHT rules.

IHT situs is almost entirely based on the common law rules. These are discussed in this chapter. Some IHT double tax treaties override the usual IHT situs rules.<sup>5</sup>

CGT has statutory situs rules which cover most situations, and the common law is only needed to fill a few gaps. So CGT situs is best regarded as a separate subject, though in a few cases the common law/IHT rules still apply for CGT. Situs for CGT is discussed in the next chapter.

The rules which determine the location of a source of income for income tax purposes are distinct from the rules which determine the situs of assets. For instance, the source of dividends is the place where the company is resident, but the situs of shares is the place where the shares are registered. Situs of assets only occasionally matters for IT, but where it does, then (subject to any overriding rule of IT law) the common law rules discussed in this chapter will apply.

As there are diverse statutory situs rules, one should (strictly speaking) not refer to situs in the abstract, but to situs for a specific purpose (CGT, IHT, or whatever). However context may supply the reference, and in this chapter, situs means situs as determined by the common law rules which apply for IHT purposes.

Dicey takes the view that “situs for tax purposes” may be different from

(2) stamp duty; see s.14(4) Stamp Act 1891

In most cases the issue is whether or not the asset is situated in the UK, and if outside the UK it does not matter where. However in cases of foreign IHT and CGT credit relief, it may be necessary to identify the state where assets are situated.

- 3 This topic is also called “Conflict of Laws” but (notwithstanding Dicey’s book of that name) I think “private international law” is the better label.
- 4 I use the term “common law” here to mean judge-made law, including the pre-1857 ecclesiastical law from which the present law is derived.
- 5 See 109.8 (Treaty-situs); 113.9 (Dual-situate asset).

situs for the purpose of private international law. But this expression conceals a muddle or a mistake. One may correctly refer to situs for *specific* tax purposes, such as CGT, or IHT DTAs, which have statutory situs rules. But in the absence of contrary intention, references in a tax statute (or any statute) to the situs or location of property are taken as references to the private international law concept of situs. The law does not distinguish between situs for (general) tax purposes and situs for private international law purposes. *AG v Bouwens* (the leading tax case) adopts the situs rules which were developed “to prevent conflicting jurisdictions between different ordinaries”.<sup>6</sup> Non-tax situs cases<sup>7</sup> routinely cite and follow tax cases, and vice versa. In a stamp duty case, Lord Lindley referred to situs “for *legal* purposes” (not *tax* purposes) and added:

It may perhaps be true that property which has no physical existence may, if necessary, be treated for some purposes in one locality, and for other purposes in some other locality. But, until the necessity for so treating it is apparent, I see no justification for introducing confusion by judicially holding the same property to be legally situate in two different places at one and the same time. But this confusion would be introduced if your Lordships were to decide that the analogy of probate cases was to be no guide in dealing with liability to stamp duty.<sup>8</sup>

It would of course be possible for the common law to develop different situs rules for different purposes. But (subject to statutory exceptions) a distinction between situs for one purpose and situs for another purpose should be avoided so far as possible, and in practice the common law has

---

6 See the quote at 97.12 (Simple contract debt). The argument that situs rules should be limited to their original context of probate cases was rejected in *English, Scottish & Australian Bank v IRC* [1932] AC 238 at p.257:

“It was suggested that the doctrine just enunciated was peculiar to probate cases. Apart from the illustrations of its application in other departments of the law which [counsel] adduced, I venture to express my agreement with Lord Lindley, who said: “The authorities which bear upon the locality of incorporeal personal property for purposes of probate appear to me to afford the best guides for the solution of the case before us.”

7 Such as *New York Life Insurance Co v Public Trustee* [1924] 2 Ch 101.

8 *IRC v Muller & Co. 's Margarine* [1901] AC 217 at p.237.

not gone down this path.<sup>9</sup>

Scots situs law is the same as English law,<sup>10</sup> except where situs depends on concepts of property law which are different in Scotland.<sup>11</sup>

Northern Ireland situs law is the same as English law.

### 97.1.1 *History and terminology*

To understand the old case law one needs to know some of its history and historic terminology.<sup>12</sup>

As mentioned above, the common law has adopted situs rules which were originally developed “to prevent conflicting jurisdictions between different ordinaries”.<sup>13</sup>

The “**ordinary**” was the judge of an ecclesiastical court with jurisdiction to grant probate for personal property situate in his province or diocese.

Blackstone explains:

If all the goods of the deceased lie within the same jurisdiction, a probate before the ordinary, or an administration granted by him, are the only proper ones; but if the deceased had *bona notabilia*, or chattels to the value of a hundred shillings in two distinct dioceses or jurisdictions, then the will must be proved, or administration taken out, before the metropolitan of the province, by way of special prerogative; whence the court where the validity of such wills is tried... is called the prerogative court.”<sup>14</sup>

---

9 Except for a line of Canadian case law concerning expropriation, which requires a lot of explanation, but which does not affect the point being made here.

10 For instance, *Laidlay v Lord Advocate* (1890) 15 App Cas 468 followed the Scots case *Commissioner of Stamp Duty v Salting* [1907] AC 449; see 97.33 (Situs of partnership share).

11 See 97.16.2 (Situs in Scots law).

12 For a discussion of this interesting corner of legal history; see Outhwaite, *The Rise and Fall of the English Ecclesiastical Courts, 1500-1860*.

13 See the quote at 97.12 (Simple contract debt).

14 Commentary on the Laws of England, Book 2 p.509. There were about 250 local courts, and two prerogative courts, in Canterbury and York.

The Solicitor-General said in argument in *AG v Bouwens* (1838) 4 M & W 171 <http://www.commonlii.org> at p.189: “that doctrine [*bona notabilia*] has no application as between goods in one province or diocese, and out of the kingdom. The defendants must establish that these instruments have no value in the kingdom.” In order to understand this, one needs to understand what the Solicitor-General meant

The term “*bona notabilia*” in the wider sense meant “such goods and debts of a deceased person as require administration being taken thereto, [ie which require a grant of probate or administration] and are therefore denominated *notable*.” The term was more often used to mean “goods and debts belonging or owing to any person at the time of his death, in any other diocese or peculiar jurisdiction, within the province... besides the goods in the diocese or peculiar jurisdiction where he dwelt”.<sup>15</sup> The detailed rules of what counted as *bona notabilia* (and so required probate) need not be considered here.

In 1857 the jurisdiction of the ecclesiastical courts passed to the Court of Probate. The concept of *bona notabilia* (in the sense of assets not in the diocese where the deceased was resident) then became obsolete, though the term continued to be used: “*bona notabilia*” in a certain place became a traditional way of referring to the assets of the deceased situate in that place.

In 1875 the jurisdiction passed to the Chancery Division of the High Court.

### 97.1.2 *Inconsistent case law*

As in any large body of case law – and the body of situs case law is very large – it is usually possible to find cases or dicta supporting inconsistent views. In 1914, Hohfeld said of the subject of conflict of laws:

This is a branch of municipal law as to which... the Anglo-American system ... has conspicuously failed both in England and in the United States. We have, even in relation to some of the most basic principles,

---

by the doctrine of *bona notabilia*. The Solicitor-General is *not* referring to the set of rules which determine where assets are situate. He is referring to the rule that where the deceased had *bona notabilia* in more than one diocese, the will must be proved in the prerogative court. Obviously that rule has no application in tax cases such as *Bouwens* where the issue is whether property is situate in the UK or outside the UK. This comment does not cast any doubt on the application of the situs principles developed in the ecclesiastical probate cases and now adopted in the common law. I mention this because the comment has sometimes been misunderstood.

<sup>15</sup> Lawton, *A Brief Treatise of Bona Notabilia* (1825) p.2. Comyn’s Digest (Administration, B6): “If the testator had *bona notabilia*, the administration belongs to the archbishop of the province... If the testator had not *bona notabilia*, it belongs to the bishop of the diocese...”.

which ought above all others to be uniform, certain, and knowable, a veritable chaos of opinion and decision.<sup>16</sup>

Private international law has largely been codified by international treaties. But some of this confusion survives today, particularly in the situs of debts secured on land. It may be possible to reconcile some inconsistent cases by saying that there is one situs for tax and another for private international law; or that an asset may be dual situate. But where inconsistency exists it would be better to grasp the nettle and prefer one body of authority to the other.

## 97.2 Intangible property has a situs

In *R v Williams*:

Shares in a company are “things in action” which have in a sense no real situs, but it is now settled law that for the purposes of taxation ... they must be treated as having a situs which may be merely of a fictional nature.<sup>17</sup>

There are two points here:

- (1) Shares (and other choses in action) have a situs.
- (2) That situs is “fictional”.<sup>18</sup>

The first point is a straightforward rule of law: all property has a situs.<sup>19</sup>

---

16 Hohfeld, “A vital school of jurisprudence and law: Have American universities awakened to the enlarged opportunities and responsibilities of the present day?”

17 [1942] AC 541 at p.549.

18 Similarly, in *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 at p.119 the situs rules for choses in action were described as “legal fictions”; also *English Scottish & Australian Bank v IRC* [1932] AC 238 at p.248 (“*fictionem legis*”).

19 If further authority is needed, see *English Scottish and Australian Bank v IRC* [1932] AC 238 at p.244: “it is desirable that [debts] should possess a locality”; at p.248: the legal conception of property involves the legal conception of existence somewhere”; even, at p.251, with an element of hyperbole: “it is not easy to form a conception of property having no local situation”. Similarly *IRC v Muller* [1901] AC 217 at p.236: “Goodwill is only taxable as property; and the legal conception of property appears to me to involve the legal conception of existence somewhere. Incorporeal property has no existence in nature and has, physically speaking, no locality at all. We, however, are dealing not with anything which in fact fills a portion of space, but with a legal conception, or, in other words, with rights regarded as property. But to

### 97.2.1 *Is situs fictional?*

The second point is a point of jurisprudence. It is of course true that an asset with no corporeal existence, such as a debt, shares, or other chose in action, has no material position in the material world. Nevertheless a better analysis is to say that “situs” (of a chose in action) is a term describing an abstract concept. The situs of a chose in action is not “fictional”, but “real” (or at least as real as other legal concepts such as “residence” or “domicile” or indeed “chose in action”). The concept may be described as technical. It might be described as metaphorical (at least in origin), or as “artificial” (though that has a pejorative nuance which is not apt here). Lawyers are entitled to use ordinary words in special senses and to call a situs (of a chose in action) a “fiction” is inapt.<sup>20</sup> If we talk of fiction, we suggest that we are using words in their ordinary sense and are pretending that something exists to which they apply.<sup>21</sup> It would be better to abandon the use of the word fiction in this content. It may not matter, in that the use of the word “fiction” may not lead to difficulty or error, but it is good to see clearly what we are talking about.

Similarly, for private international law purposes, choses in action are categorised as movable or immovable property; but I am not aware of anyone describing that as a fiction.

### 97.2.2 *Situs connecting factors*

Once one accepts that intangible assets (shares, debts, etc) have a situs, the law must choose connecting factors to identify the situs, in short, to link the asset to a jurisdiction. There is a large choice of possible connecting factors, and the selection of the determining factor must sometimes be arbitrary:

probably any system of rules for determining the constructive locality

---

talk of property as existing nowhere is to use language which to me is unintelligible.”

20 See Baker, *The Law's Two Bodies* (2001), Lecture 2 (“Legal Fictions”); MacCormick, *Institutions of Law* (2007), p.136. Dumbledore makes the same point: “Of course it is happening inside your head, Harry, but why on earth should that mean that it is not real?”

21 Hart, “Definition and Theory in Jurisprudence” (1953).

of intangible property must be more or less arbitrary.<sup>22</sup>

One might think that it would not matter much what the rule was, as long as there is some rule and its application is clear. But sometimes choices have to be made between more formal rules (easy to apply) and more substantive rules (which aim to track the economic realities more closely).<sup>23</sup> The desirable rule (at least from the HMRC viewpoint) is one which minimises the scope for persons to choose the situs of assets, as that would allow tax planning. The common law rules do not achieve that. Inasmuch as they were devised for conflicts purposes, there is no reason why they should. In the context of private international law, there is no objection to parties being able to choose a situs and it may be convenient if they can do so. The common law situs rules are not so well suited to serve as a territorial limitation for tax. It is not surprising that the common law rules have been modified for CGT. The role of situs in private international law has also decreased, though for different reasons,<sup>24</sup> and sometimes it still matters.

### 97.3 Every asset has one situs

Under the common law rules, every asset is situate in a jurisdiction and only in one jurisdiction. In *R v Williams*:

Property, whether movable or immovable, can ...<sup>25</sup> have only one local situation.<sup>26</sup>

---

22 *Royal Trust Co v Provincial Secretary-Treasurer of New Brunswick* [1925] SCR 94 at p.99.

23 A similar distinction arises in determining the location of a source of income: see 15.5 (Formal/substantive source rules).

24 The role of situs in private international law is criticised in Rogerson “The Situs of Debts in the Conflict of Laws - Illogical, Unnecessary and Misleading” [1990] CLJ 441.

25 The omitted words are “... for the purposes of determining situs as among the different provinces of Canada in relation to the incidence of a tax imposed by a provincial law upon property transmitted owing to death”. These words do not qualify the general principle as there is only one common law situs concept and (subject to statute) that applies for all purposes.

26 [1942] AC 541 at p.559. Likewise *Laidlay v Lord Advocate* (1890) 15 App Cas 468 at p.483: “locality cannot be both England and India—the choice has to be made

This rule is self-evidently necessary if situs rules in private international law are to achieve their object, which is to resolve conflicts of jurisdiction, and if situs rules in tax law are to achieve the object of avoiding double taxation.

It is also implicit in the word situs: a physical object (let us ignore quantum physics) can be situate in only one place.

I stress this as some old cases considered one asset could be situate in two jurisdictions. They no longer represent the law. It is however possible that what appears at first sight to be one asset (eg copyright) is in fact a bundle of distinct assets, situate in different jurisdictions.

An asset must be situate in a single legal jurisdiction. The expression “**UK situate**” is in a literal sense inapt because an asset must be situate in England, Scotland or Northern Ireland. It is, however, universally used to describe an asset which is situate in England, Scotland or Northern Ireland. For tax purposes it usually makes no difference where in the UK an asset is situate, though for non-tax purposes that is occasionally important.

#### 97.4 Situs of shares: General principle

In *Brassard v Smith*:

This is, in their Lordships’ opinion, the true test. Where could the shares be effectively dealt with?<sup>27</sup>

In *R v Williams* the Privy Council approved this test, and continued:

It may be useful here to make some general remarks on the meaning and effect of the principle laid down in *Brassard v Smith* and in the *Erie Beach* case. The first observation is that the phrase used in laying down the principle clearly means “where the shares can be effectively

---

between the two”. Likewise *Toronto General Trusts Co v The King* [1919] AC 679 at p.684: “it is plainly impossible to hold that [the debts] were situate in both provinces at once.” Likewise *Ex p. Coote* (1948) 49 SR (NSW) 179 at p.184: “Unless there is some special reason which makes it necessary so to hold, property should not be regarded as legally situate in two different places at the same time.” Likewise *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 at p.120.

<sup>27</sup> [1925] AC 371, page 376.

dealt with as between the shareholder and the company, so that the transferee will become legally entitled to all the rights of a member,” e.g., the right of attending meetings and voting and of receiving dividends. If the phrase only meant “effectively dealt with as between transferor and transferee of shares,” the test would obviously be almost completely useless, since the rights of a shareholder as between himself and a transferee can, speaking generally, effectively be transferred in any part of the world.<sup>28</sup>

These cases concerned registered shares, but the principle is not so restricted and applies to bearer shares also.

France/Italy IHT DTAs apply different rules.<sup>29</sup>

The question which follows from this test is: How to identify the place where shares can be dealt with?

## 97.5 Situs of registered shares

### 97.5.1 Place-of-register rule

The IHT Manual provides:

**IHTM27121 Usual location** [May 2020]

For the purposes of Inheritance Tax an inscribed<sup>30</sup> and registered security<sup>31</sup> (a shareholding in a Company, for example) is located at the place where the title of ownership must be registered – see *AG v Higgins*.<sup>32</sup>...

It makes no difference that the business of the company is totally administered outside the country in which the register is kept: see *Baelz v Public Trustee* [1926] Ch 863.

---

28 [1942] AC 541, pages 557-558.

29 See 109.8 (Treaty-situs).

30 Author’s footnote: “Inscribed” securities are those whose legal owners are inscribed in a register; the term is, as far as I can see, only an old-fashioned synonym of “registered”.

31 Author’s footnote: “Securities” here includes shares as well as debt-securities.

32 (1857) 2 H & N 339:

<https://www.kessler.co.uk/wp-content/uploads/2012/04/AGvHiggins.pdf> This was approved in *AG v Winans* (No. 2) [1910] AC 27.

I call this the “**place-of-register rule**”.<sup>33</sup> This is a straightforward application of the general principle that shares are situate where they can be dealt with.

Dicey states the same rule:

If shares may be transferred only by registration on a particular register, they will be regarded as situate at the place where the register is kept.<sup>34</sup>

Underhill & Hayton, *Law of Trusts and Trustees* states the same rule:

if shares are transferable by entry on the register, they are situated in the country where the register is kept.<sup>35</sup>

I set this out at length because the contrary has been suggested. *Macmillan v Bishopsgate Trust (No. 3)* concerned a company incorporated and with its share register in New York. Auld LJ adopted the place-of-register rule.<sup>36</sup> Alarming, Aldous LJ stated without discussion that the situs is the place of incorporation.<sup>37</sup> Staughton LJ inclined to the same view but expressed himself more cautiously.<sup>38</sup> However, this was a case where the court did not have to decide between place-of-register and place of incorporation as rival situs rules. The court’s attention was not on the point and the relevant cases were not discussed. In the circumstances, it is suggested that no weight whatsoever should be given to these dicta. The IHT Manual tactfully ignores this case. Thus the Court of Appeal accidentally introduced into the law if not an uncertainty at least an inconsistency which needs to be explained away.

*Akers v Famba Financial Group* leaves the question open. Lord Mance (with whom the rest of the Court agreed) said:

---

33 A “register” is only a record of stockholders and their assignees: see *Ramsay v IRC* 54 TC 101 at p.133.

34 Dicey, Morris & Collins, *The Conflict of Laws* (15th edn, 2012) para 22-044 (Shares in companies) 22-044 and 22-048.

35 19<sup>th</sup> ed (2016) para 100.127 (Intangible movable property).

36 [1996] 1 WLR 387 at p.411E.

37 [1996] 1 WLR 387 at p.423F.

38 [1996] 1 WLR 387 at p.405E.

The situs or location of shares and of any equitable interest<sup>39</sup> in them is in the jurisdiction where the company is incorporated or the shares are registered (which is presently unimportant, since in this case they coincide in Saudi Arabia).<sup>40</sup>

It may happen that a company has a computerised share register with no identifiable location. In that case a place-of-register rule does not work, and place of incorporation may fill in the gap.

See Venables, “The Situs of Registered Shares”, PTPR Vol 9 p.115.<sup>41</sup>

### 97.5.2 SDRT comparable

The territorial limitations for SDRT also use the concept of the place where a share register is kept. A full discussion of the topic is outside the scope of this book, but in outline, s.99 FA 1986 provides:

- (3) Subject to the following provisions of this section, “chargeable securities” means—
- (a) stocks, shares or loan capital,
  - (b) interests in, or in dividends or other rights arising out of, stocks, shares or loan capital,
  - (c) rights to allotments of or to subscribe for, or options to acquire, stocks, shares or loan capital, and

---

39 On the facts of the case, this is clearly a reference to an equitable interest under a bare trust; different principles apply to an interest under a substantive trust.

40 [2017] 1 BCLC 151 at [19]. I briefly comment on the authorities which Lord Manse listed without further discussion:

- (1) Dicey, Morris & Collins, *The Conflict of Laws* (15th edn, 2012) paras 22–044 and 22–048. But Dicey supports the place-of-register rule: see above.
- (2) Underhill and Hayton, *Law of Trusts and Trustees*. Lord Manse cites an old edition, and an erroneous para reference. But both old and current editions of Underhill support the place-of-register rule: see above.
- (3) *Re Berchtold* [1923] 1 Ch 192, *Philipson-Stow v IRC* [1961] AC 727 at p.762. But these cases have nothing to say on the situs of shares.

To compound the confusion, in the same case Lord Sumption said, inconsistently and evidently without consideration: “The ... *lex situs*... in the case of registered shares is the law of the company's incorporation, in this case Saudi Arabia. This proposition is well established and was not seriously disputed: see *Macmillan Inc v Bishopsgate Investment Trust plc (No 3)*.” [2017] 1 BCLC 151 at [80].

41 <http://www.khplc.co.uk/reviews>

- (d) units under a unit trust scheme.
- (4) "Chargeable securities" does not include securities falling within paragraph (a), (b) or (c) of subsection (3) above which are issued or raised by a body corporate not incorporated in the UK unless—
  - (a) they are registered in a register kept in the UK by or on behalf of the body corporate by which they are issued or raised ...

So it is possible that SDRT law and practice may shed light on situs issues (and vice versa).

### *97.5.3 Overseas branch register*

Multiple registers raise a problem for a place-of-register rule. If there is only one register applicable to the shares in question, that is where the shares can be dealt with. The IHT Manual provides:

**IHTM27122 Branch registers** [May 2020]

... If a company has more than one register, and any changes must be recorded on one of the registers, the relevant securities are sited in the place where that register is required by law to be kept – not in the place of the head office of the company. ...

This requires an examination of company law to identify which of the two registers is applicable. The IHT Manual summarises the company law background:

**IHTM27124 Overseas branch registers of UK companies** [May 2020]

... Under UK law a share cannot, at one and the same time, be registered on more than one register.

The rule applies even to overseas branch registers (these are branch registers of members resident in the country to which the register relates). Under [s.132 CA 2006], a company that maintains an overseas branch register has to keep a duplicate of it at the place where its principal register is kept.

And 'no transaction with respect to any shares registered in an overseas branch register shall, during continuance of the registration, be registered in any other register' – see [s.133 CA 2006].

So, shares on the overseas branch register of a UK company are situated, for Inheritance Tax purposes, in the country where the register is kept.

Under [s.129 CA 2006] a company may maintain an overseas branch register. The countries and territories in which overseas branch registers may be kept are specified in the Companies Act 1985 SCH14. Sections 362 (4) and (5) enable the provisions for overseas branch registers to be extended by Order in Council to countries within the jurisdiction, or under the protection, of the Crown.

This view is confirmed by s.133(3) CA 2006:

An instrument of transfer of a share registered in an overseas branch register—

(a) is regarded as a transfer of property situated outside the UK.

#### 97.5.4 *Transfer office*

Another solution may be that the company has only one register and merely a “transfer office” elsewhere. The IHT Manual provides:

**IHTM27125 Duplicate or multiple registers of non-UK companies**  
[May 2020]

... Some overseas company laws allow a shareholder to use duplicate (or multiple) share registers to record the transfer of their securities. The South African Companies Act, for example, authorises South African companies to maintain branch registers in any foreign country. Shares can be transferred on any register, but no transfer of shares passing on death can be registered in the UK until any death duty claimed by South Africa on the shares has been paid.

Remember that some registers merely record information about transfer of securities without providing the legal basis for the transfer. These registers do not affect the locality of the security (IHTM27071)

Details of transfer arrangements given in the Stock Exchange Year-Book<sup>42</sup> do not always make the position clear and, if necessary, you must ask the taxpayer to explain. ...

#### 97.5.5 *Two effective registers*

If that fails one must look for a tie-breaker test:

---

42 Author’s footnote: The Stock Exchange Official Year Book has long ceased publication; it was first published in 1876 and the most recent edition I have been able to trace was 1994.

**IHTM27125 - Duplicate or multiple registers of non-UK companies**

[May 2020]

Where there are many registers the register upon which the shares would normally be dealt with in the ordinary course of business is the register that determines the situs of the security – see *Treasurer of Ontario v Aberdeen* [1947] AC 24.

But which is the register which would normally be used? The Manual explains:

If the share certificates are in the UK, one of the alternative registers is in the UK, and transfers can be effected here the shares will normally be regarded as legally situated here (*Re Clark, McKechnie v Clark* [1904] Ch 294.)

*R v Williams* [1942] AC 541 is another example: the location of a (signed and endorsed) share certificate acted as a tie-breaker between two competing jurisdictions (each with a share register).<sup>43</sup> The Manual continues:

This is only an assumption and can be rebutted by the particular circumstances of the case (see *Standard Chartered Bank Ltd v IRC* [1978] 1 WLR 1160). But if tax is offered on shares in a foreign company with transfer facilities in the UK, you can assume that the register in the UK is the one on which the shares would normally be dealt with in the ordinary course of business.

### 97.5.6 Company without register

The place-of-register test does not work if there is no company register. The IHT Manual provides:

**IHTM27123 Effectiveness of register** [May 2020]

... If shares are entered on a list which does not affect the legal holding

---

43 IHT Manual para IHTM27150 [May 2020]:

“If the company has more than one register on which the holding could be effectively transferred, and the share certificates are found at the material time at a place where a register is located, the holding is for Inheritance Tax purposes situated at that place – see *R v Williams* [1942] AC 541. Cases where none of the effective registers is located where the certificates are found must be referred to Technical.”

of the security (even though the list could be called a register) the location of the list does not affect the situs of the security.

In *Erie Beach v AG for Ontario* [1930] AC 161, certain shares (on the view that they could, under the Ontario Companies Act, be effectively dealt with only in Ontario) were held to be situated in Ontario for the purposes of Ontario Succession Duty, although they had in fact been entered on a 'register' opened elsewhere.

It was explained however, in *R v Williams*, that the *Erie Beach* decision was based on the finding that the particular shares in question could be dealt with effectively in Ontario only. In this case it was explained that the decision was 'not an authority for holding that any company subject to the Ontario Companies Act is precluded from establishing registers outside Ontario on which effective transfers can be made, and Ontario companies like other Canadian companies may establish branch registers kept by 'transfer agents' which are equivalent to duplicate or multiple registers (IHTM27125)'.

#### 97.5.7 Register of share transfers

The IHT Manual provides:

##### **IHTM27127 Transfer agencies** [May 2020]

Many companies incorporated under Canadian law keep a register, or branch register, of transfers kept by one of the company's duly appointed 'transfer agents', not a register of shareholders as with UK companies.

When considering the question 'where could the shares be effectively dealt with?' (*Brassard v Smith*), to find out where the shares can be taxed we must find out where the company has established transfer agents to operate a register, or branch register, of transfers. There is usually more than one transfer agent to which the shareholder could transfer their holding, regardless of where the share certificate was issued. Some (but relatively few) companies have transfer agents in the UK. These equally available transfer arrangements in various places are said to be 'interchangeable'. For the purposes of situs in relation to Inheritance Tax they can be taken as equivalent to duplicate or multiple registers (IHTM27125).

This applies:

- to shares registered in the name of the taxpayer or their nominee (including marking names),
- whether or not the share certificates are endorsed in blank (*Treasurer*

*of Ontario v Aberdeen* [1947] AC 24),

- whether the company in question was incorporated under Canadian dominion or provincial law.

### 97.5.8 Miscellaneous

The IHT Manual provides:

**IHTM27128 Branch registers of British Colombian and Newfoundland companies** [May 2020]

Branch registers of companies in these two provinces of Canada can be kept outside the province, so the location of the shares will be determined by the location of the branch register.

In certain circumstances shares registered on a branch register in the name of a deceased member can be transferred only on a duplicate register kept at the registered office of the company. This restriction does not affect locality for Inheritance Tax purposes on the deceased's death.

**IHTM27129 - Canadian companies: Nova Scotia companies** [May 2020]

Every company incorporated under the laws of Nova Scotia must keep a duplicate of any branch register kept outside the province at its registered office in the province. In respect of lifetime transfers, we understand that there is a distinction between:

- Companies incorporated under the Nova Scotia Companies Acts, in which case a lifetime transfer on a branch register appears to be valid and effective. Accordingly if the securities are registered on a branch register in the UK they must be treated as situated in the UK.
- Companies incorporated under other Acts, in which case no transfer on a branch register is effective until entered in the principal register. In this case, registered securities may be regarded as situated in Nova Scotia, even though they may be registered on a branch register in the UK.

This restriction does not affect locality for Inheritance Tax purposes on the deceased's death.

## 97.6 Registered debt-securities

The rules for registered debt-securities<sup>44</sup> are, in general, the same as for

---

44 I use the term "debt-securities" to mean securities which are debts, not shares.

registered shares; the passage from the IHT Manual set out above refers to securities, generally meaning both shares and debt-securities.

A UK company is not required by company law to keep a register of debentures, but if it does, it must keep the register in the UK.<sup>45</sup> But planning by converting registered securities into bearer securities may be possible.<sup>46</sup>

### 97.6.1 *Place-of-register v specialty rule*

Shares are not “specialties” so the specialty situs rule cannot apply to them.<sup>47</sup>

A debenture may be a specialty so the question arises as to the priority between the place-of-register rule and the specialty situs rule. The specialty situs rule overrides the place-of-register rule. For HMRC views as to which securities are “specialties”, see 97.13.1 (Situs of specialty).

## 97.7 Bearer and negotiable instruments

### 97.7.1 *General law background*

“**Bearer**” shares or securities are transferable by delivery of the document of title, so that the person who holds the document has legal title to them.<sup>48</sup>

An instrument is “**negotiable**” if legal title to it is transferable by delivery or by endorsement and delivery; a transferee who takes bona fide and for value has full legal title including the right to sue in his own name all parties to the instrument.<sup>49</sup> Bills of exchange and promissory notes are typically (though not necessarily) negotiable.

Thus bearer instruments and negotiable instruments are distinct but overlapping categories: bearer instruments are negotiable but negotiable instruments are not necessarily bearer.

Negotiable instruments (other than shares) may be made by deed, and so specialties, in which case situs is governed by the specialty situs rule. But

---

45 Section 743 Companies Act 2006.

46 See 97.7.2 (Bearer shares and securities).

47 See 97.13 (Specialty obligation).

48 Bearer shares are not possible in UK company law: s.84 Small Business, Enterprise and Employment Act 2015. But bearer debt-securities are possible, and bearer shares remain possible for some foreign company laws.

49 *Byles on Bills of Exchange and Cheques* (29th ed., 2013), para 1-06 (Negotiability).

they may not be specialties, in which case the specialty situs rule does not apply.

### 97.7.2 *Bearer shares and securities*

The place-of-register rule cannot apply to bearer shares or securities as there is no register of shareholders or security holders.

The situs of bearer shares and bearer debt-securities is where the document is to be found.

The IHT Manual provides:

**IHTM27076 Bearer securities**<sup>50</sup> [May 2020]

A bearer security was situated, for Inheritance Tax purposes, in the place where the document of title is found at the material time. .. This does not apply to certain qualifying international securities (IHTM27141).

Dicey agrees:

For taxation purposes, bonds, bills of exchange and other securities which can be validly and effectively transferred by delivery with or without endorsement are situate in the country where the paper representing the security is itself from time to time to be found.<sup>51</sup>

This is consistent with the general principle that shares are situate where legal title can be transferred.<sup>52</sup>

Situs of UK registered debt-securities can be changed by converting them into bearer securities and taking the document outside the UK. Similarly, foreign shares and securities could be made UK situate. Stamp duty needs consideration. This planning has been described as tax mitigation, not avoidance,<sup>53</sup> though views may differ, and the abolition of bearer shares for UK companies reduces the practical importance of the issue.

---

50 Author's footnote: This passage applies to both shares and debt-securities.

51 *Conflict of Laws* (15th ed., 2012), para 22-044. Dicey cites: *AG v Bouwens*; *AG v Glendining* (1904) 92 LT 87; *Winans v AG (no 2)* [1910] AC 27; *Provincial Treasurer of Manitoba v Bennett* (1937) 2 DLR 1; *Re Moore* [1937] 2 DLR 746; *Lunn v Barber* [1949] OR 34; *Favorke v Steinkopff* [1922] 1 Ch 174.

52 See 97.4 (Situs of shares: General principle).

53 See 49.29.2 (Transfer for avoidance).

*AG v Bouwens* concerned foreign government bonds (not specialties) which were bearer instruments so it was not necessary to do any act outside England in order to transfer them. The court said:

No ordinary<sup>54</sup> in England could perform any act of administration within his diocese, with respect to debts due from persons resident abroad, or with respect to shares or interests in foreign funds payable abroad, and incapable of being transferred here; and therefore no duty would be payable on the probate or letters of administration in respect of such effects. But, on the other hand, it is clear that the ordinary could administer all chattels within his jurisdiction; and if an instrument is created of a chattel nature, capable of being transferred by acts done here, and sold for money here, there is no reason why the ordinary or his appointee should not administer that species of property. Such an instrument is in effect a saleable chattel, and follows the nature of other chattels as to the jurisdiction to grant probate.<sup>55</sup>

### 97.7.3 *Negotiable instrument not bearer*

The IHT Manual gives guidance on bearer securities but does not consider other negotiable instruments (that is, those which are transferable by endorsement and delivery). But the passage from Dicey set out above states that the same rules apply. The same rule applies in Australia:

*negotiable instruments and securities transferable by delivery* for taxation purposes, bonds, bills of exchange and other securities which can be validly and effectively transferred by delivery with or without endorsement are situate in the country where the paper representing the security is itself from time to time found.<sup>56</sup>

In *Bouwens* the court stressed that there was an active market in England for the bonds (the Royal Exchange). Some cases suggest that this might be a requirement for situs:

A negotiable instrument will be situate where the instrument is, *at any*

---

54 See 97.1.1 (History and terminology).

55 (1838) 4 M & W 171 at p.192 <http://www.commonlii.org> This was approved in *AG v Winans (No. 2)* [1910] AC 27.

56 Taxation Ruling TR 2008/9

<http://law.ato.gov.au/atolaw/view.htm?docid=TXR/TR20089/NAT/ATO/00001>

*rate where there is an available market for its negotiation.*<sup>57</sup>

However I think the general trend of the authorities is that the situs of the instrument prevails and whether or not there is a market (which in modern conditions would be difficult to determine) is not relevant.<sup>58</sup> This is the view of the textbooks cited above. In particular, it would be strange to draw a distinction between bearer instruments (which HMRC accept are situate where the document is, regardless of whether there is a market) and other negotiable instruments.

#### 97.7.4 Eurobonds

HMRC have commented specifically on the situs of eurobonds in a passage which I mention for completeness but which adds nothing to the general principles:

... in the Revenue's view, the *situs* for IHT purposes of Eurobonds and similar fungibles in any issue depends on the terms of that issue and, in particular, where under those terms the bondholder's rights to or rights of action for property exist. Those rights will be determined by reference to general, not Revenue, law principles. So where title to the rights under an issue passes by delivery, the *situs* for IHT purposes of such rights is where the instrument of title is physically.<sup>59</sup>

### 97.8 CREST

The Law Commission explain the securities law background:

2.21 Investment securities constituted under English, Scots and

---

<sup>57</sup> *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.732 (emphasis added); the same point is made in *AG v Bouwens* at p.192.

<sup>58</sup> But for a dissenting view, see 97.10 (Letter of allotment of shares).

<sup>59</sup> [1994] PCB 139. For completeness, the passage concludes:

“There is little we can add to the foregoing guidance. In particular we cannot offer any undertaking about the likely future IHT liability which may arise in respect of rights to particular Eurobond issues currently extant or which may be issued in future. However, in order to be as helpful as possible, we can say that where a Eurobond issue satisfies the terms and conditions of section 124 ICTA 1988, the Revenue will treat for IHT purposes the rights and interests of the beneficiary-investors in such issues as rights to and interests in a bearer security.”

A eurobond within s.124 (now repealed) had to be a bearer security, so this does not take matters much further.

Northern Irish law can take either certificated or dematerialised ('uncertificated') form. CREST is the main securities settlement system in the UK and settles securities in uncertificated form. Unlike system operators in most national settlement systems, CREST does not hold domestically issued securities<sup>60</sup> as a central securities depository for account holders. CREST has no proprietary rights in the securities and is not treated as 'holding' these securities from the issuer on behalf of its participants. Rather, the CREST member is treated as holding directly from the issuer. This CREST member alone is entitled to exercise voting, dividend and other rights attaching to the shares and may do so directly against the issuer.

2.22 Instead, it is the register operated by CREST which, in the case of UK securities, is actually constituted by statute<sup>61</sup> as the sole legal record of entitlement to the securities. Although the issuer will maintain a regularly reconciled record of what is held in CREST for corporate events purposes, it is the CREST register that confers legal title and which determines the person or entity named in the register as the shareholder for company law purposes.<sup>62</sup>

The first footnote at para 2.22 is important. It provides:

For UK companies it is the entry in the CREST register that confers legal title on the owner: Uncertificated Securities Regulations 2001, SI 2001/3755 reg 24.

For Irish, Manx, Guernsey and Jersey securities, the pre-2001 system still operates. Settlement is through CREST but legal title is transferred when the entry is made in the issuer's register.

Registered securities are in principle situate where the register of title is kept.

For listed UK companies, the register of legal title is the CREST register; the situs of the securities is in the UK, assuming (as is no doubt the case) that the operator of CREST (Euroclear) keeps the CREST

---

60 Footnote original: That is, in the UK, Republic of Ireland, Isle of Man, Guernsey and Jersey.

61 This footnote is set out in the text above.

62 Law Commission, *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (May 2008). See too Law Commission, *Intermediated securities: who owns your shares?* (Nov 2020) para 2.12ff and 2.56ff.

register in the UK.<sup>63</sup>

For listed Irish, IoM and Channel Island companies whose shares are registered on CREST, the company law is different: the register of legal title is the company's register. So registering a security on CREST does not make any difference as to situs.<sup>64</sup>

It is possible for retail investors to have a personal CREST account, but it has become expensive and unusual. Securities are generally held through intermediaries such as Euroclear and Clearstream, which alters the situs position.<sup>65</sup>

### **97.9 Share certificate endorsed in blank**

The IHT Manual explains the background law and practice as follows:

**IHTM27150 Share certificates endorsed in blank** [May 2020]

Certificates of many American and Canadian railroads and of certain other companies include a printed transfer form or power of attorney. When this is signed or endorsed by the registered holder it enables the certificates to be transferred by delivery.

Often these certificates are 'endorsed in blank', This means the endorsement is to be signed by the registered owner as transferor, and the name of the transferee is left blank.

Dividends are paid by the company to the registered owner, and if these shares have in fact changed hands by delivery, the beneficial owner for the time being recovers their dividends from the registered owner.

Usually the shares are registered in the name of a recognised broker, bank or discount house. These are known in the UK as a 'good Marking Name' or, in the USA, as a 'Street Name'. This helps to make sure that the purchaser receives their dividends with minimum of trouble and risk.

A list of good Marking Names recognised by the London Stock

---

63 This has the curious consequence that Scots and Northern Ireland companies registered on CREST are situate in England, not in Scotland or Northern Ireland. But this makes no difference for tax, and I suspect would only rarely matter for non-tax purposes.

64 Further thought would be needed if the relevant company law were to change from the position which the Law Commission describe in 2008.

65 See 67.1 (Intermediated securities).

Exchange is printed in the Stock Exchange Official Year Book.<sup>66</sup>  
 However the beneficial owner can have them registered in their own name, or in the name of some nominee other than a good Marking Name.

This is mainly of historical interest, but I set out the HMRC comments for completeness:

The location of the shares for Inheritance Tax purposes is determined as follows:

- [a] If the registered owner is a good Marking Name, the shares are situated where the register is kept, not where the certificates are found. ...<sup>67</sup>
- [b] The location of the shares is determined in the same way if the registered owner is also the beneficial owner, or a nominee of the beneficial owner, or, in the case of settled property, the trustees of the settlement or their nominees.<sup>68</sup>

The HMRC view is that one ignores the fact a share transfer form has been endorsed in blank. This is right, because the endorsed certificate does not alter the place where registered shares are dealt with as between shareholder and company.<sup>69</sup> At this point the Manual becomes confused:

- [d] If the registered owner is neither:  
 a good Marking Name,  
 the beneficial owner, or  
 any of the other persons named above, and  
 the certificates are physically present in the UK at the material time,

---

66 Author's footnote: The Stock Exchange Official Year Book has long ceased publication; it was first published in 1876 and the most recent edition I have been able to trace was 1994.

67 Omitted text set out at 97.5.3 (Overseas branch register).

68 The Manual continues:

“[c] In the cases outlined in the bullet points above we consider that the only legal title the holder has to the shares is their registration as owner. If the owner brings the certificates to the UK they could sell the shares to a UK purchaser, so the equitable interest in the shares would be situated here. But, until the sale takes place the beneficial interest has not been severed from the legal interest so their location has not changed.”

This is muddled and wrong.

69 See 97.4 (Situs of shares: general principle).

the shares are located in the UK for Inheritance Tax purposes, (*Stern v The Queen* [1896] 1 QB 211).

I find it hard to see how [d] can apply: the registered owner will always be one of the persons named at [b] (beneficial owner or a nominee).

Certificates of this kind, that do not contain any express obligation or promise, are not specialty (IHTM27079) debts - see the *Williams* case at [1942] AC 556.

That is correct.

### 97.10 Letter of allotment of shares

A letter of allotment confers the right to an issue of shares. The letter is normally transferable by delivery: it is a bearer security. One would have thought that the bearer security situs rule would apply. However, in *Young v Phillips*<sup>70</sup> a letter of allotment in respect of a company with UK registered shares was held to be situate in the UK, not where the letter of allotment was held. Nicholls J cited the passage in *AG v Bouwens* set out above<sup>71</sup> and said:

From this it is apparent that for an instrument to be treated as analogous to a chattel for situs purposes more is required of it than mere transferability of title by delivery. A simple contract debt owed by a foreign debtor to a person resident in England and evidenced by a promissory note might be, and normally would be, freely and effectively transferable in England, but such a debt has as its situs the country where the debtor resides, not the place where the creditor lives or currently holds the promissory note. What is required is that in practice the value of the instrument can be realised by a sale of the instrument for money in the country where the instrument is found: the reason being that if an instrument in England could be so sold, the ordinary could properly and effectively administer that asset by selling it here, there being no need in such a case to have recourse to where the foreign debtor lived. When so saleable an instrument is in practice realisable in the same way as a saleable, valuable chattel, and hence, for situs purposes, it falls to be treated in the same way. ...

---

<sup>70</sup> 58 TC 232 This case concerned the common law rules before s.275A TCGA and is still relevant for situs for IHT, and for CGT in the case of foreign incorporated companies.

<sup>71</sup> See 97.7.2 (Bearer shares and securities).

This approach requires an investigation into whether a market exists. The judge said:

In the instant case there are no grounds for concluding that in practice the value of the letters of allotment, *which were issued with a life-span of a little over two months*, could have been realised by a sale of those documents for money wherever they were to be found. The Special Commissioners pointed out that no evidence had been led before them to prove that there existed a market in letters of allotment of shares in private companies. Having regard to the fact that shares in private companies may not be the subject of a public issue, they expressed themselves as being far from prepared to assume the existence of such a market. With that approach I agree. And it is to be noted that the “sales” of the letters of allotment which did take place in Sark were not arm’s length transactions but were to purchasers wholly under the control of the vendors, and they had been prearranged even before the letters of allotment were issued. Accordingly, applying the principles I have mentioned to the facts of this case, the renounceable letters of allotment in the UK companies do not fall to be treated as saleable chattels, realisable where they might be found from time to time. They are documents evidencing rights against UK companies, which rights were enforceable in the UK.

(Emphasis added)

The requirement for “marketability” is not supported in textbooks, or much supported in the cases, nor does it make good sense. A buyer could be found for any valuable asset in any community where private property exists, and one buyer makes a market.<sup>72</sup> Whether a market exists is a question of fact, so application of the marketability test will result in assets moving from one jurisdiction to another as markets come and go. It is conceivable that there was no market in Sark (population 600). But with improved communications markets are no longer local to jurisdictions, as

---

72 This is self-evident, but for an illustration see *FGP v Union of India* 2004 (168) Excise Law Times 289 (Supreme Court of India) <https://www.kessler.co.uk/wp-content/uploads/2012/04/FGPvUnion-of-India.pdf> Contrast the sophisticated definition of “asset for which there is a liquid market” in ICAEW Tech 7/03 para 19 (Guidance on the determination of realised profits and losses in the context of company distributions).

was assumed in *Young v Phillips*. An asset can be sold anywhere, even in Sark.

It seems that *Young v Phillips* stretched the law in order to defeat a tax avoidance scheme, and in doing so has left something of a mess.

The CG Manual provides:

**CG12440 Shares and securities etc [May 2020]**

**Letters of allotment**

Letters of allotment should be treated as located in the country where the company issuing the letters is registered. In the case of *Young v Phillips* 58 TC 232 bonus shares were issued in respect of registered shares located in the UK. The issue was made in letter of allotment form. The letters were then taken to the Channel Islands and disposed of there. It was held that the letters of allotment were located in the UK because they evidenced rights which were properly enforceable only in the UK.

Thus in the HMRC view *Young v Phillips* is relevant to letters of allotment only, it has no relevance to the situs of bearer debt-securities or shares.<sup>73</sup> It is suggested that the reasoning should be restricted to short life assets (such as the letters of allotment in that case which, it was stressed, had a life of only two months).

Even letters of allotment may be situate where the letter is situate, if there is a “market” there (whatever that may require).

## 97.11 International organisation security

For convenience this section deals with CGT situs as well as IHT situs, as the rules are the same. Exemptions are made pursuant to international agreements and the International Organisations Act 1968.

### 97.11.1 Designated organisations

It is helpful to read the IHT and CGT legislation side by side.

**Section 126 FA 1984**

**Section 265 TCGA**

---

<sup>73</sup> In *Mehjoo v Harben Barker* [2013] EWHC 1669 (QB) at [267] ff it was found that HMRC’s practice was not to take any *Young v Phillips* point in relation to bearer shares. The point was not considered on appeal.

(1) Where—

[Identical]

(a) the UK or any of the Communities is a member of an international organisation; and  
 (b) the agreement under which it became a member provides for exemption from tax in relation to the organisation, of the kind for which provision is made by this section;

the Treasury may, by order made by statutory instrument, designate that organisation for the purposes of this section.

the Treasury may by order designate that organisation for the purposes of this section.

(4) The Treasury may, by order made by statutory instrument, designate any of the Communities or the European Investment Bank for the purposes of this section, and references in subsections (2) and (3) above to an organisation designated for the purposes of this section include references to a body so designated by virtue of this subsection.

(2) The Treasury may by order designate any of the Communities or the European Investment Bank for the purposes of this section.

(2) Where an organisation has been so designated, the provisions mentioned in subsection (3) below shall, with the exception of any which may be excluded by the designation order, apply in relation to that organisation.

(3) The provisions are  
 (b)<sup>74</sup> any security issued by the organisation shall be taken, for the purposes of capital transfer tax [now IHT] to be situated outside the UK; ..

(3) Where an organisation has been designated for the purposes of this section, then any security issued by the organisation shall be taken, for the purposes of this Act, to be situated outside the UK.

The IHT Manual provides:

---

74 para (a) has been repealed.

**IHTM27141 List of non-UK situs organisations** [May 2020]

Unless they are bearer securities (IHTM27076) and situated physically in the UK<sup>75</sup> securities issued by the following organisations are effectively outside the charge to IHT where:

- they form part of the estate of a person domiciled outside the UK; or
- they are comprised in a settlement and the settlor was not domiciled in the UK at the time the settlement was made:
  - ○ the International Monetary Fund:
    - The Bretton Woods Agreement Order in Council, 1946, SR & O 1946 no.36
    - the International Bank for Reconstruction and Development<sup>76</sup>:
    - The Bretton Woods Agreement, as above
    - the International Finance Corporation:
      - The International Finance Corporation Order, 1955 (SI 1955/1954)
      - the International Development Association:
        - The International Development Association Order, 1960 (SI 1960/1383)

This list of organisations may not be complete. If you receive a claim for exemption for a security issued by any other international body you should refer the case to Technical.

**27142 Designated as non-UK by Treasury** [May 2020]

... The following organisations have been so designated.

- The Asian Development Bank: under the International Organisations (Tax Exempt Securities) Order 1984 (SI 1984/1215) made on 2 August 1984
- The African Development Bank: under the International Organisations (Tax Exempt Securities) (No 2) Order 1984 (SI 1984/1634) made on 22 October 1984
- The European Community; The European Coal and Steel Community; The European Atomic Energy Community; The European Investment Bank - under the European Communities (Tax Exempt Securities) Order 1985 (SI 1985/1172) made on 25 July 1985.
- The European Bank for Reconstruction and Development - under the International Organisations (Tax Exempt Securities) Order 1991 (SI 1991/1202) made on 16 May 1991.

Any security issued by these organisations automatically has a foreign situs for IHT, where the event occurred on or after the date of the order. ...

The CG Manual provides:

**CG12440 Types of asset (2): Shares and securities etc** [May 2020]

*Securities of International or European Organisations*

---

<sup>75</sup> I do not understand the basis for this exception, but in practice the point may never arise.

<sup>76</sup> Author's footnote: More commonly known as the World Bank.

Special rules are provided for dealing with securities issued by certain designated international organisations.

Section 265 TCGA 1992 allows the Treasury to designate for special treatment certain organisations whose membership includes the UK or any of the Communities of which the UK is a member. Once such an organisation has been designated any securities issued by it are deemed for the purposes of Capital Gains Tax to be located outside the UK. The list of organisations that have been designated under this provision is as follows.

- International Bank for Reconstruction and Development
- Asian Development Bank
- African Development Bank
- The European Economic Community
- The European Investment Bank
- The European Bank for Reconstruction and Development
- The European Coal and Steel Community
- The European Atomic Energy Community ...

#### 97.11.2 *Inter-American Development Bank/ OECD support fund*

Article XI Section 9 of the Agreement Establishing the Inter-American Development Bank provides:

##### **Immunities from Taxation**

- a) The Bank, its property, other assets, income, and the operations and transactions it carries out pursuant to this Agreement, shall be immune from all taxation and from all customs duties. The Bank shall also be immune from any obligation relating to the payment, withholding or collection of any tax, or duty.
- b) No tax shall be levied on or in respect of salaries and emoluments paid by the Bank to executive directors, alternates, officials or employees of the Bank
- c) No tax of any kind shall be levied on any obligation or security issued by the Bank, including any dividend or interest thereon, by whomsoever held:
  - i) which discriminates against such obligation or security solely because it is issued by the Bank; or
  - ii) if the sole jurisdictional basis for such taxation is the place or currency in which it is issued, made payable or paid, or the location of any office or place of business maintained by the Bank.
- d) No tax of any kind shall be levied on any obligation or security guaranteed by the Bank, including any dividend or interest thereon, by whomsoever held:

- i) which discriminates against such obligation or security solely because it is guaranteed by the Bank; or
- ii) if the sole jurisdictional basis for such taxation is the location of any office or place of business maintained by the Bank.

I suspect this is standard form for international organisations.  
It is helpful to read the IHT/CGT exemptions side by side:

**Section 131 FA 1976**

A security issued by the Inter-American Development Bank shall be taken for the purposes of capital transfer tax [now IHT] to be situated outside the UK.

**Section 266 TCGA**

A security issued by the Inter-American Development Bank shall be taken for the purposes of this Act to be situated outside the UK.

In practice one would expect the securities to be non-UK situate in any event, but this does no harm.

Similarly, s.4(1) OECD Support Fund Act 1975 provides:

A person not resident in the UK shall not be liable to income tax in respect of income from any security issued by the support fund established by the Agreement if he would not be liable but for the fact that—

- (a) the security or income is issued, made payable or paid in the UK or in sterling; or
- (b) the support fund maintains an office or other place of business in the UK;

and such a security shall be taken for the purposes of capital transfer tax and capital gains tax to be situated outside the UK.

However I am not sure if this fund currently exists. That would explain why there is no exemption for it in the TCGA.

**97.12 Simple contract debt**

A “**simple**” debt is one which is not a specialty (in short, not made by deed).

The basic principles are well established:

to prevent conflicting jurisdictions between different ordinaries, with respect to choses in action ... it was established as law, that judgment debts were assets, for the purposes of jurisdiction, where the judgment

is recorded; ... specialty debts, where the instrument happens to be; and simple contract debts, where the debtor resides ...<sup>77</sup>

The IHT Manual provides:

**IHTM27091 Debts: contractual** [May 2020]

In English law a **simple contract** debt is situated where the debtor resides: *AG v Bouwens*;<sup>78</sup> *English, Scottish and Australian Bank v IRC* [1932] AC 238...

Dicey states:

Subject to the exceptions set out below, a debt is situate in the country where the debtor resides.<sup>79</sup>

I call this the “**place-of-debtor rule**”. Along with the specialty situs rule, this rule can be traced back to Elizabethan times.<sup>80</sup>

There are many cases which state this rule: the most frequently cited, which may be called the leading cases, are *English, Scottish and Australian Bank* (mentioned above) and *New York Life Insurance Co v Public Trustee*<sup>81</sup> (affirming the passage from *Bouwens* set out above).

A winding-up order against the debtor does not affect the situs of a debt,<sup>82</sup> but judgment against the debtor (turning the debt into a judgment debt) does do so.<sup>83</sup>

France/Italy IHT DTAs apply different rules.<sup>84</sup>

### 97.12.1 Meaning of “residence”

In order to apply the place-of-debtor rule one needs to determine where the debtor resides.

Section 14 CTA 2009 provides:

(1) A company which is incorporated in the United Kingdom is UK

<sup>77</sup> *AG v Bouwens* (1838) 4 M & W 171 <http://www.commonlii.org> The same applies in Australia: *Haque v Haque* (No.2) (1965) 114 CLR 98 at p.137.

<sup>78</sup> See above fn.

<sup>79</sup> Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012) para 22-026 (Debts).

<sup>80</sup> See 97.13.1 (Situs of specialty).

<sup>81</sup> [1924] 2 Ch 101.

<sup>82</sup> *Wight v Eckhardt* [2004] 1 AC 147. In practice this issue will not usually arise.

<sup>83</sup> See 97.20 (Judgment debt).

<sup>84</sup> See 109.8 (Treaty-situs).

resident for the purposes of the Corporation Tax Acts.

(2) Accordingly, even if a different place of residence is given by a rule of law, the company is not resident in that place for the purposes of the Corporation Tax Acts.

This rule only applies for the purposes of the CT Acts. So for present purposes, it does not apply.

The common law test of corporate residence for tax purposes (management and control) also does not apply. The test is where the company carries on business:

Now, when you are dealing with a corporation, ... you have to examine the question where the debt can be said to be situate. It appears to me plain that a corporation according to our law is deemed to reside for the purposes of suit in the place where it carries on business in its own name ...<sup>85</sup>

Moreover for this purpose a company is always resident in the place where it is incorporated and has its registered office, whether or not it is carrying on business in any other place.<sup>86</sup>

I refer to the concept as “**jurisdiction-residence**” to distinguish it from tax-residence. It seems surprising to use the term “residence” in a non-tax sense but it is understandable when one bears in mind the history: the situs rule emerged in the context of private international law, not in the context of tax. In practice it may be rare for there to be a difference between tax-residence and jurisdiction-residence.

What is the test of residence of an individual, for the purposes of the place-of-debtor rule? Here jurisdiction-residence adopts and still operates the common law definition of residence which applied for tax purposes until the SRT in 2013.<sup>87</sup> The statutory residence test is intended to achieve

---

85 *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 at p.120; followed *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.733.

86 *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.733. This may be justified on the basis that a company must be carrying on business where it has its registered office.

87 *OJSC Oil Co Yugraneft v Abramovich* [2008] EWHC 2613 (Comm) (also reported under the name *Yugraneft v Abramovich*) at [461]: “... the courts have sought to give the word [residence] the same ‘ordinary’ meaning in both tax cases ... and jurisdiction cases ... It makes sense to do so. Resident for jurisdiction purposes but not resident for tax purposes is a distinction to be avoided if possible.” For the

(more or less) the same result, so it should come to the same thing. One difference is that for tax-residence, one is resident in the UK; for jurisdiction-residence the question is whether an individual is resident in England, or Scotland, or Northern Ireland. Also a person may be jurisdiction-resident in part of a tax year.

### 97.12.2 *Dual-resident debtor*

A company may be jurisdiction-resident in two states. It has been said that an individual cannot be dual jurisdiction-resident.<sup>88</sup> But I do not understand why; an individual could be dual tax-resident under the common law definition of residence.<sup>89</sup>

Where the debtor is jurisdiction-resident in two states, the place-of-debtor rule does not provide a solution. A tie-breaker is needed, and the solution adopted in *New York Life Insurance v Public Trustee*<sup>90</sup> is to prefer the state of jurisdiction-residence where the debt is payable.

The position where the debtor is jurisdiction-resident in two states and the debt is payable in a *third* state has not been considered. Perhaps in relation to a company this cannot happen, as if the debt is payable in a state the company will be carrying on business there, so it must be jurisdiction-resident there.

The position where the debtor is jurisdiction-resident in two states and the debt is payable in *both* states has not been considered. Some suitable tie-breaker must be devised; it is suggested that the proper law of the contract would be suitable.

### 97.12.3 *Identifying the debtor*

In order to apply the place-of-debtor rule one needs to identify the debtor. The identity of the debtor does not usually change, but it may do so:

- (1) By operation of law (eg on death of the debtor) or
- (2) By a novation (under which an existing debt is discharged and a new

---

common law (pre-2013) test, see the 2012/13 edition of this work chapter 3 (Residence of individuals).

88 *New York Life Insurance Co v Public Trustee* [1924] 2 Ch 101 at p.114.

89 See the 2012/13 edition of this work para 3.13 (Dual residence/dual ordinary residence).

90 [1924] 2 Ch 101 followed *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.733.

debt created)<sup>91</sup>

#### 97.12.4 Joint debtors

Where a guaranteed debt is in default, the creditor may sue the debtor or the guarantor. This should not affect the situs of the debt, which is the jurisdiction-residence of the debtor, not the guarantor.

*Hillside (New Media) v Baasland* raised the problem of a debt under a contract with an agent acting for an undisclosed principal. The Judge said:

[35] ... Hillside ... dealt with Mr Baasland in two capacities, (i) as principal in respect of [some funds] and (ii) as agents for an undisclosed principal (or undisclosed principals) in respect of [other funds]. In either case, Hillside are liable for the debt represented by the funds ... That chose in action was situate in England

[36] However, if this analysis is correct, ... Hillside Gibraltar [a Gibraltar company], as an undisclosed principal of Hillside, would also have been liable to Mr Baasland in debt in respect of [certain funds], and that debt would have been situate in Gibraltar. Similarly, Bet 365 NV [a Netherlands Antilles company] would also have been liable for a debt in respect of [certain funds], and that debt would have been situate in the Netherlands Antilles.<sup>92</sup>

The better analysis of an undisclosed principal case is that the creditor has distinct claims (against the agent and against the undisclosed principal) but the claims relate to one single asset. An asset should be regarded as situate in only one place, so here we need a tie-breaker between the jurisdiction-residence of the agent and the jurisdiction-residence of the principal. The jurisdiction-residence of the undisclosed agent has the stronger claim as the test of residence. The position of the undisclosed principal is analogous to a guarantor. This is the practical solution, as the creditor needs to know the situs, but may not know about the residence, or even the existence, of the undisclosed principal.

There is no case discussing the situs of a debt owed by a partnership. On first principles, it is considered that the situs is where the partnership is jurisdiction-resident, on common law principles. That is where the

---

91 For an example of this issue arising (though on slightly unusual facts) see 25.9.4 (*Hafton Properties*).

92 [2010] EWHC 3336 (Comm).

partnership business is carried on.<sup>93</sup> If the partnership carries on business in more than one location, it is considered that the tie-breaker test should be the same as for a company which is dual resident, ie where the debt is due and payable.<sup>94</sup>

A debt may be owed by several debtors, whether jointly or severally, who are jurisdiction-resident in different places and not partners. Here again some tie-breaker is needed, and the logical one (as in the case of a dual-resident debtor) is the place where the sum is payable. This was the solution adopted in *Cambridge Credit Corporation v Lissenden*<sup>95</sup> where the asset was an insurance policy issued by dozen or more underwriters resident in the UK and the USA. Each underwriter was severally liable for a percentage of the amounts due under the policy. The policy was situate in New South Wales, where sums due were payable, even though none of the underwriters (debtors) were resident there.

#### 97.12.5 *Place-of-enforceability: Rationale of place-of-debtor rule*

In *New York Life Insurance v Public Trustee* the court said:

The rule of law with regard to the locality of simple contract debts is that it is determined by the residence of the debtor at the material moment. That has been well settled for a long time, and I think the reason for that is that it is

[1] the residence of the debtor which determines the place where he may be sued, prima facie at all events, and

[2] is in general the place where the means of satisfying any judgment may be discovered,

but whatever the reason is, there is no doubt that this is the rule.<sup>96</sup>

---

93 See Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 11-109 (Partnerships). Dicey records that before 1891, jurisdiction residence turned on the residence of the partners, not the place of business of the partnership; but it is suggested that situs of a partnership debt should follow the post-1891 test of jurisdiction.

94 For partnership tax-residence see 82.22 (Residence of partnership). But here we are concerned with jurisdiction-residence.

95 [1987] NSWLR 411 accessible

<https://www.kessler.co.uk/wp-content/uploads/2015/07/Cambridge-Credit-Corp-v-Lissenden.pdf>

96 [1924] 2 Ch 101 at p.114; similarly at p 119.

These are not absolutely compelling reasons for the place-of-debtor rule. Even when the rule was first laid down, it was not necessarily the case that the debtor could only be sued in his place of residence, or that their assets were there and not elsewhere. Nowadays these are less safe assumptions than formerly; though even now, they are still the case more often than not. However there is no reason why the debt situs rule must have a compelling reason. In fact any situs rule is bound to be slightly arbitrary and any clear rule is better than none.

#### 97.12.6 *Place-of-enforceability: Synonym of place-of-debtor rule*

In *Jabbour v Custodian of Absentee's Property* the court said:

It is established by the decided cases that not only debts, but also other choses in action, are for legal purposes localised and are situated where they are properly recoverable and are properly recoverable where the debtor resides.<sup>97</sup>

Similarly, Dicey rule 129 provides:

Choses in action generally<sup>98</sup> are situate in the country where they are properly recoverable or can be enforced.<sup>99</sup>

I think that “properly recoverable” and “can be enforced” are synonyms, so Dicey is propounding one test expressed in two different ways. I call this the “**place-of-enforceability test**”.

If this test is synonymous with jurisdiction-residence, it is correct. It is however a confusing and inapt way of expressing the place-of-debtor rule. It would be better to refer to place of residence rather than place of enforceability, and all the leading cases use the term residence;<sup>100</sup> though there are some cases which (under the influence of Dicey) have expressed

97 [1954] 1 All ER 145 at p.151.

98 I think “generally” recognises (inter alia) the exceptional case that where the place of residence and the place of enforceability are different, the place of enforceability is not the situs of the debt; it also recognises other exceptions such as specialties, judgment debts).

99 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), 22R-023 rule 129. The statement is found already in the 1<sup>st</sup> edition *A Digest of the Law of England with Reference to the Conflict of Laws* (1896) p.318.

100 *AG v Bouwens; English, Scottish and Australian Bank v IRC* [1932] AC 238.

the rule in terms of a place-of enforceability test.<sup>101</sup>

#### 97.12.7 *Place-of-enforceability: Rival to place-of-debtor rule*

The difficulty with the place-of-enforceability test is that a debt is *not* necessarily recoverable in the place of residence of the debtor, and if that is understood, a place-of-enforceability test is not consistent with the place-of-debtor rule.

The question has been settled in a number of cases which have held that a debt is situate where the debtor is resident, even if the debt is enforceable elsewhere:

a simple contract debt ... is deemed by English law to be situated in the place where the debtor resides. The reason for assigning this locality to a simple contract debt was that the place where the debtor resides was in nearly every case the place where it was recoverable. Even in earlier times, it might, of course, occasionally have happened that judgment could be obtained against a debtor in a country where he did not reside. But it was probably thought desirable for the sake of uniformity to adopt in all cases the test of residence rather than the test of recoverability. However, whatever the reason may have been, the rule was laid down, was I have stated it, in *AG v Bouwens*, and was recognised by this court as still being the rule in *New York Life Insurance v Public Trustee*.

A debt from a non-resident is recoverable in the UK if (in short) the court gives permission, but that does not alter situs:

The debt was also recoverable here ... had the plaintiffs been successful in obtaining leave to serve the defendant bank out of the jurisdiction. But I know of no authority for the proposition that a simple contract debt is situate in this country, at a time when the debtor is not resident here, merely because he can be sued by putting into operation the provisions of R.S.C., Ord. 11.<sup>102</sup> It would be strange if it were so. For it is always in the discretion of the court in cases coming within the rule, to give or refuse leave for service out of the jurisdiction, a discretion depending upon the balance of convenience. A debt due from a debtor resident out of the jurisdiction cannot therefore be deemed to be in this country until

---

101 For instance, *Kwok Chi Leung Karl v Commissioner of Estate Duty* [1988] STC 728 at p.732.

102 Now 6.30 Civil Procedure Rules 1998.

an application has been made for service of the writ out of the jurisdiction and that application has been acceded to. If leave were obtained, the question would then arise whether the order granting leave brought the debt into this country for the first time, or established its presence here as from some earlier date... But I need not attempt to answer this question, for in my judgment the fact that a simple contract debt can be recovered here from a debtor out of the jurisdiction does not establish an English locality for the debt....<sup>103</sup>

I set this out at length because unfortunately the contrary view was reached in one recent case, *Hillside (New Media) v Baasland*. In this case Baasland (“the creditor”) deposited money with Hillside (“the debtor”), creating a debt. The debtor was resident in England. The court should have held that the debt was situate in England because of the residence of the debtor but it did not. The Judge cited the Dicey rule set out above<sup>104</sup> and continued:

Although at common law this principle led to the general rule that (with some exceptions that are irrelevant for present purposes) debts are situate where the debtor resides (see Dicey, Morris & Collins, at para 22-026<sup>105</sup>), its application in a case such as this, where the debtor is a corporation and the case is covered by the Lugano Convention, depends, as I see it, upon the debtor’s domicile. That is the primary ground on which a court takes jurisdiction under article 2 of the Lugano Convention. The domicile of a corporation is determined in accordance with section 42 of the Civil Jurisdiction and Judgments Act, 1982. It depends upon where it has its “seat”, and this in turn depends upon where it was incorporated and has its registered or other official address or where its central management and control is exercised.<sup>106</sup>

I do not think any weight should be given to the comments on situs in *Hillside*, as the relevant cases were not cited.<sup>107</sup> *Hillside* illustrates how the

---

103 *Re Banque Des Marchands De Moscou (Koupetschesky)* [1954] 2 All ER 746 at p.752 citing *Deutsche Bank v Banque des Marchands de Moscou* (unreported). The passage was also followed in *Re Helbert Wagg & Co* [1956] 1 All ER 129 at p.137.

104 97.12.6 (Place-of-enforceability: Synonym of place-of-debtor rule).

105 The text of Dicey has not changed between the 14<sup>th</sup> edition to which the Judge refers, and the current (15<sup>th</sup>) ed.

106 [2010] EWHC 3336 (Comm) at [33]. The comment may be regarded as obiter as place of residence and place of enforceability were both in England.

107 The creditor (probably insolvent) was not represented.

place-of-enforcement test can mislead if it is intended to be synonymous with the place-of-debtor rule: it ought to be abandoned.

Although jurisdiction was the historical reason for adopting the place-of-debtor rule, now the rule has been chosen, jurisdiction-residence determines situs regardless of where the debt would actually be enforced. So a debt is situate where the debtor resides even though enforceable elsewhere, eg under an exclusive jurisdiction clause in the debt contract. If the historical reason for the place-of-debtor rule now holds less validity, or even no validity (though I think that would be an exaggeration) the rule is still as good as any other. Well-established precedents are not overturned merely because the historical reason for selecting that rule has become less compelling.

The place-of-debtor situs rule is in fact better than a place-of-enforceability rule for several reasons:

- (1) It is generally easier to ascertain where a debtor is resident than where a debt may be enforced.
- (2) The place of enforcement changes with developments in international law.
- (3) A debt may be enforceable in several places against the same debtor.

### 97.13 Specialty obligation

#### 97.13.1 *Situs of specialty*

If any rule of law can be called established, it is the rule that a debt due under a deed or other specialty is situate where the deed is situate.<sup>108</sup> I call this the “**specialty situs rule**”. This rule (along with the place-of-debtor rule) can be traced back to Elizabethan times.<sup>109</sup>

The same rule applies in Australia:

---

108 *AG v Bouwens* (1838) 4 M & W 171 <http://www.commonlii.org> This was approved in *AG v Winans (No. 2)* [1910] AC 27; *Comr of Stamps (New South Wales) v Hope* [1891] AC 476. Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 22-034 (Specialties) cite another half dozen cases and the discussion is found already in the first edition *A Digest of the Law of England with reference to the Conflict of Laws* (1896), p.320.

109 *Byron v Byron* Cro. Eliz. 472: “The debt is where the bond is, being upon a speciality; but debt upon a contract follows the person of the debtor; and this difference has been oftentimes agreed.”

*specialties* (such as a policy of insurance) - a debt created by deed (a ‘specialty’) has been held to be located where the deed itself is to be found...<sup>110</sup>

So a debt due from a UK resident can be made non-UK situate for IHT by drafting the debt as a specialty and keeping the document offshore. Conversely a debt, policies, and other specialties can be made UK situate for IHT by bringing the deed here.

France/Italy IHT DTAs apply different rules.<sup>111</sup>

### 97.13.2 Reason for specialty situs rule

What is the reason for the specialty situs rule? *R v Williams* offers this explanation:

[A specialty debt] was for centuries treated as very different from an ordinary debt. Indeed, the act of creating a specialty by deed was at one time possible only to men of the highest rank. Unlike debt, it was enforced by an action of covenant.<sup>112</sup> The deed itself was the foundation of the action, the original debt, if any, being merged. The terms of the deed were conclusive. Specialty debts till recent [?] times conferred special rights. They used to rank in the administration of the estate of a deceased person in priority to simple contract debts,<sup>113</sup> and, unlike such debts, were enforceable against the real estate.<sup>114</sup> They were said to be “of a higher nature” than debts by contract. It is, therefore, not surprising that specialty debts by deed were treated from an early date as *bona notabilia*<sup>115</sup> where the deeds were found at the time of the death, unlike ordinary debts which were said “to follow the person of

110 Taxation Ruling TR 2008/9

<http://law.ato.gov.au/atolaw/view.htm?DocID=TXR/TR20089/NAT/ATO/00001&PiT=99991231235958>

The Ruling cites: *Shaw v R* (1895) 21 VLR 338; 1 ALR 122; *Haque v Haque (No.2)* (1965) 114 CLR 98 at p.137.

111 See 109.8 (Treaty-situs).

112 The Privy Council refer to Holdsworth, *A History of English Law* (3rd ed., 1903), vol. iii., p.417; now Holdsworth, *A History of English Law* (5th ed., 1991), vol. iii., p.417. This rule was abolished by the Civil Procedure Act 1833.

113 This rule was abolished by the Administration of Estates Act 1869.

114 This rule was abolished by the Administration of Estates Act 1833.

115 See 97.1.1 (History and terminology).

debtor”.<sup>116</sup>

The higher status attributed to a deed made sense several centuries ago. Important legal arrangements were recorded in deeds. Less important or casual legal arrangements were not. The rule that a deed was of a higher nature than a simple contract reflected the views of the community and the manner in which business was conducted.

The specialty rules mentioned by the Privy Council had (by 1942) long ceased to be valid in English law, but it continues to be the case that a specialty has a higher status, for instance, preferential treatment in the law of limitation. In common law jurisdictions it is still the case, in Blackstone’s words, that a deed is “the most solemn and authentic act that a man can possibly perform with relation to the disposal of his property”.<sup>117</sup>

None of this justifies the specialty situs rule, but it does show that a distinction between situs rules for a specialty debt and other debts should not be regarded as surprising or anomalous. Still, one might conclude that the specialty situs rule has no reason, but *Commissioner of Stamps v Hope* offers a good explanation:

... the distinction drawn and well settled has been and is whether it is a debt by contract or a debt by specialty. In the former case, the debt being merely a chose in action – money to be recovered from the debtor and nothing more – could have no other local existence than the personal residence of the debtor, where the assets to satisfy it would presumably be, and it was held therefore to be bona notabilia<sup>118</sup> within the area of the local jurisdiction within which he resided; but this residence is of course of a changeable and fleeting nature, and depending upon the movements of the debtor, and inasmuch as a debt under seal or specialty had a species of corporeal existence by which its locality might be reduced to a certainty ... it was settled in very early days that such a debt was bona notabilia where it was “conspicuous”, i.e. within the jurisdiction within which the specialty was found at the time of death: see *Wentworth on the Office of Executors*, ed. 1763, pp.45, 47, 60(1).<sup>119</sup>

---

116 [1942] AC 541 at p.555.

117 Commentaries Book II (1st ed., 1766), p.297.

118 See 97.1.1 (History and terminology).

119 [1891] AC 476 at p.481. The passage from Wentworth is at

<https://www.kessler.co.uk/wp-content/uploads/2013/12/wentworth-on-executors.pdf>

The reason for the specialty situs rule is not that the specialty has a “species of corporeal existence” though of course the deed does have physical existence. The reason is that the physical existence of the specialty allows the location of the debt to be a matter of certainty: the rule is more certain and easier to apply than a place-of-debtor rule. There is good sense in that. The specialty situs rule reflects a rational choice in the policy dilemma - common in tax and other areas of law<sup>120</sup> - of balancing the need for certainty against other criteria.

### 97.13.3 HMRC view(s)

HMRC formerly accepted that the specialty situs rule was correct.<sup>121</sup> HMRC announced a change of practice in 2013, but rightly abandoned the position(s) that specialty debts were (or were likely to be), situate where the debtor resides.<sup>122</sup>

After a number of iterations, IHTM now provides:

**IHTM27079 Specialty debts: bonds and debentures under seal** [May 2020]

... HMRC has revised its previous approach to the Inheritance Tax (IHT) treatment of such debts, which was that where the debt is situated depends on where the relevant document is to be found. HMRC will take the following approach, which will apply regardless of when the specialty debt was created.

[Comment on secured specialty debts, discussed below; see 97.17 (Mortgage debt).]

**Unsecured specialty debts**

[1] Where the debt is not secured the view of the Courts is that the situs of the debt is usually (!) where the relevant deed or instrument evidencing the debt is found. HMRC will generally adopt this approach to unsecured specialty debts.

[2] However, it is possible to exploit this approach artificially by, for

---

120 See 15.5 (Formal/substantive source rules).

121 The IHT Manual formerly provided:

**“27091 Contractual** [February 2006]

*A specialty debt is situated where the instrument happens to be.”*

122 The point is considered in detail in the 2017/18 edition of this work, para 94.13 (Specialty obligation), concluding: “It seems safe to predict that the statement will be withdrawn.”

example, removing the document from the UK to avoid an IHT charge. Where the creditor and debtor are both resident in the UK but the deed evidencing the debt has been removed from the UK, it may be possible for HMRC to argue that the debt is nevertheless situated in the UK for the purposes of the IHT charge. For this reason all cases in which a specialty debt is claimed to be situated outside the UK should be referred to Technical.

The tentative<sup>123</sup> suggestion is that the speciality situs rule may not apply for IHT purposes where:

- (1) the creditor is UK resident
- (2) the debtor is UK resident
- (3) the deed has been removed from the UK

There is no basis for this view, other than, conceivably, the GAAR, but I do not think it can sensibly be said that the example constitutes abusive arrangements, within the meaning of the GAAR. HMRC, I think wisely, do not give any reason. Nor do HMRC claim, as they did before, that their view is supported by legal advice. But condition (3) is not likely to arise (in practice the deed will never enter the UK) so the issue will probably never arise.

As the statement falls into the category of “clearly wrong” I see no need to disclose to HMRC occasions where a tax charge would arise if their view were right.<sup>124</sup>

Perhaps the passage is just there to minimise embarrassment at the change of position.

#### 97.13.4 *Specialty situs rule: Critique*

There is something to be said for statutory abolition of the specialty situs rule.<sup>125</sup> The change would not bring in any significant amount of tax (as

---

123 It is qualified by the words “for example” and “... it may be possible for HMRC to argue ...”

124 See 116.9.2 (Disclosure to avoid misconduct).

125 There are precedents for statutory reform: the specialty situs rule was amended for probate duty: s.39 Revenue Act 1862; and it does not usually apply for CGT. Dymond states:

“It was formerly considered that s.39 Revenue Act 1862 (which provided that, for Probate Duty purposes, specialty debts owing from persons in the UK, and

debts could be held by companies whose shares would be non-UK situate) but it would be a simplification. The transitional rules would need thought. If the object is simplification, the new rules should not just apply to new debts. A fair rule would be to apply the new rules after a reasonable delay, say 12 months, to allow taxpayers to review their position. The cost of taxpayers reviewing their affairs ought to be taken into account. After factoring that in, I would not have thought that the improvement was worth the trouble involved in achieving it.

If it could be done as a quid pro quo of a wider review and simplification of the unsatisfactory CGT debt and debenture situs rules<sup>126</sup> the law would be left in a better state. But the best solution is to look at the wider picture altogether: treat all assets other than UK land and securities as non-UK situate for the purposes of IHT and CGT.<sup>127</sup>

### 97.14 Meaning of “specialty”

“Specialty” is an opaque technical term whose meaning can only be ascertained from the case law. Four categories of asset are “specialties”:

(1) Obligations under deeds:

- (a) The paradigm example of a specialty is a debt due under a deed.
- (b) The term also applies to deeds which create or record obligations which are not (or may not be) debts.<sup>128</sup> A life policy, contract for deferred annuity, capital redemption policy and the like are specialties if made by deed. Shares are not specialties.<sup>129</sup>

(2) For completeness the term also includes some liabilities which are not

---

forming part of the free estate, were to be treated as though they were simple contract debts), was incorporated for estate duty purposes... The Irish Court, however, decided in *Re Finance Act, 1894 and Deane* [1936] Ir R 556 that [this was not the case] and, accepting this interpretation as correct, such debts are to be regarded as subject to the ordinary rule applicable to specialty debts.”

See Dymond’s *Death Duties* (15<sup>th</sup> ed, 1973) p.1267. Of course all this is inconsistent with the current HMRC view.

126 See 98.8.4 (Critique); 98.13.5 (UK law rule: Critique); 98.9 (Debt situs rule); 98.11 (Critique).

127 See 97.36 (Reform of IHT/CGT situs rules).

128 In *Aiken v Steward Wrightson Agency* [1995] 1 WLR 1281 the term was applied to a contract by deed to provide services (so a claim for breach of contract was “an action upon a specialty” which qualified for a 12-year limitation period).

129 *R v Williams* [1942] AC 541.

deeds:

- (a) A debt incurred under a statute.<sup>130</sup>
- (b) Certain debts are by statute given the status of a specialty.<sup>131</sup>

So the terms “deed” and “specialty” are not strictly synonymous, but in most cases a deed is a specialty and vice versa.

#### 97.14.1 *What is a “deed”*

Since a specialty is a deed, the question arises as to what is a deed.

For a document to be a “deed” in English law it was formerly a requirement that the document must be sealed but that is not usually now the case. The current rules of what is a deed govern the meaning of “specialty”. So a seal is not usually required for an English law document to be a “specialty”.<sup>132</sup> No particular form is necessary to be a “specialty” beyond the formalities of a deed.

The same applies in Northern Ireland.<sup>133</sup>

As a shorthand, a deed was formerly referred to as a document “under seal” and a non-deed as a document “under hand”. This usage is now out of date (at least in England) but it is still found in HMRC Manuals.

A full discussion requires a long chapter to itself. I set out the current law, in less than full detail; though it will sometimes be necessary to consider the old law.

#### 97.14.2 *Intended to be a deed*

Section 1(2)(a) Law of Property (Miscellaneous Provisions) Act 1989 sets out the first requirement which applies both to individuals and to companies:

- (2) An instrument shall not be a deed unless—
  - (a) it makes it clear on its face that it is intended to be a deed by the person making it or, as the case may be, by the parties to it (whether by describing itself as a deed or expressing itself to be

130 *Royal Trust v AG for Alberta* [1930] AC 144.

131 In this category there now remain only a few Victorian antiquities of no practical importance, such as s.14 Metropolitan Fire Brigade Act 1865.

132 The Law Commission took this view in Working Paper No. 85 (1985) and Report No. 253, para 2.12.44. Dicey agrees: *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 22-034

133 Article 3 Law Reform (Miscellaneous Provisions) (NI) Order 2005.

executed or signed as a deed or otherwise)...

(2A) For the purposes of subsection (2)(a) above, an instrument shall not be taken to make it clear on its face that it is intended to be a deed merely because it is executed under seal.

### 97.14.3 *Executed as a deed*

Section 1(2)(b) Law of Property (Miscellaneous Provisions) Act 1989 provides:

- (2) An instrument shall not be a deed unless ...
  - (b) it is validly executed as a deed—
    - (i) by that person or a person authorised to execute it in the name or on behalf of that person, or
    - (ii) by one or more of those parties or a person authorised to execute it in the name or on behalf of one or more of those parties.

The phrase “validly executed as a deed” is a label for a set of requirements which vary depending on whether the party is an individual or a company.

### 97.14.4 *Execution by individual*

Section 1(3) Law of Property (Miscellaneous Provisions) Act 1989 provides:

An instrument is validly executed as a deed by an individual if, and only if—

- (a) it is signed—
  - (i) by him in the presence of a witness who attests the signature; or
  - (ii) at his direction and in his presence and the presence of two witnesses who each attest the signature; and
- (b) it is delivered as a deed.

Land Registry Practice Guide 8 – Execution of deeds (November 2018)<sup>134</sup> contains a helpful summary. It comments on “delivery” and attestation:

#### **2.1.3 Delivery**

[The guidance sets out s.1(3)(b), LP(MP)A 1989 and continues]:

Delivery requires that the person expressly or impliedly acknowledges, by words

---

134 <http://www.landregistry.gov.uk/professional/guides/practice-guide-8>

or conduct, an intention to be bound by its provisions.

Where a conveyancer, in a transaction involving the disposal or creation of an interest in land, purports to deliver a document as a deed on behalf of a party to it, there is a conclusive presumption in favour of a purchaser that the conveyancer is authorised to deliver it (s.1(5), LP(MP)A 1989). In practice, we assume that a document has been delivered as a deed unless there is some indication to the contrary. So if, for example, the words of execution have been modified to provide that delivery has not taken place, or that delivery is not to be presumed until some condition has been fulfilled, we will require evidence that delivery has subsequently taken place.

## **2.2 Attestation clause**

The general law does not require a particular attestation clause. It is sufficient if the clause makes clear that the signatures of the parties to the deed are intended to be by way of execution and that they were made in the presence of the witnesses. The wording should also state that the document has been executed “as a deed”. Then, even if it is not clear elsewhere in the document that it is intended to be a deed, the words of execution will make this apparent ...

### *97.14.5 Execution by company*

In relation to a company, the requirements for a deed are supplemented by requirements for execution of a document by a company which apply to deeds and to non-deeds. Section 44 CA 1986 provides:

- (1) Under the law of England and Wales or Northern Ireland a document is executed by a company—
  - (a) by the affixing of its common seal, or
  - (b) by signature in accordance with the following provisions.
- (2) A document is validly executed by a company if it is signed on behalf of the company—
  - (a) by two authorised signatories, or
  - (b) by a director of the company in the presence of a witness who attests the signature.
- (3) The following are “authorised signatories” for the purposes of subsection (2)—
  - (a) every director of the company, and
  - (b) in the case of a private company with a secretary or a public company, the secretary (or any joint secretary) of the company.

Section 46 CA 2006 provides:

- (1) A document is validly executed by a company as a deed for the purposes of section 1(2)(b) of the Law of Property (Miscellaneous Provisions) Act 1989 and for the purposes of the law of Northern Ireland

if, and only if—

- (a) it is duly executed by the company, and
- (b) it is delivered as a deed.

(2) For the purposes of subsection (1)(b) a document is presumed to be delivered upon its being executed, unless a contrary intention is proved.

#### 97.14.6 *Scottish company*

Land Registry Practice Guide 8 – Execution of deeds provides:

##### **3.6 Execution by Scottish companies registered under the Companies Acts**

The question of whether a disposition of land in England and Wales is formally valid must be determined in accordance with the *lex situs*, that is, the law of England and Wales. It is our view, therefore, that the requirements for an effective transfer etc. of registered land are the same where the disposition is by a Scottish company registered under the Companies Acts as for a disposition by English and Welsh companies so registered.

S.48 CA 2006 provides that “a document signed or subscribed by or on behalf of the company in accordance with the provisions of the Requirements of Writing (Scotland) Act 1995 shall have effect” as if executed by a company affixing its common seal. However, the section begins: “The following provisions form part of the law of Scotland only.” It is difficult to see, therefore, how s.48 CA 2006 can be relevant where it is registered land that is being disposed of.

The Overseas Companies (Execution of Documents and Registration of Charges) Regulations 2009 includes provisions as to execution by overseas companies, but a Scottish company is not an overseas company.

#### 97.14.7 *LLPs*

Land Registry Practice Guide 8 – Execution of deeds provides:

##### **5.2 Limited liability partnerships**

... Limited Liability Partnerships (Application of Companies Act 2006) Regulations 2009 (SI 2009/1804) applies ss.44-47, CA 2006 to limited liability partnerships, so they may execute deeds as provided by s.44 CA 2006. The regulations modify s.44 CA 2006 so that the references to a director and the secretary, or two directors, of the company are to be read as references to two members of the limited liability partnership (Regulation 4). ...

#### 97.14.8 *Foreign company*

Overseas Companies (Execution of Documents and Registration of Charges) Regulations 2009 provides:

Sections 43, 44 and 46 of the Companies Act 2006 apply to overseas companies, modified so that they read as follows ...

**44 Execution of documents**

(1) Under the law of England and Wales or Northern Ireland a document is executed by an overseas company—

- (a) by the affixing of its common seal, or
- (b) if it is executed in any manner permitted by the laws of the territory in which the company is incorporated for the execution of documents by such a company.

(2) A document which—

- (a) is signed by a person who, in accordance with the laws of the territory in which an overseas company is incorporated, is acting under the authority (express or implied) of the company, and
- (b) is expressed (in whatever form of words) to be executed by the company,

has the same effect in relation to that company as it would have in relation to a company incorporated in England and Wales or Northern Ireland if executed under the common seal of a company so incorporated...

(4) Where a document is to be signed by a person on behalf of more than one overseas company, it is not duly signed by that person for the purposes of this section unless he signs it separately in each capacity.

(5) References in this section to a document being (or purporting to be) signed by a person who, in accordance with the laws of the territory in which an overseas company is incorporated, is acting under the authority (express or implied) of the company are to be read, in a case where that person is a firm, as references to its being (or purporting to be) signed by an individual authorised by the firm to sign on its behalf.

(6) This section applies to a document that is (or purports to be) executed by an overseas company in the name of or on behalf of another person whether or not that person is also an overseas company.

**46 Execution of deeds**

(1) A document is validly executed by an overseas company as a deed for the purposes of section 1(2)(b) of the Law of Property (Miscellaneous Provisions) Act 1989 and for the purposes of the law of Northern Ireland if, and only if—

- (a) it is duly executed by the company, and
- (b) it is delivered as a deed.

(2) For the purposes of subsection (1)(b) a document is presumed to be delivered upon its being executed, unless a contrary intention is proved.

Practice guide 78 (Nov 2018) provides:

#### **4. Execution of deeds by overseas companies**

The Overseas Companies (Execution of Documents and Registration of Charges) Regulations 2009 (OCR 2009) allow an overseas company to execute a document in one of the following three ways. The OCR 2009 apply section 44 of the Companies Act 2006 with some amendments.

Questions as to who is duly authorised to act on behalf of an overseas company in making a contract or executing a document are determined by the law of the company's domicile, not the governing law of the contract or document (*Integral Petroleum SA v Scu-Finanz AG* [2015] EWCA Civ 144).

##### **4.1 Execution under a common seal**

An overseas company that has a common seal may execute deeds using that seal provided the deed is executed in a form appropriate to a company registered under the Companies Act, with such adaptations as may be necessary. Practice guide 8: execution of deeds – section 3.1 Execution by a company under its common seal sets out the methods by which a deed may be executed in this manner.

Where the seal is affixed in the presence of and attested by a permanent officer of the corporation who is not a clerk (or their deputy) or secretary (or their deputy), a note is required to be added to the description below the signature to the effect that the signatory is, in fact, a permanent officer of the corporation. A similar such note is required where the seal is affixed in the presence of and attested by a member of the governing body where their title does not make this clear...

##### **4.2 Execution in a manner permitted by local law**

Under Regulation 4 of the OCR 2009 a deed may be executed “in any manner permitted by the laws of the territory in which the company is incorporated for the execution of documents by such a company”. In this instance we will require evidence (which might include a letter from a qualified lawyer practising in or familiar with the domestic legislation of the territory of incorporation) to establish that the manner of execution used is indeed effective according to the law of the territory of incorporation. Such evidence must not be conditional or qualified in any way.

##### **4.3 Execution by signature of authorised person**

The OCR apply s.44(2), CA 2006 amended as follows.

“(2) A document which:

- (a) is signed by a person who, in accordance with the laws of the territory in which an overseas company is incorporated, is acting under the authority (express or implied) of the company, and
- (b) is expressed (in whatever form of words) to be executed by the company,

has the same effect in relation to that company as it would have in relation to a company incorporated in England and Wales or Northern Ireland if executed under the common seal of a company so incorporated.” ...

#### 97.14.9 *Which debts are specialties*

The specialty situs rule requires one to ascertain whether any particular debt is a specialty, which depends on the documentation. The specialty situs rule overrides the place-of-register rule: see 97.5 (Situs of registered shares).

The IHT Manual provides:

**IHTM27080 specialty debts: Treasury Bills, British Savings Bonds, National Savings Income Bonds** [May 2020]

Treasury Bills and British Savings Bonds are treated as specialty debts and situs will follow the normal principles for unsecured specialty debts (IHTM27079). Any claim that such assets should be regarded as non UK situs at a chargeable event must be referred to Technical.

It is difficult to see why the claim to apply “the normal principles for unsecured specialty debts” should be referred to Technical, but there it is. In practice I would not expect Technical to challenge situs.

**IHTM27091: Foreign property: debts: contractual** [May 2020]

... Corporation mortgages, issued by local authorities under seal, and Northern Irish Land Bonds are examples of specialty debts. You should be careful not to confuse corporation mortgages with corporation stock, which is far more common and which is a registered security, situated where the register is kept.

#### 97.14.10 *Isle of Man deeds*

The position is as follows:

While there is no doubt that seals have never been used in the Isle of Man, except by corporations, and that the formality of affixing a seal has never been, and is not now, required in order to constitute a written paper a deed, in my view for a written paper to be a deed there must be some evidence that the parties intended it to be a deed. That will normally be found in the words of the document itself.<sup>135</sup>

#### 97.15 Jurisdictions without “deeds”

Common law jurisdictions employ the concept of a “deed”, ie

(1) They draw a distinction between:

---

<sup>135</sup> *Aall Trust & Banking Corporation v Samuel McCormick* 2 OFLR 85, Butterworths Offshore Service Cases, Vol 2, p.479.

- (a) a “deed” (a technical term meaning a document which meets some set of formal requirements of execution) and
  - (b) an informal document (which does not meet those requirements).
- (2) The distinction matters for various purposes, eg certain dispositions of land require a deed; limitation and situs rules differ; etc.

Both the requirements and the consequences of being a deed have varied over the years, but there is a sufficient core to yield a stable and meaningful concept. As far as I know, other jurisdictions do not have this concept or anything very closely comparable.

#### 97.15.1 Channel Islands

Jersey and Guernsey law does not have the common law concept of a deed and prefer to avoid the word or (if used) to give it an express definition.<sup>136</sup>

#### 97.15.2 Scotland

Scots law does use the word “deed”<sup>137</sup> but not as a technical term:

[16]... it is clear that the word “deed” has no technical meaning in Scots law. In *Henderson’s Trs v IRC*, 1913 SC 987, a case dealing with the question of whether a minute of acceptance of office by trustees engrossed upon a trust disposition and settlement was a deed for the purposes of the Stamp Act 1891, ... Lord Kinnear stated (at 990):

“... for the purpose of this case the word ‘deed’ is a word of ordinary language, because it is not in our system a term of art. I agree also that it is unnecessary to attempt any exact definition of what the word ‘deed’ means; but I take the definition ... that a deed was any formal instrument which creates a legal relation”.

... It is unnecessary for present purposes to attempt any definition of the word “deed”. Nevertheless, I take from these cases that the significant characteristics of a deed are first that it should have some degree of formality and secondly that it must demonstrate an intention to create a legal relation.

[17] The minute of the board meeting of a company, duly signed by the

---

136 Kessler & Matthams, *Drafting Trusts and Will Trusts in the Channel Islands* (2<sup>nd</sup> ed., 2013), para 9.1.

137 For instance, “trust deed” (broadly defined) is used frequently in the Trusts (Scotland) Act 1921.

chairman, is to my mind clearly a formal document. Section 382 of the Companies Act 1985 [now s.248 CA 2006]... provided ... that every company shall cause minutes of all proceedings at meetings of its directors to be entered in books kept for that purpose. The reason for that provision is that the minutes serve an important purpose in recording the formal decisions of the board, which is of course the body that is responsible for managing the company. Thus board minutes are important documents. Subsection (2) then provides:

“Any such minute, if purporting to be signed by the chairman of the meeting at which the proceedings were had... is evidence of the proceedings”.

That too indicates a degree of formality in the notion of board minutes; they may have to be relied on in future, and it is important to establish precisely what the directors decided on any particular matter. Apart from the provisions of the Companies Act, section 2 of the Trusts (Scotland) Act 1921 states that the expression “trust deed” shall mean and include “any... resolution of any corporation”. That again suggests that formal resolutions taken by a company, whether in general meeting or through its board of directors, are to be regarded as documents that have the requisite degree of formality to constitute a deed. ...<sup>138</sup>

In short, Scots law has a concept of “deed” (albeit somewhat vague) but that is not the common law concept. The use of the same word should not be allowed to obscure the difference. Scots law does not have the concept of a “specialty”.<sup>139</sup> Accordingly, Scots law cannot have the rule that a specialty is situate where the document is.

## 97.16 Specialties: Conflict of laws

### 97.16.1 *Situs in English law*

An English<sup>140</sup> court may have to determine the situs of a debt governed by a foreign law. If the foreign law recognises the concept of a deed (in

---

138 *Low & Bonar Pension Trustees v Mercer* [2010] CSOH 47.

139 This is recognised in former companies act legislation; for instance, s.14(2) Companies Act 1985 provided: “Money payable by a member to the company under the memorandum or articles is a debt due from him to the company, and *in England and Wales* is of the nature of a specialty debt.” There is no equivalent in the current companies legislation.

140 The same would apply in Northern Ireland.

practice, if it is a common law jurisdiction) then it is considered:

- (1) The question whether the document is a deed (and so a specialty) is governed by the law of the document.<sup>141</sup>
- (2) If the document is a specialty under that law, one applies the English law (common law) rule that the situs is where the document is.

It has been suggested that the specialty situs rule may only apply if the document is situate in a jurisdiction which applies the specialty situs rule. So the situs of a specialty debt would be (say) the Isle of Man if the document was there, but it would be the residence of the debtor if the document was moved to (say) Jersey or Scotland. But there is no authority which supports that, and it is clearly wrong on principle. The question of situs in an English court is decided according to English law rules and under English law an asset may be situate in (say) Ruritania even if under Ruritanian law the asset is not situate there. Those who are concerned about the point will keep the documents in a common law jurisdiction, but that is not strictly necessary.

What is the position if a document is governed by a law which does not have the concept of a deed? There is authority that the document will be a specialty if it is executed in accordance with the English law requirements of a deed.<sup>142</sup> But in practice if one wishes to rely on the specialty situs rule, it is possible to avoid the issue, and choose a common law governing law, which does recognise deeds so the issue need not arise.

### 97.16.2 *Situs in Scots law*

If one turns to the Scots law textbooks on private international law, one finds no discussion at all on the situs of debts. Scotland did not have the jurisdiction of the Ordinary, where the common law rules arose;<sup>143</sup> and its private international law has managed to develop without reference to the situs of debts. I would be grateful to any reader who could direct me to relevant Scots authority if there is any.

Whatever the rule of Scots law on the situs of debts, it seems safe to say

---

141 In practice it would be unusual that a document which is a deed under the governing law does not meet the English law requirements for a deed, so the issue of which law applies for this purpose will not often arise.

142 *Alliance Bank of Simla v Carey* (1880) 5 CPD 429.

143 See 97.1.1 (History and terminology).

that it does not apply the specialty situs rule as Scots law does not recognise that concept. It might apply the place-of-debtor rule: a debt is situate where the debtor resides. I would not have thought that was inevitable. The common law cases are not binding in Scotland. But in the absence of other authority, a solution which is more consistent with foreign jurisdictions seems preferable. This is the view of Dymond's *Death Duties*:

The English specialty rule is unknown to Scottish law, so that debts owing by a person resident in Scotland, whether secured by a document under seal or not, are situate there [under Scottish law].<sup>144</sup>

Take the following examples; assume a specialty debt, and (if it matters) governed by English or IoM law (ie a law recognising deeds):

Case	Specialty in	Debtor resident	Situs (Scots law)	Situs (English law)
1	IoM	Scotland	Scotland	IoM
2	Scotland	IoM	IoM	Scotland

The situs of the debt (and whether it is excluded property) can hardly depend on whether the issue is litigated in England or in Scotland. It is suggested that the solution to the conundrum is to say that an asset is situated in the UK if it is:

- (1) situate in England according to English law
- (2) situate in Scotland according to Scots law, or
- (3) situate in Northern Ireland according to NI law.<sup>145</sup>

It is situate outside the UK if none of those apply.

On that analysis the debt in case 1 is situate in the UK and the debt in case 2 is situate outside the UK. The answer in case 2 is perhaps surprising but the facts of case 2 will not often arise.

The IHT Manual provides:

**IHTM27092 debts in Scotland** [May 2020]

In Scotland, the rule that a debt is situated where the debtor resides applies to both specialty debts (IHTM27079) and to those due on simple contract. For Inheritance Tax purposes debts due from people or companies who are resident or based in Scotland are regarded as situated

---

<sup>144</sup> *Dymond's Death Duties* (15<sup>th</sup> ed., 1973), p.1267.

<sup>145</sup> See too 3.18 (Child's domicile: Scotland).

there. If the taxpayer or agent disputes this rule, refer the case to Technical.

Any case where a Scottish instrument under seal is outside the UK and the locality of the asset determines whether or not Double Taxation Relief under IHTA84/S159 (IHTM27185) applies must also be referred to Technical.

The guidance on this page relates to specialty debts generally. It covers, for example, mortgages under seal, policies under seal, and covenant debts, and also applies to debts due from the Crown, or due under a statute.

No reason is given, but the result (although surprising at first sight) is consistent with the analysis of case 1 above.

## **97.17 Mortgage debt**

### *97.17.1 Property law background*

This section considers the situs of a debt charged or secured on land (“**mortgage debt**”). The borrower is the “**mortgagor**” and the creditor is the “**mortgagee**”. Although the discussion focuses on land, the same should apply if a debt is charged on other property, such as shares.

It is not necessarily the case that all mortgage debts should be treated the same way. In English law, mortgages have a long and complex history; in other jurisdictions the nature of a mortgage will vary. The rights of the mortgagee will also depend to some extent on the documentation. However the situs cases have never investigated this, and we may proceed on the basis that all mortgages should in principle be governed by the same situs test(s).

A mortgage debt has a twofold character:

- (1) It is an interest in land, conferring (at least when the debt is due and unpaid):
  - (a) right to possession
  - (b) power of sale
  - (c) right to foreclose
- (2) It is a debt, conferring a right of action against the debtor (like an unsecured debt)

In short, a mortgage debt confers a bundle of rights. It should however be regarded as a single asset, and not as two assets. The bundle is indivisible:

If [the mortgagee] sues on the covenant to pay he must reconvey the land on payment.<sup>146</sup> If he has parted with the land, otherwise than in exercise of a power of sale, he would be restrained from suing on the covenant... The result is that a mortgagee cannot assign the mortgage debt effectually without also transferring the security upon the land.<sup>147</sup>

Since rules applicable to land are often different from rules applicable to debts, the question of how to classify a mortgage debt has often arisen, and has been answered in different ways. That is not surprising, as a mortgage debt partakes of both qualities, and the answer has depended on the context.

At common law, on the death of an individual, real property passed to the heir and personal property passed to the personal representatives.<sup>148</sup> *Thornborough v Baker* held that a mortgage debt is personalty, so that on the death of the mortgagee it passed to his personal representatives. The mortgagee's legal title to the land passed to the heir but he held it on trust for the PRs:

for in natural justice and equity the principal right of the mortgagee is to the money, and his right to the land is only as a security for the money.<sup>149</sup>

Again:

a charge to secure a liability of the chargor to the chargee is a secondary benefit. It is available only for the purpose of enforcing the primary benefit, namely the underlying personal liability which the chargor owes him.<sup>150</sup>

---

146 Author's footnote: The equivalent in modern law would be a duty to support an application to the land registry to de-register the mortgage.

147 *Re Hoyles* [1911] 1 Ch 179 at p.184. Although this relates to a pre-1925 mortgage (which took the form of the conveyance of land to the mortgagee subject to a right of reconveyance) the same applies to a modern mortgage (a charge by way of legal mortgage).

148 Hence the name "personal representatives". After s.30 Conveyancing Act 1881, the mortgagee's legal title to the land passed to the PRs; but the point would still arise even now if a will gave real property to A and personal property to B: the mortgage debt would pass to B.

149 (1675) 3 Swans 628 at 630 <http://www.commonlii.org>

150 *SOCA v Szepietowski* [2013] UKSC 65 at [79].

On the other hand, a mortgage debt is an interest in land; a gift by will to a charity was void under the Charitable Uses Act 1735. In *Re Hoyles* a testator domiciled in England gave to charity mortgage debts charged on land in Ontario. The majority of the Court of Appeal held that a mortgage debt was immovable property, at least for the purpose of the conflicts rule that succession to immovable property was governed by the law of the place where the land was. The 1735 Act applied in Ontario, so the gift was void. The principle that a mortgage debt was personal property was limited (or brushed aside):

It is true that a mortgage is as between mortgagor and mortgagee regarded as personal estate for many purposes; ... but the fact that it is so for certain purposes in questions between our fellow subjects here has no bearing on the question whether such a mortgage should be regarded as movable or not in questions of international law. The mortgage undoubtedly affects the land directly; the mortgagee can enter and take possession at any time after his estate has become absolute at law;<sup>151</sup> he can by foreclosure acquire the full title to the land in fee, and the [Charitable Uses Act 1735] has forbidden any devises of land for any estate or interest whatsoever in any way charged or incumbered by any person or persons whatsoever in trust or for the benefit of any charitable use whatsoever and has made them void.<sup>152</sup>

This was a case where the court decided the answer first and the analysis came second:

[Counsel] invites us to leave the Mortmain Act out of sight and decide as a preliminary abstract question whether mortgages on land are movable or immovable. But we should fail in our duty if we did not consider that Act and the effect of our decision upon devises within it. We must have regard to the fact that such gifts have been regarded as prejudicial to and against the public utility and a public mischief, and we must accordingly come to such conclusion as will avoid these evils.<sup>153</sup>

### 97.17.2 *A principled analysis*

There are four possible solutions:

---

151 This is not the case for a mortgage under modern law.

152 [1911] 1 Ch 179 at p.187.

153 [1911] 1 Ch 179 at p.187.

- (1) The asset is situate only where the land is.
- (2) The asset is situate only where the debt is.
- (3) The asset is double situate, ie fully situate in both jurisdictions.
- (4) The asset is partly situate in both jurisdictions:
  - (a) situate where the land is, to the extent of the value of the land, and
  - (b) situate where the debt is, if and so far as the value of the asset exceeds the value of the land.

Solution (3) must be rejected if one accepts the view in this book that one asset cannot be situate in two places.<sup>154</sup>

Solution (2) is rational. It provides a reasonable result even in a case where the debtor has no assets other than the land, so the debt is paid out of the land. An unsecured debt may be situate in state A even though the debtor's assets used to pay the debt are all in state B.

Solution (1) - that situs depends solely on location of the land - is not a sensible or workable rule for the following reasons:

- (1) One debt may be charged on land in two different countries.
- (2) The rule becomes absurd if a large debt happens to be secured on an asset of small value. Would one say a £100m debt is situate in Jersey if it is secured on Jersey land, or indeed shares, worth £100k?

Solution (4) may be said to best track the economic reality - though one might doubt how far economic reality may be said to apply to situs rules of unsecured debts. It is not necessarily inconsistent with the principle that a mortgage debt is one asset and not two. Perhaps it is like a chattel which might perch across both sides of a border, whose situs may be split in the same way. If situs depends on values of the debt and the land, the proportions may fluctuate from time to time, but that too is not an insuperable objection.

### 97.17.3 *Mortgage situs: Case law*

All the solutions have some support in case law.<sup>155</sup> At some point the courts will have to review the cases and decide which to prefer.

---

<sup>154</sup> See 97.3 (Every asset has one situs).

<sup>155</sup> See Hopley, "Reaping the Succession Duty Field: Mortgages and the One Local Situation Rule" (1958) 16 *University of Toronto Faculty Law Review* 8.

#### 97.17.4 *Situs of debt prevails*

These cases in this camp go back at least to *Commissioner of Stamps v Hope* [1891] AC 476. Here:

- (1) The testator entered into a contract to sell land in New South Wales for a purchase price payable (in part) by 12 promissory notes falling due at various dates. The contract and promissory notes created simple contract debts (not made by deed).
- (2) Subsequently the purchaser granted a mortgage of the land by deed. This deed included a covenant to pay the promissory notes.

The testator died before the last promissory note was payable, so the question arose as to the situs of the debt. The Revenue argued that the testator held a simple contract debt situate where the debtor was resident (New South Wales). There was some debate about the simple contract debt had merged into the mortgage deed. Under the doctrine of merger, a simple contract debt could merge into a later deed (ie be superceded by the deed) in which case the simple contract debt ceased to exist.<sup>156</sup> Had that happened here then there would only have been a specialty debt. But the court did not have to decide whether there had been a merger, as even if that had not happened, the debt was a specialty debt:

The [mortgage] deed contains an express covenant to ... pay the promissory notes; between the same parties it was an existing security under seal, at the time of the testator's death, for the balance then due; it would continue to be a security for a much longer period, and would be attended with advantages not belonging to debt by simple contract. Although it never became necessary to act upon the [mortgage] deed by taking possession or seeking any remedy under it, it was and remained ... of full force and validity. *There is but one debt*, whether in Victoria or New South Wales; and their Lordships fail to see how it can be said that that debt has not become a debt by specialty.<sup>157</sup>

Since the deed was kept in Victoria, the debt was situate there. The Revenue did not argue that the situs of the land in NSW made any

---

<sup>156</sup> Merger was important when there were different remedies for simple contract debts and specialties; but now the doctrine is (more or less) obsolete.

<sup>157</sup> [1891] AC 476 at p.484

difference to the situs of the debt but the court can hardly have overlooked that fact.

*Toronto General Trust Corporation v The King* [1919] AC 679 supports the same approach. Here a mortgage debt was represented by two duplicate deeds, one in Ottawa and one in Alberta. In such a case one cannot apply the rule that the debt is situate where the deed is situate. The court cited *Hope* and distinguished it (there was only one deed in that case) but would otherwise have followed it. Had there been only one deed, the court would have held the debt to be situate where the deed was.

A comment of the Special Commissioner in *Hafton Properties v McHugh* also supports this view<sup>158</sup> and the same view has been reached in India.<sup>159</sup>

#### 97.17.5 *Situs of land prevails*

The starting point on this side of the fence is the decision of the Privy Council in *Walsh v The Queen*.<sup>160</sup> Here there were a variety of debts owed by non-residents secured on property in Queensland. The documents were kept outside Queensland. Whether one applied the place of debtor rule or the specialty rule, the debts were not situate in Queensland. It was held that the debt should be regarded as being in Queensland up to the lower of the value of the debt and the value of the Queensland property.<sup>161</sup>

I have wondered if one could explain *Walsh* on the basis that it did not concern the common law situs rule. The case turned on an income tax statute (the [Queensland] Dividend Duty Act 1890) which could have operated a different situs rule. But the view that *Walsh* only concerned the Dividend Duty Act and was not a common law situs case is difficult to maintain after the probate duty case *Henty v The Queen*. Here a debt was secured on land in New South Wales. In an *obiter* comment the Privy Council said:

---

158 "... the debt was a mortgage debt. Such a debt is regarded for private international law purposes ... as a speciality debt, the situs of which is to be found where the mortgage deed is to be found;" 59 TC 420 at p.426.

159 *Dharanidhar Roy v Sethi* AIR 1933 Cal 379  
<http://www.indiankanoon.org/doc/959534>

160 [1894] AC 144 also reported under the name *Walsh v Regina*.

161 Where the debt was secured on property in Queensland and elsewhere, there was an apportionment.

according to the principles recognised by this Board in *Walsh v. Reg.* the security held by [the creditor] is as much an asset in New South Wales as the real estate there which it affects.<sup>162</sup>

If the court was applying the common law situs rule, the Privy Council in should have referred to *Commissioner of Stamps v Hope* (which the taxpayer cited in argument) or to other leading situs cases. Perhaps the PC thought that *Hope* was wrong and chose to ignore it since they could not overrule it. Or perhaps they thought that the debt was dual-situate.

#### 97.17.6 *Mortgage debt dual-situate*

*Payne v R* [1902] AC 552 concerned a debt charged on land in Victoria. The debtor was resident in New South Wales. The Privy Council held (without citing authority) that the mortgage debt was an asset in New South Wales *and* tentatively suggested it was situate in Victoria too:

The debtor as well as the testator resided in Victoria and was domiciled there. The debt, though a specialty debt in New South Wales, was a simple contract debt in Victoria. That being so, it seems to their Lordships that ... the debt was an asset in Victoria and recoverable under a Victorian probate, although it may well be that in order to discharge the mortgage probate duty would also have to be paid in New South Wales, and the debt, if recovered in Victoria, might be retained in Court until the mortgagees were in a position to discharge the mortgage.<sup>163</sup>

The attraction of this solution is that all the cases adopting the situs of debt approach can be reconciled with those adopting the situs of land approach. But there is only one asset which cannot be dual situate.<sup>164</sup> The comment in *Payne* is *obiter*, and should be dismissed as now overruled.

#### 97.17.7 *Textbooks*

Dicey notes that in practice mortgages on land in England are usually specialties and continues:<sup>165</sup>

[1] A mortgage of land confers an interest in land and will be held

---

162 [1896] AC 567 at p.574.

163 [1902] AC 552 at p.560

164 See 97.3 (Every asset has one situs) and 97.1.2 (Inconsistent case law).

165 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 22-035.

situate where the land is situate,<sup>166</sup>

[2] but where it is necessary (e.g. for taxation purposes) to distinguish between the situs of the mortgagee's interest in land and that of the mortgagor's personal obligation to repay, then the latter (if in the form of a specialty) will be held situate where the deed is situate from time to time.<sup>167</sup> ...

[3] In the conflict of laws the distinction between the interest in land and the personal obligation is not normally made for the purposes of situs, and the asset is regarded as a unity which is situate in the country where the land lies.<sup>168</sup>

Dicey's view at [1] and [3] is that the location of the land prevails. This overlooks the authorities cited above. The case cited, *Re Hoyles*, does not support Dicey. It shows that the succession law which applies to a mortgage debt is the law where the land is situate. However, it does not follow from this that the debt should be regarded as situate in that country. This is a case where succession law does not follow the situs of the asset. Situs as such is nowhere discussed in *Re Hoyles*. The suggestion at [2] is that tax law may distinguish between the mortgagee's interest in land and the mortgagees's right to payment. But tax law does not have different situs rules from the general law.

HMRC adopt the view that the location of the land prevails. IHTM provides:

**IHTM27079 Bonds and debentures under seal [May 2020]**

**Secured specialty debts**

Where the debt is solely secured on land or other tangible property situated in the UK the situs of the debt will also be in the UK. HMRC considers the situs of the debt follows the genuine interest of the creditor in the secured property, not merely the personal obligation of the debtor to repay (which may be situated elsewhere, for example where the debtor is resident).

Any claim that a debt secured on UK assets is not UK situs property

166 [Dicey's footnote] *Re Hoyles* [1911] 1 Ch 179.

167 [Dicey's footnote] See *Walsh v The Queen* [1894] AC 144; *Payne v R* [1902] AC 552. Also *Henty v The Queen* [1896] AC 567.

168 [Dicey's footnote] *Re Hoyles* [1911] 1 Ch 179; *Dicey*; cf Falconbridge, *Selected Essays on the Conflict of Laws* (2<sup>nd</sup> ed., 1954), pp.573–580 for an acute discussion of the problem raised in this paragraph.

must be sent to Technical.

### 97.17.8 Conclusion

There is a lot to be said for the view that a mortgage debt is situate where the debt is, and not where the land is, and this was the view formerly taken in this work. But it is tentatively suggested that the best solution is solution (4), the situs is the situs of the land, except so far as the value of the debt exceeds the value of the land. This does mean that the situs of an debt can be changed by charging it on land; but that is not absurd, because the charge alters the nature of the asset. It may not be inconsistent with the HMRC view, as the Manual passage above may not be considering the case where the debt exceeds the value of the land.

### 97.18 Claim for breach of trust

If a trust makes a distribution in breach of trust, or a company makes an unlawful distribution, the transferor acquires two remedies:

- (1) A claim *in personam* against the recipient, for an amount equal to the sum distributed
- (2) A claim *in rem* for the asset transferred, which the recipient holds on constructive trust for the transferor

The transferor holds a chose in action which is one asset, not two. It is suggested that the situs of this asset is:

- (1) The situs of the asset transferred, or assets to which it may be traced, up to the value of those assets; and
- (2) If and so far as the value of the claim exceeds the value of those assets, the situs is where the recipient is resident.

The argument is similar to the situs of a mortgage, but stronger, in that the transferor has the beneficial interest, not just a security interest, in the asset transferred.<sup>169</sup>

### 97.19 Debt under letter of credit

The IHT Manual provides:

**IHTM27091: debts: contractual** [May 2020]

---

<sup>169</sup> See 97.17 (Mortgage debt); 100.30 (Bare trust or nomineehip).

A debt under a letter of credit has been held to be situated in the place where it is in fact payable against documents (*Power Curber International Ltd v National Bank of Kuwait* [1981] 3 A11 ER 607).

In *Power Curber International*, the debtor bank was resident in Kuwait but the debt was payable in Carolina. The majority of the Court of Appeal held the debt was situate in Carolina. The decision on this point was obiter, not fully argued, and the dissenting view was the better one. But the issue will not often arise in an IHT context, as letters of credit are likely to be held by companies, so the situs of the debt will not often matter for tax purposes. If it did arise, the lower courts are likely to follow the majority view of the Court of Appeal, and even the Supreme Court should prefer to maintain the stability which results from following a decision which has been unchallenged for so long. So the law should be regarded as settled.

## 97.20 Judgment debt

A judgment debt is situate where the judgment is recorded.<sup>170</sup> Obtaining judgment may therefore have the effect of changing situs, for better or worse.

## 97.21 Bank account

The IHT Manual provides:

### **IHTM27093 Debts: Bank accounts** [May 2020]

A bank account is a debt, and under general law is situated at the branch of the bank where the account is kept: *R v Lovitt*<sup>171</sup> [1912] AC 212...

This is not a special rule for bank accounts: it is an application of the general rule for debts; in particular, in the case of a company carrying on business in two places, a simple debt is situate where payable.<sup>172</sup>

UK bank accounts may qualify for IHT relief.<sup>173</sup> Guidance on what constitutes a branch of a bank can be found in the discussion of branch and

170 *AG v Bouwens* (1838) 4 M & W 171 on <http://www.commonlii.org>

171 In the Law Reports the name of this case is: *The King v Lovitt*.

172 See 97.12.2 (Dual resident debtor).

173 See 72.13 (Foreign currency account).

PE.<sup>174</sup>

## 97.22 Building society account

A standard form building society account is not a debt, it is an interest in the society, so corporation situs rules rather than debt rules should be applied.

The IHT Manual provides:

**IHTM27151 [Bank or]<sup>175</sup> building society accounts in Channel Islands and Isle of Man [May 2020]**

Any case where it is claimed that an account with a UK Building Society must be treated as situated in the Channel Islands or the Isle of Man, so it is exempt from IHT, must be referred to Technical.

## 97.23 Insurance policy

For the purpose of common law situs rules a policy is treated in the same way as a debt, so the place-of-debtor and specialty situs rules apply.<sup>176</sup> That makes sense if one bears in mind the insurance law background: under insurance law/property law, a policy is classified as a contingent debt,<sup>177</sup> even though in a CGT context one would not describe a policy as a “debt”, as policies are taxed differently from normal debts.<sup>178</sup>

France/Italy IHT DTAs apply different rules.<sup>179</sup>

The IHT Manual provides:

**IHTM27101 Foreign Property: Money From A Life Policy: General Rule [May 2020]**

When a life policy is not made by way of deed the policy monies are

174 See 101.2 (Meanings of permanent establishment); 101.25 (Meaning of “branch or agency”).

175 The reference to a “bank” in the heading seems to be erroneous since the text only relates to building societies.

176 *New York Life Assurance v Public Trustee* [1924] 2 Ch 101.

177 *Foskett v McKeown* [2001] 1 AC 102 at p.134: “The word “policy” is here used to describe the bundle of rights to which the policyholder is entitled in return for the premiums. These rights, which may be very complex, together constitute a chose in action, viz, the right to payment of a debt payable on a future event and contingent upon the continued payment of further premiums until the happening of the event.”

178 See 53.21 (CGT debt exemption).

179 See 109.8 (Treaty-situs).

situated where the debtor (the company) is resident. This is generally the head office of the company.

You can find more information on policies at IHTM20000 onwards.

**IHTM27102 Payment Made At Place Other Than Head Office** [May 2020]

Where under the terms of the policy, payment is to be made at some place other than the residence of the head office the monies are deemed to be situated at the place of payment' (*New York Life Insurance Co v Public Trustee* [1924] 2 Ch 101).

So, if the policy proceeds are to be paid in the UK the policy proceeds are UK sited and chargeable to Inheritance Tax.

**IHTM27103 Policy Issued At Branch Office** [May 2020]

The proceeds of a policy are usually taxed where they are sited (IHTM27071).

If a policy:

- is issued by, or through, a branch office of a UK company that is outside the UK, and
- no reference is made in the terms of the policy as to the place where the policy monies are to be paid,

policy monies are to be treated as situated in the country of the branch office as long as the whole course of business in relation to the policy had been transacted in that country.

The 'whole course of business' means that all the following events must happen in the country of the branch office:

- The policy is issued to a resident in that country from the branch in that country.
- The holder of the policy remains resident and retains the policy there, pays the premiums to the branch there, and dies there.
- The grant of representation to the policy holder's estate is taken out there and the proceeds are collected there.

You should not assume that the policy was situated in the UK without considering all the circumstances surrounding the policy, even if, at the date of the life assured's death:

- the policy is in the UK at the Assurance Company's head office, and
- the life assured has assigned the policy to the assurance company as security for a loan.

Each case must be considered on its own facts. If a small detail prevents the conditions from being fully met this may still mean that the policy is situated outside the UK. But any case where this applies, or where the locality of the policy has to be determined before the policy holder's

death must be referred to Technical.

Where a policy not made by way of deed has terms that provide for payment either at its head office or at a branch office, and the ‘whole course of business’, takes place in the country of the branch office, the monies are also treated as locally situated in that country.

Some of para 27103 is doubtful but the practice will normally favour the taxpayer so the issues will not often arise.

#### 97.23.1 *Policy made by deed*

The IHT Manual provides:

**IHTM27104 Policies Under Seal** [May 2020]

Policies by way of deed or under seal are specialty debts (IHTM27079). Where the policy holder is non UK domiciled and there is no evidence to suggest the location of the policy documents has been artificially arranged, HMRC will treat such policies as situated where the deed is to be found. You should refer to Technical any case in which it is claimed that a policy under seal held by a person domiciled in the UK is not situated in the UK.

But if the policy is held by a UK domiciliary, the issue of situs will not often arise.

It is necessary to investigate whether policies are specialties. The IHT Manual gives a little guidance:

Most Lloyds policies are embossed with a seal but they are not specialty debts unless they also bear the witnessed personal signature of the General Manager of Lloyds Policy Signing Office. Lloyds policies that do not bear this signature are chargeable to Inheritance Tax in the country where the debtor (the company) resides (IHTM27101).

On IHT treatment of UK situate policies see 62.24 (Policy held by non-dom: IHT).

#### 97.24 Land

The IHT Manual provides:

**IHTM27074 Land and interest in land** [May 2020]

Immovable property is situated where it is actually located.

That seems self-evident; but if authority is needed, see *Haque v Haque* (*No*

2) (1965) 114 CLR 98 at p.136.

The Manual continues with a discussion of the meaning of “land”:

But, different legal systems may take opposing views as to whether some types of interest in land or relating to land are movable or immovable property.

These differences are resolved (under Private International Law, and also by specific provision in Double Taxation Conventions where these apply)<sup>180</sup> by the adoption of the view taken by the law of the country in which the land itself is ‘situated’: *Johnstone v Baker* (1817) 4 Madd 474; *Macdonald v Macdonald* (1932) SLT (HL) 381.<sup>181</sup>

Land is usually classed as immovable property, so is generally governed by the law of the country in which it is situated ...

## 97.25 Chattels

The rule is what one would expect. The IHT Manual provides:

**IHTM27075 Chattels** [May 2020]

... (chattels) are situated where they happen to be at the relevant time.<sup>182</sup>

It is suggested that this applies even where:

- (1) a chattel is moved out of the UK;
- (2) the chattel is transferred to another person or trust;
- (3) the chattel is returned to the UK.

The temporary removal of the asset at the time of the disposal cannot be ignored, for tax purposes, even if the time spent out of the UK is short.

## 97.26 Ships and aircraft

The IHT Manual provides:

**IHTM27073 Ships** [May 2020]

A ship on the high seas is deemed to be situated at its port of registry but when it comes within territorial waters this artificial situs is displaced by the actual situs: *Trustees Executors & Agency Co Ltd v IRC* [1973] Ch 254.

---

180 See 23.7.1 (“Immovable property”).

181 Accessible <http://uniset.ca/other/cs5/1932SLT381.html>

182 The text is found twice: IHT Manual paras 21047 [May 2020] and 27075 [May 2020]. For a concession on works of art see 72.14 (Works of art).

*Dornoch v Westminster International*<sup>183</sup> raises the issue of the situs of a ship, but muddles what ought to be two distinct issues, namely, (1) situs and (2) what system of law governs the transfer of title to a ship.<sup>184</sup>

In *Air Foyle v Centre Capital*:

Although there is a somewhat tentative and limited suggestion in Dicey that an aircraft “may at some times be deemed to be situate in its country of registration”<sup>185</sup>, there are overwhelming reasons for treating an aircraft as situate in the State where it physically is for the time being, at least unless it is either over the high seas or over or on territory which is not under the sovereignty of any State.<sup>186</sup>

It is suggested that the ship rule is the most sensible solution for aircraft.

### 97.27 Goodwill

Goodwill is situate where the business to which it relates is carried on.<sup>187</sup>

In *Star Industrial v Yap Kwee Kor*:

Goodwill, as the subject of proprietary rights, is incapable of subsisting by itself. It has no independent existence apart from the business to which it is attached. It is local in character and divisible; if the business is carried on in several countries a separate goodwill attaches to it in each.<sup>188</sup>

### 97.28 Intellectual property

Intellectual property is likewise divisible, and is regarded as a separate asset situate in each jurisdiction it can be enforced.<sup>189</sup> In *Peer International v Termidor Music Publishers*:

---

183 [2009] EWHC 889 (Admlty) at [90] - [103].

184 This illustrates the critique in Rogerson “The Situs of Debts in the Conflict of Laws - Illogical, Unnecessary and Misleading” [1990] CLJ 441.

185 The passage is still in the current ed: Dicey, Morris & Collins, *The Conflict of Laws* (15th edn, 2012) para 22E-061 (Exception 2).

186 [2002] EWHC 2535 (Comm) at [40].

187 *IRC v Muller* [1901] AC 217.

188 [1976] FSR 256 at p.269.

189 See 24.5 (Source of non-trade IP income); *Foster's Australia v CIT* 302 ITR 289 (AAR) 10 ITLR 939.

The essence of an intellectual property right is the owner's right to take action to prevent others from engaging in certain types of activity in a given territory without the owner's permission. Although patents, trade marks and copyright are classified as moveables, they share some of the characteristics of immovables in the sense that the rights which they confer are territorially limited. It follows that a patent, a trade mark or copyright is situate in the country whose law governs its existence... although a wholly abstract concept, English copyright is inevitably located in England, or, as may be more appropriate in light of the provisions of the Copyright, Designs and Patents Act 1988, UK copyright is inevitably located in the United Kingdom.<sup>190</sup>

Copinger & Skone James on Copyright explains:

... there is no such thing as global or world-wide copyright... In respect of any particular work, separate copyrights or equivalent rights subsist in different territories throughout the world. Copyright is only situated here in so far as it is protected here by the Copyright, Designs and Patents Act 1988. The rights in works which are protected in other countries by other laws are situate in those countries and not in the UK.<sup>191</sup>

These issues will not often arise for IHT, because intellectual property is mostly held by companies or partnerships, not directly by individuals; and because of BPR.

### **97.29 Land subject to contract of sale**

An interest in English land subject to a contract of sale is still situated in the UK. It is suggested that a contract of sale does not affect situs.<sup>192</sup>

### **97.30 Bare trust or nomineehip**

The interest of a beneficial owner in property held by a nominee or bare trustee<sup>193</sup> is situate where the underlying asset is situate: a nomineehip or bare trust is transparent for situs. That is almost self-evident, but if

---

190 [2002] EWHC 2675 (Ch) at [22] [23].

191 17<sup>th</sup> ed, (2019) para 2-15, 29.31 (non-domiciled individuals).

192 See *Re Clore, IRC v Stype Investments* [1982] STC 625; see too 78.19.2 (Contract to buy/sell asset).

193 For present purposes the terms bare trustee/nominee are used synonymously.

authority is needed, see *Re Clore, IRC v Stype Investments* where a Jersey nominee held land in England (“the land”):

Immediately after the conveyance of [the land] to [the Jersey nominee] and the execution of the declaration of trust which acknowledged that [the land] would “continue to remain in the beneficial ownership of Sir Charles,” [the land] belonged in equity to Sir Charles in fee simple and his interest constituted property situate in England. [The Jersey nominee] was entitled to be paid any outgoings or charges in respect of the land, but this entitlement did not affect the nature, quality or situation of the interest of Sir Charles in the [land].<sup>194</sup>

The position is different for unit trusts<sup>195</sup> and intermediated securities<sup>196</sup>, which are not straightforward bare trusts, and best not described as bare trusts at all.<sup>197</sup>

### 97.31 Interest under substantive trust

The situs of an equitable interest under a substantive<sup>198</sup> trust is not often relevant for IHT, but it may matter, eg where a reversionary interest is not excluded property for IHT.

#### 97.31.1 *Baker trusts*

An equitable interest under a *Baker* type trust (ie English law or a jurisdiction following English trust law principles)<sup>199</sup> has a twofold character:

- (1) It provides rights enforceable against the trustee.
- (2) It is an interest in the trust property.

There are many connecting factors which might be used to attribute a situs to an equitable interest, and the courts have not had to consider all possible permutations. *Favorke v Steinkopff* [1922] 1 Ch 174 concerned an English law will trust, with English trustees, but German situate property; the

---

194 [1982] STC 625 at p.633-4.

195 See 66.8 (Situs of unit).

196 See 67.3 (Transparent intermediated security: Situs for IHT/IT).

197 See 1.7.1 (“Bare trust” and related terms).

198 By “substantive” I mean a trust other than a bare trust (nomineeship) or unit trust.

199 For the trust law background, see 39.3 (Taxation of life tenant); 39.8 (Baker or Garland trust?).

equitable interests of an annuitant, life tenant and remaindermen were held to be situate in England. It is suggested that an equitable interest is in principle situate where the trustees are resident. If the trustees are resident in different jurisdictions, situs would be determined by an exclusive jurisdiction clause if there is one, or failing that, by the proper law.<sup>200</sup>

This is consistent with the rule that the equitable interest is classified as moveable (not immovable) property. The High Court of Australia said:<sup>201</sup>

The mere fact that there is land subject to the trust would not result in the beneficiary's interest in the fund being an immovable in the place where the land is situated. The interest in the fund is situated in the country which is the forum of administration of the trust or whose law is the proper law of the trust: *Ewing v. Orr Ewing* (1883) 9 App Cas 34.

There is a sound basis to say that situs of the assets of the trust fund is not relevant to the situs of the equitable interest. If the trust assets are situate in different jurisdictions it would be impossible to ascertain the situs of the equitable interest (if the equitable interest is regarded as a single asset). An equitable interest such as a life or reversionary interest should not be regarded as several separate interests in as many assets as are held by the trustees. Such an equitable interest is generally regarded as one asset and not as many assets as there are items of trust property.

Where the equitable interest is a power of revocation the position is even clearer. Where the equitable interest is an annuity, it would often be impossible to locate the annuity by reference to the situs of the trust assets, because one cannot identify any particular trust asset and say that asset is (to any fixed extent) the source of the annuity.

### 97.31.2 *Garland trusts*

An interest under a Scots law or other *Garland* type trust is not an interest in the trust property, so the situs of the trust property is irrelevant to situs.

## 97.32 Estate of deceased person

---

200 For a contrary view see Harris, *The Hague Trusts Convention* (1<sup>st</sup> ed, 2002), Chapter 9 (Situs of equitable interests) and Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 22-048 (Interests under trusts).

201 *Haque v Haque (No 2)* [1965] HCA 38; (1965) 114 CLR 98 at [2].

The IHT Manual provides:

**IHTM27072 Unadministered estates** [May 2020]

In general, a person who takes an absolute interest in the residue of an estate is entitled, not to the assets **of the testator, but to a right of action**, enforceable against the executors. This is the case under English law and many other legal systems.<sup>202</sup>

This means the executors must administer the estate and transfer the clear residue, or a share of it to the beneficiary. The same rule applies in the case of intestacy.

This is a similar rule to the jus crediti to which a beneficiary is entitled in Scotland.

The chose in action is situate where it is enforced, ie where the executors are. The situs of the assets of the estate is not relevant. See *CSD v Livingston* [1965] AC 694. The IHT Manual continues:

But, for IHT, the deceased is treated as having a direct interest (in the whole or a share) in the net assets of the residuary estate. See IHTM22031<sup>203</sup>

For this reason you must consider the situs of each of the underlying assets separately.

For example, the excluded property provisions in s.6(2) IHTA may apply to qualifying securities included in the unadministered estate (IHTM04260) and as a result they may not be chargeable to IHT.

### 97.33 Situs of partnership share

The situs of a partnership share may not matter for IHT, because of BPR, but the issue does arise for investment partnerships.

#### 97.33.1 Partnerships (except LLPs)

A partnership share may be analysed as an asset (a chose in action) distinct from the assets of the partnership, or as co-ownership.<sup>204</sup> In the context of situs, the chose in action analysis applies, and so a partnership share has its own situs distinct from the situs of the partnership assets. That must be the

---

202 Author's footnote: Further consideration will be required for jurisdictions other than England and Wales, especially civil law jurisdictions.

203 See s.91 IHTA.

204 See 82.3 (Nature of partnership share).

appropriate analysis, given the impracticality of ascertaining all the assets of the partnership and their situs.

There are several factors that the court might have used to determine situs. In practice the situs of an interest in a partnership is the place where the partnership business is carried on.<sup>205</sup> I refer to that as the “**place-of-business situs test**”.

On identifying the place where the partnership business is carried on, see 82.18.3 (Where is control/management).

What if a partnership carries on one business in two places? Dicey says: “Where the business is carried on in more than one country then it is submitted that the share is situate in the country where the headquarters of the business is to be found.”<sup>206</sup> HMRC agree. The Partnership Manual provides:

**PM274500 IHT: Situs of partnership interest** [Jul 2019]

... In relation to a partnership interest, situs will be in the jurisdiction in which the overall management and control of the business is exercised.

What if a partnership is carrying on *two* businesses in different places? This arose in *Beaver v Master in Equity*<sup>207</sup> where the partnership had three businesses, in London, Melbourne and Adelaide. The solution adopted was that the partnership businesses were situate in different places; the Melbourne business was therefore situate in the state of Victoria. The distinction between one single business and two (or more) separate businesses could be somewhat fragile. The issue will not often arise, except, possibly, in some tax planning contexts.

### 97.33.2 *Partnership holding land*

This section considers the position where partnership assets consist of or include land.

---

205 See *Laidlay v Lord Advocate* (1890) 15 App Cas 468, a Scots case concerning an English partnership (see p.480). This was followed in *Commissioner of Stamp Duty v Salting* [1907] AC 449, an Australian case concerning an English or New South Wales partnership (the court did not ask which, no doubt it would make no difference).

206 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 22-049 (Shares in a partnership business).

207 [1895] AC 251.

Dicey states (tentatively) that “A share in land belonging to the partnership may however be situate where the land is situated.”<sup>208</sup> But there is only one case which takes that view. It is wrong in principle as a partnership share is one asset. “An interest in a partnership is not to be fragmented into as many different interests as the partnership has assets with the consequence that each fragment should be treated as located where the asset with which it is concerned might happen to be”.<sup>209</sup> It is also out of line with the authorities. The law is correctly stated in *Livingston v Commissioner of Stamp Duties*.<sup>210</sup>

the local situation of the interest in the partnership as a whole being considered in law to be where the business is carried on, so also is the partner’s interest in a partnership asset:<sup>211</sup> it occurred to no one to distinguish for the purposes of locality between the interest in the partnership and the interest in the assets; and indeed in *Beaver v Master in Equity* the emphasis given by the Privy Council to the fact that the business of the partnership in Melbourne was a distinct business from others which the partnership carried on in London and Adelaide indicates that the partner’s interest in the Melbourne assets would not have been treated as situate there if there had been only a single business and that had been carried on in London. There is a case in the Supreme Court of Canada in which the contrary view was taken by a majority of the Court, but, with respect, I would prefer the dissenting judgment of Anglin J: *Boyd v AG for British Columbia*<sup>212</sup>.

This is consistent with the rule that even if partnership assets include land, a partnership share is classified as:

---

208 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 22-049 (Shares in a partnership business). Dicey cites: *Boyd v AG for British Columbia* (1916) 54 SCR 532; *Haque v Haque (No. 2)* (1965) 114 CLR 98 but the majority in *Haque* do not support Dicey’s view.

209 *Haque v Haque (No 2)* [1965] HCA 38; (1965) 114 CLR 98 at [2].

210 High Court of Australia, 107 CLR 411, at [14].

211 The Court referred to: *In the Goods of Ewing* (1881) 6 PD 19, at p.23, *Laidlay v Lord Advocate* (1890) 15 App Cas 468, *Beaver v Master in Equity* [1895] AC 251 and *Stamp Duties Commissioner v Salting* [1907] AC 449.

212 (1917) 36 DLR 266.

- (1) moveable (not immovable) property<sup>213</sup> and  
 (2) personal (not real) property.<sup>214</sup>

The position is perhaps even clearer for a Scots partnership, under which the partners have no direct proprietary interest in the partnership assets.

HMRC agree.<sup>215</sup> The rule may work in favour of HMRC, in that a UK situate partnership with foreign land is a UK situate asset.

If the partnership business is letting land in the UK, it will be a business carried on in the UK and so the partnership interest is UK situate. If that is right, partnerships (unlike companies) cannot easily be used to transfer situs of property outside the UK.

It follows that the existence of a partnership may be important for situs, as the interest of a co-owner of land (in the absence of partnership) is situate where the land is situate. If what purports to be a partnership merely allows a partner to occupy the land, there is no business and so the arrangement does not constitute a valid partnership (which requires a business).<sup>216</sup>

### 97.33.3 *Situs of LLP*

An LLP is a body corporate. The situs of a member's interest in an LLP for

213 *Re Stokes* (1890) 38 WR 535, 62 LT 176, 6 TLR 154; *Haque v Haque (No 2)* [1965] HCA 38; (1965) 114 CLR 98 Menzies J at [2] sets out the majority view.

214 Until 1996 it was clear that a partnership interest was personal (not real) property, as there was a common law rule to that effect. The rule applied for fiscal purposes: *Forbes v Steven* (1870) LR 10 Eq 178. The rule was codified in s.22 Partnership Act 1890. The Trusts of Land and Appointment of Trustees Act 1996 misguidedly repealed s.22 in England, leaving English law confused but probably unaltered. (Section 22 continues to apply in Scotland). But whatever the effect (if any) of the repeal of s.22, it does not affect situs.

215 HMRC, "Technical Briefing on Non Dom/IHT Residential property changes" (2015) provides: "The government intends to amend the rules on excluded property so that trusts or individuals owning UK residential property through an offshore company, *partnership* or other opaque vehicle, will pay IHT on the value of such UK property..."

<https://www.gov.uk/government/publications/technical-briefing-on-foreign-domiciled-personsinheritance-tax-residential-property-changes/technical-briefing-on-foreign-domiciled-personsinheritance-tax-residential-property-changes>

This amendment was subsequently made; see 88.4 (Residence-partnership).

216 See 82.11.2 (Partnership holding land).

the purposes of private international law will be determined by the rules applying to companies.

For IHT, however, s.267A IHTA provides:

For the purposes of this Act and any other enactments relating to inheritance tax—

- (a) property to which a limited liability partnership<sup>217</sup> is entitled, or which it occupies or uses, shall be treated as property to which its members are entitled, or which they occupy or use, as partners...

A foreign LLP is not an LLP for this purpose<sup>218</sup> and references to an LLP in the discussion here are to a UK LLP.

Section 267A deems the LLP's property to be property to which its members are entitled *as partners*. It does not deem the members to be directly entitled to the assets: it puts an LLP in the same position as a general partnership. CIOT correctly say:

The general intention of s.267A IHTA 1984 would appear to be to treat LLPs as though they were general partnerships for IHT purposes, and the wording of the section would seem to be sufficiently clear to achieve this.<sup>219</sup>

It follows that (for IHT) the place-of-business situs test determines the situs of an interest in an LLP, as for a general partnership. The same applies for IT.<sup>220</sup>

The place-of-business situs test does not work if the partners are not carrying on a business. In the case of a general partnership, this situation cannot arise. A partnership only exists while partners are carrying on a

217 For the meaning of “limited liability partnership” see 82.20.1 (Definition and nature of LLP).

218 See 82.20.1 (Definition and nature of LLP); 86.28 (Foreign LLP).

HMRC agree: See ICAEW Tax Faculty, CIOT and STEP, “IHT Business Property Relief – Interests in Partnerships/LLPs and Surplus Cash Holdings” (2014) para 15: “We confirm that s.267A IHTA 1984 relates solely to UK LLPs.”

<https://www.icaew.com/restrictedmedia?mediaItemId=4aed2a6e-ed18-40ae-be24-83d1d761d297>

ICAEW ref: TECH 01/14 TAX

219 See 82.20.1 (Definition of LLP).

220 See 82.21.1 (Income tax treatment of LLP).

business. If they are not doing that, there is no partnership.<sup>221</sup> the arrangement is classified as joint ownership. An LLP which is not carrying on a business is still an LLP. It is considered that for IHT purposes the members are then treated as joint owners.

The IHT Manual provides:

**IHTM25094 Limited liability partnerships** [May 2020]

... [1] The effect of [s.267A] is that we look through LLPs so that they will be treated in the same way as traditional partnerships. The result of this is that:

- Where a traditional partnership incorporates itself as a LLP, a partner's period of ownership for the purposes of qualifying for business (or agricultural) relief will not be regarded as being interrupted.
- The normal reliefs and exemptions available to partners in a traditional partnership will also be available to members of a LLP...

[2] A further change is that an interest in a LLP is deemed to be an interest in each and every asset of the partnership, while an interest in a traditional partnership is a 'chose in action', valued by reference to the net underlying assets of the business.

[3] This may require you to consider issues of situs of assets. In cases of doubt refer to Technical for advice.

Paragraph [2] is terse. It floats the suggestion that an LLP is treated as co-ownership (rather than partnership) for IHT purposes, specifically for valuation, and (logically) for other purposes. But that is wrong and in practice HMRC do not apply that approach in relation, for instance, to BPR (which is considered later in the same paragraph of the Manual). I would be surprised if HMRC seriously argue that the test for situs of an interest in an LLP is different from the test for situs of an interest in a general partnership; I do not think that para [3] should be read as expressing a view on that question, beyond the instruction to refer difficulties on to TG.

### 97.34 Situs of pension and death benefits

Death in service benefits payable in respect of service under the Crown, local authorities or overseas governments are generally payable at discretion and so not liable to IHT. However the situs does matter in the

---

221 See 82.5.1 ("Business").

exceptional case where the benefit is an asset in the estate of the deceased. Section 153 IHTA provides:

- (2) For the purposes of this Act—
- (a) a pension paid under the authority of a scheme made under section 2 of the Overseas Pensions Act 1973 which
    - [i] is constituted by the Pensions (India, Pakistan and Burma) Act 1955 or
    - [ii] is certified by the Secretary of State for the purposes of this section to correspond to the said Act of 1955shall be treated as if it had been paid by the Government of India or the Government of Pakistan (according as the arrangements in pursuance of which the pension was first paid under the said Act of 1955 were made with the one or the other Government);
  - (b) a pension paid out of any fund established in the UK by the Government of any country which, at the time when the fund was established, was, or formed part of, a colony, protectorate, protected state or UK trust territory shall, if the fund was established for the sole purpose of providing pensions, whether contributory or not, payable in respect of service under the Government be treated as if it had been paid by the Government by which the fund was established;
  - (c) a pension paid out of the Central African Pension Fund established by section 24 of the Federation of Rhodesia and Nyasaland (Dissolution) Order in Council 1963 shall be treated as if it had been paid by the Government of a territory outside the UK; and
  - (d) so much of any pension paid to or in respect of any person under—
    - (i) the scheme which by virtue of subsection (3) of section 2 of the Overseas Pensions Act 1973 is constituted under that section by section 2 or subsection (2) of section 4 of the Overseas Service Act 1958 or
    - (ii) such other scheme made under section 2 of the Overseas Pensions Act 1973 as is certified by the Secretary of State for the purposes of the Taxes Act to correspond to section 2 or subsection (2) of section 4 of the Overseas Service Act 1958as is certified by the Secretary of State to be attributable to service under the Government of an overseas territory shall be treated as if it had been paid by the Government of that territory.
- (3) ... for the purposes of subsection (2) above—

- (a) “pension” includes a gratuity and any sum payable on or in respect of death, and a return of contributions with or without interest thereon or any other addition thereto;
  - (b) “UK trust territory” means a territory administered by the Government of the UK under the trusteeship system of the United Nations;
  - (c) “overseas territory” means any country or territory outside the UK;
  - (d) references to the Government of any such country or territory as is mentioned in paragraph (b) or (d) of that subsection include a Government constituted for two or more such countries or territories and any authority established for the purpose of providing or administering services which are common to, or relate to matters of common interest to, two or more such countries or territories.
- (4) If, by reason of Her Majesty’s Government in the UK having assumed responsibility for a pension, allowance or gratuity within the meaning of section 1 of the Overseas Pensions Act 1973 payments in respect of it are made under that section, this section shall apply in relation to the pension, allowance or gratuity, exclusive of so much (if any) of it as is paid by virtue of the application to it of any provisions of the Pensions (Increase) Act 1971 or any enactment repealed by that Act, as if it continued to be paid by the Government or other body or fund which had responsibility for it before that responsibility was assumed by Her Majesty’s Government in the UK.

The important effect of this is that the pension (defined to include a death benefit) is not UK situate if it is treated as payable by a foreign government. The IHT Manual provides:

**IHTM17058 Pensions: IHT charges: Crown, local authorities and overseas governments** [May 2020]

Death in service benefits payable in respect of service under the Crown, local authorities or overseas governments are generally (but not always) payable at the discretion of the pension provider (IHTM17051), so they are not liable to Inheritance Tax.

The following guidance is only general and will not cover every situation. Scheme rules may change and you should check the latest position or ask for advice from Technical. ...

**Overseas Service**

Sums payable on death to personal representatives by way of return of

subscriptions under the regulations of:

- the Indian Military Widows and Orphans Fund;
- the Superior Services (India) Family Pension Fund
- the Indian Military Service Family Pensions Fund; and
- the Indian Civil Service family pension fund

Are not included as part of the estate (IHTA84/S153 (1)).

A lump sum payable on death to personal representatives under a scheme constituted under the Pensions (India, Pakistan and Burma) Act 1955 or a corresponding scheme (a foreign asset by virtue of S153 (2)(a) is part of the estate if the deceased died domiciled (IHTM13000) in the UK. It is excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.

Benefits payable to personal representatives as of right on death of a Colonial Government servant (a foreign asset under S153 (2)(b) are part of the estate if the deceased died domiciled in the UK). They are excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.

Benefits payable under s.1 Overseas Pensions Act 1973 other than 'statutory increases' thereof (a foreign asset by virtue of S153 (4) and S153 (2)(b)) are part of the estate if the deceased died domiciled in the UK. They are excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.

Benefits payable out of the Central African Pension Fund (a foreign asset by virtue of S153 (2)(c)) are part of the estate if the deceased died domiciled in the UK. They are excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.

Lump sum payable on death to personal representatives as of right under a scheme constituted under the Overseas Service Act 1958, or a corresponding scheme (a foreign asset by virtue of S153 (2)(d)) are part of the estate if the deceased died domiciled in the UK. They are excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.

## **97.35 Cryptoassets**

### *97.35.1 What cryptoassets are*

Cryptoassets Taskforce Final Report provides:

2.10 There is not a single widely agreed definition of a cryptoasset. Broadly, a cryptoasset is a cryptographically secured digital representation of value or contractual rights that uses some type of DLT

[Distributed ledger technology] and can be transferred, stored or traded electronically. Examples of cryptoassets include Bitcoin and Litecoin (and other ‘cryptocurrencies’), and those issued through the Initial Coin Offering (ICO) process, often referred to as ‘tokens’. The market is constantly evolving, with new and different cryptoassets being developed and around 2000 currently in existence.

2.11 The Taskforce considers there to be three broad types of cryptoassets:

**A. Exchange tokens** – which are often referred to as ‘cryptocurrencies’ such as Bitcoin, Litecoin and equivalents. They utilise a DLT platform and are not issued or backed by a central bank or other central body. They do not provide the types of rights or access provided by security or utility tokens, but are used as a means of exchange or for investment.

**B. Security tokens** – which amount to a ‘specified investment’ as set out in the Financial Services and Markets Act (2000) (Regulated Activities) Order. These may provide rights such as ownership, repayment of a specific sum of money, or entitlement to a share in future profits. They may also be transferable securities or financial instruments under the EU’s Markets in Financial Instruments Directive II (MiFID II).

**C. Utility tokens** – which can be redeemed for access to a specific product or service that is typically provided using a DLT platform.

...

2.13 While cryptoassets can be used as a means of exchange, they are not considered to be a currency or money, as both the Bank of England and the G20 Finance Ministers and Central Bank Governors have previously set out. They are too volatile to be a good store of value, they are not widely-accepted as means of exchange, and they are not used as a unit of account.<sup>222</sup>

### 97.35.2 *Crypto situs: Underlying asset*

HMRC guidance is in the Crypto Manual.<sup>223</sup> This provides:

---

222 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/752070/cryptoassets\\_taskforce\\_final\\_report\\_final\\_web.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/752070/cryptoassets_taskforce_final_report_final_web.pdf) (2018) See too UK Jurisdiction Taskforce, “Legal statement on cryptoassets and smart contracts” (2019)

[https://35z8e83m1ih83drye280o9d1-wpengine.netdna-ssl.com/wp-content/uploads/2019/11/6.6056\\_JO\\_Cryptocurrencies\\_Statement\\_FINAL\\_WEB\\_111119-1.pdf](https://35z8e83m1ih83drye280o9d1-wpengine.netdna-ssl.com/wp-content/uploads/2019/11/6.6056_JO_Cryptocurrencies_Statement_FINAL_WEB_111119-1.pdf)

223 Guidance was formerly in a paper entitled “Cryptoassets: tax for individuals” (Dec 2019) which is now of historical interest only.

**CRYPTO22600: Determining the location of exchange tokens [Apr 2021]**

**...Underlying Asset**

... Where the cryptoasset is simply a digital representation of an underlying asset then the location of the underlying asset will determine the location of the cryptoasset.

**Example**

ABC Ltd buys and sells gold bullion on behalf of clients. ABC Ltd issues the GoldABC Coin where each token represents the beneficial interest in one gold bar. The GoldABC Coin is a digital representation of a physical asset – the gold bar – and we ‘look through’ the GoldABC Coin and establish the location of the GoldABC Coin by reference to the underlying asset, being gold bar.

It is possible for a cryptoasset to be a digital representation of another intangible asset, such as share capital or debt, and the relevant rule for determining the location of the underlying asset would determine the location of the cryptoasset.

More analytically, in this case there is no crypto asset.

97.35.3 *Crypto asset situs*

The Crypto Manual continues:

**No Underlying Asset**

Where the cryptoasset is an asset distinct from any underlying asset then HMRC’s view is that none of the statutory rules in the TCGA 1992 apply.

So the common law rules situs apply to CGT and IHT.

Instead it is HMRC’s view that:

- exchange tokens have an economic value as they can be ‘turned to account’ - for example, exchanging them for goods, services, fiat currency or other tokens;
- exchange tokens are a new type of intangible asset (different to other types of intangible assets, such as shares or debentures); and
- the only identifiable party to consider is the beneficial owner of the exchange token,

such that the location of the cryptoasset will be determined by the residency of the beneficial owner

Using the residency of the beneficial owner of the exchange tokens to

determine the location gives a clear, logical, predictable and objective rule which can be easily applied. This means that a person who holds exchanges tokens is liable to pay UK tax if they are a UK resident (as determined by the Statutory Residence Test, see RDRM11000) and carry out a transaction with their tokens which is subject to UK tax.

If an exchange token is co-owned between two or more beneficial owners, then section 275C Taxation of Chargeable Gains Act 1992 applies (for Capital Gains Tax).<sup>224</sup> Each beneficial owner's interest in the asset will be where that beneficial owner is resident. If one or more of the co-owners are UK resident, this will not affect the location for those co-owners who are not UK residents.

For Inheritance Tax, common law is relevant to the extent that Double Taxation Agreements do not determine the location (section 158 of the Inheritance Tax Act 1984).

Where the location of cryptoassets are being considered please make a referral by following the process at CRYPTO100500.

The Manual proposes the SRT test of residence, but that test applies for limited tax purposes. For instance, it does not apply to trustees. Situs is a general law concept. It is considered that the residence test should be the same as for debts, ie residence here means jurisdiction-residence.<sup>225</sup> But that will usually give the same result.

The Manual does not consider the position where a person is dual-resident; a tie-breaker test of chief residence would be appropriate.

To avoid UK situs for IHT purposes, a UK resident foreign domiciliary should generally hold cryptoassets through a non-resident trust, company or partnership.

However, Ceri Davis records another view:

In *Ion Science Ltd v Persons Unknown*, [unreported, 21 December 2020] the court considered the *lex situs* of cryptoassets and stated that it is the place where the person or company who owns it is domiciled.<sup>226</sup>

It would be strange if the situs test should depend on domicile, when other

---

224 See 98.3 (Co-owned assets).

225 See 97.12.1 (Meaning of "residence").

226 Davis, "Cyber law: language matters" 171 NLJ 7938, p13. "*Ion Science* is said to follow the view of Prof Dickinson in Fox & Greed (eds) *Cryptocurrencies in Public and Private Law* (1<sup>st</sup> ed, 2019), chap 5 (Cryptocurrencies and the Conflict of Laws).

situs tests use the concept of jurisdiction-residence. But further comment will have to wait until the case is final, and reported.

STEP suggest another view.<sup>227</sup>

a case could be made for allocating the location of cryptocurrency to the place where it can effectively be dealt with

“A case could be made” is somewhat tentative guidance. But adopting that test, where can cryptoassets be dealt with?

it can only be dealt with by the use of the private key and, arguably, its location should therefore be linked to the location

[1] of the private key or

[2] of the person who has control of the private key (who may or may not be the beneficial owner).

As to [1], the private key is a code, which does not have an obvious location. In principle the beneficial owner will have control of the key. So that takes us back to the location (ie, I assume, residence) of the beneficial owner.

The position will be different when cryptoassets are pooled. The position then would be analogous to unit trusts<sup>228</sup> or intermediated securities.<sup>229</sup>

#### 97.35.4 *Cryptoasset derivatives*

The Crypto Manual continues:

**CRYPTO10150: Derivatives over cryptoassets [Apr 2021]**

A derivative is a financial instrument where the performance is based on the movement of the price of the underlying asset. Under a derivative the holder does not hold the underlying asset. Some businesses offer the ability for individuals and companies to gain exposure to the movements in the cryptoasset market by using a derivative.

The nature of a derivative is typically very different to directly holding a cryptoasset. In particular, a derivative will give rise to contractual rights and obligations between the two parties. As a result, where a

[https://www.step.org/system/files/media/files/2021-09/step\\_note\\_location\\_of\\_cryptocurrencies-an\\_alternative\\_view\\_0.pdf](https://www.step.org/system/files/media/files/2021-09/step_note_location_of_cryptocurrencies-an_alternative_view_0.pdf) (Sep 2021)

228 See 66.8 (Situs of unit).

229 See 67.3 (Transparent intermediated security: Situs for IHT/IT).

cryptoasset derivative has been entered into the guidance in this manual will not generally apply.

Where a company enters into a derivative over a cryptoasset this will typically constitute a ‘derivative contract’ within Part 7 of CTA09...

### **97.36 Reform of IHT/CGT situs rules**

Amendment of situs rules for IHT purposes is difficult because of the problem of double inheritance taxation. To the extent that different states adopt the same common law situs rules, they effectively prevent double taxation which otherwise arises if state A regards an asset as situate in state A for IHT purposes and state B regards the same asset as situate in state B. That explains why in 1974 CTT (now IHT) adopted the common law situs rules and not the CGT statutory situs rules. The disparities between CGT and IHT situs are not accidental.<sup>230</sup>

The reform to improve the position would be to treat all assets other than UK land and securities as non-UK situate for the purposes of IHT (and also CGT). That would be a simplification and it is most unlikely that the IHT (or CGT) charge on such assets of foreign domiciliaries brings in any significant tax. There is a precedent in the abolition of stamp duty on UK situate property (other than securities and land).

---

230 It could of course arise that state A regards an asset as situate in state A for CGT purposes and state B regards the same asset as situate in state B; however that is not likely to cause problems in practice, because (in short): (1) a non-resident does not usually pay CGT so double capital gains taxation does not usually arise; (2) a DTA following OECD Model convention will normally resolve the problem if it does arise.

## CHAPTER NINETY EIGHT

# SITUS OF ASSETS FOR CGT

### 98.1 Asset situs for CGT: Introduction

#### Cross references

The following topics are considered elsewhere:

- 66.8.2 (Situs of unit for CGT)
- 67.1 (Securities law background) - Intermediated securities
- 82.19 (Partnership transparency: CGT)
- 97.35.3 (Crypto asset situs)
- 97.11 (International organisation security)

### **98.1 Asset situs for CGT: Introduction**

This chapter deals with situs of assets for CGT. Strictly one should not refer to situs in the abstract, but to situs for a specific purpose (CGT, IHT, or whatever): see 97.1 (Concepts of situs). But the context may supply the reference, and in this chapter references to situs means situs for CGT purposes.

### **98.2 “Shares” and “debentures”**

The CGT situs rules make specific provision for shares and debentures, so it is necessary to consider the meaning of these terms.

The meaning of debenture is particularly important, because there is an significant distinction for CGT situs between:

- (1) Debts which are not debentures, whose situs is generally the residence of the creditor.<sup>1</sup>
- (2) Debts which are debentures, whose situs is:
  - (a) UK if issued by UK incorporated company, or

---

<sup>1</sup> See 98.9 (Debt situs rule).

- (b) if registered and issued by a non-UK incorporated company, the place of the register.

There are two statutory provisions which relate to the definitions but they are of limited scope. It is convenient to mention them first to clear them out of the way.

### 98.2.1 *No share capital*

Section 275(2)(a) TCGA provides:

In subsection (1) above—

- (a) in paras (d), (da) and (e), the references to shares or debentures, in relation to a company that has no share capital, include any interests in the company possessed by members of the company

...

In UK company law, the only significant type of company with no share capital is a company limited by guarantee. There are also foreign entities which are classified as companies for tax purposes which have no share capital, but I cannot think of any to which s.275(2)(a) is likely to be significant.

So far as it concerns *shares* the rule makes sense. In particular, the effect is that “shares” includes the interest of members of a guarantee company. In practice the situs of interests in guarantee companies will rarely if ever arise. A provision of this kind is quite common in tax.<sup>2</sup> The rule was enacted in other areas to prevent avoidance and perhaps the drafter put it in here without much thought as to whether it was actually needed.

The reference to *debentures* is otiose. A debenture is a right against the company, not an interest in the company. Whether a company has share capital is (in the absence of the definition) important in deciding whether an asset is a “share” but it is irrelevant in deciding whether an asset is a “debenture”. In practice it does no harm.

### 98.2.2 *Securities of non-company*

Section 275(2)(b) TCGA provides:

---

<sup>2</sup> There are too many to list; see for instance s.135(4)(5) TCGA.

in paras (d) and (e), the references to debentures, in relation to a person other than a company, include securities.

This assumes that (in the absence of this definition) securities issued by a non-company would not be, or may not be, debentures. I think that is doubtful. The term “debenture” is normally used in the context of companies, but the concept is not restricted to companies.<sup>3</sup>

Section 275(1)(d) refers to debentures issued by a government authority.<sup>4</sup> Treasury gilts, though “securities”, are not normally called “debentures” so perhaps the provision is useful to avoid doubt.

Similarly, other non-companies, such as trusts or individuals, can in theory issue “securities” and if such assets might not be regarded as “debentures” then this provision could be needed.

Even if unnecessary, this provision does no harm.

### 98.2.3 Security/debenture distinction

Before 2005 the legislation referred to “securities” where it now has the word “debentures.” HMRC explained the reason for the change:

The scope of the existing rules in s 275 which apply in relation to securities will be extended so that they apply in relation to debentures - this means, for example, that ... all registered debentures (rather than just those which are securities) of a company which is not incorporated in the UK will be treated as being situated where they are registered ...<sup>5</sup>

HMRC were concerned that there might be a debenture which was not a security. One might have thought that a debenture must necessarily be a security.<sup>6</sup> Perhaps the point is that a “security” in the expression “debt on a security (within the s.132 definition)” must be marketable; a debt which

---

3 See Gower and Davies, *Principles of Modern Company Law* (7<sup>th</sup> ed., 2003), p.806: “The word “debenture” is not restricted to securities of companies or bodies corporate. Clubs not infrequently issue debentures and the name may even be applied to bonds issued by an individual; eg to those issued by the Tichborne Claimant...”

This passage is not in the current edition but the point is sound.

4 See 98.4 (Municipal/government security).

5 BN 36, 16 March 2005.

6 Contrast s.738 CA 2006: “In the Companies Acts “debenture” includes debenture stock, bonds and any other securities of a company...”

is not assignable, or which is repayable on demand, is not a “debt on a security” as it is not marketable.<sup>7</sup> A debenture might be unmarketable and so not a security in that sense, and so perhaps not a security for the purpose of the pre-2005 situs rules.<sup>8</sup>

The reform raises the question of whether a corporate debt could be a security but not a debenture; if there were such an asset the effect of the 2005 reform was to take it outside the scope of the statutory situs rules applicable to debentures, which was not intended! The better view is that any registered debt security is a debenture so this problem does not arise.

#### 98.2.4 “*Debenture*”

In the absence of special context, the word “debenture” should be given its normal meaning. It is wide and vague:

If we begin by asking what the word “debenture” means, apart from any definition, the reply must be that it has no precise meaning. Chitty J. observed<sup>9</sup> that the word “means a document which either creates a debt or acknowledges it, and any document which fulfills either of these conditions is a debenture.” ... Sir Nathaniel Lindley had previously stated simply, “What the correct meaning of ‘debenture’ is I do not know”.<sup>10</sup> In *Lemon v Austin Friars Investment Trust*<sup>11</sup>, the same ignorance was professed in the Court of Appeal. Warrington LJ in particular, after observing that it had been said “by a wiser man than himself” that it was impossible to give an exhaustive definition of the word “debenture,” went on to remark that he did not propose to incur the reproach of venturing where wise men fear to tread. The textbooks are agreed at least in this that no accurate definition of the word can be found.<sup>12</sup>

Company law draws a distinction between an ordinary debenture and

---

7 See App.2.12.4 (Marketability).

8 The concern that a debenture may not be a “security” (within the s.132 definition) is also found in s.251(6) TCGA: “... a debenture ... shall be deemed to be a security (as defined in section 132) ...”

9 *Levy v Abercorris Slate and Slab Co* (1887) 37 Ch D 260.

10 *British India Steam Navigation Co v IRC* (1881) 7 QBD 165.

11 [1926] 1 Ch 1.

12 *Knightsbridge Estates Trust v Byrne* [1940] 1 AC 613 at p.621, approved *Fons HF v Corporal* [2015] 1 BCLC 320.

debenture stock:

Debenture stock is merely borrowed capital consolidated into one mass for the sake of convenience. Instead of each lender having a separate bond or mortgage, he has a certificate entitling him to a certain sum, being a portion of one large loan; and generally debenture stock differs from a debenture in form rather than in substance.<sup>13</sup>

No-one doubts that debenture stock is within the general meaning of “debentures”.

In this chapter, I use the word “**securities**” to mean either shares or debentures.

### 98.3 Co-owned assets

Section 275C(1) TCGA provides:

This section applies for determining for the purposes of this Act—  
(a) the situation of an interest (see subsection (4)) in an asset, or  
(b) whether the situation of an interest in an asset is in the UK.<sup>14</sup>

“Interest” is normally a wide term, but s.275C(4) defines it narrowly:

In this section “interest”, in relation to an asset, means an interest as a co-owner of the asset (whether the asset is owned jointly or in common and whether or not the interests of the co-owners are equal).

I refer to this as a “**co-ownership interest**”. Section 275C applies to co-owned assets of all kinds but the most important cases are co-owned securities and debts.

Section 275C goes on to lay down two rules which govern situs of co-ownership interests:

- (2) The situation of the interest in the asset shall be taken to be the same as the situation of the asset, as determined in accordance with subsection (3) below.
- (3) The situation of the asset for the purposes of subsection (2) above shall be determined on the assumption that the asset is wholly-owned by the person holding the interest in the asset.

---

<sup>13</sup> *Re Herring* [1908] 2 Ch 493 at p.497.

<sup>14</sup> Paragraph (b) is otiose since the matter is fully covered by (a); but it does not matter.

I refer to these as “**co-ownership situs rules**”.

At first sight it is hard to see the point of these rules. If an asset is situate in a jurisdiction, one would expect a co-ownership interest to be situate in the same place and a statutory provision to that effect seems unnecessary. But s.275 stipulates the situs of shares, debentures, debts, etc and it might be argued that a person who owns a co-ownership interest in a share, debenture, debt, etc does not own a share, debenture, debt, etc; so it might be argued that these statutory situs rules do not apply to co-ownership interests. Hence s.275C(2) has a role to play.

Section 275C(3) is relevant where situs depends on the residence of the owner and the asset is co-owned. For instance, if a debt or a ship or a cryptoasset is jointly owned by two persons, one UK resident and one non-resident, the interest of the UK resident is regarded as UK situate and the interest of the non-resident is regarded as non-UK situate.

The CG Manual provides:

**CG12470 interests of co-owners** [Jul 2019]

...Assets held by a partnership, in which the partners therefore each have an interest, are within the scope of this provision.

## 98.4 Municipal/government security

Section 275(1)(d) TCGA provides:

shares or debentures<sup>15</sup> issued by any municipal or governmental authority, or by any body created by such an authority, are situated in the country of that authority.

The CG Manual provides:

**12440 Location of assets: Shares and securities** [Jul 2019]

[The Manual sets out s.275(1)(c) and continues:] This applies to shares and securities issued by such bodies whether they are in registered form or in bearer form. ...

## 98.5 Securities of UK company

Section 275(1)(da) TCGA provides:

Subject to para (d) above, shares in or debentures of a company

---

15 For the meaning of “debentures” see 98.2.2 (Securities of non-company).

incorporated in any part of the UK are situated in the UK.

This rule prevents planning under which remittance basis taxpayers used to turn UK situate assets (securities in UK incorporated companies) into non-UK situate assets, by converting them to bearer securities or by foreign share registers.<sup>16</sup> There is still scope for planning if action is taken at the time the company is set up (rather than at the time of disposal).<sup>17</sup>

## 98.6 Registered security: Non-UK co

Section 275(1)(e) TCGA provides:

subject to paras (d) and (da) above, registered shares or debentures are situated where they are registered and, if registered in more than one register, where the principal register is situated.

This applies to shares/debentures of foreign incorporated companies but not UK incorporated companies. It (more or less) restates the common law rule.<sup>18</sup>

The CG Manual provides:

### **12440 Types of asset (2): Shares and securities etc [Jul 2019]**

#### *Shares and securities*

...Registered shares and securities<sup>19</sup> other than those dealt with in the previous two paragraphs are situated where they are registered. This will normally be in the country where the company was incorporated. If they are registered on more than one register then they are located where the principal register is located, Section 275(1)(e) TCGA 1992. Which register is the principal register is a question of fact.

## 98.7 Bearer shares

Bearer shares of non-UK incorporated companies are governed by the common law rule.<sup>20</sup> They are situate where the document is situate.

---

16 The spur to the 2005 reform was probably *Chandrasekaran v Deloitte & Touche* [2004] EWHC 1378 which discussed and raised awareness of this planning.

17 See 98.24.4 (UK resident, non-UK situs).

18 See 97.5 (Situs of registered shares).

19 Following the 2005 reforms, the reference to securities should strictly read “debentures” as that is now the statutory term. But it makes no difference.

20 See 97.7 (Bearer and negotiable instruments).

## 98.8 Bearer debenture: Non-UK co

What is the position for bearer debentures? Unless one of the statutory situs rules applies, the common law rule will apply and the debenture will be situate where the document is situate.

Debentures are normally registered or bearer. If not registered or bearer, they are at least negotiable and treated in the same way as bearer debentures. If neither bearer nor negotiable, the debt is not likely to be a debenture.

Two statutory rules need consideration: the debt situs rule and the UK-law rule.

### 98.8.1 *Does debt situs rule apply*

Section 275(1)(c) TCGA (the debt situs rule) provides:

subject to the following provisions of this subsection, a debt, secured or unsecured, is situated in the UK if and only if the creditor is resident in the UK.<sup>21</sup>

Debenture stock is not a debt<sup>22</sup> so the debt situs rule does not apply to debenture stock.<sup>23</sup>

An ordinary debenture (not debenture stock) is a debt in the normal sense of the word. At first sight it seems that the debt situs rule applies, so a bearer debenture is situate where the creditor is resident. If that were right the situs of the document of a bearer debenture would never determine situs. However it is considered that the context of s.275, the reference to a debt in the debt situs rule means a simple debt and not a debenture. The debt situs rule does not apply to any debentures.

HMRC agree. The CG Manual provides:

---

21 See 98.9 (Debt situs rule).

22 For the meaning of “debenture stock” see 98.2.4 (“Debenture”). A person who holds debenture stock is not a creditor: *Re Dunderland Iron Ore* [1909] 1 Ch 446. So the asset is not a “debt”.

23 Against this, it might be argued that the co-ownership situs rule applies so the situs of the debenture stock is the situs of the underlying debenture. But it is considered that (1) the co-ownership situs rule does not apply in this case and (2) even if it does, the situs of the underlying debenture is not governed by the debt situs rule as the underlying debenture is not a debt for the purposes of that rule.

**CG12440 Types of asset (2): Shares and securities etc [Jul 2019]***Shares and securities*

... The location of bearer securities issued by any body other than

- a municipal or governmental authority or
- any body created by such an authority, or
- a company incorporated in the UK

is not covered by a specific capital gains rule. Therefore it has to be decided in accordance with general law, see CG12420-CG12421. General law provides that such securities are located where the certificate is located. As for chattels, the location can change if the certificate is moved in or out of the UK.

**98.8.2** *Does UK-law rule apply*

A debenture is an intangible asset and if it is “subject to UK law” (as widely defined) then in principle it appears that the UK-law rule applies, and the debenture will be UK situate.<sup>24</sup>

The CG Manual does not refer to the UK-law rule. One might argue that the reference to an intangible asset in s.275A means intangible assets other than debentures, in which case a debenture of a foreign incorporated company is not UK situate even if it is subject to UK law. This appears to be the HMRC view since the Manual passage above says that the location of bearer securities “is not covered by a specific capital gains rule”.

**98.8.3** *Planning*

Remittance basis taxpayers will generally avoid investing in debentures which are UK situate for CGT purposes. Non-UK incorporated companies who issue debentures and want their investors to include remittance basis taxpayers will in principle wish to ensure that their debentures should not be UK situate for CGT purposes.

To achieve this:

- (1) The debenture could be registered and the register kept outside the UK; in that case the position is clear.
- (2) The debenture could be a bearer instrument and
  - (a) kept outside the UK and

---

<sup>24</sup> See 98.13.4 (UK-law rule).

- (b) not “subject to UK law” (as defined) though that may not be necessary.

#### 98.8.4 *Security situs: Critique*

The combination of statutory and common law rules for securities of non-UK incorporated companies is intricate and sometimes impractical. It has never been thought through. It is suggested that *all* corporate securities should be situate in the place of incorporation of the company. That would be logical, and a simplification, with no loss of tax.

### 98.9 Debt situs rule

A debt is in some cases a chargeable asset for CGT, so its situs may be relevant for CGT. Section 275(1)(c) TCGA provides:

subject to the following provisions of this subsection, a debt, secured or unsecured, is situated in the UK if and only if the creditor is resident in the UK.

I refer to this as “**the debt situs rule**”. This reverses the common law rule (under which a simple debt is situate where the *debtor* is situate).

A debt is UK situate if the creditor is dual-resident.

This provision overrides the UK-law rule and common law rules such as the specialty rule and the bearer security rule. However, it is subject to the rules relating to:

- (1) debentures
- (2) judgment debts
- (3) bank accounts

### 98.10 Judgment debt

Section 275(1)(k) TCGA provides:

a judgment debt is situated where the judgment is recorded.

The CG Manual explains:

**12430 Types of asset (1): Land, tangible property and debts** [Jul 2019]

Judgment debts, that is, debts created by the judgments, decrees, etc, of courts of record, are located where the judgment is recorded, Section 275(1)(k) TCGA 1992.

Obtaining judgment may have the effect of changing situs.

### 98.11 Debt rules: Critique

The effect of the debt situs rule is generally<sup>25</sup> to disapply the CGT remittance basis for debts, because a debt owned by a remittance basis taxpayer is deemed UK situate so the gain from the debt is taxed on an arising basis. That is anomalous, counter-intuitive and a trap for the ill advised foreign domiciliary. I can see no good reason for the rule and it is suggested that s.275(1)(c) should be replaced by a statutory rule that a debt is situate where the debtor is resident (applying the UK tax definition of residence). This would bring CGT and IHT into line.

It is considered that there is no point in a separate rule for judgment debts, and s.275(1)(k) should be repealed. That would be a small but worthwhile simplification. The statutory rule is based on the common law rule, but that is no reason to retain it.

But the best solution is to look at the wider picture altogether: treat all assets other than UK land and securities as non-UK situate for the purposes of IHT and CGT.<sup>26</sup> The debt situs rule and judgement debt rule would fall by the wayside.

### 98.12 Bank account

A foreign currency bank account is not normally a chargeable asset for CGT<sup>27</sup> so the question of situs does not normally arise.

If it mattered, s.275(1)(l) TCGA provides:

a debt which—

- (i) is owed by a bank, and
  - (ii) is not in sterling, and
  - (iii) is represented by a sum standing to the credit of an account in the bank of an individual who is not domiciled<sup>28</sup> in the UK,
- is situated in the UK if and only if

25 An exception is if the individual disposes of the debt while temporarily non-resident.

26 See 97.36 (Reform of IHT/CGT situs rules).

27 See 91.10 (Foreign currency bank account: CGT).

28 Section 275(3A) TCGA provides: “Section 835BA (deemed domicile) applies for the purposes of subsection (1)(l)(iii).” This is the standard wording to apply the deemed domicile rules.

- [a] that individual is resident in the UK and
- [b] the branch or other place of business of the bank at which the account is maintained is itself situated in the UK.

In short, for UK resident foreign domiciled individuals, the situs of a foreign currency account is the situs of the branch. This restates the common law rule for bank accounts; it is needed because without this provision the situs of the account would be the residence of the creditor (ie the account holder). In cases where the conditions (i), (ii) and (iii) are not all satisfied, the usual CGT debt rule applies.

Section 275(1)(l) only applies to individuals' bank accounts. However the situs of a bank account held by a trust or a company does usually matter for CGT.<sup>29</sup>

### 98.13 UK-law rule

Section 275A TCGA provides a situs rule for intangible assets which I call “**the UK-law rule**”. It is convenient to deal with some definitions before turning to the rule itself.

#### 98.13.1 “Intangible asset”

Section 275A(2) TCGA provides a commonsense definition of “intangible asset”:

In this section “intangible asset” means—

- (a) intangible or incorporeal property and includes a thing in action, or
- (b) anything that under the law of a country or territory outside the UK corresponds or is similar to intangible or incorporeal property or a thing in action.

This includes policies and bonds, futures and options.

---

<sup>29</sup> If it did matter, the usual CGT debt rule would apply so all accounts held by a non-resident trust or non-resident company would be non-UK situate, as situs would depend on residence of the account holder. This means that UK services relating to the account qualify for foreign services relief under s.809W ITA. That could be important for a bank account held by a non-resident close company, which is a relevant person, but in practice the point will rarely if ever arise as such a company would not normally use a UK account.

### 98.13.2 *Situs otherwise undetermined*

Section 275B(1) TCGA provides a commonsense explanation of “not otherwise determined”:

For the purposes of section 275A, the situation of an asset is not otherwise determined if, apart from that section, this Act does not make any provision for determining—

- (a) the situation of the asset, or
- (b) whether the situation of the asset is in the UK.

Thus the statutory rules in s.275 TCGA have priority to the UK law rule. For instance, a debt held by a foreign creditor is not UK situate even if subject to UK law; an option to purchase a non-UK situate chattel is not UK situate, even if governed by UK law.<sup>30</sup>

### 98.13.3 “*Subject to UK law*”

The expression “subject to UK law” is widely defined in s.275B(2):

For the purposes of section 275A, an intangible asset is subject to UK law at a particular time if any right or interest which comprises or forms part of the asset is, at that time,—

- (a) governed by, or otherwise subject to, or
- (b) enforceable under,  
the law of any part of the UK.

Whether or not an asset is subject to UK law depends on the documentation. That will vary from case to case, but I understand that the position for some standard financial contracts is as follows.<sup>31</sup>

LIFFE FTSE 100 index future contracts are subject to UK (English) law.<sup>32</sup>

Eurex contracts and CME contracts are not subject to UK law. They are governed by German law<sup>33</sup> and US law.<sup>34</sup>

---

30 See 98.17 (Chattels).

31 I am grateful to Lindsay Pentelow of Mazars LLP for his research in this area.

32 See cl 13 of Exchange Contract 29, issue date 3 Sept 2007,

<https://globalderivatives.nyx.com/en/products/index-futures/Z-DLON/contract-specification>

33 See [https://www.eurexchange.com/blob/2388366/b3c7643200649756b237fc94ed46c2ae/data/appendix01\\_ab\\_2018\\_11\\_26.pdf](https://www.eurexchange.com/blob/2388366/b3c7643200649756b237fc94ed46c2ae/data/appendix01_ab_2018_11_26.pdf)

#### 98.13.4 *UK-law rule*

Section 275A(1)(3) TCGA need to be read together to follow the sense:

- (1) This section applies for the purpose of determining whether the situation of an intangible asset (“asset A”) is in the UK if the situation of asset A is not otherwise determined (see section 275B(1))...
- (3) If asset A is subject to UK law (see section 275B(2)) at the time it is created, it shall be taken for the purposes of this Act to be situated in the UK at all times.

#### 98.13.5 *UK law rule: Critique*

The UK law rule was introduced (in accordance with the then practice) without consultation or debate. It should be repealed as:

- (1) It is impractical for remittance basis taxpayers who want to know how to invest or what to declare in their returns. Only the wealthiest taxpayers with a significant budget for UK tax advice can be expected to research what law governs the assets concerned.
- (2) It is contrary to UK legal commercial interests, encouraging the use of `non-UK law and `non-UK jurisdictions. (The ill effect may be mitigated by the fact that little notice is taken of the rule in practice.)
- (3) It brings in no tax.

But the best solution is to look at the wider picture altogether: treat all assets other than UK land and securities as non-UK situate for the purposes of IHT and CGT.<sup>35</sup> The UK law rule would fall by the wayside.

### 98.14 **Futures/options**

Section 275A contains situs rules for futures and options which I call “**future/option rules**”.

In the absence of these provisions, remittance basis taxpayers could invest in a foreign law future/option which tracks the value of UK situate

---

Clearing Agreement between Eurex Clearing AG and a Clearing Member 26.11.2018 para 13.

34 CME Chapter 9, Rule 905 (Choice of Law)

<https://www.cmegroup.com/content/dam/cmegroup/rulebook/CME/1/9/9.pdf>

35 See 97.36 (Reform of IHT/CGT situs rules).

intangible assets (because the underlying assets are UK situate). I surmise that these rules are intended to prevent that.

The drafting makes some formal gestures to the conventions of plain English legal drafting, but its structure is remarkably convoluted. If the Parliamentary Counsel Office held a competition for the most obscure drafting, within a plain legal English format, this should make the shortlist.

It is convenient to deal with some definitions before turning to the rule itself. The definitions are derived from the corporation tax derivatives code now in Part 7 CTA 2009. The definitions of expressions used in the UK law rule are also relevant here.

#### 98.14.1 “*Future*”

Section 275B(3) TCGA provides:

In section 275A—

“future” has the meaning given by section 581 of CTA 2009,

So we turn to s.581 CTA 2009 which defines a “future”:

(1) In this Part “future” means a contract for the sale of property under which delivery is to be made—

(a) at a future date agreed when the contract is made, and

(b) at a price so agreed,

but this is subject to subsection (3).

(2) For the purposes of subsection (1)(b), a price is agreed when the contract is made even if—

(a) the price is left to be determined by reference to the price at which a contract is to be entered into on a market or exchange or could be entered into at a time and place specified in the contract, or

(b) in a case where the contract is expressed to be by reference to a standard lot and quality, provision is made for a variation in the price to take account of any variation in quantity or quality on delivery.

#### 98.14.2 “*Option*”

Section 275B(3) TCGA provides:

In section 275A ...

“option” has the meaning given by section 580 of [CTA 2009].

So we turn to s.580(1) CTA 2009 for a partial definition of option:

In this Part “option” includes a warrant.

Section 710 CTA 2009 defines “warrant”:

In this Part [Part 7]

“warrant” means an instrument which entitles the holder to subscribe for—

- (a) shares in a company, or
- (b) assets representing a loan relationship of a company, whether or not the shares or assets exist or are identifiable.

98.14.3 *Cash-settled future/option*

Sections 580/581 CTA 2009 exclude most cash-settled options and futures. They are conveniently read side by side:

<b>s.580 CTA 2009 (Options)</b>	<b>s.581 CTA 2009 (Futures)</b>
(2) References in this Part to an option do not include a contract whose terms—	(3) References in this Part to a future do not include a contract whose terms—
(a) provide— (i) that, after setting off their obligations to each other under the contract, a cash payment is to be made by one party to the other in respect of the excess, if any, or (ii) that each party is liable to make to the other party a cash payment in respect of all that party’s obligations to the other under the contract, and	[identical]
(b) do not provide for the delivery of any property.	[identical]
(3) Subsection (2) does not prevent an option whose underlying subject matter is currency from being an option.	(4) Subsection (3) does not prevent a future whose underlying subject matter is currency from being a future.

So cash-settled futures and options do not count, except for currency futures. The exception does not matter as currency futures/options are outside the scope of the future/option rules.

#### 98.14.4 “*Underlying subject matter*”

Section 275B(4) TCGA provides a commonsense definition:

For the purposes of section 275A—

- (a) the underlying subject matter of a future is the property which, if the future were to run to delivery, would fall to be delivered at the date and price agreed when the contract is made, and
- (b) the underlying subject matter of an option is the property which would fall to be delivered if the option were exercised.

In the case of options, the language of s.275B(4)(b) seems to assume that the option is a call option and that the underlying subject matter is therefore what is received. However, options can also be structured as put options. It is unclear, with a put option, whether the underlying subject matter is what is put, or what is received in return. In a simple case where the price for delivery is currency, one assumes that the underlying subject matter is what is put. The position is more complex where the option is between two currencies (say sterling and dollars). In such a case it would be possible either to call for dollars (paying sterling) or to put sterling (being paid in dollars). However, this may not make a difference given the discussion below regarding options over currency. Presumably a situation where one tried to mis-characterise a call option as a put option - for instance purporting to put sterling in return for securities - would be looked through to the underlying reality and treated as a call option over the securities.<sup>36</sup>

#### 98.14.5 *Futures/options rules*

Armed with these definitions, we can turn to the future/option rules.

Section 275A(4) TCGA provides:

Subsections (5) to (9) below have effect if asset A [the intangible asset]—

- (a) is a future or option (see section 275B(3)), and
- (b) is not subject to UK law at the time it is created.

---

<sup>36</sup> I am grateful to John Barnett for this observation.

The point of (b) is that a future/option which is subject to UK law is UK situate under the UK-law rule and the future/option rules are not needed. We are therefore only concerned with a foreign law future/option.

One needs to read s.275A(5)(6) together to follow the sense, and it easier to read them in reverse order. Section 275A(6) TCGA provides:

That rule is that where, in the case of any intangible asset,—

- (a) the asset is a future or option,<sup>37</sup>
- (b) the underlying subject matter (see section 275B(4)) of the asset consists of or includes an asset which is an intangible asset, and
- (c) either—

- (i)[A] that intangible asset [the underlying subject matter] is subject to UK law at the time it is created and,
  - [B] on the assumption that there were no rights or interests in or over that asset,<sup>38</sup> the situation of that asset [the underlying subject matter] would not be otherwise determined, or

- (ii) that intangible asset is treated by this subsection as being so subject [ie subject to UK law] at that time,

the intangible asset mentioned in para (a) above [i.e. the future/ option] is to be treated for the purposes of subsection (5) above and this subsection as being so subject [ie subject to UK law] at the time it is created.

This triggers s.275A(5) TCGA:

If, as a result of the application of the rule in subsection (6) below in relation to asset A or any other asset or assets, asset A falls to be treated as being subject to UK law at the time it is created, it shall be taken for the purposes of this Act to be situated in the UK at all times.

In short, a foreign law future/option over a UK law underlying intangible asset is UK situate.

EN FB 2005 explains the point of s.275A(6)(c)(ii):

---

37 Para (a) is otiose, since it repeats s.275A(4)(a); but it does not matter.

38 The words “on the assumption that there were no rights or interests in or over that asset” are difficult to understand, as situs of an asset does not depend of whether there are rights or interests in the asset. I think the words are otiose.

These rules apply recursively. In any case where there is a “nested sequence” of futures or options in which the underlying subject matter of each contract in the sequence consists of or includes the next contract in the sequence, subsection (5) has effect to provide that the first contract is taken for TCGA purposes to be situated in the UK at all times if the [relevant] requirements ... are met in relation to any of the contracts in the sequence.

Suppose:

- (1) Option 1 is a foreign-law option over UK intangible property.
- (2) Option 2 is a foreign-law option over option 1.

Option 1 is UK situate under s.275A(6)(c)(i) and option 2 is UK situate under s.275A(6)(c)(ii).

Section 275A(6) leaves one gap: it does not apply where the situs of the underlying subject matter is “otherwise determined”.<sup>39</sup>

Suppose, for instance, a foreign-law option over shares in a UK incorporated company. That is not caught by s.275A(5)(6). The gap is filled by the second of the three future/option rules, which is in s.275A(7)(8). These subsections follow much of the format of s.275A(5)(6) and I need not repeat the drafting points that they have in common.

One needs to read (7) and (8) together to follow the sense and it easier to read them in reverse order. Section 275A(8) TCGA provides:

That rule is that where, in the case of any intangible asset,—

- (a) the asset is a future or option, and
- (b) the underlying subject matter of the asset consists of or includes an asset—
  - (i) which is, by virtue of
    - [A] subsection (9) below or of
    - [B] any provision of this Act apart from this section, situated in the UK at any time, or
  - (ii) which is treated by this subsection as being so situated [ie

---

<sup>39</sup> At first sight there is a second gap: s.275A does not apply where the underlying subject matter of the future/option is a tangible asset. But that is not a gap, as in such a case the future/option is an interest in that asset, and situs is determined by s.275(1)(b) TCGA.

UK situate] at any time,  
 the intangible asset mentioned in para (a) above [the future/option] is to be treated for the purposes of subsection (7) above and this subsection as being so situated [ie UK situate] at that time.

This triggers s.275A(7) TCGA:

If—

- (a) asset A [the future/option] is not taken to be situated in the UK by virtue of subsection (5) above, and
  - (b) as a result of the application of the rule in subsection (8) below in relation to asset A or any other asset or assets, asset A falls to be treated as being situated in the UK at any time,
- it shall be taken for the purposes of this Act to be situated in the UK at that time.

Suppose:

- (1) Option 1 is a foreign-law option over a UK security.
- (2) Option 2 is a foreign-law option over option 1.

Option 1 is UK situate under s.275A(8)(b)(i) and option 2 is UK situate under s.275A(8)(b)(ii).

The rules in s.275A(5)(6) and (7)(8) only apply where there is an identifiable underlying asset in existence. A future/option over an asset class (such as gold) rather than any specific asset is not caught. If the underlying asset is currency, say, rather than a specific asset the future/option rules do not apply. Hence it does not matter that cash-settled currency future/option are within the definition of future/option, as they are not within the scope of the future/option rules.

#### 98.14.6 *Unissued securities*

Section 275A(9) TCGA deals with the case where the underlying subject matter is unissued shares or debentures:

Where—

- (a) the underlying subject matter of a future or option consists of or includes shares or debentures issued by a company incorporated in any part of the UK, but
  - (b) at the time the future or option is created, those shares or debentures have not been issued,
- the underlying subject matter of the future or option, so far as consisting of or including those shares or debentures, is to be taken, for the

purposes of subsection (8) above, to consist of or include an asset which is situated in the UK at all times.

### 98.15 Insurance policy

The situs of policies rarely matters for CGT, because of the relief for policies. UK policies will be UK situate under the UK-law rule and for others the common law rule will apply.<sup>40</sup>

### 98.16 Land

Section 275(1)(a) TCGA provides:

the situation of rights or interests (otherwise than by way of security) in or over immovable property is that of the immovable property.

The CG Manual provides:

**12430 Types of asset (1): Land, tangible property and debts** [Jul 2019]

*Land and buildings (Section 275(1)(a) TCGA 1992)*

Land and buildings are located in the country where they are found. This applies to all rights and interests in the land and buildings. It will therefore apply to leases of land, tenancies etc.

### 98.17 Chattels

Section 275(1)(b) TCGA provides:

subject to the following provisions of this subsection,<sup>41</sup> the situation of rights or interests (otherwise than by way of security) in or over tangible movable property is that of the tangible movable property.

Thus an option to purchase a UK situate chattel (even if governed by a foreign law) is a UK situate asset. The CG Manual provides:

**12430 Types of asset (1): Land, tangible property and debts** [Jul 2019]

*Chattels (Section 275(1)(b) TCGA 1992)*

Items of tangible moveable property (chattels) are located where they are found at any point in time. This applies to all rights and interests

---

40 A policy is not a debt for the purposes of the CGT debt situs rule.

41 This is referring to the special rules for ships and aircraft.

over such assets also. Therefore a lease of a chattel can change from being located in the UK to being located elsewhere if the chattel is removed from the UK to another country.

For the position of temporarily exported chattels, see 97.25 (Chattels).

## 98.18 Ships and aircraft

Section 275(1)(f) TCGA provides:

a ship or aircraft is situated in the UK if and only if the owner is then resident in the UK, and an interest or right in or over a ship or aircraft is situated in the UK if and only if the person entitled to the interest or right is resident in the UK.

The CG Manual provides:

**12430. Types of asset (1): Land, tangible property and debts** [Jul 2019]

*Ships and aircraft (Section 275(1)(f) TCGA 1992)*

Contrary to the general rules of international law,<sup>42</sup> for capital gains purposes the location of a ship or aircraft does not depend on its country of registration. Instead the ship or aircraft is located in the UK if and only if the owner is resident in the UK. Similarly any interest or right in or over the ship or aircraft is located in the UK if and only if the owner of the interest or right is resident in the UK.

This generally<sup>43</sup> disappplies the CGT remittance basis since a ship/aircraft owned by a remittance basis taxpayer is deemed UK situate and the gain taxed on an arising basis. If the individual holds the ship/aircraft through a non-resident company the asset is treated as not UK situate which has two remittance basis advantages:

- (1) The s.3 remittance basis is available on a disposal by the company.
- (2) Relief is available under s.809W ITA for services relating to the asset.

## 98.19 Goodwill

Section 275(1)(g) TCGA provides:

the situation of good-will as a trade, business or professional asset is at

---

42 The Manual's view (that under private international law ships and aircraft are situate where registered) is erroneous: see 97.26 (Ships and aircraft).

43 An exception is if the individual disposes of the asset while temporarily non-resident.

the place where the trade, business or profession is carried on.

The CG Manual provides:

**12450 Intangible assets - goodwill, patents, trademarks etc** [Jul 2019]

*Goodwill (Section 275(1)(g) TCGA 1992)*

Goodwill which is an asset of a trade, profession or vocation is located where the trade, profession or vocation is carried on. If the trade etc is carried on in more than one country part of the goodwill appropriate to the part of the trade etc carried on in any one country should be treated as located in that country.

## 98.20 Intellectual property

Section 275(1)(h) TCGA provides:

- [a] patents, trade marks, registered designs and corresponding rights<sup>44</sup> are situated where they are registered, and if registered in more than one register, where each register is situated, and
- [b] licences or other rights in respect of any such rights are situated in the UK if they or any right derived from them are exercisable in the UK,

A different solution must be found for copyright and similar rights which do not need registration. Section 275(1)(j) TCGA provides:

copyright, design right, franchises, and corresponding rights,<sup>45</sup> and licences or other rights in respect of any such rights, are situated in the UK if they or any right derived from them are exercisable in the UK.

This will not often concern remittance basis taxpayers. It could be important for non-residents carrying on a trade in the UK through a permanent establishment, who are (in short) subject to CGT/CT on UK situate trade assets.

It seems at first sight that intellectual property is (uniquely) capable of being situate for CGT purposes in more than one jurisdiction. But intellectual property exercisable in a number of jurisdictions should be

---

44 “Corresponding rights” has a commonsense definition in s.275(3) TCGA:

In subsection (1) above, in each of paras (h) and (j), “corresponding rights” means any rights under the law of a country or territory outside the UK that correspond or are similar to those within that paragraph.

45 See above footnote.

regarded as a number of separate assets, one situate in each jurisdiction.<sup>46</sup>

### **98.21 Bare trust or nominee ship**

The interest of a beneficial owner in property held by a nominee or bare trustee is situate where the underlying asset is situate: the CGT bare trust disregard<sup>47</sup> reinforces the common law rule on this point.

Also see 66.8.2 (Situs of unit for CGT).

### **98.22 Substantive trust interest**

The situs of an equitable interest under a substantive trust only rarely matters for CGT because of the exemption for equitable interests. However it may matter, eg in the case of a purchased interest or an interest under a non-resident trust.

If the trust is “subject to UK law” (as defined) the interest will be situate in the UK. This clearly includes the case of a trust with a UK governing law; it may arguably apply to any trust with UK trustees. In other cases the common law rules will apply.

### **98.23 Estate of deceased person**

If the estate is subject to UK law, it is UK situate for CGT. Other estates are governed by the common law rule.<sup>48</sup>

### **98.24 Planning: Changing situs**

#### *98.24.1 Moveable assets in UK*

Moveable assets could in principle be moved offshore prior to a disposal. Consider whether an export licence is needed.

#### *98.24.2 Unincorporated UK business*

A business could sometimes be transferred to a foreign incorporated company under s.162 TCGA and shares later sold.<sup>49</sup> Watch stamp duty. If the company were subsequently to become non-resident, eg on

---

46 See 97.28 (Intellectual property).

47 See 1.7 (Bare trust/nominee ship).

48 See 97.32 (Estate of deceased person).

49 For an unsuccessful example of similar planning using hold-over relief, see 99.8 (Ultra-wide control: Critique).

emigration of shareholder/directors, no tax would arise except on growth in value since transfer to the company.

### 98.24.3 *Debts*

There are two ways to deal with a UK situate debt on a security. It may be possible to make the asset non-UK situate. It might be possible to make the asset a simple debt (not a debt on a security) so it falls within the relief given by s.251 TCGA. It is important to do this by varying the existing debt, and not by ending the existing debt and creating a new one.<sup>50</sup>

### 98.24.4 *UK resident, non-UK situs*

It is not ideal for a foreign domiciled individual to hold a UK incorporated company directly, as a disposal of that asset would give rise to CGT. If the foreign domiciliary does not want to go to the trouble and expense of using an offshore trust, what is the alternative? One possibility is to use a foreign incorporated UK resident company. The shares in the company will not be UK situate for CGT.<sup>51</sup>

---

50 But see App.2.12.10 (Date to test security).

51 See 98.6 (Registered security: Non-UK co).

## CHAPTER NINETY NINE

# CONTROL, CONNECTED, CLOSE AND RELATED EXPRESSIONS

### 99.1 Introduction

#### 99.1 Introduction

This chapter considers the terms “control”, “connected person”, “close company”, and related terms such as “associate” and “participator”.

Control is the most fundamental, as this term is used in the definitions of connected person and close company.

The layout of this chapter is as follows:

<b>Topic</b>	<b>See para</b>
Control	99.2
Associate	99.6
Connected person	99.12
Control/connected person: Examples	99.20
Participator	99.22
Close company	99.26

#### 99.2 Control

##### 99.2.1 *Why control matters*

Control of a company is a concept used throughout tax legislation, and it is not possible to write a full list.

The concept is important in particular for the definition of connected person: a person is connected with a company they control. The concepts of control and connected overlap.

##### 99.2.2 *Definitions of “control”*

There are two main definitions of control in tax legislation, as well as

many other definitions. The legislation does not have terminology to describe them, so I coin the following:

<b>Type of control</b>	<b>Provision</b>	<b>See para</b>
Control in <b>ultra-wide</b> sense	s.450 CTA 2010	99.3
Control in <b>strict</b> sense	s.995 ITA; s.1124 CTA 2010	99.9
<i>Other senses of control</i>	<i>Meaning</i>	
<b>Boardroom</b> control	Power to make <i>directors</i> decisions	
<b>Shareholder level</b> control	Power to make <i>shareholders</i> decisions	
Control in <b>natural (undefined)</b> sense	Vague & context-sensitive	

The word control is used in accountancy, where it has another set of definitions again.<sup>1</sup> Those definitions do not apply for tax, so a person who has control in one of the tax senses may not be the person named in company accounts as the ultimate controlling party of the company.

It follows that one should not use the word “control” without specifying the context or meaning.

It is not helpful, and perhaps not even meaningful, to refer to the “real” sense of control, for in the absence of context the word is vague: it has no precise fixed meaning. The strict sense of control is not exactly the natural (undefined) sense. The ultra-wide sense of control is very distant from the natural (undefined) sense.

Statute formerly used the expression “controlling interest” (undefined). This generated a large case law.<sup>2</sup> But it seems to me that those cases shed little light on the current statutory concepts of strict-sense/ultra-wide control, which are both elaborately defined. The drafter learnt the lesson that “control” is too vague a concept to use without some explanation. Careful thought is needed before using cases discussing “controlling interest” to shed light on the meaning of strict-sense or ultra-wide control.

Where there is control in the strict sense, there is usually control in the ultra-wide sense. Where appropriate, I refer to that as control “**in every sense**”.

### 99.2.3 *Default meaning of control*

---

1 FRS 102 (The Financial Reporting Standard applicable in the UK and Republic of Ireland) para 9.4; IFRS 10 (Consolidated Financial Statements) para 5.

2 These cases are discussed in Venables, “Corporate Relationships” (2003) Corporate Tax Review Vol 4 p.1.

**s.989 ITA**

The following definitions apply for the purposes of the Income Tax Acts—“control”, in relation to the control of a body corporate or a partnership, is to be read in accordance with section 995.<sup>3</sup>

**s.1316(2) CTA 2009  
& s.1176(2) CTA 2010**

Section 1124 (meaning of control in relation to a body corporate or partnership) applies for the purposes of this Act unless otherwise indicated (whether expressly or by implication).

**s.288(1) TCGA**

In this Act, unless the context otherwise requires—“control” shall be construed in accordance with sections 450 and 451 of CTA 2010;

Thus:

- (1) For IT and CT the strict sense is the default meaning. However, in practice the ultra-wide sense is more commonly applied.
- (2) For CGT the ultra-wide sense is the default meaning.

For IHT, s.269 IHTA provides yet another definition of control. Such is the patchwork nature of UK taxation. The IHT definition is not discussed here as it does not arise in the IHT issues closest to the themes of this book.

### 99.3 Control: Ultra-wide sense

#### 99.3.1 *Five heads of control*

This section considers the concept of control in the ultra-wide sense. Section 450(1) CTA 2010 provides:

This section applies for the purpose of this Part [Part 10 CTA 2010, close companies].

The definition is also applied by reference in many other contexts.

- (2) A person (“P”) is treated as having control of a company (“C”) if P—
  - (a) exercises,
  - (b) is able to exercise, or
  - (c) is entitled to acquire,
 direct or indirect control over C’s affairs.

---

3 The point is repeated (unnecessarily) in s.719 ITEPA and s.1021(2) ITA: “Section 995 (meaning of “control”) applies for the purposes of this Act unless otherwise indicated.”

- (3) In particular, P is treated as having control of C if P possesses or is entitled to acquire—
- (a) the greater part of the share capital or issued share capital of C,
  - (b) the greater part of the voting power in C,
  - (c) so much of the issued share capital of C as would, on the assumption that the whole of the income of C were distributed among the participators, entitle P to receive the greater part of the amount so distributed, or
  - (d) such rights as would entitle P, in the event of the winding up of C or in any other circumstances, to receive the greater part of the assets of C which would then be available for distribution among the participators.

Thus there are five heads of control in the ultra-wide sense:

<b>Type of control</b>	<b>CTA 2010</b>	<b>My term</b>
Control of company affairs	s.450(2)	General control
Majority of share capital	s.450(3)(a)	Para (a) control (shares)
Majority of voting power	s.450(3)(b)	Para (b) control (votes)
Majority of company income	s.450(3)(c)	Para (c) control (income)
Majority of company assets	s.450(3)(d)	Para (d) control (assets)

These rules overlap, and there is usually more than one reason why a person “controls” a company, in the ultra-wide sense, particularly after allowing for the associate-attribution rule, discussed below; but that does not matter.

### 99.3.2 *What are shareholder’s rights*

In order to apply these rules it is necessary to ascertain what are the rights exercisable by a shareholder.

In *HMRC v UBS*, the company’s articles provided (in short) that while UBS was shareholder, its shares carried (more or less) no rights. The purpose was to ensure that when UBS held the shares it did not have control. An argument that this should be ignored as a sham was curtly rejected:

There was no finding that the participants did not intend article 2(15) to take effect according to its terms and so the argument that it was a sham was rightly rejected. Once this point is reached, I am at a loss to know

on what basis article 2(15) can be airbrushed out of the scheme.<sup>4</sup>

Sham is however fact sensitive, and in other circumstances an article of that kind might perhaps be ignored as a sham.

### 99.3.3 General control

*P is treated as having control of C if P—*

- (a) exercises,*
- (b) is able to exercise, or*
- (c) is entitled to acquire,*

*direct or indirect control over C's affairs.*

I refer to this as “**general control under s.450(2)**”.

In the last line of this head, “control” is used in a natural (undefined) sense. So this head seems similar to strict-sense control (company affairs conducted in accordance with P’s wishes).<sup>5</sup> But there are differences:

- (1) Strict-sense control requires boardroom control, not control at shareholder level.
- (2) Strict-sense control requires legal control conferred by a company’s governing documents, not de facto control or control conferred in some other way.

Para (a) concerns someone who *actually* exercises control. That includes a case where P exercises *de facto* control but has no right of control.<sup>6</sup>

Para (b) concerns someone *able* to exercise control. It does not matter if they choose not to exercise control. It is suggested that although para (a) applies where P exercises mere *de facto* control, para (b) only applies if P has a right of control, ie *able* means legally entitled to. An attraction of this reading is that para (a) and (b) both have some role to play. For if para (a) required a right of control, then (b) would be otiose; if para (b) did not require a right of control, then para (a) would be otiose.<sup>7</sup>

However it may be rare for someone to actually exercise control without having a right to do so, and so fall within para (a) but not (b).

---

4 [2014] EWCA Civ 452 at [107].

5 See 99.2.3 (Control: Strict sense).

6 This was accepted as the position in *UBS v HMRC* where the issue was whether a company exercised *de facto* control despite having no legal power to do so.

7 This view is also consistent with the meaning of “able to control” in ToA enjoyment condition E: see 46.12 (Enjoyment condition E: control).

### 99.3.4 *Shareholder level control*

In *Steele v EVC International*:

... control of the affairs of the company in [s.450] means control at the level of general meetings of the company ... control at that level carries with it the power to make the ultimate decisions as to the business of the company and in that sense to control its affairs.<sup>8</sup>

The CT Manual provides:

**CTM60220 Control: Over the company's affairs** [Nov 2020]

... As regards the level at which control is exercised, the judgment in *Steele v EVC International NV* 69 TC 88 confirms that what is required is control at the participator or general meeting level, not at administrative or board level.

SP 1/01 provides:

54. Where the establishment of a connected persons relationship depends on the question of whether a person falls to be regarded as having control of a company's affairs within the terms of [s.450 CTA 2010], it is not considered that a persons ability (whether de facto or de jure) to appoint the majority of the Board of directors will itself constitute control of the company's affairs unless, that is, the Board exercises powers which would normally be exercised by the shareholders at a general meeting.

Power to appoint directors confers boardroom control, but that is not the test of control in the ultra-wide sense. Appointment of directors is also

---

<sup>8</sup> 69 TC 88 at p.127. See too 7.7 (Control: company law background).

I am not sure if it is necessary, even in a work which seeks to be comprehensive, to refer to FTT decisions which overlook relevant case law. But for completeness; this was overlooked in the FTT decision of *Hunters Property v HMRC* [2018] UKFTT 96 (TC). In this case a group company was sole member of a company limited by guarantee ("the guarantee company"). The issue was whether the appellant "controlled" the guarantee company (in the ultra-wide sense). The FTT held that the appellant was had control under s.450(2)(b) (able to exercise control) as it could appoint and dismiss directors. The correct analysis was that the appellant had control under s.450(2)(b) because as the sole member of the guarantee company it had control at the level of company meetings. There is no difference between a guarantee company and a company with share capital. The test is control at shareholder/company member level. But the end result would be the same.

one of the affairs of a company which is dealt with at shareholder level. But control of one isolated issue is not sufficient to constitute control of the company's *affairs* in general.

See too 7.7 (Control: company law background).

### 99.3.5 *Partial control*

The issue of partial control arises for:

- (1) Ultra-wide sense of control first head (general control under s.450(2)): what is the position if a person has power of control over some of a company's affairs at shareholder level but not others?
- (2) Strict-sense control: what is the position if a person has power of control over some of a company's affairs at boardroom level but not others?

Control (in its natural, undefined sense) is a matter of degree, and the law as so often has to resolve shades of gray into black/white, control/non-control.

The requirement is to have control over company "affairs" in general. Control over one matter alone is not control over affairs in general:

... ability to achieve an isolated result, the power to carry a particular resolution, is insufficient to establish control in the statutory sense; and that what is required is power to secure the continuing conduct of the company's affairs in accordance with the will of the person...<sup>9</sup>

Bramwell, *Taxation of Companies and Company Reconstructions* agrees:

the ability to control only some aspects of the company's affairs is insufficient.<sup>10</sup>

At the other extreme, all shareholders/directors are subject to some constraints on how they conduct the affairs of the company, at board/shareholder level, for instance, restrictions on distributions; but that does not stop them having control over company affairs in general.<sup>11</sup>

---

<sup>9</sup> *IRC v Lithgows* 39 TC 270 at p.278.

<sup>10</sup> Looseleaf, para D1.1.4 (General test of control).

<sup>11</sup> For completeness: An old case held that a 51% shareholder had a "controlling interest" (undefined); it was not relevant that a 75% majority was required to carry out some shareholder level decisions. See *British-American Tobacco v IRC* 29 TC 49 at p.67. But the relevance of cases on "controlling interest" to strict-sense and

FD\_99\_Control\_Connected\_Close\_and\_Related\_Expressions.wpd 03/11/21

It is suggested that the constraints on charitable companies are so far reaching that the members of a charitable company should not be regarded as having control of the company in the strict sense (though they do have control in the ultra-wide sense, because they possess voting power which confers para (b) control).<sup>12</sup> But this question will not often arise.

### 99.3.6 *De facto control*

If one accepts that de facto control is sufficient to amount to control in the ultra-wide sense, it is necessary to identify what constitutes that control.

Mere influence does not constitute control: *de facto* control would only apply if the person with legal control surrenders independence and acts as a “rubber stamp”.

In *HMRC v UBS* one issue was whether a company (DB) exercised *de facto* control over another (in which it was a minority shareholder), so that it had control in the ultra-wide sense:

... the scheme was pre-ordained and involved a co-ordinated course of action between the participants, with Investec and DB, two wholly independent companies, playing pre-ordained and co-ordinated roles, with each having its own commercial interests in bringing the scheme to fruition. It does not, however, begin to follow from this that DB was in relevant [ultra-wide sense] control of Investec. If

[1] A Ltd proposes to B Ltd, an unconnected and independent company, a co-ordinated course of action with a view to achieving a commercial end to the benefit of both, and

[2] B Ltd agrees to the proposal and co-operates in its implementation, it is beyond my comprehension why such a state of affairs should be thought to justify the inference that, in playing its own part in the operation, B Ltd is to be regarded as being ‘controlled’ in what it does by A Ltd. The proposition is wrong. B Ltd will, by inference, want to take part, and will do so. But there will ordinarily be no basis for an inference that the decisions it makes en route to the ultimate goal will

---

ultra-wide control is doubtful. This particular issue does not however arise, for those definitions, as:

- (1) a 51% shareholder has strict-sense control (a 51% shareholder has power to appoint directors and so has boardroom control);
- (2) a 51% shareholder has ultra-wide sense control (majority of voting power confers para (b) control).

<sup>12</sup> See 99.3.8 (Votes: para (b) control).

be decisions it makes other than independently, and in its own interests, in achieving the proposed end.<sup>13</sup>

### 99.3.7 *Shares: Para (a) control*

*P is treated as having control of C if P possesses or is entitled to acquire ... (a) the greater part of the share capital or issued share capital of C.*

This is (relatively) straightforward.

### 99.3.8 *Votes: Para (b) control*

*P is treated as having control of C if P possesses or is entitled to acquire ... (b) the greater part of the voting power in C.*

*Children’s Investment Fund Foundation v AG* considered whether a member of a charitable company was entitled to exercise voting power, for the purpose of the Companies Act rule that a director is connected with a body corporate if:

entitled to exercise ... more than 20% of the voting power.<sup>14</sup>

The member argued that she was not “entitled to exercise voting power”, because of the extensive charity law restraints on use of that power.<sup>15</sup> This argument was summarily dismissed:

The fact is that Ms Cooper is the only member of [the charity], which is a company limited by guarantee without a share capital. She is, therefore, entitled to exercise... 100% of the voting power in [the charity] ...<sup>16</sup>

It is suggested that the same applies for para (b) control: members of a charitable company possess voting power, and so “control” the company

13 [2014] EWCA Civ 452 at [139].

14 s.254(2)(b) Companies Act 2006

15 The member referred specifically to restraints due to:

- (1) The Foundation’s charitable objects
- (2) Statutory rules such as s.201 Charities Act 2011
- (3) Restricted uses to which charity funds could be put (a grant agreement required charity funds to be used as an endowment for specified charitable purposes)

But clearly one should look at the totality of the restraints imposed by charity law.

16 [2017] EWHC 1379 (Ch) at [99]. The point was common ground on appeal. But see 99.23.10 (Member of charitable co).

in the ultra-wide sense.

At first sight, para (b) control is otiose, since a person with the greater part of the voting power has general control under s.450(2) CTA 2010: they are able to exercise control over the company's affairs. But it might be argued that a 51% shareholder does not have general control, at shareholder level, as they are unable to pass a special resolution. In the case of a charity it might be argued that the members rights as a whole fall short of general control. So para (b) control (votes) is required to cover these cases.

### 99.3.9 *Income: Para (c) control*

*P is treated as having control of C if P possesses or is entitled to acquire ... (c) so much of the issued share capital of C as would, on the assumption that the whole of the income of C were distributed among the participators,<sup>17</sup> entitle P to receive the greater part of the amount so distributed.*

Section 450(4) CTA 2010 provides:

Any rights that P or any other person has as a loan creditor are to be disregarded for the purposes of the assumption in subsection (3)(c).

This will not normally make any difference, as a company would not normally distribute income to loan creditors. But it would apply in special cases where interest is treated as a distribution.

The CT Manual provides:

**CTM60240. Control: Summary** [Nov 2020]

... The test ... depends on the dividend rights of the issued capital and will be mainly of interest where shares with no voting rights carry the right to a high dividend..

But this is not the only case. The life tenant of an IIP trust holding a majority of the shares in a company in principle has control of the company under this head.

### 99.3.10 *Assets: Para (d) control*

*P is treated as having control of C if P possesses or is entitled to acquire ... (d) such rights as would entitle P,*

---

<sup>17</sup> See 99.22 (Definitions of participator).

*[i] in the event of the winding up of C  
[ii] or in any other circumstances,  
to receive the greater part of the assets of C which would then be  
available for distribution among the participators.<sup>18</sup>*

The CT Manual provides:

**CTM60230. Control: Right to receive most assets** [Nov 2020]

Control ... exists where a person or persons have a right to receive the greater part of the assets then available for distribution among participators, in any circumstances, (for example, on redemption of redeemable share capital or on repayment of loans to the company) but also, specifically, on a winding up of the company.

‘Participators’ for this purpose includes loan creditors (unlike (c) of CTM60220). ... If a loan creditor is an open company, see CTM60300. The test under CTA2010/S450 (3) ... only applies to the assets that would come to a participator in that capacity. In the case of a bank, for example, no regard would be had to any assets that would come to it in respect of loans made in the ordinary course of its banking business, because it is not deemed to be a loan creditor (and, hence it is not a participator) in respect of such loans by virtue of CTA2010/S453 (4) ...

Suppose a company owes a debt of £x to a loan creditor. If the assets of the company are less than £2x, then the loan creditor has control. If the assets are more than £2x (plus a little for the notional costs of a notional liquidation) then the loan creditor does not have control under this head. It may not be easy to know whether they have control or not.

If a company has no net assets (liabilities exceed value of net assets) then shareholders do not have control under this head, because nothing would be distributed to them on a winding up. Loan creditors may still have control, unless the company has no assets at all.

“Other circumstances” means circumstances in which a distribution is made to participators. The example given in the CT Manual is a redemption of redeemable shares.<sup>19</sup> The CT Manual provides:

**CTM60240. Control: Summary** [Nov 2020]

...The test in CTM60230 will normally be of interest only where

---

<sup>18</sup> See 99.22 (Definitions of participator).

<sup>19</sup> In the absence of these words, avoidance might perhaps have been possible by giving redeemable shares smaller rights on a winding up than on a redemption.

- [1] loan creditors are participators (see CTM60130) or
- [2] there exist special rights to participate in the assets available for distribution in a winding-up or in any other circumstances for example, on redemption of redeemable share capital.

But these are not the only cases where the test may be satisfied. If trustees hold a company on trust for A for life, remainder to B absolutely, then B has control under para (d) (assets): for B will in the future be entitled to the assets of the company. If trustees hold a company on trust for B contingently (eg on attaining the age of 25, if B is under 25) then B does not have control under para (d).

### 99.3.11 “Entitled to acquire”

Section 451 CTA 2010 provides:

- (1) This section applies for the purposes of section 450 [“control” in ultra-wide sense].
- (2) A person is treated as entitled to acquire anything which the person—
  - (a) is entitled to acquire at a future date, or
  - (b) will at a future date be entitled to acquire.

I find the difference between para (a) and (b) hard to grasp, but it does not matter.

I refer to this as the “**entitled-to-acquire rule**”.

The wording is often used. The INT Manual comments on the rule in the CFC legislation:

#### **210050 ‘Entitled to acquire’ and ‘entitled to secure’** [May 2012]

The terms ‘entitled to acquire’ and ‘entitled to secure’ in (a), (b) and (c) of INTM210040 apply both where a person is presently entitled to acquire or secure an asset at a future date and where a person will at a future date be entitled to acquire or secure that asset. They do not extend to situations where, in an entirely arm’s length transaction, one party temporarily has future rights over the other’s property, for instance, in the period between exchange of contracts and completion of a sale of land.

A person whose entitlement to acquire or secure is contingent on a default of any person, including the controlled foreign company in question, will not be treated as having an interest in the controlled foreign company, unless that default has occurred.

So, for example, a person will have an interest in a controlled foreign

company if, by means of a contractual right or some other arrangement, he can

- require a shareholder to transfer shares to him, or
- secure the issue to him of unissued share capital of the company, or
- secure that if a distribution is made by the company he has a share in the distribution or premium.

A person will not have an interest in a controlled foreign company solely by virtue of rights over the income or assets of the company which are exercisable on the default of any person. Thus the contingent rights of banks, trade creditors, etc. to acquire some or all of the company's assets in the event of a default would not amount to an interest in the company in advance of the default.

See too 99.23.11 (“Entitled to do”).

## 99.4 Trustees of settlement

This section considers trustees of a substantive trust.<sup>20</sup>

Trustee shareholders are constrained by fiduciary duties, for instance, they may be unable to remunerate themselves as directors. These restraints do not prevent trustees from having control in the ultra-wide sense:

- (1) Trustees may be said to have general control. Fiduciary control is sufficient.
- (2) Trustees may be said to “possess”, or to be “entitled to acquire”:
  - (a) Share capital
  - (b) Voting power
  - (c) Share capital entitling them to receive income distributions
  - (d) Rights entitling them to receive capital distributions

Words such as possess/entitled to, do not require *beneficial* possession/entitlement. Trustees of a substantive trust have legal ownership, or the right to call for legal ownership, and a better title than any other single person to exercise powers over the trust property.

This is confirmed by the rule that trustees may be associates.

## 99.5 Nominees: Control

### 99.5.1 *Nominee-attribution rule*

---

<sup>20</sup> For nominees, see the next section. Also see 99.10.1 (Trustee in personal capacity).  
FD\_99\_Control\_Connected\_Close\_and\_Related\_Expressions.wpd 03/11/21

Section 451(3) CTA 2010 provides (for the purposes of the definition of control in the ultra-wide sense):

If a person—

- (a) possesses any rights or powers on behalf of another person (A),  
or
- (b) may be required to exercise any rights or powers on A’s  
direction or behalf,

those rights or powers are to be attributed to A.

I refer to this as the “**nominee-attribution rule**”.

### 99.5.2 *Position of beneficial owner*

In the case of a straightforward nominee, where N holds on trust for A, then A possesses and is entitled to the rights or powers of the trust property, and there is no need for the nominee-attribution rule.

Cases where a person “may be required to exercise rights on A’s direction” extend beyond the case where the person is nominee for A in the strict sense of nominee. Even then, the rule is (more or less) otiose, for if a person may be required to exercise rights on the direction of A, or on behalf of A, then these are rights which A possesses or is entitled to acquire, so the rights would be taken into account in any event in the test of control.

So perhaps the point of the rule is that as the rights are to be attributed to A (the beneficiary) they are not to be attributed to the nominee.

It is unclear whether the nominee-attribution rule would apply where a person possesses rights on behalf of more than one person, but the question may not often arise.

### 99.5.3 *Position of nominee*

A nominee has some rights, and although it is usually the case that one ignores and looks through nominees for tax purposes<sup>21</sup> that is not an absolute rule.<sup>22</sup>

If N holds a majority shareholding on trust for B absolutely, it is

<sup>21</sup> See 1.7.4 (Tax treatment of bare trust).

<sup>22</sup> Contrast *Atlasview v Brightview* [2004] EWHC 1056 (Ch) which held that a nominee had an interest for the purposes of (what is now) s.994 Companies Act 2006 (unfair prejudice to shareholders).

suggested that N does not necessarily have control in the ultra-wide sense, on the basis that:

- (1) The statutory words “possess” and “able to exercise” and “entitled”, while not requiring beneficial possession (etc), are not apt to describe the limited rights of a bare nominee.<sup>23</sup>
- (2) The nominee-attribution rule which attributes rights (etc) to B, by implication requires that N does not possess (etc) those rights.<sup>24</sup>

On the other hand, if:

- (1) N holds the shares on as nominee for a number of beneficiaries in undivided shares, and
- (2) The beneficiaries are not entitled to call for the transfer of their shares or to give directions to N

then it is suggested that N may “possess” the share capital and voting power of the shares.

In other words, the term “nominee” actually covers a variety of different circumstances.<sup>25</sup>

A nominee may also have control in the ultra-wide sense on the basis that it exercises *de facto* control, but that depends on the facts.

A similar approach applies to the question whether a nominee is a participator; see 99.23.6 (Nominees: Participators).

## 99.6 Associates

### 99.6.1 Associate/connected: Control

“Associate” is one of a cluster of similar and overlapping concepts:

Term	See	Application
------	-----	-------------

<sup>23</sup> There is some support for this view at the CA level in *Bibby v IRC* 27 TC 167 at p.173 where CA said, obiter, that a bare trustee did not have a “controlling interest” (the term was not defined). The point was left open by the House of Lords on the appeal, because it was appreciated that the term bare trustee was ambiguous and needed further consideration.

<sup>24</sup> Note that the nominee-attribution rule states that the rights “are to be” attributed to A; contrast the associate-attribution rule, which is that an associate’s rights “may be” attributed to a person; see 99.7 (Associate-attribution rule).

<sup>25</sup> Lord Simonds made the point in *Bibby v IRC* 27 TC 167 at p.185: “I would reserve further consideration [for] the case of the so-called bare trustee. ...I should myself require a more satisfactory explanation than has yet been given of a term which, though it has statutory sanction, has never, I believe, received statutory definition.”

Associate	<i>Discussed here</i>	Associate-attribution rule & more
Connected person	99.12	
Associated company	99.17.1	
Associate	52.3.4; s.681DL ITA	Transactions in securities code

The first two of this list - associate and connected person - are the most important. The definitions are similar but not the same. It may be that:

- (1) A is connected with B but not an associate of B; or
- (2) A is an associate of B but not connected with B.

I note the differences in the discussion below.

This section considers the definition of associate; the next section considers the associate-attribution rule; and the following section gives examples and discusses difficulties caused by the width of the definition.

Associate is defined in s.448(1) CTA 2010. This has seven paragraphs, as follows:

<b>Type of associate</b>	<b>s.448(1) para</b>	<b>See para</b>
Relatives	(a)	99.6.2
Partners	(a)	99.6.3
Trustees	(b)(c)(d)	99.6.5, 99.6.6
Companies	(e) (g)	99.6.7
Personal representatives	(f)	99.6.8

The definition sets out a list of cases where a person is an associate *in relation to* P. The attribution rule refers to an associate *of* the person (“P”). But where a person is an associate in relation to P, that person is an associate *of* P.

Strictly one should not use the term “associate” in the abstract. An associate can exist only in relation to another person. But where the context is clear it is permissible to refer to an associate in isolation (leaving the words “in relation to a person” and the identity of that person to be inferred).

### 99.6.2 *Associates: Relatives*

Section 448(1) CTA 2010 provides:

In this Part [Part 10 CTA 2010, close companies] “associate”, in relation to a person (“P”), means—

- (a) any relative ... of P

There are two distinct definitions of “relative” relevant for this chapter:

- (1) The definition for “associate”
- (2) The definition for “connected person”

Unless the context is clear, one should not use the word “relative” without specifying which definition applies.

Section 448(2) CTA 2010 defines relative for the purpose of “associate”:

- In this section, “relative” means—
- (a) a spouse or civil partner,
  - (b) a parent or remoter forebear,
  - (c) a child or remoter issue, or
  - (d) a brother or sister.<sup>26</sup>

The definition of connected person is wider. A spouse of a brother, sister, etc, is a connected person but not an associate.<sup>27</sup>

### 99.6.3 *Associates: Partners*

Section 448(1) CTA 2010 provides:

- In this Part [Part 10 CTA 2010, close companies] “associate”, in relation to a person (“P”), means—
- (a) any ... partner of P

The definition of connected person is narrower, as (in short) it does not apply to commercial acquisitions/disposals of partnership assets.

### 99.6.4 *Trustees & settlor/relatives*

Section 448(1) CTA 2010 provides:

- In this Part [Part 10 CTA 2010, close companies] “associate”, in relation to a person (“P”), means ...
- (b) the trustees of any settlement in relation to which P is a settlor,
  - (c) the trustees of any settlement in relation to which any relative of P (living or dead) is or was a settlor

The definition of connected person is different in several ways.<sup>28</sup> An important difference is on the death of a settlor: Trustees are connected with associates of a relative of a deceased settlor, but the trustees and the

---

26 For the meaning of these terms, see App 3.1 (Family terms: Introduction).

27 See 99.13 (Connected: Family members).

28 See 99.14 (Connected: Trustees).

relative are not connected persons.

“Settlement” has the standard IT/CGT meaning. Contrast the definition of connected person where the word has the settlement-arrangement meaning.

A person may be a spouse at one time and not at another time. It is considered that one must look at the position from time to time. Thus:

- (1) If P’s spouse is settlor, the trustees are associates of P, but if there is a divorce, they cease to be associates under s.448(1)(c) CTA 2010.<sup>29</sup>
- (2) If P marries a person who has previously made a settlement, then at that time the trustees become associates of P under s.448(1)(c) CTA 2010.

The CT Manual provides:

**CTM60170 Close companies: tests: trustees, executors, etc** [Jun 2016]

[1] The trustee or trustees of any settlement to which (b) of CTM60150 applies<sup>30</sup> are associates of the participator and therefore any rights or powers which they possess as trustees of that settlement may be attributed to the participator.

[2] This does not, however, apply to any rights or powers such trustees possess in other capacities, for example,

[a] in relation to shares owned by them personally or

[b] as trustees of other settlements of which neither the participator nor any of his or her relatives (living or dead) within (a)(ii) to (iv) of CTM60150 is or was the settlor.

Point [2] is right as trustees are deemed to be a separate person.

### 99.6.5 *Trustees and beneficiaries*

Section 448(1) CTA 2010 provides:

In this Part [Part 10 CTA 2010, close companies] “associate”, in relation to a person (“P”), means ...

- (d) if P has an interest in any shares or obligations of a company which are subject to any trust, the trustees of any settlement concerned

---

<sup>29</sup> But if P is a beneficiary, the trustees are associates of P under para (d).

<sup>30</sup> This is referring to the part of CTM60150 which summarises s.448(1)(b)(c) CTA 2010.

If trustees hold shares or securities on trust for A for life, remainder to B, then the trustees are associates of A and B.

What about beneficiaries of a discretionary trust? The question is whether they have an “interest” in the company; see 99.23.4 (Trustees and beneficiaries). The trustees would be associates of the person (if any) entitled on the termination of the trust.

Trustees are not associates of P under s.448(1)(d) where P’s relatives have an interest under the trust, provided that P does not have an interest.<sup>31</sup>

There is no equivalent rule for connected persons, which is narrower on this point.

The CT Manual continues:

**CTM60170 Close companies: tests: trustees, executors, etc [Jun 2016]**

...

[1] Where (c) of CTM60150 applies,<sup>32</sup> a participator interested by virtue of the trust in shares or obligations of the company which are subject to the trust has as his or her associate only the trustee or trustees of that trust.

[2] Any rights and powers they possess as trustees are deemed to belong to him or her but not any rights and powers they possess in any other capacity.

[3] As with (b) of CTM60150<sup>33</sup> the association is one way only.

The reason is the same as before. Point [2] is right as trustees are deemed to be a separate person. Point [3] is saying that the trustees are associates of the beneficiary, but the beneficiary is not an associate of the trustees.

### 99.6.6 *One way association*

“Associate” is not a symmetrical relationship, that is to say, if A is an associate of B, it does not necessarily follow that B is an associate of A.<sup>34</sup>  
Suppose:

---

31 But if P (or a relative) is settlor, the trustees are associates of P under para (b) or (c).

32 This is referring to the part of CTM60150 which summarises s.448(1)(d) CTA 2010.

33 See 99.6.4 (Trustees & settlor/relatives).

34 “Connected person” is different: see 99.12.4 (Reciprocity of connection).

Suppose the settlor of the trust is P or a relative of P:

- (1) The trustees are associates in relation to P, that is, they are associates of P. So P “controls” Y Ltd in the ultra-wide sense.
- (2) P is not an associate of the trustees, so the trustees do not “control” X Ltd.

HMRC agree. The CT Manual provides:

**CTM60170 Close companies: tests: trustees, executors, etc** [Jun 2016]

... You should note that the rights and powers of the settlor and his or her relatives may not be attributed to the settlement trustees under (b) of CTM60150, that is, this association is one way only.

The same applies if P is not the settlor, but has an interest under the trust.

### 99.6.7 *Associates: Companies*

Section 448(1) CTA 2010 provides:

In this Part [Part 10 CTA 2010, close companies] “associate”, in relation to a person (“P”), means ...

- (e) if P—
  - (i) is a company, and
  - (ii) has an interest in any shares or obligations of a company which are subject to any trust, any other company which has an interest in those shares or obligations

This might arise if A Ltd is held on trust for X Ltd for a period, with remainder to Y Ltd, but it is not likely to arise in practice.

The same applies to estates:

In this Part [Part 10 CTA 2010, close companies] “associate”, in relation to a person (“P”), means ...

- (g) if P—
  - (i) is a company, and
  - (ii) has an interest in any shares or obligations of a company

which are part of the estate of a deceased person,  
any other company which has an interest in those shares or  
obligations.

These must be a rare case.

Generally, if A owns a company, the company is *not* an associate. However this makes no difference, as the associate-attribution rule (discussed below) applies to controlled companies as well as to associates.

#### 99.6.8 *Personal representatives*

Section 448(1) CTA 2010 provides:

In this Part “associate”, in relation to a person (“P”), means ...

- (f) if P has an interest in any shares or obligations of a company which are part of the estate of a deceased person, the personal representatives of the deceased

There is no equivalent rule for connected persons, which is narrower on this point.

#### 99.7 **Associate-attribution rule**

Section 451(4) CTA 2010 provides (for the purposes of the definition of control in the ultra-wide sense):

There may also be attributed to a person all the rights and powers—

- (a) of any company of which the person has, or the person and associates of the person have, control,<sup>35</sup>
- (b) of any two or more companies within paragraph (a),
- (c) of any associate of the person, or
- (d) of any two or more associates of the person.<sup>36</sup>

In short, a person is treated as holding the rights of:

- (1) their associates
- (2) companies (not associates) which:
  - (a) they control or
  - (b) they and their associates control

I refer to this as the “**associate-attribution rule**”. (This label is not ideal,

---

35 Control here has the ultra-wide meaning: see s.450(1) CTA 2010 set out in 99.3.1 (Introduction).

36 Para (b) and (d) must be otiose, but it does not matter.

as under the rule applies to controlled companies which are not associates; but no short label will neatly fit all the circumstances.)

Section 451(5) CTA 2010 provides (for the purposes of the definition of control in the ultra-wide sense):

The rights and powers which may be attributed under subsection (4)—

- (a) include those attributed to a company or associate under subsection (3) [nominees], but
- (b) do not include those attributed to an associate under subsection (4).

One is not treated as holding the rights of an associate of an associate.

Section 451 uses the word “may”. Section 451(6) CTA 2010 provides (for the purposes of the definition of control in the ultra-wide sense):

Such attributions are to be made under subsection (4) as will result in a company being treated as under the control of 5 or fewer participators if it can be so treated.

The point is that an attribution could have the result that a company is not a close company (because if the rights are attributed to the person, they are not attributed to the associate); in such a case the attribution is not to be made.

This rule does not apply for the purposes of the definition of participator (that is, the fact that A is an associate of a participator does not entail that A is a participator).

## **99.8 Ultra-wide control: Critique**

*In R v IRC ex p. Newfields Developments:*

[10] It will be seen that although this definition starts in subs (2) with a concept of control which reflects its meaning in ordinary speech (‘a person shall be taken to have control of a company if he exercises, or is able to exercise or is entitled to acquire, direct or indirect control over the company’s affairs’), that fairly simple notion is enormously widened by subsequent subsections. ...

[11]... The effect of those cumulative definitions is that for the purpose of deciding whether a person ‘shall be taken to have control of a company’ under [what is now s.450], it may be necessary to attribute to him the rights and powers of persons over whom he may in real life have little or no power of control. Plainly the intention of the legislature was

to spread the net very wide.<sup>37</sup>

The attribution rule - together with the wide definition of associates - is what makes the s.450 definition of control ultra-wide. It is so wide that the word “control” is not apt to describe the concept (“some loose association” would be nearer the mark). It is confusing to depart from statutory terminology, but where the ultra-wide sense of control is used, the actuality demands quotation marks. For instance:

- (1) A has “control” of a company owned by a relative (say, a sister) even though A has no beneficial interest in the company, and, of course, A’s knowledge of the company is limited to information in the public domain.
- (2) A has “control” of a company owned by a trust of which a relative is a settlor, even though A is not a beneficiary and has no right to know that the trust had been made, or to know anything about the trust or its property. Indeed the relative need not be the settlor but only *a* settlor, so the rule would apply if (say) a sister provides a nominal amount of property to a trust.
- (3) A partner has “control” of a company owned by a partnership even if it is an investment partnership with a large number of unconnected partners. The modern use of partnerships as a collective investment vehicle raises this problem, because investment partnerships have large numbers of partners,<sup>38</sup> and partners do not know who their fellow partners are.

Hold-over relief illustrates the problem. The relief applies on a gift of a business asset to a company. This rule formerly allowed (relatively) straightforward avoidance by a gift to a company held by a non-resident trust. To counter this, s.167 TCGA provides (so far as relevant):

- (1) [Hold-over relief] shall not apply where the transferee is a company which is within subsection (2) below.
- (2) A company is within this subsection if it is controlled by a person

---

<sup>37</sup> 73 TC 532 at p.556.

<sup>38</sup> In 2014 there were 500 partnerships which filed an SA800 return and had more than 50 partners; some have more than 1,000 partners (unfortunately HMRC software did cope with more than 999) and, anecdotally, one had more than 20,000 partners; data from OTS “Review of partnerships: interim report” (2014) para 5.25 and appendix A. <https://www.gov.uk/government/publications/partnerships-review>

who, or by persons each of whom—

- (a) is not resident in the UK, and
- (b) is connected with the person making the disposal.

It is sensible that the relief should not apply on a gift to, say, a company owned by a non-resident. But the effect of the ultra-wide definition of control is that the relief is disapplied where there is any person in existence who:

- (1) is an associate of the person
- (2) is connected with the person and
- (3) is non-resident

Such a person would “control” the company (because the powers of the associate are attributed to them). This arose in *Reeves v HMRC*<sup>39</sup> where the taxpayer made a gift to a company which he owned. The disporor had a wife and children who were not UK resident. Each of them “controlled” the company (in the ultra-wide sense) as the taxpayer was their associate, and his powers were attributed to them. So the relief was disapplied under s.167. Had the taxpayer been single, that is, unmarried and childless, the relief would have applied. How absurd is that? In this case, the UT somehow amended the provision under the guise of purposive construction. The reader may prefer the reasoning of the FTT, and suspect this will be a case more often cited than followed.

The vast extent of the ultra-wide definition of control has three noteworthy consequences.

The first is practical: it is not possible for a person to know whether they control a company, or to draw up a list of all companies which they control. In practice there is substantial innocent non-compliance, and selective or arbitrary enforcement, where HMRC sufficiently dislike a taxpayer to make enquiries not normally made.

The second point is presentational, but presentation is important: anti-avoidance provisions which refer to control appear to the non-tax specialist to be reasonable because control seems a sensible limiting factor; but they operate unreasonably widely (because the meaning of *control* is so wide).

Thirdly, this leads to complexity. On occasions, where the difficulty caused by the extravagant definition has been recognised, the definition

---

39 [2018] UKUT 293 (TCC).

of control<sup>40</sup> is restricted.<sup>41</sup> However this is done on a piecemeal basis, typically where taxpayer lobbying has for some reason given rise to government action. So the result is a complexity which would not arise if a more restrained definition of control had been adopted in the first place.

The same difficulties apply to provisions using the term “connected person” (since that term uses the concept of “control” in the ultra-wide sense). It will in practice be impossible for a person to identify all persons who are “connected” with them. One individual might easily have 500 persons connected with them. If one could write a full list, it would vary continuously. Even an attempt to enquire would be grossly intrusive.

The point was made in responses to a consultation on the substantial donor rules:

charities described the connected persons rule as an “impossible requirement”, a “substantial administrative burden” and a “compliance nightmare”.<sup>42</sup>

There was nothing particularly unusual in the substantial donor rules, except, perhaps, that the charities who responded to the consultation felt a greater obligation than most taxpayers to seek to comply with the law. This difficulty applies generally to the use of the concepts of control and connected persons. But there it is. HMRC’s priority in anti-avoidance legislation is not to produce legislation with which everyone can comply:

---

40 or some concept in which the word control is used, such as associate or connected person.

41 For instance, ss.27, 29, 30 CTA 2010. Section 27 CTA 2010 provides:

“(2) In the application of section 451 (meaning of ‘control’: rights to be attributed) for the purposes of the determination, the references in section 451(4) and (5) to an associate of a person (“P”) include a partner of the person only if the condition in subsection (3) below is met.

(3) The condition is that tax planning arrangements which—

(a) involve P and the partner, and  
(b) secure a relevant tax advantage,

have at any time had effect in relation to the taxpayer company.”

For other examples, see 56.4.2 (“Control” and “participant”); 68.9.3 (20% rule: HMRC practice); 124.9.2 (“Connected”).

42 HMRC, Substantial Donors to Charity Consultation Responses Document (2009), para 3.12, [2009] STI 65.

it is to produce legislation which catches everyone they wish to catch.<sup>43</sup>

## 99.9 Control: Strict sense

This section considers the concept of strict-sense control.<sup>44</sup>

### s.995(1) ITA

This section has effect for the purposes of the provisions of the Income Tax Acts which apply this section.

### s.1124 CTA 2010

This section has effect for the purposes of the provisions of the Corporation Tax Acts which apply this section (or to which this section is applied).

This is misleading as the s.995/1124 definition is the default definition of control in the IT and CT Acts.<sup>45</sup> But it does not matter.

Section 995(2) ITA/1124 CTA 2010 provide the definition:

In relation to a body corporate<sup>46</sup> (“company A”), “control” means the power of a person (“P”) to secure—

- (a) by means of the holding of shares or the possession of voting power in relation to that or any other body corporate, or
- (b) as a result of any powers conferred by the articles of association or other document regulating that or any other body corporate, that the affairs of company A are conducted in accordance with P’s wishes.

*IRC v Lithgows* summarised the concept of strict-sense control:

... what the [predecessor of s.995(2) ITA 2007] is referring to is real control by one person,<sup>47</sup> so that the company is really his creature...<sup>48</sup>

43 Thus the definition of connected person in the tainted donation rules (which replaced the short-lived substantial donor rules) is even wider than the standard ultra-wide definition! See s.809ZQ ITA.

44 See 99.2.2 (Definitions of “control”).

45 See 99.2.3 (Default meaning of control).

46 See 86.4 (Body corporate).

47 Of course a company may be jointly controlled (in the strict sense) more than one person, the singular includes the plural; I do not think that *Lithgows* intended to suggest otherwise. *Pilkington v IRC* is an example.

48 39 TC 270 at p.274.

That does not take us very far. The word “real” never does.<sup>49</sup>

### 99.9.1 Boardroom control

The CT Manual provides:

**CTM80175: Groups: group relief: arrangements, effect 2** [Jun 2016]  
... **Control at various levels**

The ability to secure that the affairs of the company are conducted in accordance with a persons wishes includes consideration of how the business of the company as managed by its Board. Usually shareholders cannot dictate to or overrule the Board on management matters entrusted to the Board. So a necessary element of control is the ability to determine the composition of the Board, or failing that, to appoint directors who have the power to impose their decisions on directors appointed by any other shareholder.

The voting rights shareholders can exercise in general meetings will normally include the right to vote on the appointment and removal of directors. However, it is not safe to assume that possession of the majority of voting rights will bring automatic control of the Board. In *Irving v Tesco Stores (Holdings) Ltd* 58 TC 1, the claimant did not have Boardroom control of the surrendering company because:

- more than half of the directors were to be appointed by the minority shareholder and could not be removed without his consent, and
- the directors appointed by the claimant could not impose their decision on the directors appointed by the minority shareholder.

The Employee Share Schemes Unit Manual provides:

**43210. Control of the scheme company** [Sept 2013]

... [The Manual refers to the definition of control in the strict sense, and continues:]

Control will not necessarily be obtained simply because of the size of a share holding in the scheme company. Shareholders cannot ordinarily dictate to or overrule the Board of Directors in respect of matters of management entrusted to them. So a necessary element of control is (by voting powers or other powers) to have economic control of the company and the power of a person to secure that the affairs of the company are conducted in accordance with their long term wishes. The ability to determine the composition of the Board, or failing that, to

---

49 See App 6.1 (What do we mean by “real?”).

appoint directors who have the power to impose their decisions on directors appointed by any other shareholder are indicators of control.

...

The Corporate Finance Manual provides:

**35120. What is control?** [Aug 2018]

***Meaning of Control***

Section 472 CTA 2009 gives the meaning of control.<sup>50</sup> The test is whether a person can ‘secure that the company’s affairs are conducted in accordance with his wishes’. A person (an individual or company) can do this by

- holding most of the shares, or
- holding most of the voting rights in the company (or another company, such as the ultimate parent), or
- through any other powers, given through any document (such as the company’s Memorandum and Articles of Association).

***Control through shares***

A majority shareholding will usually ensure control, unless different classes of shares carry different voting rights. Share held on trading account and their voting rights are ignored for this purpose.

***Control through voting rights: example***

MK Ltd’s issued share capital is made up of

- 1,000 ordinary shares, carrying one vote each
- 2,000 ‘A’ ordinary shares with no voting rights.

KB Ltd owns 800 ordinary shares.

JR Ltd owns 200 ordinary shares and 2,000 ‘A’ ordinary shares.

Although JR Ltd has the majority of the issued shares, KB Ltd has control because it has the majority of the shares with voting rights, and can therefore use those voting rights to ensure that MK Ltd acts according to its wishes.

***Control through other powers: example***

AV Ltd owns 40% of the shares of BK Ltd, but it has the power, through BK Ltd’s Articles, to appoint more than half of BK Ltd’s board of directors. These directors will manage the business according to AV Ltd’s wishes, so AV Ltd has control...

The decision in *Tesco* - that strict-sense control refers to boardroom

---

<sup>50</sup> Author’s footnote: This definition is based on the definition of control in the strict sense.

control - was approved in *Farnborough Airport v HMRC*.<sup>51</sup>

It follows that shareholders do not have strict-sense control after a receiver is appointed. They still have power to appoint directors, but that does not confer boardroom control, as the authority of the directors to carry out the business of the company is suspended.<sup>52</sup>

See too 7.7 (Control: company law background).

### 99.9.2 Power to obtain control

In *Farnborough*, although the shareholders lost strict-sense control on appointment of a receiver, they could at any time pay off the debt so that the receiver would cease to act. They were able (at a cost) to re-acquire control. That made no difference:

77. We can see that if this argument were correct, it would give rise to immense scope for avoidance of what we consider to be the clear purpose of these provisions. It would allow for the creation of structures in which control of a company would for all practical purposes be lost but could be retained for group relief purposes by the inclusion of artificial provisions in appropriate terms allowing for control to be “regained” at some future date. We do not consider such an interpretation of the provisions would be consistent with their overall purpose and we therefore reject it.

The difficulty with this purposive argument is that strict-sense control applies not only in the context of group relief, but in many other contexts, so there should be no scope for purposive construction based on what suits the group relief rules. But the conclusion could be justified without the purposive argument. The definition of strict-sense control (unlike control in the ultra-wide sense) does not have any provision about the ability to secure control.

The non-tax case *R v Radio Authority ex p. Guardian Media Group* [1995] 1 WLR 334 concerned statutory wording equivalent to strict-sense control. The parties entered into an arrangement with the intention that (1) Company A should not have strict-sense control of company B; but (2) A should have the ability to acquire control of B by use of put and call

---

51 [2019] EWCA 118 at [30]. See Howard, “Remote Control” Taxation Practitioner, Sep 2011 p.45.

52 *Farnborough Airport v HMRC* [2019] EWCA 118.

options.

The judgement discussed the expression “able to secure” without coming up with any clear answers, but it favoured the view that A did not have strict-sense control.

### 99.9.3 *Governing documents*

Section 995(2) ITA provides that the power of control must arise:

- (a) by means of the holding of shares or the possession of voting power in relation to that or any other body corporate, or
- (b) as a result of any powers conferred by the articles of association or other document regulating that or any other body corporate ...<sup>53</sup>

*De facto* control is not enough. Legal power of control is not enough, unless it arises from matters within (a) or documents within (b). Thus directors by definition have boardroom control, but they do not necessarily have strict-sense control.

*Farnborough Airport Properties v HMRC* comments on what documents fall within (b):

It is clear from the syntax that the words “regulating that or any other body corporate” refer back both to ‘the articles of association’ and to the ‘other document’ contemplated in section 1124(2)(b) [CTA 2010 = s.995(2)(b) ITA], and accordingly the type of regulation being referred to must be similar in relation to both. Therefore, the phrase ‘other document regulating that or any other body corporate’ when read in context must, in our view, refer to a constitutional document akin to articles of association (i.e. one which sets out the governance arrangements for a body corporate which is binding upon members and officers by virtue of their status as such, without the need for them to agree separately to its terms). We infer that in referring to “other document”, the draftsman had mainly in mind the constitutional documents governing “non-standard” types of body corporate (e.g. companies incorporated overseas or bodies established by Royal Charter, where the legal terminology often does not include the phrase “articles of association”).<sup>54</sup>

In *Farnborough Airport Properties v HMRC* the first-tier tribunal held

---

<sup>53</sup> The CT equivalent is s.1124(2) CTA 2010.

<sup>54</sup> *Farnborough Airport Properties v HMRC* [2017] UKUT 394 (TCC) at [57].

that a receiver had power to secure that the affairs of the company were conducted in accordance with its wishes.<sup>55</sup> But even so, the receiver did not have control in the strict sense, according to the Upper Tribunal, because the debenture under which the receiver was appointed was not a “document regulating” the company. The issue did not arise in the CA. I do find that surprising, but the law is settled below the level of the Court of Appeal. The question may not often arise.

## **99.10 Strict-sense control: Trusts**

### *99.10.1 Trustee in personal capacity*

Trustees are generally treated as a separate notional person.<sup>56</sup> So an individual (or company) who is a trustee, even sole trustee, does not have control of a company owned by the trust, in their personal capacity, in any sense of control; only the trustees (the separate, notional trustee-person) can have control.

Cases from before the notional person rule was introduced are not now relevant on this point.<sup>57</sup>

### *99.10.2 Trustee as notional person*

Trustees of a substantive trust are constrained by fiduciary duties, for instance, they may be unable to remunerate themselves as directors. These matters do not prevent trustees from having strict-sense control of a

---

55 This point was left open at the UT appeal. In the CA the issue did not arise and was not discussed. But the wide powers normally exercisable by a receiver clearly constitute boardroom control.

56 See 6.3 (Trustees a distinct person).

57 For completeness: In *IRC v Lithgows* 39 TC 270, an individual (Sir Andrew Macharg, a leading Scottish accountant) was one of four trustees of a trust. The trust held a company whose shares were registered in the names of the trustees. Sir Andrew was the first named on the share register. HMRC argued that Sir Andrew personally controlled the company. The court rejected that argument. Although his was the only vote counted by the company, see (what is now) s.286 Companies Act 2006, Sir Andrew was only one of the trustees, and had to use his vote in accordance with the direction of the trustee majority, regardless of his own wishes.

In *Bibby v IRC*, the trustees were directors; it was held that the trustees jointly had a “controlling interest” (the term was not defined).

company held by the trust.<sup>58</sup>

On the other hand, a person with power to appoint trustees does not have strict-sense control of a company held by a trust, as they cannot require the trustees to act in accordance with their wishes. The same applies to a person with power to appoint directors of a corporate trustee.

### 99.11 Control of partnership

Although there are two principal definitions for control of companies (ultra-wide and strict-sense), there is only one definition of control of partnerships, which one may therefore call the standard definition.

Section 995(3) ITA provides:

In relation to a partnership, “control” means the right to a share of more than half the assets, or of more than half the income, of the partnership.

That might be regarded as a slightly artificial definition, as it has nothing to do with control in the natural sense, but it is precise.

### 99.12 Connected person

There are separate definitions for the separate taxes. There are more definitions elsewhere, sometimes the same and sometimes different. However the definition(s) considered in this chapter may be considered to represent a single and (more or less) standard definition.

It is a pity that the Tax Law Rewrite did not tidy up this mess; but there it is. The following table may assist navigation:

<b>Tax</b>	<b>Definition</b>	<b>Applied by</b>
CGT	s.286 TCGA	-
IT	s.993/994 ITA	s.989 ITA
CT	s.1122(1) CTA 2010	s.1316 CTA 2009; s.1176(1) CTA 2010
IHT	s.270 IHTA	-

#### 99.12.1 *Connected: IT/CGT/CT*

**s.286 TCGA**

**s.989 ITA**

**s.1122(1)CTA 2010**

---

58 This is almost self-evident; but if authority is needed, see *Bibby v IRC* 27 TC 167 which held that trustees of a substantive settlement may have a “controlling interest” (the term was not defined): the fact that they were trustees was not relevant.

Any question whether a person is connected with another shall for the purposes of this Act be determined in accordance with the following subsections of this section ...

The following definitions apply for the purposes of the Income Tax Acts—  
“connected”, in relation to two persons being connected with one another, is to be read in accordance with sections 993 and 994.<sup>59</sup>

This section has effect for the purposes of the provisions of the Corporation Tax Acts which apply this section (or to which this section is applied).

The CGT and IT definitions are substantially the same but the ITA drafting in some respects improves on the TCGA.

For CT, at first sight it seems s.1122(1) CTA 2010 applies for limited, specified CTA purposes. But s.1176(1) CTA 2010 provides:

Section 1122 (how to tell whether persons are connected) applies for the purposes of this Act unless otherwise indicated (whether expressly or by implication).

Section 1316 CTA 2009 is identical. Thus the CT s.1122 definition applies for the whole of the CTAs 2009 and 2010 unless disappplied. It could have been drafted more neatly.

The statutory expression is connected *with*, not connected *to*. Nothing should turn on the choice of preposition, but when using the term in the statutory sense it is better to follow the statutory language.

### 99.12.2 *Connected: IHT definition*

For IHT, s.270 IHTA provides:

For the purposes of this Act any question whether a person is connected with another shall be determined as, for the purposes of the 1992 Act it falls to be determined under section 286 of that Act, but as if in that section

- [a] ‘relative’ included uncle, aunt, nephew and niece and
- [b] ‘settlement’, ‘settlor’ and ‘trustee’ had the same meanings as in this Act.

Thus IHT adopts the CGT definition of “connected person” with a little

---

<sup>59</sup> The point is repeated (unnecessarily) elsewhere. Section 1021(1) ITA: “Section 993 (meaning of “connected” persons) applies for the purposes of this Act unless otherwise indicated.” Section 718 ITEPA: “Section 993 of ITA 2007 (how to tell whether persons are connected) applies for the purposes of this Act.”

tinkering.

### 99.12.3 *Definition in outline*

The definition of connected person is set out in five parts:

- (1) Family members
- (2) Trustees
- (3) Companies held by trusts
- (4) Partnerships
- (5) Companies generally

### 99.12.4 *Reciprocity of connection*

#### **s.286(1) TCGA**

... (any provision that one person is connected with another being taken to mean that they are connected with one another)..

#### **s.994(4) ITA/s.1123(4)CTA 2010**

If any provision of section 993 provides that a person (“A”) is connected with another person (“B”), it also follows that B is connected with A.

The meaning is that “connected” is a symmetrical relationship: if A is connected with B, then B is connected with A.

## **99.13 Connected: Family members**

#### **s. 286(2) TCGA**

A person is connected with an individual if that person is

- [a] the individual’s spouse or civil partner,
- [b] or is a relative,
- [c] or the spouse or civil partner of a relative,
- [i] of the individual, or
- [ii] of the individual’s spouse or civil partner.

#### **s. 993(2) ITA/s.1122(5) CTA 2010**

An individual (“A”) is connected with another individual (“B”) if—

- (a) A is B’s spouse or civil partner,
- (b) A is a relative of B,
- (c) A is the spouse or civil partner of a relative of B,
- (d) A is a relative of B’s spouse or civil partner, or
- (e) A is the spouse or civil partner of a relative of B’s spouse or civil partner.

### 99.13.1 *Relative*

#### **s. 286(8) TCGA**

#### **s.994(1) ITA/s.1123(1) CTA 2010**

In this section

“relative” means brother, sister, ancestor or lineal descendant.

In [s.993 ITA/s.1122 CTA 2010] and this section–

“relative” means brother, sister, ancestor or lineal descendant,

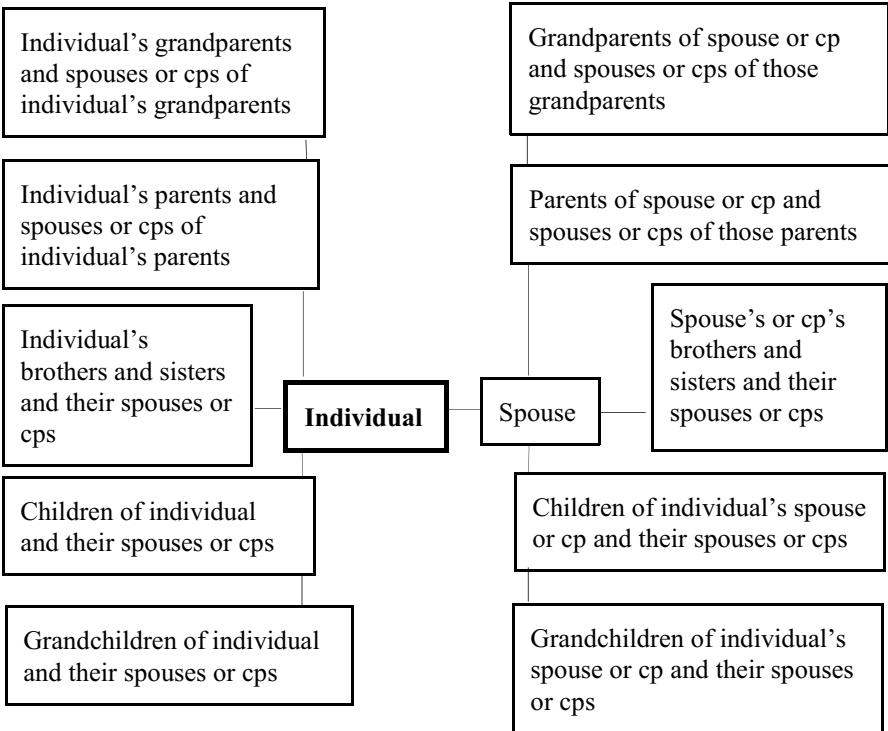

The CG Manual provides:

**CG14580. Connected persons** [Mar 2017]

... The term ‘relative’ does not cover all family relationships. In particular, it does not include nephews, nieces, uncles and aunts.

**14580. Connected persons** [Mar 2017]

The following diagram illustrates the provisions of Section 286(2) TCGA 1992. All of the people in the diagram are connected with the individual. They are not all connected with each other<sup>60</sup>

All the persons in the diagram are connected with the individual. Excluded are the widows or widowers, or surviving civil partners, of deceased persons, or relatives of a deceased spouse or of a deceased civil

60 In this diagram “spouse” includes civil partner.

partner unless connection can be established by a route not involving the deceased. A dissolution of a civil partnership or a divorce can similarly lead to persons in addition to the former civil partner or spouse ceasing to be connected with the individual.

Readers are invited to speculate whether this diagram is or is not a useful aid to comprehension.

In the definition of connected person for IHT, “relative” also includes an aunt, uncle, nephew and niece.<sup>61</sup> A two dimensional diagram could not do justice to that.

## 99.14 Connected: Trustees

### 99.14.1 *Settlor/connected persons*

#### **s.286(3) TCGA**

A person, in his capacity as trustee of a settlement, is connected with—

- (a) any individual who in relation to the settlement is a settlor,
- (b) any person who is connected with such an individual ...

#### **s.993(3) ITA/s.1122(6) CTA 2010**

A person, in the capacity as trustee of a settlement, is connected with—

- (a) any individual who is a settlor in relation to the settlement,
- (b) any person connected with such an individual

A trustee is not connected with a corporate settlor, because the word used is “individual”; but that does not often arise.

The CG Manual provides:

#### **CG14590. Connected persons: Trustees** [Jul 2019]

... The trustees are no longer connected to the persons connected to the settlor after the settlor has died.

More accurately, trustees are not connected with family or other individuals who would have been connected with the settlor when the settlor was alive.<sup>62</sup>

61 See 99.12.2 (Connected: IHT definition).

62 The FTT took this view in *Harris v HMRC* [2010] UKFTT 385 (TC) at [33]: “Section 839(3)(b) [ICTA] is expressed in the present tense, and s 839(3)(a) requires the settlor at the relevant time to be an individual who *is* the settlor. None of this is apt to include a deceased settlor.” In s.993 ITA, the Tax Law Rewrite deleted the second *is*, but that makes no difference.

Contrast the definition of associates; see 99.6 (Associates).

The CG Manual continues:

A settlor is considered to be connected with the trustee at the moment when property is put into the settlement.

Thus if an individual gives property to a trust, a loss arising on the disposal is a clogged loss even if the individual was not a settlor before the gift was made. That view is supported by the context.

The CG Manual continues:

For the purposes of determining whether a trustee is connected with an individual, the identity of the trustee is irrelevant. So, for example, if the trustee is the spouse or civil partner of the individual, he or she is only connected in his or her capacity as trustee if the case is within one of the three cases in CG14590.

This is correct since trustees are regarded as a notional person distinct from the persons who are actually the trustees.

The CG Manual continues:

Although under the tests outlined an individual is not connected with particular trustees, this may not prevent him or her from being connected with a company controlled by the trustees.

This is correct: see 99.15 (Connected: company). The Manual continues:

Under s.454 CTA, a beneficiary of a trust can be attributed with the rights and powers of trustees. In such circumstances he or she may control the company through the tests in s.450 CTA and hence be connected under s.286 TCGA.

There is no general rule that the rights of trustees are attributed to beneficiaries. However the attribution will often be made on the grounds that beneficiaries are relatives of the settlor<sup>63</sup> or (sometimes) that beneficiaries possess rights to income or capital.<sup>64</sup>

For the position if trusts own companies, see 99.20.5 (Two trusts each own company).

For completeness: s.286(3)(d)(e) TCGA deals with sub-fund

---

63 See 99.7 (Associate-attribution rule).

64 See 99.3.9 (Income: Para (c) control); 99.3.10 (Assets: Para (d) control).

settlements.<sup>65</sup> But since the sub-fund regime is dead-letter law (hardly ever found in practice) the point does not matter.<sup>66</sup>

#### 99.14.2 “Settlement”/”trustee”

##### **s.286(3ZA) TCGA**

For the purpose of subsection (3) above–

(a) ”settlement” has the same meaning as in section 620 of ITTOIA 2005

##### **s.994(1) ITA/s.1123(1) CTA 2010**

In [s.993 ITA/s.1122 CTA 2010] and this section–

”settlement” has the same meaning as in Chapter 5 of Part 5 of ITTOIA 2005 (see section 620 of that Act)

I refer to this as the “settlement-arrangement definition”.<sup>67</sup>

Why is this definition applied here? (Contrast the definition of associate.)

Perhaps non-corporate employers complained that a transfer by them to a pension fund was (before 2006) a connected person transaction, whereas a transfer by a company to a pension fund was not. Now a transfer to a pension fund is not a connected person transaction, as the transferor is not in principle connected with the trustees of a pension trust.<sup>68</sup> But that is speculation as no reason was ever provided.

Before 2006, the settlement-arrangement definition applied for IT but not for CGT. Perhaps the reason for the CGT change might have been that the same rule should apply for both taxes. Of course an alternative would have been to bring IT in line with CGT. Had a reason for the change been given, the issues could have been discussed. But there it is.

A consequence is that will trusts are not settlements for the purposes of the connected persons rules, which is odd.<sup>69</sup> It does not matter for s.286(3)(a)(b) (settlor/settlor-connected persons) because that rule only applies when the settlor is alive. But it matters for s.286(3)(c) (company

65 “(d) if the settlement is the principal settlement in relation to one or more sub-fund settlements, the trustees of the sub-fund settlements, and

(e) if the settlement is a sub-fund settlement in relation to a principal settlement, the trustees of any other sub-fund settlements in relation to the principal settlement.”

66 See 59.2 (Sub-fund regime).

67 See 1.5 (Settlement-arrangement definition).

68 See 94.39.1 (Is pension/EBT a settlement).

69 See 84.8.1 (Is estate a “settlement” for s.87). For completeness: This was overlooked in an obiter passage in *Harris v HMRC* [2010] UKFTT 385 at [32] where the relevant authorities were not cited.

connected with trust participator).

**s. 286(3ZA)(b) TCGA**

“trustee”, in relation to a settlement in relation to which there would be no trustees apart from this paragraph, means any person in whom the settled property or its management is for the time being vested.

**s.994(3) ITA/s.1123(3) CTA 2010**

... “trustee” , in the case of a settlement in relation to which there would be no trustees apart from this subsection, means any person—  
 (a) in whom the property comprised in the settlement is for the time being vested, or  
 (b) in whom the management of that property is for the time being vested.

This is the standard form where legislation refers to trustees of a settlement-arrangement.<sup>70</sup>

There is no definition of settlor. Since settlement has the settlement-arrangement definition, it is considered that settlor should also have the settlement arrangement definition.<sup>71</sup> But the point will not often arise.

For the definition of connected person for IHT, settlement/settlor/trustee have their IHT meanings: s.270 IHTA.

## 99.15 Connected: Company

### 99.15.1 Outline

In outline:

<b>Connection</b>	<b>See para</b>
<u>A person (individual/co/trust/PRs) may be connected with a co</u>	
1 person has control	99.15.3
Connected persons have control	99.15.4
Persons act together to exercise control	99.15.8
<u>A company may be connected with another company</u>	
One person has control of both companies	99.15.5
Connected persons have control of both companies	99.15.6
One group of persons has control of both companies	99.15.7
<u>A trust may be connected with a company</u>	
Close company in which the trust has an interest	99.16
Subsidiary of such a company	99.16

These rules overlap, so there may be more than one reason why a person

<sup>70</sup> See 57.3 (Non-classic trust).

<sup>71</sup> See 94.2 (Definitions of “settlor”).

is connected with a company, but that does not matter.

For completeness: the standard IT/CT definitions of company are disapplied for the purposes of the definition of connected person in s.993/994 ITA & 1122/1123 CTA 2010.<sup>72</sup> Instead, s.994 ITA/s.1123 CTA 2010 provide their own definition of company, in terms equivalent to the CGT definition of company.<sup>73</sup> But since all these definitions are (almost) the same, this makes (almost) no difference.<sup>74</sup>

### 99.15.2 “Control” test

#### **s. 288(1) TCGA**

In this Act, unless the context otherwise requires... “control” shall be construed in accordance with sections 450 and 451 of CTA 2010

#### **s.994(1) ITA/s.1123(1) CTA 2010**

In [s.993 ITA/s.1122 CTA 2010] and this section ... “control” is to be read in accordance with sections 450 and 451 of CTA 2010 (except where otherwise indicated)

“Control” in the connected person test is generally used in the ultra-wide sense. The words in brackets allude to two minor exceptions:

- (1) In the phrase “acting together to secure or exercise control”, the context shows that control is used in a natural sense.
- (2) In the (relatively unimportant) context of s.993(3)(e)<sup>75</sup> the word control is used in the strict sense.

For this reason the concept of being connected with a company is ultra-wide, and no-one could draw a complete list of all the companies with which they are connected.

---

72 See 86.3 (Definition of “company”).

73 Section 994 ITA/s.1123 CTA 2010 provide:

“(1) In section 993/1122 and this section ... ‘company’ includes any body corporate or unincorporated association, but does not include a partnership (and see also subsection (2)).

(2) For the purposes of section 993/1122—

(a) a unit trust scheme is treated as if it were a company, and

(b) the rights of the unit holders are treated as if they were shares in the company.”

74 The only difference concerns the specialist topic of local authorities; see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), para 44.5.1 (Group relief) online version <https://www.taxationofcharities.co.uk>

75 See 99.16 (Company connected with trust).

99.15.3 *Person controls company***s. 286(6) TCGA**

A company is connected with another person, if

[a] that person has control of it ...

**s. 993 (6) ITA/s.1122(3) CTA 2010**

A company is connected with another person (“A”) if—

(a) A has control of the company

Since control is ultra-wide, this head of connection is also ultra-wide. See 99.20.2 (Two persons each own co).

99.15.4 *Connected persons control co***s. 286(6) TCGA**

A company is connected with another person, if...

[b] if that person and persons connected with him together have control of it.

**s. 993 (6) ITA/s.1122(3) CTA 2010**

A company is connected with another person (“A”) if—

(b) A together with persons connected with A have control of the company.

If two persons (“X” and “Y”) are associates, this is not needed because the rights of X are attributed to Y.<sup>76</sup> For instance, suppose:

- (1) X and Y are relatives or partners.
- (2) X and Y each own 30% of A Ltd.

X “controls” A Ltd so this provision is not needed. It is only relevant in a case where two persons are connected but not associates.

Suppose:

- (1) A and B are connected persons but not associates.
- (2) B controls X Ltd and A has no interest in X Ltd.

It is considered that A is connected with X Ltd. It might be argued that A and B do not *together* have control, but various anomalies would arise, and that is reading too much into the word *together*.

99.15.5 *One person controls 2 co’s***s. 286(5)(a) TCGA****s. 993 (5) ITA/s.1122(2) CTA 2010**

---

<sup>76</sup> See 99.7 (Associate-attribution rule).

A company is connected with another company

(a) if the same person has control of both...

A company is connected with another company if–

(a) the same person has control of both companies,

A simple case is if one person owns two companies:

X Ltd is connected with Y Ltd.

99.15.6 *Connected persons control 2 companies*

**s. 286(5)(a) TCGA**

A company is connected with another company

(a) if ..  
 [i] a person has control of one and  
 [ii] [A] persons connected with him,  
 or  
 [B] he and persons connected with  
 him, have control of the other

**s. 993 (5) ITA/s.1122(2) CTA 2010**

A company is connected with another company if–

(b) a person (“A”) has control of one company and persons connected with A have control of the other company,

If two persons (“X” and “Y”) are associates, this is not needed because:

- (1) the rights of X are attributed to Y,<sup>77</sup> so
- (2) Y”controls” the company, so
- (3) Y is connected with the company.

The rule is relevant in a case where two persons are connected but not associates.

99.15.7 *Group controls 2 companies*

**s. 286(5)(b) TCGA**

**s. 993 (5) ITA/s.1122(2) CTA 2010**

---

<sup>77</sup> See 99.7 (Associate-attribution rule).

A company is connected with another company...

(b) if

[i] a group of 2 or more persons has control of each company, and

[ii] the groups either

[A] consist of the same persons or

[B] could be regarded as consisting of the same persons by treating (in one or more cases) a member of either group as replaced by a person with whom he is connected.

A company is connected with another company if—

(d) a group of two or more persons has control of both companies and the groups either consist of the same persons or could be so regarded if (in one or more cases) a member of either group were replaced by a person with whom the member is connected.

The group may be vast and does not need any common purpose or identity. In *Kellogg Brown v HMRC*<sup>78</sup> two quoted companies each with over 16,000 shareholders were connected since there was sufficient overlap between the two groups.

X Plc and Y Plc are connected. The reader may think this a somewhat unimaginative construction of this head.

### 99.15.8 *Acting together to control*

#### s. 286(7) TCGA

Any 2 or more persons acting together to secure or exercise control of a company shall be treated in relation to that company as connected

[i] with one another and

[ii] with any person acting on the directions of any of them to secure or exercise control of the company.

#### s. 993 (7) ITA/s.1122(2) CTA 2010

In relation to a company, any two or more persons acting together to secure or exercise control of the company are connected with—

(a) one another, and

(b) any person acting on the directions of any of them to secure or exercise control of the company.

<sup>78</sup> *Kellogg Brown & Root Holdings (UK) v HMRC* [2010] STC 925

I refer to this as the “**acting-together rule**”.

The fact that persons are acting together, and so become connected with each other, may have the consequence that they become connected with the company.

For the purposes of discussion I abbreviate “secure or exercise control” to “control”.

The CG Manual comments on the phrase “acting together to control”:

**CG14622 2 or more persons acting together to control** [Jul 2019]

... For this subsection to operate it is not sufficient for the persons to have control of the company, the persons do have to act in some way to control the company. However, for example, exercising control could mean refraining from voting in a particular way and so enabling another person to win a vote, as well as by actually voting.

In *Steele v EVC International* 69 TC 88 one issue was whether two joint shareholders were “acting together”. The Court of Appeal said:

the mere coincidence of voting the same way at general meetings is insufficient. Likewise, combining together to carry a particular resolution would not normally be sufficient to constitute acting together to exercise control ...

So far so good. The court continued:

... the shareholders’ agreement set out in great detail how EVC was to be constituted and administered. At all material times the agreement was in force and performed and observed by each of the shareholders. ... such performance and observation constituted the necessary “acting together”.

The existence of a shareholder agreement does not show that the shareholders are acting together to control. It depends on the terms of the agreement. In *EVC*, most of the shareholder agreement seem to be indicative of each side protecting its interest acting separately! The agreement ensured that the company was deadlocked at board level as it was at general meeting level. However one important clause did suggest the shareholders were acting together:

EniChem and ICI should procure that not less than two-thirds of the profits of the joint venture available for dividend should be distributed to the shareholders and should procure that the shareholders vote

accordingly to achieve this.

The issue of acting together has been discussed in the context of flat management companies, where there could be an ATED charge if the members of the company act together to exercise control.<sup>79</sup> CIOT express concern on this point:

This state of affairs might not be so unusual. Even if there is no formal agreement, there may be an understanding that decisions are only taken unanimously. While there are clearly cases where it would be possible to say that the shareholders of a flat management company, even if they are all directors, do not act in concert, there may be an agreement to that effect. In our members' experience, some management companies that act effectively as "cooperatives" will have put in place shareholder agreements that new flat owners have to sign up to as a condition of becoming shareholders that will produce the necessary nexus.<sup>80</sup>

The better view is that "acting together to control" requires more than acting collegiately, or even an agreement to act so far as possible with unanimity. If so it will be rare for the acting-together rule to apply to flat management companies. It seems that HMRC agree:

we think that although this might be possible in the case of these types of companies, it must be unusual. You cite the case of *Steele v EVC International NV* (69 TC 88) which looked at the phrase "acting together". In that case the two shareholders entered into a shareholders agreement which continued to be recognised and implemented by the parties. The shareholders agreement was a very long document making the most extensive provision of the joint venture between two shareholders. It was found on those particular facts that the two were acting together.

It seems unlikely that an ordinary memorandum and articles of association will constitute the shareholders "acting together". In fact, it would be unconscionable (?) because it would follow that all

---

79 See 93.14.4 (Flat management company).

80 CIOT, open letter to HMRC "Application of ATED to flat management companies" (2014).

[https://www.tax.org.uk/system/files\\_force/file\\_uploads/141114%20ATED%20and%20flat%20management%20companies%20-%20CIOT%20comments.pdf?download=1](https://www.tax.org.uk/system/files_force/file_uploads/141114%20ATED%20and%20flat%20management%20companies%20-%20CIOT%20comments.pdf?download=1)

shareholders in a company would be connected. The cases it [the acting-together rule] would affect would be where there is a comprehensive shareholders agreement which would dictate how the company would be run.<sup>81</sup>

Of course the issue depends on the facts, and in particular on the terms of a shareholder agreement; but the fact that shareholders act collegiately should not be sufficient.

The Takeover Code<sup>82</sup> has a comparable concept, “acting in concert”, and guidance in the code may be relevant to the acting-together rule.

*Foulser v MacDougall* is another example of acting together, but the facts were unusual. An individual (in short) owned a trading company through a life policy wrapper. He arranged the sale of the trading company on behalf of its insurance company shareholder. The insurance company shareholder and the individual were held to be acting together to control.

A and B may be acting together even though A owns all the shares and B owns none. *Foulser* was such a case. The court said:

there is no reason why the concept of two or more persons “acting together to ... exercise control of a company” should, necessarily, be confined to cases where each of the persons acting together has less than a controlling shareholding, so that (absent some combination between them) none would be able to exercise control individually. It seems to me that the concept is sufficiently wide to include cases where one person (who has shareholder or voting control) agrees to exercise that control in accordance with the wishes of another.<sup>83</sup>

But in such a case the individual will also have general control under s.450(2); see 99.3.6 (De facto control).

### 99.15.9 *Directors*

The CG Manual considers the position of directors:

**CG14623. Directors of a company** [Jul 2019]

Directors of a company are not necessarily connected persons in relation

---

81 Open email from HMRC to CIOT (26 July 2015) (emphasis added).

82 <http://www.thetakeoverpanel.org.uk/the-code/download-code>

83 [2007] STC 973 at [42].

to transactions between themselves. Whether or not one of them controls the company or two or more together control the company, they are not connected persons unless they are ‘relatives’, see CG14580, or partners, see CG14610. TCGA92/S286 (7) makes two or more directors connected persons only in relation to transactions with the company.

The last sentence means that if directors are shareholders and are acting together to control at shareholder level, they are connected persons only in relation to transactions with the company.

#### 99.15.10 *Personal representatives*

The definition of connected person does not mention PRs (unlike the definition of “associates”). PRs cannot be connected with individuals or trustees.<sup>84</sup>

PRs may be connected with a company. They are “persons” so they are connected if (inter alia) they have control of the company or if they act together with others to exercise control.

#### 99.16 Company connected with trust

##### s. 286(3)(3A) TCGA

A person, in his capacity as trustee of a settlement,<sup>85</sup> is connected with ...

##### s.993(3) ITA/s.1122(6) CTA 2010

A person, in the capacity as trustee of a settlement, is connected with–

---

84 The same conclusion was reached, though in a more roundabout way, in *Harris v HMRC* [2010] UKFTT 385 at [31] - [33].

85 The phrase “A person, in his capacity as trustee of a settlement” is just a roundabout way of saying “a trustee”, because a trustee is regarded as a distinct person. A settlement here does not include a will trust: see 99.14.2 (“settlement/”trustee”).

(c) any body corporate<sup>86</sup> which is connected with that settlement,  
 (3A) For the purpose of subsection (3) above a body corporate is connected with a settlement if-  
 (a)[i] it is a close company (or only not a close company because it is not resident in the UK) and  
 [ii] the participators<sup>87</sup> include the trustees of the settlement; or

(b) it is controlled (within the meaning of section 1124 of the Corporation Tax Act 2010 [control in strict sense]) by a company falling within paragraph (a) above.

(c) any close company whose participators include the trustees of the settlement,  
 (d) any non-UK resident company which, if it were UK resident, would be a close company whose participators include the trustees of the settlement,

(e) any body corporate controlled (within the meaning of section 995) by a company within paragraph (c) or (d)

In TCGA, it is confusing that the drafter used the expression “connected with a settlement” since in that expression the term “connected” is not used in the normal CGT sense of connected persons. But it does not matter. The IT equivalent is better drafted.

Thus trustees are connected with a close company in which they have any interest, no matter how small, which is not the case for non-trustees.

## 99.17 Associated co/joint control

### 99.17.1 “Associated company”

Section 449 CTA 2010 defines “associated company”:

For the purposes of this Part [Part 10 CTA 2010, close companies], a company is another’s “associated company” at a particular time if, at that time or at any other time within the preceding 12 months—

- (a) one of them has control of the other, or
- (b) both are under the control of the same person or persons.

---

86 It seems odd that the subsection refers to body corporate, rather than company. This is for historical reasons: the subsection originates from para 21 sch 7 FA 1965, which incorporated s.411(4) ITA 1952, in which the term used was “body corporate”. But it does not matter, because unless the body corporate is a close company it does not fall within (3A). See 86.4 (“Body corporate”).

87 See 99.22 (Definitions of participator).

This is just for the purposes of Part 10, but similar definitions apply elsewhere. The expression does not often arise in matters relating to this book, but it comes up occasionally.

There are three possibilities which may make two companies associated:

- (1) One controls the other
- (2) One person controls both
- (3) The same group of persons controls both

I refer to (3) as “**joint control**”.

Associated companies will necessarily be connected with each other.

It is possible for connected companies not to be associated companies though in practice that would not often arise. An example is if:

- (1) A owns A Ltd
- (2) B (who is connected with A but not an associate of A) owns B Ltd

A Ltd and B Ltd are connected with each other but not associated companies.

#### 99.17.2 *Joint control*

Joint control matters for many purposes. The most important for this book are:

- (1) The definition of associated companies (and similar definitions)
- (2) Connected persons<sup>88</sup>

The CT Manual discusses the issue in the context of the former small profits relief, which was restricted for associated companies. Section 25(4) CTA 2010, now repealed, provided a similar definition, so far as relevant:

*... a company is an associated company of another at any time when...both are under the control of the same person or persons.*

Section 450(5) CTA 2010 provides:

If two or more persons together satisfy any of the conditions in subsections (2) and (3), they are treated as having control of C.

Suppose A and B (not associates) each hold 50% of a company. A does

---

88 See 99.15.7 (Group controls 2 companies).

not have control, and B does not have control. A and B together do have control.

In *HMRC v UBS*:

The UT’s view ... appears to have been that if DB controlled Investec in relation to the latter’s voting at general meetings of Dark Blue, then ‘the test of control in section 416(3) [ICTA = s.450(5) CTA 2010] was satisfied’. [Counsel for the taxpayer] submitted, and I agree, that section [450(5)] is irrelevant to our facts. Investec, by virtue of its holding in Dark Blue, was formally in control of Dark Blue within the meaning of section 416(1) [ICTA = 449 CTA 2010, definition of “associated company”]. The relevant question for our purposes, however, is whether Investec was, vis-à-vis its role as a Dark Blue shareholder, itself in the control of DB. If it was, the opening words of section 416(2) [ICTA = s.450(2) CTA 2010] are satisfied and DB and Dark Blue are associated companies. If it was not, those words are not satisfied. I do not understand what section [450(5)] is thought to have to do with it. It is contemplating a case in which, for example, DB and X Ltd together had relevant control of Dark Blue via their combined control of Investec. On no footing is that this case.<sup>89</sup>

The CT Manual provides:

**60250 Control: In multiple** [Mar 2020]

More than one person or one group of persons may ‘control’ a company. For example, one person may have the greater part of the voting power, while two people hold the greater part of the issued share capital and a group of three people are entitled to the greater part of the assets in a winding up. All three combinations of people can be taken to have control of the company at the same time.

If say three persons, A, B and C, each hold one third of the shares in a company, and they are not connected<sup>90</sup> in any way which would allow the rights and powers of one to be attributed to another, then control is held by A and B, or B and C, or A and C but not A, B and C together. This is because in determining whether companies are ‘associated companies’ the focus is on ‘minimum’ controlling combinations, disregarding those containing superfluous members. Thus, a company controlled by unconnected persons A, B and C, but not by any one or

---

89 [2014] EWCA Civ 452 at [133].

90 Author’s footnote: The correct term is “associated”.

two of them alone, is not regarded as associated with any company controlled by one of them alone (as in the first paragraph above) or by any two of them (as in the second paragraph). See CTM03730 for an example.

However deciding on the ‘minimum’ controlling combination for any of the tests set out at s.416(2)(a) to (d) CTA does not mean you have to establishing the smallest controlling combination of each company when determining whether companies are associated companies.

In his High Court judgment in *R v IRC ex p. Newfields Developments* (73 TC 532 at page 541B) Moses J said that [what is now s.450 CTA 2010] had to be exercised for the statutory purposes for which it was conferred:

“In the context of Section 13 [ICTA, later s.24, 25 CTA 2010], that purpose is to ascertain whether, in the instant case, two companies are under the control of the same person pursuant to Section 13(4) [ICTA, later s.25(4) CTA 2010]. That is the statutory question. If it is possible to answer that in the affirmative, by exercising the power of attribution, in my judgment, that power must be exercised. Conversely, if that question, namely, are the two companies under the control of the same person, can only be answered in the affirmative by refraining from the exercise of the power, then the power should not be exercised”.

So in the first sub-paragraph above, it may be able to determine that two companies are associated because the three people who together have an entitlement to the greater part of the assets in a winding up also together hold the greater part of the voting power in another company. In that case this group would control the company and not the single or two person combinations. The identical controlling combination does not need to be established by the same test in each company.

In *Ghelanis Superstore v HMRC*<sup>91</sup> two family companies were, I think, held as follows:

Shareholder	Company X		Company Y	
	Own	Own + associates	Own	Own + associates
Father	12.5%	50% <sup>92</sup>	9%	51%
Mother	12.5%	50%	8%	51%

91 [2014] SFTD 835.

92 The father’s associates are the mother and the two sons.

Son 1 (S1)	12.5%	62.5% <sup>93</sup> [control]	17%	67% [control]
Wife of S1	12.5%	25% <sup>94</sup>	16%	33%
Son 2 (S2)	12.5%	62.5% [control]	17%	67% [control]
Wife of S2	12.5%	25%	16%	33%
Unconnected	<u>25%</u>	25%	<u>17%</u>	17%
Total	<u>100%</u>		<u>100%</u>	

The two companies are connected (and were associated companies) as they are both under the “control” (in the ultra-wide sense) of one person, namely S1 (and the same could be said of S2). If that is right, the tribunal (in which the parties were not represented by Counsel) reached the right result for the wrong reason.

Suppose the facts were those assumed by the Tribunal, in short:

Shareholder	Company X	Company Y
A <sup>95</sup>	25%	17%
B	25%	33%
C	25%	33%
D	25%	17%

Company X is controlled by any 3 of the 4 shareholders thus allowing the following combinations:

A+B+C	(75%)
A+B+D	(75%)
A+C+D	(75%)
B+C+D	(75%)

Company Y is controlled by any of the following combinations:

B + C	(66%)
A+B+D	(67%)
A+C+D	(67%)

On this basis:

- (1) The companies were associated companies as one group (A + B + D) controlled both (the same could be said of the group A + C + D).

---

93 The son’s associates are his wife, his brother, and his parents.

94 The wife’s associate is her husband.

95 The tribunal treated married couples as one unit with no other associates; the fact that a parent and child are associates, and that siblings are associates, was overlooked.

(2) The companies were also connected with each other, for that reason (along with others).

The abolition of small profits relief is a significant simplification (a rarity in UK tax) and as a result the issue of associated companies/joint control will now less often arise.

## 99.18 Connected: Partners

### s. 286(4) TCGA

Except in relation to acquisitions or disposals of partnership assets pursuant to bona fide commercial arrangements, a person is connected with

[a] any person with whom he is in partnership,

[b] and with [i] the spouse or civil partner

[ii] or a relative of any individual with whom he is in partnership.

### s.993(4) ITA

A person who is a partner in a partnership is connected with—

(a) any partner in the partnership,

(b) the spouse or civil partner of any individual who is a partner in the partnership, and

(c) a relative of any individual who is a partner in the partnership

But this subsection does not apply in relation to acquisitions or disposals of assets of the partnership pursuant to genuine commercial arrangements.

### s.1122(7)-(8) CTA 2010

(7) [identical to ITA]

[identical to ITA]

[identical to ITA]

[identical to ITA]

(8) But subsection (7) does not apply in relation to acquisitions or disposals of assets of the partnership pursuant to genuine commercial arrangements.

A partner is connected with a company controlled by a partnership because the partner has “control” of the company<sup>96</sup> and a person is

---

96 See 99.6.3 (Associates: Partners).

connected with a company which they “control”.<sup>97</sup>

### 99.19 Connected: Unit trust

A unit trust is not a settlement,<sup>98</sup> so the trustee connected person rules do not apply.

**TCGA**                    **s.994(2) ITA/s.1123(2) CTA 2010**

[No provision]      For the purposes of [s.993 ITA/s.11222 CTA 2010]–

- (a) a unit trust scheme is treated as if it were a company, and
- (b) the rights of the unit holders are treated as if they were shares in the company.

I refer to this as the “**deemed-company fiction**”. This applies the company connection person rules to a unit trust.

The deemed-company fiction generally applies for CGT (but it applies for all purposes, not just for the connected person rule).<sup>99</sup> But there is a gap: for CGT, the deemed-company fiction does not apply to a unit trust which is a transparent offshore fund.<sup>100</sup> So a unit trust of that kind is not connected with anybody.

### 99.20 Examples

The following examples address two questions:

- (1) who has “control” (in the ultra-wide sense)
- (2) who is connected

#### 99.20.1 *Chain of companies*

Suppose a straightforward chain of companies:

A  
| 51% or more

<sup>97</sup> See 99.15.3 (Person controls company).

<sup>98</sup> Because there is no element of bounty (gratuitous intent); see 99.14.2 (“settlement”/“trustee”).

<sup>99</sup> See 66.5 (Unit trust CGT: Deemed company).

<sup>100</sup> See 66.7 (Unit trust transparent offshore fund).

*Control*

A controls X Ltd in every sense.

A controls Y Ltd in every sense. More specifically, A controls Y Ltd in the ultra-wide sense for two independent reasons:

- (1) A has indirect control over the affairs of Y Ltd.
- (2) A controls X Ltd so its rights are attributed to A.<sup>101</sup>

*Connected persons*

A is connected with X Ltd and with Y Ltd, because A has control of them. X Ltd is connected with Y Ltd because X Ltd has control of it.

That is a commonsense result, but common sense does not take us far in this area of law.

99.20.2 *Two persons each own co*

Suppose two individuals are associates and each own a company:

*Control*

X controls X Ltd in every sense.

X “controls” Y Ltd in the ultra-wide sense, because Y is an associate so the rights of Y are attributed to X.<sup>102</sup>

*Connected persons*

- (1) X is connected with X Ltd and with Y Ltd (because X has “control”).
- (2) X Ltd is connected with Y Ltd (because one person has “control” of both companies).
- (3) X is not necessarily connected with Y (because associates are not necessarily connected persons, though the definitions do overlap).

---

<sup>101</sup> See 99.7 (Associate-attribution rule).

<sup>102</sup> See 99.7 (Associate-attribution rule).

Suppose X and Y are connected individuals but not associates:

*Control*

X controls X Ltd in every sense.

X does not “control” Y Ltd.

*Connected persons*

- (1) X is connected with X Ltd.
- (2) It is considered that X is connected with Y Ltd (because a connected person has control).<sup>103</sup>
- (2) X Ltd is connected with Y Ltd (because X has control of X Ltd and a person connected with X has control of Y Ltd).<sup>104</sup>

99.20.3 *Two persons jointly own co*

Suppose individuals A and B are associates and each own 50% of X Ltd.

*Control*

A “controls” X Ltd in the ultra-wide sense, because B is an associate so the rights of B are attributed to A.<sup>105</sup>

*Connected persons*

- (1) A is connected with X Ltd (because A has “control”).
- (2) A is not necessarily connected with B (because associates are not necessarily connected persons, though the definitions do overlap).

Suppose A and B are connected individuals but not associates: for instance, if they are acting together to control, so that they are treated in

103 See 99.15.4 (Connected persons control co).

104 See 99.15.6 (Connected persons control 2 companies).

105 See 99.7 (Associate-attribution rule).

relation to that company as connected with one another:

*Control*

A does not control X Ltd.

*Connected person*

A is connected with X Ltd (because A and a connected person together have control).<sup>106</sup>

Suppose X Ltd has a subsidiary thus:

It is considered that A is connected with Y Ltd since A and persons connected with A (either B or X Ltd) together control Y Ltd.<sup>107</sup>

99.20.4 *Two persons jointly own 2 cos*

Suppose A and B jointly own two companies thus:

X Ltd is connected with Y Ltd even if A and B are not connected and not associates, as the one group of persons (A and B) has control of each company.<sup>108</sup>

106 See 99.15.4 (Connected persons control co).

107 See 99.15.4 (Connected persons control co).

108 See 99.15.7 (Group controls 2 companies).

The same would apply if Y Ltd were owned by A and C, if C was connected with B.

The same would apply if Y Ltd were owned by C and D, if C was connected with A, and D was connected with B.

### 99.20.5 *Two trusts each own company*

Suppose:

- (1) A creates a trust (trust A) which owns a company (A Ltd)
- (2) B (an associate of A) creates a trust (trust B) which owns a company (B Ltd), thus:

#### *Control*

- (1) A has “control” of A Ltd (the trustees of trust A are associates of A, because A is the settlor; so their rights are attributed to A)
- (2) A has “control” of B Ltd (the trustees of trust B are associates of A; so their rights are attributed to A)

#### *Connected person*

- (1) A is connected with Trust A (because A is the settlor)
- (2) A is connected with A Ltd (because A “controls” A Ltd)
- (3) A is connected with B Ltd (because A “controls” B Ltd)
- (4) A Ltd is connected with B Ltd (because A has “control” of both)
- (5) A is not necessarily connected with B or trust B (because associates are not necessarily connected persons, though the definitions do overlap).
- (6) The trustees of trust A are not connected with the trustees of trust B, but that does not stop their companies from being connected. Note that it is not necessarily possible for A Ltd or the trustees of trust A to know that A Ltd is connected with B Ltd.

What if A and B have died? If there is any person alive who is a relative of A and B, within the associates definition, that person has “control” of both companies and so A Ltd and B Ltd are still connected. But if A and

B have no relatives (as defined) then the two companies are not in principle connected.

Suppose A is the settlor of both trusts, thus:

The analysis is as follows:

*Control*

(1) A has “control” of A Ltd and B Ltd.

*Connected person*

- (1) A is connected with Trust A and with Trust B (because A is the settlor).
- (2) A is connected with A Ltd and with B Ltd (because A has “control”).
- (3) A Ltd is connected with B Ltd (because A has “control” of both).
- (4) The trustees of trust A are not connected with the trustees of trust B but that does not stop their companies from being connected.

What if A has died? If there is any person alive who is a relative of A, within the associates definition, the relative has “control” of both companies and so A Ltd and B Ltd are still connected. But if A has no relatives (as defined) then the two companies are not in principle connected.

99.20.6 *Two trusts jointly own co*

Suppose individuals A and B are settlors of trusts which each own 50% of X Ltd. The trustees are Trustee-A and Trustee-B:

The analysis is as follows:

*Control*

- (1) The trustees of trust A and trust B are associates of A.
- (2) A has “control” of X Ltd (because the associates’ rights are attributed to A).

*Connected person*

- (1) A is connected with Trust A (because A is the settlor).
- (2) A is connected with X Ltd (because A “controls” X Ltd).
- (3) A is not necessarily connected with B or trust B (because associates are not necessarily connected persons, though the definitions do overlap).

Suppose A is the settlor of both trusts. The analysis is as follows:

*Control*

- (1) A has “control” of A Ltd and B Ltd.

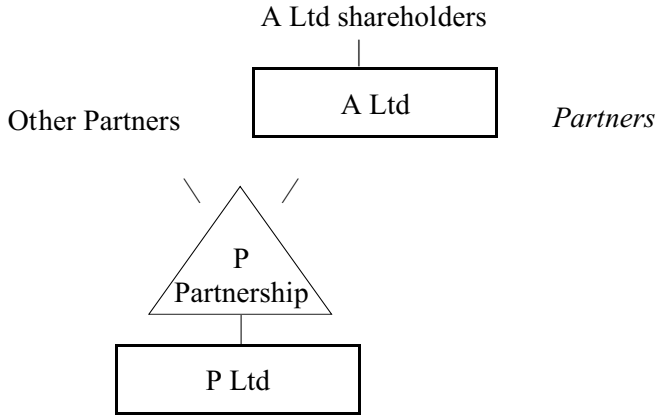

*Connected person*

- (1) A is connected with Trust A and with Trust B (because A is the settlor).
- (2) A is connected with X Ltd (because A has “control”).
- (3) The trustees of trust A are not connected with the trustees of trust B but that does not stop A from being connected with X Ltd.

99.20.7 *Shareholders in partner co*

Suppose a partnership (P) has a corporate partner (A Ltd) and P holds an underlying company (PS Ltd).

Diagrammatically:

The partners in P are associates.

Each partner “controls” P Ltd, because their associates’ rights are attributed to them. So P Ltd is connected with partners.

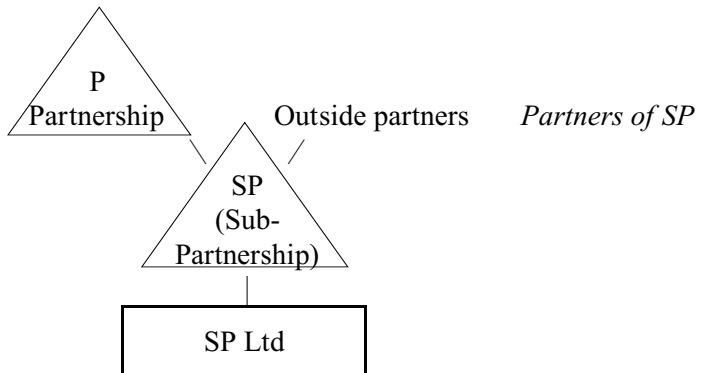

P Ltd is in principle close.<sup>109</sup>

Are the A Ltd shareholders participators in P Ltd, or connected with P Ltd?

99.20.8 Partnership is partner

Suppose a partnership (P) is partner in a sub-partnership with outside investors. The sub-partnership has an company (SP Ltd)

Diagrammatically:

109 Unless the partners are all open companies, see 99.31 (Open company exemption); but one individual or close company would lose the benefit of that exemption

The position depends on whether the partners of P are regarded as partners in the sub-partnership; see 82.8 (Partnership is partner).

## 99.21 Why participators matter

The term “participator” is used frequently in tax legislation, and it is not practical to write a full list. For the purposes of this book, the term is important in particular in the following contexts:

- (1) The definition of “relevant person” for the remittance basis
- (2) s.3 TCGA (non-resident company gains attributed to participators)
- (3) The definition of “close company”
- (4) Ultra-wide sense “control” of a company
- (5) Whether trustees are connected with a company<sup>110</sup>

## 99.22 Definitions of participator

There are two main definitions of participator in tax legislation (as well as numerous specialist definitions not considered here). The legislation does not have terminology to describe them, so I coin the following:

Definition	Provision	See para
<b>Standard</b> definition of participator	s.454 CTA 2010	99.23
<b>Extended</b> definition of participator	s.455(5) CTA 2010	99.24

## 99.23 Participator: Standard definition

### 99.23.1 *Participator: s.454 definition*

Section 454(1) CTA 2010 provides:

For the purposes of this Part [Part 10 CTA 2010, close companies], “participator”, in relation to a company, means a person having a share or interest in the capital or income of the company.

Section 454(2) CTA 2010 goes on to list five specific categories of participator:

In particular, “participator” includes—

- (a) a person who possesses, or is entitled to acquire, share capital or voting rights in the company,

---

110 See 99.16 (Company connected with trustees).

- (b) a loan creditor<sup>111</sup> of the company,
- (c) a person who possesses a right to receive or participate in
  - [i] distributions<sup>112</sup> of the company or
  - [ii] any amounts payable by the company (in cash or in kind) to loan creditors by way of premium on redemption,
- (d) a person who is entitled to acquire such a right as is mentioned in paragraph (c), and
- (e) a person who is entitled to secure that income or assets (whether present or future) of the company will be applied directly or indirectly for the person’s benefit.

The wording is in part drawn from the definition of control in the ultra-wide sense, and some of the discussion on that is relevant here too.

Subsection (2) is so wide that it is hard to identify a case within subsection (1) which is not also within (2). A possible example is a beneficiary of a discretionary trust. The beneficiary does not fall within (2) but may arguably have an interest and so fall within (1).<sup>113</sup>

The definition is expressed to apply for the purposes of Part 10 CTA 2010, but it should be a taxes-act-wide definition. When the word participator is used in connection with close companies, this definition is generally incorporated and where there is no definition it may be implied.

The associate-attribution rule does not apply to determine who is a participator. Eg if A owns a company, then B (an associate of A) has “control” of it, in the ultra-wide sense, because A’s rights are attributed to B; but B is not a participator.

99.23.2 Chain of wholly-owned co’s

Suppose a chain of wholly-owned companies:

111 See 99.25 (Loan creditor).

112 Section 454(4) CTA 2010 tinkers with the standard definition of “distribution”: “In subsection (2) ‘distribution’ is to be construed without regard to section 1000(2) (extended definition of distribution for close companies).”

113 See 99.23.5 (Discretionary beneficiary).

B Ltd is obviously a participator in C Ltd. But A is also a participator in C Ltd, under:

- (1) s.454(2)(a): A is entitled to acquire share capital in C Ltd
  - (a) by putting B Ltd into liquidation or
  - (b) by procuring B Ltd to make a dividend in specie of C Ltd shares;
- (2) s.454(2)(e) CTA 2010: A is entitled to secure that income is applied for its benefit, by procuring dividends from C Ltd to B Ltd and from B Ltd to A.<sup>114</sup>

This is so wherever the companies are resident. The same applies to longer chains of 100% owned companies, and chains of less than 100% (as long as they confer control in the natural sense).

99.23.3 *Chain of partly-owned co's*

Suppose a chain of partly-owned companies which do not confer control (in the natural sense) such as:

*Example 1*

*Example 2*

114 This view (“the wider view”) is not universally held. On the alternative view (“the narrow view”), one company can sometimes be used to block a person from being a participator in another company. It comes down to the meaning of “entitled” to acquire/secure.

This would not much matter in practice, however, because other rules fill the gap, eg:

(1) Attribution rules which apportion gains, etc, to participators may allow further apportionment to participators of participators.

(2) Rules imposing charges on loans or benefits to participators apply if the loan or benefit is provided to an associate of a participator.

In favour of the narrow view one might say that s.455(5) CTA 2010 (and perhaps other provisions) seem to be drafted on the assumption that the narrow view is correct; see 99.24 (Participator: extended definition).

A is obviously a participator in B Ltd.

In example 1, it is considered that A is a participator in C1 Ltd under s.454(2)(a): A is entitled to acquire share capital in C1 Ltd:

(a) by putting B Ltd into liquidation or

(b) by procuring B Ltd to make a dividend in specie of C1 Ltd shares.<sup>115</sup>

In example 2, it is considered that A is not a participator in C2 Ltd. It might be argued that A's rights as minority shareholder of B Ltd are such that A is a participator in C2 Ltd under s.454(2)(e) - ie that A has the right to secure that income or assets of C2 Ltd is applied for A's benefit. I refer to this as the wide view. But this is very doubtful and in practice it appears that HMRC do not take the wide view.<sup>116</sup> The extended definition of participator covers this case, if it applies.<sup>117</sup>

#### 99.23.4 Trustees and beneficiaries

This section considers substantive trusts.<sup>118</sup>

Suppose trustees hold a shares in a company. The trustees are participators under s.454(1) CTA 2010. A person holding shares as trustee is not a participator in their personal capacity since trustees are (at least for IT/CGT/CT purposes) deemed to be a separate person.

Beneficiaries of a *Baker* trust, other than merely discretionary beneficiaries, are also participators under s.454(1) since they too have an interest in the trust property. Beneficiaries of a *Garland* trust do not have an interest in trust property. However they are participators under s.454(2)(a)(c)(d) by virtue of their right to compel administration of the trust.

HMRC agree. The VC Manual provides:

**VCM11100 the investor: meaning of 'associate' [Sep 2017]**

**'Interested in'**

For the purpose of d., the words 'interested in' have a wide meaning.

For example, where shares are held by trustees, the trustees, the beneficiaries and the remainderman (if any) of the trust are all interested

115 This view is not universally held; see above fn: the same arguments (more or less) apply. It comes down to the meaning of "entitled to acquire".

116 See 99.24 (Participator: extended definition).

117 See 99.24 (Participator: extended definition).

118 For nominees, see the next section.

in the shares. Where shares are held by trustees under a will for persons in succession, the life tenant and the remainderman, as well as the trustees, are interested in the shares. (See, in this connection, *CIR v Park Investments Ltd*, 43TC200, particularly the judgment of Danckwerts L J at page 225, *CIR v Tring Investments Ltd*, 22 TC 679, and *Alexander Drew and Sons Ltd v CIR*, 17 TC 140).

### 99.23.5 *Discretionary beneficiary*

What about beneficiaries of a discretionary trust? The question is whether they have an “interest” in the company. The general rule is that:

A beneficiary under a discretionary trust has a right to be considered as a potential recipient of benefit by the trustees. That is an interest which equity will protect... But that right is not a proprietary interest in the assets held by the trustees, although it can be described as an interest of sorts.<sup>119</sup>

In short, the word “interest” is ambiguous and may or may not be taken to include the rights of a discretionary beneficiary: the context must decide the question.<sup>120</sup> The difficulty is that the concept of participator is used in many contexts, and the definition section itself does not offer much context. Bramwell, *Taxation of Companies & Company Reconstructions*

---

119 *JSC Mezhdunarodniy Promyshlenniy Bank v Pugachev* [2015] EWCA Civ 139 at [13].

But contrast *Lewis v Tamplin* [2018] EWHC 777 (Ch) at [39]:

“A beneficiary or object may have rights in relation to the trust fund which are good, not only against the trustees, but also against third parties, which thus may properly be called property rights, without necessarily having a vested interest in possession or in remainder in a particular income stream or capital asset. If the trustee of a discretionary trust in breach of trust gave away a trust asset to a third party, no-one can doubt that even a discretionary object of the trust in whose favour an appointment could still be made would have standing to sue the third party for the return of the asset to the trust fund.”

If that is correct, a discretionary beneficiary has a right against third parties, which is the definition of a proprietary right. But I wonder if it is in fact correct.

120 *Leedale v Lewis* 56 TC 501. The problem is fundamentally one of terminology. See *Comr of Stamp Duties v Livingston* [1965] AC 694 at p.712: “The terminology of our legal system has not produced a sufficient variety of words to represent the various meanings which can be conveyed by the word ‘interest’.”

takes the view that beneficiaries of a discretionary trust are participators,<sup>121</sup> and for practical purposes it would be safest to proceed on the basis that this may well be correct.

#### 99.23.6 *Nominees: Participators*

If N holds as nominee for B, then B is of course a participator.

Bramwell states:

A nominee shareholder is still a “participator”.<sup>122</sup>

That is, the nominee is a participator in addition to the beneficiary.

The question is (in short) whether the words “share or interest” in the definition of participator include the interest of a bare nominee. The answer probably depends on the nature of the nomineehip.<sup>123</sup>

The question may arise, but not often:

- (1) If the nominee is a participator, a loan from a UK resident close company to a nominee may be taxable;<sup>124</sup> but such loans are not likely to be made unless the nominee has some share or interest in the company in addition to holding as nominee (in which case the nominee is in any event a participator).
- (2) If the nominee is a participator, that may make the company close; but only if (in short):
  - (a) the participator can be said to exercise control, which depends on the facts; or
  - (b) the participator can be said to possess share capital or voting rights, which again depends on the nature of the nomineehip.<sup>125</sup>

#### 99.23.7 *Partnerships*

Suppose a partnership holds a company, thus:

---

121 *Taxation of Companies and Company Reconstructions* (looseleaf) para D1.2.4.

122 *Taxation of Companies and Company Reconstructions* (looseleaf) para D1.1.8.

123 See 99.5.3 (Position of nominee).

124 See 81.6 (Loan to participators).

125 See 99.5.3 (Position of nominee).

The partners are not participators under s.454(1) as they do not hold a share or interest in the company, at least if the partnership is a Scottish partnership, and arguably if it is an English partnership and one adopts the chose in action analysis. However that does not matter, because they are participators under s.454(2)(c)(d)(e) CTA 2010.

#### 99.23.8 PRs and beneficiaries of estate

Suppose personal representatives hold shares in a company. The PRs are participators under s.454(1) CTA 2010.

A person holding shares as PR is not a participator in their private capacity for CGT purposes as for CGT the PRs are deemed to be a separate person. The Tribunal sensibly reached the same conclusion for IT purposes even in the absence of a provision expressly deeming PRs to be a separate person.<sup>126</sup>

Beneficiaries of an estate are not participators under s.454(1) since they do not have a legal or equitable “interest” (in the strict sense) in the assets of the estate. However they are participators under s.454(2)(a)(c)(d) by virtue of their right to compel administration of the estate.

The VC Manual provides:

**VCM11100 the investor: meaning of ‘associate’** [Sep 2017]

**‘Interested in’**

...The executors or administrators are interested in the assets of a

---

126 *Harris v HMRC* [2010] UKFTT 385 (TC) at [31]: “There must be a distinction between a benefit being received by an individual beneficiary and a benefit being received, albeit by the same person, in a representative capacity.... Otherwise a different result would obtain depending on whether the residuary beneficiaries were the same persons as, or different persons from, the personal representatives.” However *Bibby v IRC* 29 TC 167 was not cited.

deceased person's estate during the period of administration, (*Willingale v Islington Green Investment Co*, 48 TC 547). The beneficiaries should be regarded as interested in any assets of the estate from which they may benefit.

### 99.23.9 *Charge over shares*

Suppose a person has a charge over shares to secure a debt. The charge is an interest in the shares of the company, but is it an interest in the capital or income of the company? If not, a chargee is not necessarily a participator.

### 99.23.10 *Member of charitable co*

Is a member of a charitable company a participator? Members do not fall within s.454(1) CTA 2010 (they have no share or interest in the capital or income of the company) and they do not fall within s.454(2)(b)-(e) (various financial rights). The question is whether a member falls within s.454(2)(a) on the ground that they possess "voting rights".

Members of a charitable company can of course vote, but they are curtailed in that the vote must be used for the charitable purposes of the company. The expression "voting *rights*" should be read in the context of the definition which refers to rights held beneficially as against the company. A member of a charitable company does not possess voting rights within the meaning of the provision. There are only voting duties.<sup>127</sup> So it is suggested that a member of a charitable company is not a participator.

A charitable company is close if (in short) it is under the control of 5 or fewer participators, so it would follow that a charitable company is not usually close.<sup>128</sup>

This view would reduce anomalies between charitable trusts and companies.

HMRC do not agree. The HMRC charity guidance note provides:

Many charitable companies are close companies for tax purposes (that's

---

<sup>127</sup> Note the corresponding company law provision, and the definition of control in the ultra-wide sense, refer to voting *power*, not voting *rights*; see 99.3.8 (Votes: para (b) control).

<sup>128</sup> A charitable company could be close if under the control of a loan creditor.

under the control of 5 or fewer participators).<sup>129</sup>

If that were right, then a charitable company would also be close if the directors (regardless of their number) were a majority of the members (and so “control” the company in the ultra-wide sense).

The issue is untested, and one should proceed on the cautious view that a member of a charitable company may be a participator, and a charitable company could be close. In practice it will not normally matter whether a charitable company is close or not.

### 99.23.11 “Entitled to do”

Section 454(3) CTA 2010 provides:

For the purposes of subsection (2) [standard definition of participator<sup>130</sup>], a person is treated as entitled to do anything which the person—

- (a) is entitled to do at a future date, or
- (b) will at a future date be entitled to do.

It is curious that this is a definition of “entitled to do”; this is not the precise expression used in s.454(2) ITA. But presumably “to do” stands for the words which are used in s.454(2), ie, to acquire and to secure.

The CT Manual provides:

#### **60120. Entitled to acquire or secure** [Sep 2018]

The words ‘entitled to acquire’ and ‘entitled to secure’ introduce the concept of a potential participator. So, for example, a person is a participator if, by means of a contractual right or by rights arising under a trust deed, they can:

- require a shareholder to transfer shares to that person, or
- secure the issue to that person of unissued capital of the company, or
- secure that if the company makes a distribution or if a loan is redeemed by the company at a premium, that person has a share in the distribution or the premium. ...

Similarly, a person is a participator if by means of a contractual right or

---

129 HMRC, “Charities: detailed guidance notes” Annex III.8.1

<https://www.gov.uk/government/publications/charities-detailed-guidance-notes/annex-iii-approved-charitable-investments-and-loans>

130 See 99.23.1 (Participator: s.454 definition).

some other arrangement they can secure that income or assets of the company will be applied directly or indirectly for their benefit. See too 99.3.11 (“Entitled to acquire”).

#### 99.23.12 *Participator in non-resident co*

Where the term “close company” is extended to include a non-resident close company, the term “participator” is sometimes defined with a similarly extended meaning. For instance, s.102 IHTA:

“participator”, in relation to any company, means any person who is (or would be if the company were resident in the UK) a participator in relation to that company within the meaning given by section 454 of the Corporation Tax Act 2010...

But the underlined words are otiose, as the definition of “participator” is not limited to close companies. So it does not matter that in most cases where the term “close company” is extended to include non-resident close companies, the definition of “participator” is not extended in that way.

#### 99.24 **Participator: Extended definition**

Occasionally the standard definition of participator is adopted with an extension. Section 454(6) CTA 2010 anticipates this:

This section does not affect any provision of this Part requiring a participator in one company to be treated as being also a participator in another company.

Section 455(5) CTA 2010 provides:

If a company (C) controls<sup>131</sup> another company (D), a participator in C is to be treated for the purposes of this section as being also a participator in D.

I refer to this as the “**extended definition of participator**”.

The extended definition is expressed to apply for s.455 (loans to participators), so it has to be repeated in 459(4) CTA 2010 (loan treated as made to participator). It is also incorporated by reference in a few other places, in particular:

---

131 The ultra-wide definition of “control” applies: see 99.3 (Control: Ultra-wide sense).

<b>Context</b>	<b>See</b>
Definition of relevant person in ITA remittance basis	17.4.1
Meaning of “distribution” for close companies	s.1064 CTA 2010

The CT Manual provides:

**60110 Participant: Extended meaning of [Sep 2018]**

... If, for example, Company B holds all the issued share capital of Company T and Company T makes a loan to W, a shareholder in Company B, that loan is within s.455 CTA 2010 [loans to participants] since W as well as being a participant in Company B is deemed also to be a participant in Company T.

Diagrammatically:

*Example 1*

*Example 2*

The HMRC example is example 1 above. Under the extended definition, W is a participant in T Ltd.<sup>132</sup>

What about example 2? A is a participant in C Ltd under the standard definition, and the extended definition is not needed.<sup>133</sup>

**99.25 Loan creditor**

*99.25.1 Why loan creditors matter*

The expression is used frequently in tax legislation, and it is not practical to write a full list. The term is particularly important in the following contexts:

- (1) A loan creditor is a participant.

132 This assumes that W (at least, if a minority shareholder) would not be a participant under the standard definition, ie what I call the wide view is not correct; that is why the extended definition of participant is needed. See 99.23.3 (Chain of partly owned co’s).

133 See 99.23.3 (Chain of partly owned co’s).

(2) The expression is used in the definition of close company.

99.25.2 “*Loan creditor*”

Section 453(1) CTA 2010 provides:

For the purposes of this Part [Part 10 CTA 2010, close companies], “loan creditor”, in relation to a company, means a creditor—

- (a) in respect of any debt within subsection (2), or
- (b) in respect of any redeemable loan capital issued by the company.

But this is subject to subsection (4).<sup>134</sup>

I refer to a debt within s.453(2) as “**loan creditor debt**”. There are 3 categories of these debts:

<b>Category</b>	<b>See para</b>
Debt for money/capital assets	99.25.3
Debt is right to income	99.25.4
Debt not for full consideration	99.25.5

A creditor may be a participator even though they do not fall within these categories. The CT Manual provides:

**CTM60130. Loan creditor** [Nov 2020]

It should be borne in mind that s.1000(1)(E) CTA 2010 ... provides that the interest etc on certain loans is a distribution. As regards such loans, the creditor is in any case a participator as he or she ‘possesses a right to receive or participate in distributions of the company’ (see [s.454(2)(c)]).

99.25.3 *Debt for money/capital assets*

Section 453(2) CTA 2010 provides:

- (2) Debt is within this subsection if it is incurred by the company—
  - (a) for any money borrowed or capital assets acquired by the company

This is the main category of loan creditor. Of course it does not cover all types of debt. The CT Manual provides:

---

134 See 99.25.10 (Bank creditor).

**CTM60130. Loan creditor** [Nov 2020]

A person is not a participator merely because he or she is a normal trade creditor of the company.

A vendor under a hire purchase contract is not caught. The CT Manual provides:

**CTM60130. Loan creditor** [Nov 2020]

Payments to be made under a hire purchase agreement would not normally be regarded as part of the company's loan capital. This is because under the usual hire purchase agreement there will be no debt for capital assets acquired by the company. The terms of the typical agreement make it clear that the assets remain in the ownership of the hire company until the final instalment is paid. The payments not made in order to acquire a capital asset, but rather they are rent for the use of the asset.

*99.25.4 Debt is right to income*

Section 453(2) CTA 2010 provides:

- (2) Debt is within this subsection if it is incurred by the company ...
  - (b) for any right to receive income created in favour of the company

The CT Manual provides:

**CTM60130. Loan creditor** [Nov 2020]

An example of a sum owing in the circumstances described in [s.453(2)(b)] is where a person contracts to make annual payments to the company, in return for a capital sum due at some later date. The capital sum is treated as loan capital of the company and the person will be a participator.

In practice this does not happen.

*99.25.5 Debt not for full consideration*

Section 453(2) CTA 2010 provides:

- (2) Debt is within this subsection if it is incurred by the company ...
  - (c) for consideration the value of which to the company was (at the time when the debt was incurred) substantially less than the amount of the debt (including any premium on the debt).

The CT Manual provides:

**CTM60130. Loan creditor** [Nov 2020]

As the normal debenture issued by a company is redeemable, debenture holders are participators.

A debenture is a debt, and the debenture holder is a loan creditor, either under head (a) (debenture issued for full consideration) or under head (c) (debenture issued for less than full consideration).

99.25.6 *Loan to corporate partnership*

Suppose a person lends to a LLP or Scots partnership which has corporate members, eg:

The question is whether the debt is incurred by the companies. As a matter of general law, it is not. But for tax purposes, it is suggested that one should treat the partnership as transparent, in the sense that the loan is regarded as made to the company, and so the lender is a loan creditor of the companies.

99.25.7 *Promise to make loan*

In *Taylor v HMRC*:<sup>135</sup>

[25] We think that the claimants are wrong in contending that the expression ‘loan capital’ covers amounts that [the borrower] company is entitled to receive as well as amounts actually received by the borrower company, ie Wrapit. The claimants say that principles of accrual accounting required by FRS 5 demands that Wrapit should

---

135 [2010] UKFTT 115 (TC).

recognise both the amounts actually paid by way of directors' loans and amounts that are committed to be paid later; these latter amounts should be recognised as assets or liabilities in its balance sheet.<sup>136</sup>

[26] Focussing on Mr Taylor's commitment to provide a further £50,000 of loan to Wrapit at the end of 2004, it seems to us that at most Wrapit then had the benefit of his covenant to advance that amount. The covenant may have been enforceable but the £50,000 had not by then become 'loan capital' within the meaning of that expression in s 291B [ICTA 1988]. Subsection (7) defines loan capital as including 'any debt incurred by the company ... for any money borrowed by the company'. At that time Wrapit had not borrowed the £50,000 and Mr Taylor had not lent it. There was no 'loan' of the £50,000 that could have ranked as such in law. We acknowledge that FRS5 might require the benefit of Mr Taylor's undertaking to lend £50,000 to be recognised in Wrapit's balance sheet ... But that does not make that amount 'loan capital' ...

As often happens, lawyers and accountants see things differently.

The question in *Taylor* was the amount of loan capital. It did not include the future borrowing. The entitled-to-acquire rule<sup>137</sup> apparently did not alter this conclusion.

### 99.25.8 Series of loans

Suppose:

- (1) A lends to B ("the A-to-B loan")
- (2) B lends to C Ltd ("the B-to-C loan")

Diagrammatically:

---

136 Para 20 FRS5 provided:

"Where a transaction results in an item that meets the definition of an asset or liability, that item should be recognised in the balance sheet if—

- (a) there is sufficient evidence of the existence of the item (including, where appropriate, evidence that a future inflow or outflow of benefit will occur), and
- (b) the item can be measured at a monetary amount with sufficient reliability."

137 Section 291B(8) ICTA 1988 was equivalent to the current entitled-to-acquire rule; see 99.3.11 ("Entitled to acquire").

A is not a loan creditor of C Ltd.

Suppose in addition:

- (3) The A-to-B loan is interest free, or on favourable terms, and
- (4) B does not have the resources to pay the A-to-B loan, except by calling in the B-to-C loan

In those circumstances it may be said that A is a participator in C Ltd under 454(2)(e) CTA 2010 on the grounds that A will in the future be entitled to secure that assets of C Ltd will be applied indirectly for A's benefit.

#### 99.25.9 *Interest in debt*

Section 453(3) CTA 2010 provides:

A person who—

- (a) is not the creditor in respect of any debt or loan capital to which subsection (1) applies, but
- (b) has a beneficial interest in that debt or loan capital, is, to the extent of that interest, treated for the purposes of this Part as a loan creditor in respect of that debt or loan capital (but this is subject to subsection (4) [bank creditor]).

The words “to the extent of that interest” are not apt, since a person either is or is not a loan creditor. One cannot be a loan creditor “to an extent”. But it does not matter.

#### 99.25.10 *Bank creditor*

Section 453(4) CTA 2010 provides:

A person carrying on a business of banking is not treated as a loan creditor in respect of any debt or loan capital incurred or issued by the company for money lent by the person to the company in the ordinary course of that business.

The CT Manual provides:

**60130. Loan creditor** [Sep 2018]

*Banking business*

... There is no statutory definition of what constitutes carrying on a banking business (the definition of bank in s.1120 CTA 2010 ... does not apply to s.453 CTA 2010 ...) so we rely instead on the common characteristics of banking established in the (non-tax) case of *United Dominions Trust Ltd v Kirkwood* [1966] 2 QB 431 and endorsed in *Hafton Properties v McHugh* 59 TC 420...

**99.26 Close company: Introduction**

“Close” company is a concept used throughout tax legislation and it is not possible to write a full list. For the purposes of this book, the concept is important in particular in the definitions of relevant person (for remittances); connected person, and for the application of s.3 TCGA and IHT residential property rules.

Sch C1 TCGA uses the expression “closely-held company” with a similar but not quite identical definition, not considered here.<sup>138</sup>

A company which is not close is known as an “**open company**”.

“Close company” is one of the most elaborately defined expressions in the taxes acts, and that is really saying something.

The definition in the CTA is for the purposes of the Corporation Tax Acts. This is extended to income tax and CGT:

**s.989 ITA**

**s.288(1) TCGA**

---

138 Summer Budget 2015 used the term “closed company” but that was either a typo or an author unfamiliar with tax.

The following definitions apply for the purposes of the Income Tax Acts—  
“close company” is to be read in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439 of that Act

In this Act, unless the context otherwise requires—  
“close company” shall be construed in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439)

An entity which is not a company<sup>139</sup>, such as a partnership, cannot be a close company.

As to whether a charitable company is close, see 99.23.10 (Member of charitable co).

## 99.27 Control test

Section 439(1) CTA 2010 provides:

For the purposes of the Corporation Tax Acts, a “close company” is a company in relation to which condition A or B is met.

I refer to “**close co conditions A and B**”

Thus there are two tests of close, which I call:

- (1) the control test
- (2) the winding up test

### 99.27.1 Condition A: Control test

Section 439(2) CTA 2010 provides:

Condition A is that the company is under the control—  
(a) of 5 or fewer participators<sup>140</sup>...

Control has the ultra-wide sense.

A company must in principle be close if:

- (1) It has less than 10 shareholders, as 5 of them will have control.
- (2) It has more than 10 shareholders, but less than 10 unassociated shareholders as 5 of them will have “control”.

### 99.27.2 Participator-directors

---

139 See 86.3 (Definition of “company”).

140 See 99.22 (Definitions of participator).

Section 439(2) CTA 2010 provides:

Condition A is that the company is under the control ...

(b) of participators who are directors

This takes us to the idiosyncratic definition of director in s.452(1) CTA 2010:

In this Part [Part 10 CTA 2010, close companies], “director”, in relation to a company, includes—

- (a) a person occupying the position of director of the company, by whatever name called,
- (b) a person in accordance with whose directions or instructions the directors of the company are accustomed to act, and
- (c) a person within subsection (2).

(1)(a)(b) are standard form; but (c) leads to a distinctly non-standard extension:

(2) A person (P) is within this subsection if P—

- (a) is a manager of the company or otherwise concerned in the management of the company’s trade or business, and
- (b) is—
  - (i) the beneficial owner of, or
  - (ii) directly or indirectly able to control, at least 20% of the ordinary share capital of the company.

(3) For the purposes of subsection (2)(b), P is treated as owning or controlling (as the case may be) what any associate of P owns or controls.

A company controlled by director-participators is a close company, even if the number of director-participators exceeds five. Directors have “control” of a company if (*inter alia*) they exercise direct or indirect control over the company’s affairs. This is puzzling as (under standard articles)<sup>141</sup> company law directors manage the business of the company, and may exercise all the powers of the company. In one sense, directors always control their company. It cannot be that every company whose directors happen to be participators is made a close company under this

---

141 Sch 1 para 3 Companies (Model Articles) Regulations 2008; (formerly Table A paragraph 70).

part of the definition. The answer is that “control” here means control at shareholder level, the ability to pass an ordinary resolution in general meeting. Directors do not “control” a company, in the relevant sense, unless they control the company at that level.<sup>142</sup>

As to whether a foundation is a close company, see 86.9.4 (Foundation: IT/CGT trust).

### 99.27.3 HMRC examples

The CT Manual gives some examples:<sup>143</sup>

#### **CTM60420 - Close companies: tests: examples** [Jun 2016]

... The examples refer to companies having shares that are not dealt in or quoted on a stock exchange.

##### **Example 1** [attribution of trustee-associates]

Company X has 1,000 issued shares of £1 held as below.

Trustees of A’s settlement	449
Mrs A (settlor)	60
Ten other shareholders	<u>491</u>
Total issued ordinary shares	<u>1,000</u>

The ten shareholders are not associated with each other or with A or Mrs A and no one of them holds more than 50 shares.

The trustees of A’s settlement are associates of Mrs A by virtue of CTA2010/S448 (1) (b) and (c) ... and their rights and powers may be attributed to Mrs A who therefore controls the company.

Company X is therefore a close company.

This is correct, but it is not necessary to rely on the associate-attribution rule to reach the conclusion that the company is close. The company would be close even if Mrs A were not the settlor since it is under the control of two (less than five) persons.

The Manual continues:

#### **CTM60420 - Close companies: tests: examples** [Jun 2016]

... **Example 2** [Ordinary shares & preference shares]

The £1 issued shares in a trading company are owned as follows.

142 See 99.3.4 (Shareholder level control).

143 In these examples I omit internal Manual cross references and alter the formatting for increased clarity.

**Ordinary shares**

Directors

A 4

B (cousin of A) 4

Others: 12 individuals equally, none of whom is a nominee, associate, etc, of any other shareholder 4,992

Total issued ordinary shares 5,000

**5% preference shares**

A (see above) 5,000

**Total nominal and issued capital** 10,000

There are no loan creditors ranking as participators or members.

Control by reference to possession of the greater part of the issued share capital (s.450(3) CTA...).

The company is a close company because A possesses more than half the issued capital.

This is straightforward.

The Manual continues:

**CTM60420 - Close companies: tests: examples** [Jun 2016]

... **Example 3** [Associate-attribution rule]

The issued ordinary shares in a trading company carry one vote each but the ‘A’ ordinary shares do not confer voting rights. The shareholders are as below.

	Ordinary	‘A’ ordinary (non-voting)
A	280	
Wife of A	100	
B (brother of A)	10	
Trustees of A’s settlement	40	
Company X (controlled by A)	80	
<i>Total</i>	<u>510</u>	
Mrs C (daughter of B)	20	
10 other equal holdings	<u>470</u>	500
Total issued shares	<u>1,000</u>	<u>500</u>

The shares carry equal rights to dividend. A’s wife has made a loan of £20,000 to the company at 5% interest. There is no share premium account or other comparable account.

Control by voting rights (CTA2010/S450 (3) ...

The associates of A are:

- his wife and his brother, (ICTA88/S417 (3)(a) and (4), ... and

- the trustees of A's settlement, CTA2010/S448 (1) (b) and (c)...
- The rights and powers attributable to A are:
- the rights and powers of his associates (CTA2010/S451 (4) to (6) ...
  - and
  - the rights and powers of Company X (CTA2010/S451 (4) to (6)).
- As a total of 510 votes are thus possessed by A or attributable to him, the company is a close company controlled by one person.

This is correct, but it is not necessary to rely on the associates rule. The company would be close even if none of the shareholders were associates, since it is under the control of five participators. A's wife's loan is irrelevant and it is difficult to see why the example mentions it.

Alternatively control by holding the greater part of the issued share capital, (s.450(3) CTA), - any eight of the other equal holdings will control the company by holding the greater part of the issued share capital.

I do not understand this comment. Perhaps the text of the example is corrupt.

#### **CTM60420 - Close companies: tests: examples [Jun 2016]**

##### **... Example 4**

The authorised and issued share capital of Company X is £1,000 in the form of 1,000 ordinary shares of £1 each, held as below.

A	200	20%
B	100	10%
C	50	5%
D	50	5%
E	40	4%
Company Y	99	9.9%
Other shareholders	<u>461</u>	<u>46.1%</u>
Total issued ordinary shares	<u>1000</u>	<u>100%</u>

A, B and C are directors.

The issued capital of Company Y, is £100 in the form of 100 ordinary shares of £1 each, held by:

F (son of E)	60
G	<u>40</u>
Total issued shares	<u>100</u>

The shareholders in Company X, other than Company Y, are all individuals and none are related or otherwise associated. No 'other

shareholder' holds more than 50 shares.

The HMRC analysis is as follows:

Control - the rights in the shares held by Company Y in Company X may be attributed to F who controls that company (CTA2010/S451 (4) to (6) ...

F is an associate of E but the rights attributed to F cannot be further attributed to E (CTA2010/S451 (4) to (6)).

No group of five participators or fewer can control Company X, nor do the director/participators control, and nor would the winding up test be of assistance here.

Company X is not a close company.

**CTM60420 - Close companies: tests: examples [Jun 2016]**

... **Example 5**

The facts are the same as in Example 4 except that F is the holder of one share in Company X.

Control rights can be attributed to F as below.

Shares held in own right	1
Shares held by E (an associate)	40
Shares held by Company Y (controlled by F)	<u>99</u>
	<u>140</u>

Thus A, B, C, D and F hold (or have attributed to them) the rights in 540 shares and control the company.

Company X is a close company.

This example neatly illustrates the arbitrary border of the close/open distinction. At the margin, there is obviously some scope for planning.

**CTM60420 - Close companies: tests: examples [Jun 2016]**

... **Example 6** [Entitlement to acquire shares]

Company X has authorised capital of £5,000 in £1 ordinary shares of which £3,000 is issued as below.

A	150
B	150
C	150
D	250
E	250
F	250
20 other shareholders (no one holder having over 100 shares)	<u>1800</u>
Total issued ordinary shares	<u><u>3000</u></u>

The 20 other shareholders are individuals and none of the shareholders is an associate of any other. A, B and C are the directors. They each enter into a service agreement providing

[1] that they are to remain directors for five years from 1 January 1992,<sup>144</sup> and

[2] that on 31 December 1996, they shall each have the right to [subscribe for]<sup>145</sup> 500 £1 shares in the company at par.

Control - A, B and C each exercises or is entitled to acquire rights in 650 shares (CTA2010/S450 (3) ... and CTA2010/S451 (2) ...-CTM60220).

Thus A, B, C, D and E (or A, B, C, D and F, or A, B, C, E and F) together constitute a group which is 'able to exercise or is entitled to acquire, control' of the company (with 2,450 shares out of 4,500, i.e. the 3,000 issued plus the 1,500 to be issued to the directors).

The company is a close company from 1 January 1992.

## **99.28 Close co winding-up test**

Condition B provides for a case where the participators have rights which

---

144 The entitlement to remain a director is not relevant.

145 The Manual says "purchase"; it is later clarified that a share issue is contemplated.

do not confer control. I refer to this as the close co winding-up test.

It is helpful to read this side by side with the similar test for para (d) control (assets):

**Close co winding-up test  
s.439(3) CTA 2010**

Condition B is that 5 or fewer participators, or participators who are directors, together possess or are entitled to acquire—

(a) such rights as would, in the event of the winding up of the company (“the relevant company”) on the basis set out in section 440, entitle them to receive

the greater part of the assets of the relevant company which would then be available for distribution among the participators, or

(b) such rights as would, in that event, so entitle them if there were disregarded any rights which any of them or any other person has as a loan creditor (in relation to the relevant company or any other company).

**Control test para (d) (assets)  
s.450(3)(d) CTA 2010**

... P is treated as having control of C if P possesses or is entitled to acquire—

(d) such rights as would entitle P, in the event of the winding up of C or in any other circumstances, to receive

the greater part of the assets of C which would then be available for distribution among the participators

The word “distribution” clearly includes repayment of a loan creditor.

Para (a) applies the test is applied on the basis that loan creditors are included as participators and para (b) on the basis that they are disregarded. The company is close if it satisfies the test on either basis.

*99.28.1 s.440 winding-up basis*

Section 440 CTA 2010 sets out the basis of the notional winding-up for the close co winding-up test:

- (1) This section applies for the purposes of section 439(3).
- (2) In the notional winding up of the relevant company, the part of the

assets available for distribution among the participators which any person is entitled to receive is the aggregate of—

- (a) any part of those assets which the person would be entitled to receive in the event of the winding up of the relevant company, and
  - (b) any part of those assets which the person would be entitled to receive if—
    - (i) any other company which is a participator in the relevant company and is entitled to receive any assets in the notional winding up were also wound up on the basis set out in this section, and
    - (ii) the part of the assets of the relevant company to which the other company is entitled were distributed among the participators in the other company in proportion to their respective entitlement to the assets of the other company available for distribution among the participators.
- (3) In the application of subsection (2)—
- (a) to the notional winding up of the other company mentioned in paragraph (b) of that subsection, and
  - (b) to any further notional winding up required by that paragraph (or by any further application of that paragraph),
- references to “the relevant company” are to be read as references to the company concerned.

In short, the effect is to look through participators which are companies.

Section 441 CTA 2010 tweaks the definition of participator for this purpose. Section 441(1) CTA 2010 provides:

The following provisions apply for the purpose of determining whether under subsection (3) of section 439

[a] five or fewer participators, or

[b] participators who are directors,

together possess or are entitled to acquire rights such as are mentioned in paragraph (a) or (b) of that subsection.

That is, s.441 applies for all purposes of the close co winding-up test.

Section 441(2) CTA 2010 provides:

A person is to be treated as a participator in or director of the relevant company if the person is a participator in or director of any other company which would be entitled to receive assets in the notional winding up of the relevant company on the basis set out in section 440.

This is comparable to the extended definition of participator.<sup>146</sup>

Section 441 CTA 2010 continues:

(3) No account is to be taken of a participator which is a company unless the company possesses or is entitled to acquire the rights in a fiduciary or representative capacity.

(4) But subsection (3) does not apply for the purposes of section 440.

This makes sense because for this test one looks through companies to non corporate shareholders.

### 99.28.2 HMRC example

The CT Manual provides an example of the close co winding-up test:

#### **CTM60420 - Close companies: tests: examples** [Jun 2016]

... **Example 7** (Winding up test)

The authorised and issued capital of an investment company is £33,000 and is owned equally by eleven individuals who are not associated.

The loan creditors are:

A (director and shareholder) £35,000

B (not a shareholder) £13,500

Neither A nor B is a bank. B is not an associate of a [participator].<sup>147</sup>

In a winding up, the value of the net assets distributable among members, including loan creditors, would be £120,000 as below.

Deposits with local authorities £30,000

Market value of quoted investments

(representing the remainder of the assets) £110,000

*Total assets* £140,000

*Deduct sundry creditors*

Management expenses £300

Bank overdraft £19,700

*Total deductions* £20,000

Value of net assets £120,000

The HMRC analysis is as follows:

---

146 See 99.24 (Participator: extended definition).

147 The Manual says “director” but I think participator is the right word.

Control - the company cannot be shown to be controlled by five or fewer participators under CTA2010/S450 (3) (a) to (c)...

That is, the company is not close under the usual condition A test (control by 5 participators).

In a liquidation, the assets would, however, be distributed as below.

A as loan creditor	£35,000
B loan creditor	£13,500
Shareholders (£6,500 each)	<u>£71,500</u>
Value of net assets	<u>£120,000</u>

More than half of this sum would be received by three persons, that is:

A (£35,000 plus £6,500)	£41,500
B	£13,500
Any shareholder other than A	<u>£6,500</u>
Distribution to three persons	<u>£61,500</u>

The company is therefore a close company by reference to s.450(3)(d) CTA 2010<sup>148</sup> ... because the inclusion of loan creditors as participators shows that it is controlled by three participators.

## 99.29 Non-close companies

### 99.29.1 Non-resident close company

Section 442 CTA 2010 provides:

A company is not to be treated as a close company if—  
(a) it is non-UK resident

A note on terminology. The rule that only a UK resident company counts as a close company is often disapplied. There are three different drafting techniques used to achieve this:

- (1) Statute sometimes makes provisions which apply to a company “which would be a close company if it were resident in the UK”.<sup>149</sup>
- (2) Statute sometimes redefines and extends the term “close company” to

148 See 99.3.10 (Assets: para (d) control).

149 Eg s.809M(2)(f) ITA; see 17.4 (Relevant person: Companies).

include a non-resident close company.<sup>150</sup>

- (3) Statute sometimes uses the term “qualifying company” defined to mean a close or a non-resident close company.<sup>151</sup>

Thus there is no consistent terminology across tax legislation. Perhaps that is too much to expect. As long as the reader is aware, it does not matter much. In this book I refer to “**a non-resident close company**” which I think is the clearest term.

### 99.29.2 *Co-operative/community benefit/building society*

For completeness: s.442 CTA 2010 provides:

A company is not to be treated as a close company if ...

(b) it is a registered society, or

(c) it is a building society.

### 99.30 **State-controlled company**

Section 443 CTA 2010 provides:

(1) A company is not to be treated as a close company as a result of section 439(2) if it is controlled by or on behalf of the Crown.

(2) A company is “controlled by or on behalf of the Crown”, for the purposes of this section, if it is under the control of the Crown or of persons acting on behalf of the Crown, independently of any other person.

(3) But a company is not controlled by or on behalf of the Crown, for the purposes of this section, if it is a close company as a result of being under the control of persons acting independently of the Crown.

EN CTA 2010 provides:

1340. [The words *as a result of section 439(2)*] leave it open for a company controlled by or on behalf of the Crown to be a close company if condition B in section 439(3) is met.<sup>152</sup> ...

1342. In short, section 414(1)(c) of ICTA is a qualified exception to

---

150 For examples, see 29.8.2 (Condition B: Close company); 52.3.3 (“Close company”); 77.2.1 (“Close company”).

151 For examples see 57.10.1 (“Qualifying company”); 94.40.1 (Trust made by co s.86 definition of settlor).

152 See 99.28 (Close co winding-up test).

[close company condition A, control of five or fewer participators] but not an exception to [condition B, close co winding up test].

So strictly the exemption for crown controlled companies is limited. If the crown own all the shares, the company is close under close company condition B. The exemption would only apply if the crown held voting shares only. That must be rare.

It is not at all clear that that was in fact the pre-rewrite position, though if so it was more likely a mistake of the drafting than a deliberate decision.

Perhaps it will not often matter, but the CT Manual suggests that HMRC do not take that point:

**60270 Control: By the Crown** [Sep 2018]

A company is to be treated as controlled by or on behalf of the Crown (and therefore not a close company) if, and only if, it is by any of the control tests under the control of the Crown or of persons acting on behalf of the Crown, independently of any other person. If, however, it can be shown that under some other control test:

- five or fewer participators, or
- participators who are directors, control the company and those participators (or director/participators) act independently of the Crown, the company is a close company. The Crown for this purpose includes any Minister, Government Department or other person acting on behalf of the Crown.

99.30.1 *Foreign government/local authorities*

The next paragraph extends the exemption, though on what authority I do not know:

**60280. Control: Overseas governments and local authorities** [Jun 2016]

A company should not be treated as a close company if the only persons who can be taken to have control of that company are any of the following:

- Overseas governments.
- The Crown Agents for Overseas Governments and Administrations.
- Local authorities or local authority associations exempt from tax under Section 984 CTA 2010 ...

This seems a somewhat loose reading of the statutory expression “the Crown”; but the outcome is sensible.

### 99.30.2 *State/open company control*

CT Manual provides:

**60280. Control: Overseas governments and local authorities** [Jun 2016]

... Nor should a company be treated as a close company if the only persons who can be taken to have control of that company are any of the above together with:

- a company or companies resident in the UK which are not close, or
- an overseas company or companies which, if resident in the UK, would not be close.

### 99.31 **Open company exemption**

Section 444(1) CTA 2010 provides:

A company is not to be treated as a close company if condition A or B is met.

I refer to **“open company conditions A and B”**.

Section 444(2) CTA 2010 concerns the main close co definition (control by 5 or fewer participators):

- (2) Condition A is that the company—
- (a) is controlled by one or more companies none of which is a close company, and
  - (b) cannot be treated as a close company except by taking, as one of the 5 or fewer participators requisite for its being so treated, a company which is not a close company.
- (4) References in subsections (2) and (3) to a close company include a company which, if UK resident, would be a close company.

Section 444(3) CTA 2010 concerns the close co winding-up test:

- Condition B is that the company—
- (a) would not be a close company were it not for
    - [i] paragraph (a) of section 439(3) [winding up test] or
    - [ii] paragraph (d) of section 450(3) [winding up test], and
  - (b) would not be a close company if the references in those paragraphs to participators did not include loan creditors which are companies other than close companies.

The CT Manual provides:

**60300 Open company loan creditor** [Sep 2018]

[The Manual summarises s.444 (3) and continues:]

If the open company loan creditor also holds shares in the company, it will remain a participator in respect of that holding and any amount which would be distributed to it in respect of those shares should be taken into account for the purposes of s.450(3)(d) CTA2010 and s.439(3)(a) CTA2010.

The CT Manual provides two straightforward examples of the open company exemption:

**CTM60420 Close companies: tests: examples** [Jun 2016]

**... Example 8**

The issued ordinary capital of a trading company (other issued capital having no voting rights) is held as below.

Company A (not a close company)	280
Company B (a close company)	270
Company C (not a close company)	230
D (director)	40
E (director)	30
F (an individual)	30
20 others	<u>120</u>
Total issued ordinary shares	<u><u>1,000</u></u>

Control - the requirements of CTA2010/S444 (2)(a) ... are regarded as satisfied because, upon one combination of shareholdings, control is in the hands of Company A and Company C, even though by other combinations a controlling group which includes only one of those companies may be established.

The company is not a close company if the requirements of CTA2010/S444 (2) (b) ... are also satisfied, that is, if none of the control tests enables control by five or fewer participators to be established without including a non-close company among those participators, and the company is not controlled by its directors and cannot be shown to be close on the or winding up test (CTM60320) without including a non-close company among the five or fewer participators (see, however, Example 9 below).

In short, the company is not close unless one adds to the facts, as in example 9:

**Example 9**

The ordinary shares are held as in Example 8.

G, an individual, holds redeemable loan stock and would receive in a winding-up more than half of the assets available for distribution among the participators.

Control - as G is in control of the company by reference to s.450(3)(d) CTA 2010<sup>153</sup> ... the requirements of CTA2010/S444 (3) ... are not met and, irrespective of the control by open companies, the company is a close company.

More analytically:

- (1) Open company condition A is not met:
  - (a) The requirement in s.444(2)(a) is met (control by open companies)
  - (b) But the requirement in s.444(2)(b) is not met, because G “controls” the company
- (2) Open company condition B is not met, because neither of the requirements in s.444(3) are met.

Suppose:

A “controls” X Ltd (because B’s rights are attributed to A).

X Ltd is not close, as open company condition A is satisfied.

Now suppose A (not an open company) were either a loan creditor of X Ltd, or held say a 1% shareholding in X Ltd. A is now a participator in X Ltd. Construed strictly, X Ltd is now close: the open company exemption does not apply, as X Ltd is “controlled” by A. But that is a strange result, and one might construe the open company exemption purposively, so that it applies in this case to prevent the attribution.

## 99.32 Pension schemes

---

153 See 99.3.10 (Assets: para (d) control).

Section 445 CTA 2010 provides:

- (1) If shares in a company (“C”) are held on trust for a registered pension scheme, the persons holding the shares are to be treated, for the purposes of section 444(2) and (3)—
  - (a) as the beneficial owners of the shares, and
  - (b) in that capacity, as a company which is not a close company.
- (2) But subsection (1) does not apply if the scheme is established wholly or mainly for the benefit of—
  - (a) directors, employees, past directors or past employees of a company within subsection (3), or
  - (b) dependants of an individual within paragraph (a).
- (3) The companies within this subsection are—
  - (a) C,
  - (b) an associated company<sup>154</sup> of C,
  - (c) a company which is under the control of—
    - (i) a director of C,
    - (ii) an associate of a director of C, or
    - (iii) two or more persons each of whom is such a director or associate, and
  - (d) a close company.

The CT Manual summarises this and provides:

**60290 Control: By another company** [Sep 2018]

The broad effect of the above conditions is that the fund or scheme must be one established for the benefit of employees, etc, of an unrelated company which is not close. A joint fund for the benefit of employees of two or more companies is not disqualified if the majority of the beneficiaries are or were employees of qualifying companies or are dependants of such employees.

**99.33 Quoted company exemption**

Section 446(1) CTA 2010 provides:

A company is not to be treated as a close company at a particular time if—

- (a) shares in the company carrying at least 35% of the voting power in the company have been allotted unconditionally to, or

---

154 See 99.17.1 (“Associated company”).

acquired unconditionally by, and are at that time beneficially held by, the public, and

- (b) [i] any such shares have within the preceding 12 months been the subject of dealings on a recognised stock exchange, and
- [ii] the shares have within those 12 months been listed on such an exchange.

### **99.34 Principal members: Vote cap**

Section 446 CTA 2010 provides:

(2) But subsection (1) does not apply to a company at any time when the total percentage of the voting power in the company possessed by all of the company's principal members exceeds 85%.

(3) For the purposes of this section, a person is a principal member of a company if the person possesses a percentage of the voting power in the company of more than 5% (but see subsection (4)).

(4) If there are more than 5 persons within subsection (3), a person is a principal member of the company only if—

- (a) the person is one of the 5 persons who possess the greatest percentages, or
- (b) in a case where there are no such 5 persons because two or more persons possess equal percentages of the voting power in the company, the person is one of the 6 or more persons (including those two or more who possess equal percentages) who possess the greatest percentages.

Section 446(5) CTA 2010 applies the usual nominee and associate-attribution rules:<sup>155</sup>

In determining for the purposes of this section the voting power which a person possesses, there is to be attributed to the person any voting power which would be attributed to the person if section 451(3) to (6) applied for the purposes of this section.

#### 99.34.1 “Shares”

Section 446(6) CTA 2010 provides:

In this section “shares”—

- (a) include stock, but

---

155 See 99.5.1 (Nominee-attribution rule); 99.7 (Associate-attribution rule).

- (b) do not include shares entitled to a fixed rate of dividend, whether with or without a further right to participate in profits.

The CT Manual provides:

**60310 35% or more voting power held by public** [Sep 2018]

... The total voting power for the purpose of [s.446(1) and (2)] is that of all the issued shares (or stock) including that of shares, etc, entitled to a fixed dividend, etc, which are excluded under [s.446(1)] in determining the voting power in the hands of the public. ...

99.34.2 *“Held by public”*

Section 447 CTA 2010 defines “beneficially held by the public”:

- (1) For the purposes of section 446, shares in a company (C) are beneficially held by the public if they are—
  - (a) beneficially held by a UK resident company which is not a close company, or by a non-UK resident company which would not be a close company if it were UK resident,
  - (b) held on trust for a registered pension scheme, or
  - (c) not comprised in a principal member’s holding...
- (4) The reference in section 446(1) to shares which have been allotted unconditionally to, or acquired unconditionally by, the public is to be read in accordance with subsections (1) to (3).
- (5) For the purposes of subsection (1), a principal member’s holding consists of the shares which carry the voting power possessed by him.
- (6) The reference in subsection (2) to shares held by any person includes shares the rights or powers attached to which would be attributed to the person if section 451(3) applied for the purposes of that subsection.<sup>156</sup>
- (7) Subsections (3) to (5) of section 446 (meaning of “principal member” and determination of voting power possessed) apply for the purposes of this section as they apply for the purposes of that section.
- (8) In this section, “shares” includes stock.

The CT Manual provides:

**60310 35% or more voting power held by public** [Sep 2018]

Where the company holding the shares loses its beneficial interest on commencement of winding-up (see CTM36125) you should not

---

156 See 99.5.1 (Nominee-attribution rule); the associate-attribution rule is not applied here.

normally contend that a company which was not close before the commencement of that winding-up, thereby becomes a close company. Shares beneficially held by an authorised unit trust (see CTM48200 onwards) are to be regarded as beneficially held by a company which is not a close company unless five or fewer persons hold more than half of the units issued by the trust. In determining the number of units held by a person, there should be attributed to him or her any units held by his or her associates (see CTM60150) or by his or her nominees or by any company (or companies) of which he/she has, or he/she and his associates have, control...

For the purpose of [s.447(1)], shares held in accordance with [s.447(1)(a) or (b)] are deemed to be beneficially held by the public (provided that they are not [otherwise] excluded) even if they are comprised in a principal member's holding.

### 99.34.3 Not "held by public"

Section 447 CTA 2010 provides:

- (2) But shares are not beneficially held by the public if they are held—
- (a) by a director of C,
  - (b) by an associate of such a director,
  - (c) by a company which is under the control of one or more persons each of whom is such a director or associate,
  - (d) by an associated company of C, or

The CT Manual provides:

**CTM60310 35% or more voting power held by public** [Sep 2018]  
Where a company in [s.447(2)(c)(d)] above loses its beneficial interest in the shares, etc, on commencement of winding-up (see CTM36125) you should not normally accept that a company which was close before the commencement of that winding-up, thereby ceases to be close. ...

Section 447 CTA 2010 continues:

- (2) But shares are not beneficially held by the public if they are held ...
- (e) as part of a fund the capital or income of which is applicable or applied wholly or mainly for the benefit of any of individuals within subsection (3).
- (3) Those individuals are—
- (a) employees, directors, past employees or past directors of C or of any company within subsection (2)(c) or (d), and

(b) dependants of any individuals within paragraph (a)...

(6) The reference in subsection (2) to shares held by any person includes shares the rights or powers attached to which would be attributed to the person if section 451(3) applied for the purposes of that subsection.<sup>157</sup>

---

157 See 99.5.1 (Nominee-attribution rule); the associate-attribution rule is not applied here.

## CHAPTER ONE HUNDRED

# PARTICIPATION & % INVESTMENT TESTS

### 100.1 Participation

#### 100.1 Participation

This term is elaborately defined in s.159-162 TIOPA. The concept (subject to modifications here or there) is used in a number of contexts:

<b>Topic</b>	<b>Provision</b>	<b>See para</b>
Transfer pricing	Part 4 TIOPA	24.8
Royalty DTA override	s.917A ITA	31.13
Offshore receipts from IP	s.608U ITTOIA	31.33.2
Royalty influenced by special relationship	s.132 TIOPA	<i>Not discussed</i>
Hybrid entities	s.259NB TIOPA	87.25.2
Advance pricing agreements	s.219(2) TIOPA	<i>Not discussed</i>
Corporate interest restriction	s.463 TIOPA	<i>Not discussed</i>

So there is some economy of drafting, and it is convenient to consider the matter as a separate topic, rather than in any particular context in which it may arise.

A modified version also applies for diverted profits tax, but that is outside the scope of this book.

#### 100.2 Direct participation

##### 100.2.1 *Application of s.157*

Section 157(1) TIOPA provides:

Subsection (2) applies for the purposes of—

- (a) this Part [Part 4 TIOPA Transfer pricing]
- (b) in Part 2, section 132(7)
- (c) in Part 5, section 219(2)

- (d) in Part 6A, section 259NB(4),
- (e) in Part 10, section 463(4), and
- (f) section 608T of ITTOIA 2005.

### 100.2.2 *Direct participation test*

Section 157(2) TIOPA provides:

A person is directly participating in the management, control or capital of another person at a particular time if (and only if) that other person is at that time—

- (a) a body corporate or a firm, and
- (b) controlled by the first person.

“Control” means control in the strict sense.<sup>1</sup> But we then need to consider the indirect participation tests.

### 100.3 Indirect participation tests

Section 158 TIOPA provides:

- (1) This section is about how to read the references, in this Part and in some other provisions of this Act, to indirect participation.
- (2) For the purposes of sections 148(2)(a) and (3)(a) and 175(2)(a), a person is indirectly participating in the management, control or capital of another person only if section 159, 160 or 161 so provides.
- (3) For the purposes of sections 148(2)(b) and (3)(b) and 175(2)(b), a person is indirectly participating in the management, control or capital of another person only if section 159, 160 or 162 so provides.
- (4) For the purposes of—
  - (a) sections 154(5) and 204(4),
  - (b) in Part 2, section 132(7)
  - (c) in Part 5, section 219(2), and
  - (d) in Part 6A, section 259NB(4),

a person is indirectly participating in the management, control or capital of another person only if section 159 or 160 so provides.

This is easier to follow in a table format:

<b>Provision in TIOPA</b>	<b>Topic</b>	<b>Apply</b>
---------------------------	--------------	--------------

---

<sup>1</sup> See s.217 TIOPA; 99.9 (Control: Strict sense).  
FD\_100\_Participation\_and\_%\_interest\_tests.wpd

148(2)(a)/(3)(a), 175(2)(a)	Transfer pricing	s.159/160/161
148(2)(b)/(3)(b), 175(2)(b)	Transfer pricing	s.159/160/162
154(5), 204(4)	Transfer pricing	s.159/160
132(7)	DT royalties article	s.159/160
219(2)	Advance pricing agreements	s.159/160
259NB(4)	Hybrid entities	s.159/160

## 100.4 Indirect participation: s.159

### 100.4.1 *Application of s.159*

Section 159(1) TIOPA provides:

Subsection (2) applies for the purposes of—

- (a) sections 148(2) and (3), 154(5), 175(2) and 204(4),
- (b) in Part 2, section 132(7),
- (c) in Part 5, section 219(2),
- (d) in Part 6A, section 259NB(4),
- (e) in Part 10, section 463(4)]2[, and
- (f) section 608T of ITTOIA 2005.

Section 159 applies in all cases where the participation test is applied.

### 100.4.2 *Indirect participation test*

Section 159(2) TIOPA provides:

A person (“P”) is indirectly participating in the management, control or capital of another person (“A”) at a particular time if

- [a] P would be directly participating in the management, control or capital of A at that time
- [b] if the rights and powers attributed to P included all the rights and powers mentioned in subsection (3) that are not already attributed to P for the purpose of deciding under section 157 whether P is directly participating in the management, control or capital of A.

### 100.4.3 *Attributed rights*

Section 159(3) TIOPA provides:

The rights and powers referred to in subsection (2) are—

There follow five paragraphs of attributed rights.

### 100.4.4 *Future rights*

Section 159(3) TIOPA provides:

The rights and powers referred to in subsection (2) are—

- (a) rights and powers which P is entitled to acquire at a future date,
- (b) rights and powers which P will, at a future date, become entitled to acquire,

The wording is taken from the definition of control in the ultra-wide sense; see 99.3.11 (“Entitled to acquire”).

Section 159(5) TIOPA provides:

In subsections (3)(c) to (e) and (4), the references to a person’s rights and powers include references to any rights or powers which the person either—

- (a) is entitled to acquire at a future date, or
- (b) will, at a future date, become entitled to acquire.

#### 100.4.5 *Beneficial/fiduciary rights*

Section 159(3) TIOPA provides:

The rights and powers referred to in subsection (2) are...

- (c) rights and powers of persons other than P so far as they are rights or powers falling within subsection (4),

That takes us to s.159(4) TIOPA:

Rights and powers fall within this subsection so far as they—

- (a) are required, or may be required, to be exercised in any one or more of the following ways—
  - (i) on behalf of P,
  - (ii) under the direction of P, or
  - (iii) for the benefit of P, and
- (b) are not confined, in a case where a loan has been made by one person to another, to rights and powers conferred in relation to property of the borrower by the terms of any security relating to the loan.

#### 100.4.6 *Connected person’s rights*

Section 159(3) TIOPA provides:

The rights and powers referred to in subsection (2) are...

- (d) rights and powers of any person with whom P is connected (see section 163),

## Section 163 TIOPA defines “connected”:

- (1) Subsections (2) and (3) apply for the purposes of section 159 and this section.
- (2) Two persons are connected with each other if one of them is an individual and the other is—
  - (a) the individual’s spouse or civil partner,
  - (b) a relative of the individual,
  - (c) a relative of the individual’s spouse or civil partner, or
  - (d) the spouse, or civil partner, of a person within paragraph (b) or (c).
- (3) Two persons are connected with each other if one of them is a trustee of a settlement and the other is—
  - (a) a person who in relation to that settlement is a settlor, or
  - (b) a person who is connected with a person within paragraph (a).
- (4) In this section—
 

“relative” means brother, sister, ancestor or lineal descendant, and “settlement” and “settlor” have the same meaning as in section 620 of ITTOIA 2005.

This is a truncated version of the standard definition of “connected person”.<sup>2</sup>

“Connected” is a symmetrical relationship: if A is connected with B, then B is connected with A.

If S is the settlor of two trusts (T1 and T2) then:

- (1) S is connected with T1 and T2, under 163(3)(a).
- (2) T1 and T2 are connected, under s.163(3)(b).

100.4.7 *Indirectly connected rights*

Section 159(3) TIOPA provides:

The rights and powers referred to in subsection (2) are...

- (e) rights and powers which would be attributed by subsection (2) to a person with whom P is connected were it being decided under that subsection whether that connected person is indirectly participating in the management, control or capital of A.

Thus if A is connected to B, and B is connected to C, the rights of C are

---

<sup>2</sup> See 98.12 (Connected person).

attributed to A.

Section 159(6) TIOPA provides:

In paragraph (e) of subsection (3), the reference to rights and powers which would be attributed to a connected person includes a reference to rights and powers which, by applying that paragraph wherever one person is connected with another, would be so attributed to the connected person through a number of persons each of whom is connected with at least one of the others.

This seems to mean that if A is connected to B, and B is connected to C, and so on to Z and beyond, one attributes to A the rights of B, C, and so on to Z and beyond. There is no limit to the number of connected persons. No-one could draw up a list of persons to whom they may be connected via an unlimited number of intermediate connected persons. But unworkability is a common feature of connected person tests.

#### 100.4.8 *Joint powers*

Section 159(7) TIOPA provides:

References in this section—

- (a) to rights and powers of a person, or
- (b) to rights and powers which a person is or will become entitled to acquire,

include references to rights or powers which are exercisable by that person, or (when acquired by that person) will be exercisable, only jointly with one or more other persons.

### **100.5 Major participant: s.160**

#### 100.5.1 *Application of s.160*

Section 160(1) TIOPA provides:

Subsection (2) applies for the purposes of—

- (a) sections 148(2) and (3), 154(5), 175(2) and 204(4),
- (b) in Part 2, section 132(7), and
- (c) in Part 5, section 219(2)
- (d) in Part 6A, section 259NB(4),
- (e) in Part 10, section 463(4), and
- (f) section 608T of ITTOIA 2005.

Section 160 applies in all cases where the participation test is applied.

### 100.5.2 *Major participant test*

Section 160(2) TIOPA provides:

A person is indirectly participating in the management, control or capital of another person at a particular time if the first person is, at that time, one of a number of major participants in that other person's enterprise.

### 100.5.3 *"Major participant"*

Section 160(3) TIOPA provides the definition of "major participant"

For the purposes of this section, a person ("A") is a major participant in another person's enterprise at a particular time if at that time—

- (a) that other person ("the subordinate") is a body corporate or firm, and
- (b) the 40% test is met in the case of each of two persons—
  - (i) who, taken together, control the subordinate, and
  - (ii) of whom one is A.

### 100.5.4 *40% test*

Section 160(4) TIOPA provides:

For the purposes of this section, the 40% test is met in the case of each of two persons wherever each of them has interests, rights and powers representing at least 40% of the holdings, rights and powers in respect of which the pair of them fall to be taken as controlling the subordinate.

### 100.5.5 *Attributing rights for 40% test*

Section 160(5) TIOPA provides

For the purposes of this section—

- (a) the question whether a person is controlled by any two or more persons taken together, and
- (b) any question whether the 40% test is met in the case of a person who is one of two persons,

is to be determined after attributing to each of the persons all the rights and powers which would be attributed by section 159(2) to a person were it being decided under section 159(2) whether that person is indirectly participating in the management, control or capital of another person.

Section 160(6) TIOPA copies s.159(7); see 100.4.8 (Joint powers).

**100.6 s.161 test: s.148/175 financing**

Section 161 TIOPA provides:

- (1) Subsection (2) applies for the purposes of sections 148(2)(a) and (3)(a) and 175(2)(a).
- (2) A person (“P”) is indirectly participating in the management, control or capital of another (“A”) at the time of the making or imposition of the actual provision if—
  - (a) the actual provision relates, to any extent, to financing arrangements for A,
  - (b) A is a body corporate or firm,
  - (c) P and other persons acted together in relation to the financing arrangements, and
  - (d) P would be taken to have control of A if, at any relevant time, there were attributed to P the rights and powers of each of the other persons mentioned in paragraph (c).
- (3) It is immaterial for the purposes of subsection (2)(c) whether P and the other persons acting together in relation to the financing arrangements did so at the time of the making or imposition of the actual provision or at some earlier time.
- (4) In subsection (2)(d) “relevant time” means—
  - (a) a time when P and the other persons were acting together in relation to the financing arrangements, or
  - (b) a time in the period of six months beginning with the day on which they ceased so to act.
- (5) In determining for the purposes of subsection (2)(d) whether P would be taken to have control of another person (“A”), the rights and powers of any person (and not just P) are to be taken to include those that would be attributed to that person by section 159(2) were it being decided under section 159(2) whether that person is indirectly participating in the management, control or capital of A.
- (6) In this section “financing arrangements” means arrangements made for providing or guaranteeing, or otherwise in connection with, any debt, capital or other form of finance.

**100.7 s.162 test: Other financing**

Section 162 TIOPA provides:

- (1) Subsection (2) applies for the purposes of sections 148(2)(b) and (3)(b) and 175(2)(b).
- (2) A person (“Q”) is indirectly participating in the management, control

or capital of each of the affected persons at the time of the making or imposition of the actual provision if—

- (a) the actual provision relates, to any extent, to financing arrangements for one of the affected persons (“B”),
  - (b) B is a body corporate or firm,
  - (c) Q and other persons acted together in relation to the financing arrangements, and
  - (d) Q would be taken to have control of both B and the other affected person if, at any relevant time, there were attributed to Q the rights and powers of each of the other persons mentioned in paragraph (c).
- (3) It is immaterial for the purposes of subsection (2)(c) whether Q and the other persons acting together in relation to the financing arrangements did so at the time of the making or imposition of the actual provision or at some earlier time.
- (4) In subsection (2)(d) “relevant time” means—
- (a) a time when Q and the other persons were acting together in relation to the financing arrangements, or
  - (b) a time in the period of six months beginning with the day on which they ceased so to act.
- (5) In determining for the purposes of subsection (2)(d) whether Q would be taken to have control of another person (“A”), the rights and powers of any person (and not just Q) are to be taken to include those that would be attributed to that person by section 159(2) were it being decided under section 159(2) whether that person is indirectly participating in the management, control or capital of A.
- (6) In this section “financing arrangements” means arrangements made for providing or guaranteeing, or otherwise in connection with, any debt, capital or other form of finance.

## 100.8 % investment tests

This concept is elaborately defined. It is used in a number of contexts:

Topic	Reference	Definition	See para
Property-rich companies	para 9 sch 1A TCGA	Set out in full	54.7; 54.10
Transactions in land	s.356OT CTA 2010	Adopts s.259NC	21.9.3; 54.7
Intellectual property	s.608U ITTOIA	Set out in part	31.32
Hybrid entities	s.259NB TIOPA	Set out in full	87.25
Permanent establishment	s.1143 CTA 2010	Adopts s.259NC	101.18
Corporate interest restriction	s.464 TIOPA	Set out in full	<i>Not discussed</i>

So:

On 3 occasions, the definition is set out in full.

Once, in s.609U, the definition is set out in part.<sup>3</sup>

On 2 occasions, the s.259NC definition is incorporated by reference.

Such is the patchwork nature of taxation. There is however a common template so it is convenient to consider the matter as a separate topic, rather than in any particular context in which it may arise.

100.8.1 *The definition(s)*

In outline, the basic definition has four or five limbs, most of which have parallels in the definitions of control/close company, so discussion in that context is relevant here:

<b>Limb</b>	<b>Control</b>	<b>Close co</b>	<b>Notes</b>
Share capital	99.3.7		Only in s.259ND
Votes	99.3.8		
Receipt on disposal	-	-	
Income test	99.3.9		
Winding up test	99.3.10;	99.28	

In full detail:

<b>para 9(1) sch 1A TCGA</b>	<b>s.259ND(3) TIOPA/s.259ND(4) TIOPA</b>	<b>s.608U(1) ITTOIA</b>
A person (“P”) has a 25% investment in a company (“C”) if—	(3) A person (“P”) has an X% investment in a company (“C”) if it is reasonable to suppose <sup>4</sup> that—	(4) A person (“P”) has an X% investment in another person (“Q”) if it is reasonable to suppose that—
		A person (P) has a 51% investment in another person (C) if any of the following apply—

3 The other part incorporates the rules from the corporate interest definition. Section 608U ITTOIA provides:

(3) Section 464(2) to (11) and section 465 of TIOPA 2010 apply for the purposes of subsections (1) and (2) of this section.

(4) In the application of section 464(10) of TIOPA for the purposes of subsection (1), the reference to a "25% investment" is to be read as a "51% investment".

4 See App.2.21 (Reasonable-to-assume).

**[Share capital limb]**

(a) P possesses or is entitled to acquire X% or more of the share capital or issued share capital of C,

**[Voting limb]**

(a) P possesses or is entitled to acquire 25% or more of the voting power in C,

(b) P possesses or is entitled to acquire X% or more of the voting power in C, or

(a) P possesses or is entitled to acquire more than half of the voting power in C;

**[Disposal limb]**

(b) in the event of a disposal of the whole of the equity in C, P would receive 25% or more of the proceeds,

(c) if the whole of C's share capital were disposed of, P would receive (directly or indirectly and whether at the time of disposal or later) X% or more of the proceeds of the disposal.

(b) in the event of a disposal of the whole of the equity in C, P would receive more than half of the proceeds;

**[Distribution limb]**

(c) in the event that the income in respect of the equity in C were distributed among the equity holders in C, P would receive 25% or more of the amount so distributed, or

(a) if the whole of Q's income were distributed, P would receive (directly or indirectly and whether at the time of the distribution or later) X% or more of the distributed amount, of

(c) in the event that the income in respect of the equity in C were distributed among the equity holders in C, P would receive more than half of the amount so distributed;

**[Winding-up limb]**

(d) in the event of a winding-up of C or in any other circumstances, P would receive 25% or more of C’s assets which would then be available for distribution among the equity holders in C in respect of the equity in C.

(b) in the event of a winding-up of Q or in any other circumstances, P would receive (directly or indirectly and whether or not at the time of the winding-up or other circumstances or later) X% or more of Q’s assets which would then be available for distribution.

(d) in the event of a winding-up of C or in any other circumstances, P would receive more than half of C’s assets which would then be available for distribution among the equity holders in C in respect of the equity in C.

100.8.2 *Which percentage?*

**s.259ND TIOPA**

(1) Where this section applies for the purposes of determining whether a person has a “50% investment” in another person for the purposes of section 259NB(6), references in this section to X% are to be read as references to 50%.

(2) Where this section applies for the purposes of determining whether a person has a “25% investment” in another person for the purposes of section 259NC(2), references in this section to X% are to be read as references to 25%.

**s.608U ITTOIA**

(2) A person (P) has a 25% investment in another person (c) where any paragraph of subsection (1) would apply if in that paragraph for “more than half” there were substituted “at least a quarter”.

100.8.3 *“Equity in C”*

This expression is used several times in the % investment tests. Para 9(2) sch 1A TCGA/s.464(2) TIOPA provide:

In this paragraph/section references to the equity in C are to—

- (a) the shares in C other than restricted preference shares, or

(b) loans to C other than normal commercial loans.<sup>5</sup>

The definition of “equity in C” uses the expression “shares in C”. Para 9(3) sch 1A TCGA/s.464(3) TIOPA provide:

For this purpose “shares in C” includes—

- (a) stock, and
- (b) any other interests of members in C.

#### 100.8.4 *Equity holder*

This expression is used several times in the % investment tests.

Para 9(4) sch 1A TCGA/s.464(4) TIOPA provide:

For the purposes of this paragraph/section a person is an equity holder in C if the person possesses any of the equity in C.

#### 100.8.5 “Receipt”

This expression is used several times in the % investment tests:

<b>para 9 sch 1A TCGA</b>	<b>s.259ND(5) TIOPA</b>	<b>s.464 ITTOIA</b>
(7) In this paragraph references to a person receiving any proceeds, amount or assets include—	In this section, references to a person receiving any proceeds, amount or assets include	In this section references to a person receiving any proceeds, amount or assets include—
(a) the direct or indirect receipt of the proceeds, amount or assets, and		[Identical to para 9]
(b) the direct or indirect application of the proceeds, amount or assets for the person’s benefit,	references to the proceeds, amount or assets being applied (directly or indirectly) for that person’s benefit.	[Identical to para 9]

---

<sup>5</sup> See 60.12 (Normal commercial loan).

and it does not matter whether the receipt or application is at the time of the disposal, distribution, winding-up or other circumstances or at a later time.

[Identical to para 9]

(8) If—  
 (a) here is a direct receipt or direct application of any proceeds, amount or assets by or for the benefit of a person (“A”), and  
 (b) another person (“B”) directly or indirectly owns a percentage of the equity in A,

[Identical to para 9]

there is, for the purposes of sub-paragraph (7), an indirect receipt or indirect application of that percentage of the proceeds, amount or assets by or for the benefit of B.

there is, for the purposes of subsection (7), an indirect receipt or indirect application of that percentage of the proceeds, amount or assets by or for the benefit of B.

(9) For this purpose the percentage of the equity in A directly or indirectly owned by B is to be determined by applying the rules in sections 1155 to 1157 of CTA 2010 with such modifications (if any) as may be necessary.<sup>6</sup>

[Identical to para 9]

### 100.8.6 *Commercial loan exemption*

**para 9(10) sch 1A TCGA**

**s.464 TIOPA**

---

<sup>6</sup> See 60.27.2 (Indirect ownership).  
 FD\_100\_Participation\_and\_%\_interest\_tests.wpd

Sub-paragraph (7) is not to result in a person being regarded as having a 25% investment in another person merely as a result of their being parties to a normal commercial loan.<sup>7</sup>

Subsection (7) is not to result in a person being regarded as having a 25% investment in another person merely as a result of their being parties to a normal commercial loan.

Para 9(6) sch 1A TCGA/s.464(6) TIOPA provide:

In a case where C is a company which does not have share capital, in applying for the purposes of this paragraph the definitions of “normal commercial loan” and “restricted preference shares”—

- (a) sections 160(2) to (7) and 161 to 164 of CTA 2010, and
  - (b) any other relevant provisions of that Act,
- have effect with the necessary modifications.

### 100.8.7 *Connected persons*

#### **Para 10 sch 1A TCGA**

(1) In determining for the purposes of paragraph 9 the investment that a person (“P”) has in a company, P is to be taken to have all of the rights and interests of any person connected with P.

#### **s.456 TIOPA**

(1) In determining for the purposes of section 464 the investment that a person (“P”) has in another person, P is to be taken to have all of the rights and interests of—

- (a) any person connected with P,
- (b) any person who is a member of a partnership, or is connected with a person who is member of a partnership, of which P is a member, or
- (c) any person who is a member of a partnership, or is connected with a person who is a member of a partnership, of which a person connected with P is a member.

The standard definition of connected person is amended:

#### **Para 10 sch 1A TCGA**

#### **s.456 TIOPA**

---

<sup>7</sup> See 60.12 (Normal commercial loan).

(2) A person is not to be regarded as connected with another person for the purposes of this paragraph merely as a result of their being parties to a loan that is a normal commercial loan for the purposes of paragraph 9.

(3) Section 286 (connected persons: interpretation) has effect for the purposes of this paragraph—

(a) as if, in subsection (2), for the words from “, or is a relative” to the end there were substituted “or is a lineal ancestor or lineal descendant of the individual or of the individual's spouse or civil partner”, and

(b) as if subsections (4) and (8) were omitted.

(2) For the purposes of subsection (1)—

(a) section 1122 of CTA 2010 (“connected” persons) applies but as if subsections (7) and (8) of that section were omitted, but

(b) a person is not to be regarded as connected with another person merely as a result of their being parties to a loan that is a normal commercial loan for the purposes of section 464.

These definitions have similarities but are not identical. I consider only the CGT definition here.

Amended as para 9(3)(a) directs, s.268(2) provides:

A person is connected with an individual if that person is the individual's spouse or civil partner, ~~or is a relative, or the spouse or civil partner of a relative, of the individual or of the individual's spouse or civil partner~~ or is a lineal ancestor or lineal descendant of the individual or of the individual's spouse or civil partner.

The effect of deleting s.286(4) is that partners are not connected persons. Section 286(8) is the definition of relative; it is deleted for neatness as it is not needed, as a result of the amendment to s.268(2).

### 100.8.8 *Acting together*

The following rule does not apply for sch 1A TCGA:

**s.259ND ITTOIA**

**s.465 TIOPA**

(6) For the purposes of subsections (3) and (4), in determining what percentage investment a person (“P”) has in another person (“U”), where P acts together with a third person (“T”) in relation to U, P is to be taken to have all of T’s rights and interests in relation to U.

(7) P is to be taken to “act together” with T in relation to U if (and only if) subsection (7A) or (7B) applies.

(7A) This subsection applies if—

(a) P and T are party to a partnership agreement that—

(i) it is reasonable to suppose is designed to affect the value of any of T’s rights or interest in relation to U, or  
(ii) relates to the exercise of any of T’s rights in relation to U, or

(b) the same person manages—

(i) some or all of P’s rights or interests in relation to U, and

(ii) some or all of T’s rights or interests in relation to U.

(3) In determining for the purposes of section 464 the investment that a person (“P”) has in another person (“U”), P is to be taken to have all of the rights and interests of a third person (“T”) with whom P acts together in relation to U. (“P”) has in another person (“U”),

(4) For this purpose P “acts together” with T in relation to U if (and only if)—  
(a) for the purpose of influencing the conduct of U’s affairs—

(i) P is able to secure that T acts in accordance with P’s wishes (or vice versa), or

(ii) T can reasonably be expected to act, or typically acts, in accordance with P’s wishes (or vice versa),

(b) P and T are party to an arrangement that it is reasonable to conclude is designed to affect the value of any equity in U possessed by T, or

(c) the same person manages some or all of any equity in U possessed by P and T.

In paragraphs (b) and (c) references to equity in U are to be read in accordance with section 464.

(5) But P does not “act together” with T in relation to U under subsection (4)(c) if—

(a) the managing person does so as the operator of different collective investment schemes, and

(b) the management of the schemes is not coordinated for the purpose of influencing the conduct of U’s affairs.

(6) For this purpose “collective investment scheme” and “operator” have the same meaning as in Part 17 of the Financial Services and Markets Act 2000 (see sections 235 and 237).

(7B) This subsection applies if P has a relevant investment in U and—

- (a) P and T are connected (within the meaning given by section 163),
- (b) for the purposes of influencing the conduct of U's affairs—
  - (i) P is able to secure that T acts in accordance with P's wishes,
  - (ii) T can reasonably be expected to act, or typically acts, in accordance with P's wishes,
  - (iii) T is able to secure that P acts in accordance with T's wishes, or
  - (iv) P can reasonably be expected to act, or typically acts, in accordance with T's wishes, or
- (c) P and T are party to any arrangement that—
  - (i) it is reasonable to suppose is designed to affect the value of any of T's rights or interests in relation to U, or
  - (ii) relates to the exercise of any of T's rights in relation to U.

(7) In determining for the purposes of section 464 the investment that a person P is to be taken to have all of the rights and interests of one or more third persons with whom P has entered into a qualifying arrangement in relation to U.

(8) For this purpose P has entered into a qualifying arrangement with one or more third persons in relation to U if they are parties to an arrangement concerning U as a result of which, by reference to shares held, or to be held, by any one or more of them in U, they can reasonably be expected to act together—

- (a) so as to exert greater influence in relation to U than any one of them would be able to exert if acting alone, or
- (b) otherwise so as to be able to achieve an outcome in relation to U that, if attempted by any one of them acting alone, would be significantly more difficult to achieve.

(9) For this purpose the reference to shares in U includes shares in U that may be held as a result of the exercise of any right or power and includes rights or interests in U that are of a similar character to shares.

(10) In this section “arrangement” includes any agreement, understanding, scheme, transaction or series of transactions (whether or not legally enforceable).

(7C) To determine whether P has a “relevant investment” in U at a particular time, subsections (3) and (4) apply but as if—

- (a) for “an X%”, in both places, there were substituted “a relevant”, and
- (b) for “X% or more”, in each place, there were substituted “greater than 5%”.

(7D) For that purpose—

- (a) subsection (6) is to be ignored, and
- (b) P's rights and interests are to be aggregated with the rights and interests of persons connected to P (within the meaning given by section 1122 of CTA 2010, ignoring subsection (4) of that section).

(8) P does not “act together” with T in relation to U under paragraph (b) of subsection (7A) where—

- (a) the person who manages the rights or interests of P mentioned in sub-paragraph (i) of that paragraph, does so as the operator of a collective investment scheme,
- (b) that person manages the rights or interests of T mentioned in sub-paragraph (ii) of that paragraph as the operator of a different collective investment scheme, and
- (c) the Commissioners are satisfied that the management of the schemes is not coordinated for the purpose of influencing the conduct of U 's affairs.

(9) In subsection (8) “collective investment scheme” and “operator” have the same meaning as in Part 17 of the Financial Services and Markets Act 2000 (see sections 235 and 237 of that Act).

## PERMANENT ESTABLISHMENT AND BRANCH/AGENCY

### 101.1 PE: Introduction

#### 101.1 PE: Introduction

It is not practical to set out a full list of the tax significance of a UK PE, but the following are the most important.

PE is central to the territorial limitations of corporation tax:

- (1) A non-resident company trading through a PE is subject to corporation tax on income linked to the PE.<sup>1</sup> In the absence of a PE, a non-resident company trading in the UK is not subject to CT. Instead the company is in principle subject to income tax on its income, but:
  - (a) it is unusual for activity of a non-resident company to constitute trading in the UK but not trading through a PE;<sup>2</sup> and
  - (b) if it did happen, investment manager exemptions or DT relief will often apply.
- (2) A company trading in the UK through a PE is subject to corporation tax on gains linked to the PE.<sup>3</sup> In the absence of a PE, a non-resident company is not in general subject to CT/CGT on its gains.

PE is central to DT relief: In the absence of a PE, a person treaty-resident in a foreign State with a DTA in OECD Model form generally qualifies for relief for UK source trading income, dividends, interest, royalties, capital gains and other income. All these reliefs are restricted for

---

1 See 20.5 (CT territorial limit: Trading).

2 See 101.22 (Trade in UK without PE).

3 See 53.5 (Trade through UK branch/PE).

income/gains linked to a PE.

Corporation Tax may be collected from the PE.<sup>4</sup>

PE of a corporate trustee is relevant to trust residence.

If a non-resident *individual or trustee* is carrying on a trade in the UK, the UK domestic law tax position is not affected whether or not they are carrying on their trade through a PE; but similar rules apply if they are carrying on business through a branch/agency, which is a similar concept.<sup>5</sup>

A PE or branch is not a “person”<sup>6</sup> though for many purposes it is treated as one.

The topic of PE need a long book to itself and several such books have been written.<sup>7</sup> This chapter is a (relatively) brief introduction.

## 101.2 PE: UK-law/OECD Model meanings

There are two principal definitions of PE in tax legislation:

<b>My term</b>	<b>INTM term</b>	<b>Defined</b>
UK-law PE	Domestic law PE	s.1141 CTA 2010
OECD Model PE	Treaty PE <sup>8</sup>	Art 5 OECD Model

There are 2 principal types of PE:

<b>Type of PE</b>	<b>CTA 2010</b>	<b>OECD Model</b>	<b>See para</b>
Fixed place of business PE	s.1141(1)(a)	Art 5(1)	101.5
Agency-PE	s.1141(1)(b)	Art 5(5)	101.12

### 101.2.1 *Pre/post-2017 OECD Model*

The OECD Model was amended in 2017, so I refer to:

- (a) Pre-2017 Model form
- (b) Post-2017 Model form

4 See 118.1 (Tax collected from UK representatives).

5 See 101.24 (Why branch/agency matters).

6 See App.2.9 (Person/legal personality).

7 There is a bibliography in Reimer, Urban and Schmid (ed), *Permanent Establishments* (2011), para 1.3. See too IFA, *Is there a Permanent Establishment?* Cahiers du Droit International (Vol 94a, 2009); [2006] BTR at p.722. For Australian Revenue views, see Taxation Ruling TR 2002/5.

8 I prefer the term “OECD Model PE” because treaty definitions are not all the same; see 101.21 (PE: Pre-1963 DTAs).

The OECD Commentary was also amended in 2017. It comments on the changes:

3. In 2017, a number of changes were made to this Commentary. Some of these changes were intended to clarify the interpretation of the Article and, as such, should be taken into account for the purposes of the interpretation and application of conventions concluded before their adoption because they reflect the consensus of the OECD member countries as to the proper interpretation of existing provisions and their application to specific situations (see paragraph 35 of the Introduction).<sup>9</sup>

4. Changes to this Commentary related to the addition of paragraph 4.1 and the modification of paragraphs 4, 5 and 6 of the Article that were made as a result of the adoption of the Report on Action 7 of the OECD/G20 Base Erosion and Profit Shifting Project were, however, prospective only and, as such, do not affect the interpretation of the former provisions of the OECD Model Tax Convention and of treaties in which these provisions are included, in particular as regards the interpretation of paragraphs 4 and 5 of the Article as they read before these changes (see paragraph 4 of that Report).

#### 101.2.2 *Scope of UK-law definition*

Section 1141(1) CTA 2010 provides:

For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if ...

This definition applies only for the purposes of the Corporation Tax Acts, so it needs to be incorporated when the same term is used elsewhere.

For CGT, s.288 TCGA provides:

In this Act, unless the context otherwise requires—  
“permanent establishment”, in relation to a company, is to be read in accordance with Chapter 2 of Part 24 of CTA 2010

Similarly, for IT, s.989 ITA provides:

The following definitions apply for the purposes of the Income Tax Acts—

“permanent establishment”, in relation to a company, is to be read in accordance with Chapter 2 of Part 24 of CTA 2010...

---

<sup>9</sup> See 103.9.6 (Variations between DTAs).

Thus the UK-law definition applies throughout the Taxes Acts, but it only applies in relation to companies.

If a UK tax statute used the expression PE in relation to a *non-company*, the statutory definition would not apply<sup>10</sup> and the expression would (subject to context) bear its normal meaning. I think OECD Model meaning is the normal meaning, though if the view expressed here is right, that UK-law PE has the same meaning as OECD Model PE, then it makes no difference.

### 101.2.3 *Role of OECD Model definition*

OECD Commentary provides:

9. ... the determination of whether or not an enterprise of a Contracting State has a permanent establishment in the other Contracting State must be made independently from the determination of which provisions of the Convention apply to the profits derived by that enterprise. For instance, a farm or apartment rental office situated in a Contracting State and exploited by a resident of the other Contracting State may constitute a permanent establishment regardless of whether or not the profits attributable to such permanent establishment would constitute income from immovable property covered by Article 6; whilst the existence of a permanent establishment in such cases may not be relevant for the application of Article 6, it would remain relevant for the purposes of other provisions such as

[1] paragraphs 4 and 5 of Article 11,

[2] subparagraph c) of paragraph 2 of Article 15<sup>11</sup> and

[3] paragraph 3 of Article 24.

### 101.2.4 *Trading through PE*

UK tax provisions refer to a company carrying on a trade through a PE, so one might think that there are two distinct questions:

- (1) whether a PE exists
- (2) whether the company is carrying on a trade through the PE.

However PE is defined as “a fixed place of business through which the

---

10 Unless expressly extended; for an example, see 31.8.3 (Deemed UK source).

11 See 36.12 (STBV payment condition (c): PE).

business of the company is carried on”; so if a company owns (say) an office building which it does not use (or which it does not use for its business) then strictly the office building is not a PE at all.

A let property is not normally a PE of the lessor; contrast 101.10.2 (Commencement/cessation of business).

### **101.3 PE in other contexts**

PE and branch/agency (or similar concepts) are also relevant for many non-tax purposes, such as civil jurisdiction.

#### *101.3.1 Overseas Companies Regs 2009*

The concept of establishment is found in Overseas Companies Regulations 2009, which applies to an overseas company with a UK establishment. Reg 2 Overseas Companies Regulations 2009 provides:

“establishment” means—

(a) a branch within the meaning of the Eleventh Company Law Directive (89/666/EEC),<sup>12</sup> or

(b) a place of business that is not such a branch, and “UK establishment” means an establishment in the United Kingdom;

We are in a similar line of country, here.

#### *101.3.2 VAT*

Section 9 VATA refers to a business establishment, or some other fixed establishment, again a similar line of country.

OECD Commentary provides:

5. In many States, a foreign enterprise may be allowed or required to register for the purposes of a value added tax or goods and services tax (VAT/GST) regardless of whether it has in that State a fixed place of business through which its business is wholly or partly carried on or whether it is deemed to have a permanent establishment in that State under paragraph 5 of Article 5. By itself, however, application of the definition of permanent establishment in the Convention; when applying

---

<sup>12</sup> This directive, since repealed, used the word “branch” but did not provide a definition.

that definition, one should not, therefore, draw any inference from the treatment of a foreign enterprise for VAT/GST purposes, including from the fact that a foreign enterprise has registered for VAT/GST purposes.<sup>13</sup>

## **101.4 Some general points**

### *101.4.1 Productive character irrelevant*

OECD Commentary provides:

7. It could perhaps be argued that in the general definition some mention should also be made of the other characteristic of a permanent establishment to which some importance has sometimes been attached in the past, namely that the establishment must have a productive character, i.e. contribute to the profits of the enterprise. In the present definition this course has not been taken. Within the framework of a well-run business organisation it is surely axiomatic to assume that each part contributes to the productivity of the whole. It does not, of course, follow in every case that because in the wider context of the whole organisation a particular establishment has a “productive character” it is consequently a permanent establishment to which profits can properly be attributed for the purpose of tax in a particular territory (see Commentary on paragraph 4).

### *101.4.2 Period of enquiry*

OECD Commentary makes an obvious point:

8. It is also important to note that the way in which business is carried

---

13 Footnote original: See paragraph 337 of the Report on Action 1 of the BEPS Project (“... it is important to underline that registration for VAT purposes is independent from the determination of whether there is a permanent establishment (PE) for income tax purposes.”), OECD (2015), *Addressing the Tax Challenges of the Digital Economy, Action 1 - 2015 Final Report*, OECD/G20 Base Erosion and Profit Shifting Project, OECD Publishing, Paris, <http://dx.doi.org/10.1787/9789264241046-en> Cf. footnote 24 of the International VAT/GST Guidelines (“For the purpose of these Guidelines, it is assumed that an establishment comprises a fixed place of business with a sufficient level of infrastructure in terms of people, systems and assets to be able to receive and/or make supplies. Registration for VAT purposes by itself does not constitute an establishment for the purposes of these Guidelines. Countries are encouraged to publicise what constitutes an “establishment” under their domestic VAT legislation.”), OECD (2017), *International VAT/GST Guidelines*, OECD Publishing, Paris, [http:// dx.doi.org/10.1787/9789264271401-en](http://dx.doi.org/10.1787/9789264271401-en)

on evolves over the years so that the facts and arrangements applicable at one point in time may no longer be relevant after a change in the way that the business activities are carried on in a given State. Clearly, whether or not a permanent establishment exists in a State during a given period must be determined on the basis of the circumstances applicable during that period and not those applicable during a past or future period, such as a period preceding the adoption of new arrangements that modified the way in which business is carried on.

### 101.5 Fixed place of business PE

The UK-law/OECD Model provisions are substantially the same:

#### s.1141(1) CTA 2010

For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if (and only if)—

(a) it has a fixed place of business there through which the business of the company is wholly or partly carried on

#### Art 5(1) OECD Model

For the purposes of this Convention, the term “permanent establishment” means

a fixed place of business through which the business of an enterprise is wholly or partly carried on.

OECD Commentary provides:

6... This definition ... contains the following conditions:

- [1] the existence of a “place of business”, i.e. a facility such as premises or, in certain instances, machinery or equipment;
- [2] this place of business must be “fixed”, i.e. it must be established at a distinct place with a certain degree of permanence;
- [3] the carrying on of the business of the enterprise through this fixed place of business. This means usually that persons who, in one way or another, are dependent on the enterprise (personnel) conduct the business of the enterprise in the State in which the fixed place is situated.

I refer to these as the geographic, permanence and personnel conditions.

### 101.6 Geographic condition

OECD Commentary provides:

10. The term “place of business” covers any premises, facilities or installations used for carrying on the business of the enterprise whether or not they are used exclusively for that purpose. A place of business may also exist where no premises are available or required for carrying on the business of the enterprise and it simply has a certain amount of space at its disposal. It is immaterial whether the premises, facilities or installations are owned or rented by or are otherwise at the disposal of the enterprise. A place of business may thus be constituted by a pitch in a market place, or by a certain permanently used area in a customs depot (e.g. for the storage of dutiable goods). Again the place of business may be situated in the business facilities of another enterprise. This may be the case for instance where the foreign enterprise has at its constant disposal certain premises or a part thereof owned by the other enterprise.

11. ... the mere fact that an enterprise has a certain amount of space at its disposal which is used for business activities is sufficient to constitute a place of business. No formal legal right to use that place is therefore required. Thus, for instance, a permanent establishment could exist where an enterprise illegally occupied a certain location where it carried on its business.

12. Whilst no formal legal right to use a particular place is required for that place to constitute a permanent establishment, the mere presence of an enterprise at a particular location does not necessarily mean that that location is at the disposal of that enterprise. Whether a location may be considered to be at the disposal of an enterprise in such a way that it may constitute a “place of business through which the business of [that] enterprise is wholly or partly carried on” will depend on that enterprise having the effective power to use that location as well as the extent of the presence of the enterprise at that location and the activities that it performs there. This is illustrated by the following examples. Where an enterprise has an exclusive legal right to use a particular location which is used only for carrying on that enterprise’s own business activities (e.g. where it has legal possession of that location), that location is clearly at the disposal of the enterprise. This will also be the case where an enterprise is allowed to use a specific location that belongs to another enterprise or that is used by a number of enterprises and performs its business activities at that location on a continuous basis during an extended period of time. This will not be the case, however, where the enterprise’s presence at a location is so intermittent or incidental that the location cannot be considered a place of business of the enterprise (e.g. where employees of an enterprise have access to the premises of

associated enterprises which they often visit but without working in these premises for an extended period of time). Where an enterprise does not have a right to be present at a location and, in fact, does not use that location itself, that location is clearly not at the disposal of the enterprise; thus, for instance, it cannot be considered that a plant that is owned and used exclusively by a supplier or contract-manufacturer is at the disposal of an enterprise that will receive the goods produced at that plant merely because all these goods will be used in the business of that enterprise (see also paragraphs 65, 66 and 121 below). ...

13. These principles are illustrated by the following additional examples where representatives of one enterprise are present on the premises of another enterprise.

The OECD commentary gives 4 examples. In outline:

**Para: Facts**

**PE**

- 14: Salesperson visits customer regularly No
- 15: Employee of parent uses premises of subsidiary Yes
- 16: Transportation enterprise uses delivery dock at customer’s warehouse No
- 17: Painter works in building 3 days/week for 2 years Yes
- 18/19: Home office Not usually

14. A first example is that of a salesman who regularly visits a major customer to take orders and meets the purchasing director in his office to do so. In that case, the customer’s premises are not at the disposal of the enterprise for which the salesman is working and therefore do not constitute a place of business through which the business of that enterprise is carried on (depending on the circumstances, however, paragraph 5 [agency-PE] could apply to deem a permanent establishment to exist).

15. A second example is that of an employee of a company who, for a long period of time, is allowed to use an office in the headquarters of another company (e.g. a newly acquired subsidiary) in order to ensure that the latter company complies with its obligations under contracts concluded with the former company. In that case, the employee is carrying on activities related to the business of the former company and the office that is at his disposal at the headquarters of the other company will constitute a permanent establishment of his employer, provided that the office is at his disposal for a sufficiently long period of time so as to constitute a “fixed place of business” (see paragraphs 28 to 34) and that the activities that are performed there go beyond the activities referred

to in paragraph 4 of the Article [Preparatory/auxiliary activities].

16. A third example is that of a road transportation enterprise which would use a delivery dock at a customer's warehouse every day for a number of years for the purpose of delivering goods purchased by that customer. In that case, the presence of the road transportation enterprise at the delivery dock would be so limited that that enterprise could not consider that place as being at its disposal so as to constitute a permanent establishment of that enterprise.

17. A fourth example is that of a painter who, for two years, spends three days a week in the large office building of its main client. In that case, the presence of the painter in that office building where he is performing the most important functions of his business (i.e. painting) constitute a permanent establishment of that painter.

#### 101.6.1 *Home office*

The OECD commentary discusses a home office. The issue has become more important as home working has increased as a result of Covid:

18. Even though part of the business of an enterprise may be carried on at a location such as an individual's home office, that should not lead to the automatic conclusion that that location is at the disposal of that enterprise simply because that location is used by an individual (e.g. an employee) who works for the enterprise. Whether or not a home office constitutes a location at the disposal of the enterprise will depend on the facts and circumstances of each case. In many cases, the carrying on of business activities at the home of an individual (e.g. an employee) will be so intermittent or incidental that the home will not be considered to be a location at the disposal of the enterprise (see paragraph 12 above). Where, however,

[1] a home office is used on a continuous basis for carrying on business activities for an enterprise and

[2] it is clear from the facts and circumstances that the enterprise has required the individual to use that location to carry on the enterprise's business (e.g. by not providing an office to an employee in circumstances where the nature of the employment clearly requires an office),

the home office may be considered to be at the disposal of the enterprise.

19. A clear example is that of a non-resident consultant who is present for an extended period in a given State where she carries on most of the

business activities of her own consulting enterprise from an office set up in her home in that State; in that case, that home office constitutes a location at the disposal of the enterprise. Where, however, a cross-frontier worker performs most of his work from his home situated in one State rather than from the office made available to him in the other State, one should not consider that the home is at the disposal of the enterprise because the enterprise did not require that the home be used for its business activities. It should be noted, however, that since the vast majority of employees reside in a State where their employer has at its disposal one or more places of business to which these employees report, the question of whether or not a home office constitutes a location at the disposal of an enterprise will rarely be a practical issue. Also, the activities carried on at a home office will often be merely auxiliary and will therefore fall within the exception of paragraph 4 [Preparatory/auxiliary activities].

See too 101.27 (Home office due to Covid).

### **101.7 “Through which” enterprise carried on**

The OECD commentary provides:

20. The words “through which” must be given a wide meaning so as to apply to any situation where business activities are carried on at a particular location that is at the disposal of the enterprise for that purpose. Thus, for instance, an enterprise engaged in paving a road will be considered to be carrying on its business “through” the location where this activity takes place.

### **101.8 Fixed/permanency**

#### **101.8.1 “Fixed” place**

The OECD commentary provides:

21. According to the definition, the place of business has to be a “fixed” one. Thus in the normal way there has to be a link between the place of business and a specific geographical point. It is immaterial how long an enterprise of a Contracting State operates in the other Contracting State if it does not do so at a distinct place, but this does not mean that the equipment constituting the place of business has to be actually fixed to the soil on which it stands. It is enough that the equipment remains on a particular site (but see paragraph 57 below).

22. Where the nature of the business activities carried on by an enterprise is such that these activities are often moved between neighbouring locations, there may be difficulties in determining whether there is a single “place of business” (if two places of business are occupied and the other requirements of Article 5 are met, the enterprise will, of course, have two permanent establishments). As recognised in paragraphs 51 and 57 below a single place of business will generally be considered to exist where, in light of the nature of the business, a particular location within which the activities are moved may be identified as constituting a coherent whole commercially and geographically with respect to that business.

23. This principle may be illustrated by examples. A mine clearly constitutes a single place of business even though business activities may move from one location to another in what may be a very large mine as it constitutes a single geographical and commercial unit as concerns the mining business. Similarly, an “office hotel” in which a consulting firm regularly rents different offices may be considered to be a single place of business of that firm since, in that case, the building constitutes a whole geographically and the hotel is a single place of business for the consulting firm. For the same reason, a pedestrian street, outdoor market or fair in different parts of which a trader regularly sets up his stand represents a single place of business for that trader.

24. By contrast, where there is no commercial coherence, the fact that activities may be carried on within a limited geographic area should not result in that area being considered as a single place of business. For example, where a painter works successively under a series of unrelated contracts for a number of unrelated clients in a large office building so that it cannot be said that there is one single project for repainting the building, the building should not be regarded as a single place of business for the purpose of that work. However, in the different example of a painter who, under a single contract, undertakes work throughout a building for a single client, this constitutes a single project for that painter and the building as a whole can then be regarded as a single place of business for the purpose of that work as it would then constitute a coherent whole commercially and geographically.

25. Conversely, an area where activities are carried on as part of a single project which constitutes a coherent commercial whole may lack the necessary geographic coherence to be considered as a single place of business. For example, where a consultant works at different branches

in separate locations pursuant to a single project for training the employees of a bank, each branch should be considered separately. However if the consultant moves from one office to another within the same branch location, he should be considered to remain in the same place of business. The single branch location possesses geographical coherence which is absent where the consultant moves between branches in different locations.

26. A ship that navigates in international waters or within one or more States is not fixed and does not, therefore, constitute a fixed place of business (unless the operation of the ship is restricted to a particular area that has commercial and geographic coherence). Business activities carried on aboard such a ship, such as the operation of a shop or restaurant, must be treated the same way for the purposes of determining whether paragraph 1 applies (paragraph 5 could apply, however, to some of these activities, e.g. where contracts are concluded when such shops or restaurants are operated within a State).

27. [This para discusses the somewhat niche question of whether a geostationary satellite is a PE.]

### 101.8.2 *Degree of permanency*

The OECD Commentary provides:

28. Since the place of business must be fixed, it also follows that a permanent establishment can be deemed to exist only if the place of business has a certain degree of permanency, i.e. if it is not of a purely temporary nature.

That might also be inferred from the label *permanent* establishment. But what is “permanent” may be for quite a short period:<sup>14</sup>

A place of business may, however, constitute a permanent establishment even though it exists, in practice, only for a very short period of time because the nature of the business is such that it will only be carried on for that short period of time. It is sometimes difficult to determine whether this is the case. Whilst the practices followed by member countries have not been consistent in so far as time requirements are concerned, experience has shown that permanent establishments normally have not been considered to exist in situations where a

---

14 Contrast 8.12.2 (“Permanent”).

business had been carried on in a country through a place of business that was maintained for less than six months (conversely, practice shows that there were many cases where a permanent establishment has been considered to exist where the place of business was maintained for a period longer than six months).

[1] One exception has been where the activities were of a recurrent nature; in such cases, each period of time during which the place is used needs to be considered in combination with the number of times during which that place is used (which may extend over a number of years).

[2] Another exception has been made where activities constituted a business that was carried on exclusively in that country; in this situation, the business may have short duration because of its nature but since it is wholly carried on in that country, its connection with that country is stronger. ...

29. [Exception [1]] is illustrated by the following example. An enterprise of State R carries on drilling operations at a remote arctic location in State S. The seasonal conditions at that location prevent such operations from going on for more than three months each year but the operations are expected to last for five years. In that case, given the nature of the business operations at that location, it could be considered that the time requirement for a permanent establishment is met due to the recurring nature of the activity regardless of the fact that any continuous presence lasts less than six months; the time requirement could similarly be met in the case of shorter recurring periods of time that would be dictated by the specific nature of the relevant business.

30. [Exception [2]] is illustrated by the following example. An individual resident of State R has learned that a television documentary will be shot in a remote village in State S where her parents still own a large house. The documentary will require the presence of a number of actors and technicians in that village during a period of four months. The individual contractually agrees with the producer of the documentary to provide catering services to the actors and technicians during the four-month period and, pursuant to that contract, she uses the house of her parents as a cafeteria that she operates as sole proprietor during that period. These are the only business activities that she has carried on and the enterprise is terminated after that period; the cafeteria will therefore be the only location where the business of that enterprise will be wholly carried on. In that case, it could be considered that the time requirement for a permanent establishment is met since the

restaurant is operated during the whole existence of that particular business. This would not be the situation, however, where a company resident of State R which operates various catering facilities in State R would operate a cafeteria in State S during a four-month production of a documentary. In that case, the company's business, which is permanently carried on in State R, is only temporarily carried on in State S.

...

32. As mentioned in paragraphs 44 and 55, temporary interruptions of activities do not cause a permanent establishment to cease to exist. Similarly, as discussed in paragraph 6, where a particular place of business is used for only very short periods of time but such usage takes place regularly over long periods of time, the place of business should not be considered to be of a purely temporary nature.

33. Also, there may be cases where a particular place of business would be used for very short periods of time by a number of similar businesses carried on by the same or related persons in an attempt to avoid that the place be considered to have been used for more than purely temporary purposes by each particular business. The remarks of paragraphs 52 and 53 on arrangements intended to abuse the twelve-month period provided for in paragraph 3<sup>15</sup> would equally apply to such cases.

34. Where a place of business which was, at the outset, designed to be used for such a short period of time that it would not have constituted a permanent establishment but is in fact maintained for such a period that it can no longer be considered as a temporary one, it becomes a fixed place of business and thus — retrospectively — a permanent establishment. A place of business can also constitute a permanent establishment from its inception even though it existed, in practice, for a very short period of time, if as a consequence of special circumstances (e.g. death of the taxpayer, investment failure), it was prematurely liquidated...

### 101.8.3 *Leasing*

OECD Commentary provides:

36. Where tangible property such as facilities, industrial, commercial or scientific (ICS) equipment, buildings, or intangible property such as patents, procedures and similar property, are let or leased to third parties

---

15 See 101.11.1 (Building/construction site).

through a fixed place of business maintained by an enterprise of a Contracting State in the other State, this activity will, in general, render the place of business a permanent establishment. The same applies if capital is made available through a fixed place of business. If an enterprise of a State lets or leases facilities, ICS equipment, buildings or intangible property to an enterprise of the other State without maintaining for such letting or leasing activity a fixed place of business in the other State, the leased facility, ICS equipment, building or intangible property, as such, will not constitute a permanent establishment of the lessor provided the contract is limited to the mere leasing of the ICS equipment, etc. This remains the case even when, for example, the lessor supplies personnel after installation to operate the equipment provided that their responsibility is limited solely to the operation or maintenance of the ICS equipment under the direction, responsibility and control of the lessee. If the personnel have wider responsibilities, for example, participation in the decisions regarding the work for which the equipment is used, or if they operate, service, inspect and maintain the equipment under the responsibility and control of the lessor, the activity of the lessor may go beyond the mere leasing of ICS equipment and may constitute an entrepreneurial activity. In such a case a permanent establishment could be deemed to exist if the criterion of permanency is met. When such activity is connected with, or is similar in character to, those mentioned in paragraph 3, the time limit of twelve months applies. Other cases have to be determined according to the circumstances.

37. [This paragraph considers the niche topic of container leasing]

37. [This paragraph considers the niche topic of telecommunication networks]

### **101.9 Personnel condition**

To apply the personnel condition one has to identify who are the personnel.

The OECD Model provides:

39. There are different ways in which an enterprise may carry on its business. In most cases, the business of an enterprise is carried on by the entrepreneur or persons who are in a paid-employment relationship with the enterprise (personnel). This personnel includes employees and other persons receiving instructions from the enterprise (e.g. dependent agents). The powers of such personnel in its relationship with third

parties are irrelevant. It makes no difference whether or not the dependent agent is authorised to conclude contracts if he works at the fixed place of business of the enterprise (see paragraph 100 below).

### 101.9.1 *Formal v effective employment*

The OECD Commentary applies the distinction between formal/effective employers which is used in the short term business visitor rules:<sup>16</sup>

39... As explained in paragraph 8.11 of the Commentary on Article 15, however, there may be cases where individuals who are formally employed by an enterprise will actually be carrying on the business of another enterprise and where, therefore, the first enterprise should not be considered to be carrying on its own business at the location where these individuals will perform that work. Within a multinational group, it is relatively common for employees of one company to be temporarily seconded to another company of the group and to perform business activities that clearly belong to the business of that other company. In such cases, administrative reasons (e.g. the need to preserve seniority or pension rights) often prevent a change in the employment contract. The analysis described in paragraphs 8.13 to 8.15 of the Commentary on Article 15 will be relevant for the purposes of distinguishing these cases from other cases where employees of a foreign enterprise perform that enterprise's own business activities

### 101.9.2 *Subcontractors*

The OECD Commentary provides:

40. An enterprise may also carry on its business through subcontractors, acting alone or together with employees of the enterprise. In that case, a permanent establishment will only exist for the enterprise if the other conditions of Article 5 are met (this, however, does not address the separate question of how much profit is attributable to such a permanent establishment). In the context of paragraph 1, the existence of a permanent establishment in these circumstances will require that these subcontractors perform the work of the enterprise at a fixed place of business that is at the disposal of the enterprise. Whether a fixed place of business where subcontractors perform work of an enterprise is at the disposal of that enterprise will be determined on the basis of the

---

<sup>16</sup> See 36.9 (Labour-hire arrangement).

guidance in paragraph 12; in the absence of employees of the enterprise, however, it will be necessary to show that such a place is at the disposal of the enterprise on the basis of other factors showing that the enterprise clearly has the effective power to use that site, e.g. because the enterprise owns or has legal possession of that site and controls access to and use of the site. Paragraph 54 illustrates such a situation in the case of a construction site; this could also happen in other situations. An example would be where an enterprise that owns a small hotel and rents out the hotel's rooms through the Internet has subcontracted the on-site operation of the hotel to a company that is remunerated on a cost-plus basis.

### 101.9.3 *Equipment not personnel*

41. Also, a permanent establishment may exist if the business of the enterprise is carried on mainly through automatic equipment, the activities of the personnel being restricted to setting up, operating, controlling and maintaining such equipment. Whether or not gaming and vending machines and the like set up by an enterprise of a State in the other State constitute a permanent establishment thus depends on whether or not the enterprise carries on a business activity besides the initial setting up of the machines. A permanent establishment does not exist if the enterprise merely sets up the machines and then leases the machines to other enterprises. A permanent establishment may exist, however, if the enterprise which sets up the machines also operates and maintains them for its own account. This also applies if the machines are operated and maintained by an agent dependent on the enterprise.

## 101.10 **The enterprise**

In order to have a PE, there has to be an enterprise; for the definition see 20.22.2 (“Enterprise”).

The OECD Commentary considers what amounts to a distinct enterprise:

42. It follows from the definition of “enterprise of a Contracting State” in Article 3 that this term, as used in Article 7, and the term “enterprise” used in Article 5, refer to any form of enterprise carried on by a resident of a Contracting State, whether this enterprise is legally set up as a company, partnership, sole proprietorship or other legal form. Different enterprises may collaborate on the same project and the question of whether their collaboration constitutes a separate enterprise (e.g. in the form of a partnership) is a question that depends on the facts

and the domestic law of each State. Clearly, if two persons each carrying on a separate enterprise decide to form a company in which these persons are shareholders, the company constitutes a legal person that will carry on what becomes another separate enterprise. It will often be the case, however, that different enterprises will simply agree to each carry on a separate part of the same project and that these enterprises will not jointly carry on business activities, will not share the profits thereof and will not be liable for each other's activities related to that project even though they may share the overall output from the project or the remuneration for the activities that will be carried on in the context of that project. In such a case, it would be difficult to consider that a separate enterprise has been set up.<sup>17</sup> Although such an arrangement would be referred to as a "joint venture" in many countries, the meaning of "joint venture" depends on domestic law and it is therefore possible that, in some countries, the term "joint venture" would refer to a distinct enterprise.

#### 101.10.1 *PE of partnership*

The OECD Commentary provides:

43. In the case of an enterprise that takes the form of a fiscally transparent partnership, the enterprise is carried on by each partner and, as regards the partners' respective shares of the profits, is therefore an enterprise of each Contracting State of which a partner is a resident. If such a partnership has a permanent establishment in a Contracting State, each partner's share of the profits attributable to the permanent establishment will therefore constitute, for the purposes of Article 7, profits derived by an enterprise of the Contracting State of which that partner is a resident (see also paragraph 56 below).<sup>18</sup>

#### 101.10.2 *Commencement/cessation of business*

The OECD Commentary provides:

44. A permanent establishment begins to exist as soon as the enterprise

---

<sup>17</sup> The Commentary continues:

But in English law, at least, "joint venture" is a loose phrase which is applicable to a wide variety of legal arrangements, and does not convey much information about their nature. Contrast 82.5.4 (Partnership v joint venture).

<sup>18</sup> For para 56, see 101.11.1 (Building/construction site).

commences to carry on its business through a fixed place of business. This is the case once the enterprise prepares, at the place of business, the activity for which the place of business is to serve permanently. The period of time during which the fixed place of business itself is being set up by the enterprise should not be counted, provided that this activity differs substantially from the activity for which the place of business is to serve permanently.

The permanent establishment ceases to exist with the disposal of the fixed place of business or with the cessation of any activity through it, that is when all acts and measures connected with the former activities of the permanent establishment are terminated (winding up current business transactions, maintenance and repair of facilities). A temporary interruption of operations, however, cannot be regarded as a closure.

If the fixed place of business is leased to another enterprise, it will normally only serve the activities of that enterprise instead of the lessor's; in general, the lessor's permanent establishment ceases to exist, except where he continues carrying on a business activity of his own through the fixed place of business.

### **101.11 Items included as PE**

The PE definitions provide a list of items which constitute a fixed place of business PE. The first seven are:

#### **s.1141(2) CTA 2010**

For this purpose a “fixed place of business” includes (without prejudice to the generality of that expression)—

- (a) a place of management,
- (b) a branch,<sup>19</sup>
- (c) an office,
- (d) a factory,
- (e) a workshop,

#### **OECD Model Art 5(2).**

2. The term “permanent establishment” includes especially:

- a) a place of management;
- b) a branch;
- c) an office;
- d) a factory;
- e) a workshop, and

---

<sup>19</sup> See 101.25.2 (“Branch”).

(f) an installation or structure for the exploration of natural resources, <sup>20</sup>	[No equivalent]
--	-----------------

(g) a mine, an oil or gas well, a quarry or any other place of extraction of natural resources; ...	f) a mine, an oil or gas well, a quarry or any other place of extraction of natural resources.
---	--

The INTM para 266110 [Jun 2016] summarises the article and continues:

The wording of article 5(2)<sup>21</sup> make it clear that this is not an exhaustive list of the places that could be a permanent establishment.

Obviously. The INTM continues:

Furthermore, it is clear that, to be a treaty permanent establishment, any of these types of places would also need to have the general attributes of a fixed place of business, i.e. the geographic, period of duration and personnel conditions.

The point was less clear and it is helpful to see it in writing.

101.11.1 *Building/construction site*

This is the eighth item in the list in s.1141(2) CTA 2010; OECD Model moves this item into a paragraph of its own, and the wording is not the same.

**s.1141(2) CTA 2010**

For this purpose a “fixed place of business” includes (without prejudice to the generality of that expression)— ...

(h) a building site or construction or installation project.

**art 5(3) OECD Model**

A building site or construction or installation project constitutes a permanent establishment only if it lasts more than twelve months.

This item, like the first seven in the list, is only a PE if it also meets the geographic, time and personnel conditions.

20 This is not in OECD Model definition.

21 The text erroneously reads: 5(1).

The INTM provides:

**INTM266130 Building sites or construction or installation projects** [Aug 2017]

The OECD Model Treaty Article 5 includes specific provisions in para 3 that a building site or construction or installation project constitutes a treaty permanent establishment only where it lasts more than 12 months. The commentary makes it clear that this includes also the construction of roads, bridges or canals, the renovation (involving more than mere maintenance or redecoration) of buildings, roads, bridges or canals, the laying of pipes-lines and excavating and dredging. Additionally, the term ‘installation project’ is not restricted to an installation related to a construction project; it also includes the installation of new equipment, such as a complex machine, in an existing building or outdoors.

The OECD member states have made this type of activity the subject of a specific rule because of the frequency with which it caused difficulties of interpretation. And, for clarity in the model treaty, 12 months duration has been taken to be a sufficient indication that the activity is a fixed place of business permanent establishment. Of course particular treaties may vary from the model in this respect and indeed different durations are included in many of the UK’s treaties all of which can be referred to in full at DT2140 onwards. The UK domestic charging provisions in s.1141(2)(h) CTA 2010] define permanent establishment (see INTM264050) in a way that specifically includes all building sites or construction or installation projects without duration qualification. Although initially this may [!] appear inconsistent you should remember that the treaty provisions will override the domestic legislation. In that way, any duration specified in any applicable treaty within which the site will become a permanent establishment will be the duration that applies.

If the non-resident is involved (directly or indirectly through subcontractors) in more than one site or project, each should be considered as a potential permanent establishment separately from the others. The 12 months or other duration test applies to each site or project. A site or project should be regarded as a single potential permanent establishment even if it is based on several contracts provided that it forms a coherent whole commercially and geographically. If it appears that a single site or project has been fragmented to avoid the appearance of being a PE the facts of the original tendering should be investigated.

A site or project exists from when the contractor begins work, including any preparatory work, in the country where the construction etc. is to be established. It continues to exist until the work is completed or permanently abandoned. Temporary discontinuation, seasonal or other temporary interruptions should be ignored.

The OECD Commentary provides:

56. In the case of fiscally transparent partnerships, the twelve-month test is applied at the level of the partnership as concerns its own activities.

If the period of time spent on the site by the partners and the employees of the partnership exceeds twelve months, the enterprise carried on through the partnership will therefore be considered to have a permanent establishment. Each partner will thus be considered to have a permanent establishment for purposes of the taxation of his share of the business profits derived by the partnership regardless of the time spent by himself on the site. Assume for instance that a resident of State A and a resident of State B are partners in a partnership established in State B which carries on its construction activities on a construction site situated in State C that lasts 10 months. Whilst the tax treaty between States A and C is identical to the OECD Model, paragraph 3 of Article 5 of the treaty between State B and State C provides that a construction site constitutes a permanent establishment only if it lasts more than 8 months. In that case, the timethreshold of each treaty would be applied at the level of the partnership but only with respect to each partner's share of the profits covered by that treaty; since the treaties provide for different time-thresholds, State C will have the right to tax the share of the profits of the partnership attributable to the partner who is a resident of State B but will not have the right to tax the share attributable to the partner who is a resident of State A. This results from the fact that whilst the provisions of paragraph 3 of each treaty are applied at the level of the same enterprise (i.e. the partnership), the outcome differs with respect to the different shares of the profits of the partnership depending on the time-threshold of the treaty that applies to each share.

OECD Covid guidance<sup>22</sup> provides:

25. It appears that many activities on construction sites are being temporarily interrupted by the COVID-19 pandemic. The duration of such an interruption of activities should, however, be included in determining the life of a site and therefore will affect the determination whether a construction site constitutes a PE. In general, a construction site will constitute a PE if it lasts more than 12 months under the OECD Model or more than six months under the UN Model. Paragraph 55 of the Commentary on Article 5(3) of the OECD Model explains that a site should not be regarded as ceasing to exist when work is temporarily discontinued (temporary interruptions should be included in determining the duration of a site). Examples of temporary interruptions

---

22 See 101.27.1 (OECD Covid guidance).

given in the Commentary are interruptions caused by bad weather, a shortage of material or labour difficulties.

26. The Commentary does not include a bright line test on the meaning of “temporary” interruption, thus jurisdictions may have different views of the duration of a “non-temporary” interruption and on other conditions that make the interruption of a different nature than the examples of interruptions in paragraph 55 of the Commentary. Accordingly, some jurisdictions may consider that particular periods of interruption required by domestic COVID-19 restrictions in their jurisdiction should not be included in the calculation of the time thresholds for construction PEs. Such an approach would result in those jurisdictions not asserting the existence of a PE if the duration test would only be satisfied by including days during which operations were prevented on the construction site as a result of COVID-19 restrictions. As noted above, this guidance cannot be relied on to create instances of double non-taxation.

27. In conclusion, a construction site PE would not be regarded as ceasing to exist when work in the site is “temporarily” interrupted, but jurisdictions may consider, in light of the extraordinary circumstances of the COVID-19 pandemic and based on the facts and circumstances, that certain periods where operations are prevented as a public health measure imposed or recommended by the government where the site is located to reduce the spread of the COVID-19 virus constitute a type of interruption that should be excluded from the calculation of time thresholds for construction site PEs.

### **101.12 Agency-PE**

There are three (main) definitions of agency-PE:

- (1) UK-law agency-PE
- (2) OECD Model agency-PE; this was amended in 2017, so I refer to:
  - (a) Pre-2017 Model form
  - (b) Post-2017 Model form

Section 1141(1) CTA 2010 provides the UK-law definition:

For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if (and only if) ...

- (b) an agent acting on behalf of the company has and habitually exercises there authority *to do business on behalf of the company*.

Article 5(5) of the pre-2017 OECD Model provides:

- [a] Notwithstanding the provisions of paras 1 and 2, where a person – other than an agent of an independent status to whom para 6 applies – is acting on behalf of an enterprise and has, and habitually exercises, in a Contracting State an authority *to conclude contracts in the name of the enterprise*, that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise,
- [b] unless the activities of such person are limited to those mentioned in para 4 which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.<sup>23</sup>

I refer to this as “**agency-PE**”. The term “dependent agency PE” is sometimes used (as an independent agent is not a PE).

As usual, the wording has varied over the years,<sup>24</sup> but without any change of meaning. OECD Commentary formerly provided:

31... The paragraph was redrafted in the 1977 Model Convention to clarify the intention of the corresponding provision of the 1963 Draft Convention without altering its substance apart from an extension of the excepted activities of the person.

This matters as pre-1977 wording survives, for instance in the Luxembourg/UK DTA.

This was rewritten in 2017 as part of the BEPS Action 7, to deal with commissionaire arrangements. Existing DTAs could have been brought into line with new wording under art 12 MLI. However the UK opted out of art 12. So UK DTAs existing at the current time will retain the pre-2017 wording. Presumably, future DTAs are likely to use that wording and not the post-2017 wording, but that will depend on the views of treaty-partners, and HMRC practice in the future.

It may be helpful to set out the pre- and post-2017 OECD Model wording, to highlight the differences (which the UK has chosen to reject):

---

23 See 101.17 (Preparatory/auxiliary activities).

24 See Avery Jones, “The Origins of Article 5(5) and 5(6) of the OECD Model”, 6 World Tax Journal 3 (2014).

**Pre-2017 OECD Model Art 5**

Notwithstanding the provisions of paragraphs 1 and 2

where a person other than an agent of an independent status to whom paragraph 6 applies is acting on behalf of an enterprise

and has, and habitually exercises, in a Contracting State, an authority to conclude contracts,

in the name of the enterprise,

**Post-2017 OECD Model Art 5**

Notwithstanding the provisions of paragraphs 1 and 2 but subject to the provisions of paragraph 6,

where a person is acting in a Contracting State on behalf of an enterprise

and, in doing so, habitually concludes contracts, or habitually plays the principal role leading to the conclusion of contracts that are routinely concluded without material modification by the enterprise,

and these contracts are

- a) in the name of the enterprise,  
or
- b) for the transfer of the ownership of, or for the granting of the right to use, property owned by that enterprise or that the enterprise has the right to use, or
- c) for the provision of services by that enterprise,

that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in paragraph 4 which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.

that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in paragraph 4 which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.

The post-2017 OECD Commentary will not be relevant to DTAs with pre-2017 wording, so far as it discusses the post-2017 wording; instead the pre-2017 Commentary will still be applicable.<sup>25</sup>

#### 101.12.1 *Agency-PE: Policy*

OECD Commentary provides:

82. It is a generally accepted principle that an enterprise should be treated as having a permanent establishment in a State if there is under certain conditions a person acting for it, even though the enterprise may not have a fixed place of business in that State within the meaning of paragraphs 1 and 2. [Article 5(5)] intends to give that State the right to tax in such cases. Thus paragraph 5 stipulates the conditions under which an enterprise is deemed to have a permanent establishment in respect of any activity of a person acting for it.

#### 101.12.2 *OECD/UK-law compared*

Dawn Primarolo (then Paymaster General) explained why the wording of UK-law PE differs from pre-2017 OECD Model PE:

**Dawn Primarolo:** ... the wording used in clause 147(1)(b) [FB 2003, now s.1141 CTA 2010] to define “dependent agent” varies from the

---

25 See 101.2.1 (Pre/post-2017 OECD Model).

exact wording in article 5(5) of the OECD model tax convention. Instead, it is based on guidance given in the commentary on article 5 ... because article 5 refers to an agent who has the authority to conclude contracts in the name of the enterprise.

However, the OECD commentary on article 5 makes it clear that that phrase is not necessarily to be taken at face value. For instance, it covers contracts in the name of an enterprise, contracts binding on the enterprise but not in its name, and contracts recognised by the agent but signed by some other person, while excluding contracts that do not relate to the business proper of the enterprise, although concluded by the agent. The area is very complicated and there is an interaction between the commentary and the article itself.

UK legislation cannot be directly interpreted by reference to the commentary,<sup>26</sup> so the phrase used in clause 147 is intended to encapsulate the current OECD interpretation in respect of dependent agents. That would not have been achieved if the wording in article 5(5) were copied directly into UK domestic law.

**Mr. Burnett:** The Paymaster General will recall ... that the Inland Revenue confirmed that the reference to an agent in clause 147 is restricted to those persons who contractually can and do bind their principals and not to persons acting in some other representative capacity falling short of having such authority. The Paymaster General is obviously well aware of *Pepper v Hart* and the reliance people may put on what she says in Committee. I would welcome her comments on that point raised by the Law Society.

**Dawn Primarolo:** I was coming to that important point, which was outlined in a letter to the Law Society and the Chartered Institute of Taxation on 8 May.

I was trying to explain that the article wording must be read in parallel with the commentary. The commentary needed to be part of the description that went into UK legislation in order to make that clear. In drafting the legislation, the importance of maintaining certainty on international understanding and practice on the OECD guidelines and model conventions while understanding how the commentary affects their operation was one of the major points, which was continually made to the Revenue and me. That is how we chose the clause's wording.

Amendment No. 101 seeks to add to the definition of dependent agent

---

26 This is not correct, but fortunately no-one reminded Ms Primarolo of (what is now) s.164 TIOPA (Application of OECD principles).

used in clause 147(1)(b). It would mean that an agent would be a dependent agent of a foreign company as long as they had the authority to enter into arrangements on its behalf and had entered into contractually binding arrangements with it. That may not have been the amendment's intended effect, but I ask the Committee to reject it nevertheless. The suggested addition is unnecessary and the language used in clause 147(1)(b) already reflects the current OECD position on dependent agents. As such, no further clarification or definition is required.... The Bill does not extend the charge to tax on non-resident companies and there is no less certainty for an agent of a non-resident company on whether they are within the charge to corporation tax. The rules are set out in the OECD treaty and commentary and in UK law, which has had and will have specific rules to facilitate foreign investment in the City.<sup>27</sup>

Similarly, the INTM provides:

**INTM264050 Permanent establishment – Domestic law definition**  
[Apr 2020]

The definition of domestic law permanent establishment is at [FA 03 s.148]. This is similar to and has the same broad effect as the OECD Model article 5 definition of permanent establishment which is an important factor bearing in mind that treaty law takes precedence over domestic law. So it is unlikely that the application of a treaty that followed the model article 5 would cause any variance to the UK domestic charge to tax on a non-resident trading in the UK through a permanent establishment as defined under domestic law. Because of the similarities of wording and effect between PE under domestic law and under the OECD Model the guidance on interpretation of treaty PE at INTM266000 is understandably substantially applicable to domestic law PE as well.

A lot of our interpretation of treaty PE is based on the Commentary to Article 5 of the OECD Model (INTM266030). Although the Commentary is not imported into UK domestic law the UK has contributed to and agreed the content except in specific instances where the UK has put on record either an observation or a reservation to a specific section of the Commentary. So, where the wording of the UK

---

27 House of Commons Standing Committee B

<http://www.publications.parliament.uk/pa/cm200203/cmstand/b/st030520/pm/part1/30520s06.htm>

domestic law PE provisions are the same as those used in the OECD Model Article 5 then the commentary interpretation on those words will apply to those provisions and this guidance will contain cross-references into the guidance on treaty PE at INTM266000. If the Commentary interpretation of PE were to materially vary through periodic update or amendment the changes would have to be accepted by the UK Parliament before they could be taken to apply also to interpretation of UK domestic law PE.

The simpler way to achieve the intention would have been to incorporate OECD definition by reference, but it is considered that the UK-law definition has reached that destination, though by a less satisfactory route.<sup>28</sup> EN CTA 2010 agrees:

3253. This Chapter determines what constitutes a permanent establishment in a territory of a company which is not resident in that territory. ...

3254. The determination is in line with various internationally recognised characteristics commonly used in the UK's double tax agreements.

Likewise an HMRC press release when the current law was enacted:

The rules also alter our current terminology so that in future we tax “permanent establishments”, (a term recognised internationally and used in our double taxation agreements), rather than “branches”. The new rules are to be interpreted in accordance with OECD guidelines, to ensure that the UK is in accord with international consensus that reflects UK agreement. If internationally agreed changes are made in the future, then any new guidance can be included to assist in the interpretation of the UK rules, if the UK government decides it wishes to adopt them.<sup>29</sup>

### **101.13 OECD Model agency-PE**

This section focuses on the pre-2017 OECD Model form, though parts of the discussion would also be relevant for the post-2017 model.

#### **101.13.1 Agent**

---

28 If that is right, it answers the concerns expressed in Nias, “Taxation of non-resident companies and the meaning of agent” [2003] BTR 468.

29 REV BN 25 para 8 (17 April 2002).

OECD Commentary provides:

83. Persons whose activities may create a permanent establishment for the enterprise are persons, whether or not employees of the enterprise, who act on behalf of the enterprise and are not doing so in the course of carrying on a business as an independent agent falling under para 6. Such persons may be either individuals or companies.

101.13.2 *Authority to conclude contract*

The phrase *authority to conclude contracts in the name of the enterprise* is at the heart of pre-2017 OECD Model agency-PE.

101.13.3 *In the name of the enterprise*

Pre-2017 OECD Commentary provided:

32.1 Also, the phrase “authority to conclude contracts in the name of the enterprise” does not confine the application of the paragraph to an agent who enters into contracts literally in the name of the enterprise; the paragraph applies equally to an agent who concludes contracts which are binding on the enterprise even if those contracts are not actually in the name of the enterprise.

The INTM provides:

**INTM266160. UK common law varies from European civil law codes [Apr 2020]**

The majority of European countries have civil law codes whereas the UK has a common law code. Any matters of interpretation of undefined terms used in the OECD Model, article 5 or any other article of a treaty should be interpreted in the UK under UK law or at least common meaning. The civil law concept of agency is different from that under common law in that civil law will not usually regard the actions of an agent as though they were the actions of the principal. Civil law separates the relationship between the principal and the agent on the one hand and that between the agent and the third party (including a customer) on the other. Thus civil law countries do not, as the UK does, necessarily see the presence of the non-resident principal in the actions of the resident agent. In the UK, under common law, we interpret any actions carried out by an agent as having been performed for the principal and binding the principal in the same way as though they had carried out those actions themselves. For example, a contract arranged

by an agent in the UK to deliver goods owned by a foreign principal to a customer would be treated for UK tax purposes as though the foreign principal themselves had contracted in the UK for the delivery. This is the case, regardless of whether the contract is written in the name of the principal or in the name of the agent (commentary to model treaty article 5(5), para 32.1 of July 2010 version).

The former International Tax Handbook provided:

**851.** Treaties following the example of the OECD Model are influenced by the civil law concept of agency. Para 5 of Article 5 of the Model deems an agent to be a permanent establishment if the agent has and habitually exercises an authority to conclude contracts in the name of the enterprise of the treaty partner state, unless the agent is an agent of independent status within para 6. There are two pointers here to civil law influence. One is ‘contracts in the name of the enterprise’, the other is ‘agent of independent status’.

**852. In the name of principal**

The making of contracts in the name of the principal would be regarded by civil law countries as a characteristic of a dependent agent whereas contracts made in the agent’s own name would be characteristic of independent status (though the wording of the Article does not preclude the possibility of independent status even if the contracts are in the name of the ‘enterprise’). In our law, if the contracts are made on behalf of and with the authority of the principal the relationship of the agent to the principal is not affected by whether the contract is made in the name of the principal or in the agent’s own name. So agents, who in all other respects would be dependent agents according to the OECD Model, could in our law make contracts in their own name. We would not wish such agents to be regarded as agents of independent status under a treaty and therefore resist the literal meaning of ‘in the name of’ and argue that the words should be interpreted as ‘on behalf of’, which is an acceptable translation of the words ‘au nom de’ which appear in the French version of the Model Convention. The commentary on Article 5 of the 1992 Model included a note of our view at para 45 and in 1994 a sentence was added to the commentary itself at para 32 confirming that this is now the accepted interpretation.

The INTM discussion of OECD Model PE at 266140 [September 2011] is a lightly adapted version of OECD Commentary, so is not set out here. Article 5(5) USA/UK DTA provides a definition of agency PE very

similar to pre-2017 OECD Model form:

**OECD Model para 5(5)**

Notwithstanding the provisions of paragraphs 1 and 2 where a person other than an agent of an independent status to whom paragraph 6 applies is acting on behalf of an enterprise and has, and habitually exercises, in a Contracting State, an authority to conclude contracts, in the name of the enterprise,

that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in paragraph 4 which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.

**USA/UK DTA para 5(5)**

Notwithstanding the provisions of paragraphs 1 and 2 of this Article, where a person—other than an agent of an independent status to whom paragraph 6 of this Article applies—is acting on behalf of an enterprise and has and habitually exercises in a Contracting State an authority *to conclude contracts that are binding on the enterprise*,

that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities that the person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in paragraph 4 of this Article that, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.

The US Model DTA Technical Explanation provides:<sup>30</sup>

The OECD Model uses the term “in the name of that enterprise” rather than “binding on the enterprise”. There is no substantive difference. As indicated in paragraph 32 to the OECD Commentary on Article 5, paragraph 5 of the Article is intended to encompass a person who “concludes contracts which are binding on the enterprise, even if those contracts are not actually in the name of the enterprise”.

101.13.4 *Authority to conclude contracts*

It seems to me that “agent” can be used in three broad senses:

- (1) A person who can *legally* enter into contracts which bind their principal. I refer to that as a “**contract-law agent**”.
- (2) A person who can *effectively decide whether* to enter into a

---

<sup>30</sup> <http://www.irs.gov/pub/irs-trty/temod006.pdf>

contractual relationship which binds their principal, and though a further step to create a contract is required, that may be regarded as a legal formality or “rubber stamping”.

- (3) In a looser, colloquial sense: an intermediary, spokesperson, or representative (who lacks power to make an effective decision)<sup>31</sup>

The meaning here is meaning (2). If in practice a person can a commercial or substantial commitment, they will be regarded as having authority to conclude contracts, even if they lack formal authority of a contract-law agent, so that any contract needs to be “rubber stamped” by the principal.<sup>32</sup>

A company with an agent of this kind in a State may in fact be resident in that State: an agent who concludes contracts on behalf of the company in a State cause the effective management/management and control of the company to take place in that State.

#### 101.13.5 *Exercise of authority in State*

What if negotiation is done by the agent in a State, but the contract is signed elsewhere? OECD Commentary provided:

97... Moreover, whether or not a person habitually concludes contracts or habitually plays the principal role leading to the conclusion of contracts that are routinely concluded without material modification by the enterprise should be determined on the basis of the commercial realities of the situation. The mere fact that a person has attended or even participated in negotiations in a State between an enterprise and a client will not be sufficient, by itself, to conclude that the person has concluded contracts or played the principal role leading to the conclusion of

---

31 “The use of the word ‘agent’ in any mercantile transaction is, of itself, wholly uninformative of the legal relationship between the parties and the use of the words ‘independent agent’ takes the matter no further. Either is consistent with a self-employed person acting either as a true agent who puts his principal into a contractual relationship with a third party or with such a person acting as a principal.” See *Potter v CE* [1985] STC 45 at p.51 cited with approval in *Umbro International v HMRC* [2009] STC 1345 at [29].

32 See Dunahoo, “Contract Conclusion and Agency Permanent Establishments: Here, There and Everywhere” in Baker & Bobbett (eds) *Tax Polymath: a Life in International Taxation: Essays in Honour of John F. Avery Jones* (2010). The point has been decided the same way in relation to branch/agency: see 101.25.4 (Branch/agency distinction).

contracts that are routinely concluded without material modification by the enterprise. The fact that a person has attended or even participated in such negotiations could, however, be a relevant factor in determining the exact functions performed by that person on behalf of the enterprise.

OECD say:

A commissionaire arrangement may be loosely defined as an arrangement through which a person sells products in a State in its own name but on behalf of a foreign enterprise that is the owner of these products. Through such an arrangement, a foreign enterprise is able to sell its products in a State without technically having a permanent establishment to which such sales may be attributed for tax purposes and without, therefore, being taxable in that State on the profits derived from such sales. Since the person that concludes the sales does not own the products that it sells, that person cannot be taxed on the profits derived from such sales and may only be taxed on the remuneration that it receives for its services (usually a commission). A foreign enterprise that uses a commissionaire arrangement does not have a permanent establishment because it is able to avoid the application of Art. 5(5) of the OECD Model Tax Convention, to the extent that the contracts concluded by the person acting as a commissionaire are not binding on the foreign enterprise. Since Art. 5(5) relies on the formal conclusion of contracts in the name of the foreign enterprise, it is possible to avoid the application of that rule by changing the terms of contracts without material changes in the functions performed in a State. Commissionaire arrangements have been a major preoccupation of tax administrations in many countries, as shown by a number of cases dealing with such arrangements that were litigated in OECD countries. In most of the cases that went to court, the tax administration's arguments were rejected.

Similar strategies that seek to avoid the application of Art. 5(5) involve situations where contracts which are substantially negotiated in a State are not formally concluded in that State because they are finalised or authorised abroad, or where the person that habitually exercises an authority to conclude contracts constitutes an "independent agent" to which the exception of Art. 5(6) applies even though it is closely related to the foreign enterprise on behalf of which it is acting.

...

6. BEPS concerns arising from commissionaire arrangements may be illustrated by the following example, which is based on a court decision

that dealt with such an arrangement and found that the foreign enterprise did not have a permanent establishment:

- XCO is a company resident of State X. It specialises in the sale of medical products.
- Until 2000, these products are sold to clinics and hospitals in State Y by YCO, a company resident of State Y. XCO and YCO are members of the same multinational group.
- In 2000, the status of YCO is changed to that of commissionnaire following the conclusion of a commissionnaire contract between the two companies. Pursuant to the contract, YCO transfers to XCO its fixed assets, its stock and its customer base and agrees to sell in State Y the products of XCO in its own name, but for the account of and at the risk of XCO.
- As a consequence, the taxable profits of YCO in State Y are substantially reduced.<sup>33</sup>

7. Similar strategies that seek to avoid the application of Art. 5(5) involve situations where contracts which are substantially negotiated in a State are not concluded in that State because they are finalised or authorised abroad, or where the person that habitually exercises an authority to conclude contracts constitutes an “independent agent” to which the exception of Art. 5(6) applies even though it is closely related to the foreign enterprise on behalf of which it is acting.<sup>34</sup>

#### 101.13.6 *Auxiliary/preparatory work*

The article 5(4) exemption (auxiliary & preparatory work, etc)<sup>35</sup> applies to agents:

Since, by virtue of paragraph 4, the maintenance of a fixed place of business solely for purposes listed in that paragraph is deemed not to constitute a permanent establishment, a person whose activities are restricted to such purposes does not create a permanent establishment either.

---

33 The reference is to *Société Zimmer Ltd v Ministre de l'Économie, des Finances et de l'Industrie* (2010) 12 ITLR 739 (with an English translation).

34 OECD/G20 “Preventing the Artificial Avoidance of Permanent Establishment Status ACTION 7 Final Report (2015) p.28

<http://www.oecd.org/ctp/preventing-the-artificial-avoidance-of-permanent-establishment-status-action-7-2015-final-report-9789264241220-en.htm>

35 See 101.17 (Preparatory/auxiliary activities).

33. The authority to conclude contracts must cover contracts relating to operations which constitute the business proper of the enterprise. It would be irrelevant, for instance, if the person has authority to engage employees for the enterprise to assist that person's activity for the enterprise or if the person were authorised to conclude, in the name of the enterprise, similar contracts relating to internal operations only.

The US Model DTA Technical Explanation provides a similar example:<sup>36</sup>

The contracts referred to in paragraph 5 are those relating to the essential business operations of the enterprise rather than ancillary activities. For example, if the agent has no authority to conclude contracts in the name of the enterprise with its customers for the sale of the goods produced by the enterprise, but it can enter into service contracts in the name of the enterprise for the enterprise's business equipment used in the agent's office, this contracting authority would not fall within the scope of the paragraph, even if exercised regularly.

#### 101.13.7 *Habitually*

“Habitually” echoes the requirement of “degree of permanency” for a fixed place of business PE. OECD Commentary provides:

83. ... The use of the term “permanent establishment” in this context presupposes, of course, that that person, or as a direct result of the actions of that person, takes place repeatedly and not merely in isolated cases.

33.1 The requirement that an agent must “habitually” exercise an authority to conclude contracts reflects the underlying principle in Article 5 that the presence which an enterprise maintains in a Contracting State should be more than merely transitory if the enterprise is to be regarded as maintaining a permanent establishment, and thus a taxable presence, in that State. The extent and frequency of activity necessary to conclude that the agent is “habitually exercising” contracting authority will depend on the nature of the contracts and the business of the principal. It is not possible to lay down a precise frequency test. Nonetheless, the same sorts of factors considered in para 6 would be relevant in making that determination.<sup>37</sup>

---

36 <http://www.irs.gov/pub/irs-trty/temod006.pdf>

37 See 101.8.2 (Degree of permanency).

See too 101.27 (Home office due to Covid).

#### 101.13.8 *Extent of agency-PE*

OECD comments on the extent of an agency-PE:

99. Where the requirements set out in paragraph 5 are met, a permanent establishment of the enterprise exists to the extent that the person acts for the latter, i.e. not only to the extent that such a person concludes contracts or plays the principal role leading to the conclusion of contracts that are routinely concluded without material modification by the enterprise.

#### 101.13.9 *Place of business/agency PE: Relationship*

OECD Commentary provides:

100. Under paragraph 5, only those persons who meet the specific conditions may create a permanent establishment; all other persons are excluded. It should be borne in mind, however, that paragraph 5 simply provides an alternative test of whether an enterprise has a permanent establishment in a State. If it can be shown that the enterprise has a permanent establishment within the meaning of paragraphs 1 and 2 (subject to the provisions of paragraph 4), [fixed place of business] it is not necessary to show that the person in charge is one who would fall under paragraph 5.

### **101.14 Independent agent exemption**

The rule in short is that an independent agent is not a PE. I refer to this as the “**independent agent exemption**”.

There are three (main) versions of the independent agent exemption:

- (1) UK-law independent agent exemption
- (2) OECD Model independent agent exemption; this was amended in 2017 so I refer to:
  - (a) Pre 2017 OECD Model independent agent exemption
  - (b) Post-2017 OECD Model independent agent exemption

Investment managers and brokers may be an agency-PE, but have a special exemption which is intended to clarify the independent agent exemption; see 68.1 (Investment manager exemptions - Introduction).

It is helpful to set out the UK-law and pre-2017 OECD model

independent agent exemptions side by side:

**s.1142(1) CTA 2010**

A company is not regarded as having a permanent establishment in a territory by reason of the fact that it carries on business there through an agent of independent status acting in the ordinary course of the agent's business.

**art 5(6) OECD Model (pre-2017)**

An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent or any other agent of an independent status, provided that such persons are acting in the ordinary course of their business.

OECD Model is slightly differently worded, but the differences do not seem material.

OECD Model independent agent exemption was rewritten in 2017 as part of the BEPS project action 7, to deal with Commissionnaire arrangements. Existing DTAs could be brought into line with new wording under art 12 MLI. However the UK has opted out of art 12. So UK DTAs existing at the current time will retain the pre-2017 wording. Presumably, future DTAs are likely to use that wording and not the post-2017 wording, but that will depend on the views of treaty-partners, and HMRC practice in the future.

It may be convenient to set out the pre- and post-2017 OECD model wording, to highlight the differences (which the UK has chosen to reject):

**Pre-2017 OECD Model**

An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent or any other agent of an independent status, provided that such persons are acting in the ordinary course of their business.

**Post 2017 OECD Model**

6. Paragraph 5 shall not apply where the person acting in a Contracting State on behalf of an enterprise of the other Contracting State carries on business in the firstmentioned State as an independent agent and acts for the enterprise in the ordinary course of that business...

So far the post 2017 Model is just a plain English rewrite of the pre-2017 version, but the post-2017 Model then adds a further condition which has no equivalent in the earlier version:

Where, however, a person acts exclusively or almost exclusively on behalf of one or more enterprises to which it is closely related, that person shall not be considered to be an independent agent within the meaning of this paragraph with respect to any such enterprise...

8. For the purposes of this Article, a person or enterprise is closely related to an enterprise if, based on all the relevant facts and circumstances, one has control of the other or both are under the control of the same persons or enterprises. In any case, a person or enterprise shall be considered to be closely related to an enterprise if one possesses directly or indirectly more than 50 per cent of the beneficial interest in the other (or, in the case of a company, more than 50 per cent of the aggregate vote and value of the company's shares or of the beneficial equity interest in the company) or if another person or enterprise possesses directly or indirectly more than 50 per cent of the beneficial interest (or, in the case of a company, more than 50 per cent of the aggregate vote and value of the company's shares or of the beneficial equity interest in the company) in the person and the enterprise or in the two enterprises.

The post-2017 OECD Commentary will not be relevant to DTAs with pre-2017 wording, so far as it discusses the post-2017 wording; instead the pre-2017 commentary will still be applicable.

OECD Commentary summarises:

36. Where an enterprise of a Contracting State carries on business dealings through a broker, general commission agent or any other agent of an independent status, it cannot be taxed in the other Contracting State in respect of those dealings if the agent is acting in the ordinary course of his business (cf. paragraph 32 above). Although it stands to reason that such an agent, representing a separate enterprise, cannot constitute a permanent establishment of the foreign enterprise, paragraph 6 has been inserted in the Article for the sake of clarity and emphasis.

The point that the independent agent exemption is only inserted for the avoidance of doubt is important in contexts, such as pre-1963 DTAs, where the exemption is not stated expressly; but these are now rare.

37. A person will come within the scope of paragraph 6, i.e. he will not constitute a permanent establishment of the enterprise on whose behalf he acts only if

- a) he is independent of the enterprise both legally and economically, and
- b) he acts in the ordinary course of his business when acting on behalf of the enterprise.

The requirements of independent status and “ordinary course of business” overlap somewhat, but it is best to consider them separately.

### **101.15 Independent status**

This is a multifactorial concept.

#### **101.15.1 *Control by principal***

OECD Commentary provides:

104. Whether a person is independent of the enterprise represented depends on the extent of the obligations which this person has vis-a-vis the enterprise. Where the person’s commercial activities for the enterprise are subject to detailed instructions or to comprehensive control by it, such person cannot be regarded as independent of the enterprise. Another important criterion will be whether the entrepreneurial risk has to be borne by the person or by the enterprise the person represents.

38.1 In relation to the test of legal dependence, it should be noted that the control which a parent company exercises over its subsidiary in its capacity as shareholder is not relevant in a consideration of the dependence or otherwise of the subsidiary in its capacity as an agent for the parent. This is consistent with the rule in paragraph 7 of Article 5. But, as paragraph 41 of the Commentary indicates, the subsidiary may be considered a dependent agent of its parent by application of the same tests which are applied to unrelated companies.

38.2 The following considerations should be borne in mind when determining whether an agent may be considered to be independent.

106. An independent agent will typically be responsible to his principal for the results of his work but not subject to significant control with respect to the manner in which that work is carried out. He will not be subject to detailed instructions from the principal as to the conduct of the work. The fact that the principal is relying on the special skill and knowledge of the agent is an indication of independence.

107. Limitations on the scale of business which may be conducted by the agent clearly affect the scope of the agent’s authority. However such limitations are not relevant to dependency which is determined by consideration of the extent to

which the agent exercises freedom in the conduct of business on behalf of the principal within the scope of the authority conferred by the agreement.

108. It may be a feature of the operation of an agreement that an agent will provide substantial information to a principal in connection with the business conducted under the agreement. This is not in itself a sufficient criterion for determination that the agent is dependent unless the information is provided in the course of seeking approval from the principal for the manner in which the business is to be conducted. The provision of information which is simply intended to ensure the smooth running of the agreement and continued good relations with the principal is not a sign of dependence.

### 101.15.2 *Multiple principals*

OECD Commentary provides:

109. Another factor to be considered in determining independent status is the number of principals represented by the agent. As indicated in paragraph 111, independent status is less likely if the activities of the agent are performed wholly or almost wholly on behalf of only one enterprise over the lifetime of the business or a long period of time. However, this fact is not by itself determinative. All the facts and circumstances must be taken into account to determine whether the agent's activities constitute an autonomous business conducted by him in which he bears risk and receives reward through the use of his entrepreneurial skills and knowledge. Where an agent acts for a number of principals in the ordinary course of his business and none of these is predominant in terms of the business carried on by the agent, dependence may exist if the principals act in concert to control the acts of the agent in the course of his business on their behalf.

The INTM provides:

#### **INTM264080 Independent agents do not create a permanent establishment** [Apr 2020]

[The INTM summarises s.1142(1) and continues:] Whether an agent is of independent status is tested by reference to the legal, financial and commercial characteristics of the particular business relationship between the non-resident and the agent. If the relationship between them is the same as a relationship between independent businesses dealing with each other at arms length then the agent will be 'an independent agent'. For example, an agent who acted for other independent unconnected businesses on the same terms as those under which he acted for the non-resident could be an 'independent agent' and it would be clear that the agent had been acting in the ordinary course of his business if his activities were repeated for various unconnected customers. Dependent or independent status does not turn on the shareholding relationship between principal and agent. The fact that an agent is a subsidiary company does not

necessarily make it a dependent agent.<sup>38</sup> However, a subsidiary company will constitute a domestic law agency PE of its parent company in the same way as any other agent of the parent company if independence by reference to the factors detailed in the guidance that follows cannot be demonstrated.

Whether an agent acts in the ordinary course of their own business is something that should be considered by reference to the behavioural facts as opposed to intentions not followed through in business performance. Matters relevant would include (but not necessarily be limited to) the number of unrelated principals that the agent acted for and the extent of the business activities customarily carried out by independent agents in the specific business sector concerned.

Assuming they did act in the ordinary course of their own business, in general, an agent would be independent and would not constitute an agency PE of the foreign enterprise for which it acts where it is independent of the principal enterprise both legally and economically. The perspective of application of this test is with relevance to the business conducted by the agent for the principal rather than, for example, any shareholding relationship between the principal and agent. Other relevant factors of independence may include:

- the extent of the obligations which the agent has vis-à-vis the non-resident;
- whether the agent is subject to detailed instructions or comprehensive control;
- whether the agent bears the entrepreneurial risk for the business that the agent carries out for the non-resident;
- the degree of reliance on the agent's special skill and knowledge by the principal in the business done, and
- Whether there is reference by the agent to the principal for approval of the manner in which the business is to be conducted.

There will undoubtedly be circumstances where, whether deliberately or not, the relationship between a non resident and a UK agent is obscure or even where the declared terms of that relationship are very different from the actual terms. In such cases there is no substitute for detailed enquiry into the relationship to see whether it falls within the category of dependent or independent agent.

INTM discusses OECD Model wording. It partly duplicates the text of the discussion on domestic law agency-PE. The other parts provide:

**INTM266150. Agent of independent status – Article 5(6) [Aug 2017]**

... The work done by an agent, where that work was all done for one non-resident client, is unlikely to be viewed as the conduct of his 'own business' but more likely that of the non-resident's business. An exception to that view might be where the concentration on one client was an unusual occurrence within a settled continuous trade involving several clients. ...

### 101.15.3 “Ordinary course of business”

---

38 See 101.16 (Controlled companies/groups).

OECD Commentary tries but cannot elucidate this:

38.7 Persons cannot be said to act in the ordinary course of their own business if, in place of the enterprise, such persons perform activities which, economically, belong to the sphere of the enterprise rather than to that of their own business operations. Where, for example, a commission agent not only sells the goods or merchandise of the enterprise in his own name but also habitually acts, in relation to that enterprise, as a permanent agent having an authority to conclude contracts, he would be deemed in respect of this particular activity to be a permanent establishment, since he is thus acting outside the ordinary course of his own trade or business (namely that of a commission agent), unless his activities are limited to those mentioned at the end of paragraph 5.

38.8 In deciding whether or not particular activities fall within or outside the ordinary course of business of an agent, one would examine the business activities customarily carried out within the agent's trade as a broker, commission agent or other independent agent rather than the other business activities carried out by that agent. Whilst the comparison normally should be made with the activities customary to the agent's trade, other complementary tests may in certain circumstances be used concurrently or alternatively, for example where the agent's activities do not relate to a common trade.

39. [This deals with insurance companies and is not discussed here].

#### 101.15.4 *USA DTA*

Article 4(6) USA/UK DTA is similar to OECD Model.<sup>39</sup>

The USA/UK DTA Technical Explanation provides:<sup>40</sup>

Whether the agent and the enterprise are independent is a factual determination. Among the questions to be considered are the extent to which the agent operates on the basis of instructions from the enterprise. An agent that is subject to detailed instructions regarding the conduct of its operations or comprehensive control by the enterprise is not legally independent.

In determining whether the agent is economically independent, a relevant factor is the extent to which the agent bears business risk. Business risk refers primarily to risk of loss. An independent agent typically bears risk of loss from its own activities. In the absence of other factors that would

---

39 "An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent, or any other agent of an independent status, provided that such person is acting in the ordinary course of his business as an independent agent."

40 <https://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

establish dependence, an agent that shares business risk with the enterprise, or has its own business risk, is economically independent because its business activities are not integrated with those of the principal. Conversely, an agent that bears little or no risk from the activities it performs is not economically independent and therefore is not described in paragraph

Another relevant factor in determining whether an agent is economically independent is whether the agent has an exclusive or nearly exclusive relationship with the principal. Such a relationship may indicate that the principal has economic control over the agent. A number of principals acting in concert also may have economic control over an agent. The limited scope of the agent's activities and the agent's dependence on a single source of income may indicate that the agent lacks economic independence. It should be borne in mind, however, that exclusivity is not in itself a conclusive test; an agent may be economically independent notwithstanding an exclusive relationship with the principal if it has the capacity to diversify and acquire other clients without substantial modifications to its current business and without substantial harm to its business profits. Thus, exclusivity should be viewed merely as a pointer to further investigation of the relationship between the principal and the agent. Each case must be addressed on the basis of its own facts and circumstances.

#### 101.15.5 *Broker/commission agent*

The precise meanings of broker and general commission agent in OECD Model PE definition do not greatly matter since both terms are subsumed into "other agent of independent status".

For completeness, "broker" is discussed at 68.5.2 ("Broker"). The former International Tax Handbook explained "general commission agent" in a passage too amusing to omit:

##### **935. General commission agent**

... Although the words general commission agent appear in the legislation, nobody really knows what a general commission agent is and textbooks on agency make no reference to such a character; the expression is indeed used in our Double Taxation Agreements but it is not a term that our treaty partners are familiar with. They say it has no particular meaning for them and think that it is there because the British were rather insistent about it.

##### **936. London Produce case**

The one case to which we most often turn for guidance on who may or may not be a general commission agent is the London Produce case [*Fleming v London*

*Produce Co* 44 TC 582]. The London Produce company acted as agents in importing meat from New Zealand and selling it for commission on the London market. 95 per cent of its business was carried out for one principal. It claimed to be a general commission agent.

Megarry J enjoyed himself with the expression saying that he found it puzzling and unidentified. He wondered whether he might get at a meaning by looking at the words general, commission and agent separately and then adding the constituent parts together. He felt, however, that that was not a good idea because one could not arrive at the meaning of a particular high office by adding together the separate words lord, privy and seal. He came to the conclusion that a general commission agent must have broker-like qualities as it is included in the term ‘broker’ in the Section and that it is someone who holds himself out as being ready to work for clients generally. In his view Section 82(1) [TMA] (then Section 373(1) ITA 1952) could not be relevant if ‘in substance what is done is that (the non-resident) carries on business within the UK through the medium of an agent who is virtually a sole agent running the entire business for him and merely sending him remittances on request’. London Produce lost the case.

The only other case is the earlier one of *Boyd v Stephen* [10 TC 698] (concerned with bacon) when Rowlatt rather summarily dismissed the suggestion that the agents were general commission agents on the grounds that they did much more than such an agent would normally do. What the words are probably getting at is somebody like an import commission agent. That is someone, probably more common in 1915, who, acting for a non-resident producer, will sell goods through a broker on the market in return for a commission. It is unlikely that the authors of the Section had in mind the smaller domestic markets such as meat and bacon.

### 101.15.6 *Agent of insurance company*

Article 5(6) of the UN Model Treaty provides:

Notwithstanding the preceding provisions of this Article, an insurance enterprise of a Contracting State shall, except in regard to re-insurance, be deemed to have a permanent establishment in the other Contracting State if

- [a] it collects premiums in the territory of that other State or
- [b] insures risks situated therein through a person other than an agent of an independent status to whom paragraph 7 applies.

The General Insurance Manual provides:

#### **GIM10121 permanent establishment** [Jun 2016]

The OECD Model does not contain an Article on the lines of Article

5(6)<sup>41</sup> of the UN Model Treaty (this tends to give greater taxing rights to the Host State, and is more often encountered in relation to developing countries, but the actual Treaty should always be examined). This Article deems a permanent establishment to exist in a State if the activities there include collecting premiums or insuring risks other than through an independent agent. GIM10115 explains that intention is important in construing treaties, and so the absence of such an Article will found an argument on *a contrario* lines that these features are not sufficient unless the treaty does contain the UN Model Article.

This proposition was considered and approved in a Canadian case involving an insurer, *Knights of Columbus v HM Queen*.<sup>42</sup>

It was also concluded that

[1] if an agency is legally or economically dependent, then Article V(5) applies and activities will amount to a permanent establishment if there is an authority to conclude contracts in the name of the business

[2] if, on the other hand, the agent is independent, then there will be a permanent establishment only if Article V(1) applies and the activities carried on through a fixed place of business are the business of the insurance company

[3] distinguishing between a place used for the agent's own activities and one used by the agent for the insurer's activities is assisted by the reference in the OECD Model Commentary to a fixed place of business being 'at the disposal' of the enterprise (insurance company, in this context): this does not mean having the key, it must be a place of permanence, through which the business is carried on, and indicative factors for being at the insurer's disposal are that it pays the expenses, requires the agent to use it, stipulates what the office will contain and that customers will be met there

- once it has been determined that the agent is in business on its own account, it is illogical to find that administrative operations it conducts, even if not at the home office, are anything other than activities of its own business
- if there is a dependent agent permanent establishment, the Article V(6) exclusions are applied in the light of all the agent's activities (not just at the home office), but if applying it to a fixed place of

---

41 The original erroneously reads: article 6(5).

42 2008 TCC 307.

<http://www.dentons.com/~media/FMC%20Import/misc/pdf/r/reasons%20for%20judgement.pdf>

business, only the activities there are considered. Although this case is of only persuasive authority, it suggests that, provided the insurance risk is genuinely borne elsewhere (see GIM10220), and the agent is independent, significant insurance-related activities can take place in a State without giving rise to a permanent establishment. In that case, focus is on the service fee charged to the agent.

### **101.16 Controlled companies/groups**

Article 5(7) OECD Model provides:

The fact that a company<sup>43</sup> which is a resident of a Contracting State controls or is controlled by a company

- [a] which is a resident of the other Contracting State, or
- [b] which carries on business in that other State (whether through a permanent establishment or otherwise),

shall not of itself constitute either company a permanent establishment of the other.

OECD Commentary provides:

115. It is generally accepted that the existence of a subsidiary company does not, of itself, constitute that subsidiary company a permanent establishment of its parent company. This follows from the principle that, for the purpose of taxation, such a subsidiary company constitutes an independent legal entity. Even the fact that the trade or business carried on by the subsidiary company is managed by the parent company does not constitute the subsidiary company a permanent establishment of the parent company.

116. A parent company may, however, be found, under the rules of paragraph 1 or 5 of the Article, to have a permanent establishment in a State where a subsidiary has a place of business. Thus, any space or premises belonging to the subsidiary that is at the disposal of the parent company (see paragraphs 10 to 9 above) and that constitutes a fixed place of business through which the parent carries on its own business will constitute a permanent establishment of the parent under paragraph 1, subject to paragraph 3 and 4 of the Article (see for instance, the example in paragraph 15 above). Also, under paragraph 5, a parent will be deemed to have a permanent establishment in a State in respect of any

---

43 See 29.9.4 (“Company” in OECD Model).

activities that its subsidiary undertakes for the condition of that paragraph are met (see paragraphs 82 to 99 above), unless paragraph 6 of the Article applies.

117. The same principles apply to any company forming part of a multinational group so that such a company may be found to have a permanent establishment in a State where it has at its disposal (see paragraphs 10 to 19 above) and uses premises belonging to another company of the group, or if the former company is deemed to have a permanent establishment under paragraph 5 of the Article (see paragraphs 82 to 99 above). The determination of the existence of a permanent establishment under the rules of paragraph 1 or 5 of the Article must, however, be done separately for each company of the group. Thus, the existence in one State of a permanent establishment of one company of the group will not have any relevance as to whether another company of the group has itself a permanent establishment in that State.

118. Whilst premises belonging to a company that is a member of a multinational group can be put at the disposal of another company of the group and may, subject to the other conditions of Article 5, constitute a permanent establishment of that other company if the business of that other company is carried on through that place, it is important to distinguish that case from the frequent situation where a company that is a member of a multinational group provides services (e.g. management services) to another company of the group as part of its own business carried on in premises that are not those of that other company and using its own personnel. In that case, the place where those services are provided is not at the disposal of the latter company and it is not the business of that company that is carried on through that place. That place cannot, therefore, be considered to be a permanent establishment of the company to which the services are provided. Indeed, the fact that a company's own activities at a given location may provide an economic benefit to the business of another company does not mean that the latter company carries on its business through that location: clearly, a company that merely purchases parts produced or services supplied by another company in a different country would not have a permanent establishment because of that, even though it may benefit from the manufacturing of these parts or the supplying of these services.

There is no equivalent of art 5(7) in UK-law PE, but it is considered that the same rules should be implied.

### **101.17 Preparatory/auxiliary activities**

It may be helpful to set out the UK law and OECD Model rules side by side:

**Section 1143 CTA 2010**

(1) If the condition in subsection (2) is met, a company is not regarded as having a permanent establishment in a territory by reason of the fact that—

- (a) a fixed place of business is maintained there for the purpose of carrying on activities for the company, or
- (b) an agent carries on activities there for and on behalf of the company.

(2) The condition is that, in relation to the business of the company as a whole, the activities carried on

- [a] are only of a preparatory or auxiliary character and
- [b] are not part of a fragmented business operation.<sup>44</sup>

(3) In this section “activities of a preparatory or auxiliary character” include (without prejudice to the generality of that expression)—

- (a) the use of facilities for the purpose of storage, display or delivery of goods or merchandise belonging to the company,
- (b) the maintenance of a stock of goods or merchandise belonging to the company for the purpose of storage, display or delivery,

**OECD Model para 5(4)**

Notwithstanding the preceding provisions of this Article, the term “permanent establishment” shall be deemed not to include:  
any other activity;

[See proviso below]

*a)* the use of facilities solely for the purpose of storage, display or delivery of goods or merchandise belonging to the enterprise;

*b)* the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display or delivery;

---

44 See 101.18 (Fragmented business operation).

(c) the maintenance of a stock of goods or merchandise belonging to the company for the purpose of processing by another person, and

(d) purchasing goods or merchandise, or collecting information, for the company.

*c)* the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise;

*d)* the maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information, for the enterprise;

*e)* the maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise,

*f)* the maintenance of a fixed place of business solely for any combination of activities mentioned in subparas *a)* to *e)*,

[See (2) above]

provided that such activity or, in the case of subpara *f)*, the overall activity of the fixed place of business, is of a preparatory or auxiliary character.

The differences in wording do not seem significant.

INTM para 264050 discusses this, but need not be set out as it only refers to (and repeats some material from) the INTM discussion of OECD Model PE:

**INTM266120 activities specifically excluded from the definition of permanent establishment [Apr 2020]**

Model treaty Article 5(4) lists certain activities that are not to be treated as permanent establishments even if they are carried on through a fixed place of business. ...

The Manual sets out a précis of the article and continues:

In deciding whether or not a fixed place of business of a non-resident enterprise is used for activities of a preparatory or auxiliary nature, consider the following factors:

1. Are the services it performs so remote from the actual realisation of profits

by the enterprise that it would be difficult to allocate any part of the profit to the fixed place of business? If they are, then the fixed place of business will not be a permanent establishment. The benchmark to gauge the activities against is that of the trade as a whole entity. So, for example, if the UK activities are no different to the essence of the trade, e.g. the UK personnel collect market research information and the non-resident company's main trade is concerned with market research, then the activities in the UK would not be preparatory or auxiliary and there could be a permanent establishment in the UK.

An example is a research division of a trading or manufacturing company.

2. Does the activity of the fixed place of business form an essential and significant part of the enterprise as a whole?

This sentence is from OECD Commentary but it cannot be a correct or helpful test since all the activities specified as auxiliary are significant and some of them are essential.

A fixed place of business whose general purpose is identical to the general purpose of the enterprise is not used for activities of a preparatory or auxiliary nature. Examples of this are fixed places of business used for the purpose of managing an enterprise, or where a fixed place of business is maintained to supply spare parts of machinery supplied by the enterprise to customers and to service such machinery.

Note that the exclusion of activities of a preparatory or auxiliary nature from the definition of a permanent establishment only applies if these activities are solely for the non-resident enterprise. If the activities are performed not only for the enterprise but also for other enterprises, including other companies in the same group, then the fixed place of business will not be within the scope of the exclusion.

I find the last paragraph rather surprising though it is in OECD Commentary. OECD Commentary explains the reason for the exemption for collecting information:

The reference to the collection of information in subpara d) is intended to include the case of the newspaper bureau which has no purpose other than to act as one of many "tentacles" of the parent body; to exempt such a bureau is to do no more than to extend the concept of "mere purchase".

## **101.18 Fragmented business operation**

Section 1143 CTA 2010 provides:

- (2A) Activities are “part of a fragmented business operation” if—
- (a) they are carried on (whether at the same place or at different places in the same territory) by the company or a person closely related to the company,
  - (b) they constitute complementary functions that are part of a cohesive business operation, and
  - (c) subsection (2B) applies.
- (2B) This subsection applies if—
- (a) the overall activity resulting from the combination of the functions mentioned in subsection (2A)(b) is not activity that is only of a preparatory or auxiliary character, or
  - (b) the company or a person closely related to the company has a permanent establishment in the territory by reason of carrying on any of those functions.
- (2C) A person who is not a company is to be treated for the purposes of subsection (2B)(b) as having a permanent establishment in a territory if, were the person a company, the person would have a permanent establishment in the territory.
- (2D) For the purposes of this section, one person (“A”) is closely related to another person (“B”) if—
- (a) A is able to secure that B acts in accordance with A’s wishes (or vice versa),
  - (b) B can reasonably be expected to act, or typically acts, in accordance with A’s wishes (or vice versa),
  - (c) a third person is able to secure that A and B act in accordance with the third person’s wishes,
  - (d) A and B can reasonably be expected to act, or typically act, in accordance with a third person’s wishes, or
  - (e) the 50% investment condition is met in relation to A and B.
- (2E) The 50% investment condition is met in relation to A and B if—
- (a) A has a 50% investment in B (or vice versa), or
  - (b) a third person has a 50% investment in each of A and B, and section 259ND of TIOPA 2010 (meaning of “50% investment”) applies for the purposes of determining whether a person has a “50% investment”.<sup>45</sup>

This is the statutory equivalent of the OECD fragmentation rule.

---

45 See 100.8 (% investment tests).

### 101.18.1 *OECD fragmentation rule*

Article 5 OECD Model provides:

4.1 Paragraph 4 shall not apply to a fixed place of business that is used or maintained by an enterprise if the same enterprise or a closely related enterprise carries on business activities at the same place or at another place in the same Contracting State and

a) that place or other place constitutes a permanent establishment for the enterprise or the closely related enterprise under the provisions of this Article, or

b) the overall activity resulting from the combination of the activities carried on by the two enterprises at the same place, or by the same enterprise or closely related enterprises at the two places, is not of a preparatory or auxiliary character, provided that the business activities carried on by the two enterprises at the same place, or by the same enterprise or closely related enterprises at the two places, constitute complementary functions that are part of a cohesive business operation.

8.[a] For the purposes of this Article, a person or enterprise is closely related to an enterprise if, based on all the relevant facts and circumstances,

[i] one has control of the other or

[ii] both are under the control of the same persons or enterprises.

[b] In any case, a person or enterprise shall be considered to be closely related to an enterprise if

[i] one possesses directly or indirectly more than 50 per cent of the beneficial interest in the other (or, in the case of a company, more than 50 per cent of the aggregate vote and value of the company's shares or of the beneficial equity interest in the company) or

[ii] if another person or enterprise possesses directly or indirectly more than 50 per cent of the beneficial interest (or, in the case of a company, more than 50 per cent of the aggregate vote and value of the company's shares or of the beneficial equity interest in the company) in the person and the enterprise or in the two enterprises.

### 101.18.2 *BEPS MLI: fragmentation*

OECD BEPS MLI has restricted the preparatory/auxiliary activities exemption.<sup>46</sup> IFS summarise:

The BEPS process sought to deal with concerns that companies are avoiding tax by structuring themselves such that they do not have a taxable presence (a PE) in a foreign jurisdiction by broadening the definition of PEs in international tax rules. The revisions are particularly focused on tackling issues related to the digital economy. Notably, entities are currently exempt from PE status if they undertake only activities of a ‘preparatory or auxiliary character’, such as storage and distribution. This means that a UK consumer may purchase a good via the website of a foreign company (such as Amazon) that is then delivered from a UK distribution centre, and that transaction will not lead to a UK corporate tax liability because there was no UK PE involved. This is the correct outcome under current law. But it leads to concerns that some activities are being undervalued and countries therefore missing out on taxable income. Storage and distribution facilities may actually constitute core business activities that contribute to the creation of value added (for example, by providing quick distribution or high levels of customer service).

... The rules dictating PE status will be revised to move where the dividing line is drawn. In particular, the revised rules will specify that storage and distribution activities will constitute the operation of a PE unless the activities are genuinely only preparatory and auxiliary in nature, which is, of course, still somewhat subjective...

Redefining PE status should result in taxing rights that better reflect the source of profits if countries find a way to adjust bilateral treaties to implement a new PE definition, and if that works to redefine some activities that are currently deemed auxiliary. It is worth noting that this change may work in both directions for the UK. For example, more income (and therefore tax) could be received from the UK storage and distribution facilities of foreign multinationals (such as Amazon) – although some companies may choose to adjust their activities to avoid becoming a PE. At the same time, some UK multinationals may receive less foreign income if their foreign storage and distribution facilities are

---

46 OECD/G20 “Preventing the Artificial Avoidance of Permanent Establishment Status ACTION 7 Final Report (2015) p.28

<http://www.oecd.org/ctp/preventing-the-artificial-avoidance-of-permanent-establishment-status-action-7-2015-final-report-9789264241220-en.htm>

given PE status.<sup>47</sup>

Article 13 BEPS MLI provides:

1. A Party may choose to apply paragraph 2 (Option A) or paragraph 3 (Option B) or to apply neither Option.

The UK has chosen not to apply option A or B, so we move on to art 13(4):

4. A provision of a Covered Tax Agreement<sup>48</sup> (as it may be modified by paragraph 2 or 3) that lists specific activities deemed not to constitute a permanent establishment shall not apply to a fixed place of business that is used or maintained by an enterprise if the same enterprise or a closely related enterprise carries on business activities at the same place or at another place in the same Contracting Jurisdiction and:

- a) that place or other place constitutes a permanent establishment for the enterprise or the closely related enterprise under the provisions of a Covered Tax Agreement defining a permanent establishment; or
- b) the overall activity resulting from the combination of the activities carried on by the two enterprises at the same place, or by the same enterprise or closely related enterprises at the two places, is not of a preparatory or auxiliary character,

provided that the business activities carried on by the two enterprises at the same place, or by the same enterprise or closely related enterprises at the two places, constitute complementary functions that are part of a cohesive business operation.

5. ...

- b) Paragraph 4 shall apply to provisions of a Covered Tax Agreement (as they may be modified by paragraph 2 or 3) that list specific activities that are deemed not to constitute a permanent establishment even if the activity is carried on through a fixed place of business (or provisions of a Covered Tax Agreement that operate in a comparable manner).

8. Each Party that has not made a reservation described in subparagraph a) or c) of paragraph 6 and does not choose to apply an Option under paragraph 1 shall notify the Depository of whether each of its Covered

---

47 IFS, "Green Budget" (2016) <http://www.ifs.org.uk/uploads/gb/gb2016/gb2016.pdf>

48 See 103.15.3 (Covered tax agreement).

Tax Agreements contains a provision described in subparagraph b) of paragraph 5, as well as the article and paragraph number of each such provision. Paragraph 4 shall apply with respect to a provision of a Covered Tax Agreement only where all Contracting Jurisdictions have made a notification with respect to that provision under this paragraph or paragraph 7.

UK MLI Notifications<sup>49</sup> sets out the list of 121 DTAs which contain a provision described in art 13(5)(b), and so fall within the scope of art 13.

### **101.19 Services PE**

OECD Commentary offers an optional clause which I call the “**services PE clause**”. The clause is found in a few UK treaties,<sup>50</sup> though it is not common.

The clause has three limbs. It begins:

[1] Notwithstanding the provisions of paragraphs 1, 2 and 3, where an enterprise of a Contracting State performs services in the other Contracting State

a) [i] through an individual who is present in that other State for a period or periods exceeding in the aggregate 183 days in any twelve month period, and

[ii] more than 50% of the gross revenues attributable to active business activities of the enterprise during this period or periods are derived from the services performed in that other State through that individual, or

b) [i] for a period or periods exceeding in the aggregate 183 days in any twelve month period, and

[ii] these services are performed for the same project or for connected projects through one or more individuals who are present and performing such services in that other State

the activities carried on in that other State in performing these services shall be deemed to be carried on through a permanent establishment of the enterprise situated in that other State ...

50 Colombia, Kyrgystan, Norway, Panama.

Unpacking this clause, the requirements are:

- (1) An enterprise of one State (“the enterprise State”)
- (2) The enterprise performs services in the other State (“the source State”)
- (3) The services are performed through an individual (or individuals)
- (4) Conditions (a) or (b) are met:
  - (a) Subparagraph a) looks at the duration of the presence of the individual through whom an enterprise derives most of its revenues
  - (b) Subparagraph b) looks at the duration of the activities of the individuals through whom the services are performed.

Para 132ff OECD Commentary discusses the policy background at some length, and is not discussed here.

I refer to a PE (or one might say, deemed PE) within this clause as a “**services PE**”.

#### 101.19.1 *Services performed through an individual*

Para [3] of the Services PE clause explains what is meant by services performed by an enterprise through an individual:

For the purposes of this paragraph, services performed by an individual on behalf of one enterprise shall not be considered to be performed by another enterprise through that individual unless that other enterprise supervises, directs or controls the manner in which these services are performed by the individual.

#### 101.19.2 *Recipient of services unaffected*

OECD Commentary provides:

151. The provision applies to services performed by an enterprise. Thus, services must be provided by the enterprise to third parties. Clearly, the provision could not have the effect of deeming an enterprise to have a permanent establishment merely because services are provided to that enterprise. For example, services might be provided by an individual to his employer without that employer performing any services (e.g. an employee who provides manufacturing services to an enterprise that sells manufactured products). Another example would be where the employees of one enterprise provide services in one country to an associated enterprise under detailed instructions and close

supervision of the latter enterprise; in that case, assuming the services in question are not for the benefit of any third party, the latter enterprise does not itself perform any services to which the provision could apply.

### 101.19.3 *Location of recipient n/a*

OECD Commentary provides:

152. Also, the provision only applies to services that are performed in a State by a foreign enterprise. Whether or not the relevant services are furnished to a resident of the State does not matter; what matters is that the services are performed in the State through an individual present in that State.

### 101.19.4 *Who performs services*

OECD Commentary provides:

153. The alternative provision does not specify that the services must be provided “through employees or other personnel engaged by the enterprise”, a phrase that is sometimes found in bilateral treaties. It simply provides that the services must be performed by an enterprise. As explained in paragraph 39 above, the business of an enterprise (which, in the context of the paragraph, would include the services performed in a Contracting State)

“is carried on by the entrepreneur or persons who are in paid-employment relationship with the enterprise (personnel). This personnel includes employees and other persons receiving instructions from the enterprise (e.g. dependent agents).”

For the purposes of the alternative provision, the individuals through which an enterprise provides services will therefore be the individuals referred to in paragraph 39,<sup>51</sup> subject to the exception included in the last sentence of that provision (see paragraph 164 below).

### 101.19.5 *Subpara (a)*

The Services PE clause applies:

where an enterprise of a Contracting State performs services in the other Contracting State

a) [i] through an individual who is present in that other State for a

---

51 See 101.9.1 (Formal v effective employment).

period or periods exceeding in the aggregate 183 days in any twelve month period, and

- [ii] more than 50% of the gross revenues attributable to active business activities of the enterprise during this period or periods are derived from the services performed in that other State through that individual ...

OECD Commentary provides:

155. Subparagraph a) deals primarily with the situation of an enterprise carried on by a single individual. It also covers, however, the case of an enterprise which, during the relevant period or periods, derives most of its revenues from services provided by one individual. Such extension is necessary to avoid a different treatment between, for example, a case where services are provided by an individual and a case where similar services are provided by a company all the shares of which are owned by the only employee of that company.

156. The subparagraph may apply in different situations where an enterprise performs services through an individual, such as when the services are performed by a sole proprietorship, by the partner of a partnership, by the employee of a company etc...

157. The first condition refers to the days of presence of an individual. Since the formulation is identical to that of subparagraph a) of paragraph 2 of Article 15, the principles applicable to the computation of the days of presence for purposes of that last subparagraph are also applicable to the computation of the days of presence for the purpose of the suggested paragraph.<sup>52</sup>

158. For the purposes of the second condition, according to which more than 50 per cent of the gross revenues attributable to active business activities of the enterprise during the relevant period or periods must be derived from the services performed in that State through that individual, the gross revenues attributable to active business activities of the enterprise would represent what the enterprise has charged or should charge for its active business activities, regardless of when the actual billing will occur or of domestic law rules concerning when such revenues should be taken into account for tax purposes. Such active business activities are not restricted to activities related to the provision of services. Gross revenues attributable to “active business activities”

---

52 See 36.13 (STBV condition a: 183-day rule).

would clearly exclude income from passive investment activities, including, for example, receiving interest and dividends from investing surplus funds. States may, however, prefer to use a different test, such as “50 per cent of the business profits of the enterprise during this period or periods is derived from the services” or “the services represent the most important part of the business activities of the enterprise”, in order to identify an enterprise that derives most of its revenues from services performed by an individual on their territory.

#### 101.19.6 *Para (a) examples*

The OECD Commentary provides 3 simple, self-evident examples, concerned with a sole proprietorship and with companies:

159. The following examples illustrate the application of subparagraph a) (assuming that the alternative provision has been included in a treaty between States R and S):

**Example 1:**

W, a resident of State R, is a consultant who carries on her business activities in her own name (i.e. that enterprise is a sole proprietorship). Between 2 February 00 and 1 February 01,

- [a] she is present in State S for a period or periods of 190 days and
- [b] during that period all the revenues from her business activities are derived from services that she performs in State S.

Since subparagraph a) applies in that situation, these services shall be deemed to be performed through a permanent establishment in State S.

**Example 2:**

X, a resident of State R, is one of the two shareholders and employees of XCO, a company resident of State R that provides engineering services. Between 20 December 00 and 19 December 01,

- [a] X is present in State S for a period or periods of 190 days and
- [b] during that period, 70 per cent of all the gross revenues of XCO attributable to active business activities are derived from the services that X performs in State S.

Since subparagraph a) applies in that situation, these services shall be deemed to be performed through a permanent establishment of XCO in State S.

**Example 4:**

Z, a resident of State R, is one of 10 employees of ACO, a company

resident of State R that provides accounting services. Between 10 April 00 and 9 April 01,

- [a] Z is present in State S for a period or periods of 190 days and
- [b] during that period, 12 per cent of all the gross revenues of ACO attributable to its active business activities are derived from the services that Z performs in State S.

Subparagraph a) does not apply in that situation and, unless subparagraph b) applies to ACO, the alternative provision will not deem ACO to have a permanent establishment in State S.

Example 3 concerns a partnership, which is less straightforward:

**Example 3:**

X and Y, who are residents of State R, are the two partners of X&Y, a partnership established in State R which provides legal services. For tax purposes, State R treats partnerships as transparent entities.

Between 15 July 00 and 14 July 01,

- [a] Y is present in State S for a period or periods of 240 days and
- [b] during that period, 55 per cent of all the fees of X&Y attributable to X&Y's active business activities are derived from the services that Y performs in State S.

Subparagraph a) applies in that situation and, for the purposes of the taxation of X and Y, the services performed by Y are deemed to be performed through a permanent establishment in State S.

101.19.7 *Subpara (b)*

The Services PE clause applies:

where an enterprise of a Contracting State performs services in the other Contracting State ...

- b) [i] for a period or periods exceeding in the aggregate 183 days in any twelve month period, and
- [ii] these services are performed for the same project or for connected projects through one or more individuals who are present and performing such services in that other State

OECD Commentary provides:

160. Subparagraph b) addresses the situation of an enterprise that performs services in a Contracting State in relation to a particular project (or for connected projects) and which performs these through one or more individuals over a substantial period. The period or periods

referred to in the subparagraph apply in relation to the enterprise and not to the individuals. It is therefore not necessary that it be the same individual or individuals who perform the services and are present throughout these periods. As long as, on a given day, the enterprise is performing its services through at least one individual who is doing so and is present in the State, that day would be included in the period or periods referred to in the subparagraph. Clearly, however, that day will count as a single day regardless of how many individuals are performing such services for the enterprise during that day.

161. The reference to an “enterprise ... performing these services for the same project” should be interpreted from the perspective of the enterprise that provides the services. Thus, an enterprise may have two different projects to provide services to a single customer (e.g. to provide tax advice and to provide training in an area unrelated to tax) and whilst these may be related to a single project of the customer, one should not consider that the services are performed for the same project.

162. The reference to “connected projects” is intended to cover cases where the services are provided in the context of separate projects carried on by an enterprise but these projects have a commercial coherence (see paragraphs 24 and 25 above). The determination of whether projects are connected will depend on the facts and circumstances of each case but factors that would generally be relevant for that purpose include:

- whether the projects are covered by a single master contract;
- where the projects are covered by different contracts, whether these different contracts were concluded with the same person or with related persons and whether the conclusion of the additional contracts would reasonably have been expected when concluding the first contract;
- whether the nature of the work involved under the different projects is the same;
- whether the same individuals are performing the services under the different projects.

163. Subparagraph b) requires that during the relevant periods, the enterprise is performing services through individuals who are performing such services in that other State. For that purpose, a period during which individuals are performing services means a period during which the services are actually provided, which would normally correspond to the working days of these individuals. An enterprise that

agrees to keep personnel available in case a client needs the services of such personnel and charges the client standby charges for making such personnel available is performing services through the relevant individuals even though they are idle during the working days when they remain available.

164. As indicated in paragraph 153 above, for the purposes of the alternative provision, the individuals through whom an enterprise provides services will be the individuals referred to in paragraph 39 above. If, however, an individual is providing the services on behalf of one enterprise, the exception included in the last sentence of the provision clarifies that the services performed by that individual will only be taken into account for another enterprise if the work of that individual is exercised under the supervision, direction or control of the last-mentioned enterprise. Thus, for example, where a company that has agreed by contract to provide services to third parties provides these services through the employees of a separate enterprise (e.g. an enterprise providing outsourced services), the services performed through these employees will not be taken into account for purposes of the application of subparagraph b) to the company that entered into the contract to provide services to third parties. This rule applies regardless of whether the separate enterprise is associated to, or independent from, the company that entered into the contract.

165. The following examples illustrate the application of subparagraph b) (assuming that the alternative provision has been included in a treaty between States R and S):

- Example 1: X, a company resident of State R, has agreed with company Y to carry on geological surveys in various locations in State S where company Y owns exploration rights. Between 15 May 00 and 14 May 01, these surveys are carried on over 185 working days by employees of X as well as by self-employed individuals to whom X has sub-contracted part of the work but who work under the direction, supervision or control of X. Since subparagraph b) applies in that situation, these services shall be deemed to be performed through a permanent establishment of X in State S.
- Example 2: Y, a resident of State T, is one of the two shareholders and employees of WYCO, a company resident of State R that provides training services. Between 10 June 00 and 9 June 01, Y performs services in State S under a contract that WYCO has concluded with a company which is a resident of State S to train the employees of that company. These services are performed in State

S over 185 working days. During the period of Y's presence in State S, the revenues from these services account for 40 per cent of the gross revenues of WYCO from its active business activities. Whilst subparagraph a) does not apply in that situation, subparagraph b) applies and these services shall be deemed to be performed through a permanent establishment of WYCO in State S.

- Example 3: ZCO, a resident of State R, has outsourced to company OCO, which is a resident of State S, the technical support that it provides by telephone to its clients. OCO operates a call centre for a number of companies similar to ZCO. During the period of 1 January 00 to 31 December 00, the employees of OCO provide technical support to various clients of ZCO. Since the employees of OCO are not under the supervision, direction or control of ZCO, it cannot be considered, for the purposes of subparagraph b), that ZCO is performing services in State S through these employees. Additionally, whilst the services provided by OCO's employees to the various clients of ZCO are similar, these are provided under different contracts concluded by ZCO with unrelated clients: these services cannot, therefore, be considered to be rendered for the same or connected projects.

#### 101.19.8 *Abuse: fragmentation*

OECD Commentary provides:

166. The 183-day thresholds provided for in the alternative provision may give rise to the same type of abuse as is described in paragraph 52 above.<sup>53</sup> As indicated in that paragraph, apart from the fact that such abuses may, depending on the circumstances, fall under the application of legislative or judicial anti-avoidance rules, these abuses could also be addressed through the application of the anti-abuse rule of paragraph 9 of Article 29. Some States, however, may prefer to deal with them by including a specific provision in the Article. Such a provision could be drafted along the following lines ...

#### 101.19.9 *Scope of Services PE*

OECD Commentary provides:

167. According to the provision, the activities carried on in the other

---

<sup>53</sup> See 101.11.1 (Building/construction site).

State by the individuals referred to in subparagraph a) or b) through which the services are performed by the enterprise during the period or periods referred to in these subparagraphs are deemed to be carried on through a permanent establishment that the enterprise has in that other State. The enterprise is therefore deemed to have a permanent establishment in that other State for the purposes of all the provisions of the Convention (including, for example, paragraph 5 of Article 11 and paragraph 2 of Article 15) and the profits derived from the activities carried on in the other State in providing these services are attributable to that permanent establishment and are therefore taxable in that State pursuant to Article 7.

168. By deeming the activities carried on in performing the relevant services to be carried on through a permanent establishment that the enterprise has in a Contracting State, the provision allows the application of Article 7 and therefore, the taxation, by that State, of the profits attributable to these activities. As a general rule, it is important to ensure that only the profits derived from the activities carried on in performing the services are taxed; whilst there may be certain exceptions, it would be detrimental to the cross-border trade in services if payments received for these services were taxed regardless of the direct or indirect expenses incurred for the purpose of performing these services.

#### 101.19.10 *Preparatory/auxiliary services*

The second limb of the services PE clause is an exemption for preparatory/auxiliary services:<sup>54</sup>

[2] unless these services are limited to those mentioned in paragraph 4 which, if performed through a fixed place of business (other than a fixed place of business to which paragraph 4.1 would apply), would not make this fixed place of business a permanent establishment under the provisions of that paragraph.

OECD Commentary provides:

169. This alternative provision will not apply if the services performed are limited to those mentioned in paragraph 4 of Article 5 which, if performed through a fixed place of business, would not make this fixed

---

<sup>54</sup> See 101.17 (Preparatory/auxiliary activities).

place of business a permanent establishment under the provisions of that paragraph. Since the provision refers to the performance of services by the enterprise and this would not cover services provided to the enterprise itself, most of the provisions of paragraph 4 would not appear to be relevant. It may be, however, that the services that are performed are exclusively of a preparatory or auxiliary character (e.g. the supply of information to prospective customers when this is merely preparatory to the conduct of the ordinary business activities of the enterprise; see paragraph 71 above) and in that case, it is logical not to consider that the performance of these services will constitute a permanent establishment.

### **101.20 Alternative finance arrangements**

Section 1144 CTA 2010 deals with sharia-compliant arrangements for interest. This is not discussed here.

### **101.21 PE: Pre-1963 DTAs**

Pre-1963 DTAs<sup>55</sup> provide another definition of PE. I take art 2(1)(k) Belize/UK treaty as an example:

[1] The term “permanent establishment”, when used with respect to an enterprise of one of the territories, means

- [a] a branch, management or other fixed place of business,
- [b] but does not include an agency unless the agent has, and habitually exercises, a general authority to negotiate and conclude contracts on behalf of such enterprise or has a stock of merchandise from which he regularly fills orders on its behalf.

[2] An enterprise of one of the territories shall not be deemed to have a permanent establishment in the other territory merely because it carries on business dealings in that other territory through a bona fide broker or general commission agent acting in the ordinary course of his business as such.

[3] The fact that an enterprise of one of the territories maintains in the other territory a fixed place of business exclusively for the purchase of goods or merchandise shall not of itself constitute that fixed place of business a permanent establishment of the enterprise.

[4] The fact that a company which is a resident of one of the territories

---

55 See 103.24 (Pre-1963 DTAs).

has a subsidiary company which is a resident of the other territory or which is engaged in trade or business in that other territory (whether through a permanent establishment or otherwise) shall not of itself constitute that subsidiary company a permanent establishment of its parent company.

The wording of [1] is based on s.17 FA 1930 and is clearly an ancestor of OECD Model PE.

## **101.22 Trade in UK without PE**

In *Brckett v Chater*:

... I find it difficult to imagine how a non-resident company which carries on a trade with any degree of continuity in the UK can do so otherwise than through a “branch or agency” as defined in the Taxes Management Act 1970.<sup>56</sup>

This is *obiter*, but given the breadth of the expression it seems right as a general rule but not as an absolute rule. This applies to a PE as well as to a branch/agency.

The former International Tax Handbook at para 846 took the view that trading in the UK without a branch or agency was rare:

Although such cases are rare it is possible for a non-resident individual to trade here other than through a branch or agency. A non-resident individual might come to this country for a short time so as not to become resident and carry on an itinerant trade. There would in such a situation be no branch and no agency. It is rather more difficult to imagine situations of that sort where the person concerned is a company. But notwithstanding the judge’s comments in the *Brckett* case there may be cases where the UK activities of a non-resident company are divided between various persons in such a way that, although the activities amount to trading here, no one person or group of persons can be identified as a branch or agency through which the trade is carried on.

Similarly HMRC say:

a trade carried on in the UK otherwise than through a permanent

---

<sup>56</sup> 60 TC 134 at p.149.

establishment which, technically, remains within the charge to UK income tax ... in practice applies to only a very small number of companies.<sup>57</sup>

### **101.23 Definitions of PE: Critique**

We only need one definition of PE and it is suggested that the UK-law definition of PE should be repealed and replaced by a rule that PE has the same meaning as in OECD Model definition at the current time. That is indeed what the current statutory definition is intended to achieve. There could usefully be a power to adopt subsequent changes to OECD Model definition by statutory instrument.

### **101.24 Why branch/agency matters**

It is not practical to set out a full list of the significance of branch/agency for tax, but the following are the most important.

In the absence of a branch/agency, a non-resident individual or trust is not generally subject to CGT. An individual or trust trading in the UK through a PE is subject to CGT on gains linked to the branch/agency.<sup>58</sup>

IT and CGT may be collected from the branch/agency.<sup>59</sup>

A branch/agency of an individual who is a trustee is relevant to trust residence.

Lastly, the branch/agency is likely to be a PE, which is relevant for DTAs.

Branch/agency is not relevant to companies. In theory one could envisage a situation where a non-resident company does not have a UK PE but does have a UK branch/agency, and such a company would be within the scope of CGT.<sup>60</sup> In practice, this does not happen, or if it does, no-one

---

57 HMRC, "Non-resident companies chargeable to Income Tax and non-resident CGT (March 2017) para 2.4

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/601032/Non-resident\\_companies\\_chargeable\\_to\\_Income\\_Tax\\_and\\_non-resident\\_CGT\\_-\\_consultation.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/601032/Non-resident_companies_chargeable_to_Income_Tax_and_non-resident_CGT_-_consultation.pdf)

58 See 53.5 (Trade through UK branch/PE).

59 See 118.1 (Tax collected from UK representatives).

60 See 53.4.5 (Charge on non-resident).

takes any notice.<sup>61</sup>

## 101.25 Meaning of “branch or agency”

### 101.25.1 *Statutory (non-)definition*

Section 1B(5) TCGA provides:

In this Act, unless the context otherwise requires, “branch or agency”—

- (a) means any factorship, agency, receivership, branch or management, but
- (b) does not include any person within any of the exemptions under sections 835G to 835K of ITA 2007 (persons who are not UK representatives).

The exceptions in s.1B(5)(b) concern agents, brokers, investment managers, alternative finance arrangements (Sharia-compliance) and Lloyds agents.<sup>62</sup>

The definition in s.1B(5)(a) is useless, since it incorporates both words being defined, merely adding three further obscure or archaic terms which seem to mean “agent” if they mean anything.<sup>63</sup> The INTM expresses the same point more tactfully:

---

61 See for instance the HMRC trustee residence guidance which states conveniently (if not strictly accurately):

“This is in line with section 10B Taxation of Chargeable Gains Act 1992 *which has the effect that an overseas company is not taxed on the gains made by a UK branch or agency, but only on those made by a permanent establishment here.*” (Emphasis added).

62 See 118.5 (UK representatives: Exemptions).

63 The former International Tax Handbook explained at 842:

“Factorship and receivership are forms of agency and so, usually, would ‘management’ be. The former two categories are found in the 1842 machinery provisions, ‘Management’ was added in 1915 but has acquired more modern associations with the growth in the use of managers such as project managers and investment managers.”

To be fair, s.10(6)[a] was not intended to be a definition as such, but simply as an abbreviation, to avoid the more cumbersome wording of, e.g. s.370 ITA 1952:

“A non-resident person shall be assessable and chargeable in respect of any profits or gains arising, whether directly or indirectly, through or from any factorship, agency, receivership, branch or management, and shall be so assessable and chargeable in the name of the factor, agent, receiver, branch or manager.”

**INTM264090. Branch or agency – Statutory definition and practical recognition of a branch [Apr 2020]**

... There is a statutory definition of ‘branch or agency’ ... thus – “any factorship, agency, receivership, branch or management”. This is not particularly helpful so we must look for authority elsewhere including case law.

101.25.2 “*Branch*”

The former International Tax Handbook stated at para 842:

There is very little guidance on the meaning of ‘branch’. We have been advised that the presence of a principal (in the case of a sole trader or partnership) or of employees on a more or less regular basis is likely to be an essential ingredient of a branch (though employees may also be agents).

That repeats the personnel condition in the definition of PE. The INTM provides:

**INTM264090. Branch or agency – Statutory definition and practical recognition of a branch [Apr 2020]**

... Most people recognise a branch of a foreign business when they see one and the impression given to the public is helpful in deciding whether or not a branch exists. For example there are many branches of foreign banks that trade on the High Streets of many towns and cities in the UK. We know this, whether we bank with these branches or not, because the name of the foreign bank will be displayed across the shop front of the UK branch. The personnel running the UK branch will be carrying on the part of the foreign bank’s trade that takes place in the UK. This amounts to the UK presence of the foreign bank’s trade, i.e. a branch of its trade. That’s an easy example in part because banks actually call themselves branches but it is worth stressing that whatever terminology is used it is the activities carried on in the UK in relation to the foreign enterprise’s overall business activities that are most relevant in deciding whether the UK activities are a branch of the foreign business.

101.25.3 “*Agency*”

The “agent” need not be an agent in the contract law sense of a person

empowered to enter into contracts on behalf of a principal.<sup>64</sup>

#### 101.25.4 *Branch/agency distinction*

It is considered that “branch” should have (more or less) the same meaning as fixed place of business PE, and “agency” should have (more or less) the same meaning as agency-PE, so the composite expression has (more or less) the same meaning as PE.

HMRC agree. The SALF Manual provides:

**704 UK representatives of non-residents chargeable under Case I and II Schedule D** [Jan 2019]

*Definition of UK representative*

Branch or agency has the statutory definition at s.126(8) FA 1995 of ‘Any factorship, agency, receivership, branch or management’ but it is interpreted on broadly equal lines to ‘permanent establishment’...<sup>65</sup>

In *Brackett v Chater*,<sup>66</sup> the Special Commissioners took a different approach. They treated the term “branch or agency” as composite phrase containing a single concept. They did not think it correct to consider separately whether there was a branch, and whether there was an agent. The difficulty with this approach is that it is far from clear what the single concept is, if it is distinct from the concepts of branch and agency and PE. (The statutory definition, as noted, does not help.) The Special Commissioners’ solution is to ignore the wording altogether.<sup>67</sup> It is not necessary to go that far, even when dealing with these 19th century fossils, and at a time when more emphasis is placed on a purposive approach.

The Special Commissioners continued:

Mr. Brackett represents Drishane in this country and is in sole charge of

---

<sup>64</sup> See *Brackett v Chater* 60 TC 134.

<sup>65</sup> Similarly the HMRC trustee residence guidance: “The examples all relate to non-UK resident companies that are trustees. The same principles would apply for other non-UK resident persons who are trustees (and for whom the relevant UK-based entity would be a branch or agency rather than a permanent establishment).”

<sup>66</sup> 60 TC 134 & 639, at p.646.

<sup>67</sup> “It would, in our view, be perverse to hold that [the non-resident company], which was effectively trading only in this country, through Mr. Brackett, is not within the charge to tax because of some semantic difficulty in fitting its arrangements with him to the wording of the definition of a branch or agency.”

the day to day conduct of the trading operations other than the formation of contracts. It is not straining language, in our opinion, to say that by entrusting those operations to his care Drishane has established at least a branch in this country. Alternatively Mr. Brackett can properly be described as the manager of those operations, because he personifies them. Nor can we accede to Mr. Brackett's argument that it is inappropriate to assess him as "agent for Drishane" because he does not have the status of an agent under the general law. The definition of "branch or agency" in s 118 Taxes Management Act adds that "branch or agent" shall be construed accordingly. We take that to mean that the term "agent" is used as the cognate noun to describe a person who represents a branch or agency. Mr. Brackett is undoubtedly the personification of the branch or management of Drishane's business in this country and is, in our opinion, properly assessed as "agent for Drishane" on the authority of s 79.

This conclusion does follow from the finding of fact in the first sentence, though the only support it received in the High Court was that the decision was one which the Special Commissioners were entitled to reach.

### **101.26 Branch/agency: Critique**

The FA 2003 replaced "branch or agency" with "PE" for the purposes of corporation tax. The reason was to achieve consistency with international tax law. A press release explained the reason:

The rules also alter our current terminology so that in future we tax "permanent establishments", (a term recognised internationally and used in our double taxation agreements), rather than "branches". The new rules are to be interpreted in accordance with OECD guidelines, to ensure that the UK is in accord with international consensus that reflects UK agreement.<sup>68</sup>

This was a good reason to change corporation tax, and it is an equally good reason to bring IT and CGT into line. We do not need both concepts. The term PE should replace "branch or agency" altogether. This would be a worthwhile and trouble-free simplification in the law. It would make no difference in practice, because in practice the two terms come to much the same thing, and no-one takes much notice of such differences as there may be, but the reform would remove some puzzles

---

68 REV BN 25 para 8 (17 April 2002).

and much complexity and duplication.

## **101.27 Home office due to Covid**

### 101.27.1 *OECD Covid guidance*

OECD have produced a helpful paper (“**OECD Covid guidance**”). The edition history is:

Apr 2020: Analysis of Tax Treaties and the Impact of the COVID-19 Crisis<sup>69</sup>

Jan 2021: Updated guidance on tax treaties and the impact of the COVID-19 pandemic<sup>70</sup>

References here are to the updated guidance.

See too 8.31 (Covid issues re treaty-residence).

### 101.27.2 *Fixed place of business*

OECD Covid guidance provides:

14. Whilst noting that the issue of whether a PE exists is a test based on facts and circumstances, in general, a place must have a certain degree of permanency and be at the disposal of an enterprise in order for that place to be considered a fixed place of business through which the business of that enterprise is wholly or partly carried on.

15. Paragraph 18 of the Commentary on Article 5 of the OECD Model explains that even though part of the business of an enterprise may be carried on at a location such as an individual’s home office, that should not lead to the conclusion that that location is at the disposal of that enterprise simply because that location is used by an individual (e.g. an employee) who works for the enterprise. The carrying on of intermittent business activities at the home of an employee does not make that home a place at the disposal of the enterprise. A home office may be a PE for an enterprise if it is used on a continuous basis for carrying on business of that enterprise and the enterprise generally has required the individual to use that location to carry on the enterprise’s business.

16. During the COVID-19 pandemic, individuals who stay at home to

70 [https://read.oecd-ilibrary.org/view/?ref=1060\\_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic](https://read.oecd-ilibrary.org/view/?ref=1060_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic)

work remotely are typically doing so as a result of public health measures: it is an extraordinary event not an enterprise's requirement. Therefore, considering the extraordinary nature of the COVID-19 pandemic, teleworking from home (i.e. the home office) because of an extraordinary event or public health measures imposed or recommended by government would not create a PE for the business/employer, either because such activity lacks a sufficient degree of permanency or continuity or because the home office is not at the disposal of the enterprise. In addition, it still provides an office which in the absence of public health measures is available to the relevant employee. This applies whether the temporary work location is the individual's home or a temporary dwelling in a jurisdiction that is not their primary place of residence.

17.If an individual continues to work from home after the cessation of the public health measures imposed or recommended by government, the home office may be considered to have certain degree of permanence. However, that change alone will not necessarily result in the home office giving rise to a fixed place of business PE. A further examination of the facts and circumstances will be required to determine whether the home office is now at the disposal of the enterprise following this permanent change to the individual's working arrangements.

18.Paragraphs 18 and 19 of the Commentary on Article 5 of the OECD Model<sup>71</sup> indicate that whether the individual is required by the enterprise to work from home or not is an important factor in this determination. Paragraph 18 explains that where a home office is used on a continuous basis for carrying on business activities for an enterprise and it is clear from the facts and circumstances that the enterprise has required the individual to use that location (e.g. by not providing an office to an employee in circumstances where the nature of the employment clearly requires an office), the home office may be considered to be at the disposal of the enterprise. As an example, paragraph 19 notes that where a cross-border worker performs most of their work from their home situated in one jurisdiction rather than from the office made available to them in the other jurisdiction, one should not consider that the home is at the disposal of the enterprise because the enterprise did not require that the home be used for its business activities.

---

71 See 101.6.1 (Home office).

19. In conclusion, individuals teleworking from home (i.e. the home office) as a public health measure imposed or recommended by at least one of the governments of the jurisdictions involved to prevent the spread of the COVID-19 virus would not create a fixed place of business PE for the business/employer. Agency PE

### 101.27.3 *Agency PE*

OECD Covid guidance provides:

20. The question may also arise whether the activities of an individual temporarily working from home for a non-resident employer could give rise to a dependent agent PE. Under Article 5(5) of the OECD Model, the activities of a dependent agent such as an employee will create a PE for an enterprise if the employee habitually concludes contracts on behalf of the enterprise. Thus, in order to apply Article 5(5) in these circumstances, it will be important to evaluate whether the employee performs these activities in a “habitual” way.

21. An employee’s or agent’s activity in a jurisdiction is unlikely to be regarded as habitual if they are only working at home in that jurisdiction because of an extraordinary event or public health measures imposed or recommended by government. Paragraph 6 of the 2014 Commentary on Article 5 explains that a PE should be considered to exist only where the relevant activities have a certain degree of permanency and are not purely temporary or transitory. Paragraph 33.1 of the Commentary on Article 5 of the 2014 OECD Model provides that the requirement that an agent must “habitually” exercise an authority to conclude contracts means that the presence which an enterprise maintains in a jurisdiction should be more than merely transitory if the enterprise is to be regarded as maintaining a PE, and thus a taxable presence, in that jurisdiction. Similarly, paragraph 98 of the 2017 OECD Commentary on Article 5 explains that the presence which an enterprise maintains in a jurisdiction should be more than merely transitory if the enterprise is to be regarded as maintaining a PE in that jurisdiction under Article 5(5).

22. A different approach may be appropriate, however, if the employee was habitually concluding contracts on behalf of enterprise in their home jurisdiction before the COVID-19 pandemic.

23. Likewise, if the employee continues to work from home for a non-resident employer after the COVID-19 pandemic, on a habitual basis and continues to conclude contracts on behalf of the enterprise, it would be more likely that the employee would be considered to

habitually conclude contracts on behalf of the enterprise. As noted in paragraph 98 of the Commentary on Article 5 of the OECD Model, the extent and frequency of activity necessary to treat an agent as acting “habitually” depends on the nature of the contracts and the business of the enterprise. In that respect, the same sort of factors considered in paragraphs 28 to 30 of the Commentary on Article 5 of the OECD Model would be relevant. For example, those paragraphs, among other things, note that whilst the practices followed by member countries have not been consistent in so far as time requirements are concerned, experience has shown that PEs normally have not been considered to exist in situations where a business had been carried on in a country through a place of business that was maintained for less than six months (conversely, practice shows that there were many cases where a PE has been considered to exist where the place of business was maintained for a period longer than six months).

24. In conclusion, the agent’s activity in a jurisdiction should not be regarded as “habitual” if they have exceptionally begun working at home in that jurisdiction as a public health measure imposed or recommended by at least one of the governments of the jurisdictions involved to prevent the spread of the COVID-19 virus and, therefore, would not constitute a dependent agent PE provided the person does not continue those activities after the public health measures cease to apply.

#### 101.27.4 *HMRC view*

HMRC sing from the same songsheet:

#### **INTM261010 HMRC Approach to UK Permanent Establishments in response to COVID-19 Pandemic [May 2020]**

##### **Background**

The COVID-19 pandemic has resulted in significant disruption to international travel and business operations, including the locations of directors, employees and other individuals.

HMRC is very sympathetic to the disruption that is being endured.

We have been asked about HMRC’s response to the permanent establishment challenges posed by COVID-19. The presence of individuals in the UK as a consequence of COVID-19 raises questions about whether foreign companies could establish a taxable permanent establishment for UK corporation tax purposes

##### **Overview**

HMRC considers that the existing legislation and guidance in relation

to permanent establishments, already provides flexibility to deal with changes in business activities necessitated by the response to the COVID-19 pandemic.

We do not consider that a non-resident company will automatically have a taxable presence by way of permanent establishment after a short period of time. Similarly, whilst the habitual conclusion of contracts in the UK would also create a taxable presence in the UK, it is a matter of fact and degree as to whether that habitual condition is met. Furthermore, the existence of a UK PE does not in itself mean that a significant element of the profits of the non-resident company would be taxable in the UK...

### **UK Permanent Establishments**

With regard to Permanent Establishments (PEs), we consider that the current legislation, treaties and related guidance provides sufficient flexibility with regard to whether a PE has been created in the UK. In particular, s1141(1) CTA 2010 requires either that a business is carried on through a fixed place of business in the UK, or that an agent acting on behalf of the company has and habitually exercises authority to carry out the company's business in the UK.

As INTM264430 makes clear, HMRC considers that a non-resident company will not have a UK fixed place of business PE after a short period of time as a degree of permanence is required. Similarly, whilst the habitual conclusion of contracts in the UK would also create a Dependant Agent PE in the UK, it is a matter of fact and degree as to whether that habitual condition is met. Furthermore, the existence of a UK PE does not in itself mean that a significant element of the profits of the non-resident company would be taxable in the UK. The attribution of profits to a UK PE would depend on the level of activity in the UK, and the relative value of that activity, in accordance with the guidance at INTM26700 onwards.

RDR Manual provides:

**RDRM13410 Annex D: International tax clarifications due to coronavirus (COVID 19) - Q&A [Aug 2020]**

#### **Company residence**

**12. Have HMRC considered the situation where people are working in a country they are not usually in and their company changing residence as a result of place of central management and control?**

HMRC does not believe such travel restrictions will necessarily result in a change of a company's tax residence, or cause there to be a UK

permanent establishment and has published guidance in INTM120185 and INTM261010. HMRC believes the guidance is consistent with the Analysis of Tax Treaties and the Impact of the COVID-19 pandemic guidance published by the OECD Secretariat on 3 April 2020.

## CHAPTER ONE HUNDRED AND TWO

# POST-BREXIT EU LAW

102.1

102.1.2 UK-EU Trade and Co-operation  
Agreement 2020

### *Cross references*

The following topics are considered elsewhere:

11.9 (EU restriction on exit taxes)

45.17 (EU-law ToA defences)

56.18 (Section 86: EU-law compliance)

## **102.1 Brexit**

It will not have escaped the attention of the reader that the UK left the EU on 31 January 2020.<sup>1</sup>

### 102.1.1 *EU/UK Withdrawal Agreement*

This was 537 pages long. We may take the EC summary:

When the UK leaves the European Union on 31 January 2020, after full ratification of the Withdrawal Agreement, we will enter into the transition period. This time-limited period was agreed as part of the Withdrawal Agreement and will last until ... 31 December 2020. Until then, it will be business as usual for citizens, consumers, businesses, investors, students and researchers in both the EU and the UK. The UK will no longer be represented in the EU institutions, agencies, bodies and offices but EU law will still apply in the UK until the end of the transition period.

#### **What is the transition period?**

The transition period is a time-limited period, starting on 1 February

---

<sup>1</sup> Though in case it had been missed, the message was found on every page of [www.gov.uk](http://www.gov.uk) (subsequently replaced by a strapline on Covid).

2020. The exact terms of the transition period are set out in Part Four of the Withdrawal Agreement. It is currently foreseen that the transition period ends on 31 December 2020...

**What status will the UK have during the transition period?**

The UK will no longer be a Member State of the European Union and of the European Atomic Energy Community as of 1 February 2020. As a third country, it will no longer participate in the EU's decision-making processes. In particular:

- It will no longer participate in the EU institutions (such as the European Parliament and the Council), EU agencies, offices or other bodies.

However, all institutions, bodies, offices and agencies of the European Union continue to hold the powers conferred upon them by EU law in relation to the UK and to natural and legal persons residing or established in the UK throughout the transition period.

The Court of Justice of the European Union continues to have jurisdiction over the UK during the transition period. This also applies to the interpretation and implementation of the Withdrawal Agreement...

**What obligations will the UK have during the transition period?**

All EU law, across all policy areas, will still be applicable to and in the UK, with the exception of provisions of the Treaties and acts, which were not binding upon and in the UK before the entry into force of the Withdrawal Agreement. The same is true for acts amending such acts.

In particular, the UK will:

- remain in the EU Customs Union and in the Single Market with all four freedoms, and all EU policies applying;
- continue to apply the EU's Justice and Home Affairs policy: The UK may choose to exercise its right to opt-in/opt-out with regard to measures amending, replacing or building upon those EU acts the UK was bound to during its membership;
- be subject to the EU's enforcement mechanisms, such as infringement procedures;
- have to respect all international agreements the EU has signed, and will not be able to apply new agreements in areas of EU exclusive competence, unless authorised to do so by the EU...

**I. What is included in the Common Provisions of the Withdrawal Agreement?**

This part sets out the necessary clauses to ensure the correct understanding, operation and interpretation of the Withdrawal Agreement. It provides the basis for the correct application of the

Agreement. From the outset of the negotiations, the EU has attached great importance to the fact that the provisions of the Withdrawal Agreement must clearly have the same legal effects in the UK as in the EU and its Member States.

The Agreement explicitly includes such a requirement, meaning that both Parties should ensure, in their respective legal orders, primacy and direct effect, as well as consistent interpretation with the case law of the Court of Justice of the European Union (CJEU) handed down until the end of the transition. Direct effect is mentioned explicitly with reference to all provisions of the Withdrawal Agreement, which meet the conditions of direct effect under Union law. This basically means that concerned parties can invoke the Withdrawal Agreement directly before national courts both in the UK, as well as in the EU Member States.

It is also mandatory for the purposes of interpreting the Agreement to use the methods and general principles of interpretation applicable within the EU. This covers, for instance, the obligation to interpret the concepts or provisions of Union law referred to in the Withdrawal Agreement in a manner consistent with the Charter of Fundamental Rights.

Furthermore, UK courts must abide by the principle of consistent interpretation with the CJEU case law handed down until the end of the transition period and pay due regard to CJEU case law handed down after that date.

The Agreement specifically requires the UK to ensure compliance with the above through primary domestic legislation, specifically empowering UK judicial and administrative authorities to disapply inconsistent or incompatible national law.

This section also makes clear that references to Union law in the Withdrawal Agreement shall be understood as including amendments made until the last day of the transition period. Few exceptions are foreseen, notably for specific financial settlement provisions, to avoid imposing additional obligations on the UK, and for the transition period, during which Union law will continue to apply dynamically to and in the UK. They shall be understood also as including the acts supplementing or implementing referenced provisions.<sup>2</sup>

---

2 EC, “Questions and Answers on the UK's withdrawal from the European Union” (Jan 2020)

[https://ec.europa.eu/commission/presscorner/detail/en/qanda\\_20\\_104?\\_cldee=Ym1jaW50b3NoQHRheGFkdmlzZXJzZXVyb3BlLm9yZw%3D%3D&recipientid=le](https://ec.europa.eu/commission/presscorner/detail/en/qanda_20_104?_cldee=Ym1jaW50b3NoQHRheGFkdmlzZXJzZXVyb3BlLm9yZw%3D%3D&recipientid=le)

Although the EU will treat the UK as remaining part of the EU during the transition period, a third country is not bound to do the same. For example, references to EU members in US DTAs may not include the UK.

### 102.1.2 *UK-EU Trade and Co-operation Agreement 2020*

This agreement (“TCA 2020”) is 1246 pages long. Again we take the EC summary:<sup>3</sup>

On Christmas Eve 2020, the UK and the EU negotiators reached political agreement on the text of the UK-EU Trade and Co-operation Agreement (TCA). This agreement, which provides for tariff and quota free trade in goods and for co-operation in a number of fields including internal security but does not cover effectively most trade in services nor co-operation in foreign policy and defence, entered into force on 1 January 2021.

In the UK, Parliament passed the European Union (Future Relationship) Act 2020 in one day on 30 December 2020 but further legislation (much of it in the form of delegated legislation that Parliament cannot amend) will be needed to implement many of the details. In the EU, the agreement has been given provisional application from 1 January 2021 while the ratification process, which requires the consent of the European Parliament, is completed.

The TCA left many aspects of the UK-EU relationship unresolved and further negotiations will be needed in areas such as financial services regulation...

### 102.1.3 *Summary*

In *Finucane*:<sup>4</sup>

- Any EU law rights which were recognised and available before withdrawal continue to be recognised and available thereafter (European Union (Withdrawal) Act 2018, section 4);
- The principle of supremacy of EU law continues to apply to any

4 [2021] CSOH 38 at [6].

- enactment passed before the completion date (*ibid*, section 5(2)):
- The Charter of Fundamental Rights is no longer part of domestic law (*ibid*, section 5(4)), but can still be relied upon in these proceedings because they were commenced but not finally decided before the completion date (*ibid*, schedule 8, paragraph 39(3)):
  - A general principle of EU law (such as, in the context of these proceedings, the principle of fiscal legality) is part of domestic law on or after the completion date only if it was recognised as a general principle of EU law by the European Court in a case decided before the completion date (whether or not as an essential part of the decision in the case) (*ibid*, schedule 1, paragraph 2):
  - Any question as to the meaning or effect of any retained EU law is to be decided, so far as that law is unmodified on or after the completion date in accordance with retained case law and retained general principles of EU law (*ibid*, section 6(3)).

## 102.2 EU law and UK taxation

EU law affects taxation in the following ways.

- (1) Domestic tax law must comply with EU law, in particular:
  - (a) The four freedoms: free movement of goods and workers, establishment and capital.
  - (b) State aid rules prohibit tax and practices that harm cross-border competition.
- (2) There are a number of directives in the field of direct taxation:
  - (a) The parent-subsidiary directive<sup>5</sup>
  - (b) The interest and royalty directive<sup>6</sup>
  - (c) The merger directive<sup>7</sup>

---

5 Council Directive 2011/96/EU of 30 November 2011 on the common system of taxation applicable in the case of parent companies and subsidiaries of different Member States.

6 Council Directive 2003/49/EC of 3 June 2003 on a common system of taxation applicable to interest and royalty payments made between associated companies of different Member States.

7 Council Directive 2009/133/EC of 19 October 2009 on the common system of taxation applicable to mergers, divisions, partial divisions, transfers of assets and exchanges of shares concerning companies of different Member States and to the transfer of the registered office of an SE or SCE between Member States.

- (d) The administrative cooperation directive<sup>8</sup>
- (e) The recovery directive<sup>9</sup>
- (f) The anti-tax avoidance directive<sup>10</sup>
- (3) VAT is an EU tax, largely governed by the VAT directive.
- (4) The Arbitration Convention, concerning transfer pricing disputes<sup>11</sup>

This chapter concentrates on freedoms of establishment and movement of capital, which are the most relevant to the themes of this book. I do not discuss points (2) - (4).

There are two aspects to our topic:

- (1) Ascertaining the EU law. As the issues are EU wide, we benefit in the UK from the work of scholars across the EU.<sup>12</sup>
- (2) Whether any particular rule of UK tax law is EU-law compliant. This is a mixed EU law/UK domestic law exercise.

This chapter considers the first aspect: EU law as a topic in itself. I have generally preferred to deal with the second aspect, EU-law compliance of UK domestic law, as it arises in the context of other topics.

A full discussion would need many volumes.<sup>13</sup> This chapter focuses on matters closest to the themes of this work, but I begin with some general comments which the more impatient reader may wish to skip.

### 102.3 EU-law terminology

Judgments and other sources of EU law are usually translated into English or composed by non-native English speakers; the prose is a little leaden, and often unidiomatic. Usage is consistent (which is of course a good thing) and EU law has acquired a standard vocabulary, sometimes a

---

8 Council Directive 2011/16/EU of 15 February 2011 on administrative cooperation in the field of taxation and repealing Directive 77/799/EEC.

9 Council Directive 2010/24/EU of 16 March 2010 concerning mutual assistance for the recovery of claims relating to taxes, duties and other measures.

10 Council Directive (EU) 2016/1164 of 12 July 2016 laying down rules against tax avoidance practices that directly affect the functioning of the internal market.

11 The full title is: 90/436/EEC: Convention on the elimination of double taxation in connection with the adjustment of profits of associated enterprises.

12 See for instance Terra & Wattel, *European Tax Law* (6th ed., 2012).

13 For a starting point, Schön, "Neutrality and Territoriality – Competing or Converging Concepts in European Tax Law?" 69 Bull. Intl. Taxn. 4/5 (2015).

technical (specialist) vocabulary, and is virtually a sub-dialect of legal English.<sup>14</sup> One might refer to that as Eurlish, or (more pejoratively) Eurojargon; I refer to this usage as “**standard (or technical) EU-law terminology**”. It is not possible to analyse EU law without adopting this terminology.<sup>15</sup>

There are occasional errors of translation, though the border between technical usage and erroneous usage can be imponderable. EU-law terminology becomes second nature to those immersed in it, and it is then difficult to step back and notice how the usage has become detached from ordinary English.

The terminology used to describe European treaties and institutions can also be confusing. I follow the guidance in “The European Union: a guide to terminology, procedures and sources”.<sup>16</sup>

I discuss the following EU-law terms elsewhere:

Abuse/avoidance/evasion: 102.15.2 (Abuse/avoidance/evasion: Terminology)

Definite influence: 102.9.3 (“Definite influence”)

Direct investment: 102.13.2 (Direct investment)

Limited/unlimited tax liability: 102.16.3 (Counteract non-residence tax advantage)

Nomenclature: 102.12.1 (“Movement of capital”)

Objectively comparable/different: 102.15.8 (“Objectively comparable”); 102.17.2 (Comparable situations v different situations)

Teleological: 102.6 (EU case law)

Third countries: 102.12 (Free movement of capital).

## 102.4 The EU Treaties

---

14 Monoglot English readers should not carp. French was used by English lawyers until the Proceedings in Courts of Justice Act 1730, but by 1592 the pronunciation was impossible for a Frenchman to understand, and “even Englishmen were sometimes shocked by the barbarity of inns of court French”; see Baker, “The Three Languages of the Common Law” (1998) 43 McGill LJ 5.

<http://www.lawjournal.mcgill.ca/userfiles/other/5850855-43.Baker.pdf>

15 Reading in translation, said Bialek, is like kissing through a veil.

16 House of Commons Library Standard Note SN/IA/3689. See

<http://www.parliament.uk/briefing-papers/sn03689.pdf>

<http://researchbriefings.parliament.uk/ResearchBriefing/Summary/SN03689>

Under the Lisbon Treaty (2009), the Treaty Establishing the European Community is named: *Treaty on the Functioning of the European Union* (TFEU). Paragraph numbering changed following the Treaty of Amsterdam (1999) and again after the Treaty of Lisbon. It may be helpful to set out the former and present numbers of the articles discussed here:<sup>17</sup>

Subject	EEC treaty Rome	EC treaty Amsterdam	TFEU Lisbon	EEA
Freedom of establishment	52	43	49	31
– public policy exception	55	45	51	32
– for companies	58	48	54	34
Free movement of capital	73b	56	63	40
– standstill	73c	57	64	41
– justification	73d	58	65	42

#### 102.4.1 EEA agreement

A full discussion of the differences between the EEA (European Economic Area) and the EU needs a book to itself. The issue has gained salience in Brexit politics

In outline: the EEA agreement applies in EEA states (Iceland, Liechtenstein and Norway). It includes the four freedoms (goods, persons, services and capital), equal conditions of competition and non-discrimination. However, secondary EU legislation does not apply in the EEA states. The charter of fundamental rights does not apply. Circumstances external to the EEA agreement, such as the absence of an information exchange agreement, may lead to different outcomes.<sup>18</sup>

Legal disputes go to the European Free Trade Association Court, currently with three judges, from Norway, Iceland and Liechtenstein.

In the interests of brevity, and comprehensibility, references in this chapter to TFEU generally include the EEA agreement; and references to a member state (MS) include EEA states.

---

17 For a table comparing all 3 numberings see  
<https://global.oup.com/uk/orc/law/eu/hartley8e/resources/table/>  
 For the evolution of the EU treaties and their texts see  
[https://europa.eu/european-union/law/treaties\\_en](https://europa.eu/european-union/law/treaties_en)

18 For an example, see 102.16.2 (Prevent misdeclaration/fraudulent evasion).

EU case law is relevant in the EEA and vice versa. In *EC v UK*, the s.3 TCGA case, the court said:

... in so far as the provisions of Article 40 of the EEA Agreement [FMC] have the same legal scope as the substantially identical provisions of Article 63 TFEU all the foregoing considerations may... be transposed *mutatis mutandis* to Article 40 of the EEA Agreement.<sup>19</sup>

### 102.5 EU/UK law relationship

The primacy of EU law over UK domestic law remains as long as the UK is a member of the EU. It is grounded in UK domestic law. *Thoburn v Sunderland City Council* (the Metric Martyrs case) states the fundamental proposition:

All the specific rights and obligations which EU law creates are by the 1972 Act<sup>20</sup> incorporated into our domestic law and rank supreme: that is, anything in our substantive law inconsistent with any of these rights and obligations is abrogated or must be modified to avoid the inconsistency. This is true even where the inconsistent municipal provision is contained in primary legislation.<sup>21</sup>

Similarly:

[24] ...it is a fundamental principle of the law of the EU, recognised in s 2(1) of the European Communities Act 1972, that if national legislation infringes directly enforceable Community rights, the national

---

19 Case C-112/2014 [2015] STC 591 at [30].

20 The reference is to s.2(1) European Communities Act 1972 which provides:

“All such rights, powers, liabilities, obligations and restrictions from time to time created or arising by or under the Treaties, and all such remedies and procedures from time to time provided for by or under the Treaties, as in accordance with the Treaties are without further enactment to be given legal effect or used in the UK shall be recognised and available in law, and be enforced, allowed and followed accordingly.”

21 [2003] QB 151 at [69] approved *HS2 Action Alliance) (R, oao) v Secretary of State* [2014] 1 WLR 324 at [208]. The rule is now codified in s.18 European Union Act 2011:

“Directly applicable or directly effective EU law (that is, the rights, powers, liabilities, obligations, restrictions, remedies and procedures referred to in section 2(1) of the European Communities Act 1972) falls to be recognised and available in law in the UK only by virtue of that Act or where it is required to be recognised and available in law by virtue of any other Act.”

But that is merely declaratory of the existing position.

court is obliged to disapply the offending provision. The provision is not made void but it must be treated as being ... without prejudice to the directly enforceable Community rights of nationals of any member state of the EEC.

[25] Disapplication is called for only if there is an inconsistency between national law and EU law. In an attempt to avoid an inconsistency the national court will, if at all possible, interpret the national legislation so as to make it conform to the superior order of EU law ... Sometimes, however, a conforming construction is not possible, and disapplication cannot be avoided.<sup>22</sup>

I am not sure if there is any practical difference between a “conforming” interpretation and a disapplication, and in any case the one shades into the other.

#### 102.5.1 UK tax law and EU law

Settled case law provides:

... although direct taxation falls within the competence of the Member States, the latter must none the less exercise that competence consistently with Community law.<sup>23</sup>

It follows that there is a “tension, if not an inconsistency between national jurisdiction over direct taxation and ... Treaty freedoms, once those freedoms are interpreted as prohibiting unjustified differential tax treatment of national and foreign EU companies.”<sup>24</sup>

This topic raises important questions about the border between EU integration and member state autonomy. In 2001, the EC said:

Progress in agreeing proposals for Directives in the tax field has always been slow, because of the unanimity voting requirement in the tax

---

22 *Fleming (trading as Bodycraft) v HMRC* [2008] STC 324.

23 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439 at [15].

24 *Thin Cap Claimants v HMRC* [2011] STC 738 at [7]. The attorney-general put the point more positively in *Établissements Rimbaud SA v Directeur general des impôts* [2010] STC 2757 at [64]:

“... it does not seem to me to be an exaggeration to refer to the emergence of co-operation akin to solidarity in the field of taxation, which, although far from exhaustive, constitutes a single and developing framework.”

field.<sup>25</sup> With enlargement it will be even more difficult to reach agreement on tax matters. Therefore the Commission suggests that, to implement its new strategy, a range of mechanisms in addition to Community legislation should be utilised. In particular, the Commission intends to be more pro-active and targeted in initiating legal action where it believes that Member States' tax measures infringe Community law. It will also consider making an increased use of non-legislative approaches such as recommendations.<sup>26</sup>

This is the political background to the tsunami of EU tax case law from 2001.

## 102.6 EU case law

EU case law (decisions of the CJEU and its predecessor, the ECJ) is unlike case law in common law jurisdictions such as the UK.<sup>27</sup>

CJEU gives one short, single judgment. Those who find these judgments sometimes difficult to follow may take comfort from Lord Neuberger:

One only has to look at some of the Judgments of the CJEU in Luxembourg to see how compulsory unanimity can result in decisions which (i) are incomprehensible, (ii) have internally inconsistent reasoning, (iii) do not answer the issue that has been referred, or (iv) manage to enjoy all these three regrettable characteristics. And in these Euro-sensitive times, let me add that there are also some very good judgments emanating from Luxembourg ...<sup>28</sup>

EU judgments contain a series of short, broad propositions, mostly repeated verbatim from earlier cases. Once repeated often enough, the propositions are described as “**settled case law**”. It is best to quote this

---

25 Author's footnote: see TFEU art. 114(2), 115, the second subparagraph of art. 173(3), point (a) of the first subparagraph of art. 192(2) and art. 194(3).

26 “Taxation: Commission outlines its priorities” IP/01/737 (2001)

27 In this respect Scotland is like a common law jurisdiction.

28 Neuberger, BAILII Lecture “No Judgment – No Justice” (2012)

<http://www.supremecourt.uk/docs/speech-121120.pdf>

Speaking judicially, Lord Neuberger toned this down to “characteristically sparse reasoning”: *ClientEarth (R, oao) v Secretary of State for the Environment, Food and Rural Affairs* [2015] UKSC 28 at [10].

HMRC make the same point in ToA draft guidance INTM603140:

“... Its judgments are ... often hard for those familiar with UK law to follow, as they are collegiate and sparingly argued.”

verbatim. These propositions are supported by citing a list of precedents which are not themselves discussed. The selection of case(s) cited as authority for these propositions is somewhat arbitrary; one cannot cite them all. I omit these references in the quotes in this chapter.

The language of the TFEU is different from UK statutory drafting. It states broad principles in vague evaluative terms which permits - indeed which requires - CJEU to develop its own principles. There is little consideration of the precise words of the TFEU. Decisions are based on policy considerations to a greater extent than is the case, or at least than is expressed to be the case, in common law. CJEU puts it this way:

According to settled case-law of the Court, in the interpretation of a provision of EU law, account must be taken not only of its wording but also of the context in which it occurs and the objectives pursued by the rules of which it forms part, and if appropriate of the origins of those rules.<sup>29</sup>

In other words:

... the Court adopted teleological<sup>30</sup> methods of interpretation. These methods are much closer to those of constitutional courts than to those of international tribunals. ... the judges frequently drew inspiration from the ultimate objective of integration, outlined in broad terms in the preamble of the Treaty. ... The idea is to link each provision of EU law to the normative goals of integration, giving to these provisions the coherence of a complete system of law. Basically, all the interpretative work of the Court was to create a “European teleology” which protects EU law against the dangers of dissolution within the various national legal orders. In constitutionalising EU law, the Court was seeking to protect EU standards from the national legal constraints, the risks of political negotiations, and all the bureaucratic complexities that EU texts are likely to encounter when they enter the national arena. This case law greatly strengthened the authority of EU law, while at the same time giving the EU judge an absolute control of this new legal order.<sup>31</sup>

This is tempered with an element of political realism:

---

29 *Drukarnia Multipress sp. z o.o. v Minister Finansow* C-357/13 para 22.

30 Author’s footnote: “teleological” is the standard EU-law term for “purposive”.

31 Jones, Menon and Weatherill (eds), *The Oxford Handbook of the European Union* (1<sup>st</sup> ed, 2012), para 25.2 (Constitutionalization of the Treaties).

Turning to national governments, it has been suggested that their overall acceptance of the European Court's jurisprudence could be viewed as a clue that judicial behaviour was perhaps more concerned with political interests than it might seem at first sight. On this realist reading, because courts are concerned about the prospect of non-compliance or possible hostile reactions, they tend to calculate how far they can go without eliciting too costly a reaction from politicians. ... But there is no shortage of evidence that it is at times willing to challenge the dominant view among governments. Its landmark rulings in *Van Gend and Loos*<sup>32</sup> and *Costa v ENEL*<sup>33</sup> were taken despite the declared opposition of a majority of states...<sup>34</sup>

The size of the case law is also a problem:

It is all but impossible in practice to keep track of all potential precedents, certainly where the corpus of decided cases numbers in the hundreds and thousands and time and other resources are limited. Unannounced shifts happen frequently, not only because a more open approach might be considered unpalatable, but simply because of the near infinite possibility of linking and contrasting different points discussed in different cases.... tracing all potential leads is a Sisyphean errand that is hostage to particular views on substantive EU law and systematicity.<sup>35</sup>

The EC maintain useful updated lists of:

- EU cases relating to direct taxation<sup>36</sup>

---

32 Author's footnote: *van Gend en Loos NV v Nederlandse Belastingadministratie* C-26/62 [1963] ECR 1 (direct effect of EU law in Member States).

33 Author's footnote; C-6/64 [1964] ECR 585 (EU law overrides Member States domestic law).

34 In 1964, the EU comprised of Belgium, France, Italy, Luxembourg, the Netherlands and West Germany. Three governments, representing Germany, Belgium, and the Netherlands, all rejected the notion of direct effect of article 12- therefore half of the states opposed this (rather than a "majority of states")

35 Jacob, *Precedents and Case-based Reasoning in the ECJ* (1<sup>st</sup> ed, 2014) p.91.

36 [https://ec.europa.eu/taxation\\_customs/sites/taxation/files/20171116\\_court\\_cases\\_direct\\_taxation\\_en.pdf](https://ec.europa.eu/taxation_customs/sites/taxation/files/20171116_court_cases_direct_taxation_en.pdf)

- Infringement cases by country<sup>37</sup> and by policy area<sup>38</sup>

New case law is constantly arriving, and this chapter needs review from year to year.

An appeal to CJEU is a significant undertaking, but as an alternative to pursuing points directly, a taxpayer may complain to the EC, leaving the Commission to take up the issue.<sup>39</sup>

## 102.7 The treaty freedoms

Article 26 TFEU provides:

1. The Union shall adopt measures with the aim of establishing or ensuring the functioning of the internal market, in accordance with the relevant provisions of the Treaties.
2. The internal market shall comprise an area without internal frontiers in which the free movement of
  - [a] goods,
  - [b] persons,
  - [c] services and
  - [d] capital
 is ensured in accordance with the provisions of the Treaties.

The basic treaty provisions which facilitate the single market are the free movement of goods, persons, services and capital. They are known as the four freedoms. The freedoms which most concern this chapter are freedom of establishment (FoE) and free movement of capital (FMC).

Tax textbooks (including this one) naturally focus on case law relation to taxation. But that is a myopic approach, like trying to write a primer of UK partnership law based on tax cases. One ought to consider FoE and FMC as discrete topics, in which non-tax cases are as significant (if not more) than tax cases. But that is much easier said than done.

### 102.7.1 Which freedom

---

37 [http://ec.europa.eu/taxation\\_customs/common/infringements/infringement\\_cases/bycountry/index\\_en.htm](http://ec.europa.eu/taxation_customs/common/infringements/infringement_cases/bycountry/index_en.htm)

38 [http://ec.europa.eu/taxation\\_customs/common/infringements/infringement\\_cases/bypolicy/index\\_en.htm](http://ec.europa.eu/taxation_customs/common/infringements/infringement_cases/bypolicy/index_en.htm)

39 For the procedure, see COM(2012) 154 final

<http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2012:0154:FIN:EN:PDF>

A case could generally be brought under more than one freedom, but settled case law provides that CJEU picks the primary freedom, if there is one, and ignores the others. For instance, in *Geurts* (a FoE case) the court dismissed arguments based on free movement of capital:

The legislation at issue in the main proceedings primarily affects freedom of establishment and falls, in accordance with the case-law of the Court, within the scope only of the Treaty provisions concerning that freedom. If, as submitted by the applicants in the main proceedings, it were to be accepted that such a national measure has restrictive effects on the free movement of capital, such effects would have to be seen as an unavoidable consequence of any restriction on freedom of establishment and do not justify an independent examination of that measure in the light of Articles 56 EC to 58 EC [FMC].<sup>40</sup>

Similarly, in *Cadbury Schweppes* (a FoE case) the Advocate-General dismissed arguments based on freedom to provide services:

34 The applicants submit that the provisions of the Treaty on freedom to provide services also apply in this case. They claim that the legislation at issue makes the supply of financial services by [the CFCs] to their UK resident parent company more difficult. ...

36. Admittedly, if the legislation at issue has the result that a resident company is dissuaded from establishing a subsidiary in another Member State, it also has the result that the supply of services by such a subsidiary out of that Member State is prevented. However, that latter restriction is a consequence of the hindrance to establishment. In the present case, it is exactly the freedom to establish a subsidiary in that Member State which is at the core of the proceedings. I do not therefore see the relevance of reliance on the rules on freedom to provide services as well.<sup>41</sup>

This approach has the attraction of shortening the argument, as it is only necessary to consider the primary freedom; but only if it is clear which is the primary freedom. It may be necessary to consider both freedoms:

... that section may affect both freedom of establishment and free movement of capital... Accordingly, that section could be examined,

---

40 *Geurts v Administratie van de BTW* Case C-464/05 at [16].

41 *Cadbury Schweppes v IRC* [2006] STC 1908.

first, in the light of Article 49 TFEU [FoE] and, secondly, in the light of Article 63 TFEU [FMC].<sup>42</sup>

### 102.7.2 *FoE or FMC: Does it matter*

It will generally make no difference which freedom is said to apply. The defences to different freedoms are differently worded, but being so policy based, they generally come to the same. In *Asscher*<sup>43</sup> after discussing whether the case should be categorised as FoE or FMC, the ECJ said:

29. ... a comparison of arts 48 and 52<sup>44</sup> of the Treaty shows that they are based on the same principles both as regards entry into and residence in the territory of the member states by persons covered by Community law and as regards the prohibition of all discrimination against them on grounds of nationality. The same applies to the pursuit of an economic activity in the territory of the member states by persons covered by Community law.

Similarly the Advocate-General in *Cadbury Schweppes*:

In any event, I do not believe that examination of the legislation at issue in the light of [freedom to provide services], in addition to freedom of establishment, can change the result of my analysis.<sup>45</sup>

One important difference is that FoE applies only to Member States, but FMC extends to third countries.<sup>46</sup>

## 102.8 Freedom of establishment

Article 49 TFEU provides:

[1] Within the framework of the provisions set out below, restrictions on the freedom of establishment of nationals of a Member State in the territory of another Member State shall be prohibited.

Article 49 contains two prohibitions:

- (1) A MS cannot restrict nationals of another MS (foreign nationals) from establishment (ie setting up an establishment) in the MS.

---

42 *EC v UK* Case C-112/14 [2015] STC 591 at [6].

43 *Asscher v Staatssecretaris van Financiën* [1996] STC 1025.

44 Now Articles 49 to 53 and 63 to 65 TFEU

45 *Cadbury Schweppes v IRC* [2006] STC 1908 at [36].

46 See 102.13 (Movement of capital to third countries).

FD\_102\_Post-Brexit\_EU\_Law.wpd

- (2) A MS cannot restrict its *own* nationals from establishment in another MS (a foreign MS).

The second is the more important in a tax context.

### 102.8.1 *Objective of FoE*

In *Cadbury Schweppes*<sup>47</sup> the ECJ say:

53. That objective<sup>48</sup> [of FoE] is to allow a national of a member state to set up a secondary establishment in another member state to carry on his activities there and thus assist economic and social interpenetration within the Community in the sphere of activities as self-employed persons... To that end, freedom of establishment is intended to allow a Community national to participate, on a stable and continuing basis, in the economic life of a member state other than his state of origin and to profit therefrom.

## 102.9 “Establishment”

Article 49 TFEU continues:

[2] Such prohibition shall also apply to restrictions on the setting-up of agencies, branches or subsidiaries by nationals of any Member State established in the territory of any Member State.

[3] Freedom of establishment shall include

[a] the right to take up and pursue activities as self-employed persons and

[b] to set up and manage undertakings, in particular companies or firms within the meaning of the second paragraph of Article 54,<sup>49</sup>

under the conditions laid down for its own nationals by the law of the country where such establishment is effected, subject to the provisions of the chapter relating to capital.

In *Cadbury Schweppes*<sup>50</sup> the ECJ say:

54. ... the concept of establishment within the meaning of the Treaty provisions on freedom of establishment involves the actual pursuit of an

---

47 *Cadbury Schweppes v IRC* [2006] STC 1908.

48 Author’s footnote: “Objective” is the standard EU-law term for “purpose”.

49 For the text of art 54(2) see 102.11 (Who is entitled to freedom of establishment).

50 *Cadbury Schweppes v IRC* [2006] STC 1908.

economic activity through a fixed establishment in that state for an indefinite period ... Consequently, it presupposes actual establishment of the company concerned in the host member state and the pursuit of genuine economic activity there.

In *Olsen*<sup>51</sup> the EFTA Court referred to the objective of FoE<sup>52</sup> and continued:

95 Having regard to that objective of integration, the right of establishment covers all measures which permit or even merely facilitate access to other EEA States and the pursuit of an economic activity in those States by allowing the persons concerned to participate in the economic life of the country effectively and under the same conditions as national operators...

96 Accordingly, the concept of establishment under Articles 31 and 34 EEA [FoE] has a specific EEA meaning and must not be interpreted narrowly.

### 102.9.1 *Passive investment*

Passive investment is not an establishment. In *Stauffer*<sup>53</sup> an Italian charity received rent from an investment property in Germany. German law allowed charity tax exemption only for a charity established in Germany. Accordingly the German Revenue sought to impose German tax on the rental income.

The ECJ held that the charity had no establishment in Germany:

19 ... in order for the provisions relating to freedom of establishment to apply, it is generally necessary to have secured a permanent presence in the host Member State and, where immovable property is purchased and held, that property should be actively managed. ... the foundation [the Italian charity] does not have any premises in Germany for the purposes of pursuing its activities and that the services ancillary to the letting of the property are provided by a German property management agent.

20. It must therefore be concluded that the provisions governing freedom of establishment are not applicable ....

---

51 *Olsen v Norwegian State* Case E-3/13.

52 See 102.8.1 (Objective of FoE).

53 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439.

The charity did not carry out any charitable work in Germany and did not actively manage its German investment property. The German investment property was not a branch or undertaking. The charity did not have or seek to have an “establishment” in Germany so there was no restriction on the freedom to establish itself in Germany.<sup>54</sup>

Suppose the charity had had an establishment in Germany – for instance if it ran a college there or provided services to its tenant rather than using a German property management agent. In that case it would have had an establishment in Germany. Assuming Germany would have denied the charity exemption, it should have succeeded under this head. Since the charity succeeded under free movement of capital, the point seems somewhat academic.

### 102.9.2 Companies

The TFEU refers to “setting up or managing” a company.

Settled case law provides that FoE includes purchase of a company or of part of a company:

30. ... the acquisition by one or more natural persons residing in a member state of all the shares in a company registered in another member state, conferring on those persons definite influence over the company’s decisions and allowing them to determine its activities, is ... covered by the Treaty provisions on the freedom of establishment.<sup>55</sup>

*Scheunemann*<sup>56</sup> concerned a German IHT business property relief. This relief applied to companies with a registered office or principal place of business in the EU. The testator died holding a shareholding of a Canadian company. The shareholding did not qualify for the relief as the company did not have a registered office or principal place of business in the EU. This was held to be a FoE case, not a FMC case, so the taxpayer was not successful:

---

54 It seems to me that there was a restriction of the taxpayer’s freedom to establish itself *outside* Germany. Because the taxpayer was established in Italy, it incurred a German tax burden which would not have been paid if it had been established in Germany. However the argument was not put on this basis and the ECJ did not consider it. Probably it would have responded that the main issue was FMC and not FoE.

55 *Columbus Container Services v Finanzamt Bielefeld-Innenstadt* [2008] STC 2554.

56 *Scheunemann v Finanzamt Bremerhaven* Case C-31/11 (2012).

23 ... according to settled case-law,

- [1] national legislation which is intended to apply only to shareholdings enabling the holder to exert a definite influence over a company's decisions and determine its activities is covered by the Treaty provisions on freedom of establishment.
- [2] On the other hand, national provisions which apply to shareholdings acquired solely with the intention of making a financial investment, with no intention of influencing the management and control of the undertaking, must be examined exclusively in the light of the free movement of capital.

### 102.9.3 “Definite influence”

“Definite influence” is a technical EU-law term which marks the boundary between FoE and FMC:

24 ... in order to determine which freedom the national legislation at issue in the main proceedings falls under, it is necessary to examine whether the shareholding referred to in that legislation is sufficient to enable the shareholder to exert a definite influence over the company's decisions and to determine its activities.

The question is how large a shareholding is needed to confer a “definite influence”. 25% is sufficient:

25 In the case under consideration, ... the tax advantages at issue is conditional upon having a direct holding of more than one quarter of the capital of the company....

29 It should accordingly be noted that, for the purposes of granting the tax advantages at issue in the main proceedings, the German legislature specified a shareholding threshold so high that the shareholder in the capital company is able to influence its management and control, and imposed conditions designed to ensure that the shareholder does not intervene solely with the intention of making a financial investment.

30 It should therefore be held that the legislation at issue in the main proceedings primarily affects freedom of establishment and that, in accordance with the case-law of the Court, it falls solely within the scope of the Treaty provisions concerning that freedom.<sup>57</sup>

---

<sup>57</sup> *Scheunemann v Finanzamt Bremerhaven* Case C-31/11 (2012).

In *Aberdeen Property Fininvest Alpha Oy*<sup>58</sup> a 20% threshold was regarded as sufficient.<sup>59</sup>

On the other hand, 10% is too low to confer definite influence. In *EC v UK* (the s.3 TCGA case)<sup>60</sup> the court said:

... section 13 of the TCGA applies where a participator resident in the UK holds more than 10% of the shares of the non-resident close company in question.<sup>61</sup> It can therefore apply both to holdings enabling their holder to exert a definite influence over the decisions of that company and determine its activities and to holdings acquired for investment purposes. It thus cannot be ruled out that that section may affect both freedom of establishment and free movement of capital.

Connected person rules are recognised which may aggregate small shareholdings into one conferring definite influence and so constitute an establishment. The Advocate-General said in *Columbus Container Services*:<sup>62</sup>

55. ...not only is Columbus controlled by at least six natural persons belonging to the same family, each of them having a 10% shareholding in the establishment concerned, but, in particular, those persons ... act together and are represented by a single person at the general meeting of the partners. Those eight partners therefore appear to be in a position to exercise, collectively, definite influence over Columbus's decisions. In that context, the possible infringement of the right of free movement of capital is merely a consequence of the alleged restriction on freedom of establishment.

This would only apply in the case of well-targeted connected person rules, where the connected persons may be regarded as “acting together”. Some aspects of the UK connected person rules are disproportionate, indeed wildly extravagant,<sup>63</sup> and would not meet this requirement.

---

58 [2009] STC 1945.

59 Also see *Thin Cap Group Litigation v IRC* [2007] STC 906 at [28] to [33] where UK thin capitalisation rules passed this test.

60 Case C-112/14 [2015] STC 591 at [6].

61 The figure was later increased to 25% but that does not affect the point made here.

62 *Columbus Container Services v Finanzamt Bielefeld-Innenstadt* [2008] STC 2554.

63 See 99.8 (Ultra-wide control: Critique).

### 102.9.4 Trusts

A trust is an “undertaking” so FoE prohibits restrictions on setting up trusts in another MS.

*Olsen*<sup>64</sup> concerned a Liechtenstein discretionary trust. The EFTA Court referred to the objective of FoE<sup>65</sup> and continued:

96 ... any person or entity, such as a trust, that pursues economic activities that are real and genuine must be regarded as taking advantage of its right of establishment under Articles 31 and 34 EEA.

The enactment of the EU-law defences to the ToA rules effectively concede that a trust is an undertaking.

### 102.10 “Restriction” on establishment

Any rule which hinders FoE, or makes a foreign establishment less attractive than a domestic establishment, is a restriction on FoE.<sup>66</sup> Settled case law provides:

... a restriction on freedom of establishment is prohibited ... even if of limited scope or minor importance.<sup>67</sup>

*Cadbury Schweppes* [2006] STC 1908 concerned a simple corporate structure:

The ECJ summarised the then UK CFC legislation:

44 Where the resident company has incorporated a CFC in a Member State in which it is subject to a lower level of taxation within the

---

64 *Olsen v Norwegian State* Case E-3/13.

65 See 102.8.1 (Objective of FoE).

66 The same applies to FMC: see 102.12.2 (“Restriction” on movement of capital).

67 *de Lasteyrie du Saillant v Ministère de l'Économie* [2005] STC 1722 at [43].

meaning of the legislation on CFCs, the profits made by such a controlled company are, pursuant to that legislation, attributed to the resident company, which is taxed on those profits.

Where, on the other hand, the controlled company has been incorporated and taxed

[1] in the UK or

[2] in a State in which it is not subject to a lower level of taxation within the meaning of that legislation,

the latter is not applicable and, under the UK legislation on corporation tax, the resident [parent] company is not, in such circumstances, taxed on the profits of the controlled company.

The CFC legislation distinguished between UK and non-UK subsidiaries, but it is not self-evident that it *restricted* the UK parent's FoE. However the ECJ held that it did:

45 That difference in treatment creates a tax disadvantage for the resident [parent] company to which the legislation on CFCs is applicable. Even taking into account ... the fact ... that such a resident company does not pay, on the profits of a CFC within the scope of application of that legislation, more tax than that which would have been payable on those profits if they had been made by a subsidiary established in the UK, the fact remains that under such legislation the resident [parent] company is taxed on profits of another legal person. That is not the case for a resident company with

[1] a subsidiary taxed in the UK or

[2] a subsidiary established outside that Member State which is not subject to a lower level of taxation.

46 ... the separate tax treatment under the legislation on CFCs and the resulting disadvantage for resident companies which have a subsidiary subject, in another Member State, to a lower level of taxation are such as to hinder the exercise of freedom of establishment by such companies, dissuading them from establishing, acquiring or maintaining a subsidiary in a Member State in which the latter is subject to such a level of taxation. They therefore constitute a restriction on freedom of establishment within the meaning of [TFEU].

The CFC rules only applied to companies in some member states, namely, those subject to a lower level of taxation (as defined). Because of this selective operation the CFC rules clearly restricted FoE, since given the choice in siting a subsidiary in:

- (1) a MS with a lower level of taxation or
  - (2) a MS with a higher level of taxation (but less than the UK)
- the parent would in principle prefer the latter.<sup>68</sup>

But the point made at 44[1] and 45[1] suggests that the CFC rules would restrict freedom of establishment even if they applied to every MS, regardless of the level of taxation just because they did not apply to a UK subsidiary. At first sight that seems surprising. The income of the CFC is subject to foreign tax as well as UK tax. Although UK tax allows a credit for the foreign tax, the burden of dealing with two tax systems is a significant one.<sup>69</sup> That might be a deterrent against a UK parent establishing a CFC in any other MS. But that is not the basis of the court's decision.

#### 102.10.1 *Generalising from CFCs to other anti-avoidance rules*

The CFC legislation attributes income of a non-resident to a UK resident. The attribution of income or gains of a non-resident to a UK resident is a feature of many UK anti-avoidance rules.

### 102.11 **Who is entitled to freedom of establishment**

Article 49 confers FoE on “nationals of a Member State”. Non-nationals do not have FoE. That seems self-evident, but authority is needed, see *Scheunemann*:

33 As regards the Treaty chapter on freedom of establishment, it does not contain any provision which extends the scope of that chapter to cover situations concerning a shareholding in a company which has its registered office in a third country... and, as it is, the case before the referring court concerns a shareholding in a capital company which has its registered office in Canada.<sup>70</sup>

---

68 The CFC rules have other effects on the management of subsidiaries. OECD Model note: “While CFC rules in principle lead to inclusions in the residence country of the ultimate parent, they also have positive spillover effects in source countries because taxpayers have no (or much less of an) incentive to shift profits into a third, low-tax jurisdiction.” See OECD, “Action Plan on Base Erosion and Profit Shifting” (2013) p.16 <http://www.oecd.org/ctp/BEPSActionPlan.pdf>

69 DT relief was (unfairly) denied: see 103.22.2 (*Bricom*).

70 *Scheunemann v Finanzamt Bremerhaven* Case C-31/11 (2012).

Article 54 TFEU extends FoE to companies and firms:

- [1] Companies or firms
  - [a] formed in accordance with the law of a Member State and
  - [b] having their registered office, central administration or principal place of business within the Community
- shall, for the purposes of this Chapter, be treated in the same way as natural persons who are nationals of Member States.

Article 54 goes on to define “companies or firms”:

- [2] “Companies or firms” means companies or firms constituted under civil or commercial law, including cooperative societies, and other legal persons governed by public or private law, save for those which are non-profit-making.

In *Olsen*<sup>71</sup> the EFTA Court said:

103 ... All interested parties, that is to say the trust’s settlors, trustees and beneficiaries hold the rights under Articles 31 and 34.

The right to FoE is a right of nationals of a MS (extended to companies and firms). What is the nationality of a trustee? It is suggested that one should look to the nationality of the trustees in their private capacities; if they had different nationalities it would not matter as any trustee who was a MS national would have FoE.

## 102.12 Free movement of capital

Article 63 TFEU provides:

1. Within the framework of the provisions set out in this Chapter, all restrictions on the movement of capital
  - [a] between Member States and
  - [b] between Member States and third countriesshall be prohibited.
2. Within the framework of the provisions set out in this Chapter, all restrictions on payments
  - [a] between Member States and
  - [b] between Member States and third countries

---

<sup>71</sup> *Olsen v Norwegian State* Case E-3/13.

shall be prohibited.

“**Third countries**” is the standard EU-law term for “**non-EU countries**”. The later term seems clearer, but it is easier to adopt the standard term.

I am not sure what para 2 adds to para 1 in the general sense, but “movement of capital” is a standard EU-law term? I refer to movement of capital, and leave payments to be understood.

### 102.12.1 “*Movement of capital*”

The TFEU does not define “movement of capital” or “payments between member states”. In practice CJEU has regard to the list in annex 1 directive 88/361/EEC,<sup>72</sup> even though the directive itself has been repealed. The standard EU-law term for this list is the “**nomenclature**” but for clarity I use the expanded term “**1988 directive nomenclature**”.

Settled case law provides:

[Annex 1 Directive 88/361]... retains the same indicative value, for the purposes of defining the term ‘movement of capital’ ... subject to the qualification, contained in the introduction to the nomenclature, that the list set out therein is not exhaustive.<sup>73</sup>

The list – too long to set out here – includes gifts and inheritance. In *Scheunemann* CJEU states:

22 ... Inheritances consisting in the transfer to one or more persons of assets left by a deceased person ... are movements of capital for the purposes of Article 63 TFEU.

FMC applies even if the donor or donee do not engage in cross-border economic activity (unlike FoE). So free movement of capital is important for IHT.

### 102.12.2 “*Restriction*” on movement of capital

Any rule which hinders FMC, or makes a enjoyment of foreign capital less

---

72 Directive for the implementation of Article 67 EC Treaty [FMC], 24 June 1988  
<http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:31988L0361:EN:HTML>

73 *Test Claimants in the FII Group Litigation v IRC* [2007] STC 326 at [179].

attractive than enjoyment of domestic capital, is a restriction on FMC.<sup>74</sup>

In *EC v UK* (the s.3 case):

the measures prohibited by art 63(1) TFEU as restrictions on the movement of capital include those that are such as to discourage non-residents from making investments in a member state or to discourage that member state's residents from doing so in other states<sup>75</sup>

In *FII Group Litigation*<sup>76</sup> the ECJ say:

184. ...any less favourable treatment of foreign-sourced dividends in comparison with nationally-sourced dividends must be regarded as a restriction on the free movement of capital in so far as it is liable to make the acquisition of holdings in companies established in other member states less attractive.

In *Stauffer*<sup>77</sup> the ECJ held that a charity tax relief applying to income of charities established in Germany (not any other MS) constituted a restriction on FMC.

Similarly in *Persche*<sup>78</sup>, an income tax relief for donors to German charities only constituted a restriction on FMC. This was just a rerun of the arguments in *Stauffer* and the conclusion was inevitable.

The point was followed again in *Missionswerk*<sup>79</sup> at [24]–[26] where a Belgian succession duty relief restricted to Belgian non-profit organisations constituted a restriction on FMC.

## 102.13 Movement of capital to third countries

Free movement of capital applies not just between member states but also between member states and third countries. It is the only one of the four freedoms which applies to third countries.

### 102.13.1 *The standstill derogation*

---

74 A similar approach applies to determine what is a restriction on FoE: see 102.10 (“Restriction” on establishment).

75 [2015] STC 591 at [18].

76 *Test Claimants in the FII Group Litigation v IRC* [2007] STC 326.

77 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439.

78 *Persche v Finanzamt Lüdenscheid* [2009] STC 586.

79 *Missionswerk Werner Heukelbach eV v État belge* Case C-25/10.

There is a transitional rule in the case of movement of capital to third countries. Article 64 TFEU provides:

1. The provisions of Article 63 [FMC] shall be without prejudice to the application to third countries of any restrictions which exist on 31 December 1993 under national or Union law adopted in respect of the movement of capital to or from third countries involving
  - [a] direct investment – including in real estate –
  - [b] establishment,
  - [c] the provision of financial services or
  - [d] the admission of securities to capital markets. ...

This is known as the “**standstill**” derogation. The most important category here is “direct investment”.

### 102.13.2 *Direct investment*

The TFEU does not define “direct investment”. In practice CJEU has regard to the list in part I annex 1 directive 88/361/EEC,<sup>80</sup> even though the directive has been repealed. The standard EU-law term for this list is the “**nomenclature**” but for clarity I use the expanded term “**1988 directive nomenclature**”.

The same indicative value must be given to that nomenclature [ie annex 1 of Directive 88/361] in interpreting the concept of direct investment.<sup>81</sup>

So we turn to the 1988 directive which provides:

#### I DIRECT INVESTMENTS

1. Establishment and extension of branches or new undertakings belonging solely to the person providing the capital, and the acquisition in full of existing undertakings.
2. Participation in new or existing undertaking with a view to establishing or maintaining lasting economic links.
3. Long-term loans with a view to establishing or maintaining lasting economic links.

---

80 Directive for the implementation of Article 67 EC Treaty [FMC], 24 June 1988  
<http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:31988L0361:EN:HTML>

81 *Test Claimants in the FII Group Litigation v IRC* [2007] STC 326 at [180]/

4. Reinvestment of profits with a view to maintaining lasting economic links.

A - Direct investments on national territory by non-residents

B - Direct investments abroad by residents...

#### EXPLANATORY NOTES

For the purposes of this Nomenclature and the Directive only, the following expressions have the meanings assigned to them respectively:

#### **Direct investments**

Investments of all kinds by natural persons or commercial, industrial or financial undertakings, and which serve to establish or to maintain lasting and direct links between the person providing the capital and the entrepreneur to whom or the undertaking to which the capital is made available in order to carry on an economic activity. This concept must therefore be understood in its widest sense.

The undertakings mentioned under I-1 of the Nomenclature include legally independent undertakings (wholly-owned subsidiaries) and branches.

As regards those undertakings mentioned under I-2 of the Nomenclature which have the status of companies limited by shares, there is participation in the nature of direct investment where the block of shares held by a natural person of another undertaking or any other holder enables the shareholder, either pursuant to the provisions of national laws relating to companies limited by shares or otherwise, to participate effectively in the management of the company or in its control.

Long-term loans of a participating nature, mentioned under I-3 of the Nomenclature, means loans for a period of more than five years which are made for the purpose of establishing or maintaining lasting economic links. The main examples which may be cited are loans granted by a company to its subsidiaries or to companies in which it has a share and loans linked with a profit-sharing arrangement. Loans granted by financial institutions with a view to establishing or maintaining lasting economic links are also included under this heading.

Thus “direct investment” is a technical EU-law term.

The ECJ comment on “direct investment”:

181. As that list and the relative explanatory notes show, the concept of direct investments concerns investments of any kind undertaken by natural or legal persons and which serve to establish or maintain lasting and direct links between the persons providing the capital and the

undertakings to which that capital is made available in order to carry out an economic activity.

182. As regards shareholdings in new or existing undertakings, as the explanatory notes confirm, the objective of establishing or maintaining lasting economic links presupposes that the shares held by the shareholder enable him, either pursuant to the provisions of the national laws relating to companies limited by shares or otherwise, to participate effectively in the management of that company or in its control...

196. ... Holdings in a company which are not acquired with a view to the establishment or maintenance of lasting and direct economic links between the shareholder and that company and do not allow the shareholder to participate effectively in the management of that company or in its control cannot, in this connection, be regarded as direct investments.<sup>82</sup>

### 102.13.3 *Existing restriction*

The ECJ also comment on “existing” restriction:

195. ... the FID regime cannot be categorised as an existing restriction merely on the basis that, because it is optional, the companies concerned can always elect to be taxed under the system previously in place, with the restrictive effects to which it gave rise...<sup>83</sup>

Consolidation and re-enactment does not affect the status of a restriction as an existing one:

196. ...[the standstill derogation] is to be interpreted as meaning that where, before 31 December 1993, a member state has adopted legislation which contains restrictions on capital movements to or from non-member countries which are prohibited by [FMC] and, after that date, adopts measures which, while also constituting a restriction on such movements, are essentially identical to the previous legislation or do no more than restrict or abolish an obstacle to the exercise of the Community rights and freedoms arising under that previous legislation, [the standstill derogation] does not preclude the application of those measures to non-member countries when they apply to capital movements involving direct investment...

---

82 *Test Claimants in the FII Group Litigation v IRC* [2007] STC 326.

83 *Test Claimants in the FII Group Litigation v IRC* [2007] STC 326.

Most important UK anti-avoidance legislation already existed in 1993, so at first glance the standstill derogation preclude EU-law remedies based on FMC, for a third country. However post-1993 amendments have been so numerous, and so far reaching, that it is doubtful whether the standstill derogation still applies. The ToA rules, for instance, have been extended to include transfers by non-residents, to apply to UK residents (as opposed to ordinarily residents), to restrict the motive defence, and to exclude DT relief. (What is now) s.3 TCGA has been extended in many ways: for foreign domiciliaries, by restrictions on treaty relief in the case of trusts; by applying to participators rather than shareholders.

## 102.14 Permitted restrictions on cross border activity

### 102.14.1 *Permitted restriction on FoE*

Article 52 TFEU provides:

The provisions of this Chapter [chapter 2 title 4, FoE] and measures taken in pursuance thereof shall not prejudice the applicability of provisions laid down by law, regulation or administrative action providing for special treatment for foreign nationals on grounds of

- [a] public policy,
- [b] public security or
- [c] public health.

This confers a general public policy exemption for FoE. I cannot see that the references to public security and health add much to public policy.

### 102.14.2 *Permitted restriction on FMC*

Article 65 TFEU provides:

1. The provisions of Article 63 shall be without prejudice to the right of Member States
  - (a) to apply the relevant provisions of their tax law which distinguish between taxpayers who are not in the same situation
    - [i] with regard to their place of residence or
    - [ii] with regard to the place where their capital is invested.
  - (b) [i] to take all requisite measures to prevent infringements of national law and regulations, in particular in the field of taxation and the prudential supervision of financial institutions, or

[ii] to lay down procedures for the declaration of capital movements for purposes of administrative or statistical information, or

[iii] to take measures which are justified on grounds of public policy or public security.

2. The provisions of this Chapter shall be without prejudice to the applicability of restrictions on the right of establishment which are compatible with this Treaty.

Article 65(1)(b)[iii] confers a public policy exemption for FMC which corresponds to the public policy exemption for FoE.

At first sight article 65(1)(a) goes further and confers an exemption which overrides FMC in all tax matters. It seems to say tax law may distinguish between domestic residents and non-residents; and between domestic capital and foreign capital. However art 65(1)(a) is negated by what follows:

3. The measures and procedures referred to in paragraphs 1 and 2 shall not constitute

[a] a means of arbitrary discrimination or

[b] a disguised restriction on the free movement of capital and payments as defined in Article 63.

It is not the case that *any* discrimination on the ground of residence or location of property is permitted. Restrictions must not be:

(a) “arbitrary” or

(b) “disguised restrictions on free movement of capital”.

Article 65(3)[b] is a sloppy phrase, since we are by definition considering rules which *are* restrictions on free movement of capital. But it does not add much to para [a].

Settled case law provides:

32 In so far as that provision of Article [65(1)(a) TFEU] is a derogation from the fundamental principle of the free movement of capital, it must be interpreted strictly. It cannot therefore be interpreted as meaning that all tax legislation which draws a distinction between taxpayers on the basis of their place of residence or the Member State in which they invest their capital is automatically compatible with the Treaty...

33 The derogation in Article [65(1)(a) TFEU] is itself limited by

Article 65(3) TFEU]....<sup>84</sup>

These are two reasons for (more or less) ignoring art 65(1)(a) and the second, at least, is firmly based on the TFEU.

In summary: FoE and FMC are alike subject to public policy exemptions which are not further explained, so the treaty permits and requires CJEU to devise its own principles.

## 102.15 Abuse

The court needs to strike a balance between two conflicting aims:

- (1) to combat abuse;
- (2) to minimise restrictions on cross-border activity.

The approach is firstly to apply a strict or limited concept of abuse; and to insist that restrictions are “proportionate”, a word best regarded as a technical EU-law term, approximating to “well-targeted”.

Similar issues arise in relation to indirect taxation, in particular VAT. However the two fields are not the same. The EC note:

The policy is decisively influenced by the greater degree of harmonization in the indirect tax field and the fact that Directive 2006/112/EC [the VAT directive] includes specific rules and procedures allowing MSs to fight avoidance and to take measures against evasion.<sup>85</sup>

### 102.15.1 Selection of MS for tax: Not abuse

I think it is helpful to start with a category which is *not* abuse. In *Cadbury Schweppes*:

37 ...the fact that the company [the CFC] was established in a Member State for the purpose of benefiting from more favourable legislation does not in itself suffice to constitute abuse of that freedom ...

38 ... it follows that the fact that in this case Cadbury Schweppes decided to establish [its CFCs] in [Ireland] for the avowed purpose of benefiting from the favourable tax regime which that establishment enjoys does not in itself constitute abuse.

---

<sup>84</sup> *Mattner v Finanzamt Velbert* C-510/08.

<sup>85</sup> COM(2007) 785 final

<http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:52007DC0785>

And similarly:

69 ... the fact that the activities which correspond to the profits of the CFC could just as well have been carried out by a company established in the territory of the Member State in which the resident company is established does not warrant the conclusion that there is a wholly artificial arrangement [ie, that there is abuse].

Similarly, the EC note:<sup>86</sup>

In so far as taxpayers have not entered into abusive practices, MSs cannot hinder the exercise of the rights of freedom of movement simply because of lower levels of taxation in other MSs.<sup>87</sup> This is the case even in respect of special favourable regimes in the other MSs' tax systems.<sup>88</sup>

In short, use of a MS company (ie a company established in any MS) to avoid tax is not in itself an abuse of FoE.

The Advocate-General explained the reasoning in *Columbus Container Services*:<sup>89</sup>

...in the absence of Community harmonisation, it must be accepted that there is competition between the tax regimes of the various member states.<sup>90</sup> It may be a matter for regret that such competition operates without restriction. That question ... calls, however, for an answer of a political nature and therefore has no effect on the rights and obligations of member states under the Treaty.

### 102.15.2 Abuse/avoidance/evasion: Terminology

“Abuse” (and its adjective “abusive”) is a technical EU-law term. In particular:

- (1) It is distinct from the UK domestic law concept of avoidance: the selection of a foreign company to obtain a UK tax advantage is the paradigm of tax avoidance.
- (2) It is distinct from “abusive” as defined in the UK domestic law

---

86 COM(2007) 785 final

<http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:52007DC0785>

87 The EC cite: *Eurowings*, C-294/97, para 44.

88 The EC cite: *Cadbury*, paras 36-38.

89 *Columbus Container Services v Finanzamt Bielefeld-Innenstadt* [2008] STC 2554.

90 The AG refers to the opinion of the AG in *Cadbury Schweppes* at [55].

## GAAR.

In technical EU-law terminology, the words “avoidance” and “evasion” tend to be used as synonyms of abuse; so these terms too do not have their UK domestic law meanings; in particular, “evasion” does not carry its UK domestic law meaning of (criminal) tax fraud.<sup>91</sup>

## 102.15.3 Abuse

In *Cadbury Schweppes*:<sup>92</sup>

- 55 ... in order for a restriction on the freedom of establishment to be justified on the ground of prevention of abusive practices, the specific objective of such a restriction must be to prevent conduct
- [1] involving the creation of wholly artificial arrangements which do not reflect economic reality,
  - [2] with a view to escaping the tax normally due on the profits generated by activities carried out on national territory.

There are two requirements for abuse, the prevention of which would justify a restriction on FoE or FMC. [1] is a conduct requirement and [2] is a subjective (intention) requirement. Both must be present but the conduct requirement is the more important because if there are “wholly artificial arrangements which do not reflect reality” then the intention of escaping tax is likely (perhaps almost certain) to be present.

ToA draft guidance makes the same point:

**INTM603140 Genuine transactions exemption: EU law implications**

...The criteria [for abuse] were set out in a case involving the Common Agricultural Policy, Case C-110/99 *Emsland-Stärke*, paragraphs 52 and 53:

‘A finding of abuse requires, first, a combination of objective circumstances in which, despite formal observance of the conditions laid down by Community [EU] rules, the purpose of those rules has not been achieved. It requires, second, a subjective element consisting in the intention to obtain an advantage from the Community rules by creating artificially the conditions for obtaining it.’

---

91 This may be influenced by French, where *evasion* means (legal) avoidance.

92 *Cadbury Schweppes v IRC* [2006] STC 1908.

The principle has been applied to VAT Case C-255/02 *Halifax*, and more recently to direct tax in Case C-196/04 *Cadbury Schweppes*.

#### 102.15.4 *Wholly artificial arrangements*

“Artificial” is of course vague,<sup>93</sup> and the adjective “wholly” does not add anything except emphasis.

ToA draft guidance muses over this expression, without taking matters much further:

##### *Wholly artificial arrangements*

‘Wholly artificial arrangements’ is a phrase first employed in the *ICI* case mentioned above. The authoritative text was English, but in the French working language the phrase was *montages purement artificiels*, which no doubt explains why it is sometimes in ECJ cases expressed as ‘purely artificial arrangements’, as for example in Case C-231/05 *Oy AA*...

The phrase could be translated (and arguably makes more sense in context) as ‘artificial arrangements only’ rather than arrangements that in some sense are ‘wholly artificial’. In English law ‘wholly artificial’ arrangements might well be taken to mean sham arrangements (those fraudulently misleading, which very plainly was not in the mind of the court).

The EU Commission (in its communication mentioned above) takes the view that ‘the detection of a wholly artificial arrangement ... amounts in effect to a substance over form analysis’. That is a more effective approach than attempting to understand in what sense an arrangement can be ‘wholly artificial’.

A scheme may thus be regarded as artificial if it lacks genuine economic substance born of commercial purpose (‘devoid of economic reality’, as expressed at paragraph 63 of *Oy AA*) but is inserted to gain an advantage not within the aims of the Treaty. These aims are, for freedom of establishment ‘economic interpenetration’, a phrase taken from *Cadbury Schweppes*; and for freedom of movement of capital the efficient allocation of capital.

Paragraph 63 of *Oy AA* reads as follows:

‘Even if the legislation at issue in the main proceedings is not specifically designed to exclude from the tax advantage it confers purely artificial arrangements, devoid of economic reality, created with the aim of escaping the tax normally due on the profits generated by activities carried out on national territory, such legislation may nevertheless be regarded as proportionate to the objectives pursued, taken as a whole.’

The ECJ’s decision in that case was based on the application of both the ‘prevention of tax avoidance’ and ‘balanced allocation of taxing rights’ justifications. It demonstrates that counteraction may be applied by an authority

---

93 See 49.15.2 (“Artificial”/“devices”).

where there are gratuitous transfers of income from one tax jurisdiction to another within a group of companies. This ‘profit shifting’ is a common theme. It is easier to justify counteraction where there are transfers of assets or income without commercial exchange, threatening the balanced allocation of taxing rights.

### 102.15.5 *Genuine economic activities*

Returning to *Cadbury Schweppes*, what is the conduct requirement?

... objective circumstances showing that, despite formal observance of the conditions laid down by Community law, the objective pursued by freedom of establishment<sup>94</sup>... has not been achieved.

When is the objective of FoE not achieved?

65 In those circumstances, in order for the legislation on CFCs to comply with Community law, the taxation provided for by that legislation must be excluded where, despite the existence of tax motives, the incorporation of a CFC reflects economic reality.

What is economic reality?

66 That incorporation must correspond with an actual establishment intended to carry on genuine economic activities in the host Member State...

The expression “economic activities” does not take us much further<sup>95</sup> and “genuine” does not help much either.

67 ... that finding must be based on objective factors which are ascertainable by third parties with regard, in particular, to the extent to which the CFC physically exists in terms of premises, staff and equipment.

“Premises, staff and equipment” are easily understood. The question is: how large a premises, how many staff and how much equipment is needed?

68 If checking those factors leads to the finding that the CFC is a fictitious establishment not carrying out any genuine economic activity

---

94 See 102.8.1 (Objective of FoE).

95 See App.6.5.2 (Economic reality/consequences).

in the territory of the host Member State, the creation of that CFC must be regarded as having the characteristics of a wholly artificial arrangement. That could be so in particular in the case of a “letterbox” or “front” subsidiary.

The metaphors of “letterbox” and “front” (ie, in more idiomatic English, “facade”), and the epithets “fictitious” and “artificial” are conclusions rather than useful tests or even indications of what is “economic reality”.<sup>96</sup> The use of the words “genuine”, “real” and “artificial” is normally a sign of conceptual desperation.<sup>97</sup>

*Olsen*<sup>98</sup> has now helped. The EFTA Court said:

99 Whether the entity in question conducts a real and genuine economic activity cannot be answered in the abstract. It depends on the actual terms of the entity’s statutes, such as, in the case at hand, the trust’s deed, and the actual activities of that entity and its management. If a specific assessment reveals, for example, that the trust is involved in the management of a group’s companies or other activities for a group, such as managing a pool of resources, and its actual incorporation reflected its actual activities, it has to be regarded as a real and genuine economic activity, which constitutes establishment. ... it is not required that the economic activities take effect in the EEA State of establishment. It suffices that they take effect in the EEA.

100 Provided that those conditions are fulfilled, neither the status under national law of the legal entity employed to that end, the income level of the establishment nor the origin of its funds can have any consequence as to whether or not there is an establishment for the purposes of EEA law.

101 For the plaintiffs in the main proceedings to be able to invoke Articles 31 and 34 EEA [FoE], the national courts, in the assessment of the facts which is within their exclusive jurisdiction, would need to establish that the activities in question are real and genuine. The national courts must thereby base their examination on the objective and verifiable elements set out in paragraphs 96 to 99 of this judgment and

---

96 See *FCT v Casuarina Pty Ltd* (1970) 127 CLR 62 at 7: “This and other metaphorical descriptions, dummy, puppet, alias, alter ego and the like come readily to mind : but they remain descriptive not definitive of legal consequences.”

97 See App 6.1 (What do we mean by real).

98 *Olsen v Norwegian State* Case E-3/13.

make an overall assessment of all the circumstances of the case relating to the activities concerned.

103 In light of the preceding considerations, the answer to the first two questions must be that a trust ...falls within the scope of Article 31 EEA [FoE] provided that the trust pursues a real and genuine economic activity within the EEA for an indefinite period and through a fixed establishment.

*Columbus Container Services* offers an example of a case where there were economically significant activities. The AG said:

180. ...[the] court should, in particular, determine whether, during the tax year in question, Columbus continued to meet all the conditions applying to coordination centres ... including ... requirements concerning the level of employment in Belgium.<sup>99</sup>

181. ... I do not think that the fact that an establishment such as Columbus devotes its activities to holding and managing capital and may, where necessary, make financial investments in other member states, can be decisive as regards finding that a purely artificial arrangement exists, in so far as that establishment does not engage in actual economic activities in the host member state.

182. Not only are financial activities excluded in principle from the freedoms of movement, it cannot be totally ruled out that capital investments will be made by an establishment like Columbus for its partners in the host member state or, at least, through financial or banking intermediaries established in Belgium.<sup>100</sup>

183. I consider that these circumstances, combined with an actual physical establishment in the host member state, are sufficient to rule out the existence of a purely artificial arrangement.<sup>101</sup>

#### 102.15.6 *Economically significant activities: HMRC guidance*

This is the basis of the statutory references to “economically significant activities” in the TCGA and ToA EU-law defences.<sup>102</sup>

In the CGT context, the CG Manual provides:

---

99 Footnote original: Co-ordination centres must employ in Belgium the equivalent of at least ten full-time staff once they have been in business for two years.

100 I wonder if something has gone wrong in the translation of this paragraph.

101 [2008] STC 2554.

102 See 45.18.6 (Economically significant); 60.19.1 (“Economically significant”).

**CG57314 Economically Significant Activities** [Nov 2019]

The purpose of the requirement in TCGA92/13(5)(ca) is to ensure that only arrangements that are wholly artificial arrangements are caught by the charge under TCGA92/13. The test distinguishes between

- [1] commercial arrangements, where an asset is held by a non UK resident company for reasons of genuine commercial activity outside the UK, and
- [2] artificial arrangements put in place for the circumvention of UK tax rules through the holding of an asset in a non UK resident company without genuine commercial use [in]<sup>103</sup> the UK.

An asset will be outside of the scope of TCGA92/S13 if it is used only for the purposes of economically significant activities carried on by the company wholly or mainly outside the UK. (If the activities are wholly or mainly carried on in the UK see CG57315).

Based on the approach of both the Court and Advocate General in Case C-196/04 *Cadbury Schweppes*, the legislation seeks to differentiate between companies carrying on legitimate economic activities (which reflect economic reality) and those operating wholly artificial arrangements in the host (other) country.

In applying TCGA92/S13 and 13(5)(ca) activities carried on by a company which are ‘economically significant activities’ are to be regarded as legitimate economic activities and excluded from the S13 charge. [The Manual sets out the statutory definition and continues]

Applying these criteria as indicators of legitimate (as opposed to wholly artificial) arrangements enables an assessment to be made of the genuine nature of the business, activities. For example that:

- the non-resident company is genuinely established in another country, which is informed by the number of staff in use, whether they are directly employed or contractors. Also whether the premises they are working from and the equipment available to them is consistent with what would reasonably be expected for a legitimate (genuine) commercial operator, bearing in mind the size and nature of the services offered;
- the genuine nature of the services provided by the company - that where the services offered require a level of decision making the staff employed reasonably have the level of competence necessary for a genuine company to operate; and

---

103 “In” seems to be a slip for “outside”.

- the company is providing genuine value added contribution on a sound commercial basis - that reasonable consideration is being provided in return for any payment by the UK parent company. For example if the non-resident company is providing services which have no economic substance in relation to the parent company's activity, then it would indicate that there is a wholly artificial arrangement.

To determine if this exemption applies a clear understanding of the activities of the company and how the asset is used by the company is needed. The features described are indicators of genuine behaviour and should be assessed on that basis. If the arrangements appear genuine time should not be spent on a detailed analysis of scale and proportion - see CG57315.

If the economically significant test is satisfied, no charge is generated under section 13.

#### **CG57315 Practical Considerations** [Nov 2019]

The term economically significant activities should be straightforward to apply in practice provided a clear understanding of the nature of the company's activities is held. If a company is carrying on genuine commercial activity then the test would be met. For example a joint property venture in a genuine commercial business would satisfy this test. Difficult areas that may need to be considered include investments, holding companies and cases where the asset was used wholly or mainly in activities carried on wholly or mainly in the UK:

#### *Asset used in activities wholly or mainly in the UK*

Following the approach of the Advocate General in Case C-196/04 *Cadbury Schweppes* the question of the genuineness or otherwise of the company's activities focuses on the activities of the company in the host country (Member State or third country other than the UK). However, although the specific exclusion in section 13(5)(ca) is not available for an asset used for the purposes of 'economically significant activities' carried on by the company wholly or mainly in the UK, consideration must still be given to how the asset has been used. If it has been used by the company in carrying on legitimate economic activities which reflect economic reality then the disposal of the asset will be outside the scope of TCGA92/S13.

I find this hard to follow.

#### *Investment companies*

Investments comes within the meaning of “goods and services to others on a commercial basis” for the purposes of TCGA92/S13A(4). So an investment business may provide a service to investors on a commercial basis, for example a financial service company providing investments to the general public would be providing a service on a commercial basis.

However a company holding or making investments solely for its participants is unlikely to meet the test - it may just be a private money box.

A distinction needs to be drawn between a business that uses the asset within its business of asset management and for which it would expect reward from the management activity itself and merely seeking to benefit from the actual or anticipated increase in the value of the asset.

#### *Holding companies*

It is possible for a holding company to undertake economically significant activities, for example providing management services to other companies in a group.

A holding company may undertake no economically significant activities within the holding company itself. For the purposes of applying the economically significant activities test HMRC will look at the wider business structure in assessing the business of the holding company.

### 102.15.7 Evidence

In *EC v UK* (the s.3 TCGA case) the court states:

According to settled case-law of the Court, where rules are predicated on an assessment of objective and verifiable elements making it possible to identify the existence of a wholly artificial arrangement entered into for tax reasons alone, they may be regarded as not going beyond what is necessary to prevent tax evasion and tax avoidance, if, on each occasion on which the existence of such an arrangement cannot be ruled out, those rules give the taxpayer an opportunity, without subjecting him to undue administrative constraints, to provide evidence of any commercial justification that there may have been for that transaction.<sup>104</sup>

An EC Communication provides:

---

104 Case C-112/14 [2015] STC 591 at [27].

In *Thin Cap*<sup>105</sup> the issue was not whether the establishment of the taxpayers concerned was genuine but whether the MS concerned could impose tax restrictions on financing arrangements between related companies. The ECJ confirmed that the fact that the terms and conditions of financial transactions between related companies resident in different MSs deviate from those that would have been agreed upon between unrelated parties constitutes an objective and independently verifiable element for the purpose of determining whether the transaction in question represents, in whole or in part, a purely artificial arrangement. Legislation framed on that basis was proportionate on condition that the taxpayer was given the opportunity to provide evidence of any commercial justification for the arrangement...

It is equally vital in the interest of proportionality that the result of the relevant assessment by the tax authority can be made subject to an independent judicial review.<sup>106</sup>

#### 102.15.8 “Objectively comparable”

The wording of the test is settled law, for instance, *Stauffer*:

32. According to the case law, for national tax legislation such as that at issue in the main proceedings, ... to be regarded as compatible with the Treaty provisions on the free movement of capital, the difference in treatment must concern situations which are not objectively comparable...<sup>107</sup>

“Objectively comparable” is technical EU-law terminology which is used in the context of:

- (1) Free movement of capital
- (2) Discrimination<sup>108</sup>

CJEU are fond of the word “objective”. It seems to add little more than emphasis; but perhaps the point is that the answer is decided by an independent court and not by HMRC.

---

105 C-524/04.

106 COM(2007) 785 final

<http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:52007DC0785>

107 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439.

108 See 102.17 (Discrimination on grounds of nationality).

“Comparable” is the word always used in this context, but “substantially the same” would, I think, be more idiomatic English.<sup>109</sup>

“Objectively comparable” is a vague and evaluative expression.<sup>110</sup> The formula poses, rather than answers, the question of what is required. Where situations are not “comparable” the EU-law terminology is “objectively different”.

### 102.15.9 Proportionality

In *EC v UK*:

24. Thus the court has repeatedly held that the objectives of combating tax evasion and tax avoidance may justify a restriction of the free movement of capital. That restriction must, however, be appropriate for attaining those objectives and not go beyond what is necessary for attaining them ...

25. A national measure restricting the free movement of capital may thus be justified where it specifically targets wholly artificial arrangements which do not reflect economic reality and whose sole purpose is to avoid the tax normally payable on the profits generated by activities carried out on national territory

In *Stauffer*:

... justified by overriding reasons in the general interest, such as the need to safeguard the coherence of the tax system or effective fiscal supervision ... In order to be justified, moreover, the difference in treatment between

[1] charitable foundations with unlimited tax liability in Germany and  
[2] foundations of the same kind established in other member states must not go beyond what is necessary in order to attain the objective of the legislation in question.<sup>111</sup>

UK anti-avoidance provisions do not usually pass the proportionality test.  
ToA draft guidance notes:

109 This nuance of the word “comparable” appears in the expression “closely comparable” (meaning “more or less the same”).

110 Contrast the discussion of the proposition that people who are “relevantly equal” should pay the same amount of tax; see 1.3.1 (What is fairness).

111 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439 at [32].

The *ICI* case concerned the UK group relief legislation then at ICTA70/S258(5)(b) and the definition of holding company as a company whose business consists wholly or mainly in holding interests in UK resident subsidiaries; the court held that this type of rule was clearly not effective in focusing on artificiality.

For instance, in *Fisher v HMRC*:<sup>112</sup>

666. ... the appellants say that the ToA charge goes far beyond what is necessary to attain a legitimate objective. One of its objectives is to penalise those who have transferred assets abroad.<sup>113</sup> This penal nature is incompatible with any justification for the restrictions on the freedoms which result from the application...

668. HMRC argue the legislation is proportionate because it is closely targeted on situations in which the transferor has a tax avoidance motive. It does not apply to transactions undertaken purely for commercial reasons.

669. We disagree with HMRC. ... it operates to catch persons who establish in Gibraltar in order to take advantage of the more favourable tax regime but who have not done so using artificial means. It is not therefore closely targeted at those situations (artificiality as described in *Cadbury Schweppes*) which count as avoidance in European law but captures persons ... who exercise freedom of establishment rights ...

670. Further, even if the fight against avoidance of UK betting duty were to be a valid justification for the provisions, the provisions are not suitable for that objective and go far beyond it as the way in which the tax charged on the appellants is calculated goes far beyond the amount of betting duty avoided.

Similarly, the EC Communication provides:

... the adjustments to the taxable income as a result of the application of the anti-abuse rules should be limited to the extent that is attributable to the purely artificial arrangement. ...

---

112 [2014] UKFTT 804 (TC); the position will need to be reviewed when the case is final.

113 This broad statement needs some qualification: see 45.2 (Construction of ToA provisions

). An irony in *Fisher* is that the *taxpayers* were arguing that the provisions were penal, a proposition which would normally be supported by HMRC.

The need to prevent abuse is accepted as a reason for a restriction on EU freedoms only if the legislation is targeted so that it is limited to cases of abuse. The idea that anti-avoidance legislation should be limited in this way is something to which the UK government have paid lip-service but it has not been reflected in practice:

... at the moment [anti-avoidance] works like a drive-by shooting. You might hit your objective but you also hit a lot of other people.<sup>114</sup>

It will not surprise tax practitioners that when UK legislation is put to this test, it regularly fails. This is not an exclusively UK problem:

37. ...the legislation at issue here does not have the specific purpose of preventing wholly artificial arrangements, designed to circumvent German tax legislation, from attracting a tax benefit, but applies generally to any situation in which the parent company has its seat, for whatever reason, outside the Federal Republic of Germany. Such a situation does not, of itself, entail a risk of tax evasion, since such a company will in any event be subject to the tax legislation of the State in which it is established ....<sup>115</sup>

## 102.16 Other justifications for FoE/FMC restrictions

### 102.16.1 *Loss of revenue*

CJEU does not think much of this argument as a justification for a restriction on FoE or FMC. Settled case law provides:

reduction in tax revenue does not constitute an overriding reason in the public interest which may justify a measure which is in principle contrary to a fundamental freedom.<sup>116</sup>

### 102.16.2 *Prevent misdeclaration/fraudulent evasion*

CJEU does not think much of this, as a justification for a restriction on FoE or FMC, on matters within the EU. In the court's view the mutual assistance directive, now 2010/24/EU, allows national governments "to

---

114 Ussher and Walford, *National Treasure* (Demos, 2011)

[http://www.demos.co.uk/files/National\\_treasure\\_-\\_web.pdf?1299511925](http://www.demos.co.uk/files/National_treasure_-_web.pdf?1299511925)

115 *Lankhorst-Hohorst GmbH v Finanzamt Steinfurt* [2003] STC 607.

116 *Thin Cap Claimants v HMRC* [2007] STC 326 at [36].

obtain all the information that may be necessary to effect a correct assessment of a taxpayer's liability to tax".<sup>117</sup> Outside the EU, where the directive does not apply, this consideration has been allowed to justify restrictions.<sup>118</sup> But that may cease to be the case now that international information exchange has been improved.

### 102.16.3 Counteract non-residence tax advantage

In technical EU-law terminology:

**"Unlimited tax liability"** means liability to tax on worldwide income.

**"Limited tax liability"** means liability to tax on income from one state only.

So in principle a MS resident has:

- (1) unlimited tax liability in the residence state, paying tax on worldwide income; and
- (2) limited liability in other states, paying tax only on income with a source in that state.

*Mattner* concerned German gift tax allowance which applied where donor or donee was resident in Germany. If donor and donee were not resident in Germany, the allowance was not available but the taxpayers had the advantage that German gift tax applied only to property in Germany.

This was obviously a restriction on FMC. The CFEU held it was not justified:

40 ... the Finanzamt submits that if the [German statute] provided in such a case for the application of the same allowance to gifts between non-residents and gifts involving a resident, Ms Mattner would be able, by making use of the same tax advantages in her Member State of residence, in which she has unlimited tax liability, to benefit from multiple allowances.

41 On this point, the Court has already held, in its case-law on the free movement of capital and inheritance tax, that a national of a Member State cannot be deprived of the possibility of relying on the provisions

---

117 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439 at [50].

118 For an example, see *Établissements Rimbaud SA v Directeur general des impôts* [2010] STC 2757 where a restriction on FMC in Liechtenstein was held justifiable because the Mutual Assistance Directive did not apply to Liechtenstein.

of the Treaty on the ground that he is profiting from tax advantages which are legally provided for by the rules in force in a Member State other than his State of residence ....

42 In any event, the Member State in which the immovable property which is the subject of the gift is located cannot, in order to justify a restriction on the free movement of capital arising from its own legislation, rely on the possibility, beyond its control, of the donee benefiting from a similar allowance by another Member State, such as that in which the donor and the donee resided on the date of the gift, which might wholly or partly offset the loss incurred by the donee as a result of the smaller allowance when calculating the gift tax payable in the former Member State ...

43 A Member State cannot rely on the existence of an advantage granted unilaterally by another Member State – in this case the Member State in which the donor and the donee reside – to escape its obligations under the Treaty, in particular under the Treaty provisions on the free movement of capital ...

The issue was relitigated, with the same result, in *Commission v Germany*.<sup>119</sup> The CFE comment on this case:

8. ... the Courts decision against Germany did not come as a surprise, as the Court could confirm its judgments in *Mattner* and *Welte*<sup>120</sup> and find that the different tax allowances under the limited and unlimited German inheritance tax violated the free movement of capital. ...

9. Finally, some issues remain unclear. While it seems clear that the Court's holdings cover EEA situations, nothing was said regarding third-countries. In *Scheunemann*, for example, the Court found that business property situated in Canada can be valued for inheritance tax reasons at a higher level than property situated in Germany, as the primarily affected freedom was the freedom of establishment. In *Commission v Spain*, however, the restriction was found in the comparison between resident and non-resident heirs, donees and decedents, regardless of their place of residence, and between immovable property located in Spain or abroad, regardless of the location of the property abroad. As the cases discussed in this Opinion Statement were decided in the context of the free movement of capital

---

119 C-211/13; unfortunately the case is not available in English.

120 C-181/12.

... they undoubtedly have an impact on situations in respect of third countries ...<sup>121</sup>

#### 102.16.4 *A balanced allocation of power to tax*

This was recognised as a possible justification in the *Thin Cap* case [2011] STC 738 at [55].

#### 102.16.5 *Cohesion*

In *Stauffer* the ECJ said:

52 ... the Court has acknowledged that the need to safeguard the cohesion of a tax system may justify a restriction on the exercise of the fundamental freedoms guaranteed by the Treaty.<sup>122</sup>

I am not sure what is meant by the terms “coherence” or “cohesion” of the tax system, if it is anything other than a general term for the more specific needs set out above: the need to collect enough tax, and to prevent abuse. In OECD papers the word is used to refer to the avoidance of double taxation and double non-taxation.<sup>123</sup> Whatever it means, the concept does not justify much. It did not help the German government in *Stauffer*. In *Thin Cap* the Court of Appeal concluded:

The permissible scope of the justification of the need to maintain the coherence of the tax system was held to be very narrow indeed, so narrow as to approach vanishing point.<sup>124</sup>

### 102.17 **Discrimination on grounds of nationality**

Article 18 TFEU provides:

---

121 CFE Opinion Statement ECJ-TF 1/2015 on cases C-127/12 and C-211/13 on inheritance taxation (May 2015) (some footnotes are omitted here).

<http://taxadviserseurope.org/blog/portfolio-items/opinion-statement-ecj-tf-1-2015-on-the-cases-c-127-12-and-c-211-13-concerning-inheritance-taxation/>

122 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439.

123 Eg OECD, “Action Plan on Base Erosion and Profit shifting” (2013) <http://www.oecd.org/ctp/BEPSActionPlan.pdf>

124 *Thin Cap Claimants v HMRC* [2011] STC 738 at 26. The point will need to be reviewed when the case is final.

Within the scope of application of the Treaties, and without prejudice to any special provisions contained therein, any discrimination on grounds of nationality shall be prohibited...

I refer to discrimination on grounds of nationality as “**nationality-discrimination**”.

Nationality-discrimination would normally constitute a restriction on FoE or FMC, so the prohibitions overlap. But it is possible to envisage discrimination which not a restriction on FoE or FMC, in which case article 18 is needed.

#### 102.17.1 *Overt and covert discrimination*

It is settled case law that:

the rules regarding equal treatment forbid not only overt discrimination by reason of nationality but also all covert forms of discrimination which, by the application of other criteria of differentiation, lead in fact to the same result.<sup>125</sup>

Direct and indirect discrimination would be the more natural English expression.

In particular, discrimination by reason of non-residence may be indirect (covert) discrimination by reason of nationality, as residence may serve as a proxy for nationality. But in these cases FoE or FMC is also likely to be in point; I am not sure what it adds to put the complaint under the banner of nationality-discrimination.

#### 102.17.2 *Comparable situations v different situations*

In *Royal Bank of Scotland v Greek State*<sup>126</sup> the ECJ said:

26. ... It is settled case law that discrimination consists in the application of different rules to comparable situations or in the application of the same rule to different situations.

Similarly, in *Gielen*<sup>127</sup> the ECJ said:

---

125 *Gielen v Staatssecretaris van Financiën* [2010] STC 1053 at [37].

126 [2000] STC 733.

127 *Gielen v Staatssecretaris van Financiën* [2010] STC 1053.

38. ... discrimination can arise only through the application of different rules to comparable situations or the application of the same rule to different situations.

“Comparable” situations is a technical EU-law term meaning “effectively the same situations”, ie not relevantly different.<sup>128</sup>

The question is when situations are “comparable” and when are they different.

In *Royal Bank of Scotland v Greek State*<sup>129</sup> the ECJ said:

27. As far as direct taxation is concerned, the court has held, in cases relating to the taxation of income of natural persons, that the situations of residents and non-residents in a given state are not generally comparable, since there are objective differences between them from the point of view of the source of the income and the possibility of taking account of their ability to pay tax or their personal and family circumstances... However, it has explained that, in the case of a tax advantage denied to non-residents, a difference in treatment between the two categories of taxpayer might constitute discrimination within the meaning of the EC Treaty where there is no objective difference such as to justify different treatment on this point as between the two categories of taxpayers.

Similarly:

29. It is true that companies having their seat in Greece are taxed there on the basis of their worldwide income (unlimited tax liability) whereas foreign companies carrying on business in that state through a permanent establishment are subject to tax there only on the basis of profits which the permanent establishment earns there (limited tax liability). However, that circumstance, which arises from the limited fiscal sovereignty of the state in which the income arises in relation to that of the state in which the company has its seat is not such as to prevent the two categories of companies from being considered, all other things being equal, as being in a comparable situation as regards the method of determining the taxable base.

30. Consequently, national legislation, such as the Greek tax legislation, which, for the purposes of taxing income, does not establish, as between

---

128 See 102.15.8 (“Objectively comparable”).

129 [2000] STC 733.

companies having their seat in Greece and companies which, having their seat in another member state, have a permanent establishment in Greece, any distinction such as to justify, in relation to the same taxation, a difference in treatment between the two categories of companies and which establishes a difference in treatment as regards the rate of income tax, introduces discrimination against companies having their seat in another member state in so far as it imposes on them, irrespective of their legal form and the nature of the shares which they issue, a rate of taxation of 40% whereas the rate of 35% applies only to companies whose seat is in Greece.

A MS may allow tax advantage for non-residents over residents. Of course the rule could hardly be otherwise, given the basic structure of international tax, under which:

- (1) residents are subject to tax on foreign income and non-residents are not;
  - (2) residents are often subject to tax at a higher rate than non-residents.
- But a MS may not allow tax advantage for residents over non-residents. In the former case there are relevant “differences” and in the latter case there are no relevant “differences”. The policy based nature of the distinction is evident.

### 102.17.3 *Discrimination against non-residents*

In *RBS*, the ECJ said:

28. As far as the method of determining the taxable base is concerned, the Greek tax legislation does not establish, as between companies having their seat in Greece and companies which, whilst having their seat in another member state, have a permanent establishment in Greece, any distinction such as to justify a difference of treatment between the two categories of companies. As the Commission points out ... tax is calculated, in the case of both Greek and foreign companies, on net income or profits after deduction of the part thereof corresponding to non-taxable receipts, this being determined according to that method both for Greek companies and for foreign companies.<sup>130</sup>

---

130 *Royal Bank of Scotland v Greek State* [2000] STC 733.

In *Gielen*<sup>131</sup> the ECJ said:

40. ... under the national legislation at issue in the main proceedings, a resident taxable business operator may include, for the purposes of calculation under the hours test which gives rise to the right to the self-employed person's deduction, both hours worked in another member state and those worked in the Netherlands, whereas a non-resident taxable business operator can include only hours worked in the Netherlands in that calculation.

41. ... the Netherlands government recognises in its written observations that this amounts to discrimination based on place of residence.

42. It must therefore be held that, with regard to satisfaction of the 'hours test' for the purposes of the self-employed person's deduction, the national legislation at issue in the main proceedings treats taxable persons differently depending on whether or not they are resident in the Netherlands....

43. More specifically, the court has indeed accepted, in cases relating to taxation of the income of natural persons, that the situation of residents and the situation of non-residents in a given member state are not generally comparable, since there are objective differences between them, both from the point of view of the source of the income and from the point of view of their ability to pay tax or the possibility of taking account of their personal and family circumstances...

44. However, the court has made it clear that, in the case of a tax advantage which is not available to a non-resident, a difference in treatment as between the two categories of taxpayer may constitute discrimination for the purposes of the Treaty on the Functioning of the European Union where there is no objective difference between those categories such as to justify different treatment in that regard ...

45. The Hoge Raad points out that the self-employed person's deduction is not related to the personal capacity of taxable persons but rather to the nature of their activity. That deduction is granted to business operators whose main activity is running their business, which is demonstrated, inter alia, by satisfying the 'hours test'.

46. In so far as that deduction is granted to all taxable business operators who have satisfied that test, inter alia, it must be held that it is not relevant in that regard to make a distinction according to whether those

---

131 *Gielen v Staatssecretaris van Financiën* [2010] STC 1053.

business operators performed their work in the Netherlands or in another member state.

47. Consequently, as was stated by the Advocate General in point 39 of his opinion, for the purposes of the self-employed person's deduction, the situation of non-resident taxable persons is comparable to that of resident taxable persons...

48. In those circumstances, it must be concluded that national legislation which, for the purposes of a tax advantage, such as the self-employed person's deduction at issue in the main proceedings, uses an 'hours test' in such a way as to prevent non-resident taxable persons from including hours worked in another member state risks operating primarily to the detriment of those taxable persons. Consequently, such legislation constitutes indirect discrimination on grounds of nationality for the purposes of art 49 TFEU.

## 102.18 Option to be treated as resident

In *Gielen*<sup>132</sup> the ECJ said:

49. That conclusion [breach of FoE] is not called into question by the argument that the option to be treated as a resident taxable person is capable of remedying the discrimination at issue.

50. It should be noted, at the outset, that the option to be treated as a resident taxable person provides non-resident taxable persons, such as Mr Gielen, with a choice between a discriminatory tax regime and one which is ostensibly not discriminatory.

51. It has, however, to be pointed out in that regard that such a choice is not, in the present case, capable of remedying the discriminatory effects of the first of those two tax regimes.

52. As the Advocate General stated, in essence, in point 52 of his opinion, if such a choice were to be recognised as having the effect described, the consequence would be to validate a tax regime which, in itself, remains contrary to art 49 TFEU [FoE] by reason of its discriminatory nature.

53. In addition, as the court has already had the opportunity to clarify, the fact that a national scheme which restricts the freedom of establishment is optional does not mean that it is not incompatible with European Union law...

---

132 *Gielen v Staatssecretaris van Financiën* [2010] STC 1053.

54. Consequently, the choice offered, in the dispute in the main proceedings, to non-resident taxable persons by means of the option to be treated as resident taxable persons does not serve to neutralise the discrimination established in para 48 above.

55. It follows from all of the foregoing that art 49 TFEU [FoE] precludes national legislation which, in relation to the granting of a tax advantage, such as the self-employed person's deduction at issue in the main proceedings, is discriminatory towards non-resident taxable persons, even though those taxable persons may opt for the regime applicable to resident taxable persons in order to benefit from that tax advantage.

Although the option did not remedy the defect in that case, it is possible that taxpayer options may do so in other cases.

The CFE comment on a similar issue in the Opinion statement mentioned above on *Commission v Germany*:

8. ... Germany has amended its legislation to remedy the discrimination against foreigners and the amendment was passed on December 7, 2011. Under the new provisions, heirs or donees who fall under the limited inheritance or gift tax liability in Germany and are resident in a member state of the EU or the EEA may opt for unlimited German inheritance or gift tax liability. However, the revision did not meet the deadline set by the Commission in the current case so that the Court ruled on the "old" system, and it also seems that the Commission was not completely satisfied by the German amendment.<sup>133</sup> Indeed, and as the Commission points out, it seems that exercising the "new" option under German law could lead to an additional burden with respect to non-German assets.<sup>134</sup>

This has interesting implications for IHT spouse exemption deemed domicile.

## 102.19 State aid

133 Footnote original: See also the Commission's press release "Taxation: Commission refers Germany to the Court of Justice for discriminatory inheritance tax provisions", IP/12/1018 (27 September 2012).

134 CFE Opinion Statement ECJ-TF 1/2015 on cases C-127/12 and C-211/13 on inheritance taxation (May 2015)  
<http://taxadviserseurope.org/wp-content/uploads/2018/05/CFE-Opinion-Statement-ECJ-TF-1-2015-on-two-inheritance-taxation-cases.pdf>

Article 107(1) TFEU provides the general rule.

Save as otherwise provided in the Treaties, any aid granted by a Member State or through State resources in any form whatsoever which distorts or threatens to distort competition by favouring certain undertakings or the production of certain goods shall, in so far as it affects trade between Member States, be incompatible with the internal market.

Article 107(2)(3) sets out limited exceptions not discussed here.<sup>135</sup>

EU State Aid rules constitute a significant restriction on the UK's jurisdiction over direct taxation.

The European Commission has published guidance,<sup>136</sup> according to which unjustified exceptions to tax rules may constitute State aid.

---

135 “2. The following shall be compatible with the internal market:

- (a) aid having a social character, granted to individual consumers, provided that such aid is granted without discrimination related to the origin of the products concerned;
- (b) aid to make good the damage caused by natural disasters or exceptional occurrences;...

3. The following may be considered to be compatible with the internal market:

- (a) aid to promote the economic development of areas where the standard of living is abnormally low or where there is serious underemployment, and of the regions referred to in Article 349, in view of their structural, economic and social situation;
- (b) aid to promote the execution of an important project of common European interest or to remedy a serious disturbance in the economy of a Member State;
- (c) aid to facilitate the development of certain economic activities or of certain economic areas, where such aid does not adversely affect trading conditions to an extent contrary to the common interest;
- (d) aid to promote culture and heritage conservation where such aid does not affect trading conditions and competition in the Union to an extent that is contrary to the common interest;
- (e) such other categories of aid as may be specified by decision of the Council on a proposal from the Commission.”

136 EC notice on the application of the State aid rules to measures relating to direct business taxation (1998), OJ C 384/98; and see EC, “Report on the implementation of the Commission notice on the application of the state aid rules to measures relating to direct business taxation” (2004), C(2004)434

[http://ec.europa.eu/competition/state\\_aid/studies\\_reports/rapportaidesfiscales\\_en.pdf](http://ec.europa.eu/competition/state_aid/studies_reports/rapportaidesfiscales_en.pdf)

There is an interesting interaction with Scottish devolution. The UK government cannot set a corporation tax rate that varies across the UK: this would be regarded as providing preferential treatment for different areas. Different rates can only be achieved by devolving tax powers. To be EU-law compliant the proposal must meet the criteria set out in *Portugal v Commission*, (the Azores case): institutional, procedural and fiscal autonomy.<sup>137</sup>

Gibraltar's proposed corporation tax regime was held to breach State Aid rules in *Commission v Government of Gibraltar and UK*.<sup>138</sup>

State Aid may sometimes be convenient for the government in that it provides an excuse for actions which would otherwise be controversial.<sup>139</sup>

The EC summarise the relevant law:<sup>140</sup>

[The EC cite Article 107(1) TFEU and continue]: The qualification of a measure as aid within the meaning of Article 107(1) therefore requires the following cumulative conditions to be met:

- (i) the measure must be imputable to the State and financed through State resources;
- (ii) it must confer an advantage on its recipient;
- (iii) that advantage must be selective; and
- (iv) the measure must distort or threaten to distort competition and have the potential to affect trade between Member States.

The main question in the present case is whether the rulings confer a selective advantage upon Apple in so far as it results in a lowering of its tax liability in Ireland. If the existence of a selective advantage can be shown, the presence of the other two conditions for a finding of State aid under Article 107(1) TFEU is relatively straightforward.

As regards the imputability of the measure, the contested rulings were issued by Irish Revenue, which is part of the Irish State. In the present case, those rulings were used by Apple to calculate its corporate income tax basis in Ireland. Irish Revenue has accepted those calculations and on that basis set the tax due.

---

137 Case C-88/03.

138 Cases C-106/09, C-107/09.

139 See 6.1 (Trustees and residence: Introduction).

140 [http://ec.europa.eu/competition/state\\_aid/cases/253200/253200\\_1582634\\_87\\_2.pdf](http://ec.europa.eu/competition/state_aid/cases/253200/253200_1582634_87_2.pdf) at para 3.1. See Lyal, "Transfer Pricing Rules and State Aid", 38 *Fordham Int'l L.J.* 1017 (2015).

As regards the measure's financing through State resources, provided it can be shown that the contested rulings resulted in a lowering of Apple's tax liability in Ireland, it can also be concluded that those rulings give rise to a loss of State resources. That is because any reduction of tax for Apple results in a loss of tax revenue that otherwise would have been available to Ireland.<sup>141</sup>

As regards the fourth condition for a finding of aid, Apple is a globally active firm, operating in various Member States, so that any aid in its favour distorts or threatens to distort competition and has the potential to affect intra-Union trade.

Finally, as regards the presence of a selective advantage, it follows from the case-law that the notion of aid encompasses not only positive benefits, but also measures which in various forms mitigate the charges which are normally included in the budget of an undertaking.<sup>142</sup> At the same token, treating taxpayers on a discretionary basis may mean that the individual application of a general measure takes on the features of a selective measure, particularly, where the exercise of the discretionary power goes beyond the simple management of tax revenue by reference to objective criteria.<sup>143</sup>

Accordingly, rulings should not have the effect of granting the undertakings concerned lower taxation than other undertakings in a similar legal and factual situation. Tax authorities, by accepting that multinational companies depart from market conditions in setting the commercial conditions of intra-group transactions through a discretionary practice of tax rulings, may renounce taxable revenues in their jurisdiction and thereby forego State resources, in particular when accepting commercial conditions which depart from conditions prevailing between prudent independent operators.<sup>144</sup>

---

141 The EC cite: Cases C-106/09 P and C-107/09 P, *Commission and Spain v Government of Gibraltar and UK* para 72.15.

142 The EC cite: Case C-143/99, *Adria-Wien Pipeline* [2001] ECR I-8365 para 38.

143 The EC cite: Case C-241/94 *France v Commission (Kimberly Clark Sopalin)* [1996] ECR I-4551, paras 23 and 24.

144 Footnote original: If, instead of issuing a ruling, the tax administration simply accepted a method of taxation based on prices which depart from conditions prevailing between prudent independent operators, there would also be State aid. The main problem is not the ruling as such, but the acceptance of a method of taxation which does not reflect market principles.

In 2016 the EC found a breach of State Aid rules for an (allegedly) over-generous tax ruling relating to Apple, in Ireland. The ruling concerned the apportionment of profits between a PE in Ireland, and the company's head office (not in Ireland). Further rulings will follow for investigations on Amazon (Luxembourg) and Starbucks (Netherlands).

The dispute raises a heady mix of tax law,<sup>145</sup> state aid law, and politics. Apple have won the first round, but the case is not yet final.<sup>146</sup> It will be interesting to see how the matter develops.

This may not directly concerns practitioners in the context of the issues discussed in this book, but the wider ramifications will be significant. If nothing else, topics of international tax issues and avoidance will remain high on the agenda for several years.

## 102.20 IHT and EU law

In December 2011 the EC stated:

... Some Member States apply a higher tax rate if the assets, the deceased and/or the heir are located outside their territory. In such cases, EU law is clear: Member States are obliged to respect the basic principles of non-discrimination and free movement set out in the Treaties...

### Next steps

... In 3 years time, the Commission will present an evaluation report showing how the situation has evolved, and decide on this basis whether further measures are necessary at national or EU level. Meanwhile, the Commission, as guardian of the Treaties, is continuing to take the necessary steps to act against discriminatory features of Member States taxation rules.<sup>147</sup>

IHT is gradually becoming EU-law compliant, with changes including the extension of agricultural property relief to land in the EU (2009) and the

---

145 Strictly, Irish tax law, but the applicable principles are those of international tax law.

146 *Ireland v Commission* T-778/16.

147 Press release IP/11/1551. For the Communication, Recommendation and Staff Working Paper, see:

[http://ec.europa.eu/taxation\\_customs/taxation/personal\\_tax/inheritance/index\\_en.htm](http://ec.europa.eu/taxation_customs/taxation/personal_tax/inheritance/index_en.htm)

extension of IHT charity relief to EU charities (2010 – 2011).<sup>148</sup>

An EC Working Paper provides a helpful summary of case law relevant to IHT as at December 2011.<sup>149</sup> CJEU found a breach of EU law in 8 of the 10 reported cases. The EC’s success rate is comparable to that of HMRC in the UK courts.

### 102.20.1 Discrimination against non-residents

A number of cases involved more favourable rules given to residents of the domestic MS as against residents of other MS: these have regularly been held to breach FMC or FoE. *Mattner* has been discussed above. Other examples are:

*Barbier*:<sup>150</sup> Domestic IHT law allowed a deduction from the value of an estate if the deceased lived in that Member State at the time of death but not if the deceased resided in another Member State. The rule breached FMC. The value of an obligation attached to the property should be taken into account for tax purposes irrespective of the Member State of residence of the deceased.

*Eckelkamp*:<sup>151</sup> Domestic IHT law disallowed a deduction for charges on immovable Belgium property owned by non-resident. The rule breached FMC.

*Arens-Sikken*:<sup>152</sup> Domestic IHT law allows an heir is to deduct debts relating to the property inherited only where the person whose estate is being administered was residing, at the time of death, in the Member State in which the property is situated. The rule breached FMC.

---

148 See Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), para 3.4 (Tax definition of charity) online version <https://www.taxationofcharities.co.uk>

149 Commission Staff Working Paper, “Non-discriminatory inheritance tax systems: principles drawn from EU case-law” [https://ec.europa.eu/taxation\\_customs/sites/taxation/files/resources/documents/taxation/personal\\_tax/inheritance/working\\_paper\\_en.pdf](https://ec.europa.eu/taxation_customs/sites/taxation/files/resources/documents/taxation/personal_tax/inheritance/working_paper_en.pdf)

150 Case C-364/01.

151 Case C-11/07.

152 Case C-43/07.

*Van Hilten-Van Der Heijden*:<sup>153</sup> Domestic IHT law taxed the estate of a national who dies within 10 years of ceasing to be resident in that MS: rule compatible with FMC, particularly if the legislation in question allowed relief for inheritance taxes levied by other States. The important point was that the rule did not distinguish between residents and non-residents.

Thus UK deemed domicile rules are EU-law compliant.

#### 102.20.2 *Discrimination against foreign property*

*Jäger*:<sup>154</sup> Domestic IHT law allowed relief (comparable to IHT agricultural property relief) for agricultural land in Germany. The rule breached FMC.

For practical implications, see 71.4.2 (MS government securities).

#### 102.20.3 *Miscellaneous*

*Geurts*:<sup>155</sup> Domestic IHT law allowed an exemption for family undertakings which employed at least five workers in the same Member State. The rule breached FoE.

*Halley*:<sup>156</sup> Domestic IHT law provided a limitation period for the tax authority to challenge valuations in IHT returns. The period was usually 2 years. However, in the case of shares in a company resident outside Belgium, the period was 10 years. The rule breached FMC.

### 102.21 Gibraltar

Article 355(3) TFEU provides:

The provisions of the Treaties shall apply to the European territories for whose external relations a Member State is responsible.

This includes Gibraltar. Declaration 55 of the Lisbon Treaty provides:

The Treaties apply to Gibraltar as a European territory for whose external relations a Member State is responsible.

So the general rule for Gibraltar is that EU law applies to its territory.

---

153 Case C-513/03 [2008] STC 1245.

154 *Jäger v Finanzamt Kusel-Landstuhl* Case C-256/06.

155 Case C-464/05.

156 Case C-132/10.

However, specific exceptions have been made for Gibraltar in the UK Act of Accession, such as the exclusion of Gibraltar from the customs territory. Article 28 of the UK Act of Accession<sup>157</sup> provides:

Acts of the institutions of the Community relating to the products in Annex II to the EEC Treaty and the products subject, on importation into the Community, to specific rules as a result of the implementation of the common agricultural policy, as well as the acts on the harmonization of legislation of Member States concerning turnover taxes, shall not apply to Gibraltar unless the Council, acting unanimously on a proposal from the Commission, provides otherwise.

That exclusion entails the inapplicability of the Treaty provisions and secondary legislation on trade in goods, unless otherwise expressly provided.<sup>158</sup>

The status of Gibraltar in EU law is discussed in *Gibraltar Betting & Gaming Association v Secretary of State* [2014] EWHC 3236 (Admin). Further consideration will be needed when the *Fisher* case is final.

## 102.22 Channel Islands and Isle of Man

Article 355(5)(c) TFEU provides:

the Treaties shall apply to the Channel Islands and the Isle of Man only to the extent necessary to ensure the implementation of the arrangements for those islands set out in the Treaty concerning the accession of new Member States to the European Economic Community and to the European Atomic Energy Community signed on 22 January 1972.

Protocol 3 to the UK Act of Accession provides:

### **Protocol No 3 on the Channel Islands and the Isle of Man**

#### *Article 1*

1. The Community rules on customs matters and quantitative restrictions, in particular those of the Act of Accession, shall apply to the

---

<sup>157</sup> The act concerning the conditions of accession for the Kingdom of Denmark, Ireland and the UK of Great Britain and Northern Ireland and the adjustments to the Treaties (OJ 1972, L73/14).

<sup>158</sup> *Commission v UK* Case C-30/01 at [60].

Channel Islands and the Isle of Man under the same conditions as they apply to the UK. In particular, customs duties and charges having equivalent effect between those territories and the Community as originally constituted and between those territories and the new Member States shall be progressively reduced in accordance with the timetable laid down in Articles 32 and 36 of the Act of Accession. The Common Customs Tariff and the ECSC unified tariff shall be progressively applied in accordance with the timetable laid down in Articles 39 and 59 of the Act of Accession, and account being taken of Articles 109, 110 and 119 of that Act.

2. In respect of agricultural products and products processed therefrom which are the subject of a special trade regime, the levies and other import measures laid down in Community rules and applicable by the UK shall be applied to third countries.

Such provisions of Community rules, in particular those of the Act of Accession, as are necessary to allow free movement and observance of normal conditions of competition in trade in these products shall - also be applicable.

The Council, acting by a qualified majority on a proposal from the Commission, shall determine the conditions under which the provisions referred to in the preceding subparagraphs shall be applicable to these territories.

#### *Article 2*

The rights enjoyed by Channel Islanders or Manxmen in the UK shall not be affected by naturalized or registered in the island in question; but such a person shall not for this purpose be regarded as a Channel Islander or Manxman if he, a parent or a grandparent was born, adopted, naturalized or registered in the UK. Nor shall he be so the Act of Accession. However, such persons shall not benefit from Community provisions relating to the free movement of persons and services.

#### *Article 3*

The provisions of the Euratom Treaty applicable to persons or undertakings within the meaning of Article 196 of that Treaty shall apply to those persons or undertakings when they are established in the aforementioned territories.

#### *Article 4*

The authorities of these territories shall apply the same treatment to all natural and legal persons of the Community.

#### *Article 5*

If, during the application of the arrangements defined in this Protocol,

difficulties appear on either side in relations between the Community and these territories, the Commission shall without delay propose to the Council such safeguard measures as it believes necessary, specifying their terms and conditions of application. The Council shall act by a qualified majority within one month.

*Article 6*

In this Protocol, Channel Islander or Manxman shall mean any citizen of the UK and Colonies who holds that citizenship by virtue of the fact that he, a parent or grandparent was born, adopted, regarded if he has at any time been ordinarily resident in the UK for five years. The administrative arrangements necessary to identify these persons will be notified to the Commission.

## CHAPTER ONE HUNDRED AND THREE

# DOUBLE TAXATION ARRANGEMENTS: INTRODUCTION

103.1

103.15.2 Contracting jurisdiction/  
signatory

### *Cross references*

In this chapter I consider some general aspects of DTAs. The following chapters consider:

- (1) anti-abuse rules (including Savings Clauses)
- (2) foreign tax credit relief

DT exemptions for specific types of income/gains are considered in the chapter on that topic, see:

<b>DT relief</b>	<b>Para</b>	s.720 income	46.24
Trading income	20.22	s.731 income	47.57
Property income	23.7	Offshore income gains	64.24
Interest income	25.26	Accrued income scheme	27.16
Dividend income	29.9	Capital gains	53.22
Royalties	31.16	s.86 gains	56.20
Misc Sweep-up Income	32.16	s.87 gain	57.60
Employment income	36.2	s.3 gain	60.38
Pension income	37.8		
s.624 income	44.18		

IHT treaties are considered separately:

<b>Topic</b>	<b>See para</b>	South Africa	111.1
IHT DTAs: Introduction	108.1	Switzerland	112.1
India, Pakistan, Italy, France	109.1	USA	113.1
Netherlands	110.1		

The following topics are considered elsewhere:

- 8.1 (Treaty-residence: Introduction)
- 82.24 (DT relief: Partnership)

39.7 (DT relief) - IP trusts

For discretionary trusts, see 38.9 (Discretionary trust transparency reliefs); 38.12 (UK trust, non-resident beneficiary: DT relief)

For charities, see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations*<sup>1</sup>

I do not consider corporation tax.

I do not consider EU law aspects of DTAs, though I hope to address some post-Brexit issues in a future edition.

## 103.1 DT reliefs: Introduction

There are three model double tax treaties:

Short name	Published by	Full name
OECD Model	OECD	Model Tax Convention on Income and on Capital <sup>2</sup>
UN Model	United Nations	Model Double Taxation Convention between Developed and Developing Countries
US Model	United States	Model Income Tax Convention

The discussion in this book is mainly by reference to the OECD Model. This has been the basis for tax treaties between developed countries since published (in draft in 1963, and finally in 1977). UK DTAs since 1963 have been based on OECD Model. But fortunately all 3 Models have much in common.

A new edition of the OECD Model was published in 1992. Since then OECD has published updates rather than a new edition. There have been updates every 2 or 3 years.

The US Model was revised in 1996, 2006 and 2016.<sup>3</sup> I do not consider this Model as such, but at points do consider the USA/UK DTA (2001).

OECD publish a lengthy commentary on the OECD Model (“**OECD Commentary**”); the “condensed” version is nearly 700 pages. The UN also publish a commentary. The US have published commentaries on:

---

1 12<sup>th</sup> ed, 2019/20, Chapter 14 (Double Taxation Treaties and Charities) online version <https://www.taxationofcharities.co.uk>

2 Where it is necessary to distinguish this from the OECD IHT Model, I refer to it as the “**IT/CG model**”.

3 <https://www.irs.gov/businesses/international-businesses/united-states-model-tax-treaty-documents>

- the general US Model (“**US Model DTA Technical Explanation**”)<sup>4</sup>
- the USA/UK DTA (“**USA/UK DTA Technical Explanation**”)<sup>5</sup>

A full discussion of the OECD Model would need a volume for every article, except art 7 (business profits) which would require several volumes. These books have been written, and the total would fill a bookcase. This literature includes a book on art 16 (directors fees) which is only a single sentence of 44 words. The OECD Model is used worldwide, so we benefit in the UK from scholars, practitioners, Revenue authorities, and case law, across the world - at least so far as written in English.

Of these books, *Vogel on Double Taxation Conventions* is the most frequently cited, with a judicial accolade in *O’Brien v Quigley*:<sup>6</sup>

the academic work which I found most helpful of all of the documents put before the Court ... (no less than fifty-five in number)

But applying the treaty to UK tax legislation is of course a UK domestic law exercise.<sup>7</sup>

I only consider the UK side of the matter, ie whether a DTA provides exemption from UK tax and whether foreign tax can be used as a credit against UK tax. In any particular case it will also be necessary to consider the foreign tax position.

I refer at points to the UN Model and to specific treaties. In any particular case the DTA concerned would need to be reviewed.<sup>8</sup>

The UK’s network of DTAs is extensive, there are more than 100 treaties. But there are gaps: for example, there is no full treaty with Brazil, and none at all with Peru.

---

4 <https://www.irs.gov/businesses/international-businesses/united-states-model-tax-treaty-documents> This has commentaries on the 1996 and 2006 US Models, but not on the 2016 Model.

5 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf> The Courts have found this “helpful”: *Aozora GMAC Investment (R, oao) v HMRC* [2017] EWHC 2881 (Admin) at [27].

6 [2013] IEHC 398 at [41].

7 See Avery Jones, “The Interaction Between Tax Treaty Provisions and Domestic Law” in *Tax Treaties and Domestic Law* (2006) ed Maisto, IBFD.

8 Is this so obvious that it does not need saying? It is not: see *Evans v PricewaterhouseCoopers* discussed at 8.18.6 (A cautionary tale).

## 103.2 Treaty terminology

OECD (both in the Model and in other materials, such as the Commentary and MLI) has a vocabulary, sometimes a technical (specialist) vocabulary, which can be unidiomatic.<sup>9</sup> But when discussing the Model, it is generally best to adopt the OECD dialect, because the alternative ends up even more confusing.

In the context of DTAs, the terms treaty/convention/arrangement/agreement are synonymous. OECD Model use the word “convention” and UK tax legislation uses the term “double taxation arrangements”. I prefer the word “treaty” as it seems clearest, but adopt the abbreviation DTA which has become standard usage.

The State where the income arises is the “**source State**” and the State where the individual is treaty-resident is the “**residence State**”.

### 103.2.1 “State”

The OECD model refers to a “Contracting State” but I abbreviate this to “**treaty State**” or just “**State**” and where that State is not the UK, I refer to it as the “**foreign State**”.

UK legislation generally uses the word “territory” which is wider than “State”, and includes:

- (1) Subdivisions and local authorities
- (2) Crown dependencies and British Overseas Territories, which are territories but not (independent) States; the UK is responsible for their international relations<sup>10</sup>

OECD writes “State” with an initial capital;<sup>11</sup> I follow that here.

## 103.3 Types of double taxation

The OECD Commentary begins:

International juridical double taxation can be generally defined as the imposition of comparable taxes in two (or more) States on the same taxpayer in respect of the same subject matter and for identical periods.

---

9 But OECD- English has not drifted as far from British English as EU-law English: see 102.3 (EU law terminology).

10 See 103.23 (Channel Islands/IoM DTAs).

11 Following Fowler’s Modern English Usage.

*Anson v HMRC* adopts this definition:<sup>12</sup>

[*Juridical* double taxation] is usually considered to arise where two jurisdictions impose income taxes on the same person in respect of the same income.

[*Economic* double taxation] is usually considered to arise where there is taxation of the same or derivative income in separate hands.

The purposes of the OECD Model, as stated in its preamble, include “the avoidance of double taxation”.<sup>13</sup> In *Anson v HMRC*:<sup>14</sup>

The preamble does not indicate more precisely what is meant by double taxation: in particular, whether the Convention is restricted to ‘juridical double taxation’, or can also extend to ‘economic double taxation’.

But it is well established that the OECD Model does provide relief in cases where taxes are imposed in two States on different taxpayers in respect of the same subject matter.<sup>15</sup>

The position is different where:

- (1) Income is received by a company in State A and taxed in State A; and
- (2) The income is distributed to shareholders in State B and taxed in State B.

That is also a type of economic double taxation. But the Courts regard it with equanimity. The point arise in *Memec v HMRC*:

In so far as plc is claiming that it has the merits on its side, I do not think that these points carry much weight. Prior to the agreement, plc accepts, economic double taxation was suffered through the group structure it had chosen to adopt. It is common ground that the new structure has achieved its intended purpose of reducing the burden of German tax by eliminating German corporation tax in respect of plc's share of the profits of the silent partnership. Whether the new structure has achieved the further benefit for plc of a credit against UK corporation tax for the trade tax paid by the subsidiaries seems to me to be a dry question of

---

12 [2015] UKSC 44 at [57]. The definition in OECD Commentary on article 23A and 23B, para 1, 2 is (more or less) the same.

13 See 104.2 (DTA title/preamble/purpose).

14 [2015] UKSC 44 at [57].

15 *Anson* is one such case; see 86.34.2 (LLC: Opaque). For another example, see 106.5.5 (Tax on different person/time).

law unencumbered by the merits.<sup>16</sup>

That is right, because even in a purely domestic context, eg a UK company distributes its profits to UK shareholders, there is an element of (domestic) double taxation: CT on the company and IT on the shareholders.

There are, in short, different types of economic double taxation, some are relieved and some are not. To ask whether the OECD Model applies to economic double taxation is to approach the issue at a high a level of generality. To answer the question in any particular case is a matter of descending to construe the relevant provisions (“a dry question of law unencumbered by the merits”).

### 103.4 DT exemption/credit compared

OECD Model confers two types of DT relief: Exemption and Credit.<sup>17</sup>

#### 103.4.1 DT exemption

On 16 occasions, the OECD Model provides that income/gains “*shall be taxable only*” in one State. This is the wording used to confer exemption in the other State.

It may be helpful to give an outline of the main cases of DTA exemption:

Art	Heading	Income qualifying for exemption	Taxed in State of
7	Business profits	Profits of an enterprise of a Contracting State (in absence of PE)	enterprise
12	Royalties	Royalties arising in a Contracting State, and beneficially owned by a resident of the other Contracting State	residence
13	Capital gains	Most types of gains	residence
15 (1)	Employment	Remuneration of resident of a Contracting State in respect of an employment (unless employment is exercised in the other Contracting State)	residence
15 (2)	Employment	Short term business visitor	residence

<sup>16</sup> 71 TC 77 at p.106; for the facts of *Memec*, see 86.19 (Stille Gesellschaft).

<sup>17</sup> This is self-evident from the text of the OECD Model, though this observation has also been made judicially.

18	Pensions	Pensions paid to a resident of a Contracting State in consideration of past employment	residence
19	Government service	Remuneration paid by a Contracting State/ subdivision/local authority to an individual in respect of services rendered to that State	government
21	Other income	Income of a resident of a Contracting State, wherever arising, not dealt with in other Articles	residence

### 103.4.2 DT credit

In 16 cases the OECD Model provides that income/gains “*may be taxed in that other State*” (that is, in the source State). In these cases, the residence State gives credit for the foreign tax. In the case of dividends and interest there is also a limit on the source State’s tax. It may be helpful to give an outline of the main cases of DTA credit:

Art	Heading	Income subject to credit relief
-----	---------	---------------------------------

Art	Heading	Income subject to credit relief
6	Immovable property	Income derived by a resident of a Contracting State from immovable property situated in the other Contracting State
7	Business profits in PE	Profits of a PE of an enterprise of a Contracting State if the enterprise carries on business in the other Contracting State through a PE situated therein.
10	Dividends	Dividends paid by a company which is a resident of a Contracting State to a resident of the other Contracting State
11	Interest	Interest arising in a Contracting State and paid to a resident of the other Contracting State
13	Capital gains	Gains derived by a resident of a Contracting State from the alienation of immovable property situated in the other Contracting State
15 (1)	Employment	Remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State
16	Directors fees	Directors’ fees derived by a resident of a Contracting State in his capacity as a member of the board of directors of a company which is a resident of the other Contracting State

### 103.4.3 Exemption/credit terminology

We need terms for the various types of DT relief, and in this chapter I use the following terminology.

“**DT exemption**” applies where a DTA provides an exemption from tax. “**Foreign tax credit relief**” applies where foreign tax is set against UK tax. This may be:

- (a) “**DTA tax credit relief**” where a DTA confers a credit or
- (b) “**Unilateral tax credit relief**” where UK tax law (not a DTA) confers a credit.

The terms sometimes used are “exemption” and “set-off” methods of relief.

“**IT/CGT computation deduction**” applies where foreign tax is deducted in computing income or gains.

I refer to these reliefs together as “**DT reliefs**”.

### 103.5 Double non-taxation

Double non-taxation may arise because:

- (1) Both States provide treaty relief on the same income/gains (“double exemption”); or
- (2) One State provides treaty relief, and the other State does not seek to tax the income/gains because there is no domestic-law charge, or some domestic-law relief applies.

These raise different issues, and confusion arises if they are bundled into a single category.

#### 103.5.1 *Abusive double non-taxation*

Tax avoidance DTA cases will generally involve double non-taxation.

In *Huitson (R, oao) v HMRC*:<sup>18</sup>

[Double taxation agreements] respect the principle of taxation by the state of residence. They aim to avoid the taxation of residents twice over on the same income. What DTAs do not aim to do is

[1] to facilitate the avoidance of tax, or

[2] its reduction below the level of tax ordinarily paid by residents.<sup>19</sup>

In those circumstances it is a legitimate aim of the public policy of the

---

<sup>18</sup> [2011] EWCA Civ 893 at [34].

<sup>19</sup> Limb [2] of this sentence is muddled or misconceived.

state in fiscal matters to ensure that DTAs relieve double taxation of residents rather than serve as an instrument used by taxpayers who choose to participate in artificial arrangements to avoid or reduce their level of taxation.

In *Bayfine UK v HMRC*, CA commented on a DTA using the 1992 wording which referred to “the prevention of fiscal evasion”:<sup>20</sup>

These words ... make it clear (!) that the primary purposes of the Treaty are,

[1] on the one hand, to eliminate double taxation and,

[2] on the other hand, to prevent the avoidance of taxation.

... the Treaty should be interpreted to avoid the grant of double relief as well as to confer relief against double taxation.<sup>21</sup>

Similarly GAAR guidance provides:<sup>22</sup>

... The express purpose of DTAs is to avoid double taxation and prevent fiscal evasion, not to facilitate double non-taxation. This is clear from the judgment of the High Court and the Court of Appeal in *Huitson (R, oao) v HMRC*, and the Court of Appeal in the case of *Bayfine UK v HMRC*.

In the context of avoidance cases this is not surprising, and the approach is now endorsed by BEPS MLI and the 2017 OECD Model. But how far does the principle apply that DTAs “should be interpreted to avoid the grant of double relief” when there is no avoidance in the strict sense?

### 103.5.2 *Acceptable double non-taxation*

Abuse will normally involve double non-taxation, and in such cases implied and express anti-avoidance rules can apply. But it is not the case that all double non-taxation constitutes abuse. DTA tax credit reliefs allow taxing rights to both States and seek only to avoid double taxation. DT exemptions assign taxing rights to one State alone. If that State chooses not to exercise those taxing rights, a claim for treaty relief is not abuse, even though the result is double non-taxation.

---

20 The case concerned the 1980 USA/UK treaty. For the 1992 wording, see 104.2.3 (1992 form: Fiscal evasion).

21 [2011] EWCA Civ 304 at [17].

22 Para D 12.5.1. <https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules>

Examples are:

- (1) Foreign alimony payments received by UK residents. These are exempt from foreign tax under OECD Model, but the UK does not tax them.<sup>23</sup>
- (2) Foreign income received by UK charity or pension scheme

In these cases DT relief on foreign income/gains results in double non-taxation, but not contrary to the intention of the treaties.

The purpose of double tax treaties may be to avoid double taxation, but one of the methods by which they do this is to allocate taxing rights between countries, which allows for the possibility of double non-taxation.

In other words, States sometimes *intend* double non-taxation. Suppose a country wished to encourage immigration, and did so by exempting foreign pension income of new immigrants. This policy would be frustrated if the effect of the domestic law exemption is just to replace domestic tax (residence-state tax) with foreign tax (source-state tax).<sup>24</sup> Contrary to the statement in *Bayfine*, DTAs are not, or not only, to avoid double taxation, but to allocate taxing rights; the State to which the taxing rights are allocated is not required to exercise those rights, and sometimes may want not to do so. The statement in *Bayfine* should be read in its context, which involved a tax avoidance scheme.

In *Gladden Estate v The Queen*, the Canadian court said:

... double taxation is neither a condition nor a prerequisite for invoking the protection of the treaty. The non-resident can benefit from the exemption regardless of whether or not he is taxable on that capital gain in his own country.<sup>25</sup> If Canada or the U.S. were to abolish capital gains completely, while the other country did not, a resident of the country which had abolished capital gains would still be exempt from capital gains in the other country. This in effect was the situation between the time the treaty took effect and Canada in fact first imposed a capital gains tax. During that period Canadians could benefit from Article

---

23 See 30.9 (Foreign maintenance payments).

24 The example is from Israel; see 104.14 (“Subject to tax”).

25 Article VIII Canada/US DTA (1942) provided: “Gains derived in one of the Contracting States from the sale or exchange of capital assets by a resident or a corporation or other entity of the other Contracting State shall be exempt from taxation in the former State, provided such resident or corporation or other entity has no permanent establishment in the former State.”

VIII.<sup>26</sup>

This is what happened in the India and Pakistan IHT DTAs. India and Pakistan abolished their estate duty, but the DTAs continues to provide exemption for UK IHT, and no-one suggests the contrary, notwithstanding the double non-taxation which results.<sup>27</sup>

Klaus Vogel agrees:

Dual taxability of the income or capital is not necessary for residents to be entitled to treaty benefits... double non taxation is acceptable, because it is a conscious decision of the Contracting States whether or not they enter into a tax treaty which leaves open the possibility of double non-taxation.<sup>28</sup>

It is also desirable that treaties based on the OECD Model are so far as possible interpreted in the same way, which would not be the case if construction took into account foreign taxes which vary from one State to another, and indeed from one time to another.

This is confirmed by s.3(2) TIOPA:

Section 2(1) gives effect to arrangements even if the arrangements include—

(a) provision as to income that is not subject to double taxation<sup>29</sup>

---

26 85 DTC 5188 at p.5192.

Similarly, OECD Commentary on art.23A (exemption method) provides:

“33. In the Article it is laid down that the State of residence R shall exempt from tax income and capital which in accordance with the Convention "may be taxed" in the other State E or S.

34. The State of residence must accordingly exempt income and capital which may be taxed by the other State in accordance with the Convention whether or not the right to tax is in effect exercised by that other State. This method is regarded as the most practical one since it relieves the State of residence from undertaking investigations of the actual taxation position in the other State.”

(Emphasis added).

27 See 109.8.1 (Treaty-situs: India/Pakistan).

28 4<sup>th</sup> ed, 2015, para 4.26 (footnotes omitted).

Of course if the Contracting States do wish to restrict a DT exemption so it only applies to income/gains actually subject to tax in the other State, it seems easy for a DTA to say so; see 104.14 (“Subject to tax”). But I do not think any inference should be drawn from an omission of those words, which are not common.

29 The reference is to a “subject to tax” clause but these are in practice not general provisions nor are they used very often; see 72.14.7 (Subject to tax: Critique).

Nevertheless. Except in clear or meritorious cases, if there are any, the Courts may be unsympathetic to taxpayers if the outcome is double non-taxation. In *Fowler v HMRC*:<sup>30</sup>

4. ... In fact, such an outcome [application of DT relief in the UK] could mean that Mr Fowler was not taxable in either country ... To the extent that domestic South African tax legislation did not tax the earnings of residents employed abroad he would not be taxable there or in the UK. There is no general provision in this Treaty, as there is in many others, to deal with what is called “double non-taxation”.<sup>31</sup> But the question whether South Africa did tax the earnings of its residents employed abroad was not investigated in these proceedings so it would be inappropriate to place any weight on this consideration in construing the Treaty.

The reader may detect a hint that the Court would have been more sympathetic to the taxpayer if there had been evidence that he was in fact taxable in South Africa (as may indeed have been the case).

### 103.6 Types of residence/dual residence

The starting point is to note that there are (at least) three distinct concepts of residence. We need terms to describe them, and I coin the following terminology.

- (1) **“UK-law residence”** means residence as defined in UK tax law.
  - (a) A person who is resident in the UK within the UK tax law definition is **“UK-law UK resident”**
  - (b) A person who is not resident in the UK within the UK tax law definition is **“UK-law non-UK resident”**.
- (2) **“Treaty-residence”** means residence as defined in a DTA.
  - (a) A person who is a resident of the UK within a DTA definition is **“treaty-resident in the UK”**.
  - (b) A person who is resident in the foreign State within a DTA definition is **“treaty-resident in the foreign State”**. One could use the term “treaty-resident outside the UK.” Statute sometimes calls this *“treaty non-resident”* but I think my term is clearer.

---

30 [2020] UKSC 22.

31 The judge is referring to a “subject to tax” restriction on treaty relief; but he is mistaken in assuming that such provisions are common; see 104.14 (“Subject to tax”).

“**Foreign-law residence**” means residence as defined in some foreign tax law.

“**Domestic law**” means the law of the UK, or of a foreign State, as opposed to treaty law or international law.

Since UK-law residence and treaty-residence are distinct concepts,<sup>32</sup> a person who is UK-law UK resident may be:

- (1) treaty non-UK resident (under the tie-breaker test);<sup>33</sup> or
- (2) not treaty non-UK resident: described as having “**sole UK residence**”.<sup>34</sup>

These are somewhat clumsy terms but it is difficult to think of better. For a discussion of these terms, see 8.1 (Treaty-residence: Introduction).

“**Dual residence**” means residence in two countries, but is an ambiguous term until one specifies what types of residence are involved. In its widest sense it means a person who is UK-law UK resident and also foreign-law resident in a foreign State. A dual resident person in that sense may be:

- (a) treaty-resident in a foreign State
- (b) treaty-resident in the UK or
- (c) not treaty-resident anywhere (if there is no applicable DTA).

The term “dual resident” is sometimes used specifically to mean a person within (a)<sup>35</sup> and that may be a convenient shorthand when the meaning is clear; but that usage is not adopted in this chapter.

### 103.7 DTA: Classes of residents

DT reliefs matter to all individuals, but different classes of individual are interested in different aspects of the reliefs. The permutations can be summarised thus:

Case (1): Individuals who are UK-law UK resident and not treaty-resident

32 See 8.2 (Treaty/UK-law residence).

33 It would be useful to have a short term to describe someone who is UK-law UK resident but treaty-resident outside the UK (= treaty non-UK resident). But *dual resident* and *semi-resident* do not encapsulate the concept; *treaty tie-breaker non-UK resident* does encapsulate the concept but it is so long-winded it seems better just to use the full expression when it is needed.

34 See 10.3.5 (“Sole UK residence”).

35 See 57.38 (Dual resident trust: s.88 TCGA).

in a foreign State. Where there is an applicable DTA they will also be treaty-resident in the UK.

Case (2): Individuals who are UK-law UK resident and also resident in a foreign State under the tax laws of that State. These may be:

- (a) treaty-resident in a foreign State
- (b) treaty-resident in the UK or
- (c) not treaty-resident anywhere (if there is no applicable DTA).

Case (3): Individuals who are not UK-law UK resident. These may be:

- (a) treaty-resident in a foreign State
- (b) not treaty-resident anywhere (if there is no applicable DTA).

*Case 1: UK-law UK resident and not treaty-resident in a foreign State.* These do not directly qualify for any DT exemption but they may qualify for foreign tax credit relief (or IT/CGT computation deduction). They may also qualify for third-party DT relief if income or gains accruing to a trust or company which is treaty-resident in a foreign State are deemed to accrue to them under an anti-avoidance provisions such as s.624, ToA, s.3, etc.

*Case (2)(a): UK-law UK resident and treaty-resident in a foreign State.* As UK residents they are in principle subject to IT or CGT on all UK and foreign income and gains (subject where applicable to the remittance basis). However as treaty-resident in a foreign State they may qualify for DT exemptions from UK and foreign source income and gains. This category has become much more important from 2008/09, for two reasons. First, many individuals who before 2008 would have claimed the remittance basis now prefer to claim treaty relief, as a remittance basis claim will incur the remittance basis claim charge. Secondly following the withdrawal of IR20 and its replacement by the hopelessly vague HMRC 6, many more individuals find that they may possibly be UK-law UK resident and since they may be UK resident they claim treaty relief just in case. (This should cease to be such a problem when the statutory residence test takes effect in 2013/14).

*Case (2)(b)(c): UK law UK resident and treaty-resident in the UK or not treaty-resident anywhere.* These are in the same position as case 1.

*Case (3)(a): Not UK-law UK resident and treaty-resident in a foreign State.* As non-residents they are in principle subject to IT on UK source income only. As treaty-resident in a foreign State they may qualify for some DT exemptions (eg the Other Income article and relief for UK source

interest under the some treaties).

*Case (3)(b) Not UK-law UK resident and not treaty-resident anywhere.* As non-residents they are in principle subject to IT on UK source income (though the non-residents exemption will mitigate this). They will not qualify for any DT exemptions.

### 103.8 DTA income categories

Under DTAs, income must be categorised according to its type, because different types of income are governed by different articles:

<b>OECD Model article/Income type</b>	15	Employment income
6 Immovable property income	16	Directors' fees
7 Business profits	17	Entertainers and sportspersons
8 Shipping/air transport	18	Pensions
10 Dividends	19	Government service
11 Interest	20	Students
12 Royalties	21	Other Income
13 Capital gains		

DTA categorisation is not the same as UK domestic law.<sup>36</sup>

#### 103.8.1 Category overlaps

These categories can overlap, and overlaps are addressed in the following articles:<sup>37</sup>

<b>Article</b>	<b>Overlap</b>	<b>See para</b>
6(4)	Immovable property	23.7.2
7(4)	Business income	103.8.3
10(4)	Dividends	103.8.2
11 (4)	Interest	103.8.2
12 (3)	Royalties	103.8.2
17(1)(2)	Entertainers/sportspersons	
15(1), 18, 19(3)	Employment income/pensions	
21(2)	Other Income	103.8.2

#### 103.8.2 Income through PE

Income may be (1) business profits and (2) dividend/interest/royalty/Other

<sup>36</sup> See 13.1 (Income categories: Introduction).

<sup>37</sup> This is a slightly more comprehensive list than that supplied in the Commentary.

Income. OECD Model arts 10/11/12/21 address this and (in short) give priority to art 7 (business profits):

<b>art 10(4): Dividends</b>	<b>11(4): Interest</b>	<b>12(3): Royalties</b>	<b>21(2): Other Income</b>
The provisions of paragraphs 1 and 2 shall not apply if	The provisions of paragraphs 1 and 2 shall not apply if	The provisions of paragraph 1 shall not apply if	The provisions of paragraph 1 shall not apply to income, other than income from immovable property as defined in paragraph 2 of Article 6, if
the beneficial owner of the dividends,	the beneficial owner of the interest,	the beneficial owner of the royalties,	the recipient of such income,
being a resident of a Contracting State, carries on business in the other Contracting State of which the company paying the dividends is a resident through a permanent establishment situated therein	being a resident of a Contracting State, carries on business in the other Contracting State in which the interest arises through a permanent establishment situated therein	being a resident of a Contracting State, carries on business in the other Contracting State in which the royalties arise through a permanent establishment situated therein	being a resident of a Contracting State, carries on business in the other Contracting State through a permanent establishment situated therein
and the holding in respect of which the dividends are paid is effectively connected with such permanent establishment.	and the debt-claim in respect of which the interest is paid is effectively connected with such permanent establishment.	and the right or property in respect of which the royalties are paid is effectively connected with such permanent establishment.	and the right or property in respect of which the income is paid is effectively connected with such permanent establishment.
In such case the provisions of Article 7 shall apply.	[Identical]	[Identical]	[Identical]

See 103.13 (Effectively connected with PE).

### 103.8.3 *Other business profit overlaps*

Article 7(4) OECD Model deals with other overlap between business profits and other types of income:

Where profits include items of income which are dealt with separately in other Articles of this Convention, then the provisions of those Articles shall not be affected by the provisions of this Article.

OECD Commentary on art 7 provides:

72. Absent [art 7(4)], this interpretation of the term “profits” could have given rise to some uncertainty as to the application of the Convention. If the profits of an enterprise include categories of income which are dealt with separately in other Articles of the Convention, e.g. dividends, the question would have arisen as to which Article should apply to these categories of income, e.g. in the case of dividends, this Article [art 7] or Article 10.

73. To the extent that the application of this Article and of the relevant other Article would result in the same tax treatment, there is little practical significance to this question.

Also, other Articles of the Convention deal specifically with this question with respect to some types of income...

74. The question, however, could arise with respect to other types of income and it has therefore been decided to include a rule of interpretation that ensures that Articles applicable to specific categories of income will have priority over Article 7. It follows from this rule that Article 7 will [only] be applicable

[1] to business profits which do not belong to categories of income covered by these other Articles, and, in addition,

[2] to income which under paragraph 4 of Articles 10 and 11, paragraph 3 of Article 12 and paragraph 2 of Article 21, fall within Article 7.

Of course these rules only apply for treaty purposes:

This rule does not, however, govern the manner in which the income will be classified for the purposes of domestic law; thus, if a Contracting State may tax an item of income pursuant to other Articles of this Convention, that State may, for its own domestic tax purposes, characterise such income as it wishes (i.e. as business profits or as a specific category of income) provided that the tax treatment of that item

of income is in accordance with the provisions of the Convention.

It should also be noted that where an enterprise of a Contracting State derives income from immovable property through a permanent establishment situated in the other State, that other State may not tax that income if it is derived from immovable property situated in the first-mentioned State or in a third State (see paragraph 4 of the Commentary on Article 21 and paragraphs 9 and 10 of the Commentary on Articles 23 A and 23 B).

Para 74 was followed in *Fowler v HMRC*.<sup>38</sup>

*Marsh v HMRC* considers the position of a person resident in a foreign treaty State, who carries on the trade of dealing in land in the UK, without a PE. Prior to the 2016 reforms, one would expect article 7(1) relief to have applied so the profits were not taxable in the UK.<sup>39</sup> But maybe not. To recap the relevant articles:

Article 7(1) UK-US DTA is the same as the OECD Model:

The business profits of an enterprise of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein.

Article 13(1) UK-US DTA is the same as the OECD Model:

Gains derived by a resident of a Contracting State that are attributable to the alienation of real property situated in the other Contracting State may be taxed in that other State.

Article 7(6) UK-US DTA is the same as OECD Model art 7(4):

Where business profits include items of *income* [emphasis added] that are dealt with separately in other Articles of this Convention, then the provisions of those Articles shall not be affected by the provisions of this Article.

The Tribunal said:<sup>40</sup>

86. Thus if “gains from the alienation of real property” are “income” for

---

38 [2018] EWCA Civ 2544 at [13], [47]. For another aspect of this case see 36.9.2 (Employment: OECD commentary).

39 The position from 2016 is different: see 21.3 (Dealing/developing UK land).

40 [2017] UKFTT 320 (TC) at [86] ff.

the purposes of the convention then article 13 takes precedence and no PE is required...

88. In the USA capital gains are included in income ... That this includes what would, in the United Kingdom, be regarded as capital gains...

91. In the UK a trade of dealing in real property will in nearly all cases involve the alienation of real property, and would in this case. But it could be difficult to characterise the sales of property in such a trade as themselves being “items of income”: that term is much easier to ascribe to things such as interest or dividends received by a financial trader such as a bank or an insurance company.

92. We note though that art 13 of the UK-US DTA is headed “Gains”, but the equivalent article in the OECD Model is headed “Capital Gains”. If art 13 of the UK USA DTA were headed “Capital Gains” it would be much easier to conclude that it did not cover gains that were made in the course of a trade. The difference must (?) be of some significance...

94. The answer may depend whether “income” in art 7(6) has an autonomous meaning or must be construed by reference to domestic law, and if so, which state’s.

The question does not now arise for property development income, but it may arise in other cases.

#### 103.8.4 *Other DTA category overlaps*

Avery Jones considers the position of share option gains which may be gains within art 13 and employment income within article 15:

The problem is that these items fall within both the employment income and the capital gains articles. This is not a problem in internal law because something which is taxed as income and is also a capital gain cannot be taxed as a capital gain since the income tax charge has priority. But this is not an internal law question. The Model resolves a number of situations where articles overlap, but it does not deal with this one. It is suggested that the way to resolve the problem that two treaty articles are applicable is to look at the more specific article. This is clearly the employment income article as the items are peculiar to employment, whereas the capital gains article applies to all types of gain. These items should therefore for treaty purposes be treated as falling solely within the employment income article.<sup>41</sup>

---

41 Avery Jones, “Problems of categorising income and gains for tax treaty purposes” [2001] BTR 382.

That may well be the right conclusion, though I would hesitate to use the word “clearly”.

### 103.9 DTA interpretation principles

Short formulations of the principles of interpretation can only be expressed at a high level of generality which makes their application doubtful and their usefulness to the practitioner questionable. In short, as Voltaire is said to have observed, language is difficult to put into words. Nevertheless most cases start with these generalities, so a brief summary is appropriate here.<sup>42</sup>

One might identify three approaches to interpretation, stressing:

- (1) Objective interpretation (meaning of the words)
- (2) Subjective interpretation (intention of the parties)
- (3) Teleological/purposive interpretation (the purpose of the document)

The starting point is article 31(1) of the Vienna convention on the law of treaties<sup>43</sup> (“Vienna Convention”) which draws on each of these:

A treaty<sup>44</sup> shall be interpreted in good faith in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of its object and purpose.

---

42 See Bjorge, “The Vienna Rules on Treaty Interpretation Before Domestic Courts” [2015] LQR 78.

43 The rules of interpretation in arts 31 and 32 Vienna Convention are rules of customary international law and so applicable to a treaty even if a party to the treaty is not a party to the Vienna Convention. See for instance *Anson v HMRC* [2015] UKSC 44 at [54]: “as international treaties, the [USA/UK DTA] have to be interpreted in accordance with articles 31 and 32 of the Vienna Convention on the Law of Treaties. That is so notwithstanding that, although the US is a signatory of the Vienna Convention, the US Senate has not given its consent to it: the provisions of articles 31 and 32 can in any event be applied, since they have been accepted by the International Court of Justice (and also, in this country, by the House of Lords) as being an accurate statement of customary international law.”

44 Article 2(1)(a) Vienna Convention provides: “‘Treaty’ means an international agreement concluded between States in written form and governed by international law, whether embodied in a single instrument or in two or more related instruments and whatever its particular designation”. That would include an Exchange of Notes. In *Macklin v HMRC* [2015] UKUT 39 (TCC) at [44]: “It was common ground that the Exchange of Notes can be taken into account when interpreting the DTA”.

One can identify four elements here:

- (1) Good faith
- (2) Ordinary meaning
- (3) Context
- (4) Object and purpose

This is no different from the approach to UK statutory interpretation: while there are differences between treaty interpretation and UK statutory interpretation, it seems to me that they arise from differences of context, not from differences of fundamental principles.

“Object and purpose” is a composite phrase. In discussion of domestic law, English lawyers tend to use the word “policy” (though “purpose” is also common); but the meaning is the same.

#### 103.9.1 *Context of treaties*

Article 31 Vienna Convention provides:

2. The context for the purpose of the interpretation of a treaty shall comprise, in addition to the text, including its preamble and annexes:
  - (a) any agreement relating to the treaty which was made between all the parties in connection with the conclusion of the treaty;
  - (b) any instrument which was made by one or more parties in connection with the conclusion of the treaty and accepted by the other parties as an instrument related to the treaty.

#### 103.9.2 *Material taken into account*

Article 31 Vienna Convention provides:

3. There shall be taken into account, together with the context:
  - (a) any subsequent agreement between the parties regarding the interpretation of the treaty or the application of its provisions;
  - (b) any subsequent practice in the application of the treaty which establishes the agreement of the parties regarding its interpretation;
  - (c) any relevant rules of international law applicable in the relations between the parties.
4. A special meaning shall be given to a term if it is established that the parties so intended.

#### **Article 32 Supplementary means of interpretation**

Recourse may be had to supplementary means of interpretation, including the preparatory work of the treaty and the circumstances of its

conclusion, in order to confirm the meaning resulting from the application of article 31, or to determine the meaning when the interpretation according to article 31:

- (a) leaves the meaning ambiguous or obscure; or
- (b) leads to a result which is manifestly absurd or unreasonable.

There is a distinction between:

- (1) Article 31(3) material (agreements, notes, protocols) etc which *must* be taken into account; and
- (2) Article 32 material (OECD Commentary, statements of Revenue authorities, etc) which *may* be taken into account.

### 103.9.3 *DTA/UK statutes compared*

In *IRC v Commerzbank*:<sup>45</sup>

The language of an international convention has not been chosen by an English parliamentary draftsman. It is neither couched in the conventional English legislative idiom nor designed to be construed exclusively by English judges. It is addressed to a much wider and more varied judicial audience than is an Act of Parliament which deals with purely domestic law. It should be interpreted, ... ‘unconstrained by technical rules of English law, or by English legal precedent, but on broad principles of general acceptance...

### 103.9.4 *Summary*

The following statement of principles has often been approved:

(1) It is necessary to look first for a clear meaning of the words used in the relevant article of the convention, bearing in mind that “consideration of the purpose of an enactment is always a legitimate part of the process of interpretation”... . A strictly literal approach to interpretation is not appropriate in construing legislation which gives effect to or incorporates an international treaty .... A literal interpretation may be obviously inconsistent with the purposes of the particular article or of the treaty as a whole. If the provisions of a particular article are ambiguous, it may be possible to resolve that ambiguity by giving a purposive construction to the convention, looking at it as a whole by reference to its language as set out in the relevant UK legislative instrument....

---

45 63 TC 218 at p.235 citing the non-tax case *Fothergill v Monarch Airlines* [1981] AC 251; the observation applies to all international conventions, tax and non-tax.

(3) Among those principles is the general principle of international law, now embodied in Article 31(1) of the Vienna Convention on the Law of Treaties. ... references to the primary necessity of giving effect to “the plain terms” of a treaty or construing words according to their “general and ordinary meaning”, or their “natural signification” are to be a starting point or *prima facie* guide and “cannot be allowed to obstruct the essential quest in the application of treaties, namely the search for the real intention of the contracting parties in using the language employed by them”.

(4) If the adoption of this approach to the article leaves the meaning of the relevant provision unclear or ambiguous or leads to a result which is manifestly absurd or unreasonable recourse may be had to “supplementary means of interpretation” including *travaux préparatoires*:

...

(5) Subsequent commentaries on a convention or treaty have persuasive value only, depending on the cogency of their reasoning. Similarly, decisions of foreign courts on the interpretation of a convention or treaty text depend for their authority on the reputation and status of the Court in question...

(6) Aids to the interpretation of a treaty such as *travaux préparatoires*, international case law and the writings of jurists are not a substitute for study of the terms of the convention. Their use is discretionary, not mandatory, depending, for example, on the relevance of such material and the weight to be attached to it...<sup>46</sup>

And again, more recently:

The terms of the 1975 Convention reflect the intentions of the US as much as those of the UK. They are intended to impose reciprocal obligations... . The terms ... are important to businesses in the US as well as to the UK investors ... In that context, one would be predisposed to favour an interpretation which reflected the ordinary meaning of the words used and the object of the Convention. This is indeed a point which has been repeatedly made, in other cases concerned with the construction of the UK/US double taxation conventions, in the face of narrow and technical constructions...<sup>47</sup>

---

46 *IRC v Commerzbank* 63 TC 218 at p.235; I omit references given in the original. See Avery Jones, “More on Treaty Interpretation: *IRC v Commerzbank*” [1990] BTR 88; and “*Memec*: the treaty interpretation issue” [1997] BTR 194.

47 *Anson v HMRC* [2015] UKSC 44 at [111]. What was (perhaps informally) still called *England* in 1990 is (more correctly) called the UK in 2015.

### 103.9.5 *Treaty in two languages*

Article 33 Vienna Convention provides:

1. When a treaty has been authenticated in two or more languages, the text is equally authoritative in each language, unless the treaty provides or the parties agree that, in case of divergence, a particular text shall prevail.
2. A version of the treaty in a language other than one of those in which the text was authenticated shall be considered an authentic text only if the treaty so provides or the parties so agree.
3. The terms of the treaty are presumed to have the same meaning in each authentic text.
4. Except where a particular text prevails in accordance with paragraph 1, when a comparison of the authentic texts discloses a difference of meaning which the application of articles 31 and 32 does not remove, the meaning which best reconciles the texts, having regard to the object and purpose of the treaty, shall be adopted.

The OECD Model and Commentary are published in English and French. Actual treaties based on the Model are of course in many languages, though in practice 80% of treaties have English as at least one of the languages.

I am only aware of one point where reference has been made to the French version.<sup>48</sup> Apart from that, the UK Courts do not seem to have referred to the French version of the Model, or the foreign language version of actual DTAs. That is in fact quite pragmatic:

- (1) A judge is not likely to have the necessary foreign language skills.
- (2) Use of experts to assist is expensive and the benefit is not likely to justify the cost (whether assessed on a case by case basis or overall).
- (3) It is desirable that treaties based on the OECD Model are so far as possible interpreted in the same way. Of course that cannot be fully achieved; but it is desirable. If reliance is placed on particular foreign language in one treaty, it is likely that other treaties not in that language will be construed differently; or else any exercise of construction would have to review many or perhaps all foreign language versions of the Model treaty, and a polyglot exercise of that

---

48 In the whole of the OECD commentary the French version of the Model is referred to only once: see 8.14 (Habitual abode).

kind is impractical.<sup>49</sup>

### 103.9.6 Variations between DTAs

In *Macklin v HMRC*:

Comparison of the language of the DTA which we are called upon to construe with the language of another double taxation convention ... would be a very unsure basis to reach a conclusion contrary to the one we have reached by reference to directly related materials (particularly the exchange of notes) and we reject it.<sup>50</sup>

The Australian Taxation Office discuss this issue in more detail:

46. It is important for interpretation purposes to remember that each DTA is the product of a separate bilateral negotiation process. While, therefore, there is a general template structure to Australia's DTAs, each contains variations in terms from other DTAs because they are negotiated against the background of the particular languages, legal systems, tax rules, tax treaty and wider economic policies and expectations of the respective countries at the time, as well as some historical influences.

47. Those factors, and the fact that treaty negotiations are conducted against the general background of the OECD and United Nations Model Tax Conventions (which, being products of international compromise and consensus, are couched in comparatively broad terms) mean that the Australian negotiators, administrators and courts cannot expect the terms of the DTAs to be expressed with the same precision as our ordinary domestic tax legislation. Nor is it possible to always maintain consistency in how the terms of a particular Article are expressed in the various DTAs, because of the different 'mix' of the above factors in

---

49 This would not apply to French, because the OECD Model itself is issued in English and French.

50 *Macklin v HMRC* [2013] UKFTT 554 (TC) at [109]. The Upper Tribunal agreed [2015] UKUT 39 (TCC) at [36].

The same point is made in *Fryett v HMRC* [2014] UKFTT 220 (TC) at [81]: "We approach with caution any suggestion that because one country has worded its DTA with another country in a particular way, the absence of wording or different wording can throw interpretative light on how a DTA negotiated between different countries should be interpreted. This is the case even if the DTA has one party in common. On this basis any insight that may be gained from looking at the UK's other DTAs, or at Hong Kong's other DTAs is immaterial to the matter before us."

different negotiations and the ‘give and take’ that is a necessary incident of international negotiations.

48. This is an important point to bear in mind, because it means that the network of DTAs is not drafted in an absolutely uniform manner in relation to residents of all treaty partners, or in relation to similar activities or situations.

49. Differing wording in two DTAs may represent the same intended meaning (such as, in the ATO’s view, the terms ‘beneficial entitlement’ in the Dividends, Interest and Royalties Articles of some DTAs and ‘beneficial ownership’ in the corresponding Articles in other DTAs). Often such differences exist because a country wants to avoid unintentionally ‘picking up’ a domestic law usage for an undefined term that may be different to the international tax meaning of the phrase more usually relied on. Alternatively, it may be because a country does not recognise a particular concept and regards the use of a term as potentially creating uncertainty before its courts and in the administration of the DTA.<sup>51</sup>

50. In other cases, differences in wording may represent specific negotiating intentions (e.g., the reference simply to ‘income’ rather than ‘income, profits or gains’ in many of our pre-capital gains DTAs is, in the ATO’s view, significant as is noted in Taxation Ruling TR 2001/12).<sup>52</sup>

51. It is sometimes possible that the same wording in different DTAs could present a different intended meaning. DTA negotiators will generally seek to identify the differences between a DTA under negotiation and their existing treaty network wording and as far as possible avoid the same wording having different usages, but that will not always be possible.

52. One practical example of the potential significance of different wording between DTAs is that, although the business profits/ permanent establishment (‘PE’) principle is common to all the DTAs, the definition of a PE in one DTA may be substantively different to the definition in another DTA.

53. For example, the definition of a PE in the United States Convention

---

51 Footnote original: Such as the concepts of ‘citizenship’ and ‘nationality’ - frequently only one or the other of these has a clear domestic law meaning for a DTA party, or the meaning may differ as between the parties. Because of this, an Article such as the Government Service Article in the Austrian Agreement and some of Australia’s other DTAs refers to ‘a citizen or national’ of a country.

52 Footnote original: At paragraphs 56 and 59.

is wider than the definition in the Japanese Agreement. Accordingly, Australia may have a taxing right under the Business Profits Article of the United States Convention in respect of certain profits of a United States enterprise but not under the Business Profits Article of the Japanese Agreement in respect of like profits of a comparable Japanese enterprise.<sup>53</sup>

OECD Commentary comments on the significance of changes between current and earlier OECD models:

35. Needless to say, amendments to the Articles of the Model Convention and changes to the Commentaries that are a direct result of these amendments are not relevant to the interpretation or application of previously concluded conventions where the provisions of those conventions are different in substance from the amended Articles (see, for instance, paragraph 4 of the Commentary on Article 5). ...

36. ... the Committee ... disagrees with any form of *a contrario* interpretation that would necessarily infer from a change to an Article of the Model Convention ... that the previous wording resulted in consequences different from those of the modified wording. Many amendments are intended to simply clarify, not change, the meaning of the Articles ... and such *a contrario* interpretations would clearly be wrong in those cases.

36.1 Tax authorities in Member countries follow the general principles enunciated in the preceding four paragraphs.

#### 103.9.7 *Amendments to DTAs*

In *HMRC v Smallwood*:<sup>54</sup>

The introduction of provisions designed to deal with specific schemes and to resolve any issues as to whether they are effective under the existing legislation cannot be construed as statutory admissions that the provisions in their unamended form were inadequate. We are not therefore, in my view, assisted by the later version of Article 13(5) in determining the effect of Article 13(4).

#### 103.9.8 *Foreign court decisions*

---

53 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.

54 [2010] EWCA Civ 778 at [22].

The Australian Taxation Office discuss this issue:

119. Since Australian courts have recognised that interpretation in a way conducive to producing a uniform international interpretation is an important goal in interpreting treaties,<sup>55</sup> it follows that foreign court decisions on similar provisions may give valuable guidance about the meaning of a term. They need to be treated with some caution, since they may be founded on different interpretative principles or approaches. Some courts may, for example, less strictly follow the Vienna Convention rules, or may apply a domestic law meaning of a term when they should apply an accepted international tax meaning. A court may also, quite properly, apply a domestic law meaning to a term left undefined by the DTA, whereas the same approach before Australian courts may lead to a different domestic law meaning being ‘picked up’.

120. Nevertheless, a foreign court’s decisions, including on the foreign language text, may provide important insights. Some foreign courts have considerable experience and expertise in interpreting DTAs. In *Lamesa*, the Full Federal Court did not need to (or wish to) express a concluded view on the issue. The Court noted, however, that:<sup>56</sup>

We would, however, express our agreement with the distinction drawn by Lindgren J in *Allstate Life Insurance Co v. Australia & New Zealand Banking Group (No 6)* (1996) 64 FCR 79 between the content of foreign law which is receivable in evidence and the application of that law to facts once its content has been ascertained which is not. However, where the construction of an international treaty arises, evidence as to the interpretation of that or subsequent treaties in one of the participating countries forms part of a matrix of material to which reference could properly be made in an appropriate case. As presently advised we would not wish it to be thought that a limited view of the material to which reference could be made in interpreting a double tax treaty should be taken. Had there been some decision of an appropriate Dutch court interpreting a treaty with identical or similar language, then, in our view, evidence of such a decision might well have been admissible.

121. There are also strong reasons to consider, as a matter of practice, the decisions of courts from countries other than the treaty partner (an issue not addressed by the *Lamesa* Court). Any such consideration would need to be consistent with the comments of the High Court in *Cook v Cook*<sup>57</sup>

---

55 See paragraph 87.

56 97 ATC 4229 at 4757.

57 (1986) 162 CLR 376 at 390.

that:

Subject, perhaps, to the special position of decisions of the House of Lords given in the period in which appeals lay from this country to the Privy Council, the precedents of other legal systems are not binding and are useful only to the degree of the persuasiveness of their reasoning.<sup>58</sup>

### 103.9.9 Foreign revenue guidance

The Australian Taxation Office discuss this issue:

125. Extrinsic materials of various types are extensively relied on by some countries. Some, such as the ‘Technical Explanations’ which are a feature of United States domestic procedures for consideration of a DTA, may help explain the views being put by the relevant DTA partner or a taxpayer. As the ‘Technical Explanations’ are, however, developed as part of the internal processes of the United States when implementing a DTA, they are of little or no usefulness in objectively proving the intent of both parties to a DTA. They are primarily designed to reflect the views of the United States negotiators, upon which there may not necessarily be a consensus ad idem (‘meeting of minds’), but they may in some cases provide useful signposts to that consensus.<sup>59</sup> Even if they might not be admissible in court, or might be of little probative value, they may better inform an understanding of the DTA as a whole.<sup>60</sup>

*GE Financial Investments v HMRC* took a more parochial view:<sup>61</sup>

48. I should also mention the 1992 MOU. Mr Miller drew attention to this in his expert report ... concluding that it appears to presuppose that a stapled Dutch corporation is a resident of the US for the purposes of the US-Netherlands treaty.

49. Mr Baker submits that the 1992 MOU is clarificatory and confirms

---

58 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia’s Double Tax Agreements.

59 Footnote original: See on the use of United States materials and the different approaches taken to such materials by the courts of other countries, Edwardes-Ker *Tax Treaty Interpretation* (1994) at paragraph 25.04. Edwardes-Ker notes, importantly, that this does not supplant the rule that a treaty must be interpreted in accordance with the common intention of both States.

60 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia’s Double Tax Agreements.

61 [2021] UKFTT 210 (TC). But the case is not yet final.

that the US authorities regarded such a stapled corporation to be a resident of the US, a position accepted by the Dutch revenue authorities. However, I agree with Ms McCarthy that, in the absence of any similar memorandum between the UK and US, it is not possible to derive any assistance from the 1992 MOU (which was specifically negotiated between the US and the Netherlands), in interpreting Article 4(1) of the Convention.

50. Neither, for that matter, can I derive any assistance from the view of the IRS which would appear, from correspondence referred to me by Mr Baker, to be that it considered GEFI was resident in the US. The correspondence, as Mummery J observed in *Inland Revenue Comrs v Commerzbank AG* [1990] STC 285, at 301-302, in relation to a joint statement issued in 1977 by the IRS and the Board of Inland Revenue setting out their agreement on the treatment of dividends and interest as commercial profits under the Convention:

“... has no authority in the English courts. It expresses the official view of the Revenue authorities of the two countries. That view may be right or wrong. Although art XXA authorises the competent authorities to communicate with each other directly to implement the provisions of the convention and 'to assure its consistent interpretation and application' it does not confer any binding or authoritative effect on the views or statements of the competent authorities in the English courts.”

But while no-one suggests that such materials have “binding or authoritative effect” it seems odd to disregard them completely, especially as regard is had to foreign case law.

#### 103.9.10 *Retrospectivity*

Article 28 Vienna Convention provides:

Unless a different intention appears from the treaty or is otherwise established, its provisions do not bind a party in relation to any act or fact which took place or any situation which ceased to exist before the date of the entry into force of the treaty with respect to that party.

In practice, as far as I am aware, DTAs are always expressed to be prospective in effect.

#### 103.9.11 *Territorial extent*

Article 28 Vienna Convention provides:

Unless a different intention appears from the treaty or is otherwise established, a treaty is binding upon each party in respect of its entire territory.

Tax advantaged zones within the territory of a Contracting State qualify for treaty relief, unless the treaty provides otherwise.

## **103.10 OECD Commentary**

### 103.10.1 *Use of OECD Commentary*

*In Sun Life Assurance Co of Canada v Pearson:*

... the Commentaries can and indeed must be referred to as a guide to the interpretation of the Treaty.<sup>62</sup>

HMRC have argued that recourse to the OECD Commentary is only relevant where there is ambiguity, but the better view is that it is always relevant; or perhaps there is always ambiguity.

Of course the OECD Commentary is not decisive, so it may not much matter whether one says that one has no recourse to it on the grounds that the text is unambiguous; or that one has recourse to it but it does not affect the end result. But the latter is the better approach.

OECD have adopted the following formal recommendation:

THE COUNCIL ... RECOMMENDS the Governments of Member countries ...

2. When concluding new bilateral conventions or revising existing bilateral conventions, to conform to the Model Tax Convention, as interpreted by the Commentaries thereon;

3. That their tax administrations follow the Commentaries on the Articles of the Model Tax Convention, as modified from time to time, when applying and interpreting the provisions of their bilateral tax conventions that are based on these Articles.<sup>63</sup>

OECD Commentary provides:

29. As the Commentaries have been drafted and agreed upon by the experts appointed to the Committee on Fiscal Affairs by the Governments of Member countries, they are of special importance in the

---

62 59 TC 250 at p.310.

63 C(97)195/FINAL 23 October 1997; I omit the recitals.

development of international fiscal law. Although the Commentaries are not designed to be annexed in any manner to the conventions signed by Member countries, which unlike the Model are legally binding international instruments, they can nevertheless be of great assistance in the application and interpretation of the conventions and, in particular, in the settlement of any disputes.

29.1 The tax administrations of Member countries routinely consult the Commentaries in their interpretation of bilateral tax treaties. The Commentaries are useful both in deciding day-to-day questions of detail and in resolving larger issues involving the policies and purposes behind various provisions. Tax officials give great weight to the guidance contained in the Commentaries.

29.2 Similarly, taxpayers make extensive use of the Commentaries in conducting their businesses and planning their business transactions and investments. The Commentaries are of particular importance in countries that do not have a procedure for obtaining an advance ruling on tax matters from the tax administration as the Commentaries may be the only available source of interpretation in that case.

29.3 Bilateral tax treaties are receiving more and more judicial attention as well. The courts are increasingly using the Commentaries in reaching their decisions. Information collected by the Committee on Fiscal Affairs shows that the Commentaries have been cited in the published decisions of the courts of the great majority of Member countries. In many decisions, the Commentaries have been extensively quoted and analysed, and have frequently played a key role in the judge's deliberations. The Committee expects this trend to continue as the world-wide network of tax treaties continues to grow and as the Commentaries gain even more widespread acceptance as an important interpretative reference.

The Australian Taxation Office refer to the OECD resolution and say:

101. ... While not binding (since they are not formal OECD 'Decisions', binding on OECD Members under the OECD Constitution), the OECD Model and Commentaries create a general or 'quasi-political', rather than 'legal', expectation that OECD Members will basically comply, subject to specific 'Observations' and 'Reservations' lodged with the OECD...

102. In *Thiel*, the High Court judges all accepted that the OECD Model Taxation Convention's official Commentaries may be relevant to the interpretation of DTAs based on the OECD Model. In *Thiel*, McHugh J (with whom the majority agreed in their joint judgment) approved recourse to the OECD Model and Commentaries under Article 32 of the

Vienna Convention (that is, as supplementary means only available for consideration when there is ambiguity or the like, or to confirm a meaning reached by examining Article 31 materials).<sup>64</sup>

103. Dawson J also approved reference to the Model and Commentaries ‘as a supplementary means of interpretation to which recourse may be had under Article 32 of the Vienna Convention’.<sup>65</sup> His Honour went further than the other judges, however, by expressing the view that the OECD Model and Commentaries were also relevant under Article 31 of the Vienna Convention, as primary materials to be considered even when there was no ambiguity or the like.<sup>66</sup> In so doing, Dawson J nevertheless acknowledged that ‘some doubts have been expressed about the applicability, as a matter of language, of Article 31 to the Commentaries in the case of a bilateral treaty such as a double taxation agreement’.<sup>67</sup>

104. The Commentaries, with the various Observations and Reservations of OECD Member countries which they reproduce (and which are further considered below),<sup>68</sup> therefore provide important guidance on interpretation and application of the OECD Model and as a matter of practice will often need to be considered in interpretation of DTAs, at least where the wording is ambiguous, which ... is inherently more likely in treaties than in general domestic legislation.

105. In addition, the Commentaries, with the Observations and Reservations, do provide part of the historical context of the DTA negotiations. They also have a role in testing the interpretation reached by other means, although if they conflict with, rather than confirm, that interpretation there may be an issue of whether this would be admissible

---

64 *Thiel v FCT* (1990) 90 ATC 4717, at 4727 and 4720. See 103.9.2 (Material taken into account).

65 *Ibid*, at 4723.

66 Footnote original: Dawson J, in his discussion of Article 31 of the Vienna Convention at 4723, had stated: “For my part, I do not see why the OECD Model convention and commentaries should not be regarded as having been made in connection with and accepted by the parties to a bilateral treaty *subsequently concluded* in accordance with the framework of the model”. (emphasis added).

67 Footnote original: *Thiel v FCT* (1990) 90 ATC 4717, at 4723. He cited, as to the doubts, Avery Jones et al Part II at 92. Edwardes-Ker *Tax Treaty Interpretation* (1994) similarly considers that OECD Commentaries do not fall within the meaning of Article 31(2) of the Vienna Convention: paragraph 15.03.

68 Paragraph 109ff.

in a court, since the matter was left unresolved by the *Thiel* judgments.<sup>69</sup>

### 103.10.2 Changes to Commentary

Where changes are made to the Commentary, which happens all the time, there are two possible approaches:

- (1) **“Ambulatory”** : Consider the current form, including all changes
- (2) **“Static”**: Disregard changes made after a treaty takes effect

An intermediate approach would be to consider the changes but give them a lower status or scrutinise them more carefully.

*Fowler v HMRC* deals with the point in one cursory sentence:<sup>70</sup>

The OECD Commentaries are updated from time to time, so that they may (and do in the present case) post-date a particular double taxation treaty. Nonetheless they are to be given such persuasive force as aids to interpretation as the cogency of their reasoning deserves.

There are Rule of Law points here. To have regard to post-treaty changes in the Commentary breaches the rule that tax should be laid down by Parliament. To have regard to changes made after income/gains have accrued breaches the prohibition on retrospectivity. But the Rule of Law is only one virtue of a legal system; and if one calls this an infringement, the Rule of Law may be infringed to attain other ends.<sup>71</sup> This is not significantly different from the rule that the Courts may have regard to textbooks, even though written after the date of the statute under discussion.

The static approach has unattractive practical consequences:

---

69 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia’s Double Tax Agreements.

See Lang and Brugger “The role of the OECD Commentary in tax treaty interpretation”(2008) 23 Australian Tax Forum

[https://www.wu.ac.at/fileadmin/wu/d/i/taxlaw/institute/staff/publications/langbrugger\\_australiataxforum\\_95ff.pdf](https://www.wu.ac.at/fileadmin/wu/d/i/taxlaw/institute/staff/publications/langbrugger_australiataxforum_95ff.pdf)

70 [2020] UKSC 22 at [18]. Earlier editions of this work pursued other aspects of this issue, in particular the *Indofood* case where 2003 amendments to the Commentary were relevant to how the Indonesian courts would apply the Netherlands/Indonesia DTA which was made in 2002. See the 2020/21 edition para 71.8.2 (Changes to OECD Commentary). But I omit that now as after *Fowler* this discussion is of very limited interest.

71 See 2.8.2 (Rule of Law v. other values).

- (1) Anyone considering a treaty would need to note its date and apply the historical version of the Commentary in effect on that date.
- (2) Identically worded treaties could be construed differently.

Under either approach, anyone considering a decided case needs to note its date and consider whether subsequent changes in the Commentary may have altered the position. But that is a smaller problem.

Contrast the position for changes in the text of the OECD Model itself; see 103.9.6 (Variations between DTAs).

OECD Commentary provides:

35. Needless to say, amendments to the Articles of the Model Convention and changes to the Commentaries that are a direct result of these amendments are not relevant to the interpretation or application of previously concluded conventions where the provisions of those conventions are different in substance from the amended Articles (see, for instance, paragraph 4 of the Commentary on Article 5).<sup>72</sup> However, other changes or additions to the Commentaries are normally applicable to the interpretation and application of conventions concluded before their adoption, because they reflect the consensus of the OECD Member countries as to the proper interpretation of existing provisions and their application to specific situations.

36. Whilst the Committee considers that changes to the Commentaries should be relevant in interpreting and applying conventions concluded before the adoption of these changes, it disagrees with any form of *a contrario* interpretation that would necessarily infer from a change to an Article of the Model Convention or to the Commentaries that the previous wording resulted in consequences different from those of the modified wording. Many amendments are intended to simply clarify, not change, the meaning of the Articles or the Commentaries, and such *a contrario* interpretations would clearly be wrong in those cases.

36.1 Tax authorities in Member countries follow the general principles enunciated in the preceding four paragraphs.

Avery Jones says:

If the OECD suddenly came up with a better model, it would be a long time before it generally was adopted in practice and meanwhile, there would be a long transition while the existing 1,400 treaties were

---

<sup>72</sup> See 101.12 (Agency-PE).

renegotiated. There is therefore a tendency to change the Commentary instead. The hope is that the new Commentary then will apply to all the existing treaties. As someone said, it is like the Bible; the words stay the same, only the commentary changes. Does anyone know what courts will do when they are faced with interpreting a treaty when the Commentary makes fundamental changes subsequent to the treaty? There are few cases so far, probably because many of the fundamental changes are recent. Unless there is a reasonable expectation that courts will give effect to some of the fundamental changes that are being made to the Commentary, and I doubt if this is the case, there is no point in making fundamental changes to the Commentary. In fact, from the point of view of the tax authority, changing the Commentary in this way could make matters worse. In light of statements in the Introduction to the Model Treaty that existing treaties should be interpreted in light of new Commentaries, the tax authority may feel that it cannot properly argue against the interpretation contained in Commentaries made later than the treaty in question, but the taxpayer can, and probably will succeed if he does. It follows that the only fundamental changes that can have effect are those in favour of the taxpayer, which may not be quite what tax authorities sitting round the OECD table in Paris intend.

[Avery Jones sets out the comments of the Commentary on the issue and continues]: It seems to me that too little attention is paid to the legal effect of later Commentaries in internal law, and I am doubtful about whether any legal weight should be given to the Committee's retrospective views about proper interpretation. Tax treaties are different from normal international treaties under which the contracting states can agree to any interpretation;<sup>73</sup> they are also part of internal tax law affecting taxpayers and subject to interpretation by courts in that country. In relation to the latter, these statements in the Introduction may be wishful thinking on the part of the members of the Committee rather than a statement of what the legal position actually is. ...I think we would say in the UK, that later Commentaries should not even be considered. ...On the other hand, it does seem odd that if a country makes a new treaty today, which in a particular respect is in exactly the same form as an older one made with another country at the time of an earlier Commentary, the two treaties will have different meanings, which does seem contrary to the whole principle of having Commentaries. It is not

---

73 Footnote original: Under art. 31(3) of the Vienna Convention on the Law of Treaties, subsequent agreements between the parties have the same status as context.

as if parliaments (certainly in my country) take any notice of changes in the Commentary in approving treaties, particularly so when there is no mention of the Commentary in the treaty. If - and this may be a big if - parliaments were prepared to approve a statement in the treaty that it was to be interpreted in the light of the Commentaries from time to time in force, would this be desirable? It effectively would be a statement that the parties intended that a special meaning, determined in the future by the OECD, should apply, which as far as the two tax authorities are concerned, is of course exactly what they do intend, as the Introduction makes clear.<sup>74</sup>

There must be a boundary between interpretation and change. If the later Commentary says that black now means white, there seems little doubt that article 32 will not help to give a treaty that interpretation. If, on the other hand, the parties have stated in advance that, as a special meaning to be determined later, black does mean white, a court might give effect to it. You may say that this is so extreme an example that it would never happen. Unfortunately, there are examples of the Commentary changing its meaning from black to white....<sup>75</sup>

If changes in the Commentary in the past had been restricted to what might be argued to be interpretation, there would be a strong case for an approach giving effect to future Commentaries as a special meaning, always assuming that parliaments would accept it. But, as the OECD has made such major changes to later Commentaries, it is very doubtful that this solution will now be acceptable. ... The extent to which the later Commentary has effect is in the hands of the court, which will not accept that a change from black to white is confirming the ordinary meaning or resolving ambiguities or obscurity, or avoiding manifestly absurd or unreasonable results. On the other hand, it is likely that more minor changes will be effective, which will assist the harmonization of interpretation of treaties. It is already the case that courts in many countries do refer to later Commentaries in the case of minor changes and including something to that effect in the treaty will encourage courts in all countries to do so.<sup>76</sup>

---

74 OECD Commentary, note 31, Introduction, PP33-36.

75 Avery Jones gives the example of the 1992 change to the Commentary art 15(2) (Short Term Business Visitor relief); see 23.6.2 (Employment: OECD Commentary). Another example is the 1993 change discussing tax avoidance; see 72.2.4 (Avoidance: OECD Commentary).

76 Avery Jones, "Are Tax Treaties Necessary?" (1999) 53 Tax Law Review 1.

The Australian Taxation Office say:

**Subsequent revisions to OECD Commentaries**

106. There is some debate over whether subsequent changes to the OECD Commentaries should be used as an aid to interpretation of earlier DTAs. On one hand, there is the view that the OECD Commentaries are only relevant to those DTAs subsequently concluded. Einfeld J expressed this view in the Federal Court decision of the first instance in *Lamesa Holdings BV v FC of T*. His Honour referred to the Full High Court decision in *Thiel* and to the comments made by Dawson J in that case:<sup>77</sup>

Further extrinsic material, referred to in *Thiel* as permissible ... is consideration of the 1977 OECD Model and Commentaries in construing a double tax agreement. Dawson J added an important caveat to this view, namely that the OECD model and commentaries are only applicable to those bilateral treaties subsequently concluded.

107. On the other hand, the Introduction to the OECD Commentaries now indicates more clearly that the later Commentaries are intended by OECD Member states to be used for interpretation and application of DTAs concluded before their adoption, except where the OECD Model has been changed in substance. The Year 2000 update to the OECD Model and Commentaries states: [text set out above]...

108. These changes to the Commentaries reflect the fact that the Commentaries are usually expressed not as forming an agreement between countries as to a new meaning but as reflecting a common view as to what the meaning is and always has been. Accordingly, unless it is apparent that the substance of the OECD Model has itself changed since a DTA was negotiated or the treaty in question does not conform to the OECD Model, or unless the Commentaries make clear that a former interpretation has actually been substantively altered, rather than merely elaborated, the ATO considers it appropriate, as a matter of practice, to consider, at least, the most recently adopted/published OECD Commentaries ... as well as others which may have been available at the time of negotiation.<sup>78</sup> Often, if a DTA provision is to be fully understood,

---

<sup>77</sup> 97 ATC 4229 at 4237.

<sup>78</sup> Footnote original: This approach may also be justified in terms of Article 31(3) of the Vienna Convention, with the Commentaries representing either ‘a subsequent agreement between the parties regarding the interpretation of the treaty’ (Article 31(3)(a)) or ‘any subsequent practice in the application of the treaty which establishes

the changes that have occurred to the relevant OECD Commentaries over time will need to be examined and considered.<sup>79</sup>

CFE discuss the point in connection with use of the OECD Commentary to interpret EU directives:<sup>80</sup>

...it seems that the Court endorsed an ambulatory (dynamic) use of the OECD MC Commentaries by referring to its own descriptions of the “beneficial ownership” concept in the 1977 OECD MC and the 2003 OECD Update, which addressed certain conduit companies. The Court, however, did not (explicitly)<sup>81</sup> refer to the 2014 OECD Update,<sup>82</sup> which might either imply that it did not want to go “fully dynamic” or that it did not consider it necessary. Moreover, the Court’s seemingly dynamic approach might not technically be “dynamic” at all: While the IRD was proposed in 1998, it was adopted in Council on 3 June 2003, whereas the 2003 OECD Update was adopted by the OECD Council

---

the agreement of the parties relating to its interpretation’ (Article 31(3)(b)). In *Lamesa*, Einfeld J in fact referred to the 1977 OECD Commentaries when interpreting the 1976 Netherlands Agreement (Schedule 10 to the Agreements Act) on the basis that the relevant part was based on an OECD Report released in 1974 and widely available.

79 Footnote original: An example is the amendment to paragraph 8 of the 1977 Model Commentaries on Article 5 (permanent establishments) by the 1992 Commentaries (in response to a 1983 Report). The amendments treated the leasing of industrial, scientific and commercial equipment as a matter for the Business Profits Article, rather than the Royalties Article. Australia and some other countries disagreed, and lodged a ‘Reservation’ (a concept discussed at paragraph 109ff) to OECD Model Royalties Article, to this effect: see paragraph 39 of OECD Model Commentary on Article 12. ...

80 CFE Opinion Statement ECJ-TF 2/2019.

[http://taxadviser.europa.org/wp-content/uploads/2019/06/ECJ-TF\\_2-2019\\_Beneficial-Ownership.pdf](http://taxadviser.europa.org/wp-content/uploads/2019/06/ECJ-TF_2-2019_Beneficial-Ownership.pdf)

81 Footnote original: It did, however, implicitly refer to a notion that was introduced by the 2014 OECD Update (the “in substance”-criterion) in explaining the indicia for abuse; see *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16), para. 132, and the discussion *infra* in Chapters II.3. and III.C..

82 Footnote original: It should be noted that the Court referred to the “development - as set out in paragraphs 4 to 6 above - of the OECD Model Tax Convention and the commentaries”, with paras 4 and 5 dealing with the 1977 OECD MC and para. 6 dealing with the revision of the OECD MC Commentaries in 2003, while para.7 of the judgment mentions the 2014 OECD Update of the commentaries (see *N Luxembourg I et al* [C-115/16, C-118/16, C-119/16 and C-299/16], paras. 9

already on 28 January 2003<sup>83</sup> and was based on an even earlier 2002 Report,<sup>84</sup> i.e., both before the IRD was passed. However, a dynamic approach would not be surprising as the ECJ in *Berlioz*<sup>85</sup> had already used the 2012 OECD MC Commentaries Update on Article 26 OECD MC<sup>86</sup> to interpret the concept of foreseeable relevance in the 2011 Mutual Assistance Directive.<sup>87</sup> It is, however, hard to see how such dynamic understanding would fit into the EU legal order, since – as AG Kokott, who certainly prefers a static approach,<sup>88</sup> succinctly pointed out – “[o]therwise the contracting countries to the OECD would have the power to decide on the interpretation of an EU directive”.<sup>89</sup>

### 103.10.3 *Incorporation of Commentary*

Sometimes the issue is addressed directly in the DTA. For instance, the Protocols to DTAs with Jersey, Guernsey, IoM and Gibraltar:

It is understood that both Territories will apply this Agreement in the light of the Commentaries on the OECD Model Tax Convention as they may read from time to time, having regard to any observations or other positions that they may have expressed thereon.

---

83 Footnote original: As “The 2002 Update to the Model Tax Convention”.

84 Footnote original: Entitled “Restricting the Entitlement to Treaty Benefits” (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

85 Footnote original: ECJ (Grand Chamber), 16 May 2017, Case C682/15, *Berlioz Investment Fund SA v Directeur de l’administration des contributions directes*, EU:C:2017:373, para.66.

86 Footnote original: “Update to Article 26 of the OECD Model Tax Convention and its Commentary”, adopted by the OECD Council on 17 July 2012, and later included in the 2014 Update to the OECD Model Tax Convention, adopted by the OECD Council on 16 July 2014.

87 Footnote original: Council Directive 2011/16/EU of 15 February 2011 on administrative cooperation in the field of taxation and repealing Directive 77/799/EEC, [2011] OJ L 64, p.1.

88 Footnote original: See the Opinions of AG Kokott of 1 March 2018 in Cases C-115/16 (*N Luxembourg I*, EU:C:2018:143, para. 52), C-118/16 (*X Denmark*, EU:C:2018:146, para. 52), and C-119/16 (*C Denmark I*, EU:C:2018:147, para. 52), noting that “[a]t most, should it transpire from the wording and history of the directive that the EU legislature was guided by the wording of an OECD Model Tax Convention and the commentaries (available at the time) on that OECD Model Tax Convention, a similar interpretation might be appropriate”.

89 Footnote original: Opinion of A G Kokott in *Z Denmark* (C-299/16), para. 53.

#### 103.10.4 *Commentary: Summary*

A great deal of ink has been spilt on this topic, but a reader inclined to legal realism, or a cynic, may conclude that all it comes down to is this: a judge may ignore OECD Commentary if sufficiently minded to do so, and may ignore post-treaty amendments to the Commentary with a relatively easy conscience; but if they want to they can and will rely on it.

For further reading, see Ward et al, *The Interpretation of Income Tax Treaties with Particular Reference to the Commentaries on OECD Model* (2006).

#### 103.10.5 *Commentary in other contexts*

The US, as usual, marches to a different drum. It is a member of OECD but its treaties are based on the US model. However there is a good deal of common ground. In *Crown Forest Industries v Canada*<sup>90</sup> the Canadian Supreme Court had regard to OECD Commentary as extraneous material relevant to the 1980 US/Canada DTA (based on the US model).

The CJEU have used the OECD Commentary to explain the Interest and Royalties Directive.<sup>91</sup>

#### 103.10.6 *Observations & reservations*

OECD Commentary Introduction provides:

30. Observations on the Commentaries have sometimes been inserted at the request of Member countries that are unable to concur in the interpretation given in the Commentary on the Article concerned. These observations thus do not express any disagreement with the text of the Convention, but usefully indicate the way in which those countries will apply the provisions of the Article in question. Since the observations are related to the interpretations of the Articles given in the Commentaries, no observation is needed to indicate a country's wish to modify the wording of an alternative or additional provision that the Commentaries allow countries to include in their bilateral conventions.

#### **Reservations of certain Member countries on some provisions of the Convention**

31. Although all Member countries are in agreement with the aims and the

---

90 [1995] 2 SCR 802 at [55].

91 See 104.11.8 (Beneficial ownership: EU law).

main provisions of the Model Convention, nearly all have entered reservations on some provisions, which are recorded in the Commentaries on the Articles concerned. ... It is understood that insofar as a Member country has entered reservations, the other Member countries, in negotiating bilateral conventions with the former, will retain their freedom of action in accordance with the principle of reciprocity.

32. The Committee on Fiscal Affairs considers that these reservations should be viewed against the background of the very wide areas of agreement that has been achieved in drafting this Convention.

The Australian Taxation Office say:

### **Observations & Reservations**

109. A further point which needs to be considered is the relevance for interpretation purposes of the previously mentioned Observations and Reservations of individual OECD Member countries to the OECD Model Tax Convention and its Commentaries, as Australia, like some of its DTA partners, sometimes depart significantly from the OECD Model. OECD Member Countries lodge ‘Reservations’ when they do not agree with either the relevant text of an OECD Model Article or any variations in text permitted by the Commentaries (and where they therefore wish to put other countries on notice of their views and intentions in negotiating the terms of the DTA). Countries enter ‘Observations’ if they do not object to the Model Article’s text, but do not concur with the interpretation of that text set out in the Commentaries...

111. Observations and Reservations may be of considerable relevance in explaining variations from the OECD Model, both when interpreting implementing legislation under section 15AA of the [Australia] Acts Interpretation Act 1901 and when applying Article 31 of the Vienna Convention. They may not ultimately be admissible in court except to confirm the interpretations otherwise reached under those provisions or when considering ambiguous provisions under Article 32 of the Vienna Convention or, possibly, under section 15AB of the [Australia] Acts Interpretation Act 1901.<sup>92</sup>

92 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia’s Double Tax Agreements.

See Lang and Brugger “The role of the OECD Commentary in tax treaty interpretation”(2008) 23 Australian Tax Forum

[https://www.wu.ac.at/fileadmin/wu/d/i/taxlaw/institute/staff/publications/langbrugger\\_australiantaxforum\\_95ff.pdf](https://www.wu.ac.at/fileadmin/wu/d/i/taxlaw/institute/staff/publications/langbrugger_australiantaxforum_95ff.pdf)

## 103.11 Undefined treaty terms

Terms in the OECD Model, or in any treaty, may have:

- (1) a “**domestic-law meaning**” (the meaning in UK domestic law) or
- (2) an “**autonomous meaning**”, or treaty-meaning, (distinct from UK law)

### 103.11.1 *Domestic-law meaning*

Article 3(2) OECD Model provides:

- [a] As regards the application of the Convention at any time by a Contracting State, any term not defined therein shall, unless
  - [i] the context otherwise requires or
  - [ii] the competent authorities agree to a different meaning pursuant to the provisions of Article 25 [mutual agreement],<sup>93</sup> have the meaning that it has at that time under the law of that State for the purposes of the taxes to which the Convention applies,
- [b] any meaning under the applicable tax laws of that State prevailing over a meaning given to the term under other laws of that State.

The wording of art 3(2) has changed over time, but the changes were said to clarify rather than to alter the meaning, so older treaties using the older wording should not have a different effect.

Avery Jones states:

At first sight, it seems obvious that a treaty term should mean the same in both states, rather than have different internal law meanings in each of them; indeed, there are those who advocate this. But this approach overlooks that the tax systems in internal law do not have the same scope. Article 3(2) has the effect that the relieving provisions of the treaty correspond exactly to the taxing provisions of internal law. If expressions meant the same in both countries, this would not be the result. It would not lead to a sensible result if one country had a wider meaning of a type of income that it had to exempt than the other, and the treaty meaning was the same in both countries. The likely result would be that something covered by the internal law charge would not be exempt as a result of the treaty, or, less importantly, part of the treaty meaning would have no effect.

A problem that article 3(2) appears to encourage is for each state to use its own meaning of terms not only when relieving tax in the source state, which is mainly what the treaty is about, but also when it is giving relief

---

<sup>93</sup> In practice this does not seem to be common.

as the residence state. This can lead to double taxation when the residence state says that if it had been the source state, it would not have taxed, so it will not give any relief for the tax that the source state, in fact, has charged because on its interpretation, the treaty does not prevent it. Or the reverse, when the residence state says that it would have taxed if it had been the source state, and so it will exempt the income even though the source state did not tax ... I do not believe that either result is intended by the Model Treaty; it would be a strange model treaty if it did. It would be nice if the Commentary said so plainly, rather than implying the reverse in an obscure section dealing with thin capitalization.<sup>94</sup> I shall not set out the arguments here as my co-authors and I have written extensively about it.<sup>95</sup> It would be a considerable improvement to the Model Treaty and Commentaries if this point were clarified.<sup>96</sup>

The solution to the problem lies in the words “unless the context otherwise requires.”

In practice the UK courts have regard to the foreign State’s understanding of the provisions, and may take expert evidence on the issue if relevant.<sup>97</sup>

### 103.11.2 *Time to ascertain meaning*

Article 3(2) OECD Model provides:

As regards the application of the Convention at any time by a Contracting State, any term not defined therein shall ... have the meaning that it has at that time under the law of that State for the purposes of the taxes to which the Convention applies...

Thus the meaning of a word is its domestic-law contemporary meaning, rather than that historically used at the date of the treaty. But the words in treaties are not likely to change meaning over time.

A note on terminology. In *Fowler v HMRC*:

---

94 See para 68 of OECD commentary to arts 23A and 23B.

95 Footnote original: See Avery Jones *et al* “Credit and Exemption Under Tax Treaties in Cases of Differing Income Characterization” (1996), 36 *European Taxation* 118.

96 Avery Jones, “Are Tax Treaties Necessary?” 53 *Tax Law Review* 1.

97 *Macklin v HMRC* [2013] UKFTT 554 (TC) at [71] to [75]. The Upper Tribunal [2015] UKUT 39 (TCC) dismissed the evidence as inadmissible, but while experts should not opine on the meaning of the treaty, which is a matter for the court, they may be needed in relation to issues of foreign law and practice.

[Art 3(2)] provides an “always speaking” means of ascertaining the meaning of terms in the Treaty which are undefined therein. It is always speaking because it requires meaning to be ascertained by reference to the national law of a Contracting State “at that time”, that is at the time when the Treaty falls to be applied.

I am not sure that “always speaking” is the best label to use here, because that term is quaint, and because it is best reserved for a principle which is wider than the mere interpretation of terms:

In the classic work of Sir Rupert Cross (*Statutory Interpretation*, 3rd ed. (1995), pp. 51-52) the position is explained as follows:

The somewhat quaint statement that a statute is ‘always speaking’ ... is often taken to mean that a statutory provision has to be considered first and foremost as a norm of the current legal system, whence it takes its force, rather than just as a product of an historically defined Parliamentary assembly. It has a legal existence independently of the historical contingencies of its promulgation, and accordingly should be interpreted in the light of its place within the system of legal norms currently in force. Such an approach takes account of the viewpoint of the ordinary legal interpreter of today, who expects to apply ordinary current meanings to legal texts, rather than to embark on research into linguistic, cultural and political history, unless he is specifically put on notice that the latter approach is required.

In other words, it is generally permissible and indeed necessary to take into account the place of the statutory provision in controversy in the broad context of the basic principles of the legal system as it has evolved.<sup>98</sup>

I prefer to describe the timing aspect of the art 3(2) rule as an “**ambulatory**” approach to construction. But it does not matter which term one uses.

OECD Commentary provides:

11. ... the question arises which legislation must be referred to in order to determine the meaning of terms not defined in the Convention, the choice being between the legislation in force when the Convention was signed or that in force when the Convention is being applied, i.e. when the tax is imposed. The Committee on Fiscal Affairs concluded that the latter interpretation should prevail, and in 1995 amended the Model to make this point explicitly.

---

98 *Turkington v Times Newspapers* [2000] UKHL 57.

103.11.3 *Tax meaning (if any)*

Article 3(2) OECD Model provides:

... any term not defined therein shall ...have the meaning that it has ... under the law of that State for the purposes of the taxes to which the Convention applies...

Thus the meaning of a word is its tax meaning, not any general law meaning, if different. This assumes of course that (1) domestic tax law does provide a meaning for a term; and (2) domestic tax law only provides one meaning. But where there are multiple definitions, as happens very often, it may be possible to identify a principal definition.

If domestic tax law does not provide a meaning, one would fall back on domestic general law (on the basis that tax law would adopt the general law meaning). It is possible that Scots general law and English general law may have different meanings, but that will not often, if ever, arise.

What if the treaty term is not used in domestic tax law?

In practice I do not think there are any words in the OECD Model which are not also found in UK tax statutes, and the words as used in the UK tax statutes have UK tax meanings; and so there must in all cases be some UK tax law meaning. But those meanings may be context dependent and there may not be a general tax law meaning.

Avery Jones addresses this point when considering the meaning of “salaries, wages and other similar remuneration” in art 15:

“Salaries, wages and other similar remuneration...” is not a term found in internal law since the internal law tax charge is on the emoluments of an office or employment...<sup>99</sup>

Although Article 3(2) can be read more strictly as referring to the meaning of terms used in the treaty which are identical to those in internal law, this does not take into account the different terms which might be expected to be used in internal law in different countries. Although the particular treaty being interpreted is a bilateral one, it should be borne in mind that the treaty was not drafted solely with the particular countries’ tax systems in mind when it follows the wording of the Model. There can also be

---

<sup>99</sup> Author’s footnote: the charge is now on earnings, which includes salary, wages and other profits; see 26.4.1 (“Ordinary” earnings). But that does not matter for the points being made here.

language differences in construing treaties, when two languages are equally authentic but terms have different meanings in each language. It is impossible to equate the meaning of treaty terms to identical internal law terms where the only official language of a treaty may not be the country's own language; some Japanese treaties are, for example, only in English. It seems necessary therefore to interpret undefined terms in the treaty in accordance with internal tax law, not only when the terms are identical, but also where they are recognisably the same concept. Thus "salaries, wages, and other similar remuneration ... in respect of an employment" should ... be taken to mean anything taxed as employment income under internal law.<sup>100</sup>

OECD Commentary provides:

13.1 [Art 3(2)] was amended in 1995 to conform its text more closely to the general and consistent understanding of member states. For purposes of [art 3(2)], the meaning of any term not defined in the Convention may be ascertained by reference to the meaning it has for the purpose of any relevant provision of the domestic law of a Contracting State, whether or not a tax law. However, where a term is defined differently for the purposes of different laws of a Contracting State, the meaning given to that term for purposes of the laws imposing the taxes to which the Convention applies shall prevail over all others, including those given for the purposes of other tax laws.

The Australian Taxation Office follow OECD Commentary approach.<sup>101</sup>

#### 103.11.4 *Subject to context*

The rule in art 3(2) applies "unless the context otherwise requires".

OECD Commentary provides:

12. ... The context is determined in particular by the intention of the Contracting States when signing the Convention as well as the meaning given to the term in question in the legislation of the other Contracting State (an implicit reference to the principle of reciprocity on which the Convention is based)...

---

100 Avery Jones, "Problems of categorising income and gains for tax treaty purposes" [2001] BTR 382.

101 TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements para 63-76

<http://law.ato.gov.au/atolaw/view.htm?Docid=TXR/TR200113/NAT/ATO/00001>

13. Consequently, the wording of [art 3(2)] provides a satisfactory balance between,

[a] on the one hand, the need to ensure the permanency of commitments entered into by States when signing a convention (since a State should not be allowed to make a convention partially inoperative by amending afterwards in its domestic law the scope of terms not defined in the Convention) and,

[b] on the other hand, the need to be able to apply the Convention in a convenient and practical way over time (the need to refer to outdated concepts should be avoided).

The context will often show that an autonomous meaning of undefined terms is appropriate. For examples see 103.22.1 (Approach to characterisation); 8.26.2 (Substantial presence).

Art 3(2) does not apply to terms defined in the treaty. But treaty definitions are themselves subject to context, and context might suggest domestic-law meaning should apply. Also the definitions will themselves use undefined terms.

The position is normally put in terms of stark alternatives: the meaning must be either domestic-law or autonomous. But the context may support an intermediate position. One may start with domestic-law meaning, and generally stop there; but in limited aspects only where domestic-law does not fit the treaty, the domestic law meaning may not be applied. An example (a variant of the facts of *Fowler*) might be that the meaning of employment normally follows domestic law; but if domestic law deemed a diver's trade to be an employment, the deeming should not apply for treaty purposes.

## **103.12 Taxes Covered**

### *103.12.1 Scope of DTA*

I refer to article 2 OECD Model as the Taxes Covered clause, with initial capitals to reflect the technical nature of the expression.

Article 2(1) OECD Model provides:

This Convention shall apply to

[a] taxes on income and on capital

[b] imposed on behalf of a Contracting State or of its political subdivisions or local authorities,

[c] irrespective of the manner in which they are levied.

There are three distinct points here.

### 103.12.2 *Taxes on income and capital*

Art 2(2) OECD Model defines the expression “taxes on income and capital”:

There shall be regarded as taxes on income and on capital all taxes imposed on total income, on total capital, or on elements of income or of capital, including taxes on gains from the alienation of movable or immovable property, taxes on the total amounts of wages or salaries paid by enterprises, as well as taxes on capital appreciation

The OECD Commentary provides:

3. This paragraph gives a definition of taxes on income and on capital. Such taxes comprise taxes on total income and on elements of income, on total capital and on elements of capital. They also include taxes on profits and gains derived from the alienation of movable or immovable property, as well as taxes on capital appreciation. Finally, the definition extends to taxes on the total amounts of wages or salaries paid by undertakings (“payroll taxes”; in Germany, “*Lohnsummensteuer*”; in France, “*taxe sur les salaires*”). Social security charges, or any other charges paid where there is a direct connection between the levy and the individual benefits to be received, shall not be regarded as “taxes on the total amount of wages”.
4. Clearly a State possessing the right to tax an item of income or capital under the Convention may levy the taxes imposed by its legislation together with any duties or charges accessory to them: increases, costs, interest, penalties etc. It has not been considered necessary to specify this in the Article, as it is obvious that a Contracting State that has the right to levy a tax may also levy the accessory duties or charges related to the principal duty. Most States, however, do not consider that interest and penalties accessory to taxes covered by Article 2 are themselves included within the scope of Article 2 and, accordingly, would generally not treat such interest and penalties as payments to which all the provisions concerning the rights to tax of the State of source (or situs) or of the State of residence are applicable, including the limitations of the taxation by the State of source and the obligation for the State of residence to eliminate double taxation. Nevertheless, where taxation is withdrawn or reduced in accordance with a mutual agreement under Article 25, interest and administrative penalties accessory to such taxation should be withdrawn or reduced to the extent that they are directly connected to the taxation (i.e. a tax liability) that is relieved under the mutual agreement. This would be

the case, for example, where the additional charge is computed with reference to the amount of the underlying tax liability and the competent authorities agree that all or part of the underlying taxation is not in accordance with the provisions of the Convention. This would also be the case, for example, where administrative penalties are imposed by reason of a transfer pricing adjustment and that adjustment is withdrawn because it is considered not in accordance with paragraph 1 of Article 9.

### 103.12.3 *Political subdivisions/local authorities*

The USA/UK DTA is unusual in that it applies to federal taxes but not to state or city taxes. Perhaps there are constitutional principles involved here.

### 103.12.4 *Manner of levying tax*

Art 2(1)OECD Model directs that the treaty applies “irrespective of the manner in which the taxes are levied”.

The OECD Commentary on art 2(1) explains what is meant by this:

The method of levying the taxes is equally immaterial: by direct assessment or by deduction at the source, in the form of surtaxes or surcharges, or as additional taxes (*centimes additionnels*), etc.

Art 2(1) was relied on, though unnecessarily and perhaps only rhetorically, in *Fowler v HMRC*.<sup>102</sup>

### 103.12.5 *List of taxes covered*

Article 2(3) OECD Model provides for a list of taxes covered:

The existing taxes to which the Convention shall apply are in particular:

- a) (in State A): .....
- b) (in State B): .....

### 103.12.6 *Taxes covered: UK practice*

There are some UK treaties which adopt the wording of OECD Model art 2(1)(2). But much more often, these provisions are omitted and article 2 of the DTA (headed “Taxes Covered”) provides: “The Agreement shall apply to the following taxes...” and sets out a list. Presumably that is thought to be more precise. I cannot see that the omission has any significance.

---

<sup>102</sup> See 103.22.1 (Approach to characterisation).

### 103.12.7 *Substantially similar taxes*

Article 2(4) OECD Model provides:

- [a] The Convention shall apply also to any identical or substantially similar taxes that are imposed after the date of signature of the Convention in addition to, or in place of, the existing taxes.
- [b] The competent authorities of the Contracting States shall notify each other of any significant changes that have been made in their taxation laws.

This is standard in UK treaties (unlike art 2(1)(2)).

### 103.13 **Effectively connected with PE**

This phrase is found in a number of OECD Model articles. Discussion on one may be helpful to the others, so it may be convenient to set out the list here:

<b>Article</b>	<b>Phrase (in outline)</b>	<b>See para</b>
10(4)	Holding in respect of which dividends are paid is effectively connected with a PE	103.8.2
11(4)	Debt-claim in respect of which interest is paid is effectively connected with a PE	103.8.2
11(5)	A PE in connection with which the indebtedness on which the interest is paid was incurred	25.26.6
12(3)	Royalties arise through a PE and the right or property in respect of which the royalties are paid is effectively connected with such PE	103.8.2
13(2)	Business property of a PE <sup>103</sup>	53.23.2
21(2)	The right or property in respect of which the income is paid is effectively connected with a PE	103.8.2

### 103.14 **BEPS multilateral instrument**

This section discusses the treaty whose long title is “the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting”. I call it the “**BEPS MLI**” or where the context is clear, just MLI.

The MLI is supplemented by:

---

103 This phrase is different but the meaning will be (more or less) the same.

- An explanatory statement (“MLI ES”)<sup>104</sup>
- A commentary
- Guidance for the development of synthesised texts<sup>105</sup>
- OECD Peer Review Report on Treaty Shopping<sup>106</sup>

The object and purpose of the MLI is to implement the tax treaty-related BEPS measures.<sup>107</sup> The background can be found in BEPS Action 15 Report, “Developing a Multilateral Instrument to Modify Bilateral Tax Treaties”.

The MLI implements the following BEPS Actions:

Action	Topic	Adopted by UK
2	Hybrids	Adopted in part
6	Treaty abuse	Adopted in part
7	Permanent Establishment	Adopted in part
14	Dispute resolution	Adopted but not discussed here.

OECD publish a database of countries which have signed the MLI and their choices of optional provisions.<sup>108</sup>

The UK has published a document (“UK MLI Notifications”)<sup>109</sup> which set out:

- (1) DTAs which are covered by the MLI
- (2) UK opt-outs and opt-ins

104 <https://www.oecd.org/tax/treaties/explanatory-statement-multilateral-convention-to-implement-tax-treaty-related-measures-to-prevent-BEPS.pdf>

Para 12 MLI ES provides: “While this Explanatory Statement is intended to clarify the operation of the Convention to modify Covered Tax Agreements, it is not intended to address the interpretation of the underlying BEPS measures (except with respect to the mandatory binding arbitration provision contained in Articles 18 through 26).”

105 <http://www.oecd.org/tax/treaties/beps-mli-guidance-for-the-development-of-synthesised-texts.pdf> (Nov 2018)

106 <https://www.oecd-ilibrary.org/docserver/9789264312388-en.pdf?expires=1550998970&id=id&accname=guest&checksum=0714C894B29FF51D6F78DD798D16F034> (209)

107 Para 12 MLI ES, referring to art 31 Vienna Treaty; see 103.9 (DTA interpretation principles).

108 <http://www.oecd.org/tax/treaties/mli-database-matrix-options-and-reservations.htm>

109 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/725261/Final\\_list\\_of\\_UK\\_reservations\\_and\\_notifications\\_made\\_on\\_deposit\\_of\\_the\\_instrument\\_of\\_ratification.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf)

The UK has not adopted some of the MLI provisions relating to Action 2 or Action 7, taking the view that current provisions are sufficient.

The MLI is incorporated into UK law by the Double Taxation Relief (Base Erosion and Profit Shifting) Order 2018.<sup>110</sup>

The MLI is in English and French, “both texts being equally authentic”.<sup>111</sup> But I suspect that (as is the case with the OECD Model) reference to the French version will rarely if ever happen.<sup>112</sup>

HMRC publish convenient synthesised texts of DTAs as amended by the MLI.<sup>113</sup>

### 103.14.1 Navigation

I discuss the specific MLI provisions in the context where they arise. This chapter covers MLI issues which are more conveniently dealt with as a discrete topic.

<b>Article</b>	<b>Topic</b>	<b>See</b>
<i>Part I Scope and Interpretation</i>

A full discussion requires a book to itself, and such books have been written.

## **103.15 Definitions**

### 103.15.1 *Party*

Art 2(1) BEPS MLI provides:

- b) The term “Party” means:
  - i) A State for which this Convention is in force pursuant to Article 34 (Entry into Force); or
  - ii) A jurisdiction which
    - [A] has signed this Convention pursuant to subparagraph b) or c) of paragraph 1 of Article 27 (Signature and Ratification, Acceptance or Approval)
    - [B] and for which this Convention is in force pursuant to Article 34 (Entry into Force).

### 103.15.2 *Contracting jurisdiction/signatory*

Art 2(1) BEPS MLI provides some commonsense definitions:

- c) The term “Contracting Jurisdiction” means a party to a Covered Tax Agreement.

The term “Contracting Jurisdiction” refers to the States, jurisdictions or territories that are parties to a Covered Tax Agreement. It is used instead of the more common terms “Contracting State” (because the MLI may apply to DTAs to which a non-State jurisdiction is a party) and “Contracting Party” (because “Party” refers to a party to the MLI).

- d) The term “Signatory” means a State or jurisdiction which has signed this Convention but for which the Convention is not yet in force.

### 103.15.3 *Covered tax agreement*

Art 2(1)(a) BEPS MLI provides:

The term “Covered Tax Agreement” means an agreement for the avoidance of double taxation with respect to taxes on income (whether or not other taxes are also covered):

- i) that is in force between two or more:
  - A) Parties; and/or
  - B) jurisdictions or territories which are parties to an agreement described above and for whose international relations a Party is responsible; and
- ii) with respect to which each such Party has made a notification to the Depositary listing the agreement as well as any amending or accompanying instruments thereto (identified by title, names of the parties, date of signature, and, if applicable at the time of the notification, date of entry into force) as an agreement which it wishes to be covered by this Convention.

Covered tax agreements are listed, so there will be no doubt as to what is covered. UK IHT DTAs are not covered tax agreements.

### 103.15.4 *Undefined terms*

Art 2(2) BEPS MLI provides:

As regards the application of this Convention at any time by a Party, any term not defined herein shall, unless the context otherwise requires, have the meaning that it has at that time under the relevant Covered Tax Agreement.

For the position in the absence of express definitions, see 103.11 (Undefined

treaty terms).

### 103.16 Scope of BEPS MLI

Article 1 provides:

This Convention modifies all Covered Tax Agreements as defined in subparagraph a) of paragraph 1 of Article 2 (Interpretation of Terms).<sup>114</sup>

The MLI makes changes to DTAs where both States have opted to make the change. If both States select a particular amendment, it is included in the revised version of the treaty between them. If either State does not select it, it is not included and the original treaty provisions continue to apply.

UK MLI Notifications lists 121 UK DTAs which it wishes to be covered by the MLI. That is most but not quite all of the UK DTAs as at 2017.

The following States are not listed. Instead, bilateral negotiations have updated, or will update, these agreements:

<b>State</b>	<b>Status of DTA with UK</b>
Austria	New treaty (2018)
Colombia	New treaty (2016)
Germany	Existing treaty (2010) yet to be amended
Switzerland	Existing treaty (2012) amended 2017
Taiwan	Existing treaty (2002) yet to be amended

The following jurisdictions are not listed since these are Crown Dependencies/overseas territories. Some have new DTAs; presumably the others will be updated in due course, but have lower priority.

<b>Jurisdiction</b>	<b>Status of UK DTA</b>
<i>Crown Dependencies</i>	
Jersey	New treaty (2018)
Guernsey	New treaty (2018)
Isle of Man	New treaty (2018)
<i>British overseas territories</i>	
Cayman Islands	Existing treaty (2009) yet to be amended
Falkland Islands	Existing treaty (1997) yet to be amended
Gibraltar	New treaty (2019)
Montserrat	Existing treaty (1947, 2009) yet to be amended
British Virgin Islands	Treaty yet to be concluded

---

<sup>114</sup> See 103.15.3 (Covered tax agreement),

The US, as usual, marches to a different drum. It has not ratified the MLI. But some MLI provisions have followed US Model precedent.

### **103.17 BEPS MLI commencement**

#### *103.17.1 Entry into force*

Art 34 BEPS MLI provides:

1. This Convention shall enter into force on the first day of the month following the expiration of a period of three calendar months beginning on the date of deposit of the fifth instrument of ratification, acceptance or approval.

Slovenia deposited the fifth ratification on 22 March 2018, so the MLI entered into force on 1 July 2018. But it did not enter into force for the UK at that time.

2. For each Signatory ratifying, accepting, or approving this Convention after the deposit of the fifth instrument of ratification, acceptance or approval, the Convention shall enter into force on the first day of the month following the expiration of a period of three calendar months beginning on the date of the deposit by such Signatory of its instrument of ratification, acceptance or approval.

The UK signed the convention on 7 June 2017, but deposited the instrument of ratification on 29 June 2018, so the MLI entered into force in the UK on 1 October 2018.

#### *103.17.2 Entry into effect*

Art 35 BEPS MLI provides:

1. The provisions of this Convention shall have effect in each Contracting Jurisdiction with respect to a Covered Tax Agreement:

- a) with respect to taxes withheld at source on amounts paid or credited to non-residents, where the event giving rise to such taxes occurs on or after the first day of the next calendar year that begins on or after the latest of the dates on which this Convention enters into force for each of the Contracting Jurisdictions to the Covered Tax Agreement; and
- b) with respect to all other taxes levied by that Contracting Jurisdiction, for taxes levied with respect to taxable periods

beginning on or after the expiration of a period of six calendar months (or a shorter period, if all Contracting Jurisdictions notify the Depository that they intend to apply such shorter period) from the latest of the dates on which this Convention enters into force for each of the Contracting Jurisdictions to the Covered Tax Agreement.<sup>115</sup>

There are further commencement rules (not discussed here) for mutual agreement procedures and arbitration, and some scope for States to amend these rules.

In short:

- (1) Withholding tax changes have effect from 1 January 2019.
- (2) Other tax changes have effect for taxable periods beginning on or after 1 April 2019.

This timetable applies to DTAs with the States which ratified before the UK:

Austria	Serbia
New Zealand	Slovenia
Poland	Sweden

For most treaties, commencement will take effect by reference to the date of entry into force of the other State.

On 15 March 2021, the Conference of the Parties to the MLI approved an opinion on art 35 MLI, in particular on withholding tax where the latest of the dates of entry into force of the MLI for a pair of Contracting Jurisdictions is on 1 January of a year.<sup>116</sup>

---

115 Article 35 continues with two options, but the UK has not adopted these. They will be relevant if other Parties adopt them. These are:

“2. Solely for the purpose of its own application of subparagraph a) of paragraph 1 and subparagraph a) of paragraph 5, a Party may choose to substitute "taxable period" for "calendar year", and shall notify the Depository accordingly.

3. Solely for the purpose of its own application of subparagraph b) of paragraph 1 and subparagraph b) of paragraph 5, a Party may choose to replace the reference to "taxable periods beginning on or after the expiration of a period" with a reference to "taxable periods beginning on or after 1 January of the next year beginning on or after the expiration of a period", and shall notify the Depository accordingly.”

116 <https://www.oecd.org/tax/treaties/oecd-publishes-30-country-profiles-applying-a-arbitration-under-the-multilateral-beps-convention.htm>

**103.18 Incorporating DTAs in UK law**

International treaties (including DTAs) do not automatically become part of UK law, but must be incorporated into UK law by authority of statute. Accordingly, s.2(1) TIOPA provides:

If Her Majesty by Order in Council declares—

- (a) that arrangements specified in the Order have been made in relation to any territory outside the UK with a view to affording relief from double taxation<sup>117</sup> in relation to taxes within subsection (3), and
- (b) that it is expedient that those arrangements should have effect, those arrangements have effect.

**103.18.1 DTA approval procedure**

Section 5(2) TIOPA provides:

An Order under section 2 is not to be submitted to Her Majesty in Council unless a draft of the Order has been laid before and approved by a resolution of the House of Commons.

Art. 30 OECD Model provides:

- 1. This Convention shall be ratified and the instruments of ratification shall be exchanged at ..... as soon as possible.
- 2. The Convention shall enter into force upon the exchange of instruments of ratification and its provisions shall have effect:
  - a) (in State A): .....
  - b) (in State B): .....

Thus for example art.31 (Entry into Force) of the UK/France DTA provides:

- (1) Each of the Contracting States shall notify to the other the completion of the procedures required by its law for the bringing into force of this Convention. This Convention shall enter into force on the date the later of these notifications has been received.
- (2) The provisions of this Convention shall have effect:

---

117 This is expanded by s.2(1A) TIOPA which was added in order to authorise the BEPS MLI: “For the purposes of this section, arrangements made with a view to affording relief from double taxation include any arrangements which modify the effect of arrangements so made.”

- (a) in the United Kingdom:
  - (i) in respect of income tax and capital gains tax, for any year of assessment beginning on or after 6th April in the calendar year next following that in which this Convention enters into force;
  - (ii) in respect of corporation tax, for any financial year beginning on or after 1st April in the calendar year next following that in which this Convention enters into force;
- (b) in France ...

The INTM summarises the procedure:

**INTM152020 Negotiation of agreements** [Jan 2018]

... HMRC are responsible for the negotiation of the terms of agreements, subject to ministerial approval. Once the draft agreement is agreed by the representatives of both countries they initial the draft. The final text is subsequently signed on behalf of both countries and in the UK is then laid before the House of Commons in the form of a draft Statutory Instrument. When approved, it receives the Royal Assent by Order in Council (TIOPA10/S2).

Each country has to notify the other that it has done everything necessary to give the agreement the force of law and only when each country has done so does the agreement come into force. ...

The UK parliamentary process is brief, and it is not usual to produce a detailed explanatory note. But other treaty States may produce such material, which is relevant in the UK.<sup>118</sup>

### 103.18.2 *Taxes within s.2 TIOPA*

Section 2(3) TIOPA provides:

The taxes are—

- (a) income tax,
- (b) corporation tax,
- (c) capital gains tax,
- (d) petroleum revenue tax, and
- (e) any taxes imposed by the law of the territory that are of a similar character to taxes within paragraphs (a) to (d).

IHT has its own procedure.<sup>119</sup>

---

<sup>118</sup> See 103.9.9 (Foreign revenue guidance).

<sup>119</sup> See 108.5 (IHT DTAs: Incorporation in UK law).

103.18.3 *Effect of DTAs*

Section 2(2) TIOPA provides:

If arrangements have effect under subsection (1), they have effect in accordance with section 6.

So we turn to s.6 TIOPA. Section 6(1) provides:

Subject to this Part and Part 18 of ICTA, double taxation arrangements have effect in accordance with subsections (2) to (4) despite anything in any enactment.

So DTAs override domestic UK tax legislation. In *Anson v HMRC*:<sup>120</sup>

The provisions of the ... Convention therefore override inconsistent provisions in domestic UK tax legislation, other than those concerned with double taxation relief.

Section 6(2)(3) TIOPA set out the matters which a DTA can achieve for IT/CT and CGT: it is helpful to read them side by side:

**s.6(2) TIOPA**

Double taxation arrangements have effect in relation to income tax and corporation tax so far as the arrangements provide—

- (a) for relief from income tax or corporation tax,
- (b) for taxing income of non-UK resident persons<sup>121</sup> that arises from sources in the UK,
- (c) for taxing chargeable gains accruing to non-UK resident persons on the disposal of assets in the UK,

**s.6(3) TIOPA**

Double taxation arrangements have effect in relation to capital gains tax so far as the arrangements provide—

- (a) for relief from capital gains tax,
- (b) for taxing capital gains accruing to non-UK resident persons on the disposal of assets in the UK, .

---

120 [2015] UKSC 44 at [112].

121 Defined by reference in ss(7): “In subsection (3) ‘UK resident person’ and ‘non-UK resident person’ have the meaning given by section 989 of ITA 2007.”

(d) for determining the income or chargeable gains to be attributed to non-UK resident persons,

(e) for determining the income or chargeable gains to be attributed to agencies, branches or establishments in the UK of non-UK resident persons, or

(f) for determining the income or chargeable gains to be attributed to UK resident persons who have special relationships with non-UK resident persons.<sup>122</sup>

(c) for determining the capital gains to be attributed to non-UK resident persons,

(d) for determining the capital gains to be attributed to agencies, branches or establishments in the UK of non-UK resident persons, or

(e) for determining the capital gains to be attributed to UK resident persons who have special relationships with non-UK resident persons

Para (a) is what one would expect. In practice, as far as I am aware, DTAs are not used for taxing income or chargeable gains, so s.6(2)(b)(c) and s.6(3)(b) are not needed.

Section 3(1) TIOPA authorises retrospective relief:

Section 2(1) gives effect to arrangements even if the arrangements include—

- (a) provision for relief from tax for periods before the passing of this Act, or
- (b) provision for relief from tax for periods before the making of the arrangements.

Section 3(2) TIOPA extends this:

Section 2(1) gives effect to arrangements even if the arrangements include—

- (a) provision as to income that is not subject to double taxation,
- (b) provision as to chargeable gains that are not subject to double taxation
- (c) [This relates to oil taxation]
- (d) provision conferring (with or without other functions) functions relating to the determination of matters arising under the arrangements on a public authority in the UK or in a territory

---

<sup>122</sup> This relates to adjustments under article 9.

outside the UK.

These provisions give effect to most treaty provisions, though there could be gaps.<sup>123</sup>

#### 103.18.4 “Double taxation”

Section 4 TIOPA provides:

- (1) For the purposes of sections 2 and 3, any amount within subsection (2) is to be treated as having been payable.
- (2) An amount is within this subsection if it is an amount of tax that would have been payable under the law of a territory outside the UK but for a relief—
  - (a) given under the law of the territory with a view to promoting industrial, commercial, scientific, educational or other development in a territory outside the UK, and
  - (b) about which provision is made in double taxation arrangements.
- (3) References in sections 2 and 3 to double taxation are to be read in accordance with subsection (1).

EN TIOPA provides:

35. Sections 2 and 3 [TIOPA] refer to “double taxation” in general terms. Broadly speaking, there is double taxation if the same (for example) income is taxed in more than one territory. But that will not be the case if the income (in this example) is not in fact taxed in one of the territories concerned as a result of a relief. [Section 4] supplements sections 2 and 3. It requires certain reliefs to be ignored, with the result that one is to assume in certain cases that tax has been paid even though it has in fact not been paid. This deemed tax (in the territory giving the relief), taken with the actual tax (in the other territory), then means that there is “double taxation”. As a result of this section, therefore, statutory effect can be given to provisions in arrangements which are about such cases.

#### 103.18.5 BEPS MLI

Section 2(1A) TIOPA provides:

For the purposes of this section, arrangements made with a view to

---

123 *NEC Semi-Conductors Ltd v HMRC* [2006] EWCA Civ 25; *Boake Allen v HMRC* [2007] 1 WLR 1386.

affording relief from double taxation include any arrangements which modify the effect of arrangements so made.

This is intended to facilitate the implementation of the BEPS multilateral instrument.

### 103.18.6 *Revocation of DTAs*

The esoteric topic of revocation of DTAs enjoyed an unexpected outing in *Miller (R, oao) v Secretary of State for Exiting the European Union*, the cause célèbre which decided that government had no power to revoke EU treaties without authority of Parliament.

In the High Court, the government's skeleton argument provided:

Double taxation treaties must be domestically implemented through secondary legislation to have effect upon the rights and liabilities of taxpayers, and are periodically renegotiated by the Crown. Such renegotiations involve terminating the existing treaty and enacting replacement secondary legislation. Parliament does not authorise the termination of an existing treaty, notwithstanding the effect that a change in the international rules is intended to produce on the rights and liabilities of taxpayers. Still less does it authorise the Crown to commence negotiations on changes to existing treaties. Its role is to scrutinise the secondary legislation implementing a new treaty once it has been agreed by the Crown. ... [s.2 TIOPA]<sup>124</sup> authorised neither the termination of an existing treaty nor the commencement of negotiations on changes to an existing treaty nor the agreement of a new treaty. The fact that, under [s.5(2) TIOPA], the House of Commons (and not, it is to be noted, Parliament) had a role in scrutinising a new treaty once it had been agreed does not affect the point made.<sup>125</sup>

Where a new treaty replaces an old one, under the s.2 TIOPA procedure,

---

124 The original referred to ICTA 1988; but nothing turns on that.

125 [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/558592/Miller\\_v\\_SSExEU\\_-\\_Skeleton\\_Argument\\_of\\_the\\_Secretary\\_of\\_State\\_300916.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/558592/Miller_v_SSExEU_-_Skeleton_Argument_of_the_Secretary_of_State_300916.pdf) (footnotes omitted).

The same point is made, more briefly, in the Crown's case before the Supreme Court, para 45: <https://www.supremecourt.uk/news/article-50-brexite-appeal.html>

The argument is discussed by Finnis at:

<http://judicialpowerproject.org.uk/wp-content/uploads/2016/11/Finnis-2016-Supplementary-Note-pg.pdf>

there *is* statutory (parliamentary) authority for the revocation of the old treaty.

Section 5(1) TIOPA provides:

If an Order under section 2 (“the later Order”) revokes an earlier Order under that section, the later Order may contain transitional provisions that appear to Her Majesty to be necessary or expedient.

So the government’s argument - that this situation constituted an example of the government’s power to abolish statutory rights without authority of parliament - is invalid. The High Court, I think understandably, did not even mention it, and the Supreme Court dismissed it briefly:

... DTTs are an unsatisfactory analogy. By ... TIOPA, Parliament provided in primary legislation that arrangements agreed by ministers in a DTT at international level will have effect in national law, but only if those arrangements are specified in an Order in Council which is approved by the House of Commons. Thus, unlike EU law which becomes part of UK law automatically as a result of the 1972 Act, the arrangements under a DTT do not take effect automatically as a result of ... TIOPA, but only through a specific Order in Council which has to be approved by Parliament.<sup>126</sup>

On the other hand, if the Crown could validly revoke an existing DTA *without* any replacement (and thus without following the s.2 TIOPA procedure and without Parliamentary authority) then that would have supported the Crown’s argument in *Miller* that the Crown could similarly revoke the EU treaty. The reader may think that if the Crown in *Miller* had wanted to raise tax arguments, it would have done well to seek the input of tax counsel. But it seems unlikely that this argument, however put, would have affected the final result.

It was therefore doubtful whether the Crown could validly revoke an existing DTA without any replacement (and thus without following the s.2 TIOPA procedure, and without parliamentary authority). But now s.2(1A) TIOPA may fill that gap.

### 103.18.7 DTA/UK law conflict

---

<sup>126</sup> *Miller (R, oao) v Secretary of State for Exiting the European Union* [2017] UKSC 5 at [89].

The INTM provides:

**INTM152020 Negotiation of agreements** [Jan 2018]

... In the UK, taxpayers have no rights under the agreement itself; the rights arise under the Statutory Instrument and the legislation which gives the agreement the force of law (*IRC v Collico Dealings Ltd* 39 TC 509).

In some States, treaty obligations override their domestic law; but if there is a conflict between the terms of a treaty and UK domestic law, UK domestic law prevails and overrides treaty obligations.<sup>127</sup>

However even in the UK, conflict matters, or should matter, as:

- (1) It may affect construction: the courts should seek to construe domestic law consistently with treaty obligations.
- (2) It may affect policy debate and law reform, at least to the extent that those framing UK taxation, or their treaty-partners, believe that the UK ought to comply with its treaty obligations and not to impose tax in breach of them.

### 103.19 Claim for DT reliefs

Section 6(6) TIOPA provides:

Relief under subsection (2)(a), (3)(a) or (4) requires a claim.

Subsection (2)(a) and (3)(a) provide IT/CT and CGT relief.<sup>128</sup> (Subsection (4) relates to petroleum revenue tax, not discussed here)

In short, a claim for relief is needed in all cases.<sup>129</sup>

Form HS302 (Dual residents) provides a claim form for individuals who are UK resident under the SRT, but treaty-resident in a foreign State.

In addition, dual resident companies must make a claim under the mutual agreement tie-breaker;<sup>130</sup> but perhaps that does not happen often.

---

<sup>127</sup> *Padmore (No 2) v IRC* 73 TC 470.

<sup>128</sup> See 103.18.3 (Effect of DTAs).

<sup>129</sup> This seems self-evident, but the contrary view was argued, and rejected, in *Davies v HMRC* [2020] UKUT 67 (TCC) at [84]. For completeness: the same conclusion was reached in *Uddin v HMRC* [2020] UKFTT 441 (TC).

See too 117.1 (Claims).

The application of s.6(2)(b)-(f) and s.6(3)(b)-(e) TIOPA does not depend on a claim, but these provisions are not reliefs.

<sup>130</sup> See 103.19 (Tie-breaker: Mutual agreement).

## **103.20 Remittance basis income**

### 103.20.1 *Unremitted income*

The Commentary to art 1 OECD Model provides:

108 ...[Remittance basis taxpayers are not] subject to potential double taxation to the extent that foreign income is not remitted to their State of residence and it may be considered inappropriate to give them the benefit of the provisions of the Convention on such income. Contracting States which agree to restrict the application of the provisions of the Convention to income that is effectively taxed in the hands of these persons may do so by adding the following provision to the Convention ...

The OECD proposed text is as follows:

Where under any provision of this Convention

[a] income<sup>131</sup> arising in a Contracting State is relieved in whole or in part from tax in that State and

[b] under the law in force in the other Contracting State a person, in respect of the said income, is subject to tax by reference to the amount thereof which is remitted to or received in that other State and not by reference to the full amount thereof,

then any relief provided by the provisions of this Convention shall apply only to so much of the income as is taxed in the other Contracting State.

I refer to this as a “**remittance basis DTA override**”.

Although this text was only added to OECD Commentary in 2003, a provision of this kind is found in most UK DTAs.<sup>132</sup>

USA/UK DTA Technical Explanation gives a straightforward example:<sup>133</sup>

---

131 Author’s footnote:

References to income in this discussion in principle include gains.

The draft clause refers only to income, but in the UK foreign gains also qualify for the remittance basis, so DTAs with a capital gains article generally extend the rule to gains.

If the applicable DTA fails to do this then there may appear to be double non-taxation in that gains which are (un)taxed in the UK on the remittance basis are not taxed in the foreign State because of DT relief. But the word “income” would probably be construed to include gains.

132 See too 8.5 (“Liable to tax”).

133 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>  
The remittance basis DTA override is in art 1(7) USA/UK DTA.

For example, if a UK resident who is not domiciled in the UK maintains a brokerage account in Ireland into which is paid \$100 in U.S.-source dividend income, the United States may impose withholding tax at the statutory rate of 30% because the dividend income will not be taxed in the UK as it has not been remitted to the UK. If the dividend income instead is paid into a brokerage account in London, the UK resident will be subject to tax in the UK and the United States will reduce the rate of withholding tax to 15%.

Note that it is foreign tax (in this case, US tax), not UK tax, which is in issue here. (UK tax issues only arise where the UK has a treaty with another State where the *foreign* State has a remittance basis. The only examples of which I am aware are Ireland<sup>134</sup> and Japan.)

### 103.20.2 *Remitted income*

Suppose:

- (1) Year 1: T (a remittance basis taxpayer) receives income subject to foreign tax
- (2) Year 2: T remits the income

In year 1, no DT relief is available, and so foreign tax is payable without DT relief. In year 2, the foreign tax can then be reclaimed under the relevant DTA - if foreign law allows. And what are the time limits if the remittance takes place many years after receipt? It may be easier to remit the income in year 1.

A claim for relief should be made when the income is remitted, not when it arises.

## 103.21 **Third-party DT relief**

### 103.21.1 *Terminology*

In this book I use the term “**third-party DT relief**”<sup>135</sup> to describe the case where:

- (1) Income/gains arise to a person treaty-resident in the foreign treaty State.
- (2) A person who is treaty-resident in the UK would under domestic law be taxed on that income/gain.

---

<sup>134</sup> Ireland/UK DTA art.6 (Limitation of relief) and art.14(5) (gains).

<sup>135</sup> The term “indirect DT relief” has also been used.

(3) The UK resident (ie a third party) qualifies for DT relief.

How can it happen that a UK resident is taxable on income/gains arising to a third party? There are various possible reasons, including:

- (1) Hybrid entities
- (2) Deeming provisions (such as s.3, 624, 720, CFC rules)

### 103.21.2 *Third-party DT relief*

Article 1 OECD Model provides:

This Convention shall apply to persons who are residents of one or both<sup>136</sup> of the Contracting States.

DT exemptions are not in principle restricted to the person to whom the income/gains accrue. They can apply to any treaty-resident. Sections 2 and 6 TIOPA authorise DT exemptions to apply in this way, for they simply provide “relief”, ie relief for anyone.<sup>137</sup>

It may seem self-evident that a DTA can confer third-party DT relief, but authority can be cited if needed. In *Lord Strathalmond v IRC*.<sup>138</sup>

- (1) US source income arose to Lady Strathalmond.
- (2) The rule at that time (only repealed in 1988) was that income of a married woman was deemed to accrue to her husband, so in the absence of treaty relief, Lord Strathalmond would have been taxable.

The wife was treaty-resident in the USA but the husband was treaty-resident in the UK. Nevertheless he was entitled to DT exemption. The treaty exempted the income, not the treaty-resident individual, so a third party otherwise taxed on the income could claim the benefit of treaty relief even though not treaty-resident in the USA. Lord Millett summarised the point:

[*Strathalmond*] shows that the relief from UK tax accorded by a double taxation agreement can enure for the benefit of a third party.<sup>139</sup>

---

136 The words “or both” are otiose. A person cannot be treaty-resident in *both* treaty States, given the tie-breaker; but it does not matter.

137 Wheeler discusses this issue in *The Missing Keystone of Income Tax Treaties* (2012) para 3.2 (Subjective/objective nature of treaties) but her proposed terminology (Objective/subjective) is not the most helpful.

138 48 TC 537.

139 *Bricom v IRC* 70 TC 272 at p.290.

Likewise, in *Padmore v IRC*<sup>140</sup> a partner was entitled to DT exemption on income of a Jersey partnership where the partnership was a person treaty-resident in Jersey but the partner was not.

Likewise, in *Lee v HMRC* trustees were entitled to DT exemption on a gain accruing to a Mauritian trust, which was a hybrid entity: it was regarded as a person in Mauritius, and treaty-resident in Mauritius; but in the UK the gain was regarded as accruing to the trustees who were not treaty-resident in Mauritius. The trustees could not be taxed on the same gain.<sup>141</sup>

Other countries adopt the same view.<sup>142</sup>

### 103.21.3 3<sup>rd</sup> party relief withdrawn

In some cases third-party DT relief produces a fair result. But in other cases it can override anti-avoidance provisions which deem foreign income/gains of a non-resident to arise to a UK resident, and so it can facilitate tax avoidance.

One possible reaction to this problem was to wish it away, under the guise of interpretation; and there are dicta both in case law and in OECD Commentary to the effect that DTAs do not provide third-party relief.<sup>143</sup> But given the authorities set out above, that should be dismissed as erroneous, or at least, it does not represent the law in the UK if one applies the usual rules of legal reasoning. Of course, in tax avoidance the Courts may not apply the usual rules of legal reasoning.

A second reaction to the problem was ad hoc domestic law statutory provisions overriding 3<sup>rd</sup>-party DT relief, and there were a number of

---

140 62 TC 352. But the position for partnerships was later reversed by statute: see 82.24 (DT relief: Partnership).

141 [2017] UKFTT 279 (TC) at [90]-[92]. In the future the OECD hybrid-entity rule will cover this case: see 87.4.2 (OECD hybrid-entity rule).

142 *Canada v Sommerer* 2012 FCA 207 <http://www.canlii.org> This case concerned a Canadian provision similar to s.86 TCGA. A gain accrued to trustees who were treaty-resident in the foreign State. Under the Canadian tax legislation, the gain was deemed to accrue to the Canadian resident settlor. The Canadian Federal Court of Appeal held that the settlor could claim treaty relief under a treaty with a CG provision in OECD Model form.

143 See the Special Commissioner comments in *IRC v Willoughby* [1995] STC 143 at p.169; 103.22.5 (OECD Commentary CFCs).

examples of this in specific areas.<sup>144</sup>

What was needed was an amendment to DTAs. This was eventually achieved by the OECD Savings Clause, which is increasingly but not universally applicable.<sup>145</sup> This overrides third-party DT relief, and thus gives effect to the OECD Commentary view.

#### 103.21.4 *Third-party tax credit relief*

The position is the same for DTA tax credit. The position is the same for unilateral tax credit, because s.9(1) TIOPA allows “relief” or “credit” ie relief and credit for anyone. For examples, see:

SP 6/88 para 4 examples (ii)(iii) concerning company groups<sup>146</sup>  
36.19 (DT relief: Directors)

### 103.22 Characterisation

OECD Model articles deal separately with particular types of income, so it is necessary to classify the type of income which the taxpayer receives, ie to decide whether any particular item constitutes remuneration from an employment, or business income, or Other Income, etc.

The borderlines between different types of income are often difficult to draw, and that needs to be discussed in the context of each article. However deeming provisions raise particular challenges, and it is helpful to address that here as a discrete topic.

This question is particularly difficult in the context of third-party DT reliefs. The characterisation (or classification) of income in the hands of the UK resident is often a central question. I refer to this as the “**characterisation issue**”.

*Hughes v Bank of New Zealand*<sup>147</sup> concerned the domestic tax exemption for interest on FOTRA securities, not a DTA, but the issue of classification of income is not restricted to DT reliefs: it can arise wherever a rule applies to particular types of income. The taxpayer was a non-resident bank with a UK branch. The branch’s profit was taxable in the UK. The branch’s trading receipts included interest from FOTRA securities (exempt from UK tax in

144 For instance, third-party DT relief is restricted in the case of trading income: see 20.22.7 (3rd-party relief disapplied).

145 See 104.9.2 (OECD Model Savings Clause).

146 See 106.1 (Credit for foreign tax).

147 21 TC 472.

the hands of a non-resident). The FOTRA exemption applied.<sup>148</sup>

[*Hughes*] is authority for the proposition that exempt interest retains its character as interest even when it is taxable as a component element of the recipient's trading profits. ... Interest from exempt securities does not cease to be such by being included as a component element of the recipient's taxable profit.<sup>149</sup>

On the other side of the line, according to *Bricom*, is *IRC v Australian Mutual Provident Society*.<sup>150</sup> The taxpayer was a non-resident life assurance company with a UK branch. The branch's profit was taxable. The taxable profit was calculated in an unusual way: the relevant rule provided that an unidentifiable portion of the world-wide income of the company derived from the investment of its life assurance fund, calculated in accordance with a mathematical formula, should be charged to tax. It was held that the rule did not tax the company's investment income as such but something different, described as "a conventional sum"; that sum was not interest, even though interest from FOTRA securities constituted an element in the computation:

... the question turns on the nature of the statutory process... where tax is charged on a conventional or notional sum which exists only as the product of a calculation, the fact that one of the elements in the calculation is measured by reference to the amount of exempted income does not make the exempted income the subject of the tax: *Australian Mutual Provident Society*.<sup>151</sup>

The characterisation issue often arises in cases where third-party DTA relief is sought (though it is not restricted to such cases). There are two possibilities:

- (1)(a) Income arises to a person treaty-resident in a foreign State, which under the treaty cannot be taxed in the UK.
- (b) The *same* income is deemed to arise to a UK resident.

---

148 See 22.4.2 (Trading receipts/deductions).

149 *Bricom v IRC* 70 TC 272 at p.290.

150 28 TC 388 "as explained by Lord Radcliffe" in *Ostime v Australian Mutual Society* 38 TC 492.

151 *Bricom v IRC* 70 TC 272 at p.290..

- (2)(a) Income arises to a person treaty-resident in a foreign State, which under the treaty cannot be taxed in the UK.
- (b) *Different* income is deemed to arise to a UK resident: the deeming “changes the character” of the income

In case (1) DT relief applies and in case (2) it does not.

The facts of *IRC v Willoughby* offer an example of case (2):

- (1) A life assurance company was treaty-resident in the Isle of Man. The IoM DTA provided relief for the commercial profits of the company.
- (2) A UK resident was (in principle) subject to tax on the income arising to the life company from a premium he paid to the company for a policy.

The s.720 income on which the UK resident was taxed could not be characterised as the commercial profits of the life assurance company; the income was merely one (in the context of the whole, trivial) element by reference to which those profits were computed. This is the correct reason why the UK resident could not claim third-party DT relief.<sup>152</sup>

### 103.22.1 Approach to characterisation

Suppose:

- (1) Income accrues to A (“A’s actual income”).
- (2) A statutory provision (“the deeming provision”) provides that income is deemed to accrue to B (“B’s deemed income”).

The deeming provision may or may not change the character of the income, that is, B’s deemed income may or may not be a different type from A’s actual income. It is a question of construction of the deeming provision.

In straightforward cases, where B’s deemed income is exactly equivalent to A’s actual income, it is suggested that one should normally conclude that the legislation does not change the character of the income. That is, if there is a change in the character of the income, the legislation needs to say so expressly or by implication.

One reason that this is the case is that otherwise there may be a breach of the treaty. If a DTA provides income is exempt, parliament may breach the treaty in a straightforward manner and provide that the income is still

---

<sup>152</sup> Though this is not the way that the Special Commissioner dealt with the point: 70 TC 57 at p.90. The taxpayer wisely did not appeal on the DTA issue. The TAA provisions have since changed to exclude third-party relief in a s.720 case.

taxable. Parliament may also breach the treaty in a more subtle manner, by recharacterising the income and taxing it under its new name. However that may still be a breach of the treaty. DTAs are not construed so technically. While the UK can breach a treaty, tax legislation should be construed in a treaty-consistent manner where possible.

A second reason is that in a simple case where B's deemed income is exactly equivalent to A's actual income, there is no rational distinction to be drawn between A's income and B's deemed income.

The Canadian Supreme Court decision *R v Melford Developments* concerned the 1956 Canada/Germany DTA under which German residents were exempt from Canadian tax on (Canada source) industrial or commercial profits, but subject to tax on (Canada source) interest. Canada domestic law subsequently provided that interest included guarantee fees. The question was the characterisation of guarantee fees for the purposes of the DTA. The Revenue relied on (the equivalent of) OECD Model art 3(2) (that undefined terms have domestic law meanings).<sup>153</sup> But context showed that the domestic law meaning here did not apply for treaty purposes:

Laws enacted by Canada to redefine taxation procedures and mechanisms with reference to income not subjected to taxation by the Agreement are not, in my view, incorporated in the expression "laws in force" in Canada as employed [in the equivalent of OECD Model art 3(2)]. To read this section otherwise would be to feed the argument of the appellant, which in my view is without foundation in law, that subs. (2) authorizes Canada or Germany to unilaterally amend the tax Treaty from time to time as their domestic needs may dictate.<sup>154</sup>

### 103.22.2 *Bricom*

*Bricom v IRC* concerned a claim for third-party DT relief where:

- (1) Income accrued to a subsidiary company treaty-resident in a foreign State ("the CFC").
- (2) The parent company ("the parent") was UK-law UK resident and not treaty-resident in a foreign State.
- (3) The parent was subject to tax under the Controlled Foreign Company

---

<sup>153</sup> See 103.11 (Undefined treaty terms). Similar decisions were reached in *R v Associates Corporation of North America* 80 DTC 6094 and *Placements Serco v R* 84 DTC 6098.

<sup>154</sup> [1982] 2 SCR 504 at p.513 accessible <https://www.kessler.co.uk/tfd-archive>

(“CFC”) provisions.

Diagrammatically:

The CFC provisions operate in three stages:

Stage 1. *Ascertainment*: the CFC’s chargeable profits are ascertained.

Stage 2. *Apportionment*: the CFC’s chargeable profits (less creditable tax) are apportioned among its shareholders. In *Bricom* the CFC was wholly-owned by the parent, so all its chargeable profits were attributed to the parent.

Stage 3. *Assessment*: The parent is assessed on “a sum equal to corporation tax at the appropriate rate on that apportioned amount of profits” (less creditable tax) and the sum assessed is recoverable from the parent “... as if it were an amount of corporation tax chargeable on the parent”.

The Special Commissioners held that interest received by the CFC lost its character as interest at stage 1. Millett LJ disagreed:

It is ... a reflection of the Revenue’s unsuccessful argument in *Hughes*, viz: that interest from exempt securities loses its character as income by being included in the computation of the recipient’s trading profits.<sup>155</sup>

So far so good. But the interest lost its character at stage 2:

The correct analysis is that the interest received by [the CFC] is not included in the sum apportioned to the taxpayer on which tax is chargeable. It merely provides a measure by which an element in a conventional or notional sum is calculated, and it is that conventional or notional sum which is apportioned to the taxpayer and on which tax is charged.<sup>156</sup>

*Bricom* was on the wrong side of the distinction because “the chargeable profits” as defined are *a notional sum*. Why are they more notional than the profits of any company?

---

<sup>155</sup> 70 TC 272 at p.291.

<sup>156</sup> 70 TC 272 at p.291.

They do not represent any profits of [the CFC] on which UK corporation tax is chargeable, for there are no such profits.<sup>157</sup>

This is no doubt correct, but why is it relevant? The question is not whether the CFC income of the parent represents profits of the CFC *on which UK corporation tax is chargeable*. The question is whether it represents the profits of the CFC (or more accurately, whether its type is the same as those profits). The judgment then turns to this:

Nor do they represent any actual payments or receipts of [the CFC], whether of interest or anything else.

Why not?

They are merely the product of a mathematical calculation made on a hypothetical basis and making counterfactual assumptions.<sup>158</sup> The “chargeable profits” which are defined by s.747(6)(a) [ICTA] exist only as a measure of imputation. What is apportioned to the taxpayer and subjected to tax is not [the CFC’s] actual profits but a notional sum which is the product of an artificial calculation.

The fact that taxable profits are ascertained by a mathematical calculation does not by itself change the character of the profits. The amount of profits on which tax is charged is in every case the product of a mathematical calculation.<sup>159</sup>

*Bricom* is authority for two general propositions:

- (1) The application of DT reliefs requires that the income of the taxpayer is the same income as that which qualifies for relief. (This is self-evident and could not be doubted.)
- (2) The characterisation issue is a matter of construction of the relevant provisions.

*Bricom* is authority for a third, narrower proposition: The CFC provisions

---

157 70 TC 272 at p.289.

158 Millett wisely does not state what the hypothetical and counterfactual assumptions are: one must assume that the CFC is UK resident.

159 CGT is charged on gains less losses; IT is charged on total income; CT is charged on profits.

specifically did alter the character of the income received by the parent.<sup>160</sup> The CFC provisions are now in part 9A TIOPA, but the position has not changed.

In an earlier edition of this work it was suggested that the decision does not shed a great deal of light on the question of construction of other provisions. But following *Davies v HMRC*, I am less sure about that.

### 103.22.3 Four types of deeming

Tax provisions often use the word “deem” or its plain English equivalent, “treated as”. When considering the characterisation issue in relation to deeming provisions, it is important to bear in mind that there are (at least) four different fictions that deeming provisions may be used to achieve:

- (1) *Deeming which changes the recipient*: Statute may deem that although income actually arose to A, it is deemed to arise to B.
- (2) *Deeming which changes timing*: Statute may deem that although income actually arose at one time, it is deemed to arise at another time.
- (3) *Deeming which changes quantum*: Statute may deem that although the amount of income which actually arose to A was £x, it is deemed to be of a different amount, £y.
- (4) *Deeming which changes character*:
  - (a) Statute may deem that although income which actually arose was of type A, the taxpayer is deemed to receive income of another type (type B).
  - (b) Statute may deem that although what arises is gains, it is deemed to be income.
  - (c) Statute may deem that although no income or gains arise to anyone, the taxpayer is deemed to receive income or gains.

Case (1) does not by itself change the character of the income. This is (I think) self-evident, but there is authority:

Exempt income does not change its character or lose its exemption merely because it is deemed to be the income of another person or is imputed to him.<sup>161</sup>

---

<sup>160</sup> I do not consider how convincing is the reasoning, but note that in France the opposite view was reached: *Re Société Schneider Electric* (2002) 4 ITLR 1077 (Conseil d’État).

<sup>161</sup> *Bricom v IRC* 70 TC 272 at p.290 citing *Strathalmond v IRC* 48 TC 537.

The same applies if the UK provision apportions income to the taxpayer: “apportion” has the same meaning as “deems to accrue to” or “impute”.<sup>162</sup> The term “attribute” is also the same.<sup>163</sup>

Likewise in cases (2) and (3) DT reliefs will still apply.

In case (4)(a) DT relief applicable to type A income only (not type B income) will not exempt the taxpayer. Cases (4)(b)(c) need further consideration.

So the mere fact that the legislation uses the terminology or technique of deeming does *not* mean that DT reliefs cease to apply. One must ask what is the deeming, and in particular, is it deeming which changes the character of the income?

In *Huitson* the rule is correctly stated, but in pejorative terms:

[The DTA] issue has spawned a somewhat metaphysical debate as to whether the “notional” income under section 739 [ICTA, in my terminology, s.720 deemed income] is different from the “real” income in the hands of the foreign resident, so that taxation of the “notional” does not conflict with relief of the “real”.<sup>164</sup>

The debate should be no more metaphysical than any question raised by deeming provisions, which are very common in taxation; but it has perhaps been confused by an argument based on the words “an amount equal to”.

#### 103.22.4 *Amount equal to income*

In *Bricom*:

The taxpayer lays stress on the fact that what is apportioned under [the CFC rules] is not “a sum equal to the chargeable profits” but the chargeable profits themselves; and that the subject of the charge to tax in [the CFC rules] is not “a sum equal to the apportioned part of the chargeable profits” but the apportioned part of the chargeable profits itself.<sup>165</sup>

---

<sup>162</sup> *Bricom v IRC* 70 TC 272 at p.290.

<sup>163</sup> The terms “apportion” and “attribute” are used synonymously in s.3 TCGA; see 60.3 (s.3 gain attributed to participator).

<sup>164</sup> *Huitson (R, oao) v HMRC* [2010] STC 715 at [64]. The point was not discussed in the Court of Appeal.

<sup>165</sup> 70 TC 272 at p.289.

The distinction proposed is between

- (1) statutory provisions referring to “the profits”
- (2) statutory provisions referring to “an amount equal to the profits”

The taxpayer (it seems) raised this distinction but it did not help. The characterisation of income may be altered even though the statute does not use the expression “an amount equal to”. That is, the absence of that expression does not determine the characterisation issue. Conversely, the use of the expression “an amount equal to” does not conclude the characterisation issue. While it is apt to describe a change of character, it does not necessarily do so. The issue is one of construction, and must be decided in the context of the provisions as a whole. Indeed, a general distinction between income and “an amount equal to” the income strikes me as a distinction without a difference, a foolish distinction to introduce into tax jurisprudence, which is bound to lead to confusion, muddle and uncertainty.

#### 103.22.5 *OECD Commentary on CFCs*

The Commentary states on three occasions that the OECD Model is not intended to override CFC rules.

Article 7(1) OECD Model (business profits) provides:

1. Profits of an enterprise of a Contracting State shall be taxable only in that State ...

The Commentary provides:

14. The purpose of paragraph 1 is to limit the right of one Contracting State to tax the business profits of enterprises of the other Contracting State. The paragraph does not limit the right of a Contracting State to tax its own residents under controlled foreign companies provisions found in its domestic law even though such tax imposed on these residents may be computed by reference to the part of the profits of an enterprise that is resident of the other Contracting State that is attributable to these residents’ participation in that enterprise. Tax so levied by a State on its own residents does not reduce the profits of the enterprise of the other State and may not, therefore, be said to have been levied on such profits ...

This has been in the OECD Commentary since 2008.<sup>166</sup>

The same point is made in OECD Commentary on article 1, which concludes:

81 ...whilst some countries have felt it useful to expressly clarify, in their conventions, that controlled foreign company legislation did not conflict with the Convention, such clarification is not necessary. It is recognised that controlled foreign company legislation structured in this way is not contrary to the provisions of the Convention.

This is not mentioned in *Bricom*, but the Commentary, or the thinking behind it, lies behind the decision, on grounds which the reader may think unconvincing, that deemed CFC income of the parent is not of the same type as the income which accrues to the CFC abroad.

The result of *Bricom* may still strike the reader as unfair. That unfairness may have been a factor in the ECJ decision that the CFC legislation was not EU law compliant.<sup>167</sup>

Looking back on *Bricom*, after *Davies*, it seems to me that recharacterisation has been used as a method of avoiding third-party relief, in circumstances where the Court considers that the relief ought not to apply.

### 103.22.6 *Deemed classification*

The characterisation issue arose in *Fowler v HMRC*.<sup>168</sup> The taxpayer was an employed diver, whose employment was exercised in the UK, and so his remuneration was taxable in the UK under UK domestic law. He was treaty-resident in South Africa, but treaty relief under the employment income article did not apply.<sup>169</sup> However there is a special UK law rule for North Sea divers: for IT purposes their employment is treated as a trade.<sup>170</sup>

The taxpayer claimed treaty relief under the business profits article, on the basis that his income constituted business profits. The SC held that the

---

166 Inserted following OECD Report “The 2008 Update to the Model Tax Convention”. There was a trivial amendment in 2010, not relevant here.

A similar point is made in paragraphs 37 to 39 of the Commentary on art 10(5) (dividends), though that is not directly relevant in the UK as UK CFC rules do not work in the manner envisaged in those paragraphs.

167 See 102.14.1 (Permitted restriction on FoE).

168 [2020] UKSC 22.

169 See 36.2 (Employment income DT relief).

170 See 36.16.1 (Deemed non-employment).

deemed-trade fiction did not apply for treaty purposes so the income was not business profits and did not qualify for relief under that article. A number of reasons were given.

There were said to be some indications in the ITEPA wording, though the reader who studies them may regard this as less than decisive.

The application of the deemed-trade fiction to the DTA was said to be contrary to the purpose of the fiction:

If one asks, as is required, for what purposes and between whom is the fiction created, it is plainly not for the purpose of rendering a qualifying diver immune from tax in the UK, nor adjudicating between the UK and South Africa as the potential recipient of tax. It is for the purpose of adjusting the basis of a continuing UK income tax liability which arises from the receipt of employment income. Therefore to apply the deeming provision in section 15(2) so as to alter the meaning of terms in the Treaty with the result of rendering a qualifying diver immune from UK taxation would be contrary to its purpose...<sup>171</sup>

There is a risk in this line of argument, as there is in all purposive arguments, of firstly assuming the answer and then identifying the purpose to fit.

Next, and more fundamentally, the deemed-trade fiction was contrary to the purpose of the DTA:

34. Nor should article 3(2) of the Treaty be construed so as to bring a qualifying diver within article 7 [business profits] rather than article 14 [employment income]. To do so would be contrary to the purposes of the Treaty. This is because, as is recognised by article 2(1), the Treaty is not concerned with the manner in which taxes falling within the scope of the Treaty are levied. Section 15, understood in the light of section 6(5) of ITEPA, charges income tax on the employment income of an employed diver, but in a particular manner which includes the fiction that the diver is carrying on a trade.

It seems to me that art 2(1) does not shed much light on the issue.<sup>172</sup> There is however a sound argument in favour of the decision which is hinted in the above. Suppose one asks: should the deemed-trade fiction apply if it *disallowed* treaty relief, as opposed to conferring it? If so treaty relief could

---

171 At [15].

172 See 103.12.4 (Manner of levying tax).

be unilaterally disappplied by a State which provided by its domestic law that, say, a trade was to be treated as an employment. Suppose, for instance, that the facts of *Fowler* were reversed. Suppose:

- (1) The taxpayer was UK resident and UK treaty-resident.
- (2) The taxpayer traded as a diver in South Africa.

Under the treaty, the profits of the trade would be taxable in the UK and not in South Africa, under art 7 (business profits). But suppose South Africa domestic law said that the trade was deemed to be an employment, and so taxable in South Africa, under article 15, thus disapplying art 7. Would that allow South Africa to tax the profits? The OECD Commentary says that is not the case.<sup>173</sup> The South African deeming provision would not determine the question of whether there is an employment for the purposes of the treaty. (It may be that South Africa could breach the treaty, but that would be a matter of treaty override, not treaty interpretation.)

Although not cited, this conclusion is consistent with *Melford Developments* discussed above.

On this analysis *Fowler* was correctly decided, though not for the most clearly expressed or best reasons. Does it matter? Discuss! The analysis above might perhaps help those who study the decision and would remain otherwise puzzled.

### 103.23 Channel Islands/IoM DTAs

A protocol to the Jersey/UK DTA provides:

The Territories acknowledge that the United Kingdom continues to be responsible for the international relations of Jersey in international law. This Agreement cannot therefore create obligations which are binding under international law and is not intended to alter or affect the constitutional relationship between Jersey and the United Kingdom.

There is identical wording for Guernsey, IoM and Gibraltar.

The constitutional relationship between the Crown Dependencies and the UK raises deep questions. But this will not arise for day-to-day purposes of the DTA.

### 103.24 Pre-1963 DTAs

---

<sup>173</sup> See 36.9.8 (Limit on source State powers).

A few treaties survive from before the development of OECD Model. I refer to these as “**pre-1963 DTAs**”. The expression sometimes used is “colonial model”. This model was not published as such; the expression is used to refer to early UK DTA practice within the Commonwealth.

Pre-1963 DTAs survive in Greece and a few remote corners of the world:

Antigua (1947)	Malawi (1955)
Belize (1947)	Montserrat (1947)
Brunei (1950)	St Kitts & Nevis (1947)
Burma/Myanmar (1950)	Sierra Leone (1947)
Grenada (1949)	Solomon Islands (1950)
Greece (1953)	Tuvalu (1950)
Kiribati (1950)	

Notwithstanding variations in the wording of standard definitions, a multiplicity of concepts should be avoided or minimised so far as possible. It is suggested that the courts ought to have regard to the general international law understandings and where the context permits, construe pre-1963 DTAs to be consistent with the OECD Model. Otherwise we will never know much about the pre-1963 DTAs as there will never be the litigation to answer all the puzzles which could arise.

It would be a simplification if the pre-1963 DTAs could be updated to OECD Model wording. The 2018 Channel Islands/IoM DTAs are a step in the right direction.

### **103.25 The future**

CIOT say:

we suggest that after Brexit UK companies may want to see some existing treaties renegotiated because they:

- may suffer in relation to withholding tax, albeit at a reduced rate – for example on dividends paid from Germany/ Italy and royalties involving Luxembourg - compared to the current protection under the Parent/ Subsidiary and Royalties/ Interest Directives and in comparison to comparable payments within the EU in future.
- will lose the benefit of the Merger Directive and would, therefore, benefit from a new addition to Article 13 of the OECD Model for treaties with EU/EEA members that would extend the Merger Directive bilaterally.

We suggest that renegotiation of the UK's treaties with EU countries should be prioritised (and a strategy developed to demonstrate that, while the UK does not levy withholding taxes, it would still be in these countries' interest to seek to restore the 'pre-Brexit' fiscal outcomes).<sup>174</sup>

## CHAPTER ONE HUNDRED AND FOUR

# DTA ANTI-ABUSE RULES

104.1		compared
104.2.3	Avoidance: OECD Commentary	104.11.11 Beneficial owner in treaty State
104.11.3	Beneficial owner: Commentary	104.14.2 Subject to/liable: Ordinary meaning
104.11.5	Beneficial owner: agent/nominee	104.14.6 Subject to tax/Beneficial ownership compared
104.11.10	Beneficial owner/abuse	

### 104.1 DTA anti-abuse rules: Introduction

There are various types of DTA anti-avoidance rules:

<b>Rule</b>	<b>See para</b>
<i>Express DTA rules:</i>	
Principal purpose test	104.8
Savings Clause	104.9
Conduit arrangements	104.10
Beneficial ownership	104.11
Limitation on Benefits	105.1
Implied DTA anti-avoidance rule	104.6
<i>Domestic law anti-avoidance rules:</i>	104.5
The GAAR	
Treaty override provisions	

A full discussion of each rule requires a book to itself, and indeed several books on these topics have been written.

### 104.2 DTA title/preamble/purpose

The purpose of the OECD Model DTA, like the purpose of any legal document, should be construed from the DTA as a whole. However purpose may be stated expressly in the title, and/or in a preamble, and it

may be discussed in the OECD Commentary.

The wording of these has changed over time.

#### 104.2.1 1963/1977: Double taxation

The title in the 1963 Draft Model and the 1977 Model was:

Convention between (State A) and (State B) *for the avoidance of double taxation* with respect to taxes on income and on capital

So the purpose, or at least the main purpose, was the avoidance of double taxation.

#### 104.2.2 1992 form: Fiscal evasion

Subsequently, in 1992, the title of the OECD Model was amended to delete the reference to double taxation:

Convention between (State A) and (State B) with respect to taxes on income and on capital.

This reflected an understanding that the OECD Model was not just for the avoidance of double taxation. Instead, a footnote provided:

States wishing to do so may follow the widespread practice of including in the title a reference to either  
 [1] the avoidance of double taxation or  
 [2] to both the avoidance of double taxation and the prevention of fiscal evasion.

The UK followed approach [2] and the title to UK DTAs typically identified two purposes:

Agreement between [the UK and State X] *for the avoidance of double taxation and the prevention of fiscal evasion* with respect to taxes on income and on capital<sup>1</sup>

---

1 Sometimes the wording is set out, or repeated, in a preamble. For instance the UK/US DTA provides that the parties are:

“Desiring to conclude a new Convention for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on income and on capital gains”.

But the title itself is relevant to interpretation, see 103.9.1 (Context of treaties), so a recital using the same words does not add anything except, perhaps, emphasis.

The OECD Commentary did not discuss the meaning of “fiscal evasion”. The expression could be used to include avoidance/abuse as well as fraud;<sup>2</sup> but I would have thought it self-evident that the reference in the context of a DTA was to articles 26 (exchange of information) and 27 (assistance in the collection of taxes). The evasion countered by the DTA is non-payment of tax lawfully due.<sup>3</sup> But the Court of Appeal stretched the expression to make it include tax avoidance.<sup>4</sup>

### 104.2.3 Avoidance: OECD Commentary

Until 1977, OECD Commentary did not comment on avoidance or evasion.

In 1977 the following text was added:

7. The purpose of double taxation conventions is to promote, by eliminating international double taxation, exchanges of goods and services, and the movement of capital and persons; they should not, however, help tax avoidance or evasion. True, taxpayers have the possibility, double taxation conventions being left aside,<sup>5</sup> to exploit differences in tax levels between States and the tax advantages provided by various countries’ taxation laws, but it is for the States concerned to adopt provisions in their domestic laws to counter such manoeuvres. Such States will then wish, in their bilateral double taxation conventions, to preserve the application of provisions of this kind contained in their domestic laws.
